1894.

NEW SOUTH WALES.

**REGISTRAR-GENERAL'S DEPARTMENT.**

(RETURNS UNDER THE SEVERAL ACTS OF PARLIAMENT ADMINISTERED BY THE REGISTRAR-GENERAL FOR THE YEAR ENDED 31 DECEMBER, 1893.)

Presented to Parliament by Command.

**I.—DEEDS BRANCH.**

No. 1.—CONVEYANCES, Assignments, Leases, and Miscellaneous Deeds Registered under "Deeds Registration Act" (7 Vic. No. 16) during the year 1893.

| Conveyances (absolute). |                          | Assignment (absolute)—Leasehold Estates. |                        | Lease—Period exceeding three years. |                        | *Miscellaneous Deeds. |
|-------------------------|--------------------------|--|------------------------|-------------------------------------|------------------------|-----------------------|
| Number.                 | Amount.                  | Number.                                  | Amount.                | Number.                             | Annual Rental.         | Number.               |
| 6,072                   | £ s. d.<br>2,317,777 5 2 | 308                                      | £ s. d.<br>122,486 6 1 | 248                                 | £ s. d.<br>157,581 0 6 | 1,938                 |

\* Miscellaneous Deeds embrace all documents where valuable consideration is not stated, such as Deeds of gift, Assignments for benefit of creditors, Settlements, Powers of attorney, Notifications of resumptions, Conditional purchases with nominal consideration, Writs of execution, &c., &c.

No. 2.— MORTGAGES on Land Registered under "Deeds Registration Act" (7 Vic. No. 16).

| Lent on Town Lands. |                           | Lent on Suburban Lands. |                         | Lent on Town and Country and Town and Suburban Lands. |                          | Lent on Country Lands. |                           | Total.            |                          |
|---------------------|---------------------------|-------------------------|-------------------------|---|--------------------------|------------------------|---------------------------|-------------------|--------------------------|
| No. of Mortgages.   | Amount.                   | No. of Mortgages.       | Amount.                 | No. of Mortgages.                                     | Amount.                  | No. of Mortgages.      | Amount.                   | No. of Mortgages. | Amount.                  |
| 1,286               | £ s. d.<br>1,313,760 17 5 | 1,100                   | £ s. d.<br>730,340 14 9 | 464   | £ s. d.<br>540,073 15 10 | 6,501                  | £ s. d.<br>4,849,853 18 0 | 9,351             | £ s. d.<br>7,434,029 6 0 |

NOTE.—In many instances the amounts lent upon mortgage by the Banks are not stated, but simply the words "valuable consideration" or "cash credit" inserted in the deed. As this occurs frequently when the properties mortgaged are evidently of great value, the absence of the amounts must materially affect the returns.

No. 3.—DISCHARGES, Conveyances under Mortgage, and Transfers of Mortgages on Land under "Deeds Registration Act" (7 Vic. No. 16).

| Discharges of Mortgages on Land. |                           | Conveyances under Mortgage. |                        | Transfers of Mortgages on Land. |                          |
|----------------------------------|---------------------------|-----------------------------|------------------------|---------------------------------|--------------------------|
| Number.                          | Amount.                   | Number.                     | Amount.                | Number.                         | Amount.                  |
| 3,338                            | £ s. d.<br>1,864,020 15 5 | 430                         | £ s. d.<br>216,925 2 6 | 363                             | £ s. d.<br>276,507 13 10 |

NOTE.—In many instances the amounts under the above headings are not stated, consequently the returns are, so far, incomplete.

## No. 4.— PREFERABLE Liens on Wool and Mortgages on Live Stock, registered under 11 Vic. No. 4.

| Preferable Liens on Wool. |               |                        | Mortgages on Live Stock. |               |                       |                        |                         |
|---------------------------|---------------|------------------------|--------------------------|---------------|-----------------------|------------------------|-------------------------|
| No. of Liens.             | No. of Sheep. | Amount of Liens.       | No. of Mortgages.        | No. of Sheep. | No. of Horned Cattle. | No. of Horses.         | Amount Lent.            |
| 2,257                     | 13,204,407    | £ 1,935,660 s. d. 8 11 | 2,270                    | 8,357,014     | 227,531               | 24,241 and 245 camels. | £ 3,176,724 s. d. 19 11 |

In addition to above there were 25 discharges of wool liens registered, representing £33,930 19s. 2d., also 11 transfers of mortgages. N.B.—When any sum has been secured, both by a lien on the wool and by a mortgage of the sheep, the amount is included under the head of mortgages only. Thus in 1893 the gross amount lent on liens was £2,068,098 10s. 5d.; but from this has to be deducted the sum of £132,438 1s. 6d., secured both by lien on the wool and mortgage on the sheep, and included in the figure in the last column, so that the net amount lent on lien was £1,935,660 8s. 11d.

## No. 5.— DISCHARGES of Mortgages on Live Stock, registered under 11 Vic. No. 4.

| Number. | Transfer of Mortgages. | Agreements. | Deeds of Confirmation. | Further Assurances. | Amount.                |
|---------|------------------------|-------------|------------------------|---------------------|------------------------|
| *286    | 37                     | 6           | 2                      | 2                   | £ 1,062,826 s. d. 12 1 |

## No. 6.— LIENS on Growing Crops, registered under 26 Vic. No. 10.

| Number. | Discharges of Liens. | Amount.             |
|---------|----------------------|---------------------|
| 1,789   | 4                    | £ 159,007 s. d. 1 9 |

## No. 7.— MISCELLANEOUS.

| Searches.               |  | Certified Copies issued. |        |               | Deposited Wills. |
|-------------------------|--|--------------------------|--------|---------------|------------------|
| At 2s. 6d. Real Estate. | At 1s.—Live Stock, Wool, Crops, and Wills. | Grants.                  | Deeds. | Extra Folios. |                  |
| 6,332                   | 10,947                                     | 812                      | 363    | 5,500         | 22               |

NOTE.—Total fees received, Deeds, &c. (Returns 1 to 7) ... .. £8,844 15s. 8d.

## No. 8.— REGISTRATIONS, &amp;c., under Public Companies Act, 37 Victoria No. 19.

| New Companies Registered. | Companies wound up. | Declarations, Statements, &c., that certain Companies have become defunct. | Summaries and Lists of Shareholders, Notices of Registered Office and other facts registered. | Searches. | Certified Copies issued. | Total Fees.        |
|---------------------------|---------------------|--|---|-----------|--------------------------|--------------------|
| *77                       | 74                  | 156  | 943   | 739       | 95                       | £ 1,122 s. d. 14 6 |

\* Of these there were 4 old Companies incorporated by Act of Parliament or Charter registered for purposes of winding up, under clause 224 of Public Companies Act.

## No. 9.— REGISTRATIONS, &amp;c., under No Liability Mining Act, 44 Victoria, No. 23.

| New Companies registered. | Fees.          |
|---------------------------|----------------|
| 15                        | £ 0 s. d. 15 0 |

## No. 10.— REGISTRATIONS, &amp;c., under Trade Marks Act, 28 Victoria No. 9.

| Applications lodged. | Applications granted. | Applications refused. | Applications withdrawn. | Trade Marks transferred. | Searches. | Certified Copies issued. | Total Fees.        |
|----------------------|-----------------------|-----------------------|-------------------------|--------------------------|-----------|--------------------------|--------------------|
| 331                  | 304                   | 24                    | 3                       | 63                       | 385       | 11                       | £ 1,070 s. d. 15 6 |

Grand total fees—Deeds Branch (Returns 1 to 10) ... .. £13,458 15s. 8d.

CHARLES PINHEY,  
Registrar-General.  
II.—

II.—LAND TITLES BRANCH.

No. 1.—RETURN of the Number of Applications, with amount of Fees, &c., under the Real Property Act, 26 Vic., No. 9, from 1st January to 31st December, 1893.

| Months.    | No. of Applications. | No. of Properties. | Area.                                |  | Value.      | Fees.      |                |              |               |           |         |

## V.—SUMMARY.

I.—*Deeds Branch.*

THE returns of the Deeds Registration Office for the year 1893 present the following results:—There were registered a total of 22,068 Deeds affecting land, representing 6,072 Conveyances, with a value of £2,317,777; 308 Assignments of leases, of the value of £122,486; 248 Leases, of the value of £157,581; together with 7,740 Transfer of Conditional purchases; and 1,938 miscellaneous Deeds, where no consideration was stated. There were 9,351 Mortgages over town, suburban, and country lands, representing a value of £7,434,029, registered during 1893, whilst 3,338 Discharges of mortgages were registered releasing £1,864,020; 430 Conveyances under mortgage, representing £216,925, and 383 Transfers of Mortgage in consideration of £276,507. There were 2,257 preferable Liens on wool registered over 13,204,407 sheep, in consideration of £1,935,660, in addition to 36 Transfers and Discharges of liens. Of Mortgages on Cattle registered there were 2,270 over 8,357,014 sheep, 227,531 cattle, 24,241 horses, and 245 camels, representing £3,176,724; whilst there were 286 Discharges deposited, releasing £1,062,826, and 47 other dealings therewith. The Liens on growing crops lodged for registration numbered 1,789 for £159,007, together with 4 Discharges thereof. Search fees paid numbered 6,332, at 2s. 6d. (Real Estate), 10,947 at 1s. (live stock, crops, &c.) 1,175 certified copies of Deeds and grants were issued with 5,560 extra folios. Wills deposited numbered 22. Total fees, Deeds, &c., £8,844 15s. 8d.

Under the Limited Liability Companies Act 73 new companies were registered, in addition to 4 others registered for the purpose of winding up only; and 943 returns, &c., were furnished during 1893 by those already in existence. The Limited Companies registered as having been wound up or declared to be defunct during the year number 230. The No-Liability Mining Act had 15 new companies added to the list of those already registered. Searches Public Companies numbered 739. Certified copies, 95. Total fees (Public Companies), £1,123 9s. 6d.

There were 331 Trade Marks applied for, 304 were registered, 24 refused, and 3 withdrawn; in addition to which there were 63 trade marks transferred. Searches, 385. Certified copies issued, 11. Total fees (Trade Marks), £1,070 15s. 6d.

In addition to the above, numerous miscellaneous documents were registered in connection with the Titles to Land Act of 1858, Bank Act, the Old Public Companies Act, and several other Acts of Parliament wholly or partially administered in this Office.

The fees of office received by the Registration of Deeds Branch in 1893 totalled £10,739 0s. 8d., in addition to the sum of £2,719 15s. 0d. credited by the Treasury to this office for the Registration of Conditional Purchases. Grand total of fees, Deeds Branch, £13,458 15s. 8d.

II.—*Land Titles Branch.*

The returns under the Real Property Act, 26 Vic. No. 9 (Torrens' Act), furnish the following information:—During the year 294 Applications to bring 421 properties under the Real Property Act were lodged. They represented 957 acres 2 roods 27½ perches of town and suburban lands and 44,041 acres 2 roods 9½ perches of country lands, of the total value of £962,413, the fees of office paid thereon amounting to £3,318 1s. 4d. There were 2,600 Grants recorded during 1893, comprising 1,154 acres and 10½ perches town and suburban and 252,786 acres 3 roods 18½ perches country lands, the purchase moneys totalling £306,842 8s. 9d. with payments on account of Assurance Fund, amounting to £651 19s. 3d. The aggregate area of land under these provisions of this Act on 31st December last was 17,490,626 acres 1 rood 26½ perches of the total declared value (at the date of application and grant respectively) of £36,679,650 18s. 11d. Of the 18,467 Memorials registered there were 8,418 transfers for a total consideration of £2,532,211; 4,704 Mortgages securing the sum of £6,034,324; and 2,661 Discharges of mortgages releasing £1,927,794. There were in addition to these, 5,796 New Certificates issued and 18,339 extra endorsements (after the first) entered, whilst the total fees of office collected under this head (memorials, &c.) amounted to £18,400 2s. 10d.

5,166 Searches against titles were made by the public in this Branch during 1893, viz.:—4,640 single and 526 general searches.

There were also 99 certified copies issued, with 587 extra folios thereon. Deposited plans of sub-divisions numbered 151.

Total fees for Land Titles Branch, £27,095 9s. 6d.

III.—*Births, Deaths, and Marriages Branch.*

The registrations in this Branch during the year 1893 were:—Births, 40,212—20,781 males and 19,431 females; deaths, 16,042—9,319 males and 6,723 females; marriages, 7,744. These were distributed as to locality as follows:—Births—City of Sydney, 3,329; suburbs, 10,574; country districts, 26,309. Deaths—City of Sydney, 2,053; suburbs, 4,449; country districts, 9,540. Marriages—City of Sydney, 1,656; suburbs, 1,727; country districts, 4,361. 2,773 certified copies were issued and 993 searches made. Total fees for this Branch, £510 10s.

IV.—*Total Fees for the whole Department for 1893.*

## Commission.

VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland, Queen,  
Defender of the Faith, and so forth.

To our trusty and well-beloved

GRANTLEY HYDE FITZHARDINGE, Esquire, District Court Judge for the Northern District of our  
Colony of New South Wales,—

Greeting:—

KNOW you, that we, reposing great trust and confidence in your ability, zeal, industry, discretion, and integrity, do, by these presents, authorise and appoint you to make a diligent and full inquiry into the working of the Deeds and Search Branch of the Registrar-General's Department. And we do, by these presents, grant to you full power and authority to call before you all such persons as you may judge necessary, by whom you may be better informed of the truth in the premises, and to require the production of all such books, papers, writings, and all other documents as you may deem expedient, and to visit and inspect the same at the offices or places where the same or any of them may be deposited, and to inquire of the premises by all lawful ways and means: And we do give you power at your discretion to procure such clerical and other assistance as you may deem necessary for enabling you duly to execute this our commission: And our further will and pleasure is that you do, within one month after the date of this our commission, certify to us, in the office of our Colonial Secretary, under your hand and seal, what you shall find touching the premises: And we hereby command all Government officers and other persons whomsoever within our said Colony, that they be assistant to you in the execution of these presents: And we do hereby declare this our Commission to be a Commission for all purposes of the Act 44 Victoriae No. 1, intituled "*An Act to regulate the taking of Evidence by Commissioners under the Great Seal.*"

In testimony whereof, we have caused these our letters to be made patent, and the Great Seal of our said Colony of New South Wales to be hereunto affixed.

Witness our Right Trusty and Well-beloved Councillor, SIR ROBERT WILLIAM DUFF, a Knight Grand Cross of our Most Distinguished Order of Saint Michael and Saint George, our Governor and Commander-in-Chief of our Colony of New South Wales and its Dependencies, at Government House, Sydney, in New South Wales aforesaid, this eleventh day of October, in the fifty-seventh year of our Reign, and in the year of our Lord one thousand eight hundred and ninety-three.

R. W. DUFF.

By His Excellency's Command,  
GEORGE R. DIBBS.

Entered on record by me, in REGISTER OF PATENTS No. 15, page 316, this eleventh day of October, one thousand eight hundred and ninety-three.

For the Colonial Secretary and Registrar of Records,  
CRITCHETT WALKER,  
Principal Under Secretary.

## LETTER OF INSTRUCTIONS.

The Principal Under Secretary to The Commissioner.

Sir,

Chief Secretary's Office, Sydney, 11 October, 1893.

I am directed by the Chief Secretary to inform you that His Excellency the Governor, with the advice of the Executive Council, has been pleased to appoint you to make a diligent and full inquiry into the working of the Deeds and Search Branch of the Registrar-General's Department, and to transmit herewith the instrument that has been prepared in your favour accordingly.

2. I am desired to add that you will be provided with such clerical and other assistance as may be deemed necessary for enabling you to execute the Commission; and to enclose for your information extracts from the *Sydney Morning Herald* of the 19th, 20th, 21st, and 22nd ultimo, containing a report of the case *Campbell v. Anglo-Australian Investment Finance and Land Company (Limited)*.

I have, &c.,

CRITCHETT WALKER,

Grantley Hyde Fitzhardinge, Esquire, District Court Judge.

Principal Under Secretary.

## EXTENSION OF COMMISSION.

ROYAL COMMISSION to inquire into the working of the Deeds and Search Branch of the Registrar-General's Department.

WHEREAS it is necessary to extend the time by which the Commissioner is to make his report in the above matter: Now, therefore, I do hereby, with the advice of the Executive Council, extend the time within which the said Commissioner is to make such report to and for a period of one month beyond the time in and by the aforesaid Commission appointed for such purpose, to take effect from the 11th instant.

Given under my hand at Government House, Sydney, this fourteenth day of November, one thousand eight hundred and ninety-three.

By deputation for His Excellency,

FREDK. M. DARLEY,

Lieut.-Governor, 14/11/93.

By His Excellency's Command,  
GEORGE R. DIBBS.

ROYAL COMMISSION ON DEEDS AND SEARCH BRANCH, REGISTRAR-  
GENERAL'S DEPARTMENT.

MINUTES OF MEETINGS.

APPENDED are the minutes of the proceedings of the Royal Commission, appointed on 11th October, 1893, to inquire into and report upon the working of the Deeds and Search Branch of the Registrar-General's Department.

THURSDAY, 12 OCTOBER, 1893.

PRESENT :—

His Honor Judge Fitzhardinge.

At this preliminary meeting, arrangements were made for the mode of procedure to be followed in executing the terms of the Commission :—

The Commission was read.

A letter from the Chief Secretary, appointing Mr. T. D. Elwell as secretary and shorthand-writer to the Commission, was also read.

It was resolved that evidence should be taken daily (Saturdays excepted) whenever practicable, the Commission to open at 10 a.m., and the last witness for the day to be called at 3 p.m.

[The Commission adjourned until the following morning at 10 o'clock.]

FRIDAY, 13 OCTOBER, 1893.

PRESENT :—

His Honor Judge Fitzhardinge.

The following witnesses were examined :—

Charles Hart Townley Pinhey, Registrar-General of the Colony of New South Wales.

Alfred Parry Long, Senior Examiner, Registrar-General's Department.

The Commissioner, accompanied by his Secretary, at noon, paid an official visit to the Search Room of the Deeds Branch in the Registrar-General's Department.

[The Commission adjourned until 10 a.m. on Monday, 16th October.]

MONDAY, 16 OCTOBER, 1893.

PRESENT :—

His Honor Judge Fitzhardinge.

Correspondence read and passed.

The witnesses examined were :—

William Alexander Abbott, Deputy Registrar of Deeds, Registrar-General's Department.

Henry Wheeler Gillam, Deputy Registrar of Deeds, Registrar-General's Department.

[Commission adjourned *sine die*, His Honor the Commissioner having to leave Sydney to preside over a District Court to be opened at Goulburn on the following day.]

FRIDAY, 20 OCTOBER, 1893.

PRESENT :—

His Honor Judge Fitzhardinge.

Correspondence read and passed.

Letter received from Chief Secretary, approving of the sum of £5 being placed at the disposal of the Commissioner.

[Commission adjourned until following Monday at 10 a.m.]

MONDAY, 23 OCTOBER, 1893.

PRESENT :—

His Honor Judge Fitzhardinge.

Correspondence read and passed.

The witnesses examined were :—

Robert Mead Pearson, Principal Draftsman, Registrar-General's Office.

Henry Charles Edwin Newcombe, Deputy Registrar-General, Land Titles Office, Registrar-General's Department.

William Wentworth Bucknell, clerk in the Branch for the Registration of Births, Deaths, and Marriages, Registrar-General's Department.

Patrick Madden, Anatomical Bootmaker, 180 Dowling-street.

Wilfred de Courcy Lewis, Assistant Principal Draftsman, Registrar-General's Department.

J. T. O'Brien was engaged as messenger from this date until following Friday.

[The Commission adjourned until following morning at 10 o'clock.]

TUESDAY

TUESDAY, 24 OCTOBER, 1893.

PRESENT :—

His Honor Judge Fitzhardinge.

Correspondence read and passed.

The witnesses examined were :—

Edmund Conroy Hopkins, Clerk in the Branch for the Registration of Births, Deaths, and Marriages, in Registrar-General's Department.

George William Hill, Book-porter, Deeds Branch, Registrar-General's Department.

Christopher Williams Campion Hatton, Searcher, Registrar-General's Department.

Edwin Augustus Cleeve Smith, Examiner, Registrar-General's Department

Harry Bingham Thomas, Examiner, Registrar-General's Department.

Charles Hardwick Keele, Deputy Registrar-General, Land Titles Office, Registrar-General's Department.

Henry John Noble, Accountant, Registrar-General's Department.

[The Commission adjourned until 10 o'clock following morning.]

WEDNESDAY, 25 OCTOBER, 1893.

PRESENT :—

His Honor Judge Fitzhardinge.

Correspondence read and passed.

The witnesses examined were :—

Herbert Chappel, Land Agent, 158, Pitt-street.

Harry George Davy, Conveyancer.

Wilshire John Machen, Law Clerk to the firm of Macnamara and Nathan, Solicitors.

John Booth, Clerk, Security Branch, Bank of New South Wales.

George Hellings, Law Clerk to the firm of Thompson, Minter, and Simpson, Solicitors.

Edward Henry Pownall, Search and Registration Clerk, Registrar-General's Department.

Charles Henry Mallon, Search-clerk, Land Titles Office, Registrar-General's Department.

Phillip Kelly, Crown Solicitor's Office.

[The Commission adjourned until 10 o'clock on the following morning.]

THURSDAY, 26 OCTOBER, 1893.

PRESENT :—

His Honor Judge Fitzhardinge.

Correspondence read and passed.

The witnesses examined were :—

Arthur A. Hiddilston, Clerk in Account Branch, Registrar-General's Department.

George Lilley, Messenger and Caretaker, Registrar-General's Department.

Thomas Apdaile Charlton, of the firm of John Dawson and Son.

James Lyon Spark, Draftsman, Registrar-General's Department.

Marland Clarke Cowlshaw, of the firm of Cowlshaw Bros., Macquarie-place.

[The Commission adjourned until 10 o'clock on the following morning.]

FRIDAY, 27 OCTOBER, 1893.

PRESENT :—

His Honor Judge Fitzhardinge.

The Commissioner visited the Deed and Search Room in the Registrar-General's Department. While within the enclosure set apart for the use of Mr. Henry Wheeler Gillam, the officer-in-charge of that section in the Department, Mr. Gillam produced for inspection a bound volume known as "No. 1," containing copies of grants, leases of land, &c. It appeared that the first seven grants originally in this volume had become decayed from old age and frequent use. The seven grants not visible in the volume were said to have been copied on brief-sized paper, but not bound. The copies referred to were afterwards produced. These, it was stated, are kept in a drawer in the room. There was also produced Grant Register No. 4, containing copies of grants and leases of land from the 11th of April, 1809, to the 30th of December, 1809. Another volume submitted for inspection was Register No. 5, dealing with grants dated from the 1st of January, 1810. This volume had been rebound and repaired about six months ago. The Commissioner also examined a book of search tickets in current use. The Commissioner visited the Record Room of the Land Titles Office. The system of searching was fully explained by Mr. Newcombe, who also accompanied the Commissioner through the vaults beneath, in which titles and deeds are stored. It was pointed out that there are a number of dealings both bound and unbound. The Commissioner also inspected the public room and the bookbinding branch of the Land Titles Office.

The witnesses examined the same afternoon at the Board Room, Colonial Secretary's Office, were :—

Daniel Nightingale, Law Stationer, of 91, Elizabeth-street ;

Victor Ernest Sutherland, Architect, Mount Arcadia, Parramatta.

[The Commission adjourned until 10 a.m. on the following Monday morning.]

MONDAY,

MONDAY, 30 OCTOBER, 1893.

PRESENT :—

His Honor Judge Fitzhardinge.

Correspondence read and passed.

The witnesses examined were :—

Joseph Augustus Doyle, Solicitor.  
George Frederick Rowley Burcher, Solicitor.  
Charles John Muddle, Conveyancer.  
Thos. George Drysdale, Law Clerk.  
Arthur Edward Reeve, Clerk, Registrar-General's Department.  
Fredk. McKern, Clerk-in-Charge of Deeds Branch, Lauds Department.  
James E. Hanigan, Law Stationer, of the firm of Reed and Hanigan.

[The Commission adjourned until 10 o'clock on the following morning.]

TUESDAY, 31 OCTOBER, 1893.

PRESENT :—

His Honor Judge Fitzhardinge.

Correspondence read and passed.

The witnesses examined were :—

Charles Jackson Campbell, Land Agent, Lyndhurst Chamber, Elizabeth-street.  
Andrew Walter Irlly Macansh, Solicitor, of the firm of Fisher, Ralfe, and Macansh.  
John Urquhart, Solicitor, Pitt-street.  
Robert Roberts, Bookbinder, Kent-street.  
Henry Massey Makinson, Solicitor, of the firm of Ellis, Makinson, and Plunkett.  
John Archibald Aitken, Solicitor, Castlereagh-street.  
George Colquhoun, Solicitor, of the firm of Allen and Allen.

[The Commission adjourned until 10 o'clock on the following morning.]

WEDNESDAY, 1 NOVEMBER, 1893.

PRESENT :—

His Honor Judge Fitzhardinge.

Correspondence read and passed.

The witnesses examined were :—

Ambrose Knight Doyle, Law Stationer and Searcher, Elizabeth-street.  
Mary Stedman, Wardell Road, Marrickville.  
Charles F. Rogers, Law Clerk to Fisher, Ralfe, and Macansh.  
Charles Louis Tange, Solicitor, Bond-street.

[The Commission adjourned until 10 o'clock the following morning.]

THURSDAY, 2 NOVEMBER, 1893.

PRESENT :—

His Honor Judge Fitzhardinge.

Correspondence read and passed.

The witnesses examined were :—

Donnolly Fisher, Solicitor, of the firm of Fisher, Ralfe, and Macansh.  
Edmund Conroy Hopkins re-called.

*Afternoon Sitting at the Registrar-General's Office.*

Christopher Williams Champion Hatton re-called.  
William Lachlan C. Dawes, Chief Clerk, Births, Deaths, and Marriages Branch.  
Osterley Lindsay Thompson, Search Clerk, Births, Deaths, and Marriages Branch.  
George Evans, Solicitor.  
Robert Mead Pearson re-called.

[The Commission adjourned until 10 o'clock the following morning.]

FRIDAY, 3 NOVEMBER, 1893.

PRESENT :—

His Honor Judge Fitzhardinge.

Correspondence read and passed.

The witnesses examined were :—

Frank Osborne, Solicitor, of the firm of Norton, Smith, & Co.  
Henry Burton Bradley, Solicitor.  
Alfred John Cape, Solicitor, of the firm of Cape, Kent, and Gaden.  
Patrick William Creagh, Solicitor, of the firm of Creagh and Williams.  
John Dawson, Solicitor, of the firm of John Dawson and Son.  
Alfred Macalpine Helmsley, Solicitor, of the firm of Levy, Helmsley, and Perkins.  
William Hilson Pigott, Solicitor, and Member of the Legislative Council of New South Wales.  
Henry Wheeler Gillam re-called.  
William Wentworth Bucknell re-called.

[The Commission adjourned until the following Monday at 10 a.m.]

MONDAY,

**MONDAY, 6 NOVEMBER, 1893.**

PRESENT :—

His Honor Judge Fitzhardinge.

Correspondence read and passed.

The witnesses examined were :—

Thomas Kenyon, Law Stationer.

James Pickering, Fencer and Carpenter, Peakhurst.

Charles Hardwick Keele, Registrar-General's Department, re-called.

Charles Hart Townley Pinhey, Registrar-General, re-called.

Charles Jackson Campbell further examined.

[The Commission adjourned until 10 o'clock the following morning.]

**TUESDAY, 7 NOVEMBER, 1893.**

PRESENT :—

His Honor Judge Fitzhardinge.

Correspondence read and passed.

The witnesses examined were :—

Robert Mead Pearson, Registrar-General's Department, re-called.

Henry Charles Edwin Newcombe, Registrar-General's Department, re-called.

[The Commission adjourned until following morning at 10:30 a.m.]

**WEDNESDAY, 8 NOVEMBER, 1893.**

PRESENT :—

His Honor Judge Fitzhardinge.

Correspondence read and passed.

The witness examined was :—

James Norton, Solicitor, and Member of Legislative Council of New South Wales.

[The Commission adjourned until the following Friday at 10 a.m.]

**FRIDAY, 10 NOVEMBER, 1893.**

PRESENT :—

His Honor Judge Fitzhardinge.

Correspondence read and passed.

Evidence already taken arranged, and exhibits to be printed decided upon.

Resolved to write to Colonial Secretary, asking for an extension of time for one month until 11th December, in which to submit to His Excellency the Governor the report on the inquiry.

[Commission adjourned *sine die*, His Honor the Commissioner having to go on circuit in the Southern Districts of the Colony.]

**MONDAY, 20 NOVEMBER, 1893.**

PRESENT :—

His Honor Judge Fitzhardinge.

Correspondence read and passed.

Letter received from Colonial Secretary, announcing that the request for an extension of the duration of the Commission until 11th December had been granted.

The witness examined was :—

Herbert Chappel, Land Agent, recalled.

[This concluded the taking of evidence.]

**ROYAL COMMISSION ON DEEDS AND SEARCH BRANCH, REGISTRAR-  
GENERAL'S DEPARTMENT.**

---

**REPORT.**

---

To His Excellency the Right Honorable Sir ROBERT WILLIAM DUFF, a member of Her Majesty's Most Honorable Privy Council, Knight Grand Cross of the Most Distinguished Order of Saint Michael and Saint George, Governor and Commander-in-Chief of the Colony of New South Wales and its Dependencies.

MAY IT PLEASE YOUR EXCELLENCY,—

I, the Commissioner appointed by Your Excellency, on the 11th day of October, 1893, to make a diligent and full inquiry into the working of the Deeds and Search Branch of the Registrar-General's Department, have the honor to submit the following report:—

The conclusions at which I have arrived are set out, followed by suggestions, and my reasons for those conclusions and suggestions.

From the evidence I find as follows:—

- (1.) The business in the "Record and Search Room" of the Registrar-General's Department (generally called the Search Room) had been, before March, 1890, conducted in a loose and slovenly manner.
- (2.) The indices before that date, and since, have been carelessly compiled, and more carelessly written.
- (3.) Of the grant registers one is partly destroyed.
- (4.) The supervision over persons searching was nominal only.
- (5.) The supervision was so lax that one register was mutilated, and not anything was known of the mutilation until portion of the register was found upon a person under arrest at Newcastle.
- (6.) No register has, at any time, been lost or mislaid.
- (7.) Many of the clerks in the Registrar-General's Department "searched" for their own purposes.
- (8.) Of those clerks one, Edmund Conroy Hopkins, searched very frequently; and yet more frequently employed a professional "Searcher."
- (9.) Hopkins, on some occasions, sold, and on many occasions attempted to sell, the information so gained from the registers and official documents.
- (10.) In the result of some of those "speculations" another clerk, William Wentworth Bucknell, was, and is, interested.
- (11.) Bucknell also obtained information from the registers.
- (12.) Hopkins was, and is, interested with a firm of land jobbers, Messrs. Chappel and Campbell, who seem to traffic in titles, and in properties to which the titles are questionable.
- (13.) Bucknell is also, to some extent, interested in the fortunes of Chappel and Campbell.
- (14.) Hill, the book-porter, had the interests of his friends more at heart than the safety of the registers.
- (15.) The conduct of the business in the "Search Room" has much improved since March, 1890, when the present Registrar-General was appointed.
- (16.) General searching by clerks in the department has been almost stopped.
- (17.) The supervision has been slightly improved.
- (18.) The "Search" Room is so very full of registers, etc., that it is altogether unsuitable for its original purpose.
- (19.) The public are allowed, by the Registration of Deeds Act, to inspect all documents registered.
- (20.) That it has always been the custom to allow persons so inspecting (or searching) to take extracts from the documents inspected.

(21.)

(21.) Such a custom is certain, reasonable, and universal.

My suggestions are as follow: That

- (1.) The old grant registers be copied in typewriting, and that the public be allowed to inspect such copies only.
- (2.) All documents tendered for registration be type-written, so as to minimise the risk of alteration.
- (3.) That duplicates be tendered, filed, and bound in duplicate registers of all such documents.
- (4.) That the contents of the registers now in existence be copied in typewriting, and the public be allowed to inspect such copies only.
- (5.) A catalogue, or inventory, of all books, registers, indices, etc., in the Record Room be at once prepared in duplicate, one copy to be lodged with the clerk in charge of the Deeds Branch of the Lands Office.
- (6.) The desks of some of the clerks in the Search Room be removed as close as possible to the entrance door, so that the registers may be the better guarded and supervision over those searching improved.
- (7.) That Mr. Edmund Conroy Hopkins be removed from the Service.
- (8.) That Mr. William Wentworth Bucknell be disrated and be warned to sever his connection with any land jobber or firm of land jobbers.
- (9.) That Hill, the book-porter, after being reprimanded and cautioned, be allowed to resume his duties without pay for the time of his suspension.
- (10.) More attention be paid to the supervision of persons searching.
- (11.) More attention be paid to the compiling and writing of the indices.
- (12.) That no clerk, officer, or servant in the Registrar-General's Office be allowed to "search" for any private purpose without having obtained the permission in writing of the Registrar-General.
- (13.) That no clerk or clerks be allowed to work in the Search Room after the usual office hours.

By section 13 of the Registration of Deeds Act (7 Vic. No. 16), passed in December 1843, it was enacted that "An examined copy at full length \* \* \* and certified by the oath of one credible person \* \* \* of every deed, conveyance and other instrument affecting or relating to real estates \* \* \* shall be filed in the office of the Registrar-General \* \* \* in lieu of the memorial or extracts heretofore filed", etc. And by section 14 it was enacted "Every such certified copy or memorial so delivered into the said office shall be numbered successively according to the order of time in which the same shall have been delivered, and shall immediately be registered according to such number and order of time in a book or books to be provided and kept for such purpose in the said office, and every such book shall be open at all convenient times to the inspection of all such persons as may be desirous of searching the same." Section 19 provided (by reference to schedule "B") for the amount of fees payable to the Registrar-General in respect of the several matters mentioned in the Act; and section 29 enacted "that it shall be the duty of the said Registrar-General and of his deputy \* \* \* to make proper indexes to all registrations," etc.

In 1849 the office of Registrar-General was abolished (by 13 Vic., No. 45), and his duties were transferred to the Prothonotary and Chief Clerk of the Supreme Court. In 1857 (20 Vic., No. 27) the documents theretofore registered were retransferred to the Registrar-General; and, by implication, his office was re-established, and upon him were imposed all of the duties which he had had to perform under the first-mentioned Act of 1843.

All documents registered, when bound into "books," "were to be open to the public for inspection to all such persons as may be desirous of searching the same." That right so conferred upon the public has been largely made use of, especially of late years, as the books and registers increased in number.

From the earliest time persons searching have been allowed to take extracts (understood to be short) of the contents of deeds and other documents inspected. No objection has ever been made to that practice, which in itself seems to be essential, and, according to the opinion of all professional men of experience, absolutely necessary. To guard against the possible obliteration or addition of words to any deed or document so inspected, these extracts are allowed to be made in pencil only—pens and ink are never allowed. That the practice of taking extracts

is

is of long standing, reasonable and necessary, is amply shown by the evidence of all the witnesses examined upon this point, notably by that of Mr. Henry Burton Bradley, Mr. John Dawson, the Hon. J. Norton, the Hon. W. H. Pigott, Mr. H. M. Makinson, Mr. G. E. O. Evans, Mr. G. Colquhoun, Mr. A. J. Cape, Mr. P. W. Creagh, and Mr. T. A. Charlton.

So long as the practice prevailed that it has become a custom, certain, reasonable, and universal, to abolish which would be almost impossible. Any attempt to do so would cause great dissatisfaction to the whole legal profession, and to those engaged in banking and commerce.

The registers containing the copy deeds registered and all other documents in charge of the Registrar-General, in number 811,856, are kept in presses and on shelves in the Search Room and vaults of the Deeds Branch of the Department. The registers containing the copy deeds number 2,750 (550 books, five registers to each book). There are 225 registers of stock mortgages, 30 registers of old memorials (before 1843), 388 grant registers, containing copies of grants, and 700 index books to the above-mentioned documents. Of these registers the Grant Registers are kept in presses under lock and key, and are only produced to any of the public when specially required, and then they are said to be used under the direct supervision of the clerk producing the register. The registers containing the copied deeds are on shelves throughout the body of the room and may be inspected, and extracts taken therefrom, by any person desiring so to do, who has purchased a search ticket and paid the necessary fee. The whole of the documents, registers, and indices in that room, are in the custody, and under the immediate control of Mr. W. H. Gillam, the Deputy-Registrar of Deeds, who has been in the Department since 1867, and who has held his present position since 1882. During that time Mr. Gillam had never heard of any register having been missed, lost, or mislaid; nor had any register, in fact, been missed, lost, or mislaid. On that point Mr. Gillam has been corroborated by every witness examined. Professional men of the largest and the longest experience had never known any instance of a register not being forthcoming when required, and they had never heard it reported that a register had been lost or mislaid.

The only instance in which it had been stated that a register was mislaid, lost, or could not be found, was during the hearing of a case "Campbell v. The Anglo-Australian Investment Finance and Land Company (Limited)," tried last September in the Supreme Court, before His Honor the Chief Justice. In that case it was reported that two witnesses had stated that they had some months before the trial inspected a register entitled, according to one witness "Cumberland Register, No. 28," and according to the other the "Cumberland Register," in searching for a copy of a grant said to have been signed by Sir Richard Bourke, and issued in 1836 for a parcel of land near to Gore Hill, North Shore. When each of those witnesses was in the witness-box, no register so entitled could be produced; and it was thereupon assumed that such a Register was missing from the Registrar-General's Department. There was, in fact, no register missing or lost. The mistake arose through the register having been wrongly described. Mr. Pearson, one of the witnesses, explained the mistake as follows:—In May preceding the trial, he, with Mr. George Evans, desired to examine a register of grants, to search for the copy of a grant alleged to bear date 1833. "Register No. 28" was brought to them, and that register was, on examination, at once seen to contain copy grants dated 1835, partly printed and partly written. That register was not further examined. A register was then brought from the Search Room entitled "Special Grant Register, 'C'". That register contained copy grants dated 1832 to 1834, and was in manuscript only. That was carefully examined, but no copy was found of the alleged grant of 1833. That register, then so examined, was not produced at the Supreme Court at the trial named. The only register produced was "Register No. 28," which had not been examined previously as it contained copy grants for 1835 only. The Grant Register which had been examined was not produced, although it was then in its usual position in the Search Room, as, in error, it had been called "Cumberland Register No. 28." Had "Special Grant Register 'C'" been asked for it could at once have been produced. Upon this matter I have examined Mr. George Evans and Mr. Pearson with the registers before them, and each has explained the matter fully. Their explanation is contained in answers to questions numbers 3181-3219. From the

the evidence of persons well qualified to speak upon the matter, namely, Mr. Hatton, the official Searcher of the Examiners under the Land Titles Act, with over forty years experience of the Search Room and the registers; Mr. Abbott, Deputy Registrar-General, with great experience; Mr. Pearson, with about thirty-five years experience,—it appears that no such register as a “Cumberland Register No. 28” has ever been in the Registrar-General’s Office. This evidence is corroborated by that of Mr. McKern, the clerk in charge of the Deeds Branch of the Lands Department, with twenty years experience of that office, and also of the Search Room of the Registrar-General’s Office. In reply to question 1915, Mr. McKern stated, “amongst other books I have what are generally known as the ‘County of Cumberland Registers, numbers 1 to 6,’” and to explain what was meant by “Cumberland Register,” he produced “Cumberland Register, No. 4,” on the back of which was printed, “Register of the Counties of Cumberland, Argyle, Camden, and elsewhere, 1832 to 1836.” It seems these books were always called “Cumberland Registers,” and they were so called on the endorsement on certain undelivered original grants also in his custody. Of these grants five were produced, one, dated 19th October, 1831, bore the endorsement “Entered on page 90 in the Register, County of Cumberland, Surveyor-General’s Office.” That grant was, in fact, entered on page 90 of the register produced, namely, Book 4 as above described. Mr. McKern was quite certain that such a register as “Cumberland Register No. 28” never existed. He was also just as certain that the only Cumberland Registers ever in existence were those in his custody, as they contained memorials of grants from 1792 to 1865.

The Search Room is under the immediate control of the Deputy Registrar of Deeds, Mr. H. W. Gillam, who has his table in that room, but separated from that portion of the room in which the copy deed registers are kept by a glass partition. He is assisted by eleven clerks, whose tables and desks are separated by a counter from the body of the Search Room. In addition to the small amount of supervision Mr. Gillam and his clerks can exercise over persons searching, a book-porter, or record assistant, named Hill, is on duty to assist persons searching by producing the registers required, and generally to overlook the searchers. At times his duties take him from the room—only occasionally—and never for long. His is the only direct supervision over the registers, and persons searching. Upon this matter of supervision the evidence of almost all the witnesses, whose duties had taken them to that room, was to the effect that the supervision was altogether insufficient. It was admitted that of late years the supervision had been greater, but that even now the room requires a far greater amount of supervision than that exercised. I have had a plan of the room, showing the position of the different desks, tables, presses, and shelves, prepared and appended to this Report. It appears that a person wishing to search has to pass up a narrow passage the whole length of the room before obtaining a ticket which it is necessary to obtain before searching. Any person wishing to speak to any of the clerks, or to Mr. Gillam, on business or otherwise, has to pass up that narrow passage, which is lined, and sometimes littered, with registers. The plan also shows that the shelves which contain the registers form three other passages, or alleyways, the whole length of the room; that at the eastern end of the room another passage runs at right angles to those already described, also containing registers. Many of the registers and the tables used by searchers are altogether out of the view of Mr. Gillam and his clerks, who all are at the eastern end of the room, while the entrance door is at the western.

I strongly suggest that, at least, three of the clerks be at once removed from the eastern end of the room and their desks or tables be placed as close to the door at the western end as convenient, so that there may be some check over persons entering and leaving the room.

So lax has been the supervision over those using the Search Room, that, some years ago, a deed was cut out of one of the registers; the mutilation was only discovered by chance when the stolen deed was found in possession of the thief, who was arrested on some other charge at Newcastle. No prosecution followed, the matter was hushed up; and I was unable to ascertain if the deed had been replaced, the “memory” and knowledge of the Deputy-Registrar of Deeds being curiously defective on the matter. The evidence about this matter is contained in answers to questions 243 *et seq.* and 2346 *et seq.* The

The "Indexes" provided to be made by the 29th section of the Act appear to have been carelessly compiled, and more carelessly written. Some of the worst have been recopied, and others should be so treated when time permits. In addition to some of the "Indexes" in existence, I suggest, that for the future, the "Purchasers" and also the "Mortgagees" names should appear; up to the present it has been the practice to enter the names of the "Vendor" or "Mortgagor" only; thus if "Andrews" conveys or mortgages to "Phillips" that transaction now appears under the name "Andrews" only; it should appear in the index under the initial letter and name of "Phillips" as well as that of "Andrews." It has also been suggested that a separate index should be compiled for dealing with conditional purchases. Such an index would doubtless be of great use to searchers, and would tend to lessen the time and labor of such searches.

I have devoted much of the time expended on this commission in inquiring into the conduct of the clerks in the Department—the clerks in the Deeds Branch and in other branches who had access to the Search Room. In reply to questions No. 301 *et seq.*, Mr. Pearson, whose duties then frequently took him to the Search Room, said, substantially, that five or six years ago he found it necessary to complain of the conduct of a clerk in the branch for the registration of Births, Deaths, and Marriages, named Hopkins, who was perpetually in the Search Room searching Registers he had no right to examine. On two occasions Mr. Pearson complained to Mr. Ward, a former Registrar-General, without any effect. Several times Hopkins had some other person with him when so searching. In 1882, from the evidence of Mr. Patrick Madden, it appeared that Hopkins was in some way acting for Madden in attempting to establish his title to some land in Sydney, in which matter Hopkins did not seem to have been very active and the matter was not prosecuted. In 1887 Hopkins was again examining the registers in the Deeds Branch, and in June, 1888, he entered into a certain agreement with a firm (Messrs. Campbell and Chappel) of land agents, whose business seemed to be to traffic in doubtful titles and to find owners for lands apparently either forgotten or abandoned. For giving information to that firm about one estate, Hopkins was to receive one-tenth of the proceeds of any land recovered, and for that interest he accepted £150; and for giving information in another estate he was to receive a share, and, in lieu of that share, he accepted £550, and signed a receipt to that effect. For his conduct in either of those instances he might well have been removed from the Registrar-General's Office. His explanation is that he only sold knowledge that he had gained outside the Department, and he attempted to explain away the agreement which he had entered into with Messrs. Campbell and Chappel, which contained these words:—"The said E. C. Hopkins to act in conjunction with the said Herbert Chappel and Charles Jackson Campbell in disclosing and causing diligent inquiry and search to be made as to all property passed," etc., by saying that the words were inserted against his wish, and that, as a fact, they had no meaning.

From the evidence I have come to the conclusion that he was only approached, and his knowledge bought, because he was a clerk in that Department.

In another matter of land on the Hunter he, somehow, came to the knowledge that the legal estate appeared to be in a Mr. Peppercorn or his representative, and that a fellow clerk, Mr. Spark, in another branch of the Department, was that representative. With this information Hopkins approached Mr. Spark, and offered to buy Mr. Peppercorn's interest for £100. Much correspondence ensued, and eventually the land was purchased by the Messrs. Cowlshaw (to whom Hopkins had sold his knowledge for one-half share of the property) for about £5,000. The title to the land was shortly after put under the Land Titles Act, and for that purpose the land was valued at £20,000. In this case also Hopkins explained his conduct by saying that he had obtained his information altogether in an accidental way, and from sources outside the Department. I fail to credit his explanation. The facts of that transaction are fully set forth in the evidence of Mr. Spark, Mr. M. C. Cowlshaw, and Hopkins. In addition to these instances, Hopkins in a number of cases approached Mr. Makinson, the senior partner of the firm of Ellis, Makinson, and Plunkett, offering to sell him information about land, which Hopkins alleged belonged to clients of that firm. In Mr. Makinson's opinion the information proposed to be so sold was just such information as anyone, with a knowledge of the registers, would be sure to obtain in searching. In one case, for example,

example, the land had been sold; the purchase money to be paid by instalments. The time had not expired, some of the instalments were outstanding, and the conveyance to the purchasers had not been executed, and, of course, were not registered; so that in the register the land would appear still to be the property of the vendor. In another case the land had been sold, and, the conveyance not being registered, the land appeared on the register in the name of the vendor, Mr. Makinson's client. In like manner Hopkins approached Mr. Donnelly Fisher, the senior partner in the firm of Fisher, Ralfe, and Macansh, with an offer to purchase Mr. Fisher's interest in some land at Botany for £100. Hopkins' offer was not accepted. Mr. Fisher made out his title to the land, about 14 acres, and it was valued for the purpose of bringing it under the Real Property Act at £1,300. In this case it seemed probable that Hopkins had in some way obtained his information from documents lodged in the Land Titles Office by the purchasers of other portions of that land at Botany (which land had been vested in Mr. Fisher's father) for the purpose of bringing those portions under the Act. The facts of the last-mentioned cases are fully set out in the evidence of Mr. Makinson in his replies to questions No. 2376 *et seq.*, and in the answers of Mr. Donnelly Fisher to questions No. 2838.

Hopkins' explanation of the matters alleged by Mr. Makinson was that "he did not remember"—and to that alleged by Mr. Fisher that "he (Hopkins) had obtained the information away from the office." All of the matters happened before March, 1890, when the present Registrar-General was appointed. In September, 1890, certain information coming to the knowledge of the Registrar-General about two of the transactions above referred to, namely, the land transactions with Messrs. Chappel and Campbell and that with the Messrs. Cowlshaw and Mr. Spark, Hopkins was reported to the then Colonial Secretary. The papers were all submitted to the then Attorney-General, who gave it as his opinion that Hopkins, on the facts stated, had not laid himself open to a prosecution for champerty. Hopkins was then allowed to return to his duties as before without even having been censured for his dealings with Messrs. Chappel and Campbell. Hopkins' reply to the evidence just referred to ever has been that he did not obtain the information by means of any personal searching in the Registrar-General's Office. In all cases it may be that he did not search himself, for evidence has been given by Mr. A. K. Doyle, a law stationer, in reply to questions No. 2514 *et seq.*

"I have made searches for him (Hopkins) several times years ago. I cannot say how many matters, but I should think not more than ten or twelve; the last search was about three years ago." The instructions given to Mr. Doyle appear in reply to questions No. 2526 *et seq.*

"I would receive instructions from the date of conveyance. As an illustration, I will suppose it was dated 1842, Williams to Brown, 30 acres, county Northumberland. Trace this dealing up to date. On others he might perhaps say 'Find out the present owner.'"

It makes but little difference if Hopkins personally made the searches or paid others to make them. The first information he probably obtained from the registers or indices, and from the same source perfected his knowledge until it became, as he thought, a marketable article. If it had been proved that he had only instructed others to make these many searches into matters in which he had no proper personal interest it would be for the benefit of the public and for the Public Service that he should be removed from the Registrar-General's Department.

The latest case in which Hopkins appears to have been interested happened so late as after June last year, 1892. Mrs. Mary Stedman was desirous of obtaining possession of a number of properties, which she believed had been devised to her by her father. Shortly before his death, in 1887, his house had been robbed, a number of deeds stolen and not since recovered. The properties were not specified in his will. Mrs. Stedman made her wishes known to a Mrs. Pickering, who seems to have suggested that her son, James Pickering, should go with Mrs. Stedman to the Registrar-General's Office. Mrs. Stedman consented; and at that office Mr. Pickering, who had known Hopkins for a number of years, introduced Mrs. Stedman to Hopkins as a person who could assist her in her difficulties. Hopkins consented to do so, after haggling over the price he was to receive for his aid, at first demanding one-half of the proceeds of all the properties recovered, but eventually agreed to accept one-fourth. His brother-in-law, Hopkins stated, could do the necessary searching, etc.

Mrs.

Mrs. Stedman called at the Registrar-General's Office on two or three occasions, and, on two, heard from Hopkins that portion of the property was "all right." Mrs. Stedman not being satisfied with his terms, and for other reasons which are fully stated in her evidence, beginning at question number 2,651 *et seq.*, wrote to Hopkins declining to have anything further to do with him; so that matter terminated. No property was recovered and no share was paid or became payable to Hopkins. His explanation of that case was that Mrs. Stedman came to him and that not he, but his brother-in-law (who he admitted was incompetent through ignorance to act in the matter), was to hunt up the properties, and for his services to receive the one quarter share. Hopkins admitted that he had never consulted his brother-in-law about the matter, and that he had not even asked him if he would consent to act.

Yet another case: Fully six years ago, Hopkins offered to Mr. G. F. R. Burcher, a solicitor, an interest in certain properties, the titles to which he (Hopkins) knew from information obtained in the Registrar-General's Department, were not such as the owners supposed, on condition that he (Burcher) conducted any legal business which might be necessary to bring the owners to terms; that offer was declined. The evidence in this matter may be found in reply to questions 1808 *et seq.*

These are, substantially, the instances in which Hopkins has been concerned in transactions about land. The relationship which had existed, and continues to exist, between Hopkins, Chappel, and Campbell is difficult to define. The "bill book" of the firm, said by Campbell to be in Chappel's handwriting, shows that a number of promissory-notes for substantial amounts were given to Hopkins, and, one at least, for a substantial sum, was given by Hopkins to Chappel and Campbell. Chappel could not explain why, as he swore that the entries in the "bill book" were not made by him, and that Campbell did the financing. Campbell could not explain, as he swore the "bill book" was kept by Chappel. Hopkins could not explain as he swore that the matters between the three were so "mixed up."

Mr. William Wentworth Bucknell, a clerk in the Births, Deaths, and Marriages Branch of the Registrar-General's Department, also appears to have searched in the Search Room (replies to questions 435 *et seq.*), and to have employed the same law stationer as the one employed by Hopkins—Mr. A. K. Doyle—to make two or three searches. There is no evidence that on any occasion Bucknell sold, or offered to sell, the information he so gained; it might be that he did not intend so to use it, or that the information was of no value. I should not have placed so much importance upon the fact that he was concerned in making searches, and having them made by others, had it not appeared by other portions of the evidence that he too was in some manner interested with Hopkins in his dealings with Chappel and Campbell.

The "bill book" of Chappel and Campbell shows that a promissory-note for £160 was drawn in favour of William Wentworth Bucknell on the 31st of January (the year not stated but evidently 1890). In a ledger, under date of January 25th and 29th, two separate sums of £50 each on account of a loan of £245 paid to W. W. Bucknell; and under "receipts," December 6th, 1889, Bucknell, £30; and under date May 5th, 1890, Bucknell, £4.

Bucknell's explanation of these matters was a denial of ever having received any moneys or promissory-notes from Chappel and Campbell, or either of them, with the exception of two sums each of £4, which he had received on behalf of a relation as interest on some mortgage given by Hopkins to that relation for money lent on the security of moneys due to Hopkins by Chappel and Campbell. That explanation was not satisfactory. Chappel swore that the financial part of the business was arranged by Campbell; Campbell swore that he could not say what, if any, moneys or promissory-notes, were paid away to Bucknell or received from him; although the ledger showed that there had been a number of payments made and one amount received. Bucknell admitted that he was often at Campbell's office—his reason for those visits being that he was attempting to get the interest on the mortgage from Chappel and Campbell as he could not get it from Hopkins. That may have been the reason; and it may be that on those occasions, or on some of them, he was imparting to them the information he had obtained directly or through a searcher from the indices or registers. There can be no doubt that he did obtain information  
and

and that he was interested, to some extent, in the fortunes of Chappel and Campbell and Hopkins. Such an interest was altogether antagonistic to the duties he owed to the public so long as he was a clerk in the Registrar-General's Department.

His explanation of his conduct is contained in replies to questions 3478 *et seq.* I suggest that William Wentworth Bucknell be now disgraced, and, unless he severs all connection with Chappel and Campbell, and Hopkins, and each of them, that he be removed from the Service. The only other officer whose conduct it appeared necessary to inquire into is George William Hill, the book porter or record assistant, who has been in the Registrar-General's Department for over fourteen years. In 1890 his duties were altered to some extent, as, before that year, the supervision of persons searching seems to have been even less than at present. In that year Hill, having been instructed to attend more particularly to the Search Room, was relieved of various other duties that he before had to perform. As he had been for many years the book-porter in the Search Room, and had, at times, to make official searches in the indices and registers for Mr. Abbott, the Deputy Registrar, and Mr. Gillam, the Deputy Registrar of Deeds; he has become conversant with the indices and registers. I do not find that Hill had at any time sold his knowledge of these books or any information gained from those books to any person, although there are circumstances which show that he received payment for services rendered in that Search Room. In the ledger kept by Campbell there is an entry under date October 13th, 1889, "Hill—search, £1," which entry Campbell could not explain, and which, if I had found Campbell's evidence worthy of credence in other matters, I might have considered implicated Hill. On the whole I was satisfied with Hill's explanation of his relationship with Campbell and Chappel, and although he undoubtedly did accept money from Chappel, and otherwise acted stupidly, I cannot see any reason why Hill should not be allowed to resume his duties; but as his own stupidity brought about his suspension, I suggest that he should not receive any salary for the period he has been absent from his duties. His explanation of his dealings with Chappel and Campbell will be found in the reply to question number 800 and corroborated in replies to questions number 1050 to 1080.

The present Registrar-General was appointed in March, 1890, and since then I find that the working of the Search Room has been in many respects improved. The position of the presses or shelves in which the registers are placed has been altered for the better. A plan of the room, as it was, and as it is, appears in the Appendices.

The check upon the fees payable by persons searching has been improved, so much so that the revenue for the same has greatly increased. In 1889 the fees paid for searches amounted in round figures to £726, and in the present year they should (at the rate of the first nine months, £1,075) amount to £1,434. [See Appendices; also Treasury Reports of Messrs. Hinchey and Williams and Reilly, 1891 and 1893.] In all other matters also there has been an improvement, the details of which are fully set out in the Exhibit "B," in the Appendices. For the purpose of showing that those officers in responsible positions in the Department are not ignorant of the defects in the Search Room, I have had printed in the Appendices reports and suggestions made by the Registrar-General and the heads of the branches in the Department. [See reports in Appendices and Exhibits.]

Want of space is the great stumbling block to any great reform in the Search Room. The "arrangement" of the room as a "Search" Room is altogether defective. As it is now arranged it would be impossible for less than two persons to properly supervise. Those searching are so separated by the presses and are so out of sight of the clerks at the eastern end of the room. In the Appendix is a plan of an "ideal" Search Room according to Mr. Pearson, the Principal Draftsman, who has had very great experience and seems to have given the matter much attention.

The Indices, Registers, and other documents of the Branch for the Registration of Births, Deaths, and Marriages having been lately removed to other premises, more space is at command for the registers in the Search Room. Portion of that space may be utilised by rearranging the clerk's desks as I have suggested. The suggestions made for the improvement of the room and the safety of the Registers have been many—most of them would necessitate alterations to the present "Registration of Deeds Act." It has been suggested that "official searchers" only should

should be allowed to inspect the indices and registers; and that "Searches" should be ordered and obtained in the same way as "certified copies" are now ordered. If that suggestion were adopted, the Registrar-General's Department would have to be responsible for the correctness of the "Searches" supplied—a responsibility which might be overwhelming; and further, the delay to those requiring information would be intolerable. A suggestion more worthy of consideration was that persons applying and proving their fitness in all respects to the Registrar-General should, after entering into some guarantee for good behaviour, be "licensed" to inspect documents, indices, and registers in the Search Room of the Deeds Branch, and Lands Titles Branch, and that such "licensed" persons only should be allowed to search. If such a suggestion were adopted the public would, in all probability, be better served than at present, and the safety of the registers, &c., would be almost assured. The Act (7 Vic., No. 16, sec. 13) would have to be, in part, repealed, and the necessary power to issue licenses conferred upon the Registrar-General.

Another suggestion well worthy of consideration was that duplicate copies of all deeds, etc., hereafter registered should be filed in the office of the Registrar-General; that the copies should be bound in duplicate registers; and that one set of registers should be open for the inspection of the public; that the duplicate registers should be stored under proper custody in some other building; and that such duplicates should only be inspected on an order of a Judge of the Supreme Court, or when produced on a like order in some Court. To enable that suggestion to be carried into effect the Act would have to be amended in many respects. All deeds, etc., now registered would have to be copied, the copies verified, and only such copies, when bound into registers, should be open to the public. If such duplicate registers could be brought into existence the risk, now great, of having a registered copy of the deed or other document altered or destroyed would disappear. Should any alteration to the present Act be made, I suggest that it should provide that all documents tendered for registration should be type-written; the bulk would be thereby reduced and the risk of alteration lessened.

From personal inspection I noticed that some of the older registers of copy grants were in a dilapidated condition, especially Book "1," which should contain the oldest grants. From that book the first seven (7) grants were altogether gone. After some searching, the Deputy Registrar of Deeds, Mr. Gillam, produced to me some writings on ordinary brief paper, which he alleged were copies of the missing documents. Such alleged copies were not verified, were not fastened together, and were, for the purpose of evidence, altogether useless. The "remnants" of the missing grants were not forthcoming; though I was informed that they were locked up "somewhere." All such "remnants" should be carefully preserved, and, so far as possible, the grants should be restored by being repaired and placed on tracing calico by some skilled hand.

A very great need has existed, and even now exists, for a proper and full catalogue or inventory of all books, including grant registers, index books, deed registers, and other registers now under the control of the Registrar-General and his deputies. Such an inventory should at once be compiled in duplicate, one copy should be kept in the vaults of the Search Room, and the duplicate should be placed in charge of Mr. McKern, the officer in charge of the Deeds Branch in the Lands Department. From either of such catalogues it could at any time be ascertained if any register, etc., said to be "missing" ever had an existence.

That searches have at times been made by clerks in the Registrar-General's Department, other than those already named, is too apparent. The clerks, so searching, justify their proceedings on the ground that in each case the search was in respect of some private personal matter. Should the clerks in the Department be allowed to search under any circumstances is open to question. If they are allowed to do so it should only be on certain conditions. No clerk, officer, or servant in the Registrar-General's Department should be allowed to inspect any register, book of indices, map, or any official document under the custody, care, or control of the Registrar-General, or his deputies, without the permission in writing of the Registrar-General. Every such permission should state the subject matter of the search, and should limit the time therefor. Such permissions should be filed for future reference, if necessary. No clerk, officer, or servant, should on any pretence be allowed to make any use of the Search Room after office hours. The practice which has hitherto prevailed in that respect should at once be stopped.

Some

Some days after Campbell had been examined and had an opportunity of giving the Commission every information, he wrote stating that he desired to supplement his evidence. When an opportunity was afforded him of so doing, he made a number of complaints about Mr. Ward, Mr. Donnelly Fisher, the Examiners, and a serious charge against Mr. R. M. Pearson and Mr. H. C. E. Newcombe respectively. Such complaints and charges were the result of what he asserted he "had heard." The one charge was that Mr. Pearson had made an agreement with two others to share the proceeds of some land to which the title seemed to be defective. That charge was based on what Campbell alleged he had heard from others. Mr. Pearson indignantly denied the charge, which he averred was brought against him because he had ever refused to allow Campbell to inspect the office maps and other official documents. I was satisfied with the truth of Mr. Pearson's denial.

The other charge was that Mr. Newcombe had obtained a grant to some land which had been granted to his father, and which land had vested in the official assignee of the estate on the insolvency of the grantee. Campbell alleged that he had purchased the right, title and interest of the official assignee to the land so granted and that Mr. Newcombe by some underhand means had obtained possession of the grant. Mr. Newcombe explained his position by stating that before insolvency his father had conveyed away the land granted; that the purchaser always averred that he held the land in trust for the grantee's children; and that after many years it was conveyed to him (Mr. Newcombe) and his brother by the representative of that purchaser. In this matter also I was satisfied with the explanation.

From inquiries made into the mode of "searching" allowed in another branch of the Registrar-General's Department—"The Land Titles Office"—I find that in that branch the public, as a rule, are not themselves allowed to handle the registers. Each register, as it is required, is handed by the clerk in charge of the counter to the person desiring to search, and the search is prosecuted at the counter in view of that clerk. That system seems to meet with public approbation, although many complaints were made, to the effect, that the counter space allowed for the purpose was all too small. Mr. Newcombe, in charge of that room, admitted that there was cause for complaint, as the room was so cramped. That system could not, with advantage to the public, be introduced into the Search Room of the Deeds Branch as the searching there is so very different.

Many persons other than those examined, submitted their names to me for the purpose of being summoned to give evidence. From each of these I required, and was furnished with, a short statement of the evidence they wished to give. From their statements it appeared that some of the writers considered that they had some cause of complaint against the way in which business was transacted in the Land Titles Office. One wished to complain of many matters, including an adverse decision given in the Equity Court; and some desired me to inquire into the whereabouts of a box of deeds, said to have been lodged before 1860. As each of these matters was beyond the scope of my Commission, I declined to summon the persons so submitting their names.

Certified under my hand and seal this 1st day of December, 1893.

GRANTLEY FITZHARDINGE.

---

ROYAL COMMISSION ON DEEDS AND SEARCH BRANCH, REGISTRAR-  
GENERAL'S DEPARTMENT.

MINUTES OF EVIDENCE.

FRIDAY, 13 OCTOBER, 1893.

[The Commission met at 10:30 a.m. in the Board-room, Colonial Secretary's Offices.]

Present:—

HIS HONOR JUDGE FITZHARDINGE.

Charles Hart Townley Pinhey sworn and examined:—

1. *Commissioner.*] What are you, Mr. Pinhey? I am Registrar-General of the Colony of New South Wales, and I was appointed to that position on the 25th March, 1890
  2. What branches are there in your Department? There are many branches. There is the administration of certain Acts which are distinct from one another. For instance, we have the Accountant's Branch. There are other branches. There is the Registration of Deeds Branch, and the Lands Titles Office.
  3. Is there the Land Titles Office, and the Registration of Deeds Branch? Yes. There are, too, the Registration of Births, Deaths, and Marriage Branch, the Accounts Branch, the Correspondence Branch, and the administration of the Companies' Acts and the Trades Mark Acts. I also have the custody of deposited wills, that is, wills before probate is granted are simply lodged with me for safe custody,
  4. Who are your officers in the Deeds Branch? There is a Deputy Registrar-General, Mr. W. A. Abbott, who, although associated with the branch, is not directly connected with the supervision of deeds. The Search Branch comes under various officers, the head being the Deputy-Registrar of Deeds, Mr. H. W. Gillam. Mr. Abbott sits in a separate room and performs separate duties having no direct connection with the Deeds Branch. Mr. Gillam has as assistants nine clerks, four of whom are temporarily engaged. The officials under Mr. Gillam's immediate supervision are Messrs. Robert W. Codrington, John C. de S. Mann, Alfred James Napier, Clarence E. Campbell, and F. P. J. Macguire. In addition to these, there are four temporary clerks, Messrs. Begbie, Kelleher, Hurley, and J. W. Thompson. All these have equal duties, and are directly under the supervision in the Deeds and Search Branch of Mr. Deputy-Registrar Gillam.
  5. Is the Search Branch apart from the Deeds Branch? The Deeds Registration Branch is the Search Office. The Deeds and Search Branch are not two separate branches.
  6. In addition to these names you have already mentioned, what other officers in your Department, in your opinion, can give me information upon this inquiry? There is the accountant, Mr. Henry Noble. He has been, although not of the branch, intimately associated with the doings and transactions of the branch. There is searching done in the Land Titles Office, which is entirely distinct from this; but I suppose the basis of this inquiry has no reference to that.
  7. *Commissioner.*] The scope of my commission is to make a diligent and full inquiry into the Deeds and Search Branch.
- Witness continuing:* The other officers in the Department who may be able to assist your Honor in making this inquiry are Mr. R. M. Pearson, the principal draftsman; and Mr. Wilfred De Courcey Lewis, the next draftsman. He has spent most of his time in, and is, therefore, intimate with the working of the Department. Then there is Mr. Christopher Hatton, the official searcher. I do not know who can give more valuable evidence than these two, Mr. Lewis and Mr. Hatton.
8. Can the Examiners give any assistance in this inquiry? I do not think so.
  9. I shall feel it my duty to see if they can, therefore, will you tell me who they are? Mr. Alfred Parry Long, the Senior Examiner, who, I think, would give you valuable assistance, and there is Mr. Charles H. Mallon, the assistant searcher.
  10. Since you have been Registrar-General have you continued the system that you found in existence when you assumed office? The system so far as regards the method of search, yes. I am speaking now in view of the fact that the public are allowed, under law, to have access to the registers. Solicitors, conveyancers, or any member of the general public on payment of the statutory fee have a right to see the registers.
  11. Did you find that system in vogue when you were appointed? Yes; and that system continues to obtain.
  12. So that on the payment of the proper fee the public have access to the registers? Yes; during office hours.
  13. When you were appointed did you find that parties searching were allowed to take extracts from the documents searched? Yes.
  14. Did you continue that practice? That practice has been necessarily continued, and it is absolutely necessary, for no conveyancing solicitor could perform his professional duties without being allowed to take extracts of titles. So far as regards the titles, frequently the title is based on the particulars copied from the deeds.
  15. Does the Department provide copies if they are applied for? Certainly.
  16. The public are not allowed to copy, but only to take extracts? Quite so.
  17. Are they allowed to take extracts in ink? Pencil only, and this regulation is strictly enforced.
  18. Do I understand that you, from time to time, get reports from the officers of this branch—that is, the Deeds and Search Branch—as to how their duties are performed? Yes; monthly. These are regulation reports apart from any special report that may be necessary. I produce one now for the month of September. [*Report handed to the Commissioner and marked Exhibit "A."*]

C. H. T.  
Pinhey.

13 Oct., 1893.

- C. H. T. Pinhey.  
13 Oct., 1893.
19. Since you have been in office, have you had any complaints as to the way in which the clerks of the Deeds Branch perform their duties towards the public? At the present moment, looking back over a period of three and a half years, I cannot call to mind any complaints made by one of the public against any officer of that branch.
20. Have you had any complaint against the system you follow in this branch? None. I have devoted anxious attention to the working of this branch for the past three years, and I know for certain that any alteration in the present system would cause wide-spread complaint. That is a fact I have made prominent in the report I spoke of just now.
21. Have you any idea of the number of persons who visit that branch for the purpose of searching on an ordinary working day? I should take it to be something between twenty and twenty-five.
22. Is there any report kept of persons so doing? There is no actual record except what is shown on the butts of the tickets issued on payment of fee for permission to search. Our system is that, on application for a search, a ticket containing particulars is issued to the searcher. We retain the butt, and that is our record.
23. So that you have a record of each person who has paid a fee? Yes. Each person, as he obtains his ticket, pays his fee, then he gives the ticket to the attendant before he is permitted to search. In this same room and under the same cognisance and supervision there are deposited wills, stock mortgages, liens on wool and crops, and duplicates of old grants, and registers and deeds generally—that is, really the whole of the deeds from the foundation of the Colony up to date. Every registered document, with the exception of those coming under the Lands Titles Act, go into the Deeds Search Room.
24. Are you aware of the case tried in the Supreme Court, *Campbell v. The Anglo Investment, Finance, and Land Company (Limited)*? I am.
25. Was your attention drawn to the remarks of His Honor the Chief Justice in that case? It was, by the Chief Secretary.
26. And was an extract from the *Sydney Morning Herald* sent to you? Yes, an extract of Wednesday, the 20th September.
27. After receiving that extract what steps did you take? I obtained reports from the several officers of my Department on the same day. The officers' names are R. M. Pearson, Deputy Registrar-General Abbott, Deputy-Registrar Gillam, Book-attendant Hill, and Fredk. M'Kern who is in charge of all matters relating to deeds in the Lands Department. These reports, together with the report from myself on the whole case, were forwarded to the Chief Secretary. [*The Secretary to the Commission was instructed to apply to Chief Secretary for report referred to. Application agreed to. Report handed in, bearing date September 22nd, 1893, with sub-reports, and marked Exhibit "B."*]
28. Since you took office have you altered the position of the clerks in the search-room, and so altered the whole arrangements as to give the greatest amount of supervision possible? Yes, undoubtedly. That is one particular point I wish you to see in the reports submitted, and when you make a personal inspection of the search-room.
29. Since taking office, or since your appointment as Registrar-General, has the number of clerks in the Deeds Branch been increased or diminished? I think it has been increased by two. I am not quite sure, but I think it is two.
30. Has the work increased? The work has increased, because of the reforms I have introduced.
31. I mean has it been increased in any other way—is there a larger attendance of the public, or is there an increase in the public business? I think the work of the branch may be regarded as fairly stationary.
32. Do you think there are more of the general public using the room? No; I think from that point of view the work keeps simply stationary. There is more work consequent upon the reforms referred to. Then, again, there is the administration of the Companies' Act. If necessary, I can show ample reason why the number of clerks should have been increased.
33. Can you give me any information regarding Messrs. Hopkins and Hill, in connection with this inquiry? In the matter of Hopkins, I have on several occasions found it to be my duty to report him for what I consider might be regarded as a suspicion of trafficking. This was in the year 1890.
34. Trafficking in what way? It appeared to me, from the information as to titles given by Hopkins, that he must have so far trafficked in records as to have enabled him to enter into negotiations with persons outside.
35. To whom did you report? To the Colonial Secretary.
36. Have you copies of those reports? Yes, your Honor.
37. What was the result of your so reporting? I believe the reports were submitted to the Attorney-General, and that his opinion was given to the effect that sufficient evidence had not been adduced to warrant a prosecution for champerty.
38. Did the Colonial Secretary take action in the matter? I was advised of the result of submitting the case to the Attorney-General, but no further action was taken.
39. Did Hopkins continue to occupy the same position? He continued to occupy the position, but under such restrictions as to prevent the possibility of any recurrence of the practice. I am perfectly content to aver that no such recurrence of that offence has taken place since the time mentioned.
40. Have you copies of the reports? The copies of the reports are here. [*Reports dated 16th of September and 22nd of September, 1890, together with opinion of Attorney-General, and a report dated 28th April, 1890, handed in and marked Exhibit "C."*]
41. Have you anything you wish to say with regard to Hill? I know absolutely nothing, your Honor. I saw a statement made in the report of the trial having regard to transactions concerning a piano and loans, but I know nothing of the man.
42. Hill states this in his evidence—"Sometimes Chappel might want certified copies of deeds and he would drop down just to oblige him." Does not that look as if Hill could get copies of these deeds? It would look like it, but I wish to point out that all this occurred long before I took my present position.
43. Is that all you wish to say concerning the supposed irregularities of officers in this branch with the outside public? I can only say that the whole of the transactions that have been referred to took place before my taking office, and I have never heard either directly or suggestively of anything having occurred of a like nature since I have held that office. I would like to state this emphatically, that so far as regards the matters brought out in the trial, they took place in 1888 and 1889, at all events before the beginning the year 1890.

44. I am rather suprised to see that it does not state so in these published proceedings at that trial? No, it does not; but I state it now so that the truth may come out subsequently.

45. Is that all the information you can give me at present? That is all at present your Honor.

[The witness withdrew.]

C. H. T.  
Pinhey.

13 Oct., 1893.

Alfred Parry Long sworn and examined:—

46. What is your position Mr. Long? I am Senior Examiner in the Land Titles Branch. There are three Examiners—myself, Mr E. A. C. Smith, and Mr. H. B. Thomas. I have been an Examiner since the end of July, 1886.

A. P. Long.

13 Oct., 1893.

47. During the time you have been an Examiner have any irregularities in the working of the Deeds and Search Branch of the Registrar-General's Department come under your notice? Yes, indirectly.

48. Have these irregularities come under your notice on many occasions? The question is what do you mean by irregularities: misbehaving on the part of the officials or complaints from the outside public?

49. I will ask you about both. First, have there been irregularities with regard to the officials in the Deeds and Search Branch—have these irregularities been many or few? I have not heard of a very great number; there have been some few.

50. Of late years? Well, within the last five years.

51. Since March, 1890, have irregularities come under your notice? It is so hard to say where you have no direct notice; it is more from talking in the office that I have heard anything about it. It is, of course, hard to remember all the things that have not been brought officially before myself.

52. Can you tell me whether since March, 1890, you have had notice of irregularities brought before you? No; I cannot recollect any since then.

53. Can you give me any particulars as to anything that was brought before you previous to 1890 dealing with the matter of my commission? No; I cannot recollect any particulars of those; they come indirectly under my notice, but I cannot call to mind any particular instances at present except that there were complaints in the office concerning alleged irregularities. Of course, rumours of this kind did not come within my province, and as a consequence I did not take the trouble to remember them particularly.

54. Did they simply come under your notice and passed away? Yes.

55. As Senior Examiner has anything come under your notice, or has anything struck you as being peculiar or that seemed to be peculiar with regard to the conduct of any officers? No; I cannot say as to any individual officer that such has been the case. I may say, however, that about the year 1887 or 1888 in the matter of an application by one Roberts, to bring certain lands at Bankstown under the Act, a complaint was made by Mr. W. H. Pigott who was acting for the parties, and who claimed prior application for the same land, but which had been withdrawn. After some official in the office had enabled Mr. Roberts to obtain information for the purpose of his application from papers in the office. I can hardly say whom I can suspect of giving Mr. Roberts that information, as Mr. Roberts who was then employed as a book-binder for the office was allowed to occupy rooms on the premises, for the purpose of carrying on his book-binding duties. That being so he might have been able to obtain access to the papers himself. Mr. Roberts, when called upon by the then Registrar-General strenuously denied having so obtained information.

56. Can you suggest any alteration in the mode of working or the system followed, at present, in the Deeds and Search Branch? Well, I think, myself, that there should be a system of only allowing licensed searchers to search. Of course, this, most probably, would necessitate some alteration in the present law, to the effect that neither searchers nor the general public should have unlimited access to the books of the Department as they have now. I would suggest that only the index books should be directly available to the searchers, the Search Room being so arranged that two or more attendants should be in such a position as to be able to see the searchers while looking over these index books. Furthermore, that between the searchers and registers there should be placed a long counter behind which the two attendants should stand and the searcher should only be allowed to inspect the registers at the counter I have suggested, the searcher handing in the slip containing the number of books required. They should look at these books only at the counter, and not in any available hole and corner as at present. They should look at them in the presence of the attendants.

57. Have you, yourself, had any practical experience in the Search Room? Yes, many years ago; about twenty-five years ago, when the arrangements were very different. There was then a limited number of books, and one attendant did what three or four now would have to do.

58. But from your experience would two attendants be sufficient? Yes; if the room be arranged in the way I have suggested, the two would be sufficient.

59. How many persons do you assume are searching at the same time? I should say on an average, about twenty.

60. Could these two attendants, in your opinion, sufficiently keep watch over the whole? It might possibly be found necessary to have three attendants, but, I think, it would be quite sufficient to try with two at first.

61. In your opinion, is it necessary that persons searching should be allowed to take extracts? Yes; it is absolutely necessary.

62. Would you suggest that these extracts be limited? I think they might be limited.

63. How do you propose to regulate that limit? I think it should be left to the discretion of the attendants, under the direction of the Deputy-Registrar.

64. Are the extracts now allowed to be taken in pencil only? In pencil only.

65. Would you not suggest that ink be allowed? Certainly not. Extracts should only be allowed to be taken in pencil.

66. How do the Examiners manage? We have in the office a searcher and an assistant who make searches and make returns of all deeds which might possibly refer to property searched for. These are then sent to the Principal Draftsman; the searcher or assistant does not refer to the registrars, but merely takes an extract from the indices. The assistant principal draftsman personally compares the description in the principal register with the report of the search and with the descriptions in the deeds lodged with the application, and marks all those which affect, or may affect, the title in question. After this the papers

A. P. Long. go to the Examiners, and then the Examiners send one of the messengers of the Examiners' Branch with a list of such registers that they require. Until lately, the registers have been brought up to the respective rooms by Hill, the attendant in the Deeds Branch, who sometimes would take them back. When done with, as a rule, they are taken downstairs again by Lilley, the person in charge of the buildings. Generally after 4 o'clock each day, this caretaker goes round the various rooms for the purpose of taking back the registers, or any other books which may not have been previously returned.

13 Oct., 1893.

67. So far as you know, is that the only occasion on which registers are removed from the Search Room? Yes, except for the purposes of being bound.

68. In any other way now that you have stated what your practice is, and as you have said it is necessary to make extracts, can you make any suggestion by the adoption of which the work in the Deeds and Search Branch can be improved or altered? No; I cannot, except stating as a matter of opinion that it seems to me a great improvement could be made if some material change took place in regard to the officers having charge of the supervision of that branch. As to the officers under suspension, I cannot offer any suggestion at present, not being particularly well acquainted with the way in which they perform their duties.

69. Would you suggest that the Deputy Registrar-General should be a professional man? Yes.

70. On what grounds? On the grounds that in connection with the duties of supervising the Deeds Branch he has also to supervise matters relating to the Companies' Acts and the Trades Mark Act, which really call for some legal knowledge. I think also as regards the registration of deeds themselves, and questions arising out of the registration of the various documents which are registered under different Registration Acts, such as the registration of deeds, liens on wool and crops, stock mortgages, etc., it would be desirable to have some person of legal attainments, and it would be preferable to have a professional man.

71. In your opinion, should the Deputy Registrar of Deeds be a professional man? No; I do not consider that it is absolutely necessary that he should be a professional person. I might say that one of the main faults of the existing arrangement is, that the present Deputy Registrar-General is only almost nominally the head of that branch, the main proportion of the work of supervision falling upon the Deputy Registrar of Deeds. As the office is now arranged the Deputy Registrar-General, who is supposed to have supervision over the Deeds Branch, is in a room so far removed from the Search Room as to not have actual supervision, and I think it would be desirable that some alterations should be made in this respect. Of course, at present there are defects in consequence of the want of space in the building, and the arrangement of the room. That might be altered, for there is capability of alteration, but hardly in the present room, as it is so cramped.

72. Have you any suggestion to make by which you think the working of the Deeds and Search Branch can be carried on so as to afford more convenience to the general public? I think it would perhaps be for the public benefit if the Births, Deaths and Marriages, Trades Marks, and Companies' Act Branches were separated from the Deeds Branch and the Land Titles Branch. Such an alteration would, without question, save complications which arise occasionally in consequence of mixing up the different branches. The alteration too would permit of a much closer and better supervision than at present exists. I think I may make this suggestion, that whether the Land Titles and Deeds Branches together be placed under a professional head or not, it is requisite that they should be placed within the administrative control of one of the professional Ministers, preferably perhaps, that of the Attorney-General. With respect to the present Board of Land Titles Examiners the nature and extent of their duties is almost entirely of a formal character, they not having opportunities of actually investigating the matters placed before them, and they acting generally upon the formal reports of the Examiners. Some formal channel through which the cases should be passed is perhaps requisite, but the present Board might with advantage be very well replaced by some other system. As to whether the Melbourne system should be adopted, or whether there should be a new Board created in place of the old Board, and consisting of the Examiners, is a matter for argument. I have not thoroughly thought this matter out in that respect at present.

73. Can you give me any more assistance regarding the working of the particular branch I am commissioned to inquire into? Taking the office as at present constituted, I do not think that I have any further suggestion to make as to the working of the Deeds Branch.

[The witness withdrew.]

MONDAY, 16 OCTOBER, 1893.

[The Commission met at 10 o'clock.]

Present:—

HIS HONOR JUDGE FITZHARDINGE.

William Alexander Abbott sworn and examined:—

W. A. Abbott.

16 Oct., 1893.

74. *Commissioner.*] What is your name? William Alexander Abbott. I am Deputy Registrar-General of the Deeds Branch in the Registrar-General's Department. I have been in the Department for thirty-four years, and I have been Deputy Registrar-General since March, 1884.

75. During that time have you had supervision over the Deeds and Search Room? Yes, your Honor.

76. Are you the officer under whose supervision that room is? Yes.

77. In what part of the building is your room? It is on the right hand, on the basement as you enter.

78. Since March, 1890, has the supervision been otherwise than it was before 1890? About March, 1890, there was a regular alteration throughout the branch—and for the better.

79. In what way? With regard to issuing tickets in all cases where fees were demandable.

80. Before 1890 were no tickets issued? No; they have been issued only within the last three and a half years.

81. Since 1890, you say tickets have been issued; explain what you mean? If a search had to be made any person wishing to search had first to pay a fee when applying for permission. On payment of a fee he received a ticket.

82. What did he do with that ticket? He would generally present it to the book-keeper Hill.

W. A.  
Abbott.

16 Oct., 1893

83. Was it compulsory to present that ticket to Hill or was it left to the applicant's discretion? It was compulsory.
84. What was done with these tickets after Hill received them—had he any particular duty to perform? The tickets are in triplicate form, one is given to the searcher, the other remains in the book. The searcher presented his ticket to Hill and that gave him the right to make a search.
85. Before that date do I understand you to say that no tickets were issued? There were none.
86. What was the practice in vogue before then? Any party coming in first paid the Receiving Clerk a fee and then walked into the Search Room.
87. Who receives the fees paid at present for search tickets? The receiving clerk.
88. What is the name of the present receiving clerk? Since the present Registrar-General assumed office there has been a general change regarding the officers of this particular branch.
89. Is the present receiving clerk under your supervision? Partly under mine and partly under that of the Accountant. He is under mine as far as the deeds are concerned, and he is under the Accountant as far as the fees are concerned. The officer's name is Arthur A. Hiddilston.
90. Where is his room? It is adjoining mine.
91. So far as you know how many persons make searches each day? I daresay there might be from twenty-five to thirty daily.
92. Is Mr. Gillam's room in the Search Branch? Yes; he will know more about that, probably than me.
93. Has the position of the registers been altered since March, 1890? Yes, the room is very much altered for the better.
94. Before 1890, did you receive at any time any complaints from the public as to the manner in which the business was carried on in that Search Room? There were a good many complaints as to the Search Room not being in a proper state for making searches. The general complaint was that the room was most uncomfortable.
95. Since these alterations were made have you received any complaints? No; the alterations gave very general satisfaction.
96. Since 1890 have the searches increased or decreased in number? They have increased very much, mainly I think from the adoption of this system of issuing tickets.
97. Before 1890 what check was there on the amount of fees received for searching? There was no check.
98. Since then there has been a check by reason of this ticket system? Yes.
99. Can you say whether the amount of fees received has increased by the adoption of this system? The amount of fees has increased throughout the branch generally, and the fees received in the Search Department have increased to a very great extent.
100. Have you any idea to what proportion? I should say two-thirds more than previously—seventy-five per cent.
101. Before March, 1890, who was in immediate charge of the registers? Mr. Gillam.
102. Was it part of his duty to see the registers put back in their proper places on the shelves? Hill was the party appointed to look after these things under Mr. Gillam's direction.
103. Had Mr. Gillam the care of the registers and books generally? Of registers and books generally.
104. Has he continued in charge since then? Yes.
105. Has there been any alteration whatever made in that respect? No.
106. Has Hill remained in the same position? He is under suspension.
107. Do you mean that he is now under suspension? Yes, but until suspended, he remained in that position.
108. Who is discharging Hill's duties now? His duties are now divided amongst other officials in that room.
109. How many are there in that room? Eight, I think. Nine including Mr. Gillam.
110. Have they all desks in that room? Yes.
111. Have they an opportunity at all times of seeing what is going on in that room? Nothing can be done without someone or other seeing what is done.
112. Are they all seated behind the counter leading to that glass enclosure? They are.
113. How many as a rule are standing at the counter? About six, I think.
114. I see there are a number of clerks in that branch, Mr. Codrington, Mr. Mann, Mr. Napier, and Mr. Campbell—what are their duties? Indexing.
115. Where do they do that? Each of them has a desk.
116. While occupied in so indexing, they would not be at the counter? True, your Honor; but still some would be in a position to see all that was going on.
117. Would they be at the counter? Not all of them.
118. Is there any copying done in that room—I mean copying by clerks under your supervision? Yes; there is copying done in the Trade Marks Branch.
119. Are any deeds copied? There are no deeds copied.
120. But where are the deeds copied when required? We employ an extra hand for that special purpose and pay him so much per folio; they are copied at the same table and in the same room.
121. For any purpose whatever is any register removed from that room? No Grant register.
122. Is any other register removed from that room? No register is removed; the only books removed are those copies,—that is the deeds are copied into books, and those are the only books removed.
123. Are those removed from the room? Yes; but only to suit the convenience of the party making the search.
124. I wish to be explicit, and so I ask, at any time are any books removed to the Examiner of Titles' Office? Yes, your Honor.
125. Do I understand then that these books are from time to time, when necessary, taken to the rooms of the Examiners of Titles? Yes; the examiners generally take notes from them.
126. Is that the only occasion when any books are removed from the Deeds Room? That is the only occasion.
127. During what hours are searches allowed to be carried on? Between the hours of 10 a.m. and 4 p.m.
128. Without any intermission? Except between 1 and 2.
129. Is the room shut between 1 and 2? No, your Honor.
130. So that searches may be carried on without any intermission? Yes.
131. Is there any supervision over those persons making searches? Hill has always been overlooking them.

W. A.  
Abbott.  
16 Oct., 1893.

132. Is he then the only person who has the overlooking of twenty or thirty people making searches? Yes, sir; there are clerks belonging to the Examiner of Titles—Messrs. Hatton, Mallon, and Lewis;—they make searches in the office during the time, and they, of course, to a certain extent may overlook the others.
133. They may; but I am speaking of persons under your direction—Have you heard that it was stated in the Supreme Court that one of the registers was missing? I have.
134. After that statement was published were you called upon to report to the Registrar-General? I was, your Honor.
135. In accordance with that request did you report? Yes, I did.
136. Have you anything further to add to the report you then made? No, I have not, your Honor.
137. Have you read the report made by Mr. Gillam on the same subject? Yes, I have.
138. [*Report produced.*] Do you approve of this statement in this report? I do, your Honor.
139. Is this the report headed “Sydney” and dated 21st September, 1893? Yes.
140. Are you familiar with the old registers? Pretty well, your Honor.
141. Can you say whether there was ever a “Cumberland register number 28”? We never had such a register.
142. I am speaking now of your own knowledge, can you say whether there ever was a “Cumberland register number 28”? I do not recollect it.
143. That is a register of grants entitled “Cumberland register 28”? We have no such register.
144. Have you looked through the indices to see if there ever was a certain grant? It is not in the indices.
145. When did you first hear that it was alleged that a register was missing? On the day it was brought us in Court,—when those remarks were made by the Chief Justice in the Supreme Court.
146. Was E. C. Hopkins a clerk under your supervision? No, your Honor.
147. In what branch was he a clerk? In the Births, Deaths, and Marriages Registration Branch.
148. Before March, 1890, did you from time to time see him in the Search Room? I have seen him there, your Honor.
149. On many occasions? Yes; a good number of them.
150. On any one of these occasions did you inquire what he was doing there? I did not, for the simple reason that a good many of the books belonging to the Births and Deaths Branch were in the Deeds Room.
151. Are they still in that room or have they been removed? A number are still there, but they are about being removed.
152. Am I to understand that some have been removed? Yes.
153. When were they removed? I think about two months ago.
154. Since March, 1890, have you seen Hopkins from time to time in that room? I have seen him there occasionally, but looking up books having reference to Births, Deaths, and Marriages.
155. You say you have seen him there occasionally looking at books? I have, and I naturally assumed he was there on office business connected with the registration of Births and Deaths.
156. Do you know Charles Jackson Campbell? I do not personally.
157. Do you know him by sight? Not by sight, either.
158. Do you know Herbert Chappel? No, your Honor.
159. Can you suggest any alterations that might be introduced for the benefit of the public in the system of allowing searches to be made? I cannot. I think the system at present is a good as it possibly can be.
160. Can you suggest any improvement as to the custody of registers? No.
161. What are your duties other than having supervision over that room? I take all documents that come in for registration and I sign all necessary receipts.
162. What hours are you in your room? To the public I am there from 10 till 4.
163. Do you leave your room between the hours of 1 and 2 for lunch? I generally go out from half-past twelve till a quarter past one.
164. During your absence is anyone in your room? Mr. Gillam takes my place in my room during my absence.

[The witness withdrew.]

Henry Wheeler Gillam sworn and examined:—

H. W. Gillam.  
16 Oct., 1893.

165. *Commissioner.*] What position do you hold? I am Deputy-Registrar of Deeds in the Registrar-General's Department; I have held that position for eleven years, having been appointed on the 17th of June, 1882.
166. Before March, 1890, what part of the building did you occupy? I was in the Records Room—that is the Search Room.
167. Is that the room in which the indices and registers are kept? Yes.
168. When did you first have your desk in that room? I think about three or four years previous to 1890—about 1887.
169. Did you continue to use that desk till March, 1890? Yes.
170. And since March, 1890, where has your desk or table been? Since the alterations took place, on the 24th May, 1890, I have been and I am now at the eastern end of the same room.
171. Is your desk separated from the rest of the room, at present? Yes, by a glass screen partly surrounding it.
172. Is there a counter between the portion of the room you occupy and that occupied by the registers? There is a counter extending up to my enclosure, but it does not extend beyond it; there is a glass door to my enclosure opening out into the Search Room.
173. Who occupies that glass enclosure with you? No one but myself.
174. How many clerks are there in that Search Room, clerks of the Department I mean? I think there are eleven, including myself.
175. Do you include the copying clerk? No; there are ten besides him and myself.
176. Are all these clerks under your immediate supervision? Yes, and I am including the record attendant as a clerk in this calculation.
177. What position do they occupy in the Search Room? The record attendant, I may say, pervades the Department all day.

178. What are his duties? To generally attend the searchers, and to initial their tickets; to give information of the whereabouts of the registers, and to assist in any way any novice that may come in—to show him the style of searching, and to give him the books that he wants.

H. W. Gillam.  
16 Oct., 1893.

179. Is that to find any books that may be required? Yes; and then to put the books away, and to attend to the requirements of the room generally.

180. Are his duties altogether confined to that room? If the Examiners send for records he often takes them up.

181. At times then may he be away from the room carrying records to and from the Examiners who have their rooms in a different part of the building? Yes.

182. But other than that, are his duties altogether confined to that room? Yes.

183. Does he act as messenger for you? Yes; I have sometimes occasion to send him into the vaults to procure old records.

184. During the time that he may be absent does any other clerk take his place? He would only be absent for about five minutes.

185. So that his absence being for such a short time would it be necessary to call upon others to perform his duties in the Search Room? No.

186. Where are the other clerks situated? Their desks range from my office partition to the northern wall of the building inside the counter already referred to.

187. Are the other clerks then in the space north of your enclosure, inside the counter, and extend to the northern wall of the room? Yes; that is so.

188. Have they standing desks or tables? Standing desks, but may I be allowed to state that there are seats for their use if they choose to sit down. Two clerks sit at the table in the centre of this space.

189. Are the public allowed behind that counter? No; they are not.

190. I ask this question because I saw some there the other day? I was about to make an explanation in reference to that question.

191. How do you answer the question now? I will say that the public are not allowed behind the counter with one or two exceptions.

192. What are those exceptions? The Trades Protection Society are allowed on payment of a fee to take particulars of stock mortgages and of the liens on wool and crops and also particulars regarding public companies; the fees received for this purpose form a considerable item, for there are sometimes as many as sixty at a time; the fee charged is 1s. each.

193. Do I understand that this privilege is only allowed to one or two persons? Yes; because somebody might come into this place having no particular business to do. I may state that ink is not allowed outside that counter.

194. But inside may they take extracts in ink? Yes; under supervision.

195. Inside is the supervision more strict? Yes; much more. It is strict all round too. We have them all under our eyes there. There are thirteen or at least a dozen persons watching. If a person wishes to take a copy of a deed he must only do it under the same conditions as those inside the counter.

196. But if a copy be ordered, what do you do? That is made by the copying-clerk, who generally works in the Land Titles Office. The register is then removed to the Land Titles Office, and a copy is made by the official copying-clerk, Mr. Fitzpatrick, who is paid so much per folio.

197. Do you, in practice, find that the present arrangement of the office is better than that which obtained before 1890? It is as light to darkness now to what it was before; there is no comparison, as the present arrangement is so much better.

198. In addition to the alterations made in the position of the clerks, have the shelves on which the registers are kept been in any way altered? The whole of the position of the registers has been altered.

199. For the better? Yes, sir. What were irregular places previously have been removed and now the shelves run in parallel lines, each line being visible to the clerk inside the counter.

200. In what parts of the room are the searches actually made? In the northern end. The searching-table runs from east to west, along the northern end of the room.

201. But is that the only search-table? These are the indices, and there are two small tables back-to-back because of the limited space.

202. Are these the only search-tables; are there not some search-tables in the alley-ways? The indices of the years before not yet copied are in the principal entrance, half-way down the principal entrance and the current indices are at the clerks' counter—in under the clerks' counter.

203. How many clerks stand at that counter? They are all mostly at that counter, up and down all day getting indices.

204. If an index is required—current index I mean—is that obtained from a clerk and not from Hill? The clerks get it themselves from the counter; they walk across a little space in the room to get it out. Besides that there is a counter-clerk always at the counter or at his desk.

205. Is there any one clerk whose duty it is to remain at that counter? Mr. Napier is counter clerk to attend to the public.

206. Before 1890, did you hear, at any time, of any complaint from the public as to the manner in which the business was carried on in that branch? They used to speak about the bad arrangement.

207. What was then the disposition of the registers? In the disposition of the registers there was a want of uniformity; and there was, too, a very bad light.

208. Since 1890, have there been any complaints to the same effect? No, sir.

209. Do I understand that the complaints have altogether ceased? There has been universal praise of the new arrangements of the room.

210. On an average, how many persons are searching each day? I should think there would be about thirty or more.

211. And how many, on an average, at the sametime? I counted twenty on Friday last.

212. Is that a fair average? I think so; I have seen more in the room at one time, but you may take that as an average.

213. When does the searching commence? At 10 a.m., and lasts till 4 p.m.

214. Is there any intermission? No, it is continuous.

215. Do you find the attendance to be as numerous between 1 and 2 as in other hours of the day? There are few searching between 1 and 2.

- H.W. Gillam. 216. At what time do you leave your room for lunch? At half-past 12 I take Mr. Abbott's seat while he goes to lunch. I have my lunch afterwards, leaving at a quarter past 1, and returning at 2 o'clock.
- 16 Oct., 1893. 217. Do you leave your table for Mr. Abbott's chair at 12:30? Yes.
218. Between 1 and 2 what clerks remain in the Search Room? The record attendant has his lunch in a recess, and he sees everyone who comes in, although he is not on duty.
219. Who are the other clerks in that room on duty? There is Mr. Kelleher, who is a temporary official, Mr. M'Guire, and three or four others, always there.
220. Do I understand that they have no opportunity of leaving the premises during office hours? No; they go out on an arrangement; one goes at an earlier hour, and another follows after his return.
221. Do I understand, then, that the clerks relieve each other, and that at no time are there less than three on duty in that room? No less than three, say.
222. Can you suggest any improvement either in the disposition of the registers, or the conduct of the search business in that room? With the space at command the disposition of the registers could not be improved.
223. Could the manner of allowing the searches to be made be altered for the better? Not under the present Act, by the provisions of which anyone is allowed to search, after payment of a fee.
224. In what way would you suggest that the law should be improved? Well, sir, there are two ways, one of which is the appointment of professional searchers. Secondly—searchers should be licensed, and no one who has not obtained the permission set forth in a license, for which a fee shall have been paid to the Registrar-General, should be allowed to search. Extra observation has often been given to people searching—people whose characters are known to be shady. Perhaps I might state, by way of example, that whenever we have been informed, or have ascertained that there is occasion for extra supervision during the making of the search, I take steps accordingly. I have often mentioned to the book-porter that it was necessary for him to look sharply after so-and-so.
225. Are extracts allowed to be taken from the register? Yes, by the provisions of the Act.
226. In what section of the Act is that provision? The Act is 7 Victoria No. 16, clause 14, and clause 29; schedule B also fixes the charges. I do not know anywhere in the Act where it specifically states that extracts may be taken, but this permission is implied all through the Act.
227. What other documents do you wish me to see? I have a list of the improvements made in the Deeds Branch since 1890.
228. Have you had this prepared for the purposes of this inquiry? Yes, sir; I hand it in as a memorandum of the alterations and improvements that have been made in the Search Room since 1890. [*Document handed in marked Exhibit "D".*] I also hand in a plan of the Search Room as it was before alteration. This was prepared by the assistant chief draftsman after consultation with me.
229. So far as your memory serves you, this gives a correct idea of the arrangement of the room as it was? Yes. [*Witness wrote on plan "entrance for the public." Document handed in and marked Exhibit "E." Witness was also requested by the Commissioner to have prepared a ground plan showing the present arrangements of the room.*]
230. Are there any documents you wish to show me? I have a grant register here.
231. What is that in connection with? It is in connection with the document alleged to have been missing.
232. During the hearing of the case, Campbell against the Anglo-Australian Investment Finance and Land Company (Limited) in the Supreme Court, did the question arise as to a certain register—were you in Court then? Just for about a quarter of an hour.
233. Did you hear the remarks of the Chief Justice? Yes; I heard his concluding remarks.
234. Were you afterwards called upon to make a report? Yes.
235. On the 21st of September, in consequence of instructions received, did you report to the Registrar-General? Yes, sir.
236. Do you wish to add anything to that report? I thoroughly endorse all I previously said, and I think that report states the case fully.
237. As I wish to regard the report you then submitted as evidence I will read it to you, and it can be embodied as part of your sworn testimony. You say:—

*In re Campbell v. Anglo-Australian I. F. and L. Co. (Ltd.)* The Registrar-General having called for a report touching the strictures passed upon the Registration of Deeds Office by His Honor the Chief Justice, I have the honor to append the following facts in answer thereto:—The Deeds Record Room, which is fire-proof, contains about 1,000,000 documents, composed of grants, deeds, public companies records, trades marks, &c. &c., the majority of which documents are bound in registers. The room is so much congested by the vast number of records that the space at command is reduced to a minimum. Any person on paying a fee of 2s. 6d. for each search, is entitled to search the indexes and examine the registers (*See Clauses 14, 29, and Schedule B, Registration of, 7 Vic. No. 16, Deeds Act*). Search clerks are employed by all the principal solicitors in tracing titles. Often twenty to thirty gentlemen are employed at the same time in this way. As it is necessary that the result of their searches should be communicated to their employers, with certain restrictions references and extracts bearing upon the title are permitted to be taken. These references are only in pencil, the use of ink being rigorously forbidden. I may state that searching without references being allowed would be valueless, as solicitors would have no data as to encumbrances, &c., upon which to prepare their conveyances. The Deeds Record Room is under my immediate charge and direction as Deputy Registrar of Deeds, my office being shut in by glass, and being situated at the head of the room leading to a large open office containing about twelve clerks. The whole of the records are in presses situate at right angles to the counter within which my staff work, this giving a clear view to these officers of the whole of the room. Mr. Hill is the record attendant under me, and it is his duty to attend to the requirements of the room, examine the searchers' tickets, make grant searches, &c. It must be understood that on no account are the public allowed the use of these grants, indexes, or registers without an officer of the department being with them, nor is it possible for any person to search them (situated as they are close by the clerks' desks) without being observed. It would in my opinion be impossible to observe greater caution with regard to their use than has hitherto been obtained. No register whatsoever in the possession of the department in May last has since been found "missing" despite any evidence to the contrary. With regard to the reported loss of Cumberland register 28, I can authoritatively state that no such register of grants ever existed, nor could it have existed, as is borne out by corroborative evidence. The grants, which are closely packed together, having no space left which would denote a missing number, nor do the indexes, which are perfect, give any reference to any Cumberland register 28. The fact is that sometime in May last the Principal Draftsman (Mr. George Evans, solicitor, being with him), sent down for the 1833 register of grants, in order to ascertain whether any reference was made in it to the presumed forged grant. On looking through the register they found that there was no grant in it corresponding with the said presumed forged grant, naturally they imagined the date being similar that the reference in our register would correspond with that on the document they held in their hands. Mr. Evans personally saw me as to this register, and each time asked for Cumberland register 28, and seemed annoyed that I could not produce it. The only register 28 we possess I showed him, when he stated that it was not the one he wanted. The Registrar-General and the Principal Draftsman were with me yesterday in the Record Room when grant register C (containing grants from 1830 to 1834) was shown

shown him, when the Principal Draftsman admitted that it was the same register which had been shown him in May last, and that if he said it was the "Cumberland register 28" that he had seen, he had stated so in error. The only Cumberland registers are those relating to the very early grants, and end in December, 1809, as only grants in the county of Cumberland were issued in the early days. I cannot see in what way the public interests could be better conserved than at present. Since the present Registrar-General assumed the office in 1890 the disposition of the presses in the Record Room has been materially altered, in order to give complete oversight, and I firmly believe that the present system is as perfect as it can well be. Under the present circumstances the only perfect check would be the employment of professional search clerks, and excluding the public altogether from the Record Room. This innovation, however, would entail great expense on the Government, and would require a large staff of search clerks, attendants, &c. The space at command would not permit of the necessary change, as an essential to its success would be a large counter placed at the end of the building, at which all business and references with regard to searching, &c., could be done. I am, however, well assured that the profession would object to the innovation, and would generally refuse to accept the search furnished them. In concluding, I may state that the evidence which led to the Chief Justice's remarks was given by irresponsible persons who were not intimately acquainted with the practical working of the room, and was given by them under an almost complete misapprehension of the facts of the case. With regard to the alleged pecuniary connection of Messrs. Hopkins and Hill with Messrs. Chapple and Campbell, I find that after strict inquiries that it totally ceased in 1889, ere the present Registrar-General assumed office.

H. W. Gillam.  
16 Oct., 1893.

238. Having heard me read your report are you still as positive that there was no "Cumberland register 28" as you were when you wrote this report? Yes, sir. I have made a further search since, but I have failed to trace any such register.
239. Have you not been able to find "Cumberland register 28"? No, sir.
240. Or any reference to any such register or any reference in the indices? I have gone carefully through the indices within five years of that date and I cannot find anything.
241. Do you say Mr. Pearson, the Principal Draftsman, admitted that it was register "C" that he had seen and not "Cumberland register 28"? He said that it was a written register he had seen, and register "C" is a written one.
242. Has there been any complaints at any time of any register being missing? No, sir; I have never heard of any register being missing.
243. Do you say distinctly that so far as you know there was no missing register? There was no missing register, although I must speak to a certain extent with a little reservation. I believe some years ago a deed was cut out. I know nothing of certainty with regard to this deed, but I simply heard of it.
244. How many years ago is that? I should think it was about eight or nine years ago.
245. How did that information come to you? I merely heard somebody talking about it.
246. Did you examine the register from which it was said that this deed had been cut or taken? I never got sufficient information as to the whereabouts of this thing; it was before I took charge. The Deeds Room, as previously arranged, would have permitted of anything like that being done. Under the present arrangement, however, that is hardly possible.
247. Do you say then, practically, that the supervision was so lax before that the registers might have been tampered with? Yes.
248. Is this book you hand to me supposed to be a catalogue or inventory of grants—when was this made out? This has been only recently prepared. As a proof to show that nothing was missing we have gone through every index in the place and find there is nothing missing.
249. What does this inventory show? An unbroken continuity of the deeds and dates.
250. Has this inventory been made under the direction of the present Registrar-General? It has been made with his approval.
251. You will see that the supposed missing grant is said to have borne the date of January, 1833—if there was such a grant dated 1833 where would it be shown in this catalogue? It would come in here [*witness pointing to a place marked "C"*]. It was asserted that this grant, dated January, 1833, was in "Cumberland register 28." We had no such register, as Hill showed in his evidence that the register referred to was not "Cumberland register 28" but Purchases and Special Grant Register "C" from 6th of January, 1832, till 22nd January, 1834.
252. Was Hill right, then, in his evidence? Yes, sir.
253. In his evidence did he say that "He knew that Mr. Evans and Mr. Pearson looked through a Cumberland register last May. The book he (witness) produced that morning was the book they saw, and if they swore that it was not they were under a misapprehension. He got it from the same spot, and it was the identical book they looked at in May last. He knew the book that he produced was not a Cumberland register but a register of land all over the Colony, and that was the book Messrs. Evans and Pearson saw. If there was a Cumberland register he had never seen it." You say there never was a Cumberland register, and that Mr. Pearson afterwards admitted that the book he saw was "Purchases and Special Grant Register C"? It was book "C" before you, having reference to special grants from January, 1832, to January, 1834, written in manuscript, and which now is number 31 in the registers.
254. Do you say now you are confirmed in your belief by the fact that "Cumberland register 28" does not appear in the inventory of grants and the register indices? Yes.
255. Which was prepared when? It was prepared about the middle of last week; and it was prepared in consequence of the impression which arose in the Supreme Court. While I was checking the grants right through I thought I might as well have an inventory made of them. I have searched the indices carefully and there is no record of such a grant as that mentioned in the case, and there is no trace of the register which is supposed to have existed. Mr. M'Kern, of the Lands Department, who has had charge of the deeds down there for many years, and who has had frequent access to our registers as well as his own, also says that no such book could have existed.
256. Are you, therefore, strengthened in your opinion by the statement of Mr. M'Kern? Yes.
257. Were there any other officers in your department except E. C. Hopkins, who had any right to be in that Search Room except for certain purposes? No, sir, except by express permission.
258. Did his duty only bring him into that room for the examination of records having reference to births, deaths, and marriages? Yes; and he was in and out of the room frequently for that purpose.
259. Had he a right there? Yes; but what I say is that he would have no right to our portion of the Search Room.
260. Had he a right then as his duties might take him to the Search Room, but only to that portion where the registers of births, deaths, and marriages were kept? Yes, that is so.
261. Before 1890 did you at any time see him in any other portions of the room? Yes.
262. On many occasions? On several occasions.

- H. W. Gillam. 263. Do you know what he was doing on these occasions? Searching at the table.  
 16 Oct., 1893. 264. Do you know what he was searching for? No, I do not know.  
 265. Do you know whether he was searching in indices or registers? I cannot say, it might have been indices and references to registers of deeds.  
 266. Being in the office would he have access to these indices and registers without getting special permission from either you or from the Registrar-General? At all events it was not given; permission was not asked and permission was not given by me.  
 267. And how long did he continue so to prosecute searches in that room? When I was placed in charge of the room, in 1890, the Registrar-General gave me express directions not to allow searchings by officials of the department.  
 268. Was Hopkins' name specially mentioned? It was specially mentioned.  
 269. Since then, have you seen Hopkins at any time searching? Not once since.  
 270. But before 1890, had you at any time seen any other clerks in the Registrar-General's Department searching in that room? Mr. Roberts, a bookbinder, at one time used to search.  
 271. On many occasions? I have seen him there often.  
 272. Any other clerks? Hill often searches at my request; what I call often is perhaps two or three times a week. For instance, a letter will come from the country asking for particulars of a certain search and enclosing the necessary fee, with the request to know whether the land in question is still in the hands of the grantee. I then pass the search over to Hill with the request that he shall obtain the necessary information. It is part of his duty for which he gets no special nor private fee.  
 273. So that Hill searches, but only after having been instructed to do so by you? Yes.  
 274. Would the mere fact of making these searches make him conversant with the books? Yes.  
 275. In addition to Hopkins and Hill, have any other clerks at any time used either the indices or the registers? Without express permission, no one is allowed access to these books unless, perhaps, there is some private matter concerning which information is required. Permission is then accorded, but such would not occur more than once in six months.  
 276. How is that permission given—in writing or by word of mouth? By word of mouth, but it is very seldom that such permission is granted, very seldom indeed.  
 277. And then only in reference to matters of private interest, and not in connection with the public? Yes; just private matters, and I say that these are of rare occurrence.  
 278. Since 1890, have you noticed at any time any of the clerks making searches? Only in the cases I have just mentioned—isolated cases—and then with express permission.  
 279. Who would give that permission? Mr. Abbott or myself.  
 280. Was there much general searching before 1890? Yes; there seemed to be a great deal of it.  
 281. Of course, I mean by clerks in the office? I have seen others, but I cannot remember who, beyond those I have mentioned.  
 282. And are they Hill and Hopkins? Yes; but Hill only, as far as I know officially.  
 283. Do persons who wish to search have to pay a fee before so doing? Yes.  
 284. Who to? They get a ticket at the counter outside my room—from a desk outside my glass door. Then the intending searcher leaves the room and pays the cashier in the public office outside the Record Room. Searchers come in, get a ticket, then go out and pay the fee to Mr. Hiddilston.  
 285. What check is there to show whether the fee has been paid or not? They then go to the record attendant and ask for the book they require, and that book is not produced until the search ticket is handed over to, and initialed by, the record attendant.  
 286. Does the search ticket show the amount of fee paid? Yes; the search fee is 2s. 6d., and this is stated on the ticket which is taken by the record attendant.  
 287. Which clerks issue search tickets? Mr. Napier and Mr. Mann, but mostly Mr. Napier.  
 288. Does any person wishing to have any communication with you or any of your clerks, either on public or private business, have to come through the Search Room? Yes.  
 289. In coming through the room has he to pass the shelves on which the registers are kept? Yes.

