588. Have the directors considered whether they could turn it to any use? They have; but they have been waiting for the extension of the railway to Liverpool. They thought that if a railway went through it would increase the value of the land, then they could decide what to do with it.
589. You say it was acquired by mortgage? Yes; the owner borrowed this amount of money from the Benevolent Society.
590. Do the Society lend money on mortgage? In that case they did.
591. Have they done it in any other case? No.
592. And in this, the only case in which they did it, they have had to take over the land? Yes.
593. Have you foreclosed? Yes, in 1847. It is only recently that the land has been placed under the Torrens' Act.
594. So that the land is now absolutely the Society's property? Yes; we hold the deeds.
595. Are you aware that the amount of money contributed by the Government equals about 60 per cent. of the whole expense of the institution for the last ten years? Yes; I thought it would be a little more than that.
596. Can you account in any way for the fluctuations in the subscription list;—has it anything to do with the energy of the collectors? No; I think the people get tired of subscribing. The collectors have been energetic in their own interests.
597. That hardly applies, because the subscriptions in 1894 were £1,016, and in 1895, £3,429? That includes the sum of £2,000 that I was instrumental in getting in by means of a special appeal.
598. In 1896 the amount was £2,659? So far as these items are concerned—£2,500 and the £1,300—there would be a drop in the two years from £2,500 to £1,300. One reason was, that in the previous year £400 or £500 was obtained through the influence of the school children of the Colony, but the Minister of Public Instruction stopped these appeals from going through the schools. That resource is done for now.
599. On the whole, are the ordinary subscriptions increasing or decreasing? I think the ordinary subscriptions have remained almost stationary for the last two or three years, but the special appeal has fallen to £697. People get tired of the novelty of the appeal; it will be still less this year.
600. In 1893 you appear to have received a large sum from circuses, £475, but in 1897 only £50;—is it the policy of the Society to stop those entertainments? No; they rather encourage them. The circuses, however, have done badly, and have not applied for the ground lately.
601. You consider that the publication of the *Charities Gazette* was attended with good results for the institution? Very good financial results, except during the last four or five months. Lately the proceeds have been so very small that I was thinking of proposing to the directors to suspend the publication of the paper. It is at Christmas time when people become the most sympathetic and warm-hearted.
602. What is the cost of printing it? The cost of printing is £23 per issue, and we receive in the way of advertisements on an average about £16. I should think the production would cost about £10, taking the total expenses.
603. How often is it published? Every month.
604. How do you know what results are produced? We have a little book in which we keep an account. The meaning of the *Gazette* really is an appeal in the form of a pictorial supplement, and we have a perforated portion of the supplement which is sent back with a few shillings and the name of the sender and the address. These are all totalled up every month.
605. There has been a considerable increase in the salaries of recent years;—the amount for 1894 was £1,992; 1895, £1,627; 1896, £2,518; 1897, £2,294? Yes; the amount is less in 1897 than 1896. We had the unemployed in 1896, necessitating a larger staff.
606. The staff cost, in 1895, the amount of £1,627? Yes; but afterwards our work increased. We had to increase the ordinary staff. I think we had only one inspector in 1894.

607. And how many have you now? We have three now.
608. Have you not four now? Yes; there is one away. One was recently appointed during my absence.
609. Have you had any increase of the staff besides the appointment of an inspector? Yes, in the store department.
610. What increase has there been there? We have had two men.
611. The salaries and gratuities for ten years we make 19·2 per cent. of the expenditure;—in 1895, 20·5 per cent.; in 1896, 14·7; and in 1897, 17·3. Have you worked these out? I have a very good idea of what that position is.
612. There has been a very considerable increase in the cost of stationery and printing in 1896 and 1897, what would that be for;—in 1893, the amount was £204; in 1894, £160; in 1895, £286; in 1896, £583; in 1897, £450;—is that accounted for by the *Gazette*? We had no *Gazette* until June, two years ago, but we had an appeal. We used to send out a pictorial appeal stamped. I thought it would be a saving to start this little newspaper to save the stamps, because the cost of stamps was getting very heavy.
613. And the newspaper goes free? Yes.
614. The point is this, in 1895, the amount was £286, in 1896, it is £583, or nearly double the amount for the previous year? I can account for that. In 1895, the first year of the appeal 10,000 appeals were sent out starting from the month of May. Then of course that was not a full year. Next year we kept on sending out the same number of appeals and the cost would increase because it was for a full year. The amount for 1895 does not cover a full year.
615. It was seven months? Yes.
616. Did the financial results of the special appeal justify the increase in expenditure? I was looking over the returns a few weeks back. I will take the first year, £2,500. We had in absolute profits something like £2,100.
617. That is in consequence of the appeal? Yes solely; deducting profits and stamps and any other charges that is the profit that we find.
618. It appears that two-thirds of the amount collected from the public in 1896 was received from Sydney and one-third from the country? It is only during the last 2 or 3 years that we have commenced sending collectors into the country.
619. Do you canvass the country pretty thoroughly now? Yes; one collector has been doing the northern district and another the southern district twice a year.
620. Have they covered the ground pretty well? Yes.
621. How are they paid? 5 per cent. commission and hotel expenses. They bring back receipts and give full details in the bill every month.
622. Up to the year 1895 it appears that the £ per £ subsidy was limited to £500, but for the two following years the Society received £1,200 and £2,000? Yes; an appeal was made for an increased sum on account of the great amount of relief that would have to be afforded.
623. £3,000 was voted in 1897-8; you received only £2,415. Was that because you had not sufficient contributions to claim it? Yes, we could not collect enough.
624. In addition to the £ per £ subsidy, you received payment from the Government for the maintenance of women and children? Yes, there is so much per head.
625. At what rates? £28 for a single woman, £26 for a married woman. It is practically £28, because there are so few married women that it is not worth considering.
626. Why this distinction between the two? I could never understand why the distinction was made. It has been in existence for over twenty-five years. I heard it stated many years ago, that if a married woman was received there there would be a prospect of her husband contributing something towards her maintenance, and the Government would get it.
627. It is £28 per woman, and £14 per child? Yes.
628. At what age of the child does it commence, and when does it end? Any child two months old and under, born in the institution, is not paid for, but all over that age are paid for at the rate of £14 per annum.
629. So that a woman and child costs the Government directly £42 a year? Yes.
630. *Mr. Powell.*] What would the charge be for a woman with two children? The children would be charged for at the rate of £14 per head.
631. *President.*] Do you know on what basis this amount was arrived at? Very many years ago—it is within the recollection of the President, Sir Arthur Renwick—the manager, Mr. Mansfield, was asked to make out a statement as to what he would consider would pay the whole of the indoor expenses of the institution, and this was his estimate, and the Government decided to allow this amount.
632. Then this estimate was made a certain number of years back, how many years ago? It must be twenty-five years ago.
633. It was made twenty-five years ago, and has lasted to this day? It has been in force ever since.
634. Have you made any estimate of the present cost? I have it here for a period of three years. I did not go back four years. 1894 is what I would consider an abnormal year. For instance, there was an outbreak of puerperal fever, and the Society was put to great expense in transferring to a private nurses' home and taking a new asylum at Surry Hills. The average cost per head for 1895 was £22. For 1896, £21; for 1897, £21 16s., say £22. There appears to be a difference of opinion amongst the managers of such institutions as to whether the cost of the buildings ought to be included in the cost of maintenance, so I have the figures both ways. The figures which I have just given are inclusive of the cost of the building.
635. What is it without the cost of the building? For 1895, £21 1s.; 1896, £20 1s.; 1897, £20 15s. All these are fairly good years. In comparison to the amount allowed by the Government, there seems very little cause of complaint that the Society has been paid enough. I remember that many years ago I represented that the maintenance allowance was not paying, and the answer was that representations had been made to the Government and that they would not allow any increase.
636. Not taking into account the interest on the building, the average for the last three years is something under £21? Yes. I should like to point out particularly in the case of the Benevolent Society, it is an open question whether the building ought to be taken into account, because the Society has a building fund from which it receives interest.

- E. Maxted.
11 July, 1898.
637. That £61 17s. is an average of somewhere about £20 per head,—what about the children? That means £21 per head. You can only take the cost per head throughout. You cannot say a woman costs so much and a child costs so much.
638. You can say that two or three children are equal to one adult? Their ages vary very much, from two months to twelve years old.
639. *Mr. Powell.*] But you get £14 each for them? Yes.
640. *President.*] Does not that show on an average that two children are equal to one adult? That is what is meant by the Government allowance. Our maintenance fund is made out on the principle usually adopted. For example, take the daily average number of patients altogether, and run the indoor expenditure into the gross total; then the average cost per head is arrived at.
641. For the three years it is a little over £20;—does that mean the average for a woman or average per head? The average per head, including women and children. On the same lines as if you take an institution supporting old men and old women, you would say so much per head all round.
642. Taking two children as equal to one adult, we make the average cost £28 Os. 9d? You make it practically the same.
643. I suppose you know the cost at which they can maintain inmates of the Liverpool and Parramatta Asylums? It is £14 per head at Newington. There is a large amount of hospital work in connection with the Benevolent Asylum. Of course it would be as cheap to maintain probably 250 inmates at the Benevolent Asylum as it would be to keep 200, on the ground that the administration would be the same.
644. Can you say whether your accounts properly show the separate cost—whether this is really an accurate statement? There is a careful separation of the outdoor and indoor relief work, and I think you might regard it as reasonably accurate.
645. The cost per head is just double what it is in the asylum? We have carefully separated the cost of administration. My salary is charged against indoor maintenance and also against the outdoor relief department, and the same with the others.
646. You have given us the average that you have estimated, that is taking the children per head? Yes.
647. Do you not think that for a woman and a child over two months old it is pretty stiff to charge £42 a year? That is rather a difficult question. The Government arrange to bear the whole cost of maintaining the women and children in the institution, and it is such a mixed institution, if you take one and say it is too much for this child and not enough for that there is a difficulty.
648. As the Government have to pay the whole cost, the question is whether £42 is not really higher than it should be, compared with what we know it can be done for in other institutions? Of course there is not the same character of work in the other institutions. The old people eat very little. Our inmates are vigorous young women about to give birth to children, and they have abnormal appetites, and we have also growing children.
649. This estimate for the children given by you includes not only the infants of those women, but also the children who are waiting there to be sent away? Yes; it includes the whole of the inmates, except children 2 months old and under.
650. All the women and children? Yes; it includes the cost of all the inmates except infants 2 months and under.
651. And their clothing as well? Everything, nurses' salaries as well. I mention that point about appetites because recently I have been visiting the homes of the aged poor, and I was speaking as to the small cost of maintaining them because they get so little from us, and I was told that their appetites were very small.
652. Then there is no difference between the charge for infants over 2 months old and the charge for big children? None whatever.
653. How long previous to their confinement do you admit women to the asylum? The times vary very much. It is the aim of the Ladies' Committee to receive them at as late a period as possible. But sometimes you have to receive a woman six or eight weeks before her confinement. If a woman comes from the country, and is absolutely penniless, and would be confined in five or six weeks time, they must receive her.
654. It is the object of the Ladies' Committee to postpone as far as possible their admission? Yes; to get them as near the time for confinement as possible.
655. And if there are cases such as you refer to—girls from the country—they must be somewhere else if not there? Yes; it is a matter which has exercised the minds of the directors for a very long time past.
656. What is the usual time that a woman remains in the institution, assuming that she goes in a week before her confinement? Sometimes it is very many months. There is the greatest difficulty in finding a home for a woman with a baby. If she is a smart woman or has friends she will probably go out within three weeks, if not she will remain till we can find her a home. In company with the matron, I question all these women every month, and we try to insist upon their going out, but they prove to us that they cannot go—they have nowhere to go to.
657. Is there any organisation attached to the Society for getting them employment? No. Our only method is to advertise and coax them to go to some of their friends.
658. I find that the average stay in the asylum in 1896 of the lying-in patients was forty-seven days? Yes.
659. And the other women and children sixty-four days? Yes; but by taking an average, I do not think that you will get at the actual state of things. In that case I do not think that the average is applicable. One woman may remain in twelve months, and another only three weeks.
660. So that it may occur that a woman who is received into the home a week before her confinement may have to stay some months after? It does occur.
661. You have no organisation for getting them employment? No; I telephoned to all the laundries some years ago to see if they could give employment to women with babies, but with no result.
662. Have they been trained to household work? No; they are not exactly women of a low order of intellect, but a very common type of household drudges. Very few of them are smart women.
663. Are you aware of any instance of destitute females from the other colonies receiving outdoor relief from the Society? Yes; but I could not give you any idea of the number.
664. Do you think it is a serious tax upon the State? So far as our institution is concerned I should not think so. Speaking from memory, it has never occurred to me that the tax was great. At the last meeting something

- something like seventy unemployed men came before the committee. The honorary secretary was in the chair, and he questioned them, and very few of them had come from the other colonies. E. Macted.
11 July, 1898.
665. Are you able to do anything in those cases in which women come from the other colonies to be confined? Those are rare cases; some come from Tasmania, some from Melbourne. We have a little printed circular that we send to the fathers of the children, but the result is unsatisfactory. The affiliation laws are so bad that little can be done. At one time the women refused to take proceedings against the fathers of the children, and the Board were rather indignant. It was directed nine or ten years ago that the women should be taken up to the Court in charge of the nurses; but they used to abscond, or give a wrong name as to the father of the child.
666. Do you know what is done in the other colonies in reference to that? I made some enquiries recently in Brisbane, and the state of things is as bad there. The laws are defective.
667. I suppose women go from here to Brisbane, occasionally? Yes.
668. Your medical officers are not paid? No, they are honorary officers. Originally, there was a paid medical officer.
669. Is the present arrangement satisfactory? Not entirely; they do not attend with sufficient regularity.
670. You have not these officers completely at your disposal? No; they are very independent. We have one medical officer who is most regular, but the others are irregular.
671. If you could afford it, do you think that a small salary ought to be paid to a medical officer? I think that if the Society went back to the old custom of paying a visiting medical officer not the same amount of salary, but if he could come in once every morning, and go through the institution regularly, it would be better than the present arrangement.
672. Why was the change made—was it a matter of money? No; that was not the reason. There was a dispute between the paid medical officer and the two consulting medical officers and the directors at the time of the outbreak of puerperal fever. There was a great deal of ill-feeling, with the result that the staff resigned.
673. Is the work in the lying-in division increasing? It has decreased wonderfully during the last twelve or eighteen months. This month it is going up again; but it has decreased from something like twenty-five or thirty births a month to fifteen or eighteen.
674. How do you account for that? I think that the other lying-in homes around Sydney are drawing them away.
675. What others are there? There is Dr. Graham's, there is the Salvation Army Maternity Home, Mr. George Lewis has a small maternity home, and Mr. Ardill has one. Mr. Ardill was advertising the other day to teach midwifery students, so that his work must be growing.
676. Have you a dispenser? Yes.
677. Is he a salaried officer? He has a shop opposite, and he comes over once a day. He is paid.
678. Is that a satisfactory arrangement? I think it is a very good arrangement.
679. It gives you his services at a minimum cost? We pay him £12 a year, and he is a qualified man.
680. On whose authority are medical comforts dispensed? The medical officer orders them and the matron gives them out.
681. Only on the order of the medical officer? Only on his order verbally given.
682. Are medical comforts given to any great extent? They are not. Brandy and wine would be medical comforts, and we do not pay more than £8 or £10 a year for the whole of that.
683. Does the storeman pass the stores under your directions? I see them every day. He receives them and I examine them.
684. Who is primarily responsible? With regard to the weights he would be responsible, but with regard to the quality I am responsible. I should hold myself responsible for any bad meat.
685. Is it not the storeman's duty to bring it under your notice if anything bad is delivered? As a matter of fact he does. He is a most reliable man.
686. Who issues the stores? The storeman, except the outdoor relief stores, those are controlled by the chief outdoor inspector. He books all the items and they are handed over the counter, but it is right under the supervision of the outdoor inspector.
687. Who checks the issue of the stores;—are the entries in the books balanced? Yes; they are balanced every half year. Everything that comes into the institution—the receipts and disbursements, goods of every kind—are balanced every half year, and if not found satisfactory there is an opportunity to make inquiries. The honorary treasurer comes every half year and examines the lists of everything in stock.
688. Is it possible for a certain number of loaves to be delivered and paid for and not properly used;—what check is there upon that? As far as perishable goods are concerned that is practically disposed of in one day. Suppose we order 3,000 loaves of bread, the outdoor inspector will issue, say, 2,900; then the storeman has instructions that we want some for the house next day, and they use up that 100 loaves. The system is a very sound one. You have the names of 1,100 families who receive relief, then there is the balance up at the end of the day, and we know what we have left.
689. That is to say, that loaves distributed on any particular Wednesday are balanced up at the end of the day? If we have 100 loaves left we know. The books will be balanced up on the Thursday morning. Then we have an opportunity of seeing whether they have been fairly given out.
690. How can you tell that when some get two loaves, some three, and some four? It is all entered. Mrs. Brown, two; Mrs. Smith, three; Mrs. Jones, four; and so on.
691. You take up the amounts every Thursday morning? Yes.
692. There is another point—suppose there is collusion, say, between the man who enters the book and certain people outside, and suppose they come in and call for six loaves, the storeman hands them out and makes a certain entry in the book; what check can the committee possibly have? Do I understand you to mean, suppose he calls out six loaves and only four are given and four entered, that woman would have been before the committee, the chairman will have told her that she will get a certain allowance, and if they did not get the full allowance they would go back and tell the committee.
693. I am not supposing such a case as that; but suppose a woman is a friend of the inspector's, and gets more than is due to her? More than is allowed by the committee?
694. Yes; would not the loaves still balance? He might take upon himself to give her more, because she is a favourite, and I think that dishonesty of that description could scarcely be controlled. I think it very unlikely to occur.
- 695.

- E. Maxted. 695. I am only pointing out the possibility of it, and I ask whether you have any means of preventing not only more provisions than had been ordered being given, but, also, their being given to people who had not been before the committee at all? They all come before the committee. If a woman comes during the week for assistance, and says I cannot wait till next Tuesday, and that she wants assistance at once we give her six loaves of bread.
- 11 July, 1898. 696. Suppose I were a clerk there, and I got a friend to come in who has not been before the committee at all, and I sing out six loaves? It would be to the interests of that person to come before the committee, to be placed on the books permanently.
697. She may know that the committee would refuse her, or that the committee may have refused her? I do not know how you could check that.
698. There is another point: Mrs. Smith might come before the committee and be authorised to get certain relief, and she might have her home inspected by the inspector, and it might be all satisfactory on the face of it; but suppose she hands over the ticket to Mrs. Jones, and gets paid for it, and Mrs. Jones comes and draws Mrs. Smith's allowance, is there any check? We should know the woman, her home would be visited, she would be known to the inspectors. If a stranger came we should say you are not Mrs. Smith.
699. As regards the stores received from the contractor, what checks are there between the contractor and the storeman? The storeman weighs everything. Supposing that a ton of flour was ordered, and suppose he weighed half a ton, we should say this is not a satisfactory balance—there is half a ton of flour short. He would not dare to do it. The other day a few blacklead brushes were short; of course there was not a satisfactory balance, and I found that the storeman had supplied them out of his own pocket.
700. You take stock? Yes, we take stock of all we receive, and the amount on hand every half-year. There is a check upon the storeman.
701. That is such a check as any ordinary business man would have? Yes.
702. About the contractor's accounts—the contractor has to furnish certain goods at a certain price;—who is responsible for passing those accounts? I am. I check them, and see that the prices are properly charged, and that his additions and calculations are correct. All these things go before the finance committee, they are checked by the members of the finance committee, and it does not even rest there. The schedule goes before the house committee, and all the prices are read out, and it is signed by the chairman; then it goes before the general board of directors.
703. Do you often reject stores as regards quality? It does not often occur.
704. How often has it occurred during last year? I could not call to mind how often. I have had to send meat back a good many times, but other stores scarcely ever.
705. You do not have to reject groceries very often? No; I do not think I can recollect an instance. We have sent bread back.
706. Have you ever disqualified a contractor? No.
707. How often are contracts let? Every twelve months.
708. Do you find it a better arrangement to contract for the supply of bread than to bake it yourselves? I do not know.
709. There is a sum of £366 9s. 6d. for midwifery fees;—what is the amount of the fees that the nurses pay? They pay 15 guineas each, and an additional fee of 3 guineas, and remain under tuition for six months.
710. What is the 3 guineas for? For the medical certificate.
711. The nurse resides in the institution during that six months? Yes.
712. Is that profitable or unprofitable? With the mixed character of the working of the institution, it is difficult to answer. I should say that it pays.
713. They do work in the wards? They are principally attending on the sick inmates.
714. Do you think that the institution loses by the transaction? No; I think it about equalises itself. It costs no more for administration, and they have the same diet as the ordinary nurses of the institution.
715. You must get some work out of them? We could do without their work.
716. In your opinion the Society does not lose by them? I should think not.
717. Does that apply to the students as well? The University students only pay 5 guineas.
718. But you have not to keep them? No. About £50 must be taken out of that £366 for a lecturer, making it really £316 a year.
719. The nurses remain there for six months? Yes.
720. Then they get a certificate, for which you charge them 3 guineas? Yes.
721. *Mr. Powell.*] Who examines them? One of the medical staff, and they give a certificate, which is signed by the honorary medical officer and the president, and the honorary secretary.

FRIDAY, 15 JULY, 1898.

[The Commission met at the Offices of the Public Service Board at 10 o'clock a.m.]

Present:—

G. A. WILSON, Esq., J.P. (PRESIDENT).

J. POWELL, Esq., J.P.

Edward Maxted further examined:—

- E. Maxted. 722. *President.*] Suppose an out-pensioner is ill and unable to pay for medical attendance and assistance, or unable to obtain admission to the hospital, because of the nature of his illness, does your institution meet the requirements of such a case in any way? No, not in any way; excepting that we are badgered a good deal. A person will come to us in absolute despair, perhaps a poor husband would be run to the Board of Health about a sick wife, and from the Board of Health to the hospital, seeking medical attendance in their own home. On one or two occasions recently people have actually been to the Board of Health, and have been referred to the Women's Hospital. I can call to mind a case that occurred the other day.
- 15 July, 1898. 723. To the Women's Hospital? Dr. Graham's. If asked to send a nurse to a man's wife, the answer is, "Ours is a maternity home; we have no nurses for ordinary cases of sickness. Go down to the Benevolent Asylum." Our answer would be the same, that we have no nurses for ordinary cases of sickness.

If

E. Maxted.
15 July, 1898.

If it was a maternity case, we should send a nurse. The man says, "What am I to do?" I telephone to the Board of Health, and say, "This case must be attended to, otherwise there will be some unpleasant exposure." Well, they have, as a matter of fact, attended to the case, but it seems to me that they did it with an extreme amount of reluctance. I had to speak to them in a very irritating tone through the telephone to get all I wanted.

724. In the first place, I understand that you have not the means? No; and it is not within our aims and objects.

725. Of course, there is the point in it that there is a certain amount of moral responsibility upon you to do what you say you have done. Your inspector goes round, finds a case of this kind, and it is his duty to report the case to you; and whether you can relieve the case or not, you could not divest yourself of the responsibility to convey that information, as you say you have done, to the proper quarter? In this case that occurred a few days ago, I did not take the man's name, but the Secretary to the Board of Health will remember it. It was the case of a person lying ill with typhoid, and wanting nursing attendance in his own home. This was a neighbour who called on me; he said he had been round about from one place to another till he was absolutely tired of the whole business. The case was attended to. The Board of Health do attend to them, but it seems to me that they do it with a great deal of reluctance. Irritating conversations go on through the telephone before the desired result is brought about.

726. Is it a matter for the Board of Health, or for the Chief Medical Officer? The difficulty is that there seems to be no officer when you report a case of that kind to go to the home and see what should be done with the sick man or woman.

727. *Mr. Powell.*] In the case of the Byron family, down in Bathurst-street, you arranged to send a doctor there? I do not remember that case.

728. There was a case in Harrington-street, and a doctor was sent there through your instrumentality? I expect our chief out-door inspector knows that. The doctor would not come from our institution.

729. I want to find out what doctor went, and by whom he was sent—whether by the Board of Health, or at your instance? Possibly our chief inspector telephoned to the Board of Health, and they sent someone.

730. As far as the Benevolent Society are concerned, you do not profess to afford medical relief to needy people? No.

731. *President.*] And even when it is brought under your notice you cannot do it from your own resources—you have to put the Chief Medical Officer or the Board of Health in motion? Yes; we used to try the hospitals, but the general answer was that they had nobody to send out.

732. *Mr. Powell.*] In case of death in a house, if the people are in needy circumstances, they sometimes apply to you for burial, do they not? Yes. We have no difficulty in this matter; we simply refer the friends of the deceased to the City Coroner, and it is always attended to.

733. Why to the City Coroner? He has a vote for that purpose.

734. It does not necessarily follow that there will be an inquiry into the circumstances of death? Of course, a medical certificate would be given, and the person who made the application would have to take it to the Registrar-General's Department.

735. It seems to me strange that the Coroner should have to deal with a matter of that kind; his function is to inquire into the cause of death, but you make him a kind of charity dispensation officer by giving him power to order funerals at the public cost? Many years ago we used to undertake that work ourselves. I used to give orders for the burial of poor people. Eight or ten years ago the undertaker said to me, "Why do you go to this expense?" and he put me on the track of the City Coroner, who he said had a vote for that particular purpose. Since that period I have been sending cases to the City Coroner, and he attends to them.

736. *President.*] Suppose that your inspector comes across a case of this kind: suppose that he finds a person ill and without medical attendance or proper nourishment, would it be the inspector's duty to report to you? Not necessarily. I have told the chief inspector that if he comes across such a case to telephone at once to the Board of Health.

737. Do you think he ought to inform you? It might be an urgent case.

738. I mean, in addition to that, do you not think you ought to know about it? Not unless it is one of our own people, to whom we are giving out-door relief.

739. He would mention one of your own cases? He would. If he accidentally dropped across a case that did not concern us here, it would not be our responsibility; but, as a matter of humanity, I have told him to telephone to the Board of Health.

740. The only danger is that these things might be overlooked? I consider that if we know of one of our own people in that unfortunate condition it would be our responsibility to hang on to the case until proper medical attendance was obtained.

741. You cannot divest yourselves of responsibility of that kind? I could not leave the office and go to bed, knowing that a woman was lying in that condition.

742. In view of the infrequency of the inspector's visits, might there not be many cases of this kind without your committee being aware of them? I daresay there might, considering the large number of cases on the books and the infrequency of the visits.

743. We know that the visits must be infrequent, because you have so many cases, and the inspectors have to do so much in-door work that it goes without saying? Beyond question.

744. *Mr. Powell.*] How many inspectors had you until very lately? Only Mr. Grant, for many years.

745. *President.*] Do you consider this a defect of the system? We have not sufficient inspectors.

746. One of your tables, page 28, refers to husbands sick and afflicted;—would not that point to the fact of its being part of the business of the committee to attend to these people? Suppose there is a man suffering from consumption, we should call him a sick and afflicted man. We could easily get out-door treatment from one of the hospitals for a case like that. The difficulty is where it is necessary for a doctor to attend in-doors. With regard to the case of an afflicted husband, the difficulties are easily surmounted by referring the family to out-door officers.

747. With reference to the unemployed cases that you are relieving at the institution, who decides the merits of these cases? The committee meet on Thursday, and receive applications for relief, and order the amount of relief that is to be given.

748. You do not deal with those cases except seeing that the distribution is made? No; I simply sit at the meeting and take notes.

- E. Maxted.
15 July, 1898.
749. *Mr. Powell.*] Are they treated as special cases? They are separated from the ordinary cases.
750. Do you give a larger scale of relief? Nearly double. The families are large. There are men living with their wives, and there is an increase in the family from time to time, so that the families are larger than they would be in ordinary cases, such as those of aged men or aged widows. In the case of an unemployed man it means a large family; therefore it is considered necessary to almost double the allowance.
751. *President.*] Is the Committee fortified by any report from any of its officers? Yes; we put a man on specially, and I recommended the other day another inspector, and if the work increases I am going to recommend an additional inspector, but whether my recommendations will be carried out I do not know.
752. How long have you been granting relief to the unemployed on the present occasion? Since the 15th June.
753. How many cases are you relieving in a week? About 430 families a week. There was an increase of about sixty cases yesterday, and they are increasing every week. They are being relieved in connection with the £500 vote.
754. They are increasing every week? Yes.
755. Have you ascertained if the applicants are registered as applicants for employment at the Labour Bureau? Yes; they nearly all bring their Bureau tickets.
756. Is that a condition of relief? No; they should bring a recommendation.
757. Have you ascertained before granting relief whether any of the applicants have refused employment at the Labour Bureau? I have not.
758. So that you may be relieving a family, the father of whom has refused employment? He may have his ticket, or he may have refused employment. I am not in communication with the Bureau to ascertain that particular point.
759. He may have refused employment, and yet get double the rations that the ordinary poor do? It is quite possible.
760. *Mr. Powell.*] Do you not think that granting the rations is likely to cause them to be particular in regard to the employment they accept? I could not say.
761. It takes away the necessity for exertion? If he is an undeserving man it must diminish his independence to some extent.
762. *President.*] Of course there are all sorts amongst the unemployed—good, bad, and indifferent;—do you not think that the indifferent or the bad will be liable if relief is given, to refuse employment? I have no doubt.
763. Assuming that a man is rather indifferent and inclined to be lazy, do you not think it is an inducement to him to refuse employment if he can get rations? Yes. I can call to mind cases in which men preferred rations to employment. Then the difficulty is whether if a man prefers rations to employment his wife and children should be allowed to go without food. That has always been a difficulty.
764. You say that the number of applications for relief from the unemployed is increasing? Yes. There was an increase of something like sixty or seventy yesterday.
765. Of course, you know that there are many delicate matters which young men, such as your inspectors are, could not very well inquire into, such matters as a woman near her confinement; they might have to ask all sorts of delicate questions of the woman;—do you not think you ought to have at least one lady inspector for such cases? From my experience of matters of that kind, and I have seen a good deal of women one way or another, I do not think that a smart woman would get a grasp of the work so well as a smart man. I think that a man is better constituted for work of that description, and will get a better grasp of the matter.
766. Do you think that a respectable delicate married woman would convey her condition to that man as unreservedly as she would to a sympathetic woman? I think to a keen man she would the same as she would to a doctor.
767. Why should not there be a keen woman? I always prefer a keen man to a keen woman from my business experience.
768. From your experience you think there is no necessity to employ a woman? I think that if a committee of ladies were formed in the different districts on the lines of the committees controlling the boarding-out inspection that would be a good thing, but I should make a male inspector the responsible person, and let the lady officers go round and report as they do in regard to the homes of the boarded-out children.
769. I understand that the lady officers would report to your ladies' committee, they might not care to report to a man? I should not recommend that, I should recommend that the whole of the report should go before one responsible board of management.
770. *Mr. Powell.*] Take a case that came under my notice this last week. A poor woman had been lately confined, her husband was near his death, and she had got about the fourth or fifth day. We could not put that poor woman through questions which a woman could put her through. It was clear to us that she was almost destitute of underclothing; we could not ask her that question, but through our instrumentality Miss Keele visited the case, and she found that the poor woman was not only destitute of underclothing, but also suffering from a trouble which would make it necessary for her to go into a hospital. These are facts that would not have been elicited except through Miss Keele? With regard to what a woman would tell another, some years ago I took a list of women who had interviewed our ladies' committee. When approaching their maternity they were questioned on various points with regard to the fathers of their children, and what they said was accepted by the ladies' committee, and those women signed the report. In the public interest I set aside a time from half past 4 until 6 o'clock every evening for two or three weeks to question these women at a time when they had no interest in making a false statement, as their trouble was over, and they had got all they wanted. Having questioned them, I went back to their original statements to the ladies' committee, and it disclosed what I call a horrible state of things. I have here a statement which I would like you to look at. I gave evidence in connection with the matter to a former Commission. If I quote one case it will give an idea of what I mean. I may state that in this inquiry that I made I tried to coax the women, and when I thought I could not get the truth by coaxing, I threatened them with legal proceedings. Here is a case in point. It is the case of a woman 20 years of age, who had had a former child. She was induced, she stated, by the father to fix the paternity of her child upon an innocent man named * * *. She and her sister went to the man and charged him with

E. Maxted.
15 July, 1893.

- with it. He denied it, and said that if he had not known her from childhood he would have prosecuted her. The girl was influenced by the real father of the child to take that step.
771. *President.*] You are assuming that your male inspectors are thoroughly qualified and well chosen, but I have as much right to assume that the lady inspectors would also be thoroughly qualified and well chosen? I am assuming an equal amount of capability on each side. My impression is that a man, for this particular class of work, is preferable to a woman.
772. We know that men have a better training for business than women; the only question is whether, in certain cases, a sympathetic woman will not elicit certain delicate information that a young inspector might not elicit? It is my impression that a keen sympathetic man would be more likely to elicit the information than a woman. That is my impression after going through these cases. I know what they tell me.
773. How many women were admitted into the Lying-in Home in 1897? 302.
774. How many of them were married, and how many of them were single? 246 were unmarried and fifty-six were married.
775. How are these people classified or sorted out? They are very badly sorted out. The classification is most unsatisfactory. We have no proper means of classifying them.
776. You have not sufficient wards? No.
777. So that a respectable woman may be in the same ward, and when convalescent in the same room, with women who have had any number of children? There is no proper classification. We have tried to persuade ourselves that there is, but in my opinion there is not.
778. What was the daily average of women in the institution in 1896-97? Roughly speaking, the daily average of women for confinement is, I should think, seventy.
779. How many beds are there in the hospital? In the long ward there are thirty-six beds.
780. Fifty-five are given here? That would include those waiting for a week or two after confinement.
781. How many nurses are employed? We have six official nurses with assistants.
782. Does that number include those that are learning? No; we have about fifteen pupils and about twelve qualified nurses.
783. And what are those nurses paid? They average about £52, £40, £30, and board and lodgings.
784. The hospital is visited by students for purposes of instruction? Yes.
785. Do they reside on the premises? They have a room which they sit in. They have to wait for cases to come on. We allow them to sleep there now, but we do not provide them with food.
786. How many students are there on those terms? They average about ten. This year we had not a sufficient number of patients to provide them for their studies, and some went to Dr. Graham's hospital.
787. On what terms are the students taken? The charge is £5 5s.
788. For how long? The term generally runs for three months.
789. Is the institution put to any expense on account of the students? No; there is no expense.
790. What about firing and lighting? That would be very little expense.
791. The institution cannot be said to make anything out of them? I think they make something.
792. What other institutions deal with maternity cases in Sydney? Dr. Graham's Lying-in Home, the Blue Ribbon Army, Ardill's, George Lewis' Lying-in Home, St. Margaret's Home, in Elizabeth-street, and the Salvation Army. The Salvation Army do not take many cases. There are, of course, some private lying-in homes.
793. I suppose they are registered? They would be under the new Act.
794. Have you many inmates with relatives who could support them? No; they come to us in absolute poverty. The class of person from whom the subjects of the Benevolent Asylum are recruited are the commonest kind of servant girls, house drudges, who have been away from their parents for years. They either do not know where their parents are, or their parents are very poor.
795. Have you ever known of any such cases? Yes, I have. I have a little form in the office which I send parents who I think are likely to be able to contribute, but the results are so poor that it is hardly worth the trouble.
796. Have you had any experience of other institutions of the same kind elsewhere? I have.
797. What difference have you seen in reference to the management? There is a great difference in regard to the way the work is carried out in this respect. In Brisbane, at the Lady Bowen Hospital, which receives as many confinement cases as the Benevolent Asylum does, they take absolute labour cases. They cannot go and wait a long period before confinement, nor stay a long period afterwards. They are simply there for their actual confinement. We found that we could not manage that in Sydney. In Brisbane, where there is a small population, the Rescue Work Societies, the Salvation Army, and the Infants' Home receive these women first of all at the first stage, and as the period of labour approaches they are sent on to the Lady Bowen Lying-in Hospital, and each Rescue Society takes its own subjects with the infant back again. It struck me that if that could be managed in Sydney a great expense would be saved to the Government, because the Government is really the life of the Benevolent Society.
798. That would involve that there must be some organisation to keep the woman until she was very near confinement, then send her to the hospital and to care for her as soon as she was fit to be moved again? Yes; then in Brisbane the Government have expense in another way, because the places where they do this work are subsidised by the Government. They get a lump sum.
799. Do you see much advantage in that if a woman has to be maintained so many days before confinement and so many weeks after—is there any advantage in her being maintained outside instead of inside the lying-in home; suppose you applied the system to Sydney;—can the women not be maintained for a few days before confinement and a few weeks after as cheaply in the lying-in home as scattered all over the place? I do not know that they could be. In our case the Government would absolutely keep the woman at the lying-in hospital, but if the Salvation Army had a patient and took her away when she could be removed from the lying-in hospital, the Government would be greatly relieved in a case of that kind.
800. *Mr. Powell.*] Some of those institutions are partly self-supporting? They are. The Infants' Home, Brisbane, I was speaking of, where they receive cases before confinement, has a Government subsidy of only £200. The work of the inmates amounts to nearly £800, and the public subscriptions to only £8.
801. So that the women may be employed up to a certain time? Yes; if you can get the work.

E. Maxted.
15 July, 1898.

802. Could you do that in the Benevolent Asylum? No; with the mixed character of our work it would be impossible there. In our case so much labour is lost. Suppose a woman in good health has a child, and she is capable of earning something. In Brisbane she is made to do so, and they have obtained first-class results. Very little is obtained by public subscription. The place is supported by hard work.

803. *President.*] Have you given any attention to the literature on the subject of such institutions as you are managing, and the giving of outdoor relief? Yes, I have. With regard to relief in other countries as compared with the system here, I find that in England, where outdoor relief is given, the amount granted is very much larger than we give.

804. Perhaps it would be better if you thought over the matter and then gave us your views—it is a thing which requires a little consideration, unless you are prepared to give us your views now? I may state that I have read that the system of outdoor relief is very unpopular throughout Great Britain.

805. *Mr. Powell.*] With the people? With those who have to administer it.

806. *President.*] If you would like to take time to put your ideas in order we should be glad to have them later on? I have written some articles on the subject. Would they be of any value if I sent them to you.

807. If you will look up those articles, and give the pith of them in the form of a statement, that will be the best;—have you ever heard of any case in which a lying-in hospital was carried on in a building that was also used as an asylum? No.

808. And as a medium for the distribution of outdoor relief? No. I never heard of it being carried on anywhere on the lines on which we do.

809. Do you approve of these different departments being carried on in the same institution? No; I disapprove of it. I would briefly give the grounds on which I disapprove of it. A large, or even a small number of pregnant women walking about the buildings or about the yards within sight of a number of growing children must necessarily have a pernicious effect upon the minds of those children. Those women are constantly walking about in view of children 13 or 14 years of age, and I think that is absolutely wrong.

810. Are you aware of the opinion of the medical staff upon the subject? They have not expressed their views upon the matter.

811. Have any representations been made to the Government in reference to the establishment of a maternity hospital in a suitable building apart from the asylum? Yes. I have mentioned what was done about Utimo House, where proper separation could be made.

812. What was the reply? No reply—no result at all.

813. Were the responsible Ministers interviewed? Yes, both by deputation and by letter; from year to year the strongest representations have been made.

814. Was the position recognised, by the Minister;—did he acquiesce in the argument? The general tenor of the reply seemed to be that the matter would be placed under the consideration of the Government, and there it ended.

815. Was there any proper system submitted to the Minister—any definite system? Simply that the work of the Society could be better carried on if the present site were resumed, and the Society were furnished with means to carry on the work in the way that they thought proper with a proper classification of the various departments of the institution.

816. Was there a scheme formulated with regard to the lying-in hospital, dealing with the children, and the administration of outdoor relief? Not absolutely formulated, but the argument was that the work could be carried on better under a proper system of classification.

817. The whole cost of the lying-in hospital is defrayed by the Government? Yes. As you see, the allowances for the last three years have covered the whole cost of the institution.

818. So that it would not necessarily involve any increased cost if the Government were to take the whole of the lying-in business away from the institution? No; because the Government have been paying the whole cost of maintenance for the last two or three years. They are paying for everything except finding the building.

819. With the exception of finding a building, it need not entail any greatly increased cost? Of course, I do not know what the expense would be under different conditions, but as you are paying the whole cost of the internal management of the institution at present, I presume that it would not cost more for the Government to take it over altogether. It was the original agreement with the directors that the Government should bear the whole cost.

820. That being so, how is the statement of the cost prepared for the Government? There is no statement of cost prepared at all. The Government say they will allow so much per head for the inmates. If the allowance pays for that year the Society is fortunate; if it does not pay, they are at a great loss. I can call to mind that some years ago the Society lost a very large amount because the allowance did not cover anything like the expenditure.

821. Does this £28 a year apply to women who are in for confinement? For all women and all children. Of course, the amount is £14 per child. If the expenses of the internal work of the institution exceed £28 per head, the Society loses; if there is a profit, the Society gains. I can recollect that the Society lost some hundreds of pounds in one year.

822. The Government pay, practically, per head? Yes. If it does not pay the institution that is their loss.

823. Have you ever made a fair gross estimate of the separate cost of the lying-in department? Yes; but it is only based upon a calculation. It is such mixed up work that it is most difficult to get at it. However, I got the services of a professional accountant a few weeks back, and I asked him if he considered that the basis of the calculation was a reasonable one, and he said it was, but it is only a calculation.

824. It is really more an estimate than a calculation? Yes.

825. The cost, as you estimate, includes maintenance of the women before confinement and the maintenance of them after confinement? No; I could not calculate that before and after.

826. You estimated that it would cost about £28? You reckon two children to one woman. We make our calculation in a different way. My calculation is for 1895; cost per head, £22 10s. for a woman and also for a child. For 1896, £21 3s.

827. Does that calculation extend over the time before and after confinement? No; it is merely based upon the daily average of the whole of the inmates.

828. Then it does include the period before the confinement? It includes everything. 829.

829. *Mr. Powell.*] You run the time into days? We take the daily average of the gross expenditure in the in-door department. E. Maxted,
15 July, 1898.
830. As a matter of fact, the Government do not know how long these separate cases are in the institution? No; but of course they have every facility for finding out.
831. They would not know from your returns, you charge the Government by the average? Yes; we make out the daily average sheet; then the Government officer comes, and says, "Let me look at your admission and discharge books." There are so many from the previous quarter, of which he has a list, and so many from the present quarter, and he has every facility to find out how long those women have been in the institution.
832. There is no point gained in that, if they are paid for on the average system, the length of time for each case not being taken into account? No.
833. *President.*] You have told us that in very few cases are the inmates able to pay anything towards their cost? Very rarely.
834. Have you ever known any payments to be made? Yes; they are deducted from the account at the end of the year. I can give the deductions for last year. There is an admission fee of £2, which would be refunded to the Government.
835. I want to know whether the payments made to the institution are handed to the Government? Yes; the first quarter in the year.
836. Do the majority of the lying-in cases come from Sydney or from the country districts? I think the bulk of them come from Sydney, but many come from the country.
837. *Mr. Powell.*] Is not that a little misleading;—may they not come from the country and stay a short time in Sydney before they appeal to you for help? Yes; but I think that the bulk of them belong to Sydney and suburbs.
838. *President.*] You recently extended your operations by attending to women lying-in at their own homes? Yes.
839. Are there many cases? Very few. I do not think we have had more than six or eight cases this year.
840. Do you find in the few cases you have attended to that the thing has been appreciated;—I suppose they are married women? Yes, married women—most extreme cases of destitution. The nurses have told me that the poverty in the homes was wretched, and that it would have been better if the women would have come into the institution; but they object to it.
841. What do you supply? We supply a professional nurse, and if the husband cannot provide nourishment we supply it from the institution.
842. How long do you continue that? For about a fortnight or three weeks.
843. Do you know what each confinement case, in which relief is given in their own homes, costs? They are so few that it would only entail the cost of the attendance of a nurse from the institution two or three hours a day, and a little grant of ordinary relief.
844. A little extra liberal ration? Yes.
845. Is the tendency to this system increasing? No, it is not.
846. What conditions do you lay down;—do you attend in that way to anyone who applies? A woman comes to the institution with a recommendation, and asks to be assisted in her own home. On that recommendation we would send a nurse, and if the nurse saw that there were any signs of the person being well off, we should expect her to report that; but she generally reports the reverse.
847. Is it in some cases very difficult to ascertain whether you are relieving people who are in a position to pay something? Are you referring to people relieved in their own homes?
848. Yes, or otherwise? I do not think there is much difficulty, because the class of persons who come are so poorly dressed, and they are all young women. They are not like old women, who would be likely to resort to penurious appearances for the sake of deception. I think that that part of the work needs very little inspection. They are absolutely driven to the institution. If they could go anywhere else I am sure they would rather go.
849. Do you make any effort to affiliate the children? I do.
850. I think you said the other day that that part of your business which you consider very important had been interfered with by other duties? Yes, by the growth of the general work of the institution.
851. What method do you adopt to do this, and how far has it been interfered with by your other duties? First of all, the application for admission comes before the Ladies' Committee; then the next morning she comes to me for an admission ticket, and I ask her about the history of the case, and whether there is any chance of affiliation. That would need a good deal of time, because the women are reluctant to tell anything. You have to coax it out of them. Possibly, the time taken would be about a quarter of an hour to one case. I find that I cannot do that now. What I am doing now is this; when a woman is going out she comes to me for her discharge, then I question her, but I soon find a lot of people waiting in the hall to interview me with regard to food, and I have not proper time to attend to it.
852. You find that the growth of business is so great, and the staff is so small, that you have not time to attend to this, and you consider it a most important part of your duty? I do.
853. Do you take anything in the way of a declaration from these girls? I have thought it over. It was suggested to me by an officer of one of the Courts years ago. I thought it well over, and I mentioned the misstatements that were made, and he made this suggestion. I considered the matter, but I thought it would be rather too harsh a proceeding, as the girl is in great trouble, and a large amount of sympathy is felt for her; some allowance should be made for her misstatements. As a matter of fact, the statement on oath would put her in the position of being guilty of perjury. It would be rather harsh.
854. It would be when the confinement was coming on, but would it be when she was going out? There is a good deal of romance in these cases. When a woman is fond of a man she will try to shield him, and in some of the cases the girls will swear anything.
855. *Mr. Powell.*] You told us you had great difficulty in fixing the paternity? Yes; but I used to get better results.
856. To what extent were you successful when you had more time? I daresay we got results in thirty or forty cases in a year.
857. How much money would that represent? That would go to the girl. The Society would not get anything at all. The girl would get 5s or 7s. 6d. a week.
858. You did succeed in thirty or forty cases a year? Yes, quite that number. 859.

- E. Maxted.
15 July, 1893.
859. *President.*] Is it a fact that some years ago you obtained statements from women as to the supposed fathers of children, and that you found in most cases that the wrong names had been given? Yes; I have signed statements here. I took statements in the presence of the former matron of the institution, who sat close by.
860. Having got a statement from a girl, have you power to bring the man into Court? We have not any power at all.
861. Do you think you should have that power? Yes; I think it is absolutely necessary, but it would want to be exercised with a large amount of caution and care.
862. Do you think there should be legislation giving that power? I do. There is in other countries.
863. Do you think there should be power to do that before the child is born? Yes; to save the Government the expense of the wrongdoing of the man who is more responsible on account of the woman's helplessness than he would be when she is actually able to work for herself. I cannot see why you should have to wait until after the confinement of the woman. The man is just as responsible when she is pregnant as when the child is born.
864. You think there ought to be legislation to enable the institution to do that? I think so.
865. *Mr. Powell.*] There is a weak point in that. I do not see how you can legislate to enable you to take proceedings before the child is born? The woman is pregnant—a medical man can certify to that.
866. There is no legal evidence? A medical man could easily ascertain.
867. *President.*] I understood you to say that these girls are almost entirely in a very poor condition in life? A very poor condition. For instance, it is a rare thing to have anything approaching a fast woman coming into the institution. It would be a very rare thing to find a barmaid there, because the barmaid class, I take it, are more intelligent than the common drudge class of women workers.
868. *Mr. Powell.*] Do you think that these unfortunates are on the average of lower intellect? I do.
869. *President.*] You have told us that there are no separate quarters for the married women? No.
870. You isolate them as far as you can? Yes; as far as possible, but that is not sufficient.
871. *Mr. Powell.*] Is there any line drawn at all;—does a married woman know if the occupant of the next bed is an unmarried woman? They all know the married women.
872. *President.*] How often are single women readmitted? As often as they come, and have nowhere else to go to, even if it is five or six times. On that point I should like to mention the principle that is adopted by some charitable institutions. A woman pregnant was brought to me the other day from one of the benevolent homes of the city. They would not receive her, on the ground that she had had a previous child, and they recommended the Benevolent Society to do work which they took exception to themselves. It occurred to my mind as a peculiar form of philanthropy which was adopted in that and some other places.
873. Do you know, as a matter of fact, that girls go about from one institution to another under different names? Yes; I know they come to our place with different aliases. One came in two days ago under the name of Carroll, but we found out that her name was not Carroll.
874. Do you think it is very objectionable that young women who are comparatively virtuous should have to associate with degraded women? Yes; I think it is most demoralising that an unfortunate girl who has been led astray, perhaps through love, and not from vice, should have to associate with degraded women who commit themselves from time to time. It is likely to have a bad influence.
875. They are permitted to mix together absolutely? Yes.
876. The vicious and degraded woman can, if she chooses, use all sorts of language? That would be detected, and I must say that they are generally well-behaved in the institution. Dealing with young people is not like dealing with old people. The patients are nearly all young people, and are generally tractable.
877. On their good behaviour? Yes.
878. Then you are entirely against the present arrangement, by which these women at all stages are compelled to mix together? I am. I have some reports here, dated 1887, showing the bad effects of it—"Children's separation from Pregnant Women"; Unmarried Women—Separation Ward required." I have always been met by the argument that the Government are going to resume the property, and that it is of no use attempting to make any change. Every time I have gone into the matter that has been the invariable answer by the Board of management.
879. So the whole question has been awaiting the decision of the question in regard to the building? Yes. I have reports under explanatory headings, some of which I will read:—"Visit to Newington Asylum, 1896," "Finance," "Foundlings frequenting the Asylum," "Finance Investment Account," "Separation of Children from Pregnant Women," "Separation of Women from unmarried Women," "Illegitimacy," "Rookwood Reformatory for Aged Couples,"—a large number are getting outdoor relief, and I think they could be cared for better in an institution—"Deserted Infants," "Aged Couples," "Necessity for Almshouse," "Unmarried Women," "Lying-in Homes," "Labour tests for unemployed Men," "Baby-farming," "Work done by the Benevolent Society, Indoor and Outdoor Relief," and so forth.
880. Take the case of a single girl who comes from the country for confinement, what becomes of her after she has been confined? Sometimes, when the woman comes down, I find her sitting in the hall with a bundle. I ask her where she comes from. She says, perhaps, from Bourke. I ask, "Have you a recommendation?" She wants to come in at once. She says she has been at service. The police have got her a free pass down to Sydney. She says she is within a month of her confinement. I tell her to call in two or three weeks' time; but she says that she has no money. We must necessarily admit a case of that kind; and when the child is born, the woman having no means, we cannot send her back to the country. We do not know what to do with her. She will probably remain in the institution for months. It is one of the weak points to know how to dispose of these women after confinement.
881. She has really to remain in the institution? Yes; until she can find employment.
882. Or you can find employment for her? Yes.
883. *Mr. Powell.*] At the expense of the Government? Yes.
884. *President.*] And what about the child? The child goes with her. It is a very desirable thing that the child should go with her. We could easily turn her out without the child.
885. Would it not be much easier for her to get employment without the child? It would be.
886. Is it not very difficult to get a place for a woman who has a child? It is extremely difficult.

887. So that the State has to support the woman and child till she gets employment? Yes.

E. Maxted.

888. Would it not be better to get employment for the woman—because she is liable, to some extent, for the support of the child—and send the child to the Infants' Home? That opens up the question of a foundling hospital. If that were once started the social work of the State would be greatly increased. There are hundreds of women who would leave their children in the institution and go to service, and you would lose the run of the mothers altogether. You would have a large number of illegitimate children thrown on the State that you would not have under existing arrangements. They would practically desert the children, and you would really have the French foundling hospital.

15 July, 1898.

889. So that whilst you admit that this is a weak point in the institution, you think it is better than the other plan? I think it would be better on the whole. There is one great authority on the matter, a most intellectual woman who has given a great deal of study to the question—a woman of twenty-five years' service—Mrs. Elrick, the former matron. When she went to the society first of all, she argued the theory out in the way you are doing, and she came to the conclusion that that was the better way in the interests of the State, more economical, and more humane too, because a child after a certain term becomes fond of the mother. At first the mother does not seem to care for the child, but after they have been together for awhile the natural love comes to them and the mother does not want to part with her offspring.

890. *Mr. Powell.*] Do you not think that the same state of things might be brought about if the hospital were simply a lying-in hospital, and a woman had to go out with her child at the end of a reasonable time; she would then find a home in some other institution, and they would probably have greater facilities than you have for obtaining employment for her? The other institutions are all so crowded that they cannot take them. In Brisbane it could be done.

891. Do you not think that the chances in those institutions of obtaining employment for these women will be greater than any that you possess? Far greater.

892. *President.*] Do you think that if you had a properly-organised employment agency it would facilitate the finding of employment? A kind of Labour Bureau for that particular class of work?

893. Yes? It would if it could be brought about.

894. Could you not make use of the existing Labour Bureau? No; they do not deal with that class of cases. A few months ago we advertised in one of the Bathurst papers, thinking that the farmers might want girls. We advertised for employment for unmarried women with infants at a nominal wage, but we got no response.

895. Then, whilst the present system is not perfection, you really have nothing better to propose? I cannot propose anything.

896. Do you know whether, when the mothers leave the institution in that way, they put their children on the State later on? They may do; in fact, they have done it. A mother will give a woman so much a week to mind her child while she goes to service. She will pay for a few weeks, and then go away. The custodian of the child not being able to find the mother applies to the State Children's Relief Department, for the child's admission.

897. Does not that rather point to the thing I have referred to? It is not so general. There is a warrant out against the mother for desertion. It occurs, but it would not occur generally.

898. Have many of the children born at your institution come back to you? There are a few in the year—not many, now that there is an Infants' Protection Act, but formerly child desertion was very common; now it is comparatively rare; we do not receive the same number of foundlings that we used to.

899. Do many women come to you from the other colonies? Very few indeed. They are natives of different countries, but most of them have been in the colonies for many years.

900. How many a year have come for the express purpose of being confined? This possibly might be inferred from reading the report without having time to dip more deeply into the matter. For instance, it says that in the lying-in hospital 211 were natives of New South Wales, five were natives of Tasmania, and nineteen of Victoria. Even from these figures you can see how many come in a year. There are five Tasmanians, nineteen Victorians, eight from Queensland, one from Western Australia, and three from New Zealand.

901. There is a small number of cases of women who come over expressly to be confined? Yes.

902. After those women have been confined, what is done to return them to their own colony? They remain here; they have no means of getting back.

903. So that their children may become a charge on this Colony? Yes; but I do not think it is a serious matter—the number is so small.

904. Have you ever known any of these women to return to their own colonies, leaving their children here? No; that would be a case of desertion. We could not trace a woman who went away; we should merely know that the child had been deserted.

905. Have objections been made to the use of the building as a lying-in hospital on sanitary grounds? Yes; the medical staff have, from time to time, complained for many years, and these protests have been upheld by the directors, who have made representations to the Government concerning them. At the time of the outbreak of puerperal fever the medical staff made a great objection.

906. Have you compared the death-rate at the lying-in hospital with the death-rate in other hospitals of the same kind? Yes; I did for the last year. I compared it with the death-rate at the Queensland lying-in hospital, and the results were about the same, except when the puerperal fever broke out; but, of course, that is not a fair test. Under ordinary conditions the results are extremely good. I think that last year there were three adult deaths in the Brisbane institution.

907. There has been no serious mortality in your institution? No.

908. *Mr. Powell.*] The deaths are not necessarily due to the condition of the building? No; but they consider that puerperal fever might be due to it: the medical staff favour that theory.

909. *President.*] Compared with other institutions of the same kind, it does not compare unfavourably as regards mortality in ordinary times? No.

910. You are comparing it with colonial institutions? Yes.

911. You had an outbreak of puerperal fever some years ago? Yes; four years ago.

912. Did that involve the closing of the hospital for a time? Yes, and the taking of a new building, and, under the supervision of the Board of Health, the building was put into what was considered a sanitary condition.

E. Maxted.
15 July, 1898. condition, I believe. We got a certificate from Professor Anderson Stuart to that effect. It was a building in Flinders-street. The Board of Health supervised the placing of it in a sanitary condition. We took the patients there, and puerperal fever became worse there in a few months than it was in the Benevolent Asylum. There were six or seven deaths in a few weeks. Then the patients, by directions of the medical officers, were taken back to the old building.

913. What was supposed to be the cause of the outbreak at the Asylum? It could never be properly discovered. In a hospital it spreads quickly. A woman coming in with erysipelas is liable to spread the contagion.

914. Were there any deaths resulting from that outbreak? Yes; I think there were twelve deaths altogether, with the patients who were removed to Flinders-street and those in the asylum, in a very short space of time.

915. Did the deaths occur in the temporary building or in the asylum? In both.

916. Then the inmates were returned to the asylum from the temporary building owing to the still more severe outbreak at the temporary building? Yes; but I may say that since that time we have had the walls thoroughly scraped down to the bricks, and two or three coats of paint put on and the place properly deodorised, and the results have been very good.

917. You say that women, after their confinement, are sometimes detained for months waiting for employment? Yes; sometimes more than a month. If a lady wants a servant, the women are called in, and she will pick the most suitable, and the most stupid will remain for a very long period.

918. When they remain there for months after their confinement do you get any work out of them? Yes; they do washing; they generally work in the institution.

919. Suppose there are more than are required for the ordinary household duties, have you any work test of any kind? No; but they are sometimes employed as wardswomen if they are suitable.

920. And are you sure that women are not kept there unnecessarily, and work not found? Not exactly that. There are certain duties to be performed in the institution, and the work is given to wardswomen and they get a small gratuity for it.

921. How long would some of these women be kept in the asylum—for years? There are two or three cases where they have been.

922. With their children? Yes. We are making out a return, and you will get the particulars.

923. They are kept there with their children, possibly, for years, and receive gratuities as well? In one or two cases women have been there for years, but it would be an exceptional thing.

924. How is the exception justified—that is what I want to know? Suppose you have a very useful woman, and she performs the work of the institution satisfactorily, the matron tells me that if she were sent out it would be difficult to find another to take her place. The argument is, that she is doing the work satisfactorily, although the expense is borne by the Government. It is sometimes a question of turning out an inmate who does the work satisfactorily and engaging a nurse from outside at the expense of the institution. If that system were generally adopted, then, of course, the allowance made by the Government would be quite insufficient to meet the expenses of the Society.

925. These inmates, then, are practically the domestic servants of the institution? Many of them are what we call wardswomen.

926. Are there any women detained there for a long time who are not doing the work of the institution? A large number are what we call unemployed women, and have been there many months.

927. What do you call a large number? I should think there must be fifteen or twenty who have been in the institution a very long time.

928. Fifteen or twenty women, who have been a long time in the institution, practically doing no work? No; they are unemployed.

929. Is there any solution of that trouble? I do not know that there is.

930. Have they children? They are all women with children.

931. Why are they not sent to Newington? They are all able-bodied women. They only take the aged poor at Newington. They will not take strong young women fit for work. If they would take a woman with a child at Newington, our difficulties would be over at once. The child is the difficulty.

932. *Mr. Powell.*] I will take one or two of the cases;—there is the case of the woman Curtis, a laundress? Yes; she has a child.

933. She has been employed by the institution for two years and seventeen weeks, is that so? That is correct.

934. During that time, she has received payment from the institution, amounting to £42 7s.? Yes.

935. The Government have paid the institution £65 6s. 8d. for her maintenance, and £32 13s. 4d. for the maintenance of her child; that is to say that, in all, the Government have really paid £98, and the woman has received £42 7s. from the institution; she is an able-bodied woman able to do the work of a laundress, and received payment of 7s. a week during the whole of the two years seventeen weeks, and at the same time the Government are being put to an expense of £98 in all? Yes; that is quite correct.

936. Is that an exceptional case? With regard to the length of time, and the payment of the 7s. a week that is rather exceptional.

937. We will take another case, the woman Player, a seamstress—she has been employed for two years and seventeen weeks; she has received £42 7s., at the rate of 7s. a week, during the whole of that time, and she has cost the Government £91 18s. 9d. She is an able-bodied woman, or she would not have been employed? They are both really useful women. With regard to the system of gratuities, a letter was sent in to you explaining how long the system has existed, and that the Government officials who had come down from time to time, had every opportunity to take exception to anything in that particular form of the society's work. It has been going on since 1862.

938. Take the case of the woman Ritchie. She appears to be the matron's servant; she has been employed for two years and seventeen weeks, and has received £30 5s. as wages, and the Government have paid £50 6s. 7d. for the maintenance of herself and child during the whole of that period. Is that an exceptional case? It is an exceptional case with regard to the employment of the woman. Two years ago the Committee had a meeting to decide whether the matron should have a servant, the previous matron had one, and it was decided that she should have a servant—that her payment should be 5s. a week. Since that period the woman has remained on the books. It occurred to me four or five months ago that it was questionable whether it was right that the matron, who gets a salary, should have a servant. ■

servant, and that servant paid for by the Government. It was very doubtful whether the woman should be in her present position at the Government expense, and I took her off the books. I mentioned the matter to the Committee, and their minds were much exercised in this direction, that if the principle of employing outside labour is followed out generally, the bulk of the Society's revenue from the Government for indoor maintenance would be gone. The Society could not carry on its work, and it would be in contravention of the original conditions laid down by the Government in 1862, that the cost of the institution should be borne by the Government. It is a matter that wants bringing to some practical and absolute understanding. I may mention that you are quoting a few exceptionally long cases. In these cases the amount of money given is exceptionally high, and these isolated cases are picked out from some hundreds and hundreds that are not like them.

E. Macted.
15 July, 1898.

939. Then, take the case of the woman Gwynne, a wardswoman: she has been employed continuously for two years and seventeen weeks; she received in pay from the institution £25 Gs. 6d., and the institution was paid by the Government £98, covering the whole of that period. Then there is a person named Gilchrist, who was engaged for two years and seventeen weeks; there is no child in that case? She was taken off the books; she is not a charge on the Government.

940. She was a charge on the books for one year, when she had no child? That was an accident; when I found that the child was gone I took her off the books.

941. She received £28 according to your return? She should have been turned out if she had no child.

942. Then there is the woman Murren in the isolation ward; she has been within four weeks of two years there; she received £12 Gs. from the institution, and £83 was paid to the institution by the Government for the maintenance of herself and child; if that woman had been outside she would have supported that child? Yes; if she could have got employment with the child.

943. *President.*] It is rather inconsistent; you say that these women are exceptionally useful, and if you can find employment for the less useful women surely you ought to be able to find employment for those who are useful? Yes; it is a difficult question to deal with.

944. If these women are able to do the work, it is a difficulty in my mind whether they ought to receive money at all? I do not think they ought; if they get shelter, that is sufficient payment for the work they do.

945. So long as they are paid a considerable amount, there is no inducement for them to find other employment; but if you do not give them any money there will be an inducement? These women help the matron of the institution. I suggested to the former matron that the gratuity system should be abolished on this ground, and the argument was used, that if we do not give these women 3s. or 4s. a week we cannot get our work done, and then if we cannot get the work done we shall have to employ people from outside to do it—then our revenue is done.

946. You say that there are fifteen or twenty unemployed women;—why not distribute the work amongst all those women? If a matron gets a good laundress it is difficult to say to the matron, "That laundress must go out; you must make another take her place."

947. You have only to say, "She will not be paid; and you have from fifteen to twenty unemployed women to draw from";—that is one point I want to ask a question about: why should the matron have a servant? She is engaged pretty well at night attending to the sick, and wants somebody to look after meals. She is up at any time, night and day, being at the beck and call of all patients. She has the general supervision of a large establishment, and her washing, and so forth, have to be done.

948. *Mr. Powell.*] Do you not think that the women who remain in the institution, and who are able to work, should be expected to do the work of the institution without charge? The bulk of them do the rough work. The gratuity work is a special kind of work. They do all the washing and all the scrubbing without payment. In an institution with 240 inmates there is a great deal of work. The drudgery is done by inmates, who receive no money at all.

949. *President.*] I understood you to say that the unemployed do no work at all? That a few unemployed do not.

950. Can you not apply any work-test to these unemployed women;—is it absolutely unavoidable that those people should remain there at the public expense? I have tried my best to get them out of the institution; but it has always been a failure, on account of the mental condition of the women. They are so stupid, and so dirty generally, too, nobody would have anything to do with the bulk of them.

951. Do these unemployed make any effort of their own to get away? Not the slightest. I muster them every month, ask if they have any friends, and tell them they must go out; but they show a kind of indifference, never saying a word. The same thing occurs the next month, and so it goes on.

952. Do they get the same diet as the working women? Yes; they all get the same diet.

953. Could you not differentiate against them in that way? Some of the working women get a little extra tea or sugar.

954. Assuming that the working women have a sufficiently acceptable food now, could you not give the idle women something less? We give the workers a little extra tea and sugar at 11 o'clock. There is a small difference, not on the ground you are referring to, but because we think they are deserving of a little extra.

955. *Mr. Powell.*] Do you think at the present time that the lying-in hospital is a loss to the institution? It is rather hard to answer that. The only way to get at the profits or otherwise is to take the expenditure and the inmates as a whole, and see what the Government give.

956. *President.*] Do you remember a woman named * * * an inmate of the institution? Yes.

957. Did she not remain in the institution for a very long time with her child? Yes, a very long time.

958. Under what conditions? She came in as an inmate the same as the others, and was placed on the gratuity list, and subsequently as her salary was increased she was taken off the books, but her child was left on the books. The child was left a charge upon the Government, but the woman, by reason of her salary, was no longer a charge upon the Government.

959. Did not the Government disallow an amount? Yes; they made a deduction, and the child has since been taken off the books.

960. How do you justify this woman * * * being made a charge against the Government? It was some accident on my part through not looking thoroughly into the matter. I saw that she was getting a salary, and she was taken off the books. I think the child should have been taken off too. There should be some special lines laid down by the Government as to what patients shall be charged for, or what patients

E. Maxted.
15 July, 1898.

patients or inmates shall not be charged for. It has been going on all these years, and I have been simply following precedent—precedents which have been authorised by the signatures in the account books of the various Government officers examining the accounts of the institution during all these years. It has simply been a matter of precedent. It is no arrangement of my own at all. It has grown up during all these thirty-six years. It is really most difficult to know what to charge, and what not to charge, as a matter of fact.

961. *Mr. Powell.*] What Government Department do you deal with? We send all vouchers to the Chief Secretary's office, and one to the office of the Charities Department, and an officer is sent down to check the accounts. Then that voucher is sent down to the Chief Secretary.

962. Do not the Audit Officers interfere? The account is subsequently sent on.

963. Do they audit the books of your institution? No.

964. *President.*] These unemployed women may remain indefinitely? You may think so, but they do not. We seem to get them out somehow or other.

965. That brings me back to this point, as to whether you have a proper organisation for getting employment? We have not.

966. You say they do not remain indefinitely, because ultimately you get them out; then I would ask whether, if there was a proper organisation, you would not get them out sooner than you get them out without any organisation at all? Yes; if some organisation could be devised, but the difficulty is to devise it. If the Government, or some properly constituted body, could organise some reception-house in which they could be received after they have been in the asylum for a certain time, it might have a beneficial effect. It would be well known that women were waiting at the depôt for employment. At any rate you would know that there were no women kept in the asylum longer than they ought to be.

967. If a woman is so utterly useless that she remains there with her child for many months absolutely idle, it would be much better to send the woman, young or old, to an institution like that at Newington and take her child—such a woman is unfit to take care of a child;—looking, not so much at the woman, but at the interests of the child and of society, would it not be better to support the child and send the woman to Newington? It is always a very harsh thing to separate mother and child. We have sent many women to Newington—women of weak intellect, who have been there a very long time. We have consulted together and said this will go on to the end of time unless we can get these women of weak intellect out of the institution. The scene has been a terrible one to witness when the mothers have to part from the child. She generally had sufficient intelligence to know that she would never see the child again. We have often sent women of weak minds to Newington and kept the children when we found that they were likely to remain in the institution indefinitely.

968. Do you think that the Labour Bureau would be of any use to you in getting employment for the women? I should think it would be.

969. Would not that be the organisation I referred to? I think it would be a very good idea. The Labour Bureau have facilities for inquiring throughout the country for employment for men, and it might be made to apply to women. It would be an excellent idea to try it. When they had instructions from the Government that they had to do that particular class of work they would know it was part of their duty; but if asked in the ordinary way they would not do it.

970. If the committee decided to do it I presume they would approach it in a proper way—probably through the Minister? Yes.

971. *Mr. Powell.*] If these labour offices in the town applied to you for a woman, would you pay their commission? No; we should not pay them anything at all. They would be paid by the employer. Mrs. Gardiner applied to us for the women whom we sent, and she got her fees from the employers.

972. *President.*] You think you might be able to make some use of the Labour Bureau for getting employment? I think it ought to be managed somehow.

973. Have you any acquaintance with the scope and the working of the Children's Protection Act? Yes; with regard to the provisions of it relating to desertion.

974. Did you give evidence before a Select Committee on the question of the protection of children? Yes.

975. What effect has that Act had upon the operations of your institution? A very marked and beneficial effect, in this way: that whereas we receive many children who were left with women of, I think, very doubtful character to care for, and were deserted, these women custodians would make application to the Government and get an order for the admission of those children on the ground of their mothers' desertion of them. The admission of that class of children are comparatively few, because the receiver of the child must register herself, and she has a responsibility.

976. Then the Act has had a good effect? Yes; much better than I anticipated. It is a matter that I took a great deal of interest in.

977. Is there any lying-in home in Sydney or suburbs outside of those that are controlled under the Children's Protection Act and not registered? No; they all have to be registered. I do not think they dare have them unregistered.

978. Is Mr. Ardill's home registered? I do not know.

979. *Mr. Powell.*] Do you not know that the law with regard to registering is evaded? It is sure to be evaded.

980. What is the limit? I think it is three.

981. Then, so long as they do not keep more than two in the house they are safe? Yes.

982. *President.*] You have received from time to time a number of special grants from the Government in connection with outdoor relief? Yes.

983. What have those sums amounted to in the aggregate? To £22,000 in ten years, including unemployed relief in 1896.

984. Are you applying for any special sum at the present time? Yes; we are applying for an increased amount.

985. Is that for outdoor relief? Yes.

986. What sum are you applying for now? For £6,000 in all.

987. Is that on account of your having had to trench on your capital, or that the relief you are giving is inadequate? We are heavily in debt, and we have not sufficient funds to cope with the work. That is the principal reason.

988. Have not the operations of the State Children's Relief Act, under which the children of widows or deserted wives can be boarded out with their own mothers, lessened the demand upon the Society's funds? To a small extent only. We are assisting a very large number of widows with children, principally country people. E. Maxted.
15 July, 1898.

989. Has there not been an increase in the number of widows relieved by your institution since the passing of that Act? They have taken some cases away, but they are comparatively few. We sent the whole of the cases on the books to the State Children's Department, but there has been a general increase at the institution.

990. So that whilst the State Children's Relief Board have had a largely increased expenditure, you also in regard to the same thing have had an increased expenditure? Yes; I did not notice that it was so bad as it is.

991. So that instead of being relieved by the operation of that Act you are actually paying more than you did before? Yes; poverty generally has increased.

992. The State Children's Relief Board have increased their expenditure by many thousands of pounds, and ought to have relieved your expenditure in that particular? We had great hopes of it, and the Society agitated for the passing of the Act, thinking not only that we should be relieved of the bulk of the work of assisting widows with children, but, as we could not give them sufficient relief, that it would be more beneficial to the women. The results have been disappointing.

993. How do you account for this increase in your expenditure in this particular line in face of the fact that the State Children's Relief Board are carrying out this work at a largely increased expenditure? I cannot account for it, unless it is that widows in the country or in the far suburbs, who had been previously suffering from the want of assistance from the Government, when this kind of advertisement went forth that the Government were assisting widows with children, then applications became general, and the department found it necessary to assist them.

994. Is there a possibility that the Benevolent Society and the State Children's Relief Board are assisting the same widows? Not the slightest, because we get returns. That has been watched.

995. You are quite sure of that? I am quite sure of it. We have sent widows up to the department to get assistance.

996. Do you know the extent to which the expenditure of the State Children's Relief Board has been increased by the Act? I know it has been very largely increased. The expenditure last year, I think, was £40,000 altogether in the department.

997. Then you really have received no relief, so far as the return shows, from the Act? I know that they have taken over many cases, but it has not been a substantial relief to the Benevolent Society—other cases come in.

998. On what principle is outdoor relief administered. Take the amount first and the conditions of the people;—how do you regulate the amount? We have a scale. It is not strictly adhered to, but the applicant comes before the Committee, and she is asked how many children she has. Some one will say we will give what we call six and six. I minute that, and the next morning my minutes are copied by the out-door relieving officer, and on the scale decided by the Committee the woman is given relief. A woman with one child would get three loaves of bread; a woman with two children four and four; a woman with several children six and six.

999. What checks are there as to whether they are the right people who get the relief—suppose somebody comes on behalf of So-and-so for relief? She would have to bring a letter and give a proper reason why the person could not come herself. A visit would be made, and if the result was not satisfactory the case would be struck off the books, on the approval of the Committee.

1000. At what age does the Committee disallow relief in the case of healthy children, take boys first? It is insisted that they shall go to some employment. If they do not go to any employment some satisfactory reason must be given. In the case of a girl, 14 or over, it would be insisted that she should go to service, or the mother would be told that the case would be taken off the books.

1001. Is it taken off the books? I believe it is generally. There might be some cases which were not, but the reasons would have to be very good. On account of insufficient inspection, a case might be lost sight of, and a woman might continue to get relief, though she had a girl over 14 years of age.

1002. A girl must go to work? Yes, after school age.

1003. Is it in your experience easy for a girl to get work? Yes, very easy.

1004. As regards boys? There is a difficulty. The Committee do not insist upon it so much with regard to boys, because there is a difficulty about getting employment for them. A person is brought up from time to time to explain why her boy is out of employment.

1005. Does not the continuance of relief with respect to boys do away with the necessity to obtain employment? It might in the case of an unemployed man. We are dealing with our ordinary cases, but they are not so difficult to deal with as men who have families. I mean the cases of widows with children. They are generally a very good class of cases. Unemployed men are very difficult to deal with. You do not know whether they drink or are lazy. But in the ordinary class of cases—sickness, loss of husband, and so on—the difficulty is not so great.

1006. I understand you to say that the relief in the case of boys and girls over 14 years of age must be very small? Yes; I should think it would be very small indeed, although the inspection, I think, is so insufficient. I may say that all the cases come before the chief inspector every week, and although he does not inspect such a large number of cases as it is really necessary to do, he is a man with an extraordinary gift of memory. He takes the names of persons, and he remembers their circumstances even months or years after he has paid one visit, so that as these people come before him he will ask a woman why her son is not at work, and so forth.

1007. What is the maximum amount of relief at any time allowed to any family—that is, stores or rent, or both? Six loaves of bread, 6 lb. of flour or meat, quarter lb. of tea, 1 lb. of sugar; in case of sickness a quarter or half lb. of rice. The maximum of rent money is 3s.

1008. Suppose a family get the maximum, what is it worth? The maximum would be worth about 5s. 6d., including the 3s. rent money.

1009. Does that mean the cost to you? It is the contract price. They could not buy it for that.

1010. Therefore, it would be worth more to them? They would have to pay nearly double for it. It would be worth quite 6s. 6d. at any rate.

1011. So that, looking at it from that point of view, if they had to pay for it, it is worth 6s. 6d.? —

- E. Maxted. 1012. And it costs you 5s. 6d.? Yes.
- 15 July, 1898. 1013. *Mr. Powell.*] Without the money, how much would it be? Two shillings and sixpence.
1014. I mean per head, taking the children, too? The value of a single ration would be 1s. or 11½d.
1015. That is without rent? Yes. I estimate that it would cost the institution 11½d. or 1s.
1016. That is the maximum? Yes; the average would be different.
1017. The maximum by way of rent is 3s.? Yes.
1018. *President.*] What checks are there with regard to the rent? Only that they have to bring receipts.
1019. What value do you attach to those receipts? I attach a good deal of value to them with regard to that class of persons receiving relief. With regard to unemployed men, I should not attach so much value to it, as a man might resort to trickery. With regard to the women and aged people, I attach a large amount of value to the rent receipts. I think that, except in a few cases, they would not conceive the idea of forging a receipt.
1020. Here is a receipt from So-and-so for the sum of 3s., signed by So-and-so. The person who signed the receipt was the woman's daughter. The institution has no guarantee that that rent reached the landlord in any form. What is the value of a rent receipt like that;—have you any guarantee at all that the rent in any case reaches the landlord? Only these receipts.
1021. What guarantee is this receipt? I could not conceive that that would occur in a large number of instances. We have on the books six cases out of the 1,100, as far as we can ascertain, in which the recipients of relief are paying rent to their relatives. The receipt in such a case would not necessarily be a forgery if the person with whom the woman is living is a poor person, and cannot afford to keep her. She would be just as much justified in receiving the money as a stranger would.
1022. It is not a forgery, but it is in such a form that it should cause the officers of the institution to make inquiries with regard to it? Possibly it may be known that the person is a relative.
1023. It is not sufficient for the inspector to know; it seems to me that you ought to know? But we have such a large number of cases.
1024. It comes back to a question of insufficient check? If I knew it I would not take exception to it, assuming that the family were poor, and could not afford to shelter the woman without the rent money. If the money is paid it is as good a case as if the rent were paid to a stranger.
1025. Assuming that the woman is very poor, and that the relative, who, perhaps, rents a room or two, is also very poor, no exception should be taken on that ground; but should not the fact of the receipt being given by a relative cause an inquiry? It should be inquired into.
1026. Should not the inspector, from the very form of that receipt, have been put to inquire into it;—is not the receipt one which should challenge inquiry? I conceive it to be within the bounds of possibility; and it is most likely that in this particular case, when the inspector wrote his report, So-and-so was living with a relative, and the money was paid.
1027. *Mr. Powell.*] Where single rooms are rented, are not a great number of receipts given in the same way—I came across a case on Monday, in which a woman is living with her daughter, and has a room? Yes.
1028. *President.*] There is another point—what guarantee have you that the rent goes to the landlord at all? We have no guarantee beyond the receipt.
1029. When a receipt is furnished, how do you know that the money goes to the landlord? If it does not we must assume that the receipts are forgeries.
1030. Are any proportion of these receipts ever tested;—is inquiry ever made of the landlord? No; but the landlord frequently makes inquiries of us as to whether we are paying rent.
1031. Many of these receipts would at once make me suspicious, and I doubt whether in a great many cases the landlord ever receives the rent at all;—what I want to know is whether it is left at that, whether the inspector accepts this paper? I believe they do make inquiries where they feel doubtful. Mr. Grant has from time to time brought cases before the Committee, and said this woman has written out her own receipt. The relief is so small that we give that, even if these unfortunate people use the rent money it would not be a very serious matter.
1032. Does the Committee make use of the Director of Charities, the Charity Organisation Society, or any other society? The Charity Organisation Society occasionally sends down and checks the returns, if that is what you mean.
1033. As regards the necessity for relief? We get a recommendation as to the case brought before the Committee, and we send our own officer to inquire.
1034. What checks have you against overlapping? Very weak ones. I suggested a scheme which, I think, would have been a very successful one. I suggested that the Inspector-General of Police be requested to write to the police in the different districts to get the names of all the different local Benevolent Societies that were issuing out-door relief, and the name and address of the secretary of each society. If that could have been brought about we should have been in this position: Suppose Mary Brown came from Leichhardt for relief, we should say, "Go back to the secretary of the Leichhardt Society, and ask him to give you out-door relief," and if he says that he cannot do it, ask him to state his reasons.
1035. That is assuming that Mary Brown who comes to you is known as Mary Brown at Leichhardt; she may have been receiving relief there in another name? The effect would be not only to stop overlapping, but to test the usefulness of these other small charities. If the woman said she lived at Leichhardt we should send her back to the Secretary of the Leichhardt Society, and get him to either relieve her or state his reason for not doing so.
1036. To make that effective implies that the whole ground must be covered by these Societies? That applies to the whole of the city and suburbs. I had a scheme nicely arranged, but meanwhile the metropolitan Charity Organisation Society started its operations and the matter was blocked. Our methods of checking are not regular, and are very inefficient.
1037. You say that your check against overlapping is weak? We do not know the existence of all these small Benevolent Societies. We are not in a position to say how many there are. With regard to the Charity Organisation Society, which is the largest Society in Sydney next to the Benevolent Society, the Secretary has come down from time to time and checked his list of recipients with ours. With regard to the Charities Department, which now is, I might say, an enormous outdoor relieving agency, returns are sent down from time to time to our institution, and the names are checked. This morning we got a list;

E. Maxted.
15 July, 1898.

list; we had a list some time back of 200 names, and I found that overlapping has not occurred to any serious extent. With regard to the 200, the State Children's Department were relieving only six cases that were receiving relief from the Benevolent Society simultaneously. These six cases were very deserving cases, and seemed to me to be in need of relief from the two departments; but that is not the question. It is a question of getting relief from two departments unknown to each other.

1038. You say that if you knew about the local benefit societies you could do certain things, is it done in cases where you do know? It is done inefficiently. We have a check in connection with the Randwick Benevolent Society. It is done irregularly, not systematically.

1039. Of course your scheme presupposes that it should be done systematically? It does.

1040. You said that there were only six cases of the latter, would it not be possible that there might be a great many more under different names? You must always make that allowance, but as far as ordinary care and investigation could go that was the result.

1041. How often are the inspectors supposed to visit each case yearly? The cases should be visited every month.

1042. How often are they visited? Owing to the way the work has grown lately it is impossible to say how often they are visited. I should think about every six weeks or two months, except the cases that are considered chronic.

1043. Chronic cases do not require the same supervision? No, they remain the same always.

1044. The cases are supposed to be visited monthly, but as a matter of fact they cannot be? No, they run up to between six and eight weeks.

1045. Judging from that, you consider that your inspecting staff is inadequate? I think so.

1046. What is the entire cost to the State of the out-door relief, including rations, rent, clothing, &c.? The cost of the out-door relief department in 1896 was £8,851.

1047. That £8,851 is the whole expenditure? Yes.

1048. Including the cost of inspection? Everything.

1049. Have you got separately the amount that the Government contributed? Yes; the Government would contribute £4,000 of that amount.

1050. About half of it? Yes.

1051. You mentioned the opinion in the United Kingdom about out-door relief—that it is very much opposed in certain quarters? Yes.

1052. Do you know the grounds on which it is opposed? On the ground that it pauperises.

1053. What weight do you attach to that objection? They seem to prefer in-door relief to out-door relief—to afford relief in the workhouse.

1054. As a test of poverty? Yes. I have read a great deal on the subject, and I entirely disagree with that.

1055. Do you consider that this pauperising effect is necessarily produced? It must necessarily to some extent have a pauperising effect; but if the Benevolent Asylum were to take in women with three or four children it would be bad for the children. They would grow up under worse conditions than they would if the family received relief outside. It would be more likely to be demoralising to them; they would have the taint of the workhouse about them. I have no doubt that out-door relief is demoralising to a large extent; but if we weigh the moral effects of the two systems, in-door and out-door relief, my preference, after having some experience of the two, would be decidedly in favour of out-door relief. Not only that, take a widow with four or five young children, by giving her out-door relief you enable her to keep a little home together, the children go to school, and if not allowed to come to the Benevolent Asylum for relief they would grow up under the ordinary domestic and beneficial conditions of life with regard to education and motherly care.

1056. As a matter of fact they are allowed to come to the Benevolent Asylum? Yes, in cases where the parents are unable to come themselves.

The Committee at 1 p.m. adjourned for luncheon.

The proceedings were resumed at 2 p.m.

1057. *President.*] A year or two ago you made a distribution for the relief of the unemployed? Yes.

1058. How much did you distribute then? The amount was £4,500.

1059. And you were reimbursed by the Government? Yes, partly; a promise was made by the Government to reimburse the whole cost; but we were short by nearly £300. Application was made to the Government for the balance of money owing, and the reply was received that it was included in the out-door relief subsidy. It was pointed out to the Government that that out-door relief subsidy was for ordinary purposes, and in no way could relieve the unemployed. The matter was brought before the Government from time to time; but still the money remains unpaid. I think we are not likely to be reimbursed.

1060. How long was that relief given to the unemployed at that time? From February to November.

1061. That was under instructions from the Government? Under special instructions from the Government, under the same conditions as at present.

1062. Supposing we had a system of local government throughout the country, do you think that out-door relief could then be administered through the local authorities in a better way than it is now? In the way in which it is done in Queensland it might possibly help us. In Queensland the relief is administered by the Government at the Government Immigration Depot, under the supervision of the Immigration Agent. That agent has assistant immigration agents throughout Queensland, and instructions are given to them not only to find work for people out of work, but also to find them food where necessary; and food is given under Government control, and entirely at the Government expense, not only with regard to the assistant immigration agents, but also where there are no assistant immigration agents, under the supervision of the Clerk and the Assistant Clerks of Petty Sessions. There are some private societies in Queensland, like the Benevolent Society, and other small organisations that give out-door relief; but I am informed that they are almost without funds, like some of the small organisations in the suburbs of Sydney.

1063. Is there any systematic system in this Colony of giving relief in country districts except through the local benevolent societies? No; none whatever.

E. Maxted.
15 July, 1898. 1064. Are you of opinion that the relief is too much centralised in this Colony? Yes; it occurred to my mind that it might save a great deal if relief could be given in country districts to people in poverty. It would save their having to come to Sydney, and centralising their misfortunes in the city; whilst in Brisbane the out-door relief for the year diminished in the city it increased in the country, because it is not centralised. Necessarily people living in the country districts in poverty, and finding such institutions as the Benevolent Asylum, that never refuses relief to persons in distress, would naturally think that if they get to Sydney they will not be allowed to suffer. I think, therefore, that decentralisation would be an advantage.

1065. Referring to the results of the working of section 10 of the State Children's Relief Act of 1896, it has been given in evidence before us here that there are cases in which mothers who, before that Act, tried to get a living, and did get a living, have thrown themselves on the State, taking the relief in respect of the children, and doing nothing? I have been told that, but I do not know exactly the history of those cases. I conceive it to be quite possible, not necessarily that it would be a case of imposition, but that a woman who had undergone a great deal of privation before the Act was passed, would naturally say, "There is no occasion for me to suffer longer; I will get relief under the new Act." I cannot mention a case.

1066. When relief was previously given to the unemployed, how was the thing wound up;—did the application cease, or the money cease? The money ceased; and we had an intimation from the Government, when we pointed out that we required more money, that after a certain date the work of administering relief to the unemployed would be taken over by the Labour Bureau.

1067. That was done, I presume? It was only done partially; in fact, it was not done, people were allowed to go without assistance. When sent to the Bureau after, they were refused.

1068. Your committee investigate personally all applications? Every case goes before the committee.

1069. How often are provisions issued to out-door people? Once a week, on a Wednesday. Of course, there are cases come in through the week, in which I give relief, but they always come before the committee on the following Tuesday.

1070. How do you manage with regard to meat in the summer months? It is taken in on a Wednesday morning, and it is all issued during the day.

1071. So if it is sound when it comes in, it is sound when it goes out? Yes.

1072. On page 26 of the report there is a table showing the weekly average number of cases, that is correct, I presume? Yes; that is correct.

1073. It shows the full cost of relief distributions, does it not? Yes.

1074. There is not a column there for clothing and blankets? It should be stated here that the cost of provisions, &c., should include blankets and boots. The numbers are specified further on. That heading is not sufficiently comprehensive.

1075. Do you think clothing and boots should be put in the same column with provisions;—would it not be better to have them separate? It would be; they are kept separately on the books.

1076. How long do you give out-door relief in any particular case? We are now preparing a return on the subject. Many cases extend over very many years, and to give an average, I fancy, would give the Commission rather a wrong impression.

1077. You would have to say the chronic cases average so long, and the non-chronic cases so long? Yes; that would be a good way to state it.

1078. If you include chronic cases with the others the average would be misleading? Yes.

1079. Because ten chronic cases would throw the average of 100 ordinary cases out altogether? Yes.

1080. Surely this cannot be correct—

From inquiries made by the Society of the recipients of relief on the 9th March last, it was ascertained that the average time over which they have received relief from the institution was two years five months and three days.

? That includes chronic cases.

1081. *Mr. Powell.*] What is the longest duration of any case receiving relief? Sometimes seven or eight years—in the cases of very old persons.

1082. Have you not had some on your hands ten years? I daresay we have.

1083. Have you had several over ten years? I do not think so. I daresay we have had several between eight and ten years.

1084. And perhaps, some over ten years? No. I do not think there are any over ten years. Yes; I believe there is an old woman who has been receiving relief for the last thirteen years.

1085. *President.*] That is entirely confined to chronic cases? Yes.

1086. Have there been non-chronic cases long receiving relief? The bulk would remain on the books a long time for this reason—a widow with four or five children would be in such a position that her circumstances would not change until the children could be sent to work. Her circumstances would not change for many years, and she would be kept on the books.

1087. During that term do you consider it the duty of the Society to relieve that woman independently of any efforts she may make for herself? No; she would be expected to make an effort to keep herself, but the effort that she could make with a number of young children would be so feeble that it would be practically of no avail. She could not help herself for many years. I should not call these cases chronic, but they would necessarily remain on the books for many years. It is not as if the bread-winner were a man.

1088. Is there not a serious danger in the cases you mention of the continuance of relief after the absolute necessity for it has ceased;—suppose the woman's condition improves, is it not possible that the relief may be continued in spite of that? No doubt it would occur in some cases, but on the whole I should not think there would be a great danger, if you take the children who are boarded out. We may have a widow with several young children, three or four perhaps, she cannot keep them, and out-door relief is given. It may be insufficient to support them, and two or three of these children will be taken to the Benevolent Asylum, and subsequently boarded out, and they would be a charge upon the country for many years, the same as if they remained under her own control, and at a greater cost to the country.

1089. Take the case of a woman and four children, would not the State Children's Relief Board be the proper authority to hand the woman over to under the new law? Yes, if they would take her, but they say they have not the means. We sent up something like 200 cases three or four months ago, but with no result. If they were in a position to take them, we have a very large number of widows and children who might come off the books to-morrow.

1090.

1090. It appears to be admitted by all parties that the relief given to certain aged people is very inadequate, the Government machinery should provide for the cases of widows with three or four children, who remain on your books to the injury of these aged people? We have not sufficient funds. E. Maxted.
15 July, 1898.
1091. You have not sufficient funds for both, but the law has provided machinery for the widows and children, and it is admitted that you do not relieve them adequately? That is admitted; and as I stated before, it was at first expected, when the Act was passed, that under section 10, all the widows and orphans would be taken off the books of the institution; then we could give more to the others.
1092. You see how it would ease your finances, and enable you to give these aged people necessary comforts? Yes. With regard to the question of the possibility of demoralising people who are getting outdoor relief you see this system, under section 10, is practically an outdoor relief system. It is now the policy of the country.
- 1093-6. It is contended that you pauperise people, because you allow children to come there and take away the goods? We only allow that when the mother is sick.
1097. The other system is a family system;—the children are living in a cottage with their mothers or guardians. It may be that the mother is pauperised, but I do not think we are so much concerned with the mother as with the children. It is maintained that you are pauperising the children because they are allowed to come in dozens to the asylum as if it was an ordinary grocery store, and to take provisions away; that could not happen under the other system, which you admit to be a proper system? Instructions are given to our officers not to serve children.
1098. What is the good of it—we saw them served; there they are? I found the same difficulty in the administration of out-door relief at Brisbane. They have a rule against children being allowed to come.
1099. The State provides certain machinery for widows and for the children; if that machinery were made use of your finances would be so far relieved that you would be able to give to some of your aged pensioners who are in a deplorable state some necessary relief which you cannot give them now because you have not the money? That is the point. If it was carried out as intended, and all the widows were taken off our books we should have a larger amount to give to the aged poor.
1100. Here is a Board looking after the cases of widows and children;—why should they not do that? That is what we try to ascertain from time to time.
1101. If the State Children's Relief Board would do that you would have so much more money to give to your deserving out pensioners? Decidedly; these widows are the cases that we give money to. It would be a large reduction in our expenditure on out-door relief work.
1102. It appears that the average annual increase in the number of cases of out-door relief from 1890 to 1895 was 133; the average annual increase for the past two years was 564? Yes; it is very large.
1103. The increase in the number of adults and children was, in the first term, 1895—adults, 151; children, 255; total, 406. From 1895 to 1897, 2 years—adults, 784; children, 1,282; total, 2,066;—what caused this enormous increase? I can scarcely give an answer to that question, unless it is owing to the more unfortunate condition of the city and suburbs. The labour conditions are not so satisfactory as they were formerly.
1104. Does it arise in any way from the thing growing by what it feeds on—that it is actually spreading? That the system of out-door relief is an attraction?
1105. Yes? I could not say that. Every case is visited, and they seem just as deserving now as they were originally.
1106. You can suggest no reason except that the conditions were more unfavourable in 1897 than in 1893 or 1894? I have always thought that they were more unfavourable. I can remember the time when we had only 360 cases on the books every week. That was when the attractions to the institution were far greater than they are at present. When we were giving 5s. a week rental the cases were considerably less in number than now. Something like 340 as against 1,100 during 1897.
1107. You argue that there must be wide-spread poverty, because you have reduced the attractions by one-half, and yet in spite of that you have an increase of about five times the number? Yes. Then the increase in population would possibly have some effect.
1108. There has been an increase in population of 18 per cent. since 1890? I was not aware of that.
1109. The average increase for the first term is 400 individuals, and for the second term the average increase is 2,066; that, of course, is out of all proportion to the population? There is a large increase in population.
1110. You cannot account for this large increase? No; if we had increased the allowance that might have accounted for it, but as we have decreased the allowance I cannot explain it.
1111. The increase is pretty general all over the different classes? Yes; the increase has been all round.
1112. With regard to the aged classes there is very nearly 50 per cent. increase from 1890 to 1897? Many years ago I reported to the committee on the necessity for an establishment for aged couples thinking that it would relieve the Society to a large extent, and a deputation waited on the Government and asked them to establish homes at Parramatta, and that relieved the institution of some aged couples, about twenty. I think if you had more homes for aged couples they would be better cared for, and it would relieve the institution.
1113. Take another class of cases under the head of husbands sick and afflicted, the increase from 1890 to 1895 is on the average 16 per annum, and during the past two years, 170 a year, over ten times as many? Many of those aged and afflicted husbands might possibly have gone into the institution, but of late years I know there has been an objection to go into the Government asylums on the part of both sick men and aged people, they seem to shun the institution.
1114. You account for this increase from 16 to 170 in the second period on the ground that there is not the same readiness to enter the Government asylums that there was, and that in the first period some of this class may have been relieved in the Government asylums? No; I should not like to go so far as that, because of late years I know that the institutions for old people have been made more comfortable than they were many years ago. The attractions to Newington are greater now than they were formerly.
1115. Whilst you have been reducing your attractions, the Government asylums are undoubtedly more comfortable? Yes; so the explanation seems most difficult to make on that ground.
1116. I wish you would think over that and see whether you can account for it, because the increase is so astonishing, there must be some explanation of it? It is a perplexing problem.

E. Maxted.
15 July, 1898.

1117. The total cost of relief has increased from 1890 to 1897 by over 75 per cent. Of course, this large increase will naturally follow on the increase in the number of cases? Yes; the average weekly number of cases in 1888 was 478, as against 1,196 in 1897.
1118. The 75 per cent. increase in cost is not in proportion to the increase in the number of cases, because you have reduced the cost per case? No.
1119. There has been an increase of 133 per cent. in the number of individuals relieved since 1890? Yes; that is not in proportion with the increase in the cost.
1120. Seventy-five per cent., although a large increase, is less than the increase in the number of cases, because you have reduced the amount of relief to each case? Yes.
1121. We make out that the average weekly cost of the relief afforded in 1890 was 3s. 5d., and in 1897 2s. 5d.? Would not the cost of the contracts have some influence on those percentages from year to year; of course, they are not always the same.
1122. This is taken for a particular year from your own figures? We are paying £10 5s. a ton for flour, but I can remember when we paid £6 5s. a ton for flour. That makes a great difference.
1123. In 1890 the average weekly cost of provisions per case was 1s. 9d., rent 1s. 8d. In 1897, provisions 1s. 9d., rent 8d.;—what is the reason for the reduction in the amount granted for rent money? This is one reason: Originally the rent money amounted to £2,500 a year; then a resolution was passed by the Board, seeing that the Society could not stand that strain upon its funds, and it was decided that the rent money should not exceed £1,500 a year, no matter how deserving the cases might be, and I think that would, to some extent, give the explanation which you want to get.
1124. If the rent money in 1890 was adequate then, it may be quite proper that there should be a reduction in 1897, because rents have gone down so much? The ground upon which the reduction was made was that the Society's funds could not stand it. Although it was said that the rent money should be reduced from 5s. to 3s., it was also decided that the expenditure for the year should not exceed £1,500.
1125. If the rent given in 1890 was adequate as far as the poor are concerned, it may be no injustice to the poor to reduce it in 1897, because they have not so much to pay for rent? No; but that was not the point taken by the committee at all.
1126. It is admitted that rents have gone down, and if 5s. a week was adequate for a poor person in 1890 somewhat less than 5s. would give the same accommodation in 1897? Yes.
1127. It is calculated that the cost of administration of the outdoor relief department in 1896 was 6s. 2½d. for every £ given in relief;—what are the chief items that are responsible for that cost? For 1896, I think the salaries would be the chief item. One or two of the items were reproductive; printing would be reproductive. A large amount of printing was ordered in 1896. The *Charities Gazette* caused a large amount, but that was reproductive.
1128. You are not prepared to give these items? Not in a satisfactory way from memory.
1129. I think you said you were quite positive that no family was receiving assistance from you and also from the State Children's Relief Board? Yes; as far as any reasonable investigation can go. We get a list from the Board, and make a careful comparison. The lists are not regularly supplied to us, but they are fairly well supplied.
1130. If there is a possibility of it, that is another reason why the State Children's Relief Board should take them off your hands altogether? Exactly; I could never see the necessity for two departments doing one class of work. Either the State Children's Relief Department should distribute out-door relief or the Benevolent Society should do it.
1131. It appears to be a very severe tax upon your institution, the particular work of which would appear to be the ordinary distribution of relief to the pensioners? Yes; it seems to be a needless multiplication of charities. The State Children's Relief Board is doing practically the same work as the Benevolent Society.
1132. How many paid inspectors have you? Four at the present time.
1133. Some time ago you had only one? Only one.
1134. Do these men keep a diary? Yes; they have a book with a schedule of headings guiding their inquiry; they get the information during the week, then come on Tuesday afternoons, and read a report to the committee of management.
1135. Do they take these books out with them, and write them up whilst out? They take the books, and either write them up in the homes, or they take notes in the homes, and write the books up when they get home at night.
1136. Are their reports checked in any way? They are read at the meetings. At the conclusion all the reports are handed over to the Chairman, and he puts his initials on them.
1137. Do you check the inspector's reports by sending other inspectors over the same ground? No; we do not do that.
1138. Why? We consider the men trustworthy. I must refer to Brisbane again. The system in force there is this: that every visit is made by a policeman. Suppose a woman wants relief, she is told to go to Constable So-and-so within a certain district; he visits the cases, and gives a certificate to the effect that, I, Constable So-and-so, have visited a certain case, and recommend that so-and-so is eligible for relief. On that certificate the person gets relief. If relief is wanted a second time, a second certificate has to be brought from the policeman. There is no doubt it is a very effective means of getting at a person's position, but it strikes me as extremely harsh.
1139. Do you think it should be adopted here? I should be very sorry to see it adopted.
1140. Why? I think that the children who had been in the habit of receiving out-door relief, as they grew up would remember the visits of the police, and I think it would produce an after-growth of shame in their minds. I think it would be extremely harsh. There is no doubt it would be very galling to a poor widow with a sensitive mind.
1141. Then there is really no check upon your inspectors? There is no check; they are absolutely trusted.
1142. No attempt has been made to check them? No.
1143. I think you said before that you do not consider your inspecting staff strong enough to exercise proper supervision? It is not large enough.
1144. You look upon inspection as the key of the whole system? Yes, undoubtedly.
1145. Not only to prevent imposition, but to prevent hardship on the part of innocent people outside? Yes.

1146. I suppose it will be the duty of the inspector, not only to stop imposition, but to discover deserving cases of poverty? They generally find their way to the institution without seeking them. E. Macted.
1147. I do not mean to say that they should look for cases of poverty, but if they come in contact with it it is as much their duty to report on that as to stop imposition? Yes. 15 July, 1898.
1148. And to do that your staff is not adequate? It is not adequate.
1149. You consider inspection the key of the whole thing? Precisely; some of the directors may possibly hold a different opinion with regard to the necessity for increased inspection.
1150. Has the committee ever, seeing that they have been hampered by want of means, endeavoured to enlist voluntary help from the general public? Yes; it is a matter of which I have made a special hobby. Funds have been obtained for many years through the writing of pamphlets illustrating the work of the institution, on the lines of Dr. Barnardo, and much help has been obtained in that way.
1151. I mean with regard to inspection? No, we have not. I think it would be a good idea to get a committee, or various sub-committees in the different districts to work in connection with the outdoor relief department and to do a kind of auxiliary inspection.
1152. Not that you would necessarily give relief on their report, but that they should assist the work of your own inspectors? I think it would have a healthy effect. Just the same as it would have if a professional auditor came down and went over my books.
1153. Has any attempt been made to organise such Committees? No, none whatever.
1154. I presume that such help would be in the nature of correspondence? We have received letters from time to time about cases of distress, and we have asked the parties to call. We have given food at once, and then had an inspection made.
1155. That was not organised? Not at all.
1156. Do you think it would be better to have some organisation for reporting and inspecting? Yes; you would get a good grasp of the poverty in the city and suburbs if such an organisation existed. You would be in touch with the poverty actually existing, whereas now there may be many persons suffering silently, who will not approach us at all.
1157. *Mr. Powell.*] Do clergymen bring cases under your notice? A great number of them do.
1158. *President.*] With regard to the suggestion to give tickets instead of provisions, have you anything to say about that? Yes. I think the system that exists at present is better than giving tickets, for this reason: you have all the people before you—all the adults every week—and you have an opportunity of questioning them as to any chance of an alteration in their circumstances, and the fact of their having to come to the institution for relief would make them hesitate from time to time, if they did not deserve relief, as to whether they would come or not. That is one advantage in giving relief over the counter as against the ticket system. Another advantage is that you have an oversight over the provisions. You can see that the contractor keeps up to the contract qualities, and that the people get their weights; and you have control over your stores. These are two strong advantages.
1159. The last one is particularly strong? If you had the ticket system you might have a bad quality of bread and other stores supplied, and perhaps light weight. Where the ticket system has been applied persons have brought me samples of their tea, and it was not proper tea at all.
1160. As a guarantee of quality, the ticket system would not compare with yours? What I say is, that the bad part of our system is the children coming to the institution. It is wrong altogether.
1161. The objection has been raised to the ticket system that the recipients would sell their tickets;—would that apply equally to goods supplied? We have discovered occasionally that when the recipients drank they have sold their provisions, but that is a very rare thing.
1162. So that if the selling of the tickets were the only objection, it would apply almost as much to the goods? I think it would.
1163. *Mr. Powell.*] One thing about the ticket system is that the people get little comforts which you do not give them; you do not provide them with salt, pepper, and things that make their food tasty;—you give them so much meat, but they are not able to make it so palatable? No; but what you suggest could be done.
1164. *President.*] You could arrange that instead of taking 2 lb. of meat they should take 1 lb. and an equivalent in something else? I think it would be wrong to let them exchange bread or meat for jams and other things of that sort. A person with a ticket might go to a store and say, "I will take so many jars of jelly," and so forth.
1165. You think that under the ticket system they would not get the same value as they get under this system? I think our system is preferable.
1166. *Mr. Powell.*] The ticket system seems to answer very well with the St. Vincent de Paul Society? They are split up into so many different districts.
1167. *President.*] A reduction in the average relief per individual is forced upon the institution by want of funds? Yes.
1168. You are of opinion that the relief given in many cases is very inadequate? I think it is very inadequate.
1169. Are you aware that some of your out-pensioners are enduring great privations—almost starvation? I can readily believe that they are.
1170. Have your inspectors ever reported any cases to you? I think it is pretty generally acknowledged that the relief given at the institution is insufficient. If we knew a case of starvation we should take steps immediately to get the family admitted to the institution.
1171. Have the inspectors ever reported any of these cases? Yes; and they have been removed to the institution.
1172. *Mr. Powell.*] It must occur to anyone that an allowance of two and two to a couple on a Wednesday, to last until the following Wednesday, must leave them on the brink of starvation? Yes; unless they get help from their neighbours.
1173. *President.*] You have expressed a pretty strong opinion as regards the impropriety of children being allowed to go there? Yes. It is very difficult, however, for a widow with children if she is sick in bed.
1174. Suppose that a widow does not come forward on a Wednesday herself, could you not arrange to send an inspector out at once, assuming that you have a proper staff? We must try to devise some means of dealing with the matter.
1175. If you have a sufficient staff, and a woman does not turn up on the Wednesday, is that not sufficient reason to call upon her? She will send a child with a note if she is sick.

- E. Maxted.
15 July, 1898.
1176. Assuming that you forbid children to come to the Asylum, and the woman does not turn up, she may be starving, would it not meet the case if you sent out to the woman? It would, but we should have to increase the staff. I can see how it could be done—we could put a man at the gate, and tell him to allow no children to pass through; then, at the end of the day's work, find out those who had not attended, and send a man out at once.
1177. It is quite possible to get rid of the scandal of those children coming every week to the asylum? Yes, with an increase of staff.
1178. With regard to out-door relief, most of the people that came there when we were there were evidently very poor, many of them unfit for much labour, but some appeared to be fit for labour;—have you ever considered the question of having some labour test for some of those people? Some of them are apparently well, but are suffering from various ailments. With regard to the women, if some industry could be found for them it would be advantageous; but I do not know what class of work you could find. They could only do the washing.
1179. There are some twenty Benevolent Societies in the suburbs;—do you afford relief to persons residing within their districts? We do.
1180. Is there not a danger in that? There is a danger; but these twenty Benevolent Societies are, with two or three exceptions, mushroom societies. They spring up in winter, being got up by ladies; they give temporary relief only, and then die out.
1181. Is it a fact that some of these local societies cannot give relief to any extent for want of means? That is a fact. The St. Vincent de Paul Society have sent cases to us on that ground.
1182. Suppose these twenty societies have not much means, could not the committee, having passed deserving cases, administer the relief through the societies, instead of having to bring everybody to your place? That would be handing over our functions to another organisation.
1183. Supposing that at Newtown or Ashfield there was a benefit society with a certain number of your pensioners in their area, of course, your inspector would still report to your committee, and could you not arrange that the actual relief should be handed over by the local society? Yes. It would require a large amount of administration, the checking of accounts, and so on, and it would be a very widespread work. I hardly think it would work. You would lose supervision, you would lose control, and the accounts would be considerably sprawled about.
1184. You would lose a certain amount of control and check? Yes.
1185. With regard to people coming in from long distances, we have had information about somebody coming in from Rookwood, and it takes the greater part of a day to come in and return? A case like that we refer to the Parramatta Benevolent Society. The woman would go to the Parramatta Society, and the answer would be "No funds at present." The Benevolent Society in Sydney would relieve the case, and most likely allow travelling expenses.
1186. Which would amount to 1s., I presume? To almost as much as the relief.
1187. Is it not a waste of money and a waste of energy; take the particular case at Rookwood—that woman, you say, would go to the Benevolent Society at Parramatta, and they might have no funds; would it not be better for your Society to put them in funds? Yes; the question would again crop up of supervision. Would it not be better for the Government to endow a society like that, if it has not found its means sufficient to meet local demands, and to put an embargo upon the society in Sydney giving assistance in such cases?
1188. You say that the woman would have to come in from Rookwood, and, besides losing the day, she does not get any benefit from the shilling for the railway fare? These cases are very few. I think our travelling expenses are only about £2 10s. a week altogether.
1189. What is the average daily number of inmates in the Asylum for last year? Adults and children—234.
1190. I am speaking now of the Asylum, apart from the Lying-in Home? Women, apart from the Lying-in Home—thirty-six in all.
1191. How many children? 107.
1192. What ages would those children be? From 2 months up to 12 years.
1193. How many of them would be of an age at which they could be sent to the State Children's Relief Board? They are all sent out, but as one lot is taken away others come.
1194. How many at any one time would be of an age to be sent to the State Children's Relief Board? About fifty.
1195. I want to know whether it is necessary to keep all these children in the depôt at the Asylum when the State Children's Relief Board have a depôt of their own? I have often wondered why it was necessary to keep them at the depôt instead of at the Benevolent Asylum. I understand that they require them there for a few days before they are boarded out to observe their habits, and to see what class of families they could place them in.
1196. I want to know why there are two depôts? The intention was to take them from the Benevolent Asylum, observe their habits for a few days, and get them ready to be transferred to the various homes; but I do not see why that could not be done at the Benevolent Asylum.
1197. I understand that the State Children's Relief Board require them to be kept at the depôt in order to observe their habits? I believe that is the reason.
1198. Why should there be an accumulation of fifty at the Benevolent Asylum? Of course the Benevolent Asylum has been the reception-house for destitute children for all these years.
1198. We come to the same old question, here are hundreds of your pensioners, aged people, who have been good citizens of the country, living in the greatest poverty because you have not the means to relieve them;—here is an organisation established by law to deal with these children, and you have fifty of them of that age in your asylum;—why should that be? The only answer that I can give is that the asylum arrangements were made with the Government for that particular object.
1200. This machinery that I am referring to is machinery established by law, and would override any of your regulations; but you go on keeping those children there, I want you to show the necessity for doing so? They are nearly all sent to the institution by the State Children's Relief Department.
1201. You see how the poor are being kept in poverty by your carrying on a certain branch of business which is otherwise provided for? With regard to the question of finance, the maintenance of these children in the Benevolent Asylum does not affect our financial position with regard to assisting the

out-door poor, because the Government pay for the maintenance of those children in the Asylum as they would if they were kept in the State Children's Relief dépôt. Financially, it does not affect our efforts on behalf of the out-door poor. E. Maxted.
15 July, 1896.

1202. It affects them in this way: If the attention of the committee and the staff were concentrated on the one business which seems to be their proper function—that of out-door relief—how much more efficient it would be? It is merely a temporary reception-house. The children do not remain there for long periods. Suppose we have fifty one week, they may all go out in two or three weeks, and be boarded in different homes.