[The witness withdrew.]

MONDAY, 23 OCTOBER, 1893.

[The Commission met at 10 a.m.]

HIS HONOR JUDGE FITZHARDINGE.

Robert Mead Pearson sworn and examined:—

- R. M. Pearson. 290. *Commissioner.*] What is your name? Robert Mead Pearson. I am Principal Draftsman in the Registrar-General's Department. I joined that department on the 1st January, 1863, so that I have been there thirty-one years within two months.  
 23 Oct., 1893. 291. Have you anything directly or indirectly to do with the Search Room? Yes, directly.  
 292. In what way? In the examination of search papers. That I did for twenty-five or twenty-six years, but Mr. Lewis is doing it for me now.  
 293. Do you visit the Search Room? Occasionally.  
 294. Before 1890, used you to visit the Search Room more frequently than since 1890? Yes; a great deal more, in fact every day.  
 295. While you were in the Search Room did you notice any irregularities either in the conduct of searches or in any other matter connected therewith? Twice I complained to the Registrar-General of one of the Births, Deaths, and Marriages officials, Mr. Hopkins, whom I noticed perpetually in the Search Room examining registers which he had no right to examine.  
 296. You complained, I presume, to the late Registrar? Yes; to the former Registrar-General, Mr. Ward.  
 297. When was the last occasion you thought it necessary to make that complaint? It must have been five or six years ago.  
 298. Did anything follow from your complaint? Nothing.  
 299. So far as you can say was there no serious attention paid to it? No.

300. After your complaint did the same state of things continue? As far as I know it did; but after that I did not have so much to do with the Search Room.
301. So long as you continued to visit the Search Room almost daily did you see a continuance of the same state of affairs? Mr Hopkins was perpetually looking at registers with which he had nothing to do.
302. Did you notice any other person examining registers? Several times he had somebody with him, strangers to me.
303. Strangers to you? Yes.
304. Did you notice any other irregularity in that room? No; I do not remember anything beyond that. What brought it under my notice particularly was that Hopkins had no business looking at those registers which had nothing to do with the Births, Deaths, and Marriages Branch of the Registrar-General's Department.
305. Do you say that you complained on two occasions? Yes; on two occasions.
306. Can you remember what interval elapsed between these two occasions? I think there was several months' interval. There was nothing done in the first instance and I complained again.
307. Can you tell me what year you left off visiting that room so frequently? I suppose it was about three years ago. The work was becoming so extremely difficult, as far as regards the examination of titles, that I had to get Mr. Lewis to help me, and he now generally deals with the examination of searches.
308. Is that Wilfred De Courcey Lewis? Yes. He would be able to give more accurate information than I can relative to the year he commenced the examination of searches.
309. Since the appointment of the present Registrar-General, you say, you have only from time to time been in the Search Room? Yes; not very often.
310. Have any alterations been made in the disposition of the registers and indices in that room? Yes; we were obliged to find more room for the books which were jammed into all sorts of corners. It was a most insane disposition of the books and indices altogether.
311. Have you noticed that the position of the shelves or presses used for registers and indices have been altered since the time of which you speak? Yes, it has.
312. In your opinion, has the alteration been for the better or otherwise? I think the whole disposition of them is false from top to bottom. It is utterly useless for the purpose of a Search-room.
313. With the space at command, can you suggest any alterations? That is almost impossible, as I think the present room is quite unfitted for the purpose to which it is devoted.
314. Since the appointment of the present Registrar-General, have you noticed that the desks or tables used by the clerks have been altered? Yes, and improved upon.
315. Do you consider the present arrangement is an improvement upon the old one in that respect? Yes.
316. In your opinion is the present supervision of searches sufficient? No: not by any means, quite insufficient.
317. Can you suggest what plan or system might be adopted with advantage? Only by having a new room altogether.
318. I mean what alteration could be made with advantage in the present room? I do not think there is any possibility of improving the present room.
319. In the matter of supervision could any improvement be made? Yes: I think we want more book-porters, reliable men, for this position. Those badly lighted passages in the Search Room are an abomination.
320. In your opinion how many book porters would be necessary in the present room? I think there should be at least three going up and down those passages.
321. I assume that in your opinion not one of the three should be allowed to leave the room on any pretence? No.
322. At present can any searcher remove a register from the shelves without the intervention of any clerk? Yes; easily.
323. So far as you can see could any searcher have access to any register or index without being under supervision? Yes.
324. In your opinion could any register be removed from that room by a searcher? I do not see what could prevent it.
325. So far as you know are registers ever removed from that room? Yes; daily.
326. For what purpose? For examination by myself and by the Examiners of Titles. The Examiners get up as many as twenty-five in a day. This may occur sometimes, but not on an average.
327. If you require a register how do you obtain it from the Search Room? I send down one of the draftsmen with the number of the book and he brings it to me.
328. Does he leave any written memorandum stating that he has taken the book? Not that I am aware of.
329. Do you send any memorandum to the officer in charge of the room? Simply a slip of paper containing the number, just to show him what book to get.
330. Do you mean to say that he takes the book or register from the shelves himself? He gets it from one of the clerks, or the book-porter.
331. Supposing the book-porter be absent, what then? My draftsman would possibly get it himself, and bring it to me.
332. Do you send any particular draftsman on this mission? No; I send the one who happens to be handy at the time.
333. If the register be brought to your room, when would it be returned? It would remain there till the book-porter came for it, and that might not be for a week.
334. Would that book then remain in your room the whole time? Yes, the whole time.
335. Is your room fire-proof? It is supposed to be.
336. As fire-proof as the search-room? No; I do not think it is so completely fire-proof as the search-room is.
337. At what time does work commence in your room? It is supposed to commence at 9 o'clock in the morning, and a quarter past 9 is the limit.
338. I am now referring to the draftsman's branch of the Registrar-General's Department—what time does the work commence in the draftsman's branch? The latest is at a quarter past 9.
339. And at what time do the draftsmen leave that branch? At half-past 4 o'clock in the afternoon.
340. Do the draftsmen leave at half-past 4? Yes.
341. Do they work over-time? No.

R. M.  
Pearson.

23 Oct., 1893.

R. M.  
Pearson.  
23 Oct., 1893.

342. In addition to books being carried to your room, do you know whether books are taken to any other part of the building? Yes; to the rooms of the three Examiners—sometimes ten or a dozen books at a time.
343. Do your duties from time to time take you into the Examiners' room? Yes, daily.
344. And in these rooms do I understand you see the number of registers there? Yes.
345. Are these registers which you see there on these occasions collected and replaced on their respective shelves each evening? I cannot say. They are generally lying in the passage when we go away in the afternoon; they should be taken away and placed on the shelves, there is no doubt about that.
346. Do you work over-time? No, sir, nor do any of the draftsmen work over-time.
347. Have you ever heard of any register having been tampered with? No.
348. Did you ever hear of a register having been mutilated? No.
349. Supposing there had been any mutilation of a register would you probably have heard of it? Most likely.
350. As the room is now arranged would there be any difficulty if a person were so minded in tampering with the registers? No difficulty whatever.
351. By cutting out a deed or deeds? No; nor by scoring some important part from a deed.
352. Or obliterating any material part or parts of any deed or deeds? No.
353. Did you give evidence in the case of Campbell against the Anglo-Australian Investment, Finance, and Land Company, Limited? Yes.
354. On that occasion did a question arise as to the existence of a register called "Cumberland register, number 28"? Yes.
355. In that way was that register referred to while you were in the witness-box? Yes.
356. Did you ever see such a register? No.
357. Did such a register ever exist? I believe not.
358. In company with Mr. George Evans, a solicitor, did you examine some register? Yes.
359. Can you tell me what that register was? It was "Special Grant Register C."
360. Was the register which you had examined in May last, and which was not produced to you when you were in the witness-box in the Supreme Court, "Cumberland register, number 28"? No.
361. Can you remember what register it was which was then produced to you? It was "Book, Number 28."
362. Were you then asked if that was the register you and Mr. Evans examined together? Yes; and my reply was "certainly not."
363. Did you also add to that answer "I am under the impression it was written throughout and not in print as "Book 28," and which contains only grants made in 1835. I am positive it is not the one we examined together"? Yes.
364. Can you explain how "Book 28" came to be described as "Cumberland register, number 28"? I think it was owing to some confusion in Court before I was called as a witness.
365. Is there a "Book Number 28"? Yes; but no "Cumberland register, number 28."
366. On the morning following that on which you gave evidence in the Supreme Court did you see that particular register in the Search Room of the Registrar-General's Department? Yes; in the Search Room.
367. Was that the book examined by you and Mr. Evans previously? It was; and as I mentioned in the witness-box it was written and not printed.
368. And did that register "C" pertain to purchases and special grants? Yes; and it was the one that should have been produced in Court.
369. Was that the one referred to as "Cumberland register, number 28"? Yes.
370. A name by which it was never known before? Exactly.
371. Does that register "C" of purchases and special grants contain grants having reference to counties other than the county of Cumberland? Yes, it does. It was absolutely a misnomer to call it a Cumberland register.
372. In your opinion, did the mistake arise through that register being called a Cumberland register? Exactly so.
373. After it was stated in Court that a register was missing, were you asked to report upon the matter by the Registrar-General? Yes.
374. On the 21st of September, 1893, did you report in accordance with that request? Yes.
375. In your report, did you explain materially what you have said in evidence to-day as to how the mistake arose? Yes.
376. Have you ever heard it stated that any register was missing? No.
377. In your opinion, is it necessary that searchers should be allowed to take extracts? I think extracts are indispensable.
378. Would it be possible to conduct a search effectually without taking extracts? I think not. There are professional searchers who have to take extracts in the interests of their clients.
379. Setting aside professional searchers, I would ask you is it necessary that every applicant should be allowed this privilege? In my opinion, searchers could not get along without making extracts—it is absolutely necessary to do so.
380. During the trial of the case I have already named was a document handed to you which purported to be grant number 33 to Annie Gore? Yes.
381. Which you stated unhesitatingly to be a forgery? Yes, it was an absolute forgery.
382. Where is that document? Impounded, I believe, by the Supreme Court.
383. Have other grants come before you which, in your opinion, have been forged? Conveyances, I believe, several, but not grants.
384. How many? I think there must have been six or seven.
385. Do you know by whom these were lodged? I have not got the name of the applicants.
386. Are these applications still pending? Yes.
387. Do you remember the number of these applications? The numbers are 8,920 and 9,065.
388. Can the papers lodged with these applications be withdrawn at any time? Yes; after formal application to the Registrar-General.
389. Would you kindly furnish me with a rough sketch of a Search Room as, in your opinion, such a room should be? I shall, with pleasure.

[The witness withdrew.]

Henry

Henry Charles Edwin Newcombe sworn and examined :—

390. *Commissioner.*] Are you Deputy Registrar-General of the Land Titles Branch of the Registrar-General's Department? Yes; I have occupied that position for a little more than ten years, having been appointed thereto in April, 1882.

H. C. E.  
Newcombe.  
23 Oct., 1893.

391. During that time have you had anything to do with the Search Room of the Deeds Branch? Nothing whatever.

392. Have you been from time to time in that room? I have been rarely in it—very seldom.

393. Can you give me any assistance in the matter into which I have to inquire? I am not intimately associated with the Deeds and Search Branch. I am in the Land Titles Office, and very rarely do I enter the Deeds and Search Branch.

394. Within the last three years, since the present Registrar-General was appointed, have you been officially in the Search Room? Once or twice.

395. Have you heard of any complaints concerning the way in which business is conducted in the Search Room? I have heard of such some years ago.

396. Do you mean that these complaints applied to the period prior to the present Registrar-General taking office? Yes; long before that.

397. Have you heard of any complaints of late years? I have not; I think the office is now working very well indeed.

398. In your Department of the Land Titles are the public allowed to make searches? Yes.

399. What system of searching is in vogue in your Department? Any person wishing to search obtains a ticket at the counter and pays a fee. He produces the ticket to the counter clerk, who hands to him the registrar or dealing book, as the case may be.

400. Does the searcher make his examination at the counter? Yes.

401. Is he allowed to remove the register or any other book from the counter? No; he searches at the counter.

402. So that the register is always under the direct supervision of a clerk? Undoubtedly.

403. Is the searcher allowed to take extracts? Yes.

404. In ink, or in pencil? With a pencil only.

405. How many persons do you think on an average search daily? The number fluctuates a great deal; on an average for the year, I should think about ten or twelve daily. I have seen from fifty to sixty books on the counter at one time in use by persons searching. The hours during which we are most busy are between 12 and 1, and between 3 and 4, but particularly during the last-mentioned period. We are open to the public until 4 o'clock—from 10 till 4 o'clock—and from 3 to 4 in the afternoon is the busiest hour of the day.

406. How many clerks supervise this searching? One.

407. Do you find that one clerk is sufficient supervision? Yes; I think one clerk is.

408. Do you think that this system which you have adopted works satisfactorily in the public interest? Yes; I do indeed.

409. In your opinion, does the system give general satisfaction? Yes; the only fault found is that the counter at which this public business is transacted is not large enough.

410. If the counter were larger, would you require another clerk to supervise the searching? No; a larger counter would give greater convenience by affording more space for the books used in searching.

411. How many registers have you in your Department? More than 1,100, in addition to the transfers and the dealing book.

412. How many dealing books have you? We have in the Land Titles Office 1,105 registers, containing Crown grants and certificate of title bound, and three volumes complete awaiting binding, making in all a total of 1,108. There are also 2,074 "dealing books" bound, and 101 volumes awaiting binding; also 204 books bound containing discharges of mortgages and fifteen books bound containing orders for balance certificates, these making a total of 2,394 dealing books.

413. Since the present Registrar-General was appointed, have you noticed any alteration in the disposition of the presses or shelves on which the registers are kept? Yes.

414. For the better? Much—a long way for the better, as the presses have been rearranged.

415. With the space at command, could you suggest any improvement in the arrangement of the Deeds and Search Room? No, I could not, your Honor. I think, you could not do any better than is done now, so far as the presses are arranged.

[The witness withdrew.]

William Wentworth Bucknell sworn and examined :—

416. *Commissioner.*] Are you a clerk in the Births, Deaths, and Marriages Branch of the Registrar-General's Department? I am, and I have been in that branch since September, 1884.

417. Are the registers of births, deaths, and marriages kept in the Deeds and Search Room? They have been until lately, your Honor.

418. Are they all removed now? With the exception of the current registers which are placed there for daily use.

419. Was Edmund Conroy Hopkins a clerk in the same branch? Yes; he was a clerk there when I came.

420. Do your duties from time to time take you into the Search Room? They have of late, your Honor—that is for about the last three years, I think.

421. For what purpose? For checking searches.

422. Explain what you mean by that? For instance, if one of the public applies for a certificate of the registration of a birth, death, or marriage, or of the registration of a baptism, marriage, or burial, a junior clerk makes the search, and if he is unsuccessful in that search the application is handed over to me and I make a search.

423. And to make that search have you to go into the Search Room of the Deeds and Search Branch? Yes, your Honor.

424. Do your duties take you into the Search Room frequently? Several times in a day I have been there.

425. If the junior clerk is successful in his search and makes the required extract who examines that with the original? At present the chief clerk, Mr. Daves.

W. W.  
Bucknell.  
23 Oct., 1893.

W. W.  
Bucknell.  
28 Oct., 1893.

426. Whose duty was it to do this before it came to Mr. Dawes? It was the duty of E. C. Hopkins.
427. For the purpose of making that examination would Hopkins have to visit the Search Room? Yes, your Honor.
428. To what part of the Search Room would his duties take him? To the desk where the junior clerk would be sitting.
429. In that portion of the room where the registers of births, deaths, and marriages are kept? Yes, your Honor.
430. Have you to go into that Search Room for any other purpose than to examine the register of births, deaths, and marriages? Yes.
431. For what purpose? For the purpose of putting the marriage certificates away in the presses.
432. In what part of the room are these presses? These presses divide the room from that portion where the indices are kept.
433. Is it only to that portion of the room where the registers of births, deaths, and marriages are kept that your duties take you? Only to that portion of the room.
434. Have you any right to search in, or take extracts from any of the registers of deeds? No; unless it should be in regard to land of my own.
435. And should you require to examine the register for any private purpose would you have to obtain the permission of Mr. Gillam, the officer in charge of the Deeds and Search Room? Yes.
436. Has that occasion happened to you Mr. Bucknell? Yes.
437. On how many occasions has this occurred? On one occasion in regard to my mother's property, and on another occasion sometime ago when a man wrote from England, asking for certain particulars with regard to certain land.
438. You say on one occasion for your mother's property, and on another in reference to an application from England? Yes.
439. Who directed you to make the search on these occasions? Mr. Dawes, I think.
440. Is there any other occasion on which you made a search? On one occasion for my brother-in-law, Mr. Badgery.
441. Are these the only occasions on which you have searched? Yes.
442. And in each of these instances I understand you obtained the direct permission of Mr. Gillam who is in charge of that room to make the search? Yes, your Honor.
443. Would it be possible for any person or for any clerk from your branch to search the registers without permission? I really think they could, your Honor.
444. Without a ticket or permission I mean? Yes; I think a search could be made without permission, your Honor.
445. If any clerk had a right to go into that room would he have any difficulty in searching any of the registers? No, he would not if the clerk understood searching.
446. If a clerk understood searching as you say, could he go into the room for one purpose and while there make any search he chose? Yes.
447. During how many years has Hopkins been in the habit of visiting the Search Room? That I cannot tell; he was there before I went into that branch.
448. During the last three years has Hopkins been in the habit of visiting the Search Room? Yes, your Honor.
449. Has his ostensible reason been to examine extracts made by the junior clerk, whose duty it has been to comply with applications made for particulars referring to the Department of births, deaths, and Marriages? Yes.
450. On any occasion when you have been in the Search Branch, have you noticed any irregularities? No; I never saw any irregularities.
451. Not in the manner of conducting searches, nor in any other way? No, your Honor.
452. Do you work overtime in your Branch? I do, your Honor.
453. Did Hopkins work overtime? Yes, he did. He worked overtime before I came into the Department.
454. While working overtime have you access to the Search Room? Yes, your Honor. We make our examinations in the Search Room.
455. Until what hour do you work? As a rule, until about half-past 9, or a quarter to 10 at night.
456. Is the Search Room open during that time? Yes; the front door would be open.
457. Is that the iron door? Yes, your Honor.
458. Is any person in charge of the Search Room during overtime hours? The rule is that three of our Branch work overtime together, and all three are in charge. I think we are all responsible while we are working overtime.
459. When the three are at work, as you describe, who is supposed to be in charge? Mr. Dawes, the Chief Clerk.
460. While you are at work overtime in the Search Room, is Mr. Dawes the superintendent of that work? He comes in during the evening to see how the work is proceeding.
461. Does he come into the Search Room? Yes, your Honor.
462. You say three work overtime, who would they be? They would be Hopkins, myself, and sometimes Mr. Thompson, and sometimes different clerks.
463. At any time would one clerk alone be working overtime? No, your Honor, not in our branch.
464. Why not? Because we cannot work one at a time. We must have three. In doing this overtime work it is necessary that we should examine the births, deaths, and marriages registers. As many as twenty-seven books are laid out for inspection, and one-half of this number is arranged along one side of the passage, and another half along the other. Two clerks are necessary to examine these books while the third calls out the numbers.
465. It comes to this then, your overtime duties are only for examining and comparing the different books? That is the part we do in the office.
466. Does that require the attendance of three clerks? Yes, your Honor.
467. I understand you make that examination at the table which is called the search-table which runs along the northern side of the Search Room? Yes, your Honor.
468. I ask you again this question, so far as you know does one clerk by himself at any time work overtime?

time? Not that I know of your Honor; I have never known of one clerk [remaining by himself to work overtime.

469. Have you at any time seen any clerk in any other branch working overtime? Yes.

470. In the Search Room? Yes.

471. In what part of the Search Room? In that part where the indexing is done behind the counter.

472. Who have you seen behind the counter when you have been working overtime? I have seen Mr. Gillam, and I think he is the only one I have seen working there.

473. Until what hour have you seen Mr. Gillam behind the counter? I could not say the exact time.

474. Well, about what time? Until after 6 o'clock.

475. After you have returned from your tea? No, I do not think it was after I returned from my tea.

476. On many occasions have you seen Mr. Gillam there? He was there, I think, at one time for a fortnight or three weeks working overtime.

477. So far as you remember was he there every evening? Yes; but referring to this occasion I am not altogether positive how long this period of working overtime lasted. I think it was about four or five years ago when Mr. Gillam worked overtime consecutively for a period of a fortnight or three weeks. The only reason I have for remembering it is that he complained about our calling out the numbers while we were working overtime so loud as to disturb him.

478. Was your attention drawn to what he was doing on any of these occasions? No; it was not, and I did not take any notice.

479. Are the public allowed to search your registers? No; not without special permission. Formerly some years ago the public were allowed to do so, but the practice was stopped and now people are only allowed to search under special circumstances.

480. What do you mean by under special circumstances? Supposing a search has been unsuccessful and people requiring that search are not satisfied, they would see Mr. Dawes or myself, announce the result of the search and then I would say "If you are not satisfied I will show you the books myself." I would show the books but I would be present the whole time during any further examination.

481. So that when the particulars previously obtained are so indefinite that the search cannot be completed are the persons concerned allowed to look at the registers? Yes.

482. And is that examination always under the direct supervision of either yourself or one of the clerks of the office? Yes.

483. How long is it since the public were prohibited from searching? I can hardly say. I think it was about a year or two before the present Registrar-General was appointed.

484. What system is in vogue now? A person applying to make a search must first fill up a printed form supplied by the office, sign it, and pay the necessary fees. The search is then made by the clerk whose duty it is to make the search, and the application is returned to him. If the certificate is found, I hand the person that certificate and he signs for it.

485. In your opinion does that system meet with the approval of the public? Yes; unless people come there for the purposes of scandal, and in these cases, or if we have any suspicion of this purpose, we do not satisfy them.

486. So far as you know are people coming with a *bonâ fide* purpose well satisfied with the system? Yes. They are well served and satisfied.

487. Is the information supplied promptly? Yes; as promptly and as properly as it can be. For instance, a man makes an application one day and he gets his information the next, unless the search is difficult and involves a longer time.

488. Are you aware of any complaints having been made of delay caused by the system now in vogue? No; I am not aware of any.

489. Do you say that the registers are being removed from the Deeds and Search Branch? Yes; some have been removed to a branch office in Castlereagh-street.

490. Are the only registers now kept in the Search Room of the Registrar-General's Department those current? Yes; the current registers.

491. About how many do they number? There are sometimes only three and sometimes more. Occasionally we have to get books up from the branch office. There would then be perhaps three birth registers, two death registers and one marriage register.

[The witness withdrew.]

Patrick Madden sworn and examined:—

492. *Commissioner.*] What are you, Mr. Madden? I am an anatomical boot maker, living at 180, Dowling-street Woolloomooloo.

493. Did you write this letter [*produced*], on the 17th of October, 1893, expressing a wish to give me some information relative to this inquiry? What information have you? In 1858, I called at the Registrar-General's Office in Sydney for a copy of my register of baptism. I was informed that there was no such a thing to be got. The officers of the Department referred me to the churches, saying that there was no record of my baptism at that office.

494. To which church did they refer you to? They did not know to which church they should refer me, but simply said go to the church. I knew where I was christened, and that was at St. Mary's Roman Catholic Cathedral. There they told me they had no books. I went back to the Registrar-General's Office and told them they had no books at St. Mary's, where I had been informed that the books were in the Registrar-General's Office. I was told that they could not give me the necessary information, and I went away and did not call again. Shortly afterwards I left Sydney and went to the Turon diggings. I did not return to Sydney for some years afterwards, but when I did return I again called at the Registrar-General's Department with a similar object in view.

495. About what year? I returned to Sydney in 1861 or 1862.

496. And when you called at the Registrar-General's Department on this occasion, did you receive a similar answer to your inquiry? They said they had no information. I then entirely gave the matter up. I thought I was not christened even. Later on, in 1865, I made up my mind to get married. I was married on the 29th of July, 1865, in St. Mary's Cathedral to a Roman Catholic woman. Then I put my age down in the register at 26 years. I afterwards found that I was not 26 years of age at that time. I really

W. W.  
Bucknell.

23 Oct., 1893.

P. Madden

23 Oct., 1893.

P. Madden. really did not know how old I was. Repeated applications for necessary particulars were made from time to time, but I could never get any information, good, bad, or indifferent, until at last, in 1882, I got my register from St. Mary's Church. The books had been supposed to have been destroyed at the time the church was burnt down. That proved not to be the case, for I got my register of birth, and produced it subsequently at the Registrar-General's office. The officials there then gave me everything I wanted; but the information came too late, for people were living on certain lands I wished to claim, and the land itself had been improved.

23 Oct., 1893.

497. Did you desire this information from the Registrar-General's Department, for the purpose of making out a title to some land? Yes, land situated both in Sydney and Victoria—in Sydney particularly, the place where I was born.

498. Where was that? At the corner of Campbell and Castlereagh Streets. The papers I now produce have reference to this matter since the discovery of my register in 1882.

499. Before I look at these, do you wish to say anything about the Registrar-General's Department since the year 1882? Yes; what I call my property has been improved since then.

500. But about the Registrar-General's Department, do you wish to say anything? Yes; and I hand you these documents to show what I mean. [*Documents handed in, and marked Exhibit "F"*].

501. Do you know Edmund Conroy Hopkins? Not personally, outside of business.

502. How did you come to know him in business matters? By inquiring at the Registrar-General's Office.

503. And what business had you with him? No business outside this matter to which reference is made in the documents I produce.

504. I understand, Mr. Madden, from these documents, that you had business transactions with Hopkins, relative to getting the title of certain land? Yes; he gave me a memorial of title on parchment.

505. Did you receive this letter from E. C. Hopkins, who is a clerk in the Registrar-General's Department?—

Registrar-General's Office, Sydney, 2/12/82.

MR. MADDEN,—Call in and see me on Monday; I have got valuable information *re* Melbourne land.

Yours truly,  
E. C. HOPKINS.

Yes, I did.

506. When did you receive this other letter?—

Registrar-General's Office, Sydney.

MR. MADDEN,—Call in and see me this afternoon, 4 o'clock sharp, I have got important news for you.

E. C. HOPKINS.

I really cannot tell you for certain, but I think it was about a week after I received the other letter. I also received a letter from Hopkins, which he received from Messrs. Moule and Seddon, solicitors, 24 Market-street, Melbourne, dated the 15th of December, 1882. [*Letter in question handed in, and added to Exhibit "F."*]

507. Did you pay any money to Hopkins for these services? It did not cost me a great deal.

508. How much did you pay to him? Something like £1 or so.

509. Have you told me that you have a copy of some of your plans? Some agents hold my papers—men named Booty and Riley. Riley is the man I look to for my papers, but Booty is the man from whom I got my copy.

510. What copy was it? A memorial copy of the title deeds of land in Victoria.

511. Did you receive any documents from Hopkins, having reference to your land in Sydney? No; but he walked round the land with me and saw it, and I have seen the land improved on since then. The piece of land I now refer to, is that on which the baths in Pitt-street have been erected.

512. Do you mean the Natatorium in Pitt-street? Yes.

513. Did Hopkins receive any money from you for anything he did with respect to your land in Sydney? He did not; but he received money in reference to a memorial copy of title, and specifications of land in Melbourne.

[The witness withdrew.]

Wilfred De Courcey Lewis sworn and examined:—

W. De C. Lewis. 514. *Commissioner.*] What position do you hold in the Registrar-General's Department? I am Assistant Principal Draftsman and have held that position since 1884, but I have been in the office since 1863.

23 Oct., 1893.

515. Do your duties take you to the Search Room of the Deeds Branch? Very often; in fact I might say every day.

516. To make searches or to verify searches? To verify searches or to check them.

517. In checking these searches do you examine the registers or the indices? The registers themselves.

518. Did such duties take you to the Search Room before March 1890? Yes.

519. And since March 1890? Yes.

520. After March 1890 was there any alteration in the disposition of the registers? Yes, there was a great alteration as soon as the present Registrar-General took office.

521. Was that alteration for the better or otherwise? Most decidedly for the better.

522. Can you suggest any further alteration that might be made with the space at command? Not with the room as it is at present; there is not sufficient space to make alterations.

523. To make further alterations, then, would a much larger room be required? Yes; that Search room is too small for the registers at present.

524. Before March, 1890, when you have been in that room, have you noticed any irregularities? No; I have not.

525. Have you noticed any since March 1890? No, sir, I have not. My time is so much taken up in examining searches that I have no opportunity to see what is going on.

526. Do you say that you are so engrossed with your own work that you would not be likely to notice any irregularities, if there had been any? Yes; I could not possibly see anything.

527. Would your presence in the Search Room be any safeguard to the registers? It would, possibly.

528. In what way? I should see people using them, and, as an officer of the Department, the people would notice me, and doing so, would not do anything they had no right to do.

529. You mean, of course, people in your immediate neighbourhood? Yes, in my immediate neighbourhood.

530. While you have been in the Search Room have you ever noticed a clerk or clerks from any other branch of the Department engaged there? Not searching, but I have seen clerks going in and out.
531. Have you seen Hopkins in the Search Room at any time? Not to my knowledge; I have not seen him searching.
532. In your opinion, could searches be carried on without taking extracts? No; it is most necessary to take extracts when making a search.
533. Could you suggest any improvement of the present system? I do not think anything could be done to improve the existing arrangements.
534. Is the supervision sufficient for the safety of the registers? The person who has charge of the books is constantly moving about the room looking after them. Mr. Gillam also goes round to see what is going on.
535. In your opinion, is the supervision sufficient? Well, I think it is barely sufficient.
536. What alteration would you suggest? There might be one or two alterations in the fixing of the registers.
537. Would you suggest that the registers should be placed in any other position in that room? No; not in that room.
538. Is the only alteration you suggest relative to the supervision? Extra supervision is wanted, but the room would have to be enlarged for any alteration in the disposition of the registers.
539. How do you suggest that extra supervision might be provided? By having an extra book porter to go round the room.
540. Has the present book porter occasion to leave the room from time to time? Yes.
541. For what purpose? To take registers to the bookbinder of the Department.
542. For any other purpose? He also takes registers to the Examiners.
543. And during his absence, what supervision is there? I do not think there is any.
544. For your purposes are registers ever removed from that room? Not for my particular purposes.
545. Are they taken up to the Principal Draftsman? I think I have occasionally seen registers in the Principal Draftsman's room—that is Mr. Pearson's room.
546. How would these registers be taken to him? By the book porter.
547. There are occasions then when the book porter would be absent from the room, and when there would not be any direct supervision over the persons searching? Yes; there would.
548. How many persons are there generally searching in that room? I suppose I have seen as many as fourteen or fifteen examining registers.
549. Would that be about the average or above the average? I think that is above the average.
550. When you go down to the Search Room, do you get formal permission from Mr. Gillam or any other officer to make your searches? No sir; my work is to examine searches for titles, and I go down to examine searches without permission from officers of the Department.
551. Do you ever direct that a register be taken from the room to the Examiner or to the Principal Draftsman? No sir; not of my own motion.
552. Do you also have to search in the Land Titles Office? Sometimes; and when I search there it is to compare boundaries brought under the Act.
553. How do you search in that Department? I send a messenger and he brings me up a plan. If I am not satisfied with the particulars thus obtained, I go down myself to the Search Room in the Titles Office, and refer to Mr. Keele, getting what I want from him.
554. Do you apply to the officer of the Department? Yes, to Mr. Keele who has charge of the books.
555. How long have you been examining in that Department? About nine years.
556. During that time have you on any occasion been unable to find a register? No; all the registers that I have required have been there.
557. Did you ever hear that any register was missing? No.
558. Did you hear that "Cumberland register, number 28," was missing? I did not hear it in the office, I heard of it through the report published in the newspapers, of proceedings in the Supreme Court.
559. Did you ever see any register called "Cumberland register, number 28"? There are only two registers 28.
560. So far as you know does any such register as "Cumberland register, number 28," exist? No.
561. So far as you know is there any register containing Cumberland grants alone? Not other than those we have. There is not one to my knowledge. I fancy all the country grants are mixed together.
562. I take it then, you never have seen nor known of the existence of "Cumberland register, number 28"? No, I have never heard of it.
563. Did you assist in searching for any register after the statement was made in the Supreme Court to the effect that a register was missing? No.
564. Did you see the register that was produced in Court? I saw it brought in from the Court.
565. Have you heard any complaints with regard to the working of the Deeds and Search Branch? No; I have heard nothing.
566. Neither before nor after 1890? No; I cannot say that I have.
567. Before you commenced to use the Search Room did Mr. Pearson perform that part of your duty? Yes. I was appointed to perform this duty, and it was at the end of 1884 that I commenced. I have been doing the whole of the searching for nine years. When Mr. Pearson complained that the work was getting too much for him I was appointed to assist.

[The witness withdrew.]

W. De C.  
Lewis.  
23 Oct., 1893.

TUESDAY, 24 OCTOBER, 1893.

[The Commission met at 10 o'clock.]

Present:—

HIS HONOR JUDGE FITZHARDINGE.

Edmund Conroy Hopkins sworn and examined:—

- E. C. Hopkins.  
24 Oct., 1893.
568. *Commissioner.*] Are you a clerk in the Registrar-General's office in the Registration of Births, Deaths, and Marriages Branch? Yes.
569. How long have you been a clerk in that branch? I was first appointed to the office in July, 1872. I was then transferred to the Land Titles Office in 1878. I was afterwards transferred to the Births, Deaths, and Marriages Branch, and in August, 1887, I took charge of the room.
570. Are you so doing at the present time? I continued in that position up to the time of my suspension.
571. Did your duties as clerk in charge of that branch take you to the Search Room? They did, your Honor.
572. Frequently? Yes; daily or nearly every day I was in that room.
573. For what purpose? For getting information as to births, deaths, and marriages. For getting books and verifying certified copies.
574. Where were these books kept—in what part of the Search Room? A number of registers are kept on the right hand side round from the door as you enter. Others are arranged along the western wall to the northern wall. These were the indices and they have been removed recently.
575. Do I understand that you might have to refer to any book kept in any portion of these shelves? Yes, your Honor.
576. For what purposes would you have to refer to these registers? To have copies made and to get information which might be required by the general public.
577. Were the public at any time since you have been in charge allowed to take extracts from your registers? Yes; I think they were allowed to, but there was always an officer with them. If members of the public desired to see a book we allowed them to see it.
578. Has that practice been altered of late years? It has, your Honor.
579. When was that alteration introduced? When the present Registrar-General assumed office.
580. How was the practice then altered? We were not allowed to show the registers, and the public have not been allowed to consult either the registers or indices since the present Registrar-General took office.
581. How is the information given to the public now? An application is put in for a certified copy of certain information.
582. Whose duty is it to get that information? The clerk who makes the searches.
583. And who is that? Mr. Thompson.
584. How is the work checked? In cases where there are no records he puts "No record" on the application and that is checked by Mr. Bucknell.
585. When a record is found what is next done? The certificate is handed to the applicant.
586. Is Mr. Thompson's work checked? No; only in cases where he does not find the record; where he does find a record it is not checked.
587. Not by Mr. Dawes nor any other person? No; it would not be required then.
588. Can you explain what part of your duty takes you into that Search Room, as from what you say it appears that the information necessary for the performance of your duties is obtained by a search clerk, Mr. Thompson? Well I have gone in there very seldom of late years; it was of the past I was speaking when I said I used to go in every day.
589. My question was—Did your duties take you into that room, and you said "daily," what am I to understand? Of course, I beg pardon, I meant in the past.
590. I wish to know what part of your duties took you into that room? Of course I very seldom go into the room now except it is to get a register of births, deaths, or marriages certificates. I might have occasion to go into that room to turn up a marriage register to verify a marriage, or to obtain information in reference to births and deaths. I have to take an index to see if these are correct.
591. For any other reason? No other reason, but I might have to go in four or five times during the week for the purposes I have mentioned.
592. Then your duty only takes you into that room in connection with the registration of births, deaths, and marriages? Yes.
593. Have you anything to do with registers and indices of deeds or grants? No.
594. Have you at any time had occasion to search in the registers or indices belonging to the Deeds Branch? I have.
595. When was that occasion? I suppose it must have been previous to 1887.
596. In what matter was that? That was a matter, your Honor, in which I had permission from the late Registrar-General. It was in a case where members of my family had an Equity suit.
597. What was the name of that suit? Dean *versus* Dawson.
598. Were you a party to that suit? Yes.
599. Plaintiff or Defendant? I was Plaintiff. It was in connection with property situated on the Parramatta River. On that occasion I did not search myself, for I was incompetent to do so. I employed a proper searcher, and paid him for his work, I think something like £20 or £25.
600. Whom did you employ? Mr. A. K. Doyle, a Conveyancer, of Elizabeth-street.
601. On that occasion you first say you made the search, having the permission of the Registrar-General, now you say the search was made by a professional searcher, what am I to understand? My object was to try and find out what property had passed into the hands of William Dean.
602. But did you on this occasion search yourself? I did, your Honor, if I might term it a search.
603. Was that before or after you engaged Mr. Doyle to search for you? It was about the same time.
604. Before this, in 1887, did you search? Yes; I did look at the books.
605. In what matter? It was in this way, your Honor: Prior to 1856, the Registers and Indices are not lexicographically arranged; they were most incomplete. They are alphabetically arranged, but after the letters of the Alphabet have been exhausted there is no lexicographical arrangement. A member of the public

public may come in and want to know the exact date of a death which may have occurred some fifty or sixty years since, and the want of a proper index necessitates a particular search. I find that to facilitate the search, and to help myself, and also the Public, the best course to follow is to go to these registers and to make a thorough examination of the indices and see if I can get the names of the trustees dealing with the disposition of any property, so that by looking at these dates I can get the exact date I want.

E. C.  
Hopkins.  
24 Oct., 1893:

606. Do you mean to tell me that the death would be recited in the deeds you searched? Yes. An application may be made perhaps concerning a man who died, say, in 1830. I then look at the registers. We have in our possession the Church of England and Presbyterian registers, but we have not got registers dealing with the Roman Catholic and many other religious denominations. It often happens that we cannot give the requisite particulars, and I then say that the better course to follow would be to search the church records in whatever place to which the particulars may refer. People desiring this information have accepted this advice, and have been able, in many cases, to get the information required. For instance, I may say that only five or six months ago Mr. Charlton, in the office of Mr. John Dawson, desired to find out when one Charles Throsby was married. I told him particulars might be found at Liverpool. It afterwards transpired that the marriage in question took place in 1824, in the Liverpool District. Mr. Charlton applied to the authorities at Liverpool, and obtained the desired certificate.

607. When did you commence to make these searches in the registers or indices in the Deeds Branch? It might have been nine or ten years ago.

608. Can you not give me any more definite information than that? I cannot give a more definite date, your Honor.

609. Did you continue to prosecute your searches in that way whenever you considered it necessary? Yes; I did so to facilitate the searching.

610. Before searching the registers or indices of the Deeds Branch do you obtain permission from any officer in the department or from the officer in charge of the Search Room? No; I thought there was no harm in looking at the books.

611. On how many occasions during the week do you search the registers or indices in the Deeds Branch? Perhaps two or three times a week.

612. On these occasions would you be searching during office hours or while you were working overtime? In office hours.

613. Always? Yes.

614. Have you ever prosecuted these searches during overtime? No.

615. During what hours do you generally search the registers and indices? Between the hours of 10 a.m. and 4 p.m.

616. Do you search between the hours of 1 and 2? No.

617. Not on any occasion? I may have done so while our Equity suit was on.

618. I will ask you again with regard to other matters—have you searched in reference to any case other than that of Dean *versus* Dawson? No.

619. Have you at any time given information to any member of the outside public as to the result of your searching in the registers or indices in the Deeds Branch? No.

620. Have you given information to a Mr. Madden at any time? No.

621. [*Handing to witness Exhibit "F. 1."*] Is this your signature? [*After looking at a memorandum signed "E. C. Hopkins, Registrar-General's Office, Sydney."*] Yes.

622. [*Handing to witness Exhibit "F. 2," a memorandum dated "Registrar-General's Office, Sydney, 2nd December, 1882," and addressed to Mr. Madden.*] Is that your signature? Yes.

623. Did you receive this letter [*Exhibit "F. 3."*] from Messrs. Moule and Seddon, solicitors, of Market-street, Melbourne, dated 15th September, 1882? Yes, your Honor.

624. To what matter does this letter refer? [*No answer.*]

625. There is this letter [*Exhibit "F. 1."*]

Registrar-General's Office, Sydney, 2/12/82.

MR. MADDEN,—Call in and see me on Monday. I have got valuable information *re* Melbourne land.

Yours, truly,

E. C. HOPKINS.

What did that letter refer to? I do not recollect, your Honor. I might have had a search made down in Melbourne.

626. Do you know whether Mr. Madden ever had, or claimed to have, land in New South Wales? I think he told me he had land in Sydney, your Honor.

627. Also in Melbourne? Yes, your Honor.

628. Can you tell me what this letter [*Exhibit "F. 2,"*] refers to?

Registrar-General's Office, Sydney.

MR. MADDEN,—Call in and see me this afternoon, at 4 o'clock sharp. I have got important news for you.

E. C. HOPKINS.

What does that refer to? I do not know, unless it is a Melbourne matter, sir.

629. Did you at any time go with Mr. Madden to walk round certain land he claimed in Sydney? Not that I recollect.

630. Did you at any time search on behalf of Mr. Madden in the registers or indices in the Deeds Branch? No; I might have had a search made and paid for it.

631. At that time (in 1882), were you a clerk in the Registrar-General's Office? Yes.

632. How came it then that you had a search made? Well, it might have been this way; he might have spoken to me about this matter.

633. Have you no distinct memory about it at all? I have not, your Honor.

634. Then it is a mere matter of speculation on your part? Yes, your Honor.

635. Do you remember receiving this letter [*Exhibit "F. 3,"*] from Mr. Seddon, of the firm of Moule and Seddon, solicitors, of Melbourne? Yes, your Honor.

636. And to what land did that refer? [*No answer.*]

637. Have you no memory about the matter, it is no use guessing? No, your Honor.

638. Did you ever search in the registers or indices in the Deeds Branch for Mr. Seddon? No, your Honor, not that I can recollect.

639. Do you know Mr. Seddon personally? I think he came to Sydney. I have seen him two or three times.

640. Did you do any business for him in Sydney? I did.

641-2.

E. C.  
Hopkins.  
24 Oct., 1893.

641-2. In what way? I got him some Registers of Births, Deaths, and Marriages.

643. Some Certificates of Births, Deaths, and Marriages, I suppose? Yes.

644. Were these obtained from your own branch of the department? Yes.

645. Did you ever get him any information from any other office in the Registrar-General's Department? Not that I am aware of.

646. Can you tell me to what he refers, when he says at the end of his letter, "Be good enough to accept what I have been able to do for you in this matter as an act of courtesy in acknowledgement of like acts done by you for me in Sydney last year"? I do not recollect, your Honor; I was over in Melbourne \_\_\_\_\_

647. But this refers to Sydney, to "like acts done by you for me in Sydney last year"; this statement follows a long letter announcing the result of searches made in the Deeds Branch of the Registrar's Office in Melbourne;—now that this is drawn to your attention, can you remember having made any search in the Deeds Branch in Sydney for Mr. Seddon? I cannot.

648. Can you not explain what business is referred to in the concluding part of that letter? No, your Honor.

649. Again I ask you have you at any time given any information to any member of the public from the registers or indices in the Deeds Branch? No.

650. Have you at any time been approached or asked for information from these sources? No, your Honor.

651. Do you know that in September, 1890, the Registrar-General reported you to the Colonial Secretary for trafficking in titles? Yes.

652. Were you shown a copy of that report at any time? I was shown a copy of that report, but I think it was after it came back with other papers containing the opinion of the Crown Solicitor upon my case.

653. Did you see the report and other papers after they were returned from the Colonial Secretary's Office? Yes.

654. Did you see the letters from the Messrs. Cowlshaw and Mr. Spark annexed to that report? Yes, your Honor.

655. Did you give any information to the Messrs. Cowlshaw about any land? Are you now speaking of the Newcastle property?

656. Yes; you probably know, and I am asking you the question? Yes, I did give them information. They spoke to me first about it.

657. Where did you get that information from? I got the information from Mr. M. C. Cowlshaw.

658. I ask you again did you give the Messrs. Cowlshaw information? No, I did not; not in the first instance.

659. Is it true that early in 1888, you waited upon Messrs. Cowlshaw with reference to a block of land near Hexham? Yes, I went down to see them. I might explain how that came about. I was going home in the tram with Mr. Tom Cowlshaw, and he was speaking about the coal business. I said to him "The Osbornes have a property near Newcastle that I am aware of."

660. How did you come to know that? Because the Osbornes told me. I knew they had some coal land there the same as in the Illawarra district. I said to him, "Would you care to lease it?" Mr. Cowlshaw said to me, "You might come down and have a talk over it with my brother." I went down there, and Mr. Cowlshaw said the firm was quite willing to lease the land in question, providing the royalty on the coal obtained from the land would not be too high. I then said I would see Mr. Osborne and speak to him about it. There was some difficulty about the royalty, nothing was done, and the matter dropped.

661. Did you do anything else for Mr. Cowlshaw? About the same time Mr. Cowlshaw said to me, "There is a certain property in the name of Peppercorn,"—he at the same time showing me a map with the name Peppercorn written in full. He said, "Do you know anything about this land?" I said, "Have you made any search?" and in reply, he said "Yes." I said to him, "Very well I will see if I can find out anything about it for you." At this time I really did know something about it in this way: Some months previously, myself and Mr. Spark were engaged in taking out a book of areas. I helped him to get this book published. During our conversation something was said about land belonging to W. H. Peppercorn. It struck me at once that I had heard this name mentioned, and that the name was identical with the Peppercorn Mr. Cowlshaw had spoken to me about. I then questioned Mr. Spark about the matter, and I think he informed me that the Mr. Peppercorn in question was dead, but that he had a representative or a relative living in England. Some little time after that my brother was going to England, and I wrote to him asking that he should make all necessary inquiries.

662. Did you keep any copy of the letter you wrote on that occasion? No; I did not. I think I might have copied it at the time. I also spoke to him upon the same subject.

663. You both spoke to him and wrote to him? I did both; and in speaking and in writing gave him all the particulars I could.

664. Where did you get these particulars from? Partly from Mr. Spark. I got all the particulars having reference to Dr. Peppercorn's property from Mr. Spark.

665. Where did you get the particulars regarding the area of the land in question? I got them from Mr. Cowlshaw—from a large plan he had in his office.

666. What did you do after that? I did nothing after that. The property was purchased, and the deeds were sent out here to the Commercial Bank, and the necessary money was paid by Messrs. Cowlshaw.

667. What did you gain by that transaction? It was arranged that I should take a half, and I allowed my brother to take a quarter share in my interest in the proceedings.

668. Do I understand that you did not obtain any information from any register or book of indices in the Deeds Branch of the Registrar-General's Department in connection with this matter? No, your Honor, I did not. There was nothing I could get.

669. Did you at any time offer to buy this particular piece of land from Mr. Spark? Yes, your Honor, I did.

670. Without knowing anything about the title of that land in any possible way? Without knowing about the title; I did not know how the title stood.

671. What did you offer to give him for the land? (No answer.)

672. Can you remember whether it was £600 or not? Yes, I think it was £600; I am not certain.

673. Where is Mr. Spark now? He is in Sydney.

674. What is his address? The Registrar-General's Office, I believe.

675.

E. C.  
Hopkins.

24 Oct., 1893.

675. What is his name? James Lyon Spark.

676. In what branch of the Registrar-General's Department is he? He is in the Draftsman's Branch.

677. Do you say that the information in your possession concerning that estate was obtained in an altogether accidental manner? Yes.

678. Do you remember what price the Messrs. Cowlshaw were to pay for that land? I think it was either £4,500 or £5,000.

679. Did you and your brother give a mortgage to Messrs. Cowlshaw? Yes; we gave a mortgage for our portion of the purchase money.

680. So that you were one of the purchasers? Yes. It was in this way: Messrs. Cowlshaw said, "We will find the purchase money but you must give us a mortgage over your share in the transaction."

681. Was that the result of your speculation in this matter? Yes.

682. Do you still hold your share in the transaction? No, your Honor. I sold out my share some time back to the Cowlshaws. I could not pay the mortgage. I did manage to pay the interest once or twice, but that was all.

683. Did you write a number of letters to the Peppercorns? Yes; I think I wrote two or three.

684. Were the copies of these letters enclosed in a report to Mr. Pinhey, the Registrar-General? Yes.

685. Are you satisfied that they were copies of your letters? Yes; I think they must have been copies.

686. Did you at any time search in any register or in any index for the purpose of giving any information to anybody relative to land belonging to the Peppercorn family? No.

687. Not at any time? Not that I can recollect.

688. Is it a matter of recollection? Well, I might add this: Messrs. Cowlshaw Brothers told me that they had endeavoured through Messrs Sly and Hamilton to get possession of all necessary information.

689. But, did you, as a matter of fact, at any time, search in any register or index for the purpose of gaining information concerning the Peppercorn's land? No, I did not.

690. Is this the explanation you made at that time? [*Commissioner handing to Witness a letter, dated October 2nd, 1890, part of Exhibit "B".*] Yes.

691. I now draw your attention to the Battersea Estate. What was your connection with that Estate? In June, 1887, Mr. John A. Aitken, a solicitor, called at the Registrar-General's Department and asked to see me. He said "Hopkins, are you in any way connected with the Osbornes?" I said "You might call it a connection for we have been associated with the Osborne family on intimate terms for the last forty or fifty years. Our families lived together in the Illawarra district for many years, and they are married to other relations of mine, the Throsbys." He then went on to ask me if I thought I could get the Osbornes to enter into an agreement with the Osbornes and blank, but he did not tell me for what purpose. I questioned him about what he wanted me to do, and he told me there were certain parties who knew of certain allotments of land—big portions of land—belonging to the Osbornes, which had been obtained from the old Bank of Australia—land which formed part of the assets of the old Bank of Australia. I told Mr. Aitken I could give him no answer until I had written to representatives or a representative of the Osborne family. I wrote to Mr. Henry Osborne and told him exactly what Mr. Aitken had said to me. I received a letter from Mr. Henry Osborne who was then living at Bowral, and he told me in that letter that he would be in Sydney in a few days when he would call in and see me. He did so, and we walked down to the club together and talked the matter over. I told him exactly what really the whole matter was. He then said to me "Will you get anything out of it?" I said in reply "I do not know, I might; of course I do not know the full particulars about the matter." He said to me "Well, we will let this man take the matter up." After that I went and told Mr. Aitken what had taken place. An agreement was drawn up and signed on behalf of the Osbornes, giving power to Messrs. Campbell and Chappel to move in this matter. I believe that prior to coming to me Messrs. Campbell and Chappel had tried to get the Osbornes to do something in this matter; that they were unsuccessful; and that they then found out by some way or other that I was connected with the Osborne family. Previous to this Campbell and Chappel were perfect strangers to me, as I had never heard of them previous to the year 1887, when they were introduced to me by Mr. Aitken.

692. When did you first meet Chappel and Campbell? In the year 1887, at Mr. Aitken's office, after I had obtained information from the Osbornes. I then left the matter in Mr. Aitken's hands, and I think he told me I would get a tenth of any result arising out of the agreement made.

693. Was that to be a tenth of the result obtained from any of the properties they knew about? Yes.

694. Not only this particular property, but out of any other property? Out of any property.

695. What were you to do in return for the share you were to get in this or any other properties?

When the Osbornes were about bringing a piece of land at St. Peters under the Real Property Act, George Lilley, the messenger at the Registrar-General's Department said to me, "I see, Mr. Hopkins, that the Osbornes are bringing some land under the Act which formerly belonged to the old Bank of Australia." I said, "Yes." He said to me, "There is a piece of ground on the Parramatta River known as the Battersea Estate. I bought an allotment there some fifteen or twenty years ago from a man named Coleman. This land has been lying idle ever since. I am not certain whether it belonged to the Osbornes or to Edye Manning." I told Lilley that I would tell Campbell about it. I did so the next time I saw him. I told him that there was a certain property on the Parramatta River, but I was not sure as to whose name it was in, and that it might be in the name of the Osbornes. Campbell said to me, "Well, Mr. Hopkins, if it is in the name of the Osbornes we might be able to get it. Out of whatever interest we can get we are quite willing to allow you to take one-third."

696. Would that be a third of the interest they obtained in the Battersea Estate? Yes.

697. Was there any further conversation? No; but they had searches made.

698. Did you search? No; I never search.

699. For what were they to pay you one-third? For telling them of this piece of land.

700. For what? Giving them the particulars—for letting them know there was a piece of land.

701. What was the next step you took with regard to them or to their land—what year was that in, by the way? I think it was about 1888.

702. What was the next thing you did in regard to them or this land? They, themselves, had a search made by a competent person, Mr. D. Nightingale, I believe.

703. Is he alive still? Yes, your Honor; he is a certified conveyancer occupying an office in Elizabeth-street. He made a search and found that the property was not in the hands of the Osbornes, but in the hands of someone else.

E. C.  
Hopkins.  
24 Oct., 1893.

704. And who was that "someone else"? Sir William Manning; and he arranged, I believe, to allow Messrs. Campbell and Chappel to have one-half between them.
705. What were you to get? I was to have one third of the half.
706. What further had you to do with this matter? Some time afterwards Mr. Nightingale drew up an agreement between Campbell, Chappel, and myself.
707. Was it on the 1st June, 1888, that the agreement you speak of was made? Yes.
708. Have you a copy of that agreement? No, I have not.
709. Where is the agreement? I do not know.
710. I have a copy of it dated the 1st June, 1888. [*Handing copy to the witness.*] Is this the agreement? Yes.
711. In this agreement are there these words—"The said E. C. Hopkins to act in conjunction with the said Herbert Chappel and C. J. Campbell in disclosing and causing diligent inquiries and searches to be made as to when that property passed to the said Sir William M. Manning, and dated the 19th day of August, 1851," and so on? Yes. I will explain that. I went to Nightingale and asked him to draw up an agreement. He did so and took a copy, sent it to Campbell and Chappel and then brought it back to me. I read it and then said to Mr. Nightingale, "you have got in here words to the effect that I am to make searches; in the first place I am incompetent to do so, and in the second place I am not going to do it; I cannot do it." He turned round and said to me, "You must have some consideration; it does not matter." I said, "Now mind, if anything is said about it I shall call you as a witness." These were the very words I mentioned to him. I said, "You have made the searches," and he replied, "Yes, I made the searches long before the agreement was made."
712. Do I understand that such an agreement was entered into between Campbell, Chappel, and Nightingale? I do not know. I do know, however, that Mr. Nightingale was employed constantly in making searches for Campbell and Chappel—in fact, he used to do all their searches.
713. Did you enter into any other agreement with Chappel and Campbell? No; none whatever.
714. Or with any other person? No.
715. Was that the only agreement you entered into of that nature? Yes.
716. Did you enter into any agreement with any other person at all at anytime? No, your Honor; I did not.
717. What was the result of this agreement between yourself, Campbell, and Chappel—what did you get out of the whole matter? They paid me about £450 at different times in small amounts.
718. Did you sign a receipt for £550 as received from Campbell and Chappel? Yes.
719. What became of the other £100? There is a balance of £150 they have to pay.
720. Do they owe you £150? No.
721. To whom do they owe that amount? To a Mrs. Devernet to whom I made a mortgage some little time after.
722. How came you to sign for £550 if you only received £450? I do not know how that could have occurred.
723. Who is this Frederick McRoberts who witnessed your signature to this agreement—the agreement 14th of June, 1889—and who also witnessed your receipt? He is not in the office, he is somebody outside.
724. Was he not a book-binder in the Registrar-General's Department? No, your Honor; he had nothing to do with the office.
725. Is there any other land or other matter in which you have been in any way connected? No, your Honor; none whatever.
726. Have you been in partnership with any other person or persons dealing in land? No.
727. Have you had anything to do with Messrs. Chappel and Campbell since the year 1890? No, your Honor. Since the present Register-General spoke to me, I have had nothing to do with them, good, bad, or indifferent.
728. Nor with any other land agents? No. I can give my word of honour that I have had nothing to do with any land agent since I received that notification from the present Registrar-General.
729. Do you know Hill, the book-porter in the Deeds Branch of the Registrar-General's Department? Yes, your Honor.
730. Have you ever had any arrangement with him? None whatever.
731. Neither in making searches nor in assisting to make searches? No.
732. Has he had any arrangement with you? No.
733. Do you know whether he was connected in any way with either Campbell or Chappel? No.
734. Do you know whether he received assistance from either Chappel or Campbell, either monetary or otherwise? I know nothing at all about that.
735. Did he at any time take any papers or messages from you to either Chappel or Campbell? No, sir.
736. Is there anything else you wish to add? I only wish to know in what position I stand now that I am under suspension.
737. You appear before me as a witness; you have been sworn to give true evidence, and I only consider you in the same light as any other witness. Whether persons come from the Registrar-General's Department or whether they are unconnected with that Department, before this Commission they are only witnesses.
738. *Witness.*] I would like you, your Honor, to call Mr. J. A. Aitken and Mr. Nightingale to give evidence.
739. *Commissioner.*] Are these the only two gentlemen that you suggest that I should call? Also Mr. Lilley, the messenger at the Registrar-General's Department, Mr. Spark and Mr. Cowlshaw, of Macquarie-place.

[The witness withdrew.]

George William Hill sworn and examined:—

- G. W. Hill. 740. *Commissioner.*] What position do you hold in the Registrar-General's Office? Record attendant, sir.
- 24 Oct., 1893. 741. Have you been called till lately, book-porter? Yes; I suppose it was about eighteen months or two years that the name of the position was changed.
742. How long have you been in the Department? Fourteen or fifteen years—since 1879.
743. What position did you occupy then? That of book-porter. 744.

G. W. Hill.

24 Oct., 1893.

744. Did you continue to occupy that position till about two years ago? Yes.
745. And were you then called a record attendant? Yes.
746. Were your duties altered at all in any way when the name of your position was changed? They were altered in this way that I had to look more particularly after the room than I had done previously.
747. When you mention "room" do you mean the Search Room? Yes. The present Registrar General wanted me to pervade that room, and to better enable me to do so I had extra clerks to assist. This afforded me a better opportunity for seeing everything that took place in that room.
748. Before 1890, what were your duties? Exactly the same as now, only I used to be called upon to assist in several other ways.
749. I wish to understand distinctly what your duties were before 1890? To have general supervision over the room under Mr. Gillam, the Deputy Registrar of Deeds, and to assist searchers in making their searches by giving them the necessary books and by supplying general information.
750. What else? To assist in examining copies and to do numerous other small things.
751. Where did you examine the copies? In the Search Room generally.
752. Generally, you say; whereabouts? Nearly always, I believe, in the Search Room; but I think that on one or two occasions I might have examined copies in Mr. Abbott's room.
753. When you were examining copies in Mr. Abbott's room who took your place in the Search Room? Mr. Gillam generally sent someone to take my place when I was away, as he does still.
754. Were your duties altered after March, 1890? Yes; they were. The extra duties were taken from me, and I was instructed to pervade the room so as to see, if possible, everything that was taking place. I was told to be all over the room as near as possible at the same time.
755. Did your duties from time to time, after the alteration was made, take you from the room? Never for any length of time; perhaps at the longest for only two or three minutes.
756. Where would your duties take you to during those two or three minutes? Perhaps to Mr. Abbott's or Mr. Hiddleston's room.
757. Is it not part of your duty to take registers to the Examiners' rooms? Yes, sir.
758. Are you called upon to perform that part of your duty frequently? Very frequently, sometimes.
759. Daily? Not always daily; sometimes we may be a bit slack, when the registers would not be required by the Examiners.
760. On these occasions do you take many registers up to the Examiners' rooms? Sometimes I would have a list of two or three, and perhaps as many as twenty on other occasions.
761. Would you have to collect these from the shelves? Yes, sir.
762. How long would you be away from the Search Room on such occasion, as these? I would not be away perhaps for more than two or three minutes at the most.
763. Is it part of your duty to go down to the vaults? Yes.
764. Where is the entrance to the vaults? In the Land Titles Records Room, and one half of the vaults is under the Search Room.
765. When you go down there, have you to search for books or documents required? Yes, sir.
766. What documents are kept there? Originals of liens on wool and crops.
767. How long would a visit to the vaults keep you from the Search Room? I suppose it would not take more than three or four minutes.
768. Would it only take you a few minutes to search for and find the documents required? Oh, yes; that is all, as I should be assisted by having in my possession the name and number of the document required.
769. Are the papers in these vaults under your care? Yes, sir.
770. Did you place them there? I placed them there.
771. Therefore, you should know the whereabouts of each document? Exactly so, sir.
772. Does any other duty that you have to perform take you from the Search Room? No; I do not think so, sir.
773. At what time do your duties commence in the morning? Nine o'clock.
774. When do they cease? At half-past 4 o'clock.
775. Are you ever at work overtime? No; not in the office. I have had a share in the copying which has necessitated overtime, but the work was not done in the office.
776. Where is the copying done? Each person is allowed to take it home.
777. From what do you copy? From the original indices into books.
778. What books or documents do you take home to make these copies? The blank book and the original indices that the books are compiled from.
779. Do you take the registers, or simply the indices? The indices.
780. Do I understand that you never work overtime in the Search Room? No; I do not.
781. And when you leave, do you lock the Search Room? Yes, unless Mr. Gillam is there.
782. Before you leave, do you collect the registers that may have been used by the Examiners? Sometimes I have been so busy that I have not always taken them from the Examiners' room.
783. On these occasions, when you do not collect them would they remain in the Examiners' rooms all night? No, sir; the caretaker would bring them down.
784. Do I understand that on every evening the registers are returned to the Search Room? The registers are returned to the Search Room.
785. Should a register be used in the Principal Draftsman's room during the day, would that be returned to the Search Room the same evening? Yes; I believe so. It might by chance be overlooked, but, as a rule, this register would be returned. I generally go up for these registers myself.
786. Where are the keys of the Search Room kept at night? The caretaker has them.
787. Have you at any time made a search in any of the registers or indices? I have, sir.
788. For what purpose? I received instructions from Mr. Abbott and Mr. Gillam, who desired information for office purposes.
789. Have you ever made a search or searches other than for the office? No, sir.
790. Are you conversant with the books? Yes, sir.
791. How many registers of deeds are there in that room? Books have been marked alphabetically from A to Z, and they have been numbered from 1 to 524.
792. Would that be up to the 22nd of last September? Yes.

- G. W. Hill. 793. Have you ever, for any purposes other than those you have named, made a search either in the registers or indices in your charge? I think I made one when I wished to obtain certain information concerning the house I am living in. I agreed to buy this house; I paid my deposit, and then searched to see if I was safe.
- 24 Oct., 1893. 794. Is that the only search you have made other than for the office? I believe so.
795. Have you ever made a search for Messrs. Campbell and Chappel, or for either Mr. Campbell or Mr. Chappel? No, sir.
796. Or for any other person outside the office? No, sir.
797. Have you at any time divulged the result of your searches for the office to any person or persons outside the office? No sir, I have not.
798. Have you sent me this document [*produced*] in which you explain your connection with Chappel? Yes, sir.
799. I think you had better explain in evidence what you state here? I think you will see by that statement that I called on Chappel and stated that we wanted to get a piano. My statement is as follows: "The piano in question, which I stated in Court I had bought through Mr. Chappel, was purchased in the following manner. Nearly six years ago (16th March, 1888) before he (Chappel) entered the land business he was in business as agent for sewing machines, mangles, pianos, and organs, &c., and had a shop in George-street, Haymarket. I did not know him at that time. One Saturday evening Mrs. Hill and I stepped in to inquire the price of a piano we fancied the look of. His terms being easy; arrangements were made to meet him at Bruce and Massey's, Pitt-street (for whom he said he was merely the agent) to see the stock; it ended in our taking a piano on the time-payment principle from Bruce and Massey. We were to pay for it in two and a half years by instalments of £2 per month, payable to Bruce and Massey, but it was four years before we could call it our own. Some months after we bought it we got into arrears, and being afraid that they might foreclose on us, I called on Mr. Chappel to ask him to speak for us to Bruce and Massey, but he thought the best way was for him to lend us £5 to pay them, which he did, and we paid him back on the 1st of the following month. This was about five years ago. As we found great difficulty in keeping up the payments, with other pressing claims, I called on him again on two or three occasions, and he spoke for us again. Mr. Chappel having entered the land business with Mr. Campbell, and eventually commencing several large actions, I thought I had better not have any business with him in any way, so afterwards I went to Bruce and Massey's direct. Their receipt for the full amount is attached to my report. I tried to explain this in Court but was not allowed to do so, being also very nervous. Mr. Campbell had nothing to do with this matter, and it is the only business in which I was ever connected with Mr. Chappel."
800. Is that an explanation which you now wish to give upon oath? Yes.
801. You say Chappel lent you £5? Yes.
802. Did you pay him interest for that loan? No sir.
803. Was he a stranger to you? Yes; but I suppose he got his commission out of the transaction.
804. You go on to say "Mr. Campbell had nothing to do with this matter;" do you now swear that to be true? Yes, sir.
805. During the trial in the Supreme Court did you state that on one occasion you had taken some certified copies to Mr. Chappel? Yes.
806. What is your explanation about that? The fact is Mr. Chappel had ordered those certified copies but did not call for them. I was going down town, and simply left them at his office.
807. Is it stated that you went down to his office in the Arcade? Yes.
808. Did you go there on many occasions? No, I did not.
809. On how many occasions did you go there? I went several times, but he was not in, then I had to go again.
810. Was that about the copies of deeds? No; that was about the piano.
811. Concerning the deeds or copies—on how many occasions did you visit his office? Only on the one occasion.
812. Do you know Charles Jackson Campbell? Only by him having come into the office, not otherwise.
813. Have you seen him in the office searching? Yes, sir.
814. On many occasions? Yes; I cannot say how many, but a large number.
815. And on these occasions did he take extracts? He took short extracts; only very short extracts, the same as others are allowed to do.
816. Have you seen Mr. Chappel in the office? Yes, sir.
817. On many occasions? Not very often.
818. What was he doing there? Sometimes making searches, and sometimes to see someone who was making a search for him—he did not do much in the search line himself.
819. Did Campbell? Yes; latterly Campbell has done a considerable amount.
820. Of general searching? Yes, sir.
821. It has been said that it is your duty to see that every person who is searching has a ticket? Yes, sir.
822. On that ticket is it stated what amount of fees has been paid? Yes, sir.
823. What is the charge for each search? Half-a-crown.
824. From how many registers can a person search for the payment of one fee? They go to the index first and find out if it is but one title. There may be only two required, but there may be twenty.
825. Is a person allowed to search against more than one name? Yes of course, the one ticket empowers him to go through a number of names.
826. Is he allowed to search for more than one title for the payment of one fee? No, sir.
827. Is it a fact that persons may search for three days on payment of 5s.? The search ticket lasts for one day unless it is initialled by Mr. Gillam.
828. Do searchers pay a second fee for searching on the second day? If Mr. Gillam initials the ticket, it implies that the search is not finished. I then allow them to continue that search until the search is completed.
829. Do they pay a second fee for searching on the second day if the ticket is initialled by Mr. Gillam? No.
830. It has been stated that a person on paying the sum of 5s. can make a three days' search, is that so? That is not so, sir.

831. If it has been stated that a notice is hung up in the Search Room announcing such as a fact it is not correct? Not unless it has been hung there since I left. Such a notification has never been there before. G. W. Hill.  
24 Oct., 1893.
832. Did you receive from Mr. Chappel or from Mr. Campbell at any time any money for any services which you had performed for them in the office? I did not; not a penny.
833. Do I understand you to say that you have not benefited in any way? I have not.
834. Do you say your connection with Chappel was before he became a land agent? As far as I know it was before he was a land agent.
835. Do you know anything of Hopkins' connection with Mr. Campbell? No, sir.
836. Did you ever take any message from Hopkins to Chappel or Campbell? No, sir.
837. Nor any parcel? No, sir.
838. Nor any paper? No, sir.
839. Nor bring any parcel from Campbell to Hopkins? No, sir.
840. Are you quite ignorant of any business transactions between them? Quite, sir.
841. Are you aware that at the trial, Campbell against the Anglo Australian Investment, Finance, and Land Company (Limited), that it was stated that a register was missing? Yes.
842. Do you remember what register it was that was said to be missing? Yes, sir; "Cumberland register, No. 28."
843. Have you ever seen a register called "Cumberland register, No. 28"? No, sir.
844. So far as you know, did ever such a register exist as "Cumberland register, No. 28"? No, sir.
845. Did you at any time get such a register either for Mr. George Evans, a solicitor, or for Mr. Pearson? No, sir.
846. Did you get any register for Mr. Evans and Mr. Pearson? Yes, sir.
847. What register was it? It was Grant Register, No. 28.
848. What did that contain? It contained grants in 1835.
849. Was that the register that Mr. Pearson and Mr. Evans examined? So far as I know, it was.
850. Did you take it up to Mr. Pearson's room? I cannot be quite certain, but I think I did.
851. Whether it was in his room or in the Search Room, was that the book they examined? That was the only book I took to them, and they examined that book.
852. Was that book which they examined in May last in the Search Room on the 19th of last September? Yes, sir. The only time it was taken out of the Search Room or out of the premises was when it was taken to the Supreme Court.
853. On the 19th of September was there any register missing? No, sir; not that I am aware of.
854. After some remarks had been made in the Supreme Court to the effect that a register was missing was Grant Register, No. 28, taken to the Supreme Court? It was taken to the Supreme Court on two consecutive days.
855. Was any book ever lost? No, sir; never.
856. What book did Mr. Pearson take into Court on the second occasion? The book referring to "Purchases of Special Grants," "C."
857. Was that the book that Mr. Pearson and Mr. Evans had examined in the previous May? I cannot say.  
[The witness withdrew.]

Christopher Williams Campion Hatton sworn and examined:—

858. *Commissioner.*] What are you, Mr. Hatton? I am a searcher in the Land Titles Branch, and I am also a conveyancer by profession. I have been a searcher in the Registrar-General's Department since the 22nd of May, 1884. Previous to 1884, I was employed temporarily in the department, first in 1865; but since 1872 I have been continuously searching. C. W. C.  
Hatton.  
24 Oct., 1893.
859. Are you conversant with the registers and indices in the Search Room? I am.
860. Have you ever known of the existence of "Cumberland register, No. 28"? I have had very little to do with the registers and I cannot tell what is there.
861. With what books are you most familiar? The indices.
862. Your searching I understand has been more in the indices than in the registers themselves? Quite so; your Honor.
863. During your connection with the Search Room have you ever heard of any register or book of indices being missing? No; not to my knowledge.
864. When it has been necessary for you to search an index have you ever been unable to do so? Not unless the index was being used by some person else; which has been very often the case.
865. Has your experience then been that no book has been missing from the Search Room? Yes.
866. At times are registers taken up to the Examiners' rooms? Yes; continually.
867. Is that necessarily so? Yes.
868. And at times to the Assistant Draftsman? Yes; but chiefly to the Examiners' of Titles.
869. You search the indices; and is the result of your search as a rule forwarded to the Examiners? First to the Draftsman and then to the Examiners.
870. Is it the information obtained by your search which leads to the Examiners sending for the registers? Yes.
871. Does your duty take you into the Search Room daily? Yes. At one time when I had no assistant I had to work downstairs mostly.
872. Have you an assistant now? Yes.
873. What is his name? Charles Henry Mallon. He has been my assistant since August, 1892.
874. Do you remember the arrangement of the room prior to March, 1890? I do.
875. Do you remember the facilities then afforded to the public for searching? Yes.
876. Since March, 1890, has the disposition of the registers and indices been altered? Yes; and very much improved.
877. Have the facilities afforded to the public for searching been increased? Yes; they have.
878. Is the supervision greater now than it used to be? Yes; very much so.
879. In your opinion is the supervision now sufficient? The building is certainly not sufficiently large for the requirements of a Record Room. It is a great deal too small; in fact the book shelves are all crowded.

C. W. C.  
Hatton.  
24 Oct., 1893.

880. Is the supervision sufficient? I think so; but certainly there might be some person going about to see what people are doing and to see that the books are put into their proper places.
881. Do you think then that the supervision might be increased? Yes.
882. In your opinion is it absolutely necessary that some person should always be walking about the room? Yes; there might be more supervision by a person always walking about the room.
883. While you have been in the Search Room, have you noticed any irregularities on any occasion? Not to my knowledge. 'The indices' table is a very long one. At the time of which you speak, in 1890, it was, I should say, about 65 feet long; so that if you were at one end you could not see what a person at the other end was doing.
884. When your duty takes you to the Search Room, I suppose you are greatly engrossed with the performance of your duty? Yes, I am greatly engrossed in my own duties.
885. And is the mere fact of your searching any protection to the room? None; there might be twenty or thirty persons searching there at one time, and I could not see what all were doing.
886. What is about the average number of searchers, do you think? From twenty to twenty-five. There might be more, for the number varies.
887. Are they, as a rule, at one long desk? Generally, but not always, for there are side tables.
888. So that at times are there people making examinations at these small tables? Yes; in perusing deeds.
889. Is it necessary that a person searching should be allowed to take extracts? Well, it has always been the custom to allow the taking of extracts.
890. What I ask is, is it necessary to take these extracts? Yes; I think it is necessary. For instance where a title is complicated, an extract is absolutely necessary.
891. Are extracts only allowed to be taken in pencil? In pencil, your Honour, and then only of a certain portion of the deed.
892. What portion of the deed? The essential parts with reference to covenants and otherwise.
893. What is there to prevent a searcher from taking other than these portions of the deed? I do not see that there is anything to prevent him.
894. Is there anything to prevent any person searching from making investigations into particulars other than of the title for which he professes to be searching? There is no means of checking it.
895. Can you suggest any means of supplying such a check? I think there should be licensed searchers—searchers licensed by the Registrar-General, so that there should be complete control over any misconduct, and an accompanying power to cancel the license for such misconduct. The Registrar-General should have this control, but before this power can be vested in his hands the Act controlling the department will have to be altered. A further alteration would then be necessary in relation to the payment of fees. At present the fee for each search is half-a-crown, but there is nothing to limit the duration of that search.
896. Can you tell me whether or not there has been a notice posted in the Search Room asserting that people by paying a fee of 5s. can search for three days? Yes, I believe such a notice has been posted.
897. Can you tell me how long that notice has been hung in the room? I fancy it must have been there for more than twelve months.
898. With the space at command could you suggest any alteration in the disposition of the registers or indices which would result in benefit to the public using the Search Room? I do not see, with the space at command, that there could be any alteration in that direction. The building is altogether too small for the work of the department as it is at present.
899. In your experience has any matter come before you where information has been afforded to the outside public by an officer of the department? I have never known of it. Such a thing has not come under my notice.

[The witness withdrew.]

Edwin Augustus Cleve Smith sworn and examined:—

E. A. C.  
Smith.  
24 Oct., 1893.

900. *Commissioner.* What position do you occupy in the Registrar-General's Department? I am one of the Examiners of Titles, and I have held that position for the last five years.
901. During that time have you had any personal knowledge of the working of the Deeds and Search Branch, in the Registrar-General's Department? Not much; very little. The Examiners have to inspect registers daily, and these registers are brought to the Examiners by the clerk in charge. Otherwise I have had no personal nor actual contact with the Search Room as the Examiners occupy separate rooms.
902. Is any register you may require brought to your room by some messenger? Yes.
903. What messenger? Always the same one—the messenger who has been in charge of the registers below, that is Hill, the book-porter.
904. Can you tell me when the register or registers you have used in your room have been returned to the Search Room? I think there has been one settled rule in relation to the return of these books. After they have been used in the Examiner's rooms the books have generally been placed in one corner of the room to await their return to the shelves in the Search Room below. Sometimes, Hill, the book-porter, has come up and taken the registers away. Otherwise, I believe, Lilley, the messenger of the office, takes them away at the end of the day.
905. Do you find in practice that the books are returned at the close of each day? That has been the result of my general observation. I do not think it has ever been the case that they were not taken away till the next morning.
906. Is Mr. Christopher Williams C. Hatton your searcher? Yes.
907. Does Mr. Hatton search in the indices only? Yes.
908. Do you refer to the deeds themselves and the registers? Yes.
909. From your experience, can you say if it is necessary that persons searching should be allowed to take extracts? Yes; I think it is necessary.
910. In your opinion, does the right to search carry with it the right to take extracts? I think so.
911. Can you suggest any alteration that might be made in the mode of conducting the business in the Search Room? Well, I do not think I can suggest any alteration, not having had personal contact with the office, but it seems to me that a person of considerable intelligence and experience might be appointed to superintend all the machinery in connection with the registration of deeds, the supervision and conduct

conduct of searches and the general superintendence of the Search Room. I think it is necessary that any member of the public or any other person, inspecting a deed, should be exposed to the observation of an officer of the department, so as to minimise, as far as possible, any attempt to alter or tamper with the contents of the registers.

E. A. C.  
Smith.  
24 Oct., 1893.

912. In your opinion, should the Registrar-General be a professional man? I think there are strong reasons why he should be a professional man.

913. In your opinion, should the Deputy-Registrar General be a professional man? I do not think it is necessary that he should be; assuming, of course, that he is under the supervision of a professional head.

914. Have you been in the Search Room? Yes; frequently, but some years ago. I do not suppose I have been in it for searching purposes during the last six or seven years.

915. Personally, can you suggest any improvement in that room with the space at command, so far as the disposition of the registers is concerned? I cannot; not having been in the room for at least the last five or six years.

916. During your tenure of office, have any instances come under your notice of any information that might have been given to the public by officers of the department? No; I am not aware of anything. Personally, I have not heard of anything in that direction. There has been some sort of suspicion rumoured from time to time.

917. But have you heard of anything tangible? No; nothing tangible. I am certain no such instances came under my notice.

918. Have you heard of anything in connection with applications No. 8,920 and No. 9,065, in which one Campbell was interested? I neither recollect the name nor the numbers.

919. Have these applications come before you? That I cannot say; but naturally you may take it that these applications have not come before me.

920. Has any application come before you of late concerning the validity of which your suspicions has been aroused? No.

[The witness withdrew.]

Harry Bingham Thomas sworn and examined:—

921. *Commissioner.* Are you one of the Examiners in the Land Titles Branch of the Registrar-General's Department? Yes.

H. B.  
Thomas.  
24 Oct., 1893.

922. How long have you been an Examiner? For two years and a few months; since September, the 1st, 1891.

923. Had you any experience as a member of the Legal profession in this Colony before that date? Yes; I had had experience. I was practising for three years as a solicitor, and was engaged professionally for six or seven years before that.

924. Before you became an Examiner of Titles, did you from time to time visit the Search Room in the Registrar-General's Department? Yes; I visited the Search Room, but not frequently.

925. Can you tell me in what year you were in the habit of visiting that room? In the early part of that period when I was engaged by Messrs. Norton and Smith, and while I was practising on my own account—that would be, I think, between the years 1885 and 1889.

926. Since you have been an Examiner in the Registrar-General's Department, have you visited the Search Room? Only once or twice.

927. On these occasions did you notice whether there had been any alterations in the Search Room? Yes, there had been alterations since I originally went there.

928. Were these alterations for the better or otherwise? I certainly think they were for the better.

929. Can you suggest any further alterations that might be made with the space at command? I do not think, as far as I can understand, and as far as I have heard, that there is room to make such alterations as I would suggest.

930. Have you had any experience of the mode in which the searches are made? Yes.

931. Can you suggest any alteration in that respect? As far as the searches allowed to be made are concerned I think there should be more careful supervision than there is at present. People searching should not be allowed to have the volumes at their command on the search table as they have now.

932. Do you mean to say then that there should be a greater amount of supervision? Yes, undoubtedly.

933. Have you at any time known of a register or book of indices to be not forthcoming when required? No, never.

934. Have you ever heard that any of the indices or registers have been lost? Only on one occasion, and curiously enough that came under my notice this morning. This was a case where a certain register had been missing. It is an old case with which Mr. Edwin Burton, a previous Examiner of Titles had to deal. It came before him, and this morning, by a strange coincidence, it came before me; and I found from the papers that reference was made to a particular register which was not forthcoming. I cannot say what the particular value of that missing register is.

935. But there was some reference to a register that you have not yet seen? Yes; there was. I did not call for it; Mr. Burton, my predecessor, called for it, and at that time he wrote to Melbourne announcing the fact that there was a missing folio, and at the same time desiring to know if the register had been sent to Port Phillip. It was not there, and nothing has been done since. I mention this case as a curious coincidence.

936. Are the inquiries you are making into that now pending? No; apparently the inquiry is closed. It was simply a letter from the Register-General here to the Register-General in Melbourne.

937. You cannot say then that there was a register missing, but on the face of the papers there appears to have been a folio missing? According to the index.

938. Are the grant registers frequently before you? Yes; frequently.

939. In what state of preservation are they? Fairly good; for old documents, very good.

940. Are any of the registers that come before you in a dilapidated condition? Not in a dilapidated condition.

941. Do any of them require any special attention? Some of the older registers, I think, will wear out before long. I certainly suggest that they should be copied.

942. Do you suggest that they should be copied, and that the copies should be used by the public, except when it is necessary that the originals should be seen? Certainly.

943.

- H. B. Thomas.  
24 Oct., 1893.
- 943-4. That the copies should be in general use, and the originals kept for special occasions? Yes; that would be an excellent arrangement.
945. Would it not be best that these copies should be made on parchment? Yes, certainly; the old ones are on paper.
946. Can you say whether two applications have come before you numbered respectively 8,920 and 9,065? I cannot speak exactly as to those numbers.
947. Applications, I mean, in which Charles Jackson Campbell was interested? Certainly there are two applications before the Examiners, but I cannot speak authoritatively as to the numbers.
948. Do you know the names of the applicants in these cases? Sharp is the name of one and the other is in the name of Macgregor.
949. In Sharp's application are there many deeds? I should say roughly speaking—and it is a case that has received anxious attention from Mr. Long and myself—I should think there are something like a dozen deeds.
950. In Macgregor's application are there many deeds? I think there are two deeds and a number of certified copies of old deeds.
951. With regard to Sharp's application, has any suspicion been raised? Yes.
952. In what way? As to the genuineness of the signature of the vendor.
953. Can you remember who the vendor is? It is purported to be signed by the then manager of the Bank, Mr. Sterling, and witnessed by a Mr. W. P. Woolcott.
954. One deed or two deeds? I am not sure; but I think there are two deeds purporting to be witnessed by Woolcott. In one of them there is an attesting witness who does not know how to sign his own name, or even to spell it.
955. In Macgregor's application have your suspicions been aroused? Yes.
956. In the same way? Yes.
957. With regard to many deeds? Only in one.
958. Which is that? It is a very old deed dated some fifty years ago.
959. When was it registered? It was only registered quite recently, within the last year or two.
960. Have these applications been considered or only partially considered? These are cases now pending.
961. Do I understand that these applications may be withdrawn at any time? Yes, at any moment.
962. And can the papers already lodged be claimed by the applicants? Undoubtedly.
963. So far as you know, have any steps been taken to test the validity of those deeds? No.
964. Can you remember when the deed in Macgregor's case was registered? Quite recently; I think last year.
965. Can you say by whom it was registered? I am not in a position to say.

[The witness withdrew.]

Charles Hardwick Keele sworn and examined:—

- C. H. Keele.  
24 Oct., 1893.
966. *Commissioner.*] What are you? Deputy Registrar-General in the Land Titles Office of the Registrar-General's Department.
967. Where is your room, Mr. Keele? It is the Public Room. I am stationed behind the counter where the public business is transacted. I am junior deputy to Mr. Newcombe.
968. Do your duties ever take you into the Search Room of the Deeds and Search Branch? No.
969. Do your duties keep you in the Land Titles Branch? Yes.
970. Are you at the counter in what is generally known as the Real Property Office? Yes.
971. Have you the supervision of the books in your office? Yes, in my particular branch, which is the Public Room, and in the event of Mr. Newcombe being away I take general supervision of that room.
972. Are searches conducted in that room? Searches are partially made in that room. Searchers obtain receipts there, get certain information, and then go into the Search Room of our branch.
973. Do you issue tickets for searching? Yes, I do. It is part of my duty to issue tickets to persons desirous of searching in our branch.
974. What is done with these tickets? They are presented to the cashier who is in the same room, and after he has been paid the necessary fee and has initialled the ticket the person applying is allowed to make an official search.
975. Does that ticket remain in the possession of the searcher? No; it is handed over to the clerk in the Search Room.
976. Does the searcher's name appear on the ticket? Yes; we make out the receipt in his name, and it appears on the ticket.
977. Does it also appear on the butt? Yes.
978. From these butts can you at any time see who has been searching on any particular day? Yes.
979. Does the subject matter of the search appear upon the butt? No.
980. From the butt then you cannot see for what a person came to search, but do you see that a certain person has searched? Yes.
981. Have you had any experience of the mode in which business is conducted in the Search Room of the Deeds Branch? Yes.
982. Have you searched there? Yes; I have been in the office for twenty-one years, and naturally I have been in the Search Room of the Deeds Branch now and again.
983. Of late years? Once, I think, during the last two years.
984. In whose interest? That of a lady friend.
985. Did you get permission to search on that occasion? Yes; from Mr. Gillam, clerk in charge of that room.
986. Did you get a ticket? No, I did not; but my lady friend got a ticket.
987. Did you notice how many persons were searching at that time? I suppose about twenty.
988. On other occasions have you been in that Search Room? Yes, sir.
989. On what business? On business connected with the office.
990. Have you made any other private searches? No, sir.
991. Have there been many alterations made in that room since March, 1890? Yes, sir, a great many.
992. For the better? Yes, very much.

993. Can you suggest any further alterations that might be made with the room at command? I think one or two additions might be made. C. H. Keele.
994. What improvements do you suggest? I would suggest one improvement in regard to the indexing. There is only one general index now having reference to vendors, and I would suggest that there should be an index of purchasers as well. <sup>24 Oct., 1893.</sup>
995. What is shown in the indices now? Just the dealings by vendor.
996. In other respects, can you recommend or suggest any further improvement in that room? I think if the passage was blocked just near the door by having a press put there, it would necessitate the whole of the public passing the chief officer, and at the same time the keeping of them under continuous observation.
997. Is what you suggest that the supervision might be improved if this alteration were made near the door? Yes, sir.
998. How many persons have you searching in your branch at one and the same time? Sometimes not more than three or four and sometimes as many as eight or ten. I may say that it is a very small counter and in fact the whole building is altogether too small.
999. In your opinion, does the system adopted in your branch work satisfactorily? Yes.
1000. In your Department are the public allowed to handle the books? Not unless they get permission.
1001. At the counter even? No. In exceptional cases they may go behind the counter and search, but not without special permission.
1002. Have they any right to go behind the counter? No; they have not.

[The witness withdrew.]

Henry John Noble sworn and examined:—

1003. *Commissioner.*] What position do you hold? Accountant in the Registrar-General's Department. H. J. Noble.
1004. How long have you been in that Department? Eighteen years on the 12th of last July. I have been accountant since May, 1890. Before that I was with Mr. Keele at the Land Titles counter. Since the present Registrar-General has been in office, I have been accountant. <sup>24 Oct., 1893.</sup>
1005. Have you to do anything directly or indirectly with the Search Room of the Deeds Branch? Yes, your Honor, as regards checking the fees.
1006. Are the fees payable by the searchers paid to you? No, to the cashier, but the accountant keeps a check as far as it is possible to do so.
1007. In what way? In the first place by seeing that a proper record is kept of all fees paid, and in exercising as far as he can, under the Registrar-General, some kind of personal inquiry from time to time to see that the fees are paid.
1008. Have you, as accountant, to do with both income and expenditure? Yes.
1009. What amount of fees is received from the searchers in the course of a year? I have prepared a complete report from departmental records for your perusal. I hand in that report.
1010. For the year ending 31st December, 1889, can you tell me what amount of fees was received for searches? Yes; £725 14s. 0d.
1011. Can you tell me what amount of fees were received for a similar purpose during the first four months of 1890? Yes; £252 18s. 6d.
1012. And from May to December during the same year, what was the amount of fees received? It was £671 19s. 6d.
1013. During the first eight months that you were accountant, did the fees increase or decrease? They increased, your Honor.
1014. By how much? By nearly £200.
1015. After you had been appointed accountant, did the fees during the years 1891, 1892, and 1893, continue to increase? Yes.
1016. Can you tell me what the total fees received has been for the nine months of 1893, already expired? £1,075.
1017. Has any alteration been made in the manner in which the public has been allowed to search since March, 1890, and with regard to the system of payment by fees? Yes.
1018. In what way? Previous to that year, Book-porter Hill was frequently called upon to do clerical work. After I was appointed to the position of accountant, one of the first things I did was to point out to the Registrar-General that it was simply impossible in the existing system to effectually check the fees. The Registrar-General saw the force of my contention and immediately gave instructions to Hill to confine his attention entirely to the Search Room and its supervision. The manner of checking the search tickets was also altered. Instructions were issued announcing that no one should be allowed to go into the Search Room, unless he had a search ticket.
1019. As a matter of fact, however, have they to go into that room to get a search ticket? Yes; they have to go to Mr. Gillam's counter.
1020. After having received the ticket from Mr. Gillam's counter in the Search Room, where does the intending searcher pay the necessary fee? To the branch cashier, in another room, on the same floor immediately opposite the Search Room.
1021. So that any person wishing to make a search has first to enter the Search Room to obtain his ticket, then leave it for the purpose of paying his fee, and to then return to make the search? Yes.
1022. Are you aware that any further instructions were given to Book-porter Hill? Yes; to the effect, that no person should be allowed to search without having obtained a ticket and paid the fee therefor.
1023. Before 1890, were persons allowed to make more than one search for the payment of one fee? That question I am not in a position to answer definitely. I should imagine from the returns that they were.
1024. Whether they were allowed to do so or not, does it appear from these returns that you have supplied that they must have done so? I believe they did.
1025. Assuming that searchers did make more than one search for the payment of one fee prior to 1890, has that practice been altered? Instructions have been given to the book-porter to thoroughly check the searches so far as he can, but it is extremely difficult to say whether a person does or does not search in more than one matter.

- H. J. Noble. 1026. From the increase of income derived from search fees, do you gather that a greater supervision in that respect is now exercised? Decidedly, your Honor; I think the increase has been entirely owing to the additional supervision.
- 24 Oct., 1893. 1027. Has the number of persons searching increased or decreased during the last few years? Yes. From the returns that I have compiled from our books it appears that in 1889, the number was 7,249.
1028. What was the number of searchers in 1892? The number was 17,697.
1029. What is the number for the nine months already expired this year? This is 14,759.
1030. Since the present Registrar-General took office has the system of checking the record of fees been altered? Yes, in every particular.
1031. Has the expenditure been revised? Yes, to such an extent, that an altogether new system has been adopted.
1032. Are these reports you hand to me signed by you, and do you wish them now to be embodied in your evidence? Yes, your Honor. [*Reports handed in and marked Exhibit "G."*]
1033. Does this report of yours, dated the 23rd October instant, sufficiently set forth the reforms that have been introduced in the Registrar-General's Department since 1890? Yes, your Honor.
1034. Do you work overtime in the office? Yes, Your Honor.
1035. In what part of the office? In my own room.
1036. As far as you have seen, do clerks in the Search Room work overtime in the office? They work overtime occasionally.
1037. What clerks have you seen there so working? I have noticed clerks there working on several occasions, but I have had no necessity to particularly notice who they were.

[The witness withdrew.]

WEDNESDAY, 25 OCTOBER, 1893.

[The Commission met at 10 o'clock.]

Present:—

HIS HONOR JUDGE FITZHARDINGE.

Herbert Chappel sworn and examined:—

- H. Chappel. 1038. *Commissioner.*] What are you? A land and mining agent.
- 25 Oct., 1893. 1039. Are you in partnership with any person? No.
1040. Have you been at any time in partnership as a land agent? I have been in partnership with one Charles Jackson Campbell.
1041. When did you go into that partnership? About 1887.
1042. That was in partnership with Charles Jackson Campbell—and when was that partnership dissolved? About 1890.
1043. What month in 1890? At the end of October or the beginning of November.
1044. Since then, have you been interested in any operations or transactions in land associated with that partnership? No; we were interested in the Gore Estate when the partnership was dissolved and I think that the interest in that partnership continued after the dissolution of partnership until February this year.
1045. Did you remain interested in the Gore Estate until February of this year? Yes.
1046. Are you interested with Campbell in any other estate? No.
1047. Or is he interested with you? There is a matter having reference to land belonging to the Osborne family concerning which we had an agreement, but that, I think, has expired. That was an agreement between the Osborne family, C. J. Campbell, and myself. The land originally belonged to the old Bank of Australia. I have endeavoured to get out of this affair as quickly as I could.
1048. With the exception of this land to which you refer, are you interested in any manner with Campbell—and that agreement, you think, has expired? No.
1049. When did you first become acquainted with George W. Hill, book porter in the Registrar-General's Department? The exact date I cannot give you, but I think it was about six or seven years ago.
1050. Would that be in March, 1888? I think it was before that.
1051. What business were you in then? I was in the sewing-machine and pianoforte business.
1052. Was that before you were engaged in the land business? Yes.
1053. Where was your place of business? In the Haymarket.
1054. Can you remember how you first met Hill? As a casual customer. He called at my place of business in the Haymarket as a casual customer.
1055. What was the result of that call? The immediate result was that he wanted to purchase a piano. We had not one in stock to suit his taste and I arranged with him to go to Bruce and Massey's for the purpose of obtaining an instrument to his liking on the understanding that I should get the commission usual to such a transaction.
1056. Were you then acting as an agent for Bruce and Massey? Yes.
1057. Did you arrange with Hill as to how the piano should be paid for? Hill arranged with Bruce and Massey for the payment.
1058. Do you know what that arrangement was? I understood it to be a time-payment arrangement.
1059. Had you anything to do with the receipt of those time-payments? No.
1060. Do I understand that these payments were made directly to Bruce and Massey? Yes.
1061. When did you next meet Hill? It is more than likely I met him in the Search Room of the Registrar-General's Department on the next occasion.
1062. Was that after you had entered into the land business? Yes.
1063. What were you doing in the Search Room? I had a piece of land at Botany, or had an interest in a piece of land at Botany, some 4 acres in extent, which was supposed to be in the possession of a man named Vincent. I went down to Botany to arrange for the purchase from him of the possessory title of that land and to bring it under the Real Property Act. Eventually I obtained possession of that title, we brought the land under the Act, and I went to the Search Room to make the necessary searches.
1064. Did you go there to make a search about this property? Yes.
1065. Was that the first time you had made a search? The first time, I believe. 1066.

1066. Had you anyone to assist you in making that search or did you do the searching by yourself? I had assistance. I inquired from Book-porter Hill for particulars as to how to go about the searching. H. Chappel.  
25 Oct., 1893.
1067. Did Hill give the required information? Yes.
1068. Did he show you what register to look at? He showed me the indices and books generally which were following up in rotation.
1069. How often did you search in connection with that property? I think it was twice.
1070. On each occasion did Hill assist you? On the first occasion only.
1071. Can you remember in what year that search was made? I cannot; it must have been about 1887.
1072. Was it before or after Hill had purchased that piano? That I cannot say.
1073. After you had made Hill's acquaintance, either in the Search Room or elsewhere, did you at any time render him assistance? Only on one occasion.
1074. How long was that after you had been in the Search Room? I think it was about two years.
1075. How did you assist him? I lent him £5 to pay over-due instalments on his piano.
1076. How came you to lend him that sum of £5? Because he asked me for it. He told me was in arrears to Bruce and Massey. I was flush of money at the time; he asked me to lend him the sum named, and I lent it to him.
1077. Do I understand that he called on you about the matter? Yes.
1078. Where? That I do not remember.
1079. Did the interview take place in the Search Room of the Registrar-General's Department? No; probably, and it is more than likely that the interview took place at the Haymarket.
1080. I want to know what you remember, and not probabilities? I could not swear that the interview took place in the Search Room.
1081. If not in the Search Room, can you say where it was? No.
1082. How many times did you meet Hill before you lent him that £5? About five or six times.
1083. In the Search Room on every occasion? Yes; in the Search Room.
1084. Before you lent him that £5, were you actively engaged in the land business? I can hardly say I was engaged in it. I was doing a little, but was following my usual business at the Haymarket at the same time.
1085. On those visits to the Search Room, were you searching against different properties? Yes.
1086. Was that sum of £5 ever repaid? Yes.
1087. How soon after it was lent? I think about five or six weeks—not more than that.
1088. Had you any other occasion to assist Hill? No.
1089. Either by lending him money, or in any other way? On one occasion I spoke to Bruce and Massey about him. His payments for the piano were behind, and I spoke to them for him on that account.
1090. Did you obtain any extension of time for him in which to make those payments? Yes.
1091. In what year did you first become a litigant in land matters? It must have been about 1886 or 1887—1886, I think.
1092. Was that before the dealings in connection with the piano? I cannot remember.
1093. Was it about that time? Somewhere about that time, I think.
1094. Have you been a litigant in land matters since? Yes.
1095. Almost continuously? No; it is hardly fair to say that. The first litigation was in connection with the land at Botany—that land of Vincent's—against one Thomas Broughton, and I won that.
1096. What was the next action? About the Gore Estate.
1097. Who was that against? Thomas Broughton.
1098. Who was with you in that action? Charles Jackson Campbell.
1099. Was the second action, then, you with Campbell against Broughton? Yes.
1100. Has that action terminated? The action against Thomas Broughton is, I think, terminated. It is at all events terminated so far as I am concerned.
1101. Had you any other action? No, only these two.
1102. Have you been in other litigations? I believe I have been an agent for people who have been in litigation, but my name has not come before the Court, and I have not been a party to any action.
1103. On how many occasions have you been an agent in those litigations? Two.
1104. What occasions were they? One was Austin *versus* Archer.
1105. About what property? Certain property at Burwood.
1106. What was the other action? Austin and others *versus* Devereaux.
1107. Have each of these actions terminated? One only, Archer's; the other is pending.
1108. Where is the land concerning which the action of Archer and others *v.* Devereaux was instituted? That land is at Brankstown, and the action is still pending.
1109. In addition to the visits you have already mentioned as having been made to the Search Room, have you paid other visits? Yes; scores.
1110. Do you continue to pay visits to that room? Yes; I was there on Monday last, and I hope to continue going there.
1111. Where do you carry on your business now? At 158, Pitt-street, in Phoenix Chambers.
1112. Have you given up your other business in the Haymarket? Yes; some years ago.
1113. In what year did you cease business operations there? In 1889 or in 1890.
1114. Did you at any time receive any document at your office from Hill, the book-porter in the Registrar-General's Department? Not at my present address. When Campbell and myself, as partners, had an office in the Arcade, Hill on one occasion brought down, I think, two certified copies we had ordered from the Registrar-General's Department.
1115. Certified copies of deeds? Yes.
1116. Can you tell me when that happened? I think it must have been four years ago. It was somewhere about twelve months before I and Campbell parted.
1117. Can you explain why Hill took those copies to your office? Hill was very obliging in the performance of his duties. We wanted these copies in a hurry, and we asked that we should have them, but the officials in the Department failed to let us have them at the time promised, and as soon as they were ready Hill brought them down to our office.
1118. Did you pay him for his trouble? We paid him for the certified copies, but I do not think we paid Hill for the trouble he took in bringing them to our office. 1119.

- H. Chappel. 1119. Do I understand that you paid Hill for the certified copies, or did you pay the fee into the Registrar-General's Department? I am under the impression we paid Hill on delivery.
- 25 Oct., 1893. 1120. Has Hill at any other time visited your office in the Arcade? Yes.
1121. On what occasion? When he wanted to borrow some money to pay for his piano, or when he wanted to get an extension of time for payment from Bruce and Massey; I do not remember which. It was about that time, at all events.
1122. On how many occasions was he at your office in the Arcade? Not more than three times altogether.
1123. With these exceptions have you had any business transactions with him? No.
1124. Have you paid him at any time any money? No.
1125. Have you promised him any money? No.
1126. Have you promised him any return for services rendered on any account? No.
1127. Have you promised him any share or interest in any land or in any way? No.
1128. Are the only transactions you have had with him concerning the piano, and his taking to your office the certified copies of certain deeds? Yes, that is all.
1129. Have you read the evidence given in the Supreme Court in the case Campbell against the Anglo-Australian Investment Finance and Land Company (Limited)? Yes; I read most of it in the *Daily Telegraph*. I was out of the Colony at the time of the trial, but I have read most of the evidence since my return from Queensland.
1130. How long have you known E. C. Hopkins? About six years.
1131. Where did you first meet him? At Mr. Aitken's office. Mr. Aitken is a solicitor, and I met him with Campbell at that gentleman's office one afternoon.
1132. Were you with Campbell? Yes.
1133. Was that the first time you met Hopkins? Yes.
1134. Did you then know he was a clerk in the Registrar-General's Department? Yes.
1135. What took place on that occasion? We arranged what amount of money we were to give Hopkins if he gave us information regarding certain lands concerning which he and Campbell must have had some previous conversation. It appeared to me that Campbell and Hopkins had been speaking over the matter before we met on this occasion.
1136. Had you heard so from Campbell? Yes, I had heard as much.
1137. What took place at that interview? We signed an agreement arranging that we were to give Hopkins certain moneys if he pointed out certain lands said to belong to the Osborne Estate. Whatever estate it was in which this land was supposed to be we agreed to pay him a certain amount out of the proceeds from subsequent transactions.
1138. Can you remember what amount you agreed to pay Hopkins? I think it was about £500.
1139. At that interview was the agreement made? No; I do not think it was actually made, but the result of the meeting was that we agreed to pay him a certain sum of money if he gave us information.
1140. Was that condition embodied in the agreement? Yes; and the agreement was drawn up by one, Mr. Nightingale.
1141. Who is Mr. Nightingale? He was at that time a law stationer.
1142. Before that particular agreement was drawn up had you made any other agreement with Hopkins? Not that I remember. Nightingale based his agreement on this document. [*Document produced dated 11th November, 1887, purporting to be an agreement between H. H. Osborne and others, trustees of the will of the late Henry Osborne and Charles Jackson Campbell and Herbert Chappel.*]
1143. By whom was this agreement prepared? I think by Mr. Aitken.
1144. Is this document you hand to me a copy? Yes.
1145. Was this copy made by Mr. E. Lucas? Yes.
1146. Was this agreement registered? I do not think so; I am not sure. [*Document handed in and marked Exhibit "H."*]
1147. Was the agreement made with Hopkins registered? Yes.
1148. [*Handing to witness a document.*] Have you any doubt that this is a copy of that agreement? No, I have not.
1149. Does that agreement appear to bear the date, 1st of June, 1888? Yes.
1150. After entering into that agreement what assistance did you receive from Hopkins? Practically, none. I may say this much, however, he had told us where the land was, but he gave us no assistance in any other way.
1151. Did he give you any information as to the situation of the land? Yes.
1152. What land was it? Land on the Parramatta River, belonging to Sir William Manning.
1153. Is that the Battersea Estate? Yes.
1154. Did Hopkins give you information about any other land? No; we had Osborne's land, but we had it without his assistance. In the first instance Hopkins promised to introduce us to the Osborne family, and he did so.
1155. Do I understand that he introduced you to the Osbornes? Yes; through Mr. Aitken.
1156. Can you tell me in what year that was? I cannot; but it must have been before the date of this agreement.
1157. Would that be before the 11th of November, 1887? Yes.
1158. Does this document [*produced*], bearing date the 20th of March, 1888, purporting to be an agreement between Sir William Manning, of the first part, and Herbert Chappel and Charles Jackson Campbell of the second part, concern the Battersea property? Yes.
1159. What had you to do in the terms of this agreement? To make known to Sir William Manning certain land belonging to him. We asserted that we knew of certain property belonging to Sir William Manning that he did not know of himself. He said it was not so, and after a considerable amount of correspondence he agreed to enter into this agreement, giving us one half of any land pointed out to him that belonged to him, but which was unknown to him.
1160. After entering into this agreement in March, 1888, with Sir William Manning, did you in June of the same year enter into that agreement with Hopkins? Yes.
1161. After entering into that agreement with Hopkins, did you discover where the land was? Before we made it known to Sir William Manning at all we knew where the land was.
1162. And was it not till after you had arranged to get a half share in the property from Sir William Manning that you agreed to give one third of your half share to Hopkins? Yes. [*Document handed in and marked Exhibit "I."*]

1163. Did you convey one third of your half share to Hopkins? No; we did not convey any of the land to Hopkins. H. Chappel.  
25 Oct., 1893.
1164. Did you make a subsequent agreement with Hopkins on the 14th of June, 1889? I do not remember any agreement, but I know we had an understanding between us.
1165. Please look at this. [*Copy of agreement handed to witness.*] After refreshing your memory by reading that copy, did you make a subsequent agreement with Hopkins? Yes.
1166. On the 14th of June, 1889? Yes.
1167. By which in lieu of land he was to receive a sum of money? Yes.
1168. In pursuance of that agreement, did you pay him a sum of money? Yes.
1169. How much? I cannot remember how much, as Campbell did all the book-keeping and paid all the accounts.
1170. Can you tell me what you paid him that sum of money for? For pointing out the land.
1171. Did you hear from him at any time how he learned where the land was? No.
1172. Have you any idea how he learned where that land was? No; I have no idea.
1173. Had you many interviews with Hopkins at the Registrar-General's office? Very few; only when ordering copies or something of that sort.
1174. Copies of what? Certified deeds of any kind.
1175. Was Hopkins in the Deeds Branch? No; in the Births, Deaths, and Marriages Branch, and I hand you some of the receipts I received in connection with the copies of births, deaths, and marriages certificates.
1176. Had you occasion to obtain many certified copies of births, deaths, or marriages? A great many at one time.
1177. When applying for these certified copies would you see Hopkins? Yes.
1178. Did he call at your office on any occasion? He has been at my office.
1179. On many occasions? Very seldom.
1180. On what matters? In regard to certain moneys that remain unpaid yet.
1181. I mean prior to the date of this agreement before any money became payable? I do not remember seeing him before that; never at my office for I knew little of him at that time.
1182. Where did you meet him if you wished to see him on business? At Mr. Aitken's office.
1183. Did you meet him there on many occasions? On three or four.
1184. Did you take any active part in that matter of the Battersea Estate? No; Mr. Campbell did.
- [The witness withdrew.]

Harry George Davy sworn and examined:—

1185. *Commissioner.* What are you, Mr. Davy? I am a certificated conveyancer, employed in the office of Messrs. Stephen, Jacques, and Stephen, solicitors, of this city. H. G. Davy.  
25 Oct., 1893.
1186. How long have you been a certificated conveyancer? About five years.
1187. How long have you been in your present office? About nine years.
1188. During that period of nine years, has your business taken you on many occasions to the Search Room of the Deeds Branch in the Registrar-General's Department? Yes, your Honor, daily for the past eight years.
1189. Since the present Registrar-General was appointed, in March, 1890, has the disposition of the indices and registers in that Search Room been altered? Yes; it has been altered.
1190. For the better? As regards the indices, I do not think the alteration has been for the better, as the staff of officers are at the bottom end of the room and the public enter at the top.
1191. In other words, are the public between the street and the staff? Exactly so.
1192. Has the mode of conducting searches been altered? There has been an alteration in the time which a search ticket is supposed to last. A search ticket is now only available for one day unless it is initialled by one of the deputies.
1193. What was the practice before? The previous system was rather loose.
1194. How often at that time could you search on one ticket? Some people used to search for two or three days.
1195. Was there practically no limit then? No.
1196. On one ticket could you search against different names and different properties? Yes; quite easily.
1197. From that fact, do you argue that the business was loosely conducted? Yes.
1198. Do the tickets now only last for one day unless initialled by one of the deputies? Yes.
1199. Under the present system, would it be possible to make more than one search on one ticket against different names and different properties? Yes.
1200. Ought that to be allowed? No; it should not be allowed, but the difficulty is how to alter it.
1201. By paying the sum of 5s., is a searcher now allowed to search for a longer period than one day? Not in the Deeds Branch; he is in the Land Titles Office.
1202. On any occasion that you have desired to search, have you found any of the registers or indices to be missing? No; not for any length of time. A register might be upstairs with one of the examiners, or one of the indices might be downstairs with the binder.
1203. Have you ever heard of any register or book of indices being lost? No, I have not. I heard some common talk about a deed said to have been cut out.
1204. Have you ever heard of any book of indices or register being tampered with? There was some rumour some years ago to the effect that a deed had been cut out from a book.
1205. When your duties have taken you to the Search Room, have you received any assistance either in finding the indices or registers from the book-porter? No; I do not think I have.
1206. Would you probably require any assistance, being so conversant with the books? No; I should not require assistance of any kind except in the case of grants, which are kept under lock and key in his care.
1207. Can you suggest any alteration in the present system? Yes; I have one or two suggestions to make as the result of my experience as a constant searcher. First, I think official searches ought to be made.

- H. G. Davy. 1208. In other words, should the searches be made by officers of the department? Yes.
- 25 Oct., 1893. 1209. And should the department necessarily be made responsible? Yes. My second suggestion is that searchers should be licensed. Government searchers should pay fees. The objection, perhaps, to the first suggestion are that a large staff of competent searchers would be necessary, and furthermore, to make the system complete, other offices would have to be brought into line.
1210. That would be, I presume, the appointment of official searchers for other offices, too? Yes; and that being so, it would virtually mean closing the doors of the department to the public.
1211. To bring about either of these reforms, will the present Act have to be altered? Yes.
1212. Is there any further objection, in your opinion, to the adoption of these suggestions? No; the advantages would be principally to the profession, who would be relieved of the responsibility associated with the authenticity of the searches. This responsibility being cast upon the Government, the fees payable should be put into an insurance fund. It would be an advantage to the public, in so far that they would be protected from any injury likely to accrue from the alteration of any deed. Another advantage of having official searches done in the office under sworn secrecy, it seems to me, would be a less likelihood of persons dabbling in doubtful titles. An objection to licensed searchers would be that the office would not be closed to the public unless everybody was compelled to give the searches to the licensed searchers, and this alteration could not be made without Legislative enactment. Then again, licensed searchers would have to be divided into two classes—what I would call private and public. An advantage of allowing licensed searchers would be that any delinquency could be traced more easily, and punished. Government searchers should pay fees for revenue purposes.
1213. From your large experience, is it absolutely necessary that a searcher should be allowed to take extracts? Yes; it is absolutely necessary.
1214. Are the facilities for taking extracts in the Search Room sufficient? Yes, your Honor, quite sufficient.
1215. Would you suggest that these extracts should be taken in ink? No.
1216. Do I understand the practice to be that when you go to make a search you have to obtain a ticket and pay your fee? Yes, your Honor.
1217. Does the name of the searcher appear upon that ticket? Yes.
1218. What eventually becomes of the ticket you receive? The ticket I receive is endorsed, and I take it away.
1219. Is it not deposited in the Registrar-General's Office? The tickets are in triplicate.
1220. Is the name of the searcher put on each of the three parts? Yes.
1221. So that would it be possible to find out who had been a searcher on any particular day? Yes; you could ascertain the name of the searcher, but not the subject matter of the search.
1222. Can you make any suggestion in that respect? I have an idea in connection with this matter, but I think it would be impracticable to put that idea into force. I would suggest that the Government should issue official search-papers, containing printed instructions, and if a search is not completed on the day for which this permit has been issued, and an application is made for the extension of the ticket, the search-paper should be examined, and it should be ascertained by a competent official whether the search were completed or not before any such permission to further search was extended. That, I think, would prevent what I can call by no other name than robbery.
1223. But would that prevent persons so disposed from taking advantage of their position if they were once inside the office? Yes.
1224. I understand that before giving evidence that you had an interview with the heads of your office? Yes.
1225. In your opinion is the supervision in the Search Room over the searchers sufficient? Hardly.
1226. How would you suggest an alteration in that respect? I think if two extra men, making three altogether, were to walk up and down the passages it would provide much better supervision than at present exists.
1227. Do you think three attendants would be sufficient to assist the public, and to effectually supervise the searchers? Yes.

[The witness withdrew.]

Wilshire John Machen sworn and examined:—

- W. J. Machen. 1228. *Commissioner.*] What are you, Mr. Machen? I am a clerk in the office of Messrs. MacNamara and Nathan, solicitors, of this city. I have been with them for about two years, and previous to that I had twenty years of legal experience in Melbourne.
- 25 Oct., 1893. 1229. During the two years you have been here occupying your present position, have your duties taken you to the Search Room of the Registrar-General's Department? Daily.
1230. What position do you occupy? I attend to all the business in connection with our office and the Land Titles Office in the Registrar-General's Department.
1231. Have these duties taken you to the Search Room almost daily? They have.
1232. Have you at any time been unable to get either a book of indices or register which you may have required? No, your Honor.
1233. Have you ever heard of a book of indices or a register being missing? No.
1234. From your experience, is it necessary that searchers should be allowed to take extracts? Certainly, I think so. It is impossible to conduct the business of a solicitor's office unless a searcher is allowed to take extracts from the registers. This is one of the greatest advantages of the system in this Colony, as compared with the system in Victoria, where they register only the memorials of deeds, while here you have access to the full copy.
1235. Can you suggest any improvement in the system now in vogue at the Registrar-General's Department with the space at command? No, I do not think so, your Honor; neither with the room nor with the material at command.
1236. What is your opinion with regard to the appointment of official searchers? I think it would be undesirable to appoint official searchers on account of the delay that would be inevitably involved.
1237. Have you any other reason? I have not thought over the matter sufficiently; I may add, however, that the Search Room is altogether too small, and in every way utterly inadequate for the present requirements; it is badly lighted too.

1238. Are there sufficient facilities for prosecuting the searches? No; you are backward here as compared with the corresponding department in Victoria, where they have large sloping desks and a much better light. There is not much light behind the counter where the indices are kept in the Sydney office.

W. J. Machen.  
25 Oct., 1893.

[The witness withdrew.]

John Booth sworn and examined:—

1239. *Commissioner*] Are you a clerk in the Bank of New South Wales, Mr. Booth? Yes; I am the next official to the head of the security department.

J. Booth.  
25 Oct., 1893.

1240. Do your duties from time to time take you to the Search Room of the Deeds Branch in the Registrar General's Department? They do.

1241. Are you there often? I have been there frequently in the past, but I go now to search in special matters only. I have two clerks now who assist me in this particular work, but I only go to the Search Room when some special matter requires attention.

1242. During the last five years, have you been in the habit of visiting the Search Room? Yes; close on five years.

1243. And your work having become so heavy, was it necessary to obtain assistance? Yes; for nearly three years, I think.

1244. Before 1890 were your visits more frequent than at present? Yes.

1245. Had you then to conduct the whole of the business yourself? Yes.

1246. Since March, 1890, have alterations been made in the room? Yes.

1247. Are those alterations for the better? I think so.

1248. Is the supervision greater now than it used to be before 1890? Yes, I think I am safe in saying it is.

1249. During the years that you have been searching in that room, have you ever been unable to get a book of indices or a register when required? No.

1250. Have you ever heard that either a book of indices or a register has been missing? No; not until recently, from certain reports in the newspapers.

1251. Do you refer to the report of the trial Campbell against the Anglo-Australian Investment, Finance, and Land Company (Limited)? Yes.

1252. Other than what you read in that report, have you ever heard of a book of indices or a register being missing? No.

1253. In your opinion, is it necessary that persons searching should be allowed to take extracts? Yes.

1254. Have you a strong opinion upon that matter? Yes, undoubtedly.

1255. Is it sufficient that these extracts be taken in pencil? Quite.

1256. Can you suggest any alteration in the present system in force in the Search Room? I would not care to suggest anything, being connected with a large institution such as the one I am connected with.

1257. How many searches do you now make? About 1,300 per annum.

1258. As far as your experience goes, are the facilities for searching sufficient? There are some drawbacks in regard to the light.

1259. How is the room lighted? Very badly.

1260. How are the registers arranged? They are too close together, the lines of shelves are too close.

1261. Are the presses too close together? Yes.

1262. Do I take it that you consider the room to be too small for the purposes for which it is used? Altogether too small.

1263. With the space at command, can you suggest any other alteration that would be for the public benefit? None.

[The witness withdrew.]

George Hellings sworn and examined:—

1264. *Commissioner*.] What are you, Mr. Hellings? I am a clerk in the office of Messrs. Simpson, Minter, & Co. I am a general clerk, and have conduct of the searches, and have had conduct of those searches for the last five years.

G. Hellings.  
25 Oct., 1893.

1265. What office were you in before that? With Elliott Meyer for five or six years, and prior to that, for three or four years with Mr. Stephen Campbell Brown, till he died.

1266. What experience have you had altogether? For the last sixteen or seventeen years my duties have taken me to the Registrar-General's Office.

1267. During the last five years have you, on many occasions, had to visit the Search Room in the Deeds Branch? Yes; I have had to visit that room continuously.

1268. On any of these occasions have you been unable to find a book of indices or a register that you required? No, I have not. At times, the books that might be required might be with the binder or with one of the examiners, but no book was ever away from the building.

1269. Have you ever heard that any register was missing? No.

1270. Or that any book of indices was missing? No, sir.

1271. During the last three years have you noticed any alterations in the Search Room? I have noticed that things have been more carefully done.

1272. Have the shelves on which the registers are kept been altered? Yes; for instance, the grant indices were taken up into the far corner of the room.

1273. Were these alterations for the better? Yes, certainly.

1274. Since March, 1890, has the supervision over the searchers been increased? Yes; I think it has, for this reason: In addition to Hill, who sees the searching and asks the searchers if they have got their tickets, at times other clerks have also asked. I think Mr. Gillam is giving more supervision.

1275. Do you think that the supervision is better, in that the book-porter and other clerks, and Mr. Gillam, the head of the room, are now more particular? Yes.

1276. During your visits to the Search Room, have you noticed any irregularities, or at any time have irregularities been brought under your notice? No; I have not noticed any, and none have been brought under my notice.

1277. In your opinion is it necessary that persons searching should be allowed to take extracts? Yes; I think it is necessary.

1278.

- G. Hellings.  
25 Oct., 1893.
1278. Are the facilities for searching and for taking extracts sufficient? Yes.
1279. Can you suggest any alteration that might be made in that room? Yes; especially with regard to the stock register. I think they should be arranged in the same manner as the indices referring to land.
1280. In what way do you suggest alterations should be made in the indices? I think at present all the A's are together and the B's are together. I think an improvement would be effected if they were lexicographically arranged.
1281. Do you suggest, then, that they should be lexicographically arranged? Yes; in the same way as the registers relating to land. Such an alteration would save a lot of time and obviate the necessity of double searching.
1282. If the alteration were made would it save time and possibly avert errors? Yes.
1283. In any other respect do you think the present practice can be improved? Yes; with regard to the payment of search fees. For instance, you make a preliminary search into a title, and before you settle the principles a fortnight or three weeks may intervene. You then have to search again, and have to pay another fee, and, sometimes, to complete one search it is necessary to pay a third fee.
1284. Are these fees each 2s. 6d.? Yes.
1285. Is what you suggest then for one search, even though it extend over one day, that the searcher should pay only one fee? Yes.
1286. Any other suggestion? I can say with regard to the registers that they are in a very filthy state; I think they should be kept cleaner.
1287. Filthy in what way? In dust.
1288. Do you mean that they should be dusted? Yes.
1289. Are they only dirty from dust, and not from pen or pencil marks? No; only from dust.
1290. Can you suggest any other alteration? I made a search the other day, and found several mistakes in the indices. They certainly referred to some little time back. Latterly, I think the indices have been more carefully prepared.
1291. About when were those mistakes made? Several years back.
1292. Before 1890? Yes, prior to 1890.
1293. From your experience since 1890 have the indices been more carefully prepared? Yes; certainly.

[The witness withdrew.]

Edward Henry Pownall sworn and examined:—

- E. H.  
Pownall.  
25 Oct., 1893.
1294. *Commissioner.*] What are you, Mr. Pownall? Search and registration clerk in the firm of Messrs. Allen and Allen, solicitors.
1295. How long have you been there? Since the end of 1878 or 1879.
1296. What experience had you before then? None in searching. I have done all my searching since I have been in that office.
1297. What were you before you joined the firm of Allen and Allen? I was an engrossing clerk in the office of Robertson, Fisher, and Ralfe.
1298. Since you have been with Messrs. Allen and Allen have your duties taken you to the Search Room in the Deeds Branch of the Registrar-General's Department? Yes.
1299. Daily? Yes; generally daily.
1300. During the time that you have been searching, have you ever been unable to find any register or any book of indices? Never.
1301. At times have you found that one or the other, or both, were away from the room? On some occasions a register may have been with the Examiners of Titles.
1302. In your opinion, is it necessary that persons searching should be allowed to take extracts? Yes, sir.
1303. Is it sufficient that these extracts should be taken in pencil? Quite sufficient.
1304. Are the facilities for the making of searches and the taking of extracts sufficient? Quite sufficient, your Honor.
1305. Since March, 1890, has any improvement been made in the Search Room? I consider there has in the general routine conduct of the business.
1306. In what way? In the way of checking those who make the searches, and in the matter of checking the fees paid by the persons searching.
1307. Can you suggest any alteration in the present method of conducting the business in the Search Room? I cannot say that I can. Perhaps the supervision might be more efficient than at the present time.
1308. Would you suggest that the supervision should be greater? I do not say greater.
1309. You infer that the supervision might be better than it is now—in what way? In the entering of persons into the room for the purpose of making a search by presenting a ticket at the door at the time of entrance.
1310. Do you think it should be incumbent on every person desirous of making a search to present a ticket at the door of the Search Room? Yes; I do.
1311. Where do you suggest that such a person should obtain that ticket? He should get it from some clerk of the Department outside of the Search Room.
1312. Do you go to the Search Room first and then examine the indices only? Yes.
1313. Do you give the result of your search in the indices to the book-porter in charge of the room, or to whoever is in charge of the room? Yes.
1314. Does that officer then go to the shelves and find the register? Yes.
1315. Is there any other improvement that you can suggest to me? I do not think so.
1316. In your opinion are the indices properly kept? Yes; most decidedly. They are kept all right, but I would suggest that as well as being alphabetically arranged they should be lexicographically arranged.
1317. With what object? To facilitate the searcher, and to render error less liable.

[The witness withdrew.]

Charles Henry Mallon sworn and examined:—

1318. *Commissioner.*] What are you, Mr. Mallon? I am assistant search clerk in the Land Titles Branch of the Registrar-General's Department. C. H. Mallon.  
25 Oct., 1893.
1319. Are you assistant to Mr. Hatton? Yes, your Honor.
1320. How long have you been in that position? Fourteen months.
1321. During that time have you been engaged searching in the Search Room of the Deeds Branch? Yes, your Honor, but not the whole of that time.
1322. What portion of it? By far the greater portion of the last fourteen months, and always except when I have been taken away by the Examiners for the performance of other duties.
1323. When you have been engaged in searching during what hours have you been in the Search Room? From 9 o'clock in the morning until half-past 4 in the afternoon.
1324. Continuously? Not continuously, as the lunch hour intervenes.
1325. What is your lunch hour? From 1 o'clock until a quarter to 2.
1326. Are the public admitted before 10 o'clock in the morning—that is, admitted into the Search Room? No, your Honor.
1327. Between the hours of 9 and 10 o'clock in the morning would any other person except yourself be searching? Mr. Hatton.
1328. Any other person besides Mr. Hatton? No, your Honor.
1329. After 4 o'clock in the afternoon are the public also excluded from the Search Room? Yes.
1330. Would any person other than a member of the public be searching after 4 o'clock? No, your Honor.
1331. During the time you have been searching have you ever been unable to get a book of indices, or any register that you required? I have always been able to get anything that I required.
1332. Have you ever heard of either, one or the other, being missing? No, your Honor.
1333. Do you search in the indices or registers? In the indices.
1334. At times do you search in the registers? Sometimes, but mostly in the indices. It is only when I am in doubt that I go to the registers.
1335. Do you take extracts while searching? I take extracts from the books if I think that the particulars I light upon effect the title I am searching against.
1336. When you take extracts do you take them in pencil? In pencil only—with an automatic pencil.
1337. While you have been engaged in the Search Room have you noticed any irregularities on the part of other persons searching? No, your Honor.
1338. When searching have you either the time or opportunity to supervise other persons searching? No, your Honor.
1339. Are you so engrossed with your own work? Yes.
1340. So that the mere fact of your being in a room would be no protection against irregularities on the part of other searchers? No, your Honor.
1341. As far as you can see is the supervision over the searchers sufficient? Well, I hardly think it is sufficient. I think there might be a smart active man moving about the Search Room.
1342. Are the facilities for searching and taking extracts sufficient—is there room sufficient? Yes, your Honor.
1343. How long have you been in the Department? Fourteen years on the 1st September last.
1344. What position did you hold before you became Assistant Searcher? I was an assistant clerk in the Examiners' of Titles branch.
1345. Had you then any experience in the Search Room? I had been in the Deeds Branch some eight or nine years before.
1346. What position did you hold in the Deeds Branch? That of index clerk.
1347. Was that before any alteration was made in the room? Yes.
1348. Who was the Registrar-General when you were in the Deeds Branch? Mr. Ward, your Honor.
1349. Have matters been altered in the Search Room since those days? I think since Mr. Pinhey became Registrar-General the supervision has been greater, and I think there has been a marked improvement in the conduct of the business of the office.
1350. When you go into the Search Room do you procure a ticket? No, your Honor; I search for the Department.
1351. Do you not in any way get permission from the Officer-in-Charge of the Search Room? I get no permission, your Honor.
1352. Do you announce in the Search Room that you are searching for the Department? No; it is understood.
1353. Have you at any time searched for any person or persons other than the Examiners? On one occasion I made a search after I had paid the search fee out of my own pocket.
1354. Whom did you search for then? A gentleman in the country named Thomas Burgess, a civil servant, residing at Liverpool.
1355. On that occasion did you get permission to search from any officer of the Department? No; I paid the search fee, and searched during lunch hour.
1356. When was that? I cannot say exactly when it was. It was some years ago, before 1890.
1357. Is that the only occasion on which you have done any private searching? That is the only occasion, your Honor, and I think the books of the office will show that the search ticket was then made out in my name.

[The witness withdrew.]

Phillip Kelly sworn and examined:—

1358. *Commissioner.*] What are you, Mr. Kelly? A clerk in the Crown Solicitor's Office. I have been there about nine years, and before that was with Creagh and Williams for twelve or thirteen years, and prior to that with Spain & Co. P. Kelly.  
25 Oct., 1893.
1359. How many years' experience have you had altogether as a law clerk? Twenty-five or thirty years, more than thirty years, I think.
1360. What is your position in the Crown Solicitor's office? I am assisting in the conveyancing.

1361.

- P. Kelly. 1361. Is it part of your duty from time to time to go to the Search Room in the Deeds Branch of the Registrar General's Department? Yes; on the real property side, but very little on the other side.
- 25 Oct., 1893. 1362. Do you at times go to the Search Room in the Deeds Branch? Yes; at times, when I have to make reference to grants.
1363. On any of these occasions have you been unable to find a register? Not that I am aware of.
1364. Or have you been unable to find a book of indices? Not to my knowledge.
1365. During the whole of your experience have you from time to time had to visit the Search Room in the Deeds Branch? Frequently.
1366. On any occasion have you been unable to find any register or book of indices that you required to prosecute your search? No, I do not remember any one occasion.
1367. At times, might a register be out of the Search Room with the Examiners of Titles? Quite so; but never away from the building, that I know of.
1368. Do you say your experience of late years has been more in the Search Room of the Land Titles Branch? Yes; I have to deal with that branch mostly in my conveyancing duties.
1369. In your opinion, is the mode of carrying on business in that Search Room better than that adopted in the Search Room of the Deeds Branch? The regulations for public searchers in the Search Room of the Deeds Branch do not apply to myself and others who search for the Crown Solicitor. I and they go behind the counter to make our searches.
1370. Are you unable to say which is the better system, as you are generally allowed to go behind the counter? No; I cannot say.
1371. Have you heard complaints in the Land Titles Branch as to the insufficiency of accommodation allowed to the public? Frequently.
1372. Have you at any time heard complaints in relation to the Search Room of the Deeds Branch? Not that I am aware of.
1373. Since March, 1890, has the Search Room of the Deeds Branch been improved? I can scarcely say; I have had so little to do with it.
1374. When you are searching do you find it necessary to take extracts? Extracts are invaluable. In fact, searching cannot be done without.
1375. Are these extracts taken in pencil? In pencil.
1376. In your opinion, would it be possible to search, or prosecute a search effectually, without taking extracts? I fancy not. It would be next to impossible.
- [The witness withdrew.]

THURSDAY, 26 OCTOBER, 1893.

[The Commission met at 10 o'clock.]

Present:—

HIS HONOR JUDGE FITZHARDINGE.

Arthur Alexander Hiddilston sworn and examined:—

- A. A. Hiddilston. 1377. *Commissioner.*] What position do you hold? Collector of Fees and Assistant Cashier in the Deeds Branch of the Registrar-General's Department.
- 26 Oct., 1893. 1378. Where is your room, Mr. Hiddilston? Next to Mr. Abbott's, the first door on the right hand side as you enter almost opposite the door of the Deeds Room—that is the Registration of Deeds Room.
1379. How many are there engaged in the room you occupy? Only myself.
1380. How long have you occupied the position of cashier? From May, 1890. I have been in the office eight years from the 1st January, 1884.
1381. What are your duties? To receive all fees in connection with the Deeds Branch.
1382. Do you receive the fees paid by the persons wishing to search? Yes.
1383. Do you issue the search ticket? No; no tickets are issued by me.
1384. Who issues those search-tickets? Some clerk in the Search Room.
1385. Does the person wishing to search having a ticket come to you to pay the fee? Yes.
1386. How are these tickets made out? In triplicate.
1387. Does the searcher bring two parts to you? Yes.
1388. Does his name appear upon those tickets? Always his name, or the name of the firm he represents.
1389. Does the name of the matter about which he is going to search appear on those tickets? No, it does not.
1390. Do you return him a ticket? Yes; I return him one, and I file the other.
1391. What becomes of the third ticket? That remains in the book itself.
1392. What is eventually done with the tickets on the file? I put them away every month. I bind them in bundles and put them away monthly.
1393. After receiving the fee, what is your next proceeding? I enter the amount in the daily cash-book.
1394. In the cash-book of the Deeds Branch? Yes.
1395. What happens then? At the end of the day these fees are totalled up, and then I balance the cash with the fees I have received. The accountant then checks that in the morning by the butts in the different search-ticket books. There is also a daily analysis made showing what takes place in the Deeds Branch each day.
1396. Showing the number of fees paid under the different headings? Yes.
1397. Since March, 1890, have the fees for searches increased? They have increased wonderfully.
1398. Can you give me in what proportion? I cannot exactly, but I should think the increase has been from 5 to 10 per cent.
1399. Before March, 1890, did you receive the fees from the searchers? Yes; always.
1400. What system was in vogue at that time? Previous to 1890 I had to make out the search tickets myself, and also to receive the fees.
1401. Were they then made out in triplicate? No; in duplicate then.
1402. Is the present system superior to the system that was in vogue before 1890? Far superior.
1403. In what way? The check against fraud is now much greater.
1404. Have you at any time made a search in the Search Room? Never.
1405. Neither in any private nor in any other matter? No, your Honor.
- [The witness withdrew.]

George

George Lilley sworn and examined :—

1406. *Commissioner.*] What are you, Mr. Lilley? I am a messenger in the Land Titles' Branch of the Registrar-General's Office. G. Lilley.
1407. How long have you been there? Close on thirty years. 26 Oct., 1893.
1408. Do you know E. C. Hopkins? I do.
1409. Can you remember whether you had any conversation with him in the year 1888 about an application of a person named Osborne? I do, your Honor.
1410. Where did that conversation take place? I think in Mr. Hopkins' own room, in the branch for Registration of Births, Deaths, and Marriages of the Registrar-General's Department.
1411. What led up to that conversation? I used to prepare notices for the newspapers, and saw some reference which drew my attention to the Osborne matter, as I had sold an allotment in this estate to Mr. Thomas Leader, a conveyancer with Mr. Foster, a solicitor.
1412. A piece of land on what estate? The Bello Retiro Estate, near Newtown somewhere.
1413. How came you to speak to Hopkins about it? Because I knew that he was connected with the Osbornes.
1414. Did you know that the Osbornes were connected with that estate? No, not then; I simply noticed the name.
1415. What did you say to Hopkins? I said, "I see your friends the Osbornes, are bringing land near Newtown under the Real Property Act."
1416. Can you remember anything else? I told him I had a piece of land there, and I also said to him, "I have got another piece on the Parramatta River which was conveyed to me by one John Coleman some ten years ago." He said to me, "Perhaps that belongs to the Osbornes as well." I said to him, "I do not think so." I told him I heard that the land on the Parramatta River belonged to Mr. Manning.
1417. Do you mean Sir William Manning? I do not think he was Sir William Manning then, and I said "Mr. Manning." I told him it was a large piece of ground, and that the Sydney Rowing Club had a portion of it. I also told him I was shepherding the piece I had bought from Mr. Coleman because somebody had jumped and was living on the piece adjoining mine.
1418. How came you to know that the land on the Parramatta River belonged to Sir William Manning? I did not know it belonged to him. I simply said I heard that it belonged to him.
1419. From whom did you hear it? A clerk named Richardson, in a solicitor's office.
1420. Did you obtain your knowledge from the books in the department? No.
1421. Did you verify what you had heard by reference to the books in the office? No; but I think Mr. Lander, who was then a clerk in the office, did.
1422. What position did he occupy? Clerk to the Examiners.
1423. Did you give any information to Hopkins concerning that land? No.
1424. Did you say anything about the matter to Messrs. Chappel and Campbell, or to Mr. Chappel or Mr. Campbell separately? No, your Honor.
1425. Did you see them or either of them about the matter? No, I did not.
1426. Or give them any information about it? No, I did not.
1427. Was the only information you gave to Hopkins to the effect that you heard the land belonged to Mr. Manning? Yes.
1428. Have you at any time searched in the Search Room of the Deeds Branch? Oh, yes, your Honor.
1429. Many times? Not often; not for many years. Years ago I searched a good deal.
1430. At one time, you say, you searched a good deal? Yes.
1431. For who? For Mr. Lander, who was then a clerk to the Examiners.
1432. In making those searches, did you search both in the indices and registers? In the indices and registers; but mainly in the registers.
1433. Did you search in both? More particularly in the registers, having previously received the number of the book I required from Mr. Lander.
1434. In what years did you make these searches for Mr. Lander? Over twenty years ago, your Honor.
1435. Have you since made any searches? No; I think I have not made any searches since.
1436. When was the last time you were in the Search Room for the purpose of searching? I cannot tell your Honor.
1437. Do any of your duties take you into the Search Room now? Yes.
1438. Often? No.
1439. How often on an average each week? I go in of a morning to open the shutters, and I go in at night to close them.
1440. Have you at any time to return registers to the Search Room? I have.
1441. Where from? From the Examiners' Rooms.
1442. Is that a matter of daily occurrence? Yes.
1443. At what time do you return these registers? After 5 o'clock; that is after office hours.
1444. Do you live on the premises as caretaker? I do, your Honor.
1445. Are the keys of the Search Room left with you? Yes.
1446. At what time of the evening is the Search Room locked? As a rule, about half-past 6 o'clock.
1447. What time do the clerks leave that room? They are there sometimes up to that time.
1448. Working? Yes, your Honor.
1449. Are they there often working after office hours? Nearly all the year round there is someone there.
1450. What are the names of the clerks who most often work there after office hours? At present, Mr. Gillam and Mr. Napier.
1451. Is Mr. Gillam ever there by himself? Yes.
1452. Is Mr. Napier ever there by himself? Yes.
1453. In what part of the Search Room does Mr. Gillam work? Inside the counter, at his own desk.
1454. In what part of the room does Mr. Napier work overtime? Behind the counter.
1455. How late does Mr. Gillam work? From 6 till half-past 6 o'clock.
1456. Does he ever work after 7 o'clock? I think not, your Honor; I do not recollect.
1457. Does Mr. Gillam ever work in the Search Room after 7 o'clock? I think not, your Honor.

- G. Lilley.  
26 Oct., 1893.
1458. Is Mr. Napier ever in the Search Room after 7 o'clock? I think not.
1459. Have you at any time seen any other clerks in the Department working overtime in the Search Room? Yes.
1460. What clerks? Those belonging to the branch for Registration of Births, Deaths, and Marriages.
1461. What clerks from that department have you seen working overtime? Mr. Dawes, Mr. Hopkins, Mr. Bucknell, Mr. Thompson, Mr. Butler, and Mr. Ridley.
1462. Were these clerks all there at the same time? Yes; at the same time.
1463. Where were they working in the Search Room—at the search desk, along the northern wall of the building? Yes.
1464. Have you at any time seen any clerk from that branch working by himself in the Search Room after office hours? No.
1465. Am I to understand that no clerk from any other branch is in the Search Room after office hours without being in company of a number of others? Yes; a number of clerks work there together overtime.
1466. Do you know in what these clerks are engaged on the occasions to which you refer? Yes.
1467. In what? Examining indices belonging to the Births, Deaths, and Marriages Branch.
1468. In addition to the clerks you named from the branch for the Registration of Births, Deaths, and Marriages, have you seen clerks from any other branch in the Search Room after office hours? Yes.
1469. Who were they? Mr. Mullen, Mr. MacDonald, and Mr. Heuston.
1470. To what branch do they belong? To the Land Titles Branch.
1471. Do you know what they were doing? Yes.
1472. What were they doing? They were, in company with the others, examining the indices of the Births, Deaths, and Marriages Branch.
1473. Have you at any time seen any clerk from the Land Titles Branch by himself in the Search Room after office hours? No.
1474. Have you seen Mr. F. C. W. Elyard in the Search Room after office hours? Yes.
1475. Was he by himself, or with others? With others.
1476. With what others? He was with the clerks from the branch for the Registration of Births, Deaths, and Marriages, assisting them to examine indices.
1477. Have you seen Mr. Elyard by himself in the Search Room after office hours? No, your Honor.
1478. Have you at any time seen Mr. Gillam by himself in the Search Room after office hours? Yes, your Honor.
1479. On many occasions? During certain parts of the year he has been there about four nights a week.
1480. In what part of the year? The time varies, but generally about the middle of the year.
- 1481-2. Have you seen any other clerks in the Deeds Branch in the Search Room after office hours by himself? Only Mr. Napier.
1483. Have you seen Mr. Napier there by himself on many occasions? Frequently.
1484. Till what hour? From 6 to half-past 6.
1485. Have you at any time seen Mr. Hopkins in the Search Room by himself after office hours? No; I never have.
1486. Have you seen Mr. Hopkins at any time in the Search Room before the Search Room was open to the public? Yes, your Honor.
1487. When? Until recently, I saw him go in there every morning.
1488. For what purpose? To bring his registers out.
1489. Have you at any time seen Mr. Hopkins searching? No, your Honor.
1490. In what part of the building are you during office hours? In the Record Room of the Land Titles Office.
1491. Have you ever heard of any book of indices, or of any register, being missing from the Search Room? No.
1492. You have been there for thirty years? Yes.
1493. Were you paid anything for the information you gave to Mr. Hopkins? No, your Honor.
1494. Concerning the land on the Parramatta River, I mean? No, your Honor.
1495. Were you paid anything by either Mr. Chappel or Mr. Campbell? No; I do not know either of them—or I did not know either of them at that time.
1496. When did you first know either Chappel or Campbell? Some time after we brought the land under the Real Property Act, or applied for it to be brought under the Act. I then only knew Chappel; I did not know Campbell at all.
1497. When did you first know Campbell? It must have been two years ago, and I knew him then by sight.
1498. Have you at any time given any information to any member of the outside public on matters you learned inside the office? No, your honor.
1499. Neither from the books nor otherwise? No, your Honor.

[The witness withdrew.]

Thomas Apdaile Charlton sworn and examined:—

- T. A. Charlton.  
26 Oct., 1893.
1500. *Commissioner.*] What are you, Mr. Charlton? I am Managing Conveyancer for the firm of Messrs. John Dawson & Son. I have been in that office for thirty-seven years.
1501. Have you any personal experience of the manner in which business is conducted in the Search Room in the Deeds Branch of the Registrar-General's Department? I have had a great deal of personal experience.
1502. During the last ten years? Well, perhaps not for the last ten or twelve years; but I have been there occasionally for the purpose of making special searches.
1503. Has your personal experience been as great during the last ten or twelve years as it was previously? Certainly not.
1504. Have you now occasion to visit that Search Room? I have, sir.
1505. Have you noticed any alteration in the mode of conducting business in the Search Room? I have not noticed any alteration whatever excepting in the payment of fees. It is necessary now to go to two or

or three persons before one can make a search. First you go for a search ticket, then you return to pay your fee of half-a-crown, and then you go to an official to get the ticket initialled. These are the only alterations I have noticed during thirty-seven years.

T. A.  
Charlton.  
26 Oct., 1893.

1506. Has that particular alteration been for the better? So far as regards the checking of moneys received is concerned, it has.

1507. Have you noticed whether the registers and indices are more conveniently arranged than they were before 1890? Very much more conveniently. In former times it was very difficult to make a search. Now a search can be effected with more freedom and convenience.

1508. Are the facilities better now than formerly? Yes.

1509. In your opinion, is the supervision over persons searching sufficient? Certainly not, your Honor.

1510. What alterations can you suggest in that respect? As far as I can see, there are only two courses open for adoption. The Government might make searches themselves and become responsible, but I can hardly see how that would answer, for in that case it would be a difficult thing for members of the profession to complete matters within any reasonable time. Now you can take down without any supervision any book in that office, and if a person be so inclined he may make alterations in that book. Of course there is no ink used, but what is to prevent a person altering any of the registered copies?

1511. Do you think there is a great risk? Yes; I have often thought that the present system is exceedingly loose so far as regards the conduct of the business in the office. I say emphatically that anyone with an evilly disposed mind may go into that room and alter registration copies.

1512. During your experience have you ever known of any alteration having been made in a registered copy? I would not like to say that; I cannot remember.

1513. If such a thing had occurred, and had been brought under your notice, either by personal observation, or by any report from any clerk in the office would you most probably remember the circumstances? I certainly would, I think.

1514. It has been suggested that the Registrar-General might be empowered to license certain persons to search, have you considered whether the adoption of such a course would be advisable? I do not think so, your Honor, for nothing could be gained by such an arrangement.

1515. In your opinion, is it necessary that persons searching should be allowed to take extracts from deeds? I think it is absolutely necessary that extracts should be taken.

1516. Is it sufficient that these extracts should be taken in pencil? I think it is quite sufficient.

1517. Do you remember at any time applying to one E. C. Hopkins for information with respect to the marriage of one Charles Thorsby? I do not remember it at all.

1518. Can you say whether it is likely that you personally, or through one of the clerks of the Registrar-General's Department, would have applied for such information? It is improbable that I should have done so, but I cannot say anything beyond that.

1519. Do you remember making certain inquiries or any inquiry in connection with any matter at Liverpool? Yes, now that you mention the word "Liverpool."

1520. Can you say whether it was in consequence of information you received at the Registrar-General's office that you prosecuted your inquiries at Liverpool? I think that was the cause of it.

1521. Have you any distinct memory of the fact? I cannot say positively.

1522. I ask you, as a general question, can you suggest any alteration that might be made in the working of the Deeds and Search Branch of the Registrar-General's Department? I have always thought that the business of this particular section of the Registrar-General's Department was carried on in a very loose way. I will tell you why. You enter the Search Room, take down any book you like from the shelves, place it on the table just below the place from whence you have taken it, and nobody can see what one may be doing with that book—no one can see whether a searcher is making alterations or not. Ever since I can remember there has been only one man exercising supervision in that room. That man is the book-porter, who at times may have to look after perhaps as many as thirty or forty persons searching. I do not think it is right that there should be such a small amount of supervision over people searching, amongst whom may be persons so evilly disposed that they may possibly alter some of the registration copies.

1523. In your opinion, then, is the supervision over searchers sufficient? It is not sufficient.

1524. Can you suggest any alteration that would result in an improvement in this respect? One improvement I would suggest is this. No one should be allowed to take down a register from the shelves. Supposing one goes in there to make a search he finds in the indices a certain deed and requires to see the consequent register. The book-porter should be asked to obtain the necessary book, and, I think, this book should be placed upon the large counter at the eastern end of the room, behind which there are sitting perhaps fourteen or fifteen clerks. If this system were adopted searchers would be in full view of the number of clerks I have named.

1525. For the protection of the public do you suggest that persons searching should not be at liberty to handle any register other than that asked for and produced by the book-porter? Yes.

1526. And after that register is obtained should it be only used at the public counter, in view of all the clerks in that room? Yes.

1527. Are you familiar with the mode adopted for searching in the Land Titles Record Room? I have searched there on several occasions.

1528. In your opinion, are the safeguards observed there sufficient? They are, your Honor. I do not think that there could be much improvement in the Land Titles Office with regard to searching, and if the same system were followed in the Deeds Search Room I think that would be sufficient, too.

[The witness withdrew.]

James Lyon Spark sworn and examined :—

1529. *Commissioner.*] What position do you occupy in the Registrar-General's Department? I am senior draftsman in the Land Titles Branch. I have been in that branch nineteen years and three months, having entered it on the 23rd July, 1874. I was first appointed under the Colonial Government on the 3rd June, 1863, when I held a position in the Surveyor-General's Department in the Public Lands Office. J. L. Spark.  
26 Oct., 1893.

1530. In October, 1890, were you invited by the Registrar-General to report to him upon a certain matter in which your name had appeared in connection with that of E. C. Hopkins? That is so, sir.

1531. On the 7th of October, 1890, did you report? Yes.

- J. L. Spark. 1532. Have you on any occasion made use of information you received in the office for purposes outside the office? Never.
- 26 Oct., 1893. 1533. Neither directly nor indirectly during the whole of the time you have been connected with that department? No.
1534. Had you anything to do with the intestate estate of the late William Henry Peppercorn? I was the administrator in that estate.
1535. Were the letters granted on the 14th December, 1880? Yes, that is so.
1536. How was it that the letters were granted to you? Under power of attorney from his brother Frederick Septimus Peppercorn, who was then residing in Napier, New Zealand. He cabled me from New Zealand, announcing that the fact of his brother's death had been sent to him.
1537. Who acted for you professionally in this matter? Messrs. Icton and Faithful. I am connected with Mr. Peppercorn by marriage, as I am the husband of Mr. Frederick Septimus Peppercorn's step-daughter.
1538. Had Mr. Frederick Septimus Peppercorn been in this Colony? Yes.
1539. What was he? A staff-surveyor in the service of the Government.
1540. Were you in the field with him? Yes; I was with him as field-assistant. I was trained under him, and eventually became a licensed surveyor.
1541. After you were appointed administrator in the estate of William Henry Peppercorn did Frederick Septimus Peppercorn return to Sydney? He returned to Sydney on the 14th February, 1881.
1542. Did you continue to administrate after his return? I did; under his advice.
1543. What real property was there under the late W. H. Peppercorn's estate? Two houses in Dowling-street.
1544. Did you, during the lifetime of Frederick Septimus Peppercorn, know that there was any other realty in the estate of the deceased brother, W. H. Peppercorn? No, sir.
1545. Did you ever hear from either W. H. Peppercorn or F. S. Peppercorn that William Henry Peppercorn had ever owned any other real estate? Not from either. For years before, Frederick Septimus Peppercorn had said that his brother had been interested in property of which he had disposed to purchase an annuity on which he was living.
1546. Did you wind up the estate? I wound it up, and the accounts were finally passed on the 29th of October, 1883.
1547. How long have you known E. C. Hopkins? Ever since he was in the Lands Titles Office, which covers a good many years.
1548. Were you on terms of intimacy with him? Not more so than being an office friend; just a mere acquaintance.
1549. Were you concerned with him in any transaction or speculation in regard to land? Never.
1550. Did you ever discuss with him any matter concerning any land speculation? No.
1551. Were you concerned with him in any business transaction? Yes; in one business transaction.
1552. What was that? In the publication of a certain table of areas, which at that time was in manuscript. He assisted me in getting out this publication.
1553. When was that? That was in April, 1887. He first saw my manuscript on the 9th of April in the year named, and we came to an agreement with regard to its publication in the following May.
1554. Did you, when you were discussing the publication of your table of areas, mention to Hopkins that you had administered the estate of Mr. W. H. Peppercorn? I did not.
1555. Had you at any time told him that you had administered that estate? No; I never did so at any time.
1556. When did Hopkins first approach you upon the subject of purchasing any right which you, as the representative of the late William Henry Peppercorn, might have had in any landed property? On the 1st of September, 1887.
1557. Did you know how Hopkins came to know that you had anything to do with the Peppercorns? I do not know for certain; I cannot say.
1558. Does the name of Frederick Septimus Peppercorn occur in any index in the Deeds Room of the Registrar-General's Department? I am not aware of it; I have not searched.
1559. Do you know if the name of Frederick Septimus Peppercorn appears in any of the books in that department? Not to my knowledge.
1560. Have you heard that it does? No.
1561. Do you know if there is any reference in any book in the Search Room to 1920 acres of land near Newcastle? No; I had no knowledge whatever, either by searching myself or in any other way up to the time Hopkins came to me and made this offer.
1562. Did you afterwards ascertain that there was any reference to this block of land? I did.
1563. In what book? In one of the Grant Books.
1564. On the 1st September, 1887, what did you hear from Hopkins? He came and asked me whether the representatives of the Peppercorns would sell their interest in 1920 acres of land, situated in the parish of Stockton, near Newcastle. He then offered me £100.
1565. Had you up to that time ever mentioned the fact that you had represented or had administered the Peppercorn Estate? I had not.
1566. Did you know when he came to you that there was such a block of land in existence? I did not know that there was any such land in existence.
1567. Did you accept his offer? I did not.
1568. What did you do? I told him I was fully convinced that the property had been sold, and that if it had ever belonged to Mr. W. H. Peppercorn it must have passed away from his control.
1569. When did you next hear about it? The next thing was he approached me on the 2nd of September.
1570. With what offer? He offered me an interest of £300 if the land was brought under the Real Property Act. He was to bring the land under the Act and pay all expenses. At this time he was dealing with me as the representative of the Peppercorns.
1571. Did you accept that offer? I did not. I returned the same answer as I did before.
1572. Where did these interviews take place? He came to me in the Land Titles Office.
1573. What next happened with regard to this matter? He wrote to me on the 9th of September, 1887, a letter, in which he offered £600 for the land.

1574. What did you do next? On the 12th of the same month I replied saying I could take no definite action until I had communicated with the Peppercorn family. J. L. Spark.
1575. What was your next step? I made certain inquiries. 26 Oct., 1893.
1576. In making these inquiries, did you communicate with a Mr. A. F. Hall? Yes; he was in the district.
1577. What was your next step? On the 12th of December I received another letter from Hopkins, in which he offered to bear all expenses in bringing the land under the Real Property Act, on condition that after the title had been made good, the land should be divided, he (Hopkins) keeping a two-thirds share, and the remaining third share should go to me as the representative of the Peppercorns.
1578. What followed that? My letter [*produced.*] of the 28th December to Dr. Peppercorn.
1579. Did you reply to the letter Hopkins wrote on the 12th of December? I did not.
1580. What was your next step? I wrote to Dr. Peppercorn on the 28th of December, 1887, setting forth fully what had been done in reference to the houses in Dowling-street, and, at the same time, calling attention to the land in the parish of Stockton, which was within 10 miles of Newcastle, the principal coaling port of New South Wales, and setting forth all particulars in connection with this land. In concluding that letter I asked for further instructions to act in the best interests in the Peppercorn's Estate.
1581. Before writing that letter had you seen a copy of the grant? Yes; to the best of my recollection I had satisfied myself on that point before I wrote to Dr. Peppercorn.
1582. Where did you see that copy? I believe I saw it in the Search Room of the Deeds' Branch of the Registrar-General's Office. That was the first time I saw it.
1583. Did any person assist you to find that grant? As far as I remember, I received the book from the book-porter.
1584. Was any person with you when you did find it? No, sir.
1585. Were you assisted by Hopkins? No; neither directly or indirectly.
1586. Was it after you had received information from him that you looked for and found the copy grant? Yes; just prior to writing that letter to Dr. Peppercorn, dated the 28th of December, 1887.
1587. Had Hopkins told you that there was a copy grant in existence? No; not to the best of my recollection.
1588. How came you to look for the copy grant? In order to satisfy myself that what Hopkins told me was correct, and thus to be in a position to write authoritatively to Dr. Peppercorn.
1589. Did Hopkins tell you how he came to know that the Peppercorns were interested in any land? He did not.
1590. Did you ask him? I think at the outset I did ask him, but he evaded the question.
1591. What next took place? I received a reply from Dr. Peppercorn, dated 9th of February, 1888. In this letter he stated that the late W. H. Peppercorn had parted with his interest in that particular piece of land many years before his death.
1592. Did you also receive from England two other letters, one dated 18th February, and the other dated 16th February, 1888? Yes; they were received by the same post as Dr. Peppercorn's reply.
1593. After receiving these letters from the Peppercorn family, did you communicate to Hopkins the contents of these letters? Hopkins came to me the next day, and I gave him the substance of the letters.
1594. What was the next step? Hopkins again wrote to me on the 29th of March, offering to take a half share, free of all expenses.
1595. Did you accept that offer for a half share? I accepted the offer on condition that it would receive the approval of the Peppercorn family.
1596. What was your next step? The agreement, dated the 17th April, 1888.
1597. On the 17th of April, 1888, did you receive this agreement:—"Registrar-General's Department, Sydney, 17th April, 1888. I hereby agree to give James Lyon Spark one half share in Peppercorn's 1,920 acres of land for him giving me information that will enable me to procure the said land. This offer is only made provided the Peppercorns reject my former offer. Signed,—E. C. HOPKINS. Witness—W. A. ABBOTE, 12/7/89."? I did.
1598. After this agreement, did you place him in communication with Dr. Peppercorn by giving him Dr. Peppercorn's address? Yes.
1599. Did Hopkins show you a copy of a letter which he sent to Dr. Peppercorn on the 26th of April, 1888? Yes.
1600. Did Hopkins state in that letter as follows:—"Mr. Spark, of this city, informs me that you are of opinion that W. H. Peppercorn parted with his property on the Hunter River many years ago. It seems clear to me that if this was the case, the conveyance would have been registered, and the person or persons who purchased would have been in possession of the land, but I am of opinion that the property was intended to have been sold by Mr. Peppercorn, but the contract was never fulfilled, and the land still belongs to his representatives. . . . I am quite sure that I can fix the land alright, which may turn out in a few years something good, as it is in a coal district . . . ? Yes; those are extracts from that letter.
1601. What was the next step in the proceedings? I received a letter, dated 10th of July, 1888, from Dr. Peppercorn, in which he says that Richard Ashmore Hopkins had called on him in London, and had been referred by him to Mr. Campney Powell. He also declined to accept the offer made by E. C. Hopkins.
1602. What was the next step? On the 17th of August, 1888, E. C. Hopkins again wrote to Dr. Peppercorn.
1603. Is this a copy of that letter [*produced*]? Yes; that is a copy of the letter in which Hopkins again offers to make good the title to the land on condition that he receives one-half of the proceeds.
1604. Is this letter an offer to give £600 for the whole interest, or, as an alternative, does Hopkins offer to establish a good title for a half share in the property concerned? Yes.
1605. What was the next step? A letter from Dr. Peppercorn to me, dated 9th November, 1888, in which he returns the power of attorney previously signed, and certain other documents.
1606. According to this letter, did he leave the whole matter with you? Yes.
1607. What was the next step after that? E. C. Hopkins wrote to Dr. Peppercorn, enclosing £1 10s., on the 17th of January, 1889. That was the terminating letter. 1608.

J. L. Spark. 1608. This [*letter produced*] is a copy of that letter, is it not? Yes. The letter reads as follows:—

26 Oct., 1893.

Dear Dr. Peppercorn,  
I enclose you a money order for £1 10s., to pay expenses you have been put to with reference to your late brother's land that I believed was still vested in you. My brother informs me that it was useless of him calling upon you again, as you told him you were quite certain the land in question had been sold, and that you had lost all interest in the same. Thanking you for your kindness, I remain,  
Sydney, 17th January, 1889.  
Yours faithfully,  
E. C. HOPKINS.

P.S.—I may add my brother has seen the conveyance signed by W. H. Peppercorn, so the matter is at an end.—  
E. C. HOPKINS.

1609. Did that end that matter? Yes.

1610. Did you hear anything further about that land? Nothing further. The next point is that an application appears in joint names.

1611. Joint names of whom? In the names of Messrs. Cowlshaw, E. C. Hopkins, and R. A. Hopkins.

1612. Had you anything further to do with E. C. Hopkins? Nothing, beyond the making of that agreement. Hopkins subsequently executed a mortgage to me.

1613. When? Some twelve months afterwards.

1614. How came he to sign a mortgage to you? In virtue of the agreement given to me on the 17th of April, 1888.

1615. What did you obtain? The amount of the mortgage was £3,250.

1616. Did Hopkins afterwards fulfil or perform his part of the contract in the terms of the agreement dated the 17th of April, 1888? Yes.

1617. By doing what? By executing a mortgage for £3,250.

1618. What eventually became of that mortgage? It was eventually discharged for £750.

1619. By whom? By Hopkins.

1620. To whom? To the Cowlshaw brothers, and I discharged the mortgage for £750.

1621. I understand you received that amount of money? Yes; for the discharge.

1622. Have you ever searched in the Search Room? Never, sir.

1623. Neither officially nor for any private purpose? No; I am altogether ignorant of the mode of searching, and all the information I have required from the registers I have obtained through Hill, the book-porter.

1624. Whenever you required to refer to a book had you to get the assistance of the book-porter? Yes.

[The witness withdrew.]

Marland Clark Cowlshaw sworn and examined:—

M. C.  
Cowlshaw.

26 Oct., 1893.

1625. *Commissioner.* Are you a member of the firm of Cowlshaw Brothers, merchants, whose business place is in Macquarie-place, Sydney? Yes.

1626. How long have you known E. C. Hopkins? Seven or eight years.

1627. Where did you first meet him? I think I first met him at the residence of his mother-in-law, Mrs. Dean.

1628. In Sydney? Yes.

1629. After that first occasion did you meet him from time to time? Yes; occasionally I met him in the street.

1630. Did you know he was a clerk in the Registrar-General's Department? Yes; I knew that.

1631. Had you ever seen him in the Registrar-General's Department? Yes.

1632. Were you there on business? Yes.

1633. In what branch of the department? In the branch for the registration of births, deaths, and marriages. I was there for the purpose of registering the birth of a child.

1634. Was it in that branch of the Registrar-General's Department that you saw Hopkins? Yes.

1635. Have you ever had occasion to search in the Deeds branch of the Registrar-General's Department? No; I have not.

1636. Did your firm purchase a piece of land or a block of land at Kennington Park? We purchased some land at Kennington Park.

1637. In what year? I cannot tell you exactly in what year.

1638. When did you first see Hopkins in connection with that purchase? I cannot fix the date exactly.

1639. Can you tell me the circumstances out of which your meeting with Hopkins arose? Mr. Hopkins came down to me in reference to leasing some land on the Hunter River belonging to Osbornes, beyond Newcastle, towards Maitland, and he suggested the terms on which we should take it up. I told him that we did not want any more land out that way. We had still some land at Kennington Park, and from what our solicitor said, the man had no title to it, and if we could find out where the land of the Peppercorns was we would like to buy this land. He then said that he knew the Peppercorn's agent, whose name was Spark, and that he could get the land for us, but he said that before he would do that there must be some arrangement providing we found the money by which he would receive one-fourth of the interest from the transaction.

1640. Was it your intention to resell the land? Yes; and after we had resold it Hopkins was to get one-fourth of the profit. We made an agreement to that effect. He brought Mr. Spark down, and we found that Spark had no authority to act, as the Peppercorn people were in England. Hopkins said some time afterwards that his brother was going to England and that he would look after the business in conjunction with Mr. Slade, of the firm of Messrs. Roxburgh, Slade, and Spain, and he would make terms to buy the land. We agreed to that arrangement, and subsequently documents were sent out from England to the Commercial Bank of Sydney. Richard Ashmore Hopkins wished to participate in the transaction to an extent that we considered to be unfair. We brought in E. C. Hopkins and Mr. Slade. We pointed out that it would be unfair for A. R. Hopkins to be sustained in the position he had taken up, as his brother, according to a clearly set forth agreement, was to get one-fourth of the results. After some discussion we came to the decision that R. A. Hopkins was to take one-fourth, E. C. Hopkins was to take one-fourth, and that Thomas Cowlshaw and M. C. Cowlshaw were to take the other half; the Cowlshaw Brothers to find the purchase money for the land. Providing we did so we were to allow the lapse of a certain time before we asked him to pay in accordance with the agreement they were to sign

- sign. Some little time later Hopkins asked us for an advance, alleging that it was necessary on account of some transaction he had with Spark. Eventually Spark and E. C. Hopkins came to us and we paid their share. I think we gave to Hopkins £1,250, and afterwards we gave to Spark £150 for his interest, and this was paid through Sly & Co., solicitors. R. A. Hopkins never paid us anything at all—neither principal nor interest, and the property has never been sold. M. C.  
Cowlshaw.  
26 Oct., 1893.
1641. Did you take a mortgage from E. C. Hopkins? Yes.
1642. Did you take a mortgage from Spark? Yes; E. C. Hopkins gave a mortgage to Spark first, and we then made him an advance, and I think afterwards he paid it.
1643. At present, then, do Cowlshaw Brothers hold all except the interest of R. A. Hopkins? Yes; and we have a mortgage over that.
1644. Where is the property situated? It is known as Kennington Park in the original grant. It is bounded by the Hunter River, and it is in the vicinity of Hexham. Although it has been named North Stockton—we named it that for a special purpose—it is nine miles from Newcastle by rail.
1645. When E. C. Hopkins visited your office in connection with the Osborne property had you any idea that he knew anything concerning the property belonging to the Peppercorns? No; except that a map was produced.
1646. But before the map was produced? No.
1647. How came you to speak to him about the Peppercorn property? The map was produced, and it showed where the land in question was situated.
1648. Did you then point out the Peppercorn property? Yes.
1649. In whose name does that property stand on the map in question? The name of Peppercorn.
1650. After you had received the deeds of the property from the Commercial Bank, did you take any steps to have the land brought under the Real Property Act? Yes.
1651. Was the title eventually passed? Yes. I may add that the first agreement made between R. A. Hopkins, Edmund C. Hopkins, Thomas Cowlshaw, and M. C. Cowlshaw, was dated the 6th of December, 1888. A mortgage was given by R. A. and E. C. Hopkins to T. and M. C. Cowlshaw, dated the 11th May, 1889. This was the day we paid the Commercial Bank for the property in question. The certificate of title issued on the 23rd December, 1890, in the name of R. A. Hopkins. On the 7th of August, 1889, we lent E. C. Hopkins £600 on his interest, and on the 16th of December, 1891, we purchased his interest for £1,600, at the same time giving a cheque for £1,000 as the balance of purchase-money. On the 10th of July, 1891, we lent to Spark £150 on a deed E. C. Hopkins had given him. This was tantamount to a second mortgage on his interest. This interest he sold to the Cowlshaw Brothers on the 16th of December, 1891.

[The witness withdrew.]

FRIDAY, 27 OCTOBER, 1893.

[The Commission met at 10 a.m.]

Present:—

HIS HONOR JUDGE FITZHARDINGE.

Daniel Nightingale sworn and examined:—

1652. *Commissioner.*] What are you, Mr. Nightingale? A law stationer and title searcher.
1653. Where is your office? It is 91, Elizabeth-street, Sydney.
1654. Do you know Edmund Conroy Hopkins? Yes.
1655. How long have you known him? About ten years; ever since I have been in the Colony.
1656. How long have you been a law stationer and searcher? About six years on my own account. Previously to that I was a conveyancing clerk in the firm of Messrs. Robertson, Fisher, and Ralfe, solicitors. I have been connected with the legal profession in one capacity or another all my life.
1657. Have you had much experience in the Search Room in the Deeds Branch of the Registrar-General's Department? Yes; ever since my arrival in this Colony I have been constantly searching.
1658. Did you at any time or on any occasion prosecute any search for Edmund Conroy Hopkins? Yes; I have made searches for him.
1659. When? About June, 1888.
1660. What was your first search? For the purpose of preparing an abstract of the title of the Battersea Estate.
1661. For him? Yes; for him. He was about disposing of some interest he held in that estate.
1662. Did he instruct you to prepare an abstract of his title? Yes.
1663. Did you prepare that abstract? Yes.
1664. With what materials? From a search I made on behalf of Messrs. Campbell and Chappel.
1665. When did you make that search? In March, 1888.
1666. Is this the search paper [*produced*]? Yes.
1667. From that did you obtain the date you have just given? Yes; from the note on the back of it.
1668. Who instructed you to make that search? Mr. Chas. Jackson Campbell.
1669. What property did that search concern? The Battersea Estate.
1670. When did you get instructions to make a search in connection with the Battersea Estate? Early in March, 1888.
1671. Was that before you had seen Hopkins in the matter? I never had any communication with Hopkins. He was in the Registrar-General's Office, and I have seen him there constantly when passing.
1672. Where did you first meet him? In the Registrar-General's Office.
1673. Was he in at your office? No.
1674. Did you ever meet him at Mr. Aitken's office? No.
1675. Did you ever draw up an agreement between Chappel and Campbell of the first part, and Hopkins in the second part? Yes, I did, and I produce a draft of that agreement [*produced*].
1676. Where did you draw up that agreement? At my office.
1677. Who instructed you in this matter? Mr. Hopkins.
1678. From where did you receive instructions from him? At the Registrar-General's Office, while I was there searching.

D.  
Nightingale.  
27 Oct., 1893.

- D. 1679. In what room were you searching? In the Search Room of the Deeds Branch.
- Nightingale. 1680. Did Hopkins come into the Search Room to see you? He had an office in there I believe—in the Births, Deaths, and Marriages Branch.
- 27 Oct., 1893. 1681. But did he see you in that room? To the best of my knowledge I think he did. He saw me either there or in the passage leading to the room.
1682. Can you not say where it was he gave you instructions to draw up this agreement? My impression is that when I was coming towards the door he met me, and that he gave me the instructions somewhere near the entrance to the Search Room.
1683. Can you remember the nature of any conversation you had with him previous to him giving you the instructions? Yes. I think he said he was trying to dispose of his interest in the Battersea Estate.
1684. Did he say what his interest was? Yes; one-third share of the interest that Campbell and Chappel were to obtain from Sir William Manning.
1685. Did Hopkins say how he secured the right to claim that interest? Yes; by informing these people (Campbell and Chappel) that there was a certain interest in the Battersea Estate belonging to the Osbornes, and associated with the unrealised assets of the old Bank of Australia.
1686. Did he lead you to believe that he was to receive one-third of Chappel and Campbell's share in that transaction for the information he gave? Yes.
1687. Did you know from either Chappel or Campbell that Hopkins was entitled to any share in that property? I did not.
1688. Did you learn from any person other than Hopkins that Hopkins had a share in that property? No.
1689. How had you been acting in making these searches for Chappel and Campbell? Alone.
1690. When you received instructions to draw up this agreement from Hopkins, did you see Messrs. Chappel and Campbell, or either of them? I did; to ask them whether it was true that Hopkins was entitled to one-third of their share.
1691. What did you do next? I prepared an agreement similar to the one they had with with Sir William Montague Manning—almost the same as that, except that I struck out the words "Render all assistance in disclosing the properties of the estate mentioned in the said articles of agreement." I struck out these words that were in the agreement of Chappel and Campbell with Sir William Manning.
1692. Had you the original copy of the agreement between Chappel and Campbell with Sir William Manning before you? I believe I had the registration copy which was then on the file.
1693. Is this the original copy [*handing to witness a document, which was subsequently marked Exhibit "1"*—can you point out in this document which words were omitted from the other agreement? No; I think on second consideration that this agreement was upon the lines of the original agreement; but certain words were considered to be objectionable.
1694. I have not come to that—I want to know if that agreement is identical with the one between Sir William Manning and Chappel and Campbell? Well, in substance it is virtually the same.
1695. Please mark what part of the agreement that is different to the one drawn up as between Sir William Manning in the first part, and Chappel and Campbell in the second part? [*Document marked accordingly.*]
1696. Did you say you omitted the substance of the clause which said "Chappel and Campbell will from time to time, and at their own cost, cause diligent inquiries and searches to be made as to what property passed to the said Sir William Montague Manning"? Yes.
1697. Did you have inserted in the other agreement, "The said E. C. Hopkins to act in conjunction with the said H. Chappel and Charles Jackson Campbell in disclosing and causing diligent inquiries to be made as to what property passed to Sir William Montague Manning"? Yes.
1698. Did you draw up the agreement after getting further instructions from Hopkins, and after consultation with Chappel and Campbell? I did.
1699. Did you register that agreement? I am under the impression that I did, but I am not certain.
1700. Can you say whether this [*document produced*] is a copy, or do you recognise that it is a copy of the deed you registered? I have no reason to doubt that it is a true copy of the agreement.
1701. Is that agreement dated the 1st June, 1888? Yes.
1702. After drawing up that agreement, what did you do with it? I got it executed by the three parties concerned.
1703. Who signed it first? I believe it was Herbert Chappel, then Charles Jackson Campbell, and then Edmund Conroy Hopkins.
1704. Can you say positively who signed it first? As it is five years since the agreement was signed, I cannot definitely answer that question.
1705. Did Chappel and Campbell, either separately or jointly, understand or know the contents of that agreement when they signed it? I believe the agreement was read over to the three parties concerned by myself.
1706. Did you read it over to all three in each others presence? Yes; I read it over and it was executed.
1707. As far as you could see or as you know, did each of the parties executing understand the nature of that agreement? Exactly so.
1708. Was any objection taken to the agreement by the parties, to either the first part or the second part? Mr. Hopkins did object to the words "Disclosing and causing diligent inquiries and searches to be made." He said "I shall not make any searches nor make any disclosures, and it would be better to strike these words out." I told him that there must be some consideration in the agreement to make it valid.
1709. Did you say it required some consideration? Yes; I told him that any disclosures he might be able to make would not be of the slightest assistance to me as I would have to find out the whole thing myself by searching.
1710. Did you say anything further to him? I told him I did not think that the words referred to by remaining in the agreement would make any difference or do him the slightest injury. After that he signed the agreement.
1711. What do you mean by saying that "some consideration must appear in the agreement" when it had been already expressly stated that the consideration should be 10s.? That was merely a nominal consideration. I presumed that there was some interest in this Battersea Estate that could be discovered on searching.
1712. Is that what you understood? Yes; I understood that he was connected with the Osbornes, and that Chappel and Campbell could get at the Osbornes only through Hopkins.

1713. Was not the property vested in Sir William Manning? Yes; I found that out after searching.
1714. At the time the agreement was made, did you not know it was so vested? Yes; but I had then made the search. D.  
Nightingale.
1715. Was there any question then in your mind about the Osbornes? Not the least; but that was how the searches originated. 27 Oct., 1893.
1716. What was the next step you took in the matter so far as Hopkins is concerned after registering that agreement? I prepared an abstract of title for him, for which he paid me.
1717. What was the next step? I delivered the abstract of title to Hopkins.
1718. Did you do anything further for Hopkins? No.
1719. Had you any other business transactions with him whatever? No. I may add, however, that there was some transaction with regard to a mortgage to one Mrs. Devernet. I engrossed that mortgage.
1720. Did you prepare the mortgage or only engross it? Yes; I think it was on the 13th June, 1888. I believe Hopkins was giving a mortgage to this lady, and he asked me to do the engrossing for the purpose of saving expense.
1721. Did you only charge him for the engrossing and the registration? Yes; that is all the business transactions I have had with Hopkins.
1722. Have you at any time received any information from Hopkins with respect to the contents of either registers or indices in the Search Room of the Deeds Branch in the Registrar-General's Department? Not in the least.
1723. Has Hopkins at any time disclosed to you any information which he could only have learnt in the Registrar-General's Department? Never.
1724. Do you say you have had considerable experience in the Search Room of the Deeds Branch in the Registrar-General's Department? Yes.
1725. Has the mode of conducting the business in that Search Room improved of late years? No; I see no difference in the mode.
1726. As far as you can see is the check over fees received greater now than it used to be? In that respect I think there has been an alteration.
1727. Are the facilities afforded to persons searching greater now than they used to be? Not in the least. You have access to the whole of the books after paying your fees.
1728. Are the registers arranged better than they used to be? Yes.
1729. In your opinion, is the supervision over persons searching sufficient? I think so; but at the same time if there were more persons looking after the searchers it would be a greater check against misconduct.
1730. Do you think that the supervision is sufficient? I do.
1731. Have you on any occasion when you have required to refer to a register been unable to obtain that register? Never; except, perhaps, in the case of Crown grants.
1732. You say "except Crown grants"? Yes.
1733. What am I to understand by that answer? By Crown grants I mean copies of Crown grants under the old system. These are kept under lock and key.
1734. To inspect any volume of these Crown grants have you to apply to the book-porter, and to pay a special fee? Yes; for each one you desire to inspect.
1735. At any time that you have applied for one of these registers of Crown grants have you been unable to obtain the book? Never.
1736. Have you ever found any register of any kind to be missing? Never.
1737. Have you at any time found a book of indices to be missing? No, except when it may have been in use by other persons.
1738. Have you ever known one to be missing from the building? No.
1739. In your opinion, is it necessary that persons searching should be allowed to take extracts? They must take extracts otherwise the search would be of no value at all.

[The witness withdrew.]

Victor Ernest Sutherland sworn and examined:—

1740. *Commissioner.*] What are you, Mr. Sutherland? I am an architect, residing at Mount Arcadia, Parramatta, and my business office is in Parramatta. V. E.  
Sutherland.
1741. Have you at any time had occasion to visit the Search Room in the Deeds Branch of the Registrar-General's Department? Yes; on one occasion for the purpose of searching. 27 Oct., 1893.
1742. Did you prosecute your search on that occasion? Yes.
1743. Had you any assistance? No; I searched by myself.
1744. To whom did you present your search ticket? I, first of all, went to the counter in the Search Room and bought a ticket, I went outside and paid the fee, and then returned to the Search Room to prosecute my search. While I was looking at the books an official came along and asked me if I had a ticket. I showed him my ticket and continued my search.
1745. How did you ascertain what registers you required? I first looked through the indices.
1746. What was the result? From information gleaned there I began my search in the registers.
1747. Did you ascertain what you desired to know? Partly; I did not make a complete search.
1748. Is that the only occasion you have been to the room for the purpose of making a search? Yes; that is the only one.
1749. As a general question, I ask you have you had any business in any other branch of the Registrar-General's Department? Yes; in the Land Titles Office.
1750. Were you applying to put land under the Real Property Act? I was looking at a plan which showed certain land that had been brought under the Act.
1751. In what room did you see this plan? In the draftsman's office. The plan showed what land had been applied for to be brought under the Act.
1752. Had you any other transactions there? I went down to another part of the office and asked if a ticket had been issued with respect to allotments of land I had previously seen marked on the map. I made these inquiries in the Public Room of the Land Titles Branch. As a result of these inquiries I received certain information.

- V. E. Sutherland. 1753. Have you paid any other visit to the Registrar-General's Department? I have been there on three or four occasions, sometimes with the surveyors in the draftsmen's branch looking at this same plan.  
 1754. Have you ever received any information from any clerk in the Deeds Branch of the Registrar-General's Department? No; I do not know any of the clerks there.  
 1755. Have you received any information from any one in connection with that office? No.

[The witness withdrew.]

MONDAY, 30 OCTOBER, 1893.

[The Commission met at 10 o'clock.]

Present:—

HIS HONOR JUDGE FITZHARDINGE.

Joseph Augustus Doyle sworn and examined:—

- J. A. Doyle. 1756. *Commissioner.*] What are you, Mr. Doyle? A solicitor in the Supreme Court of New South Wales.  
 1757. How long have you been admitted? About three and a half years.  
 30 Oct., 1893. 1758. Where did you serve your articles? In the office of Mr. A. J. Brady, solicitor, of Sydney, who has been in practice in this city for fourteen or fifteen years. During the period I was serving my articles, and since I have been in practice as a solicitor, I have on many occasions visited the Search Room of the Deeds Branch in the Registrar-General's Department.  
 1759. In what year did you begin to make these visits? About the year 1836, and from that time I have continued practically up to the present date.  
 1760. Before 1890, were you in that Search Room on many occasions? Yes.  
 1761. Weekly, or daily, or when? Sometimes as many as two or three occasions in one day. Then, again, I might not have been there for a couple of days afterwards. Frequently a week, or even more, might have elapsed without my being there at all.  
 1762. Since March, 1890, have your visits been more or less frequent? They have been less frequent for the reason that I commenced practice in that year, and since that my conveyancing clerk has done all necessary work of this description. It would be only in very special matters that I would go to the Search Room myself, and then to check the search previously made by my clerk.  
 1763. On any of these visits have you ever been unable to find any register or book of indices that you might have required? No; there may have been on some occasions a great deal of delay, but in no instance have I been told that any register required was not in existence.  
 1764. What would cause the delay to which you refer? Sometimes the book-porter, Hill, would tell me that the register I required was in use by some other person. At times this fact would cause delay, but I was never actually refused access to any book.  
 1765. Since 1890, have you noticed any alteration in the Search Room of the Deeds Branch in the Registrar-General's Department? I think there has been some architectural alteration, for the position of the books is different inasmuch as there are now passages which allow of more people to inspect registers.  
 1766. Are these alterations for the better? Yes.  
 1767. Is the supervision better for searchers than it was before 1890? I think so.  
 1768. Do you find that the supervision is better than it used to be? Yes, I think it is, as far as the architectural structure of the building is concerned.  
 1769. Am I to gather that the opportunities for the supervision of searchers are better? Yes.  
 1770. Can you say whether the supervision itself is better? That I would not like to say.  
 1771. Do you know E. C. Hopkins? I know that there is an official named Hopkins in the Department, but I do not know his initials. I know that there was a clerk in the Department named Hopkins, and I believe that he was in the branch for the Registration of Births, Deaths, and Marriages.  
 1772. When did you first know him? I think I have known him as a clerk in the Department of the Registrar-General from the time I was serving my articles in 1835.  
 1773. Have you known him otherwise than as a clerk in that Department? No.  
 1774. Have you ever received any official information from him otherwise than in connection with the Births, Deaths, and Marriages Branch of the Registrar-General's Department? A long while ago, I believe, I did receive some information from him in reference to the birth of a child, which child was supposed to be illegitimate.  
 1775. Did you receive information from him other than that which concerned either births, deaths, or marriages? No, your Honor.  
 1776. Did you pay him for that information? I think the payment was made in the usual way by the firm of solicitors in whose office I was a clerk at the time.  
 1777. Do I understand that Hopkins was paid the usual fee? Yes; nothing was given to Hopkins as a private remuneration for his trouble, not as far as I know.  
 1778. Can you say in what year this transaction took place? I think it was in the time when Mr. Ward was Registrar-General. I am quite certain that it was within the last four or five years.  
 1779. Did Hopkins ever employ you to do any work for him? He did not, and I do not think I ever spoke to Hopkins outside his own office, and when I say his own office, I mean the room he occupies in the Registrar-General's Department.  
 1780. Is there a Mr. A. K. Doyle? Yes, there is, and I am often taken by mistake for that man. He, I believe, is a law stationer, and his office is somewhere about 37, Elizabeth-street. Frequently confusion arises owing to the similarity of our names. Sometimes he receives letters of mine, but he is not a solicitor.  
 1781. *Commissioner.*] I am glad to accept this explanation, as I certainly see where confusion may have arisen on account of this similarity in names.  
 1782. In your opinion, Mr. Doyle, is it necessary that persons searching should be allowed to take extracts? Certainly, your Honor, particularly as regards parcels or descriptions of land.

1783.

1783. Are the facilities for taking extracts in the Search Room of the Deeds Branch sufficient? I think so. It is a rule that persons searching should be allowed to take extracts, but not to make any copy of any deed. J. A. Doyle.  
30 Oct., 1893.

[The witness withdrew.]

George Frederick Rowley Burcher sworn and examined:—

1784. *Commissioner.*] Are you a solicitor of the Supreme Court of New South Wales practising in Sydney, and is your office in Elizabeth-street? Yes. G. F. R. Burcher.

1785. How long have you been admitted? Nearly eleven years.

1786. Before that how long were you a clerk in the legal profession? Over six years.

1787. To whom were you articled? Dr. G. J. Sly.

1788. During the period of your articles, and since you have been admitted as a solicitor have you had occasion to visit the Search Room of the Deeds Branch in the Registrar-General's Department? Yes; but more particularly during the time I was articled, and in the early part of the period after I was admitted as a solicitor. Latterly I have left the searching to my clerks.

1789. What am I to understand by the word "latterly"? For the last five or six years I have not systematically searched myself, but I have endorsed the results of searches made by my clerk or other searchers.

1790. Whom do you employ when it is necessary for you to get the assistance of searchers? Mr. Reed and Mr. Hanigan, of the firm of Reed and Hanigan.

1791. What is Mr. Reed's address? Wentworth Court, I think.

1792. On any occasion that your duties have taken you to the Search Room of the Deeds Branch have you been unable to find any register? No.

1793. Might you at times have experienced some delay in making these searches? Very often.

1794. Can you tell me what the cause of that delay would be? The only delay I have experienced was when the books were before the Examiners, and at times there would be delay because a book might be in use by other searchers.

1795. So far as you know, on any occasion, has a register been missing? No.

1796. Have you always been able to obtain the required register, though occasionally, after some delay? Yes.

1797. In your opinion is it necessary that the persons searching should be allowed to take extracts? I think it is absolutely necessary.

1798. Is it sufficient for all ordinary purposes that these extracts be taken in pencil? Yes; I think so.

1799. In your opinion is the supervision exercised over persons searching in the Search Room of the Deeds Branch sufficient? I think it is totally insufficient.

1800. Can you suggest any alterations in that respect? I think there is a simple remedy for improvement in that direction. In the search, necessarily, they have to have rows of books, and it is simply impossible for one man to be in such a position as to enable him to watch everybody searching. If there was a gallery overhead where one could see all that is going on below it would meet the requirements altogether. Until recently, Hill, the book-porter, when a searcher requires a deed of grant, takes upon himself, rightly or wrongly, to get the necessary indices, and while he is away doing that, any man in the room, if he were so disposed, could cut out a number of deeds from the registers available. In this respect, therefore, I think the supervision is altogether insufficient.

1801. Do you suggest, then, that one or more persons should be stationed in what you call a balcony, merely for the purpose of supervising persons searching on the floor below? I do.

1802. Without having any other duty to perform? Yes; I think that one attendant in charge of these valuable records is quite insufficient, and I would further suggest that while the books are arranged in rows, as at present, that searchers should be only allowed to remove these books from their proper shelves to tables immediately below those shelves. I have experienced great difficulty for the want of such a regulation as the one I now suggest. I have gone to a shelf to look for a particular register and found it to be not there. I have next looked on the table, or in the place where it should be, immediately below that shelf. The book was not there, but lying away down the room, simply because some searcher who had used it previously did not seem to think it worth his while to bring it back to the place from whence it was obtained. Hundreds of times I have known a book not in use to be lying right away from the shelf to which it properly belonged.

1803. Since March, 1890, have you noticed any alteration in the arrangement of that room? Yes.

1804. For the better? Yes, for the better.

1805. Have you at any time been approached by any clerk in the Registrar-General's Department with offers of assistance? Yes.

1806. What is the name of the clerk who offered you such assistance? A Mr. Hopkins.

1807. E. C. Hopkins? I do not know his initials, but it was an officer named Hopkins, and I think there is no doubt that he was the clerk named E. C. Hopkins.

1808. In what branch was he a clerk? At the time to which I refer I believe he was a corresponding clerk in the Land Titles Branch.

1809. How long ago is this? It must have been fully six years ago.

1810. What was the nature of the assistance or information he desired to give you? He came to me with some person whose name I cannot remember. He or the other person, I cannot say which, owing to the indistinctness of my recollection of the transaction, offered me a certain interest if I would conduct legal business in regard to an estate of which they knew the title was not as it should be. The interest offered I cannot remember. They showed me some documents they had drawn up between them. I declined to have anything to do with the case. That is the only occasion on which I was approached in this manner.

1811. On this occasion did you learn, or had you any idea from where Hopkins had received his information? Oh, yes; from the office, of course.

1812. About that have you any doubt? None whatever.

1813. Can you remember where that land was situated, or can you remember the name of the estate? I cannot; I do not think it was mentioned. The transaction did not go beyond an application, and I declined to have anything at all to do with it.

- G. F. R. 1814. Is that the only occasion on which you have been approached? Yes; that is the only occasion.  
 Burcher. 1815. Have any instances come under your knowledge where other persons have received information from any clerk in that department? I was appointed an arbitrator in an arbitration between Herbert Chappel and Charles Jackson Campbell. I was appointed jointly as arbitrator with Mr. J. A. Aitken, and Dr. Coghlan was umpire. Certain things came under my notice, as an arbitrator, after which I became disinclined to proceed with the arbitration, and I allowed it to lapse.
- 30 Oct., 1893. 1816. What information was that? In looking over the bill-book of Chappel and Campbell [*now produced*] I discovered under the heading of "Bills payable" a promissory note, dated February the 20th, 1889, due on the 23rd of June, for the sum of £40, in favour of Hopkins on account of "Battersea." Also, another promissory note in favour of Hopkins, under the same date, on the same account, for £50, due on the 23rd August. Also, another promissory note in favour of Hopkins, under date, 25th of October, due on the 28th of January, for £60. Also, another promissory note, dated the 14th of June, in favour of Hopkins for £400, due on the 17th of December. Against this last promissory note there is written in pencil, under the heading "Whose account," the name "Bucknell." Under the heading "Remarks," there is an entry in ink, "December 17th, paid by cheque, £155 on account, ditto ditto, interest £10." There is a promissory note in favour of Hopkins, dated June 25th, and due on September 28th, for £60. Under the heading "Remarks," is a pencil entry which I take to be "B. Roberts." Under date of January 31st, there is a Bill drawn in favour of W. W. Bucknell. The due date is not mentioned, neither is the currency, but the amount is £160. Under "Bills receivable" by Chappel and Campbell, there, appears a bill of Hopkins, dated the 25th of June, due on the 28th of September, for £60. I find, also from a statement in the ledger kept by Chappel and Campbell, there is an account in the name of one Bucknell, whom I take to be a clerk in the Registrar-General's Department. This entry is as follows:—"Bucknell—credit or paid to Bucknell, January 25th, 1890, on account of loan £245, £50; January 29th, on account of loan, £50." I also found in a smaller book, under what is called "Manning, Battersea Estate disbursements," that there were entries under date of January 28th, 1889, "Portion of Hopkins' share, £60. Under date March 9th, 1889, interest on £400, £10; May 15th, 1889, Hopkins' interest on £400, £10; ditto, ditto, extra payment as agreed, £5; August 22nd, 1889, Hopkins' promissory note, £50; January 15th, 1889, Hopkins' agreement, £3 2s. 6d.; under date January 4th, 1889, Hopkins' promissory note, £40; May 5th, 1890, Bucknell, £4." These are the whole of the disbursements shown that are material to this inquiry. Under "Receipts," there is an entry dated December 6th, 1889, "Bucknell, £30." These things came under my notice, and as a consequence I did not care to have anything more to do with the case. I, therefore, allowed the arbitration to lapse.
1817. Since then has anything further come under your notice;—have you seen anything else that will assist me in this Inquiry? Yes; I have seen other things. Under the heading of "Nichols' Estate," and under date October 6th, 1887, I find an entry of a payment to Hopkins of £25; and on the 7th of the same month there is a further entry of a similar nature for £25. There are further entries as follow:—Under date October 11th, "S. H., search, £8 10s.;" 18th of October, "Search, £11;" 29th of October, "Search, £2;" November 5th, "Search, £1 7s. 6d.;" December 14th, "Search, £8;" November 27th, "S. H., property, £500;" February 20th, 1888, "Search, £5 15s. 9d." Under date January 11th, 1889, "S. Hills, search on account, £25;" and on October 13th, 1889, "Search, S. Hills, £1 0s. 6d." In the ledger belonging to Messrs. Chappel and Campbell, on page 64, under date April 6th, 1889, there is an entry, "Hill, search, £1." On page 33 of the same ledger, under date August 22nd, 1889, appears an entry, "Lent, Battersea, Hopkins, promissory note, £50." On the same page, under date June 15th, 1889, appears an entry, "Lent, Battersea, for "Reg.," as Hopkins' agreement, £3 2s. 6d." On page 34 of the same ledger, under date June 24th, 1889, there is the following entry, "Battersea, for Battersea, Hopkins' promissory note, £40."
1818. Is there any other matter on which you desire to give this Commission any information? I do not think so, your Honor; nothing else occurs to me.

[The witness withdrew.]

Charles John Muddle sworn and examined:—

- C. J. Muddle. 1819. *Commissioner.*] Were you for some time, Mr. Muddle, in the office of the Registrar-General? About twenty-five years.
- 30 Oct., 1893. 1820. What position did you occupy when you left that office? Deputy Registrar-General.
1821. Did you resign that position in 1882? Yes.
1822. What position have you occupied since then? That of a certificated conveyancer of the Supreme Court of New South Wales. I have been following my profession as a conveyancer since that date.
1823. Since you have been practising as a conveyancer have your duties from time to time taken you to the Search Room in the Registrar-General's Department? Not very much. Principally my search business has been carried on by members of the firm of George Kenyon and Sons.
1824. Who now carries on the business of Kenyon and Sons? Since the death of the late Mr. George Kenyon the business has been carried on by his sons as law stationers in Phillip-street, Sydney.
1825. Have you, Mr. Muddle, at any time since you have been a conveyancer been unable to find any register you required when you have visited the Search Room? No.
1826. Have you ever heard from any searcher who has worked for you that any register was missing? No; I have never heard of any such thing.
1827. In your opinion is it necessary that persons searching should be allowed to take extracts? Yes.
1828. Is it necessary that these extracts should be taken in pencil? Yes.
1829. Have you noticed any difference in the arrangement of the Search Room since March, 1890, the year Mr. Pinhey was appointed Registrar-General? Yes; I have noticed a little difference in the arrangement, and that is all.
1830. In your opinion is the supervision over persons searching sufficient? It is not by a very long way. Persons searching do as they like, and there is no one to supervise their actions.
1831. What alterations do you suggest to improve the present system? I would suggest that a man who thoroughly understands searching should be appointed to supervise all searches in that Search Room.
1832. Would one official be sufficient to effectually perform this duty? Yes; I think one active man with a fair knowledge of searching would be sufficient.
1833. And should his duty be only to supervise? Yes; that has been my opinion for a long time.

1834.

1834. In your opinion should the public continue to have access to the books in the same manner they at C. J. Muddle present have? They should, but under more stringent supervision.
1835. Do you know the registers which contain copies of the old grants? I do; for I had them under 30 Oct., 1893. my charge for many years.
1836. In your opinion should the public have access to those registers? Not in their present state, for some of the registers in question are in a dilapidated condition.
1837. Have you any suggestion to make with regard to these particular registers? I think they should be re-copied.
1838. On paper or on parchment? Parchment would be best, but I may explain that ink does not stand so well on parchment as on paper.
1839. How do you suggest that the copies, supposing they were made, should be examined? The public should have access to the parchment copies as they do now in the case of wills.
1840. In your opinion then should the old records be handled by the public? In my opinion they should not.
1841. In your opinion is the check kept upon persons using the Search Room by having to obtain a ticket before prosecuting a search sufficient under the present arrangement? It is not; for the simple reason that a searcher has to go into the Search Room to get his search ticket. That ticket ought to be obtained outside the Search Room, and no admission to that room should be possible without the production of a ticket.
1842. Is it possible under the present arrangement for a person to enter the Search Room and prosecute a search without having obtained a ticket? I think so; there is no one to check him.
1843. Is there any other improvement which you can suggest as the outcome of your experience? I do not know of anything at the present time, your Honor.
1844. In your opinion are the facilities afforded to persons searching sufficient for search purposes? The facilities generally may be sufficient. The room, however, is badly lighted, and no man can carry on a search properly under gaslight the whole day long.

[The witness withdrew.]

Thomas George Drysdale sworn and examined:—

1845. *Commissioner.*] What are you, Mr. Drysdale? A search clerk in the office of Messrs. Norton, Smith, & Co., solicitors, of this city. T. G.  
Drysdale.
1846. How long have you been in that position? About eight years. 30 Oct., 1893.
1847. Before that had you any experience in the Search Room of the Deeds and Search Branch of the Registrar-General's Department? Yes; about eighteen months.
1848. Since you have been with Messrs. Norton, Smith, & Co., have your duties taken you frequently to the Search Room of the Deeds Branch? Yes; on many occasions, and all day long.
1849. Have you on any occasion been unable to obtain any register you desired to see? Perhaps a register may have been away for about ten minutes.
1850. In your experience have you ever found that any particular register was missing? Never.
1851. When you are searching is it your practice to take extracts? Yes.
1852. In your opinion is it necessary to take extracts? Quite so; a search would be incomplete without them.
1853. In your opinion is the supervision over persons searching in the Search Room of the Deeds Branch sufficient? Yes; I think it is now.
1854. At any time has it been insufficient? Some years ago the supervision was not as great as it is now.
1855. Was that before Mr. Pinhey was appointed Registrar-General? Yes, just before.
1856. Since March, 1890, has the disposition of the registers kept in the Search Room been altered? It has.
1857. For the better? Certainly.
1858. Are the facilities allowed to searchers sufficient at the present time? No; I do not think they are.
1859. In what particular? There is insufficient room for the indices.
1860. Might the room be improved with regard to the amount of light available for searches? Yes; I think there should be a better light, and more than that, I am strongly of opinion that there should be a circular counter, in the centre of the Search Room, on which searches might be prosecuted in full view of officials in that department. I think the room should be so arranged that it would be impossible for any searcher to remove a register to an obscure corner while making a search.
1861. Are the facilities for safe searching sufficient? No, your Honor, I do not think they are.
1862. Do you think that an official should be stationed near the door of the Search Room for the purpose of safeguarding the books in that room? Yes; some of the registers are deposited very near to the door of the Search Room and it is possible for any person to take an index from the room into the street without being observed.
1863. Have you ever been approached by any clerk in the Registrar-General's Department with offers of information or assistance in making a search? Never.
1864. Do you know a clerk in the Registrar-General's Office named Hopkins? Yes; I have seen Hopkins, in the Search Room, but I have never seen him searching. I saw him in that room when the Births, Deaths, and marriages registers were kept in the same room as the real estate registers.
1865. Have you seen a clerk named W. W. Bucknell in the Search Room of the Deeds Branch? Yes; but not since the births, deaths, and marriages registers have been removed from the Deeds Branch.
1866. Have you seen any clerks other than those named in the Search Room of the Deeds Branch? Yes. I have seen a clerk named Mr. O. L. Thompson in that room.
1867. Have you seen any other person there? No; I think those named are all I have seen.
1868. Have you any other suggestion to make in reference to the working of this Branch of the Registrar-General's Department? Yes; in the matter of bespeaking office copies of the deeds registered. Frequently delay is experienced in providing these copies. I also think that documents referring to wool liens should be bound together in the same manner as the deeds are treated at present. Now the wool liens are simply stitched together in one corner.
1869. What is the condition of the stock registers? The stock registers are in a very dilapidated condition. I refer to the indices and also to the register of the District Court executions—both require amendment in some way.

- T. G. Drysdale.  
30 Oct., 1893.
1870. Are they both in a dilapidated condition? Yes.  
1871. Do you find fault with the registers of the stock mortgages with regard to the manner in which they are made out? Yes.  
1872. In what respect? In some indices they are indexed alphabetically, but not lexicographically. Take the word MacDonald, for instance. In looking for this name you might find it under Mac Donald or McDonald; therefore, you have to look under both. This entails trouble and expense. Then you may take the word Anderson, and run through three or four pages and all of a sudden see a note stating that for continuation of "A" see "Z." These annotations and complaints refer to old registers dealing with years previous to and ending with 1889.  
1873. Have you any fault to find with the manner in which the stock registers have been kept since the year you have mentioned? No, your Honor, I have not.

[The witness withdrew.]

Arthur Edward Reeve sworn and examined:—

- A. E. Reeve.  
30 Oct., 1893.
1874. *Commissioner.*] Are you a clerk in the Land Titles Branch of the Registrar-General's Department? Yes.  
1875. How long have you been a clerk there? Since the 1st of January, 1889.  
1876. What position do you now hold in the department? I am clerk in charge of the Search counter.  
1877. When a person desires to search in the Land Titles Branch must he obtain a ticket? Yes, your Honor; he must get such a ticket from the clerk at the front counter—either from Mr. Keele or Mr. McDonald.  
1878. What is done with that ticket? He pays the fee to the clerk from whom he receives the ticket; he brings the ticket to me and I check it.  
1879. What do you mean by checking it? I mean that I examine the ticket before any search is allowed.  
1880. Upon the ticket having been found to be satisfactory, what is done next? The ticket is produced at the counter, and the official in attendance for the time being will produce the book or register required.  
1881. How do you ascertain which particular book is wanted? By referring to the index which is kept on the public counter.  
1882. How is the register obtained after you get the number of the book required? I take it from the rack. I ask the applicant the number of the folio of the book and look at it myself to be certain that it is correct.  
1883. What follows that? The book is handed over to the applicant, at the counter, and he is not allowed to remove it from the counter. The applicant then makes his search under my supervision.  
1884. How many persons, on an average, search daily at your counter? I think a fair average would be about sixteen per day.  
1885. What hours of the day are the busiest at your Search counter? From 12 till 1, and from 3 to 4.  
1886. Does the searching continue up to 4 o'clock? Yes, your Honor.  
1887. After the searching is completed, what is done with the book that has been used? The book-porter or myself takes it from the counter and places it back on the rack in the proper order.  
1888. Is the counter kept clear? Unless there is a great rush of business on. Sometimes when there are about twenty people in the small space at our disposal outside the counter and it is not convenient to take a book away at once.  
1889. At times is the business more brisk than at others? Yes.  
1890. At any particular period of the year? I think the beginning of the year is the busiest time?  
1891. How many persons on an average would be in the Search Room at that time? I think twenty is about a fair average.  
1892. Is there sufficient room at your counter for twenty people to search? No, there is not.  
1893. How do you manage when the space outside your counter is not sufficient to accommodate the persons wishing to search? They have to wait until the people searching have gone away and then take their turn.  
1894. How many can your counter accommodate for the purpose of searching at one time? Eight I think; not more.  
1895. If there are twenty desirous of searching twelve will have to wait until the eight, for whom there is accommodation, have completed their searches? Yes.  
1896. Have you ever been to the Search Room in the Deeds Branch of the Registrar-General's Department for any purpose? No, except to carry a message to the officer in charge of that room.  
1897. From whom would you carry that message? From the head official of my room to the head official of the other room.  
1898. Have you ever been in there for the purpose of searching? No; I do not understand the system of searching.  
1899. How many registers have you in your department? There are 1,105 bound and about four unbound.  
1900. How many dealing books are there bound? There are 2,074.  
1901. What is the number of dealing books awaiting binding? I think it is about 103.  
1902. What is the number of books containing discharges of mortgages? I think it is 204.  
1903. May you at any time be called upon to produce any one of these books? Yes.  
1904. Or any one of the registers? Yes.  
1905. Do you yourself obtain any one of these books which may happen to be either upstairs or down in the vaults? Yes.  
1906. Have you to go down to the vaults for such a book? Yes, if necessary.  
1907. Are you able to do that and satisfactorily perform your other duties as counter clerk? Yes.  
1908. While you are away who supervises persons who may be searching at the counter? If I am likely to be away long I inform the head of the room, and he puts someone else in charge of the counter until I come back. If I am away for only a minute or so it is not necessary to take this precaution.

[The witness withdrew.]

Frederick McKern sworn and examined:—

1909. *Commissioner.*] Are you the clerk in charge of the Deeds Branch of the Lands Department? Yes. F. McKern.
1910. How long have you been in charge of that branch? Since the year 1881.
1911. Before that, what were you in the Lands Office? I was a clerk in the same branch of which I am now in charge. Previous to that I had occupied a position in the office of Messrs. Want and Johnson for twelve years. 30 Oct., 1893.
1912. Since you have been in the Deeds Branch of the Lands Department have you had the custody of the old records? Yes; and I still have charge of them.
1913. Of what do these old records consist? They consist of registers of grants, or rather duplicate registers.
1914. Do I understand that they are the registers of original or copy grants? They are copies.
1915. Of what other documents have you the custody? I have the old promise registers and the old order books. I also have charge of the undelivered grants.
1916. What registers have you? I have got a record of almost everything from the time of the Colony's commencement. Amongst other books, I have what are generally known as the county of Cumberland registers, from No. 1 to No. 6, and I also have registers relating to other counties.
1917. How many volumes altogether? I suppose I have charge of about twenty-five of these county registers.
1918. Have you an inventory or catalogue of these registers? No; I have indices of the registers.
1919. Will you explain what you mean by Cumberland registers? Yes; and I produce for that purpose Cumberland register No. 4, on the back of which is printed "Register of the Counties of Cumberland, Argyle, Camden, and elsewhere, 1832 to 1836."
1920. Is that a Cumberland register? It was recognised, and always has been recognised, as the county of Cumberland register.
1921. How many volumes have you of that register? Six.
1922. Is each volume lettered in a way similar to the lettering on the back of No. 4? Yes.
1923. Although these volumes have been commonly called Cumberland registers, do they, in fact, comprise grants for other counties than the county of Cumberland? Yes; but, notwithstanding that they have always been known as the County of Cumberland registers as distinct from other county registers. I also produce five original grants—undelivered grants: one of 19th October, 1831, and two others, one dated 11th of December, 1838, and the other dated 29th of January, 1840.
1924. For what purpose do you produce this original grant bearing date the 19th of October, 1831? To draw your attention to the endorsement in red ink in the margin in reference to the county of Cumberland. That entry reads: "Entered on page No. 90 in the register of county of Cumberland, Surveyor-General's Office, S. A. PERRY, Dy. S.-G."
1925. Have you the register in which this grant is entered? Yes; it is entered at page 90 in the county Cumberland register No. 4, which I produce as a record of the Survey Department. I also produce another of these original grants, which is entered on page 88 of the Cumberland register.
1926. Is that entered on page 88 of Cumberland register No. 4 [*produced*]? Yes. I also produce an original deed, dated 11th December, 1838, of which the endorsement shows it to be entered as "No. 303, folio 63, in the register of the county of Cumberland, in the Surveyor-General's Office, on the 15th of February, 1839." I produce another original grant, dated 29th January, 1840, on which the endorsement is: "Entered as No. 468, folio 136, in the register No. 5 of the county of Cumberland, in the Surveyor-General's Office, 21st of August, 1840." These endorsements refer to the set of registers of which there are only six.
1927. During the period you have been clerk in the Deeds Branch of the Lands Office, and while you have been in charge of that branch, have you had occasion to visit the Search Room in the Deeds Branch of the Registrar-General's Department? Yes.
1928. On many occasions? Not very many.
1929. For the purpose of consulting old records? Yes.
1930. Have you on any occasion seen a register called "Cumberland Register, No. 28?" No.
1931. So far as you know, from your experience in that Search Room, and in the Deeds Branch of the Lands Office, did such a register ever exist? No; I am quite certain that such a register never existed.
1932. Could there be a "Cumberland Register, No. 28?" No, your Honor.
1933. Are the Cumberland registers in your charge six in number? Yes.
1934. Other than these six volumes, have you ever seen any volume entitled "Cumberland Register"? No; and such a register never existed.
1935. Do you speak now from a knowledge gleaned by eighteen years' experience in your present department? Yes.
1936. Have you ever seen any "Cumberland Register" in the Search Room of the Deeds Branch of the Registrar-General's Department? No.
1937. On any occasion that your duties have taken you to consult old registers in the Registrar-General's Office, have you been unable to prosecute your search through any register being missing? No, your Honor.
1938. Have you ever heard of any register being missing from that room? No.
1939. During the last three or four years, have you noticed any alteration in that Search Room? Yes.
1940. Are those alterations for the better? Certainly, as far as my casual observation shows.
1941. Can you say whether or not the supervision over persons searching is sufficient? I do not know for certain. I do not think it is, for the simple reason that the design of the room is altogether unsuited for the purpose to which that room is devoted.
1942. Over what years do these six volumes of Cumberland registers in your custody extend? From 1792 to 1865.
1943. Do these registers contain the copies of the grants, or only extracts? Only extracts or memorials.
1944. In any other register have you any extract or memorial of a grant of land in the county of Cumberland? I believe not, your Honor.
1945. Do these six volumes to which you have referred contain all the grants in the county of Cumberland and the other counties you have named? Yes.

[The witness withdrew.]

James

James Edward Hanigan sworn and examined:—

- J. E. Hanigan. 1946. *Commissioner.*] What are you, Mr. Hannigan? I am a law stationer, of the firm of Reed and Hanigan, and I have been such for the last four years. Before that period I was a clerk in various solicitors' offices in Sydney for ten or twelve years.
- 30 Oct., 1893. 1947. During the time you were a clerk, and since you have been a law stationer, have your duties taken you to the Search Room in the Deeds Branch of the Registrar-General's Department? Yes; continuously.
1948. On any of those occasions have you been unable to find a register? None that I have required.
1949. Have you ever heard that a register was missing from the Search Room? No, never.
1950. Have you at any time had to consult the Register of Old Grants in that branch of the Department? Yes; very often in the course of each year I have named.
1951. Have you ever seen a "Cumberland Register No. 28"? Never.
1952. Have you ever seen any Cumberland Register? Not to my knowledge.
1953. Or any register containing only grants in the county of Cumberland? Not to my knowledge.
1954. Is it the practice when searching to take extracts? Certainly.
1955. Is it necessary for these extracts to be taken? It is absolutely necessary.
1956. Is it sufficient that these extracts should be taken in pencil? Yes; I think it is sufficient.
1957. Have the persons searching increased in number during the last three or four years? No; I do not think the number of searchers has increased.
1958. Have the registers increased in number? Yes, largely.
1959. Are these registers conveniently arranged? Yes; so far as the accommodation of the office will allow, but searchers certainly suffer from considerable inconvenience; there is not sufficient room in the building. The best has been made of the space available, so far as I am able to judge.
1960. With the room at command can you suggest any improvement in the arrangement of the registers or the mode of searching? No; not in the present building.
1961. Was the supervision in that room sufficient before last September? I have never heard of any complaints, only since the cause of Campbell against the Anglo-Australian Investment Finance and Land Company, Limited, in the Supreme Court. About that time an extra clerk was put on and there are now two where there was one previously. One clerk has nothing to do now but walk about the room and obtain and put away the books required.
1962. Has that alteration taken place since the trial to which you refer? Yes.
1963. In your opinion, is the supervision now sufficient? Most certainly, and I have heard complaints lately about there being too much supervision.
1964. In your opinion, is the supervision too much now? I think the correct system has been adopted now that there is one man exclusively occupied in supervising that room, and another official obtaining the books necessary to be used.
1965. Have you at any time received any information from any clerk in that office? Outside professional work, certainly not.
1966. Do you know a clerk there named Hopkins? Yes.
1967. Do you know a clerk there named W. W. Bucknell? Yes.
1968. Have you ever done any work for Hopkins? Never, sir.
1969. Did you ever do any work for Charles Jackson Campbell, or for Herbert Chappel? Never for Campbell. About three months since Chappel came to my office and asked me to do a search for him. I made that search.
1970. In prosecuting your searches, have you had to consult any records which are not properly preserved? Yes.
1971. Which were those records? The indices of mortgages on stock, which are in a shameful condition; it is absolutely dangerous to search with them.
1972. Are they falling to pieces? Yes; the covers are all lost. The indices are all carelessly compiled. Only experienced searchers can really understand what some of the entries in the books mean.
1973. What do you suggest in regard to these? A consolidation of the old books, and that the indices should be alphabetically and lexicographically arranged. If this were done searching would be much cheaper and safer for the public.
1974. Up to what year is the carelessness in their compilation disclosed? Up to about 1880.
1975. Since then have the indices of mortgages on stock been more carefully compiled? The A's, B's, and C's books are right, but they are not lexicographically arranged yet. The primary letters are alphabetically arranged, but not lexicographically.
1976. Do any other records require attention? Yes; there should be a consolidation of the old dealings in land. The dealings from the year 1802 to 1825 are in a dilapidated condition.
1977. Do I understand you to be referring to the copies of old grants? No; to the indices of transactions in the early days.
1978. What requires to be done to these? They should be consolidated.
1979. Would that necessitate re-copying? Yes.
1980. Are they on paper or on parchment? They are in little books, something like a Judge's note-book. The indices are exceedingly closely written, and it is hard to decipher them at all. I can assure you that it requires an experienced eye to decipher them.
1981. Have you any other suggestion to make? I would suggest that separate indices should be kept for dealings in conditional purchases of land. Such an alteration would make searching easy, and much cheaper for the general public. In years to come this improvement will be absolutely necessary.

[The witness withdrew.]

TUESDAY, 31 OCTOBER, 1893.

[The Commission met at 10 o'clock.]

Present:—

HIS HONOR JUDGE FITZHARDINGE.

Charles Jackson Campbell sworn and examined:—

1982. *Commissioner.*] What are you? I am an estate agent.
1983. How long have you been an estate agent? Since 1887—about six years.
1984. Are you in partnership with any person at present? No.
1985. Have you been? I was in partnership with my brothers in George-street up to 1887.
1986. In what business? In the furniture business.
1987. Since you have been a land agent or an estate agent, have you been in partnership with any person? I have not been in partnership, but I have been working with one party.
1988. Who was that? Mr. Chappel.
1989. Were you not carrying on business as Campbell and Chappel? It was no firm. I simply had my office and he had his. We had a good many matters together. I simply had my office and he had his in the same building.
1990. Do you say you were never in partnership with Chappel? Never in actual partnership.
1991. When did you begin to do business in conjunction with Chappel? In 1887.
1992. And when did that relationship end? In 1890.
1993. Are you now interested with him in any matter? No.
1994. Is he interested with you in any matter? I do not think so. We have had no dealings together since 1890—not in any friendly way. There were certain things I had to complete with him.
1995. Are they all completed? I believe so. I do not reckon that he is interested in any thing that I have in hand.
1996. What was the first matter in which you were interested with him? It was a matter in connection with the Osborne trustees in an estate called Bello Retiro, at Newtown.
1997. What was the next matter? I think the next was the Tempe Estate, another matter of the Osbornes.
1998. What was next after that? In connection with property at St. Peters.
1999. Whose property was that? Still the Osbornes.
2000. After the Osborne transactions what was the next matter you had in connection with Chappel? The matter of Sir William Manning, I believe, was the next.
2001. What was the name of the land in question? It was an estate at Abbotsford, on the Parramatta River.
2002. What is the name of that estate? It is the Battersea Estate.
2003. After the Battersea Estate what was your next dealing with Chappel? I think it was another matter concerning Osborne land near Granville, and called the Campbell Hill Estate. I cannot say whether these transactions followed each other in this order, but speaking from memory I think these are the different matters we had in hand.
2004. Have you on occasions visited the Search Room of the Deeds Branch, in the Registrar-General's Department? Yes, I have visited the Search Room.
2005. When did you first visit that room? To make searches, I think, I went in 1891. I did not know how to search before then.
2006. In what month in 1891 did you go to that room? I should think it would be early in 1891; I cannot say in what month. The tickets will give the months and the day.
2007. Had you searches made before early in 1891? Yes; I would have had some made before then.
2008. In what year did you commence to have searches made? I think it would be in 1887.
2009. How long have you known a clerk in the Registrar-General's Department named Hopkins? Since 1887, I think.
2010. When did you first know him? I cannot tell you the exact month, but I think it must have been very near the end of 1887.
2011. How did you come to know him? I think it was through Mr. J. A. Aitken, a solicitor; I think I met him at Mr. Aitken's office.
2012. Was that the first time you met Hopkins? Yes.
2013. Was Hopkins a stranger to you when you went into Mr. Aitken's office on that occasion? Yes; I think so.
2014. I want a direct answer, it is not a question of thinking—was Hopkins a stranger to you when you met him in Mr. Aitken's office? Yes, he was.
2015. Did Mr. Aitken introduce him to you? I asked Mr. Aitken to see him, I believe, about a matter of the Osbornes with a view of making some arrangement.
2016. Will you be good enough to answer my question—did Mr. Aitken introduce Hopkins to you in Mr. Aitken's office? I am not quite sure that he did.
2017. Are you now quite sure that that was the first time you met Hopkins? Yes.
2018. Did you then know he was a clerk in the Registrar-General's Department? I knew he was in the Registrar-General's Department—I was told he was there.
2019. Had you ever seen him there? No. I may have seen him, but I do not think I knew him as a clerk. I think I went to the Registrar-General's Office before then about the birth of a child, but I do not think I knew his name was Hopkins at that time.
2020. Do you know a person named W. W. Bucknell? Yes; I do know him.
2021. When did you first meet Bucknell? I believe it would be in 1889, your Honor. I did not know much about the office until 1890 or 1891. I think I saw Bucknell in 1889.
2022. What month in 1889? I should say it would be about the middle of 1889.
2023. Where did you meet him first? I cannot tell where I first met him.
2024. Where was it you first spoke to him? I could not say that. I believe he saw me in connection with a loan he was arranging for Hopkins. I think that was when he first came to know me.
2025. Where did that interview take place? I think it must have been in my office.
2026. Where was your office then? I believe it was in the Sydney Arcade.

C. J.  
Campbell.  
31 Oct., 1893

C. J.  
Campbell.  
31 Oct., 1893.

2027. What business did he see you upon? It was a matter arising out of the Sir William Manning matter. Hopkins had a share in that, and I think Bucknell came in to see me in respect to some money which was due to Hopkins. Bucknell got a friend of his to arrange this for him. This friend, I think, was Mrs. Devernet.
2028. Had you any other transaction with Bucknell? No; I had no other transaction with him.
2029. Did you ever at any time lend him any money? No.
2030. Or pay him any money? No; I do not think so.
2031. Can you swear that you did not? Yes; I think I can. I am quite sure that I did not pay him any money; it is a long time back.
2032. Did you keep books at that time? Yes.
2033. Did Bucknell ever perform any service for you? Only with regard to this matter of Hopkins—this matter of a Promissory Note the balance of which is due to Hopkins. That he arranged, but it was more for Hopkins than for himself.
2034. Did Bucknell at any time give you any information? I do not think so.
2035. Can you not be more certain than “thinking so” in this matter? I do not remember him ever giving me any information.
2036. Did you ever ask him to give you any information? No.
2037. Or to make a search for you? No.
2038. Or to give you the result of any search he might have made for any other person? No.
2039. Did you ever receive from him the result of any search that he had made? No.
2040. On how many occasions was Bucknell at your office? He must have looked in a good many times, but it was always about this one matter.
2041. Over what period did his visits extend? During the last four years, I think.
2042. Do I understand that they extended from 1889 to the present time? Yes, your Honor; if he came first of all at the end of 1889 his visits would have extended to the present time.
2043. Do you say he came first to see you about the middle of 1889? Yes.
2044. From that time to the present have his visits continued? Yes, but only for one purpose. The interest on this mortgage with Mrs. Devernet was not paid, and he came to me to say that he was annoyed, and that proceedings might be taken.
2045. Proceedings against whom? Against Hopkins and me.
2046. What was that to do with you? I was concerned in this mortgage.
2047. Were you a party to the mortgage? I gave a promissory note with Chappel.
2048. To whom? To Hopkins or Bucknell; I do not know which.
2049. What was Bucknell to get for his trouble in this transaction? Nothing that I know of. He used to come to my office and say it was unfair that the interest should not be paid, as he was getting nothing at all out of the matter, which had put him in an awkward position, owing to Mrs. Devernet continually asking him for the money.
2050. Do you know whether Mrs. Devernet is related to either Bucknell or Hopkins? I believe she is an aunt of Bucknell. I think I have heard Bucknell say so.
2051. When did you first know George W. Hill—the book-porter in the Search Room? I knew he was there about the end of 1887, but I never had much to do with him.
2052. What had you to do with him? I might say nothing at all beyond what any other member of the public would have in asking him questions in the Search Room. If I could not find a book I wanted, or if there was any other information I desired to obtain, I would speak to him the same as anybody else would.
2053. Has any person named Hill searched for you? No.
2054. Not at any time? No.
2055. Have you ever paid any person of the name of Hill any money for searching? No.
2056. Did you ever pay a man named Hill the sum of £1 for searching? Not that I remember. I do not remember paying Hill anything at all. I never considered that Hill was friendly with me.
2057. Have you ever seen Hill at your office? I think I saw him once in my office at the Sydney Arcade. He simply looked in to know if Mr. Chappel was about. I think that was the only time I have seen him in my office. He has never been to my present office.
2058. I am not speaking of your present office—has Hill been to any office of yours? I think he may have been once.
2059. To what office? At 52, Sydney Arcade.
2060. Did you speak to him on that occasion? Yes; I must have spoken to him.
2061. About what matter? No matter in particular that I know of. I think he only looked in to see where Mr. Chappel was.
2062. Did he, at any time, take any documents to you? I do not think so.
2063. Did he, at any time, take any certified copies of deeds to you? I do not think he brought any to me; I think he brought some to Mr. Chappel, but I do not remember taking any from him.
2064. Did you know that Hill did take certain certified copies of deeds to your office? I do not think he brought any to me.
2065. Did you not say that copies of deeds were taken to your office? I could not say for certain. I had very little to do with Hill until 1891, after I began to search myself in the Deeds Room of the Registrar-General's Department. I knew very little of Hill before this, but I knew he was a friend of Mr. Chappel.
2066. Have you at any time paid any money to Hopkins? Yes.
2067. How much altogether? I think about £450.
2068. In one sum or in many sums? In different sums.
2069. By cheque or in cash? Both I think.
2070. In any other form? No bills.
2071. Do you mean by saying “no bills” no promissory notes? Yes.
2072. Do you now owe Hopkins any money? Yes.
2073. How much? I think with interest it must be about £180.
2074. In payment for what service was that money? In connection with the agreement between the Osbornes and Sir William Manning.
2075. Concerning what estate? I suppose it would be the Bello Retiro Estate, at Newtown, or the Battersea Estate, on the Parramatta River.
- 2076.