1203. *Mr. Powell.*] I do not see that you are losing money by that? No; but we have lost money in the past.

1204. *President.*] Do you consider it is good for these children, many of them precocious, to be down there? No; it is very bad, but it is my opinion that the Society could do its work properly and satisfactorily to the public, and meet all the objections that you raise, and that I have raised myself, with regard to the demoralising effects of the association of these children with, or their being in the presence of, those single women, if the Government granted what the Society asked—that is, resume the present property, and gave them the money to conduct the various departments of their work in a proper building, thoroughly separating all the different portions of the work. In my opinion there is no occasion to make any change in regard to the work of the Benevolent Society. It has a building fund of £10,000. I do not know whether you admit that the asylum is their property, but they ask the Government to resume the property, and give compensation; then they could do their work.

1205. You say you admit that the surroundings of the children are abominable? Yes, at present.

1206. And any possible arrangement would be open to the same objection in the present building? Certainly; there is no proper means of separation in the present building.

1207. And the influences on these children are very bad? Yes; very bad indeed—the mixing up with the women, and want of classification.

1208. *Mr. Powell.*] What is the average time that the children stay there? A couple of months. That responsibility rests entirely with the Boarding-out Department, who know that the children are there, and who are told to come every month and select them for boarding out.

1209. Do the children get any schooling? No; they do not remain long enough.

1210. Is not two months a long time to be doing nothing? They had a school there once, but it was done away with.

1211. *President.*] Do any women come into the institution who have a child? Yes; it occasionally happens that destitute women come in.

1212. What is the longest time that such women would be kept there? They are in the same position as the other women whose children are born in the institution. Suppose a woman comes in with three or four children, and has a baby amongst them, the elder children would be boarded out, and the woman with the baby would be allowed to remain in under the same conditions as the woman whose child had been born in the institution.

1213. Suppose a woman comes without a child? We do not receive a woman without a child.

1214. Suppose the police brought a woman at 11 or 12 o'clock at night? We should take her in, but, as a matter of fact, they do not bring them. A woman without a child, if in good health, is not the subject of the same amount of sympathy as a woman with a child, because she can go to work.

1215. I am supposing a case in which a policeman finds a woman, where would he take her? If he brought her to our place we should receive her for the night, and if she was in good health she could go to the Rescue Home.

1216. You do not receive them? It is not part of our work, but we would receive an isolated case as a matter of humanity.

1217. When destitute women come in with children the elder children are handed over to the State Children's Relief Board and the woman is allowed to keep the infant on pretty much the same conditions as an unemployed woman who has a child in the Asylum? Precisely.

1218. And the ladies' committee make the same efforts to get them employment that they do to get employment for the others? Just the same.

1219. The Government contribute towards the expense of those women? Yes; the whole of the expense of the inmates.

1220. Does the Director of Charities or the Chief Secretary ever send such women there on an order? Yes; the Acting Director of Government Asylums frequently sends cases of that kind, and occasionally the Colonial Secretary does, but not often.

1221. What do you consider the cost of the asylum proper, say 1897 or 1896? Apart from the lying-in.

1222. Give the whole cost? £4,766.

1223. Does that include the expenses of the staff? It includes everything.

1224. Up to what age are children received at the asylum? Up to the age of 12 years.

1225. Suppose a child was 13 or 14 years of age, and the mother came to you destitute with two or three children, what provision would be made? In that case, we would have to take the child in. Such cases are exceptional.

1226. You would take the child in until something could be done for it? Yes.

1227. You have a lot of boys and girls up to 12 years of age;—have they separate dormitories? Yes; there is a boys' ward and a girls' ward.

1228. Have they separate yards to play in? There is a paddock, and there is a fence between them; but they can see one another. It is mostly a separation in theory.

1229. The children frequently see the women, do they not? Yes; they see them walking across the yard.

1230. You think it is objectionable that they should associate with them in any way? They should not see them at all—it is wrong.

1231. Have they any opportunity of seeing or knowing anything about the work that is going on in connection with out-door relief? That is very well separated. The only chance the children have of seeing anything is through a little gate 40 or 50 yards away.

1232. They do not see what is going on? No; that is shut out from them very well indeed.

- E. Maxted.
15 July, 1898.
1233. Are any of the elder children ever employed in assisting in the distribution of relief? On a few occasions we have had big boys there, and we have employed them in the store, and on a few occasions they have witnessed it.
1234. Do you approve of that? No; it has occurred very rarely. For instance, when any of the hands are sick with influenza we get the boys to help the storeman to pack up. They should have taken the boys out of the store on a Wednesday; I do not know whether they did.
1235. There would not be the same objection during the rest of the week, having boys helping the storeman. The objection is to having them there when people are coming in? Yes. While you are trying to stop the demoralising influence there, it is growing in the internal working of the institution, where pregnant women are exhibited before the boys and girls.
1236. For children who are there until they are taken away you get the ordinary boarding-out rate? We get the usual allowance from the Government—£14 a year.
1237. So that the process is this,—certain children are taken to the Benevolent Asylum, they wait there for a certain time, perhaps some weeks; they are then taken to Ormond House, where they are detained again whilst under observation? They are taken to be dressed; they draw their children generally from outside sources. They admit many children direct up there.
1238. Your children are in your place for weeks, they are then taken to Ormond House, where they are detained again for some time? It is not the rule; but in some cases they are.
1239. If they were sent to the depot at Ormond House, would it not save a lot of repetition of work and expense? Yes; it would save the maintaining of the children in the institution. It would do away with our work with regard to the reception of destitute children.
1240. There is a certain amount of expense in taking them to Ormond House;—how do they send them there? They go up in cabs; the matron pays the money, and it is refunded. I am not quite clear upon this point. The children are sent up from the Benevolent Asylum to be dressed. They have a particular kind of uniform up there when they are taken away from the Benevolent Asylum by the Boarding-out Department. I do not know how many go up there and remain.
1241. If the State Children's Relief Board took the responsibility of these children from the start, and a maternity hospital were established, you would have only one division of your work left—that would be the out-door relief—with the exception, perhaps, of receiving certain destitute children? There is the question of foundlings, abandoned children, and a few of those that come in. If the maternity work were taken away, and the work of receiving destitute children, there would be left the reception of destitute women.
1242. Would not the proper course be for foundlings to be dealt with at the maternity hospital? You ask what ought to be done, and if that is what you want an opinion upon I can simply repeat the opinion which I have come to after long consideration by the directors, and that is that the Government ought to resume the asylum, and also to resume Ultimo House.
1243. The question does not depend upon the resumption of Ultimo House;—I do not think it is necessary to complicate it with that;—I think it can be answered on general grounds? Or some other suitable building.
1244. You say that the building you have now is quite unsuitable? It is unsuitable for the purposes generally for which it is used; that is admitted.
1245. Suppose, then, that the question as to this building is solved, what would you recommend? I would propose that the work of the institution as at present carried on be removed to that suitable site—the whole of the departments.
1246. Including the treatment of these children? Yes; we should have high walls for perfect separation, and divisions for the classification of the various works of the institution;—with regard to women who have been once confined as against those who have been confined two or three times; proper separation of the married from the single women, and the separation of women of vicious habits from those who require a different form of treatment. If you had a site such as the one desired by the Board of Directors, all the departments of the Society could be carried on economically and satisfactorily to the community generally.
1247. Do you recommend that these children from 2 or 3 years upwards should still be treated by the Benevolent Society in spite of the fact that there is machinery provided by the State for dealing with them? I could not see any objection unless it could be shown that the State could do the work more economically and with equal advantage to the children, then I should say the State should undertake the control.
1248. *Mr. Powell.* How many collectors have you? Two.
1249. At what rate are they paid? Five per cent. commission and £60 a year.
1250. Do they collect in the town and in the country as well? Yes.
1251. Do they get commission only upon what actually passes through their hands? That is all.
1252. They do not get commission on anything paid direct to you? No.
1253. Where do they travel? Throughout all the country districts.
1254. How often do they go out? Two or three times a year.
1255. How long would they be away? A fortnight or three weeks each time.
1256. They are each away about six weeks then? I dare say they would be six or eight weeks.
1257. The two are away about thirteen weeks? Yes.
1258. And they are paid £60 a year? Yes, and 5 per cent. commission.
1259. Do they only take the railway line? They never go far off the railway line. They have a pass.
1260. Who pays for that? The Government.
1261. Do they charge it to you? We do not know. We get the pass from the Government.
1262. They do not leave the railway lines? No, they do not.
1263. The whole amount collected in the country in 1897 was £220, according to your report? Yes; there are some items which they collect in connection with the special appeal that are not included here.
1264. The exact amount is £220 11s. 10d.;—the expenses for the collection according to the return furnished amounts to £54? Twenty-five per cent.
1265. There is £12 for commission, and their salaries, then how much have you left out of that £220? I have not gone into the matter from that standpoint.

1266. It seems to me a very small amount? I have here the matter more comprehensively stated. I was just going to hand in this communication from the hon. secretary to the secretary of the Commission. It says:—

E. Maxted.
15 July, 1898.

Sir,—

In compliance with the request contained in your letter of the 12th instant, I have the honor to inform you that the following amounts were collected in the country and metropolitan districts during 1897 by the Society's collectors, Mrs. Clark, Mrs. Kenyon, and Mrs. Brown:—

1. Mrs. Clark (succeeded by Mrs. Brown in March), metropolitan district, £112 19s. 3d.; country, nil.
2. Mrs. Kenyon, metropolitan district, £546 17s. 4d.; country, £62 12s. 9d.
3. Mrs. Brown, metropolitan district, £389 11s. 9d.; country, £152 11d.

NOTE.—The above amounts include subscriptions, steamer and Agricultural Show collections, and some special appeals.

1267. The work is not done effectually;—do you think that the Goulburn district is properly canvassed, the amount returned from there being only £1. 10s. 6d.? No; I do not think they are away long enough. They say they are met with the argument by the people that they already have benevolent societies in their own districts, and they refuse to contribute on that ground. They say that they have their own poor to look after.

1268. But they send a great many cases to Sydney? Yes—inmates.

1269. As inmates and for out-door relief? Yes; we try to argue it out from that standpoint, but it seems of no effect.

1270. The amount returned from Orange is £2 11 6d.;—do you think that district is well canvassed? I do not think so. The question is, whether there should not be more collectors. If we take them and put them on country work the city may suffer. We had an old man collecting, and I recommended the appointment of a lady of good presence and smart appearance; but the Board did not at first like the idea. Finally, however, they gave way, and appointed a smart woman; then the collections rose wonderfully. After that they appointed two women. If we get another appointed on the lines you are pointing out, there ought to be a further improvement. The country collections are miserably small. If we put somebody on to collect in the country it would be productive of very good results.

1271. Nineteen municipalities on the railway contributed under £5 each to your funds? It seems a very small amount.

1272. *President.*] You have recently visited Brisbane? Yes.

1273. Would you be prepared to hand in a report regarding your observations and the methods of dealing with charities there? Yes; I will send up a copy.

1274. Are you giving relief to single men? No; they have been refused.

FRIDAY, 22 JULY, 1898.

Present:—

G. A. WILSON, Esq., J.P. (PRESIDENT).

J. POWELL, Esq., J.P.

Rebecca Graham sworn and examined:—

1275. *President.*] You are matron of the Sydney Benevolent Asylum? Yes.

E. Graham.

1276. How long have you held that position? Since the 21st January, 1895.

1277. Were you previously connected with any hospital? I was connected with the Sydney Hospital from September, 1875, until 6th May, 1891.

22 July, 1898.

1278. In what capacity were you there? As probationer, nurse, head nurse, and, finally, matron.

1279. Had you any experience before going to the Benevolent Asylum of women's hospitals? No; I had not,—not of obstetric work. Of course, I had a good deal of experience of women's diseases, but not that branch; I have since passed an examination, and now have my certificate for midwifery.

1280. Rule No. 6 lays down your duties? Yes.

1281. Rule 6 says:—

The matron shall be solely responsible for the efficiency of the internal economy of the Asylum, and shall report to the manager any breach of the rules of the house, and have power to suspend any nurse till next meeting of House Committee.

I suppose that rules 6 to 14 describe your position pretty well? Yes.

1282. Rule 8 says that the matron shall keep the daily journal;—do you keep that journal? Yes.

1283. Have you brought it with you? No; it goes before the House Committee every week.

1284. You keep the journal, and it is shown to the House Committee? Yes; every week.

1285. Rule 10 says "that the matron shall be present at all meals";—is that rule carried out as far as possible? Yes, as far as possible, but the meals are very much distributed. I have the children in one part of the building, the inmates of the lying-in department in another, and so on.

1286. The spirit of the regulation is carried out? It is.

R. Graham. 1287. As regards the position of the manager;—does he interfere at all with your branch? No; we both work together very agreeably.

22 July, 1898. 1288. I presume, though he is head of the institution, domestic matters are entirely in your charge? Yes.

1289. Therefore, unless you refer to him for advice or instruction, he does not interfere? No; he never interferes.

1290. There is no friction? No; there has never been any friction.

1291. Does your control extend to the arrangement of the dormitories, the dietary, and all that sort of thing? To the whole of the internal management.

1292. Therefore, the arrangement in the dormitories and the dietary and the control of the nurses will be in your hands? Yes; of course the arrangement of the dormitories is subject to the approval of the house committee. I could not change from one dormitory into another without consulting them about it.

1293. Rule 90 says:—

Students before commencing their duties must report themselves to the matron, and be under the control of matron and manager during the term the students are in hospital.

How is that responsibility divided? Well, I think the rule is to a certain extent necessary, because we have found that with young medical students it is necessary to have a manager who can be called in. With the exception of in 1896, however, I have never had any trouble at all. The students have been most amenable to myself, and the work has gone on very smoothly and satisfactorily.

1294. Whilst the students are in your part of the premises you are the controlling authority, but you do not hesitate to call in the manager if necessary? No.

1295. Do the students reside on the premises? Yes; since 1894. They were there when I came there.

1296. Do you think that is necessary? It is for the sake of getting their cases. They would lose cases if they did not reside there.

1297. What do they pay for this? Five guineas, I believe.

1298. Do you consider that sufficient to reimburse the institution for the room they occupy and the trouble that is caused? I have not thought of that matter. Their time varies very much. Sometimes they are only in the house six days, although we have students in the place for six months. It does not mean that every student is in for six months.

1299. No, but your room is occupied for six months? Yes; but I mean to say that it is occupied by various relays of students. We had twenty-three men this year, and five guineas is paid by each man.

1300. How many do you consider it is necessary to have on the premises? We have only six at a time.

1301. And you consider it necessary to have the six? Yes; we have been obliged to do that during the last year or two, there have been so many men to get through. That is subject to the approval of the medical staff. If the medical staff think there should be a less number we are obliged to take them, but it has worked so smoothly for the last couple of years there has been no objection to it. Two must be there if they wish to get their cases. It rests with them if they lose their cases. They cannot get through for the year. That is the only place which the young medical men have in which to obtain that particular branch of practice. We generally have them in from the middle of December up to the end of April.

1302. Are there any objections to their being there, considering the nature of the work and the women? No; I do not see that there is any objection to it at all.

1303. As far as you know, the medical officers approve of the present arrangement? Yes.

1304. How many students do you say there are? We have had twenty-four on the premises this year. Why I mentioned twenty-three was that we only received the money from twenty-three; one is from the year before. He came in to finish up his cases.

1305. These six reside in the institution? Yes; there are six beds there.

1306. Do they have any meals there? They provide themselves with food.

1307. In the institution or outside? They provide themselves inside.

1308. What is the arrangement? They employ their own baker, butcher, and milkman.

1309. How is the cooking done? One of the inmates is told off, usually a married woman, to wait upon them.

1310. Then it costs the institution nothing for food? No; it simply means lighting, fire, and room.

1311. Do they pay this woman anything? Yes; they usually allow her a gratuity.

1312. Does the institution pay the woman anything? No.

1313. Have you had any trouble with these young men at all? In 1896 I had a great deal of annoyance, but never since.

1314. Was that serious? It was very serious for the time being.

1315. Was it one or two unruly spirits? Yes. Three of them came in about half-past 1 o'clock in the morning. I think they must have been under the influence of liquor. They upset the whole place. I think myself that the police ought to have been called in.

1316. Have you no power of suspension? I suspended them from the ward. I would not allow them to take their cases until the President was seen. They were brought before the Board, and reprimanded, and I have had no trouble since.

1317. The committee supported you? Yes; and the house committee gave me more power to act.

1318. How long do these students remain in the institution;—how long are they in going through their studies? They vary. We might put them through their cases in six days or in three weeks. It depends upon the number of cases admitted.

1319. It depends upon the number of cases and upon themselves? They very seldom miss any cases, if they do they have to be put back, and they do not care for that. If a student neglects to attend to the cases, we have power, with the consent of the medical officer, to let him stand by.

1320. Rule 94 says:—

No students shall enter the wards except by permission of an honorary medical officer or the midwife in charge.

? Yes; the students are not allowed to enter.

1321. Except under those conditions? No, they have never attempted to do so; we have had no trouble in that respect.

1322. Is it possible that they enter without your knowing? Oh, no.

1323. About the classification of these women, have you any means of separating married women from single women? No. R. Graham.
22 July, 1898.
1324. Do you consider the present arrangement is a desirable one? With the class of women that I have had with very few exceptions, it really makes no difference whether they are divided or not. Sometimes when I have had a very decent married woman in, I do what I can for her. We have no ward, and the number we receive is not sufficient to ask the Committee to provide one. When more cases were taken in there were wards for them, but not since my time.
1325. Putting the married women out of the case, there must be all degrees of virtue amongst the other women, are there any means of classifying them? No; but we have been helped very much there by the Female Mission Home in Bridge Road. All young girls in their first trouble are sent there. They send them to us for confinement. They only remain fourteen days in the ward, and they are quite separate from the general class of women admitted.
1326. So to that extent the state of things has been ameliorated? Yes.
1327. These girls would only be a few days in the asylum? Yes.
1328. They do not mix with the asylum inmates at all? They are removed by the matron of the Home as soon as they are able to go out.
1329. I understand that you cannot have any proper system of classification? No.
1330. You cannot put one comparatively virtuous woman away from those who are less virtuous? No, we cannot do that; but really speaking of the women we have had for some time, although their history appears to be bad, they are wonderfully well behaved, and in some instances behave better than persons from whom better behaviour would be expected.
1331. As an abstract question, it is very easy to see the desirability of some better classification? Yes.
1332. Whilst your experience may be that these women behave very well, there may be some who are more objectionable than others? Yes; I have no doubt that it is so. Of course, I think the influence of old offenders would be very bad for young girls.
1333. Even supposing their conduct was good, the mere association would hardly be a good thing for the young girls? No.
1334. How many nurses are there in training at the institution? We have eleven pupils this year.
1335. Do they reside on the premises? Yes.
1336. They have board as well? Yes.
1337. How do they deal with them;—on what terms do they come in? They pay fifteen guineas entrance fee, and reside there for six months.
1338. Do they sign any agreement? No; there is no agreement signed. If we find they are not suitable from the state of their health, or any other cause, I believe the fee can be returned to them, and they can be sent away. That has not occurred since I have been there.
1339. Does that fee of fifteen guineas cover the cost to the institution? I should think it would; we find them in food and lighting, and there is the room. They provide for their own washing.
1340. That amount covers the cost? Yes; we have to take into consideration that we make use of their services as well.
1341. You get a certain amount of work from them? Yes.
1342. There is another division of your work by which women are attended in their own homes? Yes; we have had seven cases this year. We had six cases last year.
1343. What does the institution provide in a case of that kind? A midwife has to attend the case, and she takes a student with her if there is one in the house. When the pupils are in the house she takes a pupil, and the woman is nursed for ten days; sometimes we have to provide them with suitable soft food.
1344. You give them nourishment and occasionally clothing? Yes; we have to provide them with sheets and blankets.
1345. As a rule, the women whom you attend at home are too poor to pay? Yes; any that we have been attending have been in those circumstances.
1346. Is the institution prepared to deal with patients who are not absolutely poor, and who might be able to pay something;—suppose a husband came and asked you to send assistance to his wife, and he could pay something, but could not pay the whole cost, would the institution send assistance? I have not asked the Committee about that. No one has applied under such circumstances. I think from a conversation between myself and the medical staff it is considered only fair that anyone who can afford to pay should employ nurses from outside.
1347. I am not supposing anyone who could pay the whole cost, but, say, a labourer who could pay something, in a case like that, would the Committee help them? Such a case has not come before me.
1348. You commenced in June last year? Yes.
1349. How is the work of the Benevolent Asylum affected by the homes recently started;—I suppose there are fewer cases? Yes; our cases ought to be increasing, but they are not increasing. We have actually fewer.
1350. So you have lost the natural increase and something more? Yes; the number has been very heavy for the last month or two, but I generally find that when we have a very heavy number there is something wrong at the other home.
1351. Have you a ward in the lying-in home for separate treatment? No; we receive the patients into an isolated block which is really a hospital, and is used for influenza cases. We have received one or two such cases.
1352. You do treat such cases? Yes, a few.
1353. Why does the Society take up cases of that kind? That I do not know. If we did that we should require a resident medical officer.
1354. What I mean is—why are such cases not sent to the hospital? Sometimes it is a case with a certain amount of septic trouble. For instance, a woman would be admitted fourteen or fifteen days after confinement. We had one or two this year.
1355. What I want to get at is this—is it really part of the proper work of the institution? No; it is not, under existing conditions, but if a married woman who is very ill is brought to the door, for her own sake we are obliged to receive her.
1356. According to that, any other institution would be obliged to receive her too;—is this a proper application of the funds of the institution, and is not provision made elsewhere for such cases? Provision is made elsewhere. 1357.

- R. Graham. 1357. Then why does the society undertake the work? Cases that have been treated up to this time have been cases following confinement, so that it is partly connected with maternity work. We do not take in any operation cases.
1358. Are the cases that you have treated all cases of poor people? Yes; in which there has been very great poverty. I think that in three years we have had only three cases altogether.
1359. Do I understand you to say that you have not taken in any cases except those really connected with your own institution or confined in your own institution? No; they have not been cases confined in our own institution, but following confinement.
1360. And all very poor people? Very poor people, as far as I know. We have not had anyone who could afford to pay.
1361. *Mr. Powell.*] Did you say that you had only three such cases? Yes; since I have been there. They usually go to St. Vincent's Hospital, the Prince Alfred Hospital, and the hospital in Crown-street and the Sydney Hospital.
1362. *President.*] Generally, these cases are taken to another hospital? Yes.
1363. Would it not be better, except where there is danger in removal, when these cases are taken to your institution to have them sent to another hospital? Yes.
1364. Is it your proper function to take in such cases at all? I should have to take them in. The medical officer would see them, and on his recommendation they could be removed.
1365. If it was safe to remove them? Yes.
1366. But you take them in and the committee keep them? Well, the three cases that I have spoken of have been kept.
1367. Do you know anything about the Women's Hospital in Melbourne? I do not.
1368. You have never seen it? No.
1369. Do you consider that the premises of the Benevolent Asylum are suitable for the work you are engaged in? I think the results obtained speak very well for them. They are very comfortable and convenient.
1370. It is not what you would call a modern hospital? No; but still the lying-in wards are very comfortable.
1371. Are they in a good sanitary condition? Yes; the sanitary arrangements are very good. Since the 1st January, 1895, up to the 30th June this year, we have had 1,252 confinements, and no deaths from septic causes.
1372. Still it is not up to date? No, it is not up to date; but it is a building which if more money were spent upon it from time to time might be made very comfortable.
1373. Have you ever applied for improvements, or the cleaning, or the painting, or anything of that kind which the Committee were not able to do for you? I have asked for the downstairs lying-in ward to be painted, and the upstairs we have put in order since I went there. The w.c.'s. have been attended to, and the flushing arrangements are very good.
1374. You have an isolation ward, have you not? Yes.
1375. What is the purpose of that? In maternity work if a patient shows any suspicious symptoms such as a high rise of temperature, she is put in there. We have often to take in cases from outside, women having started in labour, and perhaps convulsions setting in, or we may get a case from a suspicious quarter where there is scarlet fever, and we put them in there.
1376. Have you a separate ward for the children? Yes; we have, in which we deal with cases of itch, ringworm, and so on.
1377. When a child is brought in, is the child isolated? Not unless we see reason for it at the time of admission.
1378. What is the daily average of patients in the isolation wards during last year, they were frequently empty, I presume? Oh, no. In the children's isolation ward I have had from twenty-four to thirty-three children more or less.
1379. Is that an average? Yes, that is our average. It is rarely that we have less than fourteen or fifteen there, and of women from nine to ten.
1380. Are these wards visited daily by a member of the medical staff? One of our medical officers when on duty visits every day. They take so many months on and off. We are not visited every day by any except that one man. The other gentlemen will come once, twice, or three times a week, they usually come when they are telephoned for.
1381. One medical officer when on duty visits daily? Yes.
1382. The other medical officers visit occasionally? Yes.
1383. Is that at your request? Sometimes I have to request them to come, at other times they will come without. Sometimes we need them; at other times, there is nothing very serious.
1384. Are the officials in charge of the wards trained nurses? Yes; all trained nurses.
1385. How long before confinement do you admit women to the institution? I think that by our Rules we are only supposed to have them in one month. In many cases of destitution, they are in much longer than that.
1386. A woman comes and requests admission, and having nowhere else to go to, you admit her? We endeavour to get her to bring proof that what she says is true. Sometimes when they come, they have simply had a quarrel with their friends, and have come for a refuge. If they bring proof that what they say is true, they are taken in on a recommendation. In some instances they cannot bring such proof. A girl from the country arrives at the Sydney Railway Station, and does not know where to go; she asks a porter who directs her to us.
1387. You contend that the institution has no choice in such cases? It does not appear to me to have any choice in such cases.
1388. Is there any provision made anywhere else for girls to wait their confinement? None; except in the Mission Home. Then it must be the girls' first confinement.
1389. Suppose a girl, awaiting her first confinement, comes to the Benevolent Asylum, do you refer her to the Mission Home? Yes; I make inquiries into her surroundings first. We do not care to send girls of a very low class there. The place is kept as much as possible for the one class of girl—not that I have anything to do with admitting them. We have nothing to do with the Mission Home.
1390. How long after confinement do you retain healthy women and their children? Only fourteen days, if they have a home to go to, providing that they know that they will be comfortable, and are willing

willing to go, but if it is a poor destitute home, and we think the woman requires nourishment, we advise her to remain longer.

R. Graham.

22 July, 1898.

1391. Some you send to the Infants' Home? Yes.

1392. What about these women who have been there for months after confinement? Any that I can, I get situations for. The Infants' Home will not admit women with a second or third child. A lady does not care about taking such women into her house, nor do I like to recommend such girls. If the lady engaging is willing, so much the better. We sometimes get a great number of girls situations. This year we have got a good many situations for all classes.

1393. And some of those women who are retained for some months after confinement, are some of them not deficient in intellect? There is one woman whom we have had there for some time, who has a very repulsive appearance. I have taken her several times before ladies who wanted girls for the country, but cannot get anyone to take her. There is one instance of a woman with weak intellect. But if we take the baby from the mother the poor little thing fades and dies; however indifferent the mother is the baby will live if she has the care of it. We keep a woman of that sort for a time, and then send her on to Newington.

1394. Take the case of a woman with a weak intellect whom you did not like to separate from her child, would not a child like that be taken into the Infants' Home? They will not take it without the mother to wet nurse. These babies are a great care and anxiety, as anyone who has had charge of infants knows. At the Infants' Home at Ashfield they will take in a woman who will wet nurse her own baby and another. We sometimes do that. I have got a girl to wet nurse her own and another.

1395. Do not the rules of the Infants' Home presuppose that they take them without the mother? They may do from outside, but I do not think they will from us. I know that they have infants there without mothers, but one girl takes two babies.

1396. That presupposes that it would not be an exceptional thing if they took these children without their mothers because they take others? I suppose so.

1397. So I understand you to say that where a woman is retained at the Benevolent Asylum for months after confinement with her child it is because you have exhausted all means of finding employment for her? Yes. I have one woman who has been acting as wardswoman for some time. She has left us once or twice, but drink is her trouble. She cannot keep a situation on account of that weakness. A second case I have sent out on several occasions, but in that case the child is very delicate and gets ill, and a mistress will not keep a servant with a sick baby, and she has to come back. There are several instances in which women have been on our books for a long time. That is owing to these cases of sickness of the infant or drink.

1398. Take the case of a woman who has been in service and who has been forced to come back to you through her infant being ill, is there no other place for her? Not that I am aware of.

1399. Then if employment can be found for them and they are sufficiently strong, what do you do? We would not send a woman with a fourteen days' old baby out to a situation.

1400. If they have friends they go out after fourteen days? Yes.

1401. And those who can be provided with employment are sent out as soon as possible? Yes.

1402. And those who have been much in the institution are women that you really cannot make other provision for? Yes.

1403. Or who would be returned on your hands again? Yes, after their being sent out to a situation.

1404. No doubt you use all the means you can to get situations for them;—do you think if there was any organisation for that particular purpose it would be easier to get employment for them? I do not know; probably it would be. We have advertised at various times in country papers and in the Sydney papers. Sometimes we have never had one application, and at other times we have had a number of applications.

1405. Do you think you could make use of the Labour Bureau for a purpose like that? We have tried that. We sent women there—not this year, but I think in 1896—several women were sent, but it did not lead to anything.

1406. Suppose the Labour Bureau were instructed by the Department to assist you, do you not think it would be a material help to you? Yes; it might be in that case.

1407. They have connection with stations up the country? Yes; we have no connection of that kind.

1408. Yours is not an organised attempt, but they have proper organisation? Yes.

1409. You have a certain number of women in the Asylum who are really not provided with work of any kind, I understand—unemployed? Yes; but they must all assist in keeping the dormitories clean and washing out the institution.

1410. There is a certain number of women who are doing domestic work in the institution, and who receive gratuities; these I do not call unemployed, but, in addition to these, are there not women who have no work to do? Yes; they are employed, but do not get gratuities.

1411. They assist in the work of the institution? Yes.

1412. I suppose they keep their own premises clean, but do not work beyond that, whilst those who receive gratuities are practically the domestic servants of the institution? Yes.

1413. The unemployed are not, except to a very limited extent? No.

1414. Have you ever considered whether you should not start some employment for them—say, for the sake of argument, a laundry? I do not know. The class of women we have there would not be much use at laundry work.

1415. Under a competent laundress? Perhaps, under a competent laundress, they might.

1416. I suppose you are aware that certain institutions in Sydney carry on large laundry businesses? Yes; I have heard of their doing so.

1417. Have you ever considered the possibility of starting a business of this kind to find employment for these women—these unemployed women, that you really cannot get rid of? No doubt it could be done if the committee were prepared to spend a good deal of money in fitting up a proper laundry.

1418. Of course, it is a matter of policy for the committee in the first instance;—do you consider it to be practicable? No doubt it would be; but very few people from outside would care to send washing to an institution like the Benevolent Asylum, where you have a number of isolated cases. I am afraid we should not be patronised very well.

1419. Would not that objection hold good to some extent with regard to other institutions? I do not know. I do not know what their work is.

1420. If you had a laundry established these women could be trained? Yes, at that work. 1421.

- R. Graham. 1421. And would, therefore, become less helpless? I have endeavoured to train some of the girls in housework, and have got situations for many of them.
- 22 July, 1898. 1422. You think there is nothing not feasible in the idea? No; nothing at all.
1423. If the women were put under a competent laundress, and had to work, getting a little for it, that would be an inducement to them to learn the business, and go out to work where they could earn something? Yes.
1424. *Mr. Powell.*] I suppose they work in your own laundry? Yes; they are employed in the wards and in the laundry. A good many women work in the laundry, who do not get gratuities. The reason for introducing the gratuity money was that I found so much destruction to the clothes. The women would tear them up; but for a shilling a week they would probably do better.
1425. Are you aware that at the Sydney Female Refuge, which is carried on a few doors away, they have a laundry? Yes; they have had it for years. I think they rescue first-offence cases from the gaols, and keep them for two years. We send some of our girls—the outrageous cases—there for a couple of years.
1426. Do you know whether that refuge is a profitable concern? From what I have heard I understood that it pays its expenses.
1427. There are certain children who are received for boarding-out at the Asylum? Yes.
1428. Are those children allowed to mix with the women who are in for confinement? No.
1429. Do they see them at all? Yes.
1430. Do you approve of that? No; I think it is a very bad arrangement, especially when we have boys and girls 11 and 12 years of age there.
1431. You have no means of preventing it? No; the only way I do is to urge the boarding-out officers to get them away as soon as possible.
1432. Do you consider that it is necessary to have those children there for boarding out;—I suppose you are aware that the State Children's Relief Board have a depôt of their own at Paddington? Yes; but I understood that it was not large enough to receive all the children, so we relieve them.
1433. Of course, it is no necessary part of the Sydney Benevolent Society's work to receive these children at all? No; I do not think so.
1434. If arrangements can be made elsewhere for the State Children's Relief Board to receive the children it would be rather an advantage to your work? I do not know that it would be an advantage to us. I suppose it would mean some loss of income.
1435. You are not supposed to be making a profit out of them; but if you had not to keep them, what loss would there be? As it is now, I have found very great difficulty in that respect.
1436. Assuming that it would be no loss to the institution, you would rather be without the children? Yes; and it would certainly be very much better for the children. I cannot altogether isolate them from the women, and I place women above them who are as suitable as possible.
1437. Do they remain there any length of time? With very few exceptions. We sometimes have very delicate children. We have one child who has been there nearly twelve months.
1438. *President.*] Do you consider that a particularly suitable place for a delicate child? Our children look very well, as a rule. There has been a difficulty about getting her away. She is a Roman Catholic, and the homes for Roman Catholics are full.
1439. *Mr. Powell.*] That is an exceptional case? Yes. There is another case of a boy with a deformed face. People will not take him on account of his appearance. It is difficult to know what to do with him.
1440. *President.*] As regards the married and the unmarried women, one woman does not know whether or not another is married, does she? No; not if they do not mention it.
1441. How do the nurses address them? They address the younger girls by their Christian names; but they would address the others as Mrs. Brown or Mrs. Jones, whatever her name was.
1442. Are their cards by their bedsides? There are no bed cards; the only thing used is the chart at the foot of the bed.
1443. Is there not the name on it? Yes; the name is on it.
1444. And Mrs. or Miss? No; only what is usual in hospital work.
1445. Does this card state the number of times that they have been in the institution? No.
1446. It is just to give medical information as to temperature, and so on? All that is on the chart is the patient's name and her age, and the sex of her child. Formerly we put on the chart first, second, or third child. I got that stopped, because the women got to know one another's histories. We used to put that on for medical information. That information is now kept in a book in my office.
1447. That information is not given now? No; if the patient herself does not volunteer any information, there is no need for the other inmates to know anything about her business.
1448. The chart is the usual chart? Yes; it gives the morning and evening temperatures. The use of it really is to record the temperature.
1449. Then the chart has the Christian name and surname of the patient? Yes.
1450. You have a ladies' committee? Yes.
1451. Are you immediately responsible to the ladies' committee? Yes.
1452. Have you anything to do with the ordinary committee? Not any further than to go in and read my report, and to place any want that I have before them.
1453. Your department is under the charge of the ladies' committee? Yes. I think I am to consider myself subject to them to a certain extent.
1454. Do these ladies go over the institution, and look over its domestic arrangements, in accordance with the by-laws? Yes, they do.
1455. Do they always go round when at the institution? Not every week.
1456. How often? Never less than once a month. It is always entered by the secretary.
1457. Is there any book in which their visits are recorded? Yes. Mrs. Holme keeps the book.
1458. Does every applicant have to go before the ladies' committee? Only those who want to come months before their confinement. There are many cases of destitution, and so forth, that the manager has to use his discretion about taking in. All urgent cases must be taken in at once.
1459. When a girl comes and requests to be taken in months before the proper time, she has to go before the ladies' committee? Yes.
1460. Then the necessary particulars are obtained from her by the committee? Yes; they have a book with printed questions.
- 1461.

1461. And on that they act? Yes.

1462. But in urgent cases or ordinary cases this is not done? There must be some reason given why the girl could not wait until Tuesday.

1463. The point is as to whether the girl has to go before the full ladies' committee, and to go into all these particulars, I understand you to say that, when they request to be taken in some weeks before the proper time, they have to go before the full committee? Yes.

1464. In other cases the woman has not to go before the committee? If the manager has to take a woman in before the proper time she has to go before the committee before leaving.

1465. All the cases have to go before the committee, either when going in or before coming out? Yes.

1466. Do you consider it as a desirable thing, or is it not a particularly painful thing, for a girl to go before the committee? They seem to be very much distressed about it very often.

1467. Do you not think that, if you saw them yourself, got the particulars from them, and reported to the committee, that would be quite sufficient? I should think so.

1468. You think it is painful for them? Yes.

1469. It is a very painful ordeal for a young girl to have to go before the ladies' committee and go into all the particulars of her case? Yes; it seems to distress them very much.

1470. *Mr. Powell.*] Do you not think that they would be more communicative to you personally? I think so. The printed questions I use, there is nothing that is objectionable in any of the questions.

1471. *President.*] You think it would spare their feelings to a very great extent if you or someone who could be trusted, could get the information from them, fill up the form, and hand it in to the ladies' committee? I think so.

1472. *Mr. Powell.*] What information is required by the form? Their name, age, religion, native country, father's name, mother's maiden name, also whether their parents are living or dead, where they are residing, if they have means to provide for their illness; and then the name of the seducer, his occupation, where he resides, and one question which seems to cause a great deal of unpleasantness, is the question, "What were you doing at the time of seduction?" Of course, it means what were they employed at; but this question is always misunderstood, and seems to cause them a great deal of unpleasantness.

1473. Do you think there is any advantage gained by pressing this particular question? I always understood that these questions were asked at the request of the Government.

1474. From your own personal feeling, do you regard this as necessary? It is necessary to have some private information. A girl may die, and it would be very necessary for that. It is necessary to have information as regards her parentage.

1475. Yes; but I am speaking about this particular item? The only reason for that question is that the man may be communicated with. It is necessary for the institution to know who he is.

1476. The institution gets no advantage from this question? No; I cannot see that it does.

1477. Then you think generally that the asking of questions in that particular direction serves no good purpose? Not that I can see. I think that to a great extent these questions are of the old days.

1478. *President.*] It might be desirable to revise them? I should think it would be better.

1479. You have never represented this to the committee? No; I have sometimes, in private conversation to the manager, told him how very upset the girls have been. As regards revising the questions, the book we are using is gradually getting finished up, and before a new book is got the questions may be altered.

1480. *Mr. Powell.*] Yours is not a society to punish vice? No; it is for us to help those who are in trouble.

1481. Simply to give assistance? Quite so.

1482. *President.*] Do you think that when a girl is taken before the committee she is more or less likely to give correct information than she would be if sitting down quietly in a room with yourself? It is very difficult in any case. We find them very untruthful, but I think it is excusable to a great extent, because the girl at the time is in very great distress. It is very natural. It is very rarely to begin with that they will give their own names.

1483. Is it more or less likely that they will give truthful information to the committee? I should think they would be more likely to give it to one individual than to the committee.

1484. *Mr. Powell.*] There is a general disposition on their part to suppress information on the subject? Yes; I think it is a very natural inclination.

1485. *President.*] Do they represent themselves as married women? They do come and represent that they are married women, but a married woman is expected to bring her marriage lines, and they are asked to do that if they represent themselves as married.

1486. Do you know what is the custom in other hospitals, say Dr. Graham's—in reference to that? I understand that the patients are taken in there without any questions being asked, but I only have that from hearsay.

1487. Regulation 50 provides that all children's hair shall be cut short;—is this rule carried out entirely? I have not carried it out strictly unless a child's head is so dirty that we cannot do anything with it. It is a very great disfigurement to a girl to have her hair cut short, but at the same time if her head is very dirty the hair must be cut off.

1488. Then you use your discretion in the matter? Yes, I have done; and I do not think there has been any objection to it. I once had a sharp letter about children leaving with very dirty heads, so I made it a rule that the children should have their hair cut off if desired by the authorities at Ormond House. It is a great disfigurement to a woman to have her hair cut off.

1489. Have women who have gone into the institution with children complained at having their hair cut off? No; I do not remember any complaints of that kind.

1490. Have you ever made any representation to either the men's or the ladies' committee in regard to the question of hair-cutting? Yes; I have mentioned it.

1491. What was the result? They left it to my discretion.

1492. Are women who remain a considerable time in the institution after confinement allowed to go out to look for work? Yes. At first when I went there the women used to go in and out a great deal, but I found that they did not do very much good, therefore, I limited their outings. I kept them in until they

- R. Graham. they would make an effort to get work outside. I did not allow them to go out so much as they had been in the habit of doing, but I sent them out from time to time to get employment.
- 22 July, 1898. 1493. Has it resulted in anything? We are not nearly so crowded as we used to be. I do not know whether it is owing to that or to other institutions having sprung up. Other institutions may have some of those women.
1494. Do they go out alone, or accompanied by officials? They go out alone.
1495. And they may or may not seek work when they are out? I have to trust them as to that.
1496. Are you aware whether any girls come from other colonies to be confined here? We get some from Victoria and a few from Queensland.
1497. Do you think they come for that purpose? I think so.
1498. Have you had many cases? I should think we get from ten to twelve or thirteen applications in the twelve months; many do not enter upon being told they cannot leave the infant.
1499. Are any measures taken for returning those people to their own colony? No; I generally find that in those cases they are provided with means to get back again.
1500. Are there any women remaining in the asylum now from the other colonies who cannot be provided for—unemployed women? There is one. I remember her, but not any of the others. She wants to get to Melbourne to her mother. She has three children on the State and one child with her.
1501. Three children on the State in this Colony? Yes; she wants to get back to Melbourne. Her husband is a Japanese. She says that if she got back to Melbourne she would get a home, and then send for her children.
1502. Is it easier to get a home in Melbourne than in Sydney? I think it is on account of her mother being in Melbourne.
1503. Is it in the power of the committee to grant that request? No; she would have to get permission from the Government.
1504. Could not the committee move the Government in the matter? Yes; it is being done now. I think the woman has a pass to Albury, and she could complete the journey if her mother will send her the means to go from there.
1505. Would it not be better to give her a ticket, as it would only be a matter of £1 from Albury to Melbourne;—is Mr. Maxted moving in the matter now? No; he gave her a card to go to Mr. Hanson.
1506. That is the only case of unemployed that you know of? The only one that I can remember. There may be others that I have not taken a note of.
1507. Ten or twelve come to this Colony every year expressly to be confined, and in most cases they have means, and return to their own colony? Yes.
1508. Do you know of any such case that has become a charge on New South Wales? No; I do not think there has been any other case since I have been there. There was one woman from Queensland, but that was a case of destitution, not a maternity case.
1509. The case you have mentioned is a serious one if the State has to support three children while the mother and another child are in the Benevolent Asylum? Yes; of course, she takes that child with her.
1510. Regulation 51 says:
- No written communication shall be sent by any inmate out of the institution except through the matron; and all letters addressed to the inmates shall be opened in her presence.
- Does this mean that you are to be made acquainted with the contents of the correspondence of all the inmates? It reads so.
1511. Take the case of a married woman, does it imply that if she writes letters to her husband those letters are to be seen by you? According to the rule they are, but I have used my discretion in these cases. All letters are opened before me, but I do not really know their contents.
1512. Do you consider that some such safeguard of the kind is necessary? No; I do not see that it is. I do not know that there is any object in a letter being opened in my presence.
1513. If a letter is opened in your presence, and you do not read it, is there any advantage in it at all? Only this: that money might be sent in a letter. Inmates have stated that money was sent in their letters, but that when they received the letter there was no money in it.
1514. Rule 52 provides that inmates who are able shall assist in the general work of the institution;—does that apply to women other than those receiving gratuities? Yes; to all women.
1515. They are supposed to do anything that they are told to do? Yes.
1516. But you cannot find constant employment for some of them? No; we generally make use of them up in the sewing-room.
1517. Do inmates who are not paid do the same class of work as those who are paid? Yes; they will assist in the laundry work along with those who are getting gratuities.
1518. Then why should one be paid and not another? Because the one who is paid becomes a sort of forewoman or assistant to the laundress. I can hold her responsible if I miss an article of clothing.
1519. She will take care that the things are not misused? Yes; or burnt. They used to put some of the clothes under the copper and burnt them rather than wash them.
1520. So that the woman who is paid is practically a fore-woman? Yes.
1521. In 1897 the gratuities amounted to £215 12s.? My gratuities usually come to £2 7s. 6d. a week.
1522. These are for laundresses, cook, and wardswomen? I do not think that the laundress is an inmate, or the cook.
1523. Would it not be possible to do away with that gratuity system, and have the work done by the inmates without any gratuity? As regards my own work, there would be very great difficulty. Take a wardswoman for instance. I pay a wardswoman 2s. 6d. a week. If I got a nurse in to do the work that the wardswoman does we should have to pay her from £45 to £52 a year.
1524. But would you have to get a nurse, seeing that practically the State keeps these women and children. The assumption is not as between women with gratuities and a nurse, but women paid and the same women not paid? We can call her a servant. There must be somebody responsible for the ward. I must have some responsible person where the children are. We must have some responsible person to see that the children are fed properly, bathed and clothed, and that their clothes are given out to wash, and are returned in a proper condition. If we put an outside person to do that work we must pay from 10s. to 12s. a week.

1525. Could you not put the same women on without gratuities? There is no doubt that that can be done. The women are in the institution, and are being sheltered, and there is no reason why they should not do work without any gratuity. R. Graham.
22 July, 1898.

1526. Is it unreasonable to expect that women who have been taken in perhaps more than once, who have got over their trouble, and who are fed and clothed by the State, should do the work of the institution without payment until they can find employment? No; I do not think it is unreasonable, only we have found a difficulty in getting it done successfully.

1527. Then there is another aspect of the matter;—is it not likely that if a woman is expected to do this work without any gratuity she will make greater efforts to obtain employment outside? Yes; no doubt. That would be the case with strong healthy women, but the women I have employed have generally been women for whom we could not get anything to do. One is a great sufferer from rheumatism, and if sent away from us would have to go to Newington; another has a failing, being given to drink; a third woman has a very delicate baby, but as soon as her child is strong enough I shall expect her to take a situation. I think that in going over the gratuity list you would find a great many changes. I have not always employed the same people. They are expected to try and get situations, and the gratuities will provide them with clothes, so that they can get situations decently.

1528. Will you state your views as to why gratuities should be paid; I understand that whilst you admit that it would not be unreasonable to expect the women to work without gratuities, you think, on the whole, that it is wise to pay gratuities? Yes; so as to encourage the women to take more interest in and look after the ward. The woman will take more interest in it if she is paid than she would if expected to do the work for nothing.

1529. You think that you get better service by paying a small gratuity? Yes; there is no doubt about it.

1530. *Mr. Powell.*] What is the highest gratuity that you pay? Three shillings and sixpence.

1531. Are there not some getting 7s. a week? I do not understand that they are on gratuity.

1532. *President.*] The laundress gets 7s. a week, the scamstress 7s., the cook 8s., Mrs. R * * 5s.? Yes; that is the highest gratuity that I am aware of.

1533. There are two at 7s. and one at 8s.; you have told us that you think the system of gratuities is defensible, because it leads to better work; now we come to the question of the amount of the gratuities;—does not 7s. or 8s. a week appear to you somewhat high, seeing that the institution is keeping the woman and child? Yes; I think it is. I understood that these women were servants of the institution. L * C * *, I think, was a servant of the institution.

1534. What do you think should be the maximum gratuity, I suppose it would vary according to the work, one woman having charge of the laundry, and another having charge of the kitchen? Well, you could not expect a laundress to take charge of the laundry for less than 7s. or 8s. a week. Suppose we engaged a woman with her child for the ordinary duties in the ward, I think 2s. 6d. a week would be quite sufficient.

1535. Do you think that an inmate in charge of the laundry who was supported with her child, and clothed by the State should get as much as 8s. a week? Well, it seems rather a high gratuity considering that the woman is being kept by the Government.

1536. Not only kept, but clothed as well? Yes.

1537. She and her child cost the Government £42 a year? Yes.

1538. *Mr. Powell.*] And you are giving her a premium to prevent her from going out?—

1539. *President.*] It must have the effect of taking away any incentive to find employment? Quite so. I do think it is high.

1540. *Mr. Powell.*] Would you say that the amount of gratuity should not be more than 2s. 6d. a week in any case? No. I think in the case of a laundress the person must be paid more than 2s. 6d. a week, there is a great deal to be done. I should not like to offer an inmate 2s. 6d. a week to take full charge of the laundry and be responsible. She has to be responsible for a great deal.

1541. *President.*] The institution is charging the Government £42 a year for their keep? Yes.

1542. Suppose these women were all discharged, how many capable general servants would be necessary to take their places? One for the kitchen, one for the laundry, not counting the wards-women who average from 2s. to 2s. 6d. a week. There would be three general servants required.

1543. You see that each of these women costs the Government £28 a year, and each child £14; that is £42 a year which the Government are paying to the institution? Yes.

1544. And the Government having provided more than sufficient to keep them in the institution, the institution gives them 8s. a week;—what do you estimate is the cost for clothing for a mother and child? I never thought about that. I do not think the expense is very great. Boots would be the heaviest item.

1545. Would it be £5 a year? I do not think it would come to quite that for the twelve months.

1546. There is one thing that must be remembered as far as clothing the women is concerned, that there are frequent changes in the institution, and many of these women have to be presented with a proper outfit, and it would be a question of a succession of women? In our institution the dresses are made so that they will fit anybody. It would be very expensive if we had the clothes made to fit each inmate.

1547. If you had permanent inmates it would cost so much per head, but you have a continuous succession of people so poor that they come in with very little outfit, and they cannot be sent out without a proper equipment of clothing? We do not provide them with clothing to go out in, those clothes are generally found in other ways. We get donations to the institution. The institution is at no cost for providing clothes for women going out except for boots.

1548. Rule 59 says:

Parents and relatives shall only be allowed to see the children in presence of the matron or an official of the Asylum.

What is the object of that Rule? I must plead ignorant of that. I have never noticed that Rule. We have a visiting day—the first Friday of every month—and I generally allow visitors to see the children in the hall. A nurse stands at the door of the dining-hall, and the nurse sees that all the visitors come before me before going in. I endeavour, in the case of mothers, to see whether I cannot get them to remove their daughters recently confined.

1549. There are some parents, I suppose, whom it would not be desirable to allow to see the children? In cases like that I send them to Mr. Hanson's department, and he would give the order.

R. Graham. 1550. Rule 76 says :

22 July, 1898. The duty of discharging all patients who have been in the hospital less than thirty days shall rest with the honorary medical officer in attendance.

Is this confined simply to the maternity division? Yes, simply to that. You are asking what the cost would be to clothe a woman; fully clothed, each adult would cost about £1 12s. 6d. That would last for twelve months. Children would cost more, as they require a greater change.

1551. Rule 76 says :

That if a patient has been in the hospital less than thirty days the duty to discharge her shall rest with the honorary medical officer.

Then, whom does it rest with if she has been there more than thirty days? His attention is drawn to that case when he comes round. I recommend a patient's discharge to the manager when a maternity case is convalescent. The medical officer's attention is drawn to her, and he gives permission that she can be discharged from the time he has seen her. Then it rests with myself and the midwife. If anything should develop it has to be reported to the medical officer, and the patient must be kept in till he sees her.

1552. I presume the reason of the resolution is that up to thirty days it must be a matter for the doctor, but after that it is presumed that the woman will be so well that she can go out? Yes, that is it.

1553. It seems strange that a medical officer has power to discharge a woman who has been in the hospital for less than thirty days, but not when she has been there more than thirty days? I think the reason of that Rule is that the patients have given trouble by saying that they had to leave the institution at a certain time. No doubt it is to provide against that.

1554. Rule 68 says :

When a consultation is required, the honorary medical officer attending the patient shall direct the resident medical officer to summon the other members of the staff.

There is no resident medical officer, is there? No.

1555. Do you think there ought to be a resident medical officer? There is not sufficient work for a resident medical officer.

1556. Do you think you ought to have an officer of your own who could be called upon? We can do that now. The medical men, as a rule, come immediately they are telephoned for, but I think it would be better if there was a medical officer who visited the institution every day.

1557. You think it would be a good thing to have a medical officer receiving some small salary to visit the institution daily? I do. For an institution like that, especially where we have a number of young children, some of whom may be well one hour and ill the next.

1558. And this medical officer would go the round of the whole institution? Yes; it would be very much more satisfactory.

1559. It seems that now you have to depend upon the services of doctors who have their own practice to attend to? Yes; they are all very busy men. As it is now they come at once when telephoned for, especially Dr. Foreman and Dr. Crago.

1560. You do not think there is sufficient employment for a resident medical man? No; there is not. Sometimes there is very little medical work when the children are thoroughly healthy, and the patients in the maternity wards.

1561. The outbreak of puerperal fever occurred before you were in charge there? Yes.

1562. Personally you know nothing about it? Nothing at all.

1563. *Mr. Powell.*] When the women go out on leave to seek situations do they return at night all right? Yes; we have no trouble. I give them a stated time, they return before dark as a rule.

1564. They do not abuse the privilege? No; they have always come home sober and respectable.

1565. With regard to those children who are kept in the Aylum for two to twelve months, is there any provision for their education? No; nothing more than Sunday services.

1566. All the children there are positively untaught? Yes.

1567. Do you not think that that is a disadvantage? As a rule we do not have the children in there so long, only in some cases. A few weeks, and at the most, two months is the longest time.

1568. If a child is there for twelve months, might that child not go to the nearest public school? In the case of the two that I have referred to we cannot send them. One is constantly breaking out with sores, and the other has a very serious deformity. The Roman Catholic Sisters attend to those of their creed on Sundays, and the Salvation Army and the City Mission attend to the Protestants.

1569. They get no secular education? No.

TUESDAY, 26 JULY, 1898.

[The Commission met at the Offices of the Public Service Board, at 10 o'clock a.m.]

Present:—

G. A. WILSON, Esq., J.P. (President).

F. BARLING, Esq., J.P.

J. POWELL, Esq., J.P.

James Pollard Grant sworn and examined:—

J. P. Grant. 1570. *Chairman.*] You are the chief inspector in connection with the Benevolent Society? Yes.

1571. How long have you held that office? Seventeen years.

26 July, 1898. 1572. Have you been chief inspector all that time? I was the only inspector at the start. There was a previous inspector who got the managership. I applied for this position and got it.

1573. Have you any colleagues? Yes, one—Mr. Roseby. He has been an inspector for the last two and a half years.

1574. Up to that time you had the whole of the inspection to do? Yes, and the distribution as well.

1575. What do your duties consist of? They commence on Tuesday afternoon with the committee. I attend the meetings of the house committee, and I attend to all the people who come for relief, present recipients,

recipients, and fresh applications or renewals. I am there to advise the committee, and give them all the information that is necessary in connection with each case. Mr. Maxted sits there and minutes all the cases. The inspectors' reports are read to a sub-committee. There are so many people coming for relief that a sub-committee hears the reports, and the suggestions from the sub-committee are submitted to the full committee, and they are carried out as a rule.

J. F. Grant.
26 July, 1898.

1576. The people are relieved accordingly? Yes; the next morning I get a list of these cases from the minute-book.

1577. You referred just now to renewals? Yes; all renewals or fresh applications are dealt with. I take the list and enter it in my issue-book on Wednesday morning.

1578. You write the cases up, in fact, in your book? I note opposite each name what is for them, so that there will be no mistake, and when the persons come before me, I can see at a glance what the person is to have, and order it.

1579. You preside over the distribution of relief on Wednesday? Yes.

1580. How many cases are receiving relief per week at present? The number for the first week in July was 1,174 cases.

1581. How many individuals would be comprised in those cases? 3,915. About three and one-third to the family.

1582. How many of these are receiving rental allowances in addition to rations? Between 340 and 350.

1583. *Mr. Barling.*] How do you arrive at that average of three and one-third;—have you worked it up from statistics, or is it a rough guess? It is worked out from the figures. I have to give a return and the classification of persons receiving relief at the end of each year. On the first week in each year I ask every person how many children there are.

1584. The average is based on the return for last year? Yes.

1585. *President.*] There is no money, except for rent? Yes; money is allowed for travelling in a few cases.

1586. Each of these cases represents a separate home, I presume? Not a separate home; they are classified. There were cases of widows with one child, and cases of widows with two children.

1587. These would still be separate homes? They live in one room or two rooms.

1588. What we want to get at is the number of inspections—if you have half a dozen families in one house that would be only one inspection;—I want to know how many separate homes there are? Nearly all of them have separate homes.

1589. The number of cases with two or three females living in one home is very small? Very small.

1590. Will you state the distance from which people come for relief? They come from all round.

1591. Do they come as far as from Rookwood? Yes; I have two cases at Rookwood now.

1592. Then they come from all the suburbs of Sydney? Yes. I have been as far as Liverpool myself, but that was a long time ago.

1593. Then you get your cases from every suburb, and even from beyond the suburbs? Yes.

1594. How many local benefit societies have those districts? I do not remember one in Rookwood.

1595. Do you not get a statement from the benefit societies within the suburban radius? No. We have tried to get that; we have asked for lists from Erskineville.

1596. Would you be surprised to hear that there are twenty of these societies? No. A good many have cropped up during the last two or three years.

1597. Take your pensioners from Rookwood or Liverpool;—how do they come in for rations? By train.

1598. What would it cost a person who comes from Rookwood by train? One shilling return.

1599. What is the average relief that you give per case? A single case:—Two loaves of bread, 2 lb. flour or meat, 1 lb. sugar, and $\frac{1}{4}$ lb. of tea.

1600. What is the value of that? Eleven-pence.

1601. Does a man or woman come in from Rookwood to get a ration like that? She gets four loaves of bread.

1602. What is the value of her ration;—is it a double ration? Yes; the value is 1s. 6d.

1603. You actually bring a woman in from Rookwood for 1s. 6d. worth of food, and you pay 1s. to bring her in? That is the fact.

1604. Do you think that that is good business? Of course, we have the committee to consider.

1605. Would it not be better business to give a woman 2s. 6d. through some local agency? Would they ensure the same amount of goods for it?

1606. Is there not a benevolent society at Parramatta? Yes.

1607. Could you not arrange for the local society at Parramatta to distribute the 2s. 6d. instead of the 1s. 6d.—I do not say necessarily in money; or could you not establish a credit with a storekeeper for bread, tea, and whatever is wanted for the woman to the amount of so much per week? She would not get the same amount of food for the money.

1608. Would she not get more than 1s. 6d. worth for 2s. 6d.? The increase in the profit would bring it up to nearly 2s. 6d.

1609. Then, if you could not do it that way, could you not distribute that money for the goods through the agency of the local society at Parramatta? That could be done, but is it to come through another society?

1610. The first thing would appear to be to refer the woman to the local society? That is done.

1611. Suppose that the local society at Parramatta is not in funds, I ask you would it not be better to put the local society in funds than to bring a woman in from Rookwood for 1s. 6d. worth of food at the cost of an extra shilling to the institution? You mean, would it not be better to send the 2s. 6d. to the local society?

1612. Suppose a woman applies for relief, and the society at Parramatta say, "We have no funds, and cannot help you," would it not be better for your society to put the Parramatta society in funds, and to give the woman 2s. 6d. instead of 1s. 6d.? That would be amalgamating the work of the two societies to a certain extent.

1613. I do not care how you do it, but could you not give the woman 2s. 6d. worth of food that way, instead of 1s. 6d. worth of food, without costing the society any more? Do I understand that you want to give the woman 1s. more in food instead of the travelling money?

1614. As it is now, you bring in a woman, and she gets 1s. 6d. for food, but it costs the institution 2s. 6d., does it not? Yes; with her travelling expenses.

1615.

- J. P. Grant. 1615. Would it not be better business that the woman should get the 2s. 6d.? I do not approve of money being given like that. The food distributed by the institution is very economically purchased, and they get more of it for their money than they would get in any other way.
- 26 July, 1898. 1616. Then you approve of the present arrangement by which a woman has to come to Sydney for relief at the cost of a shilling? That is if the local society is not in funds and cannot assist her, but I contend that they should be in funds so as to be able to assist.
1617. Suppose that the local society is not in funds, could not your society put them in funds to the amount of 2s. 6d. a week? It could be done, but it has never been tried. Each society has been independent of the other.
1618. That opens up the question as to whether in distributing public money there should not be co-operation amongst them? It could be done in that way in the future.
1619. *Mr. Barling.*] The objection you made was that they could not get food at the same price at Parramatta? They could not.
1620. How do you know that? It is because of the large quantities that we buy.
1621. On account of your large orders you get it at a cheaper rate? Yes.
1622. Then you pay 1s. to enable a woman to come and get 1s. 6d. worth of food, and your argument is that they could not get the food at the same rate at Parramatta, but supposing you could not get it at the same rate, it is not likely that there would be a difference of 1s. in the cost? No.
1623. *Mr. Powell.*] Would the difference be 50 per cent.? I do not think it would be.
1624. How much do you think it would be? I should say 25 per cent.
1625. *President.*] Are there many such cases? No, only two up there.
1626. You told us that you distributed relief all over the suburbs, even to Liverpool? Yes; I have gone to Liverpool, but that was a very isolated case; we have only two cases at Rookwood.
1627. *Mr. Barling.*] Have you many cases at Burwood and Ashfield? There is one case at Homebush, and there are three or four cases at Burwood.
1628. Can you tell how many there are at Ashfield? Three, I think.
1629. I suppose in all these cases you pay train fares? We do not in all cases.
1630. Would you in cases from Homebush and Ashfield? A person from Homebush gets a shilling.
1631. Would a case from Burwood get a travelling allowance? There are four cases, one in Concord, and they all get travelling expenses.
1632. Would a person from Ashfield get travelling expenses? Yes; there are two there, I think.
1633. Up to what limit would you pay travelling expenses,—would you pay travelling expenses from Petersham? It all depends upon the nature of the case. It might be done in the case of an aged person or a person who had not good health.
1634. *President.*] The whole amount spent in a year in travelling expenses is only £44 18s. 10d.;—what I want to get at is whether in the interests of these poor people a woman coming from Rookwood for 1s. 6d. worth of provisions could not be benefited without loss to the institution to the extent of getting the value of the 2s. 6d.? Naturally the woman would be benefited by it.
1635. I want to know how far you work in connection with the local benevolent societies, of which there are somewhere about twenty in the suburbs, do you work in co-operation with them at all? They send in their lists—the Erskineville benevolent society, and the Randwick, Waverley, North Sydney societies, and the Charity Organisation Society.
1636. Do you ever look up the secretary of a local society, and get information in your capacity of inspector in reference to any cases within the radius of that society? I have visited individual cases when I received information that they were receiving relief locally.
1637. Have you interviewed the secretary of the society? No; I have no time to do that.
1638. These societies do not all send in statements to your society? There is the Erskineville society.
1639. I do not want the individual names I want to know whether you get reports from them all? No, we do not; though Mr. Maxted has written to everyone of them.
1640. Mr. Maxted has written and tried to get reports, but cannot get them? No; we cannot get them.
1641. It was done, I suppose, with the view of ascertaining whether certain cases that you were relieving were being relieved by the local society? To prevent overlapping.
1642. You cannot get that information in all cases? Not in all cases.
1643. What steps do you take to inquire into this question of overlapping;—suppose you relieve a case at either Rookwood or Liverpool, do you ascertain whether the person is not being relieved by some local society? We get the information from the neighbours as far as possible. My plan of inspection is this: a person makes application; I get the address; I go and make full inquiries in the surrounding neighbourhood of the place where the person resides, then I have all the information necessary to enable me to ask questions, and I visit the house. When I have got all my information, and if everything is satisfactory, if I feel in my own mind that everything is right, I report to the committee.
1644. Do you consult the police at all? I do.
1645. Do you consult the Charities Department at all? They consult me a good deal.
1646. Do you consult them? No, I cannot say that I do. They come to me very often for information.
1647. You say you do not consult them? I know most of the homes that they know; that is the reason why they come to me for information.
1648. But you do not go to them? I do not go to them.
1649. Do you consider there is much overlapping in your work? No, there is not.
1650. Why does your society grant relief in cases where there are local benevolent societies? They are sent to the institution, and recommended by subscribers.
1651. I am asking why they are relieved by your institution when there are local benevolent societies in their own district;—suppose that a person comes to you from Parramatta recommended by one of your subscribers, does your society refer that case to the local society? It does.
1652. In all cases? Yes, in all cases. I suggested that course to the Committee, and it was carried out.
1653. Suppose a person from Parramatta is introduced by a subscriber and applies for relief, would it be referred to the local society? Yes.
1654. Does the person come back again? She comes back again and says she cannot be relieved there.
1655. Do you check that statement? No; it has not been checked.
1656. So that as a matter of fact a person may come back and say that he cannot be relieved, and all the time he may be getting relief? I do not think that is done.

1657. You say you do not check it, is it not possible that a person may be actually receiving relief from the two societies? We should soon get information about that.

J. P. Grant.

26 July, 1898.

1658. But you say that you do not check the statement? It is not checked.

1659. Do you not think it ought to be checked?—If they had an established secretary in the locality, or if you could go straight to some office and get the information it could be done, but it is not so easy when you have to go to a district as I have had to go and spend a long time in seeking the persons who could give you the information. If I have any suspicion that persons have been getting relief from two societies it takes up a great deal of my time to inquire into it. I have done it. You have to find these people out, and the members of these honorary committees are often changed.

1660. As a matter of fact you have no record in your office showing the office bearers of these societies so that you could go without loss of time to inquire into these cases;—you have already said that you cannot get returns from these societies? Not from all of them. We have got returns from some of them.

1661. There is the case of a man at St. Peters, do you know that case? Yes; he is an old man.

1662. He is an old man with a family, and he receives certain relief towards his rent and certain rations? Yes.

1663. Are you aware whether he is relieved by any other society? I am not.

1664. You are not aware that he is relieved by a local society? I am not. We have not had the returns in from Cook's River lately.

1665. Have you ever inspected that home? Not personally.

1666. Would it not be the duty of the inspector to inquire into that case? They are always asked if they are being relieved anywhere else. If a person does not tell the truth or you cannot get the information apart from the list that ought to come in it is very difficult.

1667. Besides yourself there are two inspectors? Yes.

1668. How long have they been employed? Mr. Roseby has been assisting me for two and a half years.

1669. And the other man? He has been there twelve months last May.

1670. Up to two and a half years ago you were doing the whole of the work of inspection? Yes.

1671. A good deal of your time is taken up in indoor work, is it not? It has been more so since 1896.

1672. Is that on account of the growth of the work? Yes.

1673. How much of your time is taken up with indoor work? Up to the beginning of this Commission asking for information I was in the office on Tuesday afternoon, Wednesday, Thursday, and Friday, and sometimes Saturday; but since this Commission commenced I have been out very little.

1674. The Commission, no doubt, has deranged your work;—we will take it when things were in their normal condition before the Commission called for information? Then I used to get out two days a week.

1675. So that practically you had very little time for the duties of inspection? Very little.

1676. As regards the other inspectors, before the Commissioners called upon you for information, how much of their time would be given to outdoor work? Mr. Roseby would be in the office on Tuesday afternoon, on Wednesday, and most of Thursday.

1677. So that half his time is taken up with indoor work? Yes, in checking and getting lists out.

1678. Then there is the other inspector? He is wholly devoted to the work, except on Tuesday afternoons.

1679. His whole time is devoted to outdoor inspection? Yes.

1680. Very little of your time is given to it, and only half of Mr. Roseby's? Yes.

1681. So that is about one inspector and a half devoted to outdoor work? Nearly two, because I am out two days a week, and Mr. Roseby three days a week.

1682. A great deal of the time of the inspectors is necessarily taken up by indoor work? Yes.

1683. It practically means that you have two inspectors? Yes.

1684. Do you consider that inspection sufficient for over 1,100 cases? There are a great many chronic cases—cases of very aged people.

1685. And these require very little inspection—they are not improving? No; if you visited them every day you would find no improvement. All these people come before me every Wednesday, and if there is anything in connection with their cases that is not right I question them. They come before me every week, and that is a great help to the work of inspection.

1686. Making allowance for the number of chronic cases, do you consider the inspection sufficient? It is not sufficient.

1687. Is that on account of the great increase in the number of cases? Yes; the great increase and the work. There is additional clerical work.

1688. It involves not only more outdoor inspection, but a great increase in the indoor work? Yes. Another inspector would be desirable.

1689. Have you ever considered the question of getting volunteer inspectors to make use of their local knowledge? Yes; I have a good many volunteer inspectors. I have met them in the suburbs where I have been, and where I am known. I ask volunteer inspectors privately to keep a look-out for me.

1690. Have you organised them as a general system throughout the suburbs? In my work I have, as far as it is practicable to do so.

1691. Could not that system be extended? Yes; if you could get people to take up the work. It is like this: You go to a business person, and you ask a question about So-and-so (of course, you do not like to make yourself known, or your business). Sometimes you are insulted. You ask, "These people have been living here a certain time, have they not?" I say that I have private reasons for asking. Of course, one does not like to publish the matter to everyone, but you have to have a great amount of tact to get the information. Sometimes you are insulted, and do not get any at all. I have had doors slammed in my face. Then there are other people from whom you can get information readily.

1692. You find that volunteer inspectors are of great use to you? Yes; I have always made myself thoroughly known to two or three, and they have given me information readily, when they knew that it would be private, but had they any idea that it would leak out they would not give the information.

1693. *Mr. Barling.*] You spoke about the increase of your work;—has there been any large increase this year as compared with last year? No; the increase is not this year. For the first week in July, 1897, there were 1,259 cases; on the 1st July this year, 1,174 cases, showing a decrease of 85.

1694. The great increase has been since 1891? Yes; it rose rapidly then.

1695. *President.*] About how many times a year is each home inspected by you or the other inspectors—take the chronic cases? Suppose a widow applies for relief, and we visit her and find that everything about

- J. P. Grant. about her is satisfactory; she perhaps has half-a-dozen children; you are satisfied in your mind that the woman is in need of relief, and that almost becomes a chronic case afterwards.
- 26 July, 1898. 1696. The only point is that the woman's circumstances might improve? Yes; but then you are satisfied that she is the person who would tell you the truth.
1697. What inspection do you consider necessary in ordinary chronic cases? Very little would be necessary. They come before me every week.
1698. That is sufficient inspection for chronic cases? Yes.
1699. As regards cases that are not chronic, how many inspections do you consider necessary in a year? I have a statement here showing the number of inspections from 4th May, 1897, to 30th April, 1898:—James P. Grant, inspector, 31 weeks, 879 cases; weekly average, 28. S. T. Dickinson, inspector; time, 48 weeks; cases visited, 3,226; weekly average, 67. I might say here that it all depends upon the weather. If the weather is wet you cannot do the work that you could do if it were fine, and that brings down your record at the end of the year.
1700. What I wanted to know was what inspection you consider necessary for cases that are not chronic; what is a sufficient number of inspections per annum? About half a dozen in the year.
1701. One every two months? Yes.
1702. You think that if they are visited six times a year in ordinary cases, that is sufficient inspection? I think so, where there is no suspicion. If there is anything suspicious we keep an eye on the case.
1703. Do you consider that your staff of inspectors is sufficient to do that? No; not at the present time.
1704. Did you give the number of Mr. Roseby's inspections from that return? His time was 43 weeks, the number of inspections 1,734 being a weekly average of 40. The total number of inspections was 5,839.
1705. You say that the cases ought to be inspected six times a year, but your staff is not sufficient to do that? No; not to visit each case six times a year. With an average of 1,000 cases, that would represent 6,000 visits.
1706. You consider that the interview that you have with them on Wednesday yourself is a pretty good check? A very good check.
1707. Is it not a fact that you are so rushed on that day that you cannot give much time to individual cases? No; I have such a grasp of the work that I know the people, and I can remember the character of each case.
1708. Have you time to talk to them? I do talk to them. It is very amusing to listen to the conversations. On a Wednesday I am watching every person who passes, and if they do not look well I ask if they would like a little light food.
1709. Rule 33 says:—
The chief outdoor inspector shall keep a record of the names, addresses, amount of relief afforded, its continuance and discontinuance, and the persons recommending all outdoor cases.
- Do you keep such a book? Yes; I have here a specimen copy of the outdoor relief book. It is a new book.
1710. That is the big book that you yourself keep? Yes.
1711. You attend each meeting of the house committee? Yes.
1712. Then you report and advise the committee? I do.
1713. Rule 47 says:—
Money for rent may be allowed on special recommendation of a subscriber after a full inquiry by the inspector in necessitous cases.
- Is it necessary to have a recommendation from a subscriber before anybody can be relieved in the way of rent? No, not necessarily. People come, and the committee hear their cases. Of course, the case is subsequently visited, but no money is given until there is a report upon it.
1714. It is not necessary that the person should be recommended by a subscriber? No; the recommendation of any citizen will do.
1715. Is the rent allowance granted before the inspection is made and the report is in recommending it? In very rare cases.
1716. Would it be for more than one week? Only one week.
1717. Awaiting the inspector's report? That is all.
1718. What is the maximum allowance for rent? Three shillings a week.
1719. The amount up to 3s., of course, would be determined by circumstance, and would depend upon the report? Yes.
1720. Is it not a fact that a great many of those who receive rations only are quite as poor as some of those who receive rent? Yes; but then they have some income. Some of the family, perhaps, are working, and there is not such necessity for rent as there would be in cases where the children are young.
1721. You do not consider, then, that females receiving only a ration are in equally bad circumstances with some receiving rent? There are some, but the funds of the society are low, and the committee have not allowed rent money in these cases, although they are deserving of rent money.
1722. If the society had more funds do you consider that there are persons receiving only rations now, and small rations, who would have an equally good claim to receive rent money? Yes.
1723. It is a matter of funds in some cases? It is.
1724. On what principle are the rations distributed;—tell us how the maximum and minimum rations are decided? The maximum ration is six loaves of bread, 3 lb. flour, 3 lb. meat, 1 lb. sugar, $\frac{1}{4}$ lb. of tea and sago, arrowroot, or rice, for the child.
1725. What is a single ration? Two loaves of bread, 2 lb. of flour or meat, 1 lb. of sugar, $\frac{1}{4}$ lb. of tea; the next ration is 3 loaves of bread, 1 lb. of flour, 2 lb. meat, 1 lb. of sugar, and $\frac{1}{4}$ lb. of tea.
1726. The second ration is for how many people? For a woman and child. It all depends upon the age of the child what amount is allowed; an older child will get a little more than a young one. No. 3 ration is 4 loaves of bread, 2 lb. flour, 2 lb. meat, 1 lb. of sugar, and $\frac{1}{4}$ lb. of tea.
1727. What number is that for? A woman and two children, or perhaps two children and an infant. An infant is allowed a little light food. The next ration would be 5 loaves of bread, 2 lb. flour, 3 lb. meat, 1 lb. of sugar, and $\frac{1}{4}$ lb. of tea. That would be for three children. For four or more children the allowance would be 6 loaves of bread, 3 lb. flour, 3 lb. meat, 1 lb. sugar, $\frac{1}{4}$ lb. of tea and light food.
1728. Is that the maximum ration? It is.

1729. Although the quantity of bread and flour is increased according to the number of individuals it seems that you always give the same quantity of tea and sugar? Yes. J. P. Grant.
1730. Can you explain that? It is a matter of funds. If you increase the quantity it runs into money. 26 July, 1898.
1731. A woman with four healthy, well-grown children, will receive the same quantity of tea and sugar as a woman who receives one ration? Yes.
1732. And you explain that on the ground of want of funds? Yes.
1733. Do you consider the maximum ration a sufficient ration? No.
1734. A woman with four children cannot do much work, and if she has no other means the family must be living very poorly? Yes; but the neighbours are very kind and often give them food. If they are stuck up for food they will go and ask for it. They always have some friends; the poor help one another very considerably.
1735. Take the question of the aged and infirm people—the ration is very stereotyped here; do you consider that it is varied enough—that they have enough choice of food? They have sago, rice, arrow-root, oatmeal, tea, sugar, bread, flour.
1736. I thought sago was only given in case of sickness? They get light food as well if it is necessary; I never refuse it if they ask for light food.
1737. You do not consider the maximum ration sufficient unless it is supplemented either from other sources of their own, or by the charity of the neighbours? That is for women with families. Aged people do not eat so much.
1738. Suppose the case of a very old man not able to earn anything at all, quite past work, and possibly in very feeble health—he would get 2 loaves of bread, 2 lb. of meat or flour, 1 lb. of sugar, and $\frac{1}{4}$ lb. of tea; would not that old man be suffering great privation on a ration like that? The amount of relief given by the Society is not intended to support them; it is simply to prevent starvation.
1739. To aid in supporting them? Yes.
1740. I presume that you have got many such cases as I have mentioned on your books? A good many.
1741. Take another case: Suppose that a young woman quite fit for work had a child, what would you allow her? Two loaves of bread, 2 lb. of meat or flour, 1 lb. of sugar, $\frac{1}{4}$ lb. of tea, and a little sago or rice for the child.
1742. Is not that much more liberal treatment than in the other case? No; the other may get a little money for shelter.
1743. But this woman is fit for work? She cannot get work with a young child; it is very difficult; it is not as it was ten or twelve years ago; there are so many girls available without children. When cases like that come before me, I am most earnest in urging them to help themselves.
1744. If it were not for the child you would not go to the relief of the woman at all? No; the child is the consideration.
1745. So that, really, the child is costing this ration? Well, if the child were taken into an institution, it would cost a great deal more.
1746. I will refer to a case actually visited by a member of this Commission:—The husband seriously ill, a delicate woman and five children, the oldest 9 years old, and the youngest a baby;—what relief would you give in that case? The maximum relief, unless they got some relief from another source. Perhaps they would not want so much food, and I would give them a little extra tea and sugar to make it up, also light food.
1747. Your inspector inspected this case before the visit of the Commission;—does he look into the question of the clothing for these people? No; we have nothing to do with the clothing. We have some clothes occasionally, and when we have I pick out the people I think the poorest, tell them to come up next day, and they take what they want.
1748. Would it not be the duty of an inspector to inquire if a family were suffering in that way, and to report to you? We cannot give them clothing.
1749. Is there not a sum for the distribution of clothing and blankets? For blankets and bed-covering. You look round the house, and see for yourself what is required in the house, but as regards boots, or anything like that, I have always let them ask for those things themselves. If they say, "I want a pair of boots badly," I report it. I do not think it is wise for the inspector to go and ask persons as regards all that they want, because they might wish you to supply all that is necessary for the house. We have to use a certain amount of discretion.
1750. Would you consider a full ration sufficient for that family of seven? Of course, if there is no other source of income, it is not sufficient to keep them.
1751. Then your inspector does not consider it his duty to inquire into the health of these people, and as to whether they require medicine, medical assistance, or clothing? If they see that there is sickness, they report it to me, and I give them a card, which enables them to go to the hospital at once; or if a doctor is required, we try to supply one.
1752. But the inspector does not go into the question of clothing? No; we cannot supply it.
1753. Except bedding and blankets? Yes, or a bed. If the bed is in a very bad state we supply a straw bed to keep them off the floor.
1754. Would your inspector, if he found a case of the kind referred to, recommend an increased ration, and would the society give it—some special ration? That question has never cropped up. The maximum has always been given in such cases.
1755. Suppose anyone came to you on Monday, and said they could not carry on till Wednesday, what would you do? Give them some food.
1756. On your own responsibility, without waiting for the committee at all? Yes.
1757. Have you authority from the committee to give relief in these cases? Yes; and if when I visit the house there is no food in the house, I give them an order at once.
1758. You personally attend to the people that come on Wednesday, and see them all? Yes.
1759. Your interviews with them must be very short when there are so many of them? It all depends on the nature of what I have to ask them.
1760. If it is a case that requires inquiry you keep the person there and let the others wait? No; I make a note of the name and the case, and give that to the inspector or visit the case myself.

- J. P. Grant.
26 July, 1898.
1761. Suppose that on Wednesday you had a representation that the relief given to a family was not sufficient, and you thought the family were in distress, what would you do then? I should say that they had better come and see the committee. I do not remember a case of that kind ever cropping up.
1762. The only check, I presume, on the visits of the other inspectors is the check that you yourself can apply on a Wednesday? No; we take the addresses, and the inspectors have their different districts.
1763. But suppose Mr. Roseby has handed in a report, then you on Wednesday see these people and talk to some of them, and that is to some extent a check upon Mr. Roseby's reports? Yes.
1764. And that is the only check that you have upon the reports of the inspectors? Yes.
1765. Have your your report-book here? I have. [*Produced.*]
1766. I see, in reference to that family I just spoke of, that the inspector in July visited the case, and reported that the society granted a pair of blankets on the strength of that report? Yes, on the 17th July. Mr. Powell and Mr. Maxted visited the case, and telephoned up to the office, asking if one of the officers could be sent down to the house to inspect it, with a view to giving more nourishment and bed-clothing. The inspectors were all away, and I visited the case myself specially, as previously we had given a pair of blankets to the family. I ordered light food, and I told the person to come up soon afterwards. I telephoned down to Mr. Powell that we had sent a pair of blankets and that another pair would be sent, and I gave them and reported to the honorary secretary.
1767. About the condition that outdoor recipients of relief have to come personally to receive rations, is it not a fact that many aged people are not able to come? They make an effort. It is only in a very few cases that they cannot come. A few send orders, but I should think not more than a dozen.
1768. There are certain people who are too infirm even to go before the committee, and they will get no relief at all? If I know of a case like that I tell the person to ask a neighbour to come before the committee.
1769. So that these people, if they do that, may be relieved? Yes.
1770. If any genuine recommendation comes to the committee from a neighbour somebody is sent out to investigate the case? It would be relieved at once, and the neighbour would be asked to come before the committee. The case would be recorded in the minute-book just as if the person who required the relief had attended herself.
1771. Suppose a man or woman came before the committee on Tuesday afternoon, stated their case, and asked for relief, and the committee were to say, "Have you anything in the house for the children and yourself?" and the applicant said, "No, we have nothing";—what would the committee do? Relieve them at once.
1772. How many cases might be relieved on a Tuesday afternoon in that way? I should think about a dozen.
1773. Would there be twenty? I do not think there would be twenty. They get enough to tide them over until the next day. The committee are very considerate in this respect. Suppose a person lives a long way out they say, "Give the relief at once," and the person's name and address are taken, to prevent any hardship in coming in the next day.
1774. About the weekly visits of some very aged and feeble people;—does it not cause these people a great deal of inconvenience and trouble to come to the institution? No, I do not think so. Of course, they have nothing else to do, and it is a little relaxation for them; many of them like to come.
1775. Still there must be some who are very infirm and unfit to be about? Yes, a few.
1776. How would you provide for a case of that kind? They will not go into the institution.
1777. I mean to say how would these people get their relief supposing they are too infirm to come? They send for it.
1778. Some years ago was not the relief given by the asylum authorities much larger than it is now? Yes.
1779. How do you account for that? Because the committee's funds were larger than they are now.
1780. The average amount distributed in rent is not so large as it was? No.
1781. Is it a matter of money? It is.
1782. Have the rations been reduced? No.
1783. The reduction in the amount of the rent allowance is simply because the committee have not the money? Yes.
1784. Have you ever calculated what the relief comes to per day per individual? I sent in a return. We took 100 cases.
1785. We make it out to be a little over 1d. a day per individual? I suppose it would not be much more than that on the average.
1786. Your theory is that this relief is not meant to fully support them? No. That is what I have always understood.
1787. It is meant to assist them? To assist only.
1788. But you are still of opinion that it is not sufficient? It is not sufficient in these times. Work is not so plentiful as it used to be for these people, they cannot get work. People who used to employ others now do the work themselves.
1789. The applicants are put through a strict examination by the committee on the Tuesdays, are they not? They are.
1790. Are these examinations recorded? No. There is simply an entry made "Mrs. so-and-so, widow, so many children," "Mr. and Mrs. so-and-so, aged couple, allowed so-and-so."
1791. Does the society provide medical attendance in cases of pensioners being ill? There is no medical attendance available except through the hospital. When I have given a card, I have been put to great straits through that. I have had to call upon private practitioners to do the work in urgent cases, and that has caused them great inconvenience.
1792. The society have no medical officers of their own, and if a case is brought under their notice they use whatever influence they have to get it attended to? We do not rest until it is attended to. If I had to pay the doctor out of my own pocket I would see that the case was attended to.
1793. The society has no machinery for this? No.
1794. Do you consider that the society should have such machinery? There would not be sufficient work. If the Board of Health have an officer available the society's officer might ring him up for a special case.
1795. It would be sufficient if the society were able to call in a Government medical officer? Yes.

J. P. Grant.
26 July, 1898.

1796. Do you consider it would be an advisable thing that such officers should go through the institution daily? There are three medical officers in connection with the institution, and they attend to the inside cases. I do not think any outside interference is necessary.
1797. You think all that is necessary is that some medical man should be available on the order of yourself and Mr. Maxted, or other authorities of the institution, to visit the homes of the out-pensioners who may be found to be suffering from illness? I do.
1798. At present there is no machinery? No.
1799. But the officers of the institution go the best way they can to get medical men to attend such cases? That is the position.
1800. Does the society provide medicines at all? No.
1801. Nor medical comforts, such as wine or brandy? No, very rarely. In only one or two cases in my experience has that been done, and those were cases of consumption.
1802. Is there much difficulty in your getting people attended to by a medical man? Yes, there is a great deal of difficulty. If a private practitioner knows you very well he might oblige you as a matter of courtesy. I had a case at Leichhardt of a man who was very ill. I visited the man at night, and went to a medical gentleman and asked as a favour if he would go to the patient, and he did so. It appears that he was already attending the man.
1803. Have you any difficulty in getting the services of a Government medical officer when you want them? The Board of Health ask for a medical certificate, certifying the nature of the complaint, or require us to send the party in to their place down here.
1804. You mean to say that they will not attend a case? We have to send the cases in. We have gone to them and said, "What are we to do? Here is a person dying." In a case like that they will stretch a point and attend, but it is not in the ordinary routine of their work to attend to cases of that character. We have been very anxious sometimes to know what to do.
1805. Then you have had it pointed out on several occasions to the medical officers that your pensioners are in need of medical attendance and medicine? Yes. Although they have never absolutely refused to attend, great pressure has had to be brought to bear before we could move them.
1806. In case of the death of one of your outdoor pensioners, how is the burial attended to? The Coroner will give an order.
1807. With reference to those who are receiving rent allowance, the check, I understand, is the production of the last week's receipt? Yes; or the receipt for the last amount they have paid.
1808. How do you know whether these receipts are genuine? We have to rely upon them.
1809. Of course you know that the officer who is paying that money is too busy to do more than look at the receipt, and put it on the file? He examines the receipts very carefully, and if he sees anything not right he refers to me. If I know the person to be straightforward, and feel in my own mind satisfied that it is all right I order the money to be paid.
1810. Do you admit that there is a possibility of fraud? Very little, because we should soon get to know. The landlords have come and asked me if persons were receiving rent money.
1811. Is it not possible for a person drawing a rent allowance to get a receipt signed by some other person than the landlord? Of course it is possible. In two or three cases we have found them out, and the money has been discontinued, and the whole of the relief would have been discontinued, but for the age of the parties, and their having little children.
1812. Do you ever pick out from amongst the receipts two or three doubtful ones, and check them by making inquiries as to whether they are genuine or not? No.
1813. Say 300 receipts are received, do you ever take half a dozen suspicious looking ones, hand them to an inspector, and say, "You find out whether these are genuine or not"? No; that has not cropped up; it is very rarely that any reason to suspect deception occurs.
1814. You do not know how often if you do not inquire? These people move about. They do not stop long in one place. To do what you suggest, we should have to have an inspector appointed purposely to look after the landlords. Your suggestion in reference to examining the receipts is a very good one, and I will note it. These poor people will move into a suburb, stay there two or three weeks, and not being able to pay their rent they have to move. In fact, sometimes the landlords pay them to get out.
1815. Your contention is that if there is a possibility of fraud, the actual fraud must be very small? Very small.
1816. But you have not checked the receipts in the way suggested? No; I have not done that.
1817. Have you ever communicated with the landlords? No; I have no communication with the landlords at all. I always make it a rule to inquire what is the rent of the house.
1818. Do you not think that the local societies could distribute the relief, instead of recipients being brought from a distance into the centre of Sydney? It is a matter of cost. It would cost more.
1819. Why? Because in the different centres they would not obtain the goods so cheap. The large supplies contracted for by the society enable us to supply food more economically than the local societies could.
1820. That is your opinion? That is my opinion. I can tell you what might be done. The society might have the control of the suburban societies, and have depôts, so that we could forward the food to those depôts, and supply the people in the different suburbs from there.
1821. You are relieving a great many women with children? Yes.
1822. You are aware, of course, of the operations of the State Children's Relief Board? Yes.
1823. Are you not to some extent, in relieving these women and children, doing what the State Children's Relief Board ought to do? If the resources of the society are going to women and children who are otherwise provided for, then you are really curtailing the relief that you ought to give to people for whom the law does not otherwise provide? But the Board send the children to us, and we send the children to them. Then they relieve them for a certain time, and send them back again. They do not relieve them permanently.
1824. But they can board these children out? They are not relieved permanently. They are kept three months, and then forwarded back to us.
1825. They throw these cases on your hands? Yes; some of the cases; I do not say all of them.
1826. Some of them are really thrown on your hands by the State Children's Relief Board? Yes.

- J. P. Grant.
26 July, 1898.
1827. I suppose you are aware that the Act of 1896 enables the State Children's Relief Board to board children out to their own mothers? Yes.
1828. You say that a lot of these cases that you have sent on have been sent back to you? They have been relieved by the Board and returned to us.
1829. Do you know the case of a woman, Mrs. E——, in Kent-street? Yes.
1830. Tell us what you know of that case? She has been receiving relief for a long time.
1831. How many years? From memory, I should say nine or ten years.
1832. How many children are there? Five or six.
1833. Has she a husband? No; he is dead; he died from consumption. It was a pitiful sight; one of the worst cases I ever saw. He was a living skeleton.
1834. What do you know of the case? All I know is that she has always been a respectable person.
1835. Have you ever seen the home? I have. The home is not very bright? The disadvantage has been that she has not been over-clean.
1836. When did you last visit the place? It is some time since I visited her.
1837. Do you consider that a home like that is a home where young children should be brought up? I spoke to her about it, but she says that when a woman goes out to work and leaves little children they will make the house dirty if it is the best of homes.
1838. The question is whether, in the interests of the children, it would not be better if they were boarded out? They will not part with their children; they would sooner die. I reported that her circumstances had improved, and the money was reduced to 2s., and there were six children. The amount had been 3s. Their income was 26s. 6d. a week, and the rent, 12s. 6d., that left 14s.
1839. Do you allow relief in respect of that oldest girl, who is 16? No; there are four younger children, and that would justify the maximum amount of relief.
1840. *Mr. Powell.*] Is that girl at work? I could not answer that. They get situations. A great deal depends upon how the children are reared. If a girl is properly reared she has no difficulty in getting into a good home; if she is reared in a slovenly way, and has slovenly habits, it is difficult to get her a situation.
1841. You told us about the B—— family? Yes.
1842. You told us that the rations supplied by the society were insufficient? Yes; in that case.
1843. Are they, or are they not, sufficient? She was getting food elsewhere.
1844. Are the rations you supply sufficient? She said so when I asked her.
1845. Take the case of Mr. M——, St. Peters;—when did you last visit that case? Mr. Roseby visited that case. We have our different districts.
1846. You do not know when he visited it last? I could not say for certain.
1847. What rations are they allowed? From memory, I should say five loaves of bread, 2 lb. flour, 3 lb. of meat, and a little light food, and 2s. 6d. a week.
1848. Is that sufficient to keep the wolf from the door? They do a little work; they make jam. They are a family who help themselves. I think it is sufficient. There is only one child.
1849. If your relief is not sufficient what objection can there be to their receiving relief from other societies? There is no objection if the relief we give is insufficient. When I find a case that has overlapped I question the people and make myself acquainted with the character of the case, and in some cases I know that the outside relief they were receiving in addition to the relief from the institution was necessary.
1850. May there not be a great number of overlapping cases of the same kind, in which the people are insufficiently relieved by you, and that relief is supplemented from other sources? Sometimes the neighbours give them relief.
1851. I am thinking of institutions where the Government may probably supplement the subscriptions of the local people, as, for instance, out at St. Peters, where the Government give something? Yes.
1852. In that case do you think it right that Mr. M—— should draw relief from both societies? If our relief is not sufficient I do not see any harm in it. They are very respectable people.
1853. *President.*] You would not say that it is a good business arrangement to have two societies relieving the same persons? Not if one society gave them enough.
1854. *Mr. Powell.*] But you have admitted in your evidence that you do not give enough? We act in accordance with the rule.
1855. The question is whether you give enough to support these people? Not in all cases. The amount of relief given to one family of four children, viz., six loaves of bread, would not do for another family.
1856. If they get relief elsewhere you do not think that there is anything very wrong in that? No.
1857. About the rent matter, have you knowledge of any case in which a daughter rents a house, and her mother receives relief and rent from you? Yes; I can give you particulars of rent money given to pensioners who reside with relatives.
1858. Are there many of these cases? No; about a dozen.
1859. In that case you take the daughter's receipt? We must.
1860. And where people live in single rooms you take the receipt from the persons in charge for the time being? From the tenant of the house.
1861. As a matter of fact, you do not know whether the landlord receives his rent or not? We are satisfied to know that the person who is receiving the relief has got a shelter, because she would be turned out in some cases if she could not pay a little. I have known people quite terrorised—frightened to go back to their homes.
1862. You do not know anything about it except that you get a receipt from somebody for rent? That is it, and we believe it is from the tenant or from the landlord of the house. As Mr. Wilson suggests, to take half a dozen receipts and check them would be a very good thing, but all that takes time. If there was a little additional inspection by another inspector I could look into these things myself, and not go out at all, possibly.
1863. You are of opinion that the inspection is really not sufficient? Not with the extra work.
1864. Does that additional work include the extra business imposed upon you by the Government in relation to the unemployed? Yes; we have over 300 unemployed now.
1865. I mean the special Government cases for which a grant of money was given to the institution to provide for these people;—are they inquired into by the inspector of the asylum? Yes; there is a special inspector on the work. We have only had that work six weeks. 1866.

1866. Are those cases included in the returns you have given? No; they are separate altogether. J. P. Grant.
1867. Is it a fact that you give a larger measure of relief in those cases than in the cases of your own poor? Yes, we do; they are healthy people, and eat well. A man and his wife and four or five or six children require more food. 26 July, 1898.
1868. How much more do you give? Double the amount.
1869. Are they visited? Yes; they are being visited now as fast as it is possible to do it.
1870. Have you any communication from the Labour Bureau about that? We have.
1871. Do you ascertain whether the men have refused work? No; we get a list of names, and we check the names of those who have gone away (say) to Moss Vale, Mittagong, and so on. When one has been away for a fortnight we send to the Labour Bureau to see whether they will not assist the wife out of the wages of the husband whom they have sent into the country.
1872. When the bedding of these poor people is in very bad condition, you say that you supply a straw bed in some cases? Yes; if necessary.
1873. Here is the case of an unfortunate woman in Cornwallis-street, Redfern, living in one room in a filthy condition? You mean in Cooper-street, Waterloo?
1874. No; in Redfern? That woman has been in a state of filth for the last twenty-five years; she was always the same. She used to buy things and hoard them. She puts me in mind of Quilp, a character in one of Dickens' novels. However, she is steady and respectable.
1875. She is sleeping almost on the bare boards? I will note the case.
1876. Do you know whether she has any friends? She has not a soul in the world. Her husband was a builder in comfortable circumstances, a respectable man, but they had no family.
1877. Do you produce a specimen of your travelling-book? Yes; I have brought a specimen of the travelling-book, also of the book in which the cases are registered, and specimen copies of the rent allowance and receipt-book.

Edwin Thomas Penfold further examined:—

1878. *President.*] Have you something to say? You asked me a question about the burial of poor people. If any person comes and states to us that they have not the means of burying a deceased relation, we give an order upon our undertaker to bury the corpse after inquiry. E. T. Penfold, J.P. 26 July, 1898.
1879. *Mr. Powell.*] We have been told that the parties were sent to the Coroner? I did not understand what was meant by that. If we have any deaths in the institution the Coroner is notified, and he gives an order for burial. There is no inquest. I should like also to state that when we send people up to Liverpool the authorities there are very courteous. If we recommend a case Dr. Paton will always, if possible, attend to it. We also find Mr. Hanson exceedingly courteous and willing to do all that he possibly can to assist in relieving the poor. I do not know whether I stated that the amounts allowed by the Government through Mr. Hanson's department are totally inadequate, and that we write and ask to be allowed to give rations in addition, which they grant.

TUESDAY, 2 AUGUST, 1898.

[The Commission met at the Offices of the Public Service Board at 11 o'clock a.m.]

Present:—

G. A. WILSON, Esq., J.P. (President).
J. BARLING, Esq., J.P.
J. POWELL, Esq., J.P.

The Hon. Sir Arthur Renwick, M.D., M.L.C., &c., sworn, and examined:—

1880. *President.*] You are President of the Sydney Benevolent Society? I am. Sir Arthur Renwick. 2 Aug., 1898.
1881. You are also President of the State Children's Relief Board, and a Member of the Legislative Council? Yes.
1882. You have taken a great interest in public charities? Yes; for the last thirty-five years.
1883. You assisted to pass the State Children's Relief Act, under which the boarding-out system has been established? Yes.
1884. Did you promote an amending Bill, which provided that children might be boarded out with their mothers? Yes; that was during the last Parliament.
1885. In your opinion, has the extension of the system in this direction had beneficial results? I am quite sure that it has.
1886. Has it increased the number of State children materially? It has diminished the number of ordinary State children, the children who were boarded out to strangers, but up to the present time I cannot say that there is a ratable proportion between the numbers of the two classes.
1887. Have you reason to suppose that many of these children suffered much hardship before the passing of the amended Act? I have no doubt whatever on the subject.
1888. Are very close inquiries made before children are boarded out with their mothers? Always. Our inspectors report on these cases, and they are dealt with by the Board on the reports of the inspectors, in which all the different circumstances connected with the cases are given in detail.
1889. Is the inspection more rigid in those cases than where the children are not boarded out with their own mothers? There is the same inspection, and similar reports.
1890. Are the children frequently inspected afterwards? They are inspected, at least in the metropolis and the neighbouring districts, three or four times a year. In more remote parts, according to the distance and the circumstances of the case, they are inspected once or twice a year.
1891. It has been stated in evidence that a large number of widows with children are still receiving outdoor relief from the Sydney Benevolent Society? That is true.
1892. They cannot be transferred to the State Children's Relief Board, because the Board have not sufficient means? That is only partly the reason. The reason is this: We knew that those people were receiving supplies, whether they are adequate or inadequate, and we thought that urgent cases, where no assistance was

Sir Arthur
Renwick.
2 Aug., 1898.

was being obtained from the Government, or from other sources, ought to be attended to first; but we do hope eventually to take from the Benevolent Asylum all the cases that come under the statutory provisions. That is the whole reason of the matter.

1893. How long has the amending Act been in operation? I should say within a year.

1894. Has it been taken advantage of to a greater extent than you anticipated? At first it was. There was a great rush at first, but the thing is now being gradually brought under proper control and regulation.

1895. Has your finance become strained on account of it? No; it has not on the whole exceeded my original anticipation when I moved for the Bill.

1896. Have you received the money that you have asked for in connection with the State Children's Relief Board? Always. The Colonial Treasurer has always provided ample means. There may have been necessary delays occasioned by official circumstances.

1897. It has been stated here that a good deal of the Benevolent Society's funds are expended in the relief of widows with children who could be legitimately relieved by the State Children's Relief Board, and that consequently the finances of the Benevolent Society have been so strained that the relief for the aged poor has had to be curtailed? That is a mistake. There has been no change whatever in the circumstances of the Benevolent Society in that respect at all. The only difference is that we have taken a limited number of persons from the Benevolent Society, and have assisted them, but we have not relieved them to the extent that we hope to do by-and-by when the system is in proper working order. I regard the administration under section 10 of the Act, dealing with widows and deserted wives, as only being in its preliminary stage at present. We require to have a little more experience of it in order to bring the whole of the widows and deserted wives under our special control.

1898. So that you hope to have the whole department under the State Children's Relief Board? Eventually. We are doing that now, but we do not want to go at a too rapid pace.

1899. You want to feel your way? Yes; it is far better to act in that way. If we were to take over the whole of these widows and deserted wives at once, in all probability it would lead to such a large expenditure on the part of the State that there might be an outcry in Parliament and elsewhere on the subject, but doing it gradually as we are doing it, relieving the urgent cases as we have done throughout the country, I think we are doing the best that is possible under the circumstances.

1900. Does it not follow from what you say that the aged poor who are the recipients of relief from the Benevolent Asylum will have their relief curtailed by the State Children's Relief Board not taking these people over? No; because the society are doing that work, and have been doing it for years. It makes no difference to them. What we take away from them will be a diminution. As it is now we have diminished their work to some extent. Of course, as regards the operations of the Benevolent Asylum during the last few years, there has been a large augmentation in the number of applicants for relief, and consequently they do not at present feel the relief that we are giving them, but they will feel it by-and-by.

1901. Is the amending Act so constructed that it is practically considered part of the original Act? Yes; it runs with it, and is read with it.

1902. Is not the Colonial Treasurer empowered to advance funds in anticipation of the consent of Parliament? There is a provision of that kind.

1903. Has it ever been availed of? I think it has.

1904. I understand you to say that there has not been any difficulty about obtaining funds for the State Children's Relief Board? We have never had any difficulty.

1905. Have you had to make repeated applications for funds for the Benevolent Asylum? Yes, on many occasions, and at the present moment.

1906. Is it a fact that those who are relieved by the society are not properly relieved for want of funds? I am quite sure that the Benevolent Society have done the very best they could for the poor under the circumstances. No case has been unrelieved; but whether the relief afforded has been adequate or not is quite another question. The great aim of the Benevolent Society has been to keep people from starvation, but not to supply them with the full amount of assistance that they might possibly require. That has been the principle on which the Society has acted all through its history. In other words, the aim has been not to create a class that would become permanently dependent upon the State. That is the reason why I and others, who think with me, are opposed to the establishment of a poor rate similar to what they have in Great Britain. We are quite sure that there is a tendency in the direction I have indicated, and if Government aid were substituted for aid such as is given by private societies and by the Benevolent Society undoubtedly a pauper class would very speedily be created in this Colony.

1907. Your object, then, is to see that no case goes unrelieved? Quite so; and at the same time not to supply them in such a way as to make them feel that they have a permanent claim upon public funds.

1908. Not to relieve them to an extent that would be an incentive to them to become dependent upon the State? That is exactly the point.

1909. *Mr. Powell.*] We have it in evidence that some cases have been on the books of the Asylum for eight or nine years? Yes; I have no doubt about that. I know there are cases of that kind—cases that have been even longer than nine years; but in those cases the individuals are positively unable to earn a livelihood for themselves. Such cases are reported from time to time. We know of their existence, and we regret it; but we see no way of putting those persons in a position to work for their own living. Most of them are cases of aged people and people suffering from incurable disease.

1910. Such persons would become chargeable on the State under a poor-rate system? Yes, undoubtedly.

1911. *President.*] Do you give mothers of children under section 10 the same amount of relief per child that you give to the foster-mothers? Certainly not. The amounts vary from 5s.—the usual allowance to persons who are not mothers—down to 1s. 6d. per child. Every case is scrutinised most carefully, and we receive very full reports respecting them from the inspectors. We do not rely entirely upon inspectors' reports. We find that we cannot place implicit confidence even in inspectors' reports. The Board uses its own judgment in each case. We weigh up the circumstances, and consider how much ought to be allowed. Every case is dealt with singly and independently.

1912. Then with regard to the reduction in the grant to the mothers as compared with the foster-mothers, that is on the same principle as you have already expressed—that you do not wish to take away all inducements to them to earn a living, you do not want to pauperise them? That is the first principle, and the next is this—we hold that a mother, from natural affection and impulse can much more easily maintain her children than a stranger could.

1913. A stranger might be supposed to make something out of the child? We do not look so much at that. We know that there is a tendency in that direction; but we think that the natural feeling of a mother will lead her to strain her efforts to do something for the child, and it is always well to keep that principle in view.

1914. Have you lately reduced the grant? No; we have made no change.

1915. Have many of these mothers represented that the grant is insufficient? Occasionally representations of that kind occur, and they are investigated by the Board as a special report. If we find any necessity for an increase it is granted. Sometimes, in the intervals between the Board meetings, reports are brought to me—there may be twenty or thirty in a month—in which a variation in the Board's decision is absolutely necessary. Recommendations may be made by clergymen, Members of Parliament, or others, who take an interest in the matter; they bring all the facts before me, then I act on my own judgment and report the matter to the Board at the next meeting. A list of such cases is always laid before the Board, so that they may know what has been done.

1916. I understand you to say that the increase in the cases of mothers boarding their children has led to a decrease in the number of foster-mothers? It has just begun to tell within the last two months. There was a diminution in the previous month of some thirty cases, and a diminution of twenty-five at the last meeting of the Board.

1917. It has been stated in evidence that the State Children's Relief Board has relieved cases for several months, and then referred them to the Sydney Benevolent Asylum? There are some cases of that kind. There are cases in which we consider it would be better for the relief to be obtained from the Benevolent Society from the special circumstances connected with their history. For instance, there is the case that Mr. Powell alluded to in which a person had been receiving relief for ten years, and is dragging out a miserable existence. We consider that the relief given by the Benevolent Society is more adapted to the wants of such cases than the relief that we could give. It is better to let them have the necessaries of life than to give them money which might not be expended in a proper way. I do not suppose that there are half a dozen such cases.

1918. Do you consider your present staff of inspectors sufficient? I do not think so, because the whole principle of boarding out depends entirely upon satisfactory inspection. Everything depends upon that. If we had an additional inspector or two I am sure that the work could be carried out more satisfactorily. We have lost one or two inspectors lately, I think, and I observe in to-day's paper that Mr. Ardill has written a letter calling attention to the fact that our inspectors do the work under the Children's Protection Act, and that he thinks it inadvisable. That is a matter that might be discussed. Our desire is to have the fullest and best inspection that we can. With that object in view we not only employ paid inspectors, but we also have honorary lady inspectors all over the Colony.

1919. Do you find that they materially assist you? There is no doubt about it at all. They take a very active part in it. Some ladies who have acted as inspectors for a number of years have rendered invaluable assistance to the State in this respect.

1920. What is your opinion of the lady inspectors? I think that lady inspectors are superior to males for this particular work.

1921. *Mr. Barling.*] I suppose you find no difficulty in getting ladies in every district to take up the duties of inspection? We have changes continually occurring amongst them. They get tired of it sometimes; sometimes we have had applications for the payment of expenses and other things of that kind, but we have always asked these ladies to act in a purely honorary way, and we have had no difficulty.

1922. *President.*] What is your opinion of lady inspectors for the work of the Benevolent Society? I do not think it would be quite so good to have ladies for that. That is a different class of work altogether. A great number of aged people are visited by the inspectors, and I think that male inspectors can do the work more satisfactory than females. One female might be employed perhaps with advantage in cases where there are women with children. The work of inspection for the Benevolent Society is carried out, I think, satisfactorily.

1923. Do you consider that your inspecting staff is sufficient? I certainly do not.

1924. Then, you would have no objection, supposing you had three inspectors, and a fourth were appointed, that the fourth should be a lady? Certainly it would be a move in the right direction.

1925. *Mr. Barling.*] Do you think you could institute in connection with the Benevolent Asylum the same inspection that you have in connection with the State Children Relief Department? The Benevolent Society is a metropolitan institution, but the State Children Department extends all over the Colony. In the metropolitan district a man can go on his bicycle and visit dozens of places. Where there are domestic arrangements women are much better for the work.

1926. *President.*] Women would talk more freely to them? Yes, and they go into domestic details which a man does not always understand.

1927. As regards the Benevolent Asylum, do you as a medical man, and from your experience of the institution approve of the maternity division, the receiving house for destitute women and children, and the system of out-door relief being carried on in the same institution? I should like to tell you what ought to be done. I think that the time has come, and indeed has long passed, when the Benevolent Society's work should have been removed from its present position. I suggested some few years ago to Sir Henry Parkes and to other Ministers, that this step should be taken. It is impossible in the building that we have there now to carry out the work in what we should consider an adequate or satisfactory way. The buildings are old, they never were adapted for the purposes to which they are now applied, and if we had proper buildings, and proper arrangements the poor could be attended to more satisfactorily than they are at present. The scheme which I have suggested to the Government, and I have laid it before them as a member of several deputations, is this: That some land such as the site of Ultimo House should be taken for the purpose. The place must be in the centre of population, so that the poor will be able to get relief in the easiest possible way. Ultimo House would suit our purpose admirably. What I suggested was that the land should be divided into three portions. The maternity part should be kept entirely distinct from the other two departments. Then there should be an outdoor relief department entirely separate. It would not require any very large building for that purpose. And then the third place should be for the reception of women and children, and for keeping those who must be retained a certain time after their confinement. That was the proposal that I made. The scheme was drawn up very fully, the expenditure was explained, and I pointed out that the Board of

Directors of the Benevolent Asylum would be only too happy to arrange with the Government on adequate and reasonable terms to carry out this plan. The result was that Sir Alexander Stuart's Government stated that it was proposed to resume the land for railway purposes. We received the necessary notice to that effect, but the thing was not carried out. With regard to the separation of the lying-in department, or what you may call the lying-in hospital, from the other departments, there is this advantage in utilising the Benevolent Asylum for the purpose, that the Society have the means, they have had experience of training nurses and doing the work generally, and they have the funds at their disposal to carry out a large amount of this work. It is done at a much less expenditure to the State by the Society than it would be if a separate institution were started by some other people. There are at least five or six little maternity homes scattered throughout Sydney, but that is a great mistake. It diverts charity. You have people subscribing to four or five different places, whereas if there was one adequate institution there would be no difficulty in the matter at all. There is one thing which must be stated in favour of the Benevolent Asylum. I may say from a long practical experience in connection with the subject that what has been a matter of extraordinary surprise to me all through its history is the extraordinary absence of mortality amongst the women confined there. I have had experience in connection with the large maternity hospitals on the Continent, in England, and in Scotland, and I know of no similar institution where the rate of mortality is so low, notwithstanding the incongruities surrounding the institution. We have had cases of puerperal fever, but they have been short-lived, except on one occasion when I happened to be absent. Notwithstanding that outbreak, the institution has been carried on with results which have been extremely favourable. The ordinary mortality rate of this institution is really below that of nearly every similar institution that I know of. In this respect there is the greatest possible difference between it and the maternity institution in Melbourne; but still it is not adapted for its present purposes. A place of that kind should not only be satisfactory in regard to the reception of the women, but it should be situated where medical pupils can be trained for their profession, and where nurses can be prepared to undertake work throughout the country. The buildings were erected many years ago; they contain no modern appliances, and the work is carried on with extreme difficulty. This is a thing which I have pointed out to the Government from time to time, but it being a social question and not a political one it has not had that attention which ought to have been given to it.