C. J.  
Campbell.  
31 Oct., 1893.

2076. What sum did you agree to pay him? I think I agreed to give him a one-third interest in the Bello Retiro Estate, for which I think he got £150 for the Bello Retiro, and a one-third interest in Sir William Manning's matter, for which he afterwards took £500.
2077. Do you say he took £500 or that he agreed to take £500? He agreed to take £500.
2078. What services did he perform for the share he was to receive in the Battersea Estate? He simply mentioned the Battersea affair to me, but he did nothing.
2079. What did he say? He said that if I could arrange with Sir William Manning something might be done, as he had heard that the land belonged to Sir William Manning.
2080. Is that the only information he gave you? Yes.
2081. And for those few words did you agree to give him £500? Yes; I agreed to give him a one-third interest. I said to him, "If the property is Sir William Manning's, and I can make arrangements with him, I will give you a one-third interest." He only mentioned it in a casual way, saying that he believed there was property on the Parramatta River belonging to Sir William Manning.
2082. Did he tell you where he had received that information? No; he did not.
2083. Had you any idea of where he received that information? No; I could have had no idea.
2084. After receiving that information from Hopkins, did you make a search? No.
2085. Did you direct a search to be made? Yes.
2086. By what person? Mr. Nightingale, I think it was.
2087. What was the result of that search? That the land known as the Battersea Estate was found to belong to Sir William Manning.
2088. Was that search to verify the information you received from Hopkins? Not particularly.
2089. I ask you again was the result of that search to verify the information you had received from Hopkins? Yes.
2090. What information did you receive from Hopkins about the Bello Retiro Estate? None that I know of. I did not receive any information.
2091. What did you pay him that £150 for, with respect to that estate? For making arrangements with the Osborne trustees; he knew them, they were related to him, and he had said he would see if they could make any arrangements with him.
2092. Did you receive any information from Hopkins about any of the Osborne property? No; I did not.
2093. Have you received any information from Hopkins concerning properties other than the Bello Retiro Estate, and other than the Battersea Estate? I do not think so. I think he has mentioned matters to me, but I have not got them from him.
2094. What other matters has he mentioned to you? There is another matter in which he said he knew of some property belonging to one Augustus Gore. I told him I knew all about that myself.
2095. Where was that property situated? It was in different parts of the Colony.
2096. Was there any particular property belonging to Augustus Gore to which Hopkins made reference? One property he referred to was at Willoughby.
2097. Has he mentioned any properties other than those said to, belong to the Gore family? I do not think so.
2098. In what year did he give you information concerning this property? I think it was about four years ago that he spoke of this property. He would, perhaps, come in about the matter of Mrs. Devernet, and at the same time, in a general way, speak of different things.
2099. But generally concerning properties? On this particular day he asked me if I knew anything about this matter and I told him I did.
2100. Have you not said he mentioned other properties to you besides the Bello Retiro Estate, the Battersea Estate, and the Augustus Gore property? He said to me that there was a valuable property belonging to the Osbornes at Bankstown, near Maitland. He said there were several valuable blocks about, but he knew nothing of them. He also said he had a coal property at Newcastle, but that he did not know any particulars at the time. It was a general conversation.
2101. Was it about properties that he spoke to you? His conversation was generally directed to money matters, but he may have said something about properties at the same time.
2102. Did he at any time mention any property in connection with Mrs. Mary Stedman? No.
2103. Or concerning the property of a Mr. Stedman, lately deceased? No; I have never heard of that name at all.
2104. When did you last see Hopkins before you entered this room this morning? He came into my office or to my office door for about a minute—he did not come inside—on last Eight-hour Day.
2105. Was that on the 2nd of October, or the first Monday of October, of this year? Yes.
2106. Have you seen Hopkins since? I saw him in the street one day.
2107. Did you speak to him? I just asked him how he was getting on.
2108. Getting on, in respect to what? I asked him if he was doing anything. I thought he would be in some difficulty after his having been suspended.
2109. Was that since this inquiry commenced? No; I think it was just about the time it was commencing.
2110. How many times has Hopkins visited your office during this year? I do not think more than about five or six times, but not in connection with anything excepting this old matter.
2111. On each or either of these five or six occasions, when he visited your office, did he speak to you about any other landed estates? Only in the way I have mentioned.
2112. In the way you have mentioned—what do you mean? He may not have done so every time.
2113. It is not a question of "may," did he? No; I do not think he did. I know it would have been of no benefit to him if he had mentioned it.
2114. During 1892 how often did Hopkins visit your office? Very seldom, if he did at all; I cannot say.
2115. How often did Hopkins visit your office in 1891? I do not think he did visit my office in 1891.
2116. When was this mortgage given to Mrs. Devernet? I think it was in 1890.
2117. Have you not said that since that mortgage was given Hopkins was constantly in your office about that matter? Probably Mr. Bucknell, I think.
2118. In what year was Bucknell last in your office? I think it was about four months ago.
2119. Was Bucknell with Hopkins? No; I mostly think that it was when I was searching that they came in, and asked me about this money. In fact, they were a regular nuisance in inquiring what I was going to do about it.

C. J.  
Campbell.  
31 Oct., 1893.

2120. Do you say they used to come into the Search Room and speak to you there? I think Hopkins was in the Search Room, but if I had to go to the Registrar-General's Department about the certificate of a birth, death, or marriage then he would ask me.
2121. Have you not just said that Bucknell also came into the Search Room, and that he was quite a nuisance while you were searching—did Bucknell so come into the Search Room? He has met me as I was going in perhaps.
2122. It is not quite a question of "perhaps"—what did Bucknell do on these occasions—what is your memory of what he did? He would meet me as I was going into the Search Room.
2123. Have you not just stated that he used to go into the Search Room and see you—in fact, that he was a nuisance—what am I to understand? I think I can say he did go into the Search Room.
2124. On many occasions? He would not have gone right into the room on many occasions, but he has met me often just as I have been going in, or as I have gone into his room he has spoken to me.
2125. Where did he last speak to you—in the Search Room? I cannot say.
2126. Do you say that the last time he was in your office was about four months ago? Yes.
2127. Has Bucknell been in your office many times this year? He may have been there six times.
2128. How many times last year? Perhaps about the same; it is very hard to say how many times he was there.
2129. During this year what was his business at your office? His business was always about this one matter.
2130. Did you discuss with him any other matter? No.
2131. Did he ever speak to you about any landed properties? No; no particular property, I think.
2132. Did he ever speak to you about any property? He would only ask me how I was getting on, or what I was doing in connection with the Gore Estate, or something like that. He might ask me what I was doing in matters I had in hand or about cases that were coming on.
2133. Were these cases to which you refer relative to landed property? Yes.
2134. Do I understand that Bucknell appeared to take an interest in your business? He seemed interested as to what I was doing; perhaps not particularly interested, but he would refer to those matters in a general sort of way.
2135. In connection with these matters was it necessary for you, from time to time, to have searches made in the Search Room of the Deeds Branch in the Registrar-General's Department? I used to search myself; I have since 1891 searched myself. I have never asked any clerk to search in the office, for I did not know any clerk.
2136. Why do you qualify your answer in this manner? I do not remember it.
2137. Could such a thing have happened without your remembering it? I do not think so. Before that time, when I had nothing to do with Mr. Chappel, he used to get these searches made.
2138. Before what year was that? Before 1890, I believe; it was principally in the early part of 1887, 1888, and 1889.
2139. Did Mr. Chappel at any time tell you that he had received assistance or information from any clerk in the Registrar-General's Office? I cannot remember.
2140. Did he ever mention that he had received any information from Hill? I know Hill would help him by just giving him the ordinary information.
2141. Did he give information about property in an improper way? No.
2142. Did Chappel ever tell you he had received information from Hopkins? No, not any improper information.
2143. Any information of any kind from Hopkins? I do not think so.
2144. Why do you qualify your answer by saying "no improper information"? Well, he might go up to Hopkins, or even to Hill, about searches.
2145. My question to you is, did Chappel ever tell you that he had received information from Hopkins? No, I do not believe he ever did.
2146. Did you ever tell Chappel that you had received information from Hopkins? Yes; I told him.
2147. Was that before or after you met at Mr. Aitken's office? After, a long time.
2148. Did you meet Hopkins before you and Chappel met him at Mr. Aitken's office? I may have just seen him; I cannot say for certain.
2149. Had you had any conversation with Hopkins before you met him at Mr. Aitken's office? I believe I knew Hopkins before I met him there.
2150. Before you met in Mr. Aitken's office did you tell Chappel that you had talked the matter over with Hopkins? I do not think so; I do not think that when I met Hopkins in Aitken's office the first time that Chappel was there.
2151. What was done at the first meeting in Mr. Aitken's office—who were present on that occasion? I believe that it was only myself and Mr. Aitken, and Mr. Hopkins came in.
2152. What was done on that particular occasion? I think Hopkins was asked to communicate with the Osbornes.
2153. What else? Nothing else that I know of; that is all I met him for, I believe.
2154. Did you again meet at Mr. Aitken's office? I cannot say; I think we may have had to make some agreement. I think Mr. Aitken ran out some agreement, but that must have been afterwards. I do not remember Hopkins in the matter.
2155. Will you come round here and examine this page of your ledger? [*Ledger produced and examined by witness.*]
2156. Is this entry in your handwriting? [*Entry examined*] No.
2157. Whose handwriting is it? I think it may be that of the auditors of accounts made in 1890.
2158. Whose writing is this [*Pointing to an entry in the ledger*]? It is mine.
2159. Will you please read that entry? Yes—"Hill, search, £1," or rather "April 6th, 1889, Hill, search, £1."
2160. What Hill does that refer to? I cannot say, unless it is an account of Surry Hills land. I think, very likely, I may have given that amount to Mr. Chappel.
2161. Have you not written down here, "Hill, search, £1," and you say you very likely gave that to Chappel? Yes.
2162. For what purpose? It may have been for Hill.
2163. Is that Hill the book-porter in the Registrar-General's Department? I cannot say.

C. J.  
Campbell.

31 Oct., 1893.

2164. Do you know any other Hill? I do not think I know any other Hill.
2165. In your own handwriting does there appear this disbursement: "Hill, search, £1"? Yes.
2166. Did you ever pay that money to Hill yourself? I do not think so.
2167. Can you swear you did not? I do not believe I did.
2168. Do you wish to make any explanation with regard to this answer? All I can say is, Chappel would come to me and say, "I want so much for a search." I would give the amount named to him as I agreed to find the money at that time. I may have entered it in the book in the way in which it appears, but why I did so I cannot say, as it looks as if Hill had got the money.
2169. On the face of the entry does it not look as if the money had been paid to Hill? Yes; but at the same time I do not think I ever paid that sum to Hill. It is so hard to remember, as the transaction took place such a long time back.
2170. Do you see this entry in the ledger under date August 22nd, 1889? Yes.
2171. Is that in your handwriting? Yes.
2172. Will you read it, please? Yes; "Hopkins, promissory note, £50."
2173. Will you please read this entry under June 15th, 1889? Yes; "Battersea, for registering Hopkins' agreement, £3 2s. 6d."
2174. In this ledger have you a heading "Hopkins" showing the money paid to Hopkins? No.
2175. Is there any such heading? No; I think the account would come under the heading of "Battersea."
2176. Is there such a heading as "Battersea"? [After examining the ledger] No; not in that book.
2177. Have you a ledger other than this? Yes; there was another ledger besides that.
2178. When was your other ledger commenced? About the same time as the one under examination.
2179. Why do you keep two ledgers? Because there were some matters which I was carrying on by myself.
2180. But were you carrying on the Battersea affair by yourself? Yes; I think I was.
2181. Do you mean to say that Chappel had nothing whatever to do with the Battersea Estate? Chappel was to get an interest, but I was to find the money.
2182. Was not his interest to be equal with yours in that estate? Well, he was given it, but I think at first he was not really interested in it. It was to be in with others, and he was to get his share afterwards.
2183. Again, I ask you if you can explain this entry in your ledger: "Hill, search, £1"? The only way I can explain it is that perhaps Hill has engaged Nightingale or Doyle to make the search, and that I have given the money to Chappel and afterwards entered it to Hill.
2184. What had Hill to do with any matter in which you got either Nightingale or Doyle to search? It may have happened in this way, Nightingale or Doyle would go into the Search Room and ask for necessary books, and they would get them in the ordinary way through Hill.
2185. Is this the explanation you wish to give me now concerning this transaction? Yes; that is the only way I can explain it.
2186. What book do you call this [Small entry book produced]? I used to keep my accounts in that book perhaps before we opened a larger ledger, and, I think, the accounts mentioned here are carried on into the larger ledger.
2187. Are there entries in this book under the heading, "Bucknell"? Yes.
2188. Are there other entries [pointed out to witness]—In whose handwriting are these? That is the handwriting of the Auditor.
2189. Did you at any time lend Bucknell any money? No.
2190. Did you ever lend him £245? No; I think that item has reference to a promissory note of Hopkins'.
2191. On account of that loan did you ever pay Bucknell £50? No.
2192. Is there another sum of £50 mentioned in this book? Yes; I believe that refers to Hopkins' bill as Bucknell got the loan from Mrs. Devernet.
2193. When was this other small book kept [book produced]? That would be before the one you were just looking at.
2194. Were both kept before you got the large ledger? I believe so.
2195. How is it, then, that in the large ledger the entry is under date December, 1888, and in this small book the whole of the entries are for the year 1889? Because I think I found the money for Battersea, and, I think, you will find that this amount was carried forward to my account in the large ledger.
2196. Where would this item [the Commissioner pointing to an entry in the small book] be carried on in the ledger? [Witness pointed to an entry in the ledger and said], "I think this will agree with the entry in the small book."
2197. Is that your explanation? Yes.
2198. Are there a number of entries here showing money to have been paid to Hopkins? Yes; but they all refer to one matter.
2199. There is an entry here of money paid to Bucknell, the amount being £4, what does that mean? That would be interest in the same matter, as far as I know. It should have been entered to Hopkins by right; Bucknell may have received it.
2200. Are all these your entries on this page [a page in the same book]? Yes.
2201. Have you any separate heading in this book showing what you have paid to different persons for searching? No; fees paid for searching would be entered under whatever estate the search applies to. I do not think I ever paid anybody for the searching. Hopkins could not search, neither could Bucknell, so it was of no use asking them to do so.
2202. Do you say that all these entries under the heading of "Bucknell—disbursements," are moneys paid to Bucknell? Yes; for Mrs. Devernet, but for Hopkins really.
2203. How do you explain this entry on the other side, under the heading of "Receipts," "Bucknell, £30."? No answer.
2204. Does not that show that you received £30 from Bucknell? I do not know how that applies; it may have been in helping to take up a promissory note given to Hopkins. We might have been short of money, and Hopkins might have got the £30 from Bucknell. I do not think there is any other explanation.
2205. How do you account for this entry, showing that you received £30 from Bucknell? Because Bucknell might have got it to pay Hopkins. I do not know where that entry came from. It is in other writing. I do not believe I ever gave him anything at all.

C. J.  
Campbell.  
31 Oct., 1893.

2206. It is not the question of your giving him anything—the question is, why did you receive this £30 from Bucknell? I did not receive any £30 from him.
2207. Can you tell me where the information leading to this entry showing the receipt of £30 from Bucknell was obtained from? It would be from this small book [*the smaller ledger already produced and examined.*] There are cross-entries, and, perhaps, it was found that I have charged certain amounts where I also should be credited with them.
2208. In what part of this ledger could the information referring to the £30 received from Bucknell be obtained. [*Witness, after examining ledger.*] Reading from this ledger I see, “December the 6th, 1889, on folio 66 of the ledger, ‘Refund for land, Bucknell, banks and valuation.’”
2209. What does that mean? That refers to money I have paid in different matters, and the refund must have been in repayment for matters to which I have previously referred.
2210. How does Bucknell come into that? Bucknell must have received some of it. It could only have been in reference to this matter of Hopkins’. There was nothing else Bucknell ever had anything to do with. I am quite sure I never paid Bucknell anything.
2211. Can you explain this entry under heading “On account of Nicholls’ Estate, January, 1889—S. HILL, search on account, £25,”—what does that mean? A search in regard to Surry Hills property in the estate of one Nicholls. Mr. Nightingale made that search, and received the amount of money mentioned.
2212. What is this entry [*pointing to the same book*] in the same estate, “October 13th—S. HILL, £1 0s. 6d”? That was a search in connection with Surry Hills property.
2213. In this bill-book before me there are entries relative to bills payable. There is one entry of a promissory note for £40 payable to Hopkins, can you explain what that means? I cannot.
2214. Have you any idea what that promissory note for £40, given to Hopkins, is for? No; unless it is in connection with the Battersea Estate.
2215. The seventh entry in this bill-book shows a promissory note granted to Hopkins for £50—do you know what that is for? No; unless it is for the same thing.
2216. The eleventh entry in this bill-book shows another promissory note payable to Hopkins for £60; can you explain that? No; I cannot. That is Chappel’s book, but I do not know the full meaning of its contents.
2217. Did Chappel manage all the financial part of the business? There must have been a bill become due which we could not meet, and, perhaps, Hopkins would discount Chappel’s bill.
2218. Does not this book show that these promissory notes were given by the firm, you and Chappel, to Hopkins? It could not have been on my account.
2219. Is there not a further entry—the twenty-second—which shows that a promissory note for £400 was given to Hopkins? It looks like it; I cannot say anything about that.
2220. Does not the entry on its face show that a promissory note for £400 was given to Hopkins? I do not remember; it would seem that Hopkins was given a bill for £400.
2221. What does the twenty-fourth entry in this book show? It seems to show that a promissory note for £60 was given to Hopkins.
2222. What does the twenty-sixth entry show? That a promissory note for £50 was given to Hopkins; I do not know what that £400 could be for.
2223. Is this the bill-book of the firm? It is Mr. Chappel’s private bill-book: I have never seen it, that is, I have only seen the cover of it.
2224. Is this memorandum posted in the beginning of the book in your handwriting? Yes.
2225. What does it show? “Promissory note, Hopkins, due on June the 23rd, 1888, for £150.” I think that would be the amount Hopkins received over the Osborne affair. I believe it was £150, and I think that was paid.
2226. Who wrote this entry—“Promissory note to Hopkins, due January 28th, 1889, £60”? We may not have had sufficient to meet the £150, and we have given him a bill for £60; he taking the rest in cash.
2227. Do you mean to say that when the sum of £150 became due you could not meet the whole of it—you paid £90 and renewed the bill for the remaining £60? Yes.
2228. Where did you get the information from which you made this entry—“P.N. due to Hopkins, January 28th, 1889, £60”? I must have got it from the ledger.
2229. Did you not get it from the eleventh entry in this bill-book? No.
2230. Does not this eleventh entry show that on 25th October, 1888, a promissory note for £60 with a currency of three months was given to Hopkins? Yes.
2231. Does it not show that the same promissory note would be due on 28th January, 1889? Yes.
2232. Seeing that entry now, do you still say you have never seen this bill-book before? No; I have never seen this book.
2233. Can you explain the fiftieth entry;—please read it? “W. W. Bucknell, January 7th, due January 31st, £160.” My explanation about that is, that it would refer to money due to Mrs. Devernet by Hopkins in the matter of the Battersea Estate.
2234. You say that the promissory note for £160 was given to Bucknell on account of Mrs. Devernet—can you explain how you or Chappell came to give W. W. Bucknell the promissory note for this £160? It may have been given to W. W. Bucknell, and he has, perhaps, given it to Mrs. Devernet in reference to paying Hopkins off. I believe that bill still remains unpaid; that is what they have seen me so often about. That must be the same bill. There is only that one transaction that Bucknell had anything to do with.
2235. Do you see this seventh entry in this bill-book? I do.
2236. What does it show? “No. 7, Hopkins, June 25th, three months, September 28th, £60.”
2237. What does that 7th entry show? It shows that Hopkins had given Chappel a Bill for £60.
2238. Did you give evidence in the case of Campbell, and another, against Broughton, and another? I think I did, in the Equity Court.
2239. Did you there swear that you had an agreement with Hopkins;—in fact, I will read that part of your evidence: “I had an agreement with Hopkins; he told me that there was a certain piece of land without a proper title”;—did you swear that? I do not remember it. If I did, I suppose it would be the same land; I suppose it would be the Battersea Estate.
2240. Can you say whether you did give that evidence or not? I do not remember.

2241. Do you remember saying this: "I promised Hopkins one-third of the interest; I gave him £500"? I think very likely I did.
2242. In what year was that evidence given? It would be in 1889, I think.
2243. What agreement do you there refer to? It must have been the agreement of Sir William Manning.
2244. You say that you entered into an agreement with Hopkins, and I ask you what agreement was that? That would be an agreement to give him £500 out of Sir William Manning's matter.
2245. Who drew out that agreement? I do not know; in fact, I do not remember signing that agreement, but I suppose I did sign it.
2246. Do you remember entering into an agreement, dated 1st of June, 1888, between Herbert Chappel, Charles Jackson Campbell, and Edmund Conroy Hopkins? I do not think it was as early as that; I know I made an agreement with Hopkins.
2247. Have you any doubt that this is a copy of the agreement [*handing document to witness*]; I may tell you that came from the Registry Office? I know there was an agreement to give Hopkins a one-third interest.
2248. Have you any doubt that the document you hold in your hand is a copy of that agreement? No; I suppose this is a copy.
2249. How came this agreement to be drawn up? I think that Hopkins mentioned this matter to me. I agreed to give him one-third interest, and then, I suppose, he drew up this agreement.
2250. Did you at that time know where the property was? I would have known it was the Battersea Estate, I think.
2251. Did you know when this agreement was drawn up where the property was? I must have known, because I must have seen Sir William Manning before that.
2252. Who drew up this agreement? I do not know who drew it up.
2253. Do you not know that it was drawn up by a law stationer named Nightingale? No; I do not. I know Nightingale made a search.
2254. Did you instruct Nightingale to draw up this agreement? I do not think so.
2255. After it was drawn up did you sign it? I think I must have signed it.
2256. Were you present when it was signed by Hopkins? I cannot say.
2257. Assuming Nightingale did draw up that agreement, who instructed him to do so? I cannot say; I am sure I would not have done so.
2258. Can you explain why this clause is in the agreement: "The said E. C. Hopkins to act in conjunction with the said H. Chappel and C. J. Campbell, in disclosing and causing diligent inquiries and searches to be made as to what property passed to the said Sir William Manning, &c."? [*No answer.*]
2259. I ask you, again, can you explain why those words were inserted in that agreement? No; only, I suppose, some consideration had to be shown; I do not know why the words were put in, because Hopkins was never expected to search, for at that time Nightingale must have had the search in hand.
2260. Is this, then, your answer: "Because some consideration had to be shown"? Yes; that is the only reason.
2261. Did Hopkins, as a matter of fact, give you any information after this agreement was drawn up? No information at all; he has never given me any information in that way.
2262. Have you ever received any information from any clerk in the Registrar-General's Department? No; I have not, except that which I have already referred to.

[The witness withdrew.]

Andrew Walter Irby Macansh sworn and examined:—

2263. *Commissioner.*] What are you, Mr. Macansh? I am a solicitor of the Supreme Court, practising in Sydney. I am member of the firm of Fisher, Ralfe, and Macansh, whose office is at the corner of King and George Streets.
2264. How long have you been admitted? Five years.
2265. With whom did you serve your articles? With Herbert Salway.
2266. How many years experience in the legal profession have you had altogether? About ten.
2267. During that time have your duties frequently taken you to the Search Room of the Deeds Branch in the Registrar-General's Department? Very seldom to the Registrar-General's Office at all.
2268. Do you know any of the clerks in the Registrar-General's Department? I know some of them—some by sight and some by name. I know them from having been to that Department soon after I was articled.
2269. Do you know Edmund Conroy Hopkins? No.
2270. Do you know W. W. Bucknell? I know Bucknell by sight.
2271. Have you seen W. W. Bucknell in your office at any time during this year? Yes.
2272. Is he a client of your office? No.
2273. At what time did you see him at your office? Either during the hearing of the case Campbell against the Anglo Australian Investment, Finance, and Land Company (Limited) or shortly before.
2274. Did you hear from Bucknell what his business at your office was? No.
2275. Did you ascertain what his business was? I made inquiries in the office and ascertained the nature of his business.
2276. What did you hear his business to have been? To find out what had become of some certificates of birth, possibly death and marriage, which had been lodged by the firm of Robertson, Fisher, and Ralfe when they were endeavouring to bring the Gore Estate, or a portion of the Gore Estate, under the Real Property Act. These certificates were lodged with the application and other papers at the Registrar-General's Department, and Bucknell told us the certificates were lost from the application.
2277. Was that application to bring a portion of the Gore Estate under the Act successful? Yes; I believe it was.
2278. After the application had been granted, what became of the papers lodged with the application? They would, in the ordinary course, become the property of the Registrar-General.
2279. Did you ascertain why Bucknell required those certificates? No; but my impression is that he told Mr. Fisher that he, Bucknell, would get into trouble over these certificates being lost.

C. J.  
Campbell.  
31 Oct., 1893.

A. W. I.  
Macansh.  
31 Oct., 1893.

- A. W. I. Macansh.  
31 Oct., 1893.
2280. Have you any other information that you think would be of assistance to this Commission? I was told by one of my clients that he had seen clerks from the Registrar-General's Department producing original deeds in Mr. Campbell's office. I reported this to the Registrar-General.
2281. Did you ascertain the names of the clerks said to have been seen in Campbell's office? No; my client did not tell me their names. He told me he knew they were clerks in the Registrar-General's Department, but he did not know their names.
2282. How long ago did you receive this information. Somewhere about two months ago, I think.
2283. In your opinion, is it necessary that persons searching should be allowed to take extracts? Yes.
2284. Can you suggest any alteration in the present mode of procedure? I would suggest that registration copies lodged in the Registrar-General's Department should be kept in some safe place. The original registration copies should be copied, and then put away, and the public, except in very special cases, should only be allowed to inspect the copies of originals.

[The witness withdrew.]

John Urquhart sworn and examined:—

- J. Urquhart.  
31 Oct., 1893.
2285. *Commissioner.* What are you, Mr. Urquhart? I am a solicitor in the Supreme Court of New South Wales. I am in partnership with Mr. H. P. Steel, and we carry on business at 98 Pitt-street.
2286. How long have you been admitted as a solicitor? Eight years.
2287. Where were you before you were admitted? With the firm of Holdsworth and Brown, from 1867; I was articled shortly after that.
2288. Have your duties frequently taken you to the Search Room in the Deeds Branch of the Registrar-General's Department? Very frequently, indeed.
2289. More frequently of late years? No; my visits were more frequent in years gone by, but I go to that Department very often at the present day.
2290. Since March, 1890, have you noticed that any alterations have been made in that room? Yes; there have been alterations made in that room.
2291. For the better? Yes; certainly for the better.
2292. Are the registers and indices now conveniently placed? The indices are conveniently placed for the use of persons searching.
2293. In your opinion is the supervision over the persons searching sufficient? Certainly not; and it never has been.
2294. Is it better now than it used to be before March, 1890? I really do not know that it is any better. I do not think there is any improvement in the supervision. The supervision at all times has been merely nominal.
2295. Can you suggest any alteration that might be made in that respect? Yes; I certainly think that when the actual registration copies are required for inspection that they should be handed to the searchers by a clerk or an official of the department, as in the Land Titles Branch; and further, that these books should only be inspected at the counter under the supervision of officials.
2296. In your opinion, should the inspection of registration copies be under the direct supervision of an official of the department? Certainly.
2297. To enable searches so to be conducted, would the arrangement have to be altered? Certainly, sir. It is almost impossible, unless there are a greater number of attendants walking about the room, to exercise complete supervision over that room as it is at present arranged.
2298. In your opinion, is it necessary that persons searching should be allowed to take extracts? It is absolutely necessary.
2299. Is it sufficient that these extracts should be taken in pencil? Quite sufficient; in fact, I do not think that pen and ink should be allowed in a room where either indices or deeds or registers are kept. It is quite easy to make alterations either in registers or indices owing to the laxness of the supervision. The wonder is that there have not been alterations made.
2300. In your opinion is the check by ticket sufficient? No; it is not sufficient, because a person going in to make one search could make a dozen searches on the one ticket.
2301. How could you prevent a searcher from so acting? I do not know any way at all. I cannot suggest any remedy for it, excepting by making a charge per hour or per day for the work to be performed.
2302. In your opinion, might additional searches be prevented if the supervision was sufficient? Certainly not. If an official was standing over you while a search is being made he could not detect what you are actually searching against.
2303. Have you any suggestion to make which would be of assistance to this Commission? I would like to say it would be of great benefit to the public and to the legal profession if the Government would make the searches in the Deeds Branch the same as they are now made in the Land Titles Branch.
2304. In your opinion, should there be official searchers? Yes.
2305. And should the solicitor ordering the search be relieved from responsibility? Yes.
2306. Should the responsibility which now attaches to the solicitor fall upon the Government? Yes; I think it would be a safeguard to the client.
2307. Would one of the objections to an official search be that every solicitor would have to accept the correctness and result of the search? Yes.
2308. By official searching do you think expense would be saved to the public? Yes; I think so.

[The witness withdrew.]

Robert Roberts sworn and examined:—

- R. Roberts  
31 Oct., 1893.
2309. *Commissioner.* Were you a book-binder in the Registrar-General's Department for some years? I was, for about twenty-two years. I entered the department as a temporary hand in 1867.
2310. Were you working there on piece-work? I was paid by results.
2311. How came you to sever your connection with the department? I was suspended by the then Registrar-General, Mr. Ward.

2312. On what account? He said that it was not he who was doing it, but Mr. Lockyer, an inspector in the Treasury, who said I would have to leave the office at once, and come back when sent for. R. Roberts.
2313. Had anything happened in the Registrar-General's Office immediately preceding this? Yes. 31 Oct., 1893.
2314. What happened? There were some irregularities discovered in reference to the office fees.
2315. Was that matter inquired into before any Court? I believe the parties connected with it were put upon their trial.
2316. Who were they? Hiddlestone and Raper.
2317. Have you worked for the department since then? I have not.
2318. Was there any investigation into your conduct? None.
2319. Have you ever ascertained for what reason you were suspended? No.
2320. Was any charge ever brought against you? None.
2321. In what year were you suspended? In 1889.
2322. While you were working for the department, which part of the building did you occupy? I used to work in different parts, but mostly in the basement.
2323. In the same place that the present book-binder works? Yes; I believe so.
2324. What hours used you to work? As near as I can remember, it was about six hours per day.
2325. Did you ever work overtime? No; the office was always open till 6 o'clock, and I worked until 6 o'clock.
2326. Was the office closed to the public at 4 o'clock? Yes.
2327. After 4 o'clock did all the clerks leave the premises? No.
2328. Have you seen many clerks working after the office has been closed to the public? Yes.
2329. In what room? Sometimes in the strong-room, where the deeds were kept. I have seen people working there later than 4 o'clock, after the room was closed to the public, up to 6 o'clock.
2330. While you were employed as book-binder at the Registrar-General's Department, did you on any occasion offer any information that you had gained in the office to any member of the outside public? No.
2331. Did any member of the outside public at any time approach you for any such information? No.
2332. In what state were the old Grant Registers? I bound them up; they are now in a very good state.
2333. There is one they call "Number 1 Register,"—perhaps you know it as "Big Ben"—in what condition was that? It was in a very dilapidated state.
2334. Can you speak as to the condition of any of the other registers? No; I cannot.
2335. In what state were the indices? They were all to pieces.
2336. Of what indices are you speaking when you say "all to pieces"? The indices of the Grants, one, two, and three; the very early ones.
2337. Did you ever re-bind any of these? Yes.
2338. How many volumes? I bound all the old indices.
2339. Has it come to your knowledge that any of the clerks at any time have removed documents from the office? Yes; it came to me from Lilley, the messenger in the Real Property Office. He said that they (the clerks) would get into trouble for taking documents home to copy.
2340. Were the names of the clerks who were taking these documents home mentioned? No.
2341. Did your duty from time to time take you into the Search Room of the Deeds Branch? Yes.
2242. For what purpose? At times to get the rolls of parchment out of the racks to take them down below to bind them, and at times to put gold-labels on the new index books.
2343. On any of these occasions have you seen the room altogether unoccupied? Not on any occasion during the morning or afternoon, as may be, but at dinner time, between one and two, I have seen the place without any person in it.
2344. Without any person being in charge? I have.
2345. In what year was that? When I left there the Search Room was by itself, and there was no officers working in the Search Room then.
2346. Can you say whether at any time any deed has been abstracted from the Search Room? Yes.
2347. How long ago was that? That was some short time before I left.
2348. What do you know about that matter? Some person was arrested at Newcastle, locked up, and the police authorities found this document in his possession.
2349. What was done in connection with that document? It was sent back and brought before the Registrar-General.
2350. Was that matter brought before Mr. Ward? Yes.
2351. What was that document? It related to a conveyance, and the registered deed was cut out of one of the books.
2352. Did you, as book-binder, replace that deed? I am not certain about that; it is more than probable that I did so.
2353. Do you remember seeing that deed after it was removed? No; I saw the circumstances mentioned in the newspapers first of all, and I know the deed was never missed until it was found on the person at Newcastle.
2354. Do you know Hopkins, a clerk in the Registrar-General's Department? Yes; well your Honor.
2355. Have you ever had any conversation with him about land transactions? Yes, your Honor.
2356. On many occasions? Yes.
2357. Can you remember any one property in particular? Yes; in reference to some land at Bankstown.
2358. What did Hopkins tell you about that? I had a deed placed in my possession by one, Mr. Tremaine, who lived next to me in Pitt-street. Tremaine asked me if the deed was any good. It was a deed in reference to a party named Thurlow. I showed that deed to Hopkins, who said he knew Mrs. Thurlow, and he would show the deed to her. He did so, and made arrangements with Mrs. Thurlow, and Mrs. Thurlow's son, by which he was to receive a certain interest.
2359. What was Hopkins to get? I forget how much Hopkins was to get, but he was to have some remuneration for carrying the matter through. An application was lodged to bring the property in question under the Real Property Act, but a caveat was lodged against this application.
2360. What did Hopkins do next? As soon as inquiries were made in reference to the title, Hopkins withdrew.
2261. Did you continue in the matter? Yes.
2362. What eventually resulted? The case came into Court, and a settlement was arrived at. It went into

- R. Roberts. into the Equity Court, and the matter was referred to the Master in Equity. The Master in Equity ruled that the money I had paid in connection with this transaction must be refunded. I got back £1,250, the other parties paid the costs, and that was the end of the matter.
- 31 Oct., 1893. 2363. Is that the only matter in which you have been mixed up with Hopkins? Yes.
2364. In what year was that? In the commencement of the year 1886, and all my trouble came from that transaction.

[The witness withdrew.]

Henry Massey Makinson sworn and examined:—

- H. M. Makinson. 2364½. *Commissioner.*] Are you senior partner in the firm of Ellis, Makinson, and Plunkett, solicitors, of Sydney? Yes.
- 31 Oct., 1893. 2365. Have you had much experience in the Search Room of the Deeds Branch in the Registrar-General's Department? Yes.
2366. For many years? Yes; since I was first articled to Mr. Ellis, my late partner. This would cover a period of thirty-five years.
2367. During late years have you been many times in that room? Of late years I have not been in the habit of searching myself. I have sent people to search generally, but I have been there myself occasionally.
2368. Have you noticed any alteration in the Search Room of the Deeds Branch since Mr. Pinhey has been appointed Registrar-General—I mean alterations in the arrangement of the presses or otherwise? I cannot speak as to the date on which Mr. Pinhey was appointed Registrar-General, but I have noticed that the books of copies have accumulated. There are more of them now than there used to be, and the books are in racks all over the room, and in the room there are now a number of narrow alleys.
2369. In your opinion is the supervision of persons searching sufficient? I understand there is only one person in charge of that room. I have only gone there recently for the purpose of verifying searches or to look at some document of special importance. I have merely stayed there a few minutes—long enough to enable me to conduct whatever business I may have had in hand.
2370. When you have been there have you noticed whether the supervision over persons searching has been sufficient? I have seen a number of persons there searching together. The room is very large, there is a great number of books, and it is impossible for any one person to see what is going on all over the place at one time.
2371. In your opinion is it necessary that persons searching should be allowed to take extracts from the registers? It is absolutely necessary, for it is impossible for any man to carry away all the necessary information in his head. No man could reliably trust his memory in regard to particulars which he had read while making a search. In my opinion, the present practice is a reasonable one, and to get copies would involve a great amount of expense. If you want a copy of the whole deed you are allowed to take it, but you have to pay for it, or you may take an abstract and pay for it.
2372. What is there to prevent a searcher taking what would amount to an abstract from a deed? Practically there is nothing to prevent an experienced searcher doing this.
2373. Do you know any of the clerks in the Deeds Branch of the Registrar-General's Department? I cannot say I do now.
2374. Do you know any of the clerks in the Branch for the Registration of Births, Deaths, and Marriages? Yes.
2375. What clerks do you know in that branch? I only remember one, and his name is Hopkins, E. C. Hopkins, I believe.
2376. Have you ever had any transactions with E. C. Hopkins? I have been approached by Hopkins on one or two occasions.
2377. Can you tell me when the first occasion was? Speaking from memory I should say it was about seven or eight years ago, when Hopkins came to me and told me that he knew of a valuable property belonging to a client of mine, who was ignorant of the fact that he had any title to the property.
2378. Anything further? Hopkins asked us a question to the effect that were he successful in giving information regarding a title to this property, whether we would undertake to give him a half or a third of the value of the property in question.
2379. Was there any name mentioned? Yes; the property was supposed to belong to a man named Jenkins.
2380. Where is this land situated? The land was at Liberty Plains, somewhere by Bankstown, but in the parish of Liberty Plains.
2381. What was the upshot of this approach by Hopkins to you? Hopkins wanted an agreement made in the terms I have mentioned, as far as I can remember. I think I said to him, as I have said to others who have come to me on similar errands, that they would be rewarded if the information given turned out to be useful. At any rate we had possession of the information, and I found out that my client was not entitled to the property at all, but that his father or grandfather, some sixty years previously, had sold the land in question. The conveyance of this land, however, had not been registered, so that to any person searching it would appear that the land still belonged to the original grantee, or to his heirs.
2382. Did you ascertain from Hopkins where he had obtained his information? I think he told me he had ascertained it from a search.
2383. Do you mean from a search in the Deeds Branch of the Registrar-General's Department? That was the only place where he could obtain information by a search. Of course, it is perfectly obvious that a searcher failing to find a registered title would come to the conclusion that the land still belonged to the original grantee, or his heirs. As a matter of fact, in this particular case, I knew that the land in question belonged to another client of mine at the time I was approached.
2384. On any other occasion were you approached by Hopkins? I think I was approached by him once or twice besides the occasion to which I have referred, but I did not pay much attention to his overtures as there was really nothing in them.
2385. Would these other occasions be other than the one which you have just mentioned? Yes; I think so.
2386. Can you remember about when the last occasion was? I cannot, for I have been approached by others besides Hopkins. I have grown into the habit of disregarding these approaches, for, as a rule, there is nothing

nothing in them. I think Hopkins did come to me about land belonging to somebody else. I think he came to our office about a property which formed part of the estate of Mr. W. E. Plunkett, the father of Mr. W. E. Plunkett, a member of my firm. When he came and mentioned this matter to me I knew that Mr. Plunkett had already brought the property in question under the "Real Property Act."

H. M.  
Makinson.  
31 Oct., 1893.

2387. Did any other clerk in the Registrar-General's Department ever approach you in a similar manner? I do not think so.

2388. Did any other person belonging to any firm ever approach you with information? Yes; there was a Mr. Campbell.

2389. Was that Charles Jackson Campbell? I forget his initials, but I know he is the Campbell who has been so notorious of late.

2390. Was he the plaintiff in that case Campbell against the Anglo-Australian Investment Finance and Land Company (Limited)? Yes.

2391. When did he approach you? He has been to me on several occasions concerning which I have no distinct recollection. I have a distinct recollection of two occasions, and I feel quite sure that there were more.

2392. About what time was the first of these two occasions? The one I remember best would be the latter of the two, and that must have been within the last year or two. My firm are the solicitors for the Marist Brothers at Villa Maria, at Hunter's Hill. Campbell came to me, and I believe, he asked if I was a solicitor for the Marist Brothers. I must have told him I was.

2393. What followed? Campbell said he had become aware that a certain property belonging to them somewhere in the vicinity of Hunter's Hill existed, but that the Marist Brothers knew nothing of the whereabouts of the deeds.

2394. Where did Campbell allege that this land was situated? I think he said it was situated at Hunter's Hill. Before coming to me he had been to the Marist Brothers, and they had referred him to me. I think he told me that he had proposed to them that if he put them on the track of this property and they obtained legal possession of it he should get one half of the value. They declined to have any business with him and referred him to me. I told him I could not advise him to make any agreement with a client of mine, but if he gave information which turned out to be of value he should be liberally remunerated, but I would not enter into any written agreement with him. I also added that the amount of his remuneration for any information he might supply would be left to my discretion. Not long after this I came to the conclusion that there was no property at Hunter's Hill belonging to the Marist Brothers of which I was not aware. Campbell then pressed me very hard, but naturally with the information in my possession I refused to agree to his terms. After having been refused on several occasions Campbell left off calling at my office.

2395. Did you ascertain from Campbell where he obtained his information? I certainly understood, and I have no doubt that he obtained it by searching in the Deeds Branch of the Registrar-General's Department. He must have got on the track there and then followed down the clue.

2396. Would he obtain this information, do you think, by a personal search or from any clerk in the department? That I cannot say. I have a strong impression, and it is pretty notorious that Campbell and Hopkins were connected in these searches. I cannot, however, give any direct evidence on this point.

2397. Did Campbell approach you on any other occasion? There was another occasion on which I was approached, but I cannot say whether it was by Campbell or by Hopkins, but I always regarded them as one and the same person.

2398. In what year was that? It was before the case I last mentioned. It might have been two or three years before. One of the two, and I believe it was Hopkins, came to me and said he understood that we were solicitors for the Holy Sisters of the Good Samaritans. He told me he could put me on the track of property belonging to the Sisters that they did not know of; he wanted the usual terms, either one-third or one-half of the value. That information also must have been obtained from the registers, because these Sisters appeared to be the owners of the land.

2399. Where is that property situated? At Dog-trap Road, Granville. From the entry in the register, it might appear that the Sisters of this religious order might have lost sight of this particular piece of land, but it was not so; for as a matter of fact, the land had been sold to two or three people, but the conveyance of sale had not been registered, because the land was being paid for on the time-payment system.

2400. Are you uncertain whether you on this occasion were approached by Hopkins or Campbell? I am sure it was one of the two, and I regard them as running in couples.

2401. Did you accept their terms? No; I found out from something that was dropped that the property had been sold and paid for.

2402. Have you been approached by any other persons in a similar manner? I have been approached by one or two others, but I can neither recollect their names nor the circumstances. I have been approached by people, but their conversation showed me that there was nothing in it; so I merely whistled the matter down the wind.

2403. Can you suggest any improvement in the mode of conducting searches in the Deeds Room of the Registrar-General's Department? I think searchers should not be allowed to manipulate those books as they do now without being observed; there is only one man in the Search Room.

2404. In other words, you say the supervision should be better than it is, in what manner could it be improved? The books should not be so crowded, and there should be more attendants, for one person cannot view all the persons searching at one time. I think the searchers should be in one open room, and in view of each other, and in view of special officials.

2405. With the space at command, can you suggest any improvement? They should have more officials to keep watch, and I think it would be better if they had a room much less encumbered with books.

2406. Are you familiar with the mode of searching in the Land Titles office? I am not very familiar with it; the clerks generally do the searching there.

2407. Are you aware that in that room the public do not have access to the registers? Yes; I know that the books required are produced at the counter, and the searcher examines them at that counter.

2408. In your opinion could the practice in vogue in the Land Titles Office be introduced in the Search Room of the Deeds Branch? No; unless you are prepared to have a man or an official standing over you

H. M.  
Makinson.  
31 Oct., 1893.

all the time. Another thing suggests itself to me in connection with the searching. It is this,—If an official is so disposed to give information to enable the levying of blackmail there is very little to prevent him doing so. Searches are usually made by clerks. If a solicitor desires to see something of importance he goes to the Deeds Branch and looks it up himself. Say for illustration that the attendant in the Deeds Branch is disposed to dishonestly give information—he would see a solicitor making any special search, looking particularly at some document, and there is nothing to prevent the attendant going and reading the same entry himself, thus becoming aware of the particular business in hand. Such latitude is dangerous with men like Campbell and Hopkins, whom you may be sure have a considerable knowledge of the solicitors in Sydney, and land transactions in which they may be concerned.

2409. What would you suggest? That people making a search, and that the official producing the books should not be allowed to speak to others concerning the searches made, if that be possible. Every solicitor in Sydney who has any large experience of conveyancing knows of faults in titles; I do myself, but I hold my tongue in these matters and I think it would be well if other people remained silent about defects in titles.

2410. In your practice do you necessarily obtain knowledge concerning the titles of persons who are not your clients? Just so; sometimes I find out defects, sometimes I find out that a person in possession is not or may not be the rightful owner.

2411. Do you say that knowledge such as this in the hands of people like Campbell causes a good deal of mischief, expense, trouble, and long course of litigation? Yes.

2412. Can you suggest any way of overcoming this difficulty? One way would be as far as possible to prevent clerks or officials helping in the search, talking about the search that is being made.

2413. On each occasion that you have been approached did it appear to you that the information under offer had been obtained by an examination of the indices or registers or both? Evidently it had.

2414. Not from noticing any particular deed that you or any of your clerks had been examining? I do not think so in the cases that came under my notice. The information must have been obtained by searching and in no other way.

[The witness withdrew.]

John Archibald Aitken sworn and examined:—

J. A. Aitken.  
31 Oct., 1893.

2415. *Commissioner.*] What are you, Mr. Aitken? I am a solicitor of the Supreme Court, practising in Sydney and I am in partnership with my brother, our office being 44, Castlereagh-street.

2416. How long have you been a solicitor? Thirteen years last month.

2417. Before that, how many years were you a clerk? Seven years before I was a solicitor.

2418. During the time you have belonged to the legal profession have your duties taken you to the Search Room in the Deeds Branch of the Registrar-General's Department? Nearly the whole of that time. I have been acquainted with the office you name for the last twenty years.

2419. On any occasion have you been unable to find a register that you required to examine? I cannot say that I have; there may have been occasions when the register I required was not in the room. It would be in another part of the building, and I would go to that part of the building to see it.

2420. Have you ever discovered or been told that a register was missing? Never to my knowledge.

2421. In your opinion is it necessary that persons searching should be allowed to take extracts? Certainly; I mean short extracts.

2422. Is it sufficient that these extracts be taken in pencil? Yes.

2423. Have you visited the Search Room frequently during the last two or three years? Yes.

2424. Have you noticed any difference in the disposition of the presses and registers? I cannot say that I have.

2425. In your opinion could the presses and registers be more conveniently placed than they are now in that room? With the space at command I do not think they could.

2426. In your opinion is the supervision of the persons searching sufficient? On some days I should say it was not.

2427. Does the number of persons searching vary much? It does.

2428. Can you give me any idea of the greatest number you have seen searching at one time? I have never counted them, but on many occasions I have seen fully thirty people searching.

2429. Are these occasions on which you consider the supervision is not sufficient? Yes; on these occasions you often have to take a book down and put it up yourself, for there is no attendant to wait upon you.

2430. Do you know a clerk in the branch for the registration of births, deaths, and marriages in the Registrar-General's Department named Edmund Conroy Hopkins? I have known him the whole time he has been in the Registrar-General's Department.

2431. Do you know Herbert Chappel and Charles Jackson Campbell? Yes; I have been acquainted with Charles Jackson Campbell for nearly twenty-five years. I met Chappel in the year 1887 through Mr. Campbell.

2432. How did you first meet Campbell? As solicitor for the family. I acted professionally for his father first, Mr. W. B. Campbell, of Blacktown.

2433. Afterwards did you act as solicitor for C. J. Campbell? Yes.

2434. When did you first meet Chappel? It was, I think, in June, 1887, that I first became acquainted with Chappel, having been introduced to him by C. J. Campbell.

2435. At that time did Campbell and Chappel enter into a partnership? It might be termed a partnership. They came to me and got an agreement prepared so that they could mutually benefit in certain transactions they intended to carry out.

2436. Were any landed properties mentioned in that agreement? In a general way.

2437. After entering into that agreement did they carry on business as Campbell and Chappel? Yes; at that time Campbell was in business in a furniture warehouse with his brothers.

2438. When did Campbell cease to take any active part in that furniture business? I cannot definitely state. The Campbell brothers assigned the business to trustees; this must have been done as near as I can remember about three years ago.

2439. From the time the agreement was entered into between Campbell and Chappel, did they under that name act as land and estate agents? Yes, your Honor.

2440.

2440. Where was their office? It was in the Sydney Arcade.
2441. When did you first meet Hopkins in connection with either Chappel or Campbell? In June, 1887.
2442. Where? I went to see him at the Registrar-General's Department.
2443. On what business? Campbell and Chappel spoke to me about a family named Osborne who were interested in certain properties they got from the old Bank of Australia. They happened to know that Hopkins knew the Osbornes, and believing I knew Hopkins well they requested me to see him with a view of arranging terms with the Osborne family in respect to certain properties with which Campbell and Chappel were prepared to deal.
2444. What was the result of your seeing Hopkins? I asked Hopkins if he would see or communicate with the Osbornes about the matter. He said he would, and he did. The result was the drawing up of an agreement between Campbell and Chappel and the Osbornes, in which Campbell and Chappel were to get one-third of the proceeds from the sale of these properties, and the Osbornes were to retain two-thirds of the proceeds.
2445. What is the date of that agreement? I cannot say; it was settled between Mr. Billyard and myself.
2446. Is this the agreement [*Exhibit "H" produced and handed to witness*]? Oh, yes.
2447. When is it dated? On the 11th of November, 1887. I believe this is the agreement, at any rate this document contains the terms of that agreement.
2448. After seeing Hopkins at the Registrar-General's Office, when did you next see him? Looking at my entries I find I saw Hopkins several times in the months of June, and July, and August, 1887.
2449. Where? Sometimes at the Registrar-General's Office, and sometimes at my own office.
2450. On any occasion that you saw Hopkins at your office, was any other person or persons present? On some occasions, your Honor, either Mr. Campbell or Mr. Chappel would be present, but not on every occasion.
2451. Can you remember the first occasion on which Hopkins met Campbell at your office? I believe the first occasion was on the 22nd of June, 1887.
2452. Who met on that occasion? I believe on looking at my entries Campbell, Chappel, and Hopkins were there together.
2453. Can you say whether that was the first occasion that Hopkins met Campbell or Chappel? As far as I know it was.
2454. Did they appear to meet as strangers, or did they know each other? I think they were strangers. I think they were introduced to Hopkins by me.
2455. What was the nature of your proceedings? We were talking generally about the Osbornes' interests in these properties.
2456. Have you no memory other than what you glean from your notes? Not of that day's proceedings.
2457. Was a certain agreement entered into? Yes.
2458. What share was Hopkins to get? He was to get one-tenth of what Campbell and Chappel received from properties revealed to the Osbornes.
2459. What was Hopkins to get that tenth for? I understood it was for getting the Osbornes to enter into the agreement with Campbell and Chappel.
2460. Was Hopkins to do anything else in return for that tenth interest? No.
2461. Was he to assist Campbell and Chappel in any manner? No; not according to my instructions.
2462. Not as far as you know? No.
2463. After that agreement was entered into what followed so far as you know? Under Chappel and Campbell's instructions I revealed to Mr. Billyard and Mr. Andrews the properties known of by Campbell and Chappel, for the purpose of going on with the investigation and the carrying out of the sale of those properties.
2464. What did that result in? Some of the property was sold.
2465. Can you tell what Hopkins got out of the matter, if anything? No money was paid to Hopkins through me; I cannot say what he actually got. Campbell and Chappel dealt with him themselves.
2466. Have you heard from Campbell, or Chappel, or Hopkins what Hopkins received? Never.
2467. Do you continue to act for Campbell and Chappel? In some matters, but not in all.
2468. Did you know Hopkins, Campbell, and Chappel in any other matter except the Osbornes? That was the only matter I carried out in which Hopkins was connected.
2469. Did you ever receive any information from Hopkins with regard to any other landed property? Never.
2470. Did he ever approach you with any such information? No, your Honor.
2471. Did Hopkins ever offer to get you information? Never to my knowledge.
2472. Did any officer or clerk in the Registrar-General's Department ever approach you with offers to get information? Never.
2473. Do you know W. W. Bucknell? Yes.
2474. Have you ever seen him in any business transaction with Hopkins? No; I never have.
2475. Are you aware that W. W. Bucknell at one time was mixed up with Hopkins in some promissory note matters? No; I cannot state that.
2476. Or either with Chappel or Campbell, or with Campbell and Chappel? No.
2477. Did you ever hear from Chappel or Campbell that they had given a promissory note to Hopkins? Yes.
2478. How did you become aware of that fact? Campbell gave me a promissory note that he had got from Hopkins which was endorsed by Campbell. I cannot state what it was given by Hopkins to Campbell for; it was given to me to discount for Campbell.
2479. In the ordinary way of business? Yes; I think it was on account of costs. It was endorsed by Campbell, but the note was never met.
2480. What was the amount of that note? Some thirty odd pounds.
2481. What became of the note? The note has never been fully met; it was compromised by Hopkins.
2482. Did you hear from Hopkins that there was some note given by Campbell to Campbell and Chappel, against which Hopkins considered he had a contra claim? I think there was something of this kind.
2483. What became of the promissory note for £30? Some little while ago Hopkins met and compromised with different people to whom he owed money.

J. A. Aitken.  
31 Oct., 1893.

- J. A. Aitken. 2484. How long ago is that? Within the last twelve months, I believe. That note is still in my possession.  
 31 Oct., 1893. 2485. Had you anything to do with the Battersea Estate? No; I only knew of it from Campbell and Chappel.  
 2486. Did you act for Campbell or Chappel, or both of them in that matter? No; it was one of the matters I was not concerned in, but of course I knew of it through them.  
 2487. Do you know Hill, the book-porter in the Search Room in the Deeds Branch of the Registrar-General's Department? Yes; I have known him during the whole of his term of office.  
 2488. Has Hill ever come to your office? Never, on any occasion.  
 2489. Has he ever been there to see Campbell or Chappel, on their business? Never.

[The witness withdrew.]

George Colquhoun sworn and examined:—

- G. Colquhoun. 2490. *Commissioner.*] Are you one of the partners in the firm of Messrs. Allen and Allen, solicitors, of this city? I am.  
 31 Oct., 1893. 2491. How long have you been a member of that firm? Seven or eight years.  
 2492. How many years experience have you had in connection with the Search Room in the Deeds Branch of the Registrar-General's Department? Personally, I have little or no experience at all, as instructions are given to and searches made by our search clerk.  
 2493. In your opinion, is it necessary that persons searching should be allowed to take extracts? Undoubtedly; the searches would be valueless without.  
 2494. After extracts are taken, at times is it necessary for the principal to visit the Search Room? Yes; in special cases.  
 2495. When it has been necessary for you to visit the Search Room, in your opinion, was the supervision over the persons searching sufficient? No; I do not think it was, and I accounted for that because there is not a sufficient staff.  
 2496. In what way do you suggest that the supervision might be increased? I think there might be an increase in the staff. I think two persons should be constantly moving about the room to see that the liberty of searching is not interfered with nor abused.  
 2497. In your opinion, should there be two attendants instead of one? Yes; I think so.  
 2498. Are the facilities for searching, in your opinion, sufficient? I have always found them so in anything I have had to do.  
 2499. Have you ever been approached by any clerk in the Registrar-General's Department with an offer of information? Never.

[The witness withdrew.]

WEDNESDAY, 1 NOVEMBER, 1893.

[The Commission met at 10 o'clock.]

Present:—

HIS HONOR JUDGE FITZHARDINGE.

Ambrose Knight Doyle sworn and examined:—

- A. K. Doyle. 2500. *Commissioner.*] What are you? A law stationer I am called, but really I am a search clerk.  
 1 Nov., 1893. 2501. How long have you been a law stationer? About ten years, and for ten years previously I was in the offices of Dawson and Son, and Stephen Campbell Brown as search clerk. I have had about twenty years' experience in searching.  
 2502. During these twenty years have you frequently had to visit the Search Room of the Deeds Branch in the Registrar-General's Department? Almost every day.  
 2503. On any of these occasions have you been unable to find a register? No; never.  
 2504. Have you at any time experienced delay? Only when the register required would be in use either by the examiners or downstairs with the book-binder.  
 2505. Have you had occasion to refer to the books of old copy grants? No.  
 2506. On any occasion when you require information from any such book how do you obtain it? From one of the officers of the department, who allows you to inspect these books.  
 2507. Do you always receive this information from one particular clerk? Not always; for if one is absent I go to the next one. Speaking generally during the last ten years I have received the information from one clerk.  
 2508. What was that clerk's name? Hill; he is the book-porter.  
 2509. As far as you can judge was Hill familiar with these books? He grew to be familiar. The first two or three years he was there he did not know much about the books, but afterwards he seemed to be very well up in them.  
 2510. Do you know a clerk in the Registrar-General's Department named Hopkins? Yes.  
 2511. How long have you known him? I cannot remember the number of years, but as long as I have been going to the office. I should think about twenty years, but I can safely say fifteen years.  
 2512. Have you ever received any information from Hopkins? None whatever, sir.  
 2513. Have you ever received information from any clerk in the Registrar-General's Department? None at all.  
 2514. Have you ever been retained to do work for Hopkins? I have made searches for him several times, years ago.  
 2515. In how many matters have you searched for him? I cannot say, but I should think not more than ten or twelve at the outside.  
 2516. During what years did you do these searches? About three or four years ago.  
 2517. Do you keep books? No, sir.  
 2518. When did you first begin to search for Hopkins? To the best of my recollection it would be five or six years ago.

2519. When did you make your last search for Hopkins? Three years ago.
2520. Since Mr. Pinhey has been appointed Registrar-General? I have not done any searching for Hopkins since 1890.
2521. Can you remember the name of any matters in which you searched for Hopkins? The only one I have a distinct recollection of was that of Dean's, an auctioneer here.
2522. What property did that refer to? It was a search for Dean's title to Birkenhead property.
2523. Have you any idea of what you were paid for that search? I had a partner at that time and he received all the moneys. I had nothing to do with the moneys; but in answer to your question, I think, to the best of my recollection, I received about £8 or £9; it was under £10, I am sure. I received this money not so much for searching as for copying.
2524. Who was your partner at the time you mention? A man named Reed, now of the firm of Reed and Hanigan.
2525. Can you give me the name of any other matter in which you searched for Hopkins? I cannot. The other searches were small affairs, taking about three or four hours. He would give me a piece of paper with just the dealings, and tell me to trace it up to date.
2526. Explain more fully what you mean by that answer? I would receive instructions from the date of conveyance, and, as an illustration, I will suppose it was "dated 1842, from Williams to Brown, 30 acres, county Northumberland, trace this dealing up to date." On occasions he might, perhaps, say, "Find out the present owner."
2527. On any occasion did Hopkins tell you for what purposes he wished the search made? No; except in Dean's matter.
2528. Did he in any matter other than that of Dean's matter tell you he was interested in the result of the search? Not to my knowledge.
2529. Do you know if Hopkins took any steps in any of these matters other than Dean's after the result of your search was handed to him? No, sir.
2530. Have you searched for any other clerk in the Registrar-General's Department? I may have made a solitary search here and there. For the moment I do not remember.
2531. Have you searched for any other clerk in the same manner in which you searched for Hopkins? Now that I come to recollect, I have. I fancy I did make one search, or it may have been searches, in one or two cases.
2532. For what clerk? For Mr. Bucknell.
2533. Can you remember concerning what properties? No.
2534. Can you remember in what year you made the searches? To the best of my recollection, it must have been about three years ago.
2535. What instructions did you get from Bucknell before you made these searches? To search out a piece of land on the same principle as I had received instructions from Hopkins.
2536. In the same way as you received instructions from Hopkins? Yes; just a few written instructions.
2537. Were these long searches? I do not think they were; perhaps of about seven or eight hours at the longest.
2538. Can you remember how many searches you made for Bucknell? About two or three, not more.
2539. Were these all made about the same time? Perhaps six months might elapse, and it might be longer.
2540. Have you made any search for Bucknell since 1890? No, sir.
2541. Have you made any search for any other clerk in the Registrar-General's Department? No; I do not think I have. I have no recollection of making any search since 1890, except officially.
2542. Explain what you mean by "Except officially"? Where I have been instructed by Mr. Abbott to make searches for one of the public who required information from the Search Room.
2543. How would these instructions be given to you? By Mr. Abbott handing me a letter which he had officially received from some person in the country requiring certain information.
2544. After receiving such a letter from Mr. Abbott, would you communicate with the writer of the letter before making your search? Yes, sir.
2545. For what purpose? To obtain my fees, and for further information.
2546. Have you been retained by any other clerk in that department to make a search or searches? No; not to my knowledge.
2547. On any occasion when you have received instructions from Hopkins was Bucknell present? No; I do not think so.
2548. On any occasion when you have received instructions from Bucknell was Hopkins present? He would be in the same room, but I do not think he would be standing alongside, so that he would not be actually present.
2549. As far as you could see, were Hopkins and Bucknell jointly interested in the result of these searches? I do not think so.
2550. Were they interested in having the searches made? Not to my knowledge.
2551. Can you say how much you have received from Bucknell for making searches? No; it would be a very small amount, perhaps £2 or £3; certainly under £5.
2552. From your experience, are you of opinion that it is necessary that persons searching should be allowed to take extracts? Decidedly; you cannot carry the result of a long search in your head.
2553. In your opinion, is the supervision over persons making searches sufficient? It is rather a peculiar question for me to answer; my opinion would not coincide with others.
2554. That is immaterial—you have had twenty years' experience in the room and I want your opinion? Under the present system I do not think it is sufficient.
2555. How might that supervision be improved? By having men doing nothing else but walking about the room, looking after searches, noting every one who comes into the room, and that man must have experience in titles to enable him to form some sort of idea of what every person requires. Only a man conversant with searching titles and so forth would be able so do this.
2556. In your opinion, should there be a man of experience? Yes.
2557. Some person with a knowledge of the books? Yes; and with a good knowledge of searching.
2558. Are the facilities for searching sufficient? They are very bad.
2559. In what way? The accommodation is disgraceful.

A. K. Doyle.  
1 Nov., 1893.

- A. K. Doyle. 2560. In what way? First, you have to make your search by gaslight, that is when searching the index books. The registers are covered with dust; there is not sufficient room to pull them down; there is not a decent table in the room, and there is not a chair to sit on.
- 1 Nov., 1893. 2561. Are the books conveniently arranged? The index books are conveniently arranged.
2562. Are the registers conveniently arranged? They would be conveniently arranged if there were some means by which one could remove them from the presses. The old books are in a deplorable state.
2563. What books do you specially refer to? The index books from 1802 to 1825.
2564. In what way are they dilapidated? They are dirty. In some of the recent indices, those applying to the last few years, I have found numerous mistakes, in fact hardly a week passes in which I am not continually doing so.
2565. What other copies are wrong? I have known two or three cases in which there has been an omission of the dealings altogether from the index.
2566. Has that been of late years? Yes; the last one I found was not six months ago.
2567. Was that in one of the old books? No; it was in a book for about 1889.
2568. Did you discover, about six months ago, an omission in an index compiled in 1889? Yes.
2569. Was that an omission? It was an omission pure and simple.
2570. Did you draw the attention of any clerk to that omission? Yes.
2571. Who was that clerk? I think it would be either Hill or Mr. Gillam.
2572. What was done after your drawing attention to the omission? It was inserted.
2573. By whom? One of the clerks.
2574. While you were there? No; I think about two days after.
2575. Did you afterwards see that it had been inserted? Yes.
2576. Can you remember any other omission? I found a trifling one the other day.
2577. How long ago? Last month—in October.
2578. Was that an omission or an error? It was the omission of the Christian name of a vendee.
2579. Did you draw the attention of any clerk to that error? I did.
2580. To whom? I went to Mr. Codrington, I think, and said to him, "Who is the clerk who alters mistakes now?"
2581. Did he alter it then? Yes.
2582. That omission, you believe, was filled in by Mr. Codrington? Yes.
2583. Can you remember any other mistakes that you detected in the indices? I have no recollection of them; but I have found numerous mistakes.
2584. Have you any other complaint to make with regard to the indices? The writing in some of them is very bad; it is hardly intelligible.
2585. Do you refer specially to any letter? There are several bad, but especially the letter "H".
2586. In what year? It goes through three or four books, and extends from 1857 to 1876.

[The witness withdrew.]

Mary Stedman sworn and examined:—

- M. Steadman. 2587. *Commissioner.*] What is your husband's name, Mrs. Stedman? William Stedman.
- 1 Nov., 1893. 2588. Is your husband living with you? No; he has not been living with me for some time.
2589. Where do you live? In Wardell Road, Marrickville.
2590. What was your father's name? Thomas Perrott.
2591. When did he die? In 1887. On the 6th of last month he was six years dead.
2592. Where did he live before he died? In Canterbury.
2593. Did you live with him? No; I did not live with him, but I lived in the same street, and my daughter and myself used to sleep at his house.
2594. What age was he? He was 88 when he died.
2595. Was he possessed of property before he died? Yes; of a great quantity.
2596. Landed or personal property? He had money in the funds, and houses and land in the country.
2597. Did he possess land in the suburbs? I believe he had land nearly everywhere.
2598. Do you know where the land which he possessed was situated? No; I do not know all the localities, but I know some parts where he had land.
2599. Did he take you into his confidence? At times he did, but not in all matters. He did not take anyone fully into his confidence.
2600. Did he leave a will? Yes; he left a will willing everything to me.
2601. Did he leave any list of the properties which he possessed? He left everything for my sole and separate use, not subject to my husband's interference, his debts, or his control.
2602. After your father died were you able to ascertain where these various properties were situated? I was not.
2603. Why were you not able to ascertain the situation of these properties? Because about six or seven weeks before he died, I think it was the last week in August, in 1887, a robbery was committed.
2604. What robbery? A robbery in his house, when the whole or the greater portion of his papers were stolen.
2605. Was anything other than papers stolen? There was about £200 in money, his papers, his bank-book, and his private letters—all these were taken away.
2606. Did your late father know of this loss? Yes; and it caused his death.
2607. Was any of the stolen property recovered before he died? None at all.
2608. What state of health was your father in when this robbery was committed? He was in a weak state of health.
2609. Did he become stronger during the intervening period between the robbery and his death? No; he grew weaker and weaker, and then died.
2610. When was his will dated? I think his will was dated over twelve months before his death.
2611. Was that will drawn up by a solicitor? Yes; it was drawn up in the office of Messrs. Allen and Allen, solicitors, of Sydney.
2612. Have you been able since your father's death to find the situation of his properties? I have heard different things, but I have never been able to distinguish which is which of the properties he left.

2613.

2613. Have you heard from any person where any of these properties were situated? I have heard that M. Stedman, my father left property in Pitt-street, Sydney, at Miller's Point, Sydney, at Woolloomooloo, Paddington, and in Melbourne. It also has been said that he owned land in Hurstville, Peakhurst, Belmore, and Petersham. 1 Nov., 1893.
2614. Have you been able to establish your title to any of the properties you have mentioned? None whatever. Not having title deeds I did not pretend to any ownership.
2615. Have you been to the Registrar-General's Department? Yes.
2616. Whom did you see on the first occasion you went there? Hill, the book-porter, was the first person I spoke to; but that was before my father's death.
2617. Do I understand, then, you were at the Registrar-General's Office before your father died? Yes.
2618. Whom did you see on that particular occasion? I saw Mr. Hill.
2619. Did you see anyone else at the Registrar-General's Office on that occasion? No; I spoke to no one else, because I only knew Mr. Hill.
2620. How long had you known him? Sometime before.
2621. How long was it before your father's death that you saw Hill at the Registrar-General's Office? It must have been several months.
2622. Did you see any other persons at the Registrar-General's Office on the occasion to which you refer? Not to have any conversation with.
2623. In what year did you first go to the Registrar-General's Office? It must have been in 1882.
2624. Was that the first time you visited that Department? That was the first time. On that occasion, too, I think I saw Mr. Duff.
2625. On how many occasions did you see Mr. Duff? Only on that one occasion to have any conversation with him at the Registrar-General's Department.
2626. Did you see Mr. Duff at any other place than the Registrar-General's Office? I went to his private house, at Burwood, to see him.
2627. Was that before your father's death? No; after my father's death.
2628. At that time had Mr. Duff left the Registrar-General's Department? Yes.
2629. Before your father's death, did you see any person other than Mr. Duff at the Registrar-General's Office? Yes; Mr. Hill.
2630. On what occasion did you see Hill? When I took my father to the Registrar-General's Department.
2631. Why did you take your father to the Registrar-General's Office? Because I could not discover the particulars of a piece of ground at Petersham, and because I had told my father that there was something wrong or some confusion among the papers concerning that land.
2632. Before that, had you seen some documents? Yes; I saw certain documents when I had that conversation with Mr. Duff.
2633. When you took your father to the Registrar-General's Office, did you see any particular documents? No.
2634. Did you ask for any particular documents? No; a book was brought to the counter.
2635. Did your father examine the contents of that book? No; other than he looked at it and said that his head was so bad that he could not understand what he saw.
2636. How long was this before your father's death? About eighteen months.
2637. Was your father in a weak state of health then? Yes.
2638. What had brought about that weak state of health? Four years and a half before his death my father met with a serious accident on which occasion his leg was broken and his skull was fractured.
2639. Did you go to the Registrar-General's Office again before your father died? No; not from that time I took him there.
2640. Did you go to the Registrar-General's Office after your father's death? Yes.
2641. How soon after? I think it must have been a few months after he died.
2642. Whom did you see at the Registrar-General's Department on that occasion? I saw Mr. Hill.
2643. Was that the second time you saw Hill? Yes.
2644. What did you say to Hill on this second occasion? I asked him to look for that piece of ground at Petersham.
2645. What did he do? He gave me an account of properties concerning which I had the deeds, but he had not found anything I was seeking for.
2646. What time of the day was it when you saw Hill on this occasion? I think it was in the afternoon.
2647. Before 4 o'clock? Yes.
2648. He then gave you a list of properties, the deeds of which you had? Yes.
2649. Did he tell you of any other property? None, except the properties I knew of.
2650. Did you again go to the Registrar-General's Department? Yes; I saw Mr. Hill repeatedly, and asked him to seek for these things, but he never gave me any satisfaction.
2651. Did you see any other person at the Registrar-General's Office? Yes; I saw a Mr. Hopkins.
2652. How came you to see him? I was introduced to him by a man named James Pickering.
2653. Where? In the Registrar-General's Office.
2654. In what part of the Registrar-General's Office? I think it was in the branch of the Registration of Births, Deaths, and Marriages.
2655. Was Pickering a clerk there? No; Pickering is a fencer.
2656. How did you come to know Pickering? His mother sent him to me, and I went to the Registrar-General's Office with him, and he introduced me to Hopkins.
2657. In what year was that? It was the same week I received this letter from Pickering's mother. [*Letter produced, dated June 3rd, 1892.*]
2658. Was Hill present when you were introduced to Hopkins? Hill was never present when we were talking to Hopkins.
2659. Had you a conversation with Hopkins? Yes; we had a conversation about searching, because Pickering thought Hopkins would be able to learn where the land was situated.
2660. What was the result of that conversation? That Hopkins was to search the books and find out where the pieces of land were belonging to my father.
2661. Were you to pay Hopkins for this service? First of all, Hopkins asked that providing he could prove

- M. Stedman. prove the title to the land, he should receive one-half of the proceeds. I said that one-half would be a rather high price. He then agreed to take a one-quarter share.
- 1 Nov., 1893. 2662. At the first interview was anything said as to price? Nothing.
2663. What was actually done at the first interview? I made a request that he should search, and he then said that his brother-in-law would do it. That practically ended the first interview.
2664. Did you again go to the office? Yes; I went a second time, about a fortnight later.
2665. Did you then see Hopkins? I saw him.
2666. Was Pickering with you? Only on two occasions he went.
2667. What was said at the second interview? Hopkins asked me where the land was situated, and I told him. I said, "There is land at Hurstville;" he replied, "That's alright." I said, "There is land at Peakhurst;" he answered, "That's alright." I next said, "Then there is land at Petersham;" he said, "Yes, that's alright."
2668. Had Hopkins any paper with him when he made these replies "That's alright"? Not that I know of, he seemed to be speaking from memory.
2669. After you had mentioned the properties, and Hopkins had said "That's alright," what next was done? Hopkins said, "The land in Petersham has been found." I said, "Then you have found the other allotments in Canterbury?" and he replied, "Yes; they are alright." It was then that the price for Hopkins' service was mentioned.
2670. Did he first mention to you the matter of remuneration? He did.
2671. What did he say? He said, "The land has been found and now we will see about recovering the ownership; we will now arrange as to the price for my services." He went on to say "I should think I should receive one-half." I said, "No; I think that one-half is too high a price." He then said, "I will take one-quarter." I replied to him, "I will agree to give one-quarter." Hopkins agreed to take that quarter.
2672. One-quarter of what? One-quarter of what the land would realise if it were sold, and for that he would undertake the trouble of getting possession.
2673. Did anything further take place at that interview? Nothing further. Later on I asked Pickering to go with me to the Registrar-General's Office.
2674. How soon after that interview did you ask Pickering to accompany you to the Registrar-General's Office? I think about a week after that. I asked Pickering to go, simply that he might hear what was spoken as to the price to be paid to Hopkins.
2675. Did Pickering go with you to the Registrar-General's Department? He did, and I saw Hopkins again.
2676. What did Hopkins say? Hopkins said, "The land is found," and I think Pickering must have had some conversation previous to my being there, because Hopkins said, "I know all about it, there has been a robbery committed and the papers have got among other people." I said, "Yes; that is how it is." I had not told Hopkins anything about the robbery. He then began to talk about detectives searching up the people suspected of having the papers.
2677. What else happened? Not much more was said, for immediately after we left. In the presence of Pickering I told Hopkins that he was empowered to do what was necessary and that for his services he would take one-fourth share of all that was realised out of the land. Hopkins in reply said, "That's alright, that's alright."
2678. Did you see Hopkins again? I did.
2679. Where? In the Registrar-General's Department. I have never seen him anywhere except in the Registrar-General's Department.
2680. How soon after that second interview with Pickering did you see Hopkins? I think it would be about a week later.
2681. What was said on that occasion by Hopkins to you, and by you to Hopkins? I called at the office to know how he was getting on with the case. He said to me, "When I want you I will write to you; do not call so often at this office as it looks as if you were up to something. Something else has been found, but I do not know what it is. I have learned from my brother-in-law that something has been found." In the meantime, Mr. Bradley, a plain-clothes policeman or a detective, I do not know which, called upon me, and it was to him that Hopkins had spoken about people having possession of the stolen papers. He had some conversation with me upon the matter.
2682. Did you see Hopkins again? I went back again a few days afterwards. I asked him the name of the detective who was retained to make inquiries concerning the missing papers. Hopkins then told me that the name of the detective was Lyons.
2683. Did anything further arise out of that interview? No; I next went to seek Mr. Lyons.
2684. What did you ascertain? That Lyons was not the person engaged for the purpose.
2685. Who was engaged for that purpose? A Mr. Bradley.
2686. After you made this discovery, did you go back to the Registrar-General's Office? I went back to the office, but I never saw Hopkins there again.
2687. Did you never see him again at that office? I never saw him there after that.
2688. How often did you call to see Hopkins after this particular occurrence at the Registrar-General's Office? I think I called three or four times, but I did not see Hopkins on either of those occasions.
2689. Did you subsequently write to Hopkins? I did. I wrote as follows:—
- Mr. Hopkins,  
Sir,—I have been seeking an interview with the person that you have appointed to search up certain information about missing papers of mine. I cannot get hold of him in any way, he seems to ignore me in the matter altogether. I cannot understand it at all. My own view of the subject is that as the matter so deeply concerns me that I ought to be able to see him to hear of my success, or otherwise, when convenient. I do not wish to take the leadership out of your hands, but simply to learn whatever progress has been made or otherwise, and if necessary make a suggestion, I claim that as my right. I have been considering in my disappointment it is best to drop all further enquiries in the matter. The load of mystery that covers the whole thing can never be lifted off. I feel disappointed, but then I must get over that. I shall look upon the whole thing as entirely ended in the future.
- Marrickville, 20 September, 1892.
- I remain, faithfully yours,  
MARY STEDMAN.
2690. Did you receive an answer to that letter? I received no reply.
2691. To where did you direct that letter? To the Registrar-General's Office, to the branch for the Registration of Births, Deaths, and Marriages..
2692. Did you post it yourself? I did. 2693.

2693. Where? At the Marrickville Post Office. A week later I again sent to him a letter saying that M. Stedman. I hoped he had ceased inquiring, as I was still of the same mind, and that I would have nothing further to do with the subject. 1 Nov., 1893,

2694. Did you keep a copy of that letter? I did. The following is the copy:—

Mr. Hopkins,

Marrickville, 28 September, 1892.

Sir,—I wrote you September 20th, telling you the decision I had then come to with respect to certain papers belonging to my late father's estate that are involved in a great deal of mystery, telling you that I had determined not to follow the search for them. I now repeat that decision, do no more in the matter, let things remain as they are.

I remain, yours truly,

M. STEDMAN.

2695. Did you post that letter in the same place and in the same way you posted the previous one? Yes; I did. I posted both in the little iron receiver at Marrickville.

2696. Did you get an answer to your second letter? No; I received no answer at all.

2697. Have you seen Hopkins since then? Yes; behind the counter, but I never spoke to him.

2698. Have you since been to the Registrar-General's office? I have been there since—on Friday last.

2699. Did you on that occasion see the Registrar-General, Mr. Pinhey? I did.

2700. When did you see Hopkins behind the counter? On another occasion when I went in.

2701. Did you speak to Hopkins or did Hopkins speak to you? No; I did not go any further in the matter.

2702. Where is James Pickering? He lives at Peakhurst, or did live there. I believe he lives there, but for certain I do not know where he lives.

2703. What is his address? I have never written to him, but all my communications with him have been through his mother.

2704. When did you see him last? About the beginning of the present year.

2705. Where? At Newtown.

2706. At your place in Newtown? Yes, at my shop in Newtown.

2707. What is he? I think he is a bush fencer, or perhaps to describe him more particularly, he is a fencer and bush carpenter.

2708. Did you place your affairs in the hands of your Solicitors, Messrs. Allen and Allen? Yes.

2709. What was their decision in this matter? I consulted a member of the firm, and he discouraged me, saying they would have nothing at all to do with this sort of thing. He advised me to leave the whole matter alone.

2710. Since your interview with Hopkins have you recovered any portion of the property or any one of your deeds? No; I have not received one deed.

2711. Have you paid anything to Hopkins? No; he has not asked me for anything, but it was understood that he was to deduct one-fourth from the proceeds of any sale of the property after it was brought under the Real Property Act.

[The witness withdrew.]

Charles Frederick Rogers sworn and examined:—

2712. *Commissioner.*] Are you a clerk in the office of Messrs. Fisher, Ralfe, and Macansh? Yes; I C. F. Rogers. have been there about eleven years. I am search clerk and registration clerk in that office. 1 Nov., 1893.

2713. Do your duties frequently take you to the Search Room of the Deeds Branch in the Registrar-General's Department? Yes, very frequently; in fact on almost every day in the week.

2714. In what condition do you find the books of indices? The stock indices up to 1889 are in a very indifferent condition, in fact they are unreliable.

2715. In what respect? The indexing is not correct and there have been cases where a particular dealing has been left out. There has been an omission of dealings.

2716. Since 1889, how have the indices been kept? They are in good condition. There is a great improvement in the new series. As regards the real estate, the first books of the old series, that is the indices starting in 1802 and going on to 1824, are in a very indifferent condition. One can scarcely decipher some of the writing in them.

2717. Have some of the entries in these old indices been made in pencil? Yes.

2718. Have some of the entries in those indices been made in ink? Yes; quite a recent date.

2719. Is it apparent where some of the entries are in pencil? Yes; and I think the entries in ink are the filling up of omissions.

2720. After the year 1824, in what condition are the indices of Real Estate? Those indices from 1825 to 1860 or 1864 are well written and are correct. In other places there are a number of dealings and transfers of mortgages which have been bunched and they appear to be only one dealing. The compilation has been careless, for these dealings and other matters should have been indexed separately.

2721. In any other respect are these indices deficient? They are fairly correct.

2722. From the year 1866 to the present day in what state are the indices? As regards the books they are in a fair state.

2723. How have the contents of those books been compiled? The contents have been compiled fairly well, but the writing of some is very indifferent.

2724. Is it so indifferent as to be illegible? In some cases.

2725. Does the bad writing of which you complain continue up to the present day? Some of it does.

2726. Have you discovered any omission? Yes, the discovery of omissions is of frequent occurrence.

2727. Omissions of what kind? I have had cases in which dealings have been omitted from the index altogether. Further than that the numbers of the book have been left out; therefore, the reference has been wrongly stated.

2728. Have you discovered any other mistakes? In one case there were two parcels of land altogether omitted.

2729. Was that a serious omission? It was. Inasmuch as the number of the parcel was left out.

2730. How did you ascertain that there was such an omission? I went to the Register-book and checked the search with the registered copy.

- C. F. Rogers. 2731. Have you discovered any other mistakes in the indices, such as the omission of christian or surnames? In some cases I have, but I think the fault has been in the writing of the copy.
- 1 Nov., 1893. 2732. In many instances? In a great many.
2733. On any occasion when you have been searching, or when you have been in the Search Room have you been unable to find any register you required? No; not in the sense which I think your question means. There have been occasions when a register has been either with the Examiners of Titles or the book-binder.
2734. Have you ever been told that any register was missing? No.
2735. Have you had to refer to the books of old copy grants? I have had frequently to do so.
2736. Have you ever been unable to find any of these books? No, sir.
2737. Have you ever referred to a register called "Cumberland register"? No, sir.
2738. Have you ever heard of any book called "Cumberland register, No. 28"? No, sir.
2739. In your opinion is it necessary that persons searching should be allowed to take extracts? It is quite necessary that extracts should be taken. It would be useless to make a search without taking extracts.
2740. In your opinion is the supervision over persons searching sufficient? I think it is.
2741. Do you know Edmund Conroy Hopkins, a clerk in the Registrar-General's Department? Yes, sir.
2742. Do you know a clerk in the Registrar-General's Department named W. W. Bucknell? I do, sir.
2743. Have you at any time seen Hopkins in the Search Room of the Deeds Branch, in the Registrar-General's Department? Yes.
2744. In which part of that Search Room? In that portion which used to be used by the Registration Branch of Births, Deaths, and Marriages. I have also seen him in the Deeds portion of this room.
2745. When Hopkins was in the Deeds portion of this room, what was he doing? As far as I could see, he was looking up deeds.
2746. Have you seen him there in that respect on many occasions? Yes; he used to be there frequently a few years ago.
2747. Have his visits to the Search Room of the Deeds Branch ceased of late years? Yes.
2748. For how many years have these visits ceased? Since Mr. Pinhey has been Registrar-General.
2749. Have you seen W. W. Bucknell in the Search Room of the Deeds Branch in the Registrar-General's Department? Yes, sir.
2750. In what portion of that Search Room have you seen W. W. Bucknell? In the Births, Deaths, and Marriages portion of the room.
2751. Have you seen W. W. Bucknell in the Deeds part of the Search Room? I think I have seen him there on one occasion.
2752. What was W. W. Bucknell doing on that occasion to which you refer? He was speaking to one of the clerks of the department.
2753. Was W. W. Bucknell searching? No, sir.
2754. Have you seen W. W. Bucknell at your office? No, sir.
2755. Have your duties as search clerk at times taken you to the Search Room in the Land Titles Branch of the Registrar-General's Department? Yes, sir.
2756. Have you referred to the indices in that branch when making searches? Yes; frequently.
2757. How do you find the indices kept in that branch of the Department? The indices there are kept in a very good condition. They are well written.
2758. Have you any complaint to make about the manner in which those indices are now kept? No, sir.
2759. As far as you can see, is there any reason why the indices in the Deeds Branch should not be as equally well kept as the indices in the Land Titles office? There is no reason whatever.

[The witness withdrew.]

Charles Louis Tange sworn and examined:—

- C. L. Tange. 2760. *Commissioner.*] Are you a Solicitor in the Supreme Court of New South Wales? Yes.
- 1 Nov., 1893. 2761. How long have you been a Solicitor? Eleven years. I think I was admitted in 1882. I belonged to the legal profession prior to the year 1879, in which year I was articled.
2762. During your experience, have your duties taken you on many occasions to the Search Room of the Deeds Branch in the Registrar-General's Department? They have.
2763. During which years? During each year, but latterly not so much as formerly.
2764. Have you had much experience in the Search Room of the Deeds Branch in the Registrar-General's Department since the middle of March, 1890? Not so much as formerly.
2765. On any occasion that you have visited the Search Room in the Deeds Branch, have you been unable to find or procure any register you required? Yes, on some occasions I have.
2766. On what occasions? I cannot call to mind the particular searches in which I was engaged when I could not obtain the register I required.
2767. Do I understand that any register you required was altogether missing? The reason given to me was, that the register necessary for making a search was in the hands of the book-binder. I was delayed on this occasion, but eventually I got the necessary register.
2768. On any occasion have you been altogether unable to get a register? No; not within my recollection.
2769. Have you, at any time, been unable to get any Book of Grants? No.
2770. In your opinion, is it necessary that a person searching should be allowed to take extracts? Yes; most undoubtedly.
2771. In your opinion is the supervision now exercised over persons searching sufficient? It is ordinarily careful.
2772. Is the supervision sufficient for the protection of the public against any person who might be dishonestly inclined? Generally speaking, I think it is.
2773. You say "Generally it is"—are there any occasions when it is not sufficient? I have frequently found that people stand alongside persons searching, and they are able to see the purpose of the search.
2774. In your opinion, should this state of things be altered? If possible, it should be prevented.

2775.

2775. Have you ever been approached by any official in the Registrar-General's Department with offers of C. L. Tange's assistance? No; I cannot call to recollection that I have.
2776. Has any clerk in the Registrar-General's Department ever approached you with any offer of information? Yes, I have had an offer of information. Nov., 1893.
2777. On one or more occasions? On one occasion, in one particular matter, and I think on two or three occasions in connection with that matter.
2778. What matter was that? That was in the matter of a search against the title of one Mr. Cargill, of New Zealand.
2779. What clerk approached you on that occasion? Mr. Hill.
2780. Hill the book-porter? Yes; the book-porter.
2781. When did he approach you? I think it would be about three or four years ago.
2782. Can you remember what Hill said to you on the first occasion he approached you? The information Hill gave to me was of a general kind. I think the first information he gave me was in answer to comments of my own, with respect to a title I was examining into.
2783. Were you making this examination for a solicitor or solicitors? No; I think not. I think I was examining for a layman.
2784. Were you examining for a land agent? No, not for a land agent.
2785. For persons known or unknown to Hill? For persons known to him.
2786. What was the next information that Hill gave you? He gave me no information at all of an important character; it was simply information to the effect that people had been searching for a particular title, and that these people had been calling frequently at the Registrar-General's Office. It was a remarkable case in a great many respects, but there was nothing definite whatever in the information Hill gave to me.
2787. Do I understand you to say that there was nothing definite in the information Hill gave to you on any occasion? No; there was nothing beyond a general statement to the effect that they had been searching up information that I was anxious to obtain.
2788. Did you pay Hill for any information he gave you? I have no recollection of having paid Hill anything.
2789. Did Hill obtain any information for you? No; he never obtained anything. I had to rely on my own resources.
2790. Did the information you received then merely amount to a statement that several persons had been searching against some title? Yes.
2791. Did Hill tell you the names of these persons? I cannot remember whether he did or not at this moment.
2792. Did Hill on any occasion tell you the names of these persons? No; I cannot remember that he did.
2793. How came you to search on behalf of Cargill? I am under the impression that I searched as the representative of Cargill's son-in-law.
2794. Under what circumstances did you search? My client first instructed me to apply to certain persons for his deeds, as they had gone astray. Being unable to find them I was instructed to search, and obtain certified copies.
2795. Did you obtain these copies? Yes.
2796. At that time did it appear that the land had been dealt with or sold by your client? It did not appear so at that time.
2797. After you obtained these copies, what happened next? I prepared a conveyance for registration from Cargill to Clulee, his son-in-law. I sent them to New Zealand for execution, with a copy for registration. The conveyance was executed, but the registration copy was not signed. The date, I think, was a few days previous to Christmas in 1888 or 1889. The registration copy had to be returned to New Zealand to be signed. In course of time that came back, to me properly signed, and I proceeded to register it at the Registrar-General's Office. A few days before doing so I made a search which disclosed that a conveyance was registered and dated about the 29th of November, 1856. This purported to be signed by Cargill, conveying the land away. I communicated with my client by cable, and was informed that no such deed had been executed. I was finally instructed to test the validity of these titles, but these instructions took some month or six weeks in the course of transit. In the meantime two conveyances, dealing with the same land, purporting to be signed in 1856, were placed on the register, and finally mortgaged to the London Chartered Bank of Australia.
2798. What time elapsed from the date on which you first searched until these deeds you have just mentioned were registered? About four months.
2799. Can you remember when the title was first vested in Cargill? In the year 1854 or in the year 1855.
2800. From the year 1854 or the year 1855 until the year 1889 had there been any dealings with this property? No.
2801. Almost immediately it was known that you were searching about this particular property were the other deeds placed upon the register? Yes. I was then instructed to bring a suit, and I brought one, with the result that the deed alleged to have been executed by Cargill was found to be a forgery. The Bank submitted to the decree, and the property was brought under the Real Property Act.
2802. What amount was the property mortgaged for? About £1,200.
2803. Did you directly, or indirectly, allow anyone to know that Cargill was about to convey away that property? I believe not. To the best of my recollection I did not.
2804. In addition to the searches you made in the Search Room, were you making inquiries outside? Yes.
2805. Was Hill, the book-porter, aware of the fact? I do not think so.
2806. Was Hill aware of any fact beyond that you were searching against that title? I believe he was aware of the fact that the prior deeds were missing, because the copies were ordered through him.
2807. Was any other clerk in the department aware of that fact? I believe not.
2808. Did you afterwards question Hill in any way upon the matter? No; beyond asking him if he had seen any person searching.
2809. I am speaking of afterwards? No.

- C. L. Tange. 2810. Do I understand that when you commenced to search you asked Hill if other persons had been searching? I asked him at the time if the deed was registered.  
 1 Nov., 1893. 2811. Was it not after the forged deeds was registered? Yes.  
 2812. Did you ascertain the name of any person who had been searching? I believe the name of one person was mentioned.  
 2813. Can you remember that name? I believe the name of Mr. Williams, a conveyancer, was mentioned.  
 2814. Did you take any steps to verify the statement then made by Hill? Yes.  
 2815. With what result? The result was I communicated direct with Mr. Williams, and he informed me that the title had been submitted to him as security for a loan of money.  
 2816. Did you ascertain by whom? Yes.  
 2817. By whom? By two persons, Shasta Larnach and James Edmund.  
 2818. Were these persons known to you? Yes; one was a resident of Ashfield.  
 2819. Did you ascertain how they became interested in this matter? Yes, your Honor; I ascertained that they had purchased from a man named Harding.  
 2820. Did you ever see Harding, or ever hear of his existence? No; I never heard of such a man.  
 2821. Who acted for Harding in the sale? Mr. P. Sullivan.  
 2822. Did you hear how Mr. Sullivan was instructed? By letter.  
 2823. Did you ascertain from Mr. Sullivan whether he had ever seen Harding? Yes. To the best of my belief he informed me that he had never seen him.

[The witness withdrew.]

THURSDAY, 2 NOVEMBER, 1893.

[The Commission met at 10 o'clock.]

Present:—

HIS HONOR JUDGE FITZHARDINGE.

Donnelly Fisher sworn and examined:—

- D. Fisher. 2824. *Commissioner.*] What are you, Mr. Fisher? I am senior partner in the firm of Fisher, Ralfe, and Macansh, solicitors, practising in Sydney.  
 1 Nov. 1893. 2825. Over how many years does your experience extend? I have been practising since 1875, but I have been actually engaged in the legal profession since 1872.  
 2826. During these years have your duties at times taken you to the Search Room in the Deeds Branch of the Registrar-General's Department? Not much of late years.  
 2827. What am I to understand by "late years"? Not much during the last ten or twelve years, I should say.  
 2828. Do you entrust what may be required in your office from the Search Room to Mr. C. F. Rogers? Yes; to Mr. Rogers at present, and previously to other clerks.  
 2829. Have you, yourself, when in the Search Room, been unable to obtain any register you required? No; I have never had any difficulty whatever.  
 2830. Has it ever been reported to you by any clerk who has been sent to make a search that any register was missing? Not to my recollection.  
 2831. In your opinion, is it necessary that persons searching should be allowed to take extracts? I am very decidedly of opinion that it is absolutely necessary that persons searching should be allowed to take extracts.  
 2832. If searchers were not allowed to take extracts, what practice would have to be adopted? Either the principal himself, or the clerk in charge of the matter, would have to inspect the register, and perhaps the production of the original deed would be required in many cases, and sometimes at considerable expense.  
 2833. If extracts were not allowed to be taken would it in most cases be necessary to obtain certified copies of the deeds registered? That might be one of the alternatives, but I would prefer seeing the original deed, because the expense of these certified copies is far in excess of what it should be; and secondly, the certified copies are not in all cases to be relied upon.  
 2834. In your opinion, could the present practice of searching be improved upon, either by the appointment of officials or licensed searchers? That would depend upon many things. First of all it would depend upon whether you could get a sufficient number of these official or licensed searchers appointed. It is, as you know, very important in a good many cases to have searches completed quickly. If you had official or licensed searchers appointed you would have to wait either their pleasure or your turn to have your search completed. You would also have to pay overtime, and further than that, it would depend upon whether a solicitor was relieved from all consequences arising from a defective search. Taking everything into consideration, I do not approve of matters being delegated to a third person over whom one has no control, when such matters ought to be looked after by the solicitor himself. The only system that I have heard of, and which I think under proper safeguard might be adopted here, is the Irish system.  
 2835. What is that? I understand that under the Irish system the original registration copies are not exhibited to the public, but only the duly examined and certified copies thereof—the original registration copies being put away under lock and key, and only opened to inspection in exceptional circumstances, and then under very stringent safeguards.  
 2836. Have you any other suggestion to make? It might be worth consideration by the Government whether or not they should adopt not only the recent English Statute of Limitations, but also the English Vendor and Purchasers Act and the English Conveyancing Act Amendment Acts of 1882 and 1884. The latter Acts contain several very important provisions with regard to conveyancing and the simplification of practice. The first-mentioned Act, I believe, materially shortens the time fixed for the limitation of action.  
 2837. Do you know a clerk named Hopkins in the Registrar-General's Department? I know there is such a clerk in that department, but I do not know whether I should recognise him if I saw him now.  
 2838. Has Hopkins ever approached you with any offer of information? Yes; on one occasion.  
 2839. How long ago? I think it was four or five years ago; I do not recollect the exact date.

2840. Can you remember the offer then made to you? The offer was made in a letter which I have searched for but been unable to find, and which, I think, has been destroyed. The letter informed me that he was aware of some property to which I had a personal right, and he offered to buy whatever interest I had in that property, I believe, for the sum of £100. D. Fisher.  
2 Nov., 1893.
2841. Was there any alternative proposal? There may have been one, but I do not recollect it. He did not inform me where the property was situated.
2842. Did you accept his terms? Certainly not. The letter put me on my guard, and there having been some litigation shortly previous to my receiving the letter, between a granduncle of mine by marriage, Mr. Richard Hill, and Mr. Jones, with regard to property at Botany, and having learned from the evidence given in that cause that there was an excess of land in a certain Crown grant of which my late father, Thomas John Fisher, had at one time been possessed, a portion of which he had sold to Mr. Richard Hill and Mr. Jones, I got my brother, a licensed surveyor, to thoroughly look into the whole matter, and I discovered, through his inquiries, that there were 14 acres of this Crown grant at Botany which had never been conveyed to my late father. I subsequently found the title deeds in the possession of Messrs. Norton & Co., who had been my late father's solicitors, and the allotments which Messrs. Hill and Jones applied to bring under the Act had been covered by a certificate of title thereto.
2843. What was the value of that 14 acres of land at the time Hopkins submitted his proposal to you? At the time that land was brought under the Act it was valued by Messrs. Richardson and Wrench at £1,300.
2844. Is that the particular property Hopkins wished to buy from you for £100? Yes; that, I believe, is the property.
2845. Did you hear from Hopkins where he obtained his information with respect to this property? Not to the best of my recollection.
2846. Have you any idea from where he could have obtained his information? That could only be a matter of surmise on my part.
2847. And what is your surmise? My surmise is he obtained it from papers in the Land Titles Office—from papers relating to applications made by Mr. Richard Hill and Mr. Jones to bring their respective portions of land at Botany under the Real Property Act.
2848. Did Hopkins on any other occasion approach you with any other offer of information? I do not think so. I have no recollection of any such offer.
2849. Do you know a clerk named W. W. Bucknell in the Registrar-General's Department? I met that clerk on one occasion.
2850. Lately? Quite recently.
2851. Where? At my office.
2852. Is he a client of yours? Certainly not.
2853. On what matter did he visit your office? He stated that he came from the Registrar-General's Department, where in his capacity of clerk, an application had been made to him for certificates of birth, death, and marriage of certain members of the Gore family. He added that it had been definitely stated in the Registrar-General's Department that these certificates of birth, death, and marriage had been obtained by my former firm, that of Robertson, Fisher, and Ralfe, from the Registrar-General's Department, and that they had been lodged with a certain application to bring land situated at Gore Hill under the provisions of the Real Property Act by one Mr. G. R. Whiting, who was a client of my late firm, and which application had been carried out by my late firm. He stated, further, that there was a receipt given by my late firm for the certificates of birth, death, and marriage with the beforementioned application of Whiting to bring the land under the Real Property Act. He asked me to have a search made among my papers, to see whether or not these certificates were in my possession. He told me that his reason for asking me for them was that it had been stated that the certificates in question had been given by the Registrar-General's Department to our firm; that no trace of any such entries could be found in the Registers, and it had been hinted that there was something crooked about the matter, and consequently he wanted me to produce these certificates, especially as some of them had not been obtained from the Registrar-General of New South Wales, but from elsewhere. I made a search amongst my papers, but I was unable to find these documents.
2854. Have you any knowledge of the particular application to which you refer? Yes; I had a good deal to do with that application.
2855. Can you remember whether your then firm did receive those certificates after the application was granted? I cannot say of my own knowledge.
2856. Have you caused any inquiry to be made as to whether such a receipt as that referred to is amongst the papers? No; I have not. The papers should speak for themselves.
2857. In what department are these papers deposited? In the Land Titles Office.
2858. Is Bucknell a clerk in that branch of the Registrar-General's Department? No.
2859. Would he have anything to do with the papers in the Land Titles Office? I should think not.
2860. Was that the only occasion on which W. W. Bucknell visited your office? That is the only occasion to the best of my knowledge.
2861. Did Bucknell ever approach you with any offer of information? Certainly not.
2862. When W. W. Bucknell called upon you, did he bring any letter or authority from the Registrar-General or from any head official in the Registrar-General's Department? He did not bring any letter or authority either from the Registrar-General or from any official in charge of any branch. He merely made the statement I have given in my evidence.
2863. Is there any other matter which in your opinion should be brought before this Commission? There is one. It has been reported to me that a registration copy of a transfer of a conditional purchase has been altered in a material particular after such registration copy was filed.
2864. When was that report made to you? That report was made to me yesterday, and I have requested the clerk who is in charge of this matter to make a written report to the Registrar-General on this subject.

[The witness withdrew.]

Edmund Conroy Hopkins recalled:—

- E. C. Hopkins. 2865. *Commissioner.*] After having given evidence before this Commission on Tuesday, October the 24th, you intimated to me that you desire to add something to the evidence already given? I have.  
 2 Nov., 1893. 2866. What additions do you wish to make? I wish to explain that matter concerning the £550 for which I appear to have given a receipt.  
 2867. Did you commit that explanation to writing? Yes.  
 2868. In this letter [*letter handed to witness*]? Yes.  
 2869. Is this the explanation you desire to make:—The facts are these: “I arranged to receive £550 for my interest, subject to a mortgage for £400 to Mrs. Devernet, and so as to enable them to bring the land under the Act in their own names, I gave a receipt for the full amount, £550. The land is now under a Torrens’ Title, subject to £150, part of the £400, with interest, due to Mrs. Devernet?” Yes; that is the explanation I desire to make.  
 2870. For how long have you known W. W. Bucknell, a fellow clerk in the Registrar-General’s Department? I have known him ever since he has been in the office.  
 2871. Did he join the Service after you did? Yes.  
 2872. Was W. W. Bucknell ever concerned in any land transaction with you? No; not that I can call to mind.  
 2873. Was he ever with you at the office of Chappel and Campbell? I do not think we ever went there together, your Honor.  
 2874. Did you go there on any occasion? Not on any occasion.  
 2875. Did you, on any occasion when you were in Bucknell’s company, have any conversation with Chappel and Campbell? It might have been that when Campbell came into the office we spoke to him in reference to paying off the balance of this mortgage.  
 2876. What had Bucknell to do with this mortgage? Simply that a relation of his lent the money to me. I think this relation was his aunt, and she was anxious to have the matter cleared up.  
 2877. How came you to borrow money in that way? I borrowed it on this mortgage.  
 2878. How came you to borrow it from a relation of Bucknell’s? I asked him did he know anybody who could lend me the money, and he told me that his aunt would lend money to him, and that he would speak to her about it.  
 2879. Did Bucknell know for what purpose the money was required when you asked him that question? I think so.  
 2880. Did you discuss the matter with him? To the best of my recollection, I asked him if he knew anybody who would lend me the money on my interest in the Battersea Estate.  
 2881. Again, I ask you, on any occasion were you at Campbell’s office with Bucknell? Not that I can recollect.  
 2882. Do you know whether Bucknell ever received any money from either Chappel or Campbell? No.  
 2883. Do you know whether Bucknell ever paid any money either to Chappel or Campbell? No.  
 2884. Are you aware that Bucknell received a promissory note for £400 from Messrs. Campbell and Chappel? Not that I can recollect. The only amount I know of was a promissory note for £150.  
 2885. Are you aware that Bucknell received the sum of £4 from Messrs. Chappel and Campbell? I am not aware.  
 2886. Are you aware that Bucknell paid the sum of £30 to Messrs. Chappel and Campbell? I do not recollect it.  
 2887. Do you know whether Bucknell had any transactions before with Messrs. Chappel and Campbell? No, I do not.  
 2888. From whom did you receive moneys when you did receive any from the firm of Chappel and Campbell? From Campbell.  
 2889. Did you receive all the money from Campbell? Yes; I think so.  
 2890. Did you receive any promissory note from Chappel or Campbell? From Campbell, I did.  
 2891. Did you receive all the promissory notes from Campbell? Yes; all from Campbell.  
 2892. Did you receive any promissory note from Chappel? I do not recollect if I did.  
 2893. Did you receive a promissory note for £40 in February, 1889, from Chappel and Campbell, or from either of them? I do not recollect if I did.  
 2894. Did you receive a promissory note for £50? Yes; I think I did.  
 2895. From whom? From Campbell.  
 2896. Did you receive another promissory note for £60 in October, 1889? Yes; I think I did.  
 2897. From whom? From Campbell.  
 2898. Did you receive a promissory note for £400 in June, 1889? [*No answer.*]  
 2899. Did you ever receive a promissory note for £400? I do not recollect that amount.  
 2900. What was the largest amount on any promissory note you received? I think it was about £60.  
 2901. Is £60 the largest amount? Yes. They paid me off in dribs and drabs at different times.  
 2902. Did you receive a promissory note for £62? Yes; I think I did.  
 2903. From whom? From Campbell.  
 2904. Do you know whether W. W. Bucknell received a promissory note for £160 from either Chappel or Campbell or from both of them? I am aware that he received a promissory note for £160.  
 2905. Do you know on what account? That was the collateral security for Mrs. Devernet. It was given at the time of the mortgage and was really a second mortgage.  
 2906. What do you say the mortgage was to secure—I take it to be £150? That is right. I think the amount is £160. I think I have made a mistake in my explanation. That is the only bill I am aware of.  
 2907. Did you at any time give a promissory note to Chappel and Campbell for £60? Yes; I did.  
 2908. What was that promissory note for? It was something to do with this money transaction; I forget exactly what it was.  
 2909. How is it you gave a promissory note to them, when you allege that they owe you money? I never could get them to clear matters up. I never could get them to fix how the account stood.

2910. When you signed that promissory note for £60, did you know whether or not you owed that money? E. C. Hopkins. I did not know that I owed them any money at the time. I got confused as to how the accounts stood.
2911. Can you say whether the date of that promissory note was 25th June, 1889? I do not recollect 2 Nov., 1893. the date.
2912. Have you any doubt that this bill book is correct? That bill book must be correct.
2913. Can you explain how, on 25th June, 1889, you gave them a promissory note for £60, and on the same date, 25th June, 1889, you received from them a promissory note for £60? There was something about the bill being dishonored.
2914. Whose bill was dishonored? This bill of Campbell and Chappel's. That is the matter over which I became confused.
2915. Do I understand your explanation to be that because one promissory note you held was dishonored that you gave your promissory note for £60? Yes; I think that is it. I never could thoroughly understand how it was.
2916. In addition to these promissory notes, did you receive any moneys from Messrs. Campbell and Chappel, or either of them? Yes, your Honor, I did.
2917. For what were these sums of money paid? For my interest in Osborne Estate and the Battersea Estate—the two estates I had to do with.
2918. Have you been at Campbell's office on many occasions during the last three years? No.
2919. Have you been there on any occasion? I might have been there once or twice.
2920. On which occasion were you there last? I do not recollect. I think it must have been about a month ago.
2921. What were you doing there on that occasion? I went to ask if the interest had been paid to Mrs. Devernet.
2922. Was that before you were suspended? Yes.
2923. How long before your suspension? I do not know.
2924. When were you suspended? It must have been before I was suspended, because my suspension took place on the 21st of September.
2925. How long before the 21st of September was it that you were in Campbell's office? It might have been a week or so, to the best of my recollection.
2926. Were you at Campbell's office on any other occasion this year? Yes, I was. I did see him.
2927. On how many occasions? Once more.
2928. On one other occasion? Yes.
2929. During the year before, in 1892, how often were you at Campbell's office? I could not say.
2930. Were you there on many occasions? No, your Honor.
2931. If Campbell has sworn you were there on a number of occasions during the year 1892, would that alter your present recollection? I do not recollect being there on any occasion.
2932. Were you in Campbell's office on many occasions during 1891? No; I do not think I was.
2933. Do you know Mr. Makinson, a solicitor, of the firm of Ellis, Makinson, and Plunkett? Yes.
2934. Were you at any time in his office? Yes; I might have been.
2935. My question is, were you there, not "might have been." Were you in Mr. Makinson's office? Yes.
2936. For what purpose? I do not recollect now, your Honor.
2937. Did you go there for the purpose of offering to sell to Mr. Makinson information with regard to certain landed properties? I do not recollect, your Honor; I may have been there.
2938. Concerning any property, had you certain information you desired to sell to Mr. Makinson? I do not recollect, your Honor.
2939. Which is it you do not recollect, the property or the information? I do not recollect either, your Honor.
2940. Not either? No.
2941. Did you go to Mr. Makinson's office and offer to sell him information concerning some landed property supposed to belong to a man named Jenkins, at Liberty Plains? I do not recollect it.
2942. Before visiting Mr. Makinson, did you search against that property? No.
2943. Did you call upon or see the members of the Marist Brothers, or any religious order, in any part of the Colony? No, not that I can recollect.
2944. Can you swear you did not call upon some such religious order or association and offer to sell information with regard to land you alleged to belong to it? I cannot recollect that I did.
2945. My question is can you swear that you did not? I cannot swear.
2946. Can you swear that you did not call upon Mr. Makinson and make to him a like offer? No.
2947. Did you call upon Mr. Makinson on any occasion and offer to sell him information with regard to land you alleged to be the property of a religious order, known as the Holy Sisters of the Good Samaritans? I do not recollect it.
2948. Can you swear that you did not visit Mr. Makinson and make him some such offer? I do not think I did.
2949. Can you swear that you did not? No.
2950. Can you swear that you did not on another occasion visit Mr. Makinson, and offer to sell him certain information? I do not think I did.
2951. I ask you again to be careful, did you visit Mr. Makinson and offer to sell him information about land which you alleged to belong to the Holy Sisters of the Good Samaritans? I do not recollect.
2952. Did you ever offer to sell Mr. Makinson information about land alleged to be the property of a member of the Plunkett family? Not that I can recollect.
2953. Can you swear that you did not make any such offer? I think I spoke to Mr. Plunkett. I have a recollection of speaking to him about this piece of land.
2954. What did you say to him? [No answer.]
2955. Where was the piece of land in question situated? At Waverley. I think it belonged to him.
2956. What offer did you make in regard to that piece of land? I wanted to know whether he would sell it.
2957. That is no answer to my question;—What offer did you make for that piece of land? I forget now.

- E. C. Hopkins. 2958. Do you know Mr. Donnelly Fisher, a member of the firm of Fisher, Ralfe, and Macansh, solicitors, in this city? Yes.
- 2 Nov., 1893. 2959. Did you ever send to him a letter about land alleged to belong to him? I think I wrote to him, and asked if he wanted to sell some land.
2960. Where was that land situated? I think it was a piece of land out Botany way.
2961. How came you to know that Mr. Fisher had any interest in that land? I think I had a search made.
2962. Who searched for you on that occasion? I think Mr. Doyle made the search.
2963. What did you offer for that land? I forget now.
2964. How many acres of land were there? I forget the area.
2965. Do you not know what the area was, or even what you offered? I do not think I do.
2966. How came you to offer a price for land, the area of which you were ignorant? I may have been somewhere near it, but I do not know the exact quantity of land. I did know that there was a piece of land, but I was not certain of its area.
2967. About what then did you think the area of that land was? I forget now.
2968. Was it an acre or a number of acres? It might have been a few acres.
2969. Was the area of that land 14 acres? Yes, it might have been; I do not recollect.
2970. Was the price you offered £160? It might have been; I am not certain.
2971. Are you aware that when the title of that land was brought under the Real Property Act, that the land was valued at about £1,300? No.
2972. Have you said you obtained information about that land by having a search made? Yes.
2973. How came you to have that search made? Somebody told me, I do not recollect who it was, that there was a piece of land lying out there vacant. I got the information outside the office, and then I caused a search to be made. I got Mr. Doyle on several occasions to make searches for me.
2974. Did you receive that particular information from any person or papers inside the Registrar-General's Department? No, your Honor.
2975. Did you not, as a fact, receive that information from papers lodged in another case for the purpose of bringing a title under the Real Property Act? No.
2976. On how many occasions did you get Mr. A. K. Doyle to search for you? I cannot tell you the exact number. I employed him on several occasions, I think.
2977. Can you give me any idea of the number of occasions you employed Mr. Doyle to search for you? No.
2978. Were the occasions many? I do not really recollect the number.
2979. Can you tell me the matters in which you so employed him? No.
2980. Were they matters in which you were personally interested? There was the Dean matter.
2981. You have mentioned that already. Was there any matter other than Dean's in connection with which you employed Mr. Doyle to search? [No answer.]
2982. Again, I ask you can you remember any matter other than that of Dean's in which you employed Mr. Doyle to search? No; I cannot.
2983. How came you to have a search made or to search in matters in which you were not personally interested? My idea was to try to buy this particular piece of land.
2984. Can you tell me how many times you employed Doyle to search for you? I cannot recollect, your Honor.
2985. On the occasions he made searches for you, how did you give him instructions? I just put it down on a piece of paper.
2986. What did you put down on paper? I asked him to make a search.
2987. Did you specify the property or name against which you wished the search to be made? I used to give him the name, as near as I could recollect.
2988. What name;—the name that appeared where? The name of the person which would be given to me.
2989. Where would you get that name from? I got it very likely from persons outside the office.
2990. Did you ever get such a name from any register or document inside the office? No.
2991. Did you, besides giving the name, specify the position of the property? I gave the situation as well as I could.
2992. Where did you learn the situation of the property or properties? I was told of it.
2993. Did you ever yourself consult the registers? Not for that purpose.
2994. During how many years did you instruct Doyle to search against properties? Perhaps five or six years.
2995. In connection with how many properties? I cannot tell you.
2996. Was the number more or less than twelve? There might have been more there might have been less.
2997. Cannot you remember something more definite than that? I cannot. Doyle has not done anything for me in this line during the last four or five years.
2998. Did you keep any books at that time? No.
2999. Did you make any entries anywhere of the money you paid away for these searches? No.
3000. Did you make any entries specifying the properties in regard to which you paid away these moneys? No.
3001. Do you know Mrs. Mary Stedman? Yes.
3002. When did you first meet her? I think sometime this year when she called at the office to see me.
3003. Was it this year or last year? I would not be certain.
3004. Was it in winter or in summer that she called upon you? I cannot remember.
3005. Was any person with her when she called upon you? No; she came to the office alone.
3006. Do you know a man named James Pickering? Yes.
3007. How long have you known him? I suppose seven or eight years, perhaps more.
3008. What is he? I do not know what he does. He used to be a great shooting man.
3009. Where did you first know him? I met him first out at Hurstville.
3010. When did you last see him? About two months ago.
3011. Where? At the Registrar-General's Office.

E. C.  
Hopkins.  
2 Nov., 1893.

3012. Did Pickering then call to see you? Yes.
3013. What about? I think it was about Mrs. Stedman's matter.
3014. What did he say to you? He asked me about some property of his own. I told him he had better consult somebody else.
3015. Have you seen Pickering at any time at the Registrar-General's Office with Mrs. Stedman? Yes; I think he did come there once.
3016. Had you seen Mrs. Stedman before you saw her with Pickering? Yes; I think Pickering sent her to see me.
3017. What did she say to you on that first occasion? She said Pickering had sent her in to see me with reference to property belonging to some of her people, I do not recollect whom. She wanted me to give her advice, and tell her what she had better do in the matter. She told me exactly about the matter, and I told her that I could do nothing myself in any way, but I said I had a brother-in-law, to whom I would speak, and see if I could get him to do anything in the matter. Then something was said as to payment for services rendered. She said she did not want to pay anything. I told her she would have to make some arrangements, and that she would have to give either one-half or one-quarter of any property that might be found. I said this much to her, afterwards I thought over the matter, and I also gave some attention to what had occurred in 1890 when I had been reported. I at once determined to abandon the whole thing, and have nothing to do with it, and I did not have anything to do with it.
3018. Did Mrs. Stedman on that occasion lead you to believe that she was entitled to many properties? Yes. She led me to believe that she had been done out of properties. I felt sorry for her at the time, and I said I would assist her.
3019. Was your share to be one-half or one-quarter for this assistance? I had no share, but I said who ever looked into the matter would expect some interest. I said a half interest at first, but she would not agree to that, and then I said a quarter interest. I distinctly told her I would not do anything myself, for after I had thought it over, I determined to have nothing at all to do with it.
3020. Did you tell Mrs. Stedman that you would not? I told her at the time, "I would see," but in my own mind, I determined to have nothing to do with it.
3021. After that interview, did Mrs. Stedman call again? I am not certain whether she called or whether she wrote me a letter.
3022. Did Mrs. Stedman call with Pickering when that first interview took place? Yes; they might have called.
3023. The question is not "might have called," did they call? I do not recollect them calling.
3024. At that interview when Pickering was present, did Mrs. Stedman say to you in his presence, "Now mind you are only to receive one-fourth and not one-half for your share in this matter?" I do not recollect her saying that.
3025. Will you swear she did not say that? I know she made some reference as to what the amount was to be, and she may have said it, your Honor.
3026. Do you now think there was any such interview between yourself, Pickering, and Mrs. Stedman? Yes; I think there was an interview at which both were present.
3027. What is the name of your brother-in-law? Dean.
3028. What is he? He has no occupation at present.
3029. Is he a searcher? No.
3030. Is he a law stationer? No.
3031. Is he a professional man of any kind? No; I never spoke to him about this matter in any way.
3032. On how many occasions did Mrs. Stedman call to see you? She might have called twice.
3033. How often do you remember that she called? Two or three times; I cannot recollect.
3034. On any occasion did you tell her that the "property at Hurstville was alright," or that "the property at Petersham was alright"? I think I made some inquiries from someone outside.
3035. Did you tell her that these properties were alright? I told her I was under the impression that the properties were there, as I had made inquiries.
3036. Is it not a fact that you had consulted the registers in reference to these properties? No; I never searched, your Honor.
3037. Did you give Mrs. Stedman any information about any other properties? I think that was all.
3038. About what properties did you give her information? I think the only two properties you mention—properties at Hurstville and Petersham.
3039. Did you take any step or make any attempt to recover some deeds Mrs. Stedman alleged to have been stolen from her father's house? No.
3040. Did you speak to any detective, private or otherwise, about this particular matter? Not that I can recollect.
3041. Did you speak to a man named Bradley about this matter? No.
3042. Did you send a man named Bradley out to Mrs. Stedman's place? I do not recollect, your Honor.
3043. Did you, at any interview with Mrs. Stedman, tell her you had sent a detective out there, and that his name was Lyons? No; I do not recollect it.
3044. Will you swear that such a thing did not take place? I have no recollection, your Honor.
3045. I ask you again, can you swear that such a thing did not take place? I cannot, your Honor.
3046. On the 20th September, 1892, did you receive a letter from Mrs. Stedman? I think I received one.
3047. Did you receive one or two? I might have received two.
3048. How long was that after Mrs. Stedman first saw you? I cannot say.
3049. Have you those letters at home? No; I have not.
3050. What did you do with them? I think I destroyed them.
3051. Look at this letter. [*Letter produced and examined by witness.*] Is that a copy of the letter that you received from Mrs. Stedman? Yes; I daresay it is. I recollect some of the words, but I do not recollect the whole.
3052. Have you any doubt but that it is a copy? I fancy the letter that I received was something similar.
3053. Are you satisfied that the date is correct? I cannot swear to the date.
3054. In your opinion, is it a correct copy of the letter you received? It may be correct.
3055. Can you say whether this is a copy of the second letter you received from Mrs. Stedman. [*Letter dated 28th September, 1892, handed to witness and examined*]? I recognise this to be a copy of the second letter.

- E.C.Hopkins. 3056. Are you satisfied that this date, the 28th of September, 1892, is correct? Yes; I take that to be correct.
- 2 Nov., 1893. 3057. Can you tell me how many weeks before the 28th of September it was you first saw Mrs. Stedman? I cannot tell you. I do not recollect.
3058. After you had seen Mrs. Stedman, did you yourself search, or procure any other person to search, in the Search Room of the Deeds Branch at the Registrar-General's Department? No.
3059. Did you make inquiries from persons outside the office? Yes; I think I made inquiries from one of the council clerks.
3060. What council clerk? The council clerk of the Canterbury Municipality.
3061. Where were you living at that time? At Paddington.
3062. Where did you see the council clerk from Canterbury? I think it was in town. He came into the office.
3063. What is his name? Hardwick.
3064. In what part of the office did you see him? I think he came into our room.
3065. What for? I do not recollect just now. I am not certain how it was.
3066. After receiving this last letter, dated the 28th of September, did you do anything further in the matter? No, your Honor.
3067. Did you establish Mrs. Stedman's right or title to any property? No.
3068. Did you receive anything from her? I did not. I did not expect anything, as I did nothing except make a few inquiries, and the result I gave to her.
3069. After the 28th of September, 1892, when did you next hear of Mrs. Stedman's business? I did not hear anything more about it until quite recently—a few days ago. Pickering asked me if anything had been done in this matter, and I told him "no, nothing had been done."
3070. Did you see Pickering on more than one occasion about this matter of Mrs. Stedman's? Perhaps once or twice.
3071. On how many occasions? Perhaps twice.
3072. How long ago is the first of these two occasions? I cannot say from memory, I do not recollect.
3073. Was it this year? I think it was last year.
3074. You have already sworn to one occasion being this year, was the other occasion this year or last year? They must have been both last year.
3075. You have already sworn to me that Pickering called on you about two months ago, what am I understand? Yes; he did.
3076. Do you wish to withdraw that answer now? He did call, your Honor, I think I have seen him once this year.
3077. Have you seen him on any occasion other than about two months ago since the 28th of September last year? No.
3078. I ask you again have you seen Pickering on any occasion other than that one you mention of two months ago? No.
3079. Did not Pickering seem to think two months ago that you were still acting for Mrs. Stedman? I fancy he thought I was acting.
3080. In addition to that interview with Pickering, what did you next hear of the matter? I heard something from the Registrar-General.
3081. When? Some few days ago.
3082. How came you to see the Registrar-General? I think I went to know if he had heard when anything was likely to be done. I called to see him.
- 3082½. Before you called did you know that Mrs. Stedman had seen the Registrar-General? No, your Honor.
3083. Did you know that the Registrar-General knew anything of Mrs. Stedman's business? No.
3084. What conversation took place between you and the Registrar-General? He spoke to me about Mrs. Stedman, and asked me if I knew her, and if I had done anything for her. I told him I knew her, but that I had not made any searches, or done anything in that way.
3085. Did you not admit to the Registrar-General that you had agreed to accept one-fourth of the value of any land, the title to which you might disclose to Mrs. Stedman? He misunderstood me if he took it that way, for I told him I would take the matter to my brother-in-law to do.
3086. Did you not attempt to shelter yourself by saying there was no agreement in writing? No; I did not want to shelter myself in any way, for the simple reason that I had really done nothing.
3087. Is there any other matter you would like to bring before this Commission, or do you desire me to ask you any other question? No.

[The witness withdrew.]

*Afternoon Sitting at the Registrar-General's Office.*

Christopher Williams Campion Hatton recalled:—

- C. W. C. Hatton. 3088. *Commissioner.*] Is it not your duty to deal principally with the indices? That is the searching part of my duty.
- 2 Nov., 1893. 3089. In what condition are the index books? Some are in very bad order, indeed. Some are badly written and mixed up.
3090. What books are in that order? The books of Realty.
3091. Are these the only indices with which you have to do? The only ones.
3092. Can you speak of the condition of index books in other matters? No.
3093. Can you tell me what index books you have noticed to be in the worst condition? Some of the books in the handwriting of Mr. John Duff.
3094. Of what do you complain in these indices? Bad writing—the writing is very cramped. Omissions have been made and afterwards supplied. There is not sufficient space left to fill in anything properly.
3095. Did you ever discover any omissions in these indices? Not a great many; but I found on one or two occasions mistakes, and in some instances deeds have been omitted.
3096. When you have found that a deed has been omitted, what did you do? I have drawn the attention of the officer in charge to it.
- 3097.

3097. And what has then been done? The officer in charge generally had it corrected, and the omitted portion inserted.
3098. Have you any other complaint to make concerning these indices? No.
3099. In what condition are the older books of indices? Very good, indeed.
3100. How have the indices been compiled? Apparently, very carefully.
3101. Have you found any mistakes in the later books of indices? No; not in the later books.
3102. Has your attention been called to mistakes which have been discovered by other persons? I think, on one occasion, lands were generally described in the index under the heading of "All other Lands," which happened in one index.
3103. Can you call to mind any other omission? I cannot.
3104. How many years experience have you had in searching? Altogether, forty years.
3105. During all that time, has it been the custom to allow searchers to take extracts? Yes.

C. W. C.  
Hatton.  
2 Nov., 1893.

[The witness withdrew.]

William Lachlan Dawes sworn and examined:—

3106. *Commissioner.*] How long have you been a clerk in the Registrar-General's Department? Since September, 1858. W. L. Dawes.  
2 Nov., 1893.
3107. How long have you been chief clerk in the branch for the registration of births, deaths, and marriages? Since 1869.
3108. Until lately were the registers belonging to your branch kept in the general Search Room? Yes: downstairs.
3109. Have most of them been removed? Yes.
3110. Are any of your registers now kept in the Search Room? Only at night, when the current ones are placed in that room for security.
3111. When your registers were kept in the Search Room, was it necessary that the clerks from time to time should visit that room? Yes; and one clerk would constantly be there.
3112. What is his name? Thompson.
3113. Was Thompson the clerk who actually made the searches when information was required by the public? Yes; Thompson made the search, but in cases where "No record" was written opposite his search, that search was then checked by Bucknell.
3114. Who took the certificates from the registers? Thompson.
3115. Who compares these copies with the originals? I do that. I then pass them on to the accountant to see if the fees are right, and they are then sent in to the Registrar-General for signature.
3116. Did your duty take you to the Search Room each day? Yes; and sometimes oftener in cases of urgency.
3117. In ordinary circumstances what time elapsed between information being asked for and information being given by you? The general rule is, that if a certified copy is ordered one day, the information is supplied on the next.
3118. Have you had any complaints about general delay? We have had none.
3119. Do the clerks under your supervision work overtime? Yes.
3120. For what purpose? For indexing all the books of the year.
3121. Do they work overtime throughout the whole year? The overtime work generally lasts about six months. There is a lump sum provided for this purpose, and we work when we like.
3122. Is your whole staff engaged on these occasions? Hitherto the juniors have not worked overtime, but this year we have taken two juniors on for that purpose.
3123. Do you take clerks from any other branch for overtime work? Yes.
3124. What other clerks have you taken? We have had Mr. Mallon over from the Land Titles Office.
3125. Where do you do this work? We use the Search Room of the Deeds Branch when making our final examination.
3126. How many work when examining? The work is done by batches of three, and there may be two batches working at the same time.
3127. At any time do less than three work? Yes.
3128. Is the work done singly before the final examination? Yes.
3129. May that work be done at home? Yes.
3130. How much is done away from the office? The larger portion of it, I think.
3131. What documents are taken away from the office to allow of this? Only the slips are taken from which the actual indexes are compiled.
3132. Is any original document taken away? No.
3133. Is any record removed? No.
3134. Does any clerk work overtime in the office? Not to my knowledge.
3135. Are you always in charge of the clerks who may be working overtime for the purpose of making a final revision? I am the supervising officer. I start the work, and call in occasionally to see how it is proceeding. That has been my practice during the last two years, but previous to that I worked myself, and then I saw all that was going on.
3136. At any time you have been there have you ever seen any of the clerks referring to or in any other way interfering with the deeds registers? No.
3137. Have you seen any clerk working overtime in the Search Room? No; except on our own particular business.
3138. Have you ever seen Mr. Gillam working overtime in the Search Room? Yes; I think I have.
3139. On many occasions? Sometimes I have seen him there alone, and sometimes I have seen him working there while we were working overtime.
3140. Have you seen any other clerk working overtime in the Deeds Room? Several of the staff—I cannot remember whom now.
3141. Have you ever seen any clerk working there by himself? Yes.
3142. What clerk or clerks have you seen working alone? I have seen Mr. Gillam, and some of his staff.

[The witness withdrew.]

Osterly Lindsley Thompson, sworn and examined :—

- O. L. Thompson.  
2 Nov., 1893.
3143. *Commissioner.*] How long have you been a clerk in the Registrar-General's Department? Since November, 1889.
3144. Have you been in the Births, Deaths, and Marriages Registration Branch? Yes; the whole time.
3145. Holding the same position you are holding now? I have been in all the junior positions.
3146. What position do you now hold? If Mr. Hopkins were there, I should be Search Clerk.
3147. Before your registers were removed from the Deeds Search Room was your desk in that room? Yes.
3148. Was it your duty to make certified copies of entries? Yes; and to make all searches.
3149. In cases where your search was unsuccessful, what course of procedure did you follow? I was checked by W. W. Bucknell.
3150. In cases where your search was successful and you made a copy of an extract what was done with that copy? In the early part of my experience it was examined by Hopkins, but that was before the present Registrar-General took office; then it was altered to Mr. Dawes, the chief clerk, and Mr. Dawes makes the examination now, and after the examination has been made, I pass the copy on to the Accountant.
3151. On any occasion have you seen Hopkins searching a Register? Yes.
3152. Have you seen Hopkins searching in a deed register? On one occasion I saw Hopkins look at some book that was not a birth, death, or marriage register.
3153. How long ago is that? I cannot say; it is a good time now.
3154. Was that before Mr. Pinhey was appointed Registrar-General? No. The book was brought into my room and placed on a little table at the back of me.
3155. What actually happened? He brought in two registers and looked at them.
3156. As far as you can say, did Hopkins take any extracts? I do not think so, your Honor.
3157. Had he any pencil in his hand? I do not think so.
3158. How long was he looking at these two registers? It happened on two occasions, and I think each examination lasted about five minutes.
3159. Did he say anything to you or did you say anything to him about what he was doing? No, your Honor, not a word.
3160. How long after Mr. Pinhey was appointed did this happen? I cannot say exactly, but I know that Mr. Pinhey was quite new here at that time. It must have been soon after his appointment.
3161. Where these the only two occasions on which you have seen Hopkins referring to registers other than your own registers? Yes; these were the only two occasions.
3162. Have you seen any other clerk, in your branch, referring to the deed registers? No.
3163. Have you seen Mr. Bucknell doing so? No.
3164. Do you work overtime? This year I have been taken on, but I have not done it before. I have relieved once or twice, when another clerk was sick and then worked overtime.
3165. What did you do? I helped in making the final examinations.
3166. On any occasion, when you have been working overtime in the Search Room, have you seen any clerk consulting any deed register? Only the clerks in the Deeds Branch.
3167. What clerks, in the Deeds Branch, have you seen consulting the deeds registers after office hours? I think I have seen Mr. Gillam, Mr. Begbie, and Hill, the book-porter, in that Search Room after office hours.
3168. Have you ever seen any of these three working by himself after hours? No, your Honor.
3169. Till what hour have you seen them working? From half-past 4 to a quarter to 5.
3170. Have you seen Mr. Gillam working later than that? Yes, at his desk, but not at the registers.

[The witness withdrew.]

George Evans sworn and examined :—

- G. Evans.  
2 Nov., 1893.
3171. *Commissioner.*] What are you, Mr. Evans? I am a solicitor of the Supreme Court of New South Wales.
3172. How many years experience have you had? About thirty.
3173. During that time have you, either yourself visited the Search Room in the Deeds Branch, of the Registrar-General's Department or sent your clerks there to obtain information? Yes. During the whole of that period.
3174. During the whole of that period has it been the custom to allow extracts to be taken? Yes.
3175. In your opinion is it necessary that extracts should be taken? Yes; I do not see how you can do without them.
3176. Do you now at any time visit the Search Room? I visited it in that case Campbell against the Anglo-Australian Investment Finance and Land Company (Limited), when I came in to see certain deeds. I think I was in about four times afterwards, and then it has been to check my searcher's work.
3177. In your opinion is the supervision over persons searching sufficient? I do not think it is.
3178. On any occasion have you been unable to obtain a register when you desired to make a search? Not at any time that I can recollect.
3179. Has it ever been reported to you by any search clerk that he has been unable to obtain a register? No.
3180. Can you suggest any alteration in the mode of conducting the searches? The supervision should be greater as I consider that people searching could alter the dates in the registration copies. It is quite possible that alterations could be made were a person so minded.
3181. Are you familiar with the mode of procedure in the Land Titles Branch? I am not very familiar with it. I have made searches there, but the mode of procedure in that branch is so different that it would be hardly fare to compare it with the system followed in the Deeds Branch.
3182. In your opinion would the supervision be sufficient if more than one book-porter was engaged in the Search Room of the Deeds Branch? In my opinion it would take three to keep a fair watch on that branch of the Registrar-General's Department.
3183. Do you remember being in the principal draftsman's room, at the Registrar-General's Office some-time before the trial of the action—Campbell against The Anglo-Australian Investment Finance and Land Company (Limited)? Yes; it was before the trial in question.
3184. Can you say in what month it was? It would be about May, I think.

3185. On that occasion was one book of indices and some registers produced to you? Yes.
3186. Do you now see the book of indices? Yes; "Grant index, No. 3, 1831 to 1839."
3187. Do you now see one of the registers then produced? Yes.
3188. How is that entitled? "Purchases and special grants 'C,' 1831."
3189. On that occasion did you see any other book? Previously to this being brought up I saw another which was rejected. I saw a "register of purchases of land, No. 28," which was discarded because it contained registered copies of grants for the year 1835 only. About twenty minutes later they brought up "Grant index, No. 3, 1831 to 1839," which I referred to and "purchases and special grants 'C,' 1831," which I also referred to.
3190. Are you certain now that the register before you is the register you saw on that occasion? I am nearly certain it is—to the best of my belief it is.
3191. On that occasion was Mr. Pearson the principal draftsman with you? Yes.
3192. After inspecting these books did you leave Mr. Pearson's room? Yes.
3193. Were you afterwards called as a witness before His Honor the Chief Justice in the case of Campbell against the Anglo-Australian Investment, Finance, and Land Company (Limited)? Yes.
3194. On that occasion, when in the witness-box, was a register produced to you? Yes.
3195. Was that the register in manuscript that you now have before you? No.
3196. Was that register produced to-day? Yes.
3197. What register is that? "Register of purchases of land, 28."
3198. Was any other register produced at that time? No.
3199. After seeing that register in manuscript "purchases and special grant C," in Mr. Pearson's room when did you next see it? In the Supreme Court the day after I had been in the witness-box.

[The witness withdrew.]

Robert Mead Pearson recalled:—

3200. *Commissioner.*] Did Mr. George Evans, a solicitor, come to your room in the Registrar-General's Department during the month of May last? Yes.
3201. On that occasion, was one book of indices and some registers produced to you and to him? Yes.
3202. What book of indices was produced? "Grant index, No. 3, from 1831 to 1839," covering grants between those years.
3203. Was a register then produced? Yes; a "register of purchases of land, No. 28."
3204. Did you refer to that register? Yes; and found that the grants were all in 1835, and we discarded it as we were looking for grants in 1833.
3205. Was another register then produced to you? Yes.
3206. What register was that? "Purchases of special grants C."
3207. Did you inspect that register? Yes.
3208. Is that register in manuscript? Yes.
3209. Did you discover the copy of the grant for which you were searching? No; there is no such grant in the book.
3210. What does "special grant C" contain? Copies of special grants from 1831 to 1834.
3211. Were these the only three books that were then produced to you? Yes.
3212. Was that last register the only one you inspected? Yes; for the purpose of finding a grant supposed to have been issued in 1833.
3213. So that, although three books were produced, you only inspected one? Yes.
3214. Were you afterwards a witness in the Supreme Court in the case of Campbell against the Anglo-Australian Investment, Finance, and Land Company (Limited), tried before His Honor the Chief Justice? Yes.
3215. On that occasion, when in the witness-box, was a register placed in your hands? Yes; a "register of purchases of land, No. 28."
3216. Was any other register placed in your hands? No.
3217. Can you remember what you were asked about that "register of purchases of land, No. 28"? I was asked if that was the book that Mr. Evans and I inspected together, and I said emphatically "No."
3218. Was it, in fact, the book you did so inspect? No.
3219. After seeing that "purchases of special grants register C" in your own room, when did you next see it? I went and found it in the grant room the morning after I was in the witness-box, and I then took it into Court.
3220. Had that register been lost or mislaid? No.
3221. Can you explain why it was not produced when you were in the witness-box? Because of it having been called a "Cumberland register," which it was not.
3222. Did the mistake arise by calling the "purchases of special grant C" a "Cumberland register, No. 28"? Yes.

[The witness withdrew.]

FRIDAY, 3 NOVEMBER, 1893.

[The Commission met at 10 o'clock.]

Present:—

HIS HONOR JUDGE FITZHARDINGE.

Frank Osborne sworn and examined:—

3223. *Commissioner.*] What are you, Mr. Osborne? I am a solicitor of the Supreme Court of New South Wales, and member of the firm of Norton, Smith, & Co.
3224. How many years experience have you had in the legal profession? Twenty-seven years altogether.
3225. Have you on many occasions had to visit the Search Room of the Deed's Branch in the Registrar-General's Department? No; I have been there very seldom. Our searches have been made by our search clerks and by our law stationers.

G. Evans.  
2 Nov., 1893.

R. M.  
Pearson.  
2 Nov., 1893.

F. Osborne.  
3 Nov., 1893.

- F. Osborne.  
3 Nov., 1893.
3226. On any occasion has it been reported to you that a register was missing from the Search Room? No.
3227. In your opinion is it necessary that persons searching should be allowed to take extracts? Certainly; otherwise it would be almost impossible to conduct our practice with advantage to our clients.
3228. Have you ever been approached by any clerk in the Registrar-General's Department with offers of information? No.
3229. Occasionally have you to order copies of deeds from that department? Yes.
3230. Do you find that your orders are promptly fulfilled? No, the reverse.
3231. Can you account for the delay in any manner? Yes; by the fact of there being, as I am informed, only one person employed to make copies of deeds, and his absolute inability to make such copies in a reasonable time.
3232. Are your search clerks and those persons you employ to make your searches under your immediate supervision? Yes.
3233. Have you occasionally to visit the Search Room? Yes.
3234. On these occasions has it appeared to you that the supervision over persons searching is sufficient? It is totally insufficient.
3235. Have you had experience in searching in other registers? Yes; in the Middlesex Registers in London.
3236. What supervision is exercised over searchers there? Two or three men are constantly patrolling the room.
3237. How many men, in your opinion, should be engaged in actual supervision in the Deeds Branch of the Registrar-General's Department in Sydney? I think one man would be quite sufficient if he were diligent in the performance of his duties.
3238. When you have been in the Search Room, have you seen any person who appeared to be supervising the searchers? No; I have not.
3239. Can you tell me what is the longest period you have been kept waiting for ordered copies of deeds? I should say the longest delay was about twelve days.
3240. Have you been delayed on many occasions? Yes; on nearly every occasion on which copies have been ordered.
3241. What would you consider a reasonable time in which copies should be supplied? I should say forty-eight hours, and that is allowing very reasonable latitude.
3242. Are these copies in manuscript? Yes.
3243. Can you suggest any alteration in that respect? It would be an improvement to have the copies type-written in each case.
3244. Would that increase the cost? It should have the effect of decreasing the cost.
3245. Would the labour in making these copies be greater or less? Infinitely less.
3246. Would it follow, if only one person were employed, that the delay would not be so great? There would not be anything like the delay if the type-writer were experienced.
3247. For copy deeds you have now ordered, what fee have you to pay? I have been told by my clerk who has ordered them that the sum of £10 has to be paid down.
3248. Have you any other suggestion to make with respect to copy deeds? Yes. Following upon their being type-written, I would suggest that as regards the profession that copies should be allowed to be made by a person nominated under the supervision of the clerk in charge of the records. I suggest that copies of deeds should be so made, and that each copy should be examined by a clerk specially appointed for that purpose.
3249. Have you considered whether it would be advisable to allow searches to be made only by licensed searchers? Certainly.
3250. How do you suggest that these persons should be licensed? They should be nominated by letter from the solicitor by whom they are employed, and they should then be licensed by the Registrar-General.
3251. Do you suggest that only persons so licensed should be allowed to search? Certainly.
3252. To limit the right of search will it not be necessary for further legislative enactment? Yes.

[The witness withdrew.]

Henry Burton Bradley sworn and examined:—

- H. B. Bradley.  
3 Nov., 1893.
3253. *Commissioner.*] How many years experience have you had as a solicitor of the Supreme Court? From December, 1832, that is sixty-one years. I was appointed third clerk of the Supreme Court. I think I might say that my actual and responsible experience commenced in February, in 1834, so that is fifty-nine years.
3254. During all these years of your experience have persons searching in the Deeds Branch been allowed to take extracts? Always.
3255. In your opinion is it necessary that people should take extracts? I do not know for what purpose any person could search if he did not.
3256. If persons were not allowed to take extracts would it be necessary in most cases to obtain a copy of the deeds registered? I think not. I think the same purpose might be served by getting official extracts.
3257. In your experience have you, at any time, been unable to procure a register in the Search Room of the Deeds Branch in the Registrar-General's Department? I have never been unable to obtain a volume.
3258. Has it ever been reported to you by any clerk you have instructed to search or by any law stationer you have instructed to search that a register has been missing? I have never heard of any such thing.
3259. Of late years have you visited the Search Room of that Department? I suppose I have been in there once, may be twice, in the course of the last ten years.
3260. Are you in a position to express an opinion as to whether the supervision over persons searching is sufficient or not? I am not. I have never known of any supervision exercised except occasionally an officer might have observed some one taking a long extract.

[The witness withdrew.]

Alfred John Cape sworn and examined:—

3261. *Commissioner.*] What are you, Mr. Cape? I am a solicitor of the Supreme Court, and senior member of the firm of Cape, Kent, and Gaden.

3262. How many years' experience have you had in the legal profession? Over twenty-five years.

3263. During that time have you on many occasions visited the Search Room of the Deeds Branch in the Registrar-General's Department? Not so many of late years.

3264. On any occasion have you been unable to procure any register you desired to inspect? No, never.

3265. Of late years have your searches been performed by clerks? Yes; and occasionally revised by myself, but I have not made it a regular practice.

3266. Has it ever been reported to you by any clerk you have instructed to search that a register was missing? No, never.

3267. Of late years do you occasionally visit the Search Room to check the search? Yes; to examine the deeds that have been referred to in the search.

3268. In your opinion, is the supervision over persons searching in that room sufficient? I think so, as far as I can judge. The last time I was there, some few weeks ago, the accommodation seemed to be extremely limited. The registers were spread about the floor, and there was very little convenience for the public.

3269. Are the facilities for searching sufficient? I do not think so. By reason of the want of accommodation for the public, and the congested state of the room. There is far from sufficient room even at the counter, and when you leave the counter to examine deeds and registers, in doing which it is often necessary to absorb a considerable amount of time, you have very little accommodation for making these necessary examinations.

3270. With the room at command, can you suggest any alteration? I do not think so, from the fact that there are so many books there. There is no place in which these books can be put. The last time I was there I saw a large number of registers lying on the floor for want of space, in which they should be stored, and, as a consequence, room has been taken up that should be at the disposal of persons desirous of examining deeds and registers.

3271. During all the years of your experience, has it been the custom to allow extracts to be taken? Yes.

3272. In your opinion, is it necessary that persons searching should be allowed to take extracts? Unquestionably, for the very plain reason that you have to possess yourself of the contents of the deeds you find in the index and what the effect of the deed is, otherwise a search would be an absolute waste of time. It appears to me, and I have no hesitation in saying so, it is absolutely necessary for a searcher inspecting deeds to take extracts.

3273. On any occasion have you found an entry in any book of index to be faulty? Yes; in so far as it does not correctly represent the deed which purports to be in the index.

3274. In what respect? Sometimes there has been a mistake, a slight mistake it may be, which a careful searcher might discover in the names.

3275. In the surname? Yes. There may be the name of Mac, clearly Mac, in the deed, that might be M'Donald or McDonald. The index is alphabetically arranged, and, of course, Mac would come before the M'Donald. The person searching down against MacDonald coming to the end of the Macs would stop; further on he might find McDonald wrongly entered. The fact of such cases existing shows the necessity for great care in indexing.

3276. Have you on any occasion found the parcels wrongly described? I cannot call to mind any just now, but I have found the nature of the deed wrongly given.

3277. In your opinion, if an index be compiled, should not the greatest possible care be exercised in its compilation? Yes.

3278. Have you ever discovered any deed omitted from the index? I think there have been some few occasions, but I cannot recollect any particular one. I think it may have been owing to purely clerical slips. I think the risk would be considerably diminished if the indexing clerk were a competent man, having the assistance of a competent checking clerk.

3279. Do you find that the books of index are kept up to date? I have frequently had occasion to call attention to the fact that they are not, but whether such is the case just now I cannot say.

3280. Was the cause of the delay in writing up the index explained to you? As regards the registration of transfers of conditional purchases, I have been given to understand that frequently these transfers are sent up in very large batches for registration, and the officials are unable, as a consequence, to keep the work of indexing up to date. These conditional purchase transfers come from the Lands Office, and are probably returned to that department, and remain there for some considerable time after their lodgment before being submitted for registration. The practice of the department, as far as I know, has been as follows:—If we are dealing with a transfer of land—say in the Murrurundi district—we send that transfer with the registration copy of the transfer to the local Land Office with a fee of 7s. 6d. I believe the local Land Officer looks into the whole matter and sees if the transfers, as far as his books disclose, are satisfactory. Then the papers are sent down by him to the principal officer of the Lands Department, where further inquiries are made, and if there is nothing discovered against the transfer it in its order is sent on to the Registrar-General's Office for registration. These proceedings take some time, and in the interval sometimes dealings may take place which would result in a transfer being over-ridden. As a matter of practice, we very often take additional assurances and register them ourselves to guard against any contingencies.

[The witness withdrew.]

Patrick William Creagh sworn and examined:—

3281. *Commissioner.*] What are you, Mr. Creagh? I am a solicitor of the Supreme Court, and senior partner in the firm of Creagh and Williams.

3282. How many years' experience have you had? Over thirty years—about thirty-three years altogether.

3283. During that time, have you had frequently to visit the Search Room of the Deeds Branch in the Registrar-General's Department? I have had to, but my duties do not lead me in the direction of searching, and I never was a regular searcher.

3284.

A. J. Cape,  
3 Nov., 1893.

P. W. Creagh,  
3 Nov., 1893.

- P. W. Creagh. 3284. On any occasion have you been unable to procure any register you desired to inspect? No; I have never been unable to obtain any register I required.  
 3 Nov., 1893. 3285. Of late years have you instructed your different clerks to make searches? Yes; but as a rule my searches are more frequently made by law stationers.  
 3286. Has it ever been reported to you, either by any of your own clerks or by any law stationer you have instructed to search, that a register was missing? Never to my recollection.  
 3287. During the years of your experience has it been the custom to allow persons searching to take extracts? Yes; short extracts.  
 3288. In your opinion, is it necessary that persons searching should be allowed to take extracts? I think they should be allowed to take extracts.

[The witness withdrew.]

John Dawson sworn and examined:—

- J. Dawson. 3289. *Commissioner.*] What are you, Mr. Dawson? I am a solicitor of the Supreme Court, and the head of the firm of John Dawson and Son.  
 3 Nov., 1893. 3290. How many years' experience have you had, Mr. Dawson, as a solicitor? About fifty-eight years altogether.  
 3291. During that time, have you on many occasions had to visit the Search Room of the Deeds Branch in the Registrar-General's Department? Not for the last twenty-five years.  
 3292. During the years that your duty did take you there, were you ever unable to find a register you desired to inspect? I think I am safe in saying no.  
 3293. Since you have ceased to visit that room have your searches been made by your own clerks? Mostly by my own clerks, but there may have been exceptional cases, but not many, when some special searches have had to be made.  
 3294. Has it ever been reported to you by any clerk you have instructed to search that a register was missing? I think I am safe in saying no.  
 3295. During the whole of your experience, has it been the custom of persons searching to take extracts? Yes; undoubtedly.  
 3296. Is it necessary that they should be allowed to take extracts? I assume that it is, especially if the matter be in the hands of proper persons.

[The witness withdrew.]

Alfred Macalpine Hemsley sworn and examined:—

- A. M. Hemsley. 3297. *Commissioner.*] What are you, Mr. Hemsley? Solicitor, and a member of the firm of Levy, Hemsley, and Perkins.  
 3 Nov., 1893. 3298. How many years' experience have you had? I have had five years' experience in this Colony, and about five or six years' experience in London. I may add that Mr. David Laurence Levy desired me to explain that he has received a note from your secretary, asking him to attend here and give evidence. He regrets his inability to comply with that request, owing to severe indisposition.  
 3299. During your experience as a solicitor in this Colony, have you had occasion to visit the Search Room in the Deeds Branch in the Registrar-General's Department? Yes.  
 3300. On many occasions? Personally, not on many occasions. When I first came to this Colony I went there more frequently to get familiar with the procedure.  
 3301. On any occasion have you been unable to find a register? No.  
 3302. Has it been reported to you by any search clerk that a register was missing? Not to my recollection.  
 3303. In your opinion, is the supervision over persons searching sufficient? No; I am sure it is not. It cannot be with the building as it is. There are several little narrow passages, and only one attendant, who has two or three duties to perform.  
 3304. How, in your opinion, could the supervision be improved? I think it would be a great improvement if there was an open space where all the searchers had to sit to make their searches. I think there should be a kind of open square, with the books on the outside and the searchers in the middle.  
 3305. Do you suggest that there should be a larger room? Undoubtedly.  
 3306. With the space at command can you suggest any improvement? I think that really the better course to pursue—but it would mean a lot of expenditure—would be to have a double register. There should be two copies, one preserved, to which the public should not have access, and a duplicate copy for the public use. As I understand it, these registers are left where they are during the day and through the night. The risk from fire reaching the presses is very great. This proposal to have two copies would be doubly advantageous. Besides providing an additional copy in case of fire, a stored and secured copy away from the public would be a safeguard and check against any alteration or tampering with registers. There is nothing at present to prevent any person from inserting anything in the registration copy, except his own sense of right and wrong. Any person so minded could alter these copies, and a duplicate copy, therefore, would be a safeguard against any malpractice.  
 3307. Can you suggest any alteration in the indices in the Deeds Search Room? I strongly suggest that the purchasers' and mortgagees' names should appear, as well as the names of the vendors and mortgagors.

[The witness withdrew.]

The Hon. William Hilston Pigott, M.L.C., sworn and examined:—

- The Hon. W. H. Pigott, M.L.C. 3308. *Commissioner.*] What are you, Mr. Pigott? A solicitor in the Supreme Court of New South Wales.  
 3 Nov., 1893. 3309. How many years' experience have you had in the legal profession? About forty years.  
 3310. During that time have you had occasion to visit the Search Room in the Deeds Branch of the Registrar-General's Department? On a great many occasions during the earlier part of my career, but I have not been there much during the last ten or twelve years.  
 3311. On any occasion that you have visited the room for the purpose of making a search have you been unable to find any register? No; I have not.  
 3312.

3312. Since your searches have been made by clerks has it ever been reported to you that a register was missing? No; not that I am aware of.
3313. During your forty years' experience has it always been the custom for persons searching to be allowed to take extracts? Always.
3314. In your opinion, is it necessary that they should be allowed to take extracts? I think persons searching should be allowed to take extracts. I do not see how business could be carried on otherwise.
3315. In your experience is the working of the Deeds and Search Room more satisfactory now than it was in former years? I think so; certainly.
3316. Can you tell me when this improvement began? Speaking roughly I should say about three or four years ago. I believe that it was about that time that the indices were brought up to date, and so arranged that searches could be made with less difficulty.
3317. Do you know that from your own knowledge? No; I have learned this from reports made to me by my search clerks.
3318. What is the effect of their reports? That the whole system of searching has been very much improved of late, and that there is much more safety owing to the system, which has been recently adopted.

The Hon.  
W. H.  
Pigott, M.L.C.  
3 Nov., 1893.

[The witness withdrew.]

Henry Wheeler Gillam recalled:—

3319. *Commissioner.*] In what condition are the books of indices? They are in a very good condition.
3320. Are they up to date? Yes.
3321. On many occasions have mistakes been pointed out to you in any of these books? Occasionally but very rarely.
3322. When was the last occasion that your attention was drawn to any mistake? I should think about a couple of months ago.
3323. Was this mistake in one of the old indices? Yes; in one of the very old ones.
3324. What error was that? I really cannot remember, sir.
3325. What was done? The mistake was altered.
3326. Who made the alteration? I did, as the head officer of the department.
3327. Was the alteration dated? I think the last one was at the request of somebody.
3328. Was the alteration initialled? Yes; to the best of my belief it was.
3329. On any occasion have you with your own hands filled in any omission or corrected any error which has been pointed out to you in any book of indices? Yes.
3330. On many occasions? Very few.
3331. In what books did these mistakes occur? I cannot remember.
3332. Were they in old books or in books of later years? In old books.
3333. Has your attention been drawn to any mistake in the indices compiled of late years? I cannot remember if it has.
3334. Do you remember Mr. Ambrose Knight Doyle, a law stationer, drawing your attention to any mistake? I do not remember it, sir.
3335. Have any complaints been made to you of delay in furnishing certified copies of deeds that have been ordered? Very rarely.
3336. When was the last complaint made? I really cannot say.
3337. Do you remember a complaint made by Messrs. Norton, Smith, & Co. of a delay extending to twelve days? No; certainly I do not.
3338. When delay has occurred, what has been the cause? A great pressure of work.
3339. What would be the longest time intervening between receiving an order for a copy and executing it? I think not more than four days at the most.
3340. What price do you charge per folio for copying deeds? The first six folios are called a certified copy, and for that 5s. are charged; 3d. per folio is charged afterwards. Grants are charged for at the rate of 1s. 3d. per folio. For the last nine months if the press of work became very great we have called in the aid of one of our law stationers.
3341. It has been said that the indices for stock mortgages are in a very bad condition, is that so? They are in fair condition.
3342. Are they up to date? Yes; and lexicographically arranged, previous to that they were not.
3343. Would it cost much expenditure in time and money to have the older stock indices copied and lexicographically arranged? It would cost both.
3344. Do you work overtime? Yes, sir.
3345. In the Search Room? Yes.
3346. Has it been your practice so to do for many years? Yes.
3347. Until what hour do you work? Until 6 o'clock.
3348. On any occasion do you work by yourself? Yes.
3349. What work requires you to remain at the office until 6 o'clock. Frequently in bringing up arrears in regular office work and sometimes in the re-copying of indices.
3350. What work has kept you till 6 o'clock in the Search Room? In preparing memoranda for the Registrar-General, in reference to Companies Act matters, Trade-marks Act matters, and other work connected with the branch.
3351. What other work has delayed you till 6 o'clock? Overtime in the compilation and supervision of re-copying old indices.
3352. Are you paid extra for work of that kind? For the latter work, yes.
3353. How many old indices have been re-copied? We originally started from about the year 1820, I think. The indices were in confusion previously, and we have been getting them lexicographically arranged gradually.
3354. Up to what year? At the present time we are occupied in copying into books the indices of 1892 and 1893.
3355. Do I understand that you have been copying the whole of the indices from the year 1820 up to the present time? I have been supervising and assisting latterly.
3356. Am I to understand that from the year 1820, to the present time, all the indices are perfect? Yes.

H. W.  
Gillam.  
3 Nov., 1893.

- H. W. Gillham.  
3 Nov., 1893.
3357. Has your attention been drawn to errors in the copies of these indices? Occasionally, yes. They were re-copied from the original indices.
3358. Are transactions with conditional purchases indexed with other dealings of real property? Yes.
3359. Would it not be more convenient for the public if there was a separate index for dealings with conditional purchases? Yes.
3360. Is there any objection to having books of index for such transactions? There are but few objections, which could be very easily overcome.
3361. Do your indices show the names of the purchasers in real property matters? They show them, but not directly.
3362. What do you mean? The name would not appear under the initial letter, but under that of the vendor.
3363. In the case of a mortgage, does the mortgagee's name appear? In the same way as others.
3364. Not under the initial letter of the mortgagee? No.
3365. Would it not be more convenient if the purchasers' and the mortgagees' name did appear? It would be a benefit, but a very small one.
3366. Is there any reason why the names of purchasers and mortgagees should not appear in the index under their initial letters? There is no reason.
3367. Are there any other clerks besides those belonging to your branch who use the Search Room while working overtime? Clerks from the Births, Deaths, and Marriages Branch make their final examinations in the Search Room because of the convenience afforded by the search table.
3368. Do you know to what hour these clerks work? I have left them there when I have gone away at 6 o'clock.
3369. Does any clerk in your department work after office hours? Yes; frequently.
3370. At any time does any clerk work by himself after office hours? Occasionally, sir.
3371. In what work would such clerk or clerks be engaged? In overtime or regular office work. There are so many varied duties that no one clerk has any particular work to do.
3372. On any occasion have you seen any clerk in your branch refer to the registers after office hours? No; except officially.
3373. What do you mean by "officially"? In marking off discharges in the current work.
3374. Have you seen a clerk refer to a register for any other purpose? No, sir.
3375. Have you seen any clerk refer to a register for any purpose of search? No, sir.
3376. Have you, yourself, referred to any index for any such purpose? No.
3377. Have you seen any clerk from any other branch of the department in any way referring to the registers after office hours? No, sir.
3378. Is there anything else you wish to add to this Commission? I would like to say that in addition to the supervision exercised by Hill as book-porter, Mr. Hatton, the official searcher, and Mr. Lewis, the assistant chief draftsman, are constantly searching, and have full opportunity of supervising other persons searching in that room.
3379. Is there anything else you wish to say? I would like to add that when I formerly said Hill, the book-porter, was away from the room for a few minutes that Mr. Hurley always acted in his absence, and is acting now.
3380. Have you a catalogue or inventory of the books under your control? Yes.
3381. Where is it? It is here. [*Book produced and handed to the Commissioner.*]
3382. What does this book you call a catalogue contain? It contains a list of the grants of all the old memorials and indices.
3383. When does it commence? The first entry refers to a copy grant dated February, 1792, and which is contained in register No. 1. It then contains a list of all the grants up to the year 1863, when the Real Property Act came in force.
3384. When was this catalogue made? About a month ago.
3385. Was it made since the trial of the cause Campbell against the Anglo-Australian Investment, Finance, and Land Company (Limited)? Yes.
3386. How many documents have you in your charge in the Search Room? By this list which I have had prepared the number appears to be 811,856. In addition to that a vast number of old registers, indices, records, &c., have been consigned to presses in the vaults, on account of want of space in the Record Room.
3387. How many registers of deeds have you? The number is 2,750, contained in 550 "books," five registers to each "book."
3388. How many memorials of stock mortgages have you? I have 225.
3389. In addition to the 225, how many grant registers have you? There are 388 volumes.
3390. Into how many volumes do the indices run? Seven hundred.
3391. What is the total number of volumes? There are 4,093 under my charge.

[The witness withdrew.]

William Wentworth Bucknell recalled:—

- W. W. Bucknell.  
3 Nov., 1893.
3392. *Commissioner.*] Have you on any occasion supplied any information to any member of the public? Yes, often.
3393. I do not mean strictly official information, but have you supplied information to the public outside of the office? I do not quite understand your question.
3394. Have you ever sold any information? No.
3395. Have you ever been concerned with any other person who did sell information? No.
3396. Have you in any way been concerned with Hopkins by giving information to any party through which land has been obtained? No. I have never been concerned with Hopkins in any manner.
3397. My question is were you concerned with Hopkins in any transaction at all? I do not understand you. If you refer to my having had anything to do with Hopkins in connection with any land speculations, I have not. I have obtained two loans for him from my aunt, Mrs. Devernet. One was for £400, and the security was his interest in the Battersea Estate. Subsequently he paid off £240 of that amount, and then it was lent to him on an interest he had in an estate near Newcastle, with Messrs. Cowlshaw Brothers.

3398.

W. W.  
Bucknell.  
3 Nov., 1893.

3398. How much was lent? £250. I think he paid £210, and the interest brought it up to £250.
3399. Were you concerned with Hopkins in any other transactions? My wife's sister is married to Mr. John Badgery, a brother of Mr. Henry Badgery, who had a property at Moss Vale. He told me this property was for sale. I mentioned the matter to Hopkins, and Hopkins found a purchaser. Mr. Badgery allowed him a commission of £100 for selling it, and that is the only other transaction that I have had with him.
3400. How long ago did this take place? I think that was about two years ago.
3401. Who was the purchaser of the property? His Honor Mr. Justice Stephen.
3402. Have you had any other transactions with Hopkins? I had one other, I think, but that was before I came into the department I am in now—I think it must have been about nine or ten years ago. He sold some land that he and Mr. Lewis, in our office, who was in partnership with him, had at Randwick, and the purchaser was to pay for this land by instalments. I think I was to discount a bill for him. I was to get him what cash I could from the bank I was dealing with.
3403. Whose bill did you discount? I think it was the purchaser's bill. I had a transfer which was signed, and it was not to be handed to the man until he had paid up. The land was under 'Torrens' Act.
3404. In what branch of the department were you then? I think I was in the Land Titles Office, but I cannot be certain about it, because I am unable to fix the date. I got the money from my mother, who lent it to me, and I paid it into the bank, and I paid it in in the usual way.
3405. In what branch of the Registrar-General's Department was Hopkins at that time? He was in the same branch that he is in now.
3406. When were you removed from the Land Titles Office to the Registration Branch for Births, Deaths, and Marriages? I do not know; but I think it was in September, 1884.
3407. How came you to be removed? Promotion.
3408. Have you on any occasion been to the office of Charles Jackson Campbell? Yes.
3409. On many occasions? Yes; I daresay that I have been there a good number of times.
3410. On what business? When trying to get the interest that was due on the balance of the money in the Battersea mortgage.
3411. Is the interest due to you by Hopkins? It is paid to me, but it was due to Mrs. Devernet by Hopkins. I collected it for her.
3412. What made you go to Campbell to get moneys owed to Mrs. Devernet by Hopkins? Mr. Hopkins had transferred the land for his amount of the mortgage to Campbell, and he asked me to go down and see Campbell about it.
3413. Used Hopkins to accompany you? No.
3414. Did he accompany you on any occasion? I do not think he did. I saw Campbell and Hopkins together in the office.
3415. On many occasions? Yes; I have seen them together on many occasions in reference to the payment of this interest.
3416. Did you at any time receive a promissory note from Chappel or from Campbell? No.
3417. Did you receive a promissory note for £400 from either Chappel or Campbell? No.
3418. Did you receive a promissory note for £400 from anyone? No.
3419. At any time? No.
3420. Did you from Hopkins? Yes.
3421. When? I cannot give you the date; I believe it was when he gave a mortgage to Mrs. Devernet. He gave the mortgage and a promissory note.
3422. What did you do with that promissory note? I gave it to Mrs. Devernet with the mortgage.
3423. Did you ever receive any other promissory note from either Chappel or Campbell? No, your Honor.
3424. Did you ever receive any other promissory note from any other person? Yes.
3425. For what amount? £160.
3426. From whom? From Hopkins.
3427. When? I cannot tell you the exact date. I think it was about the time he gave me the £240. He gave me £240 and a promissory note for the balance, which made up the £400, the amount of the mortgage.
3428. If in this bill-book [*book produced*] it appears that you received a promissory note for £160, is it an incorrect entry? It is an incorrect entry.
3429. Did you, on any occasion, pay any money to either Chappel or Campbell? No.
3430. Did you, on any occasion, receive any money from them? Yes.
3431. How much? I think I received two sums of £4 each. One I got through Mr. Aitken, a solicitor, and one £4 I got from themselves.
3432. What for? Interest due to Mrs. Devernet.
3433. By whom? By Hopkins, due on the Battersea mortgage.
3434. Did you ever pay the sum of £30 to either Chappel or Campbell? No.
3435. If there be an entry in this book [*produced*], stating that you did pay this sum of £30, is it incorrect? It is incorrect.
3436. Did you ever pay Chappel or Campbell any sum? I never paid them a cent., neither did I ever receive from them a single penny on my own account.
3437. Did you receive any other sum of money from either Chappel or Campbell? No, I do not think I did.
3438. Did you receive the sum of £50? No.
3439. Not on account of a loan of £245? No.
3440. Did you, on January the 25th, 1890, on account of a loan of £245, receive the sum of £50? I never had a loan with them.
3441. On account of any loan, did you receive that sum? No; I never received any money from them.
3442. Did you, on January 29th, 1890, receive a further sum of £50 from Campbell and Chappel? No.
3443. Did you receive any money from Campbell and Chappel on any account at any time, with the exception of the two amounts of £4 each as interest? I did not.
3444. In addition to the matters you have already mentioned, I again ask you if you have been concerned with Hopkins in any other transaction? No.

W. W.  
Bucknell.  
3 Nov., 1893.

3445. For how many years were you in the manner which you have stated concerned in these transactions with Hopkins? I cannot say. It was several years.

3446. From the first transaction to the last, how many years were you concerned in transactions with Hopkins? I do not remember. My bank-book would show it, but I cannot tell you without looking up my bank-book.

3447. Can you give me any idea of the number of years? I would not like to give you a wrong idea, and if you will allow me I will look up the necessary information. [*Subsequently witness forwarded to the Commissioner the following letter*]:—

To His Honor Judge Fitzhardinge, Commissioner, Sydney,—  
Sir,

6 November, 1893.

I have the honor to give you the following information in reply to your request as to the date and nature of my transactions with Mr. E. C. Hopkins.

1. The first transaction was on the 4th April, 1887, when acting on behalf of my mother and brother, Dr. Bucknell, I lent him money on the security of some land near Coogee.

2. My next transaction with him was on the 1st January, 1888, when acting on behalf of my aunt, Emily Jane Devernet, I lent him money on his interest in the Battersea Estate.

3. My next transaction with him was on the 1st November, 1890, when acting again for Mrs. Devernet, I lent him money on the Stockton property.

4. My next and last transaction with him was on or about 20th June, 1892, in reference to the sale of Mr. H. T. Badgery's property. Mr. H. T. Badgery could fully explain the transaction.

I have, &c.

W. W. BUCKNELL.

3448. Have you ever had any transactions with either Chappel or Campbell? No.

3449. At any time did you produce any deeds or other documents in Campbell's or Chappel's office? No.

3450. Have you at any time worked beyond office hours in the Search Room of the Deeds Branch in the Registrar-General's Department? Yes, your Honor; often.

3451. On any of these occasions have you ever referred to, inspected, or searched in any book of indices or register of deeds? No.

3452. Have you seen any other person referring to indices or registers of deeds? Yes.

3453. Who? The clerks in the Deeds Branch.

3454. As far as you could see, what were they doing? They were marking off the deeds.

3455. Were they checking the index? No; not checking the index. After a mortgage is discharged they would go to the index and mark it "discharged."

3456. Would they mark it in the index or in a register? In the index.

3457. What then? Then they would put it away. The books were ranged in front of the place where I was reading off, and they would pull these down and mark off.

3458. Have you on any occasion been at the office of Messrs. Fisher, Ralfe, and Macansh? Yes; on one occasion.

3459. When was that? A little more than two months ago.

3460. Are you a client of that firm? No.

3461. What business took you to their office then? Charles Jackson Campbell made an application for certain certificates of birth of William Bligh Gore, Francis Catherine Gore, and Eliza Marjoscis Gore. This is the application [*produced*]. The fees were paid into the office. The application was then passed by the accountant and sent on to Mr. Thompson to make the search in the birth registers, which were at that time in the branch office in Castlereagh-street. He made the search, but was unable to find any entry between the years 1808 and 1816. He returned the papers to the Births and Deaths Registration Room in the head office in Elizabeth-street. The paper was marked "please check." It was handed to me, and I then went down to the office, made a search, but was unable to find any entry. Mr. Campbell, in due course, called at the office and was so informed. He (Campbell) wished then to check it himself. We went down to the branch office together and I showed him the indices. He examined the indices in my presence with a like result. He still insisted that we had the records and that we had issued certificates on a previous occasion to Messrs. Fisher, Ralfe, and Macansh. I informed the chief clerk, Mr. Dawes, of the result of the search and of the statement made by Campbell. The chief clerk, Mr. Dawes, then instructed me to go down and see Mr. Fisher, as he said it would not do to stultify the office by stating there were no registrations of the births if we had already issued them to somebody else. The Registrar-General also had been subpoenaed to produce the registers supposed to contain the desired entries. The subpoena was handed to me, I was instructed by Mr. Dawes to attend the Court in answer to the subpoena.

3462. Before the case came on for hearing for which the subpoena had been issued, did you go to Mr. Fisher's office? Yes; I went to Mr. Fisher's office and I explained to Mr. Fisher that I was a clerk in the Registrar-General's Office, and that one of my duties was to check searches. I further explained that I had come down to ask him as a favour, if he would inform me whether he had got the certificates as had been stated. Mr. Fisher asked me who had applied for them, and I told him it was not customary for the office to disclose the names of applicants for certificates. Mr. Fisher then rang for his clerk whom he thought had the matter in hand, but he was out. He promised to telephone to me about the matter, which he never did. I heard nothing further about it.

3463. Is that all you wish to say about this matter? That is all.

3464. On that occasion did you tell Mr. Fisher that the certificates had been lodged with other papers of an application to bring some of the Gore property under the Real Property Act? I think I did.

3465. Did you tell him that the certificates were not with the other papers accompanying the application? I think I did.

3466. How did you get that information? From the application. I got permission to do so from the Deputy Registrar-General.

3467. Did you examine all the papers lodged with that application? No; I examined the printed application form, not all the papers.

3468. What did you learn from that? That Fisher, Ralfe and Macansh, had received the certificates back again. I assumed that the application had been dealt with.

3469. How came you to examine that application? I was told that the certificate had been produced in that application.

3470. By whom were you told? By Mr. Campbell.

3471. Do you know how he gained that knowledge? I cannot tell you.

3472. Did he get that knowledge from you? No.

3473.

3473. So far as you know did he gain that knowledge from any clerk in the Registrar-General's Office?  
No.
3474. Before going to see Mr. Fisher, had you examined the application? I had examined the printed form—that is, the entries in it, which show that the documents had been produced.
3475. Had you received permission to make that examination? I had.
3476. From whom? From the Deputy Registrar-General, Mr. Keele.
3477. Was that applied for and given in writing? No.
3478. On any occasion have you instructed any person to make any search for you in the Deeds Search Room? For myself personally, never, but on behalf of others I have on two occasions.
3479. What do you mean by "on behalf of others?" A man named Noble told me he had some property somewhere over on North Shore. He asked me to get it searched for him, and I asked A. K. Doyle to do it.
3480. Were you paid for any trouble you took in this Noble's matter? No.
3481. In any other matter did you instruct any person to search? On one other occasion I instructed Doyle to search for a piece of land at Manly, the particulars of which I have been unable to find. I have got the search-paper here; it is in the name of Charles Hardy, and I ascertained that the land had come under the Torrens Act.
3482. How came you to have that search made? Somebody asked me to have it done. I cannot give the name of the person, and he apparently has never come for the result.
3483. Do you say it turned out that the land in question was under the Torrens Act? Yes. This search was made for me on the 24th of June, 1887.
3484. Was the other search before or after that? I think the other search was before this.
3485. What is the date of the last search you had made in the Search Room? I think it was the 24th of June, 1887.
3486. Do I understand you to say that you have had no searches made since then? I do not think I have.
3487. How came you, as a clerk in the department, to have searches made? [No answer.]
3488. Were you then acting as a land agent? No; your Honor, but I knew Noble very well. I had known the other man for a while, as he used to come to the office about deeds.
3489. Do I understand you to say that you were familiar with some persons whose names you do not now know? I think the man in question was one of the Hoods, who is now in gaol.

[The witness withdrew.]

MONDAY, 6 NOVEMBER, 1893.

[The Commission met at 10 o'clock.]

Present:—

HIS HONOR JUDGE FITZHARDINGE.

Thomas Kenyon sworn and examined:—

3490. *Commissioner.*] What are you, Mr. Kenyon? A law stationer.
3491. Who have you succeeded in that business? I was a partner with my father for about six years before his death. I have been in the office sixteen and a half years.
3492. How long had your father been a law stationer? About forty-three years. I think he started business in 1851.
3493. How long has your father been dead? About eighteen months.
3494. Have your duties on many occasions taken you to the Search Room in the Deeds Branch of the Registrar-General's Department? Nearly daily.
3495. For what purpose? Searching, lodging documents, registering, and ordering copies.
3496. Have you done much searching? Yes; I have been searching there for the last fifteen years.
3497. On any occasion have you been unable to find any register you required to inspect? Temporarily a register may have been in the examiner's room or down with the bookbinder, but I could always get it within five or ten minutes. I have never been unable to find a register I wanted.
3498. Have you ever heard your late father say he was unable to find a register? No; never.
3499. In discussing the registers with your father, what did you learn from him? I never heard him make any remark to the effect that he could not find any record that he wanted, or that he could not obtain any register or book he desired. He led me to believe that he had never known a register to have been lost or mislaid.
3500. When searching do you take extracts? Yes; short extracts.
3501. Would it be possible to prosecute a search without taking extracts? No; not successfully.
3502. In your opinion, is the supervision over persons searching sufficient? It has been better during the last three years. Under the old Registrar-General's rule it was very loose. During the last three years anyone moving about the Indexing Room has been able to see pretty well all the registers. Hill, the late book-porter, was always about; he was seldom out of the room. I think he should have an assistant in a room of that size. I think two book-porters are necessary.
3503. In your opinion, would two book-porters be sufficient to attend to the requirements of the public and to supervise those searching? Yes.
3504. Has the disposition of the presses which contain the registers been altered during the last three or four years? It was altered three years ago.
3505. Is that alteration for the better? Yes; greatly.
3506. Is there a greater check upon persons now than there was formerly? Yes.
3507. In what respect? The tickets searchers are required to procure are more carefully checked than formerly.

[The witness withdrew.]

W. W.  
Bucknell.

3 Nov., 1893.

T. Kenyon.  
6 Nov., 1893.

James

James Pickering sworn and examined :—

- J. Pickering. 3508. Where do you live? At Peakhurst.  
 3509. What are you? A fencer and carpenter.  
 6 Nov., 1893. 3510. Do you know a clerk in the Registrar-General's department named Hopkins? I know him.  
 3511. How long have you known him? Ten or twelve years; it may be more.  
 3512. Where did you first come to know him? I first came to know him through seeing him on a holiday excursion at Hurstville.  
 3513. Was Hopkins interested in any land out there? Not that I am aware of.  
 3514. Was he making any inquiries about land? No; not that I am aware of.  
 3515. Did you at any time see him at the Registrar-General's Office? Yes.  
 3516. When? The next time I saw him was about eight years from now.  
 3517. Where did you see him on that occasion? I went to the Registrar-General's office to make some inquiries in reference to an uncle of mine about some land. I went to Hopkins to know if he could get any person to find out whether my uncle's will was there or not. He told me the best course I could take would be to get some person to make an inquiry through the office, as if it was there no doubt it would be found.  
 3518. Did you get some person to make a search? Yes.  
 3519. Who did you get? I think the man's name was Doyle. My cousin was there, and I probably left the matter to him. This man did make a search, and the will was found.  
 3520. When did you next see Hopkins? The next time I saw him, it was, I think, in the street in the city.  
 3521. When did you next see Hopkins in the Registrar-General's Office? The next time I saw him in the office was when I went in on purpose to see him with a lady whose name is Mrs. Stedman.  
 3522. Did you go with her to the office? I met her in the town, and having known her for a number of years, she said to me "I am going to the Registrar-General's Office: will you come with me?" I went with her, but I did not hear all the conversation, as I was sitting down in the room.  
 3523. Did you meet Mrs. Stedman casually in the street, or had you arranged to meet her? She had been to my mother's place, and mother told her I was going into Sydney, and she met me in King-street.  
 3524. In what part of King-street did she meet you? At its junction with Elizabeth-street, nearly opposite the Registrar-General's Office, and I then went with her to that office.  
 3525. Did you introduce her to Hopkins? No; she spoke to Mr. Hopkins.  
 3526. Did you introduce her to Hopkins? Yes; I did afterwards.  
 3527. How came you to introduce her to Hopkins? She asked me if I knew Hopkins. I said "Yes." She said to me, "You might as well go up with me and we will see him." I went with her, and on going in the office Hopkins bid her "Good morning," and I then introduced her to him.  
 3528. Did you say what she wanted at the Registrar-General's Office? I did.  
 3529. What did you say? I said she was there about some land she had which her husband had been trying to take from her, and she wanted to find out whether there was any deeds lying in the office belonging to that land.  
 3530. What did Hopkins say? He said, "You come back again, as in the course of a few days I will get somebody to find out."  
 3531. What else was said? Nothing else was said then.  
 3532. Did you go to the office again? I did.  
 3533. When did you go? It would be about eight or nine days later.  
 3534. Did you see Hopkins on that second occasion? Yes; I saw him.  
 3535. What took place on that occasion? He said that the man who was going to search if there were any papers had not come to the office. He had not seen him, and he asked us to let it stand over for a while, and in the meantime he would see this person, and we must call in again.  
 3536. At either of these interviews was anything said by Mrs. Stedman about land at Hurstville or Petersham? She said something about land at Petersham, I believe.  
 3537. Did you hear Hopkins say he had found the land at Petersham? No; I did not.  
 3538. Did Hopkins say that he had found some land at Hurstville? No; he did not.  
 3539. Did you go again to the office? No.  
 3540. At either of these interviews did Hopkins say that he would require one half of the property as a remuneration for his services? No.  
 3541. Did Hopkins say he would require one quarter of the property as remuneration for his services? No.  
 3542. Did Mrs. Stedman call your attention to these words when she was speaking to Hopkins: "Now remember that your share is to be one-fourth"? She did say so.  
 3543. What did Hopkins reply to that? To the best of my belief, he made no answer.  
 3544. Can you say why Mrs. Stedman called your attention to those words? No; I cannot say. She came to try to find some papers referring to different lands, because her husband had treated her bad and she wanted to get some of the lands back. The papers were entrusted with other women. She knew I knew two or three of the women who had the papers concerning these lands. I suppose that was why she asked me to be a witness to her saying she would give Hopkins a one-fourth interest in this land at Petersham.  
 3545. What made you suggest that she should go to Hopkins? From what he told me on the first occasion I went to him, I thought he would be as likely a man as any to be got in the office to make inquiries about recovering anything like that.  
 3546. Had you any other transaction of that kind with him? No, sir.  
 3547. Had you ever had any conversation with him before that? No; only what I told you before, sir.  
 3548. What was that? Only about my uncle's land in Macquarie-street.  
 3549. When did you see Hopkins last—how many days ago? I have not seen him for months.  
 3550. When did you last see him? In June of last year, when I was laid up with a dog-bite in my hand.  
 3551. Have you seen Hopkins since then? No; I have not seen Hopkins for months and months.  
 3552. Do you know any other clerk in the Registrar-General's Department? No, sir, I do not know any other man's name in that office.

[The witness withdrew.]

Charles

Charles Hardwick Keele recalled :—

- 3553. *Commissioner.*] Do you remember the fact of the trial Campbell against the Anglo-Australian Investment Finance and Land Company, (Limited) ? Yes.
- 3554. Before that cause came on for hearing, did you give W. W. Bucknell leave to inspect any papers in the Land Titles Branch ? About three months ago Bucknell came to me any asked for permission to see an application of Whiting's upon which a certificate of title had already issued. In order to assist him in his search for a certificate of death, a copy of which was supposed to have been deposited with Whiting's application, I told him if he would see the clerk, Mr. Reeve, the necessary information would be afforded.
- 3555. Do you know whether he took advantage of your permission ? He told me afterwards that he did.
- 3556. Do you know whether he obtained the necessary information ? I am inclined to think he did ; otherwise he would have told me.

C. H. Keele.  
6 Nov., 1893.

Charles Hart Townley Pinhey recalled :—

- 3557. *Commissioner.*] Since giving evidence on the 13th of last month, have you received any information about Edmund Conroy Hopkins ? Towards the close of the month of October—I think it was on the 27th of that month—Mrs. Mary Stedman called upon me, and advised me of certain negotiations initiated through one James Pickering with Mr. Hopkins, with a view of the last-named affording such information as would permit of her obtaining proof of title to land said to have been devised to her by her late father, Thomas Perrott, of Canterbury. Particulars were also given by her to me. as to the proportionate claim of the full value of the land to be received, for which Hopkins would undertake to bring the property under the Real Property Act. She advised me further that, considering the terms exorbitant (which were represented to be one-fourth of the value of the property brought under the Act), she wrote to Hopkins terminating the transaction.
- 3558. Did you send for Hopkins ? I sent to Hopkins. I sent a message to his private address. He came to see me on the following day, the 28th of October. I advised him of the circumstances I have just stated to you, and further, that it would be my duty to place the whole matter before His Honor the Commissioner. I presumed Hopkins would be afforded an opportunity to give what explanation he desired.
- 3559. Did Hopkins make any explanation to you—did he admit or deny that he had demanded half the value of any property brought under the Act in the name of Mrs. Stedman ? I cannot remember precisely whether he specifically denied that he had demanded half of the value.
- 3560. Did he admit or deny that he agreed to do what was necessary for one-fourth of the value of the property ? He did, for a certain proportion of the value. I do not remember whether any specific proportion was mentioned by him to me.
- 3561. Did you understand from Hopkins that he was to receive any portion of the property from Mrs. Stedman ? Yes ; certainly.
- 3562. What proportion was he to receive ? I am not aware.
- 3563. Did he at any time deny that any arrangement had been made with Mrs. Stedman ? I think not.
- 3564. Did you understand that Hopkins in person was to prosecute the necessary searches ? I did not so understand.
- 3565. Can you remember what Hopkins said upon that point ? When I challenged him with this, Hopkins said that he had proposed that his brother-in-law should conduct the whole of the searches that might be necessary to disclose the titles.
- 3566. Did you ask him the name of the brother-in-law who was to do this ? Yes.
- 3567. Do you remember what he said in reply ? Yes ; he said, " John Dean."
- 3568. So far as you know, is John Dean a professional man ? I know he is not. Hopkins added that he had never done anything in the matter—" never taken any steps in the matter", I think, were the words he used.
- 3569. Are you aware that the Search Room of the Deeds Branch is at times made use of by clerks in the Branch for the Registration of Births, Deaths, and Marriages, when working overtime ? In making some inquiries from Mr. Dawes, the Chief Clerk of that Branch, some eight or nine months ago, I ascertained that an arrangement had been made for checking and verifying the annual indices in the Births, Deaths, and Marriages Branch. He told me that, owing to the very congested condition of the Department, that the Deeds Registration Room was the only place available for the proper conduct of that work.
- 3570. What is the nature of that work ? The checking of and verifying the correctness of the completed indices.
- 3571. Can that work be performed in any other room of the Department ? I think it may be said that that is the only room in which the conveniences of the Department will allow of such work being carried on.
- 3572. Are you aware that the clerks in the Deeds Branch, at times, are working in the Search Room after office hours ? Yes ; frequently.
- 3573. On what work ? Generally upon arrears in the indexing of deeds and in keeping up the current work.
- 3574. Would it be possible to have that work done in any other room of the Department ? No ; it would not.
- 3575. Could not the room containing the registers be securely locked up at half-past 4, when the clerks are supposed to leave the building ? It would be impracticable.
- 3576. Have you prepared a report to the Colonial Secretary, on any occasion, to the effect that the accommodation is insufficient ? Yes ; I have drawn the attention of the Colonial Secretary to the utter inadequacy of the space at our command.
- 3577. Have you kept a copy of that letter or report ? I have kept a copy of the letter, dated 21st of May, 1891, which I now put in. [*Letter handed in and marked Exhibit " J "*].
- 3578. What was the result of your letter. The Government rented three floors of the premises, No. 24, Castlereagh-street, in which to locate all the officers and registers of the Births, Deaths, and Marriages Branch. This has given temporary relief, but the space is now being so rapidly filled that we shall be shortly confronted with the same difficulty as that which existed in May, 1891.

C. H. T. Pinhey.  
6 Nov., 1893.

- C. H. T. Pinhey.  
6 Nov., 1893.
3579. Has the business of the branch for the registration of births, deaths, and marriages been removed to the new premises in Castlereagh-street? Three of the officers who conduct the business have been transferred to the new branch to take charge of and conduct the business in connection with the record registers. The remainder of the staff are still retained at the head office for the purpose of carrying on registration and correspondence, pending the necessary arrangement being made for their reception and conduct of business in the new branch.
3580. When do you expect that the necessary arrangements will be made to allow of the remainder of the staff to go to the new offices in Castlereagh-street? Certainly, within the current month.

[The witness withdrew.]

Charles Jackson Campbell recalled:—

- C. J. Campbell.  
6 Nov., 1893.
3581. *Commissioner.*] Did you write to me stating you wished to give some additional information to the Commission? Yes.
3582. What does this information concern? There are several officials in the Registrar-General's Department who seem to be against me, and I think their reason is because I have gone into matters which they themselves have been working up. I have opposed them, and I think I shall be only doing right in saying who these parties are. One is Mr. Pearson, and he has always shown me as much opposition as he could. He has refused me all sorts of papers which he shows to anyone else, and the reason why he does this is on account of a matter he was working up in Kent-street. The owner of the property in question was dissatisfied with Mr. Pearson. He came to me and I took it on.
3583. Who was that person? His name is William Hardy.
3584. What is his address? Elgin-street, West Maitland.
3585. Whom did you hear this from? From William Hardy himself. It seems that William Hardy's father was a soldier here in the early days, and he was supposed to have acquired a grant of land in Kent-street, Sydney. This William Hardy, the son, has been trying to find out the position of this land for a long time. He went to Mr. W. H. Mullens, a solicitor. Mr. Mullens brought Hardy down to Sydney, took him to see Mr. Pearson at the Registrar-General's Office, and Hardy says that an arrangement was made between Messrs. Mullens and Pearson to work up this case. I cannot prove what took place, but Hardy has always stated to me and others that Messrs. Mullens and Pearson entered into a private arrangement together. It was also stated that the position of the property was found out, and, as far as I understand, they put a man on it in a tent to hold possession.
3586. In what part of Kent-street is this land situated? It is lot 5, section 93.
3587. In what part of the street is this allotment situated? Between the Gas-works and Miller's Road, opposite the Flagstaff.
3588. Do you wish to speak of any other matter before you leave Mr. Pearson? I believe Mr. Pearson was taking a share in this property even while I was working up the matter for Hardy.
3589. When did Hardy come to you? It would be some time in 1891 I saw the plan. When Mr. Mullens went into Mr. Pearson, Mr. Pearson sent for the plan. He got everything connected with this property into his office, and went thoroughly into the matter with Mr. Mullens.
3590. Where did you hear that? From William Hardy. A few days afterwards Hardy became dissatisfied, as he considered that Mr. Pearson and Mr. Mullens were working against him. Then he came to me and asked me to work the matter up for him.
3591. Was that in the year 1891? Yes.
3592. In what month? I cannot say, but I think it would be about the middle of 1891. I know at the time I went to Maitland, and I could trace the date from that circumstance. Hardy came to me, and I proceeded to look the matter up. I saw the plan the first time I asked for it, but since then the officials in the department have refused to show me this particular plan of the city of Sydney.
3593. In whose possession was that plan which you saw on that particular occasion? It was produced over the counter in the room next to Pearson's room.
3594. Is that in the draftsman's room? Yes. I do not think I have anything else to say about this particular matter.
3595. Have you any information relating to any other property? Yes; there is a property near Granville which I have had an interest in for some time called the Campbell Hill Estate, and it seems there has been some difficulty in the Registrar-General's office as to a strip of land on the eastern side of this estate. This long strip of land on the eastern side belongs to the Campbell Hill Estate, but the office has made certain mistakes in passing the applications. It is shown in one application that this strip of 6 chains would come to this boundary [*pointing to the map*], whereas a later application would show the land coming to its proper boundary. That gave an irregular boundary to the estate. I employed a surveyor (Mr. Cardew) to survey this estate, and I went to the expense of ordering a survey at a cost of £250. Mr. Pearson said he would not take this survey, and I believe he would not take it because it showed the error made by the office as to this boundary. Since then the office has been endeavouring to bring the boundary out these 6 chains so as to correct their mistake. I and others have been making fresh applications for this land, and we have had a fresh survey made; but some one in the office, I believe, has sent to a party named Watkin to get him to apply for the long strip of land which runs along the eastern boundary of the Campbell Hill Estate. I do not see how anybody outside the office could have sent to Watkin and asked him to make an application for this narrow strip.
3596. What do you say is the width of that strip? It is about 6 chains, and it belongs to the Campbell Hill Estate; and to get over their trouble they have got Watkin to make another application for this strip as though it belonged to the previous application.
3597. What is Watkin's name? E. H. Watkin, I think.
3598. Who is interested with you in the Campbell Hill Estate? I have no interest in it, except in working out the matter. I may have an interest some time. Mr. Sutherland is having a survey made now.
3599. Is that Mr. Sutherland, of Mount Arcadia, near Parramatta? Yes.
3600. Have you any interest at present in that estate? No; I have been connected with it for a long time.
3601. Under what circumstances are you to obtain any interest in that estate? I made the matter known to Mr. Sutherland.
- 3602.

C. J.  
Campbell.

6 Nov., 1893.

3602. Did you sell Mr. Sutherland the information? Yes; prior to that I claimed this property on behalf of the Osbornes. I took possession of it on behalf of the Osborne's trustees, but it afterwards turned out that they had no interest in it. That is how I came to be interested in it.

3603. Have you not said that you have no interest at present in the Campbell Hill Estate? I have no interest.

3604. Are you to have an interest hereafter? Yes.

3605. What contingency is to happen before you obtain that interest? The land is to be brought under the Real Property Act, and all the expenses that have been incurred are to come out of the property. Then Mr. Sutherland and Mr. McRoberts each take a share, and, if there is sufficient left, I am to have a share.

3606. How much? Mr. Sutherland is to take a sixth share.

3607. What is Mr. McRoberts to take? The balance.

3608. What are you to get? I am to have a share with McRoberts.

3609. How much? That all depends upon the result from the land being brought under the Act.

3610. Are you working to bring that property under the Act? I have been all along; Mr. Sutherland is now doing it, and has been for some time, and I give him assistance if necessary.

3611. Are you giving him any assistance? They sent me the plan of the strip of land.

3612. How came they to send it to you? Believing I had an interest in it, I suppose.

3613. Who are "they"? Officials in the Land Titles Office. I thought it was important that the Commission should find out how these people came to know of this strip of land. Somebody must have put them up to apply for it, for no other reason than to go against me and others. Mr. Watkin will know all about it.

3614. What is Watkin's address? It says here [*on the plan produced*] Ashfield. I do not know him at all. Watkin sent to me, and asked me to try to get others not to lodge a caveat. That is the only time I have had anything to do with him.

3615. It is stated on this plan that the name of Watkin is "John Wesley Watkin"—you said the name of Watkin was E. H. Watkin;—is this John Wesley Watkin the person to whom you refer? I made a mistake, I meant John Wesley Watkin.

3616. Do you ask me to look at this application—this special notice of application handed in? Yes.

3617. What is this application? It is "special notice of application 9,028, dated 23rd of June, 1893."

3618. After seeing this notice, did you lodge a caveat? Mr. McRoberts lodged a caveat, I think.

3619. So far as you know, did anyone lodge a caveat? I believe Mr. McRoberts and Mr. Sutherland lodged caveats. John Wesley Watkin applied for a title under the Act for the whole of his land, and for that certificate issued in April 1869. His application was No. 1240, book 84, folio 10.

3620. Do you say that John Wesley Watkin is now applying for these 6 chains shown on this map? He is.

3621. Have you any other matter you wish to bring before the Commission? After Mr. Cardew made the survey, Mr. Pearson said he would not take Mr. Cardew's plan, because it affected some of the applications for land already under the Act. In fact, the applications were changed about in all sorts of ways.

3622. How many acres are there in Campbell Hill Estate? There were originally 900 acres. It was a Crown grant to John Thomas Campbell of 1,000 acres, and then 280 acres were sold separately.

3623. Do you claim to be a relative of that Campbell, the original grantee? No.

3624. Is there any other matter you wish to bring before me? After going to the expense of this survey Mr. Pearson said he would not take it, and it was of no use lodging it. I had a difficulty with Mr. Cardew in connection with money matters. I objected to this survey, and after it was objected to Mr. Cardew went to Mr. Pearson. Mr. Pearson made a declaration to the effect that I had never tendered the plan, and that I could not say he refused it, because I did not put in an application. I wrote to Mr. Pearson on the 18th of August, 1890.

3625. Did you send this letter [*produced*] and receive it back with this endorsement? Yes.

3626. Is this the letter?

R. M. Pearson, Esq.—  
Dear Sir,

52, Sydney Arcade, 1st Floor, King-street entrance, 18 August, 1890.

Having had a plan prepared by Mr. Cardew sometime since for the purpose of bringing certain portions of the Campbell Hill Estate under the Real Property Act, and having heard that you have rejected this survey as being incorrect in the case of S. Barber and Schimmel, I wish to know if it is any use lodging such plan; and, if not, whose survey you will accept?

Yours faithfully,

C. J. CAMPBELL.

That is the letter.

3627. Is this the endorsement on that letter:—"Dawson and Dawson's survey in this neighbourhood is accepted. Their place of business is over Batt, Rodd, and Purves, Pitt-street.—R.M.P., 18/8/90"? That is the endorsement.

3628. What followed after this correspondence? I refused to pay Cardew, who then went to Mr. Pearson, and Mr. Pearson made a declaration to him that I had not tendered the plan.

3629. Have you any other matter to bring before me? Yes; about another clerk in the department, Mr. Newcombe.

3630. Is that Mr. Henry Charles Edwin Newcombe? Yes.

3631. What do you say about Mr. Newcombe? There was a grant of land out at Botany, made to Mr. Newcombe's father and another. I purchased the title to this land for a party I was acting for in the matter from Mr. John Dawson, solicitor.

3632. Did the name of that "party" appear? My name did not appear.

3633. Whose name did appear? That of Mr. Sharp.

3634. What is his christian name? F. L. Sharp.

3635. What is his address? He lives in Ashfield. He is accountant to Messrs. Binney and Sons, wholesale leather merchants and saddlers' ironmongers, in George-street, just below Margaret-street.

3636. What have you to say about this? After purchasing this interest —

3637. Whose interest did you purchase? The interest of Mr. Henry Charles Edwin Newcombe's father. He had previously been insolvent, and Mr. John Dawson purchased his estate from the official assignee. After purchasing that interest I found that Mr. Henry Newcombe had seen Mr. Scrutton, an ironmonger at the bottom of Pitt-street, and told him that he was trustee for his father, and he got Mr. Scrutton

C. J.  
Campbell.  
6 Nov., 1893.

to convey to him this piece of land. What I complain about is that the grant had never been taken up, and it appears to me that Mr. Newcombe used his position in the department to get this grant from the Deeds Branch, because he had no right to it.

3638. Where do you say he got it from? From one of the Deed Grants.

3639. Was it a grant that had not been delivered up to that time? They could not have delivered it to him as he is not the right party. Then I was told —

3640. Told by whom? I am not quite sure who told me, but I was told when I was subpoenaing some documents.

3641. Who told you, some clerk? It would have been some one in the office.

3642. In the Land Titles Office or in the Deeds Branch? It would be in the Land Titles office. I was told that Mr. Newcombe having this grant had applied to bring the land under the Real Property Act, that his application was refused, and that he was told that he must get in the legal estate or some words like that. The record is not there. He being in the office has taken it away and nobody knows that it was ever applied for. I think that if he had not been in the office that record would have remained to show that the title was refused, and that he, knowing its position simply took it away.

3643. Is there any further matter you would like to bring before the Commission? There is a matter in connection with Mr. Donnelly Fisher, a solicitor, that I wish to speak about. It seems that Mr. Donnelly Fisher was making an application for some land, a portion of the Gore Estate, one of the Gore children's share. The title was passed, and in this application there was a mortgage produced from Gore to Wentworth, dated, 1815. This mortgage by rights should be in the Colonial Secretary's office; it was lodged there years ago. Then it went to the Lands office, and backwards and forwards, and it was afterwards stated to have been lost or stolen. When this application was made it was produced by Mr. Fisher, and the Government now cannot account for this mortgage.

3644. *Commissioner.*] I cannot go into this matter unless you can prove that the mortgage you refer to was taken from the Deeds Branch of the Registrar-General's Department.

3645. *Witness, continuing:*—I complain of the way in which it was produced in this application, the way in which it was taken away again, and its whereabouts is still a mystery.

3646. How do you know it is taken away? Because there is a receipt there signed by Mr. Fisher.

3647. Did you see this receipt? Yes.

3648. Do you know the number of the application? I think it is an application in the name of Mr. Whiting, which was made about 1881. Mr. Fisher was supposed to have taken this deed up and taken it away again. I referred to him and he went up with Whiting, and he said he could not have given the receipt, and that he was not responsible for the receipt, although it appeared in their names. He went up with Whiting to see this receipt, and afterwards he would not give me any satisfaction about it, or say where it went to.

3649. About what date did this happen? The application was made about 1881.

3650. Is there any other matter you wish to bring before me? There is a small matter in connection with Mr. Ward, the late Registrar-General. It was in connection with an application made by a Mr. Thomas Broughton, and it was thought that Mr. Ward was in some way interested in this title.

3651. What do you mean by that statement? I often heard this much stated.

3652. Heard it stated by whom? I cannot say by whom. Mr. Broughton wished to bring a portion of land under the Act, and he took to the Registrar-General's Office a man named Beryene. Mr. Broughton went into Mr. Ward's room and had a conversation with him, and then he came out to Beryene and told him if he would go in and make a declaration as to the Gore Estate —

3653. Who told you this? Beryene himself. Mr. Broughton told him that if he would make a declaration about the Gore Estate, he would give him £1,000. Beryene asked him how and when he would get the money. Broughton replied, "You know I will pay you; the money is alright." Beryene made the declaration, but since then he has not received anything. I only mention this to show you what goes on up at that office.

3654. Is there any other information you wish the Commission to know? There is only that in connection with the application of Mr. Whiting, in which Mr. Plomley bases the Gore Estate title on that case, and now these Examiners pass it on Broughton's title, a different thing altogether. Mr. Plomley, in that application of Whiting's, states that there has been fraud. I do not see how they can pass Broughton's title, now that Plomley has gone fully into it; still they do so.

[The witness withdrew.]

TUESDAY, 7 NOVEMBER, 1893.

[The Commission met at 10 o'clock.]

Present:—

HIS HONOR JUDGE FITZHARDINGE.

Robert Mead Pearson re-called:—

R. M.  
Pearson.  
7 Nov., 1893.

3655. *Commissioner.*] Be good enough to listen carefully to the statement I shall read to you taken down from the lips of Charles Jackson Campbell. His statement is as follows:—

*Commissioner.*] Did you write to me stating that you wished to give some additional information to the Commission? Yes.

What does this information concern? There are several officials in the Registrar-General's Department who seem to be against me, and I think their reason is because I have gone into matters which they themselves have been working up. I have opposed them, and I think I shall be only doing right in saying who these parties are. One is Mr. Pearson, and he has always shown me as much opposition as he could. He has refused me all sorts of papers which he shows to anyone else, and the reason why he does this is on account of a matter he was working up in Kent-street. The owner of the property in question was dissatisfied with Mr. Pearson, he came to me and I took it on.

Who was that person? His name is William Hardy.

What is his address? Elgin-street, West Maitland.

Whom did you hear this from? From William Hardy himself. It seems that William Hardy's father was a soldier here in the early days, and he was supposed to have acquired a grant of land in Kent-street, Sydney. This William Hardy, the son, has been trying to find out the position of this land for a long time. He went to Mr. W. H. Mullens, a solicitor. Mr. Mullens brought Hardy down to Sydney, took him to see Mr. Pearson at the Registrar-General's Office, and Hardy says that an arrangement was made between Messrs. Mullens and Pearson to work up this case. I cannot prove what took place,

place, but Hardy has always stated to me and others that Messrs. Mullens and Pearson entered into a private arrangement together. It was also stated that the position of the property was found out, and as far I understand they put a man on it in a tent to hold possession.

R. M.  
Pearson.

7 Nov., 1898.

In what part of Kent-street is this land situated? It is lot 5, section 93.

In what part of the street is this allotment situated? Between the Gas-works and Miller's Road, opposite the Flagstaff.

Do you wish to speak of any other matter before you leave, Mr. Pearson? I believe Mr. Pearson was taking a share in this property even while I was working up the matter for Hardy.

When did Hardy come to you? It would be some time in 1891. I saw the plan. When Mr. Mullens went into Mr. Pearson, Mr. Pearson sent for the plan. He got everything connected with this property into his office, and went thoroughly into the matter with Mr. Mullens.

Where did you hear that? From William Hardy. A few days afterwards Hardy became dissatisfied, as he considered that Mr. Pearson and Mr. Mullens were working against him. Then he came to me, and asked me to work the matter up for him.

Was that in the year 1891? Yes.

In what month? I cannot say, but I think it would be about the middle of 1891. I know at the time I went to Maitland, and I could trace the date from that circumstance. Hardy came to me and I proceeded to look the matter up. I saw the plan the first time I asked for it, but since then the officials in the department have refused to show me this particular plan of the city of Sydney.

In whose possession was that plan which you saw on that particular occasion? It was produced over the counter, in the room next to Mr. Pearson's room.

Is that in the draftsman's room? Yes; I do not think I have anything else to say about this particular matter.

What have you to say with respect to that statement? The part of it referring to my having shown the plan to Mr. Mullens is quite correct, but all the rest is absolutely false.

3656. Had you any arrangement with Mr. Mullens? Most decidedly not.

3657. Had you given Mr. Mullens any assistance other than that which you have been in the habit of giving to other members of the public? No.

3658. Did Mr. Mullens call upon you in the usual way? Yes.

3659. As principal draftsman did you give him the information he desired? Yes.

3660. Do you know William Hardy, of Elgin-street, West Maitland? No.

3661. Can you say whether he has ever been in your room? I have no recollection of having ever seen him.

3662. Have you at any time refused to show a plan to Charles Jackson Campbell that you have shown to other members of the public? I have refused to let him see many plans.

3663. What plans would they be? Mostly plans possessed by the Department for use in the matter of titles. These plans I consider to be of a private nature, and neither Campbell nor anybody else is allowed to see them.

3664. Has Campbell on many occasions applied to you for information? Yes; on very many times.

3665. Have you on any of these occasions given him information? We have allowed him to see certain plans, county maps, parish maps, and town maps. We have never prevented him seeing what other people were allowed to see.

3666. Be good enough to listen to this statement, which comes from the same source covered from Question No. 3595 to Question No. 3628:—

Have you any information relating to any other property? Yes. There is a property near Granville which I have had an interest in for some time, called the Campbell Hill Estate, and it seems there has been some difficulty in the Registrar-General's Office as to a strip of land on the eastern side of this estate. This long strip of land on the eastern side belongs to the Campbell Hill Estate, but the office has made certain mistakes in passing the applications. It is shown in one application that this strip of 6 chains would come to this boundary [pointing to the map] whereas a later application would show the land coming to its proper boundary. That gave an irregular boundary to the estate. I employed a surveyor, Mr. Cardew, to survey this estate, and I went to the expense of ordering a survey, at a cost of £250. Mr. Pearson said he would not take this survey, and I believe he would not take it because it showed the error made by the office as to this boundary. Since then the office has been endeavouring to bring the boundary out these 6 chains, so as to correct their mistake. I and others have been making fresh applications for this land, and we have had a fresh survey made; but someone in the office, I believe, has sent to a party named Watkin to get him to apply for the long strip of land which runs along the eastern boundary of the Campbell Hill Estate. I do not see how anybody outside the office could have sent to Watkin and asked him to make an application for this narrow strip.

What do you say is the width of that strip? It is about 6 chains, and it belongs to the Campbell Hill Estate; and to get over their trouble they have got Watkin to make another application for this strip as though it belonged to the previous application.

What is Watkin's name? E. H. Watkin, I think.

Who is interested with you in the Campbell Hill Estate? I have no interest in it, except in working out the matter. I may have an interest some time. Mr. Sutherland is having a survey made now.

Is that Mr. Sutherland of Mount Arcadia, near Parramatta? Yes.

Have you any interest at present in that estate? No; I have been connected with it for a long time.

Under what circumstances are you to obtain any interest in that estate? I made the matter known to Mr. Sutherland.

Did you sell Mr. Sutherland the information? Yes; prior to that I claimed this property on behalf of the Osbornes.

I took possession of it on behalf of the Osborne trustees, but it afterwards turned out that they had no interest in it. That is how I became to be interested in it.

Have you not said that you have no interest at present in the Campbell Hill Estate? I have no interest.

Are you to have an interest hereafter? Yes.

What contingency is to happen before you obtain that interest? The land is to be brought under the "Real Property Act," and all the expenses that have been incurred are to come out of the property. Then Mr. Sutherland and Mr. McRoberts each take a share, and if there is sufficient left I am to have a share.

How much? Mr. Sutherland is to take a sixth share.

What is Mr. McRoberts to take? The balance.

What are you to get? I am to have a share with Mr. Roberts.

How much? That all depends upon the result from the land being brought under the Act.

Are you working to bring that property under the Act? I have been all along; Mr. Sutherland is now doing it and has been for some time, and I give him assistance if necessary.

Are you giving him any assistance? They sent me the plan of the strip of land.

How came they to send it to you? Believing I had an interest in it, I suppose.

Who are "They"? Officials in the Land Titles Office. I thought it was important that the Commission should find out how these people came to know of this strip of land. Somebody must have put them up to apply for it, for no other reason than to go against me and others. Mr. Watkin will know all about it.

What is Watkin's address? It says here [on the plan produced] Ashfield. I do not know him at all. Watkin sent to me and asked me to try to get others to lodge caveat. That is the only time I have had anything to do with him.

It is stated on this plan that the name of Watkin is "John Wesley Watkin"—you said the name of Watkin was E. H. Watkin;—is this John Wesley Watkin the person to whom you refer? I made a mistake. I meant John Wesley Watkin.

Do you ask me to look at this application—this special notice of application handed in? Yes.

What

R. M.  
Pearson.  
7 Nov., 1893.

What is the application? It is "Special notice of application," application 9,021, "notice dated 23rd of June, 1893";—after seeing this notice did you lodge a caveat? Mr. McRoberts lodged a caveat, I think. So far as you know, did anyone lodge a caveat? I believe Mr. McRoberts and Mr. Sutherland lodged caveats. John Wesley Watkin applied for a title under the Act for the whole of his land, and for that a certificate issued in April, 1869. His application was No. 1,240, book 85, folio 10.

Do you say that John Wesley Watkin is now applying for these 6 chains shown on this map? He is. Have you any other matter you wish to bring before the Commission? After Mr. Cardew made the survey Mr. Pearson said he would not take Mr. Cardew's plan, because it affected some of the applications for land already under the Act. In fact, the applications were changed about in all sorts of ways.

How many acres are there in Campbell Hill Estate? There were originally 900 acres. It was a Crown grant to John Thomas Campbell of 1,000 acres, and then 280 acres were sold separately.

Do you claim to be a relative of this Campbell, the original grantee? No. Is there any other matter you wish to bring before me? After going to the expense of this survey Mr. Pearson said, as he would not take it, it was no use lodging it. I had a difficulty with Mr. Cardew in connection with money matters. I objected to this survey, and after it was objected to Mr. Cardew went to Mr. Pearson, and Mr. Pearson made a declaration to the effect that I had never tendered the plan, and that I could not say he refused it, because I did not put in an application. I wrote to Mr. Pearson on the 18th of August, 1890.

Did you send this letter [*produced*] and receive it back with this endorsement? Yes.  
Is this the letter?—

" R. M. Pearson, Esq.,

52, Sydney Arcade, 1st Floor, King-street Entrance, 18 August, 1890.

" Dear Sir,

" Having had a plan prepared by Mr. Cardew some time since for the purpose of bringing certain portions of the Campbell Hill Estate under the Real Property Act, and having heard that you have rejected this survey as being incorrect in the case of S. Barber and Schimmel, I wish to know if it is any use lodging such plan, and if not, whose survey you will accept.

" Yours faithfully,  
" C. J. CAMPBELL."

That is the letter.

Is this the endorsement on that letter—" Dawson and Dawson's surveys in this neighbourhood are accepted. Their place of business is over Batt, Rodd, and Purves, Pitt-street. R.M.P., 18/8/90"—? That is the endorsement.

What followed after this correspondence? I refused to pay Cardew, who then went to Mr. Pearson, and Mr. Pearson made a declaration to him that I had not tendered the plan.

Having heard that statement, do you wish to say anything? Those parts of the statement affecting me are altogether untrue.

3667. So far as you know, did the officials in the Land Titles Office make any mistakes in passing in the application relative to the Campbell Hill Estate? No; decidedly not.

3668. Have you ever heard that any mistakes were made by the Land Titles Office officials with regard to that property? No; none.

3669. Did you or any other official suggest to Mr. J. W. Watkin that he should apply to bring the strip of land 6 chains wide, supposed to be a portion of the Campbell Hill property, under the Real Property Act? No.

3670. Has any such application been made? Yes.

3671. Do you know how that application was brought about? I know nothing beyond what is contained in the official papers.

3672. So far as you know, has a caveat been lodged? I cannot answer that question without having seen the papers.

3673. Did you decline to accept a certain plan made by one Mr. Cardew? The plan was never lodged.

3674. Was Mr. Cardew's plan rejected? It never was tendered in any case.

3675. Was it ever rejected? As it was never tendered it could not have been rejected.

3676. Is there any other remark you wish to make with regard to this matter? I think the statements made by Campbell show a most vindictive spirit. The statements he made to you on this recent occasion are the outcome of absolute vindictiveness through me declining to show him private plans in the department.

[The witness withdrew.]

Henry Charles Edwin Newcombe recalled:—

H. C. E.  
Newcombe.  
7 Nov., 1893.

3677. *Commissioner.*] I wish you to listen to this statement taken from the lips of Charles Jackson Campbell:—

Have you any other matter to bring before me? Yes; about another clerk in the department, Mr. Newcombe.

Is that Mr. Henry Charles Edwin Newcombe? Yes.

What do you say about Mr. Newcombe? There was a grant of land out at Botany made to Mr. Newcombe's father and another. I purchased the title to this land for a party I was acting for in the matter, from Mr. John Dawson, solicitor.

Did the name of that party appear? My name did not appear.

Whose name did appear? That of Mr. Sharp.

What is his Christian name? F. L. Sharp.

What is his address? He lives in Ashfield. He is accountant to Messrs. Binney & Sons, wholesale leather merchants and saddlers' ironmongers, in George-street, just below Margaret-street.

What have you to say about this? After purchasing this interest—

Whose interest did you purchase? The interest of Mr. Henry Charles Edwin Newcombe's father. He had previously been insolvent, and Mr. John Dawson purchased his estate from the official assignee. After purchasing that interest I found that Mr. Henry Newcombe had seen Mr. Scrutton, an ironmonger, at the bottom of Pitt-street, and told him that he was a trustee for his father, and he got Mr. Scrutton to convey to him this piece of land. What I complain about is that the grant had never been taken up, and it appears to me that Mr. Newcombe used his position in the Department to get this grant from the Deeds Branch because he had no right to it.

Where did you say he got it from? From one of the deed grants.

Was it a grant that had not been delivered up to that time? They could not have delivered it to him as he is not the right party. Then I was told—

Told by whom? I am not quite sure who told me, but I was told when I was subpoenaing some documents.

Who told you—some clerk? It would have been someone in the office.

In the Land Titles Office or in the Deeds Branch? It would be in the Land Titles Office. I was told that Mr. Newcombe having this grant had applied to bring the land under the Real Property Act, that his application was refused, and that he was told that he must get in the legal estate or some words like that. The record is not there. He, being in the office, has taken it away, and nobody knows that it was ever applied for. I think that if he had not been in the office that record would have remained to show that the title was refused, and that he, knowing his position, simply took it away.

After having heard that statement, do you wish to say anything? Yes. I would like to explain that matter. William Newcombe, the Grevilles, and I, as tenants in common of 5 acres of land at Randwick, mentioned in the grant, made application to bring that land under the Act. The application was made to

to

to the Lands Department official for the production of the grant to enable the examiner to investigate the case. Two of the examiners differed in regard to the application, and it was referred to the opinion of a third examiner. That third examiner, I believe, was Mr. E. D. Burton. In these circumstances the application was withdrawn. The grant and all the papers are still in the office. That is the only statement I have to make in reference to this matter.

H. C. E.  
Newcombe.  
7 Nov., 1893.

3678. Did Mr. Scrutton ever convey the land to you? Yes; Mr. Robert Law Scrutton, senior.  
3679. Under what circumstances did he make this conveyance? He said the land was conveyed to him in trust for the family.  
3680. Which family? For the Newcombe family.  
3681. Conveyed to him by whom? By Mr. Francis Viret.  
3682. How did Mr. Viret become entitled to this land? The land was sold to him by my father.  
3683. Is Mr. Viret living? He has been dead many years, your Honor.  
3684. Before his death, had you any conversation with him at any time about this land? Yes, several times. He wished to convey the land to me, but I declined to have anything to do with it.  
3685. How many years ago did this happen? It must have been twenty-five or thirty years ago, your Honor.  
3686. When did Mr. Scrutton convey this land to you? Seven or eight years ago I think it was when he conveyed the land to me and my brother William.  
3687. Who acted for you in that matter? Messrs. Abbott and Dodds did everything that was done.  
3688. Did you go into possession? Yes.  
3689. Is there any building or fencing upon that land? None whatever; it is vacant land.  
3690. Did you ever get the grant from the Deeds Branch in the Registrar-General's Department? No, your Honor.  
3691. When you withdrew the application, did you remove any of the papers from the Land Titles Office? No; all the papers are in the Land Titles Office now.  
3692. Have you ever had any dealings with Charles Jackson Campbell? No, none whatever.  
3693. Did Campbell ever write to you about this land at Randwick? Yes. He wrote to me in the interest of a client some three years ago. I think the substance of his letter was that I should convey the land to him.  
3694. In what terms did you reply to that letter? I replied that I did not intend to do anything of the kind.  
3695. Did anything further follow? Yes; I think Campbell sent me another letter, to which I replied in similar terms.  
3696. Has Campbell ever taken any proceedings in law or equity against you? Not to my knowledge.
- [The witness withdrew.]

WEDNESDAY, 8 NOVEMBER, 1893.

[The Commission met at 10 o'clock.]

Present:—

HIS HONOR JUDGE FITZHARDINGE.

The Hon. James Norton, M.L.C., sworn and examined:—

3697. *Commissioner.*] What are you, Mr. Norton? I am senior partner in the firm of Norton, Smith, & Co., and I have been practising as an attorney since the year 1848. I am a Member of the Legislative Council of New South Wales, and I hold the degree of LL.D.  
3698. During your many years of experience have you at times visited the Search Room of the Deeds Branch in the Registrar-General's Department? I have often visited it, but not of late years, as that part of my business is carried on either by my partners or by my clerks.  
3699. On any occasion have you been unable to obtain a register or any other record you wished to inspect when you visited that room? I cannot say so. No complaints have been made to me personally in that respect.  
3700. Has it ever been reported to you either by one of your partners, or by one of your clerks, that any register has been mislaid or missing? It has.  
3701. Can you tell me when? I cannot remember when, but I think that it was within the last two or three years. Possibly it may have been within the last twelve months.  
3702. Can you remember the particulars of that complaint? No; I cannot remember. I think my partner informed me on the matter.  
3703. Can you say whether that register said to be missing was afterwards obtained? I cannot say. The fact was reported to me that something was missing, but no particular case was mentioned. The affair cropped up when we were merely talking of the irregularities going on in the office.  
3704. Have you ever heard of any particular register, or has it ever been reported to you that some particular register was not forthcoming? I cannot specify any particular register.  
3705. In your opinion, is it necessary that persons searching should be allowed to take extracts? I can say that business cannot be satisfactorily carried on unless searchers are allowed to take extracts.  
3706. In your opinion, would it be impracticable to carry on the business of a solicitor's office unless search clerks or searchers are allowed to take extracts? I think it would be impracticable, and certainly very much more expensive than at present.  
3707. During all the years of your experience, has it been the custom to obtain these extracts? Always; I have had thousands of such cases.  
3708. In your opinion, is that custom reasonable and universal? It is quite reasonable, but I cannot say whether it is universal. I can speak of it having been universal as long as I conducted searches myself personally.

The Hon.  
J. Norton,  
M.L.C.  
8 Nov., 1893.

[The witness withdrew.]

MONDAY,

MONDAY, 20 NOVEMBER, 1893.

[The Commission met at 10·30 o'clock.]

Present:—

HIS HONOR JUDGE FITZHARDINGE.

Herbert Chappel recalled:—

- H. Chappel. 3709. *Commissioner.*] In answer to a question about the amount of money paid to Hopkins, have you already said that Campbell did all the book-keeping, and paid all the accounts? Yes.
- 20 Nov., 1893. 3710. Did you keep any of the books yourself—books of the firm of Campbell and Chappel? No.
3711. Did you keep the bill-book? I do not think we had such a thing as a bill-book.
3712. Had you a bill-book of your own? Yes.
3713. [*Bill-book produced.*] Is this the book? Yes.
3714. Under “Bills payable,” you will see the sixth and seventh entries—are they in your handwriting? No.
3715. Whose handwriting are they in? That of Mr. R. K. Davies, an accountant. After Mr. Campbell and I quarrelled we had our accounts audited. I employed an accountant named R. K. Davies, and he employed Mr. Mitchell. A Mr. Middleton, Mr. Davies’ head clerk, acted for him some times. The handwriting in the bill-book is that of Mr. R. K. Davies. When I said I did not keep books, I should have added that I kept memoranda on slips of paper, and these were copied into the books.
3716. Can you tell me where this entry is taken from, “Hopkins, promissory note £40, dated 20th of February, 1889, payable 23rd of June?” I have an idea that the entry originated from a book kept by Campbell. He had a kind of bill-book, one of his own manufacture, and I think that entry must have come from there.
3717. Did you ever see the entries in this book? While the audit was going on I went round and saw them. I placed implicit confidence in all the people concerned.
3718. Do you know anything about the next entry by which it appears that Hopkins received a promissory note for £50? I know he did receive several, but I cannot say distinctly which at the present time.
3719. Can you say anything about the eleventh entry, which shows that Hopkins received another promissory note for £60? I do not remember that particular transaction.
3720. Can you explain the twenty-second-entry, by which it appears that Hopkins received a promissory note for £400? I cannot explain.
3721. Can you explain the twenty-fourth entry by which it appears that Hopkins received a promissory note for £62? No.
3722. Can you explain the twenty-sixth entry by which it appears that Hopkins received a promissory note for £60? No; I cannot remember. All those entries must have been taken from Campbell’s book.
3723. Can you explain the fiftieth entry by which it appears that William Wentworth Bucknell received a promissory note for £160? That was in connection with some interest still owing to Mr. Hopkins. Mr. Bucknell had arranged a second mortgage on the Battersea property, so that I could pay Hopkins the balance of money due to him. That £160, with interest, is still owing to Mr. Bucknell as the agent for some lady.
3724. Has that promissory note for £160 been paid? No, your Honor.
3725. Do you wish to lead me to understand that the £160 is for interest? No. All above the £160 now due, and I think the amount due is £180, may be regarded as interest. There is still an amount owing to Bucknell, and that is what he has been down so repeatedly to see us about; we were not able to pay him.
3726. Was that £160 for principal or interest? For the principal part of the amount originally paid to Hopkins.
3727. Can you tell me who handed that promissory note to W. W. Bucknell? I cannot say, your Honor. I rather think he drew it up himself, and we signed it.
3728. Can you say whether that promissory note was drawn up in your office or in the Registrar-General’s office? I cannot say, your Honor.
3729. I now draw your attention to entries under “Bills receivable”—can you explain the seventh entry, by which it appears that Hopkins paid to you a promissory note for £60, dated June 26th, (no year mentioned) with the currency of three months? That was an accommodation bill.
3730. Had you any other accommodation bill from Hopkins at any time? I am under the impression we had, but I cannot say for certain.
3731. Can you say how many accommodation bills you had? I do not think more than two.
3732. Can you remember the amount of the second bill? No; I cannot remember.
3733. Can you explain this entry under date 25th of January, 1890:—“Paid to Bucknell on account of loan, £50”? I cannot explain it, your Honor.
3734. Can you explain a further entry dated the 29th of January, 1890:—“Paid to Bucknell £50 due”? It must have been part of the original amount due.
3735. Can you explain an entry in this small ledger [*ledger produced*] under date July 10th, 1889, showing that Campbell and Chappel received from Hopkins the sum of £50? I think so.
3736. On the 10th of July did you receive £50? Yes.
3737. On August the 7th did you receive £100? Yes.
3738. On July 10th did you receive £30? These sums were in connection, I think, with some interest in the Mount Macdonald gold-mine.
3739. Was Hopkins interested with you or with Campbell in any other than the Mount Macdonald gold-mine? I do not think so. We talked mining matters over with Hopkins, and tried to get him in, but I do not think we could get him to join us in any other mining matters. I think you will find that Hopkins’ name is mentioned in the shareholders’ book of the Mount MacDonald Gold-mining Company.
3740. In this other small ledger [*produced*] can you explain an entry under date December the 6th, 1889, by which it appears that Bucknell paid to Chappel and Campbell the sum of £30? I have no idea of it, your Honor.
3741. Do you remember ever having received any money from Bucknell? No; but at the same time I would not swear we never have done so, but I have not the slightest remembrance of it.