1928. Do you think that in a suitable building the machinery of the society would be best for conducting its present operations? Yes; it could be done more economically to the State.

1929. The State provides the whole cost of the lying-in hospital? Yes, under arrangement.

1930. If what you suggest led to the closing of the other homes, the whole cost would then fall on the State? I do not think it would make a great deal of difference. It would not make such a large difference as might be imagined. For instance, you have the Catholic Home; that would not be closed under any circumstances. Then there is the Home at Surry Hills. It would make very little difference to that. I do not think the existence of that home has made a difference of more than twenty or thirty women in a year to the Benevolent Asylum.

1931. Your views have been impressed upon the Government? Yes; by letters, deputations, and otherwise. In the time of Sir Henry Parkes the matter was postponed in consequence of a scheme that he had for erecting large public buildings in prominent parts of the city, and in the case of Sir Alexander Stuart, because they were going to bring the railway into the city. At present I do not know why it is postponed.

1932. Have you ever had a valuation of the property? Yes.

1933. *Mr. Barling.*] Have you any idea in your own mind how it is that there is such immunity in the Benevolent Asylum as compared with other asylums from puerperal fever and other diseases? It may seem strange to say it after the remarks that I have made about the necessity for proper scientific arrangements, but there is a homeliness about the Benevolent Society that I think has had a great deal to do with the satisfactory results obtained, and the medical officers have introduced the antiseptic system very completely throughout the whole place. There is a very home-like arrangement about the whole institution.

1934. Would anything be due to the fact of students attending and regular medical officers not having so much to do with the cases—that the students have not come in contact with cases of erysipelas, &c.? No; I do not think that has had anything to do with it. Of course, there are some risks in connection with the matter. We have had proof of that in Sydney, but I do not think that medical attendance, or the attendance of nurses and students makes much difference. The cases that prove fatal are cases that require operative interference.

1935. *President.*] What valuation do you put on the property? That is a very difficult question to answer. We have had valuations made by different persons at different times, and they have varied very much. I do not think that the valuation made now, with all due respect to the Land Tax Commissioners, would be exactly the valuation made a few years ago. I should not like to put a figure on it. Independently, however, of the valuation, I should like to make this remark—that as far as regards the price fixed upon the land, which we consider our own, we do not stand upon that point at all. As a Board we are there for a public purpose; we are willing to agree to any suggestion of a satisfactory nature in regard to the future interests of the Society and of the poor of Sydney, which the Government may make. The value of the property is a matter of secondary consideration.

1936. As a matter of fact, the question of price has never really been discussed? It has not been discussed with the Government. We have valued the property for our own private reasons, to see how we could work our future operations in connection with any means that might be given to us. We hold our position only to serve the public.

1937. Do you approve of the present arrangement for the medical work of the asylum, that work being done by honorary officers? I think that it is desirable, notwithstanding that there might be a resident medical officer, or one constantly in attendance, that we should have a man of large experience to refer to in critical cases. I have known three or four instances in which lives were preserved, simply by the fact that a man of larger experience could come in and give assistance in a critical position of affairs. When operative interference is necessary, it is indispensable that there should be some person of larger experience to refer to, and from whom to obtain assistance.

1938. Do you think that the society should have the services of a paid medical man? I approve of that. The present system was established on the recommendation of the Medical Adviser to the Government,

as a matter of economy, and I suppose of efficiency also; but my own impression is that it would be infinitely better to have a paid officer with honorary medical men to whom he could refer in cases of emergency.

Sir Arthur
Renwick.

2 Aug., 1898.

1939. Is there any provision made for medical attendance for people receiving outdoor relief when they have sickness in their families? Originally the dispensary at the Sydney Hospital carried out that work. The cases were attended by outdoor surgeons, but latterly it has not been done to the same extent, in fact, I do not think it is done at all now. At one time we provided dispensary assistance in cases of diseases of women and children, but I do not think that is done so much now. This is a great defect of our charity system. Of course this matter is rather out of the scope of this particular inquiry, but it might come under your purview in another way. The great defect is, that unlike other large cities, such as Glasgow, Edinburgh, and London, there are no parish doctors who could be applied to by the poor in the different districts of the city for medical assistance. If district medical officers were appointed in that way, it would be a great boon to the poor, and it would relieve this country to a very large extent. At present at the Sydney Hospital, thousands of cases are dealt with every year, and the number dealt with at Prince Alfred Hospital is increasing. If the system which I recommended some time ago to the Colonial Secretary, of paying a small sum, from £50 to £100 a year, to a doctor as a retaining fee were adopted, it would save the poor a great deal of trouble, and meet wants which are not adequately provided for in Sydney at present.

1940. A paid medical officer at the asylum would not have enough to do, I presume? I would not associate the two things together. It would be a source of extreme danger. A medical officer visiting the poor of Sydney would often come in contact with cases of contagious disease, and those are diseases which people never speak about to a doctor, they keep it quiet. If a medical man went to a scarlet fever case, and then to a confinement case, it would be certain death to the woman.

1941. There are a good many children in the Benevolent Asylum, some of them sickly;—would not the proper place for them be in the cottage homes at Mittagong? Yes; they ought to be removed as soon as possible. I suppose the scheme which I suggested of cottage homes on a new plan has been brought under the notice of the Board.

1942. You propose to have them together? No; at a distance of a quarter of a mile from each other, so that there could be no intimate relations between the mothers.

1943. The children then could go to school? Yes. Why the Government have not carried out the scheme, I cannot conceive.

1944. You have made many visits to the Mittagong homes? Yes; I go occasionally. The ladies undertake that work, and they go every month. When there is anything special, or any circumstance requiring my presence, I take a run up.

1945. You consider that they are doing very good work there? Yes; very good work.

1946. Is it a fact that many children who go there sick are soon restored to health? Yes. At Mittagong the ferruginous nature of the soil provides a strengthening influence, apart altogether from the climatic influence. That is the reason why I recommended it as admirably suited for the purpose. There are iron springs underground.

1947. You made a definite proposal to the Government in regard to homes? Yes; I sent a copy of my report to the Premier and to the Chief Secretary.

1948. Supposing it were carried out, would the homes be in a better position to take over these children from the Benevolent Asylum? You could take a large number. You might have two or three extra cottages for that purpose.

1949. Is it a fact that you have plenty of homes for the children? Yes; we have no difficulty in that respect. When the first Bill dealing with the matter was brought before Parliament by Sir Henry Parkes the objection was raised that we should not be able to find homes for the children, but we have never had any difficulty in that respect from the initiation of the system.

1950. Sometimes there are as many as fifty children waiting in the asylum;—could they not be removed? They ought always to be removed without delay. I understand that they always are, as far as possible.

1951. It has been stated in evidence that there are frequently as many as fifty waiting? I am sorry to hear that. It must be because of the inadequacy of the State Children Relief Board's machinery. At every Board meeting we fix on eighty or ninety homes, so there is no scarcity of homes whatever.

1952. There has been a very great increase in the number of outdoor relief cases of recent years, has there not? Yes.

1953. In 1890 the number of individuals relieved was 4,607; in 1895 it was 6,634; in 1897 the number of individuals was 10,767? Yes; there has been a great increase.

1954. Can you account for that? Simply a wave of poverty has passed over the country.

1955. There is a lack of employment? Yes; a lack of employment.

1956. Are you actively connected with the new organisation in connection with metropolitan charities? Yes; I am a vice-president of it.

1957. Can you tell us what they propose to do? The object of the organisation is, in the Metropolitan district, to establish a bureau at which information is to be provided for all the different institutions, so that there shall be no overlapping. Lists will be kept in the first place; in the next place, small committees will be established in association with societies in the various municipalities, so that the two may act together, and there may be no difficulty in giving immediate relief in deserving cases at once in their own district. Of course, in that respect it would be a great relief to the Benevolent Asylum. It would deal with the metropolis, I suppose, in conjunction with the City Mission and the St. Vincent de Paul Society. Those three societies would deal with the whole of the city proper, then the suburban cases, instead of having to come to the Benevolent Society from such places as Rookwood, would be relieved in their own municipalities. It is a large scheme, and it is now in its initiatory stages. Societies will be established in all the municipalities, and the Charities Organisation Society will act in association with them.

1958. And I suppose the Sydney Benevolent Society would act in cordial co-operation with them? Yes.

1959. When you were in America, did you devote any attention to the method of giving charitable aid there? Yes; they have a rate there, but it is the States and municipalities that deal with the matter. We might call them districts. They make their own arrangements in connection with their charities. Even the hospitals are provided for in that way. The State generally passes a vote, and the administration

Sir Arthur
Renwick.
2 Aug., 1898.

of the vote is reported upon every year by the hospitals or by the societies, and in most cases where they relieve the poor they have a provision for them to do a certain amount of work in return for the charity bestowed upon them. It is a much superior system to the English system.

1960. That presupposes a system of local government? It is purely local government all through. That is why I think that if the Charity Organisation Society is ultimately a success it will be in that direction.
1961. *Mr. Barling.*] You are aware that the object of the Commission is to take evidence so as to be able to suggest to the Government some method by which the charities of the Colony may be more economically carried on? Yes.

1962. Is there any suggestion you can give us, not only in connection with the Benevolent Society and the State Children Relief Board, but on the subject generally. If you cannot give any suggestion, you might be able to indicate lines of examination that would produce valuable results? I think it would be a very good thing if the charities which now act in such an irregular sort of way were all brought under one head. This Charity Organisation Society is going in that way, but you can see that the Government money is spent in a rather haphazard fashion. There is no definite control in connection with the dispensation of public money. It is true that you have gentlemen at the head of all these charities who make annual reports, but you want a more direct control than there is at present. Then I consider, further, that it would be a very excellent thing if instead of having the State Children's Department looking after a certain class of children, a Minister looking after children in reformatories and industrial schools, and other authorities looking after the action of the Children's Protection Society, if all these were placed as they are elsewhere under one Board. I think it is very desirable that that should be done as speedily as possible. Of course, the work would be immense in connection with it. In South Australia all the State children in the country are placed under the State Children's Relief Board. If that were done here it would be a move in the right direction; there would then be better control over the expenditure. We should know exactly how the money goes, and there would be a responsible body dealing with the matter. As it is now in this Colony some of these children are under one authority and some are under another; in fact, under different Ministers, which, I think, a great mistake, as regards both economical and efficient administration.

1963. Would you propose the establishment of a new Government department, or would you propose that the system should be under the control of independent gentlemen, like yourself, for instance? I think that eventually it would be a very good thing if you could have a Board who could take charge of the whole of the charities dependent upon the State, having one gentleman sufficiently expert to look after the lunacy department, another to look after the relief department, a third to look after, perhaps, the prisons, or something of that kind. A Board of that sort could take all these dependents of the State under complete control. I would not destroy the private Boards throughout the country, but I would give these Boards a controlling influence in regard to the disbursing of money and in regard to inspection.

1964. Would you have a sort of Minister of Charities? Eventually it would be that, but instead of having a separate Minister I would make one Minister deal with it, having the Board under him.

1965. An independent Board? Yes; an independent Board.

1966. You would not have Government officers, but a Board under the Ministry? Quite so.

1967. It would take complete control of all the charitable institutions of the Colony? Yes; that is the system in the United States of America. There they call it the "Board of Charity and Correction." They deal with the prisons, schools and other institutions containing children dependent on the State.

1968. *President.*] The Board would have supreme control? Yes; I would point out that the inspectorship of charities has always failed, because the person appointed has not been in touch with the charities. They have regarded him as a kind of spy, instead of as a friend and guide.

1969. *Mr. Powell.*] Are you assuming that there should be paid officers? They could not do the work without pay.

1970. They must be a paid Board? Yes; the work I am doing in connection with charities takes up three-fourths of my time. It could not be done by anyone else unless he was paid.

1971. *Mr. Barling.*] If such a body as that were created, in the event of a new charity being started it might be referred to the Board, and the Board might recommend as to whether that charity should be subsidised. Would not the Board then be able to say there is an institution of exactly the same kind carrying out exactly the same work, and it would be throwing money away to establish another? Yes; it would prevent all this overlapping, and take the place of the Charity Organisation Society.

1972. It is a large subject? It is a very large subject, but to have charities properly administered that is the only course to adopt.

1973. Would it be too much trouble for you to think a little more over the scheme, and put it before us in writing? If I had time I should be only too glad to do it.

1974. Would you like to come here again? When you have got near the close of this investigation I shall be glad to do so if you find that you want to ask me any further questions.

1975. *Mr. Powell.*] According to your own evidence, and that of other persons, the relief which you give is only in aid, it is inadequate for the support of the individuals? Yes.

1976. If these poor people get relief from other sources, do you think there is any wrong in their accepting it? I should like to point out that, whilst the Benevolent Society do not give an amount adequate to the support of the poor, they give them sufficient to prevent them from applying to any other charity for assistance. I take that for granted. The overlapping I referred to is not so much the overlapping of individual cases—and I do not think they are so numerous as people imagine—but the overlapping in the work itself, which is a mistake. It is a waste of labour.

1977. It would be better that one society should give more than that two societies should give the same amount? Quite so. There are a number of small societies that have started within the last few years, and have done exceptionally well in their work. If you look at their reports, some of which have appeared in the papers, they are putting money to their credit at the end of the year. That I consider a rather objectionable feature; but, putting that aside, there are other societies not doing that who do a certain amount of work. Take the Marrickville Society. It is unlike the one at Randwick, or the one at Waverley. It is not in funds. It expends all its funds, and then the poor have to come to the Benevolent Society. That committee has to wait until it gets more money, which is a most stupid thing, in my opinion. That is what I mean by overlapping. It is an overlapping of energy on the part of charitable people who mean well, rather than an overlapping of individual cases receiving assistance. 1978.

1978. Have you met with any cases of gross imposture? No, I have not.

1979. In connection with this new organisation society, have any cases of imposture been brought under your notice? They have not got to any practical work yet. There is one great drawback in connection with the Charity Organisation Society, and that is the great want of sympathy on the part of the public in connection with it. The subscriptions in a year do not amount to £50; but it is to be subsidised by the Government. Would it not be better for the Government to act in a bold manner, and take the whole thing into its own hands?

Sir Arthur
Renwick.

2 Aug., 1898.

1980. When the Government subsidise an institution the public generally seem content to throw all the responsibility upon the Government? Yes; that is the universal experience.

1981. *Mr. Barling.*] I suppose it is utterly impossible to form an approximate idea as to what private charity is doing? Quite so. I think private charity is not doing so much work now as it used to do, on account of the establishment of these numerous institutions in the metropolitan district.

1982. *Mr. Powell.*] The greatest help is given by the poor to the poor? No class assist each other more than the poor assist the poor. That is my own experience.

Ernest Hanson sworn and examined:—

1983. *President.*] You are the Acting Director of Government Asylums and Boarding-out Officer under the State Children Relief Board? Yes.

E. Hanson.

2 Aug., 1898.

1984. How long have you held the position? Since 23rd November, 1897.

1985. Have you to pass claims for Government subsidies for maintenance at Sydney Benevolent Asylum? Yes.

1986. And you board out children from that institution? Yes.

1987. Have you recently declined to pass any charges? Yes; about three months ago. Altogether I deducted from the voucher £150 for the quarter's subsidies. I made out a memo. [*produced*] giving the reasons for so doing. There is a sum of £94 10s. for the child of Nurse * * *, a salaried officer, in addition to which the Government were paying for the keep of her child. There were also other cases of persons who were receiving weekly gratuities of small sums from the institution, in addition to which they were making the Government pay for their keep as well. Some of these persons had been in the institution more than two years. I took all those who had been in over six months, and would not pay for the quarter. I made the proposal to the Chief Secretary that the Government should not be compelled to pay for anyone who had been in the institution more than six months.

1988. Is that how it stands now? I think the Chief Secretary has decided that the period shall be sixty days. I do not think that sixty days is enough. The contention was that they could not get rid of these people, but I pointed out that some of them had been there for two years, and Mrs. * * * about nine years.

1989. *Mr. Barling.*] She was employed in a domestic capacity? She was in charge of a ward.

1990. *President.*] The Government were paying £14 a year for her child? Yes; and her salary was about £30 a year.

1991. *Mr. Powell.*] Is it the rule that they shall remain there sixty days? No. I recommended that the time should be six months. The Chief Secretary says sixty days. The President has written a letter to the Chief Secretary, asking for a conference between him and myself upon the matter.

1992. *President.*] The money has not been paid? No.

1993. *Mr. Barling.*] I understand that you only object to the Government paying contributions in respect of women who are paid by the institution? That is all, and when they are there such a long time.

1994. I understand that you object where anything is paid on account of a woman to a contribution being made by the Government on account of a child when the mother is earning money from the institution? Yes.

1995. *President.*] Is it part of your duty to administer the amending State Children Relief Act? It is.

1996. How is section 10 administered? In the first place, a form is filled in by the applicant and submitted. It may be the case of a deserted wife or a widow. That form gives all the information about the family. Then, on that, an inquiry is made by either one of the inspectors or the police. In the country it is done by the police if an inspector is not in the district. Then the reports are submitted monthly to the State Children Relief Board.

1997. And if they are approved some relief is given? Yes.

1998. How long has that amending Act been in operation? Since September, 1896.

1999. Can you say how far it has increased the number of State children? Yes; I have a return here, showing the numbers of children and the rates approved by the State Children Relief Board to be paid to mothers towards the support of their children:—

STATEMENT showing Rates, approved by State Children Relief Board, to be paid to Mothers towards the support of their Children, on 30th June, 1898.

5s.	4s. 6d.	4s.	3s. 9d.	3s. 6d.	3s.	2s. 6d.	2s.	1s. 6d.	1s. 3d.	1s.	Total.
22	2	20	1	9	462	818	870	288	3	20	2,515

Statement of Rates payable towards the support of Children boarded out with their Mothers on 31st December, 1897.

5s.	4s. 6d.	4s.	3s. 9d.	3s. 6d.	3s.	2s. 6d.	2s.	1s. 6d.	1s. 3d.	1s.	Total.
25	2	27	1	10	496	862	699	83	4	22	2,231

2000. How far has the amending Act increased the number of State children? At present we are paying for 2,515 children. There is a slight decrease which section 10 might fairly be credited with. In the past the ordinary increase of boarding out children under the principal Act, has been about 300 a year. This year it has decreased by thirty—that is, the year ended 5th April, 1898.

2001. You may credit the amending Act with 330? Yes.

2002.

- E. Hanson. 2002. Are the amounts to be paid decided by the Board? Yes.
- 2 Aug., 1898. 2003. Are the reports handed in? Yes.
2004. Every case is inquired into before relief is given? Yes; with reference to that I have brought down three documents—the original document that is put before the Board, an abstract of the cases, and the returns showing how they were dealt with. Then I have had one made out showing what the inspectors recommended, and what the Board did with the cases.
2005. Of course, the Board do not necessarily agree with the inspector? No. Shortly after I went to the State Children Relief Department as Acting Director, the President proposed that the inspectors should not recommend any rate of relief. It was only on my pointing out to the President that the inspector was the only person who could gauge the amount required to keep the family going that they went back to the practice of the inspector recommending an amount. The Board rarely give as much as the inspector recommends. In regard to these returns, I have given the reasons why they have refused some cases, and those are a fair criterion as to what is done in the other cases.
2006. *President.*] Are the amounts paid under section 10 as a rule sufficient, in your opinion, or adequate for the cases? No; I do not think they are. The smallness of the amount has been pointed out several times, and the President has voiced that opinion. The Board have generally acted in this way: They have fixed the allowance at a small amount, leaving it to the recipients to ask for more if that granted was not sufficient.
2007. It is fixed at a small amount, the recipients having the option to come and say that it is not enough? Yes; and if they do come forward the amount is generally raised if I recommend it. The principle they fixed upon was to give smaller amounts, leaving it for the recipients to raise the point as to whether it was or was not enough.
2008. The Board did not propose to give an amount that would be sufficient to cover everything? No.
2009. Have you had any difficulty in getting funds for the operations of the State Children Relief Board? None whatever under section 10. As a matter of fact, we ran out of money towards the end of last year, ending 30th June, 1898, but there is a clause in the Act which gives the Colonial Treasurer power to make payments pending a vote of Parliament. Under section 10 the Board have been granted £10,600, pending the approval of Parliament.
2010. *Mr. Barling.*] When did the amending Act come into force by which you are enabled to board out children to their parents? On the 10th September, 1896.
2011. *President.*] Is it a fact that the amounts granted to widows and deserted wives have been reduced since the commencement of the amending Act? They are not as large as they were formerly.
2012. What was the reason for the reduction? It was thought the allowances under section 10 were getting too large.
2013. Are you aware that a considerable number of widows with children are maintained by the outdoor relief department of the Sydney Benevolent Asylum? I believe they are.
2014. Do you know whether they are also receiving relief from the State Children Relief Board? Only under very exceptional circumstances.
2015. Would the Benevolent Society relieve them on the authority of the State Children Relief Board? Yes; the Board might grant them 3s. or 4s. a week, and refer them to the Benevolent Society for extra relief.
2016. Why does not the Board relieve the Benevolent Asylum of those cases;—it is in evidence that recipients of relief from the Benevolent Asylum are in some cases suffering great privation owing to insufficient relief being afforded;—why should not the State Children Relief Board relieve the Benevolent Asylum of the deserted wives and widows? There was an application made by the Benevolent Society in April, 1898, by letter, in which it was asked that, as the cases came within the scope of the amending Act, the Board should cause such steps to be taken as would ensure relief being granted to the women under the provisions referred to. In reply to that letter I wrote and pointed out that the widows and deserted wives in need of relief must make application to the State Children Relief Board in the usual way to have their children placed with them under the boarding-out system, and that each case would then be dealt with upon its merits after the necessary inquiries had been made by the Board's inspectors. The number of cases referred to in that letter was 126, and out of that 126, eighty-two individuals have never applied to us at all.
2017. Eighty-two who have been relieved by the Benevolent Asylum have not applied? Eighty-two did not apply; twenty-seven cases were refused by the Board, thirteen of which were refused by the Board themselves, and fourteen on the reports that were handed in; ten had allowances granted, four were postponed, two applications were withdrawn, and one was under consideration. In March they sent down fifty or sixty poor old women, some were widows who had not any children, and some had children grown up, so that they did not come under the Act. I had to send them all back. When the children are over 12 years of age they do not come within the scope of the Act.
2018. Many of the cases sent to you were cases of persons who were not proper recipients of relief from the State Children Relief Board? Yes.
2019. Did your Board or did you ever state in refusing relief to these people that you had to do so for want of funds? Never; we have always had funds.
2020. Has your Board ever made application under the section that you mention, authorising the Treasurer to advance money in anticipation of a vote of Parliament? Yes; under instructions from the President I made applications for £10,600.
2021. And you got the money? Yes; without any difficulty at all.
2022. It was not for want of money that you refused to take these cases over from the Benevolent Asylum? No; certainly not.
2023. Some you did take over and others were not eligible, or were reported against by the inspectors? Yes.
2024. Are mothers paid the same allowance as foster mothers? No.
2025. Does the Act provide for the allowance for the mothers? For foster-mothers, 5s., but not for mothers or other relations. The regulation published in May, 1898, provides that:—

The rates of payment shall be 7s. a week for every child under 3 years of age, and for every child of 3 years and under 12 years of age, 5s. per week, except in special cases, when the amount of payment may be fixed by the Board. Children placed out as boarders with their mothers or their grandparents, or other near relations, shall be paid for at rates

to be fixed by the Board after the special consideration of each case. But except in special cases the total amount of payment to any mother for maintenance shall not exceed £1 per week. E. Hanson.
2 Aug., 1898.

2026. *Mr. Powell.*] It says, "to any mother shall not exceed £1 per week"; that would include foster-mothers? They hardly ever have more than four children. I think in one case there are six.

2027. *President.*] The Act provides for a sum in the case of a foster-mother, but not in the case of a mother? Yes.

2028. But why is the reduced scale given to mothers; there must be a reason for it? The allowance given to a foster-mother—5s. a week—is to support the child. The allowance given to a mother is to assist her to support the child. I have made a careful search, and that is the only reason I can find. The Board adopt this course: A widow makes application under section 10 for relief. If the Board do not think the home suitable, or if they think there is anything wrong in the locality or in the woman's character, they will offer to take the children away and board them out to someone else, and to pay 5s. a week. I have here a statement which I shall put in, showing the number of mothers receiving relief:—

STATEMENT showing number of mothers receiving relief, under section 10, on 31st December, 1897.

Widows.	Deserted wives.					Total.
	D.W.	Husbands insane.	Husbands in gaol.	Husbands in asylums.	Husbands in hospitals.	
533	127	23	16	11	4	714

Statement showing number of mothers to whom payment of allowances had been approved on 30th June, 1898.

Widows.	Deserted wives.					Total.
	D.W.	Husbands insane.	Husbands in gaol.	Husbands in asylums.	Husbands in hospitals.	
577	138	27	20	18	6	786

2029. *President.*] Have any representations been made that the relief given under section 10 is so small as to cause hardship to the mothers? Occasionally. We have had letters from the people complaining that they could not live on what they got. If anyone writes to that effect, and I put the letter before the Board they raise the amount.

2030. It has been stated that your Board have relieved the cases of widows for several months, then handed them back to the Sydney Benevolent Society;—is that correct? Yes. I took one case that I thought would be a fair sample, the case of a Mrs. C. She was receiving relief under section 10, but we found out by inspection that her husband had returned, and of course that shut her out of section 10. Then I sent her to the Benevolent Society, and some correspondence took place on the subject.

2031. Her husband having returned, of course she could not come under section 10? No.

2032. Have there been many such cases? Not many.

2033. Have you in many cases stopped the relief and sent the parties back to the Benevolent Asylum? Not very many.

2034. Is it part of your duty to deal with cases relieved from the Vote for the relief of destitute persons? Yes.

2035. What process is followed in that case? There is a form of application for relief under the Charity Vote. That is filled in, and the same system is pursued as in the case of State children. A report is made by either one of my own inspectors or by the police, and on that I make a recommendation to the Chief Secretary. When the recommendation has been approved by him, they send word over to the Treasurer by schedule to pay the money. The papers are sent back to me, and I notify to the parties and each benevolent society in the district in which the applicant lives, that the allowance has been granted.

2036. Can money be paid from that Vote without your intervention at all? Yes, in this way, the accountant of the Chief Secretary obtains an advance for special cases.

2037. These are simply cases that are referred to you for investigation? Yes.

2038. Is there a certain amount of duplication in this work it being administered by two authorities? I think it would be better for it to be administered altogether by one department.

2039. Is the relief that you are arranging for under that Charity Vote increasing or otherwise, according to your experience? I cannot give you that information. It can be given by the accountant of the Chief Secretary's Department.

2040. Are you aware that it is customary for children to be retained a considerable time in the Benevolent Asylum at the Government expense? The system is this: an officer of the State Children Relief Department attends there when the children are available and inspects them.

2041. How does he know what children are available? They produce them.

2042. Suppose they are there three or four months, and they are drawing money for them all the time? It is shown that that has been going on by the case of Mrs. Faggart.

2043. It is in evidence that there have been as many as fifty children there;—why does not your officer take them away? He might not see them. In the case of these women for whom subsidies are paid, the chances are that if we went to board the children out the mothers would not let them go.

2044. *Mr. Powell.*] Your officer only deals with children who are brought under his notice? Quite so; and the Benevolent Society send down an official list of the children that have been inspected.

2045. *President.*] Of course, you would have this check on them—that you can tell what children have been there, because you pass the payment? Yes; the question of how long children have been in the Benevolent Asylum was never gone into until the other day, when I stopped those subsidies.

2046. *Mr. Powell.*] Have you the names of all the children now waiting in the asylum? No.

2047. You do not know who they are, or anything about them? We could turn up our orders. For instance, during the last quarter the number of children boarded out by the State Children Relief Department is seventy-two; admitted by directors' orders, sixty-five; admitted by Police, two; admitted by the Benevolent Society, five.

2048. Do you know anything about the names and ages of the children? We have them with regard to all the orders that we issue, and obtain them from the Benevolent Asylum for all other children admitted.

- E. Hanson. 2049. *President.*] Have you a large number of approved applications for State children on your books?
We have.
- 2 Aug., 1898. 2050. So there is no difficulty arising from the want of homes? None at all.
2051. If there are fifty children at the asylum, it is not for want of homes? No; the supply of homes is greater than the demand.
2052. *Mr. Powell.*] If the children were in a receiving depôt of your own, could you find places for them? Yes; but I must point out that if we did that it would entail a great deal more work. I think there are homes available for over 1,000 children.
2053. Could you not arrange that children sent to the Benevolent Asylum should not be retained there more than a few days? Yes; we could do that.
2054. Do you think arrangements could be made for accommodating more children at Ormond House? Yes; by making additions to the building.
2055. There is not enough accommodation for more children than you have at present? Yes, there is. The daily average at Ormond House at present is twenty-four. We could accommodate forty-nine, exclusive of five who are in the isolation ward.
2056. You could take twenty-five more? Yes.
2057. *President.*] Does not the present way of dealing with them, partly at the Benevolent Asylum and partly at your establishment, add to the expense? Yes.
2058. You have been to the cottage homes at Mittagong several times? Yes.
2059. Could not the delicate children at the Benevolent Asylum be accommodated there? Yes; it would be better for them. We should have to have another home. They would be better there than at the Benevolent Asylum. They would have more chance to recover their health. It is a good climate, and there the children would have family life.
2060. Has the matter ever been brought under the attention of the State Children's Relief Board as to whether the sickly children at the Benevolent Asylum could be accommodated at Mittagong? No.
2061. How are the children attended to medically? If we want a doctor we have to get one.
2062. You get an ordinary practitioner? Yes; the medical expenses have been £108 from the 1st January to the 30th June this year in the Metropolitan district for all boarded-out children.
2063. Assuming that Ormond House were used as the sole depôt for State children waiting to be boarded-out, would it be necessary to arrange for a doctor at any time? Yes; we should want to have the children examined when they came in. There would be a possibility of their having some contagious disease. If we wanted to use Ormond House as a depôt we should require a receiving place. There would be room for that at the back, where we could put up a cottage in which we should be able to keep the children for two or three days to see whether they could have a clean bill of health.
2064. You will have to have a receiving depôt as well as the depôt at Ormond House? The two could be combined.
2065. Could it not be arranged that your department, instead of waiting till you are sent to by the Benevolent Society, should receive them weekly or fortnightly? It would be possible, but it would entail a large amount of extra work. Taking the children out of the Benevolent Asylum is nothing of itself, but there are arrangements that have to be made incidental to their removal from the depôt to the country, the preparation of their outfit, and for their transfer along each route, and giving notice to applicants long distances from the railways to meet the trains, &c. An attendant would take children from Liverpool to Mittagong and intermediate stations, and we have to advise people on the way to be at certain stations at certain times, and we should have a great deal more of this.
2066. You would until you got these cases placed out, but after that if you took the children as they came in you would not have so much trouble? No.
2067. You would only have the extra work whilst you are actually reducing down the numbers, but when you had exhausted that lot the trouble would not be so great? No.
2068. So that this would only apply to a month at the outside if you have plenty of homes? We have plenty of homes.
2069. After that the condition of things would be normal? Yes, it would. We have always tried to keep the Benevolent Asylum clear of children. In the month of July we transferred to the depôt sixty-five children—that is, in and out, irrespective of the Benevolent Asylum.
2070. Do you think that instead of the children being sent in the first instance to the Benevolent Asylum they could be sent direct to you? Yes. I will read an extract from the annual report referring to this matter:—

The policy of adopting a uniform system by placing all reformatory and industrial schools under the Minister of Public Instruction necessitates the transfer of the Shaftesbury Reformatory from under the control of my Board, but the officials in charge were not relieved, and were in consequence unable to take over their duties at the Central Home until recently. The reformatory had been utilised, perhaps, in a strictly legal sense, irregularly, as a receiving home for State children and for disciplinary purposes wherever girls had shown themselves unfit for private service. This change necessitated recourse to the former practice of sending children to the Sydney Benevolent Asylum before being boarded-out, and, in the absence of legislation enabling incorrigible girls to be sent for a time to the Industrial School before being again tried at service, the unwise policy of changing them from home to home had again to be resorted to. The transfer of the staff to the Central Home has, however, materially lessened these objections. A number of direct admissions are now made there, and some of the more troublesome children are also admitted to assist with the domestic work of the depôt. With a little extra accommodation, and provided the legislation outlined by me is given effect to, my Board will no doubt be able to admit all children direct to control and discontinue the practice of sending children to the Benevolent Asylum.

2071. Is it the aim of the Board to do this? Yes. There is another portion of the report which refers to the trouble which we have to get rid of the unruly children:—

The most serious difficulty that the State Children Relief Board has now to contend with is the absence of legislation enabling the President to recommend and empowering the Chief Secretary to sanction the transfer of incorrigible State children for corrective treatment in industrial and reformatory schools, when, in the interests of the children themselves, such a course becomes a matter of urgent necessity. The absence of this provision in the social reform Acts of this Colony was not so seriously felt by my Board when the numbers under control were less, but now that the aggregate has reached 3,700 children, legislation is urgently required to remedy this omission. That this is so must be obvious when it is recognised that the Board's officials receive direct from the police almost the whole of the children who have been rescued from vicious parents and the deplorable surroundings of slum life, and, acting under my Board's instructions, place them with tried guardians in the country districts, rather than press for a commitment to industrial schools before first affording such children an opportunity to reform under the beneficial influence of wholesome family life. Experience has shown the wisdom of adopting this method of dealing with these waifs, but it is not to be expected that each and every child

child rescued in this way can be successfully treated under this system. Failures in isolated instances there must be, and it is to meet these exceptional cases that legislation has been introduced in the other colonies, and requires to be brought into effect in the social reform Acts in New South Wales. There are at present under the control of the State Children Relief Board from thirty to forty incorrigible and inolent children cunning enough to know that even were they to thieve or wander, and thereby bring themselves within the jurisdiction of the Industrial Schools Act, the respectable guardians with whom they are placed would refuse to appear against them at the police courts in order to secure their commitment to an industrial or reformatory school, nor is it to be expected that they should do so, consequently these offenders have to be removed periodically from home to home at considerable expense to the Government; the unsettled lives they lead without firm discipline or proper punishment encourages them to continue their misconduct; the impression they create on the minds of the public militates against the credit of the system, and numbers of excellent homes for apprentice children are lost to others whose good conduct and faithful service would have been appreciated. Were it not for the continuous misconduct of these children, who cannot be reformed in the absence of the legislation outlined, I have no hesitation in affirming that in this Colony there would have been very little, if any, occasion to pay for the maintenance of well-developed and healthy children after the age of 12 years.

E. Harrison.
2 Aug., 1898.

2072. What is the cost per head? £9 5s. 2d., at Ormond House.

2073. Does that include salaries? No; but these figures should not be taken as the actual capitation cost. A lot of children will go in to-day, and will leave to-day, and they must come on to the numerical strength, and will build up the average.

2074. They just pass through the place? They just pass through, but they have to go on the books.

2075. What increase in the staff at Ormond House would be required if the arrangement were made that has been suggested now? I think it would only increase the staff at Ormond House by one attendant. It might be necessary to provide for somebody else at the head office. It would increase the work of boarding-out for a short time, and we might require a little temporary assistance.

2076. How many cottage homes have you for old couples at Parramatta? Twenty.

2077. All occupied? Yes.

2078. Have you always suitable people to put in them? Yes; the way the Department has been working is this: Suppose an old couple are getting relieved from the pauper vote, if we have a home vacant we recommend them.

2079. What is the cost per head at these homes? £19 16s. 4d.

2080. You have homes at Newington? Yes; twenty-four.

2081. Are they all occupied? There are nine occupied, and fifteen empty.

2082. How is it that they are empty? We are selecting suitable people to go into them. We are very particular about whom we put in.

2083. *Mr. Powell.*] Suppose a husband dies, how do you manage then? The woman would have to go to Newington.

2084. *President.*] She would very likely get into one of the cottages at Newington? We should put her in the asylum.

2085. Would you not give her a chance to get one of the cottage homes? No; they are for couples.

2086. Might you not get another woman to go in with her? Three or four months ago an old man was in a cottage home at Parramatta, and his wife died. We told him that he would have to go into one of the asylums, but he found an old woman at an asylum and married her.

FRIDAY, 5 AUGUST, 1898.

[*The Commission met at the Offices of the Public Service Board, at 11 o'clock a.m.*]

Present:—

G. A. WILSON, Esq., J.P. (President).

J. BARLING, Esq., J.P.

J. POWELL, Esq., J.P.

William Henry Crago, L.R.C.P., M.R.C.S., sworn and examined:—

2087. *President.*] You are a registered medical practitioner? Yes; and a member of the honorary staff of the Benevolent Asylum. W. H. Crago,
L.R.C.P., &c.

2088. How long have you held that position? This is the fifth year.

2089. Are there other honorary medical officers of that institution? Yes; Dr. Graham and Dr. Foreman.

2090. Are your duties the same as theirs? Yes.

2091. Your duties are to visit and make the rounds of the institution? Yes.

2092. Do you attend daily? When on duty I generally attend nearly every day.

2093. You divide up the time? Yes. At present we have two months on duty on one side and one month off, then two months on the other side and one month off. There were four of us up to the end of last year; then we each had six weeks on and six weeks off.

2094. What are your duties when you attend;—do you go through the institution? When on the children's side we do, as a rule. We generally see those cases to which the matron draws our attention. At present I am in charge of the children's side. The other side is the lying-in side.

2095. Then the medical man who visits the children does not, during that month, visit the others;—is that through fear of infection? Possibly; and for the equal distribution of the duties. Primarily, the object is not to run any risk.

2096. Do you know much about the outdoor relief business? Nothing at all.

2097. Do you approve of the lying-in hospital, the reception-house for destitute women and children, and the outdoor relief department being all administered in the same building? No, I do not. We have made representations in the past to the effect that they should be separated.

2098. Why do you object to that? Where so many people are constantly coming round it is impossible to keep away infection. That is the chief objection.

2099. So many people coming there from poor homes? Yes. It might be the means of bringing scarlet fever, or something of that kind.

2100. I presume that these three departments have really no necessary connection with each other? No. They are kept as distinct as the premises will allow us to keep them.

2101. Have you any suggestion to offer in regard to that question? I have not thought the matter out. Three or four years ago the whole staff considered it, and they recommended that what is called the women's

5 Aug., 1898.

W. H. Crago, women's hospital should be distinct from the other parts of the institution, and on a separate lot of ground. Of course, we do not consider those old buildings suitable.

L.B.C.P., &c.

6 Aug., 1898.

2102. Take the buildings first, you consider them radically unsuitable? Yes; out of date.

2103. Patching them up would be of no use? No. The staff on one or two occasions made strong representations that another building should be procured.

2104. Seeing that the present building is unsuitable, there would be an opportunity to make a new start, and your idea would be to have an entirely separate building for the lying-in department? Yes; it would be very much better.

2105. Is the nursing staff of the asylum a satisfactory one? On the lying-in side very satisfactory. There is no doubt that we get excellent results in that department, and I think it is largely due to the good nursing care that is given there. I think that the nurse in charge of the principal lying-in ward, Mrs. Cooper, is a very able woman, and Miss Mason is also an excellent nurse. The nursing is very good. The nursing on the other side also has been improved during the last few years. Formerly they never had trained nurses there; they trusted to inmates. Now they have two trained nurses on that side.

2106. You said that there is some danger to lying-in patients undergoing surgical treatment from the receiving-house; children who are brought in there possibly bringing infection? There is some slight risk. I do not know that it is very real, because when they get inside the building they are kept separate. It is really only when they are going through the hall that there is any risk.

2107. Which would be disposed of if the buildings were separate? Yes.

2108. Have you a ward in which children are placed who are suffering from infectious disease? Yes; we have the isolation department.

2109. Is it what you would consider a proper isolation? I do not know quite how to answer that question. It is not up to modern ideas, but it answers its purpose fairly well.

2110. It is the best you can do? Yes; it is the best we can do on those premises. The isolation ward has been under a trained nurse lately, and the cases are very well attended to. We put cases of ophthalmia in there. I am sorry to say that we have about thirty cases of measles there now.

2111. Do you consider that that ward is a source of danger to the patients who are lying in. No; it is fairly well separated by distance, and I do not think that there is any communication between the two in any way, unless through the matron when going her rounds. I think there is no communication between the inmates of that part and the lying-in department.

2112. Do you recollect an outbreak of puerperal fever taking place in the lying-in department? The principal outbreak was before I went there. The present staff succeeded the old staff afterwards; in fact, that was what brought about the change.

2113. Have you formed any opinion as to the cause of that outbreak? I was never able to ascertain it.

2114. Is it a fact that hospitals of that kind are liable to it? Certainly. If one case gets a footing it is likely to spread. The infection is conveyed chiefly by the hands of the attendants, but of course it may hang about the wards. We have not had a case of ordinary puerperal fever for four years, and I daresay that the results that we get would compare favourably with those of almost any lying-in hospital in the world. The figures, according to the last three reports, are: for 1895, 387 women, and only two deaths during the puerperal period; in 1896, 366, and only two deaths; last year, 320, with three deaths; making a total of 1,073 women delivered, with seven deaths in the puerperal stage, or a mortality of 0.65. I may say that in my opinion those deaths would have been almost unavoidable in any institution. In one or two of the cases the patients were in a moribund state when admitted. The wards are clean now, and the midwives are competent, and it is only due to the extreme care taken that we ward off these outbreaks. My experience goes back to the beginning of 1894 in the institution. They had an epidemic in 1893, when Dr. Warren was there. Then, on the recommendation of the Government medical officer, they took a separate place in Flinders-street for the lying-in department, and put a qualified woman in charge, but unfortunately the change was followed by an outbreak in that place.

2115-6. Have you had any experience of the place to which the patients were transferred on that outbreak? I did not have much personal experience of it. Dr. Graham was the honorary medical officer in charge at that time. Within a few weeks of its being opened there was an outbreak of puerperal fever, and the honorary medical staff recommended its closure. There was a further outbreak after we went back to the institution. After that we had all the walls scraped and painted, and I think that has been a great improvement. I do not think I exaggerate when I say that there was from one-eighth to one-quarter of an inch of colouring on the walls that had been put on coat after coat during the last fifty years. We had it scraped off, and three coats of paint put on, and things have been better since that was done.

2117. Do you think the present system of employing honorary medical men quite meets the case, or should there be a medical man receiving some remuneration attached to the institution? I think that is a suggestion that might well be entertained. I do not think, on the whole, that the practice of having only honorary medical men quite meets the case. We have in the past recommended that a house-surgeon should be appointed. If there was a resident house surgeon then everything would be all right. Probably some of the directors think that there is not enough work for a resident medical officer, and perhaps there is not; but there is no doubt a great deal of work there which honorary medical officers can scarcely be expected to do, such as looking after this epidemic of measles, and examining children for boarding out. Sometimes we have as many as twenty or thirty children for boarding out, all of whom have to be examined. It is not quite the sort of work that ought to be expected from honorary medical officers. I think that one of two things should be done. They should either appoint a resident house surgeon or give one of the present staff, or somebody else, an honorarium to ensure his visiting every day. If there was someone who could visit the institution every day, I think it would be all right. I do not know anything about the attendance of my colleagues. When on duty myself I go nearly every day, or probably five or six times a week. I know that the honorary medical officers used to hold the opinion that they ought not to be expected to visit every day, but that to visit twice a week was as much as could be expected from honorary officers. On the lying-in side as a rule we have to go when we are sent for.

2118. Are the honorary medical men expected to examine the children for boarding out? Well, we have to do it, and it takes a lot of time. We have to certify as to the children being free from infectious or contagious disease. The children accumulate there for boarding out; sometimes there are six, sometimes a dozen to examine. The examination is not a very serious one; we just have to strip them, and see that there is no eruption of the skin, or contagious affection of any kind. That seems to me to be work that should scarcely be expected from honorary medical men.

2119.

2119. You have no knowledge of the outdoor relief business? I have no knowledge at all of that beyond seeing the motley crowds at the asylum on Tuesdays.
2120. It has come under the notice of the Commission that many of those people who are recipients of outdoor relief are in a very poor state of health, and of course liable to sickness, and that there appears to be no provision made for them by the institution? No, there is not.
2121. Would there be any objection, suppose there was a resident house surgeon at the asylum, to his visiting the homes of those people? It would be rather a large order. No doubt it could be arranged, but I do not think anyone would be willing to take it up in an honorary capacity.
2122. I am not speaking of honorary officers;—suppose there was a paid medical man attached to the institution, would there be any objection to his visiting the homes of those people on the ground of carrying infection back to the institution? I do not think so. A medical man has to visit all sorts of cases, and I suppose that those cases would not be any more infectious than the average of his private patients. It would not do to go back to the lying-in home without any precautions being taken; but a medical man can be trusted to exercise discretion in such a matter.
2123. You understand that these people are not provided for at all? I suppose they are the class of people whom the Society of St. Vincent de Paul, the City Mission, and others, call upon us to visit. I believe we visit most of them at the request of those societies. Not a week passes that I do not make two or three such visits. They might be better attended to in the way you suggest perhaps.
2124. How is the dispensing done at the asylum? That I think is done by arrangement with one of the chemists near, who comes in every day for a certain time to make up any medicines. If in case of emergency he is not there they send to one of the chemists in the neighbourhood. I think the present arrangement is satisfactory. There is not sufficient work by any means for a resident dispenser.
2125. In addition to the trained nurses, you have several probationary nurses at the lying-in home? Yes.
2126. Have all your regular nurses received a proper training there or elsewhere? Yes.
2127. You are quite satisfied about that? Yes; they have given every satisfaction. Lately, pupil nurses have gone there to learn midwifery. Students are there for six months, and pupil nurses the other six months. The nurses used to be there from about May till the end of October. They began later this year, however, as the students did not get through their work in time for them.
2128. The nurses that are trained there are not trained in all the departments of hospital work? No; simply in midwifery. They get a good practical training.
2129. About the isolation wards, are there separate wards for boys and girls? I am not quite sure. At the present time they are very crowded. There is one large ward, the boys being in one part and the girls in the other. At the present moment there is a great strain on that part of the institution, more than there has ever been before in my time.
2130. Do you know anything about the cottage homes at Mittagong for sickly children? Nothing, except that we give certificates for children to go to the cottage homes.
2131. Do you consider it desirable to retain sickly children—I do not mean infectious cases, but other cases—at the asylum for some months, as they do? I think not.
2132. Seeing that there are cottages built expressly for delicate children? As far as my own experience goes, I think they get them away as fast as they can. At times there are many children suffering from ophthalmia. We do not like to send them away whilst the complaint is in the acute stage. Those cases might run on a good many weeks. I think that practically as soon as it is safe they are sent away to the cottage homes. For the cottage homes they will take children whom they would not take for ordinary boarding out. They would not mind taking children with sore eyes.
2133. I suppose that the medical staff determine the periods of residence in the asylum of lying-in women? We drew up some rules a few years ago, chiefly founded on the rules of the Women's Hospital in Melbourne.
2134. Rule 76 says:—
The duty of discharging all patients who have been in the hospital less than thirty days shall rest with the honorary medical officer in attendance.
- Why should it be limited to under thirty days? I think that is so that no one could be sent out too soon; that if a woman is not fit to go out, she should not be discharged without the sanction of a medical man.
2135. I suppose the presumption would be that after that period she would probably be fit to go out? Yes; and she would be dealt with in the ordinary way. She should not be sent out too soon, however, without the consent of the medical man in charge.
2136. About the classification of the women in the lying-in home, it has been stated in evidence that there is practically no classification, that women and girls are in the same ward, the better class being associated with less desirable characters? It is so; there is no means of classification there at present.
2137. Do you consider that there should be such classification? I think there should be. In the erection of any new hospital, arrangements should be made for it. It seems almost impossible to be carried out in the present buildings, but I think it would be a very desirable thing. Those women who have been there time after time are very case-hardened.
2138. Should that classification extend to the yards? I suppose it should, to be of any use. Of course, it would enormously increase the expense of working the place to keep the women separate. It would probably entail extra nurses and attendants.
2139. At any rate, it should extend to the wards? Yes; although, perhaps, in the wards when the women are in bed they are not so likely to upset one another's morals, because they are more under observation when they are in the lying-in ward than they are whilst they are waiting for confinement, or afterwards. The matter is one to which I have not given serious thought, but still I think there ought to be some system of classification. Arrangements should be made for it in any new institution.
2140. It is not possible except in a very limited degree in that building? No.
2141. You say that the mortality compares very favourably with that of any hospital which you know of? Yes; for the last three years. I confine that statement expressly to the midwifery side; the mortality on the other side is very high.
2142. Who regulates the dietary scale for these women? I think the rules provide that the doctors shall do it, but it is not a matter that we very often interfere with. We have the right to order anything that is necessary. Anything in the way of stimulants the doctors order and also any extras.

W. H. Crago, 2143. In visiting the lying-in home do you see every one of the inmates, or only those to whom the L.R.C.P., &c. matron directs your attention? I generally study every temperature chart. I may give more attention to one case where it seems necessary. If I find from the temperature chart that there is anything out of the normal I investigate the case, but if everything appears to be going right I do nothing.

6 Aug., 1898.

2144. Is it found that the time required for the efficient discharge of this duty interferes very much with the time of the honorary medical officers? I cannot say that it does, except, perhaps, at the present time, when there is such an amount of sickness, and we are all so busy; then it becomes a little irksome, but otherwise it does not interfere much with our business.

2145. Do the honorary medical officers take their turn to lecture to the students? We lecture to the nurses. We are not supposed to lecture to the students, as they get their lectures at the University. We sometimes give them a little clinical lecture. We take it in turn to lecture to the nurses. An honorarium of £50 a year has been granted for that purpose, so that the duty is not quite honorary.

2146. Is there a ward for the treatment of women who are not there for confinement? There is a place which they call a hospital with six or eight beds in it, where cases of that kind are taken in.

2147. Your duties extend to that too? Yes; the medical man who attends on the children's side gives his attention to that hospital too.

2148. Are those cases connected with child-bearing or following confinement? Not necessarily; any woman taken ill in the institution is put there or in the isolation ward. Lately, they have more frequently been taken to the isolation ward, because the nursing is better there. There is not a trained nurse for that little room which is called a hospital.

2149. Have you any knowledge of the out-division of the midwifery department? No; I have not. Only on one occasion I visited a patient whom some of the nurses had attended.

2150. Is the midwifery department of the Benevolent Asylum increasing or decreasing? Decreasing.

2151. To what do you attribute that? There are three or four rival institutions growing up—one or two at Newtown, St. Martha's Maternity Home, Elizabeth-street, Strawberry Hills, and the Women's Hospital in Crown-street. I think those institutions are always drawing cases from the Benevolent Asylum. The figures which I have given show a diminution from 387 in 1895 to 320 in 1897. I think that this year the number of cases will be about up to the average, but I see from the Registrar-General's returns that the number of cases in those other institutions is gradually increasing.

2152. We find that women are admitted into the asylum long before their confinement;—do you know under what circumstances that is done? In cases in which they have not friends with whom they can live, and cannot continue in their situations.

2153. In cases coming from the country, for instance? Yes. I have sent several cases from the Church Rescue Home at Paddington. I have sent girls from there two or three months before they were expected to be confined, because it was undesirable to have them in the Church Home, but I think that these cases are mostly from the country.

2154. And they have no option but to receive them? I think it would be rather cruel in many cases to refuse.

2155. Do you know that women are kept in the institution for long periods after confinement? Yes. I do not know why. I see certain women there for a good while. Many of them are made use of as wardswomen. I think it is when they have no friends to go to.

2156. In the medical report for 1897 it is stated that of 282 infants dealt with in the institution in 1897, eighty-three died, twenty-four being under 1 month old? Yes; that is a pretty high rate of mortality.

2157. To what would you attribute that? Many are admitted in a very bad state. Cases of marasmus or wasting disease are the most common of all. In a tabulated form given on page 24 of the report I have specified the number who died from each disease. From marasmus—that is, wasting away—no less than thirty-one children died; then the table below shows that twenty-four of them were under 1 month old. Many of them were foundlings. These children almost inevitably die. They were admitted into a ward where they had a most devoted trained nurse, Miss Freeman, who had had experience at the Children's Hospital at the Glebe. She is really devoted to her work, and I had great hope that when she was appointed the result would be a diminution in that mortality, but it has not been so. Whether it is due to the fact of such a number of children being brought together in one ward I cannot say.

2158. Their vitality would be very low at first? Yes, in many of them. The mortality even out of doors amongst children who are bottle-fed is enormous. If a child does not get the mother's care its chance of living is not very good. I was struck some years ago by an article on the subject written by a Scotch doctor. I was astounded at the time by his statement that 50 per cent. of all the children that are bottle-fed die in the first year of their existence. I suppose that the great thing is the loss of the mother's care. If a mother has a child which she wants to rear there is even more than giving it the breast milk. It is a great loss to lose the breast milk, but no one can replace the mother in the nursing of a baby.

2159. *Mr. Barling.*] Especially when you have to deal with a great number together? Yes. Many of these unfortunate women are simply praying for their children to die. They die in great numbers in the summer time. In the winter months many of the very young children die of acute bronchitis. Recently a child there was taken ill at 4 o'clock in the morning, and died in the evening. In summer, disorders of the digestion take off a great number.

2160. Have you any general suggestion that you could make to us which would aid us in the object of our Commission; that is to say, as to whether any measure might be devised to bring about a more economical and at the same time a more satisfactory arrangement in connection with either this charity or any other? I am afraid that I have not. Since I heard that I might be called I have not had time to think of anything. As I have stated already, the sooner new buildings are provided for the Benevolent Asylum the better.

2161. Is not the lying-in hospital at the Benevolent Asylum a very healthy place? Yes.

2162. The evidence of Sir Arthur Renwick tends in the same direction, so that apparently every attention has been paid to the keeping of the walls perfectly free from any taint of contagion? Great improvements were made. The whitewash on the walls, the accumulation of years, was all scraped off, the walls were painted and made perfectly clean. I think it is owing to our attention to that, and absolute cleanliness on the part of the midwives, that we have such good results, but I do not say that the buildings are at all suitable.

2163. Still it is very satisfactory to find that there is no fear of the building containing infection? None whatever. The deaths which occurred there have been inevitable, and might have occurred in the newest hospital. W. H. Crago,
L.R.C.P., &c.

2164. As far as the lying-in hospital is concerned there is nothing to be desired? No; the results obtained have been very satisfactory. 5 Aug., 1898.

2165. Do you think that the situation of the building is as convenient as might be desired? Of course, the situation is very central and very convenient, but I think that a more suitable place could be found, one further away from the railway station, for instance.

MONDAY, 8 AUGUST, 1898.

[The Commission met at the Offices of the Public Service Board, at 10 o'clock a.m.]

Present:—

G. A. WILSON, Esq., J.P. (PRESIDENT).
J. BARLING, Esq., J.P.
J. POWELL, Esq., J.P.

Robert Anderson sworn and examined:—

2166. *President.*] You are a director of the Benevolent Asylum? Yes. R. Anderson.

2167. *Mr. Barling.*] How long have you been a director of that Institution? About five years.

2168. *President.*] Perhaps you will state your views on the matter into which this Commission is inquiring? I will. What I have to say on the subject I have put in writing:— 8 Aug., 1898.

Being on the House Committee of the Benevolent Asylum, I have given special attention to the persons receiving outdoor relief from that institution. In the first place, I will notice the relief given to the aged and infirm. The rations given are good, but not sufficient in quantity. It would be a great improvement if rations were issued twice a week instead of weekly as at present. The maximum allowance for rent is 3s., but this is too little and ought to be increased. Indeed, I cannot describe the dole of rations and money allowance given to the aged poor as anything short of semi-starvation. The homes of those poor old people are generally damp, dilapidated, badly ventilated, and, of course, unhealthy. In their poverty they naturally look for the cheapest house accommodation they can get. As an example of the sort of homes occupied by the aged poor, I may mention the case of a worthy old couple residing in Marrickville. The house occupied by this man and his wife is situated in the low land, and is often in flood. The floors are very damp and the walls are quite wet 3 and 4 feet from the floor. The man is over 70 years of age, and is utterly unfit for any kind of employment. He has been in bad health for several months, and was fourteen weeks confined to his bed. The wife has suffered very much for some time with sore eyes, and is at present an outdoor patient of the Sydney Infirmary. I have no doubt but what the unwholesome house and insufficient nourishment is the chief cause of the sickness of the aged and infirm couple. Since December last they have been receiving 7s. per week from the State Relief Department. Out of this, 2s. goes for rent, and the wife goes twice a week to the Sydney Infirmary, which costs 1s., leaving 4s. to supply them with food, fire, and other necessaries of life. I brought this case under the notice of the House Committee, and they agreed to supply the helpless couple with rations if no objection was made by the State Relief Department.

The case I have described is not a solitary one, and I think it is highly necessary that adequate provisions should be made for the aged and destitute, many of whom are in that condition through no fault of their own. Healthy homes and a more abundant supply of nourishing food would greatly mitigate the sufferings of this unfortunate class of the community. A very unpleasant feature of our social life is the general unwillingness on the part of young people to assist their aged parents when overlaken by poverty and ill-health.

Next to the aged and infirm, widows left with young children should be more liberally assisted than they are at present. I know many widows who have a terrible struggle to support themselves and their children on the small pittance allowed. During the past five years, owing to various causes, there has been a great lack of employment for women to what there used to be, and many of the widows that I know will be weeks without earning a shilling. On Tuesday last the case of a widow with eight children—one of them a baby at the breast—was brought under the notice of the House Committee. She had been granted 12s. per week by the State Relief Department, but we considered that sum quite inadequate, and granted her a certain amount of rations if no objection was made by the Department.

During the past five years the number of deserted wives has greatly increased, and most of these unfortunate women have large families. They are in some respects worse off than widows, for a widow has generally some assistance and sympathy from her neighbours which a deserted wife rarely receives. The greater part of those inhuman husbands who have deserted their wives and children have gone to Western Australia, and it is high time that something were done to make them contribute towards the support of their wives and children.

About two months ago, at the request of the Premier, the House Committee gave rations to the unemployed, and I was deeply impressed with the number of worn-out old men who asked for assistance. A majority of the men were over 50 years of age, and to all appearance quite incapable of any severe exercise of manual labour. Several of them had been at the Government works at Shea's Creek, but had at once been discharged as unfit for the work. It was pitiful to hear these poor old fellows relating how that every job they applied for young active men were selected. A peculiarity of these old unemployed men was that most of them had got married late in life to young women, and most of them had large families of children. I daresay a good many of these men had been improvident when times were good, but I recognised some who had been always steady and industrious and were destitute through no fault of their own. There is no doubt but what much distress and hardship was prevented by the timely assistance given to the unemployed.

Among the general cases assisted there are a large number of men who, from various causes—such as general debility, deformity, deafness, &c.—are utterly unfit for any sort of hard work; but they have all wives and, in many cases, large families, and these cannot be allowed to starve.

An impression prevails with some people that the Benevolent Asylum is greatly imposed upon; but I have no hesitation in saying, from my experience on the House Committee, that such is not the case—at all events, to any great extent. If unworthy persons succeed in getting assistance once, they are soon discovered, and the relief is stopped. Strict inquiry is made into every fresh application for relief, and our careful and intelligent inspectors give periodical reports of the circumstances and prospects of every person receiving assistance. These are duly considered, and wherever the reports show improvement in the condition of the recipient the relief is discontinued.

The Benevolent Asylum has done noble service in the cause of suffering humanity, and my chief concern is that, from want of funds, we have not been able to give that measure of assistance to the aged and infirm, the widow and the orphan, and the poor and distressed generally, that they honestly deserve.

2169. About the issue of rations twice a week—do you think that practical as a matter of administration? Yes. It might require some more assistance. I heard a great many complaints from old people that they could not take meat, especially in the summer months, and the bread gets very dry in summer time. It is not fit to be eaten at the end of the week. I have given the subject a lot of attention owing to the complaints that have been made. I think it would be a great improvement if rations could be given twice a week, though it might require a little more assistance. We need only give bread and meat twice a week.

2170. Assuming that it is possible as a matter of administration, what about the funds? There would be no great difficulty. 2171.

- R. Anderson. 2171. Would your funds permit you to do it? I do not think it would involve much additional expense.
2172. You would issue smaller quantities of bread and meat on the Wednesday? Yes; and again on Friday or Saturday.
2173. It would not mean a double ration? No; I would give the same as at present, but I would give the bread and meat twice a week.
2174. As a matter of administration, you think it quite feasible with a certain amount of assistance? Yes.
2175. But your present means would not enable you to do it? I am certain that they do not get the full benefit of the rations getting them once a week.
2176. It has been stated in evidence by Sir Arthur Renwick, in dealing with the question of the rations being inadequate for the support of the family, that one principle adopted was that the ration is not intended for the whole maintenance of a family, but is simply a grant in aid of other means? That may be so in some cases, but in the cases of the aged and infirm, and widows and children, a full allowance ought to be granted.
2177. That narrows it down to this: that where there are no other means the rations ought to be increased? Yes, certainly.
2178. But with your present means you cannot do that? No; we have not the funds.
2179. You are drawing on your capital now? Yes; and I think we have an overdraft of £5,000 or £6,000.
2180. It is in evidence that a good many women and children are maintained at the Benevolent Asylum, and are paid for by the Government? No doubt.
2181. Would you not have more money available for the relief of the aged poor if you gave up keeping those women and children there;—there are sometimes as many as fifty waiting to be taken over by the State Children's Relief Board? That would certainly relieve the indoor department.
2182. And that would give more time for attention to the administration of outdoor relief? Yes.
2183. Which is your proper business? I think so. I have not studied that much, because I am connected with other societies, and my time is fully occupied.
2184. You say that the homes of these people are in a very insanitary state? Yes, very.
2185. Have you any idea how that question can be met? I have an idea, but the element of expense would be against it. Something in the shape of cottage homes would be the right thing for those people.
2186. Does that mean homes subsidised or maintained by the Government? I would rather that the public generally gave assistance to a scheme of that kind. But if it could not be done otherwise I should say that it would be money well spent if the Government built homes for these aged people.
2187. You think that at the present time they are suffering very great privations? I am certain of it. It is really a painful thing to see, and it is especially painful to see the unhealthy homes which these people inhabit.
2188. You take a great deal of interest in this question? Yes.

G. A. WILSON, Esq., J.P. (PRESIDENT).
J. BARLING, Esq., J.P.
J. POWELL, Esq., J.P.

Joseph Foreman, Esq., L.R.C.P., M.R.C.S., surgeon, sworn and examined:—

- J. Foreman, Esq., L.R.C.P., M.R.C.S.
11 Aug., 1898.
2189. *President.*] You are one of the honorary medical advisers to the Benevolent Society? Yes.
2190. Your duties, I suppose, are very similar to those of the other honorary medical officers? They are all the same.
2191. Do you know much about the out-door relief system carried on by the Benevolent Society? I cannot say that I do.
2192. Your duties, of course, are connected with the lying-in hospital? Yes.
2193. Have you anything particular to say about that? Do you wish me to speak about the building?
2194. First of all about the building, and then about the lying-in home being associated with the other branches of the asylum—the out-door relief department, and the reception of women and children? In the first place, as regards the building, that is in every sense most unsuitable. It is in no way up to modern requirements; it is a very old building. The floors have been renewed, but it is a very difficult matter to keep them perfectly right. It is only with the greatest care, and it reflects very greatly to the credit of the institution, especially of the nursing, that outbreaks of puerperal fever have not been more frequent. There have been several outbreaks, one of which unfortunately I was mixed up in. It happened when I first went there. Since then we have not had any further outbreak. It is only with the greatest difficulty in the world that it is possible to avoid it, and I feel sure that it might at any time break out again. In the lying-in home we get temperatures which we ought not to get in a suitable building, though there has been no actual outbreak recently of cases which we speak of as puerperal fever, the most troublesome thing that can happen, still the temperature has run up in a way that it would not have done if the building was up to modern requirements. I have no doubt whatever about that.
2195. Is the place itself insanitary? I think the place itself is insanitary. Those are old buildings for these cases, which so easily go wrong.
2196. I understand from the evidence of other witnesses that it is very difficult to keep that building in the state of perfect cleanliness that is required? It is most difficult. The building seems to be saturated, as we often find old buildings, with bacteria.
2197. Your evidence points, then, to the necessity for some modern building for that particular purpose;—have you any views as regards its being associated with the other parts of the Benevolent Asylum? Yes, very strong views.
2198. We should like to hear your views upon that? We cannot have a better instance than we have at the present time. The place is full of measles brought there by children, and there is no doubt whatever that, under ordinary circumstances, if we had a proper lying-in hospital entirely separate, we should not have any measles at all.
2199. If you had a properly-isolated hospital? In all probability in a properly-isolated hospital we should not have this thing. The same applies to scarlet fever and other infectious diseases.

2200. With people constantly coming in from all quarters there is a possibility of their bringing in some infectious disease, such as scarlet fever? Exactly, the children particularly. Of course, the people who attend to the lying-in patients must of necessity circulate between the children and the women. It is impossible to avoid it. J. Foreman,
Esq.,
L.R.C.P.,
M.R.C.S.
2201. Therefore, there is always a danger of infection being brought in? Always very great danger. We have a very good instance at present. Several nurses are down with measles, and there are over twenty cases amongst the children, and, of course, it may extend. There is no reason why it should not extend to the lying-in department. 11 Aug., 1898.
2202. Do you consider that there is any particular danger to the lying-in division from the fact of there being 1,100 or 1,200 people coming there every Wednesday in connection with the outdoor relief? I think there is very great danger. I think it is a most unpardonable thing. It is against all ideas of modern medicine.
2203. *Mr. Barling.*] Speaking about the measles, is the contiguity of such cases dangerous to lying-in women? It is always an element of very grave danger.
2204. Just as dangerous as scarlet fever cases? No, not so dangerous as that; but still it can never do any good, and very probably will do a very great deal of harm.
2205. *President.*] As a matter of fact, whilst the conditions have been very unfavourable, the mortality in connection with the lying-in home has been exceptionally small? Wonderfully so considering the building.
2206. As regards the nursing staff, is it in your opinion efficient? I think it is most excellent. As far as I have seen the nursing has certainly been as good as one could possibly wish. I am speaking of the state of things that has existed lately, because when I first went there the nursing was certainly very inefficient, but the present matron has been matron of the Sydney Hospital, and she, as far as she possibly can, is inaugurating a very good system—more on the principle of modern hospitals.
2207. As regards the infant mortality, it is pretty high, is it not? It is very high.
2208. Could you state the reasons for that? Yes. In the first place, there is a great number of cases of congenital syphilis, and most of the children are illegitimate births. It seems that in a great number of instances these children are born in a very puny state, whatever is the reason. As a rule, they are born very weak and very puny, and that must always be the case; but I have very little doubt that if there was a separate establishment the mortality would not be anything like so high as it is.
2209. With regard to the position of the honorary medical advisers, taking it first of all from the point of view of the Benevolent Society;—does the present arrangement meet all requirements? Yes; I think so.
2210. Do you think it would improve the position at all if there were a resident surgeon or a house surgeon, who would be available at any time, in addition to the honorary medical staff? Well, that is just a matter of opinion. There is always a surgeon available, because we have only two months on one side and two months on the other. There are two medical men on, one for the children and one for the lying-in department, and the third stands out for two months; but if one is not available one of the other two always is.
2211. You, as one of the honorary medical officers, are satisfied with the present arrangement? It seems to me to answer fairly well.
2212. There appears to be no provision made for the out-pensioners to be visited by a medical officer? That would have to be under a different arrangement. There is no provision at present. Do you mean women?
2213. No; I mean the families? That does not come under the present system at all.
2214. The question arose whether it would be desirable to have a resident medical man who could, when necessary, be called upon to attend not only to the internal part of the institution, but also to the out-pensioners? In my opinion that is not very desirable. If the medical officer were to visit out cases it would necessitate his going to all kinds of fever cases, and he would have to attend the lying-in women afterwards. That would be most undesirable.
2215. Does not that apply to any medical man in general practice? Yes; but when a medical man is attending entirely to lying-in women he is always very careful. If the medical officer had to go out and attend all sorts of cases, he would be liable to bring back infection, and his duties are entirely with the lying-in women. It would be very dangerous in my opinion.
2216. Is the number in the lying-in hospital increasing? I think it remains about stationary.
2217. You know that there are other lying-in homes in Sydney? Yes; there are two.
2218. Do you consider that in a place of the importance of Sydney it is desirable to have various homes, or that these cases should be all located in one or two institutions? I think they ought all to be in one central establishment.
2219. What would be the advantage of that? You would have them under better control, and you would be able to do the work better. At one time I was in Vienna, where they have the largest lying-in institution in the world, and they found there that that system worked better in every way. The mortality is less than it otherwise would be, and I think they have the cases under better control, and there is a better system for teaching purposes.
2220. From the point of view of University students and nurses, it would be an advantage to have one great central institution? I think so.
2221. There is an isolation ward in the asylum? Yes.
2222. Do you consider that that is an element of danger? No. You must certainly have an isolation ward in every hospital.
2223. Is not this isolation ward for the children? No, not particularly. There is an isolation ward particularly for the lying-in cases. If a case came in and any infection broke out it would be placed in the isolation ward at once.
2224. As regards cases of sickness amongst children, I understood that there was an isolation ward for children? There is an isolation ward for women also. There are two. Children can be put in the women's place and infectious cases of lying-in women in another. They are entirely separate.
2225. Do you know whether there is a separate isolation ward for the boys and one for the girls? I do not think so.
2226. As regards classification, it is in evidence that these women—good, bad, and indifferent—are all together, that there is no attempt at classification;—for instance, a comparatively innocent woman may have to associate with a less reputable person;—do you think that there should be a means of classification? Yes; it is very desirable if it were possible. 2227.

- J. Foreman, Esq., L.R.C.P., M.R.C.S., 11 Aug., 1898.
2227. Is it possible now to any extent? I do not think so.
2228. You would require a certain number of wards? You would require separate wards; but the thing is not possible under present circumstances.
2229. Suppose you had a new hospital, with the means of proper classification, would it add very much to the expense? I do not think it would add one penny to the expense.
2230. It would be an architectural matter; it would have to be arranged in the plan of the building? I do not see how it could add to the expense, because you could keep a certain class of women in a separate ward by themselves, and another class in another ward.
2231. It is simply a matter connected with the plan of the building? Entirely.
2232. There are certain sick children who are retained in the Benevolent Asylum sometimes for considerable periods;—do you consider that that is a good place in which to keep children? I am certain that it is not.
2233. Are you aware that there are certain cottage homes for sick children at Mittagong maintained by the Government? Yes.
2234. Do you not think that as soon as these children can be moved it would be better to send them to such places as those cottage homes? Yes.
2235. You think they ought to be sent there as soon as they can be moved? I think so. The asylum is a most unsuitable building for them in every respect.
2236. It is in evidence that women are admitted to the asylum long before the time of confinement? Yes.
2237. In your opinion, is that necessary in some cases? I think it is absolutely necessary, because these unfortunates have no place to go to, and no one to keep them.
2238. That is to say, that a girl may come from the country and have nowhere to go to, so that they are almost compelled to admit her? They must do so.
2239. *Mr. Barling.*] I suppose that these women are incapable of work for a month before confinement? Absolutely. They are not fit for work for a much longer period than that, and it would be cruel to refuse them admittance.
2240. *President.*] It is in evidence that after confinement these women are retained there for many months; do you consider that there is any necessity for that;—the reasons given for it are two—first, that the more useful women do the work of the institution; and, second, that the other women are kept there because it is impossible to find employment for them;—do you know anything about that? I know that they are kept there for a long time, and the reasons given are those which you have stated, but it is not a good thing to have them there if it is possible to send them away.
2241. It would be better if there was some agency to which these women could be transferred within a certain time after confinement? Certainly.
2242. These women have nothing to do, and whilst they are there they are in sight of the children? Yes; that is the fault of the present system. What is wanted badly in a city of this size and character is a lying-in home pure and simple, with all other things dissociated in every way. There should be no children in connection with it, and no system of relief carried on at such an institution. The patients should be received just a little before confinement, and when they have recovered they should be transferred to some other place.
2243. If there was such a lying-in home as you suggest there ought to be an agency, I understand, to provide for the women up to within a short time of confinement—the women to be transferred to the institution before confinement, and as soon as they have recovered to be taken charge of again? Yes. That is what is done in Vienna. In Vienna the women go to the institution two or three weeks before confinement; then shortly after confinement they must go out, and thus the hospital is kept to its proper use and purpose, and naturally the results are good. But this hotchpotch, this higgledy-piggledy system that we have here, is the most awful that it is possible for a medical man to conceive.
2244. Have you anything else to add? Only most emphatically to say that I hope some means will be brought about to have a proper lying-in place devoted entirely to its proper uses.
2245. Do you think that the Government should assume the responsibility of such a thing as that? Most decidedly; there is no question whatever about that. It is the duty of the Government to do it.
2246. I suppose you are aware that the Government at present pay the whole cost of the lying-in home? I was not aware of it, but it is very probable. I think they ought to face the problem.
2247. You think they ought to assume the responsibility of building this home and managing it? Yes; most decidedly.
2248. Should that be made a branch of Dr. Thompson's department, the same as the Coast Hospital? I do not know sufficient about that, but it ought to be under Government control.
2249. That would mean under the control of the Chief Medical Officer? I should think so; but of course I cannot express any opinion upon that; it is the duty of the Government, in my opinion, to take over this work, and to see that it is properly and thoroughly carried out.
2250. Do you consider that in any other hands it would be liable to abuses? Well, there are several reasons why the Government should undertake the matter. Where it is in private hands, or under a private committee, there is apt to be a lot of cliquism. If the institution is under Government control, the Government have everything to say in the matter. We find Government institutions like the Little Bay Hospital, for instance, controlled in a satisfactory manner.
2251. They are liable to public criticism? Yes; they are liable to public criticism, and there can be no cliquism about it. Where the lives of women and of children are at stake, I think it most important that the Government should have absolute control.
2252. I understand that in your opinion the lying-in home should be absolutely separate, and should be under Government control? Yes.
2253. That the outdoor relief should be administered entirely apart from it? Yes; there is no question about that.
2254. And that the receiving house for women and children should also have no connection with the lying-in home? None whatever.
2255. *Mr. Barling.*] Would you propose that the Government should take such complete control as to exclude the services of honorary medical officers? No; I think they should have honorary medical officers, but I think that the appointment and the control of them should be in the hands of the Government, unless the Government appoint a committee, as it practically does in the case of the Sydney Hospital,

Hospital, of the committee of which I happen to be one of the Government members. The Government should have thorough control. They ought to appoint the whole of the committee, if they have a committee, and the Government ought to be responsible for the whole of the patients, as they are at Little Bay. The institution ought to be conducted on lines entirely similar to those on which the Little Bay Hospital is conducted, except that the lying-in home ought to be in a more accessible part, where the patients can be easily and properly attended to. The work ought to be done, as it is now, by an honorary staff. If you had a hospital of that nature, you would naturally require a house surgeon—a resident medical officer—the business to be conducted entirely on the lines of the Sydney or the Prince Alfred Hospital. To allow a thing like this to be dependent upon public subscriptions or private endowments would mean that it would always be in want of funds; it would always be striving to make ends meet in one way or another, and the results would be most unsatisfactory. Appeals would have to be made to the Government, and the Government practically would have to keep it going. The Little Bay institution is conducted in a very efficient manner, and much more economically than any of the other hospitals. If a lying-in hospital on the same lines were built in an accessible part, and the Government were to assume the whole control, having an honorary staff, I think that would be the right and proper course.

2256. I think that honorary medical men do not attend the Little Bay Hospital? It is too far away. It is left to the Government officials, because it is so far away that it is not possible for anybody to go there; but if we had a proper hospital for lying-in women, with a house surgeon and an honorary medical staff, practically appointed by the Government, I think that that would be the most efficient and the best way to deal with the matter, and I think it is only right that the city should have such an institution.

2257. The Government, I suppose, would have no difficulty in getting the services of an honorary staff? None whatever. It would be a very desirable thing to belong to an institution like that. It would be a very good appointment. There would be no difficulty whatever about the honorary staff. The only medical man who would have to be paid would be the house surgeon.

2258. Then you advocate the amalgamation of all the lying-in homes in Sydney, and their concentration in one central institution, to be controlled entirely by the Government? That is my view.

2259. Of course, you are aware that our Commission is to inquire into the charities generally, with a view to their more economical management, and we should be glad to get any suggestions from you in reference to them? I do not know sufficient about them to express any opinion as to that.

2260. *President.*] Probably, when the time comes, you may be prepared to say something about the hospitals? Yes; I might say a very great deal.

J. Foreman,
Esq.,
L.R.C.P.,
M.R.C.S.
11 Aug., 1898.

The Rev. J. J. O'Driscoll sworn and examined:—

2261. *President.*] You are the Catholic chaplain at the Benevolent Asylum? Yes.

2262. You do not know anything about the lying-in part of the Benevolent Asylum? I attend there. I may mention that the girls appear to be dressed in a very slovenly fashion. To my mind, it is rather degrading, rather demoralising, for young girls to be dressed in the way they are there.

2263. Of course, you understand that all sorts and conditions of women go there, and that it might be difficult for the management to keep them well dressed? Yes, it might be, no doubt; but I have seen some who were very tidily dressed when they were out, and the way they were dressed there formed a great contrast.

2264. Some of these women are engaged in the work of the institution, and they would naturally be more tidily dressed when you saw them in the street than they would be when at work in the asylum? Yes; but even at work they need not be so untidy and slovenly.

2265. Do you know anything about the outdoor relief system? I have from time to time met people who received relief, and I have been told by people who were assisted by that society that they were asked what religion they belonged to. There may be some reason for that, but I did not think that that question ought to be put to them.

2266. I notice that some of the authorities of your Church have stated at a public meeting that the institution made no difference in regard to its treatment of applicants for relief, and that they professed themselves perfectly satisfied with the treatment? Yes, I am perfectly satisfied; but poor people on one or two occasions have complained that the question as to their religion was asked. Another matter came under my notice lately. I was speaking to two non-Catholic children—little boys—and they remarked that whilst they could attend the services of any other church, they were not allowed to attend the Catholic services.

2267. Did you make any representation about it? None whatever, because it did not concern me. They told me that their mother often sent them to the Catholic Church when they were at home.

2268. That would be a matter more for representation to the proper authorities than to bring before us? Of course. It is not a matter that concerns me, they being non-Catholics.

2269. Have any of these poor people represented to you that they were suffering hardships from not obtaining sufficient relief? Yes; they have told me that what they got was not sufficient to support them. A case came under my notice to-day of a woman whose husband had deserted her. Because she had a husband, she said she was not allowed to get assistance from this institution.

2270. You do not know that of your own knowledge? No.

2271. *Mr. Powell.*] Do you know anything about the working of the St. Vincent de Paul Society? I do.

2272. Can you tell us anything about their methods;—do they give relief directly or by ticket? The officers of the society make inquiries, and if a person wants food they give an order on a grocer. They also pay the rent for poor people. They assist them in any way that they think will be best.

2273. Do you know whether there is any maximum amount that they give for the payment of rent? No; it all depends on the state of the funds, which are usually very low.

2274. Do you find the Benevolent Society and the St. Vincent de Paul Society sometimes giving relief in the same case? Yes; I have met with cases like that. In such cases the relief given by each society would not of itself be sufficient. One society pays the rent and the other gives an order for food.

2275. You do not think you have discovered any case of imposture? No; I have not.

2276. I believe that the St. Vincent de Paul Society is unsectarian? It is entirely unsectarian. They never ask a question about religion before relieving anyone.

2277. Does that society receive any Government subsidy? None that I know of.

Rev. J. J.
O'Driscoll.
11 Aug., 1898.

MONDAY,

MONDAY, 22 AUGUST, 1898.

[The Commission met at the Offices of the Public Service Board at 2 o'clock p.m.]

Present:—

GEO. ALEX. WILSON, Esq., J.P. (PRESIDENT).
 JOSEPH BARLING, Esq., J.P.
 JAMES POWELL, Esq., J.P.

James Graham, M.D., M.P., sworn and examined:—

J. Graham,
 M.D., M.P.
 22 Aug., 1898.

2278. *President.*] You are one of the honorary medical advisors to the Benevolent Society? Yes.

2279. Are you aware that at the Benevolent Asylum the outdoor relief, the receiving-house for women and girls, and the lying-in hospital, are all carried on together? Yes.

2280. Are you of opinion that these three departments should be carried on by the management of the Benevolent Asylum? I have no hesitation in saying that the midwifery portion should not be there, and should not be carried on by them:—

(1.) My claim to express an opinion on this important matter rests on the following grounds:—

(a) I am intimately acquainted with the medical needs of the community, having been in active practice for the last sixteen years, and the various appointments that I have held, and do now hold, have given me every opportunity of gauging the medical requirements of the sick poor in Sydney.

(b) The appointments I refer to are:—Medical Superintendent of the Prince Alfred Hospital, Honorary Physician in charge of the out-patients at the Prince Alfred Hospital, for over five years, when I must have personally treated at least 50,000 of the sick poor. An honorary medical officer of the Benevolent Asylum. A director of the Sydney and the Prince Alfred Hospitals who has for some years taken an active share in the management of these institutions, and the teacher in midwifery at Sydney University. I was chiefly instrumental in founding the Women's Hospital in Crown-street, and act as its senior medical officer.

(c) Nine years ago I visited Europe for the special purpose of inspecting the principal midwifery hospitals there, as it was clear to me then that some radical change would have to be made in Sydney to bring this branch of its medical charity into line with modern methods, so that I trusted that my mission one day might be turned to some practical use. I am familiar with the working of midwifery hospitals in England, Ireland, Scotland, France, Germany, Austria, and Italy.

(2.) How the maternity work among the poor in Sydney has been provided for.

Provision for attending to the needs of the necessitous lying-in women in this Colony, especially in Sydney, has hitherto been of the most primitive kind, and the fact that no very great disaster has overtaken our pregnant sick poor, is to be ascribed to the mercy of Providence rather than to the forethought of man. For years past we have been well supplied with general hospital accommodation, designed and managed in the most modern and approved way. Our general hospitals, such as Prince Alfred and the Sydney, are among the best to be found this side of the equator, and they will bear comparison with any in the old country.

The reason why we are so well ahead in this respect is to be found in the fact that some few in the community have made it their hobby and their business to interest the Government and the public in the condition of our general hospitals, with the result that these institutions are replete with all modern resources, and the results of treatment therein approach the maximum point of success. No philanthropist or public-spirited person has so far taken the same interest in the maternity branch of medical charity, and what most large communities have made their first care we in Sydney have made our last.

The Sydney Benevolent Asylum up to the last few years was the only public institution that provided for the treatment of poor pregnant women. A portion of its buildings has for years been set apart for such cases, the other parts of the institution serve as a storehouse for food and clothing for distribution among the destitute, and for the housing of destitute women and children. Of these there are always a large number.

To carry on delicate scientific work, like midwifery, in an institution that also houses a large number of destitute women and children, and around which hundreds of unwashed people gather to receive doles of food, is an anomaly, and a violation of the canons of medical and surgical science.

(3.) The origin of the Women's Hospital.

When I joined the honorary staff of the Benevolent Asylum about six years ago, I took, with others, the place of a staff of paid medical officers, who had resigned because, in their opinion, the work could only be carried on in the Benevolent Asylum buildings at the risk of the lives of the lying-in women. There had been one or two serious outbreaks of puerperal fever, with a high mortality, which these gentlemen ascribed to the insanitary state of the buildings and its surroundings. At that time I found the nursing staff very crude; indeed, the nurses in several instances were women who had entered the institution themselves as pregnant patients, and had quietly assumed the role of nurses. There was no attempt at keeping an accurate record of cases, and even temperature charts were not in use.

The impression that forced itself on me was this—that while the Board of Directors of the Benevolent Asylum were decent and worthy men, who could be of great service in managing the affairs of an asylum for destitute people, they could not appreciate the difference in the management of a highly scientific department like a midwifery hospital, for the subjects were wide apart, and from the point of view of management, incongruous.

A further outbreak of puerperal fever, with a high mortality, led the Government to appoint a Commission to inquire into the whole matter, with the result that it recommended the removal of the maternity work from the Benevolent Asylum, and establishing a hospital which would deal only with maternity work and nothing else.

The present School of Industry was suggested as being a suitable building for such a purpose, and it was understood that the Directors of the School of Industry were not averse to changing their quarters.

Shortly after this there came a change of Government, and the matter lay dormant.

When no definite action seemed to come from the Government the matter was taken up by the public. A meeting was called in the Town Hall, presided over by Lady Windeyer, at which several leading citizens urged the establishment of a women's hospital for Sydney, so that poor pregnant women might receive that care and treatment such as they alone could get in a modern hospital, and thus remove the degradation of compelling them to go to a poor-house to give birth to their children. This movement led to the establishment of the present Women's Hospital, which was established to meet an urgent public necessity.

(4.) The Women's Hospital scheme, and the way the directors have carried out their work.

(a) A representative committee was appointed under the presidency of Lady Windeyer, and subsequently under Judge Backhouse, its President Chairman.

(b) A building in a central portion of the city was rented, and a plan of work closely following that adopted by the leading British hospitals has been quietly and effectively carried out.

(c) A large deputation accompanied the directors of the Women's Hospital, and laid before the Colonial Secretary the urgent need there was for providing the Women's Hospital with a building adequate to the needs of its work. That deputation represented all classes in the community, and included a large number of Members of both Houses of Parliament.

The Colonial Secretary was so impressed with the value of the work that he immediately granted the hospital the pound for pound subsidy, and recommended a special grant of £500 to procure instruments and furniture. He further promised to endeavour to procure a suitable building or a suitable site on which a suitable building could be erected. On the promise of the Colonial Secretary the directors of the Women's Hospital had prepared plans of a building which it was considered would answer the purpose. These plans the Commissioners examined at their recent visit. J

I may add that we have already had several promises of substantial donations from citizens as soon as we are in a position to announce our plan and see our way for erecting a permanent structure. J. Graham, M.D., M.P.

So far the expenses of the Women's Hospital have been met by public subscription and by fees derived from training nurses and students; the assistance received from the Government has been used for the purpose of procuring furniture and surgical instruments. 22 Aug., 1898.

Financially, it has been well supported by the public, and that it has met the needs of that class whom it is designed to help, the hospital statistics afford abundant proof, and are unique of their kind from the point of view of high rate of complete recoveries.

The plan of work followed may be briefly given as follows:—

(1.) An outdoor department, or what is called in the European hospitals "the externe." This branch of work embraces the treatment of poor parturient women at their own homes. It provides them with the comfort of a skilled obstetric nurse and medical assistance when such is necessary.

This branch of work had been entirely neglected in Sydney until the Women's Hospital took it up, and the proof that it was urgently needed is to be seen the fact that this year 500 poor women applied for assistance. It might be asked how were these women provided for in former times, before the Women's Hospital came to their assistance? They were allowed to do the best they could, or were dependent on the charitable assistance the medical profession gave them; but I would point out that our general hospitals have always been largely filled by a class of women who sought admission for surgical assistance—for the repair of injuries incidental to child-bearing life—especially where such births were conducted without the aid of skilled nursing or medical assistance. I would further point out that such cases constitute the most expensive class in the general hospitals, the reason being that from the nature of the injuries they take a long time to recover; the operations that they have to undergo are often extensive and delicate, and compel them to be kept in bed for a long period. As the Government had these patients for the most part to keep in hospital, the expense from this cause alone must have been very great, and an institution conducted as the Women's Hospital is will necessarily lead to a large saving in this direction. Moreover, it will tend to reduce the average length of illness in the case of a poor lying-in woman, and that means untold benefit to her children and to the household. Experience goes to prove that while nature in most cases is quite equal to manage a woman in labour without any skilled assistance, still among those who do not get that assistance there are very many who get into a chronic state of ill-health, and so become a charge upon the State.

Another important aspect of this externe department is that it affords excellent opportunities for training the obstetric nurse amidst surroundings such as she will have to work under when she follows that calling as a means of living.

A nurse only trained in the hospital in this subject has not the opportunity for becoming generally useful; the additional advantages of nursing as learned in the patient's house makes her more full of ready resource.

During the time the Women's Hospital has been established over 200 women have sought and obtained the benefit of such training. Many of these women who for years had carried on the calling of "midwives" without any previous instruction in the art.

As a result of such a state of things, as a body of ignorant women being allowed to follow a skilled calling, I believe has been that the mortality of newly-born infants and lying-in women must have greatly increased beyond what it should have been.

The Women's Hospital has done its best to displace these dangerous Sarah Gamps by giving the public a supply of intelligent and properly instructed obstetric nurses. Personally, I am endeavouring to further safeguard the public by getting a Bill through Parliament that will cause all such nurses to be registered.

(2.) The Women's Hospital has also established an indoor department consisting of two branches. The one is set apart for the reception of pregnant women whose cases are complicated from any cause, and those who have no home of their own. The other branch is set apart for the treatment of those cases who suffer from surgical injuries incidental to child-bearing, and which in the past have formed the most expensive and the most numerous type of female patients in the general hospitals.

In regard to the indoor branch for pregnant women, so far as the space would permit of judicious classification, an attempt has been made to follow a system that provides for the treatment of married and single women in separate wards. In the Benevolent Asylum they are all warded together.

The wards set apart for the surgical cases are far too small. There are generally very many cases waiting their turn. As a matter of fact, if the Board said, "We will devote the whole of the hospital to these cases," it would be filled straight away. Under proper supervision, with skilled nursing and medical care, there would be fewer such cases. If a woman is injured during her confinement some one is responsible as a rule. It is an exceptional thing if she does suffer injury. If she is left to the rough and ready assistance of a woman who knows nothing about her business, she may be injured, and may become a burden upon the State as the result.

2281. *Mr. Powell.*] By teaching women to nurse you will prevent that sort of thing? Yes.

2282. *Mr. Barling.*] And you not only prevent it in the houses of the poorer classes, but in all sections of society? Yes, obviously.

2283. *President.*] You mentioned that in the Benevolent Asylum the lying-in women are all warded together;—it is not possible to separate them, is it? In the past, whilst this work has been carried on largely by the Benevolent Asylum, there has really been no intelligent effort made to guide it in a scientific way, the Society have been so burdened with the tremendous work of providing for the destitute women and children that the maternity portion seems a kind of something thrown in, which they simply had to look after. They have not risen to a conception of its scientific importance. It has been allowed to drag along as best it could. The fact that for years they never had any charts, and took no records, and allowed pregnant women to take up the *role* of nurses, proves that they did not attach any great scientific importance to the work; neither could they, seeing that this business was taken up in connection with the work of affording relief to the destitute on a large scale. The task of placing this special charity on a proper and scientific basis seems to me to be now a very simple one. The establishment of the Women's Hospital has really made the matter a very simple problem for the Government to solve. In the Women's Hospital there is all the machinery of a complete and scientific maternity hospital; and only a larger building is wanted to bring it into line with our general hospitals, and make it worthy of the Colony. I believe the work could be conducted in a much more economical manner than it has been done in the past. As the Women's Hospital it would have a strong claim on the public for support, and it should become largely self-supporting. The money that is voted by Parliament to the Benevolent Asylum is largely swallowed up by the maternity branch, and its other important department, viz., the relief of the destitute, is thereby seriously impoverished. My view of the matter is this: that the Benevolent Asylum should conduct that very important branch of work which deals with the reception of destitute people until otherwise provided for; that it should be the centre where the destitute can get relief. In other words, that it should continue to perform its present important functions, with the exception of the lying-in work; that should be done by the Women's Hospital. That institution could do it in a much more inexpensive way, in a much more efficient way, and in a way that would be more in keeping with its scientific and medical importance, and in a manner worthy of this country.

J. Graham,
M.D., M.P.
22 Aug., 1898.

2284. *Mr. Barling.*] Do the nurses who go out remain at the houses of the patients during the whole time of the patient's sickness? They remain during the whole time of labour, and systematic visits are made during the time that they are ill.

2285. I suppose the nurses go to the better-class patients too? Yes; they do.

2286. Of course, those patients will have to pay? They do.

2287. You do not think that a lying-in institution could be made self-supporting? A person seldom goes into the Prince Alfred Hospital without being able to contribute a little. Most patients give a little. They feel that it is their duty to contribute something if even only a shilling or two or 10s. a week or something of that kind. But once patients enter the Benevolent Asylum they are considered to be recipients of poor-house relief, and therefore you do not get anything out of them. But if patients entered a maternity hospital carried on under public auspices like the Sydney Hospital or Prince Alfred Hospital, a certain revenue would be obtained from them which would go towards supporting the hospital. That is what happens in the case of the general hospitals.

2288. You would be much more likely to obtain a revenue from the patients if you had a separate institution? You would get it without any difficulty.

2289. *President.*] Suppose the Government agreed to consider this proposal do you think it would be taken up in a vigorous way by the profession and the public? It would. The profession have been waiting with open mouth wondering who was going to take up this work. There is a universal feeling amongst the profession that we are far behindhand in regard to this work. Somebody is wanted to set the thing going. It was with the view of giving the thing a start that the Women's Hospital was established. It is far from what it should be as regards size, but it was considered that if it was started there would be a *raison d'être* that would justify an appeal to the public to complete the work.

2290. Would the public be likely to respond? I think so, from the fact that we have already had numerous offers of support, but no one will give donations until there is proof that we have really made a start towards erecting a permanent building.

2291. I suppose you are aware that at present the cost of the lying-in home at the Benevolent Asylum falls on the Government? Yes. On the other hand, as a proof of what I contend, the whole cost of conducting the midwifery work in the Women's Hospital has been defrayed by public subscription, and the money from the Government has gone to furnish the building and buy instruments. We have not spent a farthing of Government money on our patients.

2292. You would take the particular site that you have mentioned? Yes; the School of Industry.

2293. In your opinion is the site sufficiently convenient and central? Yes. For work of this kind it must be within easy reach of the densely-populated centres. It should be as nearly as possible in the heart of the city. That is the situation of the lying-in hospitals in every city that I know.

2294. That site would answer your requirements? Yes, admirably.

2295. About the building, is it entirely suitable? The present building of course would not be adequate. As it stands, it would be a fairly good building for administrative purposes, but there would have to be a wing set out on each side. There is plenty of space for the buildings. There are 3 acres of land there, and it seems a pity that such a space in that position should not be put to a better use than it is at present.

2296. Having wings on either side would help towards the classification of the patients? Yes, very much. It would give ample opportunity for classification in the most approved way.

2297. What about the surroundings, are they in every way desirable? There is nothing unfavourable in the surroundings to an institution of this kind. There would be no young girls about. Most of the patients would be in bed, and when able to get up they would be removed. There would be no permanent dwellers as it were in the institution; the patients would only be there for a fortnight and then pass out. As far as the surroundings are concerned I do not think that they are such as would militate against the institution in the slightest degree.

2298. I was referring more to the nature of the buildings in the neighbourhood;—there is a gaol on one side? Yes; but there is never any noise.

2299. There are a church and a school at the other end? Yes; but they are quiet.

2300. And there is a hospital below? Yes; but there is no dense thoroughfare passing by. No leading thoroughfare, and you do not get the sound from the main street. It is a secluded spot well adapted for the purpose.

2301. As regards University purposes, I presume that the place would be convenient enough? Absolutely. As a matter of fact the present building, the Benevolent Asylum, is most unsuitable. You have to send twenty or thirty young men there into a building where there is no proper accommodation for them. Recently an empty room has been given to them, but before that they used to hang about day and night waiting till a case came off. The youths board outside, but wait and sleep on the premises. It is not a nice thing to have these young men about the building, where there are all sorts of women going about, and women of a most undesirable class, so that from the point of view of the University the building is a most undesirable one. I have begun a system of taking the young men up in batches to Crown-street, putting them into boarding-houses there, and conducting the work in the Women's Hospital, but from the point of view of the University the School of Industry would be admirable. There would be a portion of the building set apart for a number of resident students who do the work. I was in Melbourne some time ago and I found that there they take two students every six weeks all the year round.

2302. In your opinion, is the Melbourne Hospital up to date? Yes; it is the pride of the Melbourne people.

2303. They have no outdoor relief department connected with it? No; I think not. If you talk to the people at Melbourne they all know about it, and they all take a great interest in the institution. The year before last the cry was raised that they would have to shut up one of the wards for want of funds, and immediately a sum of £4,000 was raised. They take an intense interest in the institution. It is beautifully kept and it is visited by the ladies of Melbourne, so that the public sentiment around it is very strong.

2304. You think it would be equally so here? I am sure of it. It is one of those things which would rapidly appeal to public sentiment.

2305. You think that the carrying out of this proposal would be a great reform? I think it a very urgent and desirable reform, and one that would please the public immensely.

2306.

2306. Do you think there is much in the argument which might be used against it—that children born in the Asylum would be practically born in a poorhouse? No. Of course, it is a very unpleasant thing for anyone to find out when he grows up that his birth-place was a poorhouse, but when one comes to learn that he was born in a hospital that is a different matter entirely. There is no doubt that we should regard the Maternity Hospital as being to some extent just as much a hospital as the Sydney and Prince Alfred Hospitals. J. Graham,
M.D., M.P.
22 Aug., 1898.
2307. As a public hospital? Yes. You cannot take away the fact that there is a certain stigma attached to the fact of a person being born in a poorhouse.
2308. *Mr. Powell.*] That stigma exists now as far as the Benevolent Asylum is concerned? I have been called in to attend poor women who had to lie on the floor, and I have asked them why they would not go to the Benevolent Asylum, and the answer was that they could not allow their children to be born in a poorhouse. They lay on the floor, and refused to go to the Benevolent Asylum for that reason. The women in such cases were certainly risking their lives.
2309. You think they would rather go to a hospital if they had to pay even the small sum of 5s.? Yes, and the women would get better more quickly, and in that way, directly or indirectly, the State would be benefited.
2310. And the woman would not have the mental anguish of knowing that her child was born in a poorhouse? No.
2311. *President.*] Is there a Committee in charge of the Crown-street hospital? Yes; a committee consisting of a President, Vice-President, Treasurer, and other members elected by the public. It is purely a public institution.
2312. What was the amount of the public contributions for last year? £143.
2313. Is any special effort made to collect money? None at all. We also get a large amount of money in fees for teaching, which goes into the funds.
2314. Have you received any special grant from the Government besides the ordinary subsidy? We got £500 for instruments and furniture.
2315. I understand that the fees paid defray a considerable portion of the cost of the establishment? Yes; and they ought to do. In every institution of that kind the officers should work for nothing. These are sources of revenue which keep the place going.
2316. Do you know whether the operations of the Crown-street establishment have very much decreased the operations of the Benevolent Asylum? Very much. There is one important aspect in regard to that, and it is this: Recently the Benevolent Society thought they would try the experiment of establishing an external branch. They got one or two casual cases, but no one ever thinks of being assisted by a poorhouse when they can get assistance at a properly-equipped institution. We get thirty or forty a month.
2317. What is the usual period of residence? About fourteen days.
2318. I suppose you are aware that at the Benevolent Asylum the women remain for months, and even years? Yes; one or two women I have seen there during the whole of the time that I have been going and coming.
2319. It is in evidence that there are about twenty-nine women there for whom they cannot find employment;—how would you suggest that they should be dealt with? The women who go into the maternity hospital should be regarded in the same light as women who go into a general hospital. They come for the treatment of their illness, and once that is over, and they have recovered, it is for them to look out for a home. In the case of a man in the Prince Alfred Hospital, if a man says that he has nowhere to go he is sent to one of the asylums.
2320. The proper course with the women would be to send them to Newington? Yes.
2321. And with regard to children? They ought to be dealt with by the State Children Relief Department.
2322. Up to what age should the mother have the care of the child? Up to the school age.
2323. The mother of the child should be sent to Newington, and the child should be taken away after having been weaned? Unless she can provide a home or her friends can do that for her. There should be little difficulty about it. That question would solve itself in the case of a women's hospital.
2324. It would in the case of a women's hospital, but not in the case of the Benevolent Asylum? No; if a woman goes into the Benevolent Asylum, and says she is unmarried, and yet pregnant, she has upon her the stigma of having an illegitimate child, and she gets into a moping condition in some cases, and seems to never want to show her face to the world again.
2325. *Mr. Barling.*] When we were at your institute, you showed us that you had given considerable attention to the question of the cost of the proposed building to be used for a maternity hospital? Yes.
2326. Could you give us a rough idea of what it would cost to add two wings to the School of Industry? I think a sum of £5,000 should do it.
2327. Would that be sufficient to build the two wings and put them in proper order? Yes. The type of building that is wanted for a work of that kind has to be very simple. It should be a building which you would look forward to demolishing. The first principle of a women's hospital is that it must not be too old, and it must be easily demolished, because the germs of putrefaction, puerperal germs, if allowed to get a hold in women's hospitals, will play havoc. In Berlin, in a women's hospital which had got too old, 300 women were carried off.
2328. How many beds should be provided to start the thing in a proper way? From sixty to 100. Sixty should be ample for present needs, and there should be a portion set apart for special cases.
2329. There should be thirty beds in each wing? Yes; provided that you carry on your external department. That would be essential. If you did not do that you would have these women flocking to the hospital.
2330. *President.*] Do you mean that sixty should be accommodated in the wings, and a certain number in the central part of the building? Yes; I think the present building as it stands is a little too big for administration. Some portion could be utilised for classification purposes.
2331. The matron states that she can accommodate forty-eight girls? Yes; but they are a little too crowded. You have to give each lying-in patient 2,000 cubic feet of air. They have nothing like that there; they are huddled together.

J. Graham,
M.D., M.P.
22 Aug., 1898.

2332. *Mr. Barling.*] A great deal would have to be done to put the Darlinghurst building right? Yes. The drains would have to be seen to and the place would have to be thoroughly cleansed. They have a hole dug in the ground for a bath-room, and the children go down into the black hole, as they call it. The place would have to be thoroughly modernised. The first essentials are air, light, and perfect cleanliness.

2333. *Mr. Powell.*] The whole cost of the lying-in branch of the Benevolent Asylum is borne by the Government? That is so.

2334. And that is the only hospital in Sydney where the whole cost is defrayed by the Government? It is.

2335. Do they, as far as your experience goes, in any way interfere with the professional management? No. They have always carried out our suggestions. The old staff rather assumed an attitude, not of hostility, but of firmness, towards the Board, which the Board resented. They said, "You must do something at once." They objected to that, and said, "We have done everything, and made the place clean."

2336. None of the funds subscribed by the public for the Benevolent Society are applied to the lying-in branch? I believe that they have a collector in connection with the Benevolent Society, but there is never any appeal made for that special branch, so far as I know.

2337. We are told that the full cost is defrayed by the Government? Practically so.

2338. Do you propose in any alteration that you suggest that the institution would remain as a sort of mixed institution, partly supported directly by the public, and indirectly supported by the public through the Government? No. I think it ought to be entirely supported by the Government. I think that work of the kind which the Benevolent Society is expected to do should be essentially pauper work.

2339. In that case it appears to me that the pauper stigma, which you consider undesirable, would remain if the new institution had this mixed support from the public by contributions, and was managed in the same way as others? You are talking of the purely benevolent portion of the work.

2340. I am speaking of the midwifery portion. As it is now the Government support the whole institution;—supposing the Government took away the Benevolent Asylum, would you have the lying-in hospital as a mixed institution, partly supported by public subscriptions and assisted by the Government? I think that, as far as possible, it should be supported by the public, because, after all, we lean too much upon the Government in these things. This is a thing which ought to have a strong claim upon the public.

2341. As the Benevolent Asylum is wholly supported by the Government, under your proposal, if private subscribers would assist to pay the expenses, the Government would virtually save by assisting you? I think it would be a very great saving.

2342. And the mothers would be better attended to, and at a less cost to the Government? Yes. I think the work which the Benevolent Society should do should be of that kind which is generally conducted by the parochial authorities in the old country.

2343. *President.*] And which the Government should not directly do? No.

2344. It is arranged by the Government that they shall not under any circumstances give outdoor relief directly, but there is the Benevolent Society to do it? Yes; that ought to be their function. It is utterly foreign to all conception of medical propriety to have dirty children and dirty women coming into a building which approximates a department where the very presence of dirt or contagious matter means death to those women. The fact that we have had no epidemic recently has been due to our extra vigilance. To show how treacherous the thing is, I may mention that when I joined the staff of the Benevolent Society we urged the directors to take another place altogether, because the building was evidently saturated with germs, and they removed us to Flood's house in Flinders-street; but we were no sooner there than the epidemic broke out in that building. I was puzzled to know how it was, but on making inquiries I found that the attendants were the old nurses, and those nurses had little notion of antiseptics. In a week we lost eight women there. We have had nothing of the kind since, because we have been scrupulously careful, introducing the chart system and a proper kind of nurses, who are instructed in regard to antiseptics, and who know the *rationale* of the matter. The result is that we have kept the thing in check. If we were to revert to the old system that we found there we should soon have the epidemic again.

2345. *Mr. Powell.*] Do you give certificates to your nurses? First of all, we are careful to select the proper type of woman before we train her. We see that she has a certain degree of intelligence, that she can read and write, that she is a woman of good moral character; then she goes through a series of systematic lectures, and she has to take charge of so many lying-in women. Afterwards these women have to submit to an examination oral, and *visa voce*. We have special examiners and they report as to the fitness of the persons examined. If the candidates come up to a certain standard they get a certificate. Some fail, and to those we do not give certificates. We look carefully to the standard of knowledge that they possess before we grant a certificate.

2346. I suppose that it is necessary that you should have some legislative enactment? The Board think that something might be done by legislation which would have the effect of causing all these women who claim the title of midwife to be placed on a register, and to come under some supervision.

2347. And that no person should be allowed to practice without? That no person should be allowed to claim the title of midwife unless she had a certificate and was registered. You can hardly prevent a woman from going to assist a neighbour; but if a woman who lays claim to the title of midwife is employed by a confiding public, on the strength of that title, she ought to be registered.

2348. *Mr. Barling.*] The Registrar-General finds it necessary to record the fact of all the medical practitioners being duly qualified;—would not the same apply to nurses? It ought to be so. I have a Bill before Parliament now, which I introduced on the last sitting day, with the object of affording protection to the public. An untrained midwife may easily be the means of bringing death to a woman in this way: she is ignorant as to how to control bleeding, which may be fatal to a lying-in woman. A woman may die almost in a second, because the floodgates whence the blood flows are enormous. On the other hand, no lying-in woman should lose her life from hemorrhage if she is properly attended to. If she does, there is something like criminality on the part of the attendant. Then a woman is very susceptible to contagion in that condition, and she is in great danger if attended by a nurse who does not know the difference between a dirty instrument and a clean one. Sydney has been deluged with these women for years, and no systematic effort has been made to deal with the question. Because no one likely

liked to interfere with the Benevolent Asylum the matter has been hanging fire. We used to say, "They will do something some day"; but they have done nothing. The only man on the Board who could reasonably be expected to know something about the matter is the President, Sir Arthur Renwick. The others are worthy men, fit to carry on a work like providing food for the destitute, but they have no conception of the importance of a subject like this.

J. Graham,
M.D., M.P.
22 Aug., 1898.

2349. *Mr. Powell.*] I suppose that few families have escaped the consequences of the ignorance of these women? Very few. The consequences are appalling sometimes. A little instruction removes the possibility of their recurrence. We have done good work by providing the country with a class of women who are qualified to nurse. To show that our work is appreciated, I may mention that we get young women applying to us who want instruction from Melbourne, South Australia, Queensland, Tasmania, and even from New Guinea and Fiji; so that evidently our fame has travelled far and wide.

2350. *Mr. Barling.*] What fees do you charge? We encourage them to come by charging a merely nominal fee, so that we may justify our existence, and provide the public with a safeguard. Three guineas was the charge in the first instance, and we treated them for six months, the nurses boarding themselves. We have since raised the charge to 4 guineas. Of course, the nurses who live indoors have to pay for their board, and that comes to a little more. Besides that, we not only instruct the nurse in the bare elements of obstetric nursing, but we give her a turn at the wards where the injured are, so that she will know what happens to a woman from neglect; therefore she is doubly armed.

2351. *Mr. Powell.*] Unless you can get this proposed legislation, the Mrs. Gamps will be too strong for you? No; the public is awaking to the fact that there is something in the art of nursing after all, and especially as applied to midwifery. People in all parts of the city apply to us for trained nurses.

2352. *Mr. Barling.*] The question of the overlapping of charities has, of course, come under your attention. We have taken a good deal of evidence on the point, and the suggestion has been made that there should be a general Board appointed to take the oversight of all the charities? Yes.

2353. Have you ever thought the matter over? Yes. Of course, you know that Mr. Reid brought an organization society into existence, but it has always appeared to me—and I attended one or two meetings of that committee—that any organization is helpless unless it has the authority of law behind it. If such a society is to do any good it should be appointed by the Government, and it should have absolute control over the funds provided by the Government.

2354. There should be a general body having control of the charities of the Colony which are subsidised by the Government? Yes.

2355. What kind of a body should that be—should it be composed of Government officers? No; I think it should be a Board very much like the Board of Health. There you have one permanent officer who presides; then you have six or seven men who are respected in the community, and who possess a reasonable knowledge of the work. The Board might sit systematically once a week or so. It ought to be a Board of that kind.

2356. And that body should have practically the distribution of the Government subsidies to charities? I think so. Every little charity goes to the Government now, and gets assistance; but every farthing which goes to any charity ought to filter through some such Board as that.

2357. Could you get gentlemen on the Board who would give their time to that—gentlemen like yourself? I think there should be no difficulty, but I do not think you would get them to take the trouble to form a Board of that kind unless they had authority from the State to deal with the matter in an effectual way.

2358. That is to say, they should have the power of saying yes or no? Yes; they would have to be men of discreet judgment who would not interfere with the administration of any building, but who would have a right to criticise and report to the Government in reference to any defect in connection with any institution subsidised by the Government.

2359. *President.*] It would be a Board that would be the means of administering the subsidy? It ought to be that. Little organizations have arisen from time to time, and they have written to the Colonial Secretary, or they have got a member to apply, and they have received a £ per £ subsidy. That is how it has all grown up.

2360. Would you have a permanent official at the head of the Board? No; I think you ought to have a permanent secretary, but all the members of the Board should be honorary. It should be a small Board, worked very much like the Board of Health.

2361. We are using the word charity in a wider sense than you are using it—we include not only charities proper, but also the asylums and gaols? Of course that means a great work. It would have to be undertaken by men who could devote their whole time to it. If, however, you could map out a certain line of charities, such as hospitals, the Benevolent Society, and all those institutions which receive Government aid apart from the purely Government institution, such as gaols, I think you might get people to do the work. You might get the work done in the metropolitan area in that way.

2362. Would not a Board of this kind do—one comprising the Director of Charities, the Comptroller-General of Prisons, the Inspector-General of Insane, and the President of the Board of Health? Yes. The only fault of that would be that it would be so essentially a Government Board that there would be apt to be grumbling on the part of disappointed institutions and the public. I think that a lay Board, properly selected, is a better type of Board for work of that sort, although what you suggest would be a very strong Board, and could do their work well. I think that the introduction of the lay element, and as much as possible the honorary element, would commend itself more effectually to the community. Of course, if you are going to have a Board of that kind, there is no reason why they should not have the supervision of all the charities.