## DEEDS AND SEARCH BRANCH, REGISTRAR-GENERAL'S DEPARTMENT.

3742. In this large ledger [*produced*] can you explain this entry dated April the 6th, 1889, "Hill, search, £1"? No; except it may have been for some search in connection with the Campbell Hill Estate or property at Surry Hills. H. Chappel.  
20 Nov., 1893.

3743. Can you say whether that entry refers to Hill, the book-porter in the Registrar-General's Department? No, it does not.

3744. Are you certain upon that point? I am quite certain upon that point, your Honor.

3745. I will come back to the bill-book—did Campbell from time to time see this bill-book? I do not think he ever saw it until the audit was being made.

3746. Did he see it during the audit? Yes.

3747. Did he know that the book was in existence? Yes.

3748. Did you with Campbell ever refer to any entries in this bill-book? I think I did concerning an item of £72 with Rogalsky; we had a dispute over this amount, and I think we referred to the book in connection with that.

[The witness withdrew, and this closed the taking of evidence.]

December 1st, 1893.

**ROYAL COMMISSION ON DEEDS AND SEARCH BRANCH REGISTRAR-  
GENERAL'S DEPARTMENT.**

**APPENDIX.**

**EXHIBIT A.**

REGISTRAR-GENERAL'S DEPARTMENT.

REPORT of the Deputy Registrar-General (Deeds Branch) for the month of September, 1893.

1. Attendance:—Satisfactory.
2. Efficiency:—Good.
3. Attention to Duties:—Satisfactory.
4. Leave of Absence:—Leave granted to Mr. Napier on the 13th, and Mr. Gillam on the 30th, both by permission of Registrar-General.
5. Arrears of Business (if any):—

|                           |     |
|---------------------------|-----|
| C.Ps. on hand             | 2   |
| Received during the month | 703 |
|                           | 705 |
| Registered                | 704 |
|                           | 1   |

6. Remarks or Suggestions:—No. of C.Ps. unindexed, 200; No. of Deeds unindexed, 106; No. of Deeds not checked, 130.
- This Branch has been short-handed in consequence of the absence of G. W. Hill since the 22nd September.

Submitted to the Registrar-General with Attendance Book.

4 October, 1893.

W. A. ABBOTT,  
Deputy Registrar-General.

REGISTRAR-GENERAL'S DEPARTMENT.

Analysis of Attendance Books for September, 1893.

*Arrivals after 9:15 a.m.*

Deeds Branch—

Mr. Napier:—1st, 8th.

*Departures after 4:45 p.m.*

Deeds Branch—

Mr. Gillam:—1st, 2nd, 4th, 9th, 11th, 12th, 13th, 14th, 16th, 19th, 20th, 22nd, 23rd, 25th, 27th.  
 Mr. Napier:—1st, 2nd, 4th, 5th, 7th, 8th, 11th, 12th, 14th, 16th, 19th, 20th, 21st, 23rd, 25th, 26th, 28th, 29th, 30th.  
 Mr. Maguire:—1st, 2nd, 4th, 5th, 6th, 8th, 9th, 11th, 12th, 13th, 14th, 15th, 16th, 18th, 19th, 20th, 21st, 22nd, 23rd, 25th, 26th, 28th, 29th, 30th.  
 Mr. Codrington:—9th.  
 Mr. Campbell:—22nd, 23rd, 26th, 27th, 30th.

*Leave of Absence.*

Deeds Branch—

Mr. Hill:—Half-day, 13th; suspended, 22nd.  
 Mr. Napier:—13th, 1 day.  
 Mr. Begbie:—Half-day, 19th; races.  
 Mr. Kelleher:—Half-day, 21st; races.  
 Mr. Campbell:—21st, half-day; races.

The following are the Acts administered in the Deeds Branch, Registrar-General's Department:—

1. Registration of Deeds, 7 Vic. No. 16.
  2. Companies, 37 Vic. No. 19.
  3. Trade Marks, 28 Vic. No. 9.
  4. Companies (No Liability), 44 Vic. No. 23.
  5. Liens on Wool } 11 Vic. No. 4.
  6. Mortgage of Cattle }
  7. Liens on Crops, 26 Vic. No. 10.
  8. Titles to Land Act, 1858.
  9. Part 7, sec. 117 of
  10. Crown Lands Act, 1884 (Transfer of Conditional Purchases).
  11. Probate Act, 54 Vic. No. 25 (sec. 24, sec. 11, and subsec. 3 of sec. 23).
  12. Bank Act, 7 Vic. No. 13.
  13. Bankruptcy Act, 31 Vic. No. 19 (sec. 11).
- &c., &c.

EXHIBIT B.

## EXHIBIT B.

*In re Campbell v. Anglo-Australian I. F. and L. Co., Ltd.*

Remarks by Sir Frederick Darley, C.J., upon conduct of business in the Registrar-General's Department. From the tenor of the reports, forwarded herewith, it is demonstrable that the adverse opinion expressed by the Chief Justice was based upon evidence given under misapprehension of the facts and of want of knowledge of the methods guiding the transactions of the Deeds Registration Office.

Much stress was laid by two witnesses upon the loss or abstraction, between May and the 19th September instant, of the "missing Cumberland Register 28 No. 2."

It is now conclusively proved that no such register was ever in existence.

The record actually searched in May was Register C of Special Grants in 1833, and this register was produced at the instance of the Department, at a subsequent stage of the trial.

The other main point in the indictment is that the present system of searching and of access to the records is "loose and dangerous."

So comprehensive a charge is somewhat difficult of defined answer.

To this matter of "searching and access," it may here be stated, I have long devoted anxious attention.

Under the provisions of the Registration Act, 7 Victoria No. 16—sections 14 and 29—any person has, upon payment of the schedule fee, the right to demand search in any registered documents.

I have introduced for security's sake such restrictions as were not incompatible with that right.

The question here naturally presents itself: If the present system be imperfect, and, to a certain extent, unsafe for the reliable custody of these valuable records, why is not a perfected system proposed?

If the law now in force be continued, the risk of abstraction or tampering with deeds might be, in some degree, minimised by the employment of several additional supervisors of searchers.

But this would not afford absolute security against malpractice.

The exclusion of the public would necessitate the employment of a body say, approximately, of ten or twelve—public searchers, an increased expenditure of some £3,000 per annum, and a contingent liability of the Government in action for damages for error.

Searches for title in this branch are complex, generally extending back for many years, and complicated by numerous covenants and encumbrances.

Conveyancing solicitors would certainly not be satisfied with bald notes of continuance of title, but would demand full particulars of all covenants, &c., and thus would necessarily be recommenced the personal examination of all deeds by the public or other agents, which has been the basis of the present complaint.

With regard to the suggested implication of Mr. Hopkins, an officer of this Department, in the disclosure of certain titles (all of which transactions took place before I held my present office), I would refer to my reports of 28/4/90, 16/9/90, and 6/9/90, in which these matters are fully set forth.

Such reports, together with all papers in connection therewith, are now returned.

This trial has been the first intimation I have had of any connection of Hill with any outside persons in official matters.

CHARLES PINHEY,  
Registrar-General.

September 22nd.

*In re Campbell v. Anglo-Australian I. F. & L. Co., Ltd.*

Sir,

Deeds Branch, 21 September, 1893.

I beg most respectfully to submit the following statement (as Mr. Gillam requested me to make one) *re* my connection with Messrs. Chappell and Campbell, and the suit now proceeding in the Supreme Court (*Campbell v. Anglo-Australian, &c.*).

1. I first became acquainted with Mr. Chappell about six years ago when he was in business in George-street, Haymarket, as agent for Bruce and Massey, and through him I purchased a pianoforte on time-payment system, and very shortly after the purchase I got into arrears, when I borrowed £5, which we repaid. He afterwards gave up the business and started on the land business in the Arcade, and as I had some difficulty in keeping up the payments, having purchased it from him, I called several times so that he might speak to Bruce and Massey for me, as I was afraid I might lose it.

2. As far as the land business is concerned, I know nothing further than that they make searches, order certified copies, &c., both themselves and through law stationers, all fees for which being duly paid, I have not, neither have I ever had, any interest in any of their affairs, even to the extent of a single penny. With respect to the mention I made of having taken a certified copy to their office, I may state that the copy was wanted in a hurry, and as it was not called for, and I was going down the town, I thought there would be no harm in leaving it, and it is the only occasion on which I left any. This occurred fully four years ago, and I have had no connection with them whatever since.

3. With respect to the land grant register "Co. Cumberland Register No. 28," which is reported to be missing, I positively state that no such volume has ever been in the Deeds Branch, at any rate not since 1879, and so far as I can learn never was such a book in existence. Perhaps Mr. McKern, in charge of the Deeds in the Lands Department, might be able to throw some light on the matter.

I have, &c.,

GEO. W. HILL.

The Registrar-General.

Report of trial—on 19th September, 1893, *Campbell v. Anglo-Australian I. F. and L. Co. Ltd.*

Memo.—Urgent.

THE Chief Secretary having called for a report upon the evidence leading to the strictures of the Chief Justice, upon the facts of the case and generally as to the custody of documents, and the method of procedure in the Deeds Branch, the Deputy Registrar-General is requested to furnish a statement in explanation, and touching the following points, viz. :—

Custody of documents and Registers; necessity for, or objection to, taking extracts—in pencil—when searching. Access to all documents, demandable by any person, upon payment of statutory fees.

The fact, or otherwise, of any register, in possession of the Department, in May last, being now missing.

If the Department has ever had in its custody a Grants Register numbered “28” other than the one produced in Court.

Any suggestions for the better conduct of the business or the conservation of public interests.

C.P., R. G.

Mr. Deputy Registrar-General Abbott, Deeds Branch.

In *re Campbell v. Anglo-Australian I. F. & L. Co. (Limited)*.

Memo.

THE Registrar-General having called for a report touching the strictures passed upon the Registration of Deeds Office by His Honor the Chief Justice, I have the honor to append the following facts in answer thereto.

The Deeds Record Room, which is fireproof, contains about one million documents, composed of Grants, Deeds, Public Companies' Records, Trade-marks, &c., the majority of which documents are bound in Registers. The room is so much congested by the vast number of records that the space at command is reduced to a minimum. Any person, on paying a fee of 2s. 6d. for each search, is entitled to search the indexes and examine the registers. (See Clauses 14, 29, and Schedule B, Registration of Deeds Act, 7 Vic. No. 16.)

Search clerks are employed by all the principal solicitors in tracing titles. Often twenty to thirty gentlemen are employed at the same time in this way. As it is necessary that the result of their searches should be communicated to their employers, with certain restrictions, references and extracts bearing upon the title are permitted to be taken. These references are only in pencil, the use of ink being rigorously forbidden. I may state that searching without references being allowed would be valueless, as solicitors would have no data as to encumbrances, &c., upon which to prepare their conveyance.

The Deeds Record room is under my immediate charge and direction as Deputy Registrar of Deeds, my office being shut in by glass, and being situated at the head of the room, leading to a large open office containing about twelve clerks.

The whole of the records are in presses situate at right angles to the counter within which my staff work, this giving a clear view to these officers of the whole of the room. Mr. Hill is the Record Attendant under me, and it is his duty to attend to the requirements of the room, examine the searchers' tickets, make grant searches, &c. It must be understood that on no account are the public allowed the use of these Grant Indexes or Registers without an officer of the Department being with them, nor is it possible for any person to search them, situated as they are close by the clerks' desks, without being observed. It would in my opinion be impossible to observe greater caution with regard to their use than has hitherto been obtained. No Register whatsoever in the possession of the Department in May last has since been found “missing,” despite any evidence to the contrary. With regard to the reported loss of Cumberland Register 28, I can authoritatively state that no such Register of Grants ever existed, nor could it have existed, as is borne out by corroborative evidence; the Grants, which are closely packed together having no space left which would denote a missing number, nor do the indexes, which are perfect, give any reference to any Cumberland Register 28.

The fact is that sometime in May last the Principal Draftsman—Mr. George Evans, solicitor, being with him—sent down for the 1833 Register of Grants, in order to ascertain whether any reference was made in it to the presumed forged grant. On looking through the register they found that there was no grant in it corresponding with the said presumed forged grant. Naturally they imagined, the date being similar, that the reference in our register would correspond with that on the document they held in their hand.

Mr. Evans personally saw me as to this register, and each time asked for Cumberland Register 28, and seemed annoyed that I could not produce it. The only Register 28 we possess I showed him, when he stated that it was not the one he wanted.

The Registrar-General and the Principal Draftsman were with me yesterday in the Record Room when Grant Register C (containing grants from 1830 to 1834) was shown him, when the Principal Draftsman admitted that it was the same register which had been shown him in May last, and that if he had said it was the “Cumberland Register 28” that he had seen he had stated so in error.

The only Cumberland Registers are those relating to the very early grants, and end in December, 1809, as only grants in the County of Cumberland were issued in the early days.

I cannot see in what way the public interests could be better conserved than at present. Since the present Registrar-General assumed the office in 1890 the disposition of the presses in the Record Room has been materially altered, in order to give complete oversight, and I firmly believe that the present system is as perfect as it can well be. Under the present circumstances the only perfect check would be by the employment of professional search clerks, and excluding the public altogether from the Record Room. This innovation, however, would entail great expense on the Government, and would require a large staff of search clerks, attendants, &c. The space at command would not permit of the necessary change, as an essential to its success would be a large counter placed at the end of the building, at which all business and references with regard to searching, &c., could be done. I am, however, well assured that the profession would object to the innovation, and would generally refuse to accept the search furnished them.

In

In concluding, I may state that the evidence which led to the Chief Justice's remarks was given by irresponsible persons, who were not intimately acquainted with the practical working of the room, and was given by them under an almost complete misapprehension of the facts of the case.

With regard to the alleged pecuniary connection of Messrs. Hopkins and Hill with Messrs. Chappell and Campbell, I find that, after strict inquiries, it totally ceased in 1889, ere the present Registrar-General assumed office.

Deeds Branch, Registrar-General's Department,  
Sydney 21 September, 1893.

J. W. GILLAM,  
Deputy-Registrar of Deeds.

THE foregoing memorandum contains a true statement of the case, and I concur therein.—W. A. ABBOTT,  
Deputy Registrar-General, 21/9/93.  
The Registrar-General.

Deeds Branch, Department of Lands, 21 September, 1893.

I UNDERSTAND it is the intention of the Registrar-General to forward a report to the Colonial Secretary having reference to the utterances of the Chief Justice in the case of *Campbell v. The Anglo-Australian I. F. and L. Coy., Ltd.*, reflecting on the management of the Deeds Registration Office, more especially as regards the supposed loss of a register of grants alleged to be "Cumberland Register No. 28." As clerk in charge of the Deeds Branch of this Department, my duties have given me a very extensive knowledge of the registers of grants, and I feel justified in stating that there never existed a register of grants called or known as "Cumberland Register No. 28," and that Register of Grants No. 28 produced in the said case is the only register of grants bearing that number.

The Registrar-General may be pleased to have the above statement in confirmation of similar reports furnished by certain of his officers submitted.  
Urgent.—The Registrar-General.

F. McKERN.

Report of trial on 19th September, 1893.—*Campbell v. Anglo-Australian I. F. and L. Co., Ltd.*  
THE Chief Secretary having desired to be furnished with a report upon the evidence which led to the strictures of the Chief Justice, the Principal Draftsman is asked to be good enough to state what register—sworn to have been in the custody of this Department in May last—is now missing.—20/9/93.  
Memo. Urgent.—The Principal Draftsman.

21 September, 1893.

THE legal profession constantly complain of how mixed reporters get at times when dealing with Supreme Court evidence. The present is a case in point. When in the witness-box I was subject to the following queries:—

*Sir J. Salomons*—How long have you been in the service? *A.*—Thirty-eight years.

*Sir J. Salomons*—And how long in the Land Titles Office? *A.*—Over thirty years.

*Sir Julian*—What do you say to this document which purports to be the grant of 1833 to Anne Gore? *A.*—It is an absolute forgery. (No word of the remainder of the sentence was used by me. In fact, up to that moment I was unaware that a register book was missing. I was not in court when previously reference had been made to it.)

*Chief Justice*—Who is in charge of that room where these books are kept? *A.*—Hill, the book-porter, who is responsible for them. (The word searcher was not used by me.)

*His Honor*—Surely some higher officer than a book-porter ought to be responsible. These books are of extreme value. *A.*—Beyond question they are invaluable. Thousands of titles may depend upon these books.

No mention is made in the reporter's notes of Register Book No. 28 being handed to me. When it was so, the following took place:—

*Sir J. Salomons*—Is that the book you and Mr. Evans examined together? *A.*—Certainly not. I am under the impression it was written in throughout and not in print as Book 28 is, and which contains only grants made in 1835. I am positive it is not the one we examined together.

The morning following that in which the above evidence was given, the Registrar-General and I, with the help of Hill, found the so-called "missing register," the one examined by Mr. Evans and me. This was Register C of "Purchases and Special Grants" between the years 1831 and 1834, and was the one that should have been produced in court, where it was repeatedly referred to as a "Cumberland Register." This was an error, as the "missing register" contains other grants in various counties besides Cumberland.

Had I received information beforehand that I might be called, with an intimation of what might be required, the "missing register" episode would not have occurred. As it was, I was called from my duties at a moment's notice, and then for the first time informed that the register, the one examined by Mr. Evans and myself, was missing.

ROBERT M. PEARSON,  
Principal Draftsman.

#### EXHIBIT C.

Sir,  
Registrar-General's Department, Sydney, 22 September, 1890.

With reference to my previous report upon the subject of certain "representations made by Mr. J. P. Abbott, M.P." as to the conduct of certain officers in this Department, I have the honor to inform you that, in a case "*Campbell and another v. Broughton and another*," lately heard in the Supreme Court, the following evidence, bearing upon the case under review, was adduced:—

*Mr. Chappell* (of the firm of Chappell and Campbell, land and estate agents)—"Have entered into an agreement with Hopkins as to certain property, to disclose, &c., &c. No agreement with Hopkins as to this property."

*Mr. Campbell*—"I know Mr. Hopkins; I had agreement with him. He told me that there was a certain piece of land without a proper title. I promised Hopkins one-third of the interest. I have given him £500."

Copies of the evidence in question are enclosed.  
The Principal Under Secretary.

I have, &c.,  
CHARLES PINHEY.

Sir,

Sir,

Registrar-General's Department, Sydney, 2 October, 1890.

I have the honor to hereby offer an explanation of my connection with the Messrs. Cowlshaw *in re* the Kennington Park Estate near Newcastle.

In the year 1886 I had an interview with Mr. Spark, of this office, in reference to the publication of a book of table of areas that he desired to bring out. In the conversation that ensued he made mention of trouble he had experienced in the winding-up of an estate of which he was executor, calling it the Peppercorn Estate. The peculiarity of the name "Peppercorn" struck me, as in all my experience in the office, dealing as I do daily with all sorts of names, I had never heard it before.

Some little time afterwards I met Mr. Thomas Cowlshaw going home in the tram, when he spoke to me of a property at Newcastle, belonging to the Messrs. Osborne, that they (the Messrs. Cowlshaw) decided to lease. I said that I would find out from the Osbornes if they would be inclined to do so.

I subsequently saw Mr. M. C. Cowlshaw at their office, in reference to the above conversation, when he called my attention to a map that he had, on which appeared the name of Peppercorn, saying they had leased the land on which the name appeared, but the man in possession had no valid title. The name Peppercorn brought to my mind the name that cropped up in the conversation I had had with Mr. Spark. He (M. C. Cowlshaw) said if I could put them in the way of purchasing the property by finding out the last owners they would be willing to give me a half-share, they finding the necessary cash.

I had an idea that the Peppercorn appearing on the map in Mr. Cowlshaw's office and the Peppercorn spoken of by Mr. Spark might be connected. I then saw Mr. Spark in the matter, who said the property at Newcastle belonged to the late W. H. Peppercorn, but that he believed it had been sold previously. I then learnt that he represented the Peppercorn family, and I made an offer to purchase their right, title, and interest in the Newcastle property. He said he would communicate with his principals, but it appeared afterwards that they declined to entertain the offer, believing the property had been sold many years back.

My brother (R. A. Hopkins) going to England, obtained the address of one Dr. Peppercorn from me, and called on that gentleman in reference to the purchase. Dr. Peppercorn declined to entertain any proposal, as he said one Mr. C. Powell had purchased from his brother, Mr. W. H. Peppercorn, on behalf of a syndicate. My brother then saw his brother-in-law, G. P. Slade, in England, who had been a member of the firm of Messrs. Slade and Westgarth, solicitors, of this city.

Mr. Slade, making inquiries, found that the property was in bankruptcy. He then made all arrangements with the authorities in England for its purchase. All deeds and documents connected with the title were afterwards forwarded to the Commercial Bank of this city, and held by them in escrow until the purchase money was fully paid and satisfied, we (E. C. and R. A. Hopkins) giving Messrs. Cowlshaw a mortgage over our half-share.

The property subsequently passed under Torrens Act. Since the arrangement for the purchase of the Kennington Estate, the next property, North Stockton, having struck coal, increased the value of all property adjoining, and in justice to the revenue, having to pay fees on lodgment of application, the Kennington Estate was valued at £20,000.

I trust the explanation hereby given will be deemed satisfactory as to my connection with the Messrs. Cowlshaw in the negotiation and purchase of this property, confidently leaving the matter in the hands of the Honorable Colonial Secretary, feeling certain that he will deal justly with it.

I have, &amp;c.,

E. C. HOPKINS.

The Registrar-General.

Sir,

Registrar-General's Department, Sydney, 3 October, 1890.

I respectfully beg to be allowed to explain the circumstances attending my connection with Messrs. Campbell and Chappell in the matter of the Battersea property, Parramatta River, the subject of your report to the Honorable Colonial Secretary.

Early in the year 1888, George Lillie, messenger in this office, speaking to me of an application of Messrs. Osbornes, then pending, believing that they were connected with me, remarked, "There is some property on the Parramatta River, part of the old Bank of Australia lottery, which belongs either to the Osbornes or Sir Wm. Manning; they (the Osbornes) should look after it."

Shortly afterwards Mr. Chappell, of Campbell and Chappell, came into the office on other business, and as I knew Campbell and Chappell had instructions from the Osbornes to make inquiries and trace any properties to which they might have any claim, I mentioned to him the conversation with Lillie. Chappell then said, "I will hunt the matter up, and if it is as stated you shall have a third of what we are able to get in either case."

The whole of subsequent proceedings necessary to establish the title to the said property were taken solely by Campbell and Chappell, or others in their employ. Further than acquainting Campbell and Chappell with the foregoing particulars, I had nothing whatever to do either in searching or investigating the title. It will be seen from the enclosed note from Mr. Nightingale that that gentleman made all searches, &c. I did not disclose any secrets of the office, as information imparted to Campbell and Chappell could have been gathered by the veriest outsider on payment of the usual search-fee of 2s. 6d.

In justice to George Lillie, I may be permitted to state that he was never offered, nor did he ever receive, any pecuniary advantage for his information.

I trust this explanation will be considered sufficient to exonerate me from the imputations contained in Mr. Abbott's communication.

I have, &amp;c.,

E. C. HOPKINS.

The Registrar-General.

*Re* Manning—Battersea Estate.

Dear Sir,

91, Elizabeth-street, Sydney, 30 September, 1890.

The whole of the searches in this estate were made by me from instructions given by Messrs. Campbell and Chappell, who paid all my charges. Mr. Hopkins did not give any instructions or information to me in the matter. If you feel inclined to inspect my books and the draft searches you may do so with pleasure.

Yours, &amp;c.,

D. NIGHTINGALE.

The Registrar-General, Sydney.

Charges

## Charges against Officers of the Registrar-General's Department.

Two officers of the Registrar-General's Department—viz., Mr. E. C. Hopkins, clerk, and Mr. J. L. Spark, draftsman—are charged with having improperly made use of information contained in official documents with a view to benefit their private business interests. Mr. Hopkins is charged with having been concerned in two such transactions. The first was having entered into an agreement with Messrs. Chappell and Campbell, land agents, by which he was to receive one-third share of their right in certain property in the Battersea Park Estate, in consideration that he should act in conjunction with them "in disclosing and causing diligent inquiries and searches to be made as to what property passed to Sir W. M. Manning under a deed dated 19th August, 1851." These inquiries were made, and the transaction successfully completed of having this land with a defective title conveyed under the Real Property Act. Subsequently a fresh agreement was drawn up, by which Mr. Hopkins received £550 in lieu of a third share in the property.

The second transaction concerned what is known as the Peppercorne Estate, and Mr. Hopkins is charged with having acted in conjunction with the Messrs. Cowlshaw Brothers to have the land brought under the operation of the Real Property Act, and to obtain the usual certificate of title. The land consisted of 1,920 acres on the Hunter River.

Mr. Peppercorne died intestate in 1879, and Mr. Spark was granted letters of administration. In 1886, Mr. Spark mentioned to Mr. Hopkins the name of Peppercorne. In the following year, in conversation in connection with an estate held by the Osbornes, near Newcastle, Mr. Cowlshaw asked Mr. Hopkins if he knew anything of a certain 1,920 acres marked on the map in the name of W. H. Peppercorne, as it was believed the then holder had no title to grant a lease. Remembering the name of Peppercorne mentioned by Mr. Spark, Mr. Hopkins said he thought he could obtain the information required.

In September, 1887, Mr. Hopkins wrote to Mr. Spark, offering him £600 for the right, title, and interest of Mr. Peppercorne's relations in this land, and, as this offer was not accepted, he made a second proposal to bear all expenses in getting possession of the property, on condition that he should be allowed two-thirds of the value, Mr. Spark as representative of the Peppercorne family to hold the remaining one-third share.

This offer was communicated by Mr. Spark to Dr. Peppercorne in England, who replied that he felt assured his late brother had parted with the property many years before.

Mr. Powell, the nominal buyer of the land, as representative of a Company, was written to for information, and stated in a letter to Miss Peppercorne that he had no documents in his possession, and knew nothing of the matter.

Mr. Hopkins next proposed to pay the costs of bringing the land under the Act, if he received half of the property, Mr. Spark to have the other moiety, and to afford all necessary data.

A brother of Mr. Hopkins on a visit to England made inquiries, and discovered that the conveyance to Mr. Powell lay in the High Court of Chancery, and the approval of the Court was obtained for the sale of the land to Hopkins on payment of £4,500. Messrs. Cowlshaw paid this money, and obtained possession of the deeds.

Mr. Spark then claimed that he was entitled to a moiety, and eventually secured a mortgage of £3,250.

The issue of the certificate now only awaits the production of some proof of the evidence upon which the Court of Chancery ordered the sale of a property for £4,500, which a few months after was valued, even for Stamp Duty purposes, at £20,000.

The Registrar-General concludes his report by stating that "however circumstances may seem to warrant the strong assumption that the knowledge of the existence of this grant was originally obtained from the records of this Department, and that the fact of Mr. Spark's having acted as administrator was discovered in the same way, it is strenuously asserted that the whole matter was initiated by the Messrs. Cowlshaw, and that Mr. Hopkins did not enter into any negotiations with regard to the property until put in motion by that firm. Beyond what I have already stated, there is, so far as I can judge, no actual proof to the contrary."

Copies of the correspondence between the parties concerned in the sale of the Peppercorne Estate are enclosed with the papers. The explanations of these transactions offered by Messrs. Hopkins and Spark also accompany the papers. These, while traversing the facts set forth in the Registrar-General's report, repudiate the main charge—that official information was used in the matter.

The opinion of the Attorney-General on the question is:—

"Mr. Spark does not appear to me to have been guilty of any improper conduct as an officer in the matter with which his name is connected."

"I am of opinion that Mr. Hopkins has not acted in such a way as to become legally implicated. His conduct does not amount to champerty."

Sir,

Wentworth Court, Elizabeth-street, Sydney, 16 April, 1890.

During the last session of Parliament I asked you several questions in the Legislative Assembly in reference to certain officers in the Registrar-General's Department, and their conduct in making use of their position for the purpose of obtaining pecuniary advantages.

I received a reply from you which did not admit the existence of the grievances about which I complained. I am perfectly satisfied, myself, that there are officers of the Registrar-General's Office who make, or have made, money by buying up defective titles, or by putting their friends up to buy these titles, such officers having obtained their information by their very position in the office. I am confirmed in this opinion by more than one solicitor in Sydney. Up to the present I have not been able to get any information of a positive character, or such as would sheet home any charge to an officer of the Department, but recently a copy of an agreement was sent to me, just made between two persons who deal in land and an officer of the Registrar-General's Department, Mr. E. C. Hopkins; this agreement will speak for itself, and shows on the face of it that a large amount of work and searches would have to be done in the Registrar-General's Office for the purpose of benefiting the parties named in the agreement.

I forward to you a copy of the agreement in the hope that you will cause such inquiry to be made as will put a stop to a practice which is injurious to the public.

The Colonial Secretary.

Yours, &c.,  
J. P. ABBOTT.

[Enclosure.]

*An Agreement* made the first day of June, one thousand eight hundred and eighty-eight, between *Herbert Chappell and Charles Jackson Campbell*, both of Sydney, of the one part, and *Edmund Conroy Hopkins*, of the same place, of the other part. In consideration of *Ten Shillings* paid by the said E. C. Hopkins to said H. Chappell and Charles Jackson Campbell on the execution hereof, they the said H. Chappell and C. J. Campbell do hereby assign, transfer, and set over unto the said E. C. Hopkins one-third share of their respective right, title, and interest in all the properties lands and estates mentioned and comprised in certain Articles of Agreement dated the 20th day of March, 1888, and made between Sir William M. Manning of the one part and the said H. Chappell and C. J. Campbell of the other part, subject to the terms and conditions therein mentioned and expressed. The said E. C. Hopkins to act in conjunction with the said H. Chappell and C. J. Campbell in disclosing and causing diligent inquiries and searches to be made as to what property passed to the said Sir William M. Manning under a certain deed dated the 19th day of August, 1851, made between John Sterling of one part and the said Sir Wm. M. Manning of the other part.

Registered 13th June, 1888, by D. NIGHTINGALE.

*Re Hopkins, Application 7,637—Lands Village of Battersea, Parramatta River.* Sir W. M. Manning, Applicant. Lodged, 20/2/89; passed, 29/5/89; certificate issued, 20/8/89. Agreement—Chappell and Campbell with Hopkins, dated 1st June, 1888, Registered No. 571, Book 390. Transfer of Hopkins' interest under same back to C. and C., dated 14th June, 1889, Registered No. 525, Book 416.—A.P.L., 28/4/90. For Registrar-General.

*No. 525, Book 416.—Agreement.*

New South Wales stamp duty, one shilling.

AGREEMENT made this fourteenth day of June, one thousand eight hundred and eighty-nine, between Edmund Conroy Hopkins, of Sydney, in the colony of New South Wales, of the one part, and Charles Jackson Campbell and Herbert Chappell, both of Sydney, in the colony aforesaid, estate agents, of the other part. Whereas by memorandum of agreement bearing date the first day of June, one thousand eight hundred and eight-eight, wherein the said Edmund Conroy Hopkins is the holder of one-third share of the interest of Charles Jackson Campbell and Herbert Chappell who take under agreement with Sir William Montague Manning one-half of the said William Montague Manning's interest in the Battersea Estate, situate at Abbotsford, Parramatta River. Now this agreement witnesseth that in consideration of the sum of five hundred and fifty pounds paid by the said Charles Jackson Campbell and Herbert Chappell to the said Edmund Conroy Hopkins, the receipt whereof the said Edmund Conroy Hopkins duly acknowledges, he, the said Edmund Conroy Hopkins, hereby transfers to the said Charles Jackson Campbell and Herbert Chappell all his right, title, and interest under the first-mentioned agreement as aforesaid; thereby relinquishing all claim, under said agreement, to any portion of the before-mentioned estate.

E. C. HOPKINS.

Witness to the signature of Edmund Conroy Hopkins—FRED. McROBERTS.

RECEIVED by the said Edmund Conroy Hopkins the sum of five hundred and fifty pounds, being the consideration money as above mentioned.

Witness—FRED. McROBERTS.

E. C. HOPKINS.

In the Supreme Court of New South Wales.

On this seventeenth day of June, one thousand eight hundred and eighty-nine, Alexis Greig Mackenzie, of Victoria Arcade, Sydney, in the colony aforesaid, being duly sworn, maketh oath and saith, that the above is a true copy of the original agreement.

ALEXIS G. MACKENZIE.

Sworn by the deponent on the day first before mentioned,

at Sydney, before me—W. A. ABBOTT, Deputy Registrar-General.

RECEIVED into the office for the Registration of Deeds, Sydney, this seventeenth day of June, A.D. 1889, at thirty minutes past eleven o'clock in the forenoon, from Alexis Greig Mackenzie, numbered 525, book 416.

W. A. ABBOTT,

Deputy Registrar-General.

#### EXHIBIT D

Memo.

I HAVE the honor to submit briefly the following list of improvements, &c., in the general work and arrangement of the Deeds Branch since the present Registrar-General, Mr. Charles Pinhey, assumed office.

(1) *Alteration of Deeds Record Room.*—The room before alteration took up a maximum of space with a minimum of facilities for the conduct of business. The room as now arranged is as light to darkness to what formerly existed.

(2) *Certified Copies*—Sec. 30, 7 Vic. No. 16.—The want of system with regard to above led to drastic changes, which have resulted in great public as well as official convenience.

(3) *Checking of Indexing of Deeds.*—The want of a check has been felt for many years, as however correct an officer may be he is yet not infallible. Mr. Codrington now devotes the whole of his time to checking.

(4) *Conditional Purchases, Transfer of.*—Through various causes 6,518 transfers of conditional purchase were unindexed. These have all now been cleared off, and a proper system inaugurated by which arrears cannot accumulate.

(5) *Curtailment of Time of Searchers' Tickets.*—Considerable trading on old tickets used to exist. A definite time has now been fixed, with the result that fees from this source are now wonderfully increased.

(6.)

(6) *Inventory of Grants*.—This needed change has been effected, rendering reference considerably easier than formerly.

(7) *No Liability Companies Act*—44 Vic. No. 23.—The endeavour to bring the administration of this Act into something like a system has, after considerable trouble and frequent reference to the law authorities, been accomplished. A new register for entering these companies has also been successfully brought into use.

(8) *Notifications of Land having been brought under the Real Property Act*.—Through a misconception as to the relative duties of marking off the above in the deeds registers and indexes, some 10,000 notifications had accumulated. These, by the detention of the staff after office-hours, have all been worked off.

(9) *Numbering of Grant Registers*.—This most necessary work has been effected, by which ready reference can at all times be made, and by which it is impossible for any register to be missing without being discovered.

(10) *Old Records in Vault arranged*.—The accumulation of old records, mostly duplicates, in the vault had been so great that they were mixed in one heterogeneous mass. They have now been arranged in presses according to date, making reference to them most easy.

(11) *Payment of Fees*.—The payment of fees was considerably more honored in the breach than the observance. This has been radically altered, with the result that the revenue has most largely profited thereby.

(12) *Public Companies Act*—37 Vic. No. 19.—The administration of the above has been most radically altered, and the changes which have been effected leave but small room for improvement. The following books have been brought into use for the better conduct of business:—A Companies Register, Lexicographical Index, Numerical Index. To describe the improvements under this heading would take up too much space, so I forbear further dilating upon them.

(13) *Rebinding of Registers*.—Numbers of the old registers, through constant usage, had fallen almost to pieces. These have now been rebound, and a system of inspection inaugurated which leads to volumes being repaired or rebound as required.

(14) *Searches by Public Officers of other Departments*.—These searches were formerly conducted without let or hindrance. Orders signed by the heads of the respective Departments have now to be produced to the officer in charge and initialled by him ere search can be effected.

(15) *Supervision of Deeds Record Room*—Practically no supervision worthy of the name formerly existed. By the re-arrangement of the room all this has been altered, and, although mutilation or interference with documents may be possible—as it would under the best system devised—the facilities for so doing are now reduced to a minimum. This room has for the past three and a half years been under the sole control and direction of the Deputy Registrar of Deeds.

(16) *Trade-marks Act*—28 Vic. No. 9.—The whole system of carrying out the provisions of above Act have been almost completely revolutionized. The following improvements, amongst others, have been effected:—Register carefully compiled; Index of Trade-marks registered (prepared); Index of Applicants (prepared); Index of Articles (in preparation); Trade-mark Search Record Book (instituted); Search and Check Search (instituted). Careful administration of the Act founded as far as practicable upon the principles laid down in "Sebastian on Trade-marks."

(17) *Wills lodged under Sec. 31, 7 Vic. No. 16*.—The whole of the wills, numbering some hundreds, have been carefully gone over and checked with a new lexicographical index which has been prepared.

(18) *Cattle Mortgages*.—A lexicographical index to the above has been prepared, by which a vast amount of time has been saved, and greater accuracy of search has been gained by the searchers.

In giving a *resumé* of reforms instituted I have merely touched upon them. The almost universal praise which has been bestowed upon them, however, is an evidence that they are appreciated by the public, and that they were not brought into effect before a crying need for them had arisen.

H. W. GILLAM,

Deputy Registrar of Deeds.

6 October, 1893.

The Registrar-General,—I endorse all the foregoing memos. with respect to alterations and improvements in the Deeds Branch which have been effected within the last three and a half years to the great gain of the Government as to fees and accommodation as to public requirements.—W. A. ABBOTT, Dep. Reg.-Gen., 7/10/93.

Copy of Report furnished to the Registrar-General by the Deputy Registrar of Deeds,  
9th March, 1891.

I HAVE the honor to submit the accompanying statement showing the urgent need of new offices for the better conduct of the Deeds Record Room.

In premising my remarks it is I think unnecessary to advocate the importance of the valuable trust confided to this Department in being made the receptacle for the proper and safe custody of deeds and documents on which the well-being of future ages may depend; that fact will I think be conceded at the outset.

I may state that the wonderful and progressive growth of this Department, as evidenced by the figures on pages attached, speaks for itself as to the urgent need of this increased accommodation; for although certain additions were made to this office about five years ago, the extra accommodation then supplied was only suitable for the wants of the Department at that time, and without any reference to the future—in fact there was no look ahead whatever.

The present Deeds Record Room contains about 2,608 superficial feet, fully half of which is taken up by presses, counters, searching-tables and desks of clerks, &c., thus leaving only about 1,300 superficial feet for passages between the presses and space for the conduct of the various duties of clerks, searchers, and general public. In making this statement I may say that the height of the Record Room is 11 feet, whilst the average height of the presses therein is 8 feet 6 inches; thus very little room is left for ventilation, which during the present weather, notwithstanding the recent transformation of the Record Room, by which the maximum of space and air possible was obtained, is still very imperfect.

Whilst

Whilst writing on this subject I may refer to the large number of serious cases of illness experienced by the clerks both in the past as well as at the present time, which illnesses can no doubt be traced to the imperfect ventilation of this office. I believe that the dust thrown off by the various parchments and registers, and carried about in the air to be breathed by those compelled to work in this room, has somewhat to do with this matter.

The Record Room is daily thronged with people occupied in the pursuit of their various businesses of searching, registering, &c.; the large legal offices and banks having each one or two search clerks whose sole duty is to constantly attend here for the purpose of searching records of title; whilst the number of other searchers and persons intent on business in connection with Companies' matters, &c., and the registration of births, deaths, and marriages, and other business connected with the numerous Acts administered in the Deeds Branch, make up a daily total that would fairly astonish one could a census be taken of those visiting the Record Room; added to which twelve officers of the Department are always occupied here in their various clerical and other duties.

When the Land Titles Act was passed in 1863 it was foretold by the then Examiners of Titles that five years would suffice to close the old system of deeds registration; the result, as evidenced by the figures on pages attached, show the utter fallacy of that statement. The possibilities of this branch in the future are almost unlimited, showing the urgent need of the extension of its capacity for holding records, &c.

The space at command is now well filled, so much so that it will be impossible to find room for the Registers of 1891, the space now at command being already completely exhausted, whilst that for the B.D. and M. is in a similar condition.

In support of this I may mention that the Companies Act of 1874 and the No-Liability Act of 1881 have each caused a very large increase of business, which necessitates more space for the proper conduct of its business and the safe custody of its records, a new case being now required for containing them, but I can see no space in which to place it.

The bills of sale, lodged at present in the Supreme Court, and which the legal profession strongly desire should be transferred here as the general registry of deeds, &c., and which, no doubt, will ere long be given to us, will of themselves require a very large amount of space; a Bill for their transfer, I may mention, passed the Lower House some months since.

Many useful and much-needed reforms, &c., are at the present time in abeyance, pending increased accommodation, amongst which reforms I may mention a purchasers index of deeds, for more easily ascertaining the present owners of property.

Professional searchers, to be paid by the Department, by which much abuse of the documents might be obviated, &c. Gentlemen who are constantly employed searching complain much of the inconvenience to which they are placed by the height at which some of the registers are now placed, and the difficulty of seeing their contents through the blocking up of the light by the various presses, &c. I may state that many records have been for a considerable time past consigned to the vaults below which from their great importance should be within view; also, that through want of space the trade-marks are compelled to be kept in a room totally inadequate for the purpose, and which is not even fireproof. (This has been remedied.)

Whilst referring to this matter, I may mention the great need of increased accommodation for Mr. Deputy Registrar-General Abbott and his clerk, also the wretched little room to which the Cashier Deeds Branch is compelled to perform his duties.

Trusting that the Registrar-General will pardon me if I have been somewhat prolix in my remarks on this subject; but my strong feelings with regard to the necessities of the case will, however, I hope, prove my excuse.

9th March, 1891.

I am, &c.,

H. W. GILLAM,

Deputy Registrar of Deeds.

[For Exhibit E see Plans at end.]

EXHIBIT F.

Mr. Madden,—Call in and see me this afternoon, 4 o'clock sharp. I have got important news for you.  
E. C. HOPKINS,  
Registrar-General's Office, Sydney.

EXHIBIT F2.

Registrar-General's Office, Sydney, 2-12-82.  
Mr. Madden,—Call in and see me on Monday. I have got valuable information *re* Melbourne land.  
Yours truly,  
E. C. HOPKINS.

EXHIBIT F3.

24, Market-street, Melbourne, 15 December, 1882.  
*Madden.*  
(Private.)  
Dear Sir,

In reference to your two letters, one of the 6th instant and one later undated, I have had the requisite searches made, have personally inspected the property, and now have the pleasure to report as follows:—

The Crown grantee of allotment 6, section 23, Melbourne (shown in the sketch herewith), was Alexr. Fullerton Mollison, not Morrison as stated in the column for "names of the parties" in the copy memorial (Bk. W. No. 693) which you sent me, and which I now return.

Mr. Mollison, as is shown by that copy memorial, on 23rd February, 1841, conveyed the three several parts of the allotment delineated and colored red in the said sketch, and marked thereon respectively "1stly," "2ndly," and "3rdly," to Wm. Madden.

It

It then appears by the registry that on 25th February, 1841, by deed registered Bk. W No. 695, W. Madden conveyed the piece marked "2ndly" on the said sketch to one Richard Stevens in consideration of £40. And that on the next day (26th February, 1841) W. Madden, by deed registered Bk. W No. 697, mortgaged the two pieces marked respectively "1stly" and "3rdly" on the said sketch to Thos. Wilsmore in consideration of £150. And that on 26th May, 1845, Thos. Wilsmore, by deed registered Bk. C No. 602, conveyed, by direction of two intermediate purchasers, to John McDonald the piece marked "3rdly" on the said sketch, the consideration being stated to be £16 10s. paid by Lane to Wilsmore, £47 paid by Gale to Lane, and £16 paid by McDonald to Gale. And that on 24th May, 1850, Wilsmore, by deed registered Bk. J No. 880, conveyed the remaining piece, that marked "1stly" on the said sketch, to Robert Walker in consideration of £162 15s.

The said piece marked "3rdly" has been brought under the Transfer of Land Statute, and a certificate of title has been issued to George Reaby, so evidently the Titles Office has been satisfied with the title.

I was personally acquainted with Mr. Wilsmore, who was a shrewd man of business, and he was, when I knew him, a butcher carrying on a large business with the shipping at Williamstown, and was a man of considerable means and extremely cautious. I have heard that in olden times he was a lawyer's clerk and a sort of "bush lawyer," and a man unlikely to have exceeded his powers in selling under his mortgage.

As I before said, I made a personal inspection of the two pieces sold by Wilsmore. I found that on the eastern part of the front of the land marked "1stly" on said sketch, stands a very old brick building, occupied by Pinkerton Bros., bootmakers; whilst on the western part of the frontage, and on the back part along the lane are rickety wooden shanties of the very oldest description, occupied by Chinamen as furniture-makers; and that on the land marked "3rdly" stand two very old brick cottages, apparently unoccupied. On the verandah common to the two cottages is a small board, "For Sale. 8 Catherine street, Richmond Hill. Title, Crown Certificate." The whole property is in the very heart of what has an unenviable notoriety as "the Chinese quarter" of the city.

Seeing that part of the land with a title acquired under Wilsmore, or by adverse possession, has been brought under the Transfer of Land Statute, and that the corner piece marked "1stly" was conveyed by Wilsmore over thirty-two years ago, and that here continued adverse possession for thirty years is sufficient to gain a title even against infants or others under disability, save in the case of cestuique trust against trustees, I think it most unlikely that you have any chance of recovering the property.

Our memorials on the registry furnish no more particulars than I have given. Copies of deeds are not registered here.

The general locality of the property is shown in the sketch herewith.

Be good enough to accept what I have been able to do for you in this matter as an act of courtesy in acknowledgment of like acts done by you for me in Sydney last year.

Yours truly,  
ARTH. SEDDON.

E. C. Hopkins, Esq., Registrar-General's Office, Sydney.

#### EXHIBIT G.

##### Inquiry into Working of Department.

Sir, Registrar-General's Department, Sydney, 23 October, 1893.

In response to your memorandum of the 29th ultimo, I have the honor to submit for the information and consideration of the Royal Commissioner, His Honor Mr. Justice Fitzhardinge, a report of the various reforms, changes, &c., that have been effected in the working and conduct of the Department whilst you have occupied the position of Registrar-General, either in matters directly related to "account," "check of fees," "receipts and disbursements," &c., more generally connected with administration and discipline.

The report is divided into five sections, and the accompanying papers so classified, viz. :—

1. Memorandum to Commissioner, with two lists of the returns, new books, &c., attached.
2. Statement of changes brought about by present Registrar-General, with memoranda relating thereto.
3. Various reports on the Department—business, &c.
4. Returns and other papers showing checks of fees, with large increases resulting—Deeds Branch.
5. Returns and memoranda—general matters.

Each head has been well thought out and carefully compiled from original returns, notes, &c., the whole comprising a complete series of plain facts, briefly stated, and sufficiently illustrated to show the variety, magnitude, and importance, as well as the drastic and searching nature of the investigations and reformations which have been going on throughout the Department ever since your appointment—resulting in the gradual development of the system now in vogue, and furnishing ample and conclusive evidence of the complete reformation of the office.

I have, &c.,  
H. J. NOBLE,  
Accountant.

The Registrar-General.

Sir, The Treasury, New South Wales, Inspecting Branch, Sydney, 4 March, 1891.

Having closed an inspection of the accounts of Mr. Charles Pinhey, Registrar-General, I do myself the honor to submit the following report thereon for the information of the Honorable the Treasurer:—

Mr. E. G. Ward retired from the position of Registrar-General towards the end of March, 1890, when Mr. Pinhey was appointed.

The period under examination extended from the 1st October, 1889 (the date of the latest previous inspection by Mr. Lockyer) to 28th February, 1891.

The various books of account have been carefully and correctly kept, all collections have been banked with regularity and duly accounted for to the Treasury, and the cash and bank balances on the 11th February were in agreement with the liabilities as shown by the books on that date.

Since the previous inspection an accountant, Mr. H. J. Noble, has been appointed. He is entrusted with the supervision of the departmental check upon the right disposal of the collections. He is an efficient and careful officer, and performs his duties in a highly satisfactory manner. Altogether, I have much pleasure in testifying to a great improvement in the system of keeping and checking the accounts, and to the business-like manner in which the various officers concerned now perform their duties.

The collections during the past two years were as follows:—1889, £42,433 8s. 11d.; 1890, £41,463 8s. 2d.

I have, &c.,

JAMES J. HINCHY,

Treasury Inspector.

NOTE.—Expenditure, year 1890, £29,000.

Sir,

Inspecting Branch, Treasury, 27 May, 1893.

I have the honor to furnish the following report on the accounts of the Registrar-General for the information of the Honorable the Treasurer.

The present inspection embraces the period from 5th April, 1892, the date to which the accounts were last audited by Mr. Inspector Reilly, to 15th instant.

It is with much pleasure I am able to report the result of my examination as eminently satisfactory; all collections, as shown by the books and records of the office, have been duly accounted for.

The system of departmental check leaves nothing to be desired, and has been carefully and strictly maintained.

The collections for 1892 show a decrease of £1,790 11s. 7d., as compared with those of 1891.

|                               |     |     |     |     |     |     | 1891.   |    |   |
|-------------------------------|-----|-----|-----|-----|-----|-----|---------|----|---|
| Deeds Branch                  | ... | ... | ... | ... | ... | ... | £11,292 | 16 | 0 |
| Births, deaths, and marriages | ... | ... | ... | ... | ... | ... | 567     | 13 | 0 |

|                               |     |     |     |     |     |     | <hr/>   |    |   |
|                               |     |     |     |     |     |     | £43,015 | 9  | 2 |
|                               |     |     |     |     |     |     | 1892.   |    |   |
| Deeds Branch                  | ... | ... | ... | ... | ... | ... | £11,438 | 2  | 6 |
| Births, deaths, and marriages | ... | ... | ... | ... | ... | ... | 573     | 12 | 0 |
| Land Titles Office            | ... | ... | ... | ... | ... | ... | 29,213  | 3  | 1 |
|                               |     |     |     |     |     |     | <hr/>   |    |   |
|                               |     |     |     |     |     |     | £41,224 | 17 | 7 |

#### TRUST ACCOUNTS.

##### *Assurance Fund.*

The credit balance on the 31st March last amounted to £120,423 19s. 8d. Of this the sum of £80,900 is invested in debentures and Treasury bills.

##### *Advertising Fund.*

The credit balance on the 31st March last amounted to £2,478 18s.

##### *Commissioners' Fund.*

This account on the 31st March last showed a credit balance of £646 14s. Of this amount £618 6s., being the residue on 31st December, 1892, after payment of all fees due to the Commissioners, should be \*transferred to the Assurance Fund, as provided by section 2 of the Lands Titles Commissioners Act of 1887.

The Registrar-General should be asked to have this effected. The last transaction under this section was made 31st January, 1892, when the residue on 31st December, 1890, amounting to £359 3s., was transferred.

In conclusion, I have only to add that the neat and careful manner in which the various books have been kept, and the excellent system of managing the accounts of this large and important Department, reflect great credit upon the Accountant and his staff.

I have, &c.,

PERCY E. WILLIAMS,

Treasury Inspector.

The Chief Inspector, &c.

Copy of note written in General Cash-book by Mr. Treasury-Inspector Williams.

All collections have been duly accounted for. The neat and careful manner in which the books of account have been kept reflects great credit upon the officers concerned.

PERCY E. WILLIAMS,

Treasury Inspector.

Registrar-General's Office, 25th May, 1893.

NOTE.—Mr. Williams said that this office is second to no other department in the service in the systems of check and record of fees and book-keeping.

To the Under Secretary for Finance and Trade,—

Sir,

Having completed an inspection of the accounts of Mr. Charles Pinhey, Registrar-General, I do myself the honor to hand you the following report thereon for the information of the Honorable the Treasurer.

The latest previous examination of these accounts was conducted by yourself during the year 1891. The result on that occasion was highly satisfactory.

The period embraced under the present audit extended from 1st March, 1891, to 5th April last.

I commenced my examination on the 6th ultimo, and found the cash balance on hand £117 3s. 3d., together with the bank balances (as per pass-book), £357 13s. 6d.; liabilities, viz., £474 16s. 9d., as shown by cash-book and supported by data.

During

\* Done 7/6/93.  
See letter to  
U. S. Finance  
and Trade.

During the term now under report the accounts of this officer have been accurately and carefully kept. The collections have been promptly deposited in the bank, and punctually remitted to the Treasury.

The system of departmental check to which the accounts are subjected is complete and effective, and has, without interruption, been consistently adhered to by the various officers responsible for its due observance.

By this action a valuable safeguard against errors, omissions, &c, is supplied.

I have much pleasure in recording the courtesy and assistance extended to me by the gentlemen of the Department, notably, Mr. Noble, Accountant, and Mr. Macdermott, of the Account Branch.

The collections during the past two years were as follow, viz. :—

| <i>Year ended 31 March, 1891.</i> |             |
|-----------------------------------|-------------|
| Consolidated Revenue Fund ... ..  | £33,390 0 7 |
| Trust Fund ... ..                 | 7,422 5 8   |
|                                   | £40,812 6 3 |

| <i>Year ended 31 March, 1892.</i> |               |
|-----------------------------------|---------------|
| Consolidated Revenue Fund ... ..  | £36,699 11 11 |
| Trust Fund ... ..                 | 6,752 15 8    |
|                                   | £43,452 7 7   |

showing an increase of £2,640 ls. 4d.

During the quarter ended 31st of March last, the indebtedness of the Public Departments amounted to—

|                                  |          |
|----------------------------------|----------|
| Consolidated Revenue Fund ... .. | £96 4 6  |
| Trust Fund ... ..                | 386 2 11 |
|                                  | £482 7 5 |

which is still outstanding.

The accounts of the Registrar-General do not call for further comment than that they are in all respects satisfactory.

I have, &c.,  
R. H. REILLY,  
Inspector of Accounts.

4 May, 1892.

#### REGISTRAR-GENERAL'S DEPARTMENT.

##### STATEMENT of Receipts and Expenditure for five years, 1889 to 1893.

| Year.                           | Receipts. | Expenditure (voted). | Difference.  |
|---------------------------------|-----------|----------------------|--------------|
|                                 | £         | £ s. d.              | £ s. d.      |
| 1889 ... ..                     | 45,755    | 26,122 10 0          | 19,632 10 0  |
| 1890 ... ..                     | 46,204    | 27,700 0 0           | 18,504 0 0   |
| 1891 ... ..                     | 46,902    | 27,219 0 0           | 19,683 0 0   |
| 1892 ... ..                     | 45,767    | 28,513 0 0           | 17,254 0 0   |
| 1893 (actual and estimated) ... | *43,787   | 27,622 0 0           | 16,165 0 0   |
| Totals ... ..                   | £228,415  | £137,176 10 0        | £91,238 10 0 |

\* Decrease slight, considering present severe financial depression. The "Fees of Office" especially have kept up very well indeed.

#### Search Fees, Real Property, Deeds Branch.

NOTE.—The three first-named are *constant searchers*. Showing small number of Search Fees paid.

*Re* Campbell Hill Estate, St. Peters Estate, and land at Bathurst, West Maitland, Muscleebrook, and Wollongong.

Dear Sirs,

34, Castlereagh-street, Sydney, 10 February, 1888.

In reply to Mr. C. J. Campbell's letter of the 5th instant, I beg to say you having pointed out these lands they will of course come under the standing agreement with Osborne's trustees in the same manner as if same had been included in the agreement with respect to Bello Retiro Estate.

Yours, &amp;c.,

Messrs. Campbell and Chappell.

W. W. BILLYARD  
(Per W.B.)

## EXHIBIT H.

[Indorsement.]

Dated 11th November, A.D. 1887. H. H. Osborne and others, trustees of the will of Henry Osborne, Esq., and C. J. Campbell and another. Copy Memorandum of Agreement. E. Lucas.

MEMORANDUM OF AGREEMENT made this eleventh day of November, in the year of our Lord one thousand eight hundred and eighty-seven, between Henry Hill Osborne, Patrick Hill Osborne, Ben Marshall Osborne, and Alick Osborne, trustees of the will of the late Henry Osborne, Esquire, hereinafter called the said trustees, of the one part, and Charles Jackson Campbell and Herbert Chappell, of Sydney, importers and warehousemen, of the other part. Whereas it is alleged that certain portions of the Bello Retiro Estate and also the village of Tempe are now vested in the trustees of the will of the said Henry Osborne under a certain conveyance of the remaining assets of the Bank of Australia, and such portions of the said estate have been pointed out to the said trustees by the said Charles Jackson Campbell and Herbert Chappell, and the said trustees have, in consideration of the said Charles Jackson Campbell and Herbert

Herbert Chappell having ascertained and pointed out to the said trustees that the said property belonged to them, have agreed to sell their right, title, and interest to the said Charles Jackson Campbell and Herbert Chappell upon the terms and conditions following :—

1. That the said trustees of the will of the said Henry Osborne hereby agree to sell, and they, the said Charles Jackson Campbell and Herbert Chappell, hereby agree to purchase all the right, title, and interest of the said Henry Osborne or the trustees of the will of the said Henry Osborne of and in the unsold portions of the Bello Retiro Estate, situated at St. Peters, near Sydney, in the Colony of New South Wales, and also of and in the unsold portions of the village of Tempe, situated at Cook's River, near Sydney aforesaid, and which unsold portions are alleged by the said Charles Jackson Campbell and Herbert Chappell to belong to and form part of the estate of the late Henry Osborne.

2. That the said Charles Jackson Campbell and Herbert Chappell shall at their own risk at once enter into possession of the property hereinbefore referred to, and may sell the same, or any part thereof, either together or in parcels, for cash or upon terms, such sales, however, to be subject in all respects to the approval of the said trustees.

3. That the said Charles Jackson Campbell and Herbert Chappell shall pay all expenses in connection with the going into possession and management of the properties.

4. That the said trustees shall convey the land to the person or persons purchasing the same.

5. That the said trustees shall be entitled to two-thirds of the proceeds of the sale of the said lands, deducting only the costs of sale and the legal costs in connection with such sale; and the said Charles Jackson Campbell and Herbert Chappell shall be entitled to the remaining one-third of such proceeds.

6. That the said Charles Jackson Campbell and Herbert Chappell shall repay the said trustees any costs, charges, or expenses which they may incur with respect to any action, suit, or other proceedings which may be undertaken with respect to the said land, and the said Charles Jackson Campbell and Herbert Chappell hereby undertake to repay them on demand any expenses to which they may be put by reason of any such action, suit, or proceedings.

7. That the said trustees shall incur no responsibility in respect to this contract, and shall not be called upon to do anything whatever, either in respect of the said land or in respect to the title thereto, further than sign conveyances of the lot or lots sold to the purchasers thereof.

8. That William Whaley Billyard or his successors shall be attorney for both parties in connection with this agreement and the sales.

In witness whereof, the said parties to these presents have hereunto set their hands and seals the day and year first hereinbefore written.

#### EXHIBIT I.

[Indorsement.]

Dated 20th March, 1888. Sir W. M. Manning and Herbert Chappell and Charles J. Campbell. Agreement. George James Sly, solicitor, 32A York-street, Sydney.

ARTICLES OF AGREEMENT made the twentieth day of March, in the year of Our Lord one thousand eight hundred and eighty-eight, between Sir William Montagu Manning, Knight, of Woollabra, near Sydney, in the Colony of New South Wales, Esquire, of the one part, and Herbert Chappell and Charles Jackson Campbell, of Sydney, in the Colony aforesaid, merchants, of the other part, witnesseth as follows :—

1. In consideration of the covenant hereinafter contained on the part of the said Herbert Chappell and Charles Jackson Campbell, and subject to the terms and conditions herein contained, the said Sir William Montagu Manning hereby agrees that the said Herbert Chappell and Charles Jackson Campbell and their heirs shall have one moiety or half-part of the proceeds on sale as hereinafter mentioned of the land and hereditaments formerly of John Edye Manning, commonly known and described as Edye Manning, conveyed and assured to the said Sir William Montagu Manning by indenture, dated the nineteenth day of August, in the year one thousand eight hundred and fifty-one, made between John Stirling, as chairman of a certain banking establishment carried on under the name, style, or firm of the Bank of Australia, of the one part, and the said Sir William Montagu Manning, of the other part, and not heretofore by him disposed of.

2. The said Herbert Chappell and Charles Jackson Campbell do hereby for themselves, their heirs, executors, and administrators, jointly and separately covenant with the said Sir William Montagu Manning and his heirs, executors, administrators, and assigns, that they, the said Herbert Chappell and Charles Jackson Campbell, will from time to time, and at their own costs and charges, cause diligent inquiries and searches to be made as to what property passed to the said Sir William Montagu Manning under a certain indenture, dated the nineteenth day of August, one thousand eight hundred and fifty-one, and made between the said John Stirling, such chairman as aforesaid, of the one part, and the said Sir William Montagu Manning, of the other part, under which the said lands and premises hereinbefore mentioned or described were granted and assigned to the said Sir William Montagu Manning, and shall communicate

communicate to the said Sir William Montagu Manning the results of such inquiries and searches to the intent that the same may be considered and inquired into by him or his lawful representative, and that if it shall appear that any property, freehold, leasehold, or chattel real property remains vested in him under the said conveyance of nineteenth August, one thousand eight hundred and fifty-one, the same may be sold and disposed of for the joint and equal benefit of the said parties hereto of the first and second parts respectively, that is to say, as to one-half for the benefit of the said Sir William Montagu Manning, his heirs or assigns, and as to the other half for the benefit of the said Herbert Chappell and Charles Jackson Campbell in common, their heirs and assigns.

3. No action of ejectment shall be commenced at the suit of the said parties hereto or any of them against anyone in adverse possession of any land passing to the said Sir William Montagu Manning by the said indenture of the nineteenth of August, one thousand eight hundred and fifty-one, without the express written consent of the said Sir William Montagu Manning, nor shall such action be further proceeded with if at any time he shall disapprove of such further proceeding or be conducted in any manner of which he shall not approve.

4. The said Sir William Montagu Manning will sign applications of which he shall approve to bring under the provisions of the Real Property Act any land that the said Herbert Chappell and Charles Jackson Campbell may discover to have passed to the said Sir William Montagu Manning under the said indenture of the nineteenth day of August, one thousand eight hundred and fifty-one, but the expenses in connection with such applications shall be borne by the said Herbert Chappell and Charles Jackson Campbell, unless the title is passed by the examiners and certificates issued for the same; but in case such certificates of title shall issue the said Sir William Montagu Manning shall pay half the costs in respect of such applications.

5. The said Sir William Montagu Manning shall pay half the costs of survey and sale of any property sold, and the said Herbert Chappell and Charles Jackson Campbell shall pay the other half.

6. No sales shall be made in respect of the property aforesaid, except with the consent of all the parties hereto.

7. The authority reserved to the said Sir William Montagu Manning by virtue of any of the clauses hereof shall pass to the lawful representative of the said Sir William Montagu Manning.

In witness whereof, the said parties to these presents have hereunto set their hands and seals the day and year first before mentioned.

Signed, sealed, and delivered by the said Sir William }  
Montagu Manning in the presence of,— } W. M. MANNING.

Received into the Registrar-General's Office at Sydney, this thirtieth day of May, A.D. 1888, at twenty minutes to three o'clock in the afternoon, from Frank A. Wright, of Sydney, a copy of the within deed, verified by the said Frank A. Wright, and numbered folio 587, book 389.

W. A. ABBOTT,  
Deputy Registrar-General.

#### EXHIBIT J.

Sir,

Registrar-General's Department, Sydney, 21 May, 1891.

I desire to bring under the special consideration of the Government the inadequacy of the present building for the transaction of the business and the custody of the records of this Department.

The space which the rapidly-growing numbers of registers permitted for the accommodation of the officers has been so encroached upon that it is with difficulty and much inconvenience that the present work is carried on.

If business is to proceed at all, it is impossible that the already insufficient room available for the staff can be further lessened.

The bestowal of the registers of the transactions of 1890 will absolutely exhaust all the possibilities which this office affords for the safe custody of, and proper access to, the records of the Department.

In the consideration of this subject it is necessary to be borne in mind that every grant, certificate, transfer, mortgage or other dealing with land, all documents representing transactions in wool, stock, crops, &c., and all registrations affecting births, deaths, and marriages, from the foundation of the colony up to the current date, must be at immediate disposal, and for instant reference, necessitating certain space for ready access, removal, and replacement.

The filled shelves of the registration rooms, from which the heavy registers have constantly to be withdrawn, now reach almost to the ceilings, demanding the use of ladders, and seriously interfering with requisite light and air.

The accommodation which, in the inception of the Real Property Act in 1863, was provided has scarcely since been enlarged.

The natural result has been ever-increasing congestion, and consequent relative difficulty in coping successfully with the demands of the public service.

The same remark applies to every other Branch of the Department.

While what has been here stated has reference mainly to the requirements of departmental administration, and the practical necessity for considerably-enlarged accommodation for the records of the office, there is, at the same time, special provision requisite to be made for the constantly-increasing numbers of the public frequenting the rooms set apart for them.

In

In the same confined boundaries within which more than a quarter of a century since its business was carried on the public is still compelled to crowd.

This state of matters, tending alike to the manifest deterioration of right discipline in the Department, the wretched discomfort of those attending, and to the difficulty in ensuring that careful oversight of every document presented (which is an essential factor in questions of registration), unmistakably deserves immediate redress.

Several needed reforms are rendered impracticable by reason of the restricted accommodation.

I venture to state that the present business of the Department requires at least 50 per cent. additional floor space, and that it is not a speculative calculation to say that during the next ten years large extension of that provision will be necessary to carry on the work under proper conditions.

I would wish to point out that the whole of the premises are in charge of a caretaker only.

I desire, with what weight I may possess, to urge the necessity of provision being made for a departmental residence of a responsible officer.

That the Honorable the Colonial Secretary may be in a position to form an opinion of the operations of this Department, its rapid growth, the large public interests involved in its transactions, and the absolute and pressing need of affording proper building space for dealing with, and the safe custody of, the invaluable national records, I beg to enclose the several reports from those in charge of the respective branches in which are set forth, in more detail, the matters here referred to.

I have, &c.,

CHARLES PINHEY,  
Registrar-General.

The Principal Under Secretary, &c.

NUMBER of documents in Deeds Record Room, Registrar-General's Department, 30th October, 1893:—

|  |         |
|--|---------|
| Deeds ... ..   | 550,000 |
| Grants ... ..  | 76,000  |
| Wool liens ... ..  | 47,090  |
| Cattle mortgages ... ..  | 55,935  |
| Crop liens ... ..  | 44,859  |
| Writs of execution ... ..  | 1,935   |
| Trade-marks ... ..   | 4,231   |
| Public companies ... ..  | 8,450   |
| Public companies (no liability) ... ..   | 473     |
| Other documents in connection with above ... ..                                    | 1,419   |
| Deposit of deeds... ..   | 4,000   |
| Bank returns ... ..  | 550     |
| Public companies (old Act) ... ..  | 350     |
| Wills ... ..   | 630     |

| Conveyance under mortgage ... ..     | 2,148,973    | 10 | 9  |
|                                      | £47,925,717  | 11 | 5  |
| Mortgages ... ..                     | 80,242,999   | 4  | 4  |
| Discharges of mortgages ... ..       | 26,467,253   | 10 | 1  |
| Transfers of mortgages ... ..        | 4,138,035    | 13 | 9  |
|                                      | £110,848,288 | 8  | 2  |
| Mortgages on live stock ... ..       | 24,832,510   | 4  | 8  |
| Liens on wool ... ..                 | 13,602,720   | 9  | 2  |
| Discharges of stock mortgages ... .. | 14,532,234   | 11 | 0  |
| Liens on crops ... ..                | 928,846      | 15 | 4  |
|                                      | £53,896,312  | 0  | 2  |

Grand total:—£212,670,317 19s. 9d.; represented by about 350,000 deeds, documents, &c.

In addition to the above amount, very numerous deeds and documents were registered in which no consideration money is stated, such as settlements, deeds of gift, powers of attorney, &c., &c.

Registrar-General's Department, 30th October, 1893.

STATEMENT

STATEMENT showing number of Registers, &c., in Deeds Record Room, Registrar-General's Department:—

|       |  |
|-------|--|
| 2,750 | Deeds Registers (550 books, 5 Registers to each book). |
| 225   | Cattle Registers.                                      |
| 30    | Old Memorial Registers.                                |
| 388   | Grant Registers.                                       |
| 700   | Indexes to above documents.                            |

4,093 Volumes, 19 in. x 12 in. and about  $3\frac{1}{2}$  in. thick.

In addition to above, there are numerous presses filled with many thousands of public companies' papers, trade-mark applications, and other unbound documents.

There are also about 3,500 books containing original Acts of Parliament before Responsible Government, re-copied indexes, wool and crop liens, and very numerous other old documents, all of which should be in the Record Room, both for more ready reference and, also, for better preservation.  
30 October, 1893.

Sketch  
by the Principal Draftsman  
of a  
**PROPOSED SEARCH ROOM**

100 ft x 60 ft.

Two of the existing Presses are placed end to end each containing 144 Registers, in all 288.

There are 26 double Presses so placed providing for 7488 Registers as against 3004 now provided for.

There should be three Book porters who alone should be allowed to take down and put away the Registers.

The table and forms down the centre of the Room with a 9ft 6in passage round it would give splendid facilities for handling the Registers and permit of adequate supervision over the Room by the Officers in charge.

Two of the existing Presses placed end to end each containing 144 Registers in all 288.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

---

ROYAL COMMISSION APPOINTED TO INQUIRE INTO THE WORKING  
OF THE DEEDS AND SEARCH BRANCH OF THE REGISTRAR-  
GENERAL'S DEPARTMENT.

(REMARKS OF REGISTRAR-GENERAL [CHARLES HART TOWNLEY PINHEY] ON THE REPORT OF  
THE ROYAL COMMISSION.)

*Ordered by the Legislative Assembly to be printed, 17 January, 1894.*

---

The Principal Under Secretary to The Registrar-General.

Sir, Chief Secretary's Office, Sydney, 18 December, 1893.

I am directed by the Chief Secretary to forward herewith, for your information, and for any remarks you may desire to offer thereon, a copy of the Report of the Royal Commission appointed to inquire into the working of the Deeds and Search Branch of your Department.

I have, &c.,

CRITCHETT WALKER,  
Principal Under Secretary.

---

The Registrar-General to The Principal Under Secretary.

Sir Registrar-General's Office, Sydney, 28 December, 1893.

I have the honor to return herewith a copy of the Report of the Royal Commission appointed to inquire into the working of the Deeds and Search Branch of this Department.

I desire to submit such explanation and furnish such information as may prove of assistance in the Chief Secretary's consideration of the several matters referred to by the Commissioner.

That the methods of treating the subject may be as little divergent—and therefore permitting as ready reference to each branch of the case—as possible, I propose to follow the "Findings" and "Suggestions" as laid down in the Commissioner's Report.

It is with that object alone, and not with the view of categorically traversing the conclusions and proposals of the Commissioner, that I adopt this course.

The "Findings" are enumerated under twenty-one heads, viz. :—

**Finding 1—**

"The business in the 'Record and Search Room' of the Registrar-General's Department (generally called the Search Room) had been before March, 1890, conducted in a loose and slovenly manner."

**Remarks—**

That much-needed reforms in this regard were required is proved throughout the "Evidence," and is endorsed by the subsequent action of the Department.

**Finding 2—**

“The indices before that date, and since, have been carelessly compiled, and more carelessly written.”

**Remarks—**

That indices extending over nearly seventy years should be found imperfect and carelessly compiled in places is regrettable. Systematic revision or recompilation would be a heavy task. So far as regards the indices since 1890, I am constrained to state that I fail to find evidence that the sweeping conclusion of the Commissioner is justified. Some few inaccuracies may have crept in; but every precaution is taken to ensure correct compilation and legible writing. Stringent rules are laid down for guidance in this respect, and are, I am advised, strictly enforced. Mr. Hatton, the Principal Searcher, and a conveyancer of some thirty-five years' experience, states:—“Some of the indices compiled and copied prior to 1890 are no doubt very badly done, but those since that date are, in my opinion, very satisfactory, both in compilation and handwriting.”

**Finding 3—**

“Of the grant registers one is partly destroyed.”

**Remarks—**

Several copies of grants in No. 1 Register, dating from 1792, had by long use become defaced or mutilated. The copies of grants thus partially destroyed were recopied some years ago, examined, and placed in their order. The remnants of these copies of old grants are in the custody of the Deputy Registrar.

**Finding 4—**

“The supervision over persons searching was nominal only.”

**Remarks—**

This question of supervision is more fully dealt with in the several memoranda under the heading of Exhibit “B” in the Appendix to the Evidence attached to the Report.

Extract from my memorandum on the subject:—“The other main point in the indictment is, that the present system of searching and of access to the records is ‘loose and dangerous.’”

So comprehensive a charge is somewhat difficult of defined answer. To this matter of “Searching and Access,” it may here be stated, I have long devoted anxious attention. Under the Registration Act, 7 Vic. No. 16—sections 14 and 29—any person has, upon payment of the schedule fee, the right to demand search in any registered documents. I have introduced, for security's sake, such restrictions as were not incompatible with that right. The question here naturally presents itself. If the present system be imperfect, and, to a certain extent, unsafe, for the reliable custody of these valuable records, why is not a perfected system proposed? If the law now in force be continued, the risk of abstraction or tampering with deeds might be, in some degree, minimised by the employment of several additional supervisors of searchers. But this would not afford absolute security against malpractice. The exclusion of the public would necessitate the employment of a body—say approximately—of ten or twelve “Public Searchers,” an increased expenditure of some £3,000 per annum, and a contingent liability of the Government in action for damages for error. Searches for title in this Branch are complex, generally extending back for many years, and complicated by numerous covenants and encumbrances. Conveyancing solicitors would certainly not be satisfied with bald notes of the continuance of title, but would demand full particulars of all covenants, &c., and thus would, necessarily, be recommenced the personal examination of all deeds—by the public or their agents—which has been the basis of the present complaint. While opinions may be divided as to the perfect system of search and supervision under perfect surroundings, I venture to state that, with the means at command, and under the imposed conditions of congested space and ill-adapted building arrangements, the supervision has been, in such degree, satisfactorily carried out during later years. A practical test of the improved supervision may perhaps be found in the fact that, while searching has remained nearly stationary in volume, the number of search fees paid in 1889 was 7,219, and that for this year the number will closely touch 20,000.

**Finding 5—**

“The supervision was so lax that one register was mutilated, and not anything was known of the mutilation until portion of the register was found upon a person under arrest at Newcastle.”

**Remarks—**

So far as can be ascertained, a registered copy of a deed was abstracted some thirteen years since. It is believed to have been returned through the police, and replaced in the register. The matter has become a tradition in the office, but nothing more definite is known. The late Registrar-General would probably have remembered the whole of the circumstances; but he did not give evidence before the Commission. None of the present officers were in charge at the time.

**Finding**

**Finding 6—**

“No register has, at any time, been lost or mislaid.”

**Remarks—**

This misapprehension, to which, as a fact, wide publicity was given, has now been disposed of.

**Finding 7—**

“Many of the clerks in the Registrar-General's Department ‘searched’ for their own purposes.”

**Remarks—**

It is to be admitted that before April, 1890, there was ample opportunity for this searching to have been freely practised. In that month, stringent instructions were issued for stopping it, and the whole staff so advised. In those instructions the Deputy Registrar was allowed to grant special permission to an officer to search in any particular and personal matter, if the circumstances submitted to him warranted that action. This permission has, I understand, been granted, during three and a half years, on *three* or *four* special occasions under the above conditions.

**Finding 8—**

“Of those clerks: One, Edmund Conroy Hopkins, searched very frequently; and yet more frequently employed a professional ‘searcher.’”

**Finding 9—**

“Hopkins, on some occasions, sold, and on many occasions attempted to sell, the information so gained from the registers and official documents.”

**Finding 10—**

“In the result of some of those ‘speculations’ another clerk, William Wentworth Bucknell, was, and is, interested.”

**Finding 11—**

“Bucknell also obtained information from the registers.”

**Finding 12—**

“Hopkins was, and is, interested with a firm of land jobbers, Messrs. Chappel and Campbell, who seem to traffic in titles, and in properties to which the titles are questionable.”

**Finding 13—**

“Bucknell is also, to some extent, interested in the fortunes of Chappel and Campbell.”

**Finding 14—**

“Hill, the book porter, had the interests of his friends more at heart than the safety of the registers.”

**Remarks—Clauses Nos. 8 to 14—**

So far as regards Mr. Hopkins, I have to state that his dealing with land, under circumstances which seemed to warrant the supposition that he was trafficking with information obtained from the records of the office, came to my knowledge in April, 1890. After inquiry, I reported the case to the Colonial Secretary. Copy of Report, dated 28th April, 1890, enclosed (Battersea Estate), Appendix “A.” From this date, strict instructions were given that Hopkins should not, under any circumstances, be permitted to make any search in the Deeds Branch. Again, later in that year, I learned that he was associated with others in obtaining title to land known as the Peppercorn Estate. Upon this followed my report to the Colonial Secretary, dated the 16th September, 1890, (copy enclosed) Appendix “B.” The subsequent action taken and reference to the then Attorney-General are reported in the Appendices to the Evidence; the result being that it was held that there was not sufficient evidence to warrant a charge of champerty against Hopkins. I heard nothing of any other transaction in which Hopkins had interested himself, until, in the course of the late inquiry, the several matters in which the names of Messrs. Makinson, Fisher, Burcher, and Madden, and Mrs. Stedman appear as witnesses. *The whole of these transactions, with the exception of the last, occurred at times antecedent to my holding office.* In the case of Mrs. Stedman, she called on me on the 20th October last, and advised me of certain preliminary arrangements she had entered into with Mr. Hopkins some months before. On the following sitting day I placed the whole matter in the hands of the Commissioner, and it was dealt with by him. Of Bucknell or Hill, I had, directly or indirectly, heard nothing in connection with land speculation or searching until this inquiry; nor do I see in what way the transactions referred to in the evidence could have come under my cognizance.

**Finding**

**Finding 15—**

“The conduct of the business in the ‘Search Room’ has much improved since March, 1890, when the present Registrar-General was appointed.”

**Remarks—**

Unrelaxed endeavour has been exerted for the safe custody of the charge in the hands of the Department, for the correction of abuses, the facilitating of public business, the improvement in office work, and the protection of the revenue. [See Appendix “C.”]

**Finding 16—**

“General searching by clerks in the Department has been almost stopped.”

**Remarks—**

From what I have stated under Finding 7, I would say that the “general searching” by clerks of the Department has been *wholly* stopped.

**Finding 17—**

“The supervision has been slightly improved.”

**Remarks—**

This has been dealt with under Finding 4. Memo. of Mr. Deputy Registrar-General Gillam is as follows, namely:—“Previous to 1890 the state of the Record Room was simply chaos, there being no system whatever in the arrangement of the presses; a large central 7-foot wooden partition shutting the clerks in, and preventing any oversight, except such as would be exercised by the Record attendant; with the presses placed in such a position as to block his view as to what was going on a few feet away. All this was changed in 1890, when the presses were all (necessarily with two exceptions, ‘C.P.’) placed in parallel lines at right angles to the clerks’ desks, which were shifted to the eastern end of the building. The change was marvellous—light, air, and supervision being at once gained.—H. W. GILLAM, Deputy Registrar, 22/12/93.”

**Finding 18—**

“The ‘Search Room’ is so very full of Registers, &c., that it is altogether unsuitable for its original purpose.”

**Remarks—**

This is undoubtedly the case, and, being so, it necessarily accentuates the difficulties in proposing and bringing into operation practicable reforms in methods of check, supervision, and the general business of the Branch. [See my Report of 21st May, 1891; Exhibit “J” in Appendix to evidence.]

**Findings 19–20–21—**

19. “The public are allowed, by the Registration of Deeds Act, to inspect all documents registered.”

20. “That it has always been the custom to allow persons so inspecting (or searching) to take extracts from the documents inspected.”

21. “Such a custom is certain, reasonable, and universal.”

**Remarks—**

These were practices objected to by the Court.

**Suggestion 1—**

“The old grant Registers be copied in typewriting, and that the public be allowed to inspect such copies only.”

**Remarks—**

There are, I find, about 100,000 grants, containing approximately 800,000 folios; the cost of copying which, for typewriting, with dual and independent examination, would be, at 1½d. per folio, say, £5,000. This is irrespective of the cost of preparation of the volumes and binding, say, £800 more.

**Suggestion 2—**

“All documents tendered for registration be typewritten, so as to minimise the risk of alteration.”

**Remarks—**

Typewriting on parchment documents instead of minimising, would, I fear, largely increase the risk of alteration. The great safeguard in handwriting is its individuality. The whole question of typewriting, in connection with registered parchment documents, was fought out some years ago; with the result that it was determined that it was not applicable to a record office, where permanency is an essential feature. It was also proved that typewriting will not in most cases take well on parchment, and that where it has done so, when subjected to pressure, as in binding, the impress of the deed was left on the opposite document. Further experiments might perhaps remove these present objections.

Suggestion

**Suggestion 3—**

“That duplicates be tendered, filed, and bound in duplicate registers of all such documents.”

**Remarks—**

The reception of this duplicate would mean double duties for the Registrars. The space required for their custody would be double that at present demanded. This suggestion, if carried into effect, would necessitate an alteration of the Deeds Registration Act. The additional expense would, of course, fall upon the public in payment to the conveyancer.

**Suggestion 4—**

“That the contents of the registers now in existence be copied in typewriting, and the public be allowed to inspect such copies only.”

**Remarks—**

There are about 553,000 deeds in Record Room, from which deduct 96,000 transfers of conditional purchases, leaving 457,000 deeds of, say, an average of thirty-two folios each, equals 14,624,000, and the 96,000 conditional purchases of, say, four folios each, equals 384,000; making a grand total of 15,008,000 folios. This, at 1½d. per folio, would amount to £93,800 for copying and dual examination alone. Binding would cost about £3,000 more. Total, £96,800. If parchment and engrossing, as in the present deeds, were used, the cost (with £27,650 for parchment) would be approximately doubled. A building set apart for this purpose would be necessary and in close juxtaposition, so that the business of searching in the Registers, thus temporarily withdrawn from their places, would not be inordinately interfered with and public dissatisfaction caused, during the progress of the work. A fire-proof building to contain the Registers—as the new copies took their places—would be required.

**Suggestion 5—**

“A catalogue or inventory of all books, registers, indices, &c., in the Record Room be at once prepared in duplicate, one copy to be lodged with the clerk in charge of the Deeds Branch of the Lands Office.”

**Remarks—**

Such a catalogue or inventory, as suggested, is in possession of the Record Room. A copy will, if desired, be furnished to the Lands Department for lodgment in the Deeds Branch of that Office.

**Suggestion 6—**

“The desks of some of the clerks in the Search Room be removed as close as possible to the entrance door, so that the registers may be better guarded, and supervision over those searching improved.”

**Remarks—**

It would undoubtedly be advantageous to have two or three clerks stationed near the doorway; for issue of search tickets and lodgment of documents; but I doubt if this suggestion be practicable, as the room at disposal would not permit of the required space being allotted. The dual functions of clerk and supervisor would, I am afraid, conflict; both duties could not be effectively performed, although the presence of officers, in view, no doubt, acts as a check to a certain extent.

**Suggestions 7, 8, and 9—**

7. “That Mr. Edmund Conroy Hopkins be removed from the service.”

8. “That Mr. William Wentworth Bucknell be disgraced and be warned to sever his connection with any land jobber or firm of land jobbers.”

9. “That Hill, the book-porter, after being reprimanded and cautioned, be allowed to resume his duties without pay for the time of his suspension.”

**Remarks—**

.. These are matters at present under the consideration of the Executive Council.

**Suggestion 10—**

“More attention be paid to the supervision of persons searching.”

**Remarks—**

I do not think that more attention to the supervision could prevail, under existing circumstances; but possibly the employment of two additional attendants would be considered as giving more assurance of safety against malpractice.

**Suggestion 11—**

“More attention be paid to the compiling and writing of indices.”

**Remarks—**

Every care has for the past three years been taken with these indices, and I do not see what further steps can be taken to improve upon the present mode of indexing and copying, which is detailed in the remarks under Finding 2.

**Suggestion 12—**

“That no clerk, officer, or servant in the Registrar-General's office be allowed to ‘Search’ for any private purpose without having obtained the permission in writing of the Registrar-General.”

**Remarks—**

From April, 1890, to the present time, this permission had to be obtained from the Deputy-Registrar, although it is to be stated that it has not been in writing. The Commissioner's suggestion can be at once made a rule of the Department.

**Suggestion 13—**

“That no clerk or clerks be allowed to work in the ‘Search Room’ after the usual office hours.”

**Remarks—**

This suggestion, if practicable, would not altogether be unacceptable to the Branch. The work of the staff is directly and intimately connected with the Records, and could not be dissociated therefrom. It frequently happens, through pressure of work, that the staff is compelled to remain until 6 p.m., despite every effort to cope with the work during official hours. I cannot see that this suggestion is at all practicable unless the staff were increased. It is possible that what is intended by the Commissioner is that no employee of the Department *other* than the clerks of the Deeds Branch should be allowed to work in the “Search Room” after hours. If this be so, the proposed rule is already in operation.

**Report page 5, first paragraph.—****Remarks—**

To carry out, in the future, the suggestion as to purchasers and mortgagees indexes would prove of advantage to searchers and to the public. The question has frequently been considered by the Department, but had to be abandoned on account of the congested state of the Record Room. If under-counter space were at command, and an increased staff of (say) three clerks appointed, the work could be gone on with from the present date. There can be no question as to the great benefit which would follow the possession of indices of purchasers and mortgagees from the commencement of registration. It would, in a large measure, act as a preventive of speculative trafficking in titles, and be of essential assistance in legitimate search. On the other hand, its compilation would necessarily entail a very considerable dislocation and friction in the transaction of public business, unless it were wholly carried on at other than the usual office hours. It is calculated that the work would, approximately, occupy six efficient clerks for some six years, at a cost of (say) £5,400. The shifting proportion of the deeds which might have to be consulted stands in the way of allowing the formation of a more exact estimate. The proposal to have a separate index for “transfers of conditional purchases” would be acceptable, and a saving of time in searching. It would not entail additional work, and has everything in its favour. Its introduction would have taken place long since, but for the one perpetual stop-block—want of space. The current separate indices would require considerable additional under-counter room, for the constant searches “up to date”; and there is absolutely none unoccupied, even under the present “combined index” arrangement.

A widespread impression may be rectified by stating that attested copies—and not originals—of title deeds are lodged and registered in this office.

In the foregoing remarks I have endeavoured to adhere, as closely as possible, to the respective issues raised in the “Findings” and “Suggestions” of the Commission, and to avoid the intrusion of extraneous matter.

I have, &c.,

CHARLES PINHEY,  
Registrar-General,

## APPENDIX A.

Question as to Officers utilising Official Information to benefit their Private Business Interests.

Sir,

Registrar-General's Department, Sydney, 16 September, 1890.

Some time since, there was brought under my attention a case in which it was alleged that, with a view to their private gain, certain officers of this Department had improperly used official information contained in documents in the custody of the office. It appeared, upon inquiry, that the case referred to was that of an application made in the joint names of Cowlshaw Brothers, Richard Hopkins, and E. C. Hopkins, the last-named a clerk in this office, to have certain land brought under the operation of the Real Property Act, and to have the usual certificate of title issued to them. The land consists of 1,968 acres on the Hunter River, in the parish of Stockton and county of Gloucester. The grant had originally been issued for 1,920 acres to Mr. W. H. Peppercorn, in 1841, and was registered in this office in 1842. From that year forward, no dealing whatever in connection with the property has taken place—so far as the registration of any document in this Department is concerned. By the usual method of search, therefore, the land would be presumed to be still vested in W. H. Peppercorn, or, he being deceased, in his representatives. Mr. Peppercorn died intestate on the 31st December, 1879, and in 1880 Mr. J. L. Spark, a draftsman in this Department, was granted letters of administration in his estate. Such estate, as disclosed by the papers, consisted of considerable personalty; but the realty was represented only by two small houses in Dowling-street. It appears that Mr. Spark felt so convinced that no other property had been held by the intestate at the time of his death, that he did not instruct any search to be made for land in the name of W. H. Peppercorn. At some undefined time in 1886, Mr. Spark, in a conversation (having its rise in his preparation, for publication, of a "Table of Areas and Measurements"), happened to mention to Mr. Hopkins the name of Peppercorn. Mr. Hopkins states that he feels assured that the fact of Mr. Spark having administered the estate of a Peppercorn was spoken of, while Mr. Spark strenuously denies this, and avers that reference was made only to Mr. Surveyor Peppercorn, under whom he had served his articles, and of whom he spoke in connection with the professional matter in hand. During the following year (prior to September, 1887, according to Mr. Hopkins) he had an interview with the Messrs. Cowlshaw Brothers upon the subject of a lease of some coal land near Newcastle held by the Osbornes, with whom Mr. Hopkins is connected. In this conversation it is stated that Mr. Cowlshaw asked if he knew anything of a block of 1,920 acres noted on the map in the name of Mr. Peppercorn, as they had been advised by their solicitor that the person then living on the land had no title to grant a lease, which they had been and were still anxious to obtain. To this question Mr. Hopkins, remembering the name dropped by Mr. Spark, replied that he thought he could find the representative of the grantee. The Messrs. Cowlshaw wrote in their letter of the 14th May last, that this occurred in the early part of 1888; but have since stated that it might have taken place prior to September, 1887. On the 9th of September, 1887, Mr. Hopkins addressed a letter to Mr. Spark, offering him £600 for the right, title, and interest of the relations of the late W. H. Peppercorn in the land in question. To this proposal Mr. Spark appears to have demurred, and, on the 12th December following, Mr. Hopkins offered to bear all expenses in getting possession of the property, on condition that he should be allowed two-thirds of the value; Mr. Spark, as representing the Peppercorn family, to hold the remaining one-third share. Accordingly, Mr. Spark communicated with Dr. Peppercorn (brother of the intestate, and then living in England), advising him of the offer made by Mr. Hopkins, and at the same time informing him of a presumed adverse possession which would probably prejudice the value of the land. Dr. Peppercorn replied in February, 1888, stating that he felt assured that his late brother had parted with the property many years before. A few days later, Miss Peppercorn wrote to Mr. Spark, enclosing a letter from a Mr. C. Powell, of Monmouth, in whose name the conveyance of the land from W. H. Peppercorn had issued. In his letter, Mr. Powell says that he was the nominal buyer of the land referred to; but that he had represented a company which had not been successful, that he had no documents of any kind in his possession and knew nothing further about the matter. Upon receipt of this information by Mr. Spark, a fresh proposal was submitted by Mr. Hopkins, to the effect that upon his paying the costs and expenses of bringing the land under the Act he should receive one half of the property; Mr. Spark to become possessed of the remaining moiety, upon the condition of his affording all requisite data to achieve the object. The Peppercorn family having been further communicated with, declined to have anything more to do with the land, which they said had passed from the original grantee to Mr. Powell, in 1852. In the meanwhile, Mr. Richard Hopkins (brother of Mr. E. C. Hopkins) had gone to London with certain powers to deal with the property, and, acting upon the information already obtained, ultimately discovered that the conveyance of 1852 to Mr. Powell lay in the office the High Court of Chancery. After some negotiations, the Court gave its approval to the sale of the land to Mr. Richard Hopkins, upon the payment of a sum of £4,500,—together with expenses and interest to the actual date of payment—at the same time instructing that the conveyance from Powell and others to Mr. Hopkins should be forwarded to the Commercial Bank at Sydney, to be held by that institution, in escrow, until receipt of the amount agreed upon. The Messrs. Cowlshaw having paid the necessary sum, the deeds were handed to them. Under some pre-arrangement, the requisite documents were then to be prepared, by which Messrs. Cowlshaw would receive one half of the property, together with a mortgage of the amount advanced, and the Hopkins brothers the remaining one half. But Mr. Spark claimed, under the contract with Mr. Hopkins previously referred to, that he was entitled to a moiety of the land. The difficulty between these latter was eventually settled by Mr. Spark obtaining a mortgage of £3,250 upon the property, and the deeds were subsequently prepared upon that basis. The issue of a certificate of title under the Real Property Act now only awaits the production of some proof of the evidence upon which the Court of Chancery ordered the sale of a property for £4,500, which, a few months after, was valued by the purchasers (even for Stamp Duty purposes) at £20,000.

I have here set down the several phases of this transaction, as stated by the persons interested. Accepting the statements as true in substance, it can only be regarded as a marvellous combination of circumstances under which a forgotten, or, indeed, unknown, grant should, by a chance conversation (on a subject which had practically closed years before, and in which the parties had no mutual interest), have been unearthed. It is not less extraordinary that Mr. Hopkins, thus becoming possessed of the information that a link existed between the Peppercorns and Mr. Spark, should happen, directly afterwards,

wards, to be consulted by Messrs. Cowlshaw as to the ownership of land which was represented by the individual grant in that name. Further, as the Messrs. Cowlshaw—either towards the end of 1887, or beginning of 1888—had offered Mr. Hopkins one half of the property, contingent upon his obtaining the information required to gain possession; it is somewhat difficult to see what benefit he anticipated receiving, when he proposed by letter of the 29th of March, 1888, that Mr. Spark should supply the desired data, and thus become possessed of that one half for which he himself had just contracted. As a matter of fact, the information absolutely necessary to gain the object in view was pressed out of Dr. and Miss Louisa Peppercorn. This being accomplished, the offers of £600, and of one third of the property, which had been unconditionally made to them, were ignored and thrown aside; fresh arrangements being immediately entered into between Messrs. Hopkins and Spark, as above mentioned. However, as this was in the nature of a mere commercial transaction, it does not come within the scope of an inquiry limited to Departmental matters; except in so far as it goes to show how the presumed claims of the Peppercorn family were disposed of and extinguished.

For the rest, I can only state that, however circumstances may seem to warrant the strong assumption that the knowledge of the existence of this grant was originally obtained from the records of this Department, and that the fact of Mr. Spark having acted as administrator was discovered in the same way, it is strenuously asserted that the whole matter was initiated by the Messrs. Cowlshaw, and that Mr. Hopkins did not enter into any negotiations with regard to the property, until put in motion by that firm.

Beyond what I have already stated there is, so far as I can judge, no *actual proof* to the contrary.

I have, &c.,

CHARLES PINHEY,

Registrar-General.

NOTE.—It is necessary, in justice to Mr. Spark, that I should advise you that he submitted the copies (herewith enclosed) of letters from the 9th September, 1887, to 17th January, 1889.

#### APPENDIX B.

Representation by Mr. J. P. Abbott, M.P., as to the conduct of Officers in the Registrar-General's Department.

Memorandum.

Registrar-General's Office, Sydney, 28 April, 1890.

I AM given to understand that somewhat similar representations have previously been advanced; but that up to the present time they have not been accompanied by any proof of presumed default of duty on the part of any officer of the Department. Apart from the present instance, Mr. Abbott himself states that, although he is confirmed in his opinion (*i.e.*, that officers in the Registrar-General's Department have made use of information gained by reason of their employment for their individual benefit) by more than one solicitor in Sydney, he still "has not been able to get any information of a positive character such as would sheet home any charge to an officer of the Department." Under these circumstances it is no matter of surprise that, in the absence of specific accusation in an individual case, the then Registrar-General should have advised the text of the answer given by Sir Henry Parkes on the 19th June, 1889, to the question proposed by Mr. J. P. Abbott. But, in the case now under review, there is at least a tangible basis of inquiry. An agreement was entered into on the 1st June, 1888, between Mr. E. C. Hopkins, a clerk employed in this Department, and a firm of land agents and speculators, *viz.*, Messrs. Chappel and Campbell, of King-street, Sydney. This agreement specified that, in consideration of the sum of 10s. to be paid by Hopkins, the other parties would convey to him one third part of all interest, land, properties, &c., which, being mentioned and confirmed in certain articles of agreement with Sir W. M. Manning, dated the 20th March, 1888, might become their property. Further, that the said Hopkins was to act in conjunction with Chappel and Campbell, in disclosing and causing diligent searches and inquiries to be made in the Registrar-General's Department. Mr. Hopkins was enabled to enter into this negotiation by means of a communication he received from George Lillie, a messenger of this Department, who suggested to him that some of the titles in the Battersea Estate (of which Sir W. M. Manning's land formed part) were not complete, and that the defective titles might be taken up. Mr. Hopkins communicated this information to Messrs. Chappel and Campbell, and made with them the agreement stated. The business was successfully managed. The certificate of title under the Real Property Act was passed to Sir W. M. Manning on the 29th May, 1889, and, on the 14th June, 1889, Mr. Hopkins signed a release of his interest in the former covenant, and acknowledged the receipt of £550 from Chappel and Campbell in consideration of his waiver of claim. Mr. Hopkins states that, beyond the information given by him to the above firm, he did absolutely nothing to forward or assist the issue of the title. Of this there is no proof.

In view of all the circumstances, it is difficult to arrive at any other conclusion than that Mr. Abbott's contention, that an officer has made use of his position for the purpose of obtaining pecuniary advantage, has been fully borne out in the present instance.

I may state that Lillie obtained no benefit from this transaction.

CHARLES PINHEY,

Registrar-General.

The Principal Under Secretary.

#### APPENDIX C.

Memorandum.

I HAVE the honor to submit briefly the following list of improvements, &c., in the general work and arrangement of the Deeds Branch since the present Registrar-General, Mr. Charles Pinhey, assumed office.

(1) *Alteration of Deeds Record Room.*—The room before alteration took up a maximum of space with a minimum of facilities for the conduct of business. The room as now arranged is as light to darkness to what formerly existed.

(2) *Certified Copies*—Sec. 30, 7 Vic. No. 16.—The want of system with regard to [above] led to drastic changes, which have resulted in great public as well as official convenience.

(3)

(3) *Checking of Indexing of Deeds.*—The want of a check has been felt for many years, as however correct an officer may be he is yet not infallible. Mr. Codrington now devotes the whole of his time to checking.

(4) *Conditional Purchases, Transfer of.*—Through various causes 6,518 transfers of conditional purchase were unindexed. These have all now been cleared off, and a proper system inaugurated by which arrears cannot accumulate.

(5) *Curtailment of Time of Searchers' Tickets.*—Considerable trading on old tickets used to exist. A definite time has now been fixed, with the result that fees from this source are now wonderfully increased.

(6) *Inventory of Grants.*—This needed change has been effected, rendering reference considerably easier than formerly.

(7) *No Liability Companies Act*—44 Vic. No. 23.—The endeavour to bring the administration of this Act into something like a system has, after considerable trouble and frequent reference to the law authorities, been accomplished. A new register for entering these companies has also been successfully brought into use.

(8) *Notifications of Land having been brought under the Real Property Act.*—Through a misconception as to the relative duties of marking off the above in the deeds registers and indexes, some 10,000 notifications had accumulated. These, by the detention of the staff after office-hours, have all been worked off.

(9) *Numbering of Grant Registers.*—This most necessary work has been effected, by which ready reference can at all times be made, and by which it is impossible for any register to be missing without being discovered.

(10) *Old Records in Vault arranged.*—The accumulation of old records, mostly duplicates, in the vault had been so great that they were mixed in one heterogeneous mass. They have now been arranged in presses according to date, making reference to them most easy.

(11) *Payment of Fees.*—The payment of fees was considerably more honored in the breach than the observance. This has been radically altered, with the result that the revenue has most largely profited thereby.

(12) *Public Companies Act*—37 Vic. No. 19.—The administration of the above has been most radically altered, and the changes which have been effected leave but small room for improvement. The following books have been brought into use for the better conduct of business:—A Companies Register, Lexicographical Index, Numerical Index. To describe the improvements under this heading would take up too much space, so I forbear further dilating upon them.

(13) *Rebinding of Registers.*—Numbers of the old registers, through constant usage, had fallen almost to pieces. These have now been rebound, and a system of inspection inaugurated which leads to volumes being repaired or rebound as required.

(14) *Searches by Public Officers of other Departments.*—These searches were formerly conducted without let or hindrance. Orders signed by the heads of the respective Departments have now to be produced to the officer in charge and initialled by him ere search can be effected.

(15) *Supervision of Deeds Record Room.*—Practically no supervision worthy of the name formerly existed. By the re-arrangement of the room all this has been altered, and, although mutilation or interference with documents may be possible—as it would under the best system devised—the facilities for so doing are now reduced to a minimum. This room has for the past three and a half years been under the sole control and direction of the Deputy Registrar of Deeds.

(16) *Trade-marks Act*—28 Vic. No. 9.—The whole system of carrying out the provisions of above Act have been almost completely revolutionized. The following improvements, amongst others, have been effected:—Register carefully compiled; Index of Trade-marks registered (prepared); Index of Applicants (prepared); Index of Articles (in preparation); Trade-mark Search Record Book (instituted); Search and Check Search (instituted). Careful administration of the Act founded as far as practicable upon the principles laid down in "Sebastian on Trade-marks."

(17) *Wills lodged under Sec. 31, 7 Vic. No. 16.*—The whole of the wills, numbering some hundreds, have been carefully gone over and checked with a new lexicographical index which has been prepared.

(18) *Cattle Mortgages.*—A lexicographical index to the above has been prepared, by which a vast amount of time has been saved, and greater accuracy of search has been gained by the searchers.

In giving a *resumé* of reforms instituted I have merely touched upon them. The almost universal praise which has been bestowed upon them, however, is an evidence that they are appreciated by the public, and that they were not brought into effect before a crying need for them had arisen.

H. W. GILLAM,  
Deputy Registrar of Deeds.

6 October, 1893.

The Registrar-General,—I endorse all the foregoing memos. with respect to alterations and improvements in the Deeds Branch which have been effected within the last three and a half years to the great gain of the Government as to fees, and accommodation as to public requirements.—W. A. ABBOTT, Dep. Reg.-Gen., 7/10/93.

1894.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

BONUSES GRANTED IN RAILWAY AND TRAMWAY  
DEPARTMENTS.

(RETURN RESPECTING.)

*Ordered by the Legislative Assembly to be printed, 15 February, 1894.*

RETURN to an Order made by the Honorable the Legislative Assembly of New South Wales, dated 31st January, 1894, That there be laid upon the Table of this House,—

“ A Return showing the amount of Bonuses granted over and above the amount of salary stated in the Railway Estimates to Officers in the Traffic Department, the Locomotive Department, the Permanent-way Department, the Interlocking Department, and the Tramway Department, showing the name and salary of each officer, with the amount of Bonus granted in each case for the years 1891, 1892, and 1893.”

(Mr. McGowen.)

RETURN showing the Amount of Bonuses granted to Officers of the Railway Department for the years 1891, 1892, and 1893.

| Department.     | Name.              | Position.                              | Salary.           | Amount of Bonus. |         |        | Reasons for allowing Bonus.   |
|-----------------|--------------------|--|-------------------|------------------|---------|--------|---|
|                 |                    |  |                   | 1891.            | 1892.   | 1893.  |   |
| TRAFFIC BRANCH. |                    |  |                   |                  |         |        |   |

1894.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## RETIREMENT OF MR. E. G. WARD, LATE REGISTRAR-GENERAL.

(RETURN RESPECTING.)

*Ordered by the Legislative Assembly to be printed, 14 March, 1894.*

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 24th January, 1894, That there be laid upon the Table of this House,—

“Copies of all papers and correspondence in connection with the retirement of Mr. E. G. Ward, late Registrar-General.”

(*Mr. Hugh McKinnon.*)

The Colonial Secretary to E. G. Ward, Esq., J.P.

Dear Sir,

Colonial Secretary's Office, Sydney, 6 March, 1890.

I do not think you can feel surprised at the purport of the letter I am about writing to you. After the losses to the public revenue and the discredit to the Public Service which have arisen from the cases in your Department recently brought before the Law Courts and the condemnatory report made by the Treasury Inspector, you must be aware that the Government has but one course, which is to make an entire change.

In consideration of your length of service, I desire to give you the option of resigning your office before any extreme step is taken with a view to the reconstruction of the Department.

Yours faithfully,

HENRY PARKES.

E. G. Ward, Esq., J.P., to The Colonial Secretary.

Sir,

Registrar-General's Department, 13 March, 1890.

I have the honor to tender my resignation as Registrar-General, and to request that, as I have now served over twenty seven years, and am over the age of 60 years, I may be permitted to retire from the Public Service under the provisions of the Civil Service Act.

I am, &amp;c.

E. GRANT WARD.

Accepted. Mr. C. H. T. Pinhey to be appointed Registrar-General, and Mr. Ward to hand over charge at noon on Monday, or the following day at such other hour as may be convenient. Mr. Ward may be permitted to retire under the provisions of the Civil Service Act.—H.P., 22/3/90.

The Principal Under Secretary to E. G. Ward, Esq., J.P.

Sir,

Colonial Secretary's Office, Sydney, 22 March, 1890.

With reference to your letter of the 13th instant, I am directed to inform you that the Colonial Secretary has duly accepted the resignation therein tendered of your office as Registrar-General, and that the necessary steps will be taken to assign you a pension in accordance with the provisions of the Civil Service Act.

I am at the same time desired to say that Mr. Charles Hart Townley Pinhey, of the Treasury, has been appointed your successor, and to request that you will hand over the charge of the Department to that gentleman at noon on Monday next, or the following day at such other hour as may be convenient.

I have, &amp;c.,

CRITCHETT WALKER,

Principal Under Secretary.

1894.

## LEGISLATIVE ASSEMBLY.

## NEW SOUTH WALES.

AMALGAMATION OF OFFICES OF CROWN LANDS AGENT AND  
CLERK OF PETTY SESSIONS, COONAMBLE.

(CORRESPONDENCE RESPECTING.)

*Ordered by the Legislative Assembly to be printed, 27 February, 1894.*

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated 8th February, 1894, That there be laid upon the Table of this House,—

“Copies of all Letters and Correspondence in reference to the amalgamation of the offices of Crown Lands Agent and Clerk of Petty Sessions at Coonamble.”

*(Mr. Stevenson, for Mr. Morgan.)*

## No. 1.

The Under Secretary for Lands to The Under Secretary of Justice.

Sir,

Department of Lands, Sydney, 1 February, 1892.

I have the honor to inform you that G. E. Cass, Esq., M.P., represents that it would be expedient to separate the offices of Crown Lands Agent and Clerk of Petty Sessions at Coonamble, and to request you to be so good as to state your views on the subject.

I have, &amp;c.,

WM. HOUSTON,

Under Secretary

*(Per W. WILSON).*

Mr. Cass, M.P., has represented to the Department of Lands that it would be expedient (grounds not stated in letter from Lands) to separate the offices of Crown Land Agent and Clerk of Petty Sessions at Coonamble, and the views of this Department are asked for. It will be seen upon reference to the enclosed Parliamentary return of correspondence that in July, 1889, it was decided by the late Minister of Justice (Mr. Gould) that no separation of the offices was necessary, as no inconvenience had been caused by the amalgamation, and that the business at Coonamble neither called for nor would justify such separation. Since then no representations appear to have been made to this Department on the subject, and it will be seen from returns of business (other than Land Agency) for the years 1890 and 1891 that the work has not been increasing of late, rather the contrary, the moneys received last year

182—

amounting

[770 copies—Approximate Cost of Printing (labour and material), £5 15s. 9d.]

amounting to £1,149 14s. 6d. as against £2,004 10s. 10d. for 1890. Mr. Burke, probationer, who has been assisting Mr. Whitfeld for the last two and a half years, is an efficient officer, and well up in the work, so that no inconvenience to the public can well be occasioned, so far as the transaction of the Petty Sessions business is concerned. The Lands Department might be asked whether the amalgamation, so far as it affects that Department, has caused any public inconvenience. (See Mr. Whitfeld's report of 26th April, 1889, page 5, printed return.)—A.C.F., 4/2/92.

Approved.—R.E.O'C., 12/2/92. May be put by.—R.E.O'C., 15/4/92.

### No. 2.

#### The Under Secretary of Justice to The Under Secretary for Lands.

Sir,

Department of Justice, Sydney, 15 February, 1892.