2363. *Mr. Powell.*] If the funds are supplied by the Government, does it not discourage the public from subscribing? Yes. It has always seemed to me a farce that an institution like the Sydney Hospital should receive huge Government aid and be allowed to spend it in any way they liked without any checking or controlling authority. Recently matters have been more carefully looked into; but my own experience is that in the past they have simply sent in returns and got the money, and the Board have spent the money any way they liked. They may have spent the money well—I do not say that they have not—but there has been a want of control on the part of the Government.

2364. *President.*] In the reports sent, in that is one of the recommendations—that where the Government subsidises an institution, the Government should have a right to enter and consider the propriety of the expenditure?

J. Graham,
M.D., M.P.
22 Aug., 1898.

expenditure? Of course they had some form of supervision. Some years ago there was an officer called the Inspector of Charities—Mr. Robison. He used to go and formally walk round the hospital and write a report, but no steps were taken to carry out the suggestions he made. Of course you must leave as much as possible to the institutions the feeling that they are run by the public. At the same time, whilst they are run by the public, if they are receiving Government assistance that assistance should only come to them through a Board that has taken the trouble to carefully scrutinise their methods of management. If anything is done by an institution that is deemed to be an offence in the eyes of the Board, then the subsidy should be withheld in a proper way.

2365. *Mr. Powell.*] It is an extraordinary position. Take your institution: suppose you have 300 subscribers at £1 a year; they can attend meetings, pass resolutions, and do what they please; but the Government who subscribe £300 are not represented? No. Under the present system, in some cases there are Government nominees on the Board, but the system has not proved satisfactory. I am a Government nominee of the Sydney Hospital Board, but to my knowledge the Government have sent as nominees men who were absolutely of no assistance to us. This has been in the exercise of political patronage. That is where the evil of the Government nominee system comes in. At the Prince Alfred Hospital things have been managed differently, because fortunately the right sort of men got hold of the management. The result is, that we have there an institution that is almost perfect in its management, and which will compare with any other institution of its kind. I do not know of one that is better managed. You have the Sydney Hospital, with a huge Board which is like a small Parliament, consisting of Government nominees, and the result is that the thing is not so well managed. If the Government could be conscientious, and make the appointments a serious matter, it would be all right.

2366. *President.*] The great thing is for the Auditor-General to be able to send an inspector, at any time, to question the propriety of every item of expenditure? Yes.

2367. *Mr. Barling.*] Have you ever taken into consideration the fixing of the fees to be charged by the nurses you have trained; I ask that question, because certain classes of our population are in poor circumstances, and yet are quite able to pay for assistance of that kind, but they cannot afford to pay the very heavy fees that the nurses generally charge; have you ever thought whether you could lay down a certain scale of fees for efficient nurses? As a matter of fact that aspect of the question should right itself. There is such a plethora of trained nurses that there should be no difficulty in a poor man or woman getting a nurse at almost their own figure. I have never had any difficulty in putting trained nurses into houses at figures which the parties could afford to pay; 10s., 15s., and £1 a week would be about the average. The ordinary nurse asks two guineas a week, which is more than some can afford. I have put dozens of nurses into houses for 15s. and £1 a week, and they have willingly gone.

2368. If it is understood by the population that there is an institution to apply to, and that there nurses will be assigned to them at certain fees, that would be a great public convenience? We have done that at the Women's Hospital. When anyone has sent for a nurse we have supplied them; and if the parties were poor we have let them pay what they could—5s. or 10s. a week—and the money has gone to the funds of the institution.

2369. The class to whom I am alluding are persons with £100 or £200 a year to whom the payment of six or eight guineas for a nurse would be a terrible tax; if they could send to an institution such as you speak of, and get a qualified nurse at a certain rate, it would be a great boon to a large portion of the community? What I should like to impress upon you is this, that in the future hospital which will undertake maternity work, the work should be as largely as possible self-supporting. It ought to be a public institution as much as possible. Of course you can hardly expect it to start from its own efforts; it would have to receive some Government aid, but it ought in time to become a first charge upon the charity of the public.

2370. What I suggest is, that the people might be able to send to the institution, where they would get a respectable nurse at a very moderate rate? Yes. Of course other institutions have risen, but I do not think that one need take them seriously, because you will have them whether you have a well established public institution or not. Every church organisation has its fad, and if they care to pay for it one cannot object.

2371. *President.*] Your scheme would be for a great central institution? Yes; and to provide all the machinery for a great organisation.

[The evidence from Question 2372 to 3195, inclusive, relates to Institutions other than the Benevolent Society, and will be printed with a subsequent Report.]

THURSDAY, 24 NOVEMBER, 1898.

[The Commission met at the Offices of the Public Service Board at 9-30 a.m.]

Present:—

G. A. WILSON, Esq., J.P. (President).
JAMES POWELL, Esq., J.P.

The Acting Director of Government Asylums was also present.

E. Maxted further examined:—

E. Maxted. 3196. *President.*] We are very much startled, Mr. Maxted, by the increase in the number of outdoor relief cases from 1891 to 1897 of 147 per cent. as against an increase of 18 per cent. in the population; the number of "husbands sick and afflicted" in 1897 is 604, against 372 in the previous year? I may say, in reply to your remarks, that this matter was pointed out to me by your Secretary some considerable time back, and I thought well over the matter, and endeavoured to arrive at something like a reasonable conclusion as to the cause; and I must say, I find myself unable to arrive at any satisfactory

24 Nov., 1898.

satisfactory conclusion. I regarded it at the time as a difficult social problem to solve. The only possible conclusion I can arrive at is that it may be within the bounds of possibility that stringent measures have been taken at the various Government Asylums of later years to ascertain whether the inmates should be discharged or whether they should be retained; and if the discharges of later years have been abnormally large, compared with former years, and these people have left the institutions and come down to the Benevolent Society for outdoor relief, that may to a large extent account for the increase. E. Maxted.
24 Nov., 1898.

3197. That is a hypothesis, of course? Yes; merely a passing thought. Then another thought is passing through my mind, which is also merely a matter of theory. As I stated before, I am practically unable to answer the question reasonably, but a point that I think might be investigated is: Have more stringent measures of later years been adopted to prevent persons from entering the Government Asylums? Because if such measures have been adopted, it is reasonable to assume that these refusals to admit persons to the institutions have resulted in these particular persons coming down to the Benevolent Asylum for relief.

3198. We could soon test that by the evidence of the Government Medical Officer; these, of course, are assumptions? Mere assumptions. As to giving anything of value in the form of evidence, I am unable to do so.

3199. If the wave of poverty is an explanation, the increase should show, of course, in other charitable agencies? To which agencies do you refer?

3200. Take, for instance, Government Asylums; it should show all round;—inmates of Government Asylums have increased only 28 per cent. in five years? It is merely a theory. I was going to say, with regard to the popular scheme of old-age pensions which is being floated, it is also possible that persons, instead of going into Government institutions, are waiting for the passing of this scheme, and are meanwhile managing to subsist on a small amount of outdoor relief instead of entering the Government institutions.

3201. That is only a theory? Yes; but I think that the old-age pension proposal must affect the question to some limited extent.

3202. Of course it would have to be a very large extent to account for it. *To Mr. Hanson*: Is there anything within your knowledge to lead you to believe that any stringent or exacting conditions now exist in regard to admission or discharge from the asylums? No.

3203. Are they subject to more stringent conditions with regard to being kept than they were in the past? No, sir.

3204. They are occasionally reviewed so as to see whether they are proper inmates? Yes; as to whether they are able to work.

3205. *To Mr. Maxted*: Then that is all the information you can give? That is all. I am sorry to say that I cannot help the Commission further.

MONDAY, 28 NOVEMBER, 1898.

[*The Commission met at the office of the Public Service Board at 9.30 a.m.*]

Present:—

G. A. WILSON, Esq., J.P. (President).
JAMES POWELL, Esq., J.P.

The Acting Director of Government Asylums was also present.

E. Maxted further examined:—

3206. *President*.] Have you given any further thought to the matter of the increase in the outdoor relief? I have been thinking over it a great deal. I have telephoned to the Sydney Hospital to see if there has been an increase in the outdoor cases during the past three or four years, and the Secretary said he would send me the information. So far as 1898 is concerned, there has been a most extraordinary increase in the number of cases of sickness, and I was wondering whether there had been the same in 1896 and 1897. E. Maxted.
28 Nov., 1898.

3207. The Medical Officer of the Government, Dr. Payton, who comes in contact with such cases, says there was not. With regard to admissions and discharges at the Government Asylums, to which reference was made the other day, statistics supplied by the Department of Charities show that there was nothing abnormal in the numbers? *Witness, after examining the figures*: There is nothing extraordinary about the figures—they are quite normal.

3208. In reference to the cases of "husbands sick and afflicted," do you think there is anything wrong with your classification? I think not. I have gone thoroughly into the matter with the officer who classifies the cases, and he says he has made no difference in the method of classification right throughout.

3209. Supposing even that there had been a large number of discharges at the Government Asylums, the pressure would be on the robust, who perhaps would be likely to be in a position to earn some money, they would not be the sick and afflicted? I think it is possible they might not be eligible for retention, and yet not be able entirely to maintain themselves, and they come to us for help.

3210. But they would not be the sick or afflicted? There are a very large number of middle-aged people taken into the Asylum. If they were sick they might not be able wholly to support themselves, but they could earn a little.

3211. Those turned out of the Asylum are comparatively robust? Comparatively.

3212. Would not the proper classification be "aged destitute men?" Not unless they were over 60. If they were not 60 and ailing—not proper subjects for an institution—we should call them "sick and afflicted men."

3213. However, you cannot solve the matter of the increase at all? I cannot. I can see at a glance there is nothing extraordinary about the Asylum figures, so the theory entirely breaks down.

3214. *Mr. Powell*.] Did this matter of the great increase engage the attention of your Board at all? Not particularly in any section, but the question of the increase generally has been a matter of most anxious thought.

3215.

- E. Maxted.
28 Nov., 1898.
3215. Was the increase in the number of "husbands sick and afflicted" dealt with by the Board? No; only so far as the whole increase is concerned.
3216. Did you call attention to it yourself? No, I did not. I have called attention to the increase as a whole.
3217. I think you told us you did not notice it? I did not until the figures were brought under my notice by your Secretary. Still, to define a cause would be outside of my capacity, just as much as to define a cause for the general increase.
3218. *President.*] In regard to the "husbands sick and afflicted," could you not have got someone to go over the cases; suppose, for argument, you found a hundred of the cases came from other colonies, that would throw light upon the matter; not to make some investigation seems to me extraordinary? The whole of the cases on the books are taken at the end of the year and classified. The officer brings them to me, and shows me his balance of the number he has classified with the number on the books, and I see that it is within the bounds of reason. With regard to the causes of the increase, it is quite outside my power to make a discovery.
3219. Did you adopt a different way of classifying in 1897? The same system has been adopted right through.

APPENDIX.

REPORTS ON Cases visited of Outdoor Relief recipients.

CASES OF DISTRESS AT "HART'S BUILDINGS."

HART'S Buildings, off Gloucester-street, Church Hill, were visited by a member of this Commission without previous notice. The object of this visit was to see two Benevolent Asylum out-pensioners. Hart's Buildings consist of about sixteen, more or less, dilapidated tenements in a confined, low-lying, dirty square, which is the common yard of the neighbourhood. The day was cold and gloomy. The square was like a vault. In summer it must resemble a furnace. There were a number of little children playing in this unwholesome spot. In a house of two very small rooms, for which 6s. 6d. a week rent is paid, reside three old dames, whose combined ages are 210 years. The tenant is Mrs. G. aged 70, who has been a widow sixteen years. She has no children. In consequence of an accident she has been crippled since 11th May; and, judging from her apparent helplessness, is likely to remain so for some time. She is otherwise healthy. She receives relief from St. Vincent de Paul Society, in provisions, to the value of 1s. 6d. a week, which are issued by local tradesmen on the Society's ticket. "It's a handy way of getting [food]," she said; "because when they know what you are, they make you a ha'porth of salt or a penn'orth of soap, and you can get a little of anything you want." She does not receive help from any other charitable society. She applied to a Benevolent Asylum inspector who, she alleges, said she could not obtain relief there unless she went for it personally. Her "greatest trouble is the rent." She managed to get along by letting the upstairs room to two out-pensioners of the Society, who each paid her 2s. a week, and by casual assistance from friends. This appeared to be so precarious that it was obvious the old dame needed systematic relief. Your Commissioner represented her case to the Benevolent Asylum's officials on the same day, and as a consequence food was sent to her, and she was placed on the relief list. There was not any record of her case at the Asylum, but her statement accords with the practice of compelling applicants to appear before the Committee before relief is given.

On the day of your Commissioner's visit, Mrs. G. . . . and her tenants were found in the lower room of the house. This is her bedroom, and also the common kitchen and dining-room of the aged trio. It was almost filled by a bed, a small table, several common chairs, a few cooking appliances, and a flight of perilous stairs leading to the apartment above. The old ladies chatted freely, and did not complain of the hardship, which their narratives showed they experienced. Indeed, in this home, as in others visited by your Commissioner, want of the means of life did not seem to be regarded as a matter to be complained of, but rather as an ordinary condition of every-day existence.

Mrs. F. . . . stated that her age was 70 years. She was formerly a tailoress, but cannot work now because of old age and infirmity. She receives from the Sydney Benevolent Asylum two loaves of bread, 2 lb. meat, or (when she does not take meat) 2 lb. flour, $\frac{1}{2}$ lb. tea, 1 lb. sugar, and 1s. 6d. towards the rent weekly. The value of this ration is 11d; also has a ticket for provisions to the value of 1s. 6d. a week from St. Vincent de Paul Society, and a friend occasionally gives her 1s. When asked if she went to the Benevolent Society every Wednesday for her allowance, she replied, "Yes; and I find it very hard. I suffer from heart disease, and it takes me two hours to walk there. Coming home with the food it takes me longer, as I have to sit down frequently; and when I get back I am completely knocked up." In answer to the question, "Don't you find the bread go stale and the meat turn bad in summer before you can use it?" She said, "I've got a friend who buys a loaf when I get the bread, and I buy a fresh loaf when I want it, and in summer I cook the meat all at once as soon as I got home; when the bread gets hard I soak it in the tea." Here, as in Mrs. . . . case, the provision ticket seemed to be appreciated, because it enabled this feeble old woman to obtain a little variety of food.

Mrs. McK's . . . case is similar to the others, except that, although aged, she is not an invalid, she receives the same kind of rations from the Sydney Benevolent Asylum, but only 1s. a week towards her rent; she also receives a 1s. provision ticket from the St. Vincent de Paul Society. She is a deserted wife, and has no children or friends able to help her.

It was obvious in these cases that the relief granted was neither sufficient nor suitable to the requirements of the aged recipients. They did not parade their wants, but when questioned said they had difficulty in procuring enough bedding, warm clothing, and boots. They, however, preferred freedom and comparative want to becoming inmates of any asylum in which all their needs would be fully met, one old lady remarking with emotion, "I would not like to go into the poor-house." An allowance of 5s. a week each would, they said, enable them to pay rent and live comfortably. These three old women are undoubtedly fitting subjects for admission into the Newington Asylum, where they would be properly cared for at a cost to the State of between £15 and £18 a year each. Otherwise they should receive an adequate allowance outside, not to exceed that amount. The Benevolent Asylum does not meet the requirements of such cases in any essential particular, and to continue to deal with them as at present is to perpetuate hardship which decent aged persons ought not to be subjected to in a charitable community.

A WIDOW'S HOME IN KENT-STREET.

Mrs. E. . . ., a widow with six children, the eldest being a boy of 17 years of age, and the youngest aged 6, reside in Kent-street. This family have been in receipt of outdoor relief for nine years, and the father was included in it for seven years. He was an invalid, and is dead about two years. The relief granted is 6 loaves of bread, 3 lb. flour, 3 lb. meat, $\frac{1}{2}$ lb. tea, 1 lb. sugar, and 2s. towards the rent. The house contains four rooms, and is in a dilapidated condition. The home is one of poverty, dirt, and idleness. When your Commissioner visited it, at 1 o'clock in the day, the beds were unmade, the rooms apparently unswept; on every side there was evidence of carelessness which perpetual poverty seems to engender. In one corner there was a pair of girl's dancing shoes. Mrs. E. . . . is a healthy woman, and earns about 5s. a week; her eldest boy earns 8s., and she lets one room for 3s. a week; a boy aged 14 formerly earned 5s. a week as a driver, but has been out of work for some weeks; her daughter aged 16 had earned a little at dressmaking, but had also been out of employment for some time. The total income for the maintenance of seven persons is thus 18s. a week, out of which 10s. a week is paid for rent, and the food allowance is valued at 1s. 11d. Boots on occasions have been supplied from the Asylum to Mrs. E. . . . and her two girls. When there are means, vegetables are bought at Paddy's Market. In granting this relief the Benevolent Asylum Committee doubtless assumed that efforts at self-help would be made by the family. Judging from

from Mrs. E's . . . statements, such endeavours appear to have been very limited. She said, "The daughter of 16 is not at service, because I promised her father she should not go from home, and I like to have her under my own eye." She was reminded that there was greater moral safety at respectable domestic service, than at the precarious, illpaid occupation of a dressmaker. The boy of 14 was trying to procure work, but Mrs. E. . . could not say in what direction. The Society's inspector visited the home, and knew her circumstances. It appears to your Commissioner that outdoor relief in this case is not only useless, but that it is pauperising, as well as demoralising the family, by encouraging them in idleness, which may naturally lead to something worse. If it is withdrawn, the mother should be able to go to service with the eldest girl, and a portion of their earnings should contribute towards the maintenance of the three younger children, who should be boarded out by the State Children's Relief Board in a respectable home in which their relatives might visit them. They would, under this method, be well fed, clad, and educated; and eventually provided with employment. The two elder boys should be able to maintain themselves. One feature in this case is characteristic. The Society's maximum relief has been granted for nine years, although several of the children have grown up in the meantime, and ought, under proper training, to have been able to lessen the burden of their mother. On the day of your Commissioner's visit the only food in the house was some bread, and a small quantity of pumpkin and turnips. Under existing conditions the family are being partially starved.

A HOME IN GLOUCESTER-STREET.

A member of your Commission visited a home in Gloucester-street, at which outdoor relief is granted by the Sydney Benevolent Society to two families, named B. . . and H. . . The tenant is a respectable woman named N. . . who made statements, which were obviously true, disclosing a sad condition of distress in this home. Mrs. N. . . is a married woman, whose husband is out of work. He is usually employed about five months in each year, during which he earns about £2 10s. a week; he has been three months out of work. There have been seventeen children in this family. Eight are living, the others died when nearly grown up, so that the family has known sorrow. One son is married and away; he has a family, and is also out of work. Only two of Mrs. N's. . . children who reside at home can help her; one earns 10s. a week, the other 17s. The house contains six rooms and a kitchen, and the rent is 15s. a week; it is very barely furnished, and the back portion is not weather-tight. Although suffering great poverty, Mrs. N. . . is not in receipt of outdoor relief, and her case is only thus briefly referred to because of her connection with two of the Benevolent Society's cases, and also as an illustration of how the poor help the poor.

Mrs. N. . . is the guardian of three children of Mrs. B. . . a widow, aged 29, who formerly rented a room from her. Mrs. B. . . while an inmate of this home, received weekly from the Benevolent Asylum three loaves of bread, 1 lb. of flour, 1 lb. sugar, $\frac{1}{2}$ lb. of tea, 3 lb. meat, and 1s. 6d. towards her rent. Her children are aged 12, 5, and 3 years, the eldest, a girl, being delicate. As this allowance is for four persons, its value is about 4d. a week, or a little more than halfpenny for each per day. Finding this help and her own occasional earnings insufficient for her family, Mrs. B. . . obtained a situation at 6s. per week, which, with the rations drawn from the Asylum, she now gives to Mrs. N. . . who, with this allowance, provides for the three children. If she acted as their guardian under the State Children's Relief Act she would receive 15s. a week and an outfit. On several occasions the 6s. a week has been returned to Mrs. B. . . when her family urgently needed clothing or other necessaries. The children appeared well cared for; they were convalescing after measles, through which Mrs. N. . . had nursed them, her experience having rendered medical attendance unnecessary. Mrs. B. . . does not receive assistance from any other charity, and as the value of the provision from the Asylum is about 1s. 8d., Mrs. N. . . is acting guardian of three children for less than 8s. a week, while their mother has not sufficient means of obtaining clothing.

During Mrs. N's. . . narrative it transpired that she rented a room to Mrs. H. . . a poor widow, with two children, aged 6 and 2 years, who receives weekly from the Benevolent Society 4 loaves of bread, 2 lb. of flour, 1 lb. of sugar, $\frac{1}{2}$ lb. tea, 2 lb. meat, $\frac{1}{2}$ lb. sago for the baby, but no rent allowance. The value of the ration is about 1s. 5d., or $\frac{1}{2}$ d. a day for each person. This case is a painful one. Mrs. H. . . rent is 4s. a week; Mrs. N. . . when asked if she received it, replied, "The poor thing has not been able to pay me for a long time; her baby is very ill, and is not getting proper food." In reply to the question, "Why have you allowed her to keep the room, seeing that you are yourself so poor?" Mrs. N. . . said, "I couldn't turn her and her children into the street. She'll pay me when she gets it; and if she can't I'll manage to get over it." Mrs. H. . . stated that sometimes she does a day's washing, by which she earns a few shillings; and at these times her landlady looked after her children. Mrs. N. . . remarked that as there had been seventeen of her own children to look after "a few more or less of other people's made no difference."

On the day of your Commissioner's visit the three families in this home were in a state of destitution under very painful circumstances. There was nothing in the house but bread. Thirteen persons, including the two children of Mrs. N. . . who were at work, had breakfasted off bread and water; and the midday meal was to be similar. Of the truth of this statement there could be no doubt. Mrs. H's. . . youngest child lay in a cradle by the kitchen fire, apparently dying from measles. It had been taken to a doctor eight days previously, but had not been seen by one since. And Mrs. B's. . . three children who were recovering from measles, as already stated, certainly needed generous diet, which could not be obtained for want of means.

Your Commissioner at once requested the Benevolent Asylum authorities to provide suitable food for the children, and medical attendance for the baby. The Society's relief in these cases is inadequate; and there is another organisation established by law for dealing with them to which they should be transferred. The State Children's Relief Act provides for boarding-out children under 14 years of age, either with their own mothers or suitable guardians; and in order that they may be sufficiently fed and clothed the families of Mrs. B. . . and Mrs. H. . . should be thus dealt with.

THE . . . FAMILY.

B. . . aged 33, his wife (a young woman), and five children (the eldest aged 9 years, and the youngest 3 weeks) reside in Barker's-lane, off the lower end of Bathurst-street. A poverty-stricken home, in a poor, close, insanitary neighbourhood. Visited by a member of this Commission, without previous notice, on Friday, the 8th instant at noon. This home, which consists of three small rooms (including kitchen), is the upper portion of a small house, and is reached by a flight of wooden steps from a confined dirty backyard. The family were in a sad state of sickness and destitution. B. . . was bedridden with asthma, apparently in a very serious condition, and suffering greatly. His wife, a little, delicate emaciated woman—who stated it would be necessary for her to go into a hospital for an operation—was attending, as well as she was able so to do, to the wants of her young family, and the sick man, who was too ill to be questioned. She made no complaint of the poverty and illness, which were distressingly evident; but answered questions with an obvious sincerity and abnegation of self that impressed your Commissioner most favourably. This case discloses such features of patient suffering, and neglect to sufficiently relieve it, that there is difficulty in confining a narrative of it to the ordinary language of an official report. The statement of Mrs. B. . . which so far as it relates to the present, was supported by the condition of the home, briefly summarised, is as follows:—Her husband has been ill for the past twelve months; during all that time he has been unable to work; he has been three times an inmate of the Carrington Convalescent Hospital, and cannot now be admitted to the Sydney Hospital, because his case is incurable. Doctor Norrie prescribes for him, and supplies medicine without charge, but says, "Nothing further can be done." Ever since B's. . . illness outdoor relief has been received from the Sydney Benevolent Asylum. This help now consists of 2s. 6d. a week towards the rent, and the following allowance of food, which is drawn from the Asylum every Wednesday:—Two lb. sugar, 4 lb. flour, four loaves of bread, 4 lb. meat (including bone), $\frac{1}{2}$ lb. tea, and also 1 lb. oatmeal for the sick husband. The latter has not been able to eat solid food for some time, but on the 7th instant he ate a little thin water-gruel. On that day Mrs. B. . . had no means of obtaining milk, but on Friday she bought a halfpennyworth, half of which she gave to the sick man in his gruel, and the other half she was keeping for him until the evening. The rent of the rooms is 5s. a week; she always pays the Benevolent Society's 2s. 6d. a week towards it, and before receiving that allowance has to produce the landlord's receipt for the previous payment to him. She has no help from any other charitable society; but the Rev. Mr. Albury, of Christchurch, visits the home, either weekly or fortnightly, and on such occasions leaves a shilling, and sometimes two. Mrs. B. . . in consequence of her own illness, has been unable to earn more than a couple of shillings during the past three months: but occasionally, not often, a friend gives a shilling, and this sometimes helps to buy a little extra food, but generally it goes towards the rent. As to clothing, sometimes a friend gives an old skirt or so, which she makes up for the children, and the Benevolent Society has granted several pairs of boots.

boots. She was herself insufficiently clad, and almost shoeless—this fact was obvious, and it was elicited by questions. Mr. Dickinson, an Inspector from the Benevolent Asylum, visited the family about three months ago, and also previously; and another Inspector (an elderly gentleman) visited the home on Friday, the 1st instant. On that day B. . . . was able to go out a little. The doctor had ordered medical comforts for him, including cocoa and milk, but Mrs. B. . . . had not had means to obtain them. She managed to get vegetables for the children sometimes, and "the carters at the markets were very good, as they allowed the eldest boy to pick up potatoes which fell from the carts." When pressed to say whether the family ever suffered actual hunger, this frail woman, who had thus far shown a brave front, broke down for a moment, and then said, "Well, you see, we have not large appetites; he (meaning the husband) is sick, and can't eat the kind of food we get; and a cup of tea almost satisfies me now." "Does the 4 lb. of meat include bone?" she was asked. The reply was "Yes; but we do not care about meat—none of the children seem to want meat"—the woman's manner now clearly indicating that she shrank from disclosing the full extent of her poverty. There was at this time no meat in the house. When questioned as to the bedding, she said she would be grateful for a pair of blankets. It was apparent that they were required. The value of the rations supplied to this family weekly is, according to the Benevolent Society's prices, 2s. 3½d., or two-thirds of a ld. per day per individual, excluding the infant. Including the tea, sugar, and oatmeal, the total weight of these rations (inclusive of the bone in the meat) is 19½ lb., or less than 7½ oz. daily per individual, excluding the infant. The conditions which should be apparent to or ascertained by relieving officers visiting this home are:—(1) That the relief granted is inadequate in quantity; (2) that it is unsuitable for the husband, and also for the wife, who is "nursing" a baby, and who must, judging from her appearance, and also her admissions, which were not volunteered, be partially starved; (3) that immediate sufficient provision of more generous diet, possibly including a little stimulant, should be made for the husband and wife, and that the rations of the children should be increased, and some milk allowed; (4) that the bed-clothing is insufficient, and that the mother and children are insufficiently provided with clothing; (5) generally that the common necessities of this case have been neglected, and that the whole family, but particularly the husband and wife, must have suffered great hardship, which might have been ameliorated under a better system of inspection and relief.

Acting under instructions, an officer of your Commission represented the requirements of this case to the Sydney Benevolent Society, which thereupon sent down another pair of blankets, and some food.

On Sunday, the 10th instant, your officer again visited this home in the forenoon. B. . . . was still too ill to be questioned. Some further statements were elicited from Mrs. B. . . . She was going to have the baby christened that day. It was suffering from "thrush." She sustained the infant wholly from the breast, and "felt very weak" because she subsisted "principally on tea," as she "had no appetite for anything else." She was quite destitute of warm under-clothing, and her "nightgowns and bits of petticoats and things had to be made up for the children." After the birth of the baby, a few weeks ago, she "had to get up in a few days, before her time, to attend on the others." There was sufficient provision in the house to last over the following day. Some cocoa and stimulant had been procured for the sick man, but he had been unable to retain it.

Your officer had an interview with the Rev. Mr. Albury, of Christ Church, on Tuesday. That gentleman said he had an intimate knowledge of this case for the past eighteen months. Until two months ago he had visited the home weekly. The family, to whom he gave a high character, was not now in his parish. For more than a year Mr. B. . . . had been unable to work, "but," said Mr. Albury, "I have known him to go out when he ought to have been in his bed, to try and earn a little by doing work for which he was really incapacitated by illness." Mr. Albury's knowledge of the home fully bore out the statements made by Mrs. B. . . . and the observations of your Commissioner.

Owing to your Commissioner's action, the family is now being provided for from the Parliamentary Vote for the relief of destitute persons.

A WIDOW AND FAMILY AT CHIPPENDALE.

Mrs. R. . . ., a widow with four children—the eldest being 12 and the youngest 2 years of age—resides at Chippendale. She receives from the Sydney Benevolent Asylum weekly six loaves of bread, 3 lb. flour, 3 lb. meat, 1 lb. sugar, ¼ lb. tea, and 2s. 6d. towards her rent. The house, which is damp, contains two small rooms and a kitchen; the rent is 5s. a week. She is able to earn 1s. or 2s. a week. Mrs. R. . . ., who is evidently a respectable woman, has had a deal of trouble, and her home is in the lowest depth of poverty. Her husband died of consumption on Good Friday last, after an illness of four and a half years, and she fears her daughter of 10 years of age has inherited his complaint. The boy of 12 has had one eye destroyed by an accident. He has not attended school for more than two years, "because," said his mother, "to tell you the truth he has had to help to keep the house alive by gathering old rags and bottles for sale." At this occupation he earns on an average 2s. 6d. a week. Your Commissioner found this family in a pitiable state of destitution. The Society's allowance is usually exhausted by Saturday, and from then until the next Wednesday (relieving day at the Asylum) the food supply is precarious. The day before your Commissioner's visit the family had lived on dry bread and tea, which, with some sugar, had been supplied by a neighbour. On the following day all the food in the house was half a loaf of very dry bread, a few crusts, about ½ lb. of sugar, and a little tea. The breakfast had consisted of bread, but the family were looking hopefully forward to the Society's allowance later in the day. Some poor neighbours gave scraps of food occasionally. The delicate girl could seldom eat coarse food, "and so," said the mother, "she had nothing to eat yesterday, because she didn't feel well." The home is almost bare of furniture. The front room contains a couple of boxes, one or two small articles, and a bed covered only with a thin pair of blankets. In this sleep the mother and the three girls. The adjoining room contains a bed and another pair of thin blankets. The boy sleeps here. The third room is used as a kitchen and dining-room. It contains a small table, a form, and an old safe. When questioned about fuel, Mrs. R. . . . said, "We chopped down an old tree in the yard; that has lasted some days, and the man at the corner is very good, as he lets us have a penn'orth of wood whenever we want it." The family are almost without clothes, and must have suffered greatly from the cold during the winter. "I have to wash on Sundays," said Mrs. R. . . ., "so that the children may have clean clothes to go to school in on the Monday; and my boy has not worn boots for two years." When questioned with regard to milk and vegetables, she replied, "I buy a half-porth of milk sometimes, but we hardly ever have vegetables, except when a neighbour, who is very good, gives us a cabbage sometimes." She spoke gratefully of a tradesman, a neighbour who had written off a debt incurred during her husband's illness, "and who," she said, "would let me go in his debt further, only I don't want to." Although there must often be dire want in this home, Mrs. R. . . . did not make the complaints that might have been expected under such circumstances. Indeed, in this, as in other cases visited by your Commissioner, long experience of poverty seems to have reconciled the sufferers to it. The Benevolent Society's relief had been received for about four and a half years. An analysis of this case, which might be taken as an example of many others, shows that the weight of the weekly ration received from the Sydney Benevolent Asylum, including tea and sugar, and the bone in the meat, is 19½ lb., or under 9 oz. for each person daily. The total income is not more than 7s. 6d. a week; when rent is paid there is 2s. 6d. over with which to eke out the food supply and provide clothing.

The case is one which should be dealt with by the State Children Relief Board. Mrs. R. . . . said she would never part from her children, but it was explained to her that under a law recently passed to provide for such cases this Board had power to board them out to their own mother. The family could thus be provided with means to procure food, and the delicate girl could occasionally sojourn at one of the Board's cottage homes, where she might become strong under the generous treatment there bestowed upon delicate children, and the healthier conditions of life in the country.

SOME AGED WIDOWS' CASES.

Mrs. R. . . ., aged 80, rents a room for 2s. 6d. a week, in Macquarie-street South. She receives from the Sydney Benevolent Society 1s. 6d. a week rent allowance, 2 loaves of bread, 2 lb. of flour (or otherwise 2 lb. of meat), 1 lb. of sugar, ¼ lb. of tea. She has six children, five of whom are married and have families. A statement of their earnings disclosed that they are all very poor. One son, a journeyman carpenter, has six children; another, who works at the tram-sheds, has three children; a daughter is married to a shoemaker, and she has seven young children; another is a boot-maker, with seven children; another is a boilermaker, with eleven children. The eldest son, aged 50, is a bachelor. When asked why she did not live with one of her children, Mrs. R. . . . said, "They would give me a home, only I won't give up my eldest boy; he don't drink, but he can't get constant work; he chops wood sometimes for a bake-house." There could not be much doubt, from other answers, that this son shared his mother's small means. He did not appear to have any place of residence, and the old lady was much affected when speaking about him. Her daughter helps her occasionally, but it was clear that she was suffering great hardship. She was very insufficiently clad, and stated that she suffered much from the cold in consequence. She also asked for a blanket, as she had not sufficient bed-clothes. Your Commissioner

Commissioner visited this home on Monday. Mrs. R. . . , who is in feeble health, had then a little tea and sugar and some bread and jam only to subsist upon until the following Wednesday, when she would receive the Society's ration, including meat. The relief afforded to this woman is neither sufficient nor suitable in view of her age and weakness. Her children are not legally liable for her support, and the Society would be acting most kindly by stopping its benefaction, as, in that event, Mrs. R. . . would be compelled to go into an asylum, where she would be sufficiently provided for, or to the home of one of her children. As she now lives she is half-starved with cold and hunger.

Mrs. H. . . , aged 76, rents a room in Cornwallis-street, Redfern, for 2s. 6d. a week. She receives from the Sydney Benevolent Asylum 2 loaves of bread, 2 lb. of flour (or 2 lb. of meat), 1 lb. of sugar, $\frac{1}{2}$ lb. of tea, and 1s. 6d. a week towards rent. She also obtains boots from the Asylum. A Church society allows her 1s. a week, and assists her to procure clothing. She has been forty-two years in the Colony, and her husband has been dead fourteen years. He was a builder, and he appeared from her statements to have been fairly well off until about three years before his death. She has no family. Your Commissioner visited this home on Wednesday (the Benevolent Society's relieving day). Mrs. H. . . is a feeble woman, and her room is a dirty hovel. There was reason to believe that for several days she had been partially starved. She made the following statement:—"I do not get enough food, and I cannot work. The Society's ration only lasts until Saturday. A poor neighbour sends me a dinner on Sunday, and I saved part of it for Monday. Since Monday I have only had a little bread and jam. To-day I have had no breakfast, nor shall I have anything until this afternoon, when I will get the Society's ration. My landlady is too poor to help me, even with a little food." She obtained "a pennyworth of firewood at a time." When asked whether she would not rather go into Newington Asylum, and be well cared for, she answered, "I would sooner have my liberty, and live even as I do." She said that an allowance of 6s. a week would provide her with everything she required. At present she is living in dirt and misery, and her surroundings are so unsanitary that it would be true charity to stop outdoor relief and to compel her to go into any home where she would be kept clean and properly nourished.

Mrs. J. . . , aged 76 years, resides in Irving-street, in a room for which she states she pays 4s. a week. This charge, if made, is excessive. The room was very clean, and was sufficiently furnished. In this case an allowance similar to that of Mrs. H. . . is granted by the Sydney Benevolent Asylum. Mrs. J. . . has a friend who has allowed her 2s. a week for some years, and her married daughter, who is very poor, helps her occasionally. She is a helpless cripple, and moves with difficulty on crutches. It is certainly not safe for her to be left alone. She admitted that if she fell in the fire she could not rescue herself. Her daughter visits her or sends someone to her daily, but in view of her condition this intermittent assistance is not sufficient. This case is quite unsuitable for ordinary outdoor relief. Mrs. J. . . should either be in an asylum, or a home where she would receive constant attention. If she is not thus dealt with she will probably be found severely burned either through smoking in bed (she uses tobacco), or falling in the fire when there is no help at hand. In reply to your Commissioner she stated that she did not reside in her married daughter's home, because there was not room there. This, however, was probably, not the true reason, as the majority of these old persons seem to prefer the independence of their own little homes, no matter how poor they may be, to living with relatives, and it is, doubtless, this sentiment that causes them to decline admission into an asylum.

Mrs. M. . . , aged 52, resides with her married daughter (who is delicate), at Park Road, Marrickville. Although not of very advanced age, Mrs. M. . . , who was not at home when your Commissioner called, is said to be delicate, and suffers from ophthalmia. She receives relief from the Sydney Benevolent Asylum equal to that granted in the previous case. She has eight children (the youngest is aged 15), but it is alleged that they are unable to help her. Two reside in the same home with her, but their earnings are stated to be hardly sufficient to keep themselves. The rent of the house is 7s. a week. It contains four rooms, is very damp, and is, consequently, undesirable as a residence for two delicate women. Her son-in-law, with whom she lives, is receiving small wages as a porter at a Boys' College. There are not any features in this case requiring special comment, beyond the fact that if the present relief ceased the recipient would, doubtless, be provided for by her children in her present home without cost to the public. She has now been on the Society's books continuously for eighteen months, but was in receipt of out-door relief on a previous occasion. Although she is stated to be weakly, Mrs. M. . . is able to walk a long distance to and from the train every week in order to procure the Society's ration. If her children are unable to keep her, and her condition is as stated, she would be better provided for in an asylum, as the food she receives is not suitable for a delicate woman. Her daughter, who has not any children to maintain, receives from her mother the Society's rent allowance.

SOME RESPECTABLE AGED COUPLES.

A case which is worthy of most generous assistance is that of Mr. and Mrs. G. . . , who rent a house in Irving-street, Chippendale. The husband, who is 72 years of age, has resided in the Colony since 1835, and his wife aged 76 has been a colonist for fifty-seven years. Mr. G. . . , who is a member of the New South Wales Pharmaceutical Society, was, at different times, dispenser at Gladesville Asylum, assistant-surgeon and dispenser on immigrant ships, manager of a leading druggist business in Sydney, and assistant to the late Dr. . . . He and his wife are a very intelligent couple. They have three daughters whose husbands are too poor to help them. Mr. G. . . is very feeble, being crippled by a broken hip, and he is also partially paralysed; his wife is more robust, and is still able to perform the domestic duties of her little home. The rent is 9s. a week. Two rooms are let for 7s. a week, one being occupied by an out-pensioner of the Sydney Benevolent Society. Mr. and Mrs. G. . . receive from the Society 3s. rent allowance, which with their lodgers payments, and their allowance of 1s. 6d. a week from their church, leaves them 2s. 6d. over their own rent, with which to procure clothing and pay 6d. a week towards a burial insurance fund. The Society's provision allowance is 1 lb. sugar, $\frac{1}{2}$ lb. tea, 3 loaves bread, 3 lb. flour, and 1 lb. oatmeal. The value of this ration is about 1s. 5d. The food is not suitable for this aged couple, who both require much more generous diet. They are also able to procure firing for cooking purposes only. The wife stated she had just passed through ten days illness, during which she had required other nourishment but had not been able to obtain it. Mr. G. . . badly needed a crutch and a pair of spectacles. Arrangements have been made for these to be supplied. Blankets and clothing are both much needed by husband and wife. The old gentleman seemed very grateful for the help he is receiving. He chatted freely about his antecedents, and is proud of his connection with a bible class, from which he had obtained two interesting books as annual prizes for regular attendance; and also of several family relics. These latter included portraits of his father and grandfather, both bearing a strong resemblance to himself, which although modelled in wax sixty-five years ago are in a perfect state of preservation; and a photograph of a monument erected to his father as a tribute of respect from his fellow-townsmen in his native city in Scotland. Mr. G. . . likes his newspaper, but cannot afford to buy it. His only luxury is tobacco, and it is also very difficult to procure this from his limited means. Representations are being made for the purpose of removing this case from the Society's books, in order that it might be more liberally provided for. Although no complaint was made by the old couple it was obvious to your Commissioner that they were not being provided with food requisite for their physical condition; and that they needed milk, and additional tea, sugar, and warm clothing, and other necessaries which they cannot at present procure.

Mr. M. . . a feeble man, aged 73 years, and his wife aged 52 years, but looking much older, reside with their daughter, aged 9, at Brown-street, St. Peters. The house contains two small rooms and kitchen, and the rent is 5s. a week. The relief granted by the Sydney Benevolent Society consists of 2s. towards the rent, 5 loaves of bread, 3 lb. meat, 2 lb. flour, 1 lb. sugar, $\frac{1}{2}$ lb. tea, and also 1 lb. of oatmeal for the use of the old man, who is recovering from influenza. The St. Peter's Benevolent Society also grants a ticket on which provisions to the value of 2s. 6d. a week can be obtained. The Sydney Benevolent Asylum supplies the family with two pairs of boots a year, and a year ago the local society had given a pair of blankets. This couple are better off than many others, as they make jam, of which they sell about 6 dozen bottles a week, the profit being 1 $\frac{1}{2}$ d. a bottle. The total value of food allowance to this home is 4s. 5d. a week, or 2 $\frac{1}{2}$ d. a day for each person. The money income is 11s. a week; there is, therefore, after paying rent, 6s. a week with which to provide extra food and clothing. Mr. M. . . stated that each society was aware the other was helping him. Thus, although the whole assistance that they receive is barely sufficient, this family is in an unduly favourable position as compared with others who have only the Sydney Benevolent Society to rely upon, and no income from earnings. The local society should be left to deal with this and similar cases, and the Sydney society's benefactions distributed among more needy pensioners.

Mr. and Mrs. F. . . , each aged 78 years, reside in O'Connor-street, Chippendale. The man is a feeble cripple, and the woman is decrepit. They occupy a dirty apartment, which serves the purpose of bedroom, sitting-room, dining-room, and kitchen, for which they pay a poor widow, who had also been one of the Sydney Benevolent Asylum's out-pensioners, 4s. a week. This old couple have been fifty-seven years in the Colony, and have not any children. They bear an excellent character. The man, who has been a master-baker, broke his hip twenty years ago, since when he has been

very

very helpless. He failed at business, and his injury at nearly 60 years of age, prevented him from obtaining work as journeyman. They receive the following relief from the Society: 2s. a week towards rent, 3 loaves of bread, 3 lb. of flour, 1 lb. sugar, $\frac{1}{2}$ lb. tea, 3 lb. meat, 1 lb. oatmeal. A lady allows them 2s. a week to enable them to "make up the rent," and also assists them with clothing. Occasionally, friends give them a shilling or two. Their bedding is very poor, the sole covering being a thin double blanket. They also suffer for want of sufficient firing. These old people did not complain, but when questioned said they frequently had not sufficient food. They had applied for a cottage home at one of the Government asylums, when there was not one vacant, but did not now wish to go into an asylum. This case is one of great hardship. The relief afforded to it is inadequate in every respect. If one of the cottage homes is empty at Parramatta, where the inmates are provided with all necessary comforts, and enjoy the privilege of free citizens, the Society should, by stopping its relief, compel this old couple to avail themselves of it. They are now living amongst most unwholesome surroundings, and are literally partially starved for want of sufficient food and warmth.

Mr. and Mrs. W. . . . , a comparatively hearty old couple, each aged 60 years, occupy a neatly-kept room, for which they pay 3s. 6d. a week, in a very clean home at Newtown. They receive from the Sydney Benevolent Asylum 2s. 6d. a week towards the rent, 3 loaves of bread, 2 lb. meat, 1 lb. sugar, 1 lb. flour, 1 lb. rice, $\frac{1}{2}$ lb. tea. The husband suffers from rheumatism, and cannot work. The old lady, who is a pattern of neatness, occasionally earns a couple of shillings by washing. They have been thirty-six years in the Colony, and have three married children with families, who cannot help them much, two being out of work. This old couple were badly in need of boots, and they also required a pair of blankets. The old dame had not had a pair of boots for five years. She had managed with one pair by repeated patching. The husband exhibited a badge which showed he had been the best shot in his regiment in Ireland, in which he had been a sergeant-major for sixteen years. He stated he had bought himself out in order to come to this Colony. This couple require additional assistance. They are very respectable, and the case is properly one for a cottage home, or sufficient relief outside to provide them with comforts which are necessary in old age. As in all the other cases visited, they spoke of the kindness and courtesy with which they were treated by the Benevolent Society's officials.

Mr. C. . . . , aged 69, and his wife, aged 72 years, reside at Surry Hills. The man has been laid up for nine weeks with sciatica, and his wife suffers from chronic rheumatism. He is a blacksmith, and, notwithstanding his age, is able to earn a little occasionally, but during the last seven months he has only earned 6s. This couple pay 5s. a week for two rooms. They have three married children with families, who help them occasionally, but a statement of their means showed them to be all very poor, one having been out of work for some time. The Benevolent Society allows 1s. a week towards the rent, two loaves of bread, 4 lb. flour (or 2 lb. of meat), 1 lb. sugar, $\frac{1}{2}$ lb. tea, 1 lb. rice. On the day of your Commissioner's interview with Mrs. C. . . . at her married daughter's home, she had come out to borrow 2s. to make up her rent. She said the Benevolent Society's officers were very kind to her when she went to the Asylum for its help, but walking there and home again distressed her greatly, as she was not very strong. At the beginning of last summer she had managed to earn 15s., but had been unable to do any work since. Although this old couple are in a better position than others, because of the help obtained from their children, they are living under miserable conditions. The food is not suitable nor sufficient, and they have not enough clothing.

A WIDOW'S HOME IN ATHLONE PLACE.

Mrs. O. . . . , a strong young woman with two children, aged 6 and 3 years, resides in a room for which she pays 2s. a week, at Athlone-place, off George-street West. She receives 1s. 6d. a week rent allowance from the Sydney Benevolent Asylum, also four loaves of bread, 2 lb. flour, 2 lb. meat, 1 lb. sugar, $\frac{1}{2}$ lb. tea. She earns about 4s. a week by washing; has been a recipient of help from the Asylum for two years and a half. Your Commissioner visited this home on Saturday. The Benevolent Society's ration, which usually lasts half a week, was then exhausted, and Mrs. O. . . . had 1s. 6d. with which to provide food for her family until the following Wednesday. Boots and clothing were required by mother and children, and additional bed-clothing was also needed. The children were said to be strong and healthy. This family is living in extreme poverty, and, there can be no doubt, often feels the want of sufficient food.

1898.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

PUBLIC CHARITIES.

(REPLY TO THE REPORT AND RECOMMENDATIONS OF THE ROYAL COMMISSION ON.)

Printed under No. 18 Report from Printing Committee, 22 December, 1898.

A Reply from the Board of Management of the New South Wales Institution for the Deaf and Dumb and the Blind, Newtown-road, to the Report and Recommendations of the Royal Commission on Public Charities respecting the above-named Institution.

1. The Directors of the New South Wales Institution for the Deaf and Dumb and Blind, having been favoured with copies of the Report of the Royal Commission "appointed to make a diligent and full inquiry into and report upon the methods of carrying on the Government Charitable Institutions," are glad to find that, taken as a whole, the Report is favourable to the Institution. But they regret to state that, in their opinion, certain portions of the Report made by the Royal Commissioners, as well as some of the recommendations it contains, exhibit want of knowledge of the peculiar character of the work of the Institution and its objects. This, to some extent, might have been anticipated, from the fact that the Royal Commissioners have had no opportunity of gaining personal experience of such Institutions. It is, therefore, greatly to be regretted that they have not obtained the results of the experience of the Directors themselves, some of whom have been connected with the management of the Institution since its foundation, and were therefore qualified in the highest degree, by experience of this and cognate Institutions in other parts of the world, to give the Commissioners assistance of an expert nature, which, it must be clear, in such an inquiry, was eminently necessary.

2. Errors have consequently occurred in the conclusions arrived at by the Royal Commissioners in some important matters, and recommendations have been made which the Directors are satisfied would never have been imported into the Report if the Commissioners had acquired information from those who have had long experience in the working and management of the Institution. While the Directors cordially accept those portions of the Report which specially refer to the general management and mode of instruction and other details, conclusions authenticated by the independent and expert reports of examiners appointed by the Public Instruction Department, they regret that the financial recommendations and those having reference to expenditure in connection with the erection of the buildings connected with the Institution prove that the inquiry was imperfect in character; hence the conclusions adopted are materially affected, as will be shown hereafter by an examination of the financial statistics of the Institution, and of the very full report made by the architects. Further, some of the subjects incidentally referred to, in connection with the Reports of the British Royal Commission, are yet undecided; and future experience alone can determine whether they are based on sound foundations.

Audit of Accounts, &c.

3. In considering the recommendations made by the Commissioners (page 32, section 184), it will be found that, in the first place, it is advised—"That a responsible officer of the Government shall have power (1) to audit the accounts at any time; (2) to ascertain if the funds are expended for proper purposes, and with due regard to economy; (3) to see that the rules and by-laws are carried out in their integrity; (4) to report generally on the management of the Institution, with a view of bringing under the notice of the Government and the Committee any defects that may, in his opinion, exist in connection therewith."

4. Now, in this connection it may be stated that no objection has ever been offered by the Directors to the supervision herein referred to, although the amount contributed by the Government, compared to that derived from other sources, is very small. With reference to the remarks of the Royal Commissioners (page 2, clause 9) in regard to Institutions generally, that the absence of Government supervision "has probably not only resulted in serious defects of management, which might have been prevented by the supervision of an independent responsible official, but also to large, and in some instances unnecessary, demands upon the Public Treasury"; the Directors consider that these remarks do not apply to this Institution, as no "large or unnecessary demands" have ever been made upon the Public Treasury by this Institution. Up to the present time the Government has only contributed £5,000 towards the erection of the buildings, and given a maximum annual subsidy of £450. These amounts cannot be considered large or unnecessary for the work this Institution has performed.

5. As regards the power to audit the accounts at any time, it may be stated that the books of the Institution have been examined periodically by a Government official in connection with the claim for the annual subsidy already referred to, and special returns, as well as copies of the Annual Report, are furnished every year to several of the Government Departments. Further, two auditors appointed by the Board audit the accounts of the Institution annually, and the result of their examination is printed and published in the Annual Report presented to the subscribers and published in the daily Press after the annual meeting.

6. With regard to the further suggested examination in connection with this official supervision, it may be stated that the Directors have no desire in any way to prevent the closest scrutiny of their management of the Institution or the application of its funds. The Directors perform their duty without fee or reward and devote a large amount of time and money in order to carry out satisfactorily the work of the Institution, and they consider themselves only trustees for the public in their philanthropic work.

Receipts for Subscriptions.

7. The second recommendation suggests—"That receipts be given for all subscriptions, and that the auditor should include in his audit a thorough check of the receipt-book butts."

8. This recommendation must have been made unadvisedly, and without knowledge of the facts of the case. Receipts, without any exception, are given for all subscriptions, and the butts of the receipt-books are systematically checked by the Hon. Treasurer, so that it will thus be perceived that this recommendation has really been carried into effect for many years back.

Canvass for Subscriptions.

9. Another recommendation is—"That a more extended energetic canvass for public subscriptions be made, particularly in the country districts of the Colony."

10. This recommendation is evidently made in view of remarks in the general report as to the desirableness of the Society dispensing with the aid at present annually derived from the Government, and also in view of the reduction in amount of the annual subscriptions within the last few years. The Directors would gladly dispense with the Government aid, were it in their power to do so, but, although the Institution has a large amount of accumulated funds, the interest only of this amount of money can be used, and the rate of interest now ruling has fallen so low that the sum received from this source is barely equal to one-fourth of the cost of maintenance. As the Commissioners themselves point out (page 9), the income for the year ended on 30th September, 1897, was £4,134 12s. 11d., while the expenditure during the same period amounted to £4,238 9s. 1d., leaving a deficiency on the year's operations of £103 16s. 2d.

11. It cannot be argued that there has been any extravagance in the management, for the Commissioners themselves are satisfied, from the comparison they have made with the expenditure in similar Institutions elsewhere, that the management has been conducted on a sound economical basis, and yet it will be observed that there was a deficit in this case. The rate of interest, also, now being received for a very large proportion of the accumulated funds is only three (3) per cent; it will therefore be seen that the condition of the Institution's finances necessarily demands the very small subsidy annually voted by Parliament.

12. Referring to the matter of the diminished amount derived from subscriptions, this result may be attributed, in large measure, to the altered circumstances of the country. Since the Bank and Building Society failures and the collapse of the land boom, a few years ago, many who subscribed for years to the Institution have been compelled either to discontinue their contributions or to reduce them. The imposition of the Land and Income Taxes, which fall almost entirely on those who have been the chief supporters of Charitable Institutions, has accentuated this result, and these causes have also checked the accession of new subscribers. It is to be remembered that the number of Charitable Institutions maintained more or less by private subscriptions has greatly increased of late years, and the demands on the private charity of those who are the chief supporters of this and kindred Institutions have also been very numerous.

13. Other Institutions have suffered even more from decrease in subscriptions. The subscriptions of this Institution fell from £1,613 in 1891 to £1,068 in 1897, being a decrease of £544, or 33·75 per cent. in six years. The subscriptions of the Industrial Blind Institution fell from £1,226 in 1893 to £672 in 1897, the decrease being £554, or 45·18 per cent. If this Institution's subscriptions has decreased in the same proportion, the reduction would have been £728 instead of £544.

14. Whilst urging these circumstances, the Directors are prepared to admit that there are certain centres of population in the Colony which have not been canvassed for subscriptions. Up to the present time the Assistant Secretary has performed the work of collection in addition to the office work, and double duty (of a most responsible character, as the Directors are fully aware) has been thus carried on purely as a matter of economy; but it is the intention of the Board to make other arrangements in connection with this matter.

Collection of Fees.

15. Another recommendation is—"That measures be taken to collect all arrears now recoverable, and that, in future, payments in advance should, as far as possible, be insisted on as provided in the Committee's form of security; and that any special arrangements for reduced payments which it may be necessary to make with parents or guardians who may not be in a position to pay the prescribed fees be strictly enforced, and any payments so arranged for be made in advance."

16. This matter is also referred to on page 15, clauses 75-77, and it deals with a subject regarding which the Commissioners have formed an opinion with an imperfect knowledge of the case. As a matter of practical experience, in dealing with the fees payable for children on admission, the Directors have found it absolutely necessary to deal with each case on its own merits, and if an unvarying rule were adopted it would lead not only to hardship in connection with parents of afflicted children, but also, in all probability, to the exclusion of many of the pupils. The Directors take all possible pains to carry out the provisions of their form of security, and moneys owing for maintenance and instruction of pupils are never finally written off until every effort short of legal proceedings has been made to recover the amount. In cases where there is reason to believe that the parents, although at the present time unable to pay, may ultimately be in a position to do so, the amounts owing have been carried forward and kept in suspense. The Directors are confident, from their experience, that if they were to insist on payment in advance

advance many of the children would be deprived of the advantages of the Institution; and that if legal enforcement were adopted in all cases of debt, the result would undoubtedly be to alienate from the Institution not only the parents of children, but also the sympathy and support of the subscribers. If complete evidence had been taken on this subject, it would have been found that every effort of a reasonable nature had been made by the Directors to obtain from parents and guardians the sums required for the maintenance of the children.

Government Pupils.

17. With regard to the recommendation "that Government payments for the maintenance of inmates of the Institution be confined in future to children under the control of the State Children's Relief Board," the Directors desire to point out that the small subsidy annually voted by Parliament to the Institution is to a large extent utilised for the purpose of maintaining the children of poor parents unable to pay anything but a small fee; and if any limitation is made in connection with the payment for inmates recommended for admission by the Government officials, it will be necessary to increase the annual subsidy voted by Parliament.

Additional Accommodation.

18. Recommendation No. 7, page 33. The Royal Commissioners have seen fit to advise that "in order to secure the additional accommodation at the Institution for the Deaf and Dumb and the Blind, which the Committee state is required, the Roman Catholic children now there should be transferred to the Roman Catholic Institutions at Lewisham and Waratah, if satisfactory arrangements can be made for such transfer; and that, in future, all deaf and dumb and blind children of that Church, who may be at any time under the control of the State Children's Relief Board, should be maintained in the Institutions established for that purpose at Lewisham and Waratah."

19. The Directors of this Institution would respectfully point out the inconsistency of the Commissioners in making this recommendation. In their first recommendation they advise "That, as long as State aid is continued, a responsible officer of the Government shall have power (1) to audit the accounts at any time; (2) to ascertain if the funds are expended for proper purposes, and with due regard to economy, etc." Surely the Commissioners to be consistent, should have made a similar recommendation in connection with the Institutions now referred to; but the Commissioners must be aware that such conditions would not be permitted for a moment in connection with the Institutions referred to, and it is incomprehensible to us, as Directors and persons having some experience of public life, how the Commissioners, under these circumstances, could have made such recommendations as those contained in the above clause. But further, the Lewisham Institution for the Blind, we are informed on good authority, does not admit or retain boys over 8 years of age. For example, it is within the knowledge of the Directors that a blind boy was recently sent back to Tasmania from the Lewisham Institution in consequence of his being over the prescribed age, and the documents in connection with this matter are in the possession of the Directors. The presence of the children belonging to the Roman Catholic faith in this Institution is sufficient evidence that their parents prefer to send them to this Institution, and it would be unreasonable to interfere with their desire in this respect.

Roman Catholic Pupils.

20. The following is a list of the Roman Catholic Pupils in this Institution on the 30th September, 1898, with their ages, etc.:-

Names.	Age.	Amount of School Fees.	Amount Owng.
		£ s. d.	£ s. d.
DEAF PUPILS—			
Aubrey W. Guilfoyle	17	10 0 0	
Clotilda Planchenault	16	36 0 0	Government Pupil.
Alice J. Ware	19	36 0 0	Government Pupil.
Reginald Brennan	16½	Free.	0 2 0
Aila E. Causley	13	10 0 0	
Essie A. Causley	8½	5 0 0	
Ethel A. Carroll	11½	20 0 0	0 8 0
Charles A. D. Smith	10½	10 0 0	19 14 0
Christina Vanzuela	13½	13 0 0	11 2 6
Alice Backhouse	8½	5 0 0	12 10 8
Ethel M. Hogan	11½	5 0 0	1 14 6
Milton C. O'Sullivan	9	6 10 0	
BLIND PUPILS—			
Teresa Rogers	18½	6 0 0	10 8 6
Matilda Holland	15	36 0 0	Government Pupil.
John McDermott	13	36 0 0	Government Pupil.
Mary Reynolds	15	36 0 0	Government Pupil.

21. It will be seen from the above that only five of the Roman Catholic pupils in this Institution are under the control of the State. The education of three of these is nearly completed, while another, John McDermott, is not eligible for admission into the Lewisham Institution, as he is 13 years of age. Some of the other pupils have almost completed their education, too, and as they were placed here by their parents, they could not be removed without their parents' consent.

School Inspection.

22. In connection with this matter there is one point which the Directors desire to specially emphasise, and which may be considered by the Government and the public as of very great importance, viz, the testing of the educational acquirements of the pupils by Government officials. This is done annually at the New South Wales Institution for the Deaf and Dumb and the Blind, and the Government in this way has a guarantee that the money paid for school fees for State children, or as subsidy, is judiciously expended.

23. As stated elsewhere, the small annual Parliamentary subsidy to some extent warrants the claim for the public inspection of the scholastic department of the Institution, and the Directors are glad to find that the results in this respect are eminently satisfactory.

24. The following is the summary of the report on the examination of the pupils by Messrs. H. Skillman and H. D. McLelland, Inspectors of the Department of Public Instruction:—"This Institution was visited for examination of the pupils on the 6th and 7th December, 1897. The favourable comments made on former occasions respecting the class-rooms and their appliances still hold good, and the general impression conveyed by a visit to various parts of the building is that both care and skill have been shown in the arrangements made for carrying on the work of this important Institution. Of the attitude of the children under examination it is impossible to speak too highly. Their attention never flags. In every class, no matter what subject is being dealt with, they are constantly on the alert, and take genuine pleasure in trying to acquit themselves well. Their demeanour is always cheerful, and the interest they take in every portion of their work reflects the highest credit on the teaching staff. The general discipline is practically perfect. When one considers the affliction from which these children suffer, it must be conceded that the scheme of instruction covers a sufficiently wide range. The results of the examination of the various classes indicate careful and thorough teaching, and there is abundant proof that the general aim of the teachers is to develop the intelligence and train the thinking powers of their pupils. Their efforts have been attended with well-merited success.

(Signed) "H. SKILLMAN,
"H. D. McLELLAND, } Inspectors."

The full text of this and previous reports may be seen in the various annual reports of the Institution.

Age of Discharge.

25. The recommendation No. 8—"That the age at which pupils should be discharged from Institutions in receipt of aid from the Government for the education of the Deaf and Dumb and the Blind should not exceed 16 years"—exhibits still further proof of want of that knowledge which experience alone can provide in connection with this subject. From the large extent of the Colony of New South Wales, and its sparse and scattered population—from the fact that, in many cases, parents are most unwilling to part with their children, and retain them long after the period at which they should be brought under the educative influences of such an Institution as that for the Deaf and Dumb and the Blind, and from other difficulties of a similar nature well known to and recognised by the Directors, it is found to be almost impossible to fix the date of discharge of the children by any invariable rule. As a matter of fact, however, the Directors endeavour to persuade parents to send their afflicted children to school at or about 7 years of age, and as these children require eight or nine years of tuition and training, in the majority of cases they are discharged about the age of 15 or 16; but where children are brought to the Institution at a more advanced age, and imperatively demand the assistance which the Institution provides, then the Directors, with the advice of the Superintendent, carefully consider the peculiarities of such cases, and, if necessary, extend the period of tuition to a slightly more advanced age.

26. The great object of the Directors is to afford the best possible educational influences to these children while in the Institution, so as to add to the happiness and comfort of their future life. Should, however, the Legislature, in its wisdom, at any future time pass a compulsory law, providing that parents should send their afflicted children to school at 7 years of age, there would be no difficulty in adopting this recommendation; but, until such step is taken, the Directors believe it is in the interest of the children and of the Institution to deal with each case on its own merits and according to its necessities. A reference to the Thirty-sixth Annual Report of this Institution will show that 20 per cent. of the deaf pupils and 30 per cent. of the blind were over 10 years of age when admitted.

27. In order to prove that the Institution does not retain the children longer than is absolutely necessary to give them a fair education, the following table has been prepared containing the names, ages, and time at school of all the pupils paid for by the Government on 30th September, 1898.

28. It will be observed that some of the older pupils have not been at school very long; for instance, Mary Reynolds, 15 years old, one and a quarter years at school, and Kate Ford, 14½ years old, three years at school. In the case of the eldest on the list, viz., Alice Ware, it should be mentioned that, although she is 19 years old, she has only had six and a half years' tuition, which everyone who knows anything about education will admit is anything but excessive for a deaf and dumb child.

29. The difficulty, as already pointed out, is to get the children in at an early age, say 7. If that could be done, then they would be ready to leave when about 16.

Government Pupils.

30. List of Pupils paid for by the New South Wales Government in the New South Wales Institution for the Deaf and Dumb and the Blind on 30th September, 1898:—

Names.	Age.	Time at school.	Names.	Age.	Time at School.
DEAF AND DUMB—			DEAF AND DUMB—continued.		
Boyd, James	15	5½ years.	Muelie, Nellie	9	1 year.
Fairhall, Charles	12½	4½ "	Planchenault, Clothilda	16	7 years.
Fairhall, Arthur	10½	3½ "	Smith, Edith M.	8½	2½ "
Hammond, Percy	11	3½ "	Ware, Alice J.	19	6½ "
Harris, John	7½	1½ "			
Lovett, James Henry	14	8 "	BLIND—		
Perry, George A.	13	4½ "	Bartley, Arthur	8	1 year.
Perry, Ernest Job	9	1½ "	McKay, Alfred T.	13	5 years.
Philp, Albert E.	14	2½ "	McDermott, John	13	4½ "
Riddell, Inness C.	13½	4½ "	Taylor, James	15½	8½ "
Riddell, Richard F.	13½	1½ "	Young, Arthur J.	11½	2½ "
Adams, Lily May	11½	1½ "	Ford, Kate	14½	3 "
Davison, Ellen R.	12½	5½ "	Holland, Matilda	15	8½ "
Hepperlin, Annie E.	16	9 "	Reynolds, Mary	15	1½ "

Total, 26 pupils; average time at school, about 4½ years.

Indigent Deaf and Dumb and Blind from other Colonies.

31. As regards Recommendation No. 9—"That there should be legislation for the purpose of controlling the admission of indigent deaf and dumb and blind persons from other Colonies into New South Wales"—the Directors, as far as this Institution is concerned, have no desire to express any definite opinion; they would point out, however, that for many years, in the absence of similar Institutions in the other Colonies, they have been in the habit of receiving deaf and dumb and blind children from other Colonies on the recommendation of the various Governments, and the question of the exclusion of adults is one which scarcely comes within the purview of the Directors of this Institution. Perhaps this recommendation might have been more appropriately included with those having reference to the Industrial Blind Institutions, for this Institution is purely a boarding school for children.

Investment of Funds.

32. Recommendation No. 10—"That in view of the risk attendant upon lending money on mortgage of freehold property, the Directors in future invest their accumulated funds in Government securities." The Directors are quite prepared to acknowledge the value of this suggestion; but they desire to point out that at the present time the sum of £3,535 only is invested on mortgage of freehold property. The Directors, however, who are business men of considerable experience, may be trusted to exercise the fullest discretion in regard to the investment of the funds of the Institution.

Finance.

33. Referring now generally to the question of finance, as discussed in the Report and recommendations of the Royal Commissioners, which may be considered as summarised on page 8, clause 45, viz.: "The Institution is in a much stronger position financially than any other kindred Institution in Australia. So satisfactory is the condition of its finances, that the Committee might well now consider whether they should not set an example worthy of being followed in other directions, and forego all further claims to State aid, except for services rendered."

34. In reply to this suggestion, the Directors have no hesitation in stating that if the Government would undertake to pay for the maintenance of all the pupils whose parents are unable to pay the full amount of £40 per annum (receiving credit, of course, for any payments made by the parents), the Directors would willingly forego all further claims to State aid in the form of subsidy. But as it is improbable that such a course is ever likely to be adopted, the Directors are unable to adopt the above suggestion. Even with the Government subsidy considerable difficulty is experienced in keeping the Institution in a sound financial condition, and it may be easily understood that, as the scope of its operations becomes extended, and the number of pupils increases, the expenditure must *pro rata* be also increased, and the liabilities referred to be continued. During the four years ended on the 30th September, 1898, the expenditure exceeded the income on general fund account by £108 5s. 8d.

35. The subscriptions to this Institution during the past seventeen years totalled £26,905, while the annual Government subsidy for the same period only amounted to £7,650, or about 28 per cent. The Industrial Blind Institution in six years (1892-7) received £4,852 in subscriptions and £5,746 in Government subsidy, or 118.42 per cent. The attention of the Government is specially invited to this fact, that an Institution which has hitherto endeavoured to carry on its important work with so little aid from the Government may receive that consideration at the present time which it both needs and deserves.

36. At the present time the accumulated funds, of which the interest alone can be used, amount to £37,617 10s. 6d. Nearly the whole of this amount is invested at 3 per cent., bringing in an annual income of about £1,150, which is only a little more than one-fourth of the present annual expenditure. Subscriptions provide about another fourth, and the balance is made up of school fees, Government subsidy, etc. To relinquish State aid under these circumstances, and before it is known whether sufficient funds can be obtained from other sources, would be very unwise, and would probably land the Institution in debt, a position which the Directors have always strenuously endeavoured to avoid.

37. It should not be forgotten that this Institution relieves the Government of a very great responsibility, viz., that of educating and training those children who are afflicted with deafness or blindness. *It is as much, and more, the duty of the State to provide education for those who are so sadly afflicted as for those who have all their faculties.* These children cannot well be educated in ordinary schools, therefore it is necessary that an Institution such as this should be maintained and properly equipped for carrying out in a satisfactory manner this most important work. And the reports on the work of the Institution, which have been issued from year to year by the Department of Public Instruction, prove conclusively that the Institution is doing that, and it is therefore fairly entitled, not only to that amount of support which it has received from the State in the past, but also to further assistance towards providing the additional accommodation now required.

Funds for New Buildings.

38. The recommendation of the Commissioners (No. 3, page 32)—"That the request of the Committee for a grant of £6,000 for building purposes be declined, the Committee having ample funds for necessary buildings"—must be taken in connection with the conclusions on which they have based that recommendation. Those conclusions are contained in paragraphs 62 to 66, pages 12 to 13, of the Commissioners' Report. In the first place, exception is taken to the estimate of the probable increase in the number of new pupils being based upon the figures of the past four years, when the number of pupils increased from 76 to 114, or exactly 50 per cent.

39. The Commissioners state that these "figures, to be of value, however, and to make the comparison fair, ought to have extended over a longer period." The Directors maintain, however, that the comparison between the figures of 1893 and 1897 was perfectly fair. It would not be fair to go back beyond 1893, because before that year we had all the Queensland pupils, who left in a body at the end of 1892 to enter the Brisbane Institution. The increase since then of 50 per cent. in the number of our pupils was the natural normal increase in our own Colony, and the Directors are perfectly justified in coming to the conclusion that the increase during the next four years will be in the same proportion.

Transfer

Transfer of Legacies.

40. The Commissioners also take exception to the transfer of legacies amounting to £2,265 from the Building Fund to the Perpetual Subscribers' Fund, and say that, if that transfer had not been made, "the Building Fund would have been in a position to provide a new kitchen and laundry, which are undoubtedly required." That transfer was made before there was any intention of increasing the accommodation, or of approaching the Government for assistance towards that object. It was made because the Directors considered that it was never intended by the legators that the principal should be expended, but that only the income should be used. It was an error in the first instance to place the money to the Building Fund Account. Had it been credited direct to the Perpetual Subscribers' Fund the Commissioners would probably never have referred to the matter.

41. Many years ago the Directors passed a resolution that all legacies of £50 and upwards should be placed to the Perpetual Subscribers' Fund. From time to time this resolution was carried into effect, as on the occasion referred to by the Commissioners; but, as a matter of fact, in consequence either of the urgency of the case or for other important reasons, some legacies, unfettered by conditions in the wills of the legators, have been expended on buildings, in order to save unnecessary delay, and to prevent what the Directors always enter upon with great reluctance, an appeal to the Government for assistance for building purposes.

42. There can be no doubt that if the Government had provided the funds for the buildings and improvements to which such unfettered legacies have been appropriated, *the Directors would at the present time be in a position to do without State aid in the form of subsidy.*

Alleged Excessive Expenditure on Buildings.

43. In their Report (page 10, clause 54) the Commissioners practically charge the Directors of the Institution with extravagance in expenditure on buildings; but if they had carefully considered the details of the expenditure as shown in the following statement, and all the surrounding circumstances, which are fully explained in the Report from Messrs. A. L. and G. McCredie, the architects of the Institution, hereto appended, they would probably have arrived at a different conclusion. The total amount set down for buildings and improvements is £47,753 18s. 5d., being the total expenditure in that direction from the commencement of building operations. It includes the cost of building the Superintendent's residence, boundary walls and iron palisadings, laundry, cowshed, gymnasium, etc., making and tar-paving the roadways inside the grounds, tar-paving the footpaths, and constructing a sewer outside the Institution boundaries, turfing the lawns, planting trees and erecting fences, also heavy charges for alterations, painting, and repairs during the last twenty years, which might fairly have been carried to the maintenance account. Take one item alone, that of the wall on the Darlington-road frontage; owing to the conformation of the ground, and the necessity for keeping the sanitary buildings on a level with the other buildings of the Institution, this work was of a very expensive character, and cost no less than £5,417.

44. It is a matter for deep regret that when the Royal Commissioners held their inquiry into the working and cost of the buildings, etc., of this Institution, compared with the Institution for the Blind at Lewisham, that more attention was not directed to the details of cost, etc. It should not be forgotten that competitive designs and estimates for our building were submitted by the leading architects of the city; also, that many items in the accepted plans were omitted, through the slenderness of the funds available. Still, the site being a prominent one, it was felt that some attention should be given to appearance, as well as to utility; for effect, the architect recommended the use of patent pressed bricks, which cost much more than the ordinary bricks, and it was hoped to avoid the heavy expense of cementing the walls externally. To avoid damp, the walls were built hollow, a plan which at that time was largely in vogue, but the exposed position proved that hollow walls were not damp-proof, and subsequently the whole of the walls had to be cemented on the outside at great cost. It was also decided to leave the internal walls plain brick, lime-washed, except a small portion, but in after years, as their porosity threatened to absorb infection, the Directors determined to have nearly the whole of them plastered with adamant plaster. This work cost over £700. At the various periods, some years apart, when alterations and additions became necessary, opportunity was always seized to modernise such portions as could be dealt with, and to make good all wear and tear, etc. These expenses were always included in the tenders and contracts, and, of course, became a charge on the Building Fund Account, when, more correctly, they should perhaps have gone to a maintenance account. The amounts thus expended came to a considerable sum, but it is difficult now to pick them out of the account.

45. Another item improperly charged against the building account proper was the cost of erecting a superintendent's residence. This should be deducted from the Institution Building Account. When all these items are taken from the total amount spent on buildings, it will be found that, taking into account the prices of material and labour when the largest portion of this building was put up and the cost of the same at this period, that very little, if any, complaint of extravagance in building will hold good. The number of beds given as the accommodation available in the Institution is really misleading, as no account is taken of beds occupied by the staff, which it is considered should be counted when the estimates are made as per bed; nor is consideration given to large apartments which, if counted as dormitories, would entirely alter the estimates.

46. The bed and sitting room accommodation provided for officers and servants when the building was first erected was subsequently found to be quite inadequate. Hence when the last additions were in hand this was remedied to a limited extent by the conversion of the two top-floor dormitories, which had accommodated 13 beds each, into six single bedrooms, thus losing 20 beds. It would be only just to have counted these as 26 beds.

47. These facts, which are fully set out in the Architects' Report, should all be taken into consideration when comparing the cost of this Institution with that of another quite differently situated, only in its infancy, not fully equipped, and for one class only of the afflicted, viz., the Blind.

48. It should also be remembered that, although the cost per head of the pupils of this Institution during the year ended on 30th September, 1897, was £38 10s. 7½d., the Government contribution in school fees and subsidy was only £10 12s. 4d. per head for the total number of pupils. It will thus be seen that the Institution relieves the Government of nearly three-fourths of the cost of maintaining and educating these afflicted children.

49. Another important point in connection with this matter is the fact that, in charging the Government £36 per head for State children, the Directors are charging less than the bare cost of maintenance and education. Nothing whatever is charged for interest on money invested in buildings, to the cost of which, so far, the Government, as already pointed out, has only contributed £5,000. This statement is borne out by the Commissioners in clause 53, page 10, of their Report.

Cost per Bed.

50. In paragraph 60, page 12, it is stated that "the Institution for the Deaf and Dumb and the Blind, Newtown-road, cost nearly £48,000, and as, with 113 pupils, the Directors state it is occupied to its full capacity, the expenditure for accommodation alone has amounted to over £430 per pupil."

51. Here the Commissioners do not take into consideration all the surrounding circumstances already referred to. They are also in error in stating that the Institution is occupied to its full capacity. The girls' dormitories are full, but there is accommodation in those for the boys for about 16 more beds. Altogether there is accommodation in the dormitories for 77 boys and 51 girls, and in the hospital for about 12 beds. The present number of pupils is 61 boys and 53 girls.

52. Again, the prominent position on which the Institution stands, close to the University, Colleges, and Prince Alfred Hospital, demanded a building worthy of the site. And when the difficulties encountered are taken into consideration and allowances made for expenditure outside the main buildings, as fully set forth in the Architects' Report, it will be found that the cost per bed is much less than that stated by the Royal Commission.

Expenditure on Buildings, &c.

53. The following is an epitome of Expenditure on Buildings and Improvements:—

	£	s.	d.
Buildings	28,580	14	4
Excavating, fencing, and other works	729	11	4
Laundry	292	13	0
Verandahs	1,012	16	9
Guttering, road-making, planting trees, and turfing lawn	256	14	9
Dwarf walls and iron railings	1,967	11	6
Cowsheds, gymnasium, &c.	901	15	6
Cementing buildings	593	0	0
Tar-paving roadways inside and footpaths outside	1,222	1	3
Back wall, water-closets, and outside sewer	5,417	0	0
Plumbing and sanitary works	686	19	0
Additions and alterations	266	18	6
Superintendent's residence	1,779	2	6
Painting	881	13	9
Gas lamps	106	0	0
Lightning conductors	92	0	0
Venetian and other blinds	68	11	6
Architects' commission and Clerk of Works' salary	2,898	14	0
	<hr/>		
	£47,753	18	5

54. The following shows the state of the Institution's finances on 30th September, 1898:—

	£	s.	d.
The amount placed at interest belonging to the Perpetual Subscribers and Mrs. Baillie's Legacy Fund is	37,089	10	1
The amount standing to the credit of the Building Fund Account is	401	0	10
The amount required for building purposes according to the suggestions of the Royal Commission is			
The amount required according to the suggestions of the Board is	6,000	0	0

55. The grounds upon which the Directors claim necessity not only for completing the kitchen and laundry, as recommended by the Royal Commissioners, but also for the whole work, as submitted to the Hon. the Colonial Secretary by a deputation of the Board, are that—

- (1) There is an absolute necessity for the completed buildings, as already pointed out, and that the work can be cheaply and effectively done if carried on at the present time.
- (2) It has been pointed out by practical men that, in consequence of the cheapness of materials and the low price of labour, the present is a most opportune time to carry out the said work.
- (3) The Directors, having at their disposal, for building purposes, only the sum above referred to (£401 Os. 10d.), and being unwilling to make a charge on the Institution's finances in regard to their future application to the purposes of the Institution, are of opinion that, in view of the small amount hitherto granted by the Government, and the important work done by the Institution for the public, it is only reasonable for the Government at this particular time to give the assistance necessary for the purpose of erecting the additional accommodation required for the purposes of the Institution.

Conclusion.

Conclusion.

56. It would have been in the power of the Directors to enter into a further and more extended criticism of the Report of the Royal Commissioners; but their endeavour has been to avoid the discussion of outside matters, at the present time quite undecided upon by those who have expert knowledge of Deaf and Dumb and Blind Institutions (such, for example, as the influence and results of inter-marriage of the deaf and dumb, etc.)

57. The object they have had in view has been to rectify conclusions arrived at by the Royal Commissioners, after a somewhat hasty investigation of the management of the Institution, and to show that the Directors are only asking a fair consideration of their claim to Government assistance in their earnest endeavours to give enlarged and better accommodation for the deaf and dumb and blind children.

58. The Directors would especially point to the Architects' Report as a complete rejoinder to a very unfair criticism of the expenditure on buildings connected with this Institution. And as regards the financial questions involved in the recommendations of the Royal Commission, it will be seen from the statements now made that the Directors have always adopted the best and most advantageous methods in the interest of the Institution.

Signed by resolution of the Board of Management,

ARTHUR RENWICK,
President.

Sydney, 7th December, 1898.

APPENDIX.

REPORT of Messrs. A. L. and G. McCredie, Architects, on remarks made by the Royal Commission on Charitable Institutions as to the relative costs of the New South Wales Institution for the Deaf and Dumb and the Blind, Newtown-road, and St. Patrick's Institute for the Blind, Lewisham.

Martin Place, Sydney, 30 August. 1898.

ELIAS ROBINSON, Esq., Hon. Secretary, New South Wales Institute for the Deaf and Dumb and the Blind, Newtown-road, Sydney,—

Dear Sir,

In accordance with your instructions, we have made an inspection of St. Patrick's Institute for the Blind at Lewisham, with a view of reporting on the remarks made by the Royal Commission on Charitable Institutions in its report as to the relative cost of that Institution and your own; and to see if there was anything at that Institution that could be advantageously adopted in the plans of the proposed additions to your Institution, and now have the honor to submit the following report:—

We find that St. Patrick's Institute for the Blind is in its infancy, and only a small portion of the buildings has been erected; and, in our opinion, this Institution is not sufficiently advanced to form a satisfactory basis of comparison.

We are of the opinion that the Royal Commission, in stating the relative costs of the two Institutions at so much per bed, is adopting a very unfair method, as the two Institutions are widely different in many particulars, to which we shall subsequently refer.

It seems to us that the Royal Commission has also based its cost of St. Patrick's Institute largely upon estimates which may, or may not, be correct; while the following points, which to our mind have not been taken sufficiently into consideration by the Royal Commission, will tend to equalise the cost of the two Institutions:—

1. The date of the erection of your Institution.—The buildings of St. Patrick's Institute were erected in 1896, when everything connected with the building trades was at its lowest ebb, and work was done at the lowest possible cost; while your Institution was erected twenty-seven years ago, when the cost of building materials, as well as labour, was very much dearer than during the last three years; and the same remark applies to the additions which have been made from time to time, as they have all been carried out at periods when the building trades were in a much more prosperous condition than in 1896. Another item of considerable cost which had to be provided for at your Institution was water conservation and storage, involving the construction of expensive underground tanks; while at St. Patrick's Institute they had the advantage of a complete water supply from the Water and Sewerage Board's main at a comparatively trifling cost.

2. The sites of the two Institutions do not admit of comparison, as that on which your Institution stands involved much expense in the—(a) Preparation of the ground for the buildings; (b) the design of the buildings; and (c) retaining-walls. (a) The site of your Institution was originally a mound rising from the Newtown-road, and falling precipitately towards Darlington-road at the back, thus necessitating excavations in the front portion and filling-in at the back; and as no buildings could be erected upon the filled-in portions, the foundations had to be carried up from the original ground level to the level of the front, before the buildings proper could be commenced. Thus a considerable cost was incurred for which at the present time there is nothing to show, and which does not actually accommodate a single inmate. On the other hand, the site at Lewisham involved comparatively small outlay for foundations. (b) The St. Patrick's Institute buildings, being in a practically lonely situation, with no public buildings near them, could be, and have been, erected in a plain style, without much ornament as regards design; while your Institution, occupying a commanding position and surrounded by the University buildings, Affiliated Colleges, Prince Alfred Hospital, etc., and being a semi-public building, demanded a design in keeping with its surroundings, and as time went on it was changed from a brick and stone building, in which it was first designed, to a cemented one, and ultimately took its present form when the extensive additions were made in 1891-2. (c) Retaining-walls.—The precipitate fall towards the Darlington-road involved an expensive retaining-wall, so that playgrounds of sufficient area, shelter-sheds, w.c.'s, etc., could be made level with the main buildings, and steps—always dangerous in the case of the blind—avoided as far as possible; while at Lewisham nothing of this kind is required.

3. In taking the cost of your buildings into consideration the Royal Commission has included the cost of maintenance and repairs, and, as this extends over a very long period, it amounts to a considerable item. The buildings at your Institution have been painted, both inside and out, several times, and kept in repair; the playgrounds, carriage-drives, etc., tar-painted; the drainage and sanitary arrangements have been overhauled from time to time, and brought into line with modern requirements, and many other items of expense have been met with; while St. Patrick's Institute has, so far, not had to incur any expense in this direction, nor has any allowance been made for it in the Royal Commission's statement of the cost.

4. Since your Institution was first built many improvements have been made in the methods of treating the inmates, and this has necessitated considerable additions and alterations from time to time in the buildings. The number of the inmates has increased, and more room has had to be provided for their accommodation; portions of the old building have had to be enlarged, and others, such as the old hospital, have had to be entirely removed and rebuilt, to bring the Institution up to modern requirements, and the cost of these alterations has been included in the Royal Commission's totals, without any allowance being made for the buildings removed; and this course has considerably added to the proportionate cost per inmate, and, in our opinion, very unfairly, as no deduction has been made for the old buildings; and it is always a more expensive method to adapt an existing building to modern ideas than to build a new one, when the initial cost of the existing building is added to the cost of the alterations, as has been done by the Royal Commission in the case of your Institution.

5. Even were everything else equal, which is far from being the case, your Institution, accommodating both sexes, of more advanced ages—entailing separate dormitories, playgrounds, latrines, hospital wards, etc.—would necessarily be more expensive than one which accommodates only one sex; and, added to this, there is the fact that, in addition to the blind pupils, you have also deaf and dumb scholars to provide for in extra and separate class-rooms, with entirely different methods of treatment. Thus, it is practically impossible to make a comparison in the matter of cost, at so much per bed, between your Institution and one which accommodates only blind pupils, and those practically of one sex. The separation of the pupils also entails more accommodation for officers and attendance, as a larger number is required.

6. Another very important item in the cost of your Institution is the provision made for hospitals in separate wards with fire-proof means of escape to each ward, fire-proof stairs to the large dormitory, etc., none of which are to be found in connection with St. Patrick's Institute, there being a general hospital in close proximity, and, we believe, under the same management as the Institute, to which their sick pupils can be sent.

7. A considerable expense has also been incurred in connection with laying out the grounds, etc., at your Institution; providing separate tar-paved playgrounds for both sexes, cricket-grounds, gardens, etc.; and also in the dwarf walls and iron railings in Newtown-road and Codrington-street, and the retaining-wall, shelter-sheds, w.c.'s, etc., on the Darlington-road frontage; the gymnasium and workshops for the boys, and many other conveniences provided at your Institution, which are totally wanting at Lewisham; and the Royal Commission has included the cost of all these in their cost per bed at your Institution, but has allowed nothing whatever for them in the case of St. Patrick's Institute. No doubt, were they provided for, the apparent discrepancy in the costs would be materially reduced.

8. The drainage at your Institution has also been a costly item, as at the time connections were made with the sewer the nearest point was some distance from your boundaries down Codrington-street, so that a line of pipes had to be carried along the whole length of your Darlington-road frontage and a long way down Codrington-street; and, in addition to this, the old latrines, drainage pipes, and pits had to be removed, to give place to the more sanitary arrangement of the present system. St. Patrick's Institute, if it has any connection with the sewer at all, has nothing nearly so extensive and costly as this.

9. The magnitude of your Institution, and the absence of steam laundries at the time of its erection, demanded a laundry building, while at Lewisham nothing of this nature has been provided beyond what might be found in any ordinary dwelling-house, and they also have the advantage of steam laundries under the control of similar bodies to that managing the Institute itself.

10. Your Institution is also provided with a large concert hall, which is a valuable adjunct, as it enables the annual meetings, displays, and examinations of the pupils to be held without the expense of hiring halls elsewhere, and the consequent inconvenience and risk of taking the inmates to and from the Institution on such occasions, and it also serves to bring the

subscribers and general public out to the Institution on these times, and in the meantime it is very useful as a class-room for music and drawing pupils. The basement of this wing is utilised as workshop, wet-weather playground, etc., and the top storey forms a commodious dormitory for the boys. St. Patrick's Institute has no provision for these things at all, nor, as far as we can see, has any allowance been made for them in the estimated cost of the completed buildings.

11. A residence for the Superintendent of your Institution is also included in the cost set down by the Royal Commission, and as there is no provision made for anything of the sort at Lewisham, we do not see that it should have been included in the comparison made by them. This building alone cost nearly as much as the buildings at St. Patrick's Hospital, although there is nothing extravagant about it; but at the time of its erection much higher prices were ruling in the building trades than in 1896.

12. *Area per Bed.*—A very important item in the comparison of the two Institutions is the respective spaces allowed for each bed in the dormitory accommodation, and we find, on going into this question, that in the large boys' dormitory you have an area of 3,720 square feet, with 54 beds, equal to an area of 68.88 superficial feet for each bed; and in the other four dormitories you have an area of 1,048.75 square feet in each, with 17 beds in each, equal to an area of 61.69 superficial feet for each bed; while at Lewisham the total area of the present dormitories is 1,706.25 square feet, estimated to be sufficient for 35 beds, equal to 48.75 superficial feet for each bed.

The cubic contents of the dormitories at your Institution give 826.56 cubic feet per bed in the boys' dormitory and 740.28 cubic feet in the others, with suitable appliances for ventilation; while at St. Patrick's Institute the space allowed is only 682.5 cubic feet per bed.

When these figures are compared with those of the requirements of the Licensing Act and the most modern authorities on such Institutions as yours, it will be seen that the provision you have made is far from excessive, while that at Lewisham is totally inadequate.

No allowance whatever has been made by the Royal Commission for the more spacious accommodation at your Institution.

From the foregoing remarks it will be seen that, as we have previously stated, a comparison of costs, worked out to so much per bed, as has been done by the Royal Commission in their Report, is most unfair, inasmuch as no allowance has been made for the more advanced condition to which your Institution has attained, nor for the special requirements of the site, different sexes of the inmates, diversity of afflictions, additional number of attendants, teachers, and general staff required for the larger number of pupils, larger area per bed, etc., provided in your buildings.

As to the charge "that a large expenditure has been unnecessarily incurred upon the buildings of your Institution," we cannot see that any foundation exists for it. An examination of the buildings will show that, while they are substantial in character, they are not extravagant in construction, ornament, or design, while the fact that they are now fully utilised, and leave no room for further expansion, sufficiently answers any charge as to their being too extensive, while if they were compared with similar Institutions elsewhere it will be seen that they are comparatively economical; but if they are to be compared with such Institutions as St. Patrick's Institute, which has nothing beyond dining and day rooms and dormitories, and is totally unprovided with the more modern requirements such as class-rooms, workshops, gymnasium, etc., to say nothing about the bare condition of its surroundings, they may seem to be extravagant, especially when the comparison is so unfairly based as is the case in the Royal Commission's Report.

We have examined the costs of the different portions of the buildings carried out prior to our appointment as architects to the Institution, and are satisfied that when the different prices ruling when the various works were carried out are taken into consideration that the costs have not been excessive, and since we have been the architects for the Institution the whole of the works carried out have been completed below our estimates.

With regard to the new additions for which we have prepared plans, they consist of new dining-room, kitchen, scullery, pantries, and verandahs, on the ground floor; dormitory, attendant's bedroom, bathrooms, lavatories, clothing or linen-room, on the first floor; together with servants' quarters and box-room over the kitchen, etc.; and dormitory, attendant's bedroom, bathrooms, and lavatories, clothing or linen-room, and water storage on the second floor; with stone fire-escape stairs connected to the present dormitories in the main building.

From their general nature they require to be placed in as central a position as possible, and that occupied by the present dining-room, etc., is the most suitable.

The present dining-room is even now too small for the number of inmates, and it is absolutely necessary to provide for a greater number in the near future so as to meet the growing demands made upon the Institution. The kitchen arrangements are also incapable of expansion, while more dormitory accommodation is needed for the girls and staff.

To build only what would meet present requirements would be a short-sighted and expensive policy, consequently a building of such general utility has to be arranged to meet future developments.

In preparing the designs we have made the buildings as plain as possible, and in keeping with their more immediate surroundings, and advantage has been taken to as far as possible utilise the present foundations, and at the same time to encroach as little as possible upon the playgrounds.

Using the site of the present dining-rooms, kitchen, &c., necessarily entails the provision of temporary accommodation while the new ones are in course of erection, and this all adds to the cost of the proposed additions. The servants, of whom a larger number will be required than at present, are now accommodated at the main building; but new quarters will be provided for them in the proposed additions, and the rooms they now occupy will be available for the resident officers or other purposes.

The water pressure at the Institution being very low, it is necessary to provide storage, so that ample supplies may be available at all times and to provide for hot-water circulation and fire-hydrants. This storage will be provided for by means of tanks on the second floor level and the roof.

The fire-proof stairs will be accessible from the new dormitories direct, and from the present ones by means of the balconies.

The laundry accommodation at present provided is also inadequate to meet the requirements of the present and future, so a new one has been designed which will be fitted with the most modern requisites, and a portion of the Darlington-road wall has been utilised, and will form one wall of the new building.

In preparing these designs we have been actuated by a desire to provide the necessary accommodation as economically as possible consistent with stability and general appearance; every attention has been paid to such important matters as ventilation, accessibility, cleanliness, fire-escapes, and utility, and we do not think that the buildings could be placed in a better position or be more economically arranged, considering the various requirements.

We are,

Yours faithfully,

A. L. AND G. MCCREDIE.

1898.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MANAGEMENT OF THE COOMA HOSPITAL.

(RETURN RESPECTING.)

Printed under No. 4 Report from Printing Committee, 29 September, 1898.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 25th August, 1898, That there be laid upon the Table of this House,—

“Copies of all documents, communications, papers, &c., received by the Chief Medical Officer, or any other officer of the Government, respecting the management of the Cooma Hospital.”

(Mr. Miller.)

The Secretary, Cooma Hospital, to The Chief Secretary.

Sir,

Cooma Hospital, 22 May, 1895.

In accordance with a circular letter received from the Principal Under Secretary on the 12th December last, I have been directed to submit the name of Henry Dent for approval as wardman of this hospital. The Committee of Management have carefully considered the matter, and given due attention to the fact that the Government desire, in the terms of the circular, trained wardmen, “*as far as possible*,” and are by a large majority satisfied that Henry Dent has sufficient training and experience to enable him to carry out his duties to the satisfaction of all concerned.

Dent is a teetotaller, and intends to marry the present matron.

I enclose a declaration made by him. May I ask that the matter receive your earliest attention, as the committee are anxious to receive a reply before their next monthly meeting, to be held on the 3rd proximo.

I have, &c.,
N. BLACK,
Secretary.

The Medical Adviser, for report.—C.W., P.U.S., B.C., 29/5/95.

[Enclosure.]

1. HENRY DENT, of Cooma, do solemnly and sincerely declare that early in the year 1875, and subsequently until November, 1876, I was attached to the Ambulance Corps on field-days of H.M.S. “President,” and performed various kinds of ambulance and hospital work.

2. During my convalescence—from an injury received—in the Portsmouth Royal Naval Hospital I was required to, and did duty as an hospital attendant for some five or six weeks.

3. After leaving H.M. Navy I went to New Zealand, and while in Wellington the house I resided in was burned down. By the fire I lost, in addition to my personal effects, my naval discharge and marine certificates. I am, therefore, unable to produce same to the committee. And I make this solemn declaration, conscientiously believing the same to be true, and in virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intitled “An Act for the more effectual abolition of Oaths and Affirmations taken and made in various Departments of the Government of New South Wales, and to substitute Declarations in lieu thereof, and for the suppression of voluntary and extra-judicial Oaths and Affidavits.”

HY. DENT.

Made and signed before me, at Cooma, }
this 18th day of May, 1895,— }
N. BLACK, a Commissioner for Affidavits.

67—A

G. T. C. Miller,

[580 copies.—Approximate Cost of Printing (labour and material), £12 7s. 4d.]

G. T. C. Miller, Esquire, M.P., to The Principal Under Secretary.

Dear Sir, Parliament House, 29 May, 1895.
 Just a line to support the nomination to the post of wardsman for Cooma Hospital of
 Mr. H. Dent.
 I have known Mr. Dent for a number of years, and am aware that he has had considerable
 experience in hospital work. He is besides a thoroughly trustworthy man, sober, industrious, and
 intelligent. I have, &c.,
 GUS. T. C. MILLER.

G. T. C. Miller, Esquire, M.P., to The Medical Adviser to the Government.

Dear Sir, Parliament House, 29 May, 1895.
 As I am given to understand that the appointment of hospital attendants in country towns
 must be submitted to you for approval, I shall be pleased to give my testimony to the worth and
 suitability of Mr. Henry Dent, who has recently been appointed to the position of warder to the Cooma
 Hospital. He has had considerable experience in the Navy Hospital, and is, in addition, a trustworthy
 man.

I shall be glad if you will approve of Mr. Dent's appointment.

Faithfully yours,
 GUS. T. C. MILLER.

The Deputy Medical Adviser to The Medical Adviser to the Government.

As to proposed appointment of Henry Dent, Cooma Hospital.

10 June, 1895.

I do not think the affidavit herewith deposes to such instruction as entitles the applicant to be called a
 trained hospital attendant.

Under the circumstances of this hospital, which are the subject of another communication, it is
 indispensable that there should be attached to it at least one chief officer, thoroughly well-trained and
 competent. I do not consider that the present matron answers to this description.

The object of the regulation lately made is to secure the presence in hospitals of at least one officer
 competent as a nurse in every respect. The phrase quoted by the secretary to the committee from the
 regulation, namely, "as far as possible," is copied from a sentence which was written by way of advice, and
 should not have found place in a regulation. However, what was meant by it was that above-mentioned
 * * * to make sure that in small hospitals one superior officer at least should be trained and competent
 to care for the sick in all ways not distinctively medical.

Under these circumstances, I do not think the application made by Henry Dent, and submitted by
 the secretary of committee, should be approved.

J. ASHBURTON THOMPSON,
 Deputy Medical Adviser.

The Principal Under Secretary.—There appears to be only one conclusion to be drawn from this
 report, viz., that, however otherwise excellent, the matron is not suitable for the position of matron owing
 to the lack of training and knowledge of nursing. As Mr. Dent is (also) entirely without such training, I
 cannot in the circumstances recommend the approval of his appointment.—A.S., 11/6/95.
 Inform accordingly.—C.W., 13/6/95.

The Principal Under Secretary to The Secretary to the Cooma Hospital.

Sir,

Chief Secretary's Office, Sydney, 14 June, 1895.

In reference to your letter of the 22nd ultimo, recommending Mr. H. Dent for appointment
 as wardsman at the Cooma Hospital, I am directed by the Chief Secretary to state that the Medical
 Adviser to the Government reports that as it is indispensable that there should be at least one chief officer
 attached to this hospital who is thoroughly well trained and competent, and as, however otherwise
 excellent, the present matron does not answer this description, he cannot endorse the recommendation of
 your committee, as it is considered that Dent also lacks the necessary training.

I have, &c.,

CRITCHETT WALKER,
 Principal Under Secretary.

The Deputy Medical Adviser to The Medical Adviser to the Government.

Inspection of Cooma Hospital.

6 June, 1895.

I VISITED this institution on the 4th instant. There were present the honorary staff (Drs. Hogg and
 Harvison), and the matron (Mrs. Palmer). Subsequently I conversed with the secretary (Mr. Black, C.P.S.)
 and a member of the committee (Mr. Madgwick), and at another time with Mr. Faulkner, a member of the
 committee of long standing.

The questions under present consideration regard management. As to site, that is suitable
 enough; as to building, that dates from 1865, and is a very good house, but a very poor hospital; as to
 general condition, cleanliness, tidiness, and (apparently) repair, those were satisfactory, but cheerfulness
 and matters under that general head were neglected; there were even no (or according to the secretary,
 extremely few) books, and a small pile of old periodicals. The only accommodation for infectious diseases
 was a room in the main building (at my visit occupied by a case of diphtheria), which could not be
 regarded as furnishing isolation, and there was no mortuary.

I found that an attendance-book had been provided, in accordance with regulations recently
 promulgated, and was in use, as well as a prescription-book, in which the original prescription was retained
 at the hospital, while a copy was transmitted to the druggist in the town who dispensed for the institution.

Up

Up to three or four years ago one medical man was appointed to the hospital, and received an honorarium of £50 a year for his trouble; later, two were appointed, who received £50 a year between them. On arrival of Drs. Hogg and Harrison, the hospital funds were low, and after representations made by the committee, they agreed to forego the honorarium which had been usual for a year. Since the lapse of the year six more months have gone by, and they still do not receive any honorarium. They are the only practitioners in the town. I understand that there is a large number of poor in the district. In more or fewer cases these are made out-patients by the committee, who furnish them with medicines, and occasionally with medical comforts, the doctors visiting and prescribing for them gratuitously. At present the medical men, as I was informed, are expected to see, or do see, that persons thus relieved by the committee are fit objects of charity. I feel no hesitation in saying that the gentlemen referred to not only share handsomely in this common benevolence by rendering their outdoor professional services gratuitously, but that learning the condition of applicants is a labour and responsibility which should not be put upon them, and should certainly be undertaken by the governing body itself in any other way they may deem suitable.

The matron of the hospital was appointed (at £65 a year, all found, no uniform) between two and three years ago. She informed me that she had had training at the Children's Hospital at Liverpool (England), had been employed at the Church Home, New South Wales, and in the State Children's Relief Office. I did not think at the time I gathered this information, and I do not think now, that she had had such training as would entitle her to be considered a trained nurse; and there is information in this office that practically she is not considered a competent trained nurse. I am not aware that she is an unsatisfactory officer in any other respect.

The matron has charge, in effect, of a large house usually occupied by five or six people, besides herself and her child, and her duty is to do all the work of it—cleaning, cooking, &c.—without assistance; none is provided by the committee. Additional to this, which by itself would sufficiently occupy one person, are her nursing duties. The work of different kinds thus indicated could not be satisfactorily performed by one person; and, in fact, the matron finds it impossible, and does furnish herself, at her own cost, for wages and food, with such help as she can afford to pay for. Latterly only she has been given assistance to relieve her of night-nursing; the night-nurses engaged and paid by the committee (£1 Is. a week, from 7 o'clock to 7) have in no case been trained nurses. The committee now propose to provide the institution with a wardman. His papers are the subject of another communication.

The institution is entirely unprovided with instruments. I was informed that there was a small collection of splints, a pair of scissors, a pair of forceps, and some other such odds and ends.

Until a short time ago there were no clothes at all at the hospital, except those which patients had brought in with them; in many cases these were what they stood up in, and such patients were, perforce, put to bed in the (usually) filthy shirt, &c., which they wore on admission. Now some night-gowns have been provided, but no other clothes, and there is no swag-room.

I heard statements that the hospital was unpopular, and that destitute sick residents of the town were persuaded with difficulty, or not at all, to enter it; but I do not insist on this, since all knowledge of it was denied by the members of the committee whom I named at first. It is the case (to judge from the numbers) that the institution has received a progressively increasing number of patients during about two years past, but this, by itself, is by no means an answer to the charge of unpopularity; it may, perhaps, indicate a slowly reviving popularity, or it may perhaps be due to causes unconnected therewith. If unpopularity really does exist, I am of opinion that there is reasonable ground for it in the arrangements described, especially as regards nursing.

I do not think I have seen so poor a hospital in any town and district of similar size. The causes of inferiority at Cooma (population about 2,000; of district, about 15,000) must probably be complex, and it is neither necessary nor expedient that I should attempt to name them all. For the present purpose it is enough to remark that the absence of instruments and means of isolating infectious from other patients effectually at a hospital established about thirty years indicates misapprehension of the objects and uses of hospitals; while the absolute dullness and meanness of the appointments indicate either some extraordinary obstacle to the exercise of such charity as extends itself beyond mere pecuniary contributions, or else a singular indifference on the part of the clergy and ladies of the town especially. It is scarcely possible that a hospital should serve its true ends unless it be more attractive than the homes of the poor, who chiefly resort to it, or sufficiently comfortable to attract persons from lodgings, hotels, &c., who by their contributions should be to some extent a source of revenue. It is not possible that such a hospital should confer all the benefits it ought to be capable of conferring on the extremely destitute unless during their stay they can, after being bathed, &c., be cleanly clad in clothes superior to the filthy rags in which some of them enter.

As to a remedy for the bad state in which the institution, as it seems to me, now is, perhaps the general fault may be most suitably described as inertia. The committee are almoners to the more prosperous part of the residents in the district; their duty in that capacity is to provide such efficient service as prudently economical administration of the funds entrusted to them can furnish. But beyond this, if the funds entrusted to them do not suffice for all that is necessary in view of the known requirements of efficient hospitals, then it is their part to urge increase of contributions from the residents, either of individual amounts (of money or kind), or by inducing those to subscribe who have not already done so, and this by a steady and business-like organisation which should operate throughout the year, as well as by occasional entertainments, &c. Farther, as to their position as almoners, their first step should be to see that their executive officers are competent in point of training, and then that they are provided with necessary materials, and not asked to make bricks out of straw.

The executive officers consist chiefly of the medical and nursing staff. As regards the former, the committee are now excellently provided. But they accept the gratuitous services of the two gentlemen who constitute it, and they, in their turn, give their services gratuitously, but not quite voluntarily. Under these circumstances they contribute more to the charity, as a matter of fact, than any others of the community concerned. They are the only medical men in the district, which cannot well support more than two; in common with other members of the profession, they willingly do a great deal of work among the poor, in the ordinary course of practice, for which they know well they can never expect any return. I therefore venture to ask whether, on consideration, this community think it fair that they should accept these services additionally rendered to this hospital without awarding them, when medical attendance is the very thing they are ostensibly providing the poor with, by their own benevolence, and at their own expense.

To

To this extent the community are sailing under false colours, and the case is the worse that the medical staff, as constituting the only medical aid in the neighbourhood, have no choice but to bear this extra burden forced upon them by the charitable.

As regards the nursing staff, I cannot look on that as efficient. A fair provision would be a thoroughly trained and experienced matron, whose wage should be about £80 a year; such an officer would doubtless attract to her one or more young women living in the neighbourhood, who would be anxious to learn to nurse, and glad to begin their career by sound instruction from the matron to the extent of the opportunity afforded by a small hospital, and who would be content with a very small stipend in addition to board and lodging. Additionally, there must be a servant of some sort to do the cooking and the rougher part of the house-work. A wardsman might be necessary or not; if a thoroughly trained nurse suitable for the position of matron happened to be married to a respectable man, devoid of the knowledge possessed by hospital attendants, it might be economical and well to appoint him wardsman; in that case no objection to him would be raised on the score of want of such knowledge, or even an otherwise suitable man, but devoid of hospital, might be appointed, were the matron of the standing described, and were a wardsman thought necessary. But it is absolutely indispensable that the matron should thoroughly well understand her art, otherwise nothing can be satisfactorily effected.

I believe I have now said enough to show that I think reforms necessary at this hospital, and to enable any members of the committee who may feel that necessity to move (with advice of the Medical Staff) on right lines.

There are certain points to which the committee should be officially required to attend without unnecessary delay. They are—provision of isolation accommodation, provision of a mortuary so constructed as to be suitable for performing *post-mortem* examinations, and conversion of existing cesspits to pail-closets. A hint should also be conveyed to them touching the following matter:—I heard that, now or formerly, members of the committee had supplied goods to the institution in the ordinary course of trade; this is manifestly undesirable, or even improper, and during his term of office no committeeman should enter into such business relations with the body of which he is a member. A hospital without instruments is inconceivable, and could become possible only by unacknowledged and practically compulsory requisitions on the Medical Staff.

J. ASHBURTON THOMPSON,
Deputy Medical Adviser.

Copy of this report to the hospital authorities.—A.S., 11/6/95. Done, 13/6/95.

The Secretary, Cooma Hospital to The Secretary, Board of Health.

Sir,

Cooma Hospital, 29 June, 1895.

I have the honor to forward herewith a reply to your communication of the 13th instant, covering the Deputy Medical Adviser's report of his inspection of this hospital.

I have, &c.,
N. BLACK,
Secretary.

[Enclosure.]

THE report of Dr. Ashburton Thompson having been considered by the local committee, in reply thereto I am instructed to submit the following:—

Building and the interior.

The committee agree that the hospital is not as conveniently designed as they would wish, but as it is an old building, this is hardly to be expected. That in August, 1893, the idea of erecting the additions, viz., an infectious diseases ward and mortuary, was considered, and it was then intimated to the Government that the funds of the institution would not allow of their erection, and though since then the matter has always been in view of the committee, still the funds have never been sufficient, barely covering the expenses of maintaining the hospital. It is, therefore, now quite out of the power of the committee to erect these buildings without a special grant for the purpose.

The committee also regret that for want of funds they have not been able to provide pictures and books, but the class of patients usually in the hospital do not miss them, and books are always forthcoming for those who are able to appreciate them, also the daily and weekly papers are provided. It is satisfactory to the committee to know that the other conditions of the buildings are considered satisfactory, and that it is only such additional buildings as lie beyond their power to erect that are said to be necessary.

As regards the closets, they are, and have been since 1892, on the pail system; it is, therefore, apparent Dr. Thompson did not inspect them.

Medical Officers.

It is distinctly understood between the committee and these gentlemen that their services are gratuitously and voluntarily given, on account of the want of sufficient funds, and the committee have not been behindhand in giving them all the praise and thanks that their generous acts entitle them to, and they have again assured the committee that these services on their part are purely voluntary, and will be continued with pleasure, providing that reform in regard to nursing is carried out, which it will be seen hereafter the committee intend to put into operation; so long as this understanding and the present kindly feelings in the matter exist, they fail to see that it is a subject for the severe criticism it has received. It never has been the wish that these gentlemen should be held in any way responsible for the condition of applicants for outdoor relief, and arrangements have lately been made whereby the poor requiring medical aid, &c., are provided with it at the expense of the local Ladies' Benevolent Society, which Dr. Thompson appears to have not been informed existed, and to which society the medical men also give their valuable services free of cost.

Instruments.

Application for a grant to enable the committee to procure these has been made, and they take this opportunity of asking to be liberally dealt with as other committees have been in the past.

Matron.

The present matron is certainly not a trained nurse, but she is incomparably superior to any former holder of the position, and has materially assisted in bringing the institution to its present fairly satisfactory state. She has always been provided with night-nurses when the medical men thought it necessary. The committee, owing to the great increase in the number of patients, and also the more serious nature of the diseases coming into the hospital, and at the suggestion of the medical officers, called for applications for a trained nurse to work in conjunction with the matron, but no applications were received. A wardsman then applied, who intended, if appointed, to marry the matron, but his nomination has been disapproved of.

The committee are desirous of improving the nursing arrangements, and are giving it their careful consideration. Unfortunately, the matron was seized with diphtheria, and the committee have consequently been put to great expense in procuring two trained nurses from Sydney. As this matter is under consideration, something will be shortly done. It would be manifestly unjust to dismiss the matron, who has done so much; has given satisfaction to previous medical officers, and has only failed when the work became impossible for any one person to perform.

Clothes.

Clothes.

This matter will receive the attention of the committee, some having been already provided, and others being under consideration.

Popularity.

Some few years ago this hospital was, no doubt, in great disfavour, but the stigma then cast upon it has disappeared. Patients and subscriptions are on the increase, and in the absence of any proof to the contrary, these appear to be the only signs by which any opinion can be arrived at. The visiting committee are in regular attendance, and all patients are individually asked if they have any complaint to make, and none are forthcoming; but, on the contrary, it is a common practice to publicly thank the matron and hospital committee for the attention and kindness received in the hospital. Amongst the poorer classes there is always an objection existing to go to the hospital, and is attributable more to their ignorance of the life therein than to any true and sufficient reason.

Committee.

While it may appear to those living in larger places than Cooma, that it is undesirable that committeemen should have any interest in the supplying of provisions to the institution under their charge; still it is almost necessary, as the storekeepers and hotelkeepers are some of the staunchest supporters of our hospital, and having the success and economical management of it in view, they no doubt fulfil their contracts faithfully, and as reasonably as any other business people could possibly do. The contracts are all let by tender, the lowest tender nearly always getting the contract; therefore no injustice can possibly arise. Moreover, the remaining committee are surely a sufficient safeguard against any imposition. To exclude committeemen from contracting would result in a large decrease of support; and, if any evil, it is certainly a necessary one for the revenue of this institution (see Rule 12).

General.

The committee, one and all, desire to express their deep sense of the responsibility cast upon them, and their only desire is to do all they can for the proper conduct of the hospital and relief of the patients therein. They desire to point out that they lose no opportunity of collecting contributions, nor do they omit to bring about the holding of entertainments for its benefit. This district is not in a flourishing condition, nor are the general run of persons in affluent circumstances. The committee do not consider the reflection on the ministers of religion and the ladies either just or becoming. They desire also to respectfully express the opinion that however wise it may be for Dr. Thompson to inspect the hospital alone in the first instance, that it is his duty to request the committee to attend the hospital and there discuss matters. If such course had been adopted, much of his report would have been unnecessary.

Further efforts will be made to get in subscriptions, and steps will be taken to get a grant for the buildings considered necessary, and which would undoubtedly be a great addition to the hospital and the efficient working of same.

JOHN L. KING,
President,
For the Committee.

The Chief Medical Officer to The Principal Under Secretary.

Sir, Office of the Chief Medical Officer, Sydney, 25 November, 1897.

I do myself the honor to transmit herewith a letter concerning the management of Cooma Hospital, addressed to me by Dr. Walter S. Harvison, Government Medical Officer at Cooma, and a member of the hospital medical staff. The complaint, though referring to a single incident only, is, in my opinion, a serious one.

2. On 6th June, 1895, I made report on this institution after visiting it. That report, though moderate, was, perforce, strongly condemnatory of the then management, and the most important matter which I then pointed out as requiring alteration was the absence of any trained nurse.

3. It appears that there is still no trained nurse in charge of this institution. This appears to me to be a very serious defect, and one which ought to be remedied as speedily as possible; in the meantime, I feel constrained to say that the public moneys with which the hospital is subsidised are not being expended either in accordance with the needs of the sick poor nor advantageously.

4. You may, perhaps, think proper to draw the attention of the committee to this matter by inquiring whether they have a trained nurse; and, if so, what certificate of training she possesses.

I have, &c.,

J. ASHBURTON THOMPSON,
Chief Medical Officer of the Government.

The committee of the hospital may be written in terms of this communication.—C.W., 8/12/97.
Approved.—J.N.B., 8/12/97.

[Enclosures.]

The Government Medical Officer, Cooma, to The Chief Medical Officer.

Dear Dr. Thompson,

Cooma, 7 November, 1897.

Just a few lines to tell you that the hospital committee held their meeting to inquire into my complaints against the matron, and came to the conclusion that she was not to blame in the matter.

I sent a boy to the hospital, and the same night went up to arrange about an operation on him next morning. I told the matron what I intended doing, and asked her to have him ready at 12 o'clock next day, also telling her what dressings, &c., would be required. When he was put on the table he was simply dirt from head to foot, and I had to scrub him with soap and water before I could do anything. Dr. Ryan, who also attended at the hospital, gave chloroform for me and saw the state the boy was in, and I thought it a good opportunity to bring it before the committee, as he could also prove the charge. He, however, attended the meeting, and stated that the matron would have done quite wrong if she had sponged the boy without my instructions to do so, and if any case were admitted to the hospital, no matter how dirty, no cleaning up should be done without the doctor's orders. I told the committee that I would not insult a woman in charge of a hospital by telling her to have a patient clean when put on the table for operation any more than I would tell her to have his face washed; that every decent nurse would understand that it should be done, and if not, she might have asked in this case, as she knew the boy was very dirty. Other matters came up at the meeting, showing very clearly that the patients were not properly looked after, but as far as I know the committee don't intend to alter them. I wrote and said I would not attend the hospital after the end of the year, as I could not be connected with the place as managed at present, and they wrote and asked me to reconsider the matter, as my leaving would be against the best interests of the hospital. I wrote to-day and said I would have no more to do with them until there was a trained nurse in charge. I also said that as Government Medical Officer I had informed you how the hospital was managed, and would give you an account of their meeting, and if they did not think fit to make any changes perhaps you might do so.

I am very sorry to have to give it up, as there is no work I like so well, but I have tried so often to get things right that I am now going to leave it to them, as they won't be reasonable.

I think the people here will go for the committee when I leave, as they are very wild about the way things are conducted, and a number of subscribers will withdraw their subscriptions. I am very much obliged for your kind letter, and am sorry to trouble you again, and also regret that I have not succeeded better with the committee.

I have, &c.,

WALTER S. HARVISON.

The

The Government Medical Officer, Cooma, to The Chief Medical Officer.

Dear Sir, Cooma, 22 November, 1897.
Please consider my letter as an official one. I am sure if you do anything in the matter it will do a great deal of good for the hospital. The committee only want a little to make them do the right thing.
Yours, &c.,
WALTER S. HARVISON.

The Principal Under Secretary to The Committee of Management of the Cooma Hospital.

Sir, Chief Secretary's Office, Sydney, 9 December, 1897.
With reference to previous correspondence, I am now directed by the Chief Secretary, at the instance of the Government Medical Adviser, to inquire whether there is, at the present time, a trained nurse attached to the Cooma Hospital; and, if so, what certificate of training she possesses.
I have, &c.,
CRITCHETT WALKER,
Principal Under Secretary.

The Secretary, Cooma Hospital, to The Principal Under Secretary.

Sir, Cooma Hospital, 20 December, 1897.
I have the honor to acknowledge the receipt of your letter of the 9th instant, and am instructed to reply thereto in the following terms:—
That Mrs. Dent, the present matron, is a thoroughly competent nurse (although not in possession of credentials as a trained nurse), and has given the fullest satisfaction to the committee and all medical men who have been connected with the hospital since her appointment, with one exception. I enclose a report from Dr. Ryan, one of the medical officers of this hospital, on the matter.
I have, &c.,
A. W. WALLACE,
Secretary.

May be referred to the Medical Adviser.—C.W., 22/12/97. Approved.—J.N.B., 22/12/97.
The Medical Adviser to the Government.—C.W., P.U.S., B.C., 22/12/97.
The matron of this hospital is not a trained nurse. I drew attention to this in 1895. I think the committee should be warned that their subsidy will be withheld until the nursing is efficiently provided for by appointment of a trained nurse, in accordance with the circular order.—J.A.T., 30/12/97. The Principal Under Secretary.
The committee should be warned accordingly.—C.W., 5/1/98. Approved.—J.N.B., 7/1/98.

[Enclosure.]

Dear Sir, Cooma Hospital, 20 December, 1897.
As Medical Officer of the Cooma Hospital, I have been requested by the committee to report to you concerning the qualifications of the matron of that institution.
Mrs. Dent, the matron, has occupied her present position for nearly six years, during which time she has acted under five or six different medical officers who were all perfectly satisfied with her, and from whom she holds unexceptionable references.
I, myself, have been acting over two years as medical officer here, and I have always found her a most capable and trustworthy matron, as well as a skilful and efficient nurse, and I do not think we could possibly procure anyone better fitted for the position.
Before coming to Cooma, Mrs. Dent acted as matron to the Children's Home, Liverpool, under Dr. Beattie, from whom she also holds first-class references.
I may state that some complaints were made recently by Dr. Harvison to the committee against Mrs. Dent, but on a searching investigation being held, she was completely exonerated from all blame, and Dr. Harvison's charges were declared to be entirely unfounded. In consequence of this decision of the committee, the latter felt himself compelled to resign his position of medical officer to the hospital.
After this, I fail to understand his present action in writing to the Chief Secretary's Office concerning the matron; and I may state, in conclusion, that he has done so without letting me know anything whatever of his intentions, an act, to say the least of it, of extreme discourtesy to me, his colleague to the hospital, as well as of gross injustice to the matron.
Yours, &c.,
JOSEPH RYAN, L.R.C.S.E., L.R.C.P.E., J.I.P.S.S.,
Medical Officer, Cooma Hospital.

The Principal Under Secretary.

The Principal Under Secretary to The Secretary, Cooma Hospital.

Sir, Chief Secretary's Office, Sydney, 10 January, 1898.
With reference to your letter of the 20th ultimo, in continuation of previous correspondence, on the subject of the qualification of the matron of the Cooma Hospital, I am directed by the Chief Secretary to inform you that unless the nursing is efficiently provided for by the appointment of a trained nurse in accordance with the circular letter from this office, of date the 11th December, 1894, the Government will be constrained to withhold payment of subsidy to the institution.
I have, &c.,
CRITCHETT WALKER,
Principal Under Secretary.

The Chief Medical Officer to The Principal Under Secretary.

Sir, Office of the Chief Medical Officer, Sydney, 28 February, 1898.
I have the honor to draw your further attention to the management of the Cooma Hospital, as represented in letters transmitted herewith, and addressed to me by Dr. Walter Harvison, Government Medical Officer, and until 31st December last a member of the honorary staff of the hospital.
You will observe that in case marked "A" in Dr. Harvison's letter, dated 15th February, a destitute wayfarer, apparently *in articulo mortis*, who had been picked up on the road, and brought into town by a charitable person, was refused admission to the hospital by the matron until the formality of getting

getting an order from a subscriber had been gone through, and until the order had been countersigned by a committeeman, although Dr. Harvison had taken the trouble to drive to the hospital and warn the matron to admit the patient at once, in view of the extreme urgency of his symptoms. Dr. Harvison adds that a majority of the committee subsequently decided that the matron's action was in accordance with the hospital rules; a decision which, if it really were arrived at, amply confirms the opinion of the management of this institution formed by me in 1895, and justifies the terms in which I expressed it. This defence of observance of rules having been raised (although its inaptness is obvious), I append a copy of the Model Rules for District Hospitals, in which provision for immediate admission by the person in charge of the institution of all urgent cases is made.

3. Fortunately for all concerned, the patient above alluded to did not die. In the case described in the same letter, and marked "B," you will notice that the patient did die during the interval which elapsed between Dr. Harvison's first seeing him and his admission, Dr. Harvison having in this instance apparently refrained from seeking the immediate admission which the urgency of the illness rendered necessary, in consequence of his experience in case "A," just fifteen days before.

4. The death in the case "B" Dr. Harvison says he reported to the coroner, who agreed it would be a good thing to hold an inquiry in order to draw attention to the matter, but no inquiry has been held. It is a matter for consideration, in my opinion, whether the Minister of Justice might not be moved to direct inquiry even after this lapse of time, with a view to bringing out some of the facts, which are of public interest in relation to management of this hospital.

5. The committee were warned by you on 10th January last that the subsidy would be withheld unless they provided for efficient nursing by appointing a trained hospital nurse to the post of matron. Five or six weeks having elapsed, and a fresh complaint having been received in the meantime, I now suggest that a letter of inquiry should be addressed to the committee, requesting information as to any steps they may have taken towards engaging a suitable matron.

I have, &c.,

J. ASHBURTON THOMPSON,
Chief Medical Officer of the Government.

A communication should be addressed to the committee, requesting that information may be furnished as to what steps have been taken towards engaging a suitable person as matron, as herein suggested.—C.W., 3/3/98.

Approved.—J.N.B., 4/3/98.

[Enclosures.]

Dear Dr. Thompson,

Cooma, 15 February, 1898.

In connection with the local hospital, I would like you to know of a case that occurred on the 16th December Case A last. Mr. Litchfield, a large station-owner, called at my house, and asked me if I would go at once to see a man whom he had brought into town. He found him lying on the road near the station, 10 miles from Cooma. His clothes were all blood, also the ground near him; and he said he had been vomiting. I went at once, and found the man in a very low condition. I could not count his pulse, and he was hardly able to speak, and had a temperature of 100 degrees. He was still vomiting blood into a vessel beside him. I sent for medicine and let him have a dose at once, and told the people at the house to keep him quiet for an hour or so, until I sent someone to take him to the hospital. I also gave him a note to give to the matron, asking her to admit him, &c.; then, for fear of anything going wrong, I drove to the hospital, saw the matron, and told her to have the man very carefully put to bed, as he had lost a lot of blood, and if it started again it might be impossible to stop it. He was taken to the hospital, and the matron refused him admission, and it was over 100 degrees in the shade, and he had to be taken back to the Coffee Palace, where I had left him. I wrote complaining of her conduct to the committee, and they sent her my letter, to which she replied that the man did not look ill, consequently, in compliance with hospital rules, she refused him admission until he would get a card signed. The man's clothes were covered with blood; he was as pale as a ghost. I had told her an hour and a half before that he was dangerously ill, and yet a majority of the committee decided that she had acted in accordance with hospital rules.

A few days later I was called to see a Chinaman whom I found alone in his hut, with severe hemorrhage from the Case B lung. There was no food of any kind in the place. I returned home and got some, and a bottle of milk, and went back to him at once. He told me when he had taken the medicine and milk he felt better, so I told him he must go to the hospital. I found another Chinaman in a hut near, and directed him how to go about getting a card for his admission to the hospital, and told him to get it as soon as possible. This he succeeded in doing by 3:30 p.m., when he went for a cart to remove him to hospital. I said I would ride down to the hut and wait for the cart, as I wanted to be sure that the patient was fit to start. When I got there, 4 p.m., I found the poor old man lying across the bed, which was only about 4 inches high, with his head on the ground on one side, and his feet on the other, dead. If I could have had him taken quietly to the hospital within an hour or two of the time I first saw him, 9:30 a.m., I think he would have recovered, yet a note from me would not be accepted by the matron, nor even a message given her by myself at the hospital, so I was compelled to get a card signed by a subscriber and a member of the committee, while the poor old wretch was left there to die. I reported the matter to the Coroner, who was also President of the Hospital Committee, and he said it would be a very good thing to hold an inquiry and let the public have the facts before them, and bring the committee to their senses; however, no inquiry was held. A number of subscribers have told me they will not give any money to the place while it is conducted as at present. All the decent men who were on the last committee have resigned, and the new committee has all the objectionable members who were on it before, and no less than four publicans. As it is now, the committee will never know what goes on in the place, as Dr. Ryan and the matron and her husband will stick to one another, and what one says the other two will swear to, so that complaints made by patients will never do any good, and some members of the committee, who know that the matron is not fit for her place, and is doing the hospital a lot of harm, will help her in every possible way to hang on.

You will think, I am afraid, that I am a disagreeable individual, but I am really disgusted at the way things have been carried on. I have done my level best for the last four years to try and make the hospital what it should be, but I had to give it up at last. It is really better for me to be out of it, as my practice has just doubled itself in the last two years, and I will not have much time to spare; but there are so many poor people in the district who would like to take advantage of a local hospital, and many people of means, who would be only too glad to help to keep it going, that I am sorry it is not the useful place it ought to be.

I hope you will excuse the length of my letter, but I feel that I should give you the information in it.

With kind regards.

Dr. Ashburton Thompson, Board of Health.

I am, &c.,

WALTER S. HARVISON.

Dear Dr. Thompson,

Cooma, 22 February, 1898.

I have not been connected with the hospital since 31st December, 1897. I sent the case of hæmætemesis, I wrote to you about, to the hospital on 16th December, 1897. The date of the old Chinaman's death was 31st December, 1897.

Dr. Thompson.

Yours, &c.,

W. S. HARVISON.

Extract

Extract from Model Rules for District Hospitals.

The Matron.

* * * * *

But she shall admit all cases of accident and urgency on her own responsibility, and she shall also admit police cases at any hour.

Admission of Patients.

* * * * *

Accidents, urgent and police cases, shall be admitted at all hours, and, in default of other authority, on responsibility of the matron.

The Principal Under Secretary to The Secretary, Cooma Hospital.

Sir,

The Chief Secretary's Office, Sydney, 7 March, 1898.

I am directed by the Chief Secretary to invite attention to my letter of the 10th January last, on the subject of the appointment of a trained nurse to the position of matron to the Cooma Hospital, and to inquire what steps have been taken by your committee towards engaging a suitable person to the office in question.

I have, &c.,

CRITCHETT WALKER,

Principal Under Secretary.

The Secretary, Cooma Hospital, to The Principal Under Secretary.

Sir,

Cooma Hospital, 10 March, 1898.

I have the honor, by direction of the president and the committee of the Cooma Hospital, to acknowledge the receipt of your letter of the 7th instant, respecting the appointment of a trained nurse to the position of matron at the Cooma Hospital, and to inform you that the letter in question was considered at a special meeting of the committee, held yesterday, when that body regretted to learn that your letter of the 10th January last escaped the attention it should have received by the late committee, and which, I am informed, was omitted by accident.

I am further desired to inform you that the matron, formerly Mrs. Palmer, now Mrs. Dent, was appointed matron under the old Act, and has been in her present position for some years (five); that she holds very high certificates as to her undoubted qualifications, as you will observe by the enclosed copies thereof.

I am to add that many medical men bear high testimony of her ability, and that the present medical officer of the institution, Dr. Ryan, says "that a more careful or suitable nurse could not be employed by the committee." The committee have the fullest confidence in her, and the general public admit that she is an experienced and kind-hearted nurse.

I have, &c.,

HUGH H. MACDONNELL,

Secretary.

This communication should be forwarded for the information of the Chief Medical Officer.—C.W., 14/3/98. Approved.—J.N.B., 14/3/98. The Chief Medical Officer of the Government.—C.W., P.U.S., B.C., 15/3/98.

I think that on the receipt of the next application for subsidy, payment should be withheld, but in view of the terms of the letter, dated 5th January, 1898, that nothing further need be done just now.—J.A.T., 18/4/98. The Principal Under Secretary.

[Enclosures.]

The "Calliope," Start-street, Bourke, 20 October, 1897.

It affords me pleasure to testify to Mrs. H. M. Dent's proficiency as a hospital (general) nurse.

I had ample opportunities to observe Mrs. Dent when first appointed as matron to the Cooma Hospital, and notwithstanding she entered into her office under most trying circumstances, she, in a most ladylike way, looked on the bright side of an irksome position, and attended with great gentleness and kindness to each patient under her care. Her disposition and cleanly appearance always recommends her to her patients, and any medical practitioner may, without doubt, consider himself fortunate in having her assistance to his success.

F. B. KANE, L.R.C.P., &c.,

Late Hon. Surgeon, Cooma Hospital, Newcastle Hospital, &c., &c.

12 January, 1894.

MRS. PALMER has asked me for a testimonial.

It gives me great pleasure to bear testimony to her intelligence and care of the sick poor in her charge in the Cooma Hospital.

JOHN CLIFFORD,

Physician, &c.

From Drs. Collingwood and Blackwood.

South-street, Summer Hill, 18 May, 1895.

I HAVE pleasure in testifying to the manner in which Mrs. Palmer performed her duties during the time that I was connected with the Cooma Hospital.

Although she had not the advantage of hospital training, she readily adapted herself to the work—was willing to learn, and most careful in carrying out my orders. Her general management of the place was excellent, considering the means at her command. The wards were kept scrupulously clean, and I cannot speak too highly of her kindness to the patients under her care.

F. M. BLACKWOOD, M.D.

Liverpool Asylum, 23 May, 1892.

I AM afforded much pleasure in adding my testimony to that of many others as to the excellent character of Mrs. H. M. Palmer.

I have known her for over three years, and can speak with all confidence as to her capacity and general work while she acted as matron of the Children's Home in this town. Mrs. Palmer is, in truth, a most excellent woman, kindly in disposition, active, and regular and clean in habits, of high moral principle and strictest integrity, and fond of the faithful discharge of whatever duties she undertakes.

J. A. BEATTIE,

Senior Government Medical Officer, Liverpool District.

The

The President, Cooma Hospital, to The Principal Under Secretary.

Re Subsidy for the year 1897.

Sir,

Cooma Hospital, 4 April, 1898.

As the Cooma Hospital is much in need of funds for the payment of current requirements and past liabilities, I have the honor to request that you may be pleased to cause the Chief Secretary to be moved to place the subsidy due to the credit of the Cooma Hospital with the Cooma branch of the Commercial Banking Company of Sydney (Ltd.)

I have, &c.,

T. W. FAULKNER,
President.

The Honorary Treasurer, Cooma Hospital, to The Principal Under Secretary.

Re Subsidy for 1897.

Sir,

May I have the honor of drawing your attention to my letter of the 4th April last, wherein you were asked to be so good as to request the Honourable the Chief Secretary to be pleased to cause the subsidy due for the year ending 31st December, 1897, to be placed to the credit of the Cooma Hospital in the Cooma branch of the Commercial Banking Company of Sydney (Limited).

I may add that, owing to the subsidy not being forthcoming, that I have been unable to pay the wages of the employees or the tradesmen for their supplies for the past quarter yet.

Trusting that you will be so good as to use your influence in having this matter adjusted without delay.

I have, &c.,

DAVID JEFFREY,
Hon. Treasurer.

Will the Medical Adviser kindly state if he is in a position to now recommend payment of this subsidy.—C.W. (P.U.S.), B.C., 13/5/98.

The Chief Medical Officer to The Principal Under Secretary.

Office of the Chief Medical Officer, Sydney, 19 May, 1898.

Payment of Subsidy, Cooma Hospital.

With reference to your inquiry of the 13th instant, on papers returned herewith, and to my note of 24th March last,* nothing has come to my knowledge which would justify me in recommending payment of this subsidy in view of correspondence regarding ill-management of this institution now with you. On the contrary, I have reason to believe that the nursing arrangements and internal management are still what they were, such as to render the institution less useful than it should be as a State-aided hospital, and unpopular in the district.

I am strongly of opinion that the reforms already indicated should be firmly insisted upon, after reference to the correspondence already referred to; and it appears that refusal to pay the subsidy is the only available means of securing them. Allegations of consequent hardship will be made, and in part truly; but for this the committee should be held solely responsible.

J. ASHBURTON THOMPSON.

Shall the committee of management be informed that the Chief Medical Officer cannot recommend payment of subsidy?—A.E.H., 25/5/98. Yes.—C.W., 25/5/98.

The Principal Under Secretary to The Honorary Treasurer, Cooma Hospital.

Sir,

Chief Secretary's Office, Sydney, 27 May, 1898.

With reference to your communication of the 11th instant, relative to the payment of subsidy due to the Cooma Hospital for the period 1st May to 31st December, 1897, I am directed by the Chief Secretary to inform you that the Chief Medical Officer, to whom the claim has been referred, reports that he cannot recommend payment of this subsidy until the matter in dispute regarding the nursing staff is satisfactorily settled.

I have, &c.,

CRITCHETT WALKER,
Principal Under Secretary.

The Secretary, Cooma Hospital, to The Principal Under Secretary.

Sir,

Cooma Hospital, Cooma, 11 June, 1898.

I have the honor, by direction of the President of the Cooma Hospital, to convey to you the following resolution, unanimously passed by the committee at the usual monthly meeting held on Wednesday evening last, viz.:—"That the Secretary be instructed to write to the Principal Under Secretary, and ask that gentleman to be pleased to cause Dr. Ashburton Thompson to be so good as to furnish the committee of the Cooma Hospital with a copy of the report which justified his remarks to Mr. W. M. Madgwick on the 27th May last as to the state and management of the Cooma Hospital."

I have, &c.,

HUGH H. MACDONNELL,
Secretary.

May be referred to the Chief Medical Officer.—C.W., 15/6/98. Approved.—J.N.B., 16/6/98.
The Chief Medical Officer.—C.W. (P.U.S.), B.C., 17/6/98.

The Chief Medical Officer to The Principal Under Secretary.

Memorandum.

Office of the Chief Medical Officer, Sydney, 20 June, 1898.

I do not understand the reference to a report in the committee's resolution. I have none.

But I would suggest that the matter is simple. The hospital is not furnished with a trained nurse, although the Chief Secretary's direction is that any subsidised hospital shall be so furnished. I am not aware that any other matter is now under consideration.

J. ASHBURTON THOMPSON,
Chief Medical Officer to the Government.

Submitted.—C. W., 23/6/98.

G. C. Miller, Esq., M.P., to The Chief Secretary.

Dear Mr. Brunker,

Cooma, 15 June, 1898.

I, together with the people of this district generally, are much exercised over the treatment the hospital committee at Cooma are receiving. I understand that your Department refuse the subsidy due to the committee, on the grounds that Dr. Ashburton Thompson refuses to recommend payment. I have no hesitation in pronouncing the Medical Officer's decision as wrong, and unfair to the committee. According to the published report he absolutely refuses to recommend payment. I ask you to kindly peruse the report, and also letters and remarks marked in accompanying papers. I shall have to fight the matter out, I expect; but I am satisfied, from personal observations and reports, that the statement as to dirt and bad management are utterly groundless. I am so far convinced of the matter, that I shall ask you to kindly refer to officers of the Civil Service for their independent opinions on the matter, and these are men that have left the district:—Mr. Milton S. Love, Chamber Magistrate, Water Police Court, Sydney; Mr. J. L. King, Police Magistrate, Orange; Mr. E. S. Black, C.P.S., Young. I can produce volumes of evidence from the most reliable men in Monaro to refute the statement of Dr. Thompson. I cannot possibly allow the matter to rest here, and I am not certain whether the alleged dirt, &c., will not have to be proven in Court by Dr. Thompson. Trusting that you will investigate the question, and have the subsidy paid forthwith.

I am, &c.,

GUS. C. MILLER.

The Chief Medical Officer.—C.W. (P.U.S.), B.C., 21/6/98.

I think this letter is covered by papers returned to you yesterday; but I attach some newspaper cuttings received since then. The Principal Under Secretary.—J.A.T., B.C., 22/6/98.

[Enclosures.]

The Monaro Mercury, 10th June, 1898.

COOMA HOSPITAL COMMITTEE.

THE WITHHELD SUBSIDY.

THE monthly meeting of the Cooma Hospital Committee was held at the Council-chambers, on Wednesday afternoon, at which there were present:—The President (Mr. T. W. Faulkner), Messrs. W. Spicer, E. Dodds, H. W. Jackson, C. Solomon, D. Jeffrey, and the Rev. W. A. S. Anderson.

A letter was read from Mr. G. D. Cochrane, architect, to the effect that Mr. Titus Plackett had accepted and signed the contract for the erection of a female fever ward for the hospital, to be completed ten weeks from date, subject to the weather being favourable to building operations, for the sum of £225. The letter was received.

A letter was read from the Australian Natives Association, Melbourne, enclosing a cheque for £2, being a donation from the profits of the art union held on 26th January last. The letter stated that £1,471 had been disbursed amongst the hospitals.

Alderman Dodds moved, "That the letter be received, and the receipt of the cheque acknowledged."

The Rev. W. Anderson seconded, and it was carried.

A letter was read from Mr. J. St. Vincent Welch, of the Commercial Union Fire Insurance Company, stating that an increase had been made in the rates of charges, in terms of the tariff entered into by the insurance companies, and that the policy expired on the 25th May last.

The secretary (Mr. H. H. Macdonnell) stated that he had been notified that the policy would be right, in view of the meeting to be held that day.

The Chairman said that he would suggest that application be made for an extension of time to afford an opportunity to the Committee to consider whether they would increase or decrease the policy. Those who were supplying goods to the patients were entitled to the amounts due. It was owing to the penurious and parsimonious conduct of the Government that they were not able to pay their debts.

Mr. Solomon thought they should pay the premiums due at once, and give notice of the additions to the buildings.

Mr. Spicer seconded. It often happened that when a policy was allowed to lapse a fire occurred.

Mr. Jackson said the fact of their making building additions would have to be submitted.

The Chairman said they wanted a protecting order from the company. The risk was a great one, but he thought they could inform the company that additions were being made, but they would like to have a temporary protecting cover to their policy, and then they could represent the matter to the Government. If it did not jeopardise the matter he would advise them to do as he stated.

Mr. Spicer said the building could not be completed by the conclusion of the extension of time. He thought they should insure the present building and the additions also.

The motion was then put and carried.

The medical officer's report showed that six patients were treated during May; two had been discharged, and three remained in the hospital. The report was received.

Mr. W. M. Madgwick wrote as follows:—"St. Peter's, 27th May, 1898. The President and Committee of the Cooma Hospital. Dear Sirs,—In compliance with your desire, I waited on the Principal Under Secretary, in company with Mr. Dawson, this morning, and asked the reason of delay with regard to the subsidy. I at once learned that the reason was the refusal of the committee to employ a trained nurse. Mr. Critchett Walker, I may say, is not favourable to the action of stopping the subsidy, and I do not think he holds a more favourable opinion of Dr. Thompson than some of your committee. However, he said he could only act on the report of the Government Medical Officer, and he accordingly introduced me to Dr. Ashburton Thompson. However, before leaving Mr. Walker I put him (at his own request) in possession of the whole circumstances of the trouble between the matron and Dr. Harvison. In Dr. Thompson I did not meet a gentleman as amenable to reason as the gentleman I had just left. I went over the whole matter with him, and found that a complaint had been made by Dr. Harvison that the matron had refused a serious case recommended by him. He referred to the man who was found on the Hazeldean-road; I forget his name. I explained this matter had been before the committee and the matron was exonerated; and we also went over the complaints that had been heard by the committee at the hospital, and made by Dr. Harvison; I submitted to the doctor that the complaints and stoppage of the subsidy were the results of pique, and not of any medical necessity. Then Dr. Thompson made the, to me, astounding assertion

assertion that the hospital was dirty, and so badly managed that he had to assert his position as Chief Medical Officer, and stop the subsidy for so ill-conducted an establishment. Furthermore, he said that it was on account of the bad condition of the Cooma Hospital that caused him to have the regulation re trained nurses framed, and that though the regulation was not retrospective he intended it should apply in this particular case. I combated the "dirty" business, and instanced the recommendations of Dr. Blackwood, whom Dr. T. acknowledged was a good man—and to my mind a better man than Dr. T. But nothing would cause Dr. T. to alter his intention not to recommend the payment of the subsidy for the Cooma Hospital—not even the fact that accounts were waiting to be paid out of it. The only way out of the difficulty that I can see is: 1. To bring political influence to bear and force the hands of Dr. T.; or, 2. By informing the Colonial Secretary that the hospital will have to be closed, and laying before him all the circumstances leading up to the present trouble. Some old member of the committee, conversant with the details, ought to be able to make out a strong case. I am very sorry I am unable to report better success, but hope you will be able to steer through it all for the sake of suffering humanity. I remain, yours truly,—(Signed) W. M. MADGWICK."

The Chairman said the charge was groundless, and should not be admitted.

Mr. Spicer said it struck him that Dr. Thompson was taking exception to, or backing up, a report by Dr. Harvison. He did not know whether they would get a reply to that effect.

The chairman said it was a cowardly thing to stab them in the dark like that. If a charge was brought against the hospital it should be brought up, and they should have a chance of reply. It was not proper to write to Dr. Ashburton Thompson, who had, unfortunately, the power of stopping the subsidy. He was at Cooma about two years ago.

The Rev. Anderson asked whether the committee could not demand the report.

The Chairman said he thought they should call upon the Under Secretary for a report, and state in their claim that, in expectation of the subsidy, they had received into the institution paupers who would have been a charge on the Government, and who would have been obliged to go to Sydney or elsewhere. They had provided them with medical attendance and comforts, and the attendance of matrons and nurses, and were entitled to subsidy, as they had incurred certain debts and responsibilities. They wanted to know why the amounts were not paid, and they would wish the Government to give them some reason. They wanted Dr. Ashburton Thompson to produce the report he had against the institution, and if it were refused the committee would have it before the House, and then they would see who was making the charge.

Mr. Solomon suggested that they place the matter in the hands of the Member for the district. The writer had expressed a wish that it should not be done.

Mr. Jackson said they could not go behind their Member in the matter.

The Rev. Anderson said that the rule with regard to trained nurses was not retrospective, but in the case of Cooma Hospital Dr. Thompson wished it to be retrospective. It would be well to know why Cooma should be made the exception. Some discussion then ensued as to the terms of a motion expressive of the committee's contention in the matter.

Mr. Jeffrey said if Dr. Harvison had reported about the institution, he should be able to substantiate the statement.

The Rev. Anderson pointed out that Mr. Critchett Walker was favourable to the action of supporting the subsidy, and the speaker did not think Mr. Walker held a more favourable opinion of Dr. Thompson than had some of the committee. That gentleman said he could only "on the report of the Government Medical Officer." Did the "Government Medical Officer" refer to the local one?

Mr. Spicer said Mr. Madgwick referred to Dr. Harvison's letter.

Mr. Solomon said Dr. Harvison was the Government Medical Officer of the district.

Mr. Jeffrey said that if Dr. Harvison said in his report that the hospital was dirty and badly conducted, he (the speaker) wanted to bring him to book. He would move—"That the Principal Under Secretary be asked to cause Dr. Ashburton Thompson to furnish a copy of the report that justified his remarks to Mr. Madgwick on 27th May, 1898, as to the state and management of the Cooma Hospital."

Mr. Dodds seconded, and it was carried.

Mr. Solomon said he did not think the Government would comply with the request.

The Chairman said that it was not until they had acceded to the request of Dr. Hogg to engage two trained nurses that the finances got in a bad way. That ruined the hospital. They had had typhoid cases in the hospital during the past two months. Most dangerous cases had been treated there most successfully. He had visited the hospital every week for a considerable time, and he said that the hospital was never cleaner than at the present time.

Mr. Spicer said the hospital was never in a more sanitary state or cleaner. He had been there when they had been washing and ironing, and it was carried out as well as in a private house. No person could take exception to its condition.

The Chairman thought they should ask whether the subsidy was to be paid or not; the management had contracted certain debts.

Mr. Spicer said if they did not get the subsidy they must close the hospital.

Mr. Jeffrey said he had received a letter from the Principal Under Secretary, which ran as follows:—"Chief Secretary's Office, Sydney, 27th May, 1898.—With reference to your communication of the 11th instant, relative to the payment of subsidy due to the Cooma Hospital for the period 1st July to 31st December, 1897, I am directed by the Chief Secretary to inform you that the Chief Medical Officer, to whom the claim has been referred, reports that he cannot recommend payment of this subsidy until the matter in dispute regarding the nursing staff is satisfactorily settled.—(Sgd.) CRITCHETT WALKER."

Mr. Solomon proposed, "That Mr. G. T. C. Miller, Member for the district, be asked to see the Under Secretary, with reference to the efficient manner in which the hospital is conducted, and to inform him that if the subsidy be not paid forthwith the institution would have to be closed."

Mr. Spicer seconded, and it was carried.

The Chairman said that the Under Secretary should be informed of the full position of the hospital, and he would communicate with Mr. Miller, and give him the necessary information.

Mr. Jeffrey, hon. treasurer, reported that the sum of £24 4s. 6d. had been received since the last monthly meeting, and accounts to the extent of £13 9s. 8d. were outstanding for that period.

In reply to a question, the clerk said there were about £70 worth of other accounts outstanding. The doctor had not sent in his account yet.

The Chairman said there was, roughly speaking, £90 to be paid.

Mr. Jeffrey moved,—"That the accounts amounting to £13 9s. 8d. be passed for payment."

Mr. Dodd seconded, and it was agreed to.

With reference to the annual ball, it was decided to submit the matter to the ladies of Cooma, the Mayor undertaking to call a meeting about 20th June, on the motion of Mr. Jeffrey, seconded by Mr. Jackson.

The meeting then adjourned.

The Monaro Mercury, 13th June, 1898.

THE COOMA HOSPITAL.

(To the Editor of the *Monaro Mercury*.)

SIR,—It appears from your report of the last hospital committee meeting that the finances of the institution are again getting into a muddle. The committee will find themselves in an unenviable position ere long. Having contracted debts which the funds of the hospital appear unable to provide for, it will devolve upon the committee personally to discharge these obligations, having incurred them, I understand, after being notified the Government subsidy could not be forthcoming. The committee occupy, in a measure, a position similar to the directors of a company who are liable personally under certain circumstances. Some twelve or eighteen months ago the finances of the hospital were in a bad way, and the working of the institution generally was considered unsatisfactory. A committee was elected, who in a short time put the finances straight, through strict economy and close supervision. A number of the committee were in favour of certain reforms, which were not acceptable to the majority; hence the suggested reforms were not carried out. The public would like to know why the subsidy is withheld, and what Mr. Madgwick has to do with it, and for what reason he was deputed to interview the Government. The public, I fear, will cease contributions. What next? The present committee must walk out and take their debts with them; a new committee will then be nominated by the Government. It is ridiculous to talk of the hospital being closed.

Cooma, 13th June, 1898.

I am, &c.,
WELL-WISHER.

THE

THE "DIRTY" HOSPITAL.

(To the Editor of *The Monaro Mercury*.)

Sir,—Re the assertions in your last issue of "dirty" regarding the Cooma Hospital, the opinions of the following gentlemen, who have at different times during the last six years visited the hospital, may not at this time come amiss:—

Dr. David Collingwood, M.D.B.S., F.R.C.S., Prince Alfred Hospital, Sydney.—"Very pleased with the perfect cleanliness of this hospital, which I have carefully inspected throughout."

Dr. J. N. E. MacLennan, "Rotunda," Dublin:—"Hospital beautifully clean; quite a pleasure to go over it."

Dr. James Donovan:—"I inspected this institution to-day. I find everything in perfect condition."

F. M. Blackwood, M.D., Summer Hill:—"The wards are kept scrupulously clean."

G. M. Smithers, S.M., Sydney:—"Everything in splendid order."

T. W. Faulkner:—"Found wards and grounds clean and tidy."

Richard Sellors, D.D., Sydney:—"Very much pleased with the hospital."

James Higgins, R.C. Bishop of Sydney:—"Have this day visited the Cooma Hospital, and have been much pleased with the cleanliness and good order observable, and as well with the kind attention of the worthy matron to her various patients."

These are some of the numerous entries in the Visitors' Book, which can be inspected at the hospital upon visiting days—Thursdays and Sundays, from 3 to 5 p.m.

13th June, 1898.

I am, &c.,

MATRON, COOMA HOSPITAL.

The Monaro Mercury, 17th June, 1898.

THE COOMA HOSPITAL.

(To the Editor of *The Monaro Mercury*.)

SIR,—A correspondent signing himself "Well-Wisher," refers to the hospital trouble. Sheltering himself behind a *nom de plume* suggested that he is only a well-wisher in word and not in action. He also shows what a great interest he has taken in the hospital by attributing the extrication of the hospital from financial trouble some twelve or eighteen months ago by certain "alleged reforms." Perhaps "Well-Wisher" will say how the reforms paid the back debts. If the hospital champion reflects a moment he will realise that it was the Jubilee Collections that removed the hospital from debt. The less said about the "reforms" the better for those who are doing the wire-pulling in the Government offices, in the hope of strangling a worthy institution so that the matron will have to retire, and an opening made for a pet "trained" nurse, of the extravagance of which the Cooma Hospital Committee had too much evidence.

As "Well-Wisher" states the "public" would like to know what I have to do with the matter, I will briefly reply—(1) the common feeling of humanity to assist the sick and suffering; (2) because I was asked to do so by the Committee; (3) because I am still a member of the hospital by reason of my subscription, a standing in the institution which I do not think "Well-Wisher" possesses. In every place—Cooma not excepted—there are people who criticise and injure, but who never assist by money or time.

The reason the subsidy is withheld is, that the committee refused to discharge without any cause a careful, competent matron, to make room for a "trained" nurse.

St. Peter's, Sydney, 15/6/98.

Yours truly,

W. M. MADGWICK.

(To the Editor of *The Monaro Mercury*.)

SIR,—With your kind permission I desire to reply to the letter which appeared in your issue of Monday last, regarding the Cooma Hospital difficulty, and signed "Well-Wisher," which is another of those stealthy and apparently vindictive attacks which has injured and is militating very much against the institution. The man who has written that letter is, I feel safe in saying, from the way he argues, one who has some knowledge of the affairs of the institution, and may have tried his prentice hand in its management, but who, perhaps, from a conscious knowledge of his own inability, or a disinclination to face the complications which lack of moral courage may have created, left the committee to work as best it could out of the difficulty. What arrant nonsense to say—"Having contracted debts which the funds of the hospital appear unable to provide for, it will devolve upon the committee personally to discharge these obligations." How very nice, and probably the very thing this "Well-Wisher" (?) would like. Do not the members of the committee regularly and generously contribute towards the necessities of the hospital? Would it not be a better task to have a more liberal garnishing of the truth in that letter, and frankly acknowledge that the committee, aided by the charitable public, have provided the funds for medical attendance, a first-class matron and nursing staff, the best of suitable food, good bedding, medicine, and all the comforts the patients stand in need of, and that towards the procuring of these things and the many other requisites to which I need not now allude, the committee has sacrificed both time and money, on the distinct understanding, inviolably observed and maintained by the Government, that the amounts raised by contributions would be subsidised pound for pound. This being so, can any reasonable man say that the Government have any justifiable excuse for withholding the subsidy provided by Act of Parliament.

The subsidy, nevertheless, has been withheld, and Mr. Madgwick, in his letter published in your columns of the 10th instant, supplies the reason why.

Speaking of his interview with Dr. Ashburton Thompson, he says, amongst other things, that "Dr. Thompson made to me the astounding assertion that the hospital was dirty and so badly managed that he had to assert his position, and stop the subsidy for so ill-conducted an establishment." Well might Mr. Madgwick declare his astonishment at the attempt by this man to get the Government to repudiate its liability and indebtedness.

There can be no doubt that such interference creates the impression that a secret motive is lurking somewhere, which, to say the least of it, is extremely unfair.

It is over three years since Dr. Thompson visited the hospital. He, therefore, can have no self-acquired knowledge of its condition or management during the past six months; so by this single fact he exposes himself (if correctly reported) to the suspicion of having acted from bias and under influences not creditable.

I would ask, should he not, as a doctor, have some compassion on the miseries and sufferings of those who, from necessity, are compelled to seek refuge within the walls of the hospital, instead of endeavouring to condemn the management and deprive the institution of its legalised allowance.

There can be no excuse for such conduct. "Well-Wisher," it would appear, innocently asks, "Why was the subsidy withheld?" He might as well ask why the cat jumps; but if he still wants to know as to why the subsidy was stopped, he can have the balance of the information later on. As to his inquiry "Why Mr. Madgwick interviewed the Government?"—it was for the reason that he was an old and respected member of the committee, thoroughly conversant with the hospital management and control, and because by a unanimous vote of the committee he was requested to call upon the Under Secretary and find out why the subsidy was held back. He kindly did as requested, and discovered reasons which I shrink from describing in any other words than his own against expressions that it is withheld "to satisfy a pique and not a medical necessity." I would recommend "Well-Wisher" to strive and find a better way of showing his disposition than by injuring the institution of the poor and unfortunate of Cooma and district.

ONE OF THE COMMITTEE.

(To the Editor of *The Monaro Mercury*.)

SIR,—Hospital quarrels seem the fashion all the world over, and as an old subscriber to the Cooma institution I am sorry to see we follow the general example. Your publication of the matron's testimonials in the visiting-book is hardly necessary in a "local" paper, as no "local" charge of dirtiness has yet been made against her. Dr. Ashburton Thompson having made the charge, it is to him that the matron should send the gilded volume. Mr. Madgwick, in his omniscience, ascribes our present deadlock to pique on Dr. Harvison's part. Without at all taking this gentleman's side, this statement of Mr. Madgwick's seems little else than an impertinent assumption. Moreover, it appears that our subsidy is withheld because

the

the public medical officer found (or says he did) the hospital dirty. It is open knowledge that years ago the hospital was certainly mismanaged, and the nurses were nothing but old Mother Gamps. Mrs. Dent (then Mrs. Palmer) was appointed, and under her regime the institution was vastly improved. So far, so good. But if the hospital is not sufficiently clean even now to suit Dr. Ashburton Thompson, this must be rectified, if he is correct in his statement. If he is incorrect, an inquiry must be instituted, and Mrs. Dent justified. As to Dr. Harvison's misunderstanding (so-called), I believe he contends that Mrs. Dent and her husband, not being qualified nurses (which he asserts the law demands), must retire, however hard it may be on them. We all must abide by the law, and if this is so, though not necessarily for incompetence, Mrs. Dent and her husband must give way to duly qualified nurses, who will be amenable to existing medical laws and regulations. But what with the committee squabbling, what with Dr. Harvison's pique, the matron's just indignation, and Mr. Madgwick's enterprising interference, the patients are—where? and the subscribers are ditto, which, being interpreted, meaneth "in the soup."

Yours, &c.,
CHARITY.

The Monaro Mercury, 20th June, 1898.

THE COOMA HOSPITAL.

(To the Editor of *The Monaro Mercury*.)

SIR,—You published several letters in your last issue on the above subject. I only intend to say one or two words. "Charity" (a misnomer, surely), charges me with "enterprising interference" for doing something the committee unanimously asked me to do. Whether it is an "impertinent assumption" or not (if it was so assumed by me), Dr. Ashburton Thompson certainly told me he had received a letter from Dr. Harvison whilst referring to the stoppage of the subsidy. It is about four years since Dr. Thompson visited the Cooma Hospital and made a report on the state of the institution, which report was forwarded to our committee for reply. An exhaustive reply was written by the then president, Mr. J. L. King, and unanimously endorsed by the committee at a full meeting. That reply refuted Dr. Thompson's charges, and showed them to be groundless—and I state this in the full knowledge of the high position held by that gentleman. From that day till now nothing has been heard of the matter, and not until Dr. Harvison's (and "Charity's" or some wire-pullers') complaints have reached the Health Officer, has there been any insinuation against the cleanliness of the Cooma Hospital. If it was such a dirty and mismanaged place as Dr. Thompson makes out, why did he not do his duty and stop the subsidy years ago? And why does he now rely on refuted charges four years old to assert his authority? He has either neglected his duty in the past, or the present movement is the result of pique, as I have already stated. As an old working member of the Cooma Hospital—one with "enterprising interference" as dear "Charity" puts it—I emphatically assert that Dr. Thompson's charges of "dirtiness" are groundless, and coming from a gentleman holding the high position he does, the nature of the charges reflect great discredit on an important department of the State.

Yours truly,
W. M. MADGWICK.

St. Peter's, Sydney, 15th June, 1898.

The Cooma Express, 17th June, 1898.

THE COOMA HOSPITAL EMBROGLIO.

THE local hospital committee seem to be in troublous times, judging by the report of the last meeting held. It would appear that the subsidy due, amounting to nearly £100, has not been forthcoming; that the committee have been running up bills to the amount of the subsidy due; and that the treasury chest is empty. The refusal of the Colonial Secretary to grant the subsidy is evidently based upon the non-recommendation for such payment by the Chief Medical Officer of the Government, Dr. Ashburton Thompson. The public have the word of one Mr. Madgwick, who, up till recently, ran a newspaper in Cooma, that he has interviewed Mr. Critchett Walker, Principal Under Secretary, and subsequently Dr. Thompson, in company with Mr. Henry Dawson, and the pair of them "had a go" at the old war horse, but he could not be coaxed or bullied by prayers, solicitations, or that one man commodity, "influence," in sanctioning the grant. Mr. Madgwick reports that he combated Dr. Thompson's statements. Fancy Madgwick "combating" any one with a grain of intelligence! It is really too funny. Whatever he did, or attempted to do, with the doctor, it would appear from his letter of explanation to the hospital committee, that he and his influential friend have made a complete hash of the matter; for, according to his curiously phrased epistle, Dr. Thompson refuses, under any circumstances, to budge from the position he has taken up. Mr. Madgwick's screed then goes on with colossal ignorance and unparalleled impudence to suggest to the committee that "political influence should be brought to bear upon Dr. Thompson, to force the doctor's hands." Did ever anyone read such damnable arrogance and impertinence? Does Mr. Madgwick imagine that Dr. Thompson will be browbeaten by Madgwick's suggested political coercion and corruption? The letter is a disgraceful production, and the committee have capped it by allowing its publication. How a body of sensible men could bring themselves to allow such a letter being published passes our understanding. Why, it is strong enough to justify the Government in refusing to have anything further to do with such a body of men. What they should have done was to have read the "letter," and straightway confined it to the flames as a ruinously dangerous document, calculated to do more injury than good to the cause. The committee, if they possessed a grain of sense, might know that no other construction could be put upon such a letter than a shameless proposal to browbeat into submission and stultification of his conscience an estimable officer holding a very high and exalted position in this Colony. We are not possessed of all the *pros* and *cons* of the case; but from what we do know, as outside observers, we feel satisfied that a mistake has been made somewhere which can be fairly and easily rectified without any political dodging on the part of the committee or anyone else. If the grant cannot be had otherwise than by "political influence" and coercion, the committee must have a weak and rotten case indeed. We are not believers in the system of the "political influence" suggested, and we are pleased to see that so far the "influence" trick has not yet come off with Mr. Madgwick and his friend. With the merits and demerits of the case we shall not deal at present. We have but one side of the case before us, and must hear Dr. Thompson and the local Government Officer in defence before we can arrive at a fair judgment. We are anything but satisfied with that windy letter from the Sydney delegate, and do not feel inclined to swallow it as gospel, as evidently the committee of the hospital do. We are not satisfied with the conduct of the committee in appointing Messrs. Madgwick and Dawson as interpleaders when the proper channel was through the representative of the district, and no plausible statement will satisfy either Mr. Miller or any other disinterested person that no offence was intended to our Member over the matter. The committee thought that Madgwick and "influence" were the men, and that Mr. Miller had no possible "show" if they could not work the business. So much is satisfactory, at all events, to Mr. Miller that he can do no worse, should the hospital committee decide upon enlisting his services in accordance with a resolution passed, than the mighty Mogul of the city. The snub Dr. Thompson has dealt out to the committee and its audacious delegate will have a salutary effect upon bodies of a like character who so far display their ignorance and spleen as to attempt to walk over the people's legitimate representative.

The last of the typhoid fever patients was discharged from the Cooma Hospital this week. The patient was Miss B. Cook, sister-in-law of Mr. Mark Rollason, junior. This makes the fourth case of typhoid treated and cured in the local hospital during the present quarter. Altogether, we are informed, there were thirty cases of various sorts admitted during the last six months, as against nineteen cases received during a corresponding period last year. All made good recoveries, and most happily not a single death occurred since the beginning of the year. This is a most exceptional record, as anyone can see, and speaks volumes for the good management and perfect cleanliness of the institution, also the extreme care and attention paid to the inmates by the nursing and medical staff of our local hospital. No amount of praise or partisan approbation could equal the eloquence of such facts; and it may safely be asserted that no hospital in New South Wales can boast this record for perfect recoveries, and absolute absence of mortality, of our much-maligned but admirable institution.

THE HOSPITAL MATTER.

(To the Editor of the *Cooma Express*.)

DEAR SIR,—Re the assertion in your last issue of "dirty," regarding the Cooma Hospital, the opinions of the following gentlemen, who have at different times during the last six years visited the hospital, may not at this time come amiss:—

David Collingwood, M.D., B.S., F.R.C.S., Prince Alfred Hospital, Sydney:—"Very pleased with the perfect cleanliness of this hospital, which I have carefully inspected throughout."

Dr. J. N. E. Maclellan, "Rotunda," Dublin:—"Hospital beautifully clean; quite a pleasure to go over it."

Dr. James Donovan:—"I inspected this institution to-day. I find everything in perfect order and condition."

F. M. Blackwood, M.D., Summer Hill:—"The wards are kept scrupulously clean."

G. H. Smithers, S.M., Sydney:—"Everything in splendid order."

T. W. Faulkner:—"Found wards and grounds clean and tidy."

Richard Sellar, D.D., Sydney:—"Very much pleased with the hospital."

James Higgins, R.C. Bishop of Sydney:—"Have this day visited the Cooma Hospital, and have been much pleased with the cleanliness and good order observable, and as well with the kind attention of the worthy matron to her various patients."

The above are some of the numerous entries in the Visitors' Book, which can be inspected at the hospital upon visiting days—Thursdays and Sundays, from 3 o'clock to 5 p.m.

MATRON, COOMA HOSPITAL.

(To the Editor of the *Cooma Express*.)

SIR,—Mr. W. M. Madgwick does not stand alone in the consternation he evinced on hearing the charges of being "dirty and badly managed" hurled at the staff of Cooma Hospital by Dr. Thompson, Chief Medical Officer, as reasons for withholding the Government subsidy from that institution. The writer has been treated at Cooma Hospital on two occasions, and when sorely pressed financially, on each occasion he being treated with eminent success (thanks to Dr. Joseph Ryan), for bad accidents, at this sanitarium—for, under the watchful eyes of the matron and her husband (the wardsman), such it literally is. On the occasion of my last visit the same strict rules as to cleanliness of person and surroundings existed—intensified, if possible—as obtained during my former residence as an inmate. Indeed, a patient's qualifications in this respect, as it appeared to me, seemed to be a test of his desirability as an inmate. Mr. Madgwick tells the president and committee that he "combated the dirty business," and to this writer's positive knowledge a number of ex-patients can be brought forward to corroborate him. At this point we arrive at the charge made by Mr. Madgwick of "pique" being at the bottom of the miserable affair, and which charge has not been refuted. This being so, don't you think, Mr. Editor, it looms up luridly in the light of the latter end of the nineteenth century advancement that relief of the sufferings of the sick poor should be jeopardised by, or put in antagonism with, the action of personal pique, or the working out of an unsatisfied vendetta. The odium and lasting distress of the community, especially the toilers, will have been well-earned by the party or parties who, for their own evil ends, will be instrumental in diverting the Government subsidy from the much maligned, but wholly beneficial, Cooma Hospital. With apologies for trespassing on your space, I beg to subscribe myself,

Yours, &c.,

ALEXANDER DEVEREUX,

Miner, Kiandra

(at present in Cooma).

[Consequent on the remarks of Dr. Thompson, Chief Medical Officer, in connection with the Government staff, as given for not recommending the payment of Government subsidy to the Cooma Hospital, by the above letters, the report on which Dr. Thompson bases his refusal to recommend the payment cannot have any grounds to stand on. The climax has now been reached, and the services of Mr. Miller, M.L.A., are to be utilised in urging the payment of the subsidy, and who, no doubt, will urge the sending up of an independent medical man to report on the charges made, which is an absolute necessity in the interests of the management of the institution, the officers, and for the good of the community, for no community can afford to have so beneficial an institution as a hospital closed as ours is threatened to be in this summary way through want of funds; and, besides, the stigma now cast upon the management and officers must be cleared away once and forever; and in view of the stand of Dr. Thompson in stating that nothing will shift or alter his decision, an independent report must be demanded to enable the granting of the subsidy, notwithstanding Dr. Thompson's opinions as to the management, &c., to the contrary.—ED. C.B.]

The Secretary, Cooma Hospital, to The Principal Under Secretary.

Sir,

Cooma Hospital, Cooma, 21 June, 1898.

I have the honor, by direction of the President of the Cooma Hospital, Major Faulkner, to convey to you the following resolution, unanimously passed at a special meeting of the committee of the hospital held last night, viz.:—"That the Honorable the Colonial Secretary be approached with regard to the withheld subsidy due to the Cooma Hospital, as we are informed that the Chief Medical Adviser had advised the Government adversely to its payment on an unjustifiable report, stating that the hospital is dirty and insanitary, and containing some other more trivial complaints. We now respectfully demand, in justice to the committee, that a copy of that report be forthwith supplied to us, so that we may know exactly of what remissions we are accused. Further, as the committee unanimously declare that report to be utterly untrue and unfounded, and as Dr. Thompson acted on it without any proper inquiry or examination, and as the aforesaid report is entirely unsupported by corroborative evidence, we humbly beg that in fair play and common justice to this committee a sworn inquiry be had on the whole matter, and that a magistrate be sent from Sydney to conduct it in due form."

I have, &c.,

HUGH H. MACDONNELL,

Secretary.

G. T. C. Miller, Esq., M.P., to The Chief Secretary.

Dear Mr. Brunker,

Parliament House, Sydney, 24 June, 1898.

I am enclosing letters from the Cooma Hospital Committee *re* subsidy. I shall take the opportunity of interviewing you personally during the coming week, with your consent, on the matter, after the debate on the Address-in-Reply has been concluded.

Yours, &c.,

GUS. C. MILLER.

Refer to Chief Medical Officer.—J.N.B., 24/6/98.
Treasury for payment on 6th July, 1898.

Claim detached and forwarded to the

[Enclosure.]

[Enclosures.]

G. T. C. Miller, Esq., M.P., Cooma,—

Dear Sir,

Cooma Hospital, 21 June, 1898.

Referring to your interview with the President of the Cooma Hospital, Major Faulkner, respecting the subsidy due thereto by the Government, and his desire, and that of the committee, that you should interview the Hon. the Chief Secretary thereon, I am desired to lay before you the following facts:—

That under the Act to further amend the law relating to the management of hospitals, assented to on the 31st October, 1894, the committee of any hospital, notwithstanding anything contained in the Principal Act, has the power alone, and states shall, *inter alia*, appoint the matron.

Further, the present matron, Mrs. Dent, then Mrs. Palmer, was appointed matron of the Cooma Hospital on the 14th July, 1892, and that as the regulation respecting certificated nurses as matron was not retrospective, and the matron has not been guilty of any misconduct or breach of discipline, the committee, who hold her in the highest of esteem, cannot, in view of her long and meritorious service, dispense with her in order that private pique and spleen may be satisfied.

The Medical Officer to the Government, in his report to the Chief Medical Adviser of the inspection he made of the Cooma Hospital, dated 6th June, 1895, although aware the matron was not a trained nurse, said, "I am not aware that she (the matron) is an unsatisfactory officer in any other respect."

As a proof of her excellent nursing, I am to add that during the past four months there were treated, amongst other patients, four with very severe attacks of typhoid, who, thanks to her assiduous care and watching, are now about, and loud in her praise of treatment.

Whilst intimating to you by the request of the committee the thorough satisfaction which the matron has given them, as well as the general public who have been admitted to the institution, of which you are doubtless aware, I am to draw your particular attention to the subjoined extracts from the Visitors' Book:—

Dr. Collingwood, M.D., B.S., F.R.C.S., Prince Alfred Hospital, on the 13th July, 1893, wrote:—"Very pleased with the perfect cleanliness of this hospital, which I have carefully inspected throughout."

G. M. Smithers, Stipendiary Magistrate, Sydney, wrote on 8th November, 1894:—"Everything in splendid order." Major Faulkner, Mayor of Cooma, wrote on 8th November, 1894:—"Found wards and grounds clean and tidy."

Rev. R. Sellors, D.D., Sydney, on 13th May, 1895, wrote:—"Very much pleased with the hospital."

Dr. Higgins, R.C. Bishop of Sydney, wrote on the 13th September, 1895:—"Have this day visited the Cooma Hospital, and have been much pleased with the cleanliness and good order observable, and, as well, with the kind attention of the worthy matron to her various patients."

Dr. J. N. E. Maclellan, "Rotunda," Dublin, wrote on the 21st September, 1895:—"Hospital beautifully clean; quite a pleasure to go over it."

Dr. James Donovan, of Cooma, on the 15th June, 1894, wrote:—"Inspected this institution to-day; I find everything in perfect condition."

Dr. Blackwood, M.D., Summer Hill, Sydney, on 18th May, 1895, wrote:—"The wards are kept scrupulously clean."

As you are now to some extent seized with the whole matter, I, with every confidence, leave the matter in your hands,

I have, &c.,

HUGH H. MACDONNELL,

Secretary.

Dear Mr. Miller,

By direction of the President I am forwarding you a copy of the resolution which the committee unanimously passed last evening, which is as follows:—"That the Honorable the Chief Secretary be approached with regard to the withheld subsidy due to the Cooma Hospital, as we are informed that the Chief Medical Adviser has advised the Government adversely to the payment on an unjustifiable report, stating that the hospital is dirty and insanitary and containing some other more trivial complaints. We now respectfully demand, in justice to the committee, that a copy of that report be forthwith supplied to us, so that we may know exactly of what remission we are accused. Further, as the committee unanimously declare that report to be utterly untrue and unfounded, and as Dr. Thompson acted on it without any inquiry or examination, and as the aforesaid report is entirely unsupported by corroborative evidence, we humbly beg that, in fair play and common justice to this committee, a sworn inquiry be held into the whole matter, and that a magistrate be sent from Sydney to conduct it in due form."

The foregoing was sent by this day's mail to the Principal Under Secretary.

H. H. MACDONNELL.

The Principal Under Secretary to The Committee of Management of the Cooma Hospital.

Gentlemen,

Chief Secretary's Office, Sydney, 6 July, 1898.

With reference to the claim made for subsidy in aid of the Cooma Hospital for the period 1st July to 31st December, 1897, I am directed by the Chief Secretary to inform you that, upon the personal representations of Mr. G. T. C. Miller, M.P., the Chief Medical Officer, to whom the matter was again referred, has withdrawn his objections to the payment of the above claim, on the distinct understanding that before payment of the next claim a qualified trained nurse will be appointed at that institution.

2. I am to request, therefore, that you will kindly take the necessary action, and also to state that the Chief Medical Officer has made no report as to the mismanagement at the above institution.

I have, &c.,

CRITCHETT WALKER,

Principal Under Secretary.

The Secretary, Cooma Hospital, to The Principal Under Secretary.

Sir,

Cooma Hospital, Cooma, 22 July, 1898.

With respect to your letter of the 6th instant, wherein you state "the Chief Medical Officer, to whom the matter was again referred, has withdrawn his objections to the payment of the above claim (subsidy), on the distinct understanding that before payment of the next claim a qualified trained nurse will be appointed at that institution,"—I am desired by the committee of the Cooma Hospital to convey to you the underwritten resolution, which was unanimously passed at the monthly meeting held on the 13th instant:—"That as the present matron has held the position for six years, and has given the various committees during that time full satisfaction, we, the members of this committee, recognising the care, skill, kind-heartedness, and ability which she discharges her onerous duties, fail to recognise how we would be justified in dismissing her, and therefore decline to do so."

I have, &c.,

H. H. MACDONNELL,

Secretary.

Refer to the Chief Medical Officer.—C.W., B.C., 26/7/98.

The

The Chief Medical Officer to The Principal Under Secretary.

Memorandum.

Office of the Chief Medical Officer, Sydney, 29 July, 1898.

It appears to me that it now rests entirely with the Minister to insist, or not to insist, on the condition being fulfilled upon which the last half-year's subsidy has just been paid, and from which the committee now appear anxious to recede. I do not think, therefore, that I can make any further useful remarks except this: that the country hospital referred to in the circular No. 94-15,612, dated December, 1894, which begins, "An official inquiry recently held at the instance of the Government in relation to a country hospital having disclosed the fact that there was a serious lack of supervision and management," was the Cooma Hospital, and that I was led to recommend the rule approved by the Minister in section 1 of that circular by the circumstances of that case and by my examination of the matron (Mrs. Dent). The circular in question—which was framed for the advice of hospitals in general—spoke of the future as regarded them, but was entirely without prejudice to the special case of the Cooma Hospital, which was the subject of a special report. I would, therefore, repeat the opinion I have expressed in the third paragraph of my letter, dated 25th November, 1897, namely, that it is highly desirable that the recommendation made in my report of 1894 with reference to the matron should be carried out.

J. ASHBURTON THOMPSON.

1898.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

BOARD OF HEALTH.

(REPORT OF THE PRESIDENT ON THE MANUFACTURE AND SALE OF MARGARINE.)

Printed under No. 9 Report from Printing Committee, 27 October, 1898.

Department of Public Health, New South Wales, 11 October, 1898.

REPORT ON THE MANUFACTURE AND SALE OF MARGARINE.

DURING the year 1888 margarine was manufactured and sold under the name of butterine by a company styled "The Butterine Company of Sydney." It had a depôt at 163, King-street. Its manufacturing premises were at Alexandria, and were visited by the Chief Medical Inspector to the Board of Health. The product, though coloured and flavoured to resemble butter, was fully described in the company's advertisements, together with the materials from which it was prepared, and the method of making it. There was no attempt at deception; it was offered to the public for what it was. After a short time this company ceased to trade in Sydney.

Oleo-margarine, margarine, or butterine, is a perfectly wholesome article of food. It is made from the kidney and caul fat of beeves, which is minced while quite fresh, washed and heated. The liquid fat thus produced is then deprived of the greater part of one of its constituents (tristearine) either by cooling, or, after cooling, by hydraulic pressure. The separated fat is known as oleo-margarine; it is churned up with water, skim-milk, and butter-colour; it is then salted and worked in an ordinary butter worker. There is thus nothing objectionable about it; it is an animal fat, perfectly adapted to food purposes. The worst that can be said of it is that it may be somewhat less digestible than butter-fat; but this difference, if it exist, is so slight as to be of no importance.

The flavouring and colouring of margarine to resemble genuine butter do not necessarily betoken fraud; but they open an easy way to it. Margarine is said to be producible at a cost of about 3d. a pound. This price is so greatly below that of butter that margarine could be loaded with a heavy profit, and still be sold by a retailer at a price to which genuine butter never falls. Consequently, the temptation to do this when the means are available must sometimes be strongly felt. However, the fraud, if committed, is a fraud upon the pocket, and entails no more serious result. But if margarine, disguised to resemble butter should be exported from this country, and be sold as New South Wales butter—still more, if this should be done with assistance of the further and distinct fraud which consists in packing margarine in packages identical with those used by reputable butter factories, and bearing their brands—then it would be necessary to take prompt steps to regulate its manufacture and sale, so that it could not by any possibility be mistaken for butter. It is easy to see that unless this were done the reputation of New South Wales in the butter market might easily be destroyed; and if the remedy were not promptly applied, that that reputation might in the meantime sustain an injury from which it would scarcely recover in many years.

During July last it came to the Board's knowledge that margarine was being again manufactured in Sydney in rather large quantity. The Sanitary Inspector to the Board was directed to make full inquiry, and he subsequently presented the reports which are attached hereto. The result of the inquiry was as follows:—In the first place, three margarine factories were discovered, which, between them, could put out probably not less—possibly more—than 12 tons weekly of the finished article between them. Secondly, the finished product was so coloured and flavoured as to resemble butter closely. Thirdly, at each of the three factories, many butter-boxes were found which bore the brands of no less than twenty-four different butter-factories of high repute. Further inquiry revealed the destination of the comparatively small quantity of margarine mentioned above, which alone is produced for the present. It appears that a considerable proportion is used up by pastry-cooks, who are said to prefer it to butter, both on account of its higher melting-point, and its better keeping qualities. Another considerable proportion is supplied to shipping, and in that case is invoiced as "butterine"; a considerable quantity is consumed at cheap restaurants, whose customers are said to know what it is, and to prefer it to the stale butter which proprietors can afford to supply at the low price they charge for meals. Lastly, two retail shops were discovered at which margarine was sold as cheap butter—one situated at Newcastle, the other at Sydney.

On receiving this information, the Board directed the only steps to be taken which, for the present, lie open to it. It directed that the two retail traders last mentioned above should be prosecuted under the adulteration part of the Public Health Act, and this was successfully done, a conviction being obtained in each case. [See Appendix B.] It further directed that all existing makers of margarine should be licensed, after inspection of their premises, under Part I of the Noxious Trades and Cattle Slaughtering Act, 1894, since they clearly fell within the proclaimed class of fat-extractors; and that any who might commence business in the future without first obtaining a license should be prosecuted.

Such proceedings under the Public Health Act, if watchfully and steadily taken by local Authorities in their several districts, would amply suffice to protect the public against any fraudulent substitution of margarine for genuine butter, and the Board's requirement that all factories shall be licensed will enable supervision to be kept up, which in its turn will afford some information as to development of this trade, and the destination of its products; but, for obvious reasons, these measures cannot protect the dairying industry from the serious dangers by which, as has already been pointed out, it is threatened from this source.

While the proceedings which have just been briefly described were in progress, an important deputation which well represented the butter trade, was introduced to the President of the Board by Messrs. Kidd and Perry, M's.L.A. The speakers pointed out the immediate damage they suffered from the substitution of margarine for butter, though they admitted that for the present this was not a very important matter; but they earnestly urged the Board to assist them in taking steps to prevent the injury to the butter export trade, which they apprehended would be done to it. They mentioned the damage which had actually had been done to that trade both in Great Britain and the United States, and the legislation which had been deemed necessary in both of those, as well as in other countries, to protect it; and they made the important remark that it would be difficult to regulate the manufacture of margarine if the attempt to do so were deferred until that business should have attained much larger proportions than it has at present. They mentioned the value of the reputation of New South Wales for high-class butter, which had been gradually built up with great labour by improving the conditions under which dairy-farming was carried on (in which the Board itself had taken its important share), and at great expense, and pressed that steps should be speedily taken to prevent margarine from being sent out in a form in which it could be represented as, and might be mistaken for, genuine butter.

With these views and wishes the Board finds itself, on the whole, in sympathy. The manufacture of margarine is a legitimate industry; margarine itself is a wholesome food. That it should be flavoured like butter, or in any other way, is unobjectionable, and perhaps might be fairly said to be necessary; but that it should also be coloured so as to resemble butter is not necessary, and should be forbidden.

J. ASHBURTON THOMPSON,
Chief Medical Officer of the Government,
President of the Board of Health.

APPENDIX A.

REPORTS from Sanitary Inspector to The Secretary to the Board of Health.

Subject :—Manufacture and Sale of Margarine.

6th August, 1898.

I VISITED Daniel and Thomas Hannan's Margarine Factory, situated at 415, Parramatta-road, Leichhardt, on 4th instant.

The premises consist of a fair-sized timber and iron building, which is in very good repair. The floors are partly bricked, partly timbered. The interior is well lime-washed and clean.

Thomas Hannan, one of the proprietors, showed me through the place and explained their method of manufacturing margarine.

The raw material consists of "caul-fat" from bullocks. It is procured at the Glebe Island Abattoirs, Mackay's Slaughter-yards, at Canterbury, and the Riverstone Meat Works. This fat is received daily, and is treated directly after arrival.

On the upper floor this fat is cut up in a chaff-cutter; then it is passed into a pulper with hot water. From here it goes into a large wooden vat, where it is melted by means of a steam coil. In another vat, supplied with a steam coil, the margarine is separated from the stearine, which process is easily accomplished, as the melting point of the former is much lower than that of the latter.

This product is then churned, and during this process $\frac{1}{2}$ pint of Wells and Richardson's butter-colour, 3 lb. of salt, and 10 gallons of separated milk are added to every 35 gallons of fat. From the churn the margarine passes into a trough, where it is solidified by ice-water. It is then worked up in an ordinary butter-worker, and packed in boxes similar to those used for butter.

Mr. Hannan states that their output amounts to about 4 cwt. a day. In the main building, and close to the front door, I found two kegs containing margarine ready to be sent out. These kegs were branded "Wollar Dairy Company."

I also saw sixteen boxes of margarine, and of these four were branded as follows :—

- (i) Choice Creamery Butter.
Lyre-bird Brand.
- (ii) Richmond River
Creamery Butter.
- (iii) Finest Creamery Butter.
Rose Brand.
- (iv) North Coast Co-operative Company (Ltd.)
56 lb. net Creamery Butter.

The remainder of the boxes had only a few private marks in blue colour.

When questioned as to why they used these butter-boxes, Mr. Hannan replied: "These boxes are returned to us empty when we deliver full ones."

I said that this was very misleading, as people might think that they were buying butter when they were actually supplied with margarine. Mr. Hannan said that the only people whom they supplied were pastry-cooks and confectioners, and these people bought it as "margarine," and not as "butter."

This firm has been established for about seven years. They have lately altered their mode of manufacture. Formerly the fat was pressed in an hydraulic press, but this has been abandoned for the method described above.

Mr. Hannan positively assured me that they never supplied any of this margarine to retail dealers in or about Sydney, but in the afternoon of the same day I succeeded in finding a shop where margarine is sold in retail. This shop is kept by a man named Edward Moore, and is situated at 708, George-street, Sydney.

I entered the shop about 2:30 p.m. There were several customers inside, and after they had been served I asked the shopman, named Andrew Watson, "How much is this butter a pound?" at the same time pointing to a box containing what to any ordinary customer would appear to be butter. The shopman replied, "Six-pence." I said, "Give me a pound." He then commenced supplying me with this article, when I said, "Let me have a look at the outside of the box." He replied, "I don't know so much about that." I then informed him that I was an officer of the Board of Health, and that I was entitled to my demand. I turned the box over, and then found the box branded:—

"North Coast Co-operative Company, Ltd.,
56 lb. net Creamery Butter."

this being exactly the same brand as I found on one of the boxes I saw at Hannan's factory at Leichhardt in the morning. The shopman then informed me that it was not butter but "butterine." I then demanded 1 lb. of this material labelled butter. He supplied me with it. I paid 6d. I then informed him that I would have it analysed by the Government Analyst, and offered to divide it according to the Act, but my offer was not accepted. I thereupon sealed up the sample, and marked it "XXX P.E.G., 4/8/98." I also notified the shopman that I would hand it over to Mr. Hamlet at 2 p.m. the next day, and that if he liked he could be present to see that it was handed over in the same condition as when purchased at the shop. He replied that he would not come.

While I was fastening up the sample, the shopman volunteered the statement, "If anyone asks what this is, I tell them that it is pastry-butter."

The box containing this margarine, or "butterine," as the shopman called it, was standing on a shelf alongside some boxes containing genuine butter, and over this shelf was a calico sign showing the different prices of butter in figures 1 foot high.

The sample of margarine bought by me, and which was labelled "Creamery Butter," was handed over to Mr. Hamlet at 2 p.m. on 5th instant, but no one put in an appearance.

From inquiries, I find that this margarine, or butterine, is used by a great number of pastry-cooks, who claim that it is much better than cheap butter, which, especially in summer, turns rancid much sooner than margarine. These people know when purchasing it that it is not butter, so there is no deception in their case.

I also find that a number of cheap restaurants, where meals are supplied for 3d. and 4d., use nothing else on their table. The proprietors tell me that their customers know full well that it is butterine; in fact, since this material is used very few complaints are received in comparison to the time when cheap inferior butter was supplied at these restaurants.

I am given to understand that this provision dealer, Edward Moore, supplies a large number of the lower class restaurants with margarine. He sells about seven to eight boxes a week.

On the 6th instant I visited the margarine factory, carried on by the Sydney Soap and Candle Company, in Bourke Road, Alexandria.

Mr. Sealey, the manager, showed me through the place, and gave me all particulars I asked for.

These premises were some years ago used as a butterine factory, but have been unoccupied until three weeks ago, when the manufacture of margarine or butterine (as the company calls it) was commenced.

The building, constructed of timber and iron, has brick flooring, and as far as cleanliness is concerned, it does not leave anything to be desired.

The caul-fat used is sent from Glebe Island and from the Aberdeen Meat Works in bags.

The process of manufacturing the product is similar to that in use at Hannan's, but here the stearine is separated from the margarine by means of hydraulic presses.

The finished article is put into butter-boxes. I found nineteen full, and the following brands were on them:—

"Chowbaleo Factory, Bega."
"Balance Creamery, N.Z."
"N.S.W. Creamery Butter Company (Ltd.)"
"Finest Grass Butter, Duckenfield Park Estate."
"Choicest Creamery Butter."
"Grabben Gullen Co., Com."
"Monaro Creamery Butter."
"Finest Creamery Butter, Cowslip Brand."
"Central Creamery, Mogilla."
"L. C. Creamery Butter."

In another part of the building I found about 200 empty butter-boxes, and amongst them there were some with the same brands as those mentioned above, and the others with the brands given below:—

"Taralga Co-operative Com."
"Northern Central Creamery Butter Factory, Lismore."
"Crookwell Creamery Butter."
"Island Creamery, Kameruka."
"Lyndhurst Creamery Butter, Burrigale."
"Berry, Shoalhaven Creamery."
"Barrengarry Dairy Company, Creamery Butter."
"Bonnie Doon Butter Factory, Victoria."
"Finest Grass Butter, Camden Park Estate."

There were not more than ten unbranded boxes amongst the 200. The output, so far, has been about 7 tons for three weeks; the full capacity of the work is 1 ton a day.

Mr. Sealey informs me that a large amount of their product has been taken by the Union S.S. Company, on whose vessels it is used. The greater part, however, is put up in 10-lb. canisters, and is sent to Newcastle for ships' use. Mr. Sealey says that they invoice it as butterine, but I doubt very much if shipmasters buy it as such.

I would suggest that I be allowed to make further inquiries at Newcastle to ascertain if this material is sold as butter, and if so to take proceedings against such people.

The article manufactured by the Sydney Soap and Candle Company is superior in grain and "butter" taste, but inferior as to freshness, as it is slightly rancid. This latter fact, however, is likely to deceive people. The "flat" taste of perfectly sweet margarine makes it easy to detect it.

I think that the butter companies could do much to protect their interests against deception, by taking proceedings to restrain manufacturers of margarine from using their empty boxes. A reference in the Press to this fact just mentioned, and to the great number of branded boxes being found in those two factories, would put people on their guard, and prevent imposition on a trusting public.

Sanitary Inspector to pursue his inquiry at Newcastle, and report.—J.A.T., 9/8/98.

13 August, 1898.

I visited the licensed premises of a poultry-farmer named Thos. Doody in Bennett's Road, Alexandria, this day, and found that he had lately commenced to manufacture margarine.

The mode of producing the article at this place is similar to Hannan's, but the quality and appearance are very much below that obtained by Hannan's and the Sydney Soap and Candle Company. Doody makes about 200 lb. a week, and this is packed in square boxes, one of which was branded—

"Finest Grass Butter, Duckenfield Park Estate."

Doody showed me his delivery book, and in this I found that the article was sold as "butterine," and his price is 5d. a lb. The premises, although primitive, are clean and well-kept.

This is the third factory where margarine is made, and I think that they are all liable to be prosecuted for carrying on a noxious trade, namely, that of "fat-melter," without a license. If they were licensed it would facilitate any inquiries as to the manufacture and sale of margarine in the future, and would compel these people to keep their premises in clean order and condition.

PAUL E. GETTING,
Sanitary Inspector.

Department

Department of Public Health, Analytical Branch, Sydney, 10 August, 1898.

Certificate of Analysis.

The sample of margarine, properly sealed and marked or labelled "XXX P.E.G., 4/8/98," received 5/8/98 from Mr. Sanitary Inspector Getting, has been examined with the following results:—

Section 62 (11) (a). I hereby certify that I have analysed the sample of margarine marked "XXX P.E.G., 4/8/98," handed to me on the 5th instant by P. E. Getting, and I am of opinion that the same is not butter. The substance was found to consist of a preparation of animal fat known by the names of margarine or butterine.

WILLIAM M. HAMLET,
Government Analyst.

In this case, I think a prosecution should be undertaken, and shall be glad if the Crown Solicitor will be good enough to cause the requisite legal assistance to be given.—J.A.T., B.C., 11/8/98. The Crown Solicitor.

REPORT from Sanitary Inspector to the Secretary to the Board of Health.

17 August, 1898.

I VISITED Newcastle on 15th and 16th instant, with the view of making inquiries as to the sale of margarine at that place.

I find that the firm of E. Ball and Son is the local agent for the Sydney Soap and Candle Company for that commodity, and this firm has, within the last few weeks imported a fair quantity thereof. The main part of this margarine or butterine has been sold to ship-chandlers, who supply it to the masters of vessels provisioning at Newcastle. It is sold in tin cans, as I saw at this company's works at Alexandria, and on the invoices it is termed butterine. I saw several ship's accounts and thus verified the statements made by the firm. The remainder of the butterine sent from Sydney has been sold to a grocer named Geo. Ball as butterine. On the 15th instant I saw some of this butterine in his shop window, and labelled 9d. I went in and asked for 1 lb. of 9d. butter, and I was served by one of the assistants named W. Coulter. I then complied with the requirements of the Act. My offer to divide my purchase was, however, not accepted, so I sealed up the parcel in Coulter's presence, and this morning I handed it over to Mr. Hamlet for analysis. After I told the shopman who I was, he informed me that his employer sent it from his other shop as butter, and that he only obeyed his instructions. I also visited a number of grocers' shops in Newcastle, Lambton, and Wallsend, where this butterine had been sold as butter from some time previous to my visit. I was, however, unable to obtain another sample.

After I had bought this butterine at Ball's shop, two different people purchased some of it as butter, thus clearly showing that the public have been deceived, and would continue to be deceived. I made inquiries from all the principal pastry-cooks in Newcastle, and find that these people have been in the habit of using butterine for some considerable time. These, however, obtain their supplies from Hannan's factory at Leichhardt, which they consider far superior for their trade than the article produced by the Sydney Soap and Candle Company. I would recommend a prosecution in this case to show the public how they have been duped.

PAUL E. GETTING,
Sanitary Inspector.

Department of Public Health, Analytical Branch, Sydney, 18 August, 1898.

Certificate of Analysis.

The sample of margarine or butterine, sealed and secured, and marked or labelled "Geo. Ball, Hunter-street, 15/8/98, P.E.G.," received 17/8/98 from Mr. Sanitary-Inspector Getting, has been examined, with the following results:—

Section 62 (11) (a).—I hereby certify that I have analysed the sample of margarine marked "George Ball, Hunter-street, Newcastle, 15/8/98, P.E.G.," handed to me on the 17th instant by P. E. Getting, and I am of opinion that the same is not butter.

The substance was found to consist of a preparation of animal fat, known by the name of margarine or butterine.

WILLIAM M. HAMLET,
Government Analyst.

The Sanitary Inspector to prosecute.—J.A.T., 20/8/98.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

DISEASED ANIMALS AND MEAT BILL.

(PETITION FROM CERTAIN BUTCHERS AND STOCK-BUYERS OF THE NORTHERN DISTRICT OF NEW SOUTH WALES, IN FAVOUR OF.)

Received by the Legislative Assembly, 4 October, 1898.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Inhabitants of New South Wales—butchers and stock-buyers of the Northern District,—

HUMBLY SHOWETH :—

That a Bill, entitled “To provide for the refund of the purchase money of any animal or carcass sold by auction, and condemned under the Diseased Animals and Meat Act of 1892, and the return of the animal or carcass to the auctioneer,” has passed its first reading in your Honorable House, having for its object—

1. That it is unjust that the butcher or purchaser should have to bear the loss of a diseased animal or animals, which he purchased as sound and healthy.
2. That the producers, knowing that they would have to bear the loss of all diseased animals sold on their behalf, would take steps to purify their herds, and send only healthy cattle to market.

Your Petitioners, therefore, humbly pray your Honorable House to pass into law the Bill hereinbefore mentioned.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 75 signatures.]

PURCHASE AND IMPORTATION OF STOCK BY THE
GOVERNMENT.

(RETURN RESPECTING.)

Printed under No. 13 Report from Printing Committee, 24 November, 1898.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 21st September, 1898, That there be laid upon the Table of this House,—

“ All letters, papers, minutes, correspondence, &c., respecting the purchase and importation of the cattle and pigs landed or expected to arrive from England or Europe.”

(Mr. Suttor.)

The Under Secretary for Mines and Agriculture to The Under Secretary for Finance and Trade.

Sir, Department of Mines and Agriculture, Sydney, 24 December, 1897.

I am directed by the Secretary for Mines and Agriculture to request that you will be good enough to have the enclosed letter concerning the purchase of certain breeds of dairy cattle and pigs forwarded to the Agent-General.

I have, &c.,

D. C. McLACHLAN,

Under Secretary.

Letter forwarded, 24/12/97. A.F., Records. The Under Secretary for Mines and Agriculture,—The communication herein referred to has been forwarded as desired.—F.K., the Treasury, B.C., 24/12/97. Approved.—J.H.R., 28/12/97.

The Secretary for Mines and Agriculture to The Acting Agent-General.

Sir, Department of Mines and Agriculture, Sydney, December, 1897.

I have the honor to inform you that the Government are desirous of improving the breed of the dairy stock in this Colony, with a view to promoting an increase of exports in dairy produce, and it has been decided to import through you, if suitable prices and other matters can be arranged, a number of selected cattle from the best herds in Great Britain. The following is a list of the special cattle it is desired that you will obtain quotations for, and, if eventually purchased, to arrange for their shipment to the Colony:—

Shorthorn ...	{ Bulls, 4. Cows, 6.	Kerry ...	{ Bulls, 3. Cows, 4.
*Shorthorn, Irish	{ Bull, 1. Cow, 1.	Holstein ...	{ Bulls, 3. Cows, 6.
Ayrshire ...	{ Bulls, 2. Cows, 5.	Dexter Kerry ...	{ Bulls, 2. Cows, 2.
Jerseys ...	{ Bulls, 4. Cows, 6.	Red Polls ...	{ Bulls, 3. Cows, 3.
Guernseys ...	{ Bulls, 3. Cows, 6.	(milking strain)	{ Cows, 3.

It

* These to be obtained from the South of Ireland.

197—A

[580 copies—Approximate Cost of Printing (labour and material) £28 11s. 4d.]

It is to be one of the essentials that as the cattle are being imported to improve our stock they shall be only of the best breed. The main feature in any that are selected is that they should be of a good milking strain—that is, large producers. Special care in this respect should be taken in the selection of the bulls, and it should be ascertained that their mothers are of a good milking strain. A guarantee of the quantities and quality of milk the dams produced should be given where possible.

In this matter it is recognised that you will require the assistance of some well known expert to enable you to have the selection made, and you are hereby authorised to incur any reasonable expense on behalf of the Government in this direction.

It is left to your discretion to select the breeders from whom you purchase the cattle, but probably you will find it of advantage to communicate with the following persons in regard to some of the animals.

All breeds:—

Mr. Robt. Bruce, Superintendent of the Royal Dublin Society, who will furnish valuable information as to where the best breeds can be obtained.

Jerseys:—

Baron Rothschild of Tring Park.
Lord Roseberry.

Kerry's and Dexter's:—

R. Barter, St. Ann's Hill, County Cork.

In the case of the bulls, their ages are not to be less than 2 or over 4 years, and the cows are not to be over 6.

It is to be a condition that any animal to be shipped must be subjected to the tuberculin test, and that the ship in which they are conveyed shall not take in fodder or anything else at the Cape that would be likely to communicate Rinderpest or any other contagious disease of that character.

I wish to specially direct your attention to the question of freight charges. Hitherto, these have been so high as to be quite prohibitive, so far as the ordinary farmer is concerned, in importing for himself; but in view of the large number in this shipment, it is thought that, by inviting offers from the steamship companies trading to this port, you will be able to secure a considerable reduction in the freight. I have myself spoken to some of the Agents here, and have also communicated with the Manager of the Houlder Brother's line on the matter. Special arrangements will, of course, have to be made for the transit of the cattle; but in any conditions made, the freight should include all fodder and attention on the voyage. In case, however, that a large number of the cows are milking, and will require to be milked daily, it would perhaps be advisable to arrange for a caretaker to be sent with them to carry out this work.

As the stock will be valuable they should be insured before they leave England.

When you have completed negotiations, I would be glad if you will kindly cable me the list of prices for the different breeds of stock required, and also the lowest rate per head at which you have been able to get the freight quoted.

Advantage might also be taken of the opportunity to ship a few pure-bred pigs, and I would be glad if you could obtain quotations for the following breeds:—

Berkshire	Two boars and sows.
Large White Yorkshire	" "
Middle "	" "
Improved Tamworth	" "

Before making arrangements for the purchase of the pigs, I would suggest that you communicate with Mr. Barnes, Baslucks Green Farm, Shirley, Birmingham, who has I understand some experience in purchasing pigs for this market.

I have, &c.,

S. SMITH.

Minute by The Secretary for Mines and Agriculture.

Importation of Dairy Stock to Improve the Breed of Cattle in the Colony.

3 December, 1897.

THIS is a question of very great importance to the Colony, and I desire to bring it under attention with a view of some steps being taken to bring about an improvement in the breeding and milk-producing qualities of our stock.

It is now being recognised in all the large dairying countries that this is a matter in which the State should assist its people. It is being done elsewhere, and I think the Government here should make every effort to advance the industry in this Colony. Its most pressing want at the present time is a radical improvement in the dairy herds, and if we are to take our part in supplying the wants of Great Britain, or, indeed, of even maintaining our present successful export trade, it is absolutely necessary that the best quality only be produced with the least possible expense for labour and feed.

The most effective method of increasing the output of our dairy produce is by improving the quality of the cattle, and I can suggest no surer way of securing this than by importing specially selected stock from England, putting them on our experimental farms, and at other suitable places, where the new strains of blood will effect a rapid improvement in the cattle of the district; in fact, by a careful selection of milking strains, in a short time there is no reason why, even with the same number of cows as are at present depasturing, the yield of milk should not be doubled, with immense gain to the whole Colony.

My proposal is to import a number of bulls and a few good milking cows. This is a question which affects not only the dairy farmer, but the Colony as a whole; and it is absolutely necessary that our producers should have equal facilities with their rival competitors in producing the best article at the cheapest rate. At present other countries, through improving their stock, produce over 500 gallons of milk per cow per annum, while our yield is estimated at considerably under 300 gallons; so it will be seen that they start with an immense advantage over us.

The

The improvement in the cattle of Denmark and other countries has been mainly brought about by the assistance rendered by the respective Governments to Dairy Associations to purchase first-class bulls, and there is no good reason why this Colony should not assist its people in the same way. The essentials required to secure success in dairying are first-class stock, absence of disease, and the yield of a high percentage of milk and butter fat.

The necessity for improving our stock being admitted, the question of paying for these stock next presents itself, and I consider it a fair charge upon the Loan Vote. The cattle will be continually reproducing themselves and multiplying, so that we shall always have an available asset much in excess of the original cost to show for the expenditure, while the proceeds from the sale of the young stock, if paid into Consolidated Revenue, will more than meet the interest charges on the original expenditure. It has been held that anything that forms a permanent asset is a proper charge to Loan Account; and as the stock will always be a realisable asset, as well as the progeny, there is every warrant for the initial expense to be incurred in the purchase of this herd being charged against the Loan Account. It is to be understood, however, that should any of the original stock die, or its value be reduced from any cause, the capital account should be made up to its original amount by replacements from the Consolidated Revenue.

S. SMITH.

I have conferred with Mr. O'Callaghan, our Dairy Expert, and after thoroughly discussing the merits of the different breeds of cattle, he agreed with me that the following should be imported:—

		No.			No.

To await cable from Agent-General.—M.C., 11/1/98. Perhaps the Minister will be good enough to say if the cablegram was despatched. It was sent to him at the Cabinet meeting on 29th.—W. FREEDY, 31/3/98. The Under Secretary.—M.C., 30/3/98. Inquire at Treasury whether it was sent away.—D.C.McL., 1/4/98.

The Treasury state that the cablegram respecting the cattle to be ordered from England has not been sent. It was sent to the Minister at the Cabinet on 29th April, 1898. Submitted as to what action he wishes taken.—W. FREEDY, 5/4/98. The Under Secretary.

It was sent direct from Colonial Secretary's Office. Wire has been sent direct from Colonial Secretary's Office; copy attached.—W.P., 5/4/98. The Accountant to note expenditure.—W.P., 5/4/98. Mr. Butler to note.—6/4/98. Noted.—E.D.B., 12/4/98. The Examiner to note.—A.S., 15/4/98. Noted.—, Examiner, Department of Mines and Agriculture, 16/4/98.

Cablegram to The Acting Agent-General.

29 March, 1898.

APPROVE of what you have done *re* cattle and pigs. Purchase soon as possible and ship. Cannot forego tuberculin test. Local veterinary certificate will suffice in some cases.

No test should be accepted unless an interval of two months has elapsed since the animal was previously tested.

Rewritten, 29/3/98. File.

Mr. Fry,—I suppose this cablegram has been sent.—W.P., 31/3/98. I do not know. It was copied for the Minister and sent to him at a Cabinet Meeting.—A.F., 31/3/98.

Cablegram to The Acting Agent-General.

29 March, 1898.

APPROVE of what you have done *re* cattle and pigs. Purchase as soon as possible and ship. Cannot forego tuberculin test. No test should be accepted unless an interval of two months has elapsed since the animal was previously tested. Local veterinary certificate will suffice in some cases.

S. SMITH.

Cablegram from The Acting Agent-General to The Colonial Treasurer.

16 March, 1898.

SECRETARY, Mines and Agriculture. Inform him that I have consulted John Thornton and Company respecting cattle. Following is quotation obtained:—Average cost twelve Shorthorns, seventy-five guineas; fifty-one other breeds, forty-five guineas; total, say, £3,354 15s. Lowest freight, twenty guineas per head, water only; cost of travelling expenses, selecting, commission, transit to docks, freight, boxes, fodder, passage of (say) three men in charge and gratuity on landing, insurance against mortality and all risks, (say) £3,150. Thorntons think there are legal difficulties (?) in connection with tuberculin tests. It is feared that some of best breeders will not accept conditions. Government inspector expenses will be heavy. Would local veterinary inspector approved of by Board Agriculture do in some cases? Estimated cost of so good specimen pigs, inclusive other expenses, £380. Please telegraph reply.

The

* These to be obtained from south of Ireland.

The Under Secretary for Finance and Trade, 17th March, 1898. The Under Secretary for Mines and Agriculture.—F.K., B.C., 27/3/98. Submitted.—M.C., 23/3/98.

I think the following reply should be sent to the Agent-General, viz.:—"Approve of what you have done *re* cattle and pigs. Purchase soon as possible and ship. Cannot forego tuberculin test. Local veterinary certificate will be sufficient in some cases.—S. SMITH, 29/3/98." *Add*—"No test should be accepted unless an interval of two months has elapsed since the animal was previously tested."

The Chief Inspector of Stock to The Under-Secretary for Mines and Agriculture.

Department of Mines and Agriculture,
Stock and Brands Branch, Sydney, 18 January, 1898.

Minute Paper.

Subject:—Purchase of Poland-China, and Small White Yorkshire Pigs.

I THINK the Poland-China pigs could be obtained through Messrs. Morrison and Clark, who have, for the last six or eight years, been introducing Vermont sheep into this Colony from the United States.

Mr. Clark left this Colony by the last Vancouver steamer for Vermont to bring out another consignment of merinos, and he offered, if the order were sent him, to purchase and ship, either from San Francisco or Vancouver, any pigs which might be required; and I believe he would do so honestly and with sound judgment.

From the inquiry I have made, I believe an excellent three to four months old pure bred Poland-China pig could be purchased for from £8 to £10, and that the carriage from (say) Chicago to Vancouver or San Francisco, and the freight charges and insurances would not exceed (say) £8 to £10; making in all £16 to £20 per pig; or (say) £64 to £80 for the two boars and two sows landed in Sydney.

The Small Yorkshire is a very easily kept, early maturing, handsome little pig, and one of the best for the purpose mentioned by Mr. Principal Valder. In the selection I previously suggested, I had only in view bacon pigs, as I was not aware that there was a demand for fresh pork beyond what could be met by our ordinary breeds. The Small White Yorkshire can be best obtained in England, and I believe from Saunders Spenser, who is the leading breeder of all types of the White Yorkshire pig.

ALEX. BRUCE,

Chief Inspector of Stock.

Shall we communicate with the Agent-General to obtain quotations for two boars and two sows, Small Yorkshire, in addition to those kinds already referred to in our letter of December? Mr. Valder urges that these be bought. He also wants the Poland-China breed, which Mr. Bruce suggests could be obtained from America through Messrs. Morrison and Clark. Two boars and sows could be landed here for about £60 or £80.—ALFRED SALWEY, 25/1/98.

For approval to order the additional pigs recommended.—D.C.McL., 28/1/93. Approved.—S. SMITH, 29/1/98. Corres. for necessary letters.—W.P., 1/2/98. Acting Agent-General (through Treasury), 2/2/98. Morrison and Clark, 7/2/98, 8, Norwich Chambers, Hunter-street, Sydney. The Examiner.—W.P., 8/2/98. Noted.—Examiner, 9/2/98, Department of Mines and Agriculture.

The Under Secretary for Mines and Agriculture to The Under Secretary for Finance and Trade.

Sir, Department of Mines and Agriculture, Sydney, 2 February, 1898.

I am directed to enclose letter addressed to the Acting Agent-General, requesting him to obtain quotations for Small White Yorkshire pigs, and to ask that you will be so good as to cause the communication to be forwarded to London per first mail.

I have, &c.,

D. C. McLACHLAN,

Under Secretary.

Mr. Robberds.—F.K., 3/2/98. Letter forwarded.—G.H., 8/2/98. The Under Secretary for Mines and Agriculture.—The communication herein referred to has been forwarded to the Acting Agent-General as desired.—F.K., the Treasury, B.C., 8/2/98.

Q.B.—Expenditure.

Department of Audit, Sydney, 31 January, 1898.

Reference to the Account.	Observation or Query.
Gen. Loan Vt. 4518 of 1897-S... (Attached to be returned.)	Explanation is requested why the attached voucher has been charged against the Loan Vote, "Agricultural Colleges and Experimental Farms," 59 Vic. No. 6. Certificate of the Under Secretary for Mines and Agriculture required.
	E. A. RENNIE.

Submitted.—D.C.McL., 9/2/98.

A copy of my minute of 3/12/97 may be forwarded to the Auditor-General. It should also be mentioned that some of our present stock were paid for out of Loan Vote. If any further information is required I shall be pleased to furnish it.—S. SMITH, 10/2/98. Please see 98/227 herewith.—D.C.McL., B.C., 11/2/98. The Auditor-General, Appropriation Br.—G.E.B. 14/2/98. The Under Secretary for Mines and Agriculture.

It is requested that the estimated cost of the whole proposed importations be stated. It is pointed out that this expense would appear to be more correctly chargeable to the Revenue than the Loan Vote. Any previous charges to Loans should, if possible, be transferred to the Revenue Fund.—E.A.R., A.-O., B.C., 22nd February, 1898. The Under Secretary for Mines and Agriculture. Submitted.—D.C.McL., 24/2/98. Please see Minister's minute on separate paper herewith.—D.C.McL., 25/2/98. The Auditor-General.

Papers

Papers returned herewith. Please acknowledge receipt hereon. Under explanation given, and after personal discussion with the Minister for Mines, the Auditor-General is satisfied to allow the charge as against Loan Funds. Certificate of Under Secretary to Vt. 4518 required.—E.A.R., A.O., B.C., 7th March, 1898. The Under Secretary for Mines and Agriculture.

Records to detach papers.—E.C.P., 12/3/98. 98/1632 received.—E.W., 15/3/98. Voucher submitted for signature of Under Secretary.—E.C.P., 15/3/98.

Minute by The Secretary for Mines and Agriculture.

Department of Mines and Agriculture, Sydney, 24 February, 1898.

THE cost of the cattle proposed to be imported will amount to between £5,000 and £6,000. With regard to charging this sum to the Loan Vote, I desire to point out that the broad lines upon which capital expenditure is made are that it is allowable when the purchase provides an additional permanent asset to the Government. In the purchase of these animals the Department will always have this asset, because should any of the stock die or be reduced in value the capital account is to be made up to its original amount by replacements from Consolidated Revenue. In addition to this, the Department will not only have as an asset the initial cost of the stock, but the amount of the original cost will be returned to the Consolidated Revenue over and over again from the progeny. I know no form of capital expenditure where a better return can be obtained; and in justification of the position I take up, I have only to instance the case of a squatter taking up a run and stocking it. He must in purchasing the stock charge the initial cost to his capital account, and this is precisely what I propose to do in connection with our Experimental Farms.

I think, for the reasons stated in this and my previous minute, that the purchase of the stock under the conditions named is properly chargeable to the capital account of our farms and colleges.

S. SMITH.

The Auditor-General,—D.C.McL., B.C., 25/2/98. Returned by Auditor-General to-day.—E.W., 15/3/98. See copy of Auditor-General's minute attached, stating that the charge can be made against loans.—D.C.McL., 18/3/98.

The Acting Agent-General to The Secretary for Mines and Agriculture.

Quotations for Cattle.

Sir. Westminster Chambers, 9, Victoria-street, Westminster, S.W., 18 March, 1898.

Referring to your letters (2) of 23rd December last and 2nd ultimo (No. 98/776 A), requesting me to obtain quotations for a number of dairy cattle to be selected from the best herds in Great Britain, I have the honor to inform you that I duly communicated with Mr. Robert Bruce, as desired, and with Mr. Sydney Villar, who succeeded the late Mr. Ingersoll as Veterinary Inspector, on behalf of your Government, at the port of London. As an outcome of these and other inquiries, I decided to consult Messrs. John Thornton and Company, of 7 Princes-street, Hanover Square, London, an old established and very experienced firm of Live Stock Agents, with a view to obtaining quotations for the breeds of cattle named by you.

I furnished to Messrs. Thornton and Company the particulars contained in your letters under reference, and explained that only specimens of the best herds were required, that they must be of good milking strain, and be subjected to the tuberculin test.

Messrs. Thornton in due course supplied quotations, which, in compliance with your request, I cabled to you on the 16th instant. (Copy enclosed.)

In the event of your deciding to purchase, the selection of the desired cattle could not, I think, be in better hands, as Mr. Thornton is considered one of the best judges of cattle in the Kingdom, and has undertaken to give the matter his personal attention. He anticipates a little difficulty over the tuberculin question, and fears that some of the best breeders, from whom he would like to purchase, will not sell their animals under the condition of being tested. It appears that the efficacy of the tuberculin test is not by any means universally recognised in this country, and as Messrs. Thornton raised the question, I thought it desirable to mention it in my telegram for your consideration.

The Stock Regulations of your Government require that such test shall be carried out by the veterinary surgeon appointed to examine and grant certificates of health at time of shipment. This would involve (1) the assembling of the cattle at some good healthy place (no accommodation for cattle at the docks), and in the event of any animal reacting to the test the expense of returning such animal (or perhaps animals) to its original starting point; or (2) your inspector would have to travel from place to place, involving a stay at each of from twenty-four to thirty-six hours, possibly longer, with heavy travelling and hotel expenses, as the cattle would be selected from all parts of the Kingdom.

One way out of the difficulty would be for your Government to allow local veterinary inspectors to conduct the tests. There are many veterinary surgeons in this country who have been approved by the Board of Agriculture for carrying out cattle orders, &c. Those gentlemen might be arranged with to conduct the tests, and so save our inspector's travelling and other expenses, as well as the possible expense of returning stock if it were decided to assemble them for testing.

In this connection I may mention that Mr. Robert Bruce, whom I asked to select the Irish cattle, desired to know whether, in their case, the tuberculin test might be carried out by Mr. Matt. Hedley, F.R.C.V.S., Chief Inspector for Ireland.

I may add that the testing for tuberculosis enhances the prices of the animals.

Copy correspondence.—From the accompanying copy of correspondence it will be noted that the sixty-three cattle are expected to cost an average of £53 each—Shorthorns, 75 guineas; other breeds, 45 guineas; while travelling expenses, making selections, commission, transit of animals to docks, freight, boxes, and fodder, men in charge, passage and gratuity, and insurance, are estimated to cost £3,150, or an average expense of £50 for each animal, the expenses thus nearly reaching the cost of the animals themselves.

It is expected that the Holsteins may have to be purchased in Holland, and shipped from Antwerp.

I have made inquiries as to freight, but I am unable to obtain a lower quotation than 20 guineas per head, the ship supplying water only. I raised the question with Messrs. Houlder Brothers and Company as to whether sufficient and ample room had been calculated for each beast, as, owing to the value of the cattle proposed to be purchased, it was desirable they should be made as comfortable as possible for so lengthy a voyage, to ensure, to the fullest extent, their reaching Sydney in a healthy condition. I am informed that the usual space has been allowed for.

Insurance is quoted at the rate of 7 per cent. against mortality and all other risks until three days after landing.

Mr. Bruce, at my request, has submitted his quotations for Irish cattle through Messrs. Thornton and Company.

Messrs. Thornton consider that one man would not be enough to entrust with the charge of so many valuable beasts, especially as there is a probability of a good number of the cows requiring frequent milking. They have therefore calculated for the passages of three attendants and a gratuity to each on landing the cattle in sound condition.

With regard to the pigs (five kinds), I consulted Mr. Barnes, of Shirley, Birmingham, as suggested by you; but I subsequently came to the conclusion that the interests of your Government would be best served by placing the swine quotations also in the hands of Messrs. Thornton and Company. They estimate that to obtain twenty good specimens of the breeds named by you, will cost an average of £19 each, inclusive of all expenses, or a total of £380.

I have, &c.,

DANIEL COOPER.

Submitted for the Minister's information. One cable of 29/3/98 has dealt with all matters referred to. Mr. O'Callaghan might see the reports.—W. PREEDEY, 22/4/98. For the Minister's information.—D.C.McL.; 23/4/98. Seen.—S. SMITH, 24/4/98. Mr. O'Callaghan.—A.S., 26/4/98.

Cablegram from Acting Agent-General, to The Hon. the Premier and Colonial Treasurer.

16 March, 1898.

SECRETARY for Mines and Agriculture. Inform him that I have consulted John Thornton and Company respecting cattle. Following are quotations obtained:—

Average cost—12 Shorthorns, 75 guineas; 51 other breeds, 45 guineas; total, say, £3,354 15s.

Lowest freight—20 guineas per head, water only.

Cost of travelling expenses, selecting, commission, transit to docks, freight, boxes, fodder, passage of, say, three men in charge and gratuity on landing, insurance against mortality and all risks, say, £3,150.

Thorntons anticipate considerable difficulty in connection with tuberculin tests. It is feared that some of best breeders will not accept conditions. Government inspector expenses will be heavy. Would local veterinary surgeon, approved of by Board Agriculture, do in some cases?

Estimated cost of 20 good specimen pigs, inclusive other expenses, £380.

Please telegraph reply.

John Thornton & Co. to The Acting Agent-General.

Dear Sir Daniel,

7, Princes-street, Hanover Square, London, W., 17 March, 1898.

In reply to your letter of the 4th instant, requesting quotation of prices of live stock for New South Wales, I beg to hand you statement with an estimate for the purchase and cost of the shipments of the animals to Sydney.

The prices quoted are for first class specimens of each breed required.

During the last three or four years there has been an increased demand for pure-bred Shorthorns of a good milking type, which is likely to continue, and the large demand for bulls to go to South America has increased the prices for them. Many Estancia holders have readily given 150 guineas to 200 guineas for first class animals, though more of the beef type.

I observe that one variety now rising in estimation for dairying purposes is not mentioned. It is the South Devon, or South Hammar, a somewhat new race evolved from crosses of the Devon, Guernsey, and Shortborn, and which were shown in great perfection at the Royal Show at Plymouth. Their value is about the same, 45 guineas, as the other dairy breeds.

In connection with Shorthorns, the one Irish bull and one cow are, I presume, intended to be pure-bred Shorthorns—for there are several very fine herds throughout Ireland—and not the ordinary dairy cow of the Limerick, Cork, and Tipperary districts, which are of a Shorthorn type.

There are, I believe, only one or two herds of Holstein cattle in England, and I doubt if they are pure; for many years ago, owing to pleuro and foot and mouth diseases, cattle from the Continent were, and are still, prohibited from being imported alive into England. If they are required it would, I think, be better to import them direct from Holland.

There are few breeders of shorthorns who keep accurate returns of the milk yields of each cow, for they consider that a well bred cow, having a good shaped udder and showing dairy points, is sufficient for their purpose. In selecting these animals we should get them as cheaply as we could, consistent with quality and excellence.

Tuberculosis.—It is mentioned that it is a condition that any animal to be shipped should be subjected to a tuberculin test. In this country many breeders strongly object to having their animals tested for tuberculosis, for they consider that science has not yet sufficiently advanced to allow the injection of a powerful poison into the system of their animals, which they have every reason to believe are sound and healthy. If, however, the test is permitted they consider the value of their animals is enhanced in consequence of the risk and possible ill results that may eventually ensue. Moreover, the time and expense will necessarily be increased, for every test will take at least from thirty-six to forty-eight hours; besides a much larger selection of animals will have to be made, as reaction may take place in animals which, to every appearance, as well as from their ancestry, are possibly sound and healthy. The quotations are consequently higher, as there may be much difficulty in obtaining tested animals that have not reacted.

Freight.—

Freight.—There has been a tendency on the part of shipowners to combine with the view of keeping up freight charges; moreover, so many ships now call at the Cape. We have, however, succeeded in obtaining a much lower quotation of freight than was at first quoted, with a plentiful supply of water for the voyage. We also purpose sending three men in charge, as it is our intention of obtaining if possible cows both in milk and in calf, which will require special attention on board ship.

Insurance.—This we hope to effect at 7 guineas per cent., which includes all risk of sea and mortality from the farm to Sydney and three days after landing.

Pigs.—It is presumed that two boars and two sows are required of the breeds mentioned. We have estimated for this, and will endeavour to send first-class healthy young animals.

In executing this commission, we will do our best to render the shipment one of such excellence as may be both a credit to the Colonial Government as well as to ourselves.

Yours, &c.,

JOHN THORNTON & CO.

JOHN THORNTON & CO.

Mr. Sidney Villar, Veterinary Surgeon, to The Secretary to the Agent-General.

Dear Sir,

16 February, 1898.

I beg to acknowledge the receipt of, and to thank you for, your communications of 14th instant.

I understood from our conversation that you would like me to suggest the names of some well-known experts in cattle. A gentleman who occurs to me as probably suitable is Mr. A. Dunlop, of Church Farm, Hendon. He is a dairy farmer, has officiated as judge of cattle at the Royal Agricultural, the British Dairy Farmers', the Bath and West of England, and many other Shows; also, I believe, at the Royal Society's Show in Ireland; and also is a Justice of the Peace of this county. I hope to furnish you with the names of other gentlemen, and also the names of the proprietors of well-known herds of the breeds specified.

Yours obediently,

SIDNEY VILLAR.

Mr. Sidney Villar, Veterinary Surgeon, to The Secretary to the Agent-General.

Dear Sir,

20 February, 1898.

Importation of Stock.—In continuation of my letter of 16th instant as to experts in cattle, I beg to inform you that I have it on most reliable authority that it would be almost impossible to get a better judge of Kerry, Dexter Kerry, and Irish Shorthorn cattle than Mr. Robert Bruce of Dublin.

Mr. Fred. Hordern of Buxted, Sussex, is an authority on Jerseys and Kerrys and Dexter Kerrys, and would probably be available.

There are also firms which make a speciality of this kind of trade, such as John Thornton & Co., 7, Princes-street, Hanover-square and W. and A. Mansell & Co., Live Stock Agents, Shrewsbury.

Holstein cattle now in this country would not be of good enough quality and would have to be purchased in Holland. If you would like to see me on any point I should be glad to call, and am, dear sir,

Yours obediently,

SIDNEY VILLAR.

Robert

Robert Bruce, Esq., to The Acting Agent-General.

Sir,

Royal Dublin Society, Leinster House, 19 February, 1898.

I received your letter of the 16th, and at once say I shall have much pleasure in being of service to you, in any way, in the matter referred to.

I understand the New South Wales Government do not intend to import anything but the best representatives of the various breeds. This being the case, you doubtless understand that the cattle will cost comparatively higher prices and must be selected with much care.

Shorthorns.—You are perhaps aware that several families of Shorthorns are termed fashionable and each have keen partisans. This being so I would venture to say, in the selection of stock it is all important for the Colony that practical utility should, in the purchase of the cattle, be kept steadily in view, instead of fashion or fancy. Although in many herds of Shorthorns milk has been neglected, yet representatives of the breed are to be obtained alike superior as milk and beef cattle.

Ayrshires.—Fancy, in the matter of colour and the direction of the horns (often artificially screwed into showyard form), has to some extent interfered with the practical value of many of the herds of Ayrshire cattle; yet there are many herds where, in the breeding of cattle, the quantity and quality of milk have been carefully kept in view.

Jerseys and Guernseys.—I am of opinion that Jersey and Guernsey cattle bred in England are more robust, and quite as good milkers as those bred in the Islands, although the Island cattle may, for showing purposes, be considered better.

Kerry.—While many owners of Kerry cattle consider it imperative that this breed should be all black, many practical breeders do not object to white marking on the udder and underline of the cow, and they justly hold that the formation and size of the udder ought to receive more attention than its colour.

Holsteins.—I take it that the Holsteins would have to be bought from English breeders of these cattle; and if this is so the selection must necessarily be restricted.

Dexters.—The improvement of this breed has not been hindered by colour fancy, and as a breed Dexter cattle are steadily growing in favour. For the quantity and quality of food consumed, it may be questioned if any cow can make a better milk record than a Dexter. The shape and size of the udder should receive attention.

Red Polled Cattle.—Breeders of these cattle have of late years been giving much attention to milk, and cows can be bought whose milk records have been carefully kept.

Shorthorns.—Names and addresses of owners of herds of high-class Shorthorns where milk has been carefully kept in view, while the "general purpose" qualifications have been conserved:—

The Queen	The herd in charge of W. Tait, Shaw Farm, Windsor.
The Prince of Wales... ..	The herd in charge of F. Beck, Sandringham, Norfolk.
Lord Brougham and Vaux. Brougham	Penrith.
J. Deane Willis	Bapton Manor, Codford, Wilts.
R. Stratton	The Duffryn, Newport, Monmouth.
W. Graham	Edengrove, Kirkleyshore, Penrith.
E. Potter	Low-Fields, Kirkby-Lonsdale, Westmoreland.

Irish Shorthorns.

Major Barton... ..	Straffan House, Straffan Station, Co. Kildare.
Dr. Norman Thompson	Kindlestown, Delgany, Co. Wicklow.
Major Cradock	Derrycalaghan, Roscrea, Tipperary.
C. M. Doyne	Wells Gorey, Co. Wexford.

Ayrshire.

A. Cross	Knockdon, Maybole.
A. Mitchell	Barcheskie, Kirkcudbright.
Dowager Duchess of Athole... ..	Dunkeld.
Sir Mark J. Stewart, Bart., M.P.	Ardwell, Strauraer, Wigtownshire.
Robt. Wilson	Manswrae, Bridge of Wier, N.B.

Jersey.

The Queen.	
J. J. Coleman... ..	Herd in charge of Garrett Taylor, Trowse House, Norwich.
Sir James Blyth, Bart.	Blythwood, Stansted, Essex.
Lord Rothschild	Tring Park, Hertfordshire (Agent, Richardson Carr, Home Farm).
Ernest Matthews	Chequers' Mead, Potters' Bar, Middlesex.
J. S. Budgett	Stoke Park, Guildford, Surrey.
Lord Roseberry	Montmore, Leighton Buzzard.

Guernsey.

Sir F. A. Montefiore, Bart.	Worth Park, Crawley, Sussex.
W. Herbert Fowler, J.P.	Claremount, Taunton.
The Hon. Mrs. A. Ballie	Hamilton, Sheldon's Hook, Winchfield.

Kerry.

Lord de Vesci... ..	Abbeyliex House, Abbeyliex, Queen's Co.
J. Robertson	La Mancha, Malahide, Co. Dublin.
Denis Courtney	College-street, Killarney.
J. E. Butler	Waterville, Co. Kerry.
Richard Barter	St. Ann's Hill, Cork.

Holsteins.

Prof. James Long	Burleigh, Cheshunt, Herts.
-------------------------	----------------------------

Red

Red Polled.

The Duke of York Herd in charge of F. Beck, Sandringham.
 Garrett Taylor Trowse House, Norwich.
 Alfred J. Smith Rendlesham, Woodbridge, Suffolk.

Dexter.

The Prince of Wales... .. Herd in charge of F. Beck.
 Norman Cookson Oakwood, Wylam-on-Tyne.
 J. Robertson La Mancha, Malahide, Co. Dublin.
 D. Courtney College-street, Killarney.
 J. Butler Waterville, Co. Kerry.

Pigs.

The different White breeds—Large, Middle, and Small.
 Sanders Spencer Holywell Manor, St. Ives.
 Berkshire and Tamworth.
 Garrett Taylor Trowse House, Norwich.

I have, &c.,
 ROB. BRUCE.

Robert Bruce, Esq., to The Acting Agent-General.

Dear Sir, Royal Dublin Society, Leinster House, Dublin, 25 February, 1898.

I have received your letter of yesterday.

I regret I am unable to give an opinion regarding the other gentlemen named as purchasers of cattle, but would, without hesitation, say that J. Thornton & Co., 7, Princes-street, Hanover Square, W.C., are thoroughly reliable and well up on all subjects connected with the several breeds.

I shall be very pleased to select the Irish breeds, and shall be glad to hear from you regarding prices and the date you propose to fix for shipping the stock.

I presume the cattle bought in Ireland could be tested for tuberculosis by Mr. Matt. Hedley, F.R.C.V.S., Chief Inspector for Ireland.

Yours, &c.,
 ROB. BRUCE.

The Acting Agent-General to The Secretary for Mines and Agriculture.

Sir, Westminster Chambers, 9, Victoria-street, Westminster, S.W., 1 April, 1898.

I have the honor to acknowledge the receipt from you of the telegram shown in the accompanying Schedule.

I have, &c.,
 DANIEL COOPER.

SCHEDULE of telegrams received from the Honorable the Secretary for Mines and Agriculture, Sydney, by the Agent-General, London, between the 25th March, and the 1st April, 1898.

Date.	Subject.
1898. 29th March ...	Approve of what you have done re cattle and pigs. Purchase soon as possible and ship. Cannot forego tuberculin test. No test should be accepted unless an interval of two months has elapsed since the animal was previously tested. Local veterinary certificate will suffice in some cases. S. SMITH.

Cablegram from the Acting Agent-General to The Colonial Treasurer.

11 June, 1898.

SECRETARY for Mines and Agriculture. Inform him that fifty-four cattle, twenty pigs, will be shipped by "Hawkesbury." Will probably leave on eighteenth instant. Holsteins in the course of selection.

13th June, 1898. The Under Secretary for Mines and Agriculture.—F.K., B.C., 13/6/98.

For the Minister's information. Mr. Bruce should see this, and prompt arrangements also made for land to accommodate stock.—W.P., 15/6/98. For the Minister's information. Mr. Bruce has already been instructed to prepare for the cattle. His attention may now be drawn to the fact that twenty pigs will also be sent.—A.S., 16/6/98. Submitted.—D.C.McL., 16/6/98. Seen by Minister.—D.C.McL., 16/6/98. Memo. sent to Mr. Bruce, giving copy of cablegram.—A.S., 16/6/98. As to place for the cattle.—A.S., 17/6/98. Mr. Campbell. To see Mr. O'Callaghan and Mr. Valentine.—M.C., 20.

The Acting Agent-General to The Secretary for Mines and Agriculture.

Purchase of Live Stock.

Sir, Westminster Chambers, 9, Victoria-street, Westminster, S.W., 5 May, 1898.

In continuation of my letter of the 18th March last, M. and A. 40-98, respecting the cattle and swine required by your Department, I have the honour to inform you that immediately on receipt of your telegram of the 29th idem, approving of the action taken by me on the subject, I instructed Messrs. John Thornton and Company to proceed with the selection of the cattle, and they now inform me that, so far, they have selected the Red Polls and five of the Guernseys required, and these are about to undergo the tuberculin test. The Ayrshires are at present in course of selection.

197—B

Mr.

Mr. Robert Bruce, who is acting with Messrs. Thornton and Company, has purchased eight cattle (Irish), which have been tested and have not reacted.

It is expected that, with the exception of the Holsteins, the whole of the cattle will be shipped about the end of this month. The only herd of Holsteins in this country is that belonging to Professor J. Long, of Cheshunt, Herts., and as that herd has been here a good many years, it is considered advisable to purchase on the Continent the Holsteins you require.

As they would consequently have to be shipped direct from either Antwerp, Bremen, or Hamburg to Sydney, it is proposed to proceed with their selection and purchase when the other breeds are cleared.

I regret to have to state that, owing to a misunderstanding, an augmentation has had to be made in the rate of freight for the fifty-four head of cattle to be shipped from this country, viz., to 22½ guineas per head; but it is not anticipated that this will cause any important increase in the gross amount of cost originally estimated, an ample margin having been allowed for incidental expenses.

I may mention that certain shippers of stock to Sydney are desirous of sending cattle by the same vessel that takes our animals, in order, if possible, to obtain the benefit of the special rate of freight, the ordinary rate for small numbers of cattle being 35 guineas per head at present. Having been approached as to whether your Government would have any objection to the special rate being conceded, I communicated with Messrs. Houlder Brothers and Company (Limited), and informed them that, provided the concession has no influence towards dividing our consignment into two shipments, your Government, I was of opinion, would have no objection, but would rather appreciate the special rate being accorded to the shippers in question. Messrs. Houlder Brothers inform me that they are agreeable to granting the special rate, and will see that the extra animals shall in no way prejudice your Government's stock being conveyed in one vessel.

I have, &c.,

DANIEL COOPER.

Mr. Campbell wants these papers returned to him *re* 98-3,690. Submitted for the Minister's information. The cattle should reach here about 20th July, after which they will remain sixty days in quarantine. Prompt steps should be taken to secure land to put them on.—W. PREEDY, 10/6/98.

With regard to securing land near the H. A. College, Mr. Campbell reported on the papers a few days ago that none had yet been obtained, but he was still making inquiries.—A.S., 10/6/98.

Minister to see. No time should now be lost in deciding where the cattle are to be placed after they pass through quarantine. As other cattle are coming in the same ship, special quarantine arrangements will have to be made—I mean in the way of accommodation—and Mr. Bruce should be asked to look into this matter at once.—D.C.McL., 10/6/98.

Approved.—S. SMITH, 14. Copy of this sent to Mr. Bruce.—A.S., 15/6/98. As to place for the cattle.—A.S., 15/6/98. Mr. Campbell. Minister wishes me to consult with Mr. O'Callaghan.—M.C., 15/6/98.

The Acting Agent-General to The Secretary for Mines and Agriculture.

Sir, Westminster Chambers, 9, Victoria-street, Westminster, S.W., 15 July, 1898.

Referring to my letter of the 1st instant (M. & A., 95-98), on the subject of the cattle and swine for your Department, I have the honor to inform you that Messrs. Thornton & Co. are unable yet to furnish their account, owing to the difficulty of obtaining the railway companies' invoices for conveyance of animals to the docks.

Messrs. Thornton have received a letter from Las Palmas, stating the cattle and pigs per s.s. "Hawkes Bay" had arrived there on June 30th, all well.

I have, &c.,

DANIEL COOPER

(Per S.Y.)

Papers with Under Secretary.

The Acting Agent-General to The Secretary for Mines and Agriculture.

Sir, Westminster Chambers, 9, Victoria-street, Westminster, S.W., 1 July, 1898.

In continuation of my letter of the 24th ultimo (M. & A., 91-98), I have now the honour to enclose a bill of lading for the cattle (fifty-three) and swine (nineteen) shipped to Sydney per s.s. "Hawkes Bay" on behalf of your Government.

It will be noted that there is one Shorthorn bull and one pig less than the number ordered by you, exclusive of the Holsteins. This is due to the death of one of the Tamworth boars owing to the heat of the weather during the journey to London, while one of the Shorthorn bulls reacted at the last moment, leaving insufficient time to replace the animal. The boar was insured for £20.

I enclose certificates from Mr. Inspecting Veterinary Surgeon Villar in regard to his final inspection of the whole of the consignment in question, as well as seven cattle and one pig exported by others by the same opportunity.

I also forward a copy of a long letter from Messrs. J. Thornton & Co., reporting on the selection of the animals, and giving a full list thereof, with their distinguishing marks. Messrs. Thornton & Co., with my concurrence, have made an agreement (copy herewith) with the attendants on the stock, and have arranged for the payment by your Government of the balance of wages on the third day after the cattle and pigs are landed in quarantine at Sydney. As an encouragement to the attendants to give every attention to the comfort of the animals, it has also been arranged to pay them the following "head money" for all those belonging to your Government landed in good condition, viz., 10s. per head for cattle, 5s. per head for pigs.

Thornton & Co.
to A.-A.-G.,
5,709.—29 June.
Included with
Thornton's
letter.

Four

Four attendants have been engaged, but portion of the "fourth" attendant's wages will be paid by the other shippers and credited to your Government in Messrs. Thornton's account, a copy of which I hope to send you by next Friday's mail, together with the pedigrees of the stock.

Great credit is due to Messrs. Thornton & Co. for the careful and judicious manner in which they have executed this order. The work has involved a great strain on all concerned, and I sincerely trust that the animals will reach Sydney in a sound and healthy condition.

I have, &c.,
DANIEL COOPER.

Submitted for the Minister's information. I would suggest that the papers be forwarded to Mr. O'Callaghan, who should be responsible for the whole business connected with the landing, &c., of the stock.—W. FREEDY, 5/8/98.

For Minister's information, and to pay the several amounts mentioned to the attendants. The business of landing the stock should be placed in Mr. Bruce's hands.—D.C.McL., 5/8/98. Approved.—S. SMITH. Mr. Bruce.—A.S., 8/8/98.

John Thornton & Co. to The Acting Agent-General for New South Wales.

Dear Sir,

7, Princes-street, Hanover Square, London, W., 29 June, 1898.

After our communications to you of the 10th and 17th of March and subsequent correspondence, we proceeded to visit various breeders to inspect and purchase the stock ordered for the Colony. The order has been difficult to execute, for the reason that several eminent breeders objected to having their valuable animals injected with tuberculin; for they said, even if the animals did not react, the fluid had been injected into their system and science could not yet tell them when it would be eliminated. Another difficulty was in finding pure-bred Shorthorn cows with good udders and with the form and symmetry of the recognised type of the breed; for many breeders consider that the flesh-forming qualities of the Shorthorn more than equal their value for the dairy, especially for crossing and producing good feeding steers throughout the country. Again, many very fine specimens of the dairy Shorthorn are ineligible for the Herd Book. We saw several remarkably good cows in the north of England, but they were six years old and upwards. There has not been the same difficulty in obtaining those breeds that are essentially kept for dairy purposes, particularly the Ayrshires, Jerseys, and Guernseys. The Holstein, or Dutch cattle, are not kept pure in England except in one small herd in Hertfordshire, and which has been bred closely owing to Continental cattle being prohibited from landing alive in England.

If they are to be purchased and shipped to the Colony, it will be necessary to obtain them in Holland and ship them direct from there, the country being free from foot and mouth disease since the end of May, and pleuro-pneumonia has been stamped out for twelve years.

We have prepared the pedigree and certificates of the various animals, with their numbers and marks. Owing to one animal reacting at the last moment there is one Shorthorn bull short, and one pig, which died in transit to London owing to the heat of the weather. This boar was insured for £20, and we have applied for recovery.

The Shorthorns we first endeavoured select in the great district of Cumberland and Westmoreland; it was somewhat difficult to find animals with good udders, and of an age and in suitable state of breeding. In two large herds the breeders declined to submit their animals to the test; in other cases breeders refused to sell their best cattle. We, therefore, went to the large dairy districts of the west of England. It was not an easy matter to find really good bulls of 2 to 4 years of age, owing to the large number of young bulls that are purchased by the South Americans.

One particularly good bull, unfortunately one of the last that Mr. Villar, the Government Veterinary, was able to test, reacted, and the time before shipment was insufficient to replace him.

The Ayrshire we specially selected for their constitution and milking quality in their own district. Some of them are of the light colour that is now seen so frequently at the principal shows.

The Red Polls are from good breeders in Norfolk, and, like the Ayrshire, were selected for their heavy milking properties and constitution, avoiding the beef type of the present show-yard animals.

The Jerseys and Guernseys.—We did our best to obtain these all bred in England, for it is found that many of the island-bred animals are often too delicate to withstand the climate. We are of opinion they will be found fine specimens. Several of them have been successfully exhibited, and they are descended from parents of known great dairy properties.

The Kerrys and Dexters, and two pure-bred Shorthorns from Ireland, were selected and purchased by Mr. Robert Bruce, of Dublin, from some of the best breeders in that country.

The pigs we chose from large breeders who owned good, healthy stock, and had great reputation as exhibitors and breeders. As no particular age was mentioned, we selected young animals that were not far gone in a breeding state, as they might be able to better stand the voyage.

This large shipment of animals would require considerable attendance on the voyage, for most of the cows were in milk, as we considered it better to send them in that state. Four men went with them, one of them having made several journeys to the Colony before. The two young men from Cornwall have good characters and practical knowledge of stock. They purpose stopping in the Colony if they can find employment.

Especial care was taken in having the boxes strongly made and padded. The fodder was of various kinds, of the best quality, and an abundant supply, with all the necessary medicines and implements, &c., that might be required on the voyage.

A full list of the animals, with their distinguishing marks, were supplied to the attendants.

The ship also took out some young bulls for Mr. A. A. Dangar, Mr. A. Dugdale, Mr. C. G. Tindal, and the Australian Agricultural Co., as well as one pig for Mr. Bloore. The expenses of these animals have been proportioned with the Government charges, and the amount received from each shipper has been credited by us to your account, which will be forwarded next week, as well as the pedigree of the animals.

The men in charge are to receive the balance of their wages on the third day after they have landed the cattle and pigs in quarantine at Sydney, in accordance with the annexed agreement.

In

In executing this order we have taken every pains, and spent much time in travelling, often long distances, to purchase really good animals; and when obtained, we have done our best to secure good transit accommodation and attendance. It will doubtless take the animals some time to get rested and refreshed after their long journey, and acclimatised to their new home. It would be well, therefore, that they be not judged until they have had time to recover the effect of the voyage. We shall hope in due course that our efforts, in executing this order with which you have been good enough to entrust us, has met with the appreciation of the Government in Sydney.

Yours, &c.,

JOHN THORNTON & CO.

AGREEMENT for the payment of the four men in attendance on the cattle and pigs on board the "Hawkes Bay."

The men in charge are to receive the balance of their wages on the third day after they have landed the cattle and pigs in Quarantine, at Sydney, viz. :-

William Henry Collins, is to receive £20, balance of wages.
Stephen Henry Hosking, " £20, "
Henry Day, " £7, "
Charles Trussler, " £10, "

In addition to this, Collins, Hosking, and Day are to receive the following head money, and divide it equally among themselves, viz. :-10s. per head for cattle, 5s. per head for pigs, for all the New South Wales Government animals that are landed in good condition. A return passage has been arranged for Day, who receives in consequence less money than Collins and Hosking, the other two experienced men.

A proportion of the attendants' wages will be charged to the other shippers of stock and credited to the Government account.

JOHN THORNTON & CO.

(Agent-General, received 1st July, 1898, New South Wales.)

[Stamp, Sixpence.]

Australian and New Zealand Steam Trade Bill of Lading, 1893.

Freight payable at Port of Shipment.

SHIPPED in good order and condition by the Agent-General for New South Wales, on board the steamship "Hawkes Bay," whereof is master for this present voyage, now lying in the port of London, and bound for Sydney, N.S.W., with liberty to call at any port or ports, to receive and [or] discharge goods and passengers, and to take in coal and [or] other supplies, or for any other purpose, and to sail with or without pilots, and to tow and assist vessels in all situations, the following goods, viz. :—

Fifty-three cattle, and boxes for same..... } On deck, at shipper's risk, ship not responsible for jettison,
Nineteen pigs, and pens for same..... } disease, mortality, or accident.

Being marked and numbered as in the margin, and to be delivered (subject to the exceptions and conditions hereinafter 53 cattle 19 pigs. mentioned) in the like good order and condition from the ship's deck, at her anchorage (where the ship's responsibility shall cease), at the aforesaid port of Sydney, N.S.W. (or so near thereto as she may safely get), unto the Honorable the Minister for Mines and Agriculture, or to his or their assigns. Freight for the said goods, with primage, to become due on shipment, and to be paid in London, in cash, without deduction, ship lost or not lost. Average according to York-Antwerp Rules, 1890.

The act of God, the Queen's enemies, pirates, robbers or thieves by land or sea, but not pilferage, arrests, or restraints of princes, rulers, or people, riots, strikes or lock-outs, or other labour disturbances, or delay caused, directly or indirectly, thereby, and loss or damage resulting from any of the following causes or perils are expected, viz. :—Insufficiency in packing or in strength of packages, loss or damage from rust, vermin, breakage, leakage, sweating, evaporation, or decay; injurious effects of other goods, effects of climate or heat of holds; risk of craft, of transshipment, and of storage afloat or on shore; fire on board, in hull, in craft, or on shore; explosion, accidents to, or defects in hull, tackle, boilers or machinery or their appurtenances; barratry, jettison, neglect, default or error in judgment of the master, mariners, engineers, and others in the soever caused, and accidents, loss, damage, delay, or detention from any act or default of the Egyptian Government or the service of the owners; collision, stranding, perils of the seas, rivers or navigation of whatsoever nature or kind and how-administration of the Suez Canal, or arising out of, or consequent upon, the employment of vessel of the line in Her Majesty's Mail Service.

The ship will not be responsible for correct delivery unless each package is distinctly, correctly, and permanently marked by the merchant before shipment, with a mark and number or address, and also with the name of the port of delivery, which last must be in letters not less than 2 inches long.

The owners are to be at liberty to carry the said goods to their port of destination, by the above or other steamer or steamers, ship or ships, either belonging to themselves or to other persons, proceeding by any route, and whether directly or indirectly to such port, and in so doing to carry the goods beyond their port of destination, and to tranship or land and store the goods either on shore or afloat and reship and forward the same at the owner's expense, but at merchant's risk, but subject to any proved claim for loss of market on any goods so overcarried, such claim not to exceed 10 per cent. of the net invoice cost of such goods.

The ship will not be accountable for gold, silver, bullion, specie, jewellery, watches, clocks, precious stones, precious metals, bank notes or securities for money, paintings, sculptures, or other works of art, nor beyond the value of £5 per cubic foot, nor exceeding £100 for any one package unless the value thereof shall have been declared at time of shipment, and the bills of lading signed with a declaration of the nature and value of the goods appearing thereon, and extra freight in respect of same agreed upon and paid; nor for loss, injury, or detention to packages, intended for different consignees, but made up into one package, unless the contents and value of each separate package be given before shipment, and freight paid accordingly; nor for damage to castings, or show-cases, nor for breakage of glass, glassware, chinaware, or earthenware, or other goods of a brittle or fragile nature, of any description, from whatsoever cause arising, excepting improper stowage and handling.

Specie deliverable in Melbourne or Sydney will be conveyed from the steamer to the Mint at owner's expense, but at the merchant's risk. All liability of the owners is to cease as soon as the specie is free from the steamer's tackle.

If chemicals, liquids, or other goods of a dangerous or damaging nature are shipped without being previously declared and arranged for, they are liable upon discovery to be thrown overboard, and their loss, as well as any loss or damage to the ship or cargo, or to any person or interest whatsoever, will fall upon the merchants or owners of such goods. Double freight will be charged on all goods not correctly described.

All fines and expenses or losses by detention of vessel or cargo, caused by incorrect or insufficient marking of the package, or by incomplete or incorrect description or weight (or any other particulars required by the authorities at the port of delivery), either upon the packages or the bill of lading, shall be paid by the shipper or consignees of the goods.

The master or agent is to deliver the goods with all reasonable despatch, and the consignees or their assigns must be ready to take delivery as soon as the ship is ready to discharge them, otherwise the master or agent shall be at liberty to land and warehouse the goods, or discharge them into a store-ship, or hulk, or into lighters, or on a wharf, as customary, at the merchant's risk and expense.

In case of quarantine, the goods may be discharged into quarantine dépôt, hulk, or other vessel, as required for the ship's despatch. Quarantine expenses upon the goods, of whatsoever nature or kind, shall be borne by the owners of the goods.

In case of the blockade or interdict of the port of discharge, or if the entering of or discharging in such port shall be considered by the master unsafe by reason of war or disturbances, the master may land the goods at the nearest safe and convenient port or place at the expense and risk of the owners of the goods; and the ship's responsibility shall cease when the goods are so discharged into proper and safe keeping, the master giving immediate notice of the same to the consignees of the goods, so far as they can be ascertained.

The ship shall have a lien upon the goods for all freight and charges, for which the goods are liable under the bill of lading.

No claim that may arise in respect of goods shipped by this steamer will be recoverable unless made at the port of delivery within seven days after the discharge of said goods.

The shipowners' liability in case of loss or detention, or injury to goods, for which they may be responsible, to be calculated on and in no case to exceed the net invoice cost and disbursements.

Weight, measurement, contents, quality, and value unknown.

In witness whereof the master, purser, or duly authorised agent of the said ship hath affirmed to four bills of lading, all of this tenor and date, one of which being accomplished the others to stand void. If required by the owners or their agents, one of the bills of lading must be given up, duly endorsed, in exchange for the goods.

Dated in London, 23rd June, 1898.

For the Master,

TYSER & CO., Per ALFRED J. BIRD (as Agents).

Merchants are cautioned against shipping goods of a dangerous or damaging nature, as by so doing they become responsible for all consequential damage, and also render themselves liable to penalties imposed by statute.

[Copy.]

(Agent-General received 1st July, 1898, New South Wales.)

Houlder Brothers & Co. (Limited), London, to Messrs. Tyser & Co., Fenchurch Avenue, E.C.

Dear Sirs,

146, Leadenhall-street, London, E.C., 30th June, 1898, and at Lloyds.

In consideration of your handing us clean bills of lading for the cattle and pigs per s.s. "Hawkes Bay," it is understood that you have the right to land or put into lighter such boxes and cattle as may be in the way of discharge at Melbourne, at steamer's risk and expense; all reasonable care to be used in so doing.

You are also at liberty to take to pieces any of the boxes that are not wanted through the death of any of the animals, but pieces of same to be delivered.

Yours, &c.,

HOULDER BROTHERS & CO. (LIMITED.)

(ALFRED H. HOULDER, Managing Director.)

NEW SOUTH WALES GOVERNMENT.

(Form K.—Regulation 36.)

Imported Stock Act of 1871, and the Imported Stock Act Amendment Act of 1884.

Certificate and Declaration by Veterinary Surgeon at Port of Shipment.

I, SIDNEY VILLAR, of Harrow-on-the-Hill, a duly qualified veterinary surgeon, appointed in that behalf for the Colony of New South Wales, having made a thorough inquiry respecting, and a careful examination of, the stud stock about to be shipped from the port of London by the s.s. "Hawkes Bay," of which Mr. J. C. Felgate is the master, for the port of Sydney, N.S.W., which are more particularly described in the schedule below, and having made the like inquiry respecting, and examination of, all ship's stock on board, or about to be put on board, such vessel for the use of the passengers or crew (particulars of which are also given below), and having also obtained the declaration called for by No. 38 of the Regulations issued for the said Colony in that behalf by the owner or breeder of such stock, together with the relative certificates by the proper inspector in regard thereto, and being satisfied that such stock have been not less than fourteen days in Great Britain or Ireland, do hereby solemnly and sincerely declare that none of the said stock are infected with any infectious or contagious disease, and that all the requirements of these Regulations up to the present time with respect to such stock have been duly complied with.

The Acting Agent-General to The Secretary for Mines and Agriculture, Sydney.

Purchase of Cattle.

Sir, Westminster Chambers, 9, Victoria-street, Westminster, S.W., 22 July, 1898.

I have the honor to forward herein the undermentioned documents, which I have to-day received from Messrs. John Thornton, in connection with the cattle and pigs recently purchased for your Department, and shipped to Sydney per s.s. "Hawkes Bay," viz. :— In original certificates.

- (1.) Certificates of the pedigrees of fifty-three cattle, showing distinctive markings, and breeding state of the cows, prize, notes, milking, and other details.
- (2.) Certificates for nineteen pigs (claim for insurance being made owing to death of twentieth pig; certificate, therefore, not enclosed).

The accounts in connection with this matter will be forwarded to you by next mail.

I have, &c.,

DANIEL COOPER
(Per T.Y.).

Pedigrees with Mr. O'Callaghan.—Mr. Bruce, 24/8/98.

The Acting Agent-General to The Secretary for Mines and Agriculture, Sydney.

Sir, Westminster Chambers, 9, Victoria-street, Westminster, S.W., 29 July, 1898.

Referring to the consignment of cattle and pigs per s.s. "Hawkes Bay," I have now the honor to enclose, for your information, copies of Messrs. J. Thornton and Company's account, together with the subsidiary vouchers forwarded therewith. Copy accounts, Messrs. Thornton & Co., Mr. Inspecting Vet. Surg. Villar, Mr. J. Miller (fodder), Blyth and Pascoe (boxes).

Messrs. Thornton have deducted the proportionate amounts payable for fittings, fodder, attendance, &c., by the parties to whom the benefit of shipping stock by this opportunity was afforded.

I also enclose a copy of Messrs. Houlder Brothers and Company's account for freight, as well as a copy of the insurance policy. Copy, Houlder's account. Copy, insurance policy.

It will be noted that after, making all payments in connection with the animals shipped per s.s. "Hawkes Bay," a balance of about £900 remains within the estimated cost submitted to you in March last. We have, therefore, I think, an ample margin left to cover the purchase of the Holsteins.

I have, &c.,

DANIEL COOPER.

The New South Wales Government in account with John Thornton and Company.

7, Princes-street, Hanover Square, London, W., June, 1898.

Purchase of 11 Shorthorns, 5 Red Polls, 9 Guernseys, 7 Ayrshires, 10 Jerseys, 7 Kerries, 4 Dexters, 20 Pigs; shipped per s.s. "Hawkes Bay," 22 June, 1898.

Be it known that James Fraser & Co., as our agents as well in their own name as for and in the name and names of all and every other person or persons to whom the same doth, may, or shall appertain, in part or in all, doth make assurance, and cause themselves and them, and every of them, to be insured, lost or not lost, at and from, farms to London, while there, and thence to Sydney, New South Wales, including all risk of craft to and from the vessel, with leave to call at any ports and [or] places to coal, and for all purposes to sail with or without pilots, to be towed and to tow and assist vessels in all situations, including all risk of any act of neglect or default or error of judgment of the pilot, master, or crew, or as per bill of lading or charter party.

Upon any kind of goods and merchandises, and also upon the body, tackle, apparel, ordnance, munition, artillery, boat, and other furniture, of and in the good ship or vessel called the "Hawkes Bay," s.s., whereof is master under God for this present voyage or whosoever else shall go for master in the said ship, or by whatsoever other name or names the same ship, or the master thereof, is, or shall be named or called; beginning the adventure upon the said goods and merchandises from the loading thereof on board the said ship, upon the said ship, &c. and shall so continue and endure, during her abode thereupon the said ship, &c. And further, until the said ship, with all her ordnance, tackle, apparel, &c., and goods and merchandise whatsoever shall be arrived at upon the said ship, &c., until she hath moored at anchor twenty-four hours in good safety; and upon the goods and merchandise until the same shall be there discharged and safely landed. And it shall be lawful for the said ship, &c., in this voyage to proceed, and sail to, and touch, and stay at any ports or places whatsoever without prejudice to this insurance. The said ship, &c., goods, and merchandise, &c., for so much as concerns the assured by agreement between the assured, and assurers in this policy are and shall be valued at £5,637 on cattle and a few pigs as per specification so valued. To cover all risks, including mortality, jettison, and washing overboard, but animals walking, or being capable of walking on arrival, to be deemed safely arrived, and no claim to attach thereto except for general average.

Touching the adventures and perils which we, the assurers, are contented to bear, and do take upon us in this voyage; they are of the seas, men-of-war, fire, enemies, pirates, rovers, thieves, jettisons, letter of mart and counter-mart, surprisals, takings at sea, arrests, restraints, and detentions of all kings, princes, and people of what nation, condition, or quality soever; barratry of the master and mariners, and of all other perils, losses, and misfortunes, that have or shall come to the hurt, detriment, or damage of the said goods and merchandises and ship, &c., or any part thereof. And in case of any loss or misfortune, it shall be lawful to the assured, their factors, servants, and assigns, to sue, labour, and travel for, in and about the defence, safeguard, and recovery of the said goods and merchandises, and ship, &c., or any part thereof, without prejudice to this insurance; to the charges whereof we, the assurers, will contribute each one according to the rate and quantity of his sum herein assured; and it is especially declared and agreed that no acts of the insurer or insured in recovering, saving, or preserving the property insured shall be considered as a waiver, or acceptance of abandonment. And it is agreed by us, the insurers, that this writing or policy of assurance shall be of as much force and effect as the surest writing or policy of assurance heretofore made in Lombard-street, or in the Royal Exchange, or elsewhere in London. And so we, the assurers, are contented, and do hereby promise and bind ourselves, each one for his own part, our heirs, executors, and goods, to the assured, their executors, administrators, and assigns, for the true performance of the premises, confessing ourselves paid the consideration due unto us for this assurance by the assured at and after the rate of seven guineas per cent.

In witness whereof we, the assurers, have subscribed our names and sums, assured in London.

N.B.—Corn, fish, salt, fruit, flower, and seed are warranted free from average, unless general, or the ship be stranded. Sugar, tobacco, hemp, flax, hides, and skins are warranted free from average under five pounds per cent.; and all other goods, also the ship and freight, are warranted free from average under three pounds per cent., unless general, or the ship be stranded.

London, 24 June, 1898

The Under Secretary for Finance and Trade to The Under Secretary for Mines and Agriculture.

Sir,

The Treasury, New South Wales, Sydney, 5 October, 1898.

I have the honor to hand you, enclosed, bills of lading (2) and invoices (2) in connection with shipments from England.

These documents have been received in support of payments made by the London and Westminster Bank. They are not advices of shipments to arrive.

I have, &c.,

F. KIRKPATRICK,

Under Secretary for Finance and Trade.

The Accountant.—A.S. 7/10/98. These should be placed with papers.—10/10/98. Records, 98/8,019. Place with other papers.—A.S., 10/10/98. Records.

(No. of cheque and voucher, 12,516.)

(Agent-General, received 1st July, 1898, New South Wales.)

(Stamp, 1d.)

(Stamp, Sixpence.)

(Agent-General, received 1st July, 1898, New South Wales.)

Australian and New Zealand Steam Trade Bill of Lading, 1893.

Freight payable at Port of Shipment.

SHIPPED in good order and condition, by the Agent-General for New South Wales, on board the steamship "Hawke's Bay," whereof is master for this present voyage, now lying in the port of London, and bound for Sydney, New South Wales, with liberty to call at any port or ports, to receive and [or] discharge goods and passengers, and to take in coal and [or] other supplies, or for any other purpose, and to sail with or without pilots, and to tow and assist vessels in all situations, the following goods, viz. :—

Fifty-three cattle, and boxes for same ... } On deck at shipper's risk, ship not responsible for jettison,
Nineteen pigs, and pens for same } disease, mortality, or accident.

53 cattle, 19 pigs. Being marked and numbered as in the margin, and to be delivered (subject to the exceptions and conditions hereinafter mentioned) in the like good order and condition from the ship's deck, at her anchorage (where the ship's responsibility shall cease), at the aforesaid port of Sydney, New South Wales (or so near thereto as she may safely get), unto the Honorable the Minister for Mines and Agriculture, or to his or their assigns. Freight for the said goods, with primage, to become due on shipment, and to be paid in London, in cash, without deduction, ship lost or not lost. Average according to York-Antwerp Rules, 1890.

The act of God, the Queen's enemies, pirates, robbers or thieves by land or sea, but not pilferage, arrests or restraints of princes, ruler, or people, riots, strikes or lock-outs, or other labour disturbances, or delay caused directly or indirectly thereby, and loss or damage resulting from any of the following causes or perils are excepted, viz. :—Insufficiency in packing or in strength of packages, loss or damage from rust, vermin, breakage, leakage, sweating, evaporation, or decay; injurious effects of other goods, effects of climate or heat of holds; risk of craft, of trans-shipment, and of storage afloat or on shore; fire on board, in hulk, in craft, or on shore; explosion, accidents to or defects in hull, tackle, boilers, or machinery, or their appurtenances; barratry, jettison, neglect, default, or error in judgment of the master, mariners, engineers, or others in the service of the owners; collision, stranding, perils of the seas, rivers, or navigation of whatsoever nature or kind and howsoever caused, and accidents, loss, damage, delay, or detention from any act or default of the Egyptian Government or the administration of the Suez Canal, or arising out of or consequent upon the employment of vessels of the line in Her Majesty's Mail Service.

The ship will not be responsible for correct delivery unless each package is distinctly, correctly, and permanently marked by the merchant before shipment, with a mark and number or address, and also with the name of the port of delivery, which last must be in letters not less than 2 inches long.

The owners are to be at liberty to carry the said goods to their port of destination by the above or other steamer or steamers, ship or ships, either belonging to themselves or to other persons, proceeding by any route, and whether directly or indirectly to such port, and in so doing to carry the goods beyond their port of destination, and to trans-ship or land and store the goods either on shore or afloat, and reship and forward the same at the owners' expense, but at merchant's risk, but subject to any proved claim for loss of market on any goods so overcarried, such claim not to exceed 10 per cent. of the net invoice cost of such goods.

The

The ship will not be accountable for gold, silver, bullion, specie, jewellery, watches, clocks, precious stones, precious metals, bank notes or securities for money, paintings, sculptures, or other works of art, nor beyond the value of £5 per cubic foot, nor exceeding £100, for any one package, unless the value thereof shall have been declared at time of shipment, and the bills of lading signed with a declaration of the nature and value of the goods appearing thereon, and extra freight in respect of same agreed upon and paid: nor for loss, injury, or detention to packages intended for different consignees, but made up into one package, unless the contents and value of each separate package be given before shipment, and freight paid accordingly: nor for damage to castings or show-cases, nor for breakage of glass, glassware, chinaware, or earthenware, or other goods of a brittle or fragile nature, of any description from whatsoever cause arising, excepting improper stowage and handling.

Specie deliverable in Melbourne or Sydney will be conveyed from the steamer to the Mint at owner's expense, but at the merchant's risk. All liability of the owners is to cease as soon as the specie is free from the steamer's tackle.

If chemicals, liquids, or other goods of a dangerous or damaging nature are shipped without being previously declared and arranged for, they are liable upon discovery to be thrown overboard, and their loss, as well as any loss or damage to the ship or cargo, or to any person or interest whatsoever, will fall upon the merchants or owners of such goods. Double freight will be charged on all goods not correctly described.

All fines and expenses or losses by detention of vessel or cargo, caused by incorrect or insufficient marking of the package, or by incomplete or incorrect description or weight (or any other particulars required by the authorities at the port of delivery), either upon the packages or the bill of lading, shall be paid by the shipper or consignees of the goods.

The master or agent is to deliver the goods with all reasonable despatch, and the consignees or their assigns must be ready to take delivery as soon as the ship is ready to discharge them, otherwise the master or agent shall be at liberty to land and warehouse the goods, or discharge them into a store-ship, or hulk, or into lighters, or on a wharf, as customary, at the merchant's risk and expense.

In case of quarantine, the goods may be discharged into quarantine depôt, hulk, or other vessel, as required for the ship's despatch. Quarantine expenses upon the goods, of whatsoever nature or kind, shall be borne by the owners of the goods.

In case of the blockade or interdict of the port of discharge, or if the entering of or discharging in such port shall be considered by the master unsafe by reason of war or disturbances, the master may land the goods at the nearest safe and convenient port or place at the expense and risk of the owners of the goods; and the ship's responsibility shall cease when the goods are so discharged into proper and safe keeping, the master giving immediate notice of the same to the consignees of the goods, so far as they can be ascertained.

The ship shall have a lien upon the goods for all freight and charges, for which the goods are liable under the bill of lading.

No claim that may arise in respect of goods shipped by this steamer will be recoverable unless made at the port of delivery within seven days after the discharge of said goods.

The shipowners' liability, in case of loss or detention, or injury to goods, for which they may be responsible, to be calculated on and in no case to exceed the net invoice cost and disbursements.

Weight, measurement, contents, quality, and value unknown.

In witness whereof the master, purser, or duly authorised agent of the said ship hath affirmed to four bills of lading, all of this tenor and date, one of which being accomplished the others to stand void. If required by the owners or their agents, one of the bills of lading must be given up, duly endorsed, in exchange for the goods.

Dated in London, 23rd June, 1898.

For the Master,
 TYSER & CO. (as Agents),
 Per ALFRED J. BIRD.

Merchants are cautioned against shipping goods of a dangerous or damaging nature, as by so doing they become responsible for all consequential damage, and also render themselves liable to penalties imposed by statute.

1898.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

DISEASES IN SHEEP ACT.

(RETURN SHOWING DETAILS OF RECEIPTS AND EXPENDITURE FOR THE YEARS 1894 TO 1897
INCLUSIVE, UNDER.)

Printed under No. 9 Report from Printing Committee, 27 October, 1898.

[Laid upon the Table in answer to Question No. 5, Votes No. 15, 20 September, 1898.]

Question.

- (5.) Revenue and Expenditure under Diseases in Sheep Act:—Mr. Hurley asked The Secretary for Mines,—Will he cause full information to be made public as to the amount of money collected under the Diseases in Sheep Act, together with further details of expenditure than are given in the Annual Report for 1897, Appendix N?

Answer.

APPENDIX Q.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

RINGBARKING AND DEFORESTATION.

(RETURN RESPECTING EFFECT OF, UPON THE CLIMATE OF THE COLONY.)

Printed under No. 18 Report from Printing Committee, 22 December, 1898.

[Laid upon the Table in answer to Question No. 1, Votes No. 50, 16 December, 1898.]

Question.

(1.) Dr. Ross asked the Minister of Public Instruction,—

(1.) In view of the answer given to Dr. Ross' Question on the 1st December, *re* the effect of ringbarking, and the succession of late years of disastrous droughts, will he ascertain from the Government Astronomer what effect (if any) ringbarking and wholesale deforestation has in increasing or diminishing the humidity of the atmosphere and evaporation from the soil during the months of summer, and at what rate humidity and evaporation takes place under the burning rays of an almost vertical and tropical sun on land that has been denuded of tree shade and every vestige of foliage?

(2.) Has ringbarking been found to have a tendency to increase or diminish the heat and humidity of the atmosphere during the summer; and to what extent does the change occur (if any) in districts that have been rung compared with unring country?

(3.) If ringbarking has no effect, as alleged, on rainfall or the production of heat waves or climatic disturbances, how is the effect explained of an increased evaporation arising from an overheated state of the land that is divested of trees, shade, and foliage; and what becomes of the moisture that is extracted from the overparched state of the soil and dried-up water-courses under the rays of a tropical sun?

(4.) Has deforestation been found to have had any effect in the production of heat-waves or sudden fall in temperature from which the Colony has suffered of late; or has any cause been assigned (physical, antarctic, meteorological, astronomical, or otherwise) to account for the remarkable occurrence of heat and cold disturbances that have of late been experienced in the Colony?

(5.) In the face of the present disastrous drought and dried-up river channels through which the Colony is now passing, what becomes of the alleged nineteen-year cycle theory of droughts; and does the year 1898 come under the category, or coincide in any way with the cycle theory, or is it merely a bald theory, put forth and founded on no other principle only that of mere guesswork?

(6.) Are there any records in existence to show the number of blizzards and cyclones that have occurred in the Colony, such as has been experienced in America; if so, when did they occur, and how and from what cause were they created?

Answer.

(1.) Owing to the fact that there were no instruments to measure evaporation in the forests prior to their destruction it is not possible to compare individual cases of destruction of forest areas; but some light is thrown on the question by comparing the evaporation in a dry year before destruction of forests with that in a recent one after the destruction of the forest, 1896 being a very bad year:—

Year.	Evaporation.	Rainfall.
1888	45·638 inches.	7·13 inches.
1896	34·690 „	13·14 „

From this it would appear that the recent destruction of forests in the Hay district has not caused so much evaporation as that registered in a dry year, before the wholesale destruction of forests.

(2.) It is impossible to say in reference to any particular forest area whether the denudation has increased or diminished the heat, because there were no thermometers in the forest before it was cut down, but if a decided change followed the clearing it would appear in the neighbouring meteorological stations, and no such effect has been shown by these changes.

(3.) The cause of increased evaporation is the hot dry winds which have prevailed, coming over in unusual force from the tropics; these have caused the extra evaporation, and at the same time carried it away. As to the effect of trees in dry weather, it may be mentioned that exhaustive experiments have been made in England and on the Continent, as to the amount of water which the leaves of trees evaporate. I will quote one of these experiments: A small chestnut tree, covering about 5 feet by 4 feet, was found to evaporate on a hot day 16 gallons of water, this is equivalent to $1\frac{1}{2}$ inches of rain over the ground that the tree covered. It is fair to assume that a tree in the dry climate and heat of Australia would evaporate more, but for comparison I will take the English experiment, and I find that the evaporation from water surfaces in the hottest parts of New South Wales and in hot winds lasting day and night the evaporation in twenty-four hours has never since the records began, thirteen years, reached 1 inch.

(4.) I have never known it to be stated by meteorologists that deforestation had any effect in producing heat waves. The reason they assign for such effects is entirely in accordance with the experience in New South Wales, viz., unusual heat energy within the tropics, which first accelerates the trade winds, and then sends the return hot winds to us as strong, dry, and hot north-west winds—such as we have had for the past four years, off and on. These winds heat and dry up the surface-soil rapidly, and absorb any clouds, leaving a clear sky through which the sun's rays come down with great heating power. While these north-west winds prevail the southerly winds are forced back, and they gather up force to the south of Australia. In the event of any failure in the north-west winds, the cold southerly winds rush in, giving us arctic instead of equatorial heat. In the spring and summer so far of this year we have had an unusual force of north-west winds, hot and dry, and then the southerly took possession and brought down the temperatures from over 100° (100° to 110°) below 60° , in some cases under 50° .

(5.) With reference to the nineteen years theory I have no fear of its failure. Every year but adds proof to what has been said by me; the apparent failure is not so in fact. I first mentioned my belief in it in 1870. In 1876 I published a full and carefully prepared account of all I could find in reference to it, and said then "I have never put the nineteen years period forward as the solution of our difficulty, but the evidence has convinced me that the nineteen years period represents our climatic changes." In 1896 I returned to the subject more convinced than ever of its truth, and then said "In 1876 I pointed out that out of many cycles discussed one of nineteen years seemed to represent the seasons in New South Wales better than any other." I quote these as evidence that I have always made it clear that the nineteen years period was not an exact statement of the weather changes here; and those squatters who intelligently followed what I said found it very much to their advantage, and made out of it various sums from £250,000 downwards. In 1896 I stated that I thought 1897 and 1898 would be good years. If they are compared with average years that statement of mine will be found to be fairly correct, but the public have got into the way of thinking the six years, 1889 to 1894 inclusive, as average years, while as a matter of fact the rainfall in these years was 25 per cent. above the average, and this makes the current years look worse than they are.

(6.) I have never heard of a cyclone or blizzard in this colony. Cyclonic storms of small area, often less than a mile in diameter, are common, and often very destructive; many are on record, but the list is of recent ones only. Meteorologists understand a "blizzard" to be a cold polar wind, which freezes as it goes. I have never heard of one in this colony.

II. C. RUSSELL,
Government Astronomer.

1898.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

DROUGHTS.

(RETURN RESPECTING THE CAUSE AND EFFECT OF.)

*Printed under No. 17 Report from Printing Committee, 15 December, 1898.**[Laid upon the Table in answer to Question No. 3, Votes No. 45, 1 December, 1898.]***Question.**

(3.) The Drought:—Dr. Ross asked the Minister of Public Instruction:—

(1.) In view of the serious nature of the protracted drought from which the Colony (in many parts of the interior) is at present suffering, will he ascertain from the Government Astronomer some information as to the probable cause of the frequent and continuous recurrence of late years of these havoc-producing droughts which are so seriously affecting our pastoral and agricultural industry?

(2.) Will he also ascertain what effect (if any) wholesale deforestation and ringbarking have had of late years in increasing or diminishing the humidity of the atmosphere in country that has been ringbarked?

(3.) Is the severity of the drought confined to districts where the practice of ringbarking has most frequently prevailed, or does it occur in the rung and unring country alike?

(4.) In what districts in the Colony is the drought most prevalent and most continuous of late years?

(5.) Can he assign any reasons, climatically or otherwise, for the frequent recurrence of late years of these sad and destructive droughts throughout the Colonies.

Answer.

Mr. Hogue answered,—I will presently lay upon the Table such information as I have been able to obtain upon this subject.

Reply to Question No. 1.

Droughts are not confined to Australia. They are well known in South America, Africa, India, and in a less degree all over the world.

In England, I have seen vegetation burned up, dry river-beds, and Manchester on short supply of water (1887).

In India the Meteorological Department have traced some, if not all, of their droughts to the monsoon winds, and I have done the same for this Colony. The monsoons make or mar our climate. Given the monsoon full of moisture, and rain falls abundantly all over the Colony. If, on the other hand, the monsoon wind is dry, it is also very strong, and sends us frequently and persistently strong hot north-west winds, which bring no moisture, and dry up the country—veritable Australian "Siroccos," scorching plants and animals alike.

This it is which puts up the temperature and dries up the clouds which would otherwise bring us rain.

So far as can be ascertained, droughts affect more or less all parts of the world, but not with uniform severity.

These and many other facts prove that droughts are not an Australian production; but they are the result of special energy generated in Equatorial regions, and distributed the world over by the trade winds and monsoons.

The source of this energy is, I believe, outside the earth, but a full knowledge of it will not be obtained until all countries combine efforts to trace the whole history of these destructive forces. Looked at from our locality, we find it manifested in unusual velocity of the N.W. wind, which is by its abundance capable of bringing down upon us the heated atmosphere of the Equator with very little loss of heat.

Reply to Question No. 2.

For many years I have never lost an opportunity for studying the effect of the destruction of forests upon rainfall, and, so far as this Colony is concerned, it is quite certain that the destruction of trees has not decreased the rainfall. Indeed, it would seem to have increased and not decreased it; for instance, the average rainfall over the whole Colony, 1889 to 1894 inclusive, is 24·7 per cent. above the average of all years. In 1859 it was stated in the United Kingdom that the increase of populations in Europe, and consequent destruction of forests, had caused a falling off in the rain supply, and at the cost and suggestion of the Marquis of Twesdale, the Meteorological Society of Edinburgh offered a prize for the best essay on the subject, and, after reading the essays, the Committee of Meteorologists said, "There were no grounds for thinking that the rainfall of Western Europe was getting less."

An elaborate investigation into the rainfall records of France and England was made by Mr. Symons, the highest authority in these matters in England, and he also came to the conclusion that the rainfall was not decreasing.

A similar investigation was carried out in the United States by the Smithsonian Institution, and they also, in a country which, above all others, has destroyed forests wholesale, have found no evidence of decreasing rainfall.

Professor Marsh, in his book on "The Earth as Modified by the Action of Man," enters fully into the question, and discussed all the available evidence on the subject, and concluded that there was no evidence that the annual rainfall is diminished or increased by the action of man in the destruction of trees.

Reply to Question No. 3.

In the recent droughts those parts of the Colony which have had the most intense droughts, viz., Western Riverina and the Darling country, have practically done no ringbarking. [See attached diagram B for McIndie, Kilterra, Wentworth, and Murray Downs, for the severe drought of 1895-6-7, as compared with the greatest previous drought, 1883-4-5, it will be seen that the drought in the south-western part of the Colony was the worst on record.] But in the northern districts, taking Bourke as a sample (on same diagram, B), it had in 1883-4-5 a far worse drought than 1895-6-7.

Reply to Question No. 4.

The drought has been most severe in Southern Darling country and in Western Riverina.

At Wentworth the average rainfall in 1895-6-7 has been 8 inches, while the average of all years is 12·64 inches; at Deniliquin the average rainfall for 1895-6-7 is 12·43 inches, as compared with an average for all years of 16·97.

There can be no doubt that the present drought has been more severe in the south-western districts of the Colony than elsewhere, but I think it has been exaggerated by the contrast presented by the abundant years 1889 to 1894 inclusive, which, as to rainfall, were the most abundant years on record. In figures that abundance is expressed by saying that during this period the rainfall was 24·7 per cent. above the average for all years. In these years commercial conditions favoured agricultural development, and the expansion of all matters connected with the products of the soil was unprecedented. After such a period of prosperity, the less abundant past four years are made to appear worse than they really are.

Reply to Question No. 5.

Droughts in this Colony have not been so numerous or severe during the past ten years as they have been in other periods—for instance, in the ten years preceding 1889, when droughts were much more severe than they have been recently, and this is very evident when the seasons are dispassionately compared.

No doubt great losses have been sustained in isolated parts of the Colony, and in almost every year, good and bad, this is the case; but judged by the official reports of agricultural and other produce, it would appear that on the whole 1898 will be a fairly good year.

In answer to Question 1, the origin and extent of droughts were indicated.

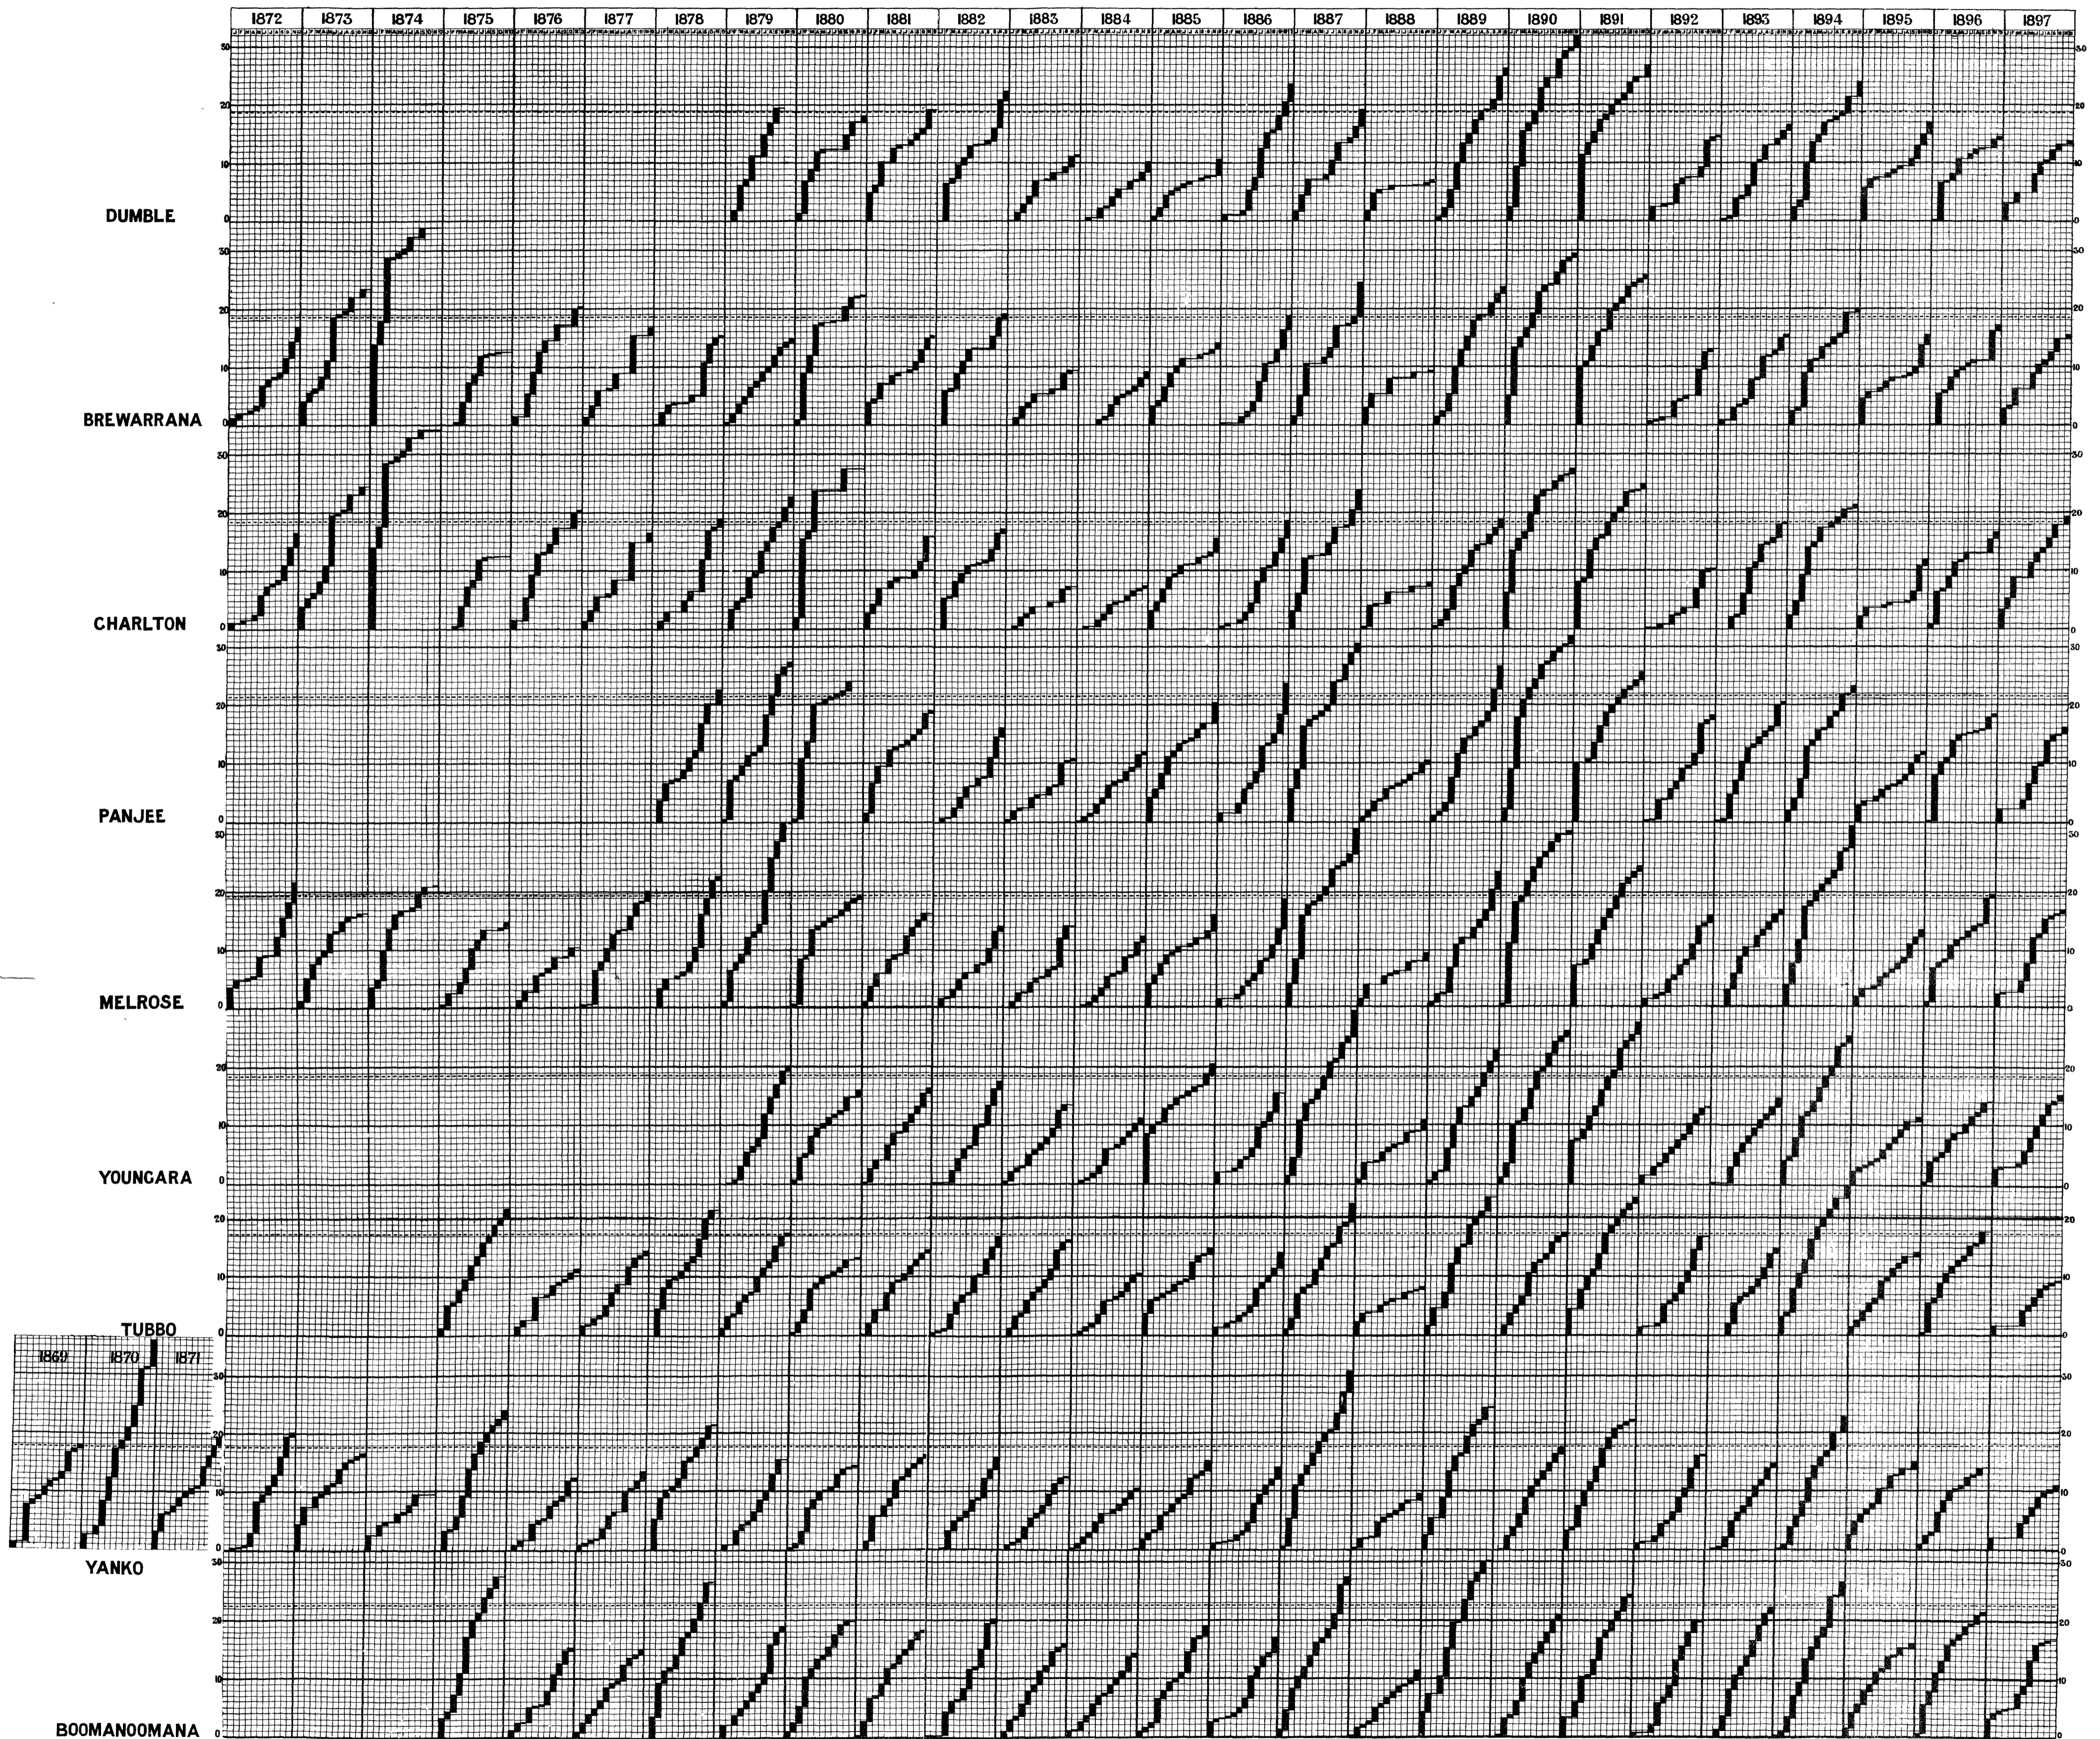

H. C. RUSSELL,
Government Astronomer.

Herewith two diagrams, A and B, showing the monthly rainfall for all years in the Central and Western Districts of the Colony; and another, marked C, showing the average rainfall of the whole Colony; the same for Deniliquin and Horsbarn (Victoria), as these towns show the average rainfall on the inland dry country.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

COAL-LADEN SAILING VESSELS FROM NEWCASTLE LOST AT SEA.

(RETURN RESPECTING.)

Printed under No. 8 Report from Printing Committee, 20 October, 1898.

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated 20th September, 1898, That there be laid upon the Table of this House, a Return showing,—

- “ (1.) The number and names of coal-laden sailing vessels which left the port of Newcastle during the past five years, and reported as being lost at sea.
 “ (2.) The alleged cause of such loss at sea.
 “ (3.) The number of lives lost in each vessel.
 “ (4.) The number and names of vessels, sail and steam, wrecked or lost upon the coast of New South Wales during the years 1896, 1897, and 1898.
 “ (5.) The alleged cause of such loss or wreck.
 “ (6.) The number of lives lost by such losses or wrecks.”

(*Mr. Smith.*)

- (1.) The number and names of coal-laden sailing vessels which left the port of Newcastle during the past five years, and reported as being lost at sea.
 (2.) The alleged cause of such loss at sea.
 (3.) The number of lives lost in each vessel.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

NAME OF "ROOKWOOD."

(PETITION FROM CERTAIN PROPERTY-OWNERS OF THE BOROUGH OF ROOKWOOD
AGAINST ALTERING.)

Received by the Legislative Assembly, 19 October, 1898.

Petition to the Honorable Members of the Legislative Assembly of New South Wales, that the name of "Rookwood" may not be changed, as suggested, or about to be suggested, by the Borough Council of Rookwood, unless with and by consent of a majority of *bona fide* property-owners within the said Borough.

THE Petitioners state that the Cemetery being within and forming part of the Borough of Rookwood, that it will be impossible to disassociate the name of the Township from that of the Cemetery.

Formerly the place was named Haslem's Creek, and the Cemetery was known as Haslem's Creek Cemetery.

Upon the change of name to Rookwood, the Cemetery at once became known as Rookwood Cemetery.

Formerly there were few owners of land; now there are many owners to object to a change of name because of above, and the expenses likely to be entailed thereby, and the fact that the Aldermen have not been authorised in any way by property-owners to try and effect such change of name up to date, which is being attempted at the expense of such owners as ratepayers.

Your Petitioners, therefore, humbly pray that no change of name be permitted except upon request, and at the expense of a majority of property-owners.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 89 signatures.]

1898.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

DEPARTMENT OF JUSTICE.

(REPORT OF THE COMPTROLLER-GENERAL OF PRISONS RESPECTING THE OPERATIONS OF THE
NEW SYSTEM OF RESTRICTED ASSOCIATION IN GAOLS.)*Printed under No. 13 Report from Printing Committee, 24 November, 1898.*

Minute Paper.

Department of Prisons,
Comptroller-General's Office, Sydney.*Subject:—New System of Restricted Association.*

THE new system of restricted association has now been sufficiently long in operation to allow of an estimate being arrived at as to its value, and the good it will be likely to effect from a moral as well as from an economic standpoint.

This day last year a report was furnished to the Minister upon the subject, of which the following is an extract:—

"The new system of restricted association was, with the approval of the Minister, personally initiated by me at Berrima Gaol on the 14th ultimo. At 5 p.m. on the day mentioned the prisoners were assembled as they left the works and were addressed by me. The objects and intention of the new departure were explained to them, and a condensed summary of my remarks was afterwards exhibited for general information, together with a copy of revised Regulation 35, section 15. I spent a few days at Berrima watching matters, and was pleased to find that no trouble of any kind occurred. The men seemed to appreciate the change, and I hope that this will be the feeling in the other prisons as the system is extended. The works prisoners at Berrima do not amount to a large number—there are usually thirty or so—but the experience gained by their reception of the new treatment may be of value when the system is being extended to the more populous gaols. As the Government Architect lights up the cells of the different prisons the extension will be gradually carried out."

The system which was superseded by the new departure will be understood from the following remarks which were addressed by me to the prisoners on the occasion in question, and which since then have been repeated to the prisoners in other gaols when inaugurating the new system:—

"It has been decided to alter the system of associating prisoners in yards. Such a system works badly in the interests of the prisoners generally; it associates well-meaning men with some of the worst characters, and so prevents reformation; it presents opportunities for quarrelling, bullying, and all sorts of tyranny; it forces men who have earned indulgences to share these rewards with undeserving prisoners, and, in various other ways, it contributes towards misconduct and discomfort. The prisoners, of course, know all these things quite well; and it is certain that only a very few, and those of the worst class, will regret the introduction of the new plan, which has for its object the reformation and protection of the well-disposed.

"Cells will be lighted up at night, so as to admit of men reading to a reasonable hour. Books will be provided of a more interesting character than has hitherto been the case; and it is hoped that these privileges will conduce to the comfort, instruction, and improvement of the prisoners. Misconduct will, of course, lead to their withdrawal. The men will take their meals in their cells, and will only associate at work, religious instruction, and at exercise.

"This is a modification of the system pursued in England, Victoria, and elsewhere; and it has been thought right to bring the New South Wales prisons under similar treatment, with not quite such rigorous restrictions. A man who honestly desires to reform will now have fewer obstacles placed in his way, as he need not fear contamination by association. He will have the companionship of his fellows while at work, but he will secure a wholesome privacy at meals and at all other times.

"I have thought it well to take the prisoners into my confidence, so that they may clearly understand the reasons for the new departure."

Before the system could be extended much preliminary work had to be done in lighting up the various cells, in manufacturing furniture, and in other necessary preparations, entailing not only considerable expense, but also considerable labour. But as the various gaols became ready the new method was gradually applied to them, until to-day there are sixteen under its operations, all working successfully and smoothly. Amongst them are the large gaols at Bathurst, Goulburn, and Maitland.

The system will be extended to the remaining gaols as opportunity offers.

The

The officers in charge of the sixteen prisons before referred to without exception report most favourably of the results accomplished by the new departure in our gaol system. Discipline and order have been improved, the mutual contamination of prisoners, which was bound to exist under the old plan, has been materially decreased, and the moral tone of the prisoners has immeasurably benefited. Appended will be found reports, dated the 1st instant, from the governors of the large gaols. The opinions of officers of such great experience must be of great value, more especially as they have controlled the operations of their respective gaols under both the old and the new methods, and are, therefore, in the best of all positions to pronounce upon their respective merits.

I think that the restricted association system may now fairly be adjudged successful, and that it has justified the expenditure in lights, books, and other accessories which its establishment has entailed. It is with great satisfaction that I am able to report that no friction of any kind attended its inauguration, and that no prisoners gave cause for punishment.

It was expected by old experienced officials that considerable trouble would be encountered with the "old hands" in initiating a plan which had necessarily to seriously interfere with long-established customs; but nothing happened, and there is every reason to believe that fully 95 per cent. of the prisoners welcome the change which relieves them from the tyranny of their fellows and the moral degradation attendant upon the yarding system. Another good likely to result will be a reduction in punishments, for as opportunities for misconduct will be less numerous, a consequent decrease in the number of punishments will naturally follow. The majority of prison offences occurred on the Saturday afternoons and Sundays when the prisoners were associated, out of working hours, for long periods. Under the new system, these days are the quietest of the week.

As the Minister knows, the bringing about of what is probably the largest measure of reform yet instituted in our prisons has entailed a great deal of anxiety and worry. It is a great satisfaction to know, however, that the reformatory and deterrent results are likely to be most beneficial to the country. Perhaps, when all our gaols are working under the new plan, the Minister might be favourably disposed to consider whether some alteration might not be brought about as regards the term of separate treatment now passed by all prisoners serving sentences of three years and upwards. In my report for 1896, a modification of the existing plan was suggested as follows:—

"But I do not think the period of seclusion should be so long as at present, and I do not think the same period should be indiscriminately applied to first-convicted men as to more hardened graduates in crime. And Mr. Michael Davitt's suggestions appear to have much in them that is commendable. He thinks a few months at the beginning of the sentences, with a month or two at the end, would be beneficial, so that 'at the end of the sentence the prisoner would be amenable to the attentions and services of the chaplain and the schoolmaster, and every such reformatory influence as could be brought to bear upon him just before he comes out into the world again.' This is the method followed in Norway and in the neighbouring colony of Victoria, where much success has attended its operations.

"It is therefore suggested that some similar plan might be followed here experimentally. For prisoners serving under three years' imprisonment of any kind, the Comptroller-General might be entrusted with discretionary powers to provide such periods of seclusion at the two ends of the sentence as might be considered fitting, the maximum duration being defined. Prisoners with sentences of three years and upwards might be the subjects of separate treatment for periods at both ends of the sentences, calculated on a sliding scale according to length of sentence and previous records, second offenders being dealt with more stringently than first, and third offenders more stringently than second. I attach great importance to a period of seclusion from ordinary gaol routine being passed immediately anterior to discharge. Visits from clergymen and others of the staff would probably exercise a beneficial influence for good at a critical time, while visits from relatives, excepting where such persons were known to be unsuitable people, should be liberally allowed. Home ties, relaxed unavoidably by the requirements of punishment, might thus be renewed and strengthened."

Since the foregoing was written, the system of restricted association has been brought into operation, which is a further reason for a revision of the rules respecting separate treatment.

There is one other matter to which the Minister's attention might be invited, and that is to the necessity which exists for decreasing the flow of criminals into this Colony from other parts. In Victoria and in South Australia there are Acts rigorously dealing with criminals making their way into those colonies from other places, and something of the sort is urgently needed here. It is a discouraging thing to the Prisons Administration to see its gaol population added to from foreign sources while it is expending much care and consideration to the reformatory treatment of New South Wales offenders.

The Under Secretary of Justice,
3rd November, 1898.

FREDK. W. NEITENSTEIN,
Comptroller-General.

(SECOND SESSION.)

CLAIM OF JOHN BRENNAN AGAINST ROADS DEPARTMENT.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on 11th October, 1898, "to inquire into and report upon the claim of John Brennan against the Roads Department on Contracts 21U and 57U, Casino District," and to whom was referred on the same date, "the Minutes of Proceedings and Evidence of the Select Committee of Session 1896," have agreed to the following Report:—

Your Committee, having examined the witness named in the margin, and considered the evidence referred, find—

John
Brennan.

1. That, with reference to Contract 21U, in 1891, the Roads Department accepted the tender of John Brennan for the construction of a bridge over a creek on the road Casino to Lismore.
2. That shortly afterwards Brennan proceeded to construct the work, and had most of his material on the ground, the old bridge partly removed, and temporary bridge constructed. The Road Superintendent then informed Brennan that he was on the wrong site, and compelled him to reinstate the old bridge and remove all his material to a site which was subsequently pointed out, and which was about a mile and a half nearer Lismore.
3. That the specification set out that the bridge was to be erected over a creek, and the surrounding scrub to be cleared away; whereas the site pointed out by the Road Superintendent to Brennan was a black gully, perfectly free from scrub of any description.
4. That the quantities supplied in the specification were suitable for the site on which Brennan started, but inadequate in every way for the place at which the bridge was subsequently constructed; and, consequently, he was compelled to provide a quantity of fresh material.
5. That with reference to Contract 57U, on a subsequent date in the same year to the acceptance of the tender for Contract 21U, the Roads Department accepted the tender of John Brennan for the construction of approaches to a bridge at Beantree Crossing, Casino—Mount Lindsay Road.
6. That although the contract was nearly completed, the Road Superintendent declined to pay Brennan, or any of his orders for payment to the men working on the contracts, until they sued and obtained a verdict against him, after which the claims were paid by the Road Superintendent. The men then declined to do any further work on Brennan's contracts.
7. That in consequence of the non-payment of wages and certain other liabilities arising out of these contracts, Brennan was sued by one of his workmen and a storekeeper, who obtained a *ca. sa.* against him, and had him arrested.
8. That Brennan claimed £201 17s. 9d., balance due for work performed, but the Department refused to acknowledge the claim, and offered him £46 5s. 4d., which he declined to accept.
9. That Brennan has suffered imprisonment and loss in consequence of a mistake on the part of the Road Superintendent, as, had such mistake not occurred in connection with Contract 21U, he would have been able to complete Contract 57U, and thereby averted the cancelling of the contract and his subsequent arrest and imprisonment.

Your Committee consider that Brennan has a claim, and therefore recommend his case to the favourable consideration of the Government.

ROBERT PYERS,
Chairman.

No. 2 Committee Room,
Legislative Assembly,
16th December, 1898.

1896.

PROCEEDINGS OF THE COMMITTEE.

WEDNESDAY, 28 OCTOBER, 1896.

MEMBERS PRESENT :—

Mr. Kelly,		Mr. Lyne,
	Mr. Pyers.	

Mr. Pyers called to the Chair.

Entry from Votes and Proceedings appointing the Committee read by the Clerk.

John Brennan called in, sworn, and examined.

Witness withdrew.

[Adjourned till Wednesday next, at *half-past Two* o'clock.]

WEDNESDAY, 4 NOVEMBER, 1896.

MEMBER PRESENT :—

Mr. Harris.

In the absence of a Quorum, the meeting called for this day lapsed.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

CLAIM OF JOHN BRENNAN AGAINST ROADS DEPARTMENT.

WEDNESDAY, 28 OCTOBER, 1896.

Present:—

MR. KELLY, | MR. LYNE.

ROBERT PYERS, ESQ., IN THE CHAIR.

John Brennan sworn and examined:—

1. *Chairman.*] What is your occupation? I am a quarryman at the present time.
2. Are you residing in Sydney at the present time? Yes.
3. You were the contractor in the year 1891 for Contract 21v and Contract 57u, in the Casino district? J. Brennan.
28 Oct., 1896.
Yes.
4. You did not finish the work, I understand? Not exactly; the Government put the metal on Contract 21v, and they cancelled Contract 57u.
5. Will you tell the Committee, as concisely as you can, the particulars of your claim on Contract 21v? I will. This contract was advertised in the *Richmond River Express*, of Casino, on 3rd April, 1891. Tenders, to close on 15th April, were invited for the erection of bridge over creek on road Casino to Lismore, near Tunstall. The time for closing tenders was extended to 23rd April, 1891. When I got notice that my tender was accepted I went to the creek near Tunstall. I could find no pegs. I met William Harley, the maintenance-man there; he did not know anything about the pegs, nor did he say it was not the place. I waited on Mr. Gracie next morning, 8th June, 1891. I requested that he would meet me on the site, by appointment, as I could find no pegs, and might put the temporary crossing in the way of the bridge. He said the bridge was going on the site of the old one, and that I could not go wrong with the crossing, and he told me to get the material delivered and he would be out there in a few days. When he came the crossing was complete, the piles, girders, and headstocks delivered, and the old bridge stripped. When he came he said this is not the place. I asked him what he was going to give me for what I had done. He said he could not send in a voucher for that, but he would allow me for it in something else, and would not keep me to time. I had to redeck the bridge and shift all material and crossing $1\frac{1}{2}$ miles into Lismore municipality, and the bridge was erected over a black gully, which terminated in a paddock at a distance of from 5 to 10 chains above the bridge. There were no pegs to be found on this site. The tracings did not suit the place. From B.M. mark given on gum-tree only half of the bridge would cross the gully. The piles for piers and wings and sawn timber for wales and bracing were too short, also twice the quantity of sheathing necessary, while the embankment in approaches was nearly three times the quantity on the tracing. This contract was carried out contrary to plan, specification, and district. I have a letter from the Departments that the approaches would be increased from 82 to 110 lineal yards (it should be from 61 to 110 lineal yards), a memo. that I would be paid for 1,660 cubic yards of earth embankment, instructions to supply 122 cubic yards of $2\frac{1}{2}$ -inch metal and 122 cubic yards of 4-inch ballast, and 96 cubic yards of rubble; backing partly destroyed. These letters were sent in a registered letter from Broadwater on 23rd June, 1893. My plan and final voucher were left in the Works Office in Sydney by me in January. January, 1893, the Under Secretary for Works writes to me that £59 3s. 9d. was the amount of the final voucher, but that sums were afterwards paid, in pursuance of orders of the Court, which reduced it to £42 6s. 7d. In addition to this amount, £3 18s. 9d. has been allowed,

J. Brennan.
28 Oct., 1896.

allowed, making it a total of £46 5s. 4d. There have not been any orders of the Court on this contract. I gave Gilbert Hilliard an order for £4 (four pounds), which Mr. Gracie refused to pay, telling him there was no money coming on the contract. He paid it afterwards. I signed a bill for Neil McCall, amounting to £28, on this contract. In May, 1892, I signed a final voucher on Bean-tree Bridge contract. The amount was £35. When I signed it Mr. Gracie told me that he had paid Neil McCall £25 of the money. That would leave £7 against the contract. By my orders, in a letter from Mr. Gracie, I find he credits McCall with £11 to this contract. I would like the Departments to explain whom this £35 on Bean-tree Bridge contract was paid to. I signed the voucher, but got no money. At the same time I was asked to sign a voucher on Contract 57v—approaches to Bean-tree Bridge. I asked what he was going to do with the money. Mr. Gracie replied he would give it to the sureties for the work. I objected, and refused to sign it on those conditions. Two inspectors have reported on Contract No. 21v—Casino to Lismore. Mr. Hanna reported that the specifications were carelessly got up. Mr. Allman reported that, as the work was so long incomplete, he considered it desirable to keep the fines on, as the extras did not exceed £40. Mr. Gracie sent me a final voucher on this contract in March, 1892, for the sum of £29. £26 were to be paid to complete the work, leaving a balance of £3. I refused to sign it. He sent for it. I sent him my bill, which he returned, saying the voucher would be paid to his credit without my signature, and I might take whatever course I pleased.

6. You tendered for the bridge, understanding that it was to be built at another place? Yes.

7. You have not got the *Gazette* showing where it was called for in the first instance—whether it was to be over a creek or over a gully? It was over a creek.

8. You stripped a bridge on another creek, and made a temporary bridge? Yes.

9. Mr. Gracie, the Road Superintendent, came along, and told you that it was not the right place? Yes.

10. You had to build a bridge in another place? Yes.

11. A mile and a half away from the first place? Yes.

12. *Mr. Lyne.*] Did you not go to examine the site before you tendered for the bridge? No; I had never been there but once before.

13. What did you tender on? On the specifications and plan.

14. How long were you over contract time? I could not exactly say. The contract time was very nearly up before I started in the right place. It was supposed to be done in three months.

15. *Mr. Kelly.*] Before you got on to the right place the contract time was nearly up? Pretty well two months of the contract time had expired.

16. *Mr. Lyne.*] How much do you consider that the Department owes you on the contract now? £132 6s.

17. How much have they offered to pay you? £46 on that contract.

18. *Mr. Kelly.*] Does the sum of £132 6s. refer to two contracts? No; to one.

19. *Mr. Lyne.*] How long is it since the bridge was finished? Close on five years. There were three contracts.

20. Does the statement you read refer to one, two, or three contracts? It refers to one contract, and to a £35 final voucher on another bridge. Excepting the £35 voucher it refers to only one contract.

21. Did you complete the whole of the bridge on Contract 21v yourself? Mr. Gracie put on a few men to spread the metal on the road; that is all he did.

22. Why did he do that? He refused to send for any money for me to do it, and he moved for the cancellation of the other contract.

23. How much work do you say he did on the bridge on Contract 21v? He spread the metal on the road, at a cost of £26.

24. Did you refuse to do that? No.

25. Why didn't you do it? He would not send for any money to assist me to do it.

26. You had not money enough, I suppose, to do it? I had plenty of money to do it if he would let me have it.

27. He did not cancel the contract? No.

28. You said in answer to my question that you did not spread the metal because Mr. Gracie did not send for money due on the other contract? There was another contract finished with money owing on it.

29. What I want to get at is, why didn't you finish the Contract 21v? He reckoned that it was too long incomplete.

30. Had you no money to complete it? I had plenty of money to complete the job at the time.

31. Why didn't you complete it? He reckoned that it was not being done quickly enough.

32. *Chairman.*] Were you working on the job all the time? I was keeping it going, but I wanted to get the other job finished first. He disputed the quantities on this job before. He returned 1,236 yards for the quantities of earthwork, and I was not satisfied; I would not accept it. He remeasured it again, and returned for 1,660 yards. Even then the quantity was not in it, but I agreed to accept it if he would pay me. He wanted to get out of paying it at the finish.

33. *Mr. Lyne.*] I understand you to say that you did not complete this contract quickly, that you left it in abeyance, that you were not going on with it, and that Mr. Gracie took it out of your hands because you were over time, and finished it at a cost of £26 for spreading the metal? Yes.

34. You did not want to finish it, because you wished to finish the other two first? Yes.

35. Why? There was no necessity to finish this contract, because the road was clear and the traffic was going on. It was merely a matter of putting the metal on.

36. Was this bridge being used before the metal was put on? It was being used all the time; it was used for two months previously.

37. *Mr. Kelly.*] How many contracts have you carried out for the Department? Three altogether.

38. *Chairman.*] Will you now make a statement to the Committee in respect to Contract 57v? I will. I may state that the metal was an extra work, given by the Road Superintendent, Mr. Gracie, to me after the earthworks were finished. Contract No. 57v, of 1891, Casino to Mount Lindsay, was let to me on 19th November, 1891. According to the conditions of this contract they agreed to pay me 80 per cent. as the work proceeded. In a permit to start work they agreed to pay 70 per cent. each month as the work proceeded. They made no payment on the contract to 23rd February, 1892, when they returned for £80 (eighty pounds). Early in December, 1891, I signed a paper for all moneys coming to me to be paid to an account in the Commercial Bank in the names of the sureties of this contract—A. Cumming and T. J. Reddecliff. They were to go security for stores, and pay it to my credit as I required it. They did

did so for a time. On 23rd February they kept £80 on this contract and £45 on the Bean-tree Bridge contract. On the 3rd of March, 1892, I was in Mr. Gracie's office, and he told me that the sureties for this contract had requested him to take it out of my hands and give it to them; that they said they would lose money through me. He asked me if I would sign it over to them. This I refused to do. I gave A. Cumming a note that evening demanding an explanation. Next morning I got no reply, and I went and saw Mr. Gracie, and asked him to send for some money for me to enable me to complete the work. This he refused to do, saying that I and the sureties were partners, and he had seen a letter that morning in which I had been threatening them. He said, "Anyhow, I have moved for the cancellation of your contract this morning." That was 4th March, 1892. There was £35 due on Bean-tree Bridge; also £39 fine that has since been remitted; also the amount of claims in these two contracts. I sent him a letter for the Secretary of Public Works that on and after that date all money coming from Government should be paid to me, and no other person or persons. I went on the work and measured up the work; gave the men an order on Mr. Gracie for their money. Some of them he refused to pay, and I had to get them orders of the Court. You will see a letter where he charges this to Contract 21v. I was going by Cumming's place a few days after, and Cumming told me that he had a very snotty letter from Mr. Gracie. He showed me the letter; it read in reference to a request by him (Cumming) and T. J. Reddecliff. They could have this, my contract, providing they were responsible for all liabilities incurred. His bookkeeper is aware of this letter, and at present he lives in Glenmore-road, Sydney. A flood came and washed the contract away. The Department offered to complete it, and then consider my claims. This I objected to, as there was plenty of money in the Department belonging to me to have completed it, and have been paid for it before the flood came, on 27th of April. The Department has since paid the sureties £25 on the contract, and charged the wages on it to Contract No. 21v, which wages, I believe, they never paid.

J. Brennan.
28 Oct., 1896.

39. *Mr. Lyne.*] How much do you estimate the Department owes you on that contract? £69 13s. 4d.
40. Did you complete that contract? No.
41. Did the Department complete it for you? Not for me.
42. They charged you with it, didn't they? They refused to acknowledge owing me anything. I got nothing on it but £80 they paid to the sureties. It seems they had paid the sureties £20 on it afterwards without my consent.
43. If during the progress of the contract a flood came and washed away the bridge you were liable? The work was not a bridge, but approaches to the bridge. Mr. Gracie refused to give me money or to send for money for me to complete the work.
44. How much was given to you on the work done when he refused to send for money? £80.
45. That is 75 per cent. of the value of the work which was done? No. This was owing to me at the time Mr. Gracie cancelled the contract.
46. On that one bridge? The approaches to a bridge; I had completed the bridge; before this there was a second contract in the same place.
47. *Chairman.*] Contract 57v is not for a bridge, but for approaches to a bridge? Yes.
48. *Mr. Lyne.*] How much was the whole tender for it? £276 3s. 4d. There is an extra £28 12s. for culverts on Contract 57v.
49. Where is Mr. Gracie now? He is stationed in Glen Innes.
50. *Mr. Kelly.*] The bridge you mentioned is the first contract you did, and it is not included in this sum? Yes.
51. *Chairman.*] You were paid for that? I would like the Department to explain what is being done with the £35. Mr. Gracie told me that he paid McCall, a sub-contractor who worked on Contract 21v, £25 out of that sum, and he charges £11 to McCall later on.
52. Did you owe McCall this money? Yes. It is alright if he has paid that money to him. He could not pay him £25 and pay him £11 afterwards, as I only owed him £28 in all.
53. *Mr. Lyne.*] Could you not find out from McCall whether he received the money? I wrote to him, but he did not supply the information. He may have charged more to the contract than he has a right to charge.
54. I suppose what you want is to get the Department to pay you the balance of the money? Yes.

THURSDAY, 5 NOVEMBER, 1896.

Present:—

Mr. HARRIS, | Mr. LYNE.
ROBERT PYERS, ESQ., IN THE CHAIR.

Percy Scarr sworn and examined:—

55. *Chairman.*] What is your position? I am Principal Assistant Engineer for Roads.
56. Do you know the particulars of Mr. Brennan's claim? I only know what I see in the papers. I have no personal knowledge of the matter. The papers are all here.
57. *Mr. Lyne.*] Mr. Brennan has stated that he had three contracts from the Department? I understand that he had Contracts 57v, 21v, and 27.
58. Can you state the circumstances under which the local officer refused to pay the balance which was due on Contract 21v? I have a statement which was drawn up for me in the office from the papers, at the time I was dealing with the case.
59. It is a *précis* of the case, I suppose? Yes.

P. Scarr.
5 Nov., 1896.

P. Scarr. 60. Will you read the *précis* to the Committee? It is as follows:—

JOHN BRENNAN'S CLAIM ON CONTRACT 91-21U—BRIDGE OVER CREEK ON ROAD CASINO TO LISMORE.		£	s.	d.
Amount of Contract		302	18	2
Extras.....		75	5	7
		<u>£378</u>	<u>3</u>	<u>9</u>
Less advances on a/c.....		289	0	0
		<u>£89</u>	<u>3</u>	<u>9</u>
Overtime fines—23 weeks @ £3	£69	0	0	
Less remitted—13 weeks @ £3	39	0	0	
		<u>30</u>	<u>0</u>	<u>0</u>
		<u>£59</u>	<u>3</u>	<u>9</u>
Wages claims paid		16	17	2
		<u>£42</u>	<u>6</u>	<u>7</u>
Additional extras approved since final voucher.....		3	18	9
		<u>£46</u>	<u>5</u>	<u>4</u>

The amount of the final voucher, £59 3s. 9d., was paid to the local officer's credit, and out of it orders of the Court, amounting to £16 17s. 2d., as shown above, were paid, leaving a balance of £42 6s. 7d.

Difficulty then arose as to final adjustment of contract. It appears that Brennan had signed an order to pay all money due to the credit of his sureties, who were finding nearly everything to carry on the work, Brennan being practically insolvent. This order he subsequently cancelled, and the sureties sued him for amount of a guarantee bond of £100 to the Bank, but they were non-suited on a point of law.

It was then decided to pay the balance, £42 6s. 7d. (which had been held by local officer for about eight months pending decision of Court), to Brennan, but on payment being offered he refused to accept it on the grounds that it was less than he was entitled to.

The matter was fully considered, and on the recommendation of Mr. Divisional-Engineer Hanna, Mr. Secretary Lyne approved, 25/3/93, of an additional amount of £3 18s. 9d. (making a total of £46 5s. 4d.) being offered, without prejudice, as payment in full of all demands. Voucher for £3 18s. 9d. was passed for payment and forwarded to local officer.

The proposed settlement, however, Brennan persistently refused to agree to, and the amount of vouchers (£46 5s. 4d.) was refunded to Treasury.

Considerable correspondence has since passed between Brennan and the Department, but his applications for increased payment for extras, and for further remission of fines, have been several times refused.

As recently as January of this year an interview was held between the local officer and Brennan, with a view to a settlement, but although Mr. Gracie offered (without prejudice) to make very considerable concessions, the offer was refused, Brennan speaking of getting a Select Committee of Parliament appointed to look into the case.

It was then stated by the local officer that one of Brennan's creditors was taking steps to compel sequestration of his estate, but nothing further has been heard of this.

Mr. Secretary Lyne approved, 12/2/94, of the previous decision being adhered to, viz., that claims be not recognised. Similar action was taken with regard to a later communication from Brennan, dated 15/3/94, again urging his claims.

Mr. Pears, M.P., now forwards a letter from Brennan, dated "Debtors' Prison, Casino Gaol," 23rd November, asking that he may be paid £40 on account, pending a final settlement of his claim.

Then there are recommendations and minutes on the papers.

61. The fines amounted to £69;—is there anything in the papers to show that the bridge was not erected on the site which was first pointed out to Mr. Brennan? I am not aware.

62. Mr. Brennan in his evidence at our last meeting stated that the site which was first pointed out to him, and for which he tendered was abandoned, and that the bridge was moved a mile or two away, and he explained that that was one cause of the delay for which the fines were charged? There is nothing about that in any of the statements. It is a long time since I went through the papers.

63. Have you a copy of the *Gazette* notice calling for the tenders? It is not a *Gazette* notice, but a notice in a local newspaper in these terms:—

GOVERNMENT NOTICE.

TENDERS are invited up to noon on Wednesday, 23rd April, for supply and erection of bridge (2 spans) on road, Casino to Lismore, near Tunstall.

Specifications may be seen at the Court-houses, Casino and Lismore.

Tenders to be marked "Tender for Bridge," and to be addressed to the undersigned.

Time of receipt of tenders has been extended to noon on the 22nd instant.

ARTHUR GRACIE,
Resident Engineer.

Roads Office, Casino, 31st March, 1891.

64. I notice in the advertisement, in the first paragraph, that tenders are invited up to the 23rd April, and in the last paragraph it says the time of receipt of tenders has been extended to the 22nd instant, although the notice is dated the 31st March? I take it that the explanation is that the advertisement was originally written out on the 31st March for tenders to close on the 15th April, and that this is a second notice extending the time to the 23rd April, and they have, by some means or other, retained the original date. The two things conflict with each other.

65. There are three mistakes in this notice? Yes.

66. *Chairman.*] You have not a copy of the *Gazette* notice calling for tenders? Tenders were not called for in the *Gazette*.

67. *Mr. Lyne.*] Is it possible to find out the reason why the site was altered? I could find out if there is any reference to it in the papers by going through them.

68. What I want to find out is whether the work was delayed in consequence of the site being altered? I do not know.

69. It appears from the papers that he was allowed four months over and above the contract time before they commenced to charge any fines;—will you read the next paper bearing on this contract? The next paper is a report from Mr. Allman to the Commissioner and the Engineer-in-Chief for Roads in these terms:—

J. BRENNAN APPLYING FOR REMISSION OF FINE ON CONTRACT 21U, CASINO TO LISMORE, AND FURTHER *Re* ALLEGED BALANCE DUE ON CONTRACT.

Mr. Brennan makes application herein for remission of £30 fine, imposed on Contract 21U, and reopens the apparently interminable question of balance alleged to be due for extra work on same contract.

The claim for extra work has been very fully dealt with by Mr. Hanna and the local officer, and has been disallowed by Ministerial direction, consequently no useful purpose can now be served by discussing this matter further.

With

With regard to remission of fines.—The original contract was for £302 18s.; time for completion, three months; actual overtime twenty-seven weeks, of which only ten weeks has been charged as a fine in final voucher. It will thus be seen that the contractor has been allowed four months over and above time specified for completion. This, when the actual extra work amounted to only £101 12s. 4d., is a very liberal allowance, and I cannot see how any further concession can be granted, more particularly having in view the unsatisfactory manner in which the contractor appears to have carried on his work.

P. Scarr.
5 Nov., 1896.

70. In one paper here it says, "The contract has been delayed for the causes stated";—what are the causes stated? I do not know what they would be.
71. I do not see anything in the papers about the site? I have no recollection of anything of the kind. It would have got into the *précis* had there been any alteration.
72. *Chairman.*] Are not tenders called for in the *Gazette*? Not always. At that time frequently they were only called for in local newspapers for these small bridges.
73. And there is nothing in the papers about the site? No.
74. Is there anything to show whether the bridge is to be built over a gully or over a creek? I do not see anything.
75. *Mr. Lyne.*] You know of no instructions to put the bridge on one site and afterwards to alter it? I have no recollection of anything of that kind occurring.
76. *Chairman.*] Does it say that it is a bridge over a creek, near Tunstall? It says, "On road, Casino to Lismore, near Tunstall."
77. Is there nothing about a creek or gully in the notice? No.
78. Mr. Alliman inspected the work? Yes; he is acquainted with the whole case.
79. *Mr. Lyne.*] With reference to Contract 57u, will you read the *précis* of the case? It is as follows:—

CONTRACT NO. 57U.—ROAD, CASINO TO MOUNT LINDSAY—APPROACHES TO BRIDGE OVER BEAN-TREE CROSSING.

This contract was let to John Brennan for the sum of £276 3s. 4d., the bond being signed on the 19th November, 1891.

On the 7th March, 1892, the resident engineer (Mr. Gracie) reported by telegram that contractor was seven weeks over time, and work was not more than half completed. Contractor had just had a meeting of his creditors, and could not possibly finish, as he was without means. He (Mr. Gracie) recommended cancellation of contract and transfer to sureties, who had up to date paid all charges. Supervising Engineer concurred.

Minister approved, and cancellation notice was accordingly issued, 21/3/92.

After a long report (6/4/92) had been received from Mr. Gracie, in which he recommended that contract be determined, work done paid for, and new arrangements made for the completion for reasons stated, telegrams came to hand stating that Brennan's sureties were willing to complete the work under contract, and take over all liabilities.

The papers were then sent to Mr. Norrie as to the course to be followed, and he stated that if the amount of new contract for completing the works exceeded £200 the contractors (Brennan's sureties) must enter into a bond with sureties, and as these gentlemen were willing to take over all Brennan's liabilities herein, a schedule of these liabilities should be prepared, and made part of whatever document was signed.

Acting on Mr. Statham's instructions, Mr. Gracie, 4/5/92, forwarded the following list of Brennan's liabilities under the contract:—

Edward Murray	£	s.	d.
J. Jalland	3	4	0
D. O'Neill	11	7	6
W. Ryan	8	10	2
J. Doherty	2	14	10
	4	4	1
These are all orders of Court	£30	0	7
D. McCarthy	1	10	0
A. Murray	2	0	0
J. Kelly	2	8	0
M. Jamieson	1	2	0
These are all acknowledged debts	£7	0	0
	30	0	7
	7	0	0
Total liabilities	£37	0	7

He also strongly recommended that the contract be at once wound up as the sureties did not wish to complete, and it would in every way be more convenient for the Department to bring "this troublesome and confused matter" to an end.

The Minister has since approved of the work being completed by day-labour.

The Local Officer submitted a voucher for £37 in favour of the sureties in order to pay for useful work and material on the ground, and the Supervising Engineer recommended payment, but the Commissioner considered payment should stand over until completion of the work, as the balance for completion was £196 13s. 4d., and estimated cost of works to be done, £188. He minuted, "See also telegram," and it is on telegram that approval is given to work being done by day-labour, but voucher does not appear to have been dealt with.

Brennan applied through Mr. T. T. Ewing, M.P., 10/9/92, for payment of balance due on contracts.

Voucher is now submitted for payment for £37 2s. Mr. Steel returned this to Mr. Statham, 19/9/92, with a minute to the effect that Ministerial approval is required to taking the work out of sureties' hands, and payment of the voucher for £37 2s. as termination of the contract.

From the papers it would not appear that the placing of work in sureties hands ever actually took place, though Ministerial approval was given thereto.

It now remains to decide whether or not this voucher should be paid to the sureties at the present time, or whether it be held over pending completion of work under general conditions of contract.

Mr. Statham recommends that it be paid on condition of sureties signing an agreement to discharge liability for claims submitted.

Mr. Steel states that when he wrote minute of 19/9/92 he had not seen Minister's approval to do work by day-labour, and he now thinks voucher should be held over until completion of work, when Mr. Gracie should render statement showing amount of contract, amount paid under contract, and amount paid for work done by day-labour, consideration might then be given to the question of paying the surplus, if any, to the sureties.

There is a later statement in John Brennan's contracts, dated 13/1/94, as follows:—

27U.—ERECTOR OF BRIDGE OVER BEAN-TREE CROSSING, ON ROAD CASINO TO MOUNT LINDSAY.

57U.—APPROACHES TO BRIDGE, BEAN-TREE CROSSING—ROAD CASINO TO MOUNT LINDSAY.

On 5th December, 1891, Brennan executed an order to pay all moneys to Messrs. A. Cummings and T. J. Reddacliff, sureties for Contract 59U.

Contract 27 was completed, and fine for thirteen weeks overtime, £39, was remitted, 22/5/93, and part of this amount was, under order of Court, used to pay a creditor—Robert Cressy—£28 7s. 10d., being £23 3s. 2d. amount claimed, and £5 4s. 8d. costs of Court, and the balance £10 12s. 2d., after being offered to Brennan, and, as reported by Mr. Gracie, on paper attached, refused by him, was refunded to the Treasury, 22/1/94.

57U.

P. Scarr.

5 Nov., 1896.

57*v*. Part of the work was done by Brennan, and the contract was cancelled through delays in completion, and approval given for transfer to his sureties; but as circumstances had rendered necessary certain alterations in the proposed work it was eventually decided to complete the work by day-labour.

It was then decided to allow payment for all work done under contract, and the Local Officer made a report and estimate of amount to be paid with a view to the claims by workmen being settled—£37 6s. 7d. Mr. Gracie, Local Officer, in his report stated that the floods had destroyed some of the work done in approaches, and that the metal was not to specification, and estimated the value of the work to the Department at £117 2s. 1d.

Brennan had been paid £80 as an advance on the contract, and the balance (£37 2s. 1d.) was paid to Brennan's sureties.

Brennan wrote to the Department in January, 1893, claiming £70 5s. 5d. as being due to him on this contract (57*v*) after deducting amounts, £70 for advances and £23 7s. 7d. for wages, from value of work done—£164 3s.

The rates quoted by him do not agree with those in his tender with Bond. The amount of advance is given at £70 instead of £80.

Brennan was informed (22 4 93) that a voucher was in course of payment to be paid to his sureties, the voucher being for £37 2s. 1d., amount referred to above.

Brennan has written several times since asking that the matter may be settled, but as far as the papers show nothing has been written in reply to his claim.

Perhaps the best course would be to inform Brennan that, as the contract was cancelled, he has no claim upon the Government, and also that, as a matter of grace, the Department paid for the value of work so as to meet the claims of workmen.

There is a later statement still, dated 14th May, 1895, as follows:—

JOHN BRENNAN'S CLAIM FOR BALANCE ALLEGED TO BE DUE TO HIM ON CONTRACT 91/57*v*. APPROACHES TO BEAN-TREE CROSSING—ROAD, CASINO TO MOUNT LINDEAY.

Full statements of this case are with the file, 94,2,990 and 92,9,224.

The contract which was for £276 3s. 4d. was, owing to unsatisfactory progress, cancelled 12/3/92, and the work completed by day-labour.

It was decided to allow payment at Local Officer's valuation for all work done under the contract.

This Mr. Gracie estimated at £117 2s. 1d., and an advance of £80 having been already paid, the balance, £37 2s. 1d., was, on approval of Mr. Secretary Lyne, paid to Brennan's sureties to allow them to pay the workmen engaged upon the contract.

Brennan now writes through Mr. Pyers, M.P., claiming an additional amount of £77 15s. 11d., which he says is due to him on the contract.

It appears quite evident from the papers that there is nothing due on the contract in question, and that the contract having been cancelled Brennan can have no legal claim.

80. *Chairman.*] To whom was the sum of £80 you mentioned paid? The statement here is that it was paid to Mr. Brennan, but it does not necessarily follow from that that it was paid to Mr. Brennan himself—it may have been paid to his sureties. It is stated that Brennan executed in December, 1891, an order to pay all moneys to Mr. Reddacliff and another. If that advance of £80 was paid subsequent to that order being signed it would be paid to the credit of those persons in the usual course.

81. Referring to the Bean-tree bridge contract, to whom was the sum of £35 paid? There is no statement here about the Bean-tree bridge.

82. *Mr. Lyne.*] Do I understand from the *précis* of Contract 21*v* that a balance of £40 has been placed in the Treasury, that Mr. Brennan has been offered the money since, and that he has refused to accept it? Yes; the amount is £46 5s. 4d.

83. *Chairman.*] As regards the statement of the amount of wages on Contract 21*v*, to whom was the sum of £16 for orders of the Court paid? The statement says:—"The amount of the final voucher, £59 3s. 9d., was paid to the Local Officer's credit, and out of it orders of the Court amounting to £16 17s. 2d., as shown above, were paid, leaving a balance of £42 6s. 7d."

84. *Mr. Lyne.*] That would be orders obtained by creditors at some time—by the men? Yes.

85. *Mr. Harris.*] From what I can gather from these statements Mr. Brennan signed an order that his sureties were to get all money paid? Yes; the usual order. It says here:—"On 5th December, 1891, he executed an order to pay all moneys to Messrs. A. Cummings and T. J. Reddacliff, sureties for Contract 59*v*." The sureties for Bridge Contract 21*v* were Alfred C. Simpson and Alexander Cummings, not Reddacliff and Cummings, who were sureties for Contract 59*v*.

86. *Mr. Lyne.*] Did Brennan give an order to pay all moneys on Contract 21*v* to these sureties? It appears so.

87. Will you be good enough to make sure that he did, because he said something about that the other day? The order does not appear to be here; probably it is in the accountant's office.

88. Is the order he signed to pay over the money there? No; that probably is still with the accountant. It could be obtained from the accounts.

89. Can you say whether or not he signed away the moneys on Contract 21*v* to sureties—Reddacliff and somebody else? I could not say beyond what is stated here.

90. Was the money which you referred to as being paid away—£16 and another amount—due on Contract 21*v*?

91. You said it was paid by order of the Court? £16 17s. 2d. is due on Contract 21*v*.

92. Where is the authority for paying that sum? I do not see the order here.

93. *Chairman.*] Do you mean for paying the claims? Yes. I do not see it stated here what authority there was for paying that.

94. Was there any other money on Contract 21*v* paid to the sureties of the other Contract 57? That I could not say.

TUESDAY, 10 NOVEMBER, 1896.

Present:—

Mr. HARRIS, | Mr. KELLY.

ROBERT PYERS, Esq., IN THE CHAIR.

Arthur Gracie, Road Superintendent, sworn and examined:—

A. Gracie,

10 Nov., 1896.

95. *Chairman.*] What is your occupation? I am Road Superintendent in the Public Works Department.

96. You are residing in Glen Innes at the present time? Yes.

97. You were the engineer for the work on Contracts 21*v* and 27*v* in the Casino district at the time Brennan carried them out? I was.

98.

98. Brennan has stated in his evidence that he was directed in the first instance to go to the wrong site, and that after he had done some work there he was shown the proper site? The site of the bridge for which tenders were called was about 3 miles from Lismore, over Black Gully. Brennan secured the contract. As far as I know there were iron-spikes in the road-way denoting the site of the proper bridge which, of course, were not very visible, as it was to be erected on a traffic road, it would have been dangerous to have had them very prominent above the metal—the spikes were driven into the metal. However, the site was well known, for I afterwards inquired from several contractors who tendered for the work, and there was no doubt whatever in their minds as to the site of the bridge they tendered for. I heard nothing from Brennan. He did not come near the office to ask that the work be laid out. The first time I saw him was when I happened to be casually riding along the road on other business. I then saw him at work at a creek about 2 miles to the west of the proper site, that is on the Casino side. I asked him what he was doing. I informed him that he was at the wrong place, and he accordingly moved on to the proper site. At that time he had some girders across the creek, as the commencement of a temporary structure, and he had commenced to dismantle the existing bridge. The site he adopted as the proper one was in no way similar to the site as depicted on the plans and sections. I know of nothing which could have induced him to start to erect the bridge where he did. It seemed to be just as unaccountable as if I had told him to erect a bridge over the Hawkesbury and he had put it over the Nepean River.

A. Gracie.
10 Nov., 1896.

99. Were tenders called in the *Gazette* for the work? I am almost sure they were. It used to be the practice then as it is now to do so.

100. *Mr. Kelly.*] Tenders were called in the local Press as well as the *Gazette*? Yes. The matter was initiated by Mr. Allman, of the Lismore district. Mr. Allman prepared the section of the bridge. It was in his district then, but at the time of calling for tenders it was in my district.

101. *Mr. Harris.*] You had a maintenance-man with you at the time you saw Brennan on the road;—do you remember his name? I believe a man named Alecock was with me at the time.

102. You do not remember a man named William Harley? Yes.

103. Could he have pointed any pegs to Brennan? Yes; he knew the site of the bridge.

104. If Brennan had gone to Harley he could have been told the site of the bridge? Certainly. He put up the bridge at a totally dissimilar place. The section was nothing like what was shown on the plan. We have since put up a bridge at the place where he proposed to put up the bridge. It is a structure consisting of three spans instead of two. As for Brennan's bridge, it is also a very much higher bridge.

105. *Chairman.*] When you met Brennan at the place did he ask you what you were going to give him for doing some work in a wrong place;—did you agree to allow him anything for stripping the bridge? Certainly not, the mistake was unaccountable to me.

106. Did he make any complaint when you drew his attention to the fact that he was at the wrong place;—did he say anything to you? No; except that there were no pegs in; there were no pegs in at the place where he commenced to put up the bridge. He might as well have put it up 5 or 10 miles this side of the site. There were no visible pegs at proper site, but Mr. Allman had driven spikes into the metal, which was really all that could be done.

107. Of course the tenders must have been called for in the local papers? I see a copy of the advertisement among the departmental papers. I admit that the situation of the creek is not well defined on the plan or specification, except that it is near Tunstall. The creek had no name on the map, but it was locally known as the Black Gully, near Tunstall.