Referring to your letter of the 1st instant, inquiring the views of this Department on the expediency of separating the offices of Crown Lands Agent and Clerk of Petty Sessions at Coonamble, I am directed by the Minister of Justice to inform you that in July, 1889, it was decided by the late Minister of Justice (Mr. Gould) that no separation of the offices was necessary, as no inconvenience had been caused by the amalgamation, and that the business at Coonamble neither called for nor would justify such separation.

*vide* return of correspondence, &c., laid on Table of Assembly, 19th November, 1889.

I am to add that since then no representations appear to have been made to this Department on the subject, and it is shown by returns of business (other than land agency) for the years 1890 and 1891 that the work of this office has not been increasing of late. Mr. Burke, probationer, who had been assisting Mr. Whitfeld for the last two and a half years, is an efficient officer and well up in the work, so that no inconvenience to the public can be occasioned so far as the transaction of the petty sessions business is concerned.

I am at the same time to inquire whether the amalgamation, so far as it concerns your Department, has caused any public inconvenience.

I have, &c.,

ARCH. C. FRASER,

Under Secretary.

### No. 3.

#### Mr. C. J. Ellis to J. Morgan, Esq., M.P.

Dear Mr. Morgan,

Legislative Assembly, New South Wales, Sydney, 21 June, 1893.

I only received the Petitions *re* appointment of Clerk of Petty Sessions and Lands Agent (separate officials) at Coonamble by this morning's post, and now leave them herewith for you.

I am returning to Coonamble to-morrow to attend the Quarter Sessions, and will remain in Coonamble about two weeks, so I am afraid I will not be able to go with you to the Ministers.

However we are satisfied the matter is in good hands, and would ask you to present them as soon as possible. You might point out that an amalgamated officer and his assistant would cost nearly as much, if not as much, as separate officials without an assistant. Also, that when the Clerk of Petty Sessions is engaged in Court land matters are delayed, and people who come a distance of 20 or 30 miles are compelled to wait until the Court is over. You might point out that the Clerk of Petty Sessions is Registrar of the Small Debts Court, Registrar of District Court, Deputy Clerk of the Peace, Registrar of Births, Marriages, and Deaths, Agent for the Curator of Intestate Estates, and Deputy Commissioner in Bankruptcy. My address after to-morrow and for the next two weeks will be "Coonamble;" meanwhile it is "Pangbourne," Belmore-road, Coogee.

Yours, &c.,

CHAS. JNO. ELLIS.

[Presented by Mr. J. Morgan, M.P.]

[Enclosures.]

Sir,

Coonamble, 17 June, 1893.

Under separate cover I enclose Petitions *re* proposed appointment of Crown Lands Agent and Clerk of Petty Sessions. Mr. C. J. Ellis, solicitor, who has been a resident of this town for many years, will probably attend with you when presenting petition, and would from his knowledge be able to point out the advantage to the town and district of separate appointments. Thanking you for your interest.

I have, &c.,

P. J. HICKEY,

Mayor

(Per A.F.W.)

J. Morgan, Esq., M.P.

Petition for the separation of offices of Clerk of Petty Sessions and Crown Lands Agent at Coonamble, from residents of Coonamble, *per* J. Morgan, M.P.  
To the Honorable the Minister of Justice, Sydney, New South Wales.

The humble petition of the undersigned residents of the town and district of Coonamble, New South Wales,—  
HUMBLY SHOWETH:—

That the office of Crown Lands Agent at Coonamble was, prior to the year one thousand eight hundred and eighty-nine, conducted separately and apart from that of Clerk of Petty Sessions and Registrar of the District Court, &c., &c.

That from the year one thousand eight hundred and eighty-nine until the end of the year one thousand eight hundred and ninety-two the said offices were conducted jointly, one officer holding the amalgamated appointment with an assistant.

That since about the beginning of this year the said offices have temporarily been conducted by separate officers.

That the conducting of the said offices conjointly has led to much inconvenience, and business in both departments has been frequently interfered with, the officer holding both appointments being required in both departments at the one time on urgent and important business necessitating his personal attention.

That, in consequence of the amalgamation of the said offices, country people are very often delayed in town owing to not being able to have their business dealt with at once.

That much satisfaction has been felt during the period when the offices have been conducted separately.

That an officer is seldom found thoroughly conversant with the duties of both departments.

That the expenditure likely to be incurred by the appointments of separate officers would not very materially exceed the amount now being paid to one officer and his assistant.

That the town and district of Coonamble is one of growing importance, and one from which a very large revenue is derived annually.

That settlement in and round Coonamble has been, and still is, greatly increasing, consequently business in the offices referred to is also yearly increasing.

Your Petitioners, therefore, humbly pray that the offices of Clerk of Petty Sessions, &c., &c., and Crown Lands Agent, be conducted separately and apart from one another.

And your Petitioners will ever pray.

PATRICK J. HICKEY,

Mayor, Coonamble.

Dated this day of June, 1893.

[Here follow 151 signatures.]

## No. 4.

The Under Secretary of Justice to J. Morgan, Esq., M.P.

Sir,

Department of Justice, Sydney, 22 June, 1893.

I have the honor to acknowledge receipt of petition forwarded by you to this Department, from residents of Coonamble, asking for the separation of the offices of Clerk of Petty Sessions and Crown Lands Agent at that place, and to inform you that the matter will receive due consideration.

I have, &amp;c.,

ARCH. C. FRASER,  
Under Secretary.

## No. 5.

## Supplementary Petition.

[Presented by Messrs. Morgan, Booth, and a'Beckett, M's.P.]

To the Honorable the Minister of Justice, Sydney, New South Wales.

The humble Petition of the residents of the town and district of Coonamble,—

HUMBLY SHOWETH:—

That the offices of Clerk of Petty Sessions and Registrar of the District Court, &c., &c., at Coonamble, was prior to the year one thousand eight hundred and eighty-nine conducted separately and apart from that of the Crown Lands Agent.

That from the year one thousand eight hundred and eighty-nine until the end of the year one thousand eight hundred and ninety-two the said offices were conducted jointly, one officer holding the amalgamated appointment with an assistant.

That since about the beginning of this year the said offices have respectively been conducted by separate officers.

That the conducting of the said offices conjointly has led to much inconvenience and business in both departments has been frequently interfered with, the officer holding both appointments being required in both departments at the one time, on urgent and important business, necessitating his personal attention.

That, in consequence of the amalgamation of the said offices, country people are very often delayed in town, owing to not being able to have their business dealt with at once.

That much satisfaction has been felt during the period when the offices have been conducted separately.

That an officer is seldom found conversant with the duties of both departments.

That the expenditure likely to be incurred by the appointment of separate officers would not very materially exceed the amount now being paid to one officer and his assistant.

That the town and district of Coonamble is one of growing importance, and one from which a very large revenue is derived annually.

That the settlement in and around Coonamble has been, and still is, greatly increasing, consequently business in the offices referred to is also yearly increasing.

Your Petitioners therefore humbly pray that the offices of Clerk of Petty Sessions, &c., &c., and Crown Lands Agent be conducted separately and apart from one another.

And your Petitioners will ever pray.

SIDNEY R. SKUTHORPE, Coonamble, Solicitor.

[Here follow 26 signatures.]

## No. 6.

The Under Secretary of Justice to J. Morgan, R. Booth, and W. C. a'Beckett, Esq's., M's.P.

Gentlemen,

Department of Justice, Sydney, 28 June, 1893.

I have the honor to acknowledge the receipt of a supplementary petition forwarded by you to this Department from the residents of Coonamble, asking for the separation of the offices of Clerk of Petty Sessions and Crown Lands Agent at that place, and to inform you that the matter will receive due consideration.

I have, &amp;c.,

ARCH. C. FRASER,  
Under Secretary.

## No. 7.

Mr. G. Whitfeld to The Under Secretary of Justice.

Report on Petition of residents of Coonamble and District, for separation of the offices of Clerk of Petty Sessions and Crown Lands Agent.

30 June, 1893.

In connection with the above-mentioned petition of residents of Coonamble and district for the separation of the offices of Clerk of Petty Sessions and Crown Lands Agent at that place, I have the honor to report that from my own observation of the working of the combined offices, the result of the amalgamation has been one of increased convenience to the public, and of greater expedition in the transaction of their business.

The system adopted to carry out the duties of the combined offices was as follows:—Mr. Burke (assistant Clerk of Petty Sessions) acted as deposition clerk, and when not so engaged assisted me in all classes of work, such as drawing informations, making out Land Office receipts, returns, &c., conducting ballots, and in supplying information to the public, under my supervision.

I have myself, except during the sittings of the Courts of Quarter Sessions, been at all times in the office, able to attend to the public, whose requirements, I may say, have invariably received prompt attention.

It can easily be understood that during a rush of work in the Land Office, Mr. Burke's services have been most useful to me, and it has also been a matter of considerable convenience to the public that during the sittings of the Police Court the Clerk of Petty Sessions office has been open for the transaction of ordinary business.

No.

No instances have come under my notice of the work of both Departments being interfered with, as stated in the Petition, owing to my personal attendance being required at the same time in connection with urgent Clerk of Petty Sessions and land business, and I do not think there are any just grounds for complaint in this respect.

Since my appointment to Coonamble in 1886 I have at all times carefully studied the public convenience, and have used every means in my power to facilitate the transaction of business, making it a practice to inform country residents that their cheques would be accepted in payment of any moneys due, with the result that a large proportion of the work has been done by correspondence, rendering personal attendance at the office unnecessary; and having a personal acquaintance with nearly all the country residents in that district, I feel satisfied there is no justification for the statement made in the petition concerning the delay experienced by them in having their business attended to.

The work of the offices is now, as a matter of fact, annually decreasing, and must, I think, continue to do so until more land is thrown open for selection.

Last year the Police Court and Small Debts Court cases together only averaged nine per week, or one and a half per day. The births, deaths, and marriages to be registered averaged five per week, the District Court cases one per fortnight, and the conditional purchase, conditional lease, and annual lease applications together only averaged three per week.

I have no hesitation in stating that the work of the Clerk of Petty Sessions Office alone could easily be done by one officer, working on an average for two and half hours daily, and the Land Office work is well within the capabilities of any fairly efficient land agent.

Mr. Burke (Assistant Clerk of Petty Sessions) proved himself to be an efficient officer in all branches of the work, and the complimentary testimonials given to him by the Magistrates, and which are, I believe, recorded in this Department, will show that the duties of a deposition clerk were satisfactorily performed by him.

The work of the combined offices has been conducted in the only available room at the Court-house, which is, however, sufficiently large for the purpose, and it may be mentioned that the former Clerk of Petty Sessions strongly recommended the amalgamation of the offices in 1887 or 1888 in a report addressed by him to the Public Service Inquiry Commission.

Prior to the amalgamation the annual expenses of the two offices were: Clerk of Petty Sessions' salary, £220; Crown Lands Agent's salary, rent, &c., £320—total, £540. Subsequent thereto the expenses have been, first year £400, second year £425, third year £450, showing a saving effected in three years of £345.

As a further means of judging whether the request contained in the petition is a reasonable one, based upon substantial grounds, I append hereto a carefully prepared return showing population, salaries, and work done during the past year at other towns where the offices are amalgamated, and where the duties to be performed are within reasonable comparison with those attached to the offices at Coonamble.

From an analysis of this return it may be ascertained that, by the appointment of an Assistant Clerk of Petty Sessions, the residents of Coonamble have been placed in a better position than the public at Lithgow, Yass, Narrandera, Bega, Wellington, Tumut, Bombala, and other places; that they have received the same consideration as the residents of Glen Innes, Kempsey, Parkes, and Cowra, and are in a much better position than the public at Molong and Narrabri where the work is very much heavier than it is at Coonamble.

G. WHITFIELD.

APPENDIX TO REPORT.

\* Offices with an assistant. (a) No resident Police Magistrate. (b) No District Court. (c) Clerk of Petty Sessions holds position of Mining Registrar and Warden's Clerk, receiving, in some instances, additional salary therefor.

Submitted. I have read carefully the petition and supplementary petition of the residents of the town and district of Coonamble in favour of the separation of the offices of Clerk of Petty Sessions and Lands Agent at that place. Mr. Whitfield's report deals with the question in an exhaustive manner, and considering his intimate knowledge of the local requirements of the district is a confirmation of the action taken

taken by this Department in amalgamating the offices in 1889. This case is a further illustration of the view previously expressed by me, namely, that it would be possible to amalgamate the offices of Clerk of Petty Sessions and Lands Agent in nearly all parts of the Colony, without materially interfering with the performance of the services.—A.C.F., 3/7/93.

Upon grounds of economy it is expedient to amalgamate these offices whenever possible. Moreover I am fully convinced that amalgamation leads to increased efficiency in administration. After careful inquiries I have determined that the alteration asked for cannot be made.—R.E.O'C., 12/7/93.

---

No. 8.

The Mayor of Coonamble to J. Morgan, Esq., M.P.

Sir,

Coonamble, 6 July, 1893.

In reference to petition recently forwarded to you in relation to appointment of Crown Lands Agent and Clerk of Petty Sessions, I have to point out that under the present system of appointing Crown Lands Agent and Clerk of Petty Sessions with an assistant, it has been the custom to pay the Crown Lands Agent and Clerk of Petty Sessions a salary of £350 per annum, and his assistant, £100. The Department of Justice of this contributed £200, and the Department of Lands, £250. Prior to amalgamation the Crown Lands Agent was paid a salary of £250 only. There are two distinct and separate offices in the Court-house which were built expressly for Lands Office and Clerk of Petty Sessions Office. There is ample furniture for both offices, and the only effect of creating separate offices would be the mere transfer of furniture from one room to another, and no expense additional whatever would be incurred.

I have, &c.,

J. HICKEY,

Mayor (*per* F.W.)

[*Presented by Mr. Jas. Morgan, M.P.*]

Submitted. See Minister's decision of 12th instant on papers 93-10,247, herewith.—A.C.F., 18/7/93.

---

No. 9.

The Under Secretary of Justice to J. Morgan, R. Booth, and W. C. a'Beckett, Esq's., M's.P.

Gentlemen,

Department of Justice, Sydney, 18 July, 1893.

Referring to the petitions presented by you at this Department, from residents of the town and district of Coonamble, asking that the offices of Clerk of Petty Sessions and Crown Lands Agent at that place, may be separated, I am directed to inform you that the Minister of Justice, being of opinion that upon grounds of economy it is expedient to amalgamate such offices whenever possible, and that amalgamation leads also to increased efficiency in administration, has decided, after careful inquiry, that the alteration asked for cannot be made.

I have, &c.,

ARCH. C. FRASER,

Under Secretary.

---

No. 10.

The Council Clerk, Coonamble, to J. Morgan, R. Booth, and W. C. a'Beckett, Esq's., M's.P.

Gentlemen,

Municipal Council Chambers, Coonamble, 27 July, 1893.

I have the honor, by direction of my Council, to reply to a communication forwarded by you from the Department of Justice, in reference to the separation of the local Clerk of Petty Sessions and Crown Lands Offices, and to inform you that the matter was fully discussed at last meeting of the Council, also to say that my Council strongly protests against the amalgamation of the offices on the grounds of economy, as the amount of work will in any case necessitate the appointment of a second officer, and viewing the large amount of work attached to each office, my Council are of opinion that better efficiency in administration would be more likely to result if each office was controlled by its own official.

I am, therefore, instructed by resolution of this Council, to ask that you will kindly move that a copy of the whole correspondence in connection with the amalgamation of the local Clerk of Petty Sessions and Crown Lands Offices be laid upon the Table of the House, and that you will also furnish a copy of same to the Mayor of this Municipality.

I have, &c.,

VICTOR BUCHING,

Council Clerk.

[*Presented by Messrs. Morgan, Booth, and a'Beckett, M's.P.*]

This matter has been decided after full consideration. I see no ground in this letter for reopening its consideration.—R.E.O'C., 3/8/93.

---

No. 11.

The Under Secretary of Justice to J. Morgan, R. Booth, and W. C. a'Beckett, Esq's., M's.P.

Gentlemen,

Department of Justice, Sydney, 9 August, 1893.

Referring to a letter, dated 27th ultimo, forwarded by you to this Department, from the Municipal Council, Coonamble, protesting against the amalgamation of the offices of Clerk of Petty Sessions and Crown Lands Agent at that place, I am directed to inform you that the matter has been decided after full consideration, and that the Minister of Justice sees no grounds in the letter referred to for reconsidering the question.

I have, &c.,

ARCH. C. FRASER,

Under Secretary.

No. 12.

## No. 12.

The Council Clerk, Coonamble, to J. Morgan, W. C. A'Beckett, and R. Booth,  
Esq's., M's.P.

Gentlemen,

Municipal Council Chambers, Coonamble, 18 October, 1893.

As the question with reference to the separation of the offices of Clerk of Petty Sessions and Crown Lands Agent is about to be reopened, my Council have again written each of the Departments on the subject, and having heard that the Chairman of the Land Board at Dubbo has been called upon to report on the work of both offices, we have now asked that the Ministers of Lands and Justice will call for a report on the matter from the local Crown Lands Officer and Police Magistrate respectively, and have pointed out to the Minister of Justice that the Chairman of the Land Board at Dubbo can have no possible knowledge as to the amount of work discharged by the Clerk of Petty Sessions here.

My Council have also again urged as their firm opinion that the offices can be separated without entailing any additional expense upon the Government, and also that the change would ensure the better administration of each; also that the public feeling is strongly in favour of the separation of the offices. My Council therefore request that you will be so good as to use your best influence with the Ministers in support of the matter, and trusting that our efforts will result in the desired change being effected,

I have, &c.,

VICTOR BUCHING,

Council Clerk.

[Presented by Mr. Jas. Morgan, M.P.]

## No. 13.

The Council Clerk, Coonamble, to The Minister for Justice.

Sir,

Municipal Council Chambers, Coonamble, 18 October, 1893.

As the question with reference to the separation of the local Clerk of Petty Sessions and Crown Lands Offices is about to be reopened, as a copy of all the correspondence bearing on the matter is about to be called for, and as my Council are informed that the Chairman of the Land Board at Dubbo has been called upon to report on the work of both of the local offices, they are of opinion that this officer can have no possible knowledge as to the quantity of work discharged by the Clerk of Petty Sessions, and that the local Police Magistrate is the proper person to report on that matter.

My Council therefore request that you will be so good as to call for a report on the matter from the local Police Magistrate. As has been previously urged, my Council are of the firm opinion that these offices could be separated without entailing any additional expense upon the Government, and also that the change would ensure the better administration of the work of each.

I may say that public feeling is strongly in favour of the separation of the offices, and trusting that you will give the matter your earnest consideration.

I have, &c.,

VICTOR BUCHING,

Council Clerk.

Submitted in reference to Minister's minutes of 12th July and 3rd August last. The action referred to herein of calling upon the Chairman of the Local Land Board, Coonamble, to report upon the amalgamated offices of Clerk of Petty Sessions and Crown Lands Agent at that place, has presumably been taken by the Department of Lands, and does not concern this Department. There appear to be no fresh grounds for reopening the consideration of this matter, so far as this Department is concerned.—A.C.F., 24/10/93.

## No. 14.

The Under Secretary of Justice to The Council Clerk, Coonamble.

Sir,

Department of Justice, Sydney, 24 October, 1893.

I have the honor to acknowledge the receipt of your letter of the 18th instant respecting the amalgamated offices of Clerk of Petty Sessions and Lands Agent at Coonamble, and to inform you that the same will receive due consideration.

I have, &c.,

ARCH. C. FRASER,

Under Secretary.

No. 1.

Minute from The Under Secretary for Public Works to The Engineer-in-Chief for Harbours and Rivers.

Dismissal of R. McElhinney.

Sydney, 24 October, 1893.

MR. FEGAN, M.P., called to-day on behalf of a man named Robert McElhinney, recently employed in the Harbours and Rivers Branch, Newcastle.

Mr. Fegan is under the impression that McElhinney's services have been dispensed with while a number of other men, of shorter service, have been retained.

Will Mr. Darley kindly have the matter investigated at his early convenience.

J. B.

Mr. Walsh for report.—C.W.D., 25/10/93. Report herewith.—H.D.W., 2/11/93.

## No. 2.

Telegram from H. D. Walsh, Newcastle, to The Chief Clerk, Harbours and Rivers Branch, Sydney.

Newcastle, 2 November, 1893.

WILL forward report *re* McElhinney to-day.

H. D. WALSH.

Re-submit with report.—Jno. P., 2/11/93.

## No. 3.

Memorandum from Mr. H. D. Walsh to The Engineer-in-Chief, Sydney.

Department of Public Works, Harbours and Rivers Branch, Newcastle, 2 November, 1893.

*Subject* :—Dismissal of R. McElhinney.

MC ELHINNEY was employed as a labourer in the shore gang on the dyke, and being a handy man about pipes, &c., often worked at repairs in the hydraulic engine-house assisting the fitters, but he is by no means a desirable man to have in our employ.

While employed in connection with the erection of the Babcock and Wilcox boilers, I had to suspend and disrate him for being drunk on the work, and shortly before he was discharged (when working at the engine-house) he was most insulting to one of the Railway Department foremen, who was putting in a siding to the new boiler-house. I have heard of his having been frequently under the influence of drink during the work hours.

With regard to his dismissal, being ranked as a labourer, there are no men of less service on at present, and two men (Lowe and Coyle), with considerably longer service, were put off at the same time, owing to slackness of work. Of course there are a number of men employed, such as the divers, and seamen on the rock-excavating plant, firemen in the engine-house, and mechanics, who have shorter service than McElhinney, but I do not consider him eligible for any of these positions, even if he was a desirable man.

H. D. WALSH.

I think McElhinney was justly discharged.—C.W.D., 3/11/93. The Under Secretary, Public Works. Mr. Fegan wishes to see Mr. Walsh about this, at Newcastle, on Saturday. Please advise him accordingly.—J. BARLING, 8/11/93. Mr. Darley. For Mr. Walsh.—Jno. P. (for Eng.-in-Chief), 8/11/93. Mr. Fegan did not call upon me about this matter on Saturday or since.—H.D.W., 4/12/93.

## No. 4.

J. L. Fegan, Esq., M.P., to The Secretary for Public Works.

Dear Sir, Legislative Assembly, New South Wales, Sydney, 14 February, 1894.

I desire to bring under your notice the case of Robert McElhinney.

I mentioned the case to you, and you promised to put the matter right.

Trusting you will consider the matter favourably,

Yours, &c.,

JOHN L. FEGAN.

## No. 5.

Minutes from The Engineer-in-Chief for Harbours and Rivers and The Under Secretary for Public Works.

PLEASE do not forget what you promised in this case.—J.B., 19/2/94. Mr. Darley.

When I saw Mr. Fegan last week I had not the papers before me, so quite forgot the case. Upon looking at previous report, I see that he is by no means a desirable or deserving man. Mr. Fegan was to have called and seen Mr. Walsh on the subject, but does not appear to have done so. I think when there are so many steady and deserving men out of employment it would be wrong to give preference to a man who is addicted to drink, and cannot retain his position.—C.W.D., 20/2/94. B.C., The Under Secretary, Public Works.

Mr. Darley,—Please obtain a further report from Mr. Walsh on this matter, and especially a letter, not amongst these papers, which McElhinney has sent to Mr. Walsh.—J.B., 6/3/94. Mr. Walsh, for early attention.

Urgent.—Jno. P. (for Engineer-in-Chief), 6/3/94.

## No. 6.

Further Report by the Supervising Engineer at Newcastle.

I HAVE but little to add to my former report. I attach the letter which is asked for, and which I did not send down with these papers in the first instance, as it contained a number of scurrilous charges against men still in the service here. On receipt of these papers, asking for further report, I called for reports from the various foremen and others under whom McElhinney worked. I now attach the reports received. I cannot recommend that this man be again employed under me.

The Engineer-in-Chief.

H.D.W., 14/3/94.

Mr. Walsh's further report, and also letter required, now forwarded for information. The man is evidently utterly unfit to be retained in the service.—C.W.D., 15/3/94. B.C., the Under Secretary, Public Works.

Nos.

## Nos. 7 to 11.

## Statements above referred to.

[Urgent.] Newcastle District, 10 March, 1894.  
PLEASE let me have a report as early as possible as to the general conduct of R. McElhinney while working under you. Have you ever known him to be under the influence of drink during working hours?  
Mr. J. Summers, foreman. H.D.W.

McElhinney was employed in my gang from June, 1893, until he was transferred to the hydraulic engine-house. While working under me I had to speak to him twice about being under the influence of drink, besides advising him to guard his unruly tongue.

I once saw him at the hydraulic engine-house in a state of helpless intoxication, during the time preparations were being made for Lord Carrington. And on about the 12th August, 1893, while in a drunken state, he went to Dassell, the foreman fitter in the Railway Department, who was shifting pipes to lay down the coal road to the new boiler-house, and abused him fearfully, using bad language to Dassell. Dassell threatened to report him to you if it should happen again. I requested him to complain to Campbell, under whom McElhinney was working at the time.

J. SOMMERS, 13/3/94.

(No. 8.)

[Urgent.] Newcastle District, 10 March, 1894.  
PLEASE let me have a report as early as possible as to the conduct of R. McElhinney when you found it necessary to suspend him during my absence. Have you ever known of his being under the influence of drink during working hours?  
Mr. Kemp. H.D.W.

On 31st January, 1891, I found McElhinney drunk and unfit for duty while working at the erection of the Babcock and Wilcox boilers. I sent him home, and he was off till 5th February, when he was reinstated with a reduction from 7s. 6d. to 7s. per day.

This is the only occasion on which I have personally known of his being drunk during working hours.

Mr. Walsh.

W.E.K., 13/3/94.

(No. 9.)

[Urgent.] Newcastle District, 10 March, 1894.  
PLEASE let me have a report as to the general conduct of R. McElhinney while working under you on the dyke. Have you ever known him to be under the influence of drink during working hours?  
Mr. Nicoll, Inspector. H.D.W.

Dyke, Newcastle, 12 March, 1894.

With reference to the general conduct of R. McElhinney while working under me at the dyke, on which you desire a report, I have to state that he was frequently more or less under the influence of drink; and on one occasion while putting in a large drain-pipe from the hydraulic engine-house to the harbour, he was so incapable that I had to send him away from the work, and would have reported the matter to you, but had to leave here for Port Macquarie that night, and in the hurry did not think of it.

McElhinney was mostly employed in work in connection with the water supply, and only occasionally with me, so that further information could be obtained from the officer superintending that work if desired; but I think his tipping habits were generally known on the work.

J. NICOLL.

(No. 10.)

[Urgent.] Newcastle District, 13 March, 1894.  
PLEASE let me have by to-morrow a report as to the general conduct of R. McElhinney while working under you in connection with the hydraulic works.

Have you ever known him to be under the influence of drink during working hours?

Mr. W. Campbell, Foreman, Hydraulic Engine-house.

H.D.W.

During the time that R. McElhinney worked with me I always found him to be a good workman. As to the matter of drink, I have noticed signs of liquor on him on more than one occasion, but he has always been able to do his work. I might mention that on one occasion during my absence from the engine-house McElhinney was placed under suspension by Mr. Kemp for being drunk.

Mr. H. D. Walsh, Newcastle.

W. CAMPBELL, 14/3/94.

(No. 11.)

Sir,

In reference to Robert McElhinney. He came interfering with the work that I and the men were doing, stacking pipes at B.I. I ordered him to go away, and told him that I had received all the information that I required. I believe the man was not quite sober at the time.

I remain, &c.,

W. DASSELL.

This is a report which the Divisional Engineer for Railways obtained from his foreman in connection with Robert McElhinney. Dassell was laying in a coal siding to the new boiler-house, when McElhinney, who was drunk, used very insulting language to him. See my former report.

H.D.W., 15/3/94.

No. 12.

No. 12:

Mr. R. McElhinney to Mr. H. D. Walsh.

Sir,

I regret very much my being still out of work. I have done nothing since my suspension from your Department, neither do I see any prospect of anything. I hope, for the sake of my family, you will find me employment as soon as possible. I have only now heard that James Meredith has been off for a fortnight through illness. I do not know if he has yet resumed work; if he has not, I would be glad to accept a few days in order to keep things going. Had I known in time I would have applied to you sooner.

Since my last interview with you I find that a great mistake has been made by the officer appointed by you to compile the list of employees, for your guidance, in matters of seniority; as I feel convinced that you are not aware of this, and are anxious to act right and just to those in employment under you, I therefore take the liberty of informing you of a few of those who had entered the employ long after me; some of them, in fact, have only been taken over from Mr. Russell in February last.

Thomas Cavanagh, single man, had only been working as fireman or trimmer at the engine-house about twelve months, when he was taken over by your Department. Both before and since that time, E. Cavanagh has been repeatedly away from his work, and strangers, or men termed bummers, have been doing it for him. His last period of absence was a fortnight. I have been employed as fireman in the absence of this man.

Isaac Williams, fireman, married, entered Russell's employ about fifteen months ago, and was taken over by your Department in February last. He acquired his right by purchase from a man named Brown, who levanted in order to escape the attentions of the police. The price paid for this job was £2.

James Toomey, married, entered Russell's employ as cleaner at the engine-house two and a half years ago; taken over by your Department in February last. He has been absent on different occasions, and I have done his work. This man is a discharged servant from your Department for insubordination, and is intimately acquainted with members of the police force. While dealing with the engine-house, I might state that I fired the old boilers during the testing of the Dudley, Hetton, and Northumberland coals.

Apart from the engine-house there are—Charles Heard, single man, intended son-in-law to Mr. W. Grahame, M.P., who boasts of the influence of Grahame to keep him at work. I do not know if Heard is still in your employ, but for the last few days he has been engaged painting a cottage for Mr. Reay, of Tighe's Hill. He is my junior. Fred. Norman, employed on rock drill, is my junior. John Silva, *alias* John Cook, foreigner, working on rock drill—unenviable Police Court record. Fred. Bell, of the rock drill, is also my junior. Rush, of the rock drill, foreigner, is also my junior. A. McMillan, of rock drill, is my junior. John M'Carthy, shore gang, about three years my junior. G. Edwards, Dredge Department, is my junior. H. O'Dare is four years my junior. Henry Beale, general servant or messenger, he is my junior. Carmichael, he is my junior by years.

Having enumerated a few of those who are my juniors, I would respectfully state that, with the exception of Bell and Edwards, I am quite capable of doing the work of any of those mentioned. With regard to the engine-house, I have often been called upon to do work which is not within the range of ordinary labour, and have given every satisfaction.

In conclusion, I am not writing this with the intention of injuring any of the men named by me, but in justice to my family and myself.

You told me you were desirous of maintaining the respectability of the Department. I have never placed myself in a position where my honesty or respectability could be questioned while in your employ.

Your attention has never yet been called to any disgraceful act of mine through the public press. I have been, and am still, a member of the Volunteer Force for the past eight years, and have never received a reprimand from my officers. I have always to the best of my ability paid 20s. to the £, and although my wages have not been so large as many others, I have never yet sought the assistance of the Insolvency Court, thus causing you annoyance at seeing my name in print as one who, while in constant work, would not pay for the luxuries he had enjoyed.

In the rock drill there are at least two men employed, apart from those mentioned, who have not done much to maintain the respectability of either themselves or the Department.

Hoping you will give my application and statement your earnest consideration, waiting a reply.

I am, &c.,

ROBERT McELHINNEY,

Late employee, Harbours and Rivers Department.

Kavanagh, fireman, taken over from Railway Department; Williams, with boilers; Toomey, boiler cleaner, taken over from Railway Department; Norman, deck-hand on rock-drill punt "Cliona"; Cook, deck-hand on rock-drill punt "Cliona"; Heard, deck-hand on rock-drill punt "Cliona"; Bell, diver on rock-drill punt "Cliona"; Rush, diver on "Posidon"; M'Millan, deck-hand on "Posidon"; Carmichael, watchman on "Posidon"; M'Carthy, coxswain, goes to sea with grab-dredge punts; Beale, chainman; Edwards, seaman, dredge service; O'Dare, no man of the name employed at Newcastle. McElhinney being ranked as a labourer is not eligible for any of the above positions, and owing to his intemperate habits would be a most unsuitable man to place in any of them.—H.D.W., 14/3/94.

1894.

## NEW SOUTH WALES.

## VACCINATION.

(REPORT FOR 1893.)

Presented to Parliament by Command.

The Medical Adviser to the Government to The Chief Secretary.

Sir,

Sydney, 31st March, 1894.

I have the honor to forward, for the information of the Chief Secretary, the Annual Returns of Vaccinations performed during the year 1893 by the Government Vaccinators of New South Wales.

The returns for 1893 show that 2,214 vaccinations were performed during the year, of which 2,206 were successful. Of the total number, 838 were performed in Sydney and its suburbs, and 1,368 in country districts. It will be seen that vaccination was performed in only 16 country districts; in 89 districts in which there are Government Vaccinators no vaccinations have been reported, and it is presumed that none have been performed.

Of the successful cases the patients in 287 were under 1 year; in 510 between 1 and 5 years; in 790 between 5 and 10 years; and in 619 upwards of 10 years of age. The unsuccessful cases were 8, or 36 per cent. of the total number.

The number of births registered in the Colony during 1893 was 40,212, and the vaccinations give a percentage of 5.48 on this number. In addition to vaccinations performed by Government Vaccinators, a number are performed by private practitioners, but of these no returns are submitted. There is reason, however, to believe that these cases would not add very materially to the percentage above given.

The Department continues to supply pure calf lymph to legally qualified practitioners of medicine on application at the office; and, while this entails a considerable expenditure of public money, yet the money is considered to be well spent, and, after careful consideration, it is not proposed to curtail the supply of lymph, which might be required in considerable quantities at any moment.

The number of vaccinations reported last year was about twice as great as the number reported this year. Last year there was a slight scare arising from the importation of small-pox by the "Oroya" and "Karlsruhe." This year there has been no such scare, and the prediction contained in my report of last year has been fulfilled. I then said: "Doubtless, if no further importation takes place, the apathy of the public on the subject will reappear, so that the small percentage of persons protected by vaccination against small-pox will not have been materially raised by the large number of vaccinations performed during the year under review. That it is a matter largely of apathy is evidenced by the fact that whenever interest in the subject is stimulated then the vaccinations immediately increase." This is just what has happened—the apathy of the public has reappeared, and the number of vaccinations has been halved.

The matter, I may be allowed to repeat, is a very serious one for this Colony, two-thirds of the population of which remain unvaccinated; and, in view of the increasing speed and number of the steamships visiting our ports, the chance of the importation of small-pox becomes greater and greater. If small-pox did obtain a footing here its effects would be more calamitous than would even a disastrous war.

In conclusion, I might again draw attention to the fact that New South Wales is the only province of the Australasian group in which an enactment for compulsory vaccination does not exist, and that the Colony is therefore a danger to the other Colonies, of which they might reasonably complain. At all events, our position, when we wish them to take stringent measures, such as we have done (say) with regard to leprosy, is much weaker when we ourselves have not done our duty in directions in which they have done theirs.

I have, &amp;c.,

T. P. ANDERSON STUART, M.D.,

Medical Adviser to the Government.

RETURN (No. 1) showing the number of Births during the past thirty-three years, and the number of Vaccinations performed by Government Vaccinators during the same period.

| Year.       | Births. | Vaccinations. | Proportion of Vaccinations to every 100 Births registered. |

1894.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## LEPROSY IN NEW SOUTH WALES.

(REPORT FOR 1893 ON ADMINISTRATION OF THE LEPROSY ACT.)

*Ordered by the Legislative Assembly to be printed, 5 April, 1894.*

The Secretary to the Board of Health to The Under Secretary for Finance and Trade.

Sir, Board of Health Office, 127, Macquarie-street, Sydney, 22 March, 1894.

I have the honor, by direction of the Board of Health, to forward you herewith a report on Leprosy in New South Wales, and to suggest that it should be laid before the Houses of Parliament.

I have, &amp;c.,

EDMUND SAGER,

Secretary.

[Enclosure.]

## LEPROSY IN NEW SOUTH WALES.

On the 1st January, 1893, there remained under detention at the leper lazaret thirty persons (*vide* Appendix A); during the year seventeen persons were notified to the Board, in accordance with the provisions of the 3rd section of the Leprosy Act, as suspected to be suffering from this disease. On investigation ten were found to be ill of some other disease, and seven, who proved to have leprosy, were accordingly placed in the lazaret; of these three were natives of New South Wales, of European descent; one a native of New Zealand, of European descent; two Chinese; and one native of India.

The number remaining on the 31st December, 1893, was thirty-six, one Chinese having died during the year.

From the summary table it will be seen that the total number of patients admitted since 1883 is fifty, six of whom were females and natives of New South Wales. Their nationality was as follows:—Natives of New South Wales fourteen, of whom three have died; twenty-nine Chinese, of whom ten have died; one half-caste from the West Indies, who was discharged in 1885; one Javanese; one native of England; one native of Fiji; one of Tanna (Solomon Islands); one of New Zealand; and one native of India.

In Appendix B will be found additional information to that given in previous years; the sex, occupation, and a reference number corresponding to those used in the clinical notes on the various cases are now stated.

In Appendix C the clinical notes of the seven cases admitted during the year 1893 are given. It has not, however, been considered necessary to reprint the clinical notes on the previous cases which are to be found in the Report for 1892.

The number of persons segregated during the year is considerably less than during any year since the reporting of cases of leprosy was made compulsory, thus confirming the opinion of the Board as expressed in a prior report dealing with the comparatively large increase in the admissions during the years 1891 and 1892, viz.:—The Board does not regard this large increase as any indication of the spread of the disease, since many of the cases recently admitted must have been suffering from the disease for some years past; but it was only when the reporting of these cases was made compulsory by law that their friends and medical attendants notified the Board.

No application has been made to the Board for the special segregation of any patient outside the lazaret, the carrying out of which would be extremely inconvenient and very expensive. At the present time all known cases of leprosy are confined in the male and female branches of the lazaret.

During the year considerable improvements have been made at the lazaret, and both branches are now fully equipped for 51 patients, being the full number they are together capable of accommodating. The total cost of the construction and equipment of the lazaret, including the making of roads and laying out grounds, &c., has been £9,154 3s., or at the rate of £180 for every available bed.

Every opportunity is given to members of the medical profession to visit the lazaret for the purpose of seeing such patients as may have been under their treatment or for the study of the disease.

The following tables show the total expenditure for the year 1893 and the sources from which the moneys have been paid :—

STATEMENT of the total Expenditure of the Leper Lazaret (male and female) at Little Bay during the year 1893, showing from what sources the amounts have been paid :—

| EXPENDITURE.  |        |       | HOW PAID.   |        |       |
|---|--------|-------|---|--------|-------|
|   | £      | s. d. |   | £      | s. d. |
| To working expenses as per table.....   | 1,771  | 14 3  | From the vote for the maintenance of Lepers by the Board of Health .....                | 1,241  | 3 0   |
| „ cost of drainage, fencing, and making roads .....   | 393    | 19 0  | From the vote for stores by the Controller-General of Stores .....                      | 383    | 15 3  |
| „ „ additions to buildings.....   | 220    | 15 6  | From the vote for erection and equipment of buildings, 1892, by the Board of Health ... | 149    | 19 11 |
| „ „ completing equipment of buildings, including furniture, bedding, drapery, ironmongery, &c. .... | 431    | 2 9   | From the votes of the Works Department by the Government Architect .....                | 700    | 15 10 |

| Total .....                            | £1,771 | 14 3  |

\* The purchase of these articles for the period under review having been for the completion of the equipment of the male and female lazarets, the cost has been charged against the equipment of the establishment.

† Being equal to an average cost of £53 3s. per inmate per annum.

The wants of the patients have been carefully attended to by an experienced wardsman in charge, two male attendants, and two female nurses, under the direct supervision of the Medical Superintendent and Matron of the Coast Hospital.

By order of the Board of Health,

EDMUND SAGER,

Secretary.

Sydney, 21 March, 1894.

## APPENDIX A.

RETURN showing number of persons found to be suffering from Leprosy and removed to Little Bay, New South Wales; also Deaths and Discharges for each year since 1883.

\* These are all natives of New South Wales of European descent. † Date of report. These patients were afterwards removed to Little Bay. ‡ Of European descent. § This patient was transferred to a Hospital for the Insane on 2nd April, 1885, where also his death occurred. ¶ This patient was discharged on the 29th December, 1885 (see note \* to Appendix A).

NOTES.-(a) The only additional cases of leprosy in New South Wales which have been reported to the Board of Health are P.S., *et.* 38, died in the Richmond River District in March, 1887, and G.R., *et.* 28, whose death, certified by his medical attendants, was reported by the City Coroner on the 18th July, 1889. Both of these persons were of European parentage. (b) On comparison with the reports for previous years differences in ages or dates of admission of some coloured patients will be observed. Those now given are the correct ages and dates.

## APPENDIX C.

CLINICAL Notes of the cases of Patients admitted to the Lazaret during the year 1893.

By J. Ashburton Thompson, M.D., D.P.H., Chief Medical Inspector.

*Case XXXV.—Ah Pung, et. 32; admitted 21 January, 1893.*

*History.*—Arrived at Sydney in 1886, from China, province of Canton. Has spent five years in Sydney, one year travelling in search of work, and one year in Sydney again. Is a wood-cutter and labourer; denies having had syphilis or malarial fever, and has lived temperately.

*History of illness.*—Says he was perfectly well until beginning of November, 1892; a small tuberosity then appeared over left eyebrow, then another about the middle of his forehead, then others over right eyebrow; he was out of health at this time: afterwards he had good health, but it was twice interrupted by attacks of sleepiness, which lasted for many days.

*On admission* the following record was made:—*Face* slightly swollen, especially over superciliary ridges, where there is a good deal of infiltration and some dark red discolouration; a small tubercle over right eyebrow; a pale waxy-brown discolouration on back; an indistinct light brown patch over right shoulder, which fades gradually into surrounding skin. *Muscles* seem fairly nourished, and there is no wasting of those of the hands, or loss of grasping power. Two oval brown patches over each hip, symmetrically placed; they are anæsthetic; a small anæsthetic spot on right instep, and furfuraceous scaling of both feet.

*December, 1893.*—Scalp and hair of scalp and face normal. There are several tuberosities irregularly placed on and over the superciliary ridges and higher on the forehead, and a good deal of general swelling, but no leonine aspect; the right eye is nearly closed by rather diffuse swelling continuous from this side of forehead and extending over right cheek, which is infiltrated and hard; the left cheek is but little swelled; the swollen parts are of a rather dusky red; the right ear is rather swollen in general, and shows some small tuberosities; the left is less altered and has no tuberosities. Orbicular muscles of face perfectly under control. On the trunk are a few discoloured areas which are infiltrated and thick, but which have no abruptly raised margin—on the nape and right side of neck; a large one covering right shoulder-tip; on the upper part of left arm; on both glutei, large, and symmetrically placed; and all are coppery brown in colour, and have the skin over them slightly wrinkled and roughened. Right hand normal. Left hand, close above the wrist joint is a tuberosity; the hand in general is a little swollen, and at present is sore from a burn. Both legs and feet have dry and harsh skin, and the right is worse than the left. There are the usual disturbances of sensation not very well marked. Special senses and voice unaffected. *General Health.*—Good; usually the wardsman has to turn him out of bed in the morning, but it is doubtful whether this is a symptom of his illness; is sturdy and well nourished.

*Case XXXVI.—M.M., et. 24; admitted 27 February, 1893.*

HER descent was as follows:—

*History.*—Was born in the province of Otago, New Zealand (1869), but removed with her parents to Fiji when she was 2 years old (1871). There she lived at many different places, but last and longest on the island of Tavuni. Her family was always in fairly good circumstances; they had plenty of fish and poultry; there was often difficulty in getting fresh meat, but salt meat was not much eaten. She never had any other illness than the present, of which she is able to give only an imperfect account. At 12 years of age (1881) her left forefinger became sore; it got well again in a week, and the occurrence would not have been remembered but that it was immediately followed by severe aching pains in the arm, and by wasting and loss of power in the hand; at the same time there was some disturbance of her general health. In two or three months she recovered, but thenceforward suffered from aching pains in her legs and knees whenever the weather was damp; and after a time her right arm was attacked as the left had been, and her right hand wasted. The trophic changes on this side cannot have been very active, as the extremity seems normally developed and is much bigger than the left. After this (but she cannot say how long) maculae began to make their appearance on several parts of the body. During 1885 her case was discussed by several medical men who had been consulted, and while two inclined to think it one of lepra, others then, and even later, excluded that disease; however, at the end of 1885 the Principal Medical Officer (the Hon. Bolton G. Corney) examined her and diagnosed lepra\*. In 1888 I visited the Fijis, and had several casual opportunities of seeing her. Nothing was then noticeable except the wasting and paresis of the left hand, and enlargement of the knuckles; but I was not formally consulted, and did not examine her. Between 1888 and the present date extensive ulcerations of the skin occurred from time to time. Menstruation began about the usual age, and has always recurred regularly and normally except during two or three recent months, when some large ulcers were discharging freely.

\*In the course of correspondence concerning the case of W. W. (No. XIII) Dr. Corney remarked that M. M.'s was the only case of lepra in a white which had occurred in Fiji.

*State on admission.*—Hair of scalp normal, but not abundant; of eyebrows, wanting; orbicular muscles under control; there is slight general thickening (infiltration) of the features, and on the lower lip is a small group of young tuberosities; lobes of ears enlarged, withered, and enclose a few obscure neoplasms; nose but slightly swollen, stopped only sometimes; at other times smell is normal, as are sight and hearing; voice normal or nearly so. The rest of the body presents in general the following signs: There is emaciation and the skin is withered, wrinkled, and furfuraceous; there are many and diffuse maculæ, or rather patches of discolouration which have none or very ill-defined borders, and which vary in colour from light brown to reddish and orange or yellow, all of faint shades. There are also at many points both on trunks and limbs extensive cicatrices, which in some few cases may have resulted from ulceration of tuberosities, but generally seem to have followed on widespread and comparatively superficial ulcerations of the skin; the skin over the elbows is baggy and slightly ulcerated, that over the knees is thickened, only slightly increased in volume, reddened, and not ulcerated. *Hands.*—Both present atrophy of the muscles, displacement and distortion of phalanges *en griffe*, no absorption of bones, nails present, some deformed. Right hand: Over the second metacarpo-phalangeal joint and on the extensor surface is a tumour as large as a pigeon's egg, free under the skin, attached in front; the thumb is generally enlarged; the first and second joints of all the other fingers are enlarged, and the skin over them is reddened and desquamating; sensation is dulled, but not excessively—she has burned this hand without being aware of it at the time, but she has not much difficulty in buttoning her clothes; cubital nerve not much above a normal size, but excessively tender; sensation on squeezing it is referred downwards only and to the end of the little finger. Left hand: This and the forearm are much smaller than the right, development having been arrested; there is a tumour similar to that mentioned above, but situated over the carpus and smaller; all the metacarpo-phalangeal joints are much enlarged; there is a displacement of the metacarpal bones; the phalanges can be imperfectly extended on the metacarpus, but not at all upon themselves; in this hand there is very little sensation; the cubital nerve seems scarcely enlarged, but it is very tender, though less so than the right nerve; on pressure sensation is referred to parts below and as far as the little finger, but is not very distinct. Feet: Both are moderately swollen, desquamating, and very slightly ulcerated round some of the nails; their general appearance is that usual in old tuberos lepra; both peroneals are enlarged, the right more than the left, are not excessively sensitive, and on pressure sensation is referred to parts below only.

*August 9, 1893.*—On April 8 a fresh eruption of tuberosities occurred, accompanied by great general disturbance; for some weeks her life was in danger. At present she has recovered to a great extent, and is well able to sit up for the greater part of the day. The face is now much more distorted than at first; large neoplasms exist on the chin and nose; there has again been extensive ulceration of various parts of the body, now remaining, however, chiefly at points over the knees and on the legs; there is extreme general emaciation. The tumour at back of right hand has disappeared.

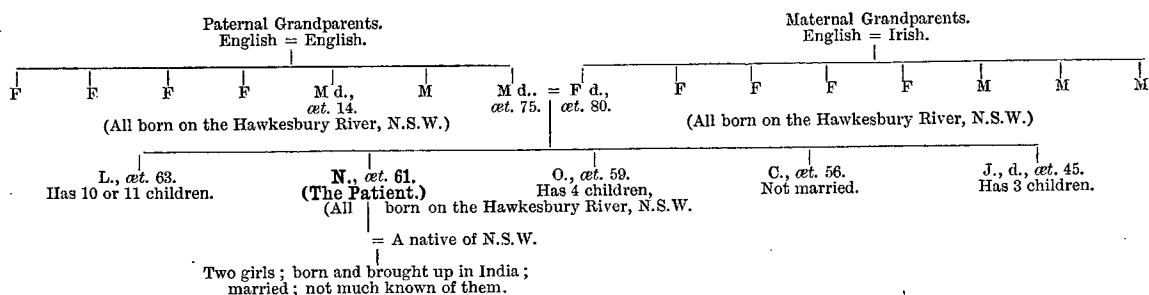

*Case XXXVII.—Ah Toy, æt. 28; admitted 15 April, 1893.*

*History.*—Chinese; was born in a district near Canton; a wood-cutter; arrived at Sydney in 1886; has since lived chiefly on the South Coast (Bodalla, Cooma), but has occasionally revisited Sydney; he dates his illness back to 1891 only, but probably it is of somewhat longer duration; the first sign he noticed was a tuberosity over the left malar bone, which was soon followed by an eruption on other parts of his face, and then of his body.

*State on Admission.*—Face, slightly swollen; expression, dull; nose, thickened and spread; ears, enlarged as to the lobes, which are also wrinkled, and contain numerous small and soft neoplasms. Trunk: There is the general mottling and brownish and reddish-yellow discolouration of old tuberos lepra, and there are many flat neoplasms at several points. Nervous System: Sensation is generally dull; the orbicular muscles of eyes and mouth are under control; both cubital nerves are enlarged, and abnormally tender, the left more than the right; the peroneals seem to be slightly enlarged, but they are not more than normally tender. Special senses: Normal. General health: Apparently good.

*Case XXXVIII.—N.G., æt. 61; admitted 21 April, 1893.*

His descent was as follows:—

NOTE.—Constitutional illnesses denied for the whole family above-mentioned.

*History.*—Was born at Windsor, New South Wales, in 1832; he removed to Sydney. While still quite young he went to gold-fields on the Turon near Carcoar, New South Wales, and lived there until he was 25 or 26 years old (1857-8), having worked as a gold-miner for several years (there were plenty of

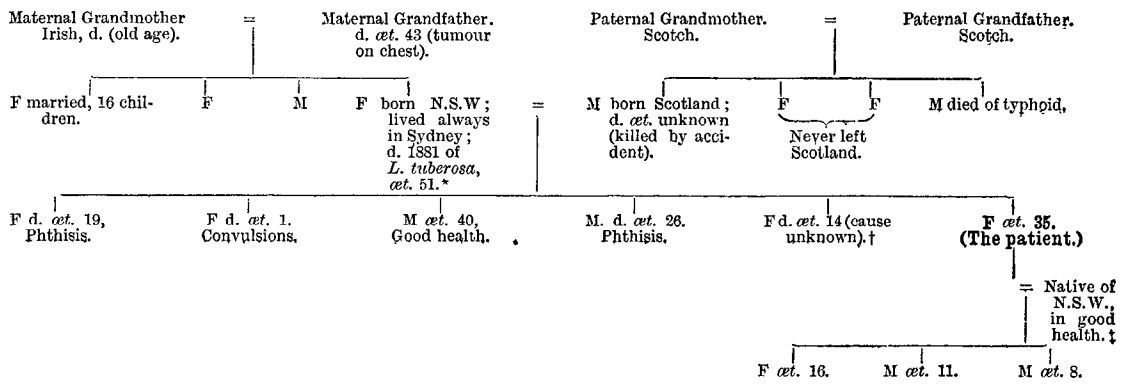

of Chinese on the field at that date). He then married. Soon after he was invited by his brother-in-law to go to Calcutta. He went there at a date he cannot fix, and purchased a saddlery business which he carried on for some years. At the end of this term he returned to Sydney; he went back to Calcutta, and again stayed there a few years, during which he was employed in the railway service; he can give no dates, but returned to Sydney for the last time soon after his wife died in India, which, he thought, happened "about 20 years ago" (1873). She had two daughters by him, who were brought up in the country, were married there, and have children; but he knows nothing about them now. He had jungle fever while in India; saw a few lepers in the streets, not otherwise. When he returned to Sydney he engaged in over-landing (droving over long distances). At this work he travelled widely over Australia. On January 25, 1884, he was admitted to the Macquarie-street Asylum for the Infirm and Destitute (N.S.W.), and he left on March 10, 1884; no medical record concerning him during his stay; no record of readmission. He returned to his occupation of droving, and in 1885 he was in the north-west of Queensland, when a coil of wire fell on his right foot and smashed some toes. He travelled a hundred miles to Charters Towers (Q.), and was admitted to the hospital there January 9, 1886. The Medical Officer on being referred to stated, "He is entered up in the books as having been suffering from gangrene; there is no note as to the cause or nature of it. One of the wardsmen informs me that on his admission he stated he had been travelling in the bush, and became exhausted and lay down for several days, until somebody picked him up and brought him into the town. He said nothing about a coil of wire falling on him." After a year's stay he was discharged on 7th January, 1887, to Dunwich Benevolent Asylum, Brisbane (Q.). He was admitted there on 1st February, 1887 (the interval having probably been occupied in transferring him), and he was discharged on 1st December, 1887. The Medical Officer reported that "while he was here he suffered from sores on the toes which were not suspected of having special origin, but were treated with the usual antiseptic ointments. He made no improvement. I am sorry that I can furnish no other particulars." He then went down to Sydney again, and about a year after arriving slipped downstairs and sprained his ankle; he was taken to a hospital, and was straightway removed thence to the George-street Asylum for the Infirm and Destitute (N.S.W.), where he was admitted 5th December, 1887. After this injury his left foot became inflamed and ulcerated. His medical record shows that during his stay he had illnesses as follows:—On admission, he suffered from eczema, and articular pains in the smaller joints; he was treated for gout. In February, 1889, he was under treatment by the Visiting Ophthalmic Surgeon (who could not recall the case, and is sure his ailment was trivial from no note at all having been made of it). In May, 1890, he had buboes in the groins, which suppurated, and subsequently entirely disappeared under poulticing and application of sulpho-carbolate of zinc. In June, 1890, he had a trifling hæmatemesis. In August, 1890, he was under treatment for a cystitis which disappeared in a month (the patient positively denies being aware that he ever had anything wrong with his water). In August, 1891, he had "ulcers on the foot," thought to be of syphilitic origin; and during the whole of his stay in this institution he was on the sick list, and in hospital quarters. During April, 1893, a West Indian fellow-inmate was told off to help in the sick wards, and refused to dress his feet on the ground that he was a leper, and he was transferred to the lazaret on 21st April.

*History of illness.*—Little can be added to the above. Although his memory seems perfectly good, he does not furnish dates which it might be supposed he would remember, at least approximately; however, he belongs to a respectable and prosperous family resident in the Colony, while his own life has been irregular. He admits having drunk a great deal, and having had gonorrhœa, but he denies syphilis. While travelling cattle his life must have been very hard for terms of from two to four months at a time. All he could say was that he had not sweated as usual for "some years," his forehead alone now sweating a little occasionally; that he first noticed his hands becoming scaly "about three years ago" (1890); and that he lost the sight of his left eye very quickly during an attack which began "about two years ago"; but these are probably guesses, and at all events cannot be relied upon.

*State on admission.*—Scalp, and hair remaining thereon, normal; eyebrows fallen; bones of nose present and normal, but slightly displaced (old fracture); the tip enlarged, bulbous, pale, and soft. Orbicular muscles under control (those of mouth not perfectly so, perhaps). Eyes: Left cornea cloudy and irregularly opaque; lids granular; can distinguish light only; right, shows the same changes less advanced, and is still useful. Ears: Normal. Generally, might be described as having a delicate complexion. Trunk: The skin is roughened, dry, and desquamating minute scales; there are obscure changes of colour—reddish, brownish, yellowish, and muddy; there are no well-defined maculæ. Upper extremities: Arms wasted; skin over elbows baggy, voluminous, and slightly ulcerated; right ulnar nerve enlarged; sensation is referred to the point of pressure, and very slightly to the ulnar side of hand; the left is in the same state, but pressure causes more discomfort; there are no enlargements in the upper course of either nerve. Hands: Both have the interossei wasted, the metacarpus flattened, and the fingers contracted *en griffe*; the terminal phalanges absorbed, the nails broken, desquamating, and deformed; the skin harsh and dry; and they are analgesic and to some extent anæsthetic (as also are the forearms). Legs and feet: Both legs are wasted, and their skin is desquamating and dry, changes which are also shown on dorsum of feet; there is the usual brown, dull, uniform discolouration. Right foot: All the toes are shortened, the second and third entirely gone (see History); the foot as a whole is thickened. Left foot: All toes present, all enlarged, bulbous at the end, and ulcerated. Peroneal nerves: Both are wasted, found with difficulty, and absolutely insensitive. There is analgesia and much anæsthesia of both feet and lower part of both legs. Special senses: Normal, except as mentioned; voice normal; nares occasionally plugged, but generally only slightly obstructed. General health: Was very weak on admission, but soon improved; is in fair general health, but is older than his years; general senile changes; has good motor power over legs, and when sitting moves them promptly and normally to show his feet; but he cannot walk without crutches owing (as he says) entirely to the sprain mentioned above, from which he never recovered.

Case XXXIX.—A.M., *æt.* 35; admitted 7 September, 1893.

HER descent was as follows:—

\* Married a second time, and had two more children. The registered (and medically certified) cause of death was "Exhaustion; two months."  
 † This death could not be found in the Register. ‡ Only this person was seen by me; he was in good health.

**History.**—The following matters and her account of the beginning of her illness are probably correct. Born Sydney, 1859; lived there always, occasionally visiting Melbourne and country places in New South Wales. Married in 1877 (*æt.* 19); went to New Zealand in 1879, and travelled there for two years, visiting various large towns in both north and south islands; stayed a good deal at Auckland; while there had a very irritable eruption on chest and back, for which she took advice; it seems to have been subacute, and her description is of prickly heat; it has never recurred, and has left no trace. While in New Zealand she became interested in the Maories, but only to the extent of conversing with them occasionally in the streets, and of occasionally buying small articles from them, but not fruit or food; has never had any coloured servants, but has twice lodged at boarding-houses where the cook was a coloured man—once a Chinese, once a Cingalèse, Malabar, or West Indian in all probability. Since 1881 has resided in New South Wales (travelling) and for several years continuously in Sydney. Has had no serious illness; has been confined at term three times—1877, 1882, 1885; has also miscarried nine times at from two to four months on dates interspersed among her confinements. This patient's mother, born Sydney 1830, never left New South Wales, lived at Sydney, and seldom went to the country, died of *lepra tuberosa* during 1881. She was admitted to St. Vincent's Hospital in December, 1878, and was discharged during the ensuing January. Her case was recognised at that time by the medical staff, but no account of it has come to light; however, a photograph then taken of her lies before me. It shows *lepra tuberosa* very well, and, from the general appearance represented the illness had probably then lasted several years already. This person's first husband and father of the present patient died by accident (see pedigree) while the latter was quite young. She married a second time, and this second husband had travelled much about the world; he also died after a few years from an unknown cause, but one said to have been quite free from suspicion of leprosy or of disease of the nervous system. The present patient said that being about to enter a fruit-shop with her mother at the age of 11 or 12 (1870) they encountered a man coming out, whose peculiar physiognomy impressed itself on her so that she now recognises his aspect in that of her own face and of one or two others in the lazaret with her.\* After the age of 13 or 14 she was only occasionally at home, her time between then and her marriage having been spent in visiting; but she returned home between the visits until her marriage in 1877, and during those short intervals was in communication with her mother.

**History of illness.**—Some time before birth of her youngest child a brown spot appeared on the left side of her neck, and another over her right eyebrow; they disappeared after remaining a longish but not remembered time, and there were no others. Probably about a year afterwards (1886) she first noticed that her face was slightly swelled, and she thinks rather more about the right orbit than elsewhere; there was no marked alteration of her features until a later and unremembered date. Prodromes: These denied; especially there were no attacks of drowsiness or unusual lassitude; nor of nose-bleed until comparatively recently, when the right nostril began to be habitually occluded. Menstruation has been uninterfered with, except for some months during 1892 when several ulcers on the legs were discharging freely; her habit is, and always has been, to menstruate during eight days at intervals of fourteen days.

**State on Admission.**—Is very thin, but scarcely emaciated; has good strength; voice natural, strong, and speech lively; complains of loss of memory, but offers no unmistakable evidence of this; recognises also a certain mental dulness or indifference. Scalp normal; hair normal, dark brown, beginning to turn grey; eyebrows and eyelashes wanting; general tuberosous enlargement of features, and complete loss of natural aspect; nose thickened and enlarged, very slight or commencing ulceration at margin of alæ, and desquamation and tenderness of the skin over all—it has been slightly broken here and there, and has lately bled; the right nostril permanently occluded almost completely, the left free and never occluded; both upper and lower lips considerably thickened, and the upper beginning to show the characteristic retraction of old *L. tuberosa*: the chin presents very many subcutaneous tuberosities and general infiltration; the cheeks are in the same state, but also carry many puckered scars where old tuberosities have shrunk and disappeared (she says she never had any ulcers on her face); the ears much enlarged, and containing many tuberosities of different sizes. The right eye has a rather extensive corneal opacity, and is practically useless; if she covers it she can read a little with the left eye. Over the elbows is a moderate degree of the usual infiltration, bagginess, and superficial ulceration of the skin; the hands are uniformly swollen, slightly shining at parts, at others desquamating, reddish blue, the fingers inclining to sausage-shape; the right hand is slightly worse than the other, its forefinger more swollen, and stiff; all unguis phalanges are shortened, and all nails very nearly wanting. The feet present similar appearances in a lesser degree; there is a slight ulceration about some nails, which

\*The date ascribed to this occurrence is approximate only; and the date of attack of two of Dr. Cox's cases may be approximately fixed at 1863-9 and 1869 (see the preceding Report dated 1893). A. M. could have seen one of these men therefore; or possibly a third whom I believe to have been in Sydney about the time mentioned, but of whom I do not yet know much.

which last, however, are present and normal except for loss of polish. On the lower third of legs are extensive shallow ulcers, and many cicatrices which mark the site of former ulcers of the same kind. The body shows some ill-marked brownish discolourations at many points, but no well-defined maculæ; the subcutaneous fat is still present, and is slightly wanting only over the forearms. Nerve trunks: Orbicular muscles of eyes are perfectly under control, as that of mouth probably is (thickening of the lips renders this doubtful). Both ulnars can be felt moderately enlarged and smooth, but at the notch are difficult to detect and give an impression of separated strands; sensation on pressure is referred upwards only (and slightly) on the right side, downwards only and as far as the wrist on the left side. Both peroneals are easily felt, but hardened rather than enlarged (atrophy), and sensation is referred downwards only and not below ankle. Sensation: This is diminished on hands and face, but to a rather slighter extent than usual; on the hands are analgesic areas not otherwise distinguishable from adjacent parts, but the finger tips retain what seems to be nearly normal sensitiveness (she could distinguish by touch alone between two soft materials of different degrees of roughness); over the tuberosities there are varying degrees of anæsthesia, from perfect to very slight. General health: Good but for some weakness. Some months ago was nearly carried off by an attack of diarrhœa accompanied with fever.

---

*Case XL.—P.M., æt. 47; admitted, 3 November, 1893.*

*History.*—Was born at Madras of a Syrian father and a Portuguese mother in 1846; no leprosy in his family. Is a Christian. In 1865 entered the police service at Madras; in 1870 entered the police service at Colombo; left the police, and entered the service of a coffee-planter for a short time, and in 1875 sailed for a sugar plantation at Mackay (Q.); in 1887, went to Sydney (N.S.W.) and worked as a cook; shipped as cook on sailing (and other) vessels, visiting England and India; about 1882, visited Brisbane (Q.), and then settled at work as a cook in a restaurant in Sydney, where he continued until 1887; in that year he went to Newcastle (N.S.W.), where he has maintained himself until the present time by selling fruit, ice-cream, sweets, &c.

*History of illness.*—Between 1882 and 1887, while working in Sydney as a cook, he used to bathe frequently, and at some time or other between those dates he first noticed some small maculæ on chest or abdomen. At this time he used to drink too much. About 1885 he had an attack of "rheumatism." During 1890 he first noticed his fingers becoming contracted, and they were numb; he had also numbness of the left foot. On 4 July, 1892, he was admitted to Newcastle Hospital, and was discharged on August 5. The record made by the late Resident Medical Officer was—"Suppurating corn, chronic ulcer of foot; cured." He was re-admitted a year later (30 May, 1893), and the following notes of his illness were furnished by the Resident Medical Officer on November 18:—"Said he was cleaning fish, and had run a bone into his finger, which was poisoned. State: The middle finger of the left hand is in a state of moist gangrene, which is horribly offensive. There is no pain anywhere. Temperature ranges from sub-normal in the morning to 99° or 100° in the evening. There is swelling, brawny and boggy in character, in the palm of the hand, but no tenderness of lymph channels in arm, neither is there any swelling of axillary glands. The finger was amputated, the greater part of the metacarpal bone being removed, and the patient was discharged well on 26 June. He was readmitted 5 October. State—Left hand: The first and third fingers in a similar condition to that of the second finger when admitted before. There are bullæ on the little finger and thumb. The palmar surface of the hand seems more swollen and infiltrated than before. He complains of severe pain shooting from his gangrenous fingers up his arm. The condition described as "gangrenous" is, in our opinion, a misnomer. It is unlike any condition we have before observed, but we have given it this name as there are large bullæ, a very offensive odour, and the ends of the fingers are evidently necrosed. Right hand: There is contraction of all the fingers and wasting of the muscles of the palm, producing a clawed appearance. There are bullæ on the extensor surface of second and third phalanges of the second, third, and fourth fingers, similar to those on the little finger of the left hand. Patient complains of lightning pains from the fingers shooting up the arm. He was placed in the isolation wards under observation. A consultation of the staff was subsequently held, when the unanimous diagnosis of those present was leprosy, and the Government Medical Officer was communicated with immediately." The latter reported to the Board that there was a "case in hospital like leprosy," on 31 October; and the patient was transferred to the lazaret 3 November.

*State on admission.*—Hair of scalp and face normal; cannot close his eyes; orbicular of mouth under imperfect control. Chiefly on the body, less on arms and thighs, has numerous and large maculæ; they are in part of a deep brown (a different shade from the brown of his normal skin), in part tending to achromatic; but there is nothing regular about the distribution of these two colours; the margins are irregular and run into each other for the most part, but rosy margins, several inches long, can be seen at some places on the back and abdomen. Right hand: Fingers contracted *en griffe*, interossei much wasted, palm flattened, much numbness in general, but sensation pretty good in thumb and fore-finger which he relies on for use. Left hand: Fingers contracted *en griffe*; the ring finger amputated; the second and fourth ulcerated, the skin detached, bullous, and stinking; the fore-finger has lost its unguis phalanx by absorption; interosseous muscles wasted; the whole hand is swollen, and the whole is quite numb. Both cubital nerves are slightly enlarged, and sensitive, but on pressure sensation is referred only to the spot touched. The feet present nothing remarkable. Injection of 14 mg. of pilocarpin caused a moderate sweat in 10 or 12 minutes, maculæ and other patches of skin remaining dry by comparison with apparently unaffected parts; but no part remained absolutely dry.

December, 1893.—The ulcerated fingers soon healed under a mixture of iodoform with carbolised oil, but the whole hand remains slightly thickened. General health said to be good.

Case XLI.—E.R., *æ*t. 16; admitted 18 November, 1893.

HER descent was as follows:—

*History.*—Was born and has always lived at Maitland, New South Wales (pop., 1891, 7,295). Three houses in the town have been occupied by her family, and all were within five minutes' walk of that in which they now live; she has never been away from the neighbourhood; she has had no illnesses; she first menstruated in August last—that is, late in life for a native; her periods have recurred regularly since; has always been bright and industrious, and in the habit of assisting her very numerous relatives in their household occupations down to the present date.

*History of illness.*—This seems unusually clear and simple. In January or February, 1892, or about 21 months ago, she went to a village called Dagworth, not more than 2 miles out of Maitland; she stayed at a farm there for a week; the sole event during the visit she can remember is that in looking for melons she walked (with boots and stockings on) much above her ankles in mud, a stream bordering the farm having overflowed its banks shortly before. At or immediately after returning home she noticed several (more than one) purplish streaks on both legs somewhere between ankle and knee, quite slender, and about an inch or more long. After a moderate time these streaks had so spread as to form purplish discolourations under the skin. Some time after her face swelled a little, and some time after her face her hands swelled. She had medical advice. At the beginning of 1893 she was again taken to a doctor, who seems not to have noticed the case particularly, but although he then saw her only once he remembered it well enough to ask after her when he happened to be called to her parents' house ten months later upon other business (later the doctor said that on the occasion of her consulting him at beginning of 1893 he noticed that she had some raised patches on her fore-arms "like wet wash-leather spread on the skin"). During the interval she had continued to get worse steadily, and when she entered the room he at once saw that she was suffering from tuberous leprosy. It is important to note that during the whole of her life she had had no illness that could be remembered, and especially that for long before and for all the time after appearance of the streaks her general health remained absolutely unaltered from the normal, according to her father and mother interrogated at one time, and her two adult sisters and an aunt interrogated at another time, and separately from the former—all of them having been in daily communication with her always. This account she also herself corroborated. None of the family have had any communication with Chinese or other Asiatics except of the inevitable kind, namely, habitual purchase of vegetables from Chinese gardeners, upon whom the inhabitants of this and all other of the larger towns rely for such supplies. The family, including the patient, have never been in distress; the father has been in the same regular employment for more than twenty years. She often went to Newcastle (17 miles), but says she never bought fruit or sweets from coloured men because she did not like such people. (See Case XL.)

*State on admission.*—Scalp, hair, and eyebrows normal; there are some rather large, not hard or well-defined, tuberosities on forehead and cheeks, and a good deal of diffuse and soft infiltration; there is dull red and coppery colouration of these points, not uniform; the nose is thickened and slightly spread, but contains no distinguishable tuberosity; the chin has some indistinct tuberous swellings, or infiltrated areas; her natural aspect is, nevertheless, easily recognised; the ears are generally enlarged, and several small tuberosities, rather hard and well-defined, are distinguishable; the orbicular muscles are under control; both shoulder-tips are covered with bistre-brown maculæ, of the bright tint usual in the earlier stages; there is some ill-defined brownish discolouration over the spines of lower dorsal vertebrae; large brown maculæ on the buttocks; nothing on the abdominal surface. Upper limbs: The shoulder-tip maculæ are continuous with similar discolouration of the arms; there are islets of normal skin; towards the elbow joint lepromata *en nappe* begin to appear. Right fore-arm: From the elbow to the wrist over the ulna bone are numerous tubercles, and irregular, flat, rather extensive lepromata; they are coppery brown in colour, and raised very nearly 3 millimetres above the normal surface, their edges being abrupt; just above the wrist similar changes extend all round; the hand is moderately swollen in general, and the fingers beginning to be sausage-shaped; the little finger is contracted from an old cut, of which the scar remains. The changes on the left side are similar, but the lepromata *en nappe* begin on the arm, and about the junction of upper and middle thirds; this hand is also a good deal more swollen, the fingers more sausage-shaped, and of a deeper purple colour; both cubital nerves are easily found, but are scarcely enlarged; they are very tender, and on pressure sensation is referred to the whole extremity from shoulder to tips of (all) fingers. Lower limbs: The right thigh has maculæ only; round the knee joint is a good deal of infiltration and some spread out specific thickening of the skin; the leg has shown many maculæ, of which only a few now remain, and the anterior surface is freest; there the skin is normal for the most part, but slightly roughened and desquamating at some points. This recession of maculæ is said to have occurred after there had been several separate eruptions of blisters on this leg. The foot is nearly normal, but the toes are much swollen, very purple, and the skin in general is dry and harsh. Left: Like the right except in degree of change; there is much more thickening; the anterior part of leg is not free from maculæ; the dorsum of foot is markedly brown. On this side there has never been any bullous eruption. The external popliteals could not be distinguished, chiefly on account of muscularity and fatness of the patient; but they were both more than usually tender, and sensation on pressure was referred on both sides to middle of thigh, legs, and feet; but the right nerve was decidedly more sensitive than the left—that is, inversely as the visible changes. Special senses: Delayed sensation and a degree of analgesia can be easily made out at several points; otherwise normal. General health: Seems perfectly good; is quite lively, cheerful, and industrious.

1894.

## NEW SOUTH WALES.

## COAST HOSPITAL, LITTLE BAY.

(REPORT FOR 1893.)

Presented to Parliament by Command.

The Medical Adviser to the Government to The Chief Secretary.

Sir,

Sydney, 31st March, 1894.

I have the honor to submit the Annual Report on the working of the Coast Hospital at Little Bay for the year 1893, with appendices containing the usual returns.

The following general statement shows the number of patients under treatment during the year, with results:—

|   |     |     |     |     |     |     |              |
|---|-----|-----|-----|-----|-----|-----|--------------|
| Remaining in hospital on 31st December, 1892      | ... | ... | ... | ... | ... | ... | 192          |
| Admitted during the year                          | ... | ... | ... | ... | ... | ... | 2,274        |
| <b>Total</b>                                      | ... | ... | ... | ... | ... | ... | <b>2,466</b> |
| Discharged well or convalescent...                | ... | ... | ... | ... | ... | ... | 1,563        |

| Remaining in hospital on 31st December, 1893      | ... | ... | ... | ... | ... | ... | 174          |
| Average number resident daily throughout the year | ... | ... | ... | ... | ... | ... | 193.5        |
| Mean residence of each patient in days...         | ... | ... | ... | ... | ... | ... | 32.8         |
| Rate of mortality over all cases...               | ... | ... | ... | ... | ... | ... | 4.88         |

The number of patients admitted during 1893 shows the large increase of 630 over the previous year, which was chiefly caused by the admission of a very large number of cases of measles and scarlatina during the prevalence of the epidemics of these diseases which visited Sydney last year. The average daily number resident throughout the year was 193.5, as against 200.3 for the year 1892, the reduction being caused by the residence in hospital of each patient being shortened from 44.6 days in 1892 to 32.8 in 1893. Notwithstanding the large additional number of cases of infectious fevers, &c., under treatment, the average rate of mortality over all cases remained about the same, viz., 4.5 per cent.

RETURN No. 1.—The channels through which the patients admitted during the year reached the hospital is shown in the following short return:—

|                         | Hospital Admission Depot. | Medical Adviser's Office. | Medical Superintendent. | Total. |
|-------------------------|---------------------------|---------------------------|-------------------------|--------|
| Number of patients..... | 1,671                     | 534                       | 69                      | 2,274  |

During the year the number of cases of typhoid fever which were admitted was 83, being 22 more than during 1892. The number of deaths, however, remained the same, viz., 10, giving a mortality of 12 per cent. The stay in hospital of these cases was reduced from 42 to 34 days.

RETURN No. 2.—Showing the number of cases of Typhoid Fever distributed under sex and age, and the death at each age, which were admitted during 1893.

(Average stay in Hospital, 34.4 days; mortality, per cent., 12.)

Return No 4 shows that 535 cases of infectious diseases other than typhoid fever were admitted during the year as against 116 in the previous year, the chief increases being scarlet fever from 39 to 195, and measles from 2 to 281; the number of other cases of infectious diseases admitted were erysipelas, 36; diphtheria, 9; chicken-pox, 7, and whooping-cough, 7. *Post-scarlatinal diphtheria* necessitated the admission of cases which otherwise might have had the special advantages provided at the Children's Hospital.

Extreme difficulty has been experienced with the limited accommodation available in keeping the different classes of infectious diseases apart, and it is absolutely necessary that special and more suitable buildings should be immediately provided for this class of cases.

RETURN No. 4.—Showing localities, whence and how many cases of Infectious Fevers, &c, were admitted in 1893

Return No. 5 shows the age, sex, and other particulars of the general hospital cases admitted during the year. The total number of these was 1,656, the average stay in hospital was 34 days, and the mortality 4.6 per cent. A large number of these cases were, after treatment for a considerable period, transferred to the Asylums for the Infirm and Destitute, their cases being such as would not be benefited by further active hospital treatment.

RETURN

RETURN No 5 — Showing the general cases distributed under sex and age, and the deaths at each age, during the year 1893

(Average stay in Hospital, 31 6 days, mortality, per cent, 4 71)

|   | 330    | 7      | 5    | „ amount paid by Government Printer                                | 16    | 0      |      |
| Total   | £      | 11,179 | 11 9 | Total  | £     | 11,179 | 11 9 |

Dr. William Peirce has continued to discharge the duties of the Medical Superintendent, and Miss J. McMaster those of the Matron. On the 31st of July Dr Franklm left the institution, having been promoted to the position of Resident Surgeon to the Public Works Prison at Trial Bay, and Drs Shaw and Sweet were appointed as House Surgeons and Dispensers. On account of the nature of the cases admitted it was found necessary to increase the nursing staff.

Indigent and deserving patients have, upon their discharge, continued to receive relief from the Samaritan Fund, to give them an opportunity of seeking work or returning to their friends in the country.

In Appendices A and B will be found the usual classification of the diseases treated, and particulars relative to the patients who died in hospital.

I have, &c,

T P ANDERSON STUART, M.D.,

Medical Adviser to the Government.

APPENDIX A.

## SUMMARY

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

**DAIRIES SUPERVISION ACT.**

(REPORT ON ADMINISTRATION OF, FOR THE YEAR 1893.)

*Ordered by the Legislative Assembly to be printed, 18 April, 1894.*

The Secretary to the Board of Health to The Principal Under Secretary.

Sir, Board of Health Office, 127, Macquarie-street, Sydney, 11 April, 1894.

I have the honor, by direction of the Board of Health, to forward herewith, for the information of the Chief Secretary, a report on the administration of the Dairies Supervision Act for the year 1893.

I have, &c.,

EDMUND SAGER,

Secretary.

[Enclosure.]

DURING the year 1893 the provisions of the Dairies Supervision Act, 50 Victoria No. 17, were extended to the following districts:—

- (a) The town of Oberon and an area within a radius of 10 miles from the Oberon Court-house;
- (b) The portion of the Manning River Police District lying within the county of Macquarie;
- (c) The municipal district of Gulgong and an area of 10 miles outside such municipality;
- (d) The municipal district of Hay;
- (e) The municipal district of Wilcannia and an area within a radius of 10 miles from the Wilcannia Court-house;
- (f) The parish of Strathearn, county of Brisbane;
- (g) The parishes of Meehan, Wilberforce, Currency, and Kurrajong, county of Cook;
- (h) The borough of Cowra and an area within a radius of 10 miles from such municipality;
- (i) The municipal district of Katoomba.

The whole of the dairies in the districts to which the Act has been extended were inspected during the year by the officers of the Board, with the exception of those that have only recently been brought under the provisions of the Act. In certain districts it was found necessary to reinspect the premises, in order to ascertain if the recommendations of the Board had been carried out. In Appendix A will be found a synopsis of the reports of such inspections, together with a record of the action taken by the Board consequent thereon.

The districts now under the operation of the Act have increased from 132 at the end of 1892, to 151 at the end of 1893, and owing to the establishment of many butter factories and creameries under the co-operative system, the dairies in several of these districts have very considerably increased in numbers, and consequently the work of inspection has been much heavier.

During the year an opinion was obtained from the Crown law officers that all persons selling or supplying milk in any form to butter factories or creameries must be registered, and also that butter factories or creameries which sell or supply cream or milk in any form come within the provisions of the Act. The various local authorities were duly apprised to this effect, and nearly all the butter factories and creameries have been inspected by the Board's officers during their visits to the various districts.

The question as to the sale of goats' milk was also decided, and all the local authorities were advised that vendors of goats' milk must be registered as milk vendors, and that a person keeping a dairy herd of goats alone must be registered as a dairyman.

In Appendix B will be found the usual abstract of the annual reports furnished by the various local authorities. The opposition at one time evinced by certain local authorities to the proper administration of the Act has now practically ceased, and the general condition of the premises show a considerable and steady improvement. The beneficial results from the administration of the Act cannot be over-estimated on the point of advantage to the health of the community.

Many dairy farmers admit the advantages of having their stock inspected, as in many cases animals in the early stages of tuberculosis have been pointed out by the veterinary inspector, and destroyed or removed. Had such cattle been allowed to remain with the herds it would probably have resulted in others being infected, whereby a greater loss and other disadvantages would have been entailed.

During the year prosecutions have been instituted and convictions obtained for various breaches of the Act—in selling the milk from diseased cows; for selling adulterated milk; for selling milk, not being registered; and for neglecting to report an outbreak of epidemic disease on a dairy.

It is noticeable that in the majority of the cases the proceedings were instituted by the police as local authority. Considering the very salutary effect of these prosecutions, and the great advantages to the public of a stringent administration of the Act, it is to be regretted that the municipal authorities do not give greater attention to their responsibilities in this regard.

A few dairies have been temporarily closed owing to persons on them having infectious disease, thus lessening the chances of the affection spreading through the medium of the milk supply; but registration has been again granted after removal of the patient and disinfection of the premises.

In the reports for previous years the Board pointed out that the Act required amendment in several particulars, and a Bill to amend the existing Act has been prepared and forwarded to the Chief Secretary. The chief points of this Bill are as follows:—

- (1.) To extend the provisions of the principal Act to persons producing milk for the manufacture of any product of milk, and also to those persons engaged in the manufacture of such product;
- (2.) To enable the local authorities to charge a registration fee to cover the cost of administering the Act;
- (3.) To give to the officers of the Board powers of entry and inspection similar to those now possessed by the local authorities; and
- (4.) To make provision for the issue by the Government of the necessary regulations for the working of the Act, and to provide for the enforcement of such regulations by penalties.

By order of the Board of Health,

EDMUND SAGER,  
Secretary.

Sydney, 4th April, 1894.

## APPENDIX A.

## DAIRIES SUPERVISION ACT, 1893.

ABSTRACT of Reports on the Registered Premises in the Municipal and Police Districts hereunder referred to, for the year ending 31st December, 1893, showing the steps taken by the Board of Health to enforce the provisions of the Act.

| No | Name of District         | No of Registered Premises |                    | Date of Inspection   | Condition of Premises   | Action taken by the Board to enforce provisions of Act |  |
|----|--------------------------|---------------------------|--------------------|----------------------|---|--|--|
|    |                          | Dairies                   | Milk Stores        |                      |   | Date   | Nature of communication forwarded to Local Authority   |
| 1  | Adamstown                | 10                        |                    | 12/5/93              | Fairly satisfactory   | 17/5/93  | Copy of report sent with letter expressing satisfaction with the administration of the Act, recommending that arrangements be made for removal of night soil from one dairy, and that lime washing should be done when required  |
| 2  | Albury                   | 17                        |                    | 6/7/93               | Satisfactory  | 14/7/93  | Letter of recommendation, in accordance with the report, sent to Council   |
| 3  | Alexandria               | 15                        | 13                 | 13/3/93              | Generally satisfactory (one diseased cow on dairy premises)       | 16/3/93  | Copy of report sent with letter drawing attention to the condition of two dairy premises, and recommending that all closets be connected with the sewer as soon as possible  |
| 4  | Armidale                 | 6                         |                    | 17/5/93              | Fairly satisfactory   | 31/5/93  | Copy of report sent with letter advising that the special recommendations contained in report should be early carried out  |
| 5  | Armidale (a)             | 8                         |                    | 18/5/93              | Satisfactory  | 31/5/93  | Copy of report with letter to Inspector General of Police advising that recommendations in the report be carried out   |
| 6  | Ashfield                 | 11                        | 8                  | 27/3/93              | do  | 30/3/93  | Copy of report with letter drawing attention to the condition of three premises, and recommending that Local Inspector pay early attention to see that the suggested improvements are done   |
| 7  | Auburn                   | 10                        |                    | 13/10/93             | do  | 18/10/93   | Copy of report sent with letter drawing attention to the requirements at two dairy premises, advising their early fulfilment, and requesting samples of water be forwarded from a well at another dairy  |
| 8  | Balmain                  | 17                        | 8                  | 17/4/93              | Very satisfactory   | 19/4/93  | Copy of report sent with letter expressing satisfaction at the general administration of the Act, and requesting that the remarks of the Inspector in reference to three of the premises receive due attention   |
| 9  | Balranald                |                           |                    |                      |   |  |  |
| 10 | Bathurst                 | 28                        |                    | 23/10/93             | Very satisfactory   | 8/11/93  | Copy of report with letter recommending that samples of water should be submitted for analysis from sources mentioned, and that cesspits should be abolished on all dairy premises, and the substitution of pan closets  |
| 11 | Bathurst (a)             | 4                         |                    | 26/10/93             | Fairly satisfactory (three diseased cows on dairy premises)       | 8/11/93  | Copy of report with letter to Inspector General of Police recommending that all suggestions contained in the report receive attention  |
| 12 | Berrima (a)              | 24                        |                    | 1/5/93 to 29/5/93    | Generally satisfactory (eighteen diseased cows on dairy premises) | 31/5/93  | Copy of report with letter to Inspector General of Police advising that all the recommendations contained in the report be carried out   |
| 13 | Berry                    | 108                       | 3 butter factories | 21/9/93 to 9/10/93   | Fairly satisfactory (fifteen diseased cows)                       | 18/10/93   | Copy of report sent with letter urging better keeping of register, and attention to recommendations made in respect to dairies special attention to the butter factories with regard to their improved sanitary maintenance, and advising discontinuance of pig keeping thereat    |
| 14 | Botany                   | 3                         |                    | 10/3/93              | Satisfactory  | 16/3/93  | Copy of report with letter sent  |
| 15 | Bowral                   | 8                         |                    | 4/5/93               | do  | 10/5/93  | Copy of report with letter sent drawing attention to and advising removal of a pig sty on one of the premises  |
| 16 | Brisbane Water (a)       | 12                        |                    | 10/10/93             | do  | 18/10/93   | Copy of report with letter sent to Inspector General of Police advising that the Local Authority see to the carrying out of suggested improvements   |
| 17 | Broken Hill              | 15                        | 4                  | 24/2/93              | Generally satisfactory  |  |  |
| 18 | Broughton Vale           | 27                        |                    | 16/10/93 to 21/10/93 | Satisfactory generally (two diseased cows)                        | 25/10/93   | Copy of report with letter sent recommending the provision of privies at two dairies without them, the erection of requisite milk stores, and the carrying out of improvements within a given period   |
| 19 | Burwood                  | 10                        | 1                  | 29/3/93              | Satisfactory  | 8/4/93   | Copy of report with letter sent drawing attention to the remarks in the report concerning a vendor's premises, the manager of the Fresh Food and Ice Company also written to in reference to the same vendor   |
| 20 | Cabramatta & Canley Vale | 8                         |                    | 4/8/93               | Satisfactory generally  | 12/8/93  | Copy of report with letter sent drawing attention to improvements required on some of the premises   |
| 21 | Camden                   | 18                        |                    | 1/9/93 and 2/9/93    | Fairly satisfactory   | 13/9/93  | Copy of report with letter sent recommending that improvements necessary at two of the dairies be completed within 14 days, or else cancel the registration in default, also that cattle be prevented from having access to polluted water on two of the premises                  |
| 22 | Camden (a)               | 91                        |                    | 2/9/93 to 7/9/93     | Satisfactory (eight diseased cows)                                | 13/9/93  | Copy of report with letter to the Inspector General of Police noting the satisfactory administration of the Act, and advising that failing the carrying out of suggested improvements within a given time, registration should be cancelled  |
| 23 | Campbelltown             | 36                        |                    | 17/8/93 to 19/8/93   | Fairly satisfactory   | 30/8/93  | Copy of report with letter sent recommending the carrying out of suggested improvements  |
| 24 | Campbelltown (a)         |                           |                    |                      | No registered premises in this district                           |  |  |
| 25 | Camperdown               | 5                         | 14                 | 17/3/93              | Fairly clean  | 27/3/93  | Copy of report with letter sent recommending that one of the registrations be cancelled unless premises are placed in a proper sanitary condition  |
| 26 | Canterbury               | 16                        |                    | 11/1/93              | Clean   | 18/1/93  | Copy of report with letter sent drawing the attention of necessity for improvements at three of the premises, and also that a waterhole should be fenced off at another  |
| 27 | Carrington               | 1                         |                    | 10/5/93              | Satisfactory  | 17/5/93  | Copy of report with letter sent recommending the appointment of an Inspector under the Act   |
| 28 | Central Illawarra        | 101                       |                    | 4/12/93 to 23/12/93  | Many unsatisfactory   | 3/1/94   | Copy of report with letter sent recommending the administration of the Act in its entirety, the removal of diseased animals from all dairy premises, and the carrying out of suggested improvements at creameries and other premises, with cancellation of registration in default |
| 29 | Central Shoalhaven       | 19                        |                    | 11/9/93              | Fairly satisfactory   | 13/9/93  | Copy of report with letter noting improved condition of premises, but recommending greater stringency and attention to the carrying out of suggestions contained in the report.  |
| 30 | City of Sydney           | 6                         |                    | 20/9/93              | do do   |  |  |

1894.

---

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

---

NOXIOUS TRADES AND SLAUGHTER-HOUSES BILL.  
(MESSAGE No. 17.)

---

*Ordered by the Legislative Assembly to be printed, 14 February, 1894.*

---

R. W. DUFF,  
*Governor.*

*Message No. 17.*

In accordance with the provisions contained in the 54th section of the Constitution Act, the Governor recommends for the consideration of the Legislative Assembly the expediency of making provision to meet the requisite expenses in connection with a Bill to regulate the carrying on of Noxious Trades and the Slaughtering of Cattle, to incorporate the Board of Health, and for other purposes.

*Government House,  
Sydney, 14th February, 1894.*

---

1894.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

**NOXIOUS TRADES AND CATTLE-SLAUGHTERING BILL.**  
(PETITION FROM MEMBERS OF THE NEW SOUTH WALES MUNICIPAL ASSOCIATION IN FAVOUR  
OF, WITH CERTAIN AMENDMENTS.)

*Received by the Legislative Assembly, 2 May, 1894.*

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales.

The humble Petition of the undersigned,—

RESPECTFULLY SHOWETH :—

1. That your Petitioners have read the provisions of the Noxious Trades and Cattle-slaughtering Bill introduced into the Legislative Assembly by the Honorable Sir George Richard Dibbs, Colonial Secretary.

2. That your Petitioners desire to see a Bill passed into law to properly regulate noxious trades.

3. That your Petitioners do not deem it expedient, in the public interest, to have slaughter-houses established in all or any of the suburbs of the City of Sydney, as the said Bill permits.

4. That your Petitioners believe that with the establishment of slaughter-houses in the suburbs will ensue a great public evil in the driving of sheep and cattle through populous districts to the danger and injury to life, limb, and property.

5. That the said Bill requires to be amended so as to increase, rather than diminish, the local self-governing powers of the people.

Your Petitioners therefore pray that your Honorable House may be pleased to so amend the said Bill as to remedy the matters above set out.

And your Petitioners, as in duty bound, will ever pray.

[*Here follow 19 signatures.*]

1894.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

**DISEASED ANIMALS AND MEAT ACT.**

(REPORT ON THE ADMINISTRATION OF, FOR THE YEAR ENDING 31ST MARCH, 1893.)

*Ordered by the Legislative Assembly to be printed, 17 January, 1894.*

The Secretary of the Board of Health to The Under Secretary for Finance and Trade.

Sir,

Board of Health Offices, Sydney, 6 December, 1893.

I have the honor, by direction of the Board of Health, to submit herewith a report on the administration of the "Diseased Animals and Meat Act" for the year ending 31st March, 1893.

This Act was assented to by the Governor on the 16th March, 1892, but prior to that date the Board had caused to be made inspections of animals sent for sale at Sydney and various country markets, and a large number found to be diseased were promptly destroyed, the owners as a rule offering no objection. The Mayor of Sydney also took similar action in the interests of the public health.

In making the preliminary arrangements for administering the Act the Board determined to utilise as far as possible the services of officers then in the employment of the Government and of the different municipal councils, and to this end authorised, in accordance with the powers given them by the fifth section, Government Medical Officers, Inspectors of Stock, Municipal Inspectors, Police Inspectors of Slaughter-houses, and other police officials to inspect and seize animals under the Act. Thus some 700 inspectors were appointed throughout the Colony without additional cost.

It is, however, to be regretted that some of the Municipal Councils which were invited to submit the name of one of their officers for appointment failed, and in several instances absolutely refused, to do so. As the Act is a measure passed in the interests of the public, it is only reasonable to expect that municipal authorities would cheerfully assist the Board in safeguarding the health of their particular districts.

At the same time the full services of the Government Veterinarian (Mr. Edward Stanley, F.R.C.V.S.), which were formerly divided between the Health Department and the Stock Branch of the Mines Department, were secured for this Board—the only actually new appointment being that of a Veterinary Inspector (Mr. S. T. D. Symons, M.R.C.V.S.). In this way the expense of administering the Act has not exceeded the sum of £1,000 per annum.

Returns have been supplied by the various inspectors, and from the figures furnished it appears that the following animals have been seized and dealt with during the year under review:—

| District.           | Cattle. | Pigs. | Sheep. | Calves. | Rabbits. |
|---------------------|---------|-------|--------|---------|----------|
| Metropolitan ... .. | 994     | 450   | 14     | 2       | 675      |
| Country ... ..      | 936     | 57    | 9      | .....   | .....    |
| Total ... ..        | 1,930   | 507   | 23     | 2       | 675      |

In addition to the above, portions of unwholesome, unsound, or diseased beef, mutton, veal, and pork carcasses, and putrid bacon have been seized and condemned.

Prosecutions have also been instituted against persons for selling or consigning diseased animals, both in Sydney and the country districts, and in nearly every instance convictions have been obtained, and fines inflicted. A large number of diseased cattle, apparently ownerless, and found straying on public lands, highways, reserves, &c., have been seized and dealt with under the sixth section, and are included in the figures given in the foregoing return.

The

The veterinary officers of the Board have visited many parts of the Colony from time to time, and afforded valuable instruction to authorised persons as to their duties, and also have given simple directions for the detection of diseased beasts, but in all seizures the authorised persons acting therein have been directed to secure professional aid to support them, either from the local Government Medical Officer, or a competent and qualified veterinary surgeon.

During the year inquiries were made by European Governments, through the Secretary of State for the Colonies, as to the condition of the meat exported from this Colony, and in one instance a very large firm of London shippers instructed their agents in this city to procure certificates from veterinary inspectors as to the condition of the cargoes. This Board, however, with their limited staff, found it impossible, to make minute inspection of every frozen carcase leaving port, and, instead of this, furnished information to the Governments concerned respecting the Act now in operation for the prevention of slaughtering of diseased animals for food, and, on the assurance that the provisions of the Act were stringently administered by the Board, no similar requests have been subsequently made, and thus shippers are saved from a considerable expense, and the important export trade assisted, whilst the home consumer is protected.

Requests have been received from two Associations connected with the sale of stock in the city that all animals about to be sold at the various metropolitan markets should be inspected by the Board's officers prior to being offered for sale, in order that the sellers might be protected from committing possible breaches of the Act. The Board could not see their way to accede to these requests, it being no part of the duties of the Department to inspect stock previous to sale for the benefit of persons trafficking therein, and the Associations were informed that in the opinion of the Board such persons should take steps on their own behalf to prevent any infringement of the law, the departmental inspectors, however, attend all sales regularly, and should any diseased cattle be presented for sale they are duly seized, but beyond this the administration of this very useful measure would be impeded.

Much opposition to the Act was displayed at its initiation by various persons connected with the breeding and sale of stock, and it was found necessary, in addition to the seizure and destruction of diseased animals, to institute proceedings for the recovery of penalties, in order that their responsibility in this matter might be brought home to graziers. As the provisions of the Act became more known it was realised that the trade generally would benefit by its strict enforcement, and that ultimately the flocks and herds of the Colony would be considerably improved. In no case, however, has the Board ordered any prosecution, except where the disease was external and clearly observable by any person with an ordinary knowledge of stock.

Applications have been made from time to time for permission to travel diseased stock to boiling-down works in various parts of the country; but the Board, whilst of the opinion that the boiling down of diseased animals was desirable, were not in a position to grant the necessary permits, as by the 6th section of the Act any diseased animals found in a public place, or on a highway, road, &c., are to be seized and condemned. Further it appeared to the Board that to permit the travelling of diseased cattle to boiling-down works would be to expose to grave danger from contagion the herds of stockowners resident in the vicinity of the route taken.

The administration of the Act raised many points of scientific interest and practical importance, to settle which it became necessary to undertake microscopical and experimental investigations, chiefly in the Board's laboratory. The results of much of this work are contained in the appendices to this report, and go far to show what diseases prevail amongst stock in this Colony, and to give an estimate of the proportion in which they affect the stock. It would thus appear that amongst 155 specimens collected indiscriminately from animals condemned as unfit for food, no less than 116, or 75 per cent., were found to be tuberculosis, thus at once justifying the action now being taken to prevent such animals passing into the food supply of the people.

The Board may be permitted to draw special attention to the investigations on the "Worm nests in beef" (App. 2) and on "Pants," or "heaves" a disease in pigs, one variety of which corresponds to "Coast cough" in cattle and consumption in man. But the investigation showed that there was another and much more contagious variety due to a specific organism, the recognition of which and the determination of its virulent character led to the disease due to it being placed on the list of contagious diseases under the Act. Coloured figures of the characteristic appearances are appended hereto. The organism—a bacterium—has been isolated and cultivated in a pure condition, and the experiments performed with the pure culture leave no doubt whatever that it is the cause of the more contagious variety of "pants." The losses occasioned by the ravages of this disease have been enormous, but it is hoped that the recognition of its nature and the prompt destruction of affected animals—the only remedy at present known—will lead to a great diminution in its prevalence.

I have, &c.,

EDMUND SAGER,  
Secretary.

## APPENDIX No. 1.

*Re* Microscopical examinations of Animal Diseases, by Mr. Pound.

Sir, Board of Health Offices, 127, Macquarie-street, Sydney, 22 May, 1893.

I have the honor to report that during the three months Mr. Pound has been engaged on the above work, I have been able to secure 155 morbid specimens, taken fresh from animals condemned as being unfit for food.

The specimens were collected indiscriminately, from the sale-yards, markets, and abattoirs.

The results are very satisfactory, proving the correctness of diagnosis made by the officers whose duty it is to condemn diseased animals or carcasses, and also supports the action being taken by the Board, under the Diseased Animals and Meat Act.

As I have taken great interest in watching Mr. Pound's work, and have examined every preparation, I may be permitted to say much credit is due to him for his patient perseverance in determining, and demonstrating the specific micro-organisms; it involved an immense amount of labour, often from one to two dozen preparations had to be made from a single specimen before definite results could be obtained.

To the naked eye, a clinical comparison of the morbid specimens proved over and over again that to judge by histological appearances is most misleading and unreliable, as the results of disease so closely simulate each other, although originating from very different causes.

The following is a summary of the examinations:—

| Diseases.                   | Cattle. |          | Swine. | Totals. |
|-----------------------------|---------|----------|--------|---------|
|                             | Males.  | Females. |        |         |
|                             | 78      | 33       |        |         |
| Tubercle .....              | 111     |          | 5      | 116     |
| Actinomycosis .....         | 18      |          | ...    | 18      |
| Abscesses .....             | 13      |          | ...    | 13      |
| Cancerous .....             | 1       |          | 2      | 3       |
| Dermoid .....               | 2       |          | ...    | 2       |
| Pneumonia, contagious ..... | ...     |          | 3      | 3       |
|                             |         |          |        | 155     |

From the above table it will be seen that about 75 per cent. were cases of tuberculosis, and a large proportion were bullocks.

In 109 cases, Koch's bacilli were unmistakably demonstrated. The diseased parts were sometimes pieces of lung, more often lymphatic glands in a nodular and caseous stage, and sometimes grapey tubercles from serous membranes.

Actinomycosis was usually in the maxillary region, one in the muscular tissue of the tongue, one in a suppurating femoral abscess. Mycelium was much more frequently found than clubs.

Of the abscesses, seven were acute, containing streptococci or other bacteria. The others were chronic. These abscesses resembled tumours, were taken from the face, neck, brisket, flank, lungs, kidneys, liver.

The cancerous cases were epithelioma from a cow's vulva. A sarcoma and a fibroma from pigs necks. Two dermoid cysts from the necks of cattle, externally resembled tubercles (carcasses were passed for food). I attach a report by Mr. Pound.

I have, &c.,

EDWD. STANLEY, F.R.C.V.S.,  
Government Veterinarian.

E. Sager, Esq., Secretary, Board of Health.

“Diseased Animals and Meat Act.”

Sir, Board of Health Offices, 127, Macquarie-street, Sydney, 22 May, 1893.

I have the honor to submit to you a report which embodies the results of an investigation carried out in accordance with your instructions to determine the nature of various manifestations of diseases in animals condemned and destroyed under the above Act.

From 17th February to 16th May inclusively the Government Veterinarian secured specimens of diseased tissues and organs from 155 animals killed at the abattoirs and saleyards, such specimens being taken indiscriminately.

As soon as convenient after each animal was killed the morbid material was placed in a stoppered bottle containing 50 per cent. alcohol, with a label affixed bearing the date and necessary remarks.

Several specimens were obtained from different animals suffering from suppurating abscesses, a few on the flank. These flank abscesses, which are somewhat uncommon in cattle, bear a striking resemblance to one another, so much so that it is almost impossible to diagnose them from their naked eye appearances. Their true nature can only be determined by resorting to various complicated processes of staining, and the use of the microscope with high power objectives. With these means at hand, I have been able to clearly differentiate these abscesses into three distinct varieties, viz. :—

Actinomycotic, in which the fungus appeared in the young active mycelium stage.

Tubercular, by the presence of tubercle bacilli, although very sparsely distributed.

And acute suppurating, which contained either the streptococcus pyogenes or the staphylococcus pyogenes aureus.

Taking any of these superficial abscesses from other parts of the body, if I failed to find either tubercle or actinomycosis, I was always successful in demonstrating the presence of some variety of pyogenic bacteria.

Very compact nodular growths are frequently noticed in the neighbourhood of the jaws in cattle; they vary considerably in size from that of a pin's head to an orange or even larger; in some cases they remain intact, while others have a tendency to break down and suppurate: they are situated sometimes in the subcutaneous tissue, frequently in and around the jawbones, but more rarely in the muscular tissue.

On examining six of these cases from the region of the upper and lower jaws, I found the actinomyces in nearly every stage represented in the life history of the organism, from the development of the spores to the actively-growing filaments, from the mycelium to the club-shaped bodies which ultimately undergo degeneration and calcification.

One specimen taken from the inferior maxilla of an ox consisted of a chain of little nodules, each about the size of a pea, and firmly embedded in the muscular tissue. In structure they consisted of a dense mass of calcareous matter surrounded by a very thin wall of fibrous tissue. Failing to find anything of a tubercular nature, specimens were stained and examined for Actinomycosis, but without success, although every known available method was used, and it was only when some of the calcareous material was treated with hydrochloric acid that I found a few clubs in a degenerative stage undergoing calcification. This manifestation of actinomycosis, which was undoubtedly undergoing spontaneous recovery, points out one of the many difficulties encountered in diagnosing this disease.

It is interesting to note that two animals each having a tumour just under the skin, in the region of the parotid gland, and which felt like and resembled tubercle or actinomycosis, proved after the animals were killed on final examination to be typical examples of dermoid cysts, otherwise these animals were in a perfectly normal condition, and, although they were not condemned, are sufficiently interesting to be noted.

I wish to draw attention to the fact that several cases of tuberculosis submitted for examination from the abattoirs were taken from dry milch cows. The specimens consisted of portions of the lungs, liver, and various lymphatic glands, and in each case presented the appearance of a chronic and long-standing form of the disease, the lungs and glands being a solid mass of cascating and gritty tubercular deposit, while tubercle bacilli were extremely numerous.

A

A number of cases of bovine tubercle presented itself in the "grapy" or "perlsucht" form of the disease, while a few lung cases of tubercle in the early stage were found associated with the old lesions of pleuro-pneumonia.

By using the same staining reagents throughout of series of specimens under precisely the same conditions, I found that the tubercle bacilli varied very considerably in size and manner in which the stain was taken up. Some of the bacilli appeared very long and distinctly beaded, in others the beading was absent, others again were very short and fat, while some took the stain very readily, others were more resistant. In some specimens the bacilli were very numerous and frequently found in giant cells, while in others difficulty was experienced in even finding one or two in a dozen preparations.

Only one case of true bovine cancer was submitted for examination, that being an epithelioma from a cow's vagina.

On examining specimens from two pigs, one was found to be a "mixed cell sarcoma," the other a fibroma.

Specimens were secured from eight pigs suffering from lung disease: on examination, five of these were tuberculosis, while in the remainder, which were cases of contagious pneumonia, I found the specific micro-organism.

In some specimens of tuberculosis in which the tubercle bacilli were not found owing to their sparse distribution, it was necessary to rely on the histological characters, but this only occurred in seven cases out of 116.

TABLE showing results of microscopical examination.

| Diseases                      | Cattle | Pigs | —   |
|-------------------------------|--------|------|-----|

This investigation adds materially to our present knowledge of the nature of diseases in cattle and pigs, also to what extent tuberculosis and actinomycosis is prevalent among cattle. Further, it points out how readily, in some instances, one disease may be mistaken for another when judging by the microscopical appearances only, and when such diagnosis is unsatisfactory, only a microscopical examination can bring about the desired result.

Edmund Sager, Esq., Secretary, Board of Health.

I have, &c.,  
C. J. POUND.

## APPENDIX No. 2.

### NODULAR TUMOURS.

#### Worm Nests in Beef.

Sir,

Sydney, 3 March, 1893.

I have the honor to report having noticed small tumours, like marbles, on the brisket, under the skin, and in the deeper layers of cellular tissue and fat, more commonly seen in this region, but they are occasionally seen in other parts of the body, sometimes so numerous as to be mistaken for tubercular nodules. Butchers call them white kernels, so distinguishing them from the brown-coloured lymphatic glands.

On cutting them open they are found to be firm and whitish in colour, but in the spring they are yellowish and drier and contain distinct calcareous worm casts. They rarely soften or excite suppuration.

They are made up of dense fibrous tissue, in which nematode (round) worms are intertwined. I have only been able to extract pieces of the worms, and find they contain ova and also living little worms. Some of them are free, some coiled up in the ova cells. They probably belong to the variety spiroptera. A similar parasite is found in nests in the stomach of the horse.

These nodular tumours are not at all uncommon, and are possibly harmless to the meat consumer. I have, however, advised the Meat Inspectors to have them cut out, as they are unpleasant to the sight, and may suggest other diseases to the uninitiated.

I forward a few specimens of the tumors in bottle marked D, in order that they may be examined and identified.

The following is Dr. Gibson's report on the specimens.—

"*Specimen D.*—Three tumours from brisket of a fat bullock from the Abattoirs, February, 1892—This is a very interesting, and, in my opinion, important specimen. The tumours were rounded or ovoid in shape, the largest being about the size of a large bean. Sections of the largest showed a somewhat kidney-shaped outline, with a dense fibrous looking capsule, measuring about the  $\frac{1}{2}$  of an inch in thickness. Passing in from this capsule were numerous trabeculae, of varying thicknesses, which interlaced to form a meshwork, enclosing spaces of different shapes and sizes, which communicated freely with each other. These spaces were mostly empty in sections cut on the freezing microtome, but in some of them there could be seen parts of the contained parasite, cut in various directions.

*Microscopically.*—Examining the outer margin of the fibrous capsule, one finds that it is ragged and ill-defined, showing that it had not been entirely isolated from the surrounding structures. The tissue of this capsule was composed of dense fibrous tissue in some places, and of fibro cellular tissue in others. It was very abundantly supplied by blood-vessels, many of which were embryonic in character. Young nematode embryos, in large numbers, were seen in some parts of this capsule, some bent double, others coiled up in figure of 8 fashion, and others stretched full length. Some appeared to be in the channel of a small blood-vessel, ready to be carried along the general circulation. The structure of the trabeculae was somewhat more cellular than that of the capsule, and the blood-vessels were more embryonic. Some of these blood-vessels were in very close relation to the enclosed spaces. Numerous nematode embryos occupied certain parts of the trabecular mesh-work.

The above-mentioned spaces were occupied by adult nematode worms. Unfortunately, I have been quite unable to procure a complete specimen of the adult worm, partly because of the hardening in absolute alcohol, and partly on account of the complex mesh-work surrounding the worm. Even very cautious efforts at pulling served to rupture the parasite, so that a very imperfect description can be given. The parasites were adult females, resembling in structure ordinary nematodes. The uterus contained fully formed embryos, as well as ova in all stages of development. As may be seen on examining slide D2, which is part of an adult parasite, the embryos are in enormous numbers in the uterine cavity. Although I am unable to give proper measurements of the adult parasites, or even to state whether one, or more than one, is present in each of the three tumours. I have taken very careful measurements of the embryos. These latter average  $\frac{1}{16}$  of an inch in length, and  $\frac{1}{600}$  of an inch in breadth. They have a slightly bulbous head, with a circular, discoid, cephalic extremity, whilst the tail is frequently curved, and invariably tapers to a fine point. There was no sac observed surrounding the embryos, such as has been described in the case of the embryos of *filaria sanguinis hominis*. The contents of these embryos were slightly granular, but there were no organs visible in the interior.