108. *Chairman.*] Why was the stuff in the embankment increased from 61 yards to 110 yards;—that is nearly twice the original quantity? There was a mistake in the plans at the head office. This section is not correct. I had nothing to do with the work before the tenders were called for. I had nothing to do with the preparation of the section or of the plans. I found when I took it over that the section was wrong—that the bed of the creek had been shown at the level of the existing culvert; that involved extras on everything—extra length of piles, wales, bracing, sheathing, and rubble filling. What is shown on plan as the bed of the creek is the roadway level of the old culvert.

109. *Mr. Harris.*] The tenders were advertised to close on the 15th April, and the time was extended to the 23rd April;—do you know why the time was extended for a week? I do not recollect.

110. Was it found out during this time that there was a mistake made in the plan? No; that was found out afterwards.

111. The driving of iron pegs down into the metal is the usual manner in which you mark out where a bridge is going to be built? Yes, when traffic has to use the road.

112. *Chairman.*] I thought it was usual to drive in wooden pegs? In macadamised roads we generally drive in iron spikes, but in other situations we use wooden pegs.

113. *Mr. Harris.*] Was this contract carried out contrary to the plans, specification, and district? No; the contract was carried out according to the plans, with that exception, and that was a matter of schedule quantities, which we adjusted afterwards.

114. *Mr. Kelly.*] You say that Brennan has no further claim against the Department? I do not know of any fair claim which he can possibly have now; I think that the Department has dealt with him liberally.

115. *Chairman.*] As regards the dispute about the remeasurements—after some trouble you gave him fresh measurements? I allowed him extra measurements on some of the items.

116. You allowed him a considerable lot more embankment than you agreed to give him at first? I am not sure whether it was not a couple of hundred yards; I cannot say exactly without looking over the papers. The measurements of the earth-work were difficult to make, and I was inclined to be liberal with him to cover any possible error; the ground was very uneven and scoured out. There was an old embankment underneath which had to be deducted. We measured the excavation as carefully as possible, and arrived, after a conference with Brennan, at what I think was a very fair calculation of the quantities.

117. But this additional lot which you agreed to give him was only offered after he had refused to accept what you first offered him? Yes.

118. He demurred to taking the first measurements? Yes.

119. Afterwards you agreed to give him an extended measurement? Yes; I asked him for his calculations.

A. Gracie.
10 Nov., 1896.

120. You did not agree to give him anything for the work he did at the bridge on the other side of Tunstall? No; because I considered that was quite unaccountable and foolish on his part.

121. Did you agree not to bind him to time because he had carried out some work there? I would not have said that. I might have said that possibly he would get some consideration on account of the mistake he had made.

122. *Mr. Harris.*] Do you know how long he had for completing the bridge? I could not say without looking at the specifications.

123. Do you know if he was over his time? I have not had a chance yet to look through all the papers. My memory does not serve me sufficiently well to say he was over his time. I know there was a lot of extra work.

124. How long is it since the bridge has been built? About four or five years.

125. *Chairman.*] Did Mr. Hanna report on the bridge? On the claims.

126. Have you ever heard that he said that these specifications were carelessly got up? No; I never heard that.

127. *Mr. Kelly.*] In the matter of disputes with contractors as to measurements I suppose it often occurs, or sometimes occurs, after a conference with them, that you make some extra allowance for something which they have pointed out? Yes; we try to meet them in a fair way in matters of doubt or dispute. We would be willing to give and take a little; we would rather give more than less.

128. Especially as regards the measurement of an embankment? Yes; where it is absolutely impossible in some cases to get an exact measurement. In this case I was in a position to get very close to the measurement, by reason of having taken a good many cross-sections of the old embankment before the new one went over the top of it.

129. Was this work carried out well? Yes.

130. From your point of view, was it carried out satisfactorily? I do not recollect having anything to find fault with as regards the work.

131. *Chairman.*] The dispute is only as to the measurements and as to the site? That is all in connection with that contract.

132. *Mr. Harris.*] He had more contracts than this one? He had two other contracts going on about the same period.

133. *Mr. Kelly.*] Were not the payments on previous contracts mixed up with the payments on this contract in some peculiar way? I do not think there was any confusion in connection with this contract; it went on smoothly. The final payment, according to my voucher, was £59 odd, and then there was a claim against that which reduced it to £42.

134. That is an outside claim which you had to meet? Yes; this balance was offered to Brennan as full payment for the work, and he refused the offer.

135. On the ground that this claim was not met? No; on the ground that it did not include his own claims as regards the site and the extras. The money was eventually sent down to the Treasury to the Suspense Account.

136. He did not object to your paying the claims which you felt called upon to pay, but he objected to accept your offer on the ground that there was not enough money coming to him? On the ground that it was not large enough; that I had allowed him nothing for shifting from the site where he first commenced to work, nor for sufficient extra work.

137. His main objection, I suppose, was, that he should have been allowed something for the error as to the site? Yes; and he claimed an extra small amount in connection with various items of the work which we could not allow.

138. *Chairman.*] There was a payment of £25 to a man named Neill McCall? I think it was £17.

139. What was the money paid to McCall for? For work done on the approaches to the bridge.

140. Are you sure that the amount of £17 was paid to McCall? £16 7s. 2d. was paid out of that £59 on orders of the Court. I do not see the vouchers among these papers at the moment, but I know that he was one of the creditors for wages due.

141. Did Brennan finish the contract himself? Yes.

142. Did you do anything, or did he finish it? He finished it. He afterwards improved it, but that was another matter.

143. Was it extra work you did? It had nothing to do with his contract. It was afterwards found to be necessary to prevent a scour.

144. *Mr. Harris.*] You did not refuse to send for any money for Brennan? No; I was always prepared to settle up.

145. You did not put on any men to spread metal? I see now from the papers that I employed labour to finish up the contract for him.

146. *Chairman.*] Then he did not finish the contract himself? According to our views he finished the contract, inasmuch as we did not cancel it. He still remained the contractor, although we put on men to expedite the completion of the contract, as we sometimes do in cases where the progress is too slow.

147. There was no charge made to him for that;—you deducted nothing out of his contract? We deducted the value of these men's labour from his final voucher.

148. Could you ascertain by a reference to the papers the cost of spreading that metal on the road? We deducted £26 6s. 9d. from his contract for labour employed by the Department.

149. That is for spreading the metal and for other works? For spreading the metal and for breaking some metal too.

150. Why did you put these men on to spread the metal? The work was going on altogether too slowly. Brennan's finances seemed to be running out, and probably he was unable to carry out the work.

151. Had he money coming to him from the Department at this time? Only the final payment, which was not due until he finished up.

152. *Mr. Kelly.*] You made, I suppose, the necessary allowance for the change of the plan which necessitated a change of timbers to a certain extent? We allowed him schedule rates for extras in every case.

153. *Chairman.*] With regard to Contract 57v,—“Approaches to Beau-tree Bridge,” the built the bridge, and that work was finished and done with before he commenced to build the approaches? Yes.

154. How was Contract 57v carried out? Very unsatisfactorily.

155. He did not finish that contract? No; we cancelled it. We paid him the value of the work done as a special concession.

156. Was that work carried out by the sureties, or by the Department? By the Department.
157. What was the reason for cancelling the contract? Its slow progress. To the best of my recollection he had pretty well abandoned the work.
158. Were the approaches ever washed away by a flood while he was carrying out the contract? No; not to any great extent. He had not sufficient work done to make any washing away a serious matter. Of course, the river used to rise very often there. We valued the work he had completed at £117. The amount of the contract was £276 3s. 4d.
159. Was the work carried out at his expense, and was the cost of finishing the work charged to his contract? No; the contract was transferred to his sureties and then cancelled.
160. It was afterwards carried out by the Department? Yes; we finished it. We determined the value of Brennan's work at £117. He had an advance of £80; the balance of £37 2s. 1d. was paid to his sureties, to whom the contract had been transferred.
161. *Mr. Kelly.*] Brennan states in his evidence that there was some great delay in paying him on account of this contract, that the agreement was that he should be paid 70 per cent. per month as the work proceeded, but that as a matter of fact nothing was paid till the 23rd February? We usually pay them when they have sufficient work done to make it worth while to give them an advance—about once a month is stated in the conditions.
162. You have no agreement that you will pay them about once a month? About once a month, as the work proceeds.
163. In this case, I suppose, you did pay when there was enough work done to pay on? Yes; we gave him an advance of £80.
164. *Chairman.*] He had money coming to him, then, when you cancelled that contract? I do not think, after the fines were deducted, he would have had anything coming to him.
165. How is it that money was paid to his sureties afterwards? The contract was transferred to them.
166. What were they paid money for;—did they do any work on the contract after Brennan left? No.
167. If you paid the sureties £37 2s. 1d. he must have had that money coming to him when he left? We always have to deduct the fines due at the time the advances are being made out. Then there is the percentage reduction.
168. Was he fined on this contract? There was no fine deducted. He was treated liberally. He was given the value of his work done, which was a concession. When a contract is cancelled the whole of the money, as a rule, is lost.
169. *Mr. Kelly.*] In your opinion, Brennan has no cause of complaint—you paid him in full on this contract? We paid him in full for the value of his work done at the time on the basis of his schedule rates where he had any completed work, and on the basis of a fair valuation for uncompleted work—that is, for work half finished, and so on.
170. *Mr. Harris.*] Was he allowed for the material on the ground? He was allowed for all material on the ground. What is he claiming?
171. *Chairman.*] He is claiming £69 13s. 4d. on this contract. You say that the work was never washed away during the time he was carrying it out? Perhaps some damage was done, because the river used often to rise. He was taking a good while over the contract, and probably on account of the delay the work was damaged to some extent. It would be damaged every fresh, even after it was finished.
172. *Mr. Kelly.*] What is the usual practice in such cases;—do you allow the contractor to take full risk? Yes.
173. So that even if the work were ever so much damaged, you claim that you are not responsible for it? He would not get a penny more.
174. *Chairman.*] Did Brennan apply to you for money on this contract, and did you refuse to pay? I have no recollection of it. He used to have his dealings with his sureties, who were supposed to supply him with money, and it would probably be his sureties who would come to see me. I have no recollection of any disagreement with him on that score. I could not say how he makes up the claim of £69.

A. Gracie.
10 Nov., 1896.

WEDNESDAY, 11 NOVEMBER, 1896.

Present:—

MR. F. CLARKE,

MR. HARRIS,

MR. KELLY.

ROBERT PYERS, ESQ., IN THE CHAIR.

Arthur Gracie recalled and further examined:—

175. *Chairman.*] Do you remember Brennan being at your office at Casino before you saw him at the site of the bridge over the creek near Tunstall? I have no recollection of Brennan having come into my office on the business of wishing to know where the site of the bridge was, or of requesting me to go out and point out the site for him; in fact, I am sure he did not come.
176. Did you go over the crossing he erected on the day you saw him or on the site near Tunstall? No; I was on horseback. I do not think it was in a state to allow one to cross over on horseback.
177. In what way did you get over? I went over the old bridge.
178. Was there any particular business on at Lismore on that day? I could not say.
179. Do you remember any law cases being on that day? No; I recollect no law case in which I was interested.
180. Was this contract for a bridge over creek on road Casino to Lismore advertised? It was.
181. What quantities of earth-work did you agree to pay for on this contract? Between 1,600 and 1,700 cubic yards.
182. What quantity of ballast did you agree to pay for? Metal, 120·88 cubic yards; ballast, 134·80 cubic yards.
183. Why did you refuse to pay for them in the final voucher? I did not refuse. Here is the final voucher certified by me. The Department never refused to pay Brennan for these items.
184. Why did you refuse to pay for 1,660 yards of earth-work? We have got down here 830 cubic yards as an extra on his contract. There is a certain quantity to be done by him under the specification.

A. Gracie.
11 Nov., 1896.

- A. Gracie. 185. What is the quantity according to the specification? I made the total 1,515 yards of earth-work, and we allowed him 122 yards more on revision of the matter to attempt a settlement.
- 11 Nov., 1896. 186. What was the total quantity in the approaches according to the tracings on the plan? 685 cubic yards. We did allow Brennan between 1,600 and 1,700 cubic yards. I put 122 yards more on to attempt a settlement with him afterwards, so that it makes a total of 1,637 cubic yards, which we offered to pay him, less the original amount of earth-work, leaving an extra of 952 cubic yards under the heading of earth-work.
187. What was the total quantity of the earth-work metal and ballast according to the tracings? 685 cubic yards.
188. Is that of earth or metal? Of earth.
189. What was the quantity of metal specified in the original specification? $92\frac{1}{2}$ cubic yards.
190. What was the quantity of 4-inch ballast specified? 134.8 cubic yards.
191. What was the full length of the approaches according to the tracing? 182 feet.
192. Is not the quantity of metal specified $1\frac{1}{2}$ yards to the lineal yard of road? Yes.
193. What is the quantity of 4-inch ballast specified per lineal yard of road? $1\frac{1}{2}$ cubic yards. Those quantities were afterwards altered by me.
194. Would that be $60\frac{3}{4}$ yards in length according to the tracing? $60\frac{3}{4}$ lineal yards.
195. What would the total quantity of ballast be, according to that measurement? A total of 91 cubic yards.
196. How was it that no pegs could be found in the gully near Lismore municipality? Because they were not visible. No one could have found the pegs except he knew where to look for them. Brennan certainly could not find them.
197. How was it that Mr. Smallwood could not find them? He was not there when they were put in. It is a matter of extreme difficulty to find them.
198. Were there gum-trees at each site at the time? There were gum-trees all over that locality. There were no gum-trees at the proper site, except a few scattered ones. It was a rather thick brush gully where he started to put up the bridge, but at the other site there were clear banks.
199. How was it that the bridge would not be over the gully according to the tracings on B.M. mark on gum-trees;—it specifies on plan from B.M. mark on gum-trees? We put B.M.'s all over the country. That simply means bench-mark. It is a standard point in levelling.
200. How was it that Mr. Smallwood found out this to be the site of the pier? I was not aware that he found anything of the sort.
201. There is his mark there? No; that is the abutment of the old bridge, which extended from 289 feet 6 inches on section to 327 feet on section.
202. You say that there were no gum-trees on the proper site? I could not be sure. It was a black-soil plain; the other was not. There is no country about there quite untimbered; there may have been a few scattered gum-trees on the plain.
203. Why is the plan marked "Datum-peg 40 feet below B.M. mark on gum-tree, south side" if this is the proper site? There may have been a gum-tree there. I am not prepared to swear that there was not one gum-tree there to put the bench-mark on. In fact there must have been one close by, as it so stated on the plan.
204. You have said that there was not any gum-trees there? No; it is hard to find a place about the Richmond where you could not find a tree to put a bench-mark on.
205. How was it that the plan did not in any way correspond with the present construction? It was a mistake of the office.
206. What quantities in the embankment did you write to Neill McCall? I have no record of them, except in the Casino office, perhaps. I am away from that office now; I left that district.
207. Did Mr. Hilliard, who was the foreman on the job, let you know when the metal was all broken on this contract? I did not wish to know; I had men breaking it myself, and guaranteed them the payment. Mr. Brennan did not finish the metalling; I had it finished. I would not naturally want to be informed by him. I would inform him if he had been finishing the work himself.
208. Hilliard was the foreman on the work? I finished the metalling myself; it was measured as soon as it was broken.
209. Did you instruct Hilliard and the other men to put the metal on? I suppose so. We were carrying on the work ourselves pretty well, guaranteeing them the payment for everything they did.
210. Why did you refuse to pay Hilliard and McCall when Brennan gave them an order for the money? We never pay such orders.
211. Referring to the final voucher on Contract 27v Bean-tree Bridge,—whom did you pay that £35 to;—did you pay the £35 which was owing on Contract 27v or Contract 21v? Brennan has accepted the final payment and signed a certificate. There is no further money due to him on that contract.
212. Brennan says he never got the money;—did you tell him that you paid McCall £25 out of that sum? No; I paid a lot of other men. The final payment on the bridge, Bean-tree crossing, was paid to the credit of Messrs. Cummings and Reddacliff, his sureties. Brennan gave them an order to receive all the moneys.
213. Did he give them an order to receive all the moneys on that contract? Yes.
214. When did he apply for permission to give that order? He applied for no permission; he just signed one of the usual forms at the office which were in existence at that time. They also received all the previous payments on the contract.
215. Does not No. 11 of the General Conditions say:—"The contractor shall not sub-let any portion of any work, or assign any of the moneys payable or to become payable under this contract without the written consent of the Engineer-in-Chief, and no such document without such consent shall have any effect, or be in any way recognised"? Yes; it was done with the Engineer-in-Chief's permission. We recognised it, and acted on the order.
216. When did Brennan apply for his permission? There was an order in the office signed by Brennan to pay Cummings and Reddacliff.
217. Will you be good enough to produce the application to assign that money? I am afraid it is with the Account Branch, but if necessary it can be produced.
218. What was the amount of McCall's order on Contract 21v given by Brennan? I paid £16 17s. 2d., and McCall's was in that amount.

219. What did you do with the balance? The balance was offered to Brennan, and refused, as the papers will show. The balance was £42 6s. 7d., and we increased it a little on the final offer.
220. You say you paid £35, owing on the Bean-tree Bridge, to the sureties for Contract 57U? Brennan cancelled that order, and the money was paid. I am not quite sure whether it was paid to his sureties or to himself. It was paid to one or the other.
221. Will you state the amount of the order which Brennan gave McCall on Contract 21U? I do not recollect. It was paid, whatever it was.
222. Was it not £28 odd? McCall was satisfied whatever it was. I could not say what it was.
223. You cannot find from these papers the amount which was paid? No. His claim was satisfied. It was a legal claim.
224. Why did you state that this sum of £16 17s. 2d., paid to McCall and Hilliard, was paid on orders of the Court on Contract 21U, i.e., to Hilliard £4 odd, and to McCall £11 odd? It is stated in the papers that they were orders of the Court amounting to £16 17s. 2d.
225. Orders of what Court? It says so here. At any rate, they were claims, whether they were orders of the Court or wages.
226. Was it to blacken Brennan with the Department that you stated they were orders of the Court? Certainly not. It would not blacken anyone.
227. Can you prove that they were orders of the Court? It was not done to blacken Brennan at all. Sometimes it is not considered sufficient for a contractor to acknowledge that he owes a man money. A man sometimes has to sue, and he can get an order of the Court. There may be collusion between the contractor and a man.
228. What was your object in stating that they were orders of the Court on the contract? It must have been because they were orders of the Court. Some workmen sued Brennan.
229. Not on that contract? The men worked on that contract.
230. What was your idea in making the statement? It was my duty. Nearly every month I am reporting that labourers have procured orders of the Court; for instance, I sent one down three or four days ago.
231. Is it your duty to report that the labourer has received an order of the Court when the contractor has given him an order without going to the Court? We report that we have received a claim from a labourer in connection with a certain contract, and send out notice to the contractor and to the labourer to prove his claim in the proper Court within a certain time.
232. Have these claims been proved in a Court, or taken to a Court of any kind? Here is the final voucher. There have been wages claims.
233. Will you admit, to save time, that it was a contractor's order, and not an order of the Court? Yes; it was an acknowledged debt of the contractor's. Sometimes we pay it to save trouble. Sometimes we make the labourer go to the Court and prove it. In this case, to save time in looking up the papers, I will say it was an acknowledged debt.
234. Why did you state that you offered Brennan £42 in the final voucher on Contract 21U? Because I was quite sure that we did. We offered him more than that amount; we offered him £40 eventually.
235. Will you swear that you ever offered Brennan £42? Certainly we did.
236. Was it not £30 18s. 8d.? No; here is the final voucher I sent in—£59 3s. 9d., less claims paid on account £42.
237. What was the amount you offered to deduct out of that final voucher? £16 17s. 2d., wages claimed, leaving a balance of £42 6s. 7d. offered to him and refused, and eventually forwarded to Suspense Account in the Treasury.
238. On what date? I could not say. Brennan would call at office, or I would write to him and inform that the money was there for him.
239. On what date did you offer him this amount of £42 6s. 7d.? I could not say; but here are his letters refusing the offer. The letter in which the offer was made would be in the Casino office.
240. Is this final voucher on Contract 21U:—

Memo. to Mr. John Brennan, Broadwater Post Office.

Department of Public Works, Roads and Bridges and Sewerage Branch, Casino, 14 December, 1892.

THE final payment on your contract for bridge and approaches on the Lismore Road amounted to £59 3s. 9d. From this the following sums have been paid in accordance with the orders given by you—

	£	s.	d.		£	s.	d.
Neil McCall	11	9	11	Wm. Ryan	2	14	10
John Pattison	0	5	3	Denis McCarthy	1	10	0
M. Jameson	1	2	0	John Doherty	4	4	1
G. Hilliard	4	0	0				
E. Murray	3	4	0				
					£28	10	1

The balance, £30 13s. 8d., will be paid to you on your informing me of your address, and on your returning this paper endorsed on the back that the statement is satisfactory, and is accepted by you in full of any demands you have.

ARTHUR GRACIE,
Resident Engineer.

? No; the first voucher was sent in at this time.

241. That states that it is the final voucher? Yes; but it had not been finally adjusted. We wanted to know what he would take before the final voucher was prepared. Brennan objected to some of these men getting paid, and we did not pay them apparently, so that he actually got more than this amount. At any rate, when the final voucher went back it was for £59 3s. 9d., out of which claims amounted to £16 17s. 2d.

242. Did you put a man on to break metal on Contract 21U? Yes.

243. In what direction were you going when you put him on? I could not say in what direction I was going when I engaged the man. There were some other men working there. I guaranteed their wages to them. That would otherwise have ceased work.

244. Was this man working there when you came back the same day? I could not say.

245. Why did you ask Alfred Clark Simpson, of Casino, to put Brennan through the Court in order to save the Department further trouble? I did not ask him to put Brennan through the Court. I may have made the remark on Mr. Simpson's statement, that there was to be a meeting of Brennan's creditors, to the effect that trouble would be saved.

246. Why did you refuse to pay Hilliard and McCall when they first got an order from Brennan? Perhaps we had not the money, or perhaps we may have been waiting to see what other claims would come in, so that we could pay *pro rata*.

- A. Gracie. 217. Did you tell them there was no money on the contracts? I could not have told them that.
- 11 Nov., 1896. 248. Did you send Brennan a final voucher on Contract 21U for a sum of £29? I do not recollect sending him any such voucher.
249. Do you recollect sending your groom, Frank Walsh, for the voucher I spoke about? I cannot say that I recollect whether I did or not, as I have sent so many vouchers.
250. Did you give him an extra on Contract 57U, Approaches to Bean-tree Bridge? The contract was cancelled. As a matter of fact, there was no extra allowed him on the contract. I did let him an extra, which was not carried out.
251. Did you state that the floods washed away the approaches, and you estimated the value of the remaining work to the Department at £117 2s. 1d.? That is correct.
252. Would the 13½ chains of filling and cutting at £2 10s. per chain, which was washed away, be worth £63 15s.? It would be worth nothing if it was washed away.
253. Would it cost that amount to do the work? Brennan seems to have been getting a price varying from 37s. to 58s. a chain.
254. You would not give 57s. or 58s. a chain for forming a road 20 feet wide where there was only forming to do? We give five times as much for a heavy side-cutting.
255. What was the actual value of the cutting and filling when it was done—before it was washed away? £2 10s. a lineal yard.
256. It does not say per yard—it says per chain? I estimated it at per chain afterwards.
257. It is per chain in the specifications? Had Brennan finished it, I would have adopted the same thing. I estimated it by the chain in its unfinished condition. He tendered by the lineal yard.
258. That would be about £9 a chain? No—£3 2s. 4d. a chain.
259. That would make it about £5 less,—that would be £175 for 13½ chains? I think it was 21½ chains.
260. The portion which was completed was 13½ chains; the cutting and filling were all done, and there were 5 chains of forming to do at the time? What Brennan would call finished and what I would call finished would vary a little.
261. Did you not leave out the culvert portion of the contract in your estimation? Yes.
262. When did you make the first payment on this contract? I have only the final voucher here.
263. Was it not on the 23rd February? I could not say, as the voucher is in the Account Branch. I have been away from my papers in the Casino office for some years, and therefore I cannot say.
264. Did you make it within the contract time? Whatever date we made it, it is certainly within the contract time.
265. When did you first inspect this work? That I am unable to say. My measurement books and everything are up at the Casino office. They have not been produced at the inquiry.
266. Did you measure the distance from the centre pegs to the water-tables in cuttings and approaches, and instruct the removal of the heaps? For his own convenience, I allowed him to remove some. They were in his way.
267. If the cutting was not wide enough I suppose you would not have removed them? Oh, yes; they are left principally to verify the depth.
268. They were supposed to be there until the cutting was measured? Supposed to be, or until I ordered their removal.
269. Were you satisfied that the width was sufficient when you ordered their removal? No; it never came to my being satisfied. I am never satisfied until I pass the work.
270. According to the conditions, you are not supposed to instruct the removal of the heaps until you are satisfied? I can do many things. It was done for his own convenience, so that he might work his carts and horses better. The conditions state that the heaps are to be left there until their removal is instructed by me.
271. Did you instruct their removal? Yes, in some cases.
272. Why did you refuse to pay his orders to the men on Contract 57U? We never refuse to pay any just claims.
273. Did you not refuse to pay Edward Murray, J. Jalland, D. O'Neill, W. Ryan, and J. Doherty? No; I reported that these men had claims against the contractor.
274. Did not these men have to sue Brennan before their claims would be recognised, making extra expense on the contract? In some cases, as I pointed out, we do force the men to sue in the Courts, so as to get them to go into the box and swear that the amount is due, otherwise there might be collusion on the part of the contractor and the men to defraud others.
275. Why did you charge the wages of these men to Contract 21U? If they were charged to that contract they worked on that contract, part of the time at any rate.
276. Will you produce the receipts of these workmen for the money they received? They can be produced on an application at the Casino Roads Office.
277. Are you aware that the sureties for this contract paid money to Brennan to leave his employ? No; I never heard about that.
278. When did the sureties first ask for this contract? When its cancellation was being mooted.
279. Was this work abandoned when the cancellation of the contract was moved? It was carried on so unsatisfactorily and the delay was so great, being seven weeks over time when I made my report, and not half finished, that the Department on my report agreed to cancel the work.
280. Why did you not return for the £35 due to Brennan on the Bean-tree Bridge, and either complete this contract or let him do so when he requested that you should? I returned for everything due to him on Bean-tree Bridge. We were not disposed to allow him to delay the completion of the approaches any longer, and we decided to take the work out of his hands.
281. £35 was owing to Brennan on Bean-tree Bridge, which had then been completed over two months;—why did you not return for that money and complete this work? He was agitating for a remission of fines during that time, and probably they were being considered.
282. Will you read No. 2 of the General Conditions of this contract? It is as follows:—
- The contractor is on no account to commence any contract without an order in writing, signed by the Road Superintendent, and no claim for any work executed without an order will be admitted.
283. Are the conditions in this contract binding on the Government as well as the contractor? Yes.
284. Is there any contract between the parties when a permit is given? Certainly.
285. Where does it come in? The signing of the bond constitutes the contract. 286.

286. Does it not say that the contractor is on no account to commence any contract without an order in writing, signed by the Roads Superintendent, and no claim for any work executed without an order will be admitted? That is for extra work or deviations from the contract.

287. Have you a copy of the permit to start the work? No.

288. Is this the permit?—

A. Gracie.
11 Nov., 1896.

No. 57c. CASINO TO MOUNT LINDSAY ROAD—CASINO DISTRICT.
Mr. A. GRACIE, Road Superintendent, hereby undertakes to return for payment to the Roads Department the sum of £276 3s. 4d. for the following works, which Mr. John Brennan has contracted to execute for the Government of New South Wales, when and as the same are completed to his satisfaction and in accordance with the General Conditions, signed by the said Mr. J. Brennan, such payment to be made as follows—that is to say, 70 per cent. of the value of the work done under this agreement to be returned for payment as nearly as possible each month, and the remainder when the whole is finished to the satisfaction of Mr. A. Gracie.

Construction of approaches to Bean-tree Crossing Bridge, as per specification.

ARTHUR GRACIE,
Resident Engineer.

Dated the 19th day of November, A.D. 1891.

No. This is not a permit to start work. It is a counterpart of an agreement to show that Brennan was a contractor.

289. I suppose it is the same as a permit? No; it is no permission for Brennan to start the work.

290. Mr. Kelly.] It is an endorsement that he is the contractor? Yes. There is a permit on the other side, I think, to get metal.

291. Chairman.] Will you read what is on the other side of this paper? It reads as follows:—

NOTICE.

No payment will be made on account of work let by Superintendent except a task executed on the proper form is produced. Verbal agreements will not be recognised (however small the amounts), but will be a private liability of the officer, for which the Department will not be responsible.

Contractor's Permit.

Mr. John Brennan is to forthwith proceed with the within-mentioned contract, and is hereby authorised to quarry, excavate, and remove all stone required for contract.

This permit is only granted for the purposes of this contract, and expires with the time specified for the completion of same, viz., 21st January, 1892.

ARTHUR GRACIE,
Road Superintendent.

It is years since we used this form.

292. Have you made payments according to that agreement? We only made one. We might have made payments more frequently.

293. Did you make any payments within the contract time? Yes; we paid him £80.

294. Within the contract time? I do not know. He was seven weeks over the contract time, and he might have got this £80 after the contract time expired. I am not sure whether he did not get it after the contract time had expired.

295. Will you admit that you did not pay according to that agreement? No. I say that we paid in accordance with the practice of the Department.

296. Did you instruct Mr. Crouch, the assistant engineer, to ask Brennan to assign this money to the sureties for Contract 57v? No; it was not a matter I would ever interfere with.

John Brennan recalled and further examined:—

297. Chairman.] Do you desire to make a statement to the Committee? Yes.

J. Brennan.

Re Contract 57v.

I was asked by Henry Ernest Crouch, Assistant Superintendent, if I was going to sign the money coming to me to be paid to an account in the Commercial Bank in the names of A. Cumming and T. J. Reddick. I thought as the Department asked me to do so that it would be all right, and I say they had a right to stop it when I asked them to do so, as I was being unfairly treated, and they were a party to the signing of such documents. No. 2 of the General Conditions provides that on no account will a contractor commence any contract without an order signed by the Road Superintendent, and no work executed without an order will be admitted. The order agrees to pay 70 per cent. each month as the work proceeds. The Department has paid no money within the contract time, nor for a month later, and then they cancel it for not making sufficient progress. Below are the names of the men who worked on this Contract 57v. None of them worked on Contract 21v.

11 Nov., 1896.

	£	s.	d.		£	s.	d.
Edward Murray	3	4	6	D. McCarthy	1	10	0

J. Doherty.....	4	4	1	J. Jamieson	1	2	0
D. O'Neil	8	10	2				

To my order the four were paid.

Five orders of Court for which he refused to pay to my order.

Document No. 57v, Casino to Mount Lindsay Road, Casino District Division.—Mr. A. Gracie, Road Superintendent, hereby undertakes to return for payment to the Roads Department the sum of £276 3s. 4d. for the following work which Mr. John Brennan has contracted to execute for the Government of New South Wales, when and as the same are completed to his satisfaction, and in accordance with the General Conditions signed by the said John Brennan, such payment to be made as follows—that is to say, 70 per cent. of the value of the work done under this agreement to be returned for payment as nearly as possible each month, and the remainder when the whole is finished to the satisfaction of Mr. A. Gracie. Construction of approaches to Bean-tree Crossing Bridge, as per specification.

The first payment made on contract was 23rd February, 1892.

Dated 19th day of November, 1891.

ARTHUR GRACIE.

Department of Public Works, Roads, Bridges, and Sewerage Branch.

DEBTOR to John Brennan in the sum of £69 13s. 4d., for work done on Contract No. 57v, approaches to Bean-tree Bridge, in Casino district.

John Brennan, No. 5, Hannam-street, Darlinghurst, Sydney, 24th June, 1895.

Arthur

Arthur Gracie recalled and further examined :—

A. Gracie. 298. *Chairman.*] Is that a mistake on the plan—that the datum-post is 40 feet from the gum-tree marked B.M.? No, it is not a mistake; it is simply an indication that the original levels are under the pegs 66·5 feet, and that we have reduced the whole section 40 feet in plotting.
 11 Nov., 1896. 299. There was a gum-tree within 40 feet of that site? That does not refer to the distance of any gum-tree. The B.M. is on the south side of the gum-tree.

John Brennan recalled and further examined :—

J. Brennan. 300. *Chairman.*] Do you desire to make a statement with regard to the particulars of your claim on Contract 21v? I do. It is as follows:—

301. Do you also desire to make a statement with regard to Contract 21U?

[Letter No. 4,010, R. and B.]
Sir,

Department of Public Works, Sydney, 12 June, 1893.

With reference to your letter of the 24th of April last, in regard to amount due to you on account of your contract of bridge and approaches on road Casino to Lismore, with regard to the amount of final voucher on account of this work, I am to point out that the sum originally was £59 3s. 9d., but sums were afterwards paid in pursuance of orders of the Court, which reduced it to £42 6s. 7d. ; in addition to this amount the sum of £3 18s. 9d. has been allowed on account of your claim for rubble backing, making it a total of £46 5s. 4d., the amount offered to you.

J. BARLING,
Under Secretary.

Memo. to Mr. John Brennan, Broadwater Post-office.

Department of Public Works, Roads, Bridges, and Sewerage Branch, Casino, 14 December, 1892.

The final payment on your contract of bridge and approaches on the Lismore Road amounted to £59 3s. 9d. ; from this the following sums have been paid in accordance with orders given by you :—

	£	s.	d.		£	s.	d.
Neil McCall.....	11	9	11	Wm. Ryan.....	2	14	10
John Pattison.....	0	5	3	Denis McCarthy.....	1	10	0
J. Jameson.....	1	2	0	John Doherty.....	4	4	1
Gilbert Hilliard.....	4	0	0				
E. Murray.....	3	4	0				
					£28	10	1

The balance, £30 13s. 8d., will be paid to you on your informing me of your address, and on your returning this paper, endorsed on the back that this statement is satisfactory, and is accepted by you in full of any demand you have.

ARTHUR GRACIE,

To Mr. John Brennan, Broadwater,—

Department of Public Works, Casino, 15 December, 1892.

With further reference to my letter of yesterday, I have to inform you that, before the payment of the balance due on contract for bridge on Lismore Road, it will be necessary for you to receipt the voucher enclosed, leaving your signature witnessed in the proper column. Please return the voucher as early as possible.

ARTHUR GRACIE,
Resident Engineer.

I would like to explain why this contract was so long incomplete. When I shifted from the creek where I tendered for, near Tunstall, that broke my agreement with the Casino Sawmill Company for the delivery of ironbark timber. I ordered it at Coraki, 9th July, to be delivered at Lismore in a fortnight from that date. On the 27th of July I had a letter from Mr. Yabsley stating that my timber was cut, and asking would I let him have my cheque in payment before delivering it to me at Lismore. I did not do so, because the timber was ordered to the plan, and the wales and bracing would have been too short. On 29th July I gave an order to Mr. Bailey at Codrington. He was to deliver it at Lismore within nine days. On the 7th August I had a letter from him stating that his teamster had gone on strike for 8d. per 100 more for drawing, and that if I would consent to pay half he would have it drawn in. On the 8th of August I ordered it at the North Lismore Sawmills, Glasgow and McNight, where I had got tallow-wood for the decking. They were to have some cut in a week. They had not. I kept going about it every second day. I got the first delivered on the 5th September, 15th, 18th, 19th, 20th, and 21st. Then the firm went bankrupt. On the 24th of September I gave an order to George Cattie, Lismore, and got the first delivered on the 12th October, and completed on the 9th November. Each time I went about this timber it cost me from £7 to £8 every day. I have been away from Bean-tree Bridge contract, which was 50 miles from this one. I have been losing from £3 10s. to £4 per day. I have been there two days in succession, pile driving. I drove two piles each day 21 feet each. When I have been away I got one pile a day driven from 18 to 21 feet. My schedule price was 4s. 6d. per foot. The material cost 1s. per foot delivered, which was 3s. 6d. for labour in topping. My losses were equally as large. This would be twelve times—two from Lismore Road, £3 10s. each, and ten times from the Bean-tree, two days each time, £7 each—or £77 in all.

The embankments were commenced on 28th of September, and completed on the 22nd of November. The traffic was on the bridge from that date. A few days previous to this I got an extra metal and ballast. I got the stone carted. I had a couple of men breaking. I brought a quantity of rations and left it in the camp with them, so that any men who wanted work could get some rations and start breaking at 3s. 6d. per cubic yard. Good men did not care about starting on such a small job, and the stone was so hard that they could not break more than 1½ cubic yard per day each. I came there every week till it was finished once at least, but could not afford to come oftener, as I had a dozen men on the other contract, and when I was away I did not get satisfaction. I had a letter sent to me by Denis O'Neill, of Casino, stating that the Department had requested Alfred Clark Simpson to put me through the Court. I wish the Committee to send for this letter. I requested it to be taken care of. I sent this letter to the District Court Casino, held on Monday, the 25th day of June, 1894, in defence of summonses for writs of *Capias ad satisfaciendum* No. of plaint 14 of 1892, between Denis

J. Brennan. Denis O'Neill, plaintiff, and John Brennan, defendant, and No. of plaint 14 of 1892, Thomas Glynn, plaintiff, and John Brennan, defendant. Alfred Clark Simpson, of Casino, sent me an eight-day summons. He had no claim. I defended this summons according to directions on the back of it, sending a copy of the defence to the C.P.S. for Glynn and O'Neill. This led to these writs being applied for and obtained for £46, which the Departments offer as settlement in full of all demands on this contract, causing me to be imprisoned for debt, while the Departments refused to pay me for quantities they had agreed to pay me for, and would not pay me any portion unless I accepted £46 as a final settlement, in full of all demands on this contract. For this action on behalf of the Departments I claim £500 damages.

11 Nov., 1896.

Contract 21v was for a lump sum according to plan and specification, and schedule prices were for deducting or increasing any of the items.

No. 11 of the General Conditions of this contract provides that the contractor is not to assign any moneys payable or to become payable under the contract without the written consent of the Engineer-in-Chief, and no such document, without such consent, shall have any effect or be in any way recognised.

THURSDAY, 12 NOVEMBER, 1896.

Present:—

MR. KELLY,

MR. LYNE.

ROBERT PYERS, ESQ., IN THE CHAIR.

Arthur Gracie recalled and further examined:—

A. Gracie. 302-3. *Mr. Lyne.*] At what time did you find the pegs at the site where Brennan first started to put the bridge over the creek near Tunstall? I do not know that I found any pegs there.

12 Nov., 1896. 304. How do you know that any pegs were there? Mr. Allman, of the Lismore district, told me that he drove spikes there.

305. You stated in your evidence that spikes were driven into the ground, and that they were covered by metal;—what was the use of spikes being driven in there if they were driven in after Brennan made his mistake? Not after, but eighteen months before.

306. I wish you to state definitely whether the pegs were there eighteen months before, or any time before he made his mistake;—if there was any doubt as to the site, and Brennan had gone to the other site, where the bridge was ultimately put up, he might have found the pegs? No, I do not think he could.

307. Why not? They got driven down into the metal and covered up with the traffic, and he would require to measure the site to find the position of the pegs.

308. Do you know that the pegs were ever there? Not of my own knowledge, but Mr. Allman, of the Lismore district, informed me that pegs were driven in there, and it is usual to do so.

309. That they were driven in a long time before? Yes.

310. You never saw the pegs yourself? I never saw them. You might say practically that there were no visible pegs at either point. There were no visible pegs at the proper place, and no pegs at all were at the place where Brennan started to erect the bridge.

311. *Mr. Kelly.*] Do you expect a successful tenderer to come to you and have the place pointed out to him? Certainly.

312. *Mr. Lyne.*] That Brennan did not do? No.

313. *Chairman.*] Brennan, in his evidence, says he did? Without even going to the spot I could have explained where we wanted the bridge put over the creek. I think his memory cannot serve him correctly.

314. *Mr. Lyne.*] Are you certain that he did not go to you and ask you for information as to the spot? I am certain that he did not. I reported at the time that he did not.

315. Did Brennan give you an authority to pay his sureties for one contract some money on that contract, and did you pay them the money on another contract for which he had given you no authority? I do not recollect such a case. I have given evidence to the effect that the balance was paid according to the orders of the Court.

316. *Chairman.*] There were no orders of the Court on Contract 21v, and this money was paid on Contract 27v? Brennan signed a final receipt as being satisfied with the disbursement of the money.

317. *Mr. Lyne.*] Did Brennan sign a final voucher that he was satisfied with all the payments which had been made in connection with Contract 27v;—have you got the document he signed? It is not among the papers here. I believe some of the men who worked on Contract 27v also worked on Contract 57v, and if they did we might have paid the money to them.

318. Brennan stated that you got an order of the Court to pay the money on one contract, and that you paid the money on another contract? The men used to work on the various contracts. The final voucher for the bridge of the Bean-tree Crossing was £35 1s. 3d.

319. As you knew that this case was coming on, why did you not look through the papers before you came here? I had no opportunity to look through the papers. I am not in the Casino district now, and I did not see these papers until I came here.

320. An authority to pay on Contract 75v is no authority to pay on Contract 21v? We look upon it as an authority to pay all moneys due by the Government in respect of any Department. It includes all money due by the Treasury.

321. If so, it does not matter on what contract it is paid? No.

322. Does it not say on what contract;—have you not a copy of the order? No; it was asked for yesterday, but it has not been supplied.

323. Surely your memory will serve you well enough to be able to give us some information about this matter? It is five or six years since it took place. It has been considerably mixed up. Here is a *précis* of the business, but I cannot go by it because it is wrong.

324. Will you read the *précis*? It is as follows:—

It appears, however, that he did not actually receive this amount, although he signed for it, Mr. Gracie merely taking his receipts as a matter of form, the amount being used along with £11 12s. 11d., part final payment on Contract 57v, approaches to Bean-tree Bridge (total amount, £46 14s. 2d.), to pay the undermentioned claims against the contracts:—

	£	s.	d.	
M. McCall.....	15	3	7	Receipt at Audit Office with voucher.
E. Murray.....	3	4	0	
W. Ryan.....	2	14	10	
D. McCarthy.....	1	10	0	
John Doherty.....	4	4	1	
J. Gallan.....	11	7	6	
O'Neill.....	8	10	2	

Total £46 14 2

ON THE CLAIM OF JOHN BRENNAN AGAINST ROADS DEPARTMENT.

There is a balance due to Brennan on this contract amounting to £10 12s. 2d. (part of remitted fine £39), which he refused to accept, amount was consequently refunded to the Treasury. R. Cressy's judgment order against Brennan was settled with the other portion of fine; amount, £28 7s. 10d. £25 9s. 2d., balance of final voucher, £37 2s. 1d., Contract 57u, approaches to Bean-tree Bridge, was paid to Brennan's sureties, Messrs. Cumming and Reddacliff, on the 17th April, 1893. A. Gracie. 12 Nov., 1896.

With reference to the payment of this final voucher, Brennan was informed that as the contract was cancelled, he has no claim upon the Government, and also that as a matter of grace the Department paid for the value of work, so as to meet the claims of workmen.

The final voucher, £59 3s. 9d., Contract 21c, bridge over creek, road Lismore to Casino, was disposed of as follows:—

Claim against Contract paid.

	£	s.	d.	
N. McCall	11	9	11	} Receipts at Audit Office, attached to voucher.
M. R. Jameson	1	2	0	
Jno. Patterson	0	5	3	
G. Hilliard	4	0	0	
Total	£16 17 2			

And balance, £42 6s. 7d., refused by Brennan, refunded to the Treasury.

325. You say that *précis* is no guide for you, because it is not correct? I doubt whether it is correct, because towards the end they did not understand very much about it in the head office, as the three contracts were getting mixed up. Then there is the remission of fines, which came afterwards, with separate papers on each contract, and they got mixed up.

326. Brennan asked for these receipts to be produced? I asked for the receipts to be sent down from the Casino office. I got some papers, but not what I wanted—not any which would be of any use to me.

327. *Chairman.*] You cannot get all the papers you want, and some of them are at the Casino office? The receipts of McCall attached to the voucher are at the Audit Office. The receipted vouchers eventually find their way to the Audit Office, and are filed there. I would have liked more time to look into the matter. I did not reach Sydney until midnight on Monday, and the Committee sat on Tuesday morning.

328. You cannot say that Brennan's assertion that a certain sum was paid on one contract for work done on another contract is true or not unless you have all the papers, which are not available? Not unless I have some papers to see who got the money.

329. You cannot say whether orders of the Court given for work done on one contract were paid out of another contract? No; it would be very unusual. I never do it.

330. It would be unusual, but you cannot say that it is not so, because you cannot see the papers? No. It is an old case, and my memory will not allow me to say that it is not so. I daresay if I had more time to look through the papers I might find something which would clear that up.

John Brennan recalled and further examined:—

331. *Chairman.*] Do you wish to make a statement? I do. In his evidence yesterday, Mr. Gracie said that when he went there there was no crossing over the creek at Tunstall. I wish to say that a crossing was there, and that it was erected for one day only. It was finished on the night previous to his coming along, and I removed it on the following night. Mr. A. Gracie, Mr. Denis Alcock, Mr. Robert Walters, Mr. A. C. Simpson, Mr. Robert Pyers, crossed over the temporary crossing on that day. J. Brennan. 12 Nov., 1896.

332. *Mr. Lyne.*] It did not cost you much? It was the decking.

333. Do you mean to say that Mr. Gracie might not have known that it was there? He could not have gone across it if it was not there.

334. *Chairman.*] You mean that Mr. Gracie crossed this crossing? Yes; but he says that he did not; that there was none there.

335. *Mr. Lyne.*] Are you claiming for a temporary bridge? Yes.

336. How much do you claim? £14. There is a schedule in the contract for a temporary bridge. It had to be erected before the traffic could be put off the other.

337. How do you come to the conclusion that you ought to be allowed £14? For the girders and labour.

338. Was it ever passed as valued at £14? I tendered for it at that price.

339. When were you in prison for a debt? Two years ago.

340. That was two or three years after the contracts were completed;—how do you connect the Department with causing you to go to prison? They asked a man to put me through the Court.

341. Whom did they ask? I have a letter from Denis O'Neill—it is not here, but it is in the Court—stating that the Department asked Charles Clark Simpson to put me through the Court, in order to save them further trouble.

342. What branch of the Department? The Roads and Bridges.

343. It seems a very unusual thing to do? Yes.

344. Who is Mr. O'Neill? He had a case against me. He is one of the parties who imprisoned me.

345. What does he know about it? He seems to know about it. He wrote a letter to me to that effect.

346. Have you any other evidence to show that the Department did put you through the Court? There is a statement in evidence here that Mr. Gracie requested me to come to a settlement, and that he made several concessions, but that I would not accept them, and later on a statement came to the office that one of my creditors was taking steps to secure my insolvency.

347. Suppose O'Neill has stated that it is not true? I suppose he has to prove it. It is between him and the Department, not between him and me.

1898.
(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

CLAIM OF JOHN BRENNAN AGAINST ROADS DEPARTMENT.

TUESDAY, 25 OCTOBER, 1898.

Present:—

MR. J. C. L. FITZPATRICK,
MR. HURLEY,

MR. HASSALL,
MR. ANDERSON.

ROBERT PYERS, ESQ., IN THE CHAIR.

John Brennan sworn and examined:—

1. *Chairman.*] Do you wish to submit fresh evidence to the Committee? Yes.
2. *Mr. Hurley.*] Are the plans now before us the plans of the bridge in question? Yes.
3. Did you work out the quantities before you tendered? Yes. I have given in a bill showing the quantities worked out. J. Brennan.
25 Oct., 1898.
4. Did you start at the Casino end? Yes; I meant Casino end to work out tracings.
5. Was there any datum-peg there? There was supposed to be a datum-peg a certain distance from a bench-mark upon a gum-tree. The tree was there, but the datum-peg could not be found.
6. Is the tree alongside the present bridge? No; the datum-peg should be 40 feet below the bench-mark on the gum-tree.
7. I understand the difference is that you tendered to build a bridge at a certain place on a creek, and the Government authorities put you in another place? Yes.
8. In the specifications is there anything about a tree as a landmark? No, only the way in which the bridge is to be carried out. The datum-peg could not be found when the inspector went there to measure the site; it could not be found according to the plan.
9. Did an officer go with you to the site where the bridge was to be built? I went to the site and looked at it, but could find no pegs.
10. How did you know that was the site? It was the creek where I tendered to build a bridge. I went on the road and could not find any pegs. I went to the office to find out where was the place.
11. *Mr. Anderson.*] Did any of the officers point out where you were to commence the bridge? Not until after I began.
12. Were any marks laid down for you to make a start? Yes; a peg was driven for the first pile.
13. *Mr. Fitzpatrick.*] In your evidence-in-chief you stated, "I waited on Mr. Gracie next morning, 8th June, 1891. I requested that he would meet me on the site by appointment as I could find no pegs, and might put the temporary crossing in the way of the bridge. He said the bridge was going on the site of the old one, and that I could not go wrong with the crossing, and he told me to get the material delivered, and he would be out there in a few days. When he came the crossing was complete, the piles, girders, and head-stocks delivered, and the old bridge stripped. When he came he said, 'This is not the place.'" Between the time you asked him to come and the period when you had constructed a portion of the works, had he been there? No.
14. *Mr. Anderson.*] Did he give instructions to do this work? He told me to get it ready when I saw him in the office, and that he would be there in a few days, and that I could not go wrong with the crossing.

- J. Brennan. 15. In the meantime you undertook to strip the bridge? Yes, according to his instructions.
- 25 Oct., 1898. 16. Then you had his instructions? Yes, but not pegged out. He was not supposed to have pegged out the crossings, he was supposed to peg the bridge.
17. *Mr. Hurley.*] Did Mr. Gracie tell you that the bridge was to go on the site of the old one? Yes.
18. When Mr. Gracie came there did he indicate on the plan that a different locality was intended? No.
19. *Mr. Anderson.*] When you commenced to construct the bridge who gave you instructions? Mr. Smallwood, one of the officials.
20. *Mr. Hurley.*] Is there any other old bridge on the creek? There was an old bridge where I began work.
21. Did you know of any other old bridge? No.
22. *Mr. Hassall.*] How long did it take to strip the crossing, and replace it? Three or four days.
23. I see in your original evidence that you were twenty-seven weeks over the time allowed for the completion of the work? Yes.
24. They fined you for being over time; one reason you gave for being over time was the fact that you commenced work on the wrong site; that you had done a certain amount of work there and had to shift. In the documents it is stated that the Department remitted a portion of the fine on account of your beginning at a wrong place;—what was the whole time occupied by you in doing the work over which the mistake arose? My loss was not sustained only through the time lost; I had made agreements for timber to be delivered there, and I had to go elsewhere.
25. *Mr. Hurley.*] When the mistake was found out, you asked him what he was going to give you for what you had done; and he said that he could not send in a voucher for that, but that he would allow you for it in something else? Yes.
26. I suppose that meant that he would not fine you on account of the over time? Yes.
27. I see that according to the evidence, you had to move the bridge a considerable distance from where you began;—was there any other old bridge where you moved to? No; it was only a culvert crossing.
28. That shows he must have misled you when he said the old bridge was the identical crossing, and when he then shifted you to where there was no bridge at all? Yes; there was a culvert $1\frac{1}{2}$ miles away, but there was no creek there.
29. Was it at that culvert that the bridge was afterwards erected? Yes.
30. Was the bridge carried out in accordance with the plan? No, not by a long way; that is shown in the extras.
31. *Mr. J. C. L. Fitzpatrick.*] How far from Lismore did you construct the bridge? Within 3 miles of Lismore—within the municipality.
32. Where you originally stripped the bridge was it $4\frac{1}{2}$ miles away? Yes.
33. *Mr. Hassall.*] Were these plans obtained from the head office? I got them from Mr. Gracie.
34. When was the mistake found out? When they came to peg the site they could not get any pegs, and they had to send one of my men to the office for a tracing; then they found the plans would not suit the place.
35. Was an allowance made in your contract price afterwards? He agreed to pay for certain quantities, then he refused to certify for the quantities in the voucher.
36. Was that after you had done the work? Yes. I sent Mr. Gracie a bill, and he refused to accept it. This is the reply of Mr. Gracie on the bill I sent him, which was much less than it should be:—"These extras will not be allowed, and as I have determined that you shall cause no further trouble to the Department, the voucher will be passed and paid to my credit in due course without your signature, leaving it to you to take any course you may think fit. I can understand that your motive is now to delay the payment of money properly due to your sureties and to men whom you employed and neglected to pay. You may rest assured, however, that steps will be successfully taken to frustrate this design. You may not again communicate with this office unless specially requested.—АВТНУМЪ ГРАСІЕ, Resident Engineer, Casino, 29/3/92." Mr. Gracie sent me a document that he would pay me for certain quantities of metal and ballast, earthwork and rubble packing. When he sent me a final voucher he did not include those quantities correctly. He charged wages for workmen who were working on other contracts.
37. *Chairman.*] Did the timber, according to the plans and specifications, suit the bridge which you eventually put up? No, they were too short; the piles for the piers were too short by 5 or 6 feet.
38. Was the length of driving the same? No; there was an extra length of driving piles to the depth of $13\frac{1}{2}$ feet.
39. *Mr. Hurley.*] Did you ever ask the officers to show you the site? Yes.
40. Mr. Gracie positively swears you did not? I did. It would be hardly likely that I would go and get material on to the place without asking him.
41. *Mr. Anderson.*] When you started the work you had not the officer's authority by his presence for beginning there—you were only told verbally, and there was a mistake? He should have come with me when I requested him.
42. *Mr. Hurley.*] Did you ever build a bridge for the Government before? That was the first bridge I built for the Government, but I built another for them later on.
43. How did you manage about that? The officer who was with me on the first bridge went with me and pegged out the site. The wooden pegs were to be found there.
44. You did not see any change in the system? No.
45. *Chairman.*] You say there was no change in the system; but do you not say in the one case there were pegs to be found, while in the other case there were not? Yes; in the second case there were pegs to be found, but in the case of the first bridge there were no pegs.
46. *Mr. J. C. L. Fitzpatrick.*] In Question No. 282 there is a reference to No. 2 of the General Conditions of this contract, in which it is stated "the contractor is on no account to commence any contract without an order in writing signed by the Road Superintendent, and no claim for any work executed without an order will be admitted";—did you receive any such order? Yes.
47. *Mr. Hurley.*] Can you produce that order? No; but it is included in the documents already handed in.
48. *Chairman.*] Have you any new evidence that you can give us? Yes.
49. What is it? I received from Mr. Gracie documents that he would pay me for certain quantities.

50. Is that in connection with that contract on the Lismore Road? Yes. I brought a final voucher to Sydney, and left it in the head office. Mr. Stathan insisted on my leaving it. He said there would not be a voucher to settle the matter if I did not leave the one I had with him. The Department has kept that voucher, and did not return it. I sent those documents to the Under Secretary for Works to prove that the quantities I was claiming were due to me. These have been sent to Mr. Gracie, at Casino. He was instructed to communicate with me *re* a final settlement. He sent me a tracing, and I worked out the quantities; they are shown on a bill before the Committee. This is Mr. Gracie's reply to me:—
 "Memo. to Mr. J. Brennan, Broadwater. Contract No. 21v. Without prejudice. I do not understand the methods of your measurement. What do you mean, for instance, by sections G, 7, &c.? What do these numbers refer to? I may mention that my revised calculations made the total earthworks 1,515 cubic yards, and I believe this is as near as it is possible to get to the correct quantity. As a kind of a check, Mr. Smallwood measured the excavations (anything but rough measurement being impossible). He made the quantity somewhat greater; the end being that you were allowed what I now think was the too liberal quantity of 1,660 cubic yards. However, I have been over the papers and measurement again, and if it will end the matter as far as this item is concerned, I am prepared to recommend 122 cubic yards more, or a total extra under this head of 952 cubic yards. I have recalculated quantities as per plan of rubble, and find the total of 76½ cubic yards. This shows an extra of 2½ yards (17½ and 19½) in your favour, and although there may have been circumstances now forgotten which made 17½ the correct quantity, I will recommend this 2½ cubic yards. Regarding the ballast and metal, unless there were at the time affecting the measurement and now forgotten, it appears the contract should be credited with an extra 5 cubic yards of ballast, and 5 cubic yards metal:—

Ballast—quantity supplied ... 134·80	Metal—quantity supplied ... 120·38
" " specified ... 92·60	" " specified ... 92·50
Extra ... 42·30	28·38
On voucher ... 37·25	On voucher... 23·38
5 cubic yards.	5 cubic yards.

The other items of your claim I cannot discuss. They have been refused by the Department, and will, I think, always be. In making you the offer herein I am satisfied that the position of the Department is perfectly secure in any action you make take. It only remains for you to let me know straightforwardly if you will accept this arrangement if the Department approves of it. *Note:—Do not write any more long letters; a line will do in this case.—ARTHUR GRACIE, Resident Engineer, 15/1/94.*" What I want to point out is that Mr. Gracie admits that this quantity was owing to me. Why did he not return in the final voucher for this 1,660 cubic yards. He also led the Department to believe that I was offered a final voucher, the amount coming to me being £42; that was incorrect.

51. *Mr. Hurley.*] How do you know that he led them to believe that? I have papers here to that effect. There is a claim for £500. The Department retained this money; they would not give it to me unless I accepted it as a final settlement. There was a *ca. sa.* got against me for the amount, and I was imprisoned.

52. *Mr. Hassall.*] How long after the completion of the contract were you imprisoned? Going on for three years. A judgment was got against me, and they applied for a *ca. sa.* Mr. Gracie gave evidence that this amount was offered to me and I refused to accept it. I was forced either to forfeit my claim or to accept what they offered.

53. But the Government did not take steps against you? No; other people did. They would not give me money to pay these people unless I accepted it as a final settlement.

54. The Government, then, had offered you what they thought was the amount of your claim, on condition that you accepted it as a final settlement in connection with the contract? Yes.

55. On your refusing to accept that amount three years afterwards somebody took proceedings against you for debt, and had you imprisoned? Yes.

56. Was the debt which you were imprisoned for incurred in connection with this contract? Yes; for materials, and money lent, and stores.

57. *Mr. Anderson.*] Was the money standing in the hands of the Government handed over to the creditors by order of the Court? No; I agreed to give these men a certain amount of money. I agreed to give an order for £10.

58. What was the amount of the debt? £40 was divided among two, according to the order of the Judge.

59. Who got the money lying in the hands of the Government? The money is still in the hands of the Government.

60. *Mr. Hassall.*] It seems that a long time elapsed between the completion of the contract and those proceedings? They had a judgment against me. It appears they got some information from the Government that they should take proceedings.

61. Had you earned no money after the completion of the contract until proceedings were taken against you? Yes, I was working for wages; but I was not in a position to pay the claims. There was some evidence revised by Mr. Gracie which I would like to call attention to. I think it should have been revised before the Committee. It is a question I asked him. He revised it apparently, or it is not given as he answered. I refer to Question 245. It is as follows:—"Why did you ask Alfred Clark Simpson, of Casino, to put Brennan through the Court, in order to save the Department further trouble? I did not ask him to put Brennan through the Court. I may have made the remark on Mr. Simpson's statement, that there was to be a meeting of Brennan's creditors, to the effect that trouble would be saved." The answer of Mr. Gracie was, "I might have insinuated it, but I have not made use of those words." Those words are not in the answer as printed.

62. *Chairman.*] But there is very little difference? At the time I had a meeting of creditors I was doing work for the Government, and these contracts were not completed.

63. That question was put by me to Mr. Gracie, through the Chairman? It may have been put through the Chairman. I took a note as to how they were answered.

64. How did you come to the conclusion that this evidence had been altered? Because I had taken a note of it.

TUESDAY, 13 DECEMBER, 1898.

Present:—

MR. HASSALL,

MR. HURLEY,

ROBERT PYERS, ESQ., IN THE CHAIR.

John Brennan recalled and further examined:—

- J. Brennan. 65. *Chairman.*] On page 20 of the Minutes of Evidence taken before the Select Committee in 1896, you have "balance due for work done £133 0s. 4d.," and on page 21 you have "balance due (on the same contract), £132 6s. "? I have done the bill over again. I find there is a slight mistake. I have put down "setting one wing-pile an extra depth of 3 feet, at 3s. per lineal foot, 6s." Instead of 6s., of course it ought to be 9s.
- 18 Dec., 1898.
66. Is there any other mistake? Yes; "wing-piles, as per plan, unused, being too short—49 lineal feet, at 1s. per foot—£2 8s.," should be £2 9s.; and "metal, 2½ inch—29½ cubic yards, at 7s. 6d.—£12 3s.," should be £11 3s. 1d. That makes up the difference. That does not bring the account out exactly the same as on the next page. There is still a difference of 2s. But what I have just stated are the correct amounts.
67. *Mr. Hurley*] How much are you asking interest on? £132 4s. 5d., and I claim £45 14s. 6d., interest at 5 per cent. for six years. The time was over six years, but I have claimed interest for only six years. That is on Contract 21 v.
68. What is the amount due on the second contract, 57 v? £69 13s. 4d.
69. For the same years? Yes.
70. What interest are you charging for that? Interest at the rate of 5 per cent.
71. How much does that amount to? £23 1s.
72. What is your total claim for interest? £68 15s. 6d.
73. How long were you in gaol? About a fortnight, I think.
74. And you claim £500 damages for that? Yes. I ought not to have been there at all.
75. The Government had money of yours in hand when you were put in gaol? Yes; they refused to pay it unless I would accept £46 as a final settlement. There were two *ca. sa.*'s got against the amount—one by Thomas Glynn, and the other by Dennis O'Neill—and the Government refused to pay me anything unless I would accept £46 as a final settlement.
76. Do you know the full amount for which you are asking,—interest on the money due, and the back money, and the damages for being imprisoned? £847 13s. 3d. That includes £77 "for loss sustained on other work *re* shifting from Tunstall."
77. *Chairman.*] Do you wish to make out that you lost that money through the fault of the Government? Yes. When I was carrying out that contract, when I could be there I was getting two piles a day driven by the same number of men as I used to get one pile a day driven by when I was absent. My schedule price for pile driving was 4s. 6d. a foot—the timber cost 1s. and the labour 3s. 6d.
78. How do you account for being so far behind the contract time? I got messed up over the matter of shifting from Tunstall. I had let a contract for the supply of timber to the Casino Saw-mill Company. When I shifted to the other place they would not supply the timber.
79. Was it any fault of the Department that that was not done? Yes; because I tendered for work at a creek near Tunstall, and I had to erect the bridge over a "black gully" in the Lismore municipality. I had to order the timber at Coraki, according to the plan, but when we came to put the bridge up a great quantity of the timber was found to be too short.
80. *Mr. Hassall.*] You say you were put in gaol because you owed certain money which you could not pay? Yes.
81. How was that debt contracted? Part of it was for plant and material, and some was money borrowed to pay wages.
82. All in connection with this work? Yes.
83. The debt did not arise at all in connection with any other transaction? No—only these contracts. I did not keep the money paid on each of them separately, but paid money when it was required.
84. Then the judgment was obtained against you for what? For stores supplied in connection with Contract 57 v and for plant.
85. How much was the judgment for? £49.
86. And the Government held money in hand to what amount? £132 4s. 5d. They offered me £46, and refused to give me any portion of it unless I would accept that as a final settlement.
87. What distance did you have to shift from your camp at Tunstall? About a mile and a half.
88. You say it cost you £77 for "loss sustained on other work, *re* shifting from Tunstall?" Yes; because when I had to shift from Tunstall my agreement for timber was broken; and every time I tried to get timber it took me two days, and I was at a loss of so much per day. I got about 42 feet of piles driven when I was there, but when I was away only from 17 feet to 20 feet were driven.
89. So, practically, you had to stand alongside the men to see that they did a fair day's work for you? Yes.
90. That is the sort of men you had? Yes; it was not easy to get men then.
91. *Mr. Hurley.*] How is it that you have not charged interest on the £77? I did not think it would be of any use charging it.
92. Then what is the use of your charging interest on the other amount? I did not think I could charge interest on a claim for losses or damages. If the Committee recommend that I should be paid interest on it I should be pleased to take it. I have not asked for interest on the £500 damages, either.

1898.
(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

REPORT FROM THE SELECT COMMITTEE

ON

SAYWELL'S TRAMWAY AND ELECTRIC
LIGHTING BILL;

TOGETHER WITH THE

PROCEEDINGS OF THE COMMITTEE

AND

MINUTES OF EVIDENCE.

ORDERED BY THE LEGISLATIVE ASSEMBLY TO BE PRINTED,
7th October, 1898, A.M.

SYDNEY : WILLIAM APPLIGATE GULLICK, GOVERNMENT PRINTER.

1898.

1898.
(SECOND SESSION.)

EXTRACTS FROM THE VOTES AND PROCEEDING OF THE
LEGISLATIVE ASSEMBLY.

VOTES No. 15. TUESDAY, 20 SEPTEMBER, 1898.

9. SAYWELL'S TRAMWAY AND ELECTRIC LIGHTING BILL (*Formal Motion*):—Mr. Cohen moved, pursuant to Notice,—
- (1.) That Saywell's Tramway and Electric Lighting Bill be referred to a Select Committee for consideration and report.
- (2.) That such Committee consist of Mr. Young, Mr. McLean, Mr. Rigg, Mr. Cann, Mr. Ashton, Mr. Hayes, Mr. Waddell, Mr. Ewing, Mr. Moore, and the Mover.
- Question put and passed.
-

VOTES No. 23. THURSDAY, 6 OCTOBER, 1898.

6. SAYWELL'S TRAMWAY AND ELECTRIC LIGHTING BILL:—Mr. Cohen, as Chairman, brought up the Report from, and laid upon the Table the Minutes of Proceeding of, and Evidence taken before the Select Committee for whose consideration and Report this Bill was referred on 20th September, 1898, together with a copy of the Bill as amended and agreed to by the Committee.
- Ordered to be printed.

SAYWELL'S TRAMWAY AND ELECTRIC LIGHTING BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report was referred on 20th September, 1898, "*Saywell's Tramway and Electric Lighting Bill*,"—beg to report to your Honorable House:—

That they have examined the witnesses named in the List* (whose evidence ^{*See List, p. 5.} will be found appended hereto), and that the Preamble having been satisfactorily proved to your Committee, they proceeded to consider the Bill, in which it was deemed necessary to make certain amendments.

Your Committee now beg to lay before your Honorable House the Bill as amended by them.

JOHN J. COHEN,
Chairman.

No. 1 Committee Room,
Legislative Assembly,
6th October, 1898.

PROCEEDINGS OF THE COMMITTEE.

TUESDAY, 27 SEPTEMBER, 1898.

MEMBERS PRESENT:—

Mr. Cann,		Mr. Cohen,
Mr. Ewing,		Mr. Hayes,
Mr. McLean,		Mr. Moore,
	Mr. Rigg.	

Mr. Cohen called to the Chair.

Entry from Votes and Proceedings appointing the Committee read by the Clerk.

Printed copies of the Bill referred, together with original Petition to introduce same before the Committee.

Thomas Saywell (*The Promoter*) called in, sworn, and examined.

Witness withdrew.

Thomas Selwood Huntley called in, sworn, and examined.

Witness withdrew.

Ordered,—That the Mayor of Rockdale, the Council Clerk, Rockdale, P. B. Walker, Chief Electrician and Engineer-in-Chief, Postal and Telegraph Department, and H. McLachlan, Secretary to the Railway Commissioners, be summoned to give evidence next meeting.

[Adjourned till to-morrow at 11 o'clock.]

WEDNESDAY, 28 SEPTEMBER, 1898.

MEMBERS PRESENT:—

Mr. Cohen in the Chair.

Mr. Hayes,		Mr. McLean,
Mr. Moore,		Mr. Rigg.

Hugh McLachlan (*Secretary to the Railway Commissioners*) called in, sworn, and examined.

Witness withdrew.

William George Judd (*Mayor of the Municipal District of Rockdale*) called in, sworn, and examined.

Witness withdrew.

Philip Billingsley Walker (*Chief Electrician and Engineer-in-Chief, Postal and Electric Telegraph Department*) called in, sworn, and examined.

Witness withdrew.

Thomas Selwood Huntley recalled and further examined.

Room cleared—Preamble considered.

Question,—“That this Preamble stand part of the Bill,”—put and passed.

[Adjourned till Tuesday next at 11 o'clock.]

TUESDAY, 4 OCTOBER, 1898.

MEMBERS PRESENT:—

Mr. Cohen in the Chair.

Mr. Ewing,		Mr. Moore,
Mr. Rigg,		Mr. Waddell.

Thomas Selwood Huntley recalled, and examined in explanation of his answer to Question 124. Bill considered.

Clause 1 read and agreed to.

Clause 2 read, amended,* and agreed to.

Clauses 3 to 6 read and agreed to.

Clause 7 read and postponed.

Clauses 8 and 9 read and agreed to.

Clause 10 read, amended,* and agreed to.

Clauses 11 to 28 read and agreed to.

Clauses 29 to 35 read and postponed.

Clause 36 read and agreed to.

Clauses 37 and 38 read and postponed.

Clauses 39 to 44 read and agreed to.

Clause 45 read and postponed.

Clause 46 read and agreed to.

[Adjourned till Thursday next at Twelve o'clock noon.]

*See Schedule of Amendments.

THURSDAY,

THURSDAY, 6 OCTOBER, 1898.

MEMBERS PRESENT :—

Mr. Cohen in the Chair.
Mr. Hayes, | Mr. McLean,
Mr. Moore.

Bill further considered.
Clause 7 read, amended,* and agreed to.
Clauses 29 and 30 read and agreed to.
Clause 31 read and omitted.
Clauses 32 to 35 read and agreed to.
Clause 37 read and omitted.
Clause 38 read and agreed to.
Clause 45 read, amended,* and agreed to.
Clause 8 reconsidered, amended,* and agreed to.
New clauses to follow clause 45 read and agreed to.
Title read and agreed to.
Chairman to report the Bill with amendments to the House.

* See Schedule of Amendments.

SCHEDULE OF AMENDMENTS.

" " " " 34. After "Works" insert "or the Railway Commissioners"
" " " " 36. Omit "wire" insert "line or tunnel"
" " " " 38. After "Works" insert "or the Railway Commissioners"
" 6, " " " 1. After "Works" insert "or the Railway Commissioners"
" " " " 2. After "telephone" insert "line or tunnel"
" " " 8, " 11. After "Works" insert "the Railway Commissioners"
" " " " 21. After "Works" insert "the Railway Commissioners"
" " " 10, " 37. Omit "approbation" insert "approval"
" 11, " 31, " Omit clause 31.
" 12, " 37, " Omit clause 37.
" 14, " 45, 43, " 8. After "Saywell" insert "and the Secretary for Public Works on behalf of the Government, and the Municipal Council of West Botany (now the Municipal Council of Rockdale) respectively."

" " Insert the following new clauses to follow clause 45, 43 of the Bill :—
44. The power of purchase or resumption conferred upon the Secretary for Public Works on behalf of the Government and the Municipal Council of West Botany (now the Municipal Council of Rockdale) under or by virtue of the said Saywell's Tramway Act of 1884, and Saywell's Tramway Act Amendment Act shall extend to and be applicable to the works to be constructed by the said Thomas Saywell in pursuance of this Act. Power of Government or Municipal Council of Rockdale to purchase works.

45. The employment and use of electricity as the motive and propelling power on and in connection with the tramway shall be brought into operation within a period of three years from the passing of this Act otherwise all rights and privileges granted under this Act shall cease. Time limit for bringing electric power into operation.

LIST OF WITNESSES.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON

SAYWELL'S TRAMWAY AND ELECTRIC
LIGHTING BILL.

TUESDAY, 27 SEPTEMBER, 1898.

Present:—

MR. CANN,
MR. EWING,
MR. McLEAN,

MR. RIGG,
MR. MOORE,
MR. HAYES.

J. J. COHEN, ESQ., IN THE CHAIR.

Thomas Saywell called in, sworn, and examined:—

1. *Chairman.*] You are the Thomas Saywell referred to in the Saywell's Tramway Act, 1884? Yes.
2. And you are the petitioner for this Bill? Yes.
3. You desire, I understand, to change the method of traction of your tramway by substituting electricity for steam-power? Yes.
4. And you also desire to supply electricity for lighting and mechanical purposes if any of the residents adjacent to the tramway desire it? Yes.
5. How do you propose to supply the electricity? By overhead wires, similar to the method to be adopted by the Government in George-street.
6. Will the alteration in the mode of traction enable you to work your tramway more economically, or otherwise? I do not think there will be any saving.
7. What do you estimate will be the approximate cost of the necessary plant and alterations? I should think between £4,000 and £5,000.
8. Will there be any advantage to the public by the proposed alteration? Yes; I should say so.
9. In what way? By dispensing with smoke there will be greater cleanliness, and the traction will be easier, and in every way more suitable.
10. And as to speed? I do not expect to have any greater speed. At present the tramway runs at a speed of 6 or 7 miles an hour.
11. You are not seeking any exclusive rights for this tramway? Not at all.
12. Nor as regards electricity? Not at all.
13. *Mr. McLean.*] Have you had any communication with the municipal council of Rockdale with reference to the proposal? I have not, but Mr. Huntley has on my behalf.
14. Do you know whether a copy of the Bill has been forwarded to them? Yes, I think so.
15. *Chairman.*] You purpose using this power for lighting the streets for the municipality? Yes, if they require it.
16. And you only intend to do that within the municipal district of Rockdale, and you are applying for this power for a period of thirty-five years from the passing of this Bill? Yes.
17. How many years has your present term to run? It has already run fourteen years, and the term was originally twenty-five years.

T. Saywell.

27 Sept., 1898.

Thomas

Thomas Selwood Huntley called in, sworn, and examined :—

- T.S. Huntley. 18. *Chairman.*] You have been acting as agent for Mr. Saywell? I have.
 19. For how long? A few months, for this purpose.
 27 Sept., 1898. 20. Did you have any interview with the municipal council of Rockdale about this Bill? Yes; several interviews and correspondence.
 21. Have the municipal council of Rockdale had a copy of the Bill? Yes.
 22. Did they have a copy during the time of your discussion? Yes; they had a copy during the discussion.
 23. And before they wrote to you? Yes.
 24. Have you any communication from them that you can produce? Yes. After passing resolutions in favour of the application of Mr. Saywell they finally sent me this letter, with the corporate seal attached :—

Municipal District of Rockdale, Town Hall, Rockdale, 25 August, 1898.

Thomas Saywell, Esq., 16, York-street, Sydney,—
 Sir,

Referring to your request that the approval of the municipal council of Rockdale should be given to a Bill proposed to be submitted to the Parliament of New South Wales, "to further amend Saywell's Tramway Act of 1884 and Saywell's Tramway Act Amendment Act, and to authorise, enable, and empower Thomas Saywell to apply electricity as a motive and propelling power on and in connection with the said tramway, and to extend the authorities and powers conferred by the said Acts for a period of thirty-five years from the passing of the said Bill; and, further, to authorise, enable, and empower the said Thomas Saywell to generate and supply electric power for the purposes of the said tramway, and also to generate and supply electricity for any public or private purpose, for the purpose of lighting the streets and public and private places, houses, and premises situated in the municipal district of Rockdale, and to generate and supply electric power to persons and public and private bodies in the said municipal district, and to exercise all powers necessary for such purposes." I am directed by His Worship the Mayor (Alderman W. G. Judd) to intimate to you that at a meeting of the council, held on the 4th day of August, 1898, the following resolution was carried unanimously :—

Resolution referred to.—Saywell's Tramway Bill.

MR. T. S. HUNTLEY'S letter asking for council's approval to an extension of an additional term of twenty years to Saywell's Tramway Act.—It was resolved by Alderman Green, seconded by Alderman Small, and carried unanimously :—"That this council approve of the extension asked for, viz., twenty years, and that the Mayor be authorised to affix the corporate seal to the letter conveying such approval."

I have, &c.,
 GEORGE LEEDER,
 Council Clerk.

25. What is the meaning of the resolution approving of the extension of the term for twenty years? The unexpired term is really fifteen years, and the new Bill, if carried through, will confer powers for thirty-five years—that is, twenty years in addition to the unexpired period.
 26. *Mr. Moore.*] The council in their resolution do not touch the question of electricity? The first part of the letter is really the preamble of the Bill, and they approve of that.
 27. They simply say, "This council approves of the extension asked for, namely, twenty years"? The Bill was submitted to them.
 28. Seeing that the substitution of electricity would affect them to some extent, would you not think they would have expressed an opinion about it? All this was discussed very freely at the council for three nights, as to why the twenty years was asked for. The twenty years' extension was asked for to enable Mr. Saywell to recoup himself for the proposed extra expenditure of capital, and also partly to recoup himself for losses in the past. The council realise that Mr. Saywell fought a very uphill battle in running this tramway through the late depression which we have experienced, at a loss every day of his life, for years, and they say, "He is the largest ratepayer in the district; he has attracted more people to the municipal district of Rockdale than all the other ratepayers put together, and we ought to assist him, and we intend to assist him."
 29. *Mr. Ewing.*] The first point is as to the extension of time;—there is no reference to any alteration of route as far as the tramway is concerned? None whatever.
 30. The old tramway remains as it is, but with a different motive power? Quite so.
 31. With regard to the question of lighting: In Saywell's old Bill there is no reference to lighting, and therefore that becomes a matter for serious consideration? Yes; that is an additional power.
 32. *Mr. Rigg.*] You nullify the existing lease, and ask for another term, and as the Bill proposes to extend greater powers than the old one, it is therefore your starting-point for thirty-five years? Yes.
 33. *Mr. Moore.*] This Bill, then, will repeal the old one? No; clause 45 says :—

The several and respective rights, powers, and authorities given to, vested in, or conferred upon the said Thomas Saywell under or by virtue of Saywell's Tramway Act of 1884, Saywell's Tramway Act Amendment Act, and this Act shall continue and be in full force and effect for a period of thirty-five years from the passing of this Act.

That will remain unaltered. In this Bill the two additional matters are an extension of time and the change of motive power.

34. *Mr. Hayes.*] There is power in the original Act for the municipality or the Government to purchase—that is saved by this Bill? Yes; that power remains.
 35. *Mr. Ewing.*] Where did the framer of the Bill get the clause with regard to the reinstatement of streets;—I ask that question in view of possible complications with the municipal council? Perhaps it will shorten the whole matter if I say that this Bill, so far as the lighting-power is concerned, is a copy, almost verbatim, where suitable, of the City of Sydney Electric Lighting Act.
 36. When you use the term lighting, I presume you mean also all works incidental to lighting? Quite so; all that can be done by the electric current. All that part has been taken from the City of Sydney Electric Lighting Bill.
 37. The Bill places Mr. Saywell in the same position as that in which the City Council would be were they working under their own Act? Yes; with alterations to suit the locality. With regard to the municipal council, I am prepared to say that the Bill was absolutely and thoroughly understood by every member of the council and by the council as a whole, and that they knew when they were giving their approval to the proposed extension for twenty years that they were giving their consent to the electric lighting part, as well as to the electric traction and the extension of term.
 38. *Mr. Moore.*] Has the Bill, now before the Committee, been submitted to the municipal council of Rockdale? Yes.
 39. Have they expressed their approval of it as it now appears? They have.
 40. Do they suggest any alterations or make any suggestions? None whatever.

41. Then you are prepared to say the council are willing to accept this Bill as it is? I am. T.S. Huntley.
42. Everything in the old Bill as regards charges remains? Yes. 27 Sept., 1898.
43. Under the existing Act Mr. Saywell is empowered to make a charge for passengers not exceeding 3d. per head each way? Yes.
44. What charges have been actually imposed? Twopence each way or 3d. return.
45. *Mr. McLean.*] That is the charge at present? Yes.
46. Has it been in operation for some time? For ten years.
47. Have there been any complaints from the public with regard to these charges? None.
48. Are you in a position to say what have been the charges on goods? No goods have been carried over the line.
49. *Chairman.*] Apart from your charge of 2d., I believe you have some arrangement by which a passenger gets a through ticket to the terminus? Yes; there is an arrangement with the Railway Department by which, for 1s., you can get a ticket right through to the Beach, including a bath, and return to Sydney. This arrangement has been in operation for ten years, and has been a great boon to thousands of people.
50. What is the fare by the railway alone? Eightpence. So that they get a bath and return ticket to the Beach for 4d.
51. *Mr. Rigg.*] Is there any opposition so far as the public outside the council are concerned to the proposed Bill? Not the slightest.
52. You have heard of none? None whatever.
53. What about the charge for electricity, is provision made for safeguarding the public in that respect? No arrangement has been made. The proposal is that if anyone desires to be supplied with electricity, and Mr. Saywell has it to sell, it will be a matter for mutual contract; no consumer will pay more than he pays for gas, that is quite certain.
54. *Chairman.*] He would not take it otherwise? No.
55. *Mr. Rigg.*] It would be a protection to the public if there were some restriction with regard to the charge for electricity, as there is with regard to the passenger fares? Mr. Saywell is a business man, and he will put down a plant sufficient to deal with the necessities that may arise, and if he can see his way clear to sell electricity, and make a profit out of it, even at a price a good deal lower than that of gas, he will be very ready to do it.
56. But if it were provided that the price should not exceed a certain sum that would protect the interests of the public in that respect? There would be no objection I take it to the insertion of a clause in the Bill providing that in the event of electricity being purchased by anybody the price should not exceed the price for gas—that is, that the price should be equivalent.
57. *Mr. Moore.*] Is any provision made in the Bill with regard to gauge, levels, and so on? The gauge of the tramway is 4 ft. 8½ in., and it will remain so. It is connected with the Government line.

WEDNESDAY, 28 SEPTEMBER, 1898.

Present:—

MR. MOORE,		MR. RIGG,
MR. HAYES,		MR. McLEAN.

J. J. COHEN, ESQ., IN THE CHAIR.

Huch McLachlan called in, sworn, and examined:—

58. *Chairman.*] What are you? Secretary to the Railway Commissioners.
59. Have you seen the Bill that is under the consideration of this Committee? Yes. H. McLachlan.
60. In your opinion will there be any objection to its provisions as far as the Railway Commissioners are concerned, or are there any suggestions which you think they would like to make? I spoke to the Railway Commissioners about the Bill. Personally they have no objection to the proposed extension of time, or to the electric power as provided in the Bill. The only thing is, that they would like to have some safeguard that no interference will be made with the Rockdale Station in carrying out the new works. Of course, I know Mr. Saywell would only be too happy to assist us, still the Commissioners think it should be provided for. The Bill provides in the Preamble that the promoters shall have power to enter any public place which would practically included the railway-station, and there are certain precautions taken, but the Railway Commissioners are not specifically mentioned, and should like to be protected in this respect. 28 Sept., 1898.
61. *Mr. Hayes.*] Would it be sufficient to insert the words "subject to the approval of the Railway Commissioners"? A clause might be inserted providing that in the case of any work being undertaken which might interfere with the railway premises or approaches, it should not be commenced until plans and conditions had been submitted to, and approved by the Railway Commissioners. I think Mr. Saywell would be only too happy to agree to such a clause.
62. *Chairman.*] The proposed electric lighting would not interfere with you in any way? No.

William George Judd called in, sworn, and examined:—

63. *Chairman.*] You are Mayor of Rockdale? Yes. W. G. Judd.
64. Have you seen the proposed Bill to amend Saywell's Tramway Act? Yes. 28 Sept., 1898.
65. Has that Bill been before your council, and have you considered it? Yes.
66. Are there any objections to it on the part of your council? None whatever. The vote in its favour was unanimous.
67. In the letter written by the Town Clerk to the promoter of the Bill conveying the resolution of the council, reference is made only to the extension of time;—do you now say that the council are agreeable that the provisions of the Bill in all respects should be carried out? Yes; they are.
68. Including the provision with regard to the supply of electricity to private persons, and also if required to the Rockdale municipality, and the provision substituting electricity for steam as a motive power to the tramway? Yes.
69. *Mr. Moore.*] The resolution of the council was intended to give approval to the whole scheme? Yes. We had before us the old Bill and the new Bill. I was Mayor at the time the old Bill was put through. 70.

W. G. Judd. We thought it would be better for the borough that the traction should be by electricity instead of steam. The steam-tramway has been a boon, and this one will be a greater boon. We had two or three meetings to consider this matter and did not come to any rash conclusion. The vote was taken at the second or third meeting, and the matter was thoroughly thrashed out.

28 Sept., 1898.

70. *Mr. Hayes.*] In reference to electric lighting, as you know, there is now a very strong feeling in the direction of having such matters under the control of the municipality;—have you fully considered that aspect of the question? Yes.

71. You know you are practically admitting a rival competitor by the adoption of this part of the Bill? Yes; we saw that; but we do not think we should be in a position to compete with the electric light that Mr. Saywell would be able to put down, and the council do not consider that he would be a rival to the borough.

72. You are perfectly satisfied to leave this matter in the hands of Mr. Saywell? Yes.

73. Have you also considered the question of the charge for electric lighting;—would you require a clause in the Bill with regard to that? No; we did not consider that question. We thought that if the electric light were not cheaper than gas the public would not take it, and as the use of electric light is not compulsory, we did not consider that in this respect Mr. Saywell would be a rival to us. We knew the ratepayers would not take it unless it was cheaper than gas.

74. There is a very strong feeling both in the Legislative Assembly and outside on the question that the lighting in any municipality should be solely in the hands of the municipality. Therefore I want you to say whether you have considered this matter fully? Yes; the council talked the matter over. There are three municipalities in the electoral district of St. George, and if the place is to be lit by electricity, it must come from the Beach side. We are fully seized of that fact.

75. In that case, coming from the Beach side, it would be to some extent a rival? Well, we did not look at it in that way; that was not the opinion of the council.

76. This is a matter that will certainly be seriously considered in the Assembly, and I should like you to be very clear that you are satisfied that, as far as the municipality is concerned, there is no objection to these provisions in the Bill—you have stated that? Yes.

77. *Mr. Rigg.*] What is the indebtedness of the municipality? About £16,000.

78. What is the revenue? About £2,800—the general revenue.

79. What interest are you paying on the £16,000? We are paying, I think, 4 per cent.

80. That would be about £650. So that you would have about £2,000 to spend in ordinary improvements in the borough? Yes.

81. In the matter of electric lighting, a special Bill would be required on behalf of the council to carry it out? Yes.

82. And that would mean expense to the borough? Yes.

83. And would weigh with the council in not claiming the right to erect these electric-lighting works? I may state that as the council is at present constituted, I do not think they would attempt anything in the way of lighting the borough.

84. You mean owing to the personnel of the council, or owing to its financial condition? On account of its financial condition.

85. There being an indebtedness of £16,000 at the present time, the council, as at present constituted, would not care to involve the borough in any further liability? No; our desire is to reduce the indebtedness.

86. That is the principal reason for allowing a private individual to take up the work of electric lighting in the borough? Yes. In fact, we have looked upon Mr. Saywell as being a great boon to Rockdale.

87. Has there been any objection on the part of the public to the proposed electric lighting? No.

88. You have heard of none? None whatever; and if there was any objection I should hear of it.

89. *Mr. Moore.*] Did your council consider the question of the extension of time to a period of thirty-five years? Yes; that was the cause of the adjournment from the first meeting. The aldermen were not then all present, and though I was very sorry to send Mr. Huntley back after he had come out that evening; still I thought it would not be fair to deal with the matter when some of the aldermen were absent. We thoroughly discussed the question of the extension of time.

90. And you came to the conclusion that the time asked for—thirty-five years from the passing of this Bill—would be a fair thing? Yes.

91. *Mr. McLean.*] Have you any reason to believe that there will be large settlement and growth of population towards Lady Robinson's Beach within the next few years? Yes; I think so; in fact the population is now increasing.

92. And you think the traffic on the tramway will become very much heavier? There will be more regular traffic; I do not know that it will be heavier. At present large numbers of pleasure-seekers use the tramway at holiday time, but I think there is a prospect of a more regular traffic from residents at the Beach.

93. Do you consider the extension of time a reasonable one in view of the possible growth of traffic? Yes; I think it is reasonable. Of course we looked at the matter from that standpoint. We knew the tramway did not pay Mr. Saywell. We were quite satisfied about that. Had it been in the hands of a private company, the company would have been liquidated years ago, and the tramway pulled up, and the people would have suffered. Mr. Saywell has an interest down there no doubt; but we thought the time he was asking for was not too much.

94. *Mr. Moore.*] I understand from an answer you gave just now to Mr. McLean, that your council, in considering the question of extension of time took into consideration not only the capital that would now be sunk in this work; but also the fact that for years the old tramway has been worked at a loss? Yes; and it has been a boon to the people.

95. Have you any idea how long it has been worked at a loss? I think from the very start, in 1834.

96. So that really the public have had all the benefit from the tramway? There is no doubt about that.

97. And you have taken that fact into consideration in agreeing to the extension of time asked for? Yes; the ratepayers look upon it in the light that it has been a boon to their district. It has in fact opened up what was formerly a desert, and what is now a beautiful place.

98. *Mr. Rigg.*] The tramway being run at a loss, do you think if it were discontinued, that would retard the progress of the district? Yes, very much; because numbers of our own ratepayers visit the Beach every afternoon at this time of year.

- 99. And it is in the interests of the public to keep the tramway going? Yes.
- 100. *Mr. Moore.*] Have the public been well served, and have they been satisfied? Yes; I have never heard a complaint; in fact, when we have made any suggestion through the council to Mr. Saywell that the tram might run up to meet a certain train, for instance, it has been carried out immediately.
- 101. *Chairman.*] There is a provision enabling the tramway to be taken over by the municipal council;—has the council had under consideration the question whether they would desire to have the same right to purchase the electric-lighting plant? No; the question of the right to purchase the electric-lighting plant was not considered.
- 102. Can you offer any opinion about it yourself, without, of course, in any way committing the council? Personally I do not think we would be in a position to undertake such a work. You see we have a heavy indebtedness.
- 103. You are not in a position even now to take over the tramway, still power is reserved to enable the council to do so;—do you think a like power should be reserved to you to take over the electric-lighting plant? I think it would perhaps be as well to have that power.
- 104. *Mr. McLean.*] You think it would be in the public interest to have the power to resume? Yes; I think it would be advisable.
- 105. *Chairman.*] Does the tramway meet all trains? Yes; from 7 o'clock in the morning until 10 at night on four days in the week and until 11 o'clock on two days, and on Sunday it meets all trains.

W. G. Judd.
28 Sept., 1898.

Philip Billingsley Walker, C.E., M. Inst. Civil Engineers, England, called in, sworn, and examined:—

- 106. *Chairman.*] What are you? Chief Electrician and Engineer-in-Chief, Postal and Telegraph Department, also M. Institute Civil Engineers, England.
- 107. Has this Bill, proposing to extend the time under the Saywell Tramway Act, and to allow the promoter to use electric traction, been brought under your notice? Yes.
- 108. In your opinion, will it in any way affect any of the arrangements of the Electrical Department? Clause 4 provides that "the said Thomas Saywell may open and break up the soil and pavement of any street, and open and break up any sewers, drains, or tunnels within or under such streets." The words "or tunnels" should be struck out, because the Postmaster-General may construct tunnels in this district, and it would never do to allow those tunnels to be cut open. If the words "or tunnels" were struck out, there would be no objection to the clause, and I do not think they are necessary.
- 109. If a clause were inserted in the Bill something to this effect "that no tunnels of the Postal and Telegraph Department shall be interfered with, unless the sanction of the Department be first obtained";—would not that meet everything? Yes; that would meet the case.
- 110. Have you any other suggestion? Clause 5 says, that Mr. Saywell may alter the position of any "pipes, wires, sewers, drains, or tunnels." The same objection occurs there, and the word "wires" should be omitted, because there are no wires in the district except the wires of the Postmaster-General.
- 111. Then you think there should be a similar provision in regard to wires as that which you have suggested in the case of tunnels? Yes; there is a provision in clause 7 for the protection of telegraph and telephone lines and other public works, but I do not think that quite meets the case, and it would be better to insert a clause such as that indicated. Those are the only two points in the Bill where it appears to me any alteration is required so far as the Postmaster-General is concerned.
- 112. Do you think any injury is likely to result from the construction of these works to any of your works? That would, of course, depend upon the method of construction. If brought into contact with any of our works serious damage might result, but if properly constructed, and with due precaution, no damage need arise.
- 113. *Mr. Hayes.*] Do you not think that a slight alteration to clause 7 would cover the two points you have mentioned? Yes; but I do not consider clause 7 is sufficient as it stands.
- 114. An alteration in clause 7 would cover the objections you have raised? I think so. Otherwise the Bill appears to me to be in no way objectionable so far as the Department is concerned.
- 115. *Mr. McLean.*] The Department has no objection to the granting of these powers with regard to electric lighting and the supply of electric power? No.
- 116. It has no intention of exercising those powers itself, so far as you are aware at present? So far as we are concerned, I am not aware of any intention to do so. But it is a matter for the Postmaster-General to decide.
- 117. Still it is not a matter that is being done by the Department at the present time? Not at present, except for our own purposes.

Philip Billingsley Walker.
28 Sept., 1898.

Thomas Selwood Huntley recalled and further examined:—

- 118. *Chairman.*] Have you a site for your electric-lighting plant? Mr. Saywell has any quantity of spare land there, but he has not actually fixed upon a site yet. He has land available for a site.
- 119. How long after the Bill was passed do you think you would have your works erected and the plant in working order? That would, necessarily, take some time, because in the first place Mr. Saywell would like to get his plant on the very best terms he could.
- 120. About how long—without binding you down to a month or two? It would not take, perhaps, more than a year to complete the whole thing.
- 121. Would two years be a reasonable time? I think three years.
- 122. Would you be prepared to have a clause inserted in the Bill providing that in three years from the date of the passing of the Act you should start the electric traction? Yes; I should think the works would be completed within three years. There would be no objection to a clause to that effect being inserted in the Bill.
- 123. *Mr. Rigg.*] You say that no particular spot has been fixed upon for the site? There is nothing absolutely fixed.
- 124. Is it likely to go on to the beach? Yes.
- 125. Would there be any crossings or anything of the kind that would involve any danger to the public? None whatever.
- 126. No provision is made for gatekeepers; I suppose there would be no necessity for anything of the kind? None whatever.

T. S. Huntley.
28 Sept., 1898.

TUESDAY, 4 OCTOBER, 1898.

Present:—

MR. EWING,
MR. MOORE,MR. RIGG,
MR. WADDELL.

J. J. COHEN, Esq., IN THE CHAIR.

Thomas Selwood Huntley recalled and further examined:—

T. S. Huntley. 127. *Chairman.*] You wish to correct your answer to Question 124—"Is it likely to go on to the beach?"
 Yes.
 4 Oct., 1898. 128. What answer do you wish to give to that question? There is no intention to extend the tramline beyond its present terminus, at the intersection of Bay-street with the Grand Parade.

1898.
(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

REPORT FROM THE SELECT COMMITTEE
ON THE
CITY AND NORTH SYDNEY CONNECTION BILL ;
TOGETHER WITH THE
PROCEEDINGS OF THE COMMITTEE
AND
MINUTES OF EVIDENCE.

ORDERED BY THE LEGISLATIVE ASSEMBLY TO BE PRINTED,
7 October, 1898, a.m.

SYDNEY: WILLIAM APPLIGATE GULLICK, GOVERNMENT PRINTER.

1898.

1898.

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.

VOTES No. 15. TUESDAY, 20 SEPTEMBER, 1898.

4. CITY AND NORTH SYDNEY CONNECTION BILL (*Formal Motion*):—Mr. McLean moved, pursuant to Notice,—
- (1.) That the City and North Sydney Connection Bill be referred to a Select Committee for consideration and report.
- (2.) That such Committee consist of Mr. Austin Chapman, Mr. Young, Mr. Dick, Mr. Howarth, Mr. Kidd, Mr. E. M. Clark, Mr. O'Connor, Mr. Watson, Mr. Sleath, and the Mover.
- (3.) That the Reports, Minutes of Proceedings, and Evidence of previous Select Committees on the subject of connecting Sydney with North Sydney by bridge, tunnel, or tunnel railway, be referred to such Committee.
- Question put and passed.

VOTES No. 23. THURSDAY, 6 OCTOBER, 1898.

7. CITY AND NORTH SYDNEY CONNECTION BILL:—Mr. McLean, as Chairman, brought up the Report from, and laid upon the Table the Minutes of Proceedings of, and Evidence taken before the Select Committee for whose consideration and Report this Bill was referred on 20th September, 1898, together with a copy of the Bill as amended and agreed to by the Committee.
- Ordered to be printed.

(SECOND SESSION.)

CITY AND NORTH SYDNEY CONNECTION BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report was referred, on 20th September, 1898, the "*City and North Sydney Connection Bill*," and to whom was referred, on the same date, "*the Reports, Minutes of Proceedings, and Evidence of previous Select Committees, on the subject of connecting Sydney with North Sydney by bridge, tunnel, or tunnel-railway*,"—beg to report to your Honorable House:—

That they have examined the witnesses named in the List* (whose evidence will be found appended hereto), and considered the Reports and Evidence referred; and that the Preamble having been satisfactorily proved to your Committee, they proceeded to consider the Bill, in which it was deemed necessary to make certain amendments.

Your Committee now beg to lay before your Honorable House the Bill as amended by them.

F. E. McLEAN,
Chairman.

No. 1 Committee Room,
Legislative Assembly,
6th October, 1898.

PROCEEDINGS OF THE COMMITTEE.

TUESDAY, 22 SEPTEMBER, 1898.

MEMBER PRESENT:—

Mr. McLean.

In the absence of a Quorum, the meeting called for this day lapsed.

TUESDAY, 27 SEPTEMBER, 1898.

MEMBERS PRESENT:—

Mr. Howarth,		Mr. McLean,
Mr. Sleath,		Mr. Watson.

Mr. McLean called to the Chair.

Entry from Votes and Proceedings, appointing the Committee, and referring Report, Minutes of Proceedings, and Evidence of previous Select Committees, on the subject of connecting Sydney with North Sydney by bridge, tunnel, or tunnel-railway, read by the Clerk.

Printed copies of the Bill referred, together with original Petition to introduce same, and copies of the papers referred, before the Committee.

Present:—E. E. Fosbery, Esq. (*Solicitor for the Bill*).

John Sulman (*the Promotor*) sworn and examined.

Witness *produced* plans showing the routes of the proposed tunnels.

Ordered,—That the Engineer-in-Chief for Railway Construction and the Secretary to the Railway Commissioners be summoned to give evidence next meeting.

[Adjourned till Thursday next at *Two* o'clock.]

THURSDAY, 29 SEPTEMBER, 1898.

MEMBERS PRESENT:—

Mr. McLean in the Chair.

Mr. E. M. Clark,		Mr. Howarth,
Mr. O'Connor,		Mr. Sleath,
		Mr. Watson.

Present:—E. E. Fosbery, Esq. (*Solicitor for the Bill*).

Eustace Edmund Fosbery sworn and examined.

Henry Deane (*Engineer-in-Chief, Railway Construction Branch, Public Works Department*) called in, sworn, and examined.

Witness withdrew.

[Adjourned till Tuesday next at *Two* o'clock.]

TUESDAY, 4 OCTOBER, 1898.

MEMBERS PRESENT:—

Mr. McLean in the Chair.

Mr. Howarth,		Mr. Watson.
--------------	--	-------------

Present:—E. E. Fosbery, Esq. (*Solicitor for the Bill*).

Hugh McLachlan (*Secretary to the Railway Commissioners*) called in, sworn, and examined.

Witness withdrew.

John Sulman recalled and further examined.

Eustace Edmund Fosbery recalled and further examined.

John Sulman recalled and further examined.

[Adjourned till Thursday next at a *Quarter to Two* o'clock.]

THURSDAY, 6 OCTOBER, 1898.

MEMBERS PRESENT:—

Mr. McLean in the Chair.

Mr. Howarth		Mr. Kidd,
		Mr. Watson.

Present:—E. E. Fosbery, Esq. (*Solicitor for the Bill*).

Room cleared.

Preamble considered.

Question,—“That this Preamble stand part of the Bill,”—put and passed.

Solicitor called in.

Clauses 1 and 2 read and agreed to.

Clause

Clause 3 read, amended,* and agreed to.
 Clause 4 read, amended,* and agreed to.
 Clauses 5, 6, and 7 read and agreed to.
 Clause 8 read, amended,* and agreed to.
 Clauses 9 to 22 read and agreed to.
 Clause 23 read, amended,* and agreed to.
 Clauses 24 to 48 read and agreed to.
 Clause 49 read, amended,* and agreed to.
 Clause 50 read, amended,* and agreed to.
 Clauses 51 to 53 read and agreed to.
 Schedule read and agreed to.
 Title read and agreed to.
 Chairman to report the Bill with amendments to the House.

SCHEDULE OF AMENDMENTS.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

CITY AND NORTH SYDNEY CONNECTION BILL.

TUESDAY, 27 SEPTEMBER, 1898.

Present:—

MR. HOWARTH,

MR. WATSON.

MR. SLEATH,

FRANCIS EDWARD MCLEAN, Esq., IN THE CHAIR.

Eustace Edmund Fosbery, Esq., appeared as Solicitor for the Bill.

John Sulman, architect, sworn and examined:—

1. *Chairman.*] Where are you carrying on your profession? Wynyard-street, Sydney.
2. You are the petitioner with reference to this Bill, known as the City and North Sydney Connection Bill? Yes.
3. You previously petitioned Parliament for their sanction to construct two tunnels, under two separate Bills? I did.
4. Will you explain to the Committee the purport of this present Bill, and the object of asking for the one Bill to be passed instead of the two, as formerly? I have asked for one Bill to be passed instead of two Bills, because, in the Committees of the previous Parliament, objection was raised that if two Bills were passed, one of the works might be proceeded with and the other not. I made a verbal promise to the Committee that I would regard the two Bills as inseparable, and to make them inseparable they are now put into one Bill.
5. Perhaps you would like to make a general statement of your proposals? Yes, I would. I now hand in plans of the proposed works, which are fully described in the statement I am about to read.

J. Sulman.
27 Sept., 1898.

In the first Session of the last Parliament I applied for a Bill to enable me to construct an underground electric railway to carry passengers between the city and North Sydney; and in the second Session of the same Parliament I applied for a further Bill to construct a tunnel roadway, for vehicular traffic, between Circular Quay and Milson's Point.

The Electric Railway Bill reached its second reading, which was passed by a large majority, and referred to Committee; but, owing to pressure of legislative business, no further progress was made.

Last year I was in England for several months, and took the opportunity of carefully examining all the electric underground railways and modern subaqueous tunnels constructed or constructing. These comprised the City and Stockwell electric line, which has been running for several years, and the City and Waterloo electric line (just opened), both passing under the Thames; the Central London electric line, 6 miles in length, from the Mansion House to Shepherd's Bush, which is being pushed forward with great energy, and is expected to have a traffic of 60,000,000 annually; the Mersey railway tunnel, at Liverpool, and the Glasgow underground circular line, which twice passes under the Clyde. I also carefully examined the celebrated Blackwall Tunnel, the finest subaqueous tunnel yet constructed for vehicular traffic.

The experience thus gained, and consultation with the engineers of the various works, has confirmed the opinion previously formed that the only practicable and possible means of connecting the city and North Sydney, with a due regard to economy and efficiency, is by tunnel.

I have, therefore, applied to this Parliament for permission to construct the same tunnels as I did to the last; but, to fulfil a promise made to the Select Committee before which I had the honor to appear, the two Bills have been recast into one. To meet another objection I have inserted a clause in the Bill that the electric railway tunnel shall be not less than 12 feet in diameter, instead of that it shall not exceed 12 feet 6 inches.

With these exceptions the schemes are the same as those proposed to the last Parliament.

The

J. Sulman.

27 Sept., 1893.

The description of the electric railway and tunnel is as follows :—

It will commence at Milson's Point, about 85 feet below high-water level, and just under the railway station; thence it will run in a straight line through the bed of the harbour to Dawes Point, pass under the Government property bordering Circular Quay, and thence under Pitt-street to its intersection with King-street, a total distance of 1 mile and 26 chains.

There will be stations at the termini and at Circular Quay.

The gradients will not exceed 1 in 60, and at no point will the roof of the tunnel approach nearer than 35 feet of the surface. It will thus be well below all sewers or basements, and being in solid rock, no surface disturbance will be caused.

At first only one tunnel will be constructed, but as soon as the traffic warrants it a second alongside the first will be provided. In each case they will be not less than 12 feet internal diameter. In the rock they will be excavated in the ordinary way, and lined with concrete; but under the harbour, shields with air-locks will be used, and the tunnel formed of cast-iron segments, lined inside with concrete, and the slight space of about an inch left outside by the shield will be filled up solid with cement grout. The iron will thus be protected and rendered indestructible. This is the method adopted in constructing modern subaqueous tunnels, and was brought to perfection by the late Mr. J. H. Greathead, the eminent engineer, who was employed in all the English works, and prepared the plans for those I am now proposing.

The stations are the same size as in the London examples, which are calculated for a very much larger traffic. They will be lined with glazed tiles and brilliantly lighted by electricity, and access thereto provided by staircases and large lifts, each carrying 120 passengers. There will be two lifts at each terminus and one at Circular Quay station.

It is intended to have a continuous service of trains leaving each terminus every five minutes during the day, and every fifteen minutes between midnight and 6 a.m. The time required to convey passengers from Milson's Point to the City terminus at King-street will be only four minutes, and without the inconvenience of changing *en route* as at present. The motive-power proposed to be used is electricity, thus avoiding the smoke and dirt of the ordinary tunnel where steam traction is used. The carriages will be similar in some respects to those on the suburban lines, and trains will be made up of four or more carriages, the length of each carriage being 45 feet, and the width 8 ft. 6 in., accommodating sixty passengers in each. They will have three side-doors for ingress and egress, and a passage from end to end, and will be brilliantly lighted by incandescent electric lamps. The gauge of the line will be the standard size, 4 ft. 8½ in., with rails 60 lb. to the yard. The electric conductor, from which each train takes the current sent out from the generating station, is to be mounted on the sleepers between the line rails. Glass insulators fixed to alternate sleepers will be employed to support it.

As to the fares to be charged, in the Bill itself, clause 25, it is stipulated that the fare for each section, viz., from Pitt-street to Circular Quay, and Circular Quay to Milson's Point, shall not exceed 1d.; and if it is possible to run the traffic at a lower rate, there is no doubt even this moderate charge would be reduced.

To conserve the rights of the general public, power is given to the Government to resume the undertaking in thirty years at cost price, with an amount added equal to three years' net profits calculated on the average of the two preceding years, the latter being compensation for forced sale.

The provision for vehicular traffic is by an entirely separate tunnel roadway of 25 feet internal diameter (the same as that at Blackwall), starting from Circular Quay, near Mott's wool store, passing thence under Phillip-street, Albert-street, Macquarie-street, and by a curve under Government House grounds to Macquarie Point, where the harbour is tunnelled in a straight line to Baulak-street, on the opposite side. Thence a curve is made to the left, and passing under the tram-lines at Milson's Point, the tunnel debouches close to the railway station-yard gates. The whole length is 1 mile 19 chains.

The construction will be the same as for the railway tunnels, but the grades will be 1 in 32 on the Sydney side, and 1 in 27 on the North Shore section. These are extremely easy, and would permit of the heaviest traffic.

As Alfred-street, on the North Shore side, is in parts very steep, I propose to make a new road from the mouth of the tunnel, curving round the slopes of the high ground facing Lavender Bay till it reaches the intersection of Junction and Alfred streets. Its grade will be 1 in 25 against 1 in 14 at present ascended in Alfred-street.

The roadway in the tunnel is to be 21 feet in width, thus permitting of three lines of traffic. The clear height in the centre is 19 feet, and at the sides 16 feet. The road-bed will be formed of concrete, covered with close-jointed wooden blocks, similar to those now being laid in the streets of the city, and it will be kept clean by hydrants placed at frequent intervals. The waste water will be carried off by drains under the roadway to a sump at the bottom level, whence it will be pumped up by a compressed air or electric motor, and discharged into the sewers. Under the roadway a large tunnel will be formed for pipes, drains, electric lighting, telegraph and telephone wires, gas, water, and compressed-air mains, &c., accessible at frequent intervals by ventilated manholes in the roadway, thus obviating any interference with the wood-blocking, and enabling the roadway to be kept permanently open for traffic. The tunnel will be kept continuously lit by three lines of electric lamps, at frequent intervals. The light would be the same as at Blackwall, which enables a newspaper to be read at any part. The most thorough ventilation will also be secured by a shaft 15 feet in diameter on each side of the harbour, which, after being used in construction as a working shaft, will be retained for ventilation.

The tolls are expressly limited in the Act to somewhat less than those now charged by the North Shore Ferry Company; but as the traffic increases it will be to the interest of the company which constructs and owns the tunnel to reduce these tolls as low as possible, and so still further encourage the traffic, and render competition impossible. The same conditions as to resummptions apply as in the electric railway.

In conclusion, may I be permitted to summarise the advantages I claim for the electric railway and tunnel-roadway schemes?

1. Neither interferes with public or private rights or vested interests to any appreciable extent, and less so than any other scheme.
2. There is no monopoly of site, as in other modes of surface communication, for fifty tunnels can, if required, be run under the harbour.
3. There is absolutely no interference with the very important shipping interests of the Port.
4. Accident to the structure of the tunnels is a practical impossibility.
5. The electric railway serves all kinds of passenger traffic—rail, tram, and road—and not a section only.
6. It is more speedy by nearly fifteen minutes than any other mode.
7. It does not compete with the Government railway and tramway services, and, in fact, will feed them, and make non-paying into paying lines.
8. It delivers passengers at Circular Quay and King-street, in the heart of the city.
9. It can be built in two years.
10. The tunnel-roadway connects the two foreshores at water-level at the most central points for traffic, viz., Circular Quay and Milson's Point.
11. The foreshores on both sides will eventually be thickly packed with warehouses and wharfs, to which a tunnel would give the easiest access.
12. In Lavender Bay there is much Government foreshore, which would be greatly improved in value for warehouse and wharfage purposes by the tunnel-roadway, which debouches right on this position.
13. The new road will relieve Alfred-street of vehicular traffic, and thus assist the running of the trams by removing obstructions.
14. The cost of both tunnels will be much below that of a suitable bridge. The cost to the country, if resumed by the Government, will, therefore, be less.
15. The tunnels are practically indestructible, as there is no corrosion, and hence cost of maintenance is low.
16. If resumed by Government they would not have appreciably deteriorated.
17. The whole of the expenditure for tunnels would be in the Colony, except for electric plant; consequently, the employment given would be large, viz., about 1,000 men for two years on both tunnels, and 500 men on the tunnel-roadway for a third year, besides men employed indirectly in brickmaking, &c.
18. It is the only proposal which deals comprehensively with the whole of the traffic of the northern side of the harbour down to the water's edge, both passenger and vehicular, and for passengers it is the only scheme that expedites their transit to any appreciable extent.

6. Mr. Watson.] I notice that clause 49 provides that: "It shall be lawful for the Governor, at any time after the expiration of thirty years from the bringing into use of the railway and tunnel-roadway, or from the bringing into use of the last of them, in case they shall not be simultaneously brought into use, to give

give to the said John Sulman notice of the intention of the Crown to purchase the railway and tunnel-roadway," &c.;—does not that period seem rather long? We have gone into the matter very carefully, and we could not do it for less than that, for the simple reason that for several years the undertaking will not pay. There will be a very large capital outlay, and we shall have to fight the existing means of transit, and even at the very best—if we got the whole of the traffic—it cannot pay for several years. We are looking to the inevitable increase of later years to recoup us for the loss of the earlier years, and it will take at least thirty years to give a fair average return on the investment.

J. Sulman.
27 Sept., 1898.

7. But it would seem that that provision would allow the matter to rest with you as to when the thirty-year period should commence? Clause 22 provides: "If the railway is not completed and brought into use within five years from the passing of this Act as to at least one tunnel thereof, and if the tunnel-roadway is not completed and brought into use within five years from the passing of this Act, then it shall be lawful for the Governor to impose on the said John Sulman a fine or forfeit at a rate not exceeding £500 per month until such time (not exceeding seven years from the passing of this Act) as the railway and tunnel-roadway shall be so completed and brought into use; and if, on the expiration of the said period of seven years, the same shall not be so completed and brought into use, then on the expiration of the said period of seven years the rights hereby conferred shall cease." That definitely determines the period during which construction is to be possible. Of course, if the Bill be passed, the sooner the works can be brought into use the sooner revenue will be earned.

8. As regards the charges, I notice that the charges for vehicles are in some instances slightly under those at present charged by the North Shore Ferry Company;—can you particularise, where the present charges are more, for I notice one or two instances where they seem about the same? In several instances they are the same, but in other instances they are less. The Ferry Company charges extra for heavily-loaded vans. We do not do that.

9. Your schedule says: "For every light buggy, and for every cart, dray, van, cab, or other two-wheeled vehicle similar to any of these, drawn by one horse or other animal, 6d."? I think the charges are the same, except where the charge is more for heavy weight in the case of the North Shore Ferry Company. The charge is the same for light vehicles, but it is in regard to heavily-loaded vans, &c., carrying produce that we give the advantage.

10. As to the amount to be paid in case of purchase by the Government, clause 49 provides: "And the amount of compensation to be paid to the said John Sulman upon such purchase by the Crown shall be the amount of the actual *bonâ fide* cost of acquisition, purchase, and construction, of the said property and premises, with an amount added equal to three years' net profits on the working of the whole undertaking, calculated on an average of the last two preceding years";—would there be any objection to specifying that the amount of compensation shall "not exceed" the amount of the actual *bonâ fide* cost, instead of "shall be"; this would practically mean that the amount would have to be determined, as in the case of an ordinary resumption, with the limitation, of course, that it was not to exceed the actual cost; there might be some deterioration in the course of thirty years? There is one point you might consider. Supposing that the profits of the undertaking are large, it will be a very profitable thing for the Government to take it over at cost price, and, therefore, the owners would be quite justified in asking for the three years' profits. Supposing that the profits are very small—that the undertaking is giving only a very small return—then the three years' profits would be a very small amount for the Government to pay. I think it is only a fair resumption price for the Government to pay when taking over the works at cost price.

11. But this aspect of the matter may be thought over by yourself; it may become desirable, from the standpoint of public policy, for the Government to resume this work, so that it shall not compete with some project the Government may have in hand, and it, perhaps, would be worth more to the Government taking it over than to the company carrying it on; although it may have deteriorated as an actual work, it may be to the Government's advantage to take it rather than put in a tunnel of their own, and, in that case, it seems to me that laying it down that the price to be paid by the Government shall "not exceed" the cost, would leave it open to have a fair value placed upon it, together with a certain amount as representing the three years' profit? I think on the whole that the clause ought to stand as it is; but I should like to consider the point, the question being rather too important a one for me to answer offhand.

12. *Mr. Sleath.*] How long do you think the rolling-stock, rails, &c., are likely to last? The life in the tunnel would be very much longer than on the surface; and it would depend upon the amount of traffic. It is difficult for me to answer the question; but I may say that the rails would have to be continually renewed if they needed it. The traffic could not be conducted without that being done.

13. The promoters of the Bill surely have some idea as to how long they expect the rails and rolling-stock to last? The whole thing, as to construction, will be under the supervision of Government officers, and the Railway Commissioners have to be satisfied as to the condition of the rolling-stock.

14. *Mr. Howarth.*] Could you reduce the time of five years for construction? We hope to get one work done in two years and the other in three years. We should have to forfeit if we did not complete the construction within a specified period.

15. I admit it is to your interest to complete the work as soon as possible, because you cannot afford to allow your capital to lie idle? There might be unforeseen contingencies. In the Blackwall Tunnel, near London, they had a serious difficulty. The water nearly got in, and if it had got in it would have meant a year's delay at least. It is in view of unforeseen contingencies that the period provided for in this Bill has been fixed as it is.

THURSDAY, 29 SEPTEMBER, 1898.

Present:—

MR. E. M. CLARK,		MR. O'CONNOR,
MR. HOWARTH,		MR. SLEATH,
	MR. WATSON.	

FRANCIS EDWARD McLEAN, Esq., IN THE CHAIR.

Eustace Edmund Fosbery, Esq., appeared as Solicitor for the Bill.

Eustace Edmund Fosbery, Solicitor, sworn and examined:—

E. E. Fosbery. 16. *Chairman.*] You are the solicitor for this Bill, authorising Mr. Sulman to construct a railway and a tunnel-roadway? Yes.

29 Sept., 1898. 17. Have you given the necessary notices to the Government and the local authorities? I have sent notices to the Crown Solicitor, the Secretary of the Water and Sewerage Board, the Engineer-in-Chief for Harbours and Rivers, the Town Clerk of Sydney, the Council Clerk at North Sydney, the Minister for Works, the Telegraph Department, the Engineer-in-Chief for Public Works, and the Engineer-in-Chief for Railway Construction. They were all delivered between the 22nd and the 25th August, 1898. I have had acknowledgments from the Council Clerk at North Sydney, the Town Clerk of Sydney, and the Telegraph Department. I also heard from Mr. Deane, the Engineer-in-Chief for Railway Construction, and I have discussed with him various portions of the Bill. So far, I have not heard from any of the other persons to whom the Bill was sent. In the letter that I wrote to those various officials I stated that I enclosed a copy of the Bill, and said that I would be glad to have their views on it generally.

18. You were the solicitor for two former Bills introduced to enable Mr. Sulman to construct tunnels under the harbour? Yes.

19. Would you explain to the Committee the difference between the Bills formerly introduced and the Bill you are now seeking to pass? The Bill we now seek to pass is an amalgamation of the two previous Bills, with some variations, chiefly in matters of detail.

20. *Mr. Watson.*] There is no variation of any importance with the exception of putting the two Bills into one Bill? There are alterations.

21. Will you point out any that may be of importance? So as to meet the objection caused by a recent case in the Courts, I have given power to Mr. Sulman to use explosives in the tunnelling, subject to the reasonable restrictions of the Works Department. I have varied the application of those sections of the Public Works Act of 1888 which are to be engrafted on this Bill, so as to improve the measure. In the original Bills there was a provision that Mr. Sulman should give notice within six months after the passing of the Act, of any land required for the purpose of the works. In this Bill I have altered the time to twelve months. That is more in accordance with what will be the requirement. I have made some slight alterations in the clause with regard to the power of deviating laterally. I have altered the clause for the protection of the Water and Sewerage Board, adding, at their request, a provision for their protection. It is a provision to enable them to take water-pipes through the tunnel. I have extended the clause with regard to the persons who are to have power to supervise the works during their progress—that is, clause 21 of the present Bill. The clauses with regard to limit of time and to deposit have been altered. The clauses with regard to tolls for passengers have been altered slightly. The power to make by-laws has been somewhat extended; also the clause with regard to publication and evidence of by-laws, and the mode in which they are to be made binding. I have also altered the Bill as to the mode in which penalties are to be recovered (making the Bill much shorter and more concise) by providing that penalties shall be recoverable in accordance with the provisions of the Justices Act; these alterations also touch the matter of appeal. I have made the time when the right of resumption by the Crown arises the same for both works, namely, thirty years. I have added to the end of sub-clause 1 of clause 50, a provision giving the assignee company similar powers of assignment. That, probably, would have been implied under the previous measure. In clause 52 the last proviso has been added. It will, of course, necessarily be found that clause 3, with regard to power to construct the works, has alterations and variations in it, because it practically had to be entirely re-cast. I have also altered and extended the provision with regard to tolls on the tunnel-roadway, and have added a provision that police, soldiers, sailors, members of fire brigades, and post and telegraph servants shall be allowed free passage. I have added a provision which was omitted from the other Bill, and should have been inserted, that Mr. Sulman is not to be liable for any damages arising from the unavoidable temporary blocking of the railway or the tunnel-roadway when it is in operation.

22. *Chairman.*] Generally speaking, the Bill is an amalgamation of the other Bills? Yes, except with regard to the above and to such matters as would occur to a draftsman who consolidated the two Bills into one measure.

23. *Mr. E. M. Clark.*] Has any arrangement been made in the Bill as to which of these tunnels shall take precedence in construction; that was a matter that came before the House on the last occasion? No; but one is made dependent on the other. If you are referring to the same thing I am referring to, I remember that there was a discussion in the House, and it was proposed to put in the previous Bill a provision that one work should be actually dependent on the other.

24. It was proposed, I think, that the tunnel-roadway should take precedence by being the first work constructed? If that is so, there is no such provision in the present Bill. There is a provision in the Bill, namely, clause 22, which makes one work absolutely dependent on the other.

25. *Mr. Watson.*] The rights cease unless both works are completed within seven years? Yes.

Henry Deane, Engineer-in-Chief, Railway Construction Branch, Department of Public Works, sworn and examined:—

H. Deane. 26. *Chairman.*] Have you seen this Bill—the City and North Sydney Connection Bill? Yes.

29 Sept., 1898. 27. Do you wish to make any observations, for the guidance of the Committee, as to your attitude in regard to the Bill? I submitted to the Minister a recommendation that a paragraph should be inserted before

before the last paragraph in clause 3, requiring that before construction of the works plans should be submitted to the Minister for Public Works for approval, both as to design and location. I think there can be no objection to that on the part of the promoters of the Bill. On the other hand, it seems to me a very necessary provision, especially as the northern end of the railway tunnel is to be under Government property at Milson's Point—in fact, under the Railway Commissioners' property. H. Deane.
29 Sept., 1898.

28. Apart from that, have you any further amendments that you would suggest in the Bill for the protection of the public or the Government interests? I have nothing to remark. It appeared to me, so far as I could discover from a perusal of the Bill, that it sufficiently provided for the public safety.

29. *Mr. E. M. Clark.*] You have no objection, I suppose, to the proposal to have lifts to a great height at either end of the tunnel? No; that is a recognised construction.

30. I suppose you have not had any report from Mr. Fischer, who gave evidence before a former Committee in favour of a graded tunnel in preference to a tunnel provided with lifts? Mr. Fischer, before the Committee referred to, gave evidence on a scheme of my own, I think, which I had submitted to the Committee.

31. That was evidence given before a Committee of the House? Yes; and it was got for me, because I happened to be away at the time.

32. I suppose that scheme of his was a well-thought-out scheme? It was my own scheme.

33. That was for a graded tunnel? Yes, it was; but it was to take trams right through from Sydney to the North Shore. My first suggestion in regard to that was to have a lift for the cars at Milson's Point. I was not aware at the time that Mr. Sulman had any scheme in hand. I proposed to run into the rocks under Macquarie-street in a somewhat similar way to what Mr. Sulman proposes for the tunnel-roadway and to come out at Milson's Point and have lifts there to lift the trams bodily up on to the existing tramline, which will sooner or later be converted into an electric line. I afterwards made a modification of that proposal, to run round to something like the same position as is shown in the case of the tunnel-roadway and to come out on the surface without lifts. But I see no objection to lifts for passengers—in fact, there are many instances in the Northern Hemisphere where they are used. They are a perfectly safe construction.

34. You think that this tramway with lifts would be preferable to a graded tunnel? The graded tunnel would, of course, serve quite a different purpose. The proposition that I made was one to carry trams right through so that passengers should go right through without changing. But I do not see how you can apply that principle on the line of the proposed tunnel. In order to get along the line of Pitt-street, and to go straight over to Milson's Point, you must put the tunnel below the level of the street and the harbour, and enter at Milson's Point below the level there. You could not have a graded tunnel on the line of this tunnel.

35. Would this tunnel fit in with any proposal that you may have for railway extension into the city? No.

36. Then it is not at all likely that the Government would ever resume this tunnel in connection with any Government work that would be undertaken in connection with the railway extension into the city? I cannot see it is likely at all. It would not suit for railway purposes.

37. Then, if any railway connection by tunnel between North Sydney and the city were made, the Government railway would virtually have to run in competition with this tramway or railway? If approximately the same location was adopted—that is to say, if the railway went exactly overhead, there would be competition.

38. *Chairman.*] Is there any such scheme in contemplation by the Department? No.

39. *Mr. E. M. Clark.*] There is a scheme for railway extension into the city in contemplation by the Department? Yes; but not from Pitt-street to Milson's Point.

40. That extension is virtually an underground extension into the city—I am referring to the Hyde Park scheme? You can call it underground, because it would be underground for a short distance; but only between Liverpool-street and Park-street.

41. However, this railway would make no provision for connection with the Milson's Point line, or with any proposed Government extension into the city? No; it would not be suitable.

42. So that although provision is made for resumption of this railway by the Government within a certain time, it is likely that it would never be necessary for the Government to resume? I think it is very likely it would not. That is the most probable.

43. I suppose you have given very little consideration to the tunnel-roadway; it is a matter pretty well outside your province? I have not paid very much attention to it. I may say that I do not think the tunnel-roadway need interfere at all with the railway at Milson's Point. It seems to keep quite clear of the resumptions. The only thing that occurs to me is, that as the traffic at the Milson's Point railway terminus increases, it will be necessary to have an entire reconstruction of the station at Milson's Point, and it would be as well to keep the road clear for any possible widening.

44. *Mr. Watson.*] The Railway Commissioners would want more room, and might want to go where it is proposed to take that road? It appears to me that the road, as shown on plan, leaves sufficient room for widening.

45. *Mr. E. M. Clark.*] If any railway extension into the city were made to connect Milson's Point with the city railway, would not this tunnel-roadway follow the route to be taken by an underground railway tunnel for a connection between Milson's Point and the city? There has been a proposal to carry a railway tunnel across to the North Shore somewhere near the line of the proposed tunnel-roadway, and to bring it round and up on the eastern side of Lavender Bay; but, if that were seriously contemplated, no doubt the two tunnels could be kept clear of one another.

46. *Mr. Watson.*] Could they get a practicable grade for an ordinary railway between the eastern side of Lavender Bay and the city easily? It would be a steep grade—1 in 33, or 1 in 35.

47. That is what you have on the Zig Zag? Yes. I do not like it. It would be only as a matter of necessity that I would consent to lay the line to a grade of that kind.

48. You said, in reply to Mr. Clark, that unless the same location were chosen, or approximately the same location were chosen, for a Government work—over bridge or through tunnel—you did not think this work would compete with the Government work—that is, unless the Government work took practically the same route? What was passing in my mind at the time I made that remark was that, as the city and the North Shore grow, the traffic between the two shores will grow immensely, and the more methods of communication you have between the north and the south shores, the more traffic there will be. A bridge has been proposed from Dawes Point across
to

- H. Deane. to Milson's Point, and also to McMahon's Point. That would be an entirely different location, however, because that would land passengers on the southern side, right up near the Observatory and York-street, and therefore, in a certain sense, it would not compete. If either the one or the other was the only means of getting across to the North Shore and passengers had to go across, the same passengers would have to adopt either the one or the other, and in that way one would be a substitution for the other. So they would be competing lines; but, with the enormous increase of traffic that must necessarily take place, I think there will be comparatively little competition. Those who wanted to start from one point would go by the nearest route, and those who started from the lower shores would go by the other. I meant my remarks to be understood in that way. Of course, any methods of communication with the North Shore would compete with one another to a certain extent, just the same as these would compete with the steamers.
49. In the event of it being considered necessary in future to connect the railway at North Shore with a railway from the southern shore, would this proposal not have the effect of drawing traffic from that possible Government railway? It very likely would.
50. I presume you think it is not impossible for the Government, if they did project a railway of that description, to provide for all traffic—that is, all passenger traffic, any how—by means of that scheme—either over a bridge or through a tunnel—for railway connection between the two shores? I think that if a railway tunnel were made it would have to start so far back on the southern side that a lot of the traffic which this tunnel would take would be missed. On the northern side, as I have explained, in order to get up you would have to have a great twist in the railway, somewhat similar to what is shown in this tunnel-roadway.
51. It would not be possible to have a lift at a nearer point than where you would reach the surface with your tunnel railway? That would not be for trains. You could not make a lift long enough to take a full-sized train.
52. I did not mean to take the train, but for the convenience of passengers who might want to get out half a mile before reaching the exit of the tunnel? You could do that.
53. It would be possible to provide in that way against an extreme length before you would reach an exit? Yes, you could do that. If you went under Fort Macquarie you could put in lifts there, to enable people to take the train there.
54. *Mr. O'Connor.*] Are we to understand that, if the Government were to connect the railway at the North Shore by tunnel with the railway on the southern shore, and if this projected electrical railway tunnel were constructed, those two schemes would serve different interests? I think they would very largely.
55. *Mr. Watson.*] Assuming that the Government scheme were to take the shape of a bridge, would it be possible to get an approach on the northern side for a railway over a bridge—I mean an approach on the northern side which would serve the traffic which this projected electrical railway would serve;—assuming that you have a bridge for a railway amongst other purposes from the North Shore to the south shore, would it then be possible to get such an approach to a train as would serve the traffic that this electrical railway is intended to serve? A railway carried over the harbour would land you at a considerable height above the water-level on the North Shore. If the railway bridge had a headway of 180 feet, as has been proposed or suggested as the least possible headway that would be granted, it would bring you to a great height even above that projection on Blue's Point road, which is about 120 feet above the water, and it would connect with a different part of the North Shore.
56. I am speaking of a line to Milson's Point—a gentleman named Kenwood proposed a line to Milson's Point? Yes.
57. Was his scheme for a line to Milson's Point practicable? Yes; he kept on high ground.
58. He increased the height to 180 feet, and you think that, with that height, his scheme was practicable? Yes.
59. Supposing that something approaching that scheme were adopted, so far as starting from North Shore is concerned, would it be possible to get a connection with the railway system on the Milson's Point line, say, some distance back—beyond the first tunnel? Oh, yes; it could be done, undoubtedly.
60. And that would serve the railway traffic at any rate, and probably catch the tram traffic coming down Alfred-street? It could be done.
61. That being so, it would seem that the projected electric railway might compete with a practicable scheme if the Government were to take it in hand? Yes; I dare say it would, to some extent.
62. *Mr. E. M. Clark.*] Would it be practicable to connect the North Shore line by bridge with any at present proposed railway extension into the city—would it be practicable to connect with the Hyde Park route by bridge? In this way it would: You could connect the southern end of the bridge, take the railway along the York-street ridge, and then turn round and bring it back into Hyde Park.
63. A roundabout course, I should think? I do not know that it would matter very much.
64. A better connection would be, if the railway extension were made to the western side, rather than to the eastern side of the city? Yes; it would make a more direct connection possible with the North Shore. On the other hand, there does not appear any suitable area of land for a main railway station on that side.
65. *Mr. Howarth.*] Assuming that the railway is extended to Hyde Park, is there anything in this proposed scheme which would prevent a tunnel from being successfully constructed, so as to connect the North Shore railway by tunnel with the railway at Hyde Park? I do not think there is, if a grade of 1 in 35 is adopted.
66. *Mr. Watson.*] That is, from an engineering point of view? Yes.
67. *Mr. E. M. Clark.*] Has your Department ever given serious consideration as to by what means the railway at Milson's Point or some other part of North Shore should be connected with the railway into the city—whether by bridge or by tunnel? Yes, the matter has been seriously considered—that is to say, as to possibility. It has not yet been looked upon as a desirable thing to do; but it has been looked at in connection with other schemes of city railway extension. It came up, I think, also on the occasion of the inquiry into the proposed construction of the Milson's Point railway—I mean as to what might be done in future to connect the North Shore with Sydney by railway. There is no doubt that a line could be laid across a bridge, passing from McMahon's Point to Dawes Point, and then along the ridge to meet an existing railway, then to curve round and enter Hyde Park, or a connection could be made, by tunnel with steep grades, with the existing line at Lavender Bay, passing under the harbour and coming up into Hyde Park, being in tunnel all the way. The question has been gone into so as to prove the practicability of these schemes.

68. You prefer a bridge to the steep gradients, I suppose—you just now said you did not like steep gradients in a tunnel? It is very much pleasanter to be in the open air.

69. *Chairman.*] Has it been the excessive cost of the bridge connection which has kept the Government from dealing with that idea? Yes; I think so. It is a matter of great cost, especially of land resumption in the city. I know that expense is one very considerable factor, because of the interest on the outlay.

70. *Mr. E. M. Clark.*] From a departmental standpoint you do not look upon this connection of the city and the North Shore as commercially possible at present? No.

71. From a commercial aspect you do not look upon this connection as a payable one? No.

72. *Mr. Fosbery.*] Referring to the question put to you just now about bringing the railway round to go on to a bridge with abutments on the heights of Milson's Point, it would be necessary to have fresh resumptions of land from the point a good way back up to the abutments at a part of the shore very much built upon? Yes. The resumption would be very costly.

73. And of course the lower branch of the line, except for the purpose of goods traffic, would be practically useless? Yes. If I were to make a bridge I would prefer to go across to McMahan's Point. It would be much more direct, and there would be less resumption.

74. *Mr. E. M. Clark.*] Would there not be resumption at McMahan's Point? Yes, but not so much.

75. What opportunities have you had of inquiring into the cost of resumption at Milson's Point as being more than at McMahan's Point; both would run along the edge of the water, and there is little difference in the cost of land at those two points? I know that less length of land would have to be resumed at McMahan's Point.

H. Deane.

29 Sept., 1898.

TUESDAY, 4 OCTOBER, 1898.

Present:—

MR. HOWARTH,

MR. WATSON.

FRANCIS EDWARD McLEAN, ESQ., IN THE CHAIR.

Eustace Edmund Fosbery, Esq., appeared as Solicitor for the Bill.

Hugh McLachlan, Secretary to the Railway Commissioners, sworn and examined:—

76. *Chairman.*] Has this Bill, authorising Mr. Sulman to construct a tunnel under Port Jackson, and to run an electric railway, been brought under the notice of the Commissioners? Yes.

77. Have you any suggestions to make with reference to the Bill, or any objections to urge against its being passed? The only thing the Commissioners ask is that their property shall not be touched.

78. Do you consider that your interests are adequately protected by the Bill? Hardly. I should like it to be made a little clearer.

79. What alteration would you suggest? I would leave it to the Committee. But first of all, so far as I understand the proposal, it is proposed to have the lifts for the passenger line on railway property at the Milson's Point terminus. The Commissioners reckon that we have not too much land there for ourselves, and are very much averse to any of the railway land at the terminus being taken for a private railway. At Milson's Point, as in the case of all other places where a railway has been built near Sydney, great development has taken place, and must take place, and we have not a very great deal of room at the Milson's Point terminus, and if something else were to come in which would prevent our extending, we should in the future find it very inconvenient. Our idea is that the promoters of this Bill should be moved out of that corner, and that we should retain all the room we have at the Milson's Point terminus at the present time.

80. *Mr. Howarth.*] Otherwise, if you were compelled to extend afterwards, it would have to be into the bay? Yes; because they close us right up on the other side. I take it that there would be no great difficulty in their going a little further north, outside our property.

81. *Mr. Watson.*] Do the Commissioners own the land between the tramway and the water? Not where the Arcade buildings are. That land belongs to the Ferry Company. At least I believe all those buildings have been erected by the Ferry Company, and that they either own the land or have a lease of it from the Government. I know that we do not own it.

82. That does not include the railway refreshment rooms that have recently been put up? The whole of those shops. As a matter of fact, the terminus of the tramway is on the Ferry Company's land. We pay them £60 a year—really to bring them traffic, and it has always been a sore point with us. We have always looked upon it as a most irritating charge.

83. *Mr. Howarth.*] I think the boundary of your railway property is just on this side of the booking-office, and that the remainder belongs to the Ferry Company? The Point practically belongs either to the Ferry Company or to the Government. I know it does not belong to us.

84. *Mr. Watson.*] Do the plans show exactly where the starting-point of this proposed railway would be? The plans show that the passenger-lift would be almost alongside our rails.

85. Then, practically, you object to their landing on that side of Alfred-street, unless they go further up Alfred-street? Yes.

86. How far beyond your present property, in view of your future railway development? As far up as they could go. We would rather see our own property there preserved.

87. How would it do to make the location of their starting-point subject to the approval of the Commissioners? I was going to suggest that. You might, perhaps, insert some words such as these:—“Nothing hereinafter contained shall give the company power to enter upon and take possession of land vested in the Railway Commissioners without the consent of the Commissioners, or permit the company to interfere with the approaches, unless the plans and conditions have been previously agreed to by the Commissioners.” That is, practically, the only point that the Commissioners take, that no interference with railway property in any way should be made without the Commissioners being first consulted. I do not suppose the company would do that; but I think it is reasonable to make provision in respect of it. We ought not to be put under any disability by the making of this electrical railway, which is not going to benefit us in any way.

H. McLachlan.

4 Oct., 1898.

H.
McLachlan.
4 Oct., 1898.

88. Do you think that this passenger line, running up as far as King-street, would have any effect on the probable takings of the George-street tramway? It would be a competitor. I do not see how it could benefit us. If this proposed line were not in existence, people going to North Shore and starting at about Market-street, or beyond King-street, might take the electric tram along George-street to the ferry, and then go by ferry across the harbour. But if this proposed line were built, they would simply make one journey by going by it. I do not know if it would be a big competitor, but it would be a competitor to that extent.

89. Can you tell us what the Commissioners propose to charge by the George-street electrical tramway from the Circular Quay to the Redfern Railway Station? The charge will probably be one penny.

90. *Chairman.*] That fare would be charged on any section of the line? Yes. We could not make any smaller charge.

91. *Mr. Watson.*] Do you know if the Commissioners have considered the question of railway communication between the northern and the southern shores? No; it has never been referred to them—at least not to my knowledge, as an immediate question. It was referred to incidentally in connection with the original City Railway Commission, about 1891, but I think the Commissioners at that time held the idea that it was a long way ahead.

92. If it were proposed to connect the northern and the southern shores by railway as a Government scheme, would the carrying out of this project have the effect of making any serious competition? That is really a very big question, and it has not been considered. Of course this line would be a competitor, but to what extent I should not like to say. Naturally, if two lines run between the same points they must compete with each other.

93. *Mr. Howarth.*] Assuming that the connection, if carried out, would be by means of a bridge, the junction points would have to be on the high land, far back on each side of the harbour, would they not? The approaches, certainly, would have to be a considerable distance back, especially on the southern side.

94. Then it would not compete for the traffic on the foreshores of the harbour on either side? I do not suppose it would—not for the ferry traffic across the harbour.

95. But you assume that this underground railway would compete with the George-street electrical tramway as regards the traffic between Circular Quay and King-street? Yes.

96. At what do you estimate the competition beyond King-street? It is simply the matter of a certain area which this line would drain. A man who was going, say, from Market-street to North Shore—perhaps on a warm day—might say, "I can ride down for a penny to Circular Quay, and then I can go in the ferry-boat by paying another penny, and get to North Shore," and we would get a penny from him.

97. That is in the case of casual travellers? Casual or regular. Another man might say, "I can walk to King-street, and by paying twopence I can go from there to North Shore by the underground electrical railway." In that case the underground electrical railway would have the advantage of affording an unbroken journey. There would be no transfer of passengers *en route*. In addition to that, this company would have a station at Circular Quay, and therefore might pick up a certain amount of local traffic—people going to or coming from Manly Beach, or places in that direction. I do not say that it would be extensive competition with the George-street electrical tramway, but it would be competition. I do not see how this proposed line would help us.

98. It could not help you, but I fail to see how there could be any serious competition, so long as the Government are not also running a tramway under the harbour to the North Shore? The point of competition would be between Market-street and Circular Quay.

99. People in places of business lying nearer to Circular Quay than to King-street would use the Government tramway on the surface in preference to the company's underground railway—they would not pay twopence to go right through to King-street from North Shore, and then walk back to their places of business? They would probably not use our tramway at all, but would come over by the ferry, and then walk to their places of business.

100. *Mr. Watson.*] I presume that King-street would tap most of the traffic that wanted to go to the North Shore? King-street would tap a lot of that traffic. But most of the traffic from King-street, I take it, would walk, whatever scheme was adopted. I daresay that nine-tenths of the traffic from King-street down would be foot traffic, people whose places of business were within a certain radius.

101. *Mr. Howarth.*] Then the competition would really be between this company and the ferry company? Yes, most largely. The competition with us would be a minor competition. I should like to remark that this question of competition has been raised by the Committee, and that I do not volunteer to say that we feared this proposed line as a very serious competitor.

102. *Mr. Fosbery.*] Do you not think that this underground railway of ours would act as a very good feeder to the North Shore line if it were constructed? No; I do not see how it could so act.

103. Not indirectly by inducing settlement on the other side of the harbour? I do not think it would induce ten people to go and settle on the other side of the harbour to benefit us. That is my own opinion.

104. The objection to this line of ours, as to its competing with the Government line, is only from a Government standpoint? That is all.

105. Not from the point of view of the public, for whom we are catering? No.

106. Have you read the Bill? Yes.

107. Do you approve of it generally, so far as the Commissioners are concerned, in other respects? Yes.

108. I ask you this particularly in regard to clause 24, in reference to the powers that are given to the Commissioners? I have looked through that, and it seems to me to give very fair powers.

109. Have you any objection to the charges mentioned in the Bill;—do you think they would be reasonable? They seem reasonable, and no doubt they would be regulated by competition.

110. *Chairman.*] Do you wish to make any other observations? Clause 49 it might be well for the Committee to look at. It deals with a matter in which we have had some little experience. I daresay that the company have some special reason for making the period as to resumption thirty years; but wherever the question of the resumption of a private railway, or anything of that kind, has been referred to the Commissioners, they have generally thought that it might be desirable not to specify a term of years, and not to have any resumption on the basis of some assumed profits, but to make it an open arbitration matter if the parties cannot agree. In one or two instances, where the other provision has been put in, it would work rather inconveniently. In this instance we might have a fixed basis, in accordance with the Land for Public Purposes Acquisition Act, providing for arbitration to be taken in a certain legal way.

I think that is the simplest plan. It is adopted in regard to most private railways now-a-days. The Government have power to resume at any time, and if the parties fail to agree, the compensation to be paid is to be determined by arbitration as provided for under the Land for Public Purposes Acquisition Act.

H.
McLachlan.
4 Oct., 1898.

111. *Mr. Fosbery.*] Do you mean that the sum to be settled by arbitration is to be the whole sum, or only the sum to be added? I would submit the whole thing to arbitration. The Government should have power to resume, and if the parties fail to agree as to the cost, arbitration should be on the basis that has been found to work easiest in other cases. The whole thing as to what is a fair price to be paid. I would again remark that we are anxious to give up no land at the terminus, or at any rate that no land shall be taken without the Commissioners first approving and settling the conditions and arrangements.

John Sulman recalled and further examined:—

112. *Chairman.*] Do you wish to add anything to your former evidence? I should like to refer to a matter that has been raised by Mr. Watson. I have considered the question of resumption, and, bearing in view what Mr. McLachlan has just said, I wish to point out that a specific period is necessary to be mentioned, because the scheme will take several years in construction, and we anticipate that for several years afterwards it will not pay reasonable interest on the outlay, and, therefore, if it were resumed (say) a few years after that, we would not be recouped reasonably for our capital outlay, in the way of interest. That is why we ask for a period of thirty years, and on that point I must adhere to my request in the Bill, for thirty years to be allowed. On the question of clause 49, raised by Mr. Watson, I am quite agreeable to substitute arbitration as suggested by Mr. McLachlan.

J. Sulman.
4 Oct., 1898.

113. *Mr. Watson.*] With a maximum provision? If you wish it, you can change the word "be" in line 12 to "not exceeding." But we are willing to take it as a full and open arbitration.

114. In view of Mr. McLachlan's opinion that the proposed tunnel railway, so far as regards the section from Circular Quay to King-street, would compete with the Government tramway along George-street, can you state to the Committee what is the reason for running your line so far as King-street and not stopping at Circular Quay? Simply because it would not be worth making to Circular Quay only. Its object is to compete with the ferry traffic, and to offer a better service to the residents of the whole of the North Shore. At present they go either by tram or by rail to Milson's Point; then they change to the ferry boat, and afterwards they have to take other means of conveyance into the city. We anticipate that our line will very largely increase settlement on the North Sydney side of the harbour, and so incidentally largely benefit the Government railways and tramways by giving the people on that side a quicker means of access to the centre of the city.

115. It would not be sufficient for your purpose to land your passengers finally at Circular Quay? No; such a line would not be worth the making. As I have already pointed out, our traffic is to be a quick underground express traffic, whereas the surface tram in George-street would be a slow, stopping traffic. Even if there were competition between the two lines, we should serve the public thereby.

116. *Chairman.*] As a matter of fact, there would not be sufficient inducement for you to construct the proposed railway without the King-street section? Absolutely no. As regards the question put by Mr. Sleath the other day, as to the time within which the deposit was to be paid, I am willing for it to be reduced from twelve months, and a further twelve months, with the sanction of the Governor, to six months, and a further six months, with the sanction of the Governor. The only object in asking for the previous term was to meet possible but not probable eventualities, such as for instance illness or difficulties of that kind, or inability to take up the business at once and proceed with it through not being able to leave immediately after the Bill has been passed. My anticipation, however, is that within a month of the Bill being received in London the money will be paid.

Eustace Edmund Fosbery, solicitor, recalled and further examined:—

117. *Chairman.*] I understand that you wish to add something to your former evidence? Since I gave my evidence on the 29th September, I have received from the Under Secretary for Public Works and Commissioner for Roads an acknowledgment of the receipt of my letter, and of copy of this Bill, and saying further that he thinks it advisable that the following words be inserted before the last paragraph in clause 3 of the Bill:—"Before construction is commenced, plans must be submitted to the Minister for Public Works for approval, both as to design and location." That is almost precisely the same as the clause asked for by Mr. Deane the other day. I think, perhaps, that we could combine the two. It will suit Mr. Deane's purpose if the plans and specifications, both as to design and location, are first of all submitted and approved of by the Minister.

E. E.
Fosbery.
4 Oct., 1898.

John Sulman recalled and further examined:—

118. *Chairman.*] I understand that you wish to add something to your former evidence? In reference to the letter from the Under Secretary for Public Works, just mentioned by Mr. Fosbery, I should like to say that Mr. Greathead, the engineer who prepared the original scheme, has since died; but while I was in England last year it was practically arranged that the engineer for these works should be Mr. Mott, who is the engineer for the Waterloo and Mansion House line, and for the Central London line—the two most important undertakings of the kind in London—and that Sir Benjamin Baker will probably be the consulting engineer, and he is the highest authority in England at the present time.

J. Sulman.
4 Oct., 1898.

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.

VOTES No. 31. WEDNESDAY, 26 OCTOBER, 1898.

20. NORTH SHORE BRIDGE BILL:—Mr. Neild moved, pursuant to *amended* Notice,—
- (1.) That the North Shore Bridge Bill be referred to a Select Committee for consideration and report.
- (2.) That such Committee consist of Mr. Young, Mr. Dugald Thomson, Mr. J. C. L. Fitzpatrick, Mr. Hayes, Mr. Harris, Mr. Suttor, Mr. Slcath, Mr. Cohen, Mr. Sawers, and the Mover.
- Debate ensued.
- Question put.
- The House divided.

Ayes, 29.

Mr. Jessop, Mr. Hogue, Mr. Reid, Mr. Cook, Mr. Spruson, Mr. Lee, Mr. E. M. Clark, Mr. J. C. L. Fitzpatrick, Mr. Chanter, Mr. Phillips, Mr. Anderson,	Mr. Rigg, Mr. Affleck, Mr. Hurley, Mr. Lyne, Mr. Wood, Mr. Neild, Mr. Smith, Mr. McGowen, Mr. Spence, Mr. Hawthorne, Mr. Ross,
--	--

Mr. James Thomson, Mr. Macdonald, Mr. Alexander Campbell, Mr. Watson, Mr. Millard.	<i>Tellers,</i> Mr. Willis, Mr. Moore.
--	--

Noes, 4.

Mr. Dacey, Mr. Bennett.	<i>Tellers,</i> Mr. Carroll, Mr. Thomas Brown.
----------------------------	--

And so it was resolved in the affirmative.

VOTES No. 44. WEDNESDAY, 30 NOVEMBER, 1898.

- 7 NORTH SHORE BRIDGE BILL:—Mr. Neild, as Chairman, brought up the Report from, and laid upon the Table the Minutes of Proceedings of, and Evidence taken before the Select Committee for whose consideration and report this Bill was referred on 26th October, 1898, together with a copy of the Bill as amended and agreed to by the Committee.
- Ordered to be printed.

(SECOND SESSION.)

NORTH SHORE BRIDGE BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report was referred on the 26th October, 1898, the "*North Shore Bridge Bill*,"—beg to report to your Honorable House:—

That they have examined the witnesses named in the List* (whose * See List p. 7. evidence will be found appended hereto), and the Preamble having been satisfactorily proved to your Committee, they proceeded to consider the clauses and Schedules of the Bill, in which it was deemed necessary to make certain amendments.

Your Committee now beg to lay before your Honorable House the Bill as amended by them.

JNO. C. NEILD,
Chairman.

*No. 2 Committee Room, Legislative Assembly,
29th November, 1898.*

PROCEEDINGS OF THE COMMITTEE.

TUESDAY, 1 NOVEMBER, 1898.

MEMBERS PRESENT:—

Mr. Cohen,		Mr. J. C. L. Fitzpatrick,
Mr. Neild,		Mr. Sawers,
		Mr. Dugald Thomson.

Mr. Neild called to the Chair.

Entry from Votes and Proceedings appointing the Committee read by the Clerk.

Printed copies of the Bill referred, together with original Petition to introduce same before the Committee.

Benjamin Crispin Simpson (*M. Inst. C.E., the Promoter*) called in, sworn, and examined.

Witness produced local sketch (A); plan showing scheme as originally proposed (B); plan of amended scheme (C).

[Adjourned till Thursday next at *Half-past Eleven* o'clock.]

THURSDAY, 3 NOVEMBER, 1898.

MEMBERS PRESENT:—

Mr. Cohen,		Mr. Hayes,
Mr. Sawers,		Mr. Sleath,
		Mr. Dugald Thomson.

Mr. Neild in the Chair.

Present:—Bruce Smith, Esq. (*Counsel for the Promoter*);
W. G. Parish, Esq. (*Solicitor for the Promoter*).

Benjamin Crispin Simpson recalled and further examined.

Witness produced plan showing the position of the southern pier, in accordance with clause 18 (as amended) of the Bill (D).

Henry Deane (*Engineer-in-Chief, Railway Construction Department*) called in, sworn, and examined.

Witness withdrew.

[Adjourned till Tuesday next at *Eleven* o'clock.]

TUESDAY, 8 NOVEMBER, 1898.

The House having adjourned over till Thursday, 10th instant, the meeting ordered for to-day could not be held.

TUESDAY, 15 NOVEMBER, 1898.

MEMBERS PRESENT:—

Mr. Cohen,		Mr. J. C. L. Fitzpatrick,
Mr. Hayes,		Mr. Sawers,
		Mr. Dugald Thomson.

In the absence of the Chairman, Mr. Hayes called to the Chair *pro tem*.
Henry Deane recalled and further examined.

The Chairman entered the room and took the Chair.

Witness withdrew.

Cecil West Darley (*Engineer-in-Chief for Public Works*) called in, sworn, and examined.

Witness withdrew.

Benjamin Crispin Simpson recalled and further examined.

[Adjourned till To-morrow at *Half-past Eleven* o'clock.]

WEDNESDAY, 16 NOVEMBER, 1898.

MEMBERS PRESENT:—

Mr. Neild,		Mr. Sawers.
------------	--	-------------

In the absence of a Quorum, the meeting called for this day lapsed.

TUESDAY, 22 NOVEMBER, 1898.

MEMBERS PRESENT:—

Mr. Cohen,		Mr. J. C. L. Fitzpatrick,
Mr. Sawers,		Mr. Dugald Thomson.

Mr. Neild in the Chair.

Present:—Bruce Smith, Esq. (*Counsel for the Promoter*).Henry Gorman (*Auctioneer and Land Valuator*) called in, sworn, and examined.

Witness withdrew.

Captain

Captain Francis Hixson (*President of the Marine Board*) called in, sworn, and examined.
 Witness withdrew.
 Benjamin Crispin Simpson, recalled and further examined.
 John Mitchell Purves (*Land and Estate Agent*) called in, sworn, and examined.
 Witness withdrew.
 John Moore Smail (*Engineer-in-Chief, Metropolitan Board of Water Supply and Sewerage*) called in, sworn, and examined.
 Witness withdrew.

[Adjourned till To-morrow at *Half-past Eleven* o'clock.]

WEDNESDAY, 23 NOVEMBER, 1898.

MEMBERS PRESENT:—

Mr. Neild in the Chair.

Mr. Hayes,
 Mr. Suttor,

Mr. Sawers,
 Mr. Dugald Thomson.

Present:—Bruce Smith, Esq. (*Counsel for the Promoter*).
 Francis Clarke (*Mayor of North Sydney*) called in, sworn, and examined.
 Witness withdrew.
 Major-General George Arthur French (*Officer Commanding the Defence Forces*) called in, sworn, and examined.

Witness withdrew.

Hugh McLachlan (*Secretary to the Railway Commissioners*) called in, sworn, and examined.

Witness withdrew.

Richard Watkins Richards (*City Surveyor*) called in, sworn, and examined.

Room cleared. Preamble considered.

Question, "That this Preamble stand part of the Bill,"—put and passed.

[Adjourned till Tuesday next at *Half-past Eleven* o'clock.]

TUESDAY, 29 NOVEMBER, 1898.

MEMBERS PRESENT:—

Mr. Neild in the Chair.

Mr. Cohen,
 Mr. J. C. L. Fitzpatrick,

Mr. Dugald Thomson.

Mr. Hayes,
 Mr. Sleath,

Bill considered.

Clause 1 read and *agreed to*.

Clause 2 read, amended,* and *agreed to*.

Clauses 3, 4, 5, and 6 read and *agreed to*.

Clause 7 read, amended,* and *agreed to*.

Clauses 8, 9, and 10 read and *agreed to*.

Clause 11 read, amended;* and *agreed to*.

Clause 12 read and *agreed to*.

Clause 13 read, amended,* and *agreed to*.

Clauses 14, 15, 16, 17, 18, 19 read, amended,* and *agreed to*.

Clause 20 read and *agreed to*.

Clauses 21, 22, 23 read, amended,* and *agreed to*.

Clauses 24, 25, 26, 27, 28, 29, 30, 31 read and *agreed to*.

Clauses 32, 33, 34, 35, 36, 37, 38, 39 read and *omitted*.

Clauses 40, 41 and 42 read and *agreed to*.

Clause 43 read and *omitted*.

Clauses 44, 45 and 46 read and *agreed to*.

First, Second, and Third Schedules read and *agreed to*.

New clauses to stand as clauses 21, 22, 23, 24, and 35, respectively, read and *agreed to*.

Title read and *agreed to*.

Chairman to report the Bill with amendments to the House.

* See Schedule of Amendments.

SCHEDULE OF AMENDMENTS.

Page 2, clause 2, lines 35 and 36. *Omit* "' Governor ' shall mean the Governor of the Colony of New South Wales for the time being, with the advice of the Executive Council "

" 3, " 2, " 1 and 2. *Omit* "' Gazette ' shall mean the Government Gazette of New South Wales "

" 3, " 2, line 8. *Omit* "' Person ' shall include corporation or company "

- " 6, " 18, lines 32 and 33. *Omit* "Engineer-in-Chief for Public Works, or to such other person as may be approved by the Governor for such purpose" *insert* "Minister"
- " 6, " 18, line 34. *After* "him" *insert* "as regards location and design"
- " 6, " 18. *Add* at end of clause "Provided that the southern group of piers at Dawes Point shall not encroach on the fairway of the harbour, that is to say—shall not project in the longitudinal direction of the bridge beyond the extreme point of Dawes Point."
- " 6, " 19, lines 39 and 40. *Omit* "metropolitan transit commissioners for the time being" *insert* "Minister"
- " 7. *Insert* the following new clauses to stand as clauses 21, 22, 23, and 24 :—

Protection of
sewers.

21. The following provisions for the protection of the sewers, water-mains, and works of the Water and Sewerage Board, and of all house-services and connections in respect thereof, shall have effect, namely :—

1. The said Benjamin Crispin Simpson shall comply with and conform to all reasonable directions of the Water and Sewerage Board in the execution of the works, and shall not in any manner interfere with any of the sewers, water-mains, or works of the Water and Sewerage Board, or with any house-services or connections in respect thereof, without notice to and the sanction of the Water and Sewerage Board; and shall provide to the reasonable satisfaction of the Water and Sewerage Board, for the proper protection of and for preventing injury or impediment to any such sewers, water-mains, works, house-services, or connections, by reason of the works or any part thereof; and shall save harmless the Water and Sewerage Board and all owners of any such house-services or connections aforesaid, against all expenses to be occasioned by the works or any part thereof.
2. The said Benjamin Crispin Simpson shall be liable to make good, with all reasonable despatch, and to the satisfaction of the Water and Sewerage Board, all injury or damage caused by or resulting from any of the works to any such sewers, water-mains, works, house-services, or connections, as mentioned in sub-section (1) of this section; and the Water and Sewerage Board, or any owner of any such house-service or connection sustaining injury or damage, shall from time to time have power to recover the amount thereof from the said Benjamin Crispin Simpson, in any court of competent jurisdiction.
3. The approval by the Water and Sewerage Board of any work under the provisions of this section shall not exonerate the said Benjamin Crispin Simpson from any liability, or affect any claim for damages under this section or otherwise.
4. If the said Benjamin Crispin Simpson shall in any respect fail to comply with and conform to any such reasonable directions of the Water and Sewerage Board as are mentioned in sub-section (1) of this section, or shall fail to provide to the reasonable satisfaction of the Water and Sewerage Board for the proper protection of and for preventing injury or impediment to any such sewers, water-mains, works, house-services, or connections, as mentioned in the said sub-section, or shall fail to make good with all reasonable despatch, and to the satisfaction of the Water and Sewerage Board, any such injury or damage to any sewers, water-mains, works, house-services, or connections, as is mentioned in sub-section (2) of this section, the Water and Sewerage Board, or any owner of any such house-service or connection, as the case may be, shall have full power and authority (in the case of the Water and Sewerage Board by their engineer, officers, workmen, and servants, and in the case of any such owner, by his workmen and servants) to enter upon the works of the said Benjamin Crispin Simpson, or any part thereof, and to do all such acts and things and carry out all such works as may be necessary and proper for the protection, amendment, or repair of any such sewer, water-main, or other works, house-service, or connection, as the case may be, and any and all costs, charges, and expenses incurred by the Water and Sewerage Board, or by such owner, as the case may be, in the exercise of the powers in this sub-section contained shall be paid to the Water and Sewerage Board or to such owner, as the case may be, by the said Benjamin Crispin Simpson on demand, or in default may be recovered from the said Benjamin Crispin Simpson by the Water and Sewerage Board, or by such owner, as the case may be, in any court of competent jurisdiction.
5. Otherwise than is herein expressly enacted the said Benjamin Crispin Simpson shall, in the construction of the said works, observe and comply with the provisions of the Metropolitan Water and Sewerage Acts, and the by-laws made by the Water and Sewerage Board under such Acts.

Inspection of
works.

22. It shall be lawful for the Minister and for the Municipal Council of Sydney, and for the Borough of North Sydney and also for the Water and Sewerage Board, at any time during the construction of the said bridge or approaches, or any works in connection therewith, to appoint an engineer to enter upon and inspect the same; and the said Benjamin Crispin Simpson and all persons acting under him shall afford all reasonable facilities in connection with any such inspection as hereinbefore mentioned.

23. For the purposes of such inspection as in the last section mentioned, the said Benjamin Crispin Simpson shall, before commencing to construct either the said bridge or the said approaches, deposit with the Minister, the Municipal Council of Sydney, the Borough of North Sydney, and the Water and Sewerage Board respectively, a copy of the plan or design of the same, together with a copy of the specifications and all necessary drawings. Plans to be lodged.

24. Provision shall be made in the design of the said bridge for the laying of water-mains, and the Water Supply and Sewerage Board are empowered to lay a water-main or water-mains, having a total inside sectional area of not more than two hundred and fifty-five square inches along the said works, where the said provision shall be made, and without any charge for the facilities herein provided. But for any additional mains which the said Board may require to lay, they shall pay to the said promoter such a sum as may be agreed upon between the said Board and the said Promoter. And in the event of the said Board and the said Promoter being unable to agree, the matter in dispute shall be referred to arbitration under the provisions of the Arbitration Act of 1892. Water-mains to be carried.

Page 7, clause 24, 25, line 8. *Omit* "Governor" *insert* "Minister"

" 7, " 24, 25. *Add* at end of clause "The Promoter shall at all times maintain the said bridge and approaches thereto in good order and condition to the satisfaction of the Minister"

" 7, " 22, 26, line 16. *Omit* "for Works"

" 7, " 22, 26, " 17. *Omit* "the Engineer-in-Chief for Public Works" *insert* "him"

" 7, " 23, 27, " 25. *Omit* "Governor" *insert* "Minister"

Pages 9, 10, and 11. *Omit* clauses 32, 33, 34, 35, 36, 37, 38, and 39.

Page 11. *Insert* the following new clause to stand as clause 36:—

36. Except as herein otherwise provided, the provisions of the Arbitration Act of 1892 shall apply to all arbitrations under this Act. Arbitration Act of 1892 to apply

Page 12. *Omit* clause 43.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

NORTH SHORE BRIDGE BILL.

TUESDAY, 1 NOVEMBER, 1898.

Present:—

MR. COHEN,		MR. SAWERS,
MR. J. C. L. FITZPATRICK,		MR. DUGALD THOMSON.
J. C. NEILD, Esq., IN THE CHAIR.		

Benjamin Crispin Simpson called in, sworn, and examined:—

1. *Chairman.*] You are promoter of the Bill before the House known as the North Shore Bridge Bill? *B. C. Simpson.*
 Yes.
2. You produce plans for the proposed structure? Yes. I produce plan A, a general local sketch; plan B, a drawing scheme as originally proposed; and plan C, a drawing of the amended scheme. 1 Nov., 1898.
3. Would you like to make any general statement to the Committee in reference to your proposal? Yes. I have prepared a general statement, which I think would give the Committee a general idea of the proposal. It is as follows:—

I think I may assume it to be admitted that better connection between the City of Sydney and North Sydney is urgently required, both on account of the safety of the navigation, and for the convenience of residents on the north side of the harbour.

The increasing number of ferry boats between Circular Quay and the north side of the harbour, all of which have to cross the courses of the Manly and outward-bound steamers, and the frequent collisions which occur, are cogent reasons why other communication between the city and North Sydney should relieve the congestion of harbour navigation. And the rapid increase in the number of residents on the northern side of the harbour makes it imperative that better facilities for communication between the city and their homes should be afforded them.

Many years ago I was asked by influential friends interested in the progress of North Sydney, to promote a private Bill in Parliament for this purpose, as it was recognised that it was improbable that any Government would construct such expensive works for a local advantage.

I gave the most careful consideration to this subject, and was convinced that a high-level bridge was the only satisfactory means of affording the necessary connection.

Under any circumstances there are the most serious disadvantages inseparable from tunnel travelling, viz., imperfect ventilation, possible failure of light, dampness, narrowness, and noise. And in the case of the Blackwall Tunnel lately constructed under the Thames, at a cost of nearly £1,000,000, these disadvantages are found to be so serious that it is stated that a suitable bridge must eventually be constructed; but in the case of North Sydney, where the objective point of the proposed work is over 120 feet above high-water level, a tunnel is peculiarly unsuitable, as every passenger and every vehicle using such a tunnel must ascend and descend 220 feet, even supposing the lowest point of the tunnel floor is only 100 feet under high water, whereas in the case of a bridge, even with a headway of 180 feet, the ascent and descent would be only 60 feet. This disadvantage, combined with the disagreeableness and danger of a drive of 1½ mile in a narrow and noisy tunnel, convinced me that for the real want of North Sydney, viz., a roadway connecting it with the city, a tunnel would be useless, and would not be used, as the present ferry-boat journey in daylight, and fresh air, would certainly be preferred.

Two years ago, in consequence of the rapid growth of the residential districts on the north side of the harbour, and of promised financial support to construct the work, I promoted a Bill in Parliament to authorise the construction of a bridge between Daves Point and Milson's Point. The joint Select Committee appointed to report on the various proposals, stated that generally the witnesses heard by them favoured a bridge rather than a tunnel; but various objections were taken to the bridge then proposed by me, by Government officers and by Members in Parliament. My amended proposal is designed to meet all those objections.

B. C.
Simpson.
1 Nov., 1898.

The route recommended by the Engineer-in-Chief for Railway Construction, viz., Dawes Point to McMahon's Point, has been adopted, and the bridge has been specially designed so that a railway bridge, if ever required, can be built alongside, thus forming, practically, one bridge with the advantage that the road traffic would be separated from the railway traffic.

The adoption of the McMahon's Point route necessitates an entirely different design of bridge, which adds to the cost of the works, but I entirely concur with Mr. Deane's preference for this route for several reasons.

1. In the event of a railway bridge ever being required, this must undoubtedly be the route it would take, and it is certainly undesirable that two bridges of possibly different spans should cross the harbour in different directions.
2. The possible interference with extension of Milson's Point Railway Station is avoided.
3. A more direct communication with the North Shore Tramway, and better gradients are attained.
4. Passengers can join the Milson's Point and Hornsby Railway at French-street, Blue's Point Road, without the serious disadvantages of a lift.

The objection was also taken to my former design that the central pier and the arms of the cantilever would obstruct the navigation of the harbour.

In the design which I now submit a clear span of over 1,300 feet is provided over the fairway of the harbour of which at least 600 feet has a clear headway of 180 feet over high water. From the ends of this centre length of 600 feet the roadway falls with a gradient of 1 in 274, but at the piers the clear headway provided is 167 feet over high water. The piers will be protected by strong floating booms, and if desired by the Marine Board, a lighted buoy will be anchored at the centre of this span, which would separate the incoming and outgoing courses, but would not be a dangerous obstruction to navigation in foggy weather.

The piers supporting the main span over the harbour are shown on my original drawing to be situated in the water about 300 feet from Dawes Point and McMahon's Point respectively, but clause 18 of the Bill provides that the exact position of these piers shall be determined by the Engineer-in-Chief for Public Works before they are constructed. This drawing has been submitted to the Engineer-in-Chief for Public Works, who considers the northern pier at McMahon's Point to be well clear of the navigation, but objected to the position of the southern pier on the ground that it obstructed the present courses of navigation.

To obviate this objection, I have removed this pier to a position close to Dawes Point, and propose to amend clause 18 of the Bill by the following addition to that clause, viz. :—“But the southern group of piers at Dawes Point shall not encroach on the fairway of the harbour more than 100 feet, measuring in the longitudinal direction of the bridge from the extreme point of the shore at Dawes Point.”

This entirely satisfies Mr. Darley's objection, and I believe he will state to the Committee that the bridge as now proposed will cause no obstruction to the navigation of the harbour, but will in fact relieve it, as it will relieve the harbour of a great deal of the cross traffic which now causes a dangerous congestion.

The bridge and approaches have a clear width of 60 feet, viz., a roadway of 40 feet and two pathways of 10 feet each, and the works are designed to carry a double line of tramway which the Minister for Works for the time being is empowered to lay and use, by clause 22 of the Bill.

This tramway will enable the Government to connect this George-street line, now being constructed, with the North Shore tramway, leaving the George-street tramway either at the Town Hall as shown on my general plan, or at Wynyard-street, as is, I believe, proposed by the Engineer-in-Chief for Railway Construction, and running along York-street, Princes-street, the approaches and bridge now proposed, and Blue's Point Road to a junction with the North Shore tramway in Miller-street. I have asked for no power in this Bill to construct a private tramway over the bridge and approaches, as I consider that the Government could not properly grant to any private company the ownership of what would virtually be an intervening link in the Government tramways. Moreover, any such private ownership would entail very serious inconvenience on the travelling public, as it would necessitate two changes of carriage instead of the facility for an unbroken journey between the city and North Sydney. This through tramway connection would inevitably lead to large extensions of the North Shore tramways, and the Government would reap the advantage of the increased revenue.

The proposed work commences at the northern end of Princes-street, crosses over Cumberland-street and George-street North on a steel girder viaduct carried on steel tressle piers, leaving a clear headway of nearly 30 feet over the former street, and 50 over the latter. The approach then curves to the left with a 400 feet radius through the Dawes Point Battery lands to the southern end of the bridge at Dawes Point. Thence across the harbour to McMahon's Point when the southern approach commences. This approach is carried on a steel girder viaduct of similar construction to the northern approach, across East Crescent-street leaving a clear headway of 30 feet and across Middle-street, which is diverted under an archway having a headway of 20 feet to Blue's Point Road near its junction with East Crescent-street, where the proposed works terminate.

The only street in any way interfered with is Middle-street, which is only a 30-foot lane, and this street can be diverted, as shown, into East Crescent-street; or, if preferred by the North Sydney Borough Council, into Blue's Point Road.

A new station can be placed at western mouth of the railway tunnel, under the Blue's Point Road, and passengers for the Milson's Point and Hornsby Railway can approach this station by French-street, without any lift.

The increasing population on the north side of the harbour, and the dangerous congestion of steamer traffic in the harbour, makes it urgently desirable that better and other facilities should be given for communication between the city and North Sydney. The present Government has stated that it will not construct the necessary works, and their expensive character makes it improbable that any Government could undertake such works for the local advantage of the districts on the north side of the harbour. It appears, therefore, that private enterprise is the only means by which this want can be supplied, and if it should be found desirable that the proposed works should be acquired by the Government their acquisition on reasonable terms is provided for by clause 23 of the Bill. I have already given my reasons for considering that a bridge is the only satisfactory solution of the question of better communication between the city and North Sydney, and I claim for the bridge now submitted by me the following advantages :—

It would afford a broad open roadway in daylight, and fresh air for pedestrian, equestrian, and vehicular traffic, and the maximum rates chargeable under the Bill are generally lower than the rates now charged by the North Shore Ferry Company.

It would enable the Government to connect their George-street tramway with the North Shore tramway, thus giving unbroken tramway connection between Sydney and North Sydney.

It would not compete with either the Government tramway or railway, but would increase the revenues of both, and lead to lucrative extensions of the former.

It would enable the Government tramway to carry passengers to the Milson's Point and Hornsby Railway, direct to the proposed station at French-street, without the disadvantage of a lift.

The route is that which must be taken by a railway bridge if ever required, and, therefore, no second crossing of the harbour will be necessary.

It would employ a large amount of labour, and stimulate various building trades.

4. Towards the conclusion of your statement you said that the work would give employment to a large amount of labour, and stimulate various building trades;—can you give the Committee any idea, roughly, what sum would be expended upon the work in question for, we will say, labour and material—the question of the cost of land is one concerning which it is difficult to arrive at any conclusion? It is very difficult to separate material from labour. Of course, one takes a contract price for concrete, brickwork, and steelwork, but one does not consider the portion which is actually material and the portion which is actually labour. I should say that the cost of this bridge would be about £400,000 as amended, and I should say that at least three-eighths of that amount would be expended upon labour.

5. In the Colony? Yes.

6. Your estimate of labour would include the cost of labour upon locally-produced material? Yes. Of course, it is quite possible that the steelwork might be locally supplied, and including that possibility, the portion expended upon labour would be greater than that which I have stated.

7. *Mr. D. Thomson.*] Will you state the exact amendment which you propose to make in the 18th clause? I propose to amend that clause by adding the following words:—"But the southern group of piers at Dawes Point shall not encroach on the fair way of the harbour more than 100 feet, measuring in the longitudinal direction of the bridge from the extreme point of the shore at Dawes Point."
8. You propose, I understand, to increase your span? Yes; I have left the clause otherwise as it stands, because it is my intention to carry out the bridge in that way. If the Committee desire I shall be happy to amend the clause, but it is really unimportant. The plan which Mr. Darley has had prepared shows that if the piers were brought in from 200 to 250 feet it would not interfere with the courses of the steamers. My reason for keeping the piers in that position are engineering reasons. Although it adds to the cost of the span and superstructure, we get a better foundation. You could put very satisfactory piers further out, but they would be at a great depth.
9. You are referring to the piers on the right-hand side;—are they covered by Blue's Point? Yes. Although I left myself power to put the piers in the position named in the Bill, I might not avail myself of it, because of the engineering difficulties.
10. As regards the Dawes Point piers, they still project 100 feet; what would be the objection to bringing those piers to the junction of land and water; I suppose the effect of that would be that you would have to remove your other piers and increase the cost of the bridge? There is another objection. It is that although I can move my southern piers to the position shown on the amended drawings, encroaching only 100 feet on the harbour, if I were to bring them right back on to the shore, I should increase the difficulties of approach. I might also create a difficulty in connection with the railway bridge, which I must consider may eventually be constructed. The difficulty in the case of the railway bridge would be greater still, because the railway authorities could not adopt the sharp curvature which I could adopt in the case of a road. But I will prepare a plan showing both positions for this pier.
11. *Chairman.*] In designing this bridge, I believe you have made provision for the position of a railway bridge alongside? Yes.
12. Therefore, it cannot be said with regard to your present proposal that you are utilising or occupying the only site the Government have for a railway bridge? No; on the contrary, my proposal was submitted to the Engineer-in-Chief for Railway Construction to know whether it would enable him to put a railway bridge alongside in case it were ever required to build one, and it was approved by him under that idea. Mr. Deane himself is to be here to give evidence upon that point.
13. *Mr. Sawers.*] The North Sydney Municipal Council had the matter submitted to them, and they are entirely satisfied with your proposal? I went over to a meeting of the North Sydney Council about a fortnight ago, and they expressed themselves very well satisfied, but I only showed them the original drawings. The amended drawings then were really not determined upon.
14. *Mr. Cohen.*] There is no practical difference between the original and the amended drawings, so far as the North Shore end is concerned? No.

B. C.
Simpson.
1 Nov., 1898.

THURSDAY, 3 NOVEMBER, 1898.

Present:—

MR. COHEN,		MR. D. THOMSON,
MR. SLEATH,		MR. HAYES,
	MR. SAWERS.	

J. C. NEILD, ESQ., IN THE CHAIR.

Bruce Smith, Esq., Barrister-at-Law, appeared on behalf of the promoters of the Bill.

Benjamin Crispin Simpson recalled and further examined:—

15. *Chairman.*] You produce a plan showing the position of the pier on the southern side in accordance with clause 18, as amended by you? Yes. We will call the tracing plan D; the plan shows in black the position of the pier as shown in the amended drawing C. It also shows, as requested by Mr. Cohen, what the position of the approach would be if the southern pier were brought back actually on to Dawes Point, so as to not to intrude upon the water-way at all. I have further amended clause 18 of the Bill to enable the Minister, if he considers the position of the pier shown in red on the plan to be more desirable, to have it adopted. There are various amendments which I propose to make in the Bill, which I should like to go through directly.
16. *Mr. Cohen.*] Does the pier in the position in which you have now shown it on the plan project into the water at all? No; it does not project at all beyond the extreme point of Dawes Point. I think it is desirable that the matter should be left to the determination of the Minister, with the advice of his officers, because it might be that Mr. Deane, in considering that a railway bridge might be erected, would prefer the position marked black, to enable him to get a railway curve in. The Bill provides that the Minister may direct not only generally, as to the position of the piers and the design, and the creation of the work generally; but that he may direct specially that this southern pier at Dawes Point should not intrude into the water beyond the extremity of that point.
17. What is the radius of the curve according to your amended plan? In either case whether the position marked in black or red is adopted, the radius in the curve will be 3 chains, which is a good radius for tramway purposes.
18. I understood you to say, yesterday, that if you brought the pier in at the southern shore it would cause a curve impracticable in the event of the adoption of a Railway Bill;—do you wish in any way to modify that statement now? Yes; from further information which I have acquired regarding this position I do not think it would be impracticable. I think, however, that it would be just as well that the position of the pier should be left to the discretion of the Minister, because the Engineer-in-Chief for Railway Construction might find that the position of the pier marked in black, which Mr. Darley holds does not interfere with the navigation, might suit his railway purposes better than the pier marked in red. For that reason I think it will be better to leave the provision of the Bill absolutely elastic, so that the Government officers may determine upon the site which best suits their purposes.

B. C. Simpson.
3 Nov., 1898.

- B. C. Simpson. 19. What is the height under the centre of the bridge from high water at ordinary spring tides to the under side of the girders? 180 feet clear.
- 3 Nov., 1898. 20. What is the clear height of the piers from high water? 167 feet.
21. You have allowed for a camber of 15 feet? Yes.
22. You told us yesterday that the distance from McMahon's pier to the shore was about 300 feet? Yes.
23. What is the depth of water between the shore at McMahon's Point and the pier? It varies from 12 feet to about 35 feet.
24. What are the dimensions of the piers? Twenty-four feet at the base.
25. There are six pedestals? Yes.
26. What is the extreme dimension of the piers longitudinally from the apex of the triangles? About 140 feet by 80 feet.
27. That is to the water-line? Yes. Each group of piers supporting the main span of the bridge consists of six pedestals, each having a foundation of 24 feet diameter.
28. *Chairman.*] Is each pedestal 24 feet in diameter? Yes. They will vary with the depth—they are from 21 to 24 feet.
29. What will be the total water surface taken up by each of the piers? About 9,600 square feet.
30. Does that include the floating booms? No; they will be outside that. There is occupied, approximately, round these piers a space of 10 feet, so as to give room for displacement without damage to either ship or pier; that will add another 6,300 square feet to the water area occupied.
31. That will be another 160 ft. x 100 ft.? Yes; according to the proposal shown on plan D, one pier will be on the shore practically, and the other pier is a long way clear of all the navigation courses.
32. *Mr. Bruce Smith.*] Do you look upon the floating booms as necessary? I think they are desirable.
33. Do you find them in the case of the bridges on the Thames? No.
34. For instance, you would not find them at London Bridge or Blackfriars Bridge? No; I never saw such a thing there.
35. *Mr. Cohen.*] You have promised to show us upon plan D the ties and anchorages? Yes; I have not shown them at present, because the anchorage can be carried down in a direct line with the straight portion of the bridge without interfering with the curve, but I will have them marked on the plan before the next meeting of the Committee. I will have shown on the plan the anchorages for both schemes—the red and black.
36. You say you have adopted this scheme in order that the railway bridge might be put alongside of it? Yes.
37. Have you any suggestion to make as to how the railway is to be connected with the main system? No, that is a matter for the decision of the Engineer-in-Chief for Railway Construction.
38. I understood you to say that it was the best site in view of that purpose? The matter has been submitted to Mr. Deane, and he will give you evidence as to that. He will tell you that he can put a railway bridge alongside the bridge—in fact the bridge was specially designed to meet Mr. Deane's requirements in that way.
39. Is there in the Bill any time named for the completion of the work? Yes; clause 17 says:—
- The said bridge shall be commenced within one year from the passing of this Act, and shall be completed and brought into use within four years from the time of such commencement, and the whole of the said bridge shall be constructed in a proper and workmanlike manner to the satisfaction of the Engineer-in-Chief for Public Works for the time being.
40. Is there any provision in the Bill with regard to a deposit? Yes; that is contained in clause 16.
41. Have you any idea, making a rough estimate, how much more expensive it would be, supposing you brought the McMahon's Point pier further out into the harbour;—of course it is possible that may be done, and we should like to know what further expense would be entailed? It would not make the bridge more expensive; it would increase the cost of the foundations, but, on the other hand, it would reduce the cost of the superstructure.
42. Supposing the Legislature said you would have to provide a span of 1,600 feet clear, instead of 1,200 feet, which you have shown on the second plan, and supposing you brought the pier back another 100 feet to give the 1,600 feet, necessitating your bringing the McMahon's Point pier 100 feet further out, would not that mean making the bridge more expensive? Yes, it would. The additional cost, however, would be very slight, because the pier at McMahon's Point would still be at a practicable depth. It would add slightly to the cost of that pier, but the cost of the other pier would be diminished. As long as there was 1,200 feet clear, it would cover all the navigation courses. Therefore the position of the pier outside the 1,200 feet would be a matter for the determination by the Minister on the advice of his officers. The consideration which would sway them probably would be, not only the general convenience, but the convenience of the proposed railway bridge. Suppose the northern pier were obliged to be put in the position shown on the drawing, it might be an inconvenience to the railway bridge. Therefore, as long as the northern portion is quite clear of the navigation courses, it is better to leave it to the option of the Minister, on the advice of his officers. They can then determine the position of that pier to suit the arrangement they propose with regard to a railway bridge. There is not very much in the question of water area occupied, because it is taken longitudinally. If the space occupied came across the fairway it would be another matter.
43. What is the total breadth of the harbour there at high water, from shore to shore? 1,850 feet.
44. What is the distance between Garden Island and Macquarie Point? 1,200 feet.
45. What is the distance between Goat Island and Milson's Point? 1,250 feet.
46. *Mr. Hayes.*] Can you tell us the height of the Brooklyn Bridge above high water? I have not been to New York since the Brooklyn Bridge has been erected; but I understand it has a headway of 155 feet. The proposed bridge is the highest in any part of the world for the purpose—that is, a big bridge over navigable water.
47. *Mr. Bruce Smith.*] Is not the Orient steamer shown upon the plan designed to scale? It is only put on to illustrate the real size of the bridge, which would otherwise hardly be apparent.
48. I understood that it was designedly put on to scale? Yes; but there are Orient boats of different sizes. That is a boat with about 100-ft. masts.
49. *Mr. Cohen.*] How far does Blue's Point project out beyond McMahon's Point, taking a line at right angles with the line of the proposed bridge? About 750 ft.

50. *Chairman.*] You have already, in regard to clause 18, indicated some additions which you desire to be made to the clause as printed;—are there any other alterations or additions in the other clauses to which you would like to direct the attention of the Committee? Yes; I have made several additions and alterations which I propose to recommend to the Committee, and I will deal with them seriatim. In clause 7, in lines 21 and 22, I propose to omit the words “in the opinion of the Engineer-in-Chief for Public Works.” I may say that this elimination is proposed on the ground of the objection of the Engineer-in-Chief of Public Works to undertaking such a responsibility. The elimination of the words will leave the promoters with the legal responsibility without the opinion of the Engineer-in-Chief. I would suggest that if it is determined to leave the responsibility with the Department that the Minister should be substituted for the words “Engineer-in-Chief for Public Works.” In clause 14, line 13, I propose to eliminate the words “of such by-laws,” and in the next line to omit the words “under the same,” and to add to the clause the words “that the same have been duly made and confirmed and are still in force.” On page 6, in lines 10 and 11, I propose to eliminate the words “Engineer-in-Chief for Public Works for the time being” and to substitute the word “Minister.” In the next clause—17—I also propose to omit the words “Engineer-in-Chief for the time being” at the end of the clause and to substitute the word “Minister.” In clause 18 the term “low-water mark” in line 27 should be “high-water mark.” In line 32 of the clause I propose to omit the words “Engineer-in-Chief for Public Works or to such other person as may be approved by the Governor for such purpose” and to substitute the word “Minister.” In the same clause in line 31, after the word “pier” I wish to add to the words “and the detailed drawings of all the proposed works.” In line 34 I propose to insert after the words “approved by him” the words “both as regards location and design.” I propose the following addition to clause 18:—

At the southern pier the group of pedestals at Dawes Point shall not encroach on the fairway of the harbour more than 100 feet measuring in the longitudinal direction of the bridge from the extreme point of the shore at Dawes Point, and if required by the Minister they shall not project at all beyond the extreme point of the shore at Dawes Point.

That is a provision in the Bill for the position of the pier marked red in plan D. I propose after clause 20 to introduce certain clauses for the protection of the Water and Sewerage Department, as follows:—

The protection of Sewers, &c.

21. The following provisions for the protection of the sewers, water-mains, and works of the Water and Sewerage Board, and of all house-services and connections in respect thereof, shall have effect, namely:—

1. The said Benjamin Crispin Simpson shall comply with and conform to all reasonable directions of the Water and Sewerage Board in the execution of the works, and shall not in any manner interfere with any of the sewers, water-mains, or works of the Water and Sewerage Board, or with any house-services or connections in respect thereof, without notice to and the sanction of the Water and Sewerage Board; and shall provide to the reasonable satisfaction of the Water and Sewerage Board, for the proper protection of and for preventing injury or impediment to any such sewers, water-mains, works, house-services, or connections, by reason of the works or any part thereof; and shall save harmless the Water and Sewerage Board and all owners of any such house-services or connections aforesaid, against all expenses to be occasioned by the works or any part thereof.
2. The said Benjamin Crispin Simpson shall be liable to make good, with all reasonable despatch, and to the satisfaction of the Water and Sewerage Board, all injury or damage caused by or resulting from any of the works to any such sewers, water-mains, works, house-services, or connections, as mentioned in sub-section (1) of this section; and the Water and Sewerage Board, or any owner of any such house-service or connection sustaining injury or damage, shall from time to time have power to recover the amount thereof from the said Benjamin Crispin Simpson, in any court of competent jurisdiction.
3. The approval by the Water and Sewerage Board of any work under the provisions of this section shall not exonerate the said Benjamin Crispin Simpson from any liability, or affect any claim for damages under this section or otherwise.
4. If the said Benjamin Crispin Simpson shall in any respect fail to comply with and conform to any such reasonable directions of the Water and Sewerage Board as are mentioned in sub-section (1) of this section, or shall fail to provide to the reasonable satisfaction of the Water and Sewerage Board for the proper protection of and for preventing injury or impediment to any such sewers, water-mains, works, house-services, or connections, as mentioned in the said sub-section, or shall fail to make good with all reasonable despatch, and to the satisfaction of the Water and Sewerage Board any such injury or damage to any sewers, water-mains, works, house-services, or connections as is mentioned in sub-section (2) of this section, the Water and Sewerage Board, or any owner of any such house-service or connection as the case may be, shall have full power and authority (in the case of the Water and Sewerage Board by their engineer, officers, workmen, and servants, and in the case of any such owner by his workmen and servants) to enter upon the works of the said Benjamin Crispin Simpson, or any part thereof, and to do all such acts and things and carry out all such works as may be necessary and proper for the protection, amendment, or repair of any such sewer, water-main, or other works, house-service, or connection as the case may be, and any and all costs, charges, and expenses incurred by the Water and Sewerage Board, or by such owner as the case may be, in the exercise of the powers in this sub-section contained shall be paid to the Water and Sewerage Board or to such owner as the case may be by the said Benjamin Crispin Simpson on demand, or in default may be recovered from the said Benjamin Crispin Simpson by the Water and Sewerage Board, or by such owner as the case may be, in any court of competent jurisdiction.
5. Otherwise than is herein expressly enacted the said Benjamin Crispin Simpson shall, in the construction of the said works, observe and comply with the provisions of the Metropolitan Water and Sewerage Acts, and the by-laws made by the Water and Sewerage Board under such Acts.

Inspection of Works.

22. It shall be lawful for the Minister and for the Municipal Council of Sydney and for the Borough of North Sydney, and also for the Water and Sewerage Board, at any time during the construction of the said bridge or approaches, or any works in connection therewith, to appoint an engineer to enter upon and inspect the same; and the said Benjamin Crispin Simpson and all persons acting under him shall afford all reasonable facilities in connection with any such inspection as hereinbefore mentioned.

Plans to be lodged.

23. For the purposes of such inspection as in the last section mentioned, the said Benjamin Crispin Simpson shall, before commencing to construct either the said bridge or the said approaches, deposit with the Minister, the Municipal Council of Sydney, the Borough of North Sydney, and the Water and Sewerage Board respectively, a copy of the plan or design of the same, together with a copy of the specifications and all necessary drawings.

In clause 21, which will become clause 24, I propose to substitute the word “Minister” for the word “Governor,” in line 8. In clause 22, line 16, I propose to omit the words “for Works,” the word “Minister” being sufficient; but in the marginal note, “Power to construct tramway,” I propose to insert the words “of Minister,” after the word “power.” I also propose, in the same clause, to omit the words “Engineer-in-Chief for Public Works,” and to substitute the word “him.” In the first line of clause 23 I desire to substitute the word “Minister” for the word “Governor.” Those, I think, are all the alterations I would suggest to the Committee.

B.C. Simpson. 51. *Chairman.*] It will be, of necessity, a point of great importance in connection with the bridge, that the Committee in the first instance, and the House afterwards, should be satisfied as to the absolute stability of the structure—that it will not be a work of a transient character, but for the permanent benefit of those who desire to use it;—are you in a position to give any direct evidence now as to the strength of the structure as compared with bridges of a similar character lately constructed in other parts of the world;—in a bridge which is required to carry not only passenger and vehicular traffic, but also tramway traffic, what strain should the structure be able to bear? The bridge will carry a general weight of live load of 50 lb. to the square foot over the 60 feet of the roadway, and also 100 lb. per square foot locally over every 75 feet.

3 Nov., 1893. 52. *Mr. Cohen.*] That, again, would be the moving load? Yes; that covers the weight of the tramway for main and cross girders. The bridge is specially designed to carry the heaviest description of tramway cars fully loaded. I have taken from the Departmental officers the heaviest load they ever provide for. I have provided for a car loaded with as many people as can possibly be packed into it. The margin of safety adopted would allow a string of loaded cars to pass over the bridge.

53. *Chairman.*] Such cars as are at present used in the electrical tram service in the Colony? Yes.

54. Does the Bill describe anywhere the materials of which it is proposed that the bridge is to be constructed? That is not in the Bill; but it provides that all the drawings shall be submitted to the Minister for his approval.

55. *Mr. D. Thomson.*] Are you prepared that the Bill should limit the position of the piers at a certain distance from the shore? The Bill does limit it.

56. On one side? On one side it limits it to the intrusion of 100 feet; but there is a span of 1,200 feet which would limit the pier on the other side.

57. While you put in the Bill that 1,200 feet, you propose, as a matter of fact, to make the span 1,600 feet? Yes; but the 1,200 feet will cover all the navigation courses, and therefore no advantage can be obtained by making a longer span compulsory.

Henry Deane called in, sworn, and examined:—

H. Deane. 58. *Chairman.*] You are Engineer-in-Chief for Railways? Yes.

3 Nov., 1893. 59. Have you examined the plans connected with the project in the Bill before us? I have seen the plan which was submitted to me by Mr. Simpson some little time ago; also, a modification which it is now proposed should be adopted in regard to the pier on the Dawes Point side.

60. Would you like to make any general statement with reference to the question whether the bridge proposed would or would not occupy the only site available for a railway bridge:—I may explain that one of the objections raised to a bridge to connect two sides of the harbour has been that the only site available for a railway bridge might be monopolised;—in your opinion would the proposed scheme monopolise the only railway bridge site? That was my objection last year when these bridge schemes were before the respective Select Committees. I pointed out that if they went across from Milson's Point to Dawes Point, touching approximately on the points shown in plan A, there would be no room for another bridge. I indicated that, in my opinion, if a bridge were made across the harbour to North Shore, it would only be a matter of a short time when a railway bridge would be insisted upon, and that therefore the location of the road bridge should be such as to permit of a railway bridge, and that the bridge should be so designed as to combine the two schemes. Mr. Simpson has pointed out to me that, with his location, in his opinion a railway bridge could be added in future alongside the other bridge, and I think it could be done without difficulty.

61. You think, then, that the scheme at present submitted, is, in respect of future railway communication, superior to the scheme submitted to you previously? Yes, I do. It does not clash with a railway bridge; whereas a railway bridge from Milson's Point to the extreme point of Dawes Point would certainly clash with it.

62. The present scheme proposing to take a bridge from Dawes Point to McMahon's Point would not interfere with a future railway bridge to Milson's Point? No; with a future railway bridge to McMahon's Point. I do not recommend a railway bridge to Milson's Point. I think that that would be the wrong place to which to take it.

63. The present scheme would not interfere with a take-off on either shore? I think a railway bridge could be added very well. Of course it would almost necessitate the adoption of the same design. I do not know whether it would be the most economical, but it might be. For a road bridge you can adopt the suspension principle, whereas for a railway bridge it is not so desirable. However, I am not offering any objection to it. It is not exactly a suspension bridge nor a cantilever bridge. It is a combination of the two principles. Looked at from a certain point of view it is more like a suspension bridge, but from another point of view it is more like a cantilever bridge. No cantilever bridge I know of is designed in exactly the same way as is this bridge. It is a design of a very special character which I have not at present investigated.

64. Are you disposed to offer any observations on the proposals as regards the Bill itself? As regards the Bill itself, I would suggest that the word "Minister" should be substituted for any officer of the Department. Mr. Darley and I agreed as to that. We recommended in the case of another Bill that words should be inserted to the effect that the plans should be submitted for approval before the commencement of the work, both as to design and location. An important reason for that is, I may mention, that Mr. Simpson has altered the position of the pier shown in red on plan D. It is shown just at the point. I think it might prove to be better to put it a little round the point where the baths are, in order to suit the future railway. It would not interfere with the bridge in any way or introduce any difficulty, but it might make it much easier for future railway purposes.

65. *Mr. Bruce Smith.*] That is as Mr. Simpson now suggests? It would be rather to the west of the place named. It has already been pointed out verbally that various City authorities, the Railway Commissioners, and the Water and Sewerage Board, as their interests may possibly be interfered with, should be consulted. There is one other matter I wanted to mention, and it may, perhaps, assist Mr. Smith in his questions. The objection which I made last year and which I mentioned just now, was to a bridge from Milson's Point to the extreme point of Dawes Point. Mr. Kenwood has modified his plan of last year.

He

H. Deane.
3 Nov., 1898.

- He now has one span over the harbour with high end arms. The northern arm of his cantilever goes right over the railway property, and right over Alfred-street, and lands, it may be, 5 chains to the east of Alfred-street. That avoids the interference with the railway property and the railway expansion which, as I showed last year, was so objectionable. He also brings the southern pier, as I stated, at a considerable distance to the south-east of the position where he landed according to his scheme of last year.
66. *Chairman.*] Towards the old A.S.N. Company's wharf? Yes. I only wanted to say that my objection, from an engineering point of view, is considerably modified by the position of that pier. The bridge would not interfere so much with a railway bridge across to McMahon's Point.
67. *Mr. Bruce Smith.*] Taking the span right over the harbour, he has avoided the obstruction to the railway property which you so much objected to? Yes, very largely.
68. You have spoken about Mr. Kenwood's scheme;—I would like to ask you, with regard to the Dawes Point end, what is the military aspect of the work? That I cannot say. I cannot give any evidence in regard to the military question.
69. Going from that to Mr. Simpson's plan, let me ask you generally this question: Assuming that the time has arrived for some connection between Sydney and North Sydney, what do you think is the best form of connection to have? I think the bridge connection is decidedly preferable to any other, if there is any necessity for it.
70. But assuming that the time has arrived for some road connection between Sydney and North Sydney, what form of connection, in your opinion, is it best to have? A bridge; I do not think there can be two opinions about that.
71. *Chairman.*] In preference to a tunnel connection? Yes, decidedly.
72. *Mr. Bruce Smith.*] Assuming that the time has arrived to connect the two sides, and that a bridge is the best means of connection, what points on either side of the harbour do you think are best adapted to the purpose—what route do you think the bridge should take? I would go from Dawes Point to McMahon's Point, because that lends itself to the construction of a railway bridge. That is the location for a railway bridge, and I think a road bridge ought to adopt the same course.
73. Then, as I understand you, the route Mr. Simpson's proposed bridge takes is the one you think best under all the circumstances? Yes, speaking generally.
74. *Chairman.*] Having regard to railway construction only, or having regard also to the existing tramway arrangements? I do not think it matters so much from that point of view. It is the railway location that I lay so much stress upon.
75. I suppose you recognise that if the time has arrived for a bridge connection, it is of some importance that it should fall in there with the railway line at a convenient point? Yes; it has always seemed so to me.
76. And which do you think the best point, having regard to railway purposes, for the bridge route to take? McMahon's Point.
77. Then, both for the purposes of taking a railway bridge side by side, so as to minimise obstruction to harbour traffic as far as possible, and also for the purpose of taking a railway to the best point on the other side, the route proposed in Mr. Simpson's Bill is, you think, the best? Yes. If you have obstruction of any description to the harbour traffic it is desirable that that obstruction should be confined to one spot. The railway location I regard therefore as of paramount importance, and from that point of view the proposed bridge is in the right location.
78. In your opinion, if such a bridge be constructed, it should provide for a tramway? Yes; decidedly there would be no difficulty about that.
79. Would not this route for tramway purposes also fall in with the most convenient point with the railway? Yes; it would fall in with the railway very well, and it would also connect with the North Sydney tramway system very well.
80. You mean the tramway on the North Sydney side? Yes.
81. But how would it fit in with the tramway construction on the Sydney side? You would have to carry it down to Wynyard Square and connect it with the George-street line at Wynyard-street, or you could take the route along York-street.
82. *Mr. Bruce Smith.*] Do you see any objection to that? No.
83. Would not the connection on this side fit in with the tramway line as being now constructed? Yes; it would fit in very well.
84. Connecting the two systems—the one on the other side with that on this side? Yes.
85. The plans of this bridge have been submitted to you, have they not? I have seen plan B, and before the Committee sat this afternoon I saw plan D.
86. Do you consider that the engineering arrangements, as exhibited by these plans, are satisfactory;—do the plans represent a satisfactory way of carrying out this want, making allowance for the modification of the plan with which you are acquainted? As far as I can see it seems to be quite satisfactory.
87. *Chairman.*] Supposing you were constructing a railway bridge across the harbour, what height would you provide between the under side of the bridge and high water? 180 feet was the conclusion I came to before when going into the matter.
88. You think, after making due inquiry, that that will suffice for the requirements of the shipping? Yes.
89. It would not be worth while to obtain a little further head room to go to greater expense? No; that was the conclusion I came to. I discussed the matter with Mr. Darley and we agreed that 180 feet was necessary, and that it would also be sufficient.
90. *Mr. Bruce Smith.*] The fact is that, for every foot higher you make the bridge you compel every individual or vehicle to rise that height at each approach? Yes. What I should consider most about the matter again relates to the railway question. You have a grade at the approaches which I do not like at all. It is a grade of about 1 in 30. Still it is workable. I should insist on the grade not being steeper, and, if you had a greater headway than 180 feet, it appears to me that it would compel you to adopt a steeper grade than 1 in 30 on the southern shore. Consequently the headway of 180 feet is about the highest you can give.
91. *Chairman.*] In connection with a railway bridge? Yes; it is necessary at the same time to make a suitable connection on the southern side. There would, therefore, be no possible advantage to shipping in constructing a vehicular bridge at a greater altitude than 180 feet if its construction were followed by a railway bridge at that altitude? No.

- H. Deane.
3 Nov., 1898.
92. *Mr. Bruce Smith.*] With regard to the provisions with regard to span and height are they, in your opinion, suitable for the requirements of navigation subject to the proposed modification? I am not an authority on navigation, but I think it is quite clear from a common-sense point of view that the larger the span the better it is, and if you keep the southern end of the span so as not to be obstructive the northern end would come in very well. I think the span is a satisfactory one.
93. You think that both span and height are satisfactory? Yes.
94. I understood you to say, in answer to the Chairman, that a railway bridge could be built alongside this one? I fully believe it could.
95. So as to constitute one bridge practically? Yes, especially with a view to the suggested alteration in the Bill, as to submitting designs beforehand.
96. Clause 18, as proposed by Mr. Simpson in his draft, says: "The main span of the bridge shall be carried by two groups of piers, and a plan showing the exact position of these piers, and detailed drawings of all the proposed works, shall be submitted to the Minister, and shall be approved by him as regards location and design";—assuming that the clause is amended in a way satisfactory to the Committee in those aspects, the proposal would be satisfactory? Yes.
97. Would you recommend that a tramway should be constructed over such a bridge? I think a tramway should be constructed.
98. Would you think it desirable that a tramway over a bridge, taking in only a short portion of a line, should be in the hands of private individuals? No; it would have to be worked by the Government.
99. From what you know of the traffic from North Shore, do you consider such a tramway would be convenient? Undoubtedly; if a bridge is made the tramway will be a necessity.
100. *Chairman.*] It will be advantageous to the Government tramway system? Yes; I have not the slightest doubt about that.

TUESDAY, 15 NOVEMBER, 1898.

Present:—

MR. COHEN,
MR. HAYES,

MR. J. C. L. FITZPATRICK,
MR. SAWERS.

MR. D. THOMSON.

J. C. NEILD, ESQ., IN THE CHAIR.

Bruce Smith, Esq., Barrister-at-Law, appeared on behalf of the promoter of the Bill.

Henry Deane recalled and further examined:—

- H. Deane.
15 Nov., 1898.
101. *Mr. Bruce Smith.*] Do you consider that a tramway connection across a bridge between the northern and southern shores of the harbour would increase the Government tramway revenue? I have no doubt it would.
102. You have seen the plan showing the proposed railway station at French-street? Yes.
103. In your opinion, could a station be constructed there on the railway? Yes; it could be constructed. There is a grade of 1 in 50, and it is therefore not a very suitable place, but there are worse places.
104. It is practicable as a railway-station site? Yes.
105. Could passengers crossing by that bridge get easy access to the railway station without the assistance of a lift? I should think so. They would simply have to walk down from the bridge to the railway station.
106. There would not be a very great incline? No; I do not know what the difference in the levels would be. I suppose there would be 20 or 30 feet difference.
107. The difference would be such that the distance could be traversed without a lift? I have no doubt it could.
108. In your opinion, lift communication is a disadvantage to railway traffic? Sometimes it is a necessity, but one would sooner do without it, of course.
109. *Mr. Cohen.*] You mean a passenger lift? Yes.
110. *Mr. Bruce Smith.*] You have said something about Mr. Kenwood's Bill. I should like to ask you one or two questions concerning it. In your opinion, would the private ownership of a length of tramway, as proposed by that Bill, be convenient or inconvenient to the public coming in between the two sections of the Government tramways? I do not believe the tramways could be conveniently worked with a section of private tramway coming in between them. Probably some arrangement would have to be made by the Government, either to take over the section or to work it.
111. You know that Mr. Kenwood's Bill in its present form provides for the right to construct a tramway over the bridge and for some distance on either side? It does, I believe.
112. In your opinion, would that be an inconvenience in the working of the Government tramway system? The Government would have to work the tramway on the bridge, I think, whatever was done.
113. Assuming that in connecting with Milson's Point under Mr. Kenwood's Bill a lift had to be provided for carrying passengers down 140 feet or so, in your opinion, which scheme would be preferable—that one, or one connecting at the station at French-street—quite apart from the question of route? I think that what I have said already will sufficiently answer that question. A lift is sometimes a necessity, but if you can do without it it is very much better.
114. You think the Bill before the Committee would have an advantage over the other Bill in this respect; that there would be no necessity for lift accommodation? Yes. Of course, people right down at the point might want to use a lift.
115. But, looking at the matter from the point of view of railway communication, you think it would be a decided advantage to avoid lifts if possible? Yes. They would, of course, have to go to a wayside station instead of to the terminal station. I do not know whether that would matter very much. In the case of Mr. Kenwood's scheme, they would go to the terminal station where the train started. There is some advantage in that, instead of going to a wayside station. On the other hand, this scheme has the advantage of not being encumbered with a lift.

H. Deane.
15 Nov., 1898.

116. *Chairman.*] But it would not make much difference whether persons got in the train at a wayside station or at the terminal station? It does not make much difference in short-distance traffic.

117. What difference does it make in long-distance traffic? In that case, travellers like to choose their seats at the terminal station, and to avail themselves of the facilities thus offered for arranging their luggage. If they get in at an intermediate station they have to take what accommodation they can get.

118. *Mr. Bruce Smith.*] As a rule, in the case of this particular line, the traffic would be suburban traffic? Yes; and in that respect it would not make much difference whether persons got in at a wayside station or at the terminal station.

119. *Chairman.*] If the connection were made at French-street instead of at the terminal point, that would be the more important station of the two as regards the quantity of traffic;—if, for instance, all the city traffic went to the station at French-street, there would really be more traffic there than at the present terminal station? That is very likely, but it is difficult to say.

120. *Mr. Bruce Smith.*] Have you formed any opinion as to the merits of a tunnel under the harbour as compared with a bridge? Do you mean for road or railway traffic, or for pedestrian traffic?

121. I mean for all classes of traffic? It makes a great deal of difference what kind of traffic you are providing for.

122. Will you deal with the several kinds of traffic, so that the Committee may become aware of your views? For road traffic, I should say decidedly that a bridge was preferable. I should not think there could be much question about that.

123. And for pedestrian traffic? The same applies to pedestrian traffic, generally speaking. With regard to railway traffic, it depends very much upon the points you wish to connect.

124. I am supposing the conditions we have before us;—take the railway traffic? If the connection were made by a tunnel the northern end would come above the surface at Lavender Bay on practically a level.

125. I am talking of the tunnel proposal before Parliament? I did not know you were referring to that.

126. In your opinion, is that a practicable scheme? It is quite practicable.

127. With lifts at either end? Yes.

128. When you say practicable, you really mean possible? In London, not to speak of other places, there are such connections.

129. But in your opinion, looking at the question from the point of view of convenience, would such a connection compare for a moment with a bridge connection? Taking my own case, if I were crossing the harbour, I would sooner go by boat or by bridge.

130. Looking at the matter from the point of view of the convenience of the public, who would have to descend in a lift, cross under the harbour by tunnel, and then ascend by lift again, would such a scheme, in your opinion, be nearly as convenient to the public as crossing on a level by means of a bridge? No; it would not.

131. And if, in addition to that, the tramway along George-street could be continued over the bridge to connect at almost the same level as the railway, could there be any comparison between the two schemes in point of convenience? No; the connection with the city south of the Post Office, or Wynyard Square, would be much more convenient probably. If the bridge were north of that, in order to go over it, people would have to rise a considerable height—they would have to go up Church Hill, for example.

132. You are speaking now of vehicular traffic,—I was referring to the tramway system? I am inclined to think that if people found the bridge inconvenient they would cross by boat, and not by tunnel.

133. Assuming that the tramway were constructed over the bridge to connect as proposed at French-street, and that were inconvenient, the next most convenient thing would be to cross by a boat? Yes; I think so. It remains to be seen, of course, but that is my own opinion. Does it not depend very much upon people's fancy—whether they prefer to travel over or under ground?

134. I am dealing with the question of convenience, upon which I consider that you, as an expert, can give us information. I ask you to assume these things: first, a bridge with a tramway across it from George-street; secondly, that the tramway is taken down to Circular Quay with boat communication at Milson's Point; and thirdly, a tunnel under the harbour, which has to be approached by two lifts—approached by one, and left by another;—of those three schemes, which do you consider the most convenient for the general public? I should say, decidedly, that the bridge would be.

135. Which do you consider the next? I fancy the next most convenient method is the present method of going over by boat.

136. The tunnel you would place last in the order of convenience? I have very grave doubts about the convenience of a tunnel.

137. *Chairman.*] There would not be much difficulty involved in running the proposed bridge from George-street at Margaret-street—there would be rather a steep grade, but the distance is short? There would not be very much trouble about that.

138. So that, practically, you might say that the bridge could come from Hunter-street instead of from the Post Office? Yes; I have no objection to include Hunter-street.

139. *Mr. Bruce Smith.*] What length of approach would a tunnel under the harbour involve? I could not tell you from memory what the distance would be from the Post Office to Milson's Point.

140. Assuming that the distance from inlet to outlet would be $1\frac{1}{4}$ mile, the tunnel being 20 feet in width, what would you say about that—I am talking now of a road tunnel from the point of view of public convenience and comfort? It is a very long tunnel.

141. How long, in your opinion, would it take ordinary traffic—not train traffic—to get through that? Ordinary traffic would go, I suppose, about 6 miles an hour; it would, therefore, take twelve minutes. Heavy traffic would go only about two-thirds of that speed—say 3 or 4 miles an hour.

142. You have to assume mixed traffic, such as you get at the present time;—looking at the matter from the point of view of comfort and ventilation, and all those circumstances, what do you say about it? I think a tunnel like that could be ventilated very well. It also could be lighted up pretty well with glazed bricks and electric light; but it is not a very nice thing if it can be avoided.

143. Would it be damp? I do not see that it need be particularly damp. It would be made watertight, and with sufficient ventilation it could be kept dry.

144. What sort of experience have they had in the case of the Blackwall Tunnel, under the Thames? I have seen only the reports in the newspapers. I have seen no official or very trustworthy reports.

145. Then you do not care to speak about it? No.

146.

H. Déano.
15 Nov., 1898.

146. *Chairman.*] You have given very strong evidence, I think, before other bodies with reference to the inadvisableness of a railway tunnel for bringing the railway into the city;—you took strong objection to a tunnel in that case? With steam locomotion, yes.
147. Would not the same class of objection to some extent apply to a lengthy tunnel for vehicular traffic, omitting the question of smoke? No; I think it would be quite different. A long tunnel, such as that suggested, would have to be properly ventilated, otherwise the air would become very objectionable.
148. Could you indicate in any way what ventilation would be necessary? I believe it could easily be done with a fan.
149. *Mr. Cohen.*] You think there would be no difficulty in ventilating a tunnel? No great difficulty.
150. You would build your railway bridge on the east side of the proposed bridge, I take it? I think so, in order to keep clear of the southern road and approach.
151. Presuming that the pier of this bridge is on Dawes Point, your piers would of necessity be a little under water, and you would have a curve in the railway of about 3 chains? I should want Mr. Simpson, I think, to shift his pier a little further west, to make further room; but that is a matter of arrangement.
152. What is the least radius you could do with there? I always avoid anything sharper than 10 chains for a running line. We had on the mountains 8 chains, but nearly all those curves have been cut out.
153. With a pier 100 feet away from the shore it would be necessary to have a curve of 400 feet;—would you consider that sufficient? That would be for a road bridge—it would be 6 chains.
154. Could you utilise the proposed piers in any way for your bridge, or would it be necessary for you to have independent piers? We should want independent piers, or we should have to widen the piers shown.
155. Your piers would have to be alongside the piers shown? Yes.
156. Would you consider a span of 1,600 feet too much for a railway bridge built upon that principle? I have not gone in to the principle—it is somewhat new; but I have no doubt it is sound.
157. You would not object to a span of 1,600 feet for railway purposes? I should not like it perhaps, with a suspension bridge, but stiffened up in the way that bridge is, it is something more in the nature of a cantilever. If the bridge can be stiffened up sufficiently for railway traffic, I see no objection to it.
158. Have you considered the question how your railway bridge on the eastern side would affect the streets shown upon the plan—they are at an angle to the bridge;—how would the bridge affect them? It would go over those streets. The bridge approach would drop down for a road, but for a railway the grade would still be a rising one.
159. Unless you followed Mr. Simpson's grade you would not touch at French-street? No; I should make the connection with the railway at about the Bay Road Station.
160. If you are going to follow a different grade from that of Mr. Simpson on your northern side with your railway bridge, then the statements we have heard concerning the station at French-street could not apply? That would not affect the railway at all. What you are referring to has to do with a connection between the railway as it stands and the proposed tramway.
161. But you were referring, I thought, this morning to a station on the present railway;—if there is to be a station at French-street, and if you do not follow the grades shown by Mr. Simpson, you will be higher. Under those circumstances, how are you going to get your approach to the station? It would be a station for access to the tramway, not to the railway. The tramway would connect with the present railway at French-street. The railway, if carried across the harbour alongside the proposed bridge, would rise over it, and connect with the railway at Bay Road.
162. I understood you to say that the connection with the tramway would be somewhere in the neighbourhood of Wynyard Square? Yes.
163. You propose to extend the cable-tram in that direction? If the line remains as laid down there now, it will be an electric line. I did propose, some years ago, a cable-line down Erskine-street. It would be a branch from the George-street tramway, and the traffic could be arranged so as to run right through.
164. You think that the site indicated would be about the best site for a railway bridge? Yes.
165. That means a railway bridge to connect with the railway system on this side? Yes.
166. Could that connection be made, supposing the Hyde Park scheme were adopted? To bring the railway into Hyde Park you would have to go round past the Town Hall and come across with a curve into the Park.
167. *Mr. D. Thomson.*] I understand that you have no objection to the proposed bridge if the pier, as proposed, is moved slightly, as regards the possibility of running a railway bridge alongside of it? I see no objection to that.
168. Neither to the bridge itself across the harbour, nor to the curve after reaching the land? No; I think that all that can be arranged to suit a roadway and railway.
169. Are you prepared to say whether you favour a pier on Dawes Point, or one projecting further into the harbour than the point, because it might be inside the point, although in water? I think without doubt that it would be better to keep the waterway clear.
170. Entirely clear? If possible.
171. Assuming that the pier is not extended beyond Dawes Point, where would the 1,200 feet come to on the opposite side;—would it come clear of the fairway? It would be north of a line connecting Milson's Point and Blue's Point.
172. Then you would consider that if one pier were fixed at Dawes Point, and the other were 1,200 feet beyond it, the fairway would be properly preserved? Yes.
173. You spoke of 1,600 feet being rather a lengthy span for such a bridge;—do you know what the nature of the bridge connecting the New Jersey shore with New York is? I do not know what was ultimately decided, but I know that it was proposed to have a span of about 3,000 feet.
174. You do not know that it is a suspension bridge? No, I do not; but it was proposed to make it a suspension bridge. A short-span suspension bridge is not suitable for a railway, because the train in passing over sets up an inconvenient vibration. The load of the train is a considerable proportion of the dead load of the bridge. The longer the span, the heavier the bridge, the less becomes the live load as compared with the dead load, and the less effect it has. Consequently, when you get to a span of over 3,000 feet, or less than that, the dead weight of the superstructure of the bridge is so large in proportion to the weight of the train moving over it, that all the vibration due to the train will be absorbed without producing any inconvenient effect. Whether that proper limit is arrived at at 1,200 feet is a question; I am not sure that it is. I am not sure that I would recommend a suspension bridge of 1,200 feet span for a railway; but this bridge is stated not to be a suspension bridge.

175. You have not made any examination which would enable you yet to say that this system of bridge would be satisfactory for the traffic it would have to carry? No; I have not yet had an opportunity.
176. I presume you do not know that if traffic such as that going over the Pyrmont Bridge were developed upon this bridge the structure would be sufficiently powerful for it? It is merely a matter of design. It is in the case of a railway train going over that any difficulty might occur.
177. Do you know whether the bridge from New Jersey to New York has been carrying six lines of railway? I cannot say from memory.
178. The connection you suggested with Hyde Park would be a very costly one, would it not? Yes, it would be costly. It would come to about the same thing as connecting with Redfern.
179. Would it not have some effect, if such a thing were contemplated, on the question of bringing the city railway in by the eastern or western route? I do not think so. The question of bringing the railway into the city is one which necessitates a spot being chosen with a considerable area, and you cannot get sufficient space on the western side of the city.
180. *Mr. Sowers.*] In answer to a question by Mr. Bruce Smith as to the engineering features of the bridge, you said, "As far as I can see, it seems to be quite satisfactory";—are we to understand, from what you said just now, that it would be stiff enough to prevent any vibration to speak of from any likely traffic—that is, tramway traffic or road traffic? I have not the slightest doubt that the details can be designed so as to make the bridge quite stiff enough.
181. Do you know enough of the plans to say whether the bridge would be substantial enough in a general way to be a long-lived bridge? It would have to be.
182. It would not be flimsy in character? No. You will see that, according to the provisions of the Bill, the design has to be approved by the Department, and a flimsy structure would not be passed.
183. *Mr. Bruce Smith.*] There is nothing about the bridge, so far as you have examined it, to suggest any doubt to your mind as to the stability of the proposed structure? No; or as to the possibility of designing it, so as to make it perfectly safe.
184. *Chairman.*] Regarding the possible construction of a railway bridge alongside this road bridge, you have already said that it was quite clear that this proposal would not monopolise the only site for a bridge connection, and that therefore a railway bridge alongside would be a possibility? Yes.
185. With reference to the position of the piers on the south side, would you, in constructing a railway bridge, be able to keep your railway piers back to the land at Dawes Point, or would you have to take them out into the water? They would have to be in a line with the piers proposed in connection with this bridge.
186. They would not be further out? Not beyond the extreme point. One or the other might have to be in the water, but not beyond the extreme point—not north of it. The point is a narrow one, and there might not be sufficient width there for the double piers without going into the water, but they would not go beyond the point.
187. They would not be north of a line drawn east and west and touching the point? No.

H. Deane,
15 Nov., 1898.

Cecil West Darley called in, sworn, and examined:—

188. *Chairman.*] You are Engineer-in-Chief for Public Works? Yes.
189. Have you had a copy of this Bill which is before this Committee for consideration? Yes.
190. Have you seen the plans of the proposed bridge? Yes; the outline plans.
191. Have you seen plan D, showing the alternative positions for the piers on the south shore, marked in red and black. You will see that the piers marked in black are about 100 feet from the point, while the piers marked in red are on the water-line;—which position do you think will be the most convenient, having regard to the traffic of the harbour? The position of the piers shown in red.
192. The piers if constructed there would not necessarily constitute any obstruction? No; there would be no obstruction.
193. The bridge, therefore, as designed with southern piers in that position, would form, in your opinion, no obstruction to the fairway of the harbour? No.
194. With reference to the height of the bridge, namely, 180 feet, in the centre above high water for a minimum length of 600 feet in the centre of the span;—would that be a sufficient height to accommodate large vessels which might require to pass under? Yes, with that height over high water.
195. It would really give you at low water about 185 feet? Practically. It would enable the highest masts which have been in the harbour, I think, to pass underneath.
196. *Mr. Bruce Smith.*] In your opinion is it desirable to have a road connection between the north and south sides of the harbour? I think so.
197. Why do you think that? The traffic is increasing so much that I think that the day has come when we must have increased means of communication between Sydney and North Sydney.
198. Is it not desirable that the steamer traffic should be relieved as much as possible? Yes; there is a perfect congestion of traffic there now, and considerable danger to life. Even if the bridge be put up it does not mean that the ferries would be run off, because a large quantity of traffic would still go to the ferries. The traffic to the lower portions of Milson's Point and Lavender Bay would still go that way; but the ferry traffic from Circular Quay is now increasing so much that it has become dangerous and difficult to manage it. While there would be room for a certain amount of ferry traffic even with a bridge, I think it is desirable to relieve the Circular Quay of a large portion of it.
199. Assuming that a road connection has become necessary, what do you regard as the most satisfactory solution of the difficulty? A bridge.
200. As compared with a tunnel provision, what are the advantages of a bridge? There is a great deal to be said in favour of a bridge in preference to a tunnel. I do not think a tunnel will ever be very popular, although for the purposes of electric traffic it is a great success.
201. What are the advantages of a bridge over a tunnel generally? In the case of a bridge you cross in the fresh air, and in a tunnel you do not; and unless special precautions are taken there is always a certain amount of difficulty in getting proper ventilation.
202. Supposing a tunnel ascended and descended by lift provision;—would that, in your opinion, be a disadvantage to the large amount of traffic which there would probably be across the harbour? For through traffic. If there were a tramway, you could get down into the tunnel by that means. 203.

C. W. Darley.
15 Nov., 1898.

- C. W. Darley. 203. But it would be necessary to approach it at a certain distance? Yes; that would be the case also with a bridge, but the distance would not be so great.
- 15 Nov., 1898. 204. If the approach were comparatively near to the harbour crossing, it would be necessary to descend or ascend by lift? Yes.
205. Is not that a further disadvantage? Not to passenger traffic. It is easily worked. You go down into the Liverpool tunnel by lift.
206. Has the bridge not the advantage of enabling the two tramway systems to be connected? Yes, decidedly. You can have direct communication between the two systems by a bridge.
207. You are aware that it is proposed to have a span of 1,200 feet, with piers as indicated on plan D, one either on the point or at a short distance from it, and the other in such a position as to be within a straight line drawn from Milson's Point to McMahon's Point. You would have no objection to that so long as it did not interfere with the shipping? No.
208. If 180 feet were provided above high-water mark for a distance of 600 feet, that would be satisfactory as regards headway? Yes.
209. With a further provision that there should not be a less height than 165 feet at the piers? Yes; that would be ample for all ordinary navigation. The larger class of traffic, of course, would keep in the centre.
210. You know that the gradient would be 1 in 27½? Yes.
211. That is satisfactory for road traffic? Yes.
212. In your opinion, is a connection between McMahon's Point and Dawes Point preferable to a connection between Miller's Point and Dawes Point? I have not gone into the question very closely, but so far as I have looked into it, it does give the most direct communication.
213. Assuming that the railway bridge takes the line which this bridge proposes to take, it would be better for the two bridges to cross alongside than to have two bridges crossing the harbour at different angles? Decidedly.
214. In your opinion, would it be desirable to have a section of the tramway system in the hands of a private company—that is, a section between the tramways on the north shore and on the south side of the harbour? No, I do not think it would be wise to have a break in the system of management.
215. So that if there be any tramway connection across any proposed bridge, in your opinion, it should be under the same management as the system on the two sides of the harbour? Yes, it should be all under one control.
216. *Chairman.*] The span of the proposed bridge would be greater in length than the distance between Miller's Point and Balmain, would it not? The two distances are about equal. It is about 1,200 feet from Miller's Point to Balmain.
217. But if the bridge were constructed with a span of 1,600 feet, instead of 1,200 feet, the distance would be greater in the case of the bridge? Yes.
218. *Mr. D. Thomson.*] Should any pier on the southern side be kept within Dawes Point, in your opinion? I should not like to see any pier projecting beyond the point.
219. You have not tested the stability of the proposed structure? I have not seen the detail drawings; I have seen only an outline sketch.
220. *Chairman.*] Are there any provisions in the Bill itself which you think, in the public interest, should be amended? I had an interview with Mr. Simpson, at which I called his attention to some things which I thought should be altered. For instance, the term "Engineer-in-Chief for Public Works" is used in different portions of the Bill, and I said I thought it ought to be altered to "Minister." I also said that "Minister" should be defined in the interpretation clause. I also directed attention to clause 7. That clause provides that wherever the bridge would, in the opinion of the Engineer-in-Chief for Public Works, have the effect of interfering with the traffic over the highway, the promoter should provide a substituted way to the satisfaction of the body then responsible for repair and maintenance. In that case I think neither the Minister nor the Engineer-in-Chief for Public Works would do. It seems to be a matter for the Corporation. There would be a sort of clashing between the Minister and the Corporation. The Minister, for instance, might say there was sufficient headroom, and the Corporation might say there was not. Those were the only points I raised.
221. *Mr. D. Thomson.*] You have said that you preferred a connection with McMahon's Point rather than with Miller's