In my opinion, these tumours, containing the adult nematode worms, with their embryos, may be regarded as so-called "worm-nests," or "worm-knots," which are not unfrequently found in the lungs of sheep, and rabbits and oxen. The parasites which form these "worm-knots" are said to belong to the strongylidæ; but some species of *filaria* also form "worm-knots." In this case, although the adult parasites appeared to be encapsuled, it is important to remember that the embryos

embryos which had become free had, in some cases, gained access to the blood vessels, and it is not too much to imagine that numbers of them were circulating in the blood stream. Important questions present themselves for consideration in this connection, especially the question of the probability of human infection from eating the under-cooked meat of the animals so affected. The complete life history of the *filaria sanguinis hominis* has not as yet, to my knowledge, been satisfactorily wrought out.

The measurements of the filaria like embryos in this case do not correspond to those which Lewis gives as the average for *filaria sanguinis hominis*. He gives the average length as  $\frac{1}{16}$  of an inch, and the breadth as  $\frac{1}{100}$  of an inch. But it must be remembered that his measurements were taken from embryos which were alive and circulating in the blood-stream, whilst those which I give were from embryos either recently escaped from their parent or actually present in the uterine cavity, and, therefore, more immature. Moreover, my specimens were hardened in absolute alcohol, which would cause a certain amount of shrinking. As regards the absence of the tubular sac surrounding the embryos in this specimen, too much weight must not be attached to that, because after death the *filaria sanguinis hominis* may occupy the entire length of the sac, and so render it invisible, or may be found contracted within the sac so as to leave the latter visible at one or both extremities.

Without being able to determine definitely the actual species of parasite present in this case, sufficient has been stated to warrant careful consideration as to the treatment of the flesh of animals affected with these so called "worm-knots" or "worm nests."

See slides D1 and D2, stained with picro carmine.

As nodular parasitic diseases are sometimes mistaken for tuberculosis, it may be well to point out that they are met with in various animals, and may be found in many parts of the body, and are often due to migration of the worms from the digestive organs. They are found in the stomach and bowels of horses, in the lungs and bowels of sheep, and are known to butchers' assistants who prepare sausage skins as knotty guts, and are discarded in consequence, being useless, as they easily tear from brittleness.

I have seen clusters of the worm nodules so excite the nutrition of the parts as to become the seat of tuberculosis, and have found the tubercle bacilli in such places, but such an occurrence is purely accidental, as it is well known that tubercle will easily become established in the seat of any injured tissue, when the subject of the injury is already in a tuberculous condition.

It will, therefore, be apparent that worm nest or parasitic worm nodules should not be mistaken for either tubercles or cancers.

I have, &c.,

EDWD. STANLEY,  
Government Veterinarian.

### APPENDIX No. 3.

#### SWINE DISEASES

##### Tuberculosis and Contagious Pneumonia.

Sir,

Board of Health Offices, 127 Macquarie, Sydney, 18 February, 1893.

I have the honor to submit a review of the investigations carried on to determine the nature of the disease in pigs known as "pants or heaves."

In a report dated 25th May, 1890, on a visit of inspection to the South Coast District, where I had noticed the prevalence of tuberculosis in cattle, the Board of Health instituted an investigation in order to ascertain the prevalence and nature of "coast cough" in cattle in that district, which proved, on microscopical examination, to be bovine tuberculosis (*vide* report presented to Parliament on the 9th October, 1890). I drew attention to the disease, locally known as "pants" or "heaves," which I saw in the swine piggeries attached to a slaughtering place, and at two butter factories.

*Post mortem* examinations revealed the pathogenic aspects of tuberculosis in several cases, in others the pathology was new and indefinite.

In order to investigate the subject, I arranged for a supply of diseased pigs. These were kept at Rodd Island, and, in conjunction with Mons. Lorr, a series of experiments were carried out during the year 1891.

We obtained at different intervals twelve diseased pigs. The symptoms of illness were noted, *post mortem* examinations made, and inoculations carried out on twelve guinea-pigs and seventeen rabbits.

On 16th June, 1891 (3242), a preliminary report by Mons. Lorr and myself expresses uncertainty as to the existence of tuberculosis, and suggesting the idea of a disease due to a specific bacillus.

On 5th December, 1891 (6712), being dissatisfied with the progress of the investigations, I reported on a pig that had been ill and under observation for a month, the *post mortem* examination giving pathogenic indications of tuberculosis. Specimens of the diseased parts were submitted by the Board of Health to Dr. John Gibson, of Windsor, for histological and microscopic examination.

On 12th January, 1892 (253), Dr. Gibson reported this case to be "tubercular broncho-pneumonia," and he suggested inoculations, he not knowing that experiments had been in progress for twelve months.

On 2nd April, 1892 (1675), I reported on experiments. Mons. Lorr having returned to France about Christmas, I determined to inoculate bovine tubercle virus, in order to compare the results with the disease "pants."

I experimented on two healthy pigs and two guinea-pigs, in every case being successful in producing tuberculosis.

The disease was confirmed by Mr. W. Scott, Veterinary Surgeon, 17th March, 1892 (2050), and by Dr. Gibson (see his report, dated 19th April, 1892).

On 9th February, 1892, I obtained specimens of disease lung and lymphatic glands, having the pathological lesions of tubercle from pigs slaughtered and condemned at the Abattoirs. These were submitted to Dr. Gibson for examination; also specimens from the tuberculous guinea-pigs.

From his report dated 29th March, 1892 (2,333), he found tubercle in each case.

During the year 1892, I lost no opportunity of gaining information about the diseases in swine, making *post mortem* examinations, and collecting morbid specimens from various localities, thus securing valuable material for further examinations; and, finally, this year, the Board of Health has secured the services of Mr. Charles J. Pound, a practical bacteriological laboratory assistant. He has enabled me to confirm my original diagnosis of the disease "pants," that it is of a tuberculous nature, and in some cases, identical with tuberculosis (coast cough) in cattle, and with phthisis or consumption in mankind.

We have also demonstrated that swine have another lung disease, with all the symptoms of "pants." This is much more fatal than tuberculosis, and may be named "contagious pneumonia of swine." It will be found fully described further on.

Mr. Pound has demonstrated, by histological preparations, tuberculosis in eleven cases, and successfully stained the bacilli in seven of these.

Contagious pneumonia he demonstrated in four cases, and the somewhat intractable bacteria are well illustrated in each.

The pneumonia specimens were obtained from different localities, namely, Enfield, Riverstone, and Jamberoo.

I have found both these diseases existing in the same herd, but I have not found the two diseases in the same pig.

#### *History of the Diseases and their distribution*

The disease "pants" has been known to swine dealers for the last thirty years. In 1889 I found contagious pneumonia at a piggery in the Mittagong district; it was very fatal, and *post mortem* examination revealed no tubercles, but extensive consolidation of the lungs.

In 1890 I saw both diseases at milk factories and slaughtering places on the South Coast.

In 1892 the Bodalla Company lost 60 per cent out of a herd of 222 Bega pigs from the "pants" (contagious pneumonia). Wet weather and travelling, perhaps, increased the mortality.

For Liverpool Asylum twenty-five pigs were purchased in May, 1892. Five days later, contagious pneumonia ("pants") broke out; deaths occurred twenty-four hours after being taken ill, others lingered for a week; altogether, seventeen died, and the rest were killed to prevent the spread of infection to the other piggeries.

During my inspection of the Metropolitan slaughtering-places in 1892, I found a few pigs affected with pants, on ten out of twenty-five slaughtering-places. The butchers always viewed it as a calamity, and believed it to be a necessary evil and

and a loss incident to the trade, quite beyond their control; they stated that it was usually fatal, but a few recovered; according to their accounts, the losses are very variable, and uncertain; this is easily understood, now that we know they may have been affected with tuberculosis, which is a slow going chronic disease, or they may have suffered from contagious pneumonia, a disease much more virulent, and speedily fatal.

I found both diseases in the large swine herds (where several hundreds of pigs are kept together) at Riverstone and at Enfield; also in the Hunter River District at Aberdeen. Contagious pneumonia was introduced in April, 1892, to the extensive piggeries there, by a herd of two hundred and forty pigs sent in lots from Sydney. The majority of these died in two or three weeks. The disease spread to the old stock of pigs, but was less fatal, 50 per cent died.

The losses were so heavy that at the Aberdeen works pig farming has been found unprofitable, and has been discontinued.

In order to allay unnecessary alarm by this report of disease in swine, I may mention that the inspection of pork at the Abattoirs during last year was energetically carried out, with the result that while many pigs have been condemned as unfit for food I wish it specially to be noted that on comparison the percentage of diseased pigs was only about half as high as that of cattle condemned, out of the total number of animals killed for food, as beef and pork.

#### *Remedial measures*

Now that the pathology of pants is known, and its virulent character understood, it is not difficult to deal with.

If contagious pneumonia breaks out, kill every panting and coughing pig at once, the first loss will be the least, so stamp it out.

If tuberculosis is in the herd, treat every panting and coughing pig the same, destroy them. A tuberculous pig never completely recovers, he is a source of dangerous infection to his fellows; the disease is hereditary, contagious, and incurable; he is useless to breed, and is condemned as pork, therefore there is only one remedy, stamp out the disease. By keeping a few convalescents about, the germs of the disease are disseminated, and the herd will never be sound. Burn or bury deeply the carcasses.

#### TUBERCULOSIS OR CONSUMPTION IN PIGS

Pigs are more susceptible to tuberculosis than cattle; it is usually found where large numbers of pigs are kept together; it is hereditary, and spreads by contagion, through the expectorations during attacks of coughing; it is readily communicated by inoculation, and more often assumes a chronic than an acute form, so that it is often noticed that a consumptive pig may continue coughing and panting for months, and even grow and get fat.

Tuberculosis is a nodular disease affecting the lungs, liver, glands, and internal organs; it is specially noticeable by little granules, called miliary tubercles on the serous membranes, in the lungs, and in the lymphatic glands. The miliary tubercles are very numerous, and often coalesce, forming nodules and nodular masses. These nodules press on the capillary blood vessels, so cut off nutrition, then caseation begins and abscesses form. These, in chronic cases, become cheesy and even calcareous.

In swine (also in cattle) we find the glands of the throat particularly liable to undergo degeneration, and form tubercular purulent abscesses, full of creamy matter, which very rarely escapes through the skin, in consequence of its density.

#### *Symptoms of tuberculosis*

These are subacute and intermittent, a chronic cough, that may last for weeks or months, the pig growing and feeding while the disease is slowly progressing. Both the cough and panting breathing are easily excited by exertion. The appetite is not often interfered with until the disease is firmly established. Then they cease to thrive, waste away, cough badly, have diarrhœa, sometimes paralysis, and then die.

#### *Pathology of tuberculosis*

The distribution and stage of development of the tubercular deposits will vary in every case examined. Sometimes they are very numerous and in others are scarce, and may even be found in one region or organ only.

Serous membranes lining the chest or the abdomen are frequently studded with gray and yellow miliary deposits.

Lungs are always affected, with either recently developed miliary tubercles, small suppurating nodules, or patches of consolidation, with points of abscesses, and occasionally with pleurisy and adhesion.

Lymphatic glands—bronchial, maxillary, mesenteric, &c.—are much swollen, with characteristic irregular surfaces, from projecting nodules, in some glands breaking down, becoming purulent, caseous, or calcareous.

Spleen is rarely much affected, only a few scattered nodules being found.

Kidneys—Tubercular deposits are rarely seen.

Liver—Usually contains a few scattered nodules. These are frequently purulent. In rare cases this organ is extensively tuberculous.

Cirrhosis is often seen in pigs.

Intestines—These are sometimes adherent from subacute peritonitis, associated with advanced mesenteric tubercles.

The mucous membrane is not often affected.

Koch's bacillus is demonstrated in swine tuberculosis, thus proving the true nature of the disease.

The pathological histology is described in Dr Gibson's report, dated 13th January, 1891.

See Appendix C

#### CONTAGIOUS PNEUMONIA.

Symptoms—These closely resemble tuberculosis, but this disease is much more rapid in its progress, and spreads through the herd. The pigs are more suddenly and severely ill, and die in from two to twenty days after taking the infection, the death rate being from 60 to 75 per cent.

As the disease is located in the lungs, the respiration is obstructed, causing the short panting breathing, from which the name "pants" has been derived. There is a painful cough, fever, excessive thirst, loss of appetite, weakness, inability to move about, finally, paralysis and death.

#### *Pathology.*

The macroscopical appearance of the lungs at first sight resembles pulmonary tuberculosis, the bronchial and other lymphatic glands, especially those of the cervical and maxillary region are usually involved, both pleuritic and peritoneal adhesions and effusions accompany this disease. The lungs show extensive consolidation or carnification. It commences in the apices, spreading throughout the smaller lobes, portions of both lungs are usually affected, and in fatal cases it involves nearly the whole of both lungs. There is more or less congestion in the sounder parts, the consolidated patches are somewhat nodular, carnified and gelatinous, the margins being clearly defined, but with very broken irregular outlines, the carnified parts being made up of clusters of solid lobuli. These are mapped out, giving a typical appearance; in colour pale greyish or yellow where caseous, with here and there a few densely congested deep red hepatized lobules; the interlobular septa are distinct as gray lines, bearing a striking miniature resemblance to contagious pleuro pneumonia in cattle.

There is a granular appearance (not unlike the miliary tubercles); these are the little points of abscesses occurring in the nodules, which undergo caseous degeneration comparatively early in this disease, but the little nodules are not diffused throughout the lung tissue, as is seen in the miliary stage of tuberculosis.

The affected parts are often, but not always, pleuritic, with recent adhesions to the ribs, and some effusion of fibrinous lymph. On section the lobules are seen distinctly marked out by the thickened septa, some are congested; many are solid, with infiltrated lymph; others are caseous, on looking closely minute minute vomicae are seen, and little abscesses are plentiful. On pressure a muco purulent material exudes, the small bronchial tubes are found obliterated, the larger bronchials are congested, and full of frothy mucus.

The bronchial glands are much swollen, spongy, and soft, from accumulated lymph cells; often undergoing caseous degeneration. The surfaces and contour of these glands are even and free from nodules, and, therefore, unlike tubercle.

The abdominal organs and serous membranes are free from granular or nodular growths.

*Pathological*

*Pathological Histology.*

By the Gram method, with carmine, and very patient manipulation, Mr. Pound has succeeded in demonstrating myriads of bacteria, shaped like grains of rice, single, and in short chains and very minute, invading the lung tissues, and most numerous in the early stages of the diseased processes.

These bacteria are probably the *materies morbi* of this disease, and their presence accounts for the army of leucocytes surrounding the nodules; the bacteria are very plentiful in the centre of the nodules, especially where they are becoming purulent (they resemble Fraenkel's pneumo-coccus). He also found the pus organism streptococcus pyogenes, and apparently also other organisms.

Sections stained show extensive areas of consolidation, due to excessive cell proliferation, accumulations of leucocytes, which readily retain carmine dye; whereas tubercle lung, examined by the same method, at the same time, similar cells, stain faintly, and are so pale as to be almost indistinct. These cells are in dense masses, invading the alveoli, dilating them, and by pressure reducing the walls, which are much atrophied and indistinct; these alveolar walls are very clearly seen in tubercle.

The interlobular septa are much thickened by increase of fibrous tissue. The leucocytes appear to squeeze the little bronchi out of shape, invade the submucous membrane, break up and destroy the columnar epithelium and crowd into the tubes and air vesicles.

Hæmorrhagic spots are well seen on the margins of the nodules. Vomicæ and minute abscesses are more frequent than in tubercle, and no centres of calcification nor any tubercle bacilli were found in the sections submitted to the Ziehl-Neelsen method of staining.

The lymphatic glands presented only slight changes, as cell proliferation, and it is interesting to note that no organisms were detected either by the Gram or the Ziehl-Neelsen methods, whereas in tubercular glands the tubercle bacilli were clearly defined.

The conclusion that the disease is contagious is founded on the history of outbreaks recorded, its rapidity of progress, and large mortality. It will be necessary to attempt the cultivation of the specific organisms and to inoculate subjects in order to place the matter beyond dispute. This, I anticipate, the Board of Health will sanction, in order to complete the subject. [This has since been accomplished.]

As a result of the investigations it is satisfactory to be able to state definitely that "pans in swine" is known to be two distinct diseases, tuberculosis and contagious pneumonia.

I would suggest that this disease, "contagious pneumonia in swine" be added to those schedules under the Diseases in Animals and Meat Acts, otherwise difficulty may arise in dealing with tuberculous swine or pigs with "pans."

I have, &c.,  
EDWD. STANLEY, F.R.C.V.S.,  
Government Veterinarian

E. Sager, Esq., Secretary, Board of Health.

## APPENDIX A.

*Re Swine Disease.*

Rodd Island, 16 June, 1891.

Sir, We have the honor of submitting this preliminary report of our experiments to determine the nature of a disease in swine known as the pans.

So far as regards the *post mortem* appearances of the pigs we apparently find always the same disease. By microscopical examination in a few cases we found bacilli which, by their staining reactions, are very similar to those of tuberculosis.

Besides this we nearly always find another small bacillus. By inoculation of animals and cultivation in artificial media, we have not had tuberculosis, but nearly always the same bacillus, which is easy to cultivate.

A pig ill with the disease and a healthy one were at the same time inoculated with Koch's tuberculine 0.01 c.c. each. They did not show any increase of temperature or any symptom of illness whatever during the thirty hours following the inoculation, the quantity injected in each case being the same as will cause reaction in a man affected with tuberculosis.

We have, &c.,  
A. LOIR.  
EDWD. STANLEY, G.V.

To the Secretary, Board of Health.

## APPENDIX B.

## Swine Disease.—Experiments at Rodd Island.

Department of Mines, 5 December, 1891.

Sir

I have the honor to report that yesterday we killed a pig (naturally) suffering with the disease.

He was from three to four months old, in good condition, had a frequent cough, and panting breathing; he has been under observation a month, the disease making very little progress; he fed well, and was growing.

*Post mortem.*—Sub maxillary lymphatic glands much swollen, and becoming caseous, the gland structure being infiltrated with pus. The lungs, especially the smaller lobes, were carnified and studded with nodules and abscesses. The body of the larger lobes was thickly studded by gray, small, tubercular-like nodules, but under the serous membrane.

The intestines were healthy, but the mesenteric glands were all more or less diseased.

The liver had characteristic gray patches, five or six from  $\frac{1}{2}$  inch to 1 inch in diameter, the tissue beneath being hard and infiltrated with blood. Spleen and kidneys were healthy.

I send herewith specimens of the diseased parts, hoping the Board will have them examined by a pathological histologist.

I am not at all satisfied with our knowledge of this disease up to the present time. M. Loir thinks it is a specific swine disease, due to a special microbe, but the microbe is intractable and uncertain. Even inoculation experiments give varying results, so that they cannot be relied upon.

The disease is not very fatal, and many affected will live, feed, and grow fat. It is very slow in progress when the animals are cared for, but if exposed and ill-fed they die sooner.

As to its being contagious, there can be no doubt; the majority appear to escape infection, but this would depend on local circumstances.

We intend to inoculate some healthy swine with bovine tubercle, and then compare the two diseased conditions.

With morbid specimens, sub-max. and mesenteric glands; portion of liver; portion of lungs.

I have, &c.,  
EDWD. STANLEY.

The Secretary, Board of Health.

## APPENDIX C.

REPORT on specimens of lung, liver, sub-maxillary, and mesenteric glands from a pig killed at Rodd Island, 4th December, 1891, suffering from the disease known as the "pans."

The specimens were all in spirit. They were treated in the ordinary manner, and cut on an ether-freezing microtome.

1. *Sections of Lung*.—The changes were of a subacute nature, and consisted in areas of condensed lung tissue, varying in size from a millet seed, or even smaller, up to nodules almost as large as a small pea. The larger nodules were made up of a number of smaller ones, united together by catarrhal and a certain amount of interstitial pneumonia. Areas of commencing caseation, surrounded by a small amount of fibrous tissue, were scattered through the larger nodules; and in some of the smaller nodules the same change was seen.\* There were a few giant cells, but these were, for the most part, ill-developed.

When the nodules were sub pleural the pleura was occasionally thickened over them, not, however, so markedly as it usually is in such cases. The smaller nodules were frequently in relation to one of the smaller bronchioles; and one could

\* Calcification was observed in one nodule in one section.

could see in transverse section the centre of the nodule occupied by the bronchiole filled with catarrhal products, and surrounded by an area of small round cells, outside which there was frequently commencing catarrhal pneumonia. Others of the miliary nodules were more directly in relation to the lymphatics of the lung, and these resembled somewhat closely the ordinary miliary tubercle in the human lung.

There was well marked bronchitis, numbers of the bronchi being filled with pus cells and catarrhal products which, in the case of many of the larger ones, became detached during the processes of cutting and mounting.

Several of the pulmonary vessels were congested.

Sections were stained in Ziehl-Neelsen's stain, and according to the Ehrlich-Weigert method for tubercle bacilli. Typical tubercle bacilli were found, but very few in number and irregularly scattered. Many of the miliary nodules contained one or more bacilli. Some of the larger nodules were found to contain a few also; but very careful search was required in order to detect them.

Other stains were used for the purpose of demonstrating ordinary bacilli. With the exception of a few micro-cocci, no definite micro-organisms apart from the tubercle bacilli were discovered.

The specimen is therefore one of tubercular broncho-pneumonia.

2. *Sections of submaxillary gland* :—Extensive calcareous change, involving a considerable portion of the section of the gland. Very little normal gland structure remaining, its place being taken by fibro-cellular tissue, in which were numerous giant cells often arranged in groups in different parts of the section. Tubercle bacilli, varying very much in size, but quite typical, were present throughout the section. As a rule the bacilli were isolated. In slide 11b, forwarded herewith, however, within the circle of ink which I have marked very imperfectly at one angle of the section, careful examination will reveal a large colony of tubercle bacilli arranged around a small blood vessel, and passing into the neighbouring tissue. Some were in giant cells in other parts of the section.

3. *Sections of mesenteric gland* :—Changes very similar to those affecting the submaxillary gland, and not requiring any separate description. Tubercle bacilli present in considerable numbers.

4. *Sections of liver* :—On examining with the naked eye, the cut surface of a piece of liver which had been preserved in spirit, it was at once observed that one portion differed very considerably from the rest. It was fairly well defined and seemed darker in colour and more fibrous than the other part of the cut surface. Indeed, it resembled a portion of a cirrhotic human liver with several localised apparently lobular-hæmorrhagic spots superadded. The microscopic appearances were of a complex nature.

It will be convenient to describe the changes in the diseased area under the following divisions :—

1st. *Changes in the fibrous tissue* :—As is well known, the lobules of the liver in the case of the pig are completely surrounded by fibrous tissue, which is of course more abundant in the so-called portal canals where it supports the branches of the vena portæ, hepatic artery, and bile ducts. The individual lobules are therefore more sharply defined than is the case in the human liver. In this specimen there was very considerable increase in the amount of the fibrous tissue; this increase being due to a fibro-cellular hyperplasia with numerous small bile ducts embedded in it. The increase was not uniform throughout the diseased area, but was more marked in some places than in others. It involved not merely the portal canals, but the interlobular fibrous tissue as well. The hyperplastic tissue invaded some of the lobules as well as surrounded them, thus causing a gradual involvement, and finally entire disappearance of the lobule, its place being taken by the fibro-cellular tissue. So far the condition corresponds to what is known as ordinary or coarse cirrhosis of the liver—localised. But careful examination of this new interstitial tissue reveals in places the presence of minute rounded nodules consisting of small round cells—tubercle follicles in an early stage. These follicles were comparatively few in number.

Throughout the rest of the section the fibrous tissue was either quite normal, or at most a little more cellular in places.

*Changes in the blood vessels* :—Many of the branches of the vena portæ were congested. The walls of some of the branches of the hepatic artery seemed hypertrophied. The central or intralobular veins were dilated in the affected area, and the capillaries opening into them were likewise markedly dilated, and many of them were filled with blood. The sublobular veins were also congested. But the most marked change was noted in connection with some of the central lobular venous branches and the capillaries opening into them. The appearances varied from a small central lobular congestion of these vessels, with or without a minute capillary hæmorrhage, up to a condition in which the greater part of a lobule was occupied by a hæmorrhage. As a rule the hæmorrhage started at the central part of a lobule, and was confined to the lobule in which it originated. Occasionally, however, one or two adjacent lobular hæmorrhages appeared to run together. The contents of the hæmorrhages differed in different cases, some consisting of coagulated fibrin with very few blood corpuscles; others of coloured and colourless corpuscles in normal proportions without fibrin filaments; and others of both fibrin and corpuscles in varying proportions. Some had become transformed into masses of small cells, with a delicate capsule of young fibrous tissue into small abscesses in fact. Around many of these hæmorrhages there was observed an attempt at the formation of a fibrous tissue capsule. The hæmorrhages varied in size and number, and were easily recognised by the naked eye.

*Third changes in the liver cells and bile ducts* :—In the affected lobules, the liver cells were compressed and atrophied from pressure by the dilated capillaries. Where hæmorrhages existed the liver cells were destroyed in the area occupied by the hæmorrhage. Some of the bile ducts showed evidence of slight catarrh.

It is possible that the hæmorrhagic changes above described may be the initial stages of an ordinary cavernous angioma of the liver, but they do not exhibit the typical structure which we are wont to associate with angiomata. Further specimens, in a more advanced stage, are required for examination before this can be definitely settled. At present, it is difficult to account for their presence in this specimen, except on the supposition that they are due to obstruction of some sort, in some of the branches of the hepatic veins.

Tubercle bacilli were found in some of the tubercle follicles previously described. To sum up, there can be no doubt of the tubercular nature of the change in the lung, the submaxillary and mesenteric glands in this case. As regards inoculation experiments, might I suggest that guinea pigs be inoculated with large quantities of fresh material from a recent case, and doubtless they would develop tuberculosis.

Windsor, 12th January, 1892.

JOHN GIBSON, M.D.

#### APPENDIX D.

##### TUBERCLE IN SWINE.

Sir,

Sydney, 2 April, 1892.

In connection with the experiment being carried on at Rodd Island, I have the honor to report that I purchased, on 22nd November, 1891, three healthy store pigs, then about two months old; they were kept under observation, and grew rapidly, and with every indication of perfect health.

On 28th January I secured some bovine tubercle, crushed it into a pulp with distilled water, and then injected a large quantity of the fluid (about 50 mms.) into the abdomen of one pig, and subcutaneously the same quantity on the thigh of the other pig.

No. 3 pig was kept as a control.

The object of the experiment was to be able to compare the pathological lesions of experimentally induced tuberculosis with the swine disease called "pant."

From the date of inoculation until death, both the pigs appeared to continue in good health; small tubercles formed at the seat of inoculation in each case; they did not increase in size after the fourth week; the pigs grew, and put on flesh and fat quite as rapidly as the control pig (all three lived together).

There was no cough or increased breathing or any indication whatever of any sickness.

On 30th March, sixty-two days after inoculation, they were killed.

The carcasses were well nourished, and quite fat.

Post

*Post mortem.*

Thorax, no effusion in the cavities, or adhesions; both lungs were studded with gray miliary tubercles, with here and there a yellow spot of degenerating tubercle; submaxillary glands were caseous, much enlarged, and tuberculous; omentum, was normal and very fat; spleen, excepting one suppurating nodule, was normal; kidneys, quite normal; liver, tunic healthy, several small abscesses underneath, like suppurating tubercles; mesentery, normal; large intestine, gray miliary spots in the mucous membrane; peritoneum, normal, no serosity in abdominal cavity; glands, femoral, gastric, submaxillary, and mediastinal were invaded by caseous tubercles.

In both pigs the lesions were very similar.

I send sections of lung, liver, spleen, glands, and intestine in absolute alcohol for microscopic preparations if necessary.

There was no carnification of the lungs, or serosity in cavities; two conditions very frequently met with in the "pants."

The control pig was killed and examined at the same time, and would seem to have contracted the disease by cohabitation. Although only very slightly affected, there was enlargement and commencing caseation of the submaxillary gland, one caseous nodule in the lungs, one in the liver, and one in the spleen; in every other part the organs were healthy.

I inoculated at the same time guinea pigs Nos. 31 and 32; both became very tuberculous. Specimens of their organs were sent to you on 3rd March in bottle marked C.

I have, &c.,  
EDWD. STANLEY, F.R.C.V.S.,  
Government Veterinarian.

To the Secretary, Board of Health.

## APPENDIX E.

Subject:—"Post mortem examination on guinea-pig at Rodd Island."

Sir,

V. Barracks, 16 March, 1892,

I have the honor to inform you that I have this day visited Rodd Island, and made a *post mortem* examination on a guinea-pig, which died on the 14th instant.

The organs were more or less in a state of decomposition, which prevented a satisfactory examination.

The lungs were studded with minute yellow nodules, similar to those seen in bovine tuberculosis, only smaller.

Slight subcutaneous effusion existed in the seat of inoculation, inside of thigh.

None of the other organs presented any of the lesions peculiar to tuberculosis.

Yours, &c.,

WILLIAM SCOTT, M.R.C.V.S.

To the Secretary, Board of Health.

## APPENDIX F.

Report on specimens received from the Board of Health, 5th March, 1892.

1. *Specimen A.*—Lymphatic gland from a pig condemned at the Abattoirs for tubercle, 9th February, 1892.

Sections of the gland exhibited extensive calcareous degeneration, which caused considerable damage to the edge of the razor. Microscopically, the greater part of the gland tissue was transformed into nodules of tubercle, varying in size, some of which had coalesced to form larger nodules. The centre of most of the nodules was calcareous. No giant cells were seen. Tubercle bacilli, in considerable numbers, were present near the margin of the nodules, and in the gland tissue generally. [See slides A1, hæmatoxyline stain, and A2, Ziehl-Neelsen stain.]

2. *Specimen B.*—Lymphatic gland from a pig condemned at the Abattoirs, 22nd February, 1892.

This specimen was also highly calcareous. The tubercle nodules resembled very closely those in specimen A, and do not require any separate description. Tubercle bacilli present in varying numbers, in the nodules, and in the lymphatic spaces throughout the gland. [See slides B1, hæmatoxyline stain, and B2 Ziehl-Neelsen stain.]

3. *Specimen C.*—Spleen, lymphatic glands, liver, and lung from a guinea-pig thirty days after inoculation with bovine tubercle pulp, 1st March, 1892.

(a.) *Spleen.*—Several nodules, scattered through the surface of the section, apparently in relation to the malpighian corpuscles of the spleen. Stained for tubercle bacilli. These nodules contained numbers of bacilli, arranged singly, and in rosette-shaped groups. Isolated tubercle bacilli were found scattered through the splenic pulp. [See slide C1, stained by Ziehl-Neelsen method.]

(b.) *Lymphatic Glands.*—Sections of these showed caseous centre, with caseous tubercular nodules outside. Tubercle bacilli in large numbers, and in all stages of development, were seen. [See slide C2, Ziehl-Neelsen stain.]

(c.) *Liver.*—A few minute nodules, composed chiefly of groups of small round cells, and occupying for the most part the portal spaces of the liver were observed. These were evidently early tubercles, because in one or two there were attempts at giant cell formation, and tubercle bacilli were present, although few in number, and chiefly occupying the interior of the so-called "wandering" cell. [See slide C3.]

(d.) *Lung.*—In the piece of lung examined there was almost no appearance of tubercle formation proper. There was very considerable small cell-thickening of the inter-alveolar septa, and marked congestion of some of the pulmonary vessels, along with small hæmorrhages. In one or two places there were collections of small round cells, in all probability early tubercle follicle formation. Some of the bronchioles contained catarrhal products. Very few tubercle bacilli were found. [See slide C4, hæmatoxyline stain, and C5, Ziehl-Neelsen stain.]

Windsor, 29th March, 1892.

JOHN GIBSON.

Report on Specimens received from the Board of Health, 5th April, 1892.

The specimens were labelled, "Tubercle in swine, two months after inoculation with bovine tubercle, 31/3/92." There were portions of lung, liver, spleen, glands, and large intestine.

*Lung.*

To the naked eye there were numbers of nodules, of firm consistence, scattered over the pleural surface of the lung, and, on section, the cut surface also contained nodules. These nodules varied considerably in size, some being about the size of ordinary miliary tubercles, others being larger. There was marked congestion of parts of the lung tissue. Under the microscope the larger nodules were seen to be formed by the union of two or more smaller ones, which latter were in turn made up of two or more so-called "tubercle follicles." Outside the larger nodules there was a variable amount of collapsed lung tissue, the seat of catarrhal pneumonia. Some of the nodules were calcareous in the centre. No typical "giant cells" were observed. Certain of the nodules were found along the line of the lymphatics, both pleural and peribronchial, &c. Very few bronchioles contained any catarrhal products, and the absence of marked bronchial catarrh constitutes the most important distinction between these sections and those from "pants," reported on 12th January last. This distinction, however, is doubtless due to the difference in the paths by which the tubercle bacilli gained access to the lung tissue. [See Report on "pants," 12th January.]

After staining with Ziehl-Neelsen's solution, tubercle bacilli were found, but not in large numbers, careful search being required to detect them.

See slide 1, stained by picro-carmin, in which near the apex a transverse section of one bronchiole may be seen filled with catarrhal products; and also slide 2, Ziehl-Neelsen stain, with tubercle bacilli.

*Liver.*

*Liver.*

Slide 3 is intended to be used as a naked-eye specimen. It is mounted, unstained, in Canada balsam; and it will be noted that there are sections of two nodules at one angle of the preparation, these nodules being about the size of small peas. One is empty, the contents having dropped out; the other contains a caseous-looking material, which has been partly cleared up by the alcohol and oil of cloves used in mounting. The nodules are bounded by a delicate fibrous wall. Marked congestion of the branches of the vena portæ may easily be seen.

Microscopically.—Apart from the presence of the above-mentioned nodules, and the congestion of branches of the portal vein, very little of pathological importance was observed. The liver cells in proximity to the nodules were compressed and atrophied. Throughout the rest of the section they were granular and somewhat fatty. Some of the central hepatic venules were filled with blood. There was no increase in the interlobular connective tissue, nor any tubercle formation in the portal spaces in other parts of the section. In thin sections the greater part of the caseous contents of the above-mentioned nodules fell out during the processes of cutting and mounting. Here and there, however, small portions remained adherent to the wall. The wall itself consisted of fibrous tissue, and in some of the preparations sections of bile ducts and hepatic vessels were found in it, showing that the nodules had originated in the portal spaces. A few tubercle bacilli were observed in the caseous parts. It seemed as if the tubercle bacilli had been carried along the portal vein, and had set up a tubercular change in the walls of two of its branches, resulting in the formation of two tubercular abscesses. [See slides 4 and 5, the latter stained with Ziehl-Neelsen's solution for tubercle bacilli.]

*Spleen.*

In the spleen there was one caseous nodule, similar in size and appearance to those in the liver. One or two small tubercle follicles were scattered through the section. The malpighian corpuscles were prominent, and in several of them granules of golden-yellow pigment were present. Very few tubercle bacilli could be seen. [See slide 6, from near the margin of the large caseous nodule, stained with Ziehl-Neelsen's solution.]

*Lymphatic Glands.*

There were two sets of glands, but one description will serve for both, as the changes were almost exactly the same in each. The glands were highly tubercular. The central part of several of the tubercular nodules was calcareous. One or two attempts at "giant cell" formation were noted. Tubercle bacilli were found chiefly in proximity to the calcareous portions. In some parts they were fairly numerous; in others almost none were to be seen. [See slides 7, Ziehl-Neelsen stain, and 8, picro-carmine stain.]

*Large Intestine.*

A few small follicular ulcers were observed. There were increased numbers of small round cells between Liel-erküline's crypts, and the ordinary lymphoid nodules present in the submucous coat appeared more cellular than normal. I stained for tubercle bacilli, but failed to discover any. Slide 9, stained with hæmatoxyline, shows the follicular small, cell proliferation, and two lymphoid nodules.

Windsor, 19th April, 1892.

JOHN GIBSON, M.D.

Sir,

Board of Health Office, 127, Macquarie-street, Sydney 15 June, 1892.

I have the honor of submitting this summary of the experiments carried on in order to ascertain the nature of the disease known as pants or heaves in swine.

Several diseased pigs were procured from the coast district; at various times, six of these were killed, and *post-mortem* examinations were made by M. Loir and myself; in each case he made cover-glass preparations from the diseased parts, and carefully examined them for the bacillus of tubercle; in only two cases he considered he was successful, these were on May 25th, the other on December 4th. Diseased portions from the last pig were sent to Dr. Gibson, and he reported finding tubercle bacilli in prepared sections. [See his report, 253, 1892.]

To assist the investigation a total number of nine guinea pigs and sixteen rabbits were inoculated with pulp juice, obtained by crushing pieces of the diseased glands or lungs in sterilized broth or distilled water, with the result that not one single animal developed tubercles, all of them died very early, *i.e.*, within a very few days, not early enough for septicæmia, but too early for tubercles to develop.

M. Loir attributed the deaths to a special microbe, as the prevailing *post-mortem* appearances were serosities in large quantities in the serous cavities. M. Loir left the colonies to visit Europe about Christmas. Not feeling satisfied with the results so far obtained, I determined to inoculate two healthy pigs and two healthy guinea pigs with bovine tubercular virus, so as to study and compare the microscopical appearances.

I procured bovine material "perlschut" from the abattoirs and inoculated them. They all developed general tuberculosis (see report 1,675/92), with which specimens of diseased parts were furnished for Dr. Gibson's examination. His report of April 5 confirmed the nature of the disease. Tubercles were distinctly developed in several organs, and in other points bore no resemblance to the disease pants.

Subsequently a pig was condemned at the abattoirs with the maxillary glands in a tuberculous condition. Pieces were pulped with distilled water, with which I inoculated two guinea pigs and three rabbits. The rabbits all died the next day; one guinea pig died eight days later. Mr. Scott, V.S., made a *post-mortem* examination, and reported tubercular deposits in various organs. The other guinea pig lived on, slowly developing tuberculosis, and was killed seventy days after inoculation; *post-mortem* revealed general tuberculosis. I send herewith pieces of the lung and gland for Dr. Gibson's examination, as these are the first and only cases of producing tuberculosis by inoculation with swine virus.

I am of opinion that the swine have two distinct diseases—one tuberculosis, the other being a specific form of catarrhal pneumonia, often associated with pleurisy. I am confirmed in this opinion by the results of the inoculations, and by having quite recently discovered very minute bacteria in immense numbers in the lung tissue of a pig I had killed at Riverstone suffering from pants.

This microbe may by cultivation, &c., prove to be Fraenkel's pneumo-coccus, or it may be the specific microbe of this disease.

I have no doubt tuberculosis exists in swine, but up to the present proof is very scanty but not less important.

The subject is of great interest, and I sincerely hope that arrangements may be made to continue the investigation.

I have, &c.,

EDWD. STANLEY, F.R.C.V.S.,

Government Veterinarian.

E. Sager, Esq., Secretary, Board of Health.

Sir,

Board of Health Offices, 127, Macquarie-street, Sydney, 5 February, 1893.

I have the honor to report that Mr. Pound has completed the examination and preparation of microscopic specimens, from morbid specimens taken by me from sixteen different pigs.

Mr. Pound has been most persevering and successful, finding the bacteria difficult to stain. He has prepared over a hundred specimens, giving a complete histological insight into the diseases; and in five cases of contagious pneumonia—three from Enfield, two from Jamberoo—he has again demonstrated, what I think is the specific bacteria of that disease, in three out of five cases; the first time we found it in Riverstone pigs.

In

In eleven cases he has demonstrated tubercle histologically, and in seven the bacillus of tubercle is found.

In no case was he able to find both the organisms in the same subject, proving that we have two distinct diseases affecting the lungs and glands of swine—tuberculosis and contagious pneumonia.

It would be interesting to try isolation and cultivation of the contagious pneumonia bacterium (as the experiments carried on by M. Loir failed to convey the disease by inoculation), in order to demonstrate the contagion.

E. Sager, Esq., Secretary, Board of Health.

I have, &c.,  
EDWD. STANLEY, G.V.

CONTAGIOUS PNEUMONIA IN SWINE—Concluding experiments.

Sir,

Board of Health Offices, 127, Macquarie-street, Sydney, 11 July, 1893.

In connection with my report on this disease in swine, dated 18th February last, wherein it was stated that the contagious pneumonia was probably due to a specific micro-organism, I have now the honor to report, that the organism has been isolated from the lungs of diseased pigs, and successfully cultivated by Mr. Pound, in the Board's laboratory, and carried through several generations.

The disease has been induced experimentally by inoculating healthy guinea-pigs, and also common black-pigs of the Berkshire breed. The pathogenic results being identical with the original disease, which has already been described in detail in my former report. Only a few animals have been experimented on, but with such satisfactory results, that the *materies morbi* of the disease is clearly demonstrated.

In order to explain briefly what has been done, I have appended two tables of experiments, to which I beg to refer you. We found that guinea-pigs possess a considerable immunity to the invasion of this disease. Of the seventeen experimented on, five were immune, eight were successfully inoculated, and four died under the operation. Whereas the eight Berkshire pigs inoculated, every one took the disease, no matter at what point of the body it was introduced, or what the state of the virus, *i.e.*, whether natural or cultivated artificially. The fever in them was very decided and fluctuating, the temperature ranged as high as 106° and 107° (the normal being 102.5°). The respirations increased ranging from thirty-five to forty-five, the normal being ten or twelve per minute. In every case the pathological changes were located in the thorax, and they were typical of contagious pneumonia. In these experiments Kochs' postulates as to the microbic nature of the disease have been strictly and completely carried out. The pigs lost flesh and ceased to grow, although feeding well all the time, and no doubt some would have regained convalescence, although the pathological changes in the diseased parts of the lung tissues would prohibit complete recovery. The slow progress of the disease was, no doubt, favoured by the liberal treatment and repose enjoyed by the animals while under observation. The fatality observed in epidemics is, no doubt, increased by unfavourable circumstances, such as bad food, bad shelter, and the general ill usage to which these animals are commonly subjected. The experiments are by no means exhaustive. The question as to contagion from subject to subject, by feeding, or by cohabitation, or the susceptibility or immunity of other animals to the contagion, have yet to be determined. And a disease similar to this is said by German authorities to be communicable to birds, pigeons, and fowls. In this Colony there are epidemic outbreaks of disease in poultry where pigs are kept, the nature of which is unknown. These are interesting points that must remain unsolved for the present. This disease, contagious pneumonia in swine, somewhat resembles the Schweineseuche, or German Swine Plague. It is quite possible that it is a modification of that disease imported into the Colony several years ago.

Now that the restrictions which wisely prohibited the importation of swine from foreign countries have been removed, and the ports of the colonies are thrown open, it is most likely that other contagious swine diseases will be introduced, such as have in the past and are still causing immense losses both in Europe and in America. It seems, therefore, advisable to have legislative power to deal with outbreaks of disease that already exist or that may arise.

This disease, swine pneumonia, has since been scheduled as a disease under the Contagious Diseases in Animals Act.

Mr. Pound's report on his work with the micro-organism of this disease, which he has been good enough to illustrate with sketches of the microbes, and also of the diseased parts, I append hereto, and I have to thank him for the great interest he has taken in bringing this investigation to a satisfactory conclusion.

I have, &c.,

EDWD. STANLEY, F.R.C.V.S.,  
Government Veterinarian.

E. Sager, Esq., Secretary, Board of Health.

No. 1.

TABLE to illustrate a series of experiments with disease of Swine, Contagious Pneumonia.

Sir,

Board of Health Offices, 127, Macquarie-street, Sydney, 12 July, 1893.

I have the honor to submit to you a report on further observations into the Etiology of Contagious Pneumonia in Swine.

A pig on arrival from the Camden district at one of the metropolitan saleyards was found to be suffering from the disease, and was subsequently killed for experimental purposes by the Government Veterinarian.

In the morbid tissues of this animal I was fortunate enough to not only identify the specific micro-organisms microscopically, but succeeded in isolating and cultivating them artificially on various nutrient media.

The cultivations were carried on through several successive generations, from gelatine to agar agar, then to bouillon and back again to agar agar, and so on through a considerable number of tubes, after which followed a series of experiments on guinea-pigs and swine, carried out with Mr. Stanley, in order to determine their virulence and pathogenic nature.

While these experiments were in progress I took the opportunity of studying some of the morphological and biological characters of the organism.

The disease was transmissible to guinea-pigs which were inoculated with the virus obtained from the lung of an infected pig, and the specific bacteria found on examination and again cultivated.

A cultivation of the tenth generation from a guinea-pig was used for inoculating healthy swine, all of which contracted the disease.

From every experimental animal that was killed or died after successful inoculation I made inoculations on nutrient gelatine, agar agar, and broth; but although the cultures were occasionally contaminated, I could always obtain a pure cultivation of the specific organism by the employment of the plate culture method.

No matter where an animal had been inoculated, either the thigh, shoulder, or in the thorax, the disease always became more or less confined to the lungs. The anterior or ventral lobes are first attacked, then the inflammatory process gradually proceeds down the principal lobes.

The naked eye appearances of the lungs in an acute case are shown in an appended drawing. The lobules in the ventral lobe have a decided livery aspect, while the principal lobe has a beautiful mapping out appearance, brought about by increased thickening of the interlobular connective tissue, whereby the lobules, which vary considerably in shade and colour become very distinct. Occasionally a lobule very much consolidated and dark in colour, is seen surrounded by apparently normal looking tissue.

In very advanced cases the bronchial, submaxillary, and inguinal glands were much enlarged, and in one or two cases were commencing to suppurate.

On cutting across the lungs in the acute stage a considerable quantity of sanguinous frothy matter exuded from the bronchi, which in a more chronic form of the disease was replaced by a gelatinous muco-purulent matter.

In microscopic sections of the lung in the early stage we find the alveoli and bronchioles greatly distended with inflammatory products, there is also frequent extravasation of blood, giving rise to hæmorrhagic infarcts, due to overdistension of the alveoli surrounding the blood vessels, with masses of leucocytes and fibrinous matter.

The interlobular connective tissue is greatly thickened and filled with clear lymphoid matter, which gives the mapping out appearance so frequently seen on post-mortem examination.

As the disease advances the bronchi become engorged with cells, which, with the epithelium lining the walls, are seen to be in various stages of disintegration. Frequently portions of the walls of the bronchi are so broken up that the contents are in direct communication to the surrounding tissues.

By making a series of microscopic sections or cover-glass preparations from diseased tissues in the acute stage, and staining after Loeffler's method, or by any of the aniline dyes usually employed, it is frequently only with prolonged examination with an immersion lens that one comes across even a few bacteria that can be regarded as presumably the specific forms, but, on introducing a scraping or a little of the exudation from the alveolar tissue into a tube of agar agar or bouillon, their presence is invariably detected after a few hours' incubation at 35° centigrade.

The reason they are so difficult to demonstrate in microscopic sections, apart from their sparse distribution throughout the tissues, is because they are like such organisms as glanders, typhoid and chicken cholera bacteria only a single stain can be used, for both tissue and organisms, consequently they are almost obscured by their taking the stain only very faintly, while the tissue cells, especially the nuclei, stain intensely.

In chronic forms of the disease other organisms are frequently met with, viz., the *Staphylococcus pyogenes aureus*, *Streptococcus pyogenes*, and other bacteria more or less of a pyogenic nature.

It is quite evident that these septic organisms play an important secondary part in this disease by considerably hastening its progress.

Their

Their presence in the air, soil, and water has been frequently confirmed by numerous observers, therefore whenever they gain access to any suitable media they readily commence to grow.

In the case of contagious pneumonia in swine certain tissues have been seriously impaired by the previous introduction of a specific bacterium. The general depression of vitality of such morbid tissues render a nidus admirably suited to the requirements of these pyogenic organisms. Having once gained admittance and obtained a foothold in such a pabulum provided with food moisture and a perfect incubating temperature, in fact, everything favourable for the reproduction of their species, they immediately produce their deleterious effects.

By their rapid multiplication and growth, accompanied by the formation of toxic products, they produce morbid changes in the adjacent tissues characterised by caseation and necrosis. These necrosed areas gradually increase in size until they coalesce and form large abscesses, which may break down and suppurate, ultimately giving rise to pleuritis and pericarditis, which usually terminates in the death of the animal.

Sections from these necrosed parts of the lung, stained with alum carmine and Gram's method, present a very beautiful and instructive specimen both for high and low power objectives. The line of demarcation between the hepatized and necrosed parts are distinctly brought out by a barrier of leucocytes, the nuclei of which are stained a much deeper red than other parts of the section, while the blue colour of the Gram's stain selects the pyogenic organisms which are seen in extraordinary large numbers scattered throughout the dead tissue. In cover-glass preparations stained by the same method, and examined under an immersion lense, the micrococci are seen in chains and groups.

Cultivations made from these necrosed areas show only very few of the specific organisms, more frequently none at all, while the pyogenic organisms are found in enormous numbers.

The reason for the absence of pneumo-bacteria can only be accounted for by their being strictly aerobic, viz., their inability to thrive without oxygen, of which in such morbid tissues there can only be a very small amount. On the other hand the staphylococcus aureus and streptococcus pyogenes are really facultative aerobic organisms, and, in consequence, these dead tissues afford a nidus as well adapted to their requirements as the surface of an agar agar plate in the laboratory where they have free access to a plentiful supply of oxygen.

#### *Morphology and Biology.*

There is a striking resemblance between the pneumo-bacteria in swine disease and the microbe of chicken cholera, both in the appearances on cultivating media and in stained preparations examined under the microscope, although by constant and careful observations I have been able to detect several minute differences.

They stain readily with any of the aniline colours usually employed, but for minute details Kühne's carbolised methylene blue is to be preferred. They do not retain their colour when treated by Gram's method.

Both in animal tissues and on various culture media they are found to vary very much in size. In cover-glass preparations, stained with Kühne's blue, they appear mostly as very short rods with parallel sides and distinctly rounded ends. As a rule the extremities or poles of each individual rod are stained more deeply than the central portion, which varies in size in different organisms. These clear spaces in some preparations examined only under a moderate magnifying power might be easily mistaken for spores.

In size they are more often twice as long as broad, but occasionally several are seen where the length exceeds ten times the breadth. These filamentous forms stain very uneven, in some the colour is intense at one end, and gradually disappears at the other end; others again may be uniformly stained, but only slightly, or may have a granular appearance; the outlines of these larger organisms is also very irregular, which gives the idea of their being involution forms. Being aerobic they naturally require a plentiful supply of oxygen; should, however, this be in any way limited, their growth is correspondingly retarded.

Moisture is also necessary to keep up the vitality, for I find that cultures kept in the laboratory for several weeks, and allowed to become dry, could not be resuscitated on making subcultures in fresh nutrient media.

I have kept several hanging drop cultivations under constant observation for some time at various temperatures, but failed to recognise anything like endogenous spore formation.

Reproduction takes place by fission only; division takes place in a direction at right angles to the longitudinal axis. Under favourable conditions a single rod will grow to twice its normal length, then a constriction in the middle of this lengthened rod, and finally complete division whereby the two daughter cells become detached; sometimes, however, this process of cell division is incomplete, hence one finds several rods held together in the form of short chains.

They are non-motile, nothing beyond the Brownian movement can be observed when examined in the living condition suspended in drop of bouillon.

Cultivations in various stages of growth are quite inodorous, nor is there any perceptible formation of gas.

The growth on 10 per cent. nutrient gelatine at 18°-20° centigrade is very slow, and forms a delicate white or greyish layer, but does not cause liquifaction. Upon gelatine plates the colonies are first seen after several days, as small white points. When examined under the microscope each colony has a light brown colour; the colony gradually increases until it attains the size of a hemp seed, having a decided shining convex surface and circumscribed margin. At this stage further development ceases, due, no doubt, to the nutrient media losing its moisture by evaporation.

Upon the surface of 2 per cent. nutrient agar agar after twenty-four hours incubation at 35s C. the growth is very marked, forming an elevated mass, which, however, does not spread far beyond the line of inoculation. In bouillon a slight cloudiness is formed, which does not become very dense.

No appreciable growth takes place on potatoes. A peculiar feature is exhibited in cultures of several days' growth on oblique gelatine when examined under the microscope with a 24 m m objective and 12 com. oc. (see plate 9) running out at right angles to the needle track are extremely minute delicate stria, which closely resembles the tracheal system in insects. This peculiar appearance has not been noted in cultures of the chicken cholera bacterium or allied varieties.

An interesting point to be noted is the striking similarity between the specific micro-organism in contagious pneumonia of swine and the bacteria which are associated with such diseases as swine fever in England, swine plague in America, wildseuche and schweineseuche in Germany, also rabbit septicæmia and chicken cholera.

Although the micro-organisms in these diseases have apparently the same morphological characters, considerable difference of opinion exists among the various observers who have directed special attention in studying their life history. Some regard them as varieties of a certain genus, while others are inclined to believe them as practically identical.

The slight individual differences observed under the microscope, and the variations noticed on cultivating media, may be attributed to the previous conditions of environment in different species of animals, such as susceptibility, peculiarity of the soil, and variations in temperature.

In concluding this report, it must be admitted that our knowledge is still very incomplete, but nevertheless, enough has been gained to enable us to judge what are the essential factors which come into play in the production of this disease. That the specific pneumo-bacteria are absolutely necessary for the production of acute contagious pneumonia in swine there can no longer be any doubt, but at the same time, as previously mentioned, considerable importance is attached to the presence and action of the pyogenic bacteria as secondary factors in the more chronic forms of the disease.

Edmund Sager, Esq., Secretary, Board of Health.

I have, &c.,

C. J. POUND.

1894.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

TYPHOID FEVER IN SYDNEY AND SUBURBS.

(FROM 1876 TO 1893.)

AND CERTAIN PARTICULARS RESPECTING OTHER INFECTIOUS DISEASES, VIZ.: MEASLES, SCARLET FEVER, AND DIPHTHERIA.

*Ordered by the Legislative Assembly to be printed, 11 April, 1894.*

The Secretary to the Board of Health to The Principal Under Secretary.

Sir, Board of Health Office, 127, Macquarie-street, Sydney, 22 March, 1894.

I have the honor, by direction of the Board of Health, to forward you the enclosed paper on the occurrence of Typhoid Fever and the mortality therefrom in the City of Sydney and Suburbs during the last eighteen years, and certain particulars respecting other infectious diseases, prepared from the records in this office for the information of the Chief Secretary.

I have, &c.,  
EDMUND SAGER,  
Secretary.

[*Enclosure.*]

Typhoid Fever in the City of Sydney and its Suburbs from 1876 to 1893, and certain particulars respecting other Infectious Diseases.

THE accompanying returns, made up to 31st December last, contain some interesting facts about the prevalence of and mortality from typhoid fever in the city and suburbs of Sydney during the last eighteen years, and of the number of deaths from scarlet fever, measles, and diphtheria, and the admission to the hospitals of patients suffering from these diseases in the past twelve months.

Return I gives the number of deaths from typhoid in each month of the ten years ending 31st December, 1885, together with the ratio calculated per 100,000 of the population, as estimated on the 30th June in each year. From this it will be seen that during the decennial period—1876 to 1885—there was a very large increase in the mortality from this disease, viz., from 46·07 per 100,000 in 1876 to 102·17 in 1885.

Return II furnishes similar information for 1886 to 1893. From this it will be seen that the mortality from typhoid fever has of late undergone considerable diminution, having gradually decreased from 90·90 per 100,000 in 1886 to 18·01 for 1893, which is by far the lowest for any of the eighteen years now under review.

Return III shows the number of cases of typhoid fever admitted to the metropolitan hospitals of Sydney, and of the number of deaths from this disease in such institutions during the eight years from 1886 to 1893. From these figures it will be seen that during 1893, 236 cases were admitted, and that thirty of these cases terminated fatally, making a death-rate of 12·71 per cent. on the admissions, this being lower than the death-rate in the three preceding years.

Return IV supplies particulars as to the localities from which the patients treated in the metropolitan hospitals in 1893 were removed, and as to the ratio of cases for each 10,000 of the inhabitants of the districts in question. From this return it will be seen that the total cases admitted from the metropolis was 232, or 5·57 per 10,000 of the population, as against 212 cases, or 5·40 per 10,000, for the year 1892.

Return V shows the deaths which took place in the hospitals among the cases mentioned in the previous table; in this it has not been deemed necessary to calculate the ratio per 10,000.

Return VI gives certain particulars respecting the prevalence of measles, scarlet fever, and diphtheria. Owing to the prevalence of epidemics in Sydney, the admissions to hospital of persons suffering from measles and scarlet fever were very considerably increased; 311 cases of the former, of which 281 were treated at the Coast Hospital, were admitted in 1893, as against 2 in the previous year, and 217 of scarlet fever, of which 202 cases were treated at the Coast Hospital, were admitted in 1893, as against 45 in 1892.

Thirteen deaths from measles occurred among the 311 cases admitted to hospital, being equal to a death-rate of 4·18 per cent.; the deaths registered in the Metropolitan District from the same disease, excluding deaths occurring in hospital, was 388, and assuming that the rate of mortality of cases treated in their homes was the same as that of the cases treated in hospital, it is estimated that there must have been some 9,000 or 10,000 persons attacked with measles in the Metropolitan District during the epidemic in 1893. Most probably the numbers were much larger, as only those cases which suffered from the disease in a more or less severe form were removed to hospital, and consequently it may be expected that the death-rate among such cases was higher than among those who were treated at their own homes.

Seventeen deaths occurred among the 217 cases of scarlet fever removed to hospital, or at the rate of 7·83 per cent., and an estimate formed on the same basis as previously stated, shows that at least some 2,000 persons must have been attacked with scarlet fever in the Metropolitan District during the epidemic of 1893.

The suffering and misery caused by these two epidemics, happening as they did at the same time, cannot be estimated, and it is to be regretted that owing to the absence of an Act for the compulsory notification and registration of infectious diseases this Board had not sufficient power to deal with the epidemics. There can be no doubt that had some of the earlier cases been reported, and proper means taken for their isolation, many lives might have been saved.

The Board have frequently drawn attention to the great need for this measure, which has now been in operation for several years in England, and indeed feel that they are almost powerless in protecting the health of the community against outbreaks of infectious disease without legislation of this character, for the spread of the disease can only be checked in the earlier stages, and then with comparative ease if immediate information is given of the occurrence of the first cases, and action can thus be taken to prevent infection.

By order,

EDMUND SAGER,

Secretary to the Board of Health.

Sydney, 21 March, 1894.

## APPENDIX.

### RETURN I.

#### Typhoid Fever—1876 to 1885.

RETURN showing the number of Deaths from Typhoid Fever in the City of Sydney and its Suburbs for each month of the years 1876 to 1885—giving the death-rate per 100,000 for each month.

1894.

NEW SOUTH WALES.

## SYDNEY HOSPITAL.

(BY-LAWS.)

Presented to Parliament pursuant to sec. 10 of the Sydney Hospital Act of 1881.

Chief Secretary's Office,  
Sydney, 2nd April, 1894.

## SYDNEY HOSPITAL—BY-LAWS.

THE following By-laws, made by the Board of Directors of the Sydney Hospital, under the 10th section of the "Sydney Hospital Act of 1881," having been approved by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the above-cited Act.

GEORGE R. DIBBS.

*By-laws revised and approved by Board of Directors,  
24th April, 1893.*

## ESTABLISHMENT, PLAN, AND OBJECTS.

THE aid afforded by the Institution known as the "Sydney Dispensary" having been found inadequate to the growing wants and necessities of the sick poor of the City of Sydney, and it having been determined that its usefulness should be extended by the formation of a General Hospital in connection with it: it was resolved in the month of July, 1845, "That the abovenamed Institution should be reconstructed under the name of the 'Sydney Infirmary and Dispensary,' and that the sum of £1,200, then invested in Government debentures and in the Savings' Bank, be invested in the name of the Trustees, in some eligible security as a permanent endowment, the interest of which should be applied to the general purposes of the Institution, and which should be known by the name of 'The Dispensary Endowment Fund.'" Subsequently, in accordance with arrangements made with the Government, the Institution received a grant of the land on which the Hospital stands, and was incorporated on 15th November, 1881, under the name of the Sydney Hospital.

BY-LAWS made in pursuance of the provisions of the Sydney Hospital Act.

## Plan and Objects.

1. The Sydney Hospital combines in its plan and objects the following purposes—

Firstly. A Hospital for In-patients afflicted with acute diseases, whereby medical and surgical advice and medicines are gratuitously administered to such persons as are unable to procure the same at their own expense, and are recommended by the Governors of the Institution.

Secondly. A Hospital for indigent In-patients received by order of the Government, and for whose support provision shall be made by the Legislature, according to their actual cost to the Institution.

Thirdly. For the reception, so far as it shall not interfere with the primary object of the Institution, viz., the relief of the really necessitous, of patients suffering from acute diseases, who may be able by themselves, their friends, or employers, to pay such sum per day as the Board may from time to time appoint.

Fourthly. For the reception of accidents and urgent cases, at all hours of the day or night, without a recommendation—subject to payment by those who are able to pay.

Fifthly. Departments for providing advice and medicines to indigent out-patients.

Sixthly. A Clinical School for the instruction of Students in medicine, surgery, &c.

Seventhly. The training of Nurses for attendance on the sick.

## COMMON SEAL.

2. The Common Seal of the Corporation shall be kept at the Hospital in a box, having two different locks; one key shall be kept by the President, and the other by the Treasurer or some Honorary Officer or Director specially appointed by the Board for that purpose.

3. The Common Seal shall not be affixed to any deed, instrument, or writing, except by the order of the Board of Directors at a meeting duly constituted, and for which meeting notice to make such order has been given.

## QUALIFICATIONS AND PRIVILEGES OF GOVERNORS AND SUBSCRIBERS.

## Life Governor.

4. Every benefactor of £50 or upwards at any one time, or within twelve months, becomes a Life Governor.

## Nomination of Life Governor through a bequest.

5. Every person making to the Institution a bequest of £100 or upward may nominate a Life Governor; in the event of no such nomination being made, any one of the Executors named in the will appointed by the Board shall be entitled to the privilege of a Life Governor.

## Clergymen to become Life Governors.

6. The Minister of any congregation contributing within the period of two years by one or more collections £50 or upwards shall be a Life Governor.

## Nomination of Life Governors by Public Companies.

7. Any Society or Public Company subscribing £50 or upwards in one sum may nominate a Life Governor.

## Governor.

8. Every annual subscriber of £2 or more becomes a Governor so long as the subscription is continued.

## Governors of £2 one patient.

9. Governors contributing £2 annually, and Life Governors, shall have the privilege of recommending one patient to the Hospital during the year.

## Governors of £5 three patients—£10 six patients.

10. Governors subscribing £5 annually shall have the power of recommending three patients to the Hospital during the same period. Governors subscribing £10 may recommend six patients.

## One patient always in.

11. Governors subscribing £30 or upwards annually shall have the privilege of having one patient always in the Hospital, provided there be a vacant bed.

## Governors Dispensary patients.

12. Governors and Life Governors shall also have the privilege of recommending six patients to the Out-door Department annually.

## Subscribers Dispensary patients.

13. Subscribers of £1 shall have the power of annually recommending six patients; those of ten shillings three patients; and those of five shillings one patient to the Out-door Department.

## Directors, &amp;c., elected by Governors and Subscribers.

14. Governors and Subscribers shall, at the Annual or a Special General Meeting, elect the President, Vice-Presidents, Treasurer, and Directors, as hereinafter provided.

## Proportion of votes.

15. Governors and Subscribers shall be entitled to vote in the manner following, viz.:—An Annual Contributor of £1 to have one vote; of £2, two votes; of £5 and upwards, three votes; Life Governors three votes, such votes being cumulative.

## New Governors, &amp;c., unable to vote.

16. No Governor or Subscriber shall be entitled to vote in any election who has not been a contributor for at least one month preceding, but Life Governors shall be at once entitled to every privilege.

## When interested cannot vote.

17. No Governor or Subscriber shall vote on any point wherein he is personally interested.

## Votes by proxy.

18. Governors and Subscribers may at the Annual or any Special General Meeting and at all balloting Meetings vote by proxy.

## Privileges of firms and associations.

19. Every firm, partnership, or association of persons combined for the purpose of subscribing to the funds of the Hospital, may exercise the privileges already described, through some one member of the firm, partnership, or association, to be named in writing by themselves.

## Privileges of absent Governors.

20. Any Governor being absent from the Colony may, by power of attorney containing the necessary powers, exercise all the privileges to which he would be entitled if personally present; but such power of attorney shall be exhibited to the Board of Directors for record.

## Subscriptions payable in advance.

21. The annual subscriptions shall be payable in advance for the current year, commencing on the first of January; and no Governor or Subscriber shall be entitled to any qualification or privilege whose subscription shall be more than six months in arrear.

## Paid officers, &amp;c., no privileges as Governors.

22. No salaried officer, pupil, or servant of the Institution, subscribing thereto, shall have any of the privileges of a Governor or Subscriber.

## BENEFACTORS.

## Names of Benefactors to be painted on a board.

23. The names of the Benefactors who may have subscribed or bequeathed £50 and upwards in one sum to the Institution shall be annually printed and circulated with the Report of the Institution, and shall be painted on a board to be placed in some conspicuous part of the building. All Clergymen collecting contributions in one year to the amount of £50 shall be included in the list of Benefactors, whose names shall be annually printed, and painted on the board.

## CONSTITUTION AND MANAGEMENT.

## Management.

24. The management of the Institution shall be entrusted to the Board of Directors, which shall meet monthly; and the Board from its own body shall appoint in the manner herein-after provided at the earliest possible period, after each Annual General Meeting, a House Committee, a Building and Repair Committee, Finance Committee, and such other committees as may from time to time be necessary, with such powers, privileges, provisions, and conditions as may be required for the due discharge of their purposes, and to carry out the objects of the Hospital. The President, Vice-Presidents, and Treasurer of the Hospital shall be ex officio members of the committees so appointed by the Board.

## Election to be determined by ballot.

25. Candidates for election to the office of Director must be Governors of the Institution; and in the event of more candidates for the office of Director being nominated than there are vacancies, their election shall be determined by ballot, at a special meeting, on a day to be fixed at the Annual General Meeting.

## Qualifications of candidates.

26. The qualifications of persons offering themselves as candidates shall be examined at a meeting of the Board, and at the time of nomination the written consent of the candidates shall be handed to the Chairman.

## Supervision of ballot.

27. The Board shall appoint five or more Governors to superintend the ballot, not less than three of whom must be constantly present during its progress, and three Governors must be present at its close to determine the result.

## Voting at ballot.

28. All persons entitled to ballot may tender their votes in person, or by proxy in the following form:—

"I hereby authorise \_\_\_\_\_, a Governor of the  
Sydney Hospital to ballot for me at the election  
for \_\_\_\_\_, to take place  
on \_\_\_\_\_

(Signed.) \_\_\_\_\_

Vote disputed.

29. In case of any objection being made to a vote tendered either in person or by proxy, the question shall be referred to the Scrutineers, and the decision of a majority of them shall be final. In case of persons acting under power of attorney, the submission of such power, as already provided, shall be sufficient authority for permission to vote.

## Temporary vacancy.

30. The Board shall have the power temporarily to supply any vacancy until a General Meeting, if they shall think it indispensable to do so.

## GENERAL MANAGEMENT.

## Board Meetings.

31. The Board shall meet monthly or oftener, as occasion may require, on such day and at such hour as they may appoint, with power to adjourn from time to time—six to be a quorum.

## Chairman.

32. The President, or in his absence, one of the Vice-Presidents, shall preside at all meetings; and in case of their absence the majority of those present shall appoint their own Chairman.

## Retirement of Directors.

33. Four of the Directors appointed to the Board by election of the Subscribers and Governors shall retire annually, the retiring members shall be those who have attended the fewest meetings during the year, and where a doubt shall exist as to the Directors to retire, the Board shall determine the matter by lot; but such retiring members shall be eligible for re-election.

34. Any Director who shall absent himself from the meetings of the Board without leave, for a period of four consecutive months, shall, ipso facto, cease to be a member and his office shall be declared vacant.

## General Management—Appointment of Paid Officer?—Bills, &amp;c.—Repair of Premises.

35. The Board of Directors shall have the General Management of the affairs of the Institution, with full power to appoint, remove, or dismiss all Officers of the Institution, and other or others to appoint; to examine and discharge tradesmen's bills after approval by the House Committee; they shall attend to the state of repair of the premises, carry into effect the directions of General Meetings, and attend generally to all matters affecting the welfare and interests of the Institution.

## Other Committees.

36. The Board may also appoint such other Committees as may, from time to time, be desirable to carry out the objects of the Institution.

Notice of Meetings.

37. Notice of all the Board meetings shall be sent to each of the Directors, which notice shall state any business of a special nature to be brought forward.

Special Meetings.

38. A Special Meeting shall be summoned at the desire of the President, or, in his absence, one of the Vice-Presidents, or of any five Directors; the earliest possible notice thereof, stating the cause of the Meeting, shall be sent to each Director.

Questions how decided.

39. Every question may be decided by the majority present—the Chairman having also a casting vote, when the numbers are equal.

Minute Books.

40. No person, except the Secretary, Chairman, or other authorised person, shall enter anything in the Minute Books, and all interlineations or erasures in the fair Minute Book, shall be noticed by the Chairman, who shall insert his initials in the margin opposite such interlineations or erasure when he signs the book.

Directors not to supply anything.

41. No Director shall be at liberty to perform any service for, or to enter into any contract with, the Institution, or to supply any article for its use, for which he may receive pecuniary compensation.

Directors when interested not to vote.

42. No Director shall act as Chairman, or vote at any Board or Committee Meeting while or when any question relating to his own conduct or individual interest shall be discussed or decided.

Diet of Patients.

43. The Board, under the advice of the Honorary Medical Staff, shall regulate the diet of the patients.

Appointment of Officers—Duties defined.

44. The following Officers, Honorary Medical Officers, Honorary Assistant Medical Officers, Medical Superintendent, Resident Medical Officers, Matron, and Secretary, shall be appointed by the Board only. The other paid officers and servants may be appointed by the House Committee.

General inspection.

45. There shall be a general inspection of the Institution by the Board, on the Board days in the months of January, April, July, and October; and a report of the different inspections shall be entered in a book provided and kept for that purpose.

Access to the books.

46. Any Director shall have access to the books of the Institution during business hours.

Speakers to address the Chairman.

47. At all meetings of the Board and Committees every Governor in speaking shall address the Chairman.

Chairman to decide questions of order.

48. The Chairman shall, at all meetings of the Board or Committees, decide upon every question of order, but if two Directors offer to speak at the same time, the Chairman shall direct which of them shall proceed, and any Governor speaking to order shall be heard first.

House Committee minutes to be read at Board meetings.

49. The minutes of the House Committee shall be read at each Board meeting. The minutes of any Sub-committee shall be read at the request of any three Directors then present.

HOUSE COMMITTEE.

House Committee.

50. The House Committee shall consist of not more than seven members, to be elected by the Board as already provided, and shall meet once in each week on such day and such hour as they may appoint for that purpose, with power to adjourn from time to time—four to form a quorum.

Chairman of House Committee.

51. The House Committee shall, immediately after their appointment, elect their own Chairman; and in his absence any other member of the Committee may be appointed Chairman for the then present meeting.

Regulation of departments.

52. The House Committee shall regulate the several departments of the Institution, and conduct and manage its affairs in every respect, subject only to the control of the Board.

Sub-committees.

53. The House Committee shall have power to appoint Sub-committees for special purposes, a report founded on whose proceedings, and signed by the Chairman, shall, if deemed necessary, be made and entered on the minutes of the House Committee.

Dismissal, suspension, and appointment of officers.

54. The House Committee may, upon sufficient cause, dismiss any salaried officers and servants not appointed by the Board, and may suspend any salaried officer until the decision of the Board can be obtained, with the power in the meantime of appointing a person properly qualified to officiate in the room of the person so suspended.

Resolutions to be carried into effect.

55. The resolutions of the House Committee relative to the ordinary business of the Institution shall be carried into execution without waiting for the confirmation of a subsequent House Committee.

Order of business.

56. The ordinary business of the meetings of the House Committee, according to the Chairman's business paper, shall be completed before any new matter be gone into.

Payment of accounts.

57. The House Committee shall, after due examination of the accounts, recommend them to the Board for payment; but in cases of emergency may direct the immediate payment of any account, such payment to be reported at the ensuing meeting of the Board.

Contracts.

58. The House Committee shall make all contracts for supplying the Institution with provisions and other stores; and all contracts shall be made after public advertisement, subject to the approval of the Board of Directors.

Security.

59. Security shall be required for the performance of all such contracts.

Repairs.

60. The House Committee shall or may order all repairs or alterations that may be considered necessary, which, if of an important nature, shall be carried out through the Building Committee.

Repairs, &c., exceeding £50.

61. No buildings, repairs, or alterations which shall exceed in expense fifty pounds, shall be carried into execution without the approval of the Board, with the exception of such matters as shall be referred to the Permanent Structure Committee.

PERMANENT STRUCTURE COMMITTEE.

Appointment.—Quorum.—Chairman.

62. Until the Hospital building now in course of erection is completed, a Committee, consisting of the ex officio members and seven Directors, to be elected at the first meeting after the Annual General Meeting, shall constitute the Permanent Structure Committee, three to form a quorum. The Committee shall, at its first meeting, elect a Chairman for the ensuing year.

Powers of Committee.—Monthly report.

63. The Committee shall take all the necessary steps connected with the erection of the new Hospital building, but shall submit through their Chairman a progress report at each monthly meeting of the Board.

BUILDING AND REPAIR COMMITTEE.

Appointment.

64. The Building Committee to be appointed by the Board shall consist of five members, three of whom shall form a quorum. They shall at their first meeting elect a Chairman for the ensuing year.

Superintendence of Works, &c.

65. They shall have the superintendence and control of all buildings, works, machinery, and apparatus; and shall have power to order repairs and to give such instructions as may be necessary to prevent loss or damage, or by the delay of which, until the next meeting of the Board, any inconvenience might be caused.

Chairman alone.

66. In cases of emergency, the Chairman in conjunction with the Architect, or the Chairman alone, shall have power to give such directions as shall be deemed requisite.

Inspection of Old Materials.

67. They shall also, once in every year at least, inspect the stock of old materials, and cause such articles as they shall consider no longer required for service to be sold, and the proceeds thereof paid to the Treasurer.

FINANCE COMMITTEE.

68. The Finance Committee, to be appointed by the Board of Directors, shall consist of five Members, three of whom shall form a quorum. They shall at their first meeting elect a Chairman for the ensuing year.

Examination of Accounts.

69. The Committee shall examine all accounts and report them for payment once a month, or oftener; such accounts having been first passed by the Secretary as agreeable to the term of the contracts. Should any difficulty arise in passing an account, it shall be referred to the determination of the next meeting of the House Committee.

## Receipts and vouchers.

70. The Committee shall examine the receipts and vouchers and compare them with the payments made by the Treasurer.

## Quarterly examination of accounts.

71. The Committee shall quarterly examine the accounts of the Treasurer and of the several Bankers, in order to ascertain and certify whether the income and receipts of the Institution have been duly paid in; and shall annually report to the Board the amounts received and sums due to the Institution, under their respective heads.

## HONORARY TREASURER.

72. The Honorary Treasurer shall call for payment of all moneys due by annual subscribers and others, and shall keep regular accounts thereof, wherein the names of Subscribers, Donors, and Testators shall be entered, as well as the sums of money respectively given by them, and the purposes for which the same shall have been subscribed, given, or bequeathed.

## Money placed in Banks.—Payments by cheque.

73. He shall, immediately on receipt thereof, place the funds in such one or more of the Sydney banks as the Board may from time to time appoint, in the name of the Sydney Hospital, and all payments ordered by the Board or House Committee shall be made only by cheque or cheques, signed by the Treasurer, President, or one of the Vice-Presidents, and countersigned by the Secretary.

## Accounts or salaries.

74. He shall not pay accounts or salaries other than those provided for in By-law 73, until the same shall have been submitted to the Board for inspection, and shall have been approved and signed by the Chairman, and he shall take legal vouchers for all moneys paid by him.

## Quarterly and yearly balance.

75. He shall make up a quarterly statement of his accounts, to be laid before the Board at their monthly meetings in May, August, and November; and he shall also make up yearly a statement of his accounts, as on the thirty-first day of December, charging himself with the whole of the money he has received during the year, taking credit for all he has paid away, and showing the exact balance; which account shall be examined, compared with the vouchers, and certified by the Auditors appointed by the Board for that purpose and laid before the Annual General Meeting, together with an approximate balance sheet showing the assets and liabilities of the Hospital as on 31st December.

76. The Honorary Treasurer, upon his acceptance of office, shall ascertain that the respective amounts standing in the various public funds and securities, as entered in the books, are correct, and he shall report to the House Committee the correctness thereof as soon after his appointment as possible.

## SECRETARY.

77. The Secretary shall attend all meetings of the Board, House, and other Committees, read and take minutes of all proceedings thereat, and carry into effect all orders of the Board and Sub-Committees.

## HONORARY CONSULTING MEDICAL OFFICERS.

78. There shall be as many Honorary Consulting Physicians and Honorary Consulting Surgeons as may be from time to time appointed by the Board, who shall give their advice and assistance when required by the Honorary Medical Officers.

## Qualification.

79. They shall be selected from those who have served the Institution as Honorary Medical Officers for a period of not less than twelve years.

## Vacation of office.

80. In the event of any Honorary Consulting Medical Officer being re-elected as an Honorary Medical Officer, he shall, ipso facto, cease to be an Honorary Consulting Medical Officer.

## HONORARY MEDICAL OFFICERS.

81. The Board shall from time to time determine the number and designation of members of the Honorary Medical Staff.

## Appointment and Qualification Hon. Physicians.

82. All Physicians and Assistant Physicians must be graduates in medicine of the University of Sydney, or of some University recognised by the University of Sydney, or be members of the Faculty of Medicine of the University of Sydney.

## Appointment and Qualification of Hon. Surgeons.

83. All Surgeons and Assistant Surgeons must possess a degree in surgery, or a diploma in surgery, from the University of Sydney, or from some University or College of Surgeons recognised by the University of Sydney, or be members of the Faculty of Medicine of the University of Sydney.

## Qualification.

84. No one shall be eligible as an Honorary Medical Officer, unless he shall produce a certificate of registration from the New South Wales Medical Board.

## Lectures and Instruction to Nurses.

85. All Honorary and Resident Medical Officers shall give such instruction to the Medical Students and Nursing Staff as may be directed by the Board of Directors.

## Period of service.

86. The Honorary Physicians and Honorary Surgeons shall be appointed for a period of four years, but one Physician and one Surgeon shall retire every year, the Physician and Surgeon retiring being those who have served four years, or, in case of death, resignation, or removal, the person or persons who may have been chosen to succeed them. The Honorary Ophthalmic Medical Officers shall retire alternately each second year, but shall be eligible for re-election.

## MEDICAL BOARD.

## Formation of Medical Board.

87. The Honorary Consulting Physicians and Surgeons, the Honorary Physicians and Surgeons, and the Honorary Assistant Physicians and Surgeons, shall form a Medical Board, the Honorary Secretary of which shall be elected annually.

## Meetings of Medical Board.

88. The Medical Board shall meet once in every month, within seven days previous to the monthly meeting of the Board. They shall consider medical, surgical, and hygienic subjects connected with the Hospital, and forward their recommendations in writing through their Secretary.

## NURSING STAFF.

## Nursing and Training Staff.

89. There shall be a Nursing Staff, which shall be under the control of the Medical Superintendent and of the Matron, who shall possess certificates of having been duly trained and qualified for her position.

## GENERAL MEETINGS.

## When held.

90. The Annual General Meeting of the Governors and subscribers of the Institution shall be held on a day appointed by the Board in the month of January or February, when the business shall be transacted in the following order:—

## Order of business sheet.

1. The Annual Report of the Board relative to the operations and general state of the Institution to be read.
2. An abstract statement of the income and expenditure for the past year, duly audited, to be received.
3. Communications from the Board or from the Officers to be received.
4. Election of the President, two Vice-Presidents, and Honorary Treasurer.
5. Election of Governors to fill vacancies in the Board.
6. Business of which notice has been given.

## How summoned.

91. All General Meetings shall be called by advertisement, and none shall be deemed duly constituted unless fifteen Governors be present.

## Lapse of Meeting for want of a quorum.

92. In case a sufficient number of Governors to constitute a meeting should not have assembled at thirty minutes after the time appointed for a General Meeting, it shall lapse, but another meeting for the same purpose shall be called within one month, in which case the existing Directors and Officers shall remain in office until their successors be appointed.

## Special General Meetings.

93. A Special General Meeting shall be called whenever ordered by the Board, or whenever a requisition to that effect, signed by not less than fifteen Governors, stating the propositions to be submitted, shall be presented to the Secretary. The cause of such meeting shall be specified, and not less than seven days' notice given—if practicable.

## Circulation of Report.

94. The Report, as adopted, shall be printed for circulation, with an alphabetical list of the Governors and subscribers.

## AUDITORS.

## Appointment.

95. At the Board Meeting to be held in December of each year three Governors shall be appointed Auditors, two of whom must sign the balance sheet.

## All vouchers to be furnished.

96. At their first meeting for examination of the yearly accounts, the Treasurer shall lay before them a written statement of his receipts and payments for the year preceding, together with an account of all funds and moneys belonging to the Institution, and furnish from time to time such vouchers and information relative thereto as may be required by them.

## Balance sheet.

97. They shall, with the assistance of the Treasurer, prepare and lay before the Board, in the month of January or February in every year, a statement of the receipts and expenditure up to the last day of December immediately preceding.

## HOUSE VISITORS.

## Appointment and Duties.

98. The House Visitors, to be appointed by and from the Board, shall, in rotation, visit the Institution with full power to examine into every part of it, and of the Medical School.

## Report to House Committee.

99. They shall keep a register of such occurrences as may be deemed of sufficient importance; and, on the next succeeding meeting of the House Committee, shall make a written report of the same, with such suggestions as they may judge expedient.

## FUNDS OF THE INSTITUTION.

## Interest only available.

100. All Legacies, Donations, or Subscriptions of £100 and upwards, unless specially directed, shall be invested in Public Stocks, Government, City or Real Securities, in the names of the President, Vice-Presidents, and Honorary Treasurer.

## Sale of Stocks.

101. No part of the property of the Institution which now is, or any time hereafter may be, so invested, shall be sold out or disposed of except upon an order of the Board (specially summoned), and signed by six Directors at least present at such Board.

## Expenses how defrayed.

102. The expenses shall be defrayed as much as possible from the Annual Subscriptions, Dividends, and Interest of the funded and other property, and income of the Institution.

## SAMARITAN FUND.

## Formation of Fund.

103. The unclaimed moneys of all deceased patients shall, at the discretion of the Board, be paid into the Savings Bank, or otherwise invested to form a fund to be called the Samaritan Fund.

## To be kept distinct.

104. This fund shall be kept entirely distinct from the General Funds of the Institution.

## Treasurer.

105. The Treasurer of the Institution for the time being shall be the Treasurer of this Fund.

## Object.

106. The sole object of this Charity shall be the relief of patients on leaving the Institution, recommended by or through any one of the Honorary Medical Officers, House Visitors, Honorary Treasurer, or Secretary.

## Relief how distributed.

107. Such recommendations to be presented to the House Committee, with whom shall rest the power of determining the merit of the petitioners and of distributing the funds of the Charity.

## Objects of this Charity.

108. The funds of the Charity shall be devoted to the following purposes:—

- For forwarding poor patients to their homes.
- For the relief of poor patients by giving them the means of subsistence for a few days after their discharge.
- For the temporary assistance of poor convalescent patients requiring further medical aid as out-patients, on leaving the Institution.

## Urgent cases.

109. In extreme or urgent cases, the Honorary Treasurer or the Secretary may authorise assistance from this Fund.

Passed at a Special Meeting of the Board of Directors of the Sydney Hospital, this 16th day of March, 1894.

JOHN POPE,  
Chairman.

1894.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

ADULTERATED LIQUORS NOW OR RECENTLY IN BOND.

(RETURN RESPECTING.)

*Ordered by the Legislative Assembly to be printed, 31 May, 1894.*

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated 23rd May, 1894, That there be laid upon the Table of this House,—

“Copies of all papers relating to adulterated liquors now or recently in  
“bond.”

No. 1.

Mr. Inspector Lenthall to Mr. Superintendent Read.

Sir,

Central Police Station, 8 March, 1893.

With reference to the attached report of the analysis of liquors collected by myself and submitted to the Government Analyst, I beg to report that of late I have only taken samples from places where I have first been informed that inferior liquors have been sold. I have since 1882 taken from all descriptions of places and localities in the Metropolitan District over 400 samples. In only one case did the analytical result justify a prosecution, when the defendant was fined £20 and costs. As will be seen by Mr. Hamlet's report, the liquors are only of low quality.

When whisky and brandy can be purchased in bond as low as 2s. and 3s. a gallon, nothing but an inferior liquor can be expected. The high duty of 14s. tempts the publican to buy the inferior and most unwholesome article—a new, raw, crude spirit, most intoxicating and stupefying. As I have before remarked, no publican can, considering the rents, trade expences, and the heavy duty, sell a glass of good spirit for less than 6d.; but the general charge is only 3d.

By

413—

[770 copies—Approximate Cost of Printing (labour and material), £5 12s. 3d.]

By letter dated 19th September, 1884, I recommend, "that if any alteration in the Licensing Acts was contemplated, it should be extended to the very root of the supply by not allowing liquors to be passed out of bond into the market until they were certified to be fit for consumption."

I repeat my recommendation, and the certificate should not only be chemical, but also from a trade expert. A chemical examination shows that the liquors contain certain ingredients, and are of a certain alcoholic strength. So the analysis of tea will show that it contains certain proportions of theine, tannin, fibre, &c., but it does not show what the quality is from a commercial point of view, which a professional tea-taster would tell at once. With spirits a trade expert would utterly condemn liquors in which the analyst could find nothing deleterious.

These low-class spirits are, without doubt, the cause of nearly all the drunkenness among the lower classes. Men stupefied with liquor are never seen about the clubs and first-class hotels, whose frequenters often drink double as much first-class liquor as many an unfortunate drunkard who gets the rubbish and afterwards appears at the Police Court.

I believe that in Victoria large quantities of tea have been condemned and refused admission as unfit for human consumption. If such a procedure is necessary for tea, how much more is it with such ardent liquor as spirits?

The examination of liquors, and the certificates thereof, should be made a charge upon the importer, so that it could be made, not a charge upon, but a profit to the revenue.

I have, &c.,

W. E. LENTHALL, Inspector,  
District Inspector, Metropolitan District.

[Enclosure.]

Government Laboratory, Sydney, 7 March, 1893.

REPORT respecting samples of Spirituous Liquors received from Inspector Lenthall.

| Liquor.          | Percentage of absolute alcohol (by weight.) | Degrees under or overproof. | Liquors.            | Percentage of absolute alcohol (by weight.) | Degrees under or overproof. |
|------------------|---|-----------------------------|---------------------|---|-----------------------------|
| 1. Rum .....     | 33·85                                       | 29 U.                       | 13. Rum .....       | 27·45                                       | 41 U.                       |
| 2. Whisky .....  | 44·10                                       | 9 U.                        | 14. Brandy .....    | 38·30                                       | 21 U.                       |
| 3. Brandy .....  | 44·30                                       | 9 U.                        | 15. Whisky .....    | 42·15                                       | 13 U.                       |
| 4. Whisky .....  | 37·30                                       | 22 U.                       | 16. Rum .....       | 35·20                                       | 28 U.                       |
| 5. Rum .....     | 31·35                                       | 34 U.                       | 17. Port Wine ..... | 12·75                                       | .....                       |
| 6. " .....       | 31·00                                       | 34 U.                       | 18. Brandy .....    | 28·60                                       | 39 U.                       |
| 7. Whisky .....  | 33·70                                       | 29 U.                       | 19. Whisky .....    | 30·50                                       | 36 U.                       |
| 8. Rum .....     | 32·30                                       | 32 U.                       | 20. Brandy .....    | 37·85                                       | 21 U.                       |
| 9. Brandy .....  | 24·50                                       | 48 U.                       | 21. Whisky .....    | 38·65                                       | 19 U.                       |
| 10. Whisky ..... | 32·70                                       | 31 U.                       | 22. Rum .....       | 32·15                                       | 32 U.                       |
| 11. " .....      | 27·80                                       | 41 U.                       | 23. Whisky .....    | 31·55                                       | 33 U.                       |
| 12. Brandy ..... | 29·70                                       | 37 U.                       | 24. Brandy .....    | 35·20                                       | 26 U.                       |

All these samples have been examined for the various poisonous and deleterious substances mentioned in section 89 of the Licensing Act, and for methylated spirit with negative results. They contain the usual traces of fusel oil and metals, and are generally of inferior quality.

The Inspector-General of Police.

WILLIAM M. HAMLET,  
Government Analyst.

Forwarded to the Inspector-General of Police. I am unable to concur in Mr. Lenthall's opinion, that the substitution generally of a better quality of spirits than those which are now retailed in public-houses would have the effect of diminishing drunkenness, but I think it should be ascertained whether liquor of the crude quality recently analysed by Mr. Hamlet is injurious to the public health. If so, some legislation in the matter would appear to be necessary. A large number of the persons arrested for drunkenness drink nothing but colonial beer.—G. READ, Superintendent, 9/3/93.

Forwarded for the perusal of the Minister of Justice. No doubt the common, cheap, and coarse spirits, largely consumed, are highly deleterious, especially white spirit illicitly distilled, but legislation would be difficult.—EDMUND FOSBERY, Inspector-General of Police, 9/3/93. The Under Secretary, Department of Justice. Submitted.—A.C.F., 14/3/93.

No. 2.

Mr. Inspector Lenthall to Mr. Superintendent Read.

Sir,

Central Police Office, 24 March, 1893.

I took, on the 17th instant, from Circular Quay Bond, a sample of 25 quarter casks of brandy consigned to J. L. Simon, of 36 Pitt-street, the value of which is declared at the Custom-house to be 1s. 9d. per gallon.

I submitted the sample to Mr. Hamlet for analysis, and to-day he informs me that the liquor is not brandy, and contains "an ingredient injurious to health."

To enable me to prosecute and prove, under section 89 of the Licensing Act, that Mr. Simon keeps this liquor for sale, I beg that I may be allowed to have a quarter cask of about 27 gallons purchased at a cost not to exceed £4 10s., but it may be much less.

I have, &c.,

W. E. LENTHALL, Inspector,  
District Inspector, Metropolitan District.

Forwarded to the Inspector-General of Police.—G. READ, Supt., 25/3/93. Recommended for approval.—EDM. FOSBERY, I.G.P., B.C., 27/3/93. The Under Secretary, Department of Justice. Submitted.—A.C.F., 28/3/93. Approved.—R.E.O'C., 28/3/93. The Inspector-General of Police.—T.E.M.N. (for U.S.), B.C., 28/3/93. Superintendent READ.—E.F., 29/3/93. Account, £3 18s. forwarded herewith.—EDM. FOSBERY, I.G.P., 1/5/93. The Under Secretary, Department of Justice.

No. 3.

## The Government Analyst to The Inspector-General of Police.

Sir,

Government Laboratory, Sydney, 29 March, 1893.

I have the honor to report that on the 17th instant I received from Inspector Lenthall a sample of brandy, properly tied over and sealed, described as Fine Cognac. The same has been submitted to chemical analysis, with the following results:—

The liquid is an artificial preparation, composed of about equal parts of partially-rectified white spirit and water, the mixture being coloured with Dimethylamidoazobenzosulphonic acid. This is an aniline dye, known in the trade as helianthin, Orange III or methyl orange, and which I declare to be an ingredient injurious to health within the meaning of section 89 of the Licensing Act.

I have, &amp;c.,

WILLIAM M. HAMLET,

Government Analyst.

Forwarded to Superintendent Read for information and attention by Inspector Lenthall.—E.F., 29/3/93. For Mr. Lenthall's information.—G. READ, 30/3/93.

No. 4.

## Mr. Inspector Lenthall to Mr. Superintendent Read.

Sir,

Central Police Office, 27 April, 1893.

With reference to the report of Mr. Hamlet upon the analysis of liquor referred to in my letter of the 24th ultimo, I beg to state that I summoned August Levy, trading as J. L. Simon, at 36 Pitt-street, Sydney, for "keeping for sale liquor mixed with a deleterious ingredient, injurious to health," to which charge to-day at the Water Police Court, before Mr. Johnson, S.M., he pleaded guilty and was fined £30, £2 14s. costs, and twenty-four quarter casks of liquor in his possession in bond at the Circular Quay Bond, ordered to be forfeited.

I am making arrangements for the destruction of the contents of the twenty-four quarter casks, and will, if I can, sell the casks, so that the sale may recoup the expenditure already incurred.

This conviction bears out my recommendation of 19th September, 1884, which I repeated by letter dated 8th ultimo, that no liquor should be allowed to enter into consumption until certified that it is fit for use.

I have received great assistance in this case from Mr. James Rainford, J.P., President of the Licensed Victuallers' Association, without whose aid I could scarcely have obtained the evidence I did.

I have, &amp;c.,

W. E. LENTHALL, Inspector,

District Inspector, Metropolitan District.

Forwarded to the Inspector-General.—G. READ, Supt., 28/4/93. Forwarded to the Under Secretary, Department of Justice.—EDMUND FOSBERY, I.G.P., B.C., 28/4/93. Submitted for the Minister's information and consideration.—A.C.F., 3/5/93.

No. 5.

## Mr. Inspector Lenthall to Mr. Superintendent Read.

Sir,

Central Police Office, 1 May, 1893.

Following my letter dated 27th ultimo, respecting the fine and forfeiture inflicted on August Levy, trading as J. L. Simon, of 36 Pitt-street, for keeping for sale adulterated liquor.

I beg to report that to-day I removed out of Circular Bond Store twenty-four quarter casks of the forfeited liquor which were poured into the gutter, the Fire Brigade having a water hydrant flushing at the same time.

The casks I sold to Mr. Cormack, cooper, for 34s., which I have paid into the Water Police Court as a portion of the penalty.

I have, &amp;c.,

W. E. LENTHALL, Inspector,

District Inspector, Metropolitan District.

Forwarded to the Inspector-General.—G. READ, 2/5/93. The Under Secretary, Department of Justice.—E. F., B.C., 2/5/93. Seen.—R. E. O'C., 3/5/93.

No. 6.

## Certificates of Analyses.

Government Laboratory, Sydney, 4 May, 1893.

## CERTIFICATE OF ANALYSIS.

THE sample of imitation brandy ex "Erlangen" sealed and secured, marked O 1,096 No. 4, received 2/5/93 from Mr. Inspector Lenthall, has been examined with the following results:—

Found to be an artificial preparation composed of partially rectified spirit and water, the mixture being coloured with a complex azo compound or aniline dye which is injurious to health within the meaning of section 89 of the Licensing Act.

WILLIAM M. HAMLET,

Government Analyst.

Government

Government Laboratory, Sydney, 4 May, 1893.

CERTIFICATE OF ANALYSIS.

THE sample of imitation brandy ex "Chemnitz" sealed and secured, marked D 1,234 No. 1, received 2/5/93 from Mr. Inspector Lenthall, has been examined with the following results:—

Found to be an artificial preparation composed of partially rectified spirit and water, the mixture being coloured with a complex azo compound or aniline dye which is injurious to health within the meaning of section 89 of the Licensing Act.

WILLIAM M. HAMLET,  
Government Analyst.

Police Department, Inspector General's Office, Sydney, 4/5/93,—Memo. forwarded to Superintendent Reid.—E.F.

Sir,

Central Police Office, 5 May, 1893.

The liquors reported on by Mr. Hamlet, were taken by me from the Circular Bond and were the property of Mr. August Levy, trading as J. L. Simon, at 36 Pitt-street, Sydney, who was fined last week for keeping adulterated liquor for sale.

There were 12 quarter casks per "Erlangen," and 25 per "Chemnitz," which, I am informed at the Custom House, have been re-shipped to Antwerp.

I have, &c,

W. E. LENTHALL,

District Inspector, Metropolitan District.

Mr. Superintendent Reid, Sydney.

Forwarded to the Inspector-General of Police.—G. READ, Supt., 5/5/93.

I don't understand this quite. Were the samples taken from casks in bond? Were the said casks of spirit subsequently taken out of bond and shipped to avoid further proceedings.—E.F.

The samples were taken out of casks in bond, and were two consignments. Before Mr. Hamlet could complete his analysis, they were reshipped to Antwerp; but I could not have prosecuted unless I could have proved that they were kept for sale.—W. E. LENTHALL, Inspector, 5/5/93.

Forwarded to the Inspector-General.—G. READ, 6/5/93. Mr. Fraser has some papers on this subject. He may require these reports to enable him to reply to the Parliamentary Questions.—E.F., B.C., 6/5/93. The Under Secretary, Department of Justice.

No. 7.

Questions and Answers.

LEGISLATIVE ASSEMBLY, THURSDAY, 9TH MAY, 1893.

(2.) IMPORTED SPIRIT IN BOND:—MR. FRANK FARNELL (FOR MR. HAYNES) *asked* THE COLONIAL TREASURER,—

(1.) Are the Government able, through their Officers, to state what amount, if any, of presumed injurious spirit is in bond, intended for sale for consumption in New South Wales?

(2.) What is the amount of white spirit imported to this country during the last twelve months, and by whom was the spirit imported?

MR. SEE answered,—

(1.) I am not aware that any presumably injurious spirit is now in bond intended for consumption in New South Wales. A quantity of spirit recently imported from Germany was found to be injurious to health, and a portion of the spirit has been destroyed. The balance has been re-exported to the place of shipment.

(2.) The quantity of white spirit imported during the year 1892 was 10,840 gallons. The spirit was principally imported by firms engaged in the manufacture of tinctures, essences, and medicines.

(8.) IMPORTED BRANDY FROM GERMANY:—MR. DICKENS *asked* THE MINISTER OF JUSTICE,—

(1.) Is it a fact that a large quantity of cheap spirit (purporting to be brandy) imported from Germany has lately been destroyed by the Licensing Inspector?

(2.) Was this so-called brandy analysed; if so, did the analysis reveal the fact that the mixture was of a most poisonous nature, and totally unfit for human consumption?

(3.) Is it a fact that another large consignment of a similar nature, also imported from Germany, has been reshipped back to the consignors?

(4.) Has the Licensing Inspector reported on the above cases; if so, will the Minister lay upon the Table of the House said reports, and all papers in connection therewith?

(5.) Will the Government take early steps with a view to bringing forward such legislation as will more stringently deal with similar cases in the future?

MR. BARTON answered,—The following Answers have been supplied by my honorable colleague the Minister of Justice,—

(1.) Yes; and the importer was fined £30 and costs for keeping adulterated liquor for sale.

(2.) The liquor was analysed by the Government Analyst, who found it to be an artificial preparation of about equal parts of partially-rectified white-spirit and water, the mixture being coloured with a complex azo compound or aniline dye, which is injurious to health within the meaning of the 89th section of the Principal Licensing Act.

(3.) I am informed by the Collector of Customs that twenty-nine quarter casks, said to contain liquor of a similar nature, have been reshipped.

(4.) Yes; there will be no objection to laying copies of the reports and other papers upon the Table of the House, if moved for in the usual way.

(5.) This matter will receive attention when the proposals for the amendment of the Licensing Law, now under consideration of the Government, are being dealt with.

## No. 8.

## Minute of The Under Secretary of Justice.

I WOULD ask the Minister to look through these papers. There can be no doubt that it would be very desirable that the selling of injurious liquors should be prevented as far as possible, even if new legislation were required.

The present system of testing and analysing liquors sold in public-houses does not go far enough. If possible such liquors should be prevented from issuing from bond.

The Crown Solicitor might be asked as to whether he could suggest any means by which this could be legally effected.

Another suggestion that appears to me worthy of consideration is that the analysis made by the Government Analytical Chemist should be published in the newspapers, so that the public may be made aware which houses to avoid. A.C.F., 17/6/93.

The Crown Solicitor might be asked to advise on this matter.—R.E.O'C., 17/6/93. The Crown Solicitor.—T.E.M.N. (for U.S.), B.C., 19/6/93.

## No. 9.

## The Crown Solicitor to The Under Secretary of Justice.

Sir,

Crown Solicitor's Office, Sydney, 29 March, 1894.

I have the honor to return herewith the papers relating to the sale of injurious and inferior liquors which were sent to me last year with instructions to advise generally on the question therein referred to.

The questions are no doubt very important, and I regret that press of other matters has prevented me from dealing with these papers earlier, and from going into the matter as fully as I should have desired.

It seems to me that the question is one relating to the adulteration of food and drink rather than, suggested in the papers, one which should be dealt with under the Licensing laws.

1. First with regard to injurious liquors: Under the Licensing Act, section 89, it is an offence for "any person" to sell or to keep or expose for sale any liquor mixed with ingredients injurious to health.

And section 90 adds that every holder of a license under the Act having in his possession any adulterated liquor, for the possession of which he is unable to account, shall be deemed to have exposed for sale such liquor within the meaning of the preceding section.

Under this Act, therefore, it will be seen (as pointed out in the report of Inspector Lenthall) that no prosecution will lie unless it can be proved that the liquor was kept for sale within the meaning of the Act.

But I would draw attention to the provisions of an old Act relating to the adulteration of spirituous and fermented liquors, namely, 19 Vic. No. 19.

That Act provides:—

Section 1.—If any dealer in spirituous or fermented liquors, licensed publican, or other person, shall

(a) Put into or mix, or cause to be mixed, with any spirituous or fermented liquors any poisonous, deleterious, or pernicious substance whatsoever; or

(b) Shall sell or otherwise dispose of or keep for sale any spirituous or fermented liquors so adulterated, he shall be guilty of a misdemeanour, and liable to imprisonment for two years or to a fine of £200.

Section 2.—If any dealer in spirituous or fermented liquors, licensed publican, or any other person, shall knowingly have in his possession any spirits or fermented liquors so adulterated as aforesaid, he is liable to a fine of £100.

And all fermented or spirituous liquors so adulterated found in the possession of such dealer may be seized, and if proved to be adulterated shall be forfeited and destroyed.

Under this Act, section 2, therefore, it would appear that it is not necessary to prove—as it is under the Licensing Act—that the adulterated liquor is kept for sale; but the offence is the possession by any person, knowingly, of any spirit adulterated with poisonous, deleterious, or pernicious substances.

2. With regard to the inferior liquors it appears from the report of the Government Analyst respecting certain samples of spirituous liquors received from Inspector Lenthall, that in numerous cases of hotels in and near Sydney inferior liquor is sold, that is to say that although no trace of the poisonous substances mentioned in clause 89 of the Licensing Act were discoverable, they were found to contain traces of fusel oil and metals and were several degrees underproof. In some cases, for instance, brandy was found to be as much as 37, 39, and 48 degrees underproof, whisky 33·36 and 41, and the same with rum. Of gin apparently, there were no samples.

In my opinion publicans who sell inferior liquor of this kind might be proceeded against under section 5 of the Adulteration of Food Act of 1879, 42 Vic. No. 14.

Section 5 provides that every person who shall to the prejudice of the purchaser sell any article of drink which is not in substance of quality the article demanded by such purchaser shall be liable to a penalty of £20, and for a subsequent offence £50. This section is taken from the English Act of 1875, 38 and 39 Victoria cap. 63.

In a case under this section which came before the Queen's Bench Division of the Supreme Court in England, the conviction of a publican who sold a pint of gin which was found on analysis to be 43 degrees below proof, but the mixture was not injurious to health, was upheld.

The principle to be deduced from that case appears to be that it is a question of fact to be decided by the Magistrates whether the article supplied is substantially what was demanded, in other words whether the amount of dilution is in excess of what is reasonable.

In England the standard to be applied in determining whether an offence has been committed under this Act has been fixed by an amending Act, and under that Act it is a good defence to show that the admixture has not reduced the spirit more than 25 degrees underproof for brandy, whisky, or rum, or 35 degrees for gin.

This

Webb v Knight,  
L. R. 2 Q. B. D.,  
530; and see  
Betts v Arm-  
stead, L. R. 20  
Q. B. D. 771, and  
compare section  
6 of our Act.

This Amending Act has not been adopted here, but it might be useful for reference in determining whether a prosecution should be instituted, and in assisting the magistrates to come to a conclusion as to what was a reasonable dilution.

With regard to the suggestion made to the effect that the Licensing Act should be so altered as to stop the importation of poisonous liquor, by not allowing any liquors to be passed out of Bond into market until they were certified to be fit for consumption—this is a matter which can only be dealt with by fresh legislation, and, as already mentioned, it seems to me to be one which comes under the heading of adulteration of food and drink, and should be dealt with under that head.

Our legislation is, no doubt, in this respect, considerably behind that of the mother country, and the other colonies. In England and adjoining colonies, for instance, I believe that there is some similar provision in this direction with regard to the importation of tea, there is no such provision in this Colony, and the consequence is that an immense quantity of absolute rubbish is thrown on the tea market in this city.

Whether it is possible or expedient to legislate with regard to liquors in the direction indicated is a matter upon which I am unable to express any opinion, but it is, no doubt, a very important matter, and one deserving of the fullest inquiry.

I have, &c.,  
ERNEST A. SMITH,  
Crown Solicitor.

#### No. 10.

#### Minute of The Under Secretary of Justice.

*Submitted with reference to the late Minister's minute of 17th June last on mine of same date.*

A copy of the late Crown Solicitor's advising might be forwarded to the Inspector-General of Police. A copy (with the exception of pars. 2, 17, and 18) might also be sent to the Stipendiary Magistrates for their information. It would appear scarcely necessary to forward a copy of the advising to country Benches of Magistrates.

It is somewhat unfortunate that the consideration of this important matter has been so long in abeyance, but this Department is in no way responsible for the delay. The opinion of the Crown Solicitor would appear to make it clear that the provisions of the Licensing Act, and of the Adulteration of Food and Drink Act, are sufficient to guard against the sale or exposure for sale, out of bond, of liquors injurious to health, if the provisions of those Acts be properly enforced. But it seems to me, as pointed out in my minute of 17th June last, that the evil should be attacked at the root, and liquors examined in bond, and, if found injurious, there condemned. To accomplish this, new legislation would appear to be necessary; and I would strongly urge that the Parliamentary Draftsman be asked to at once prepare a Bill upon the subject, with the view of having it passed into law as early as possible.

A.C.F., 10/4/94.

Approved.—T.M.S., 12/4/94. Urgent. The Secretary, 'Attorney-General's Department, in reference to the preparation by the Parliamentary Draftsman of the Bill indicated in within minute.—A.C.F., B.C., 13/4/94. The Parliamentary Draftsman.—C.G.H., A.-G., 14/4/94. The Parliamentary Draftsman.—H.M. (for the Secretary), B.C., 14/4/94.

#### No. 11.

#### The Under Secretary of Justice to The Inspector-General of Police.

Sir,

Department of Justice, Sydney, 13 April, 1894.

Referring to your blank cover communication of the 9th March, 1893, forwarding certain reports furnished to you with regard to the sale of inferior and deleterious liquors, I am directed by the Minister of Justice to inform you that as it appeared desirable injurious liquors should be prevented from issuing from bond, the papers were referred to the Crown Solicitor with an inquiry as to whether he could suggest any means by which that could be legally effected. A reply from the Crown Solicitor has now been received, dealing generally with the question of the sale of injurious liquors, and I am desired by the Minister to forward you the enclosed copy of the same.

I am to add that a copy of Mr. Smith's advising has been transmitted to the Stipendiary Magistrates, and that the Parliamentary Draftsman has been requested to prepare at once a Bill allowing liquors to be examined in bond, and, if found injurious, there condemned.

I have, &c.,  
ARCH. C. FRASER,  
(Copy opinion enclosed.) Under Secretary.

#### No. 12.

#### The Under Secretary of Justice to The Clerk of Petty Sessions and Chamber Magistrate, Central Police Office.

Sir,

Department of Justice, Sydney, 13 April, 1894.

I am directed by the Minister of Justice to forward, for the information of the Stipendiary Magistrates, the enclosed extract from an advising of the late Crown Solicitor, on the subject of the sale of injurious and inferior liquors.

I have, &c.,  
ARCH. C. FRASER,  
(Extract from opinion enclosed.) Under Secretary.

No. 13.

## No. 13.

The Parliamentary Draftsman to The Under Secretary of Justice.

Sir,

Parliamentary Draftsman's Office, Sydney, 7 May, 1894.

The object of the proposed legislation to prevent the importation of adulterated liquor can, in my opinion, be best obtained by an amendment of the Customs Regulation Act to the effect that no liquor shall be taken out of bond unless certified as fit for human consumption. As, however, my instructions come from your Department, and the Customs are under the Treasury, I apprehend that it will be necessary to obtain further instructions from the Treasury before drafting the Bill in the way suggested. Will you kindly communicate with the Treasury with the view of having the necessary instructions forwarded to me.

I have, &c.,

J. H. P. MURRAY,  
Parliamentary Draftsman.

Submitted. The Treasury might be communicated with as suggested by the Parliamentary Draftsman, and for that purpose the papers might be forwarded to that Department. Apparently there is very little prospect of the desired Bill being passed into law this Session.—A.C.F., 11/5/94.

Approved.—T.M.S., 15/5/94.

## No. 14.

The Under Secretary of Justice to The Under Secretary for Finance and Trade.

Sir,

Department of Justice, Sydney, 30 May, 1894.

I have the honor, by direction of the Minister of Justice, to forward for the information of the Colonial Treasurer, the accompanying papers on the subject of the advisableness of introducing fresh legislation to prevent the importation of adulterated liquor into this Colony, and to state that as it appears the object desired can best be attained by an amendment of the Customs Regulation Act, the Minister will be glad if Mr. See will concur in this Department, instructing the Parliamentary Draftsmen to prepare the requisite Bill for the purpose.

I have, &c.,

ARCH. C. FRASER,  
Under Secretary.

1894.
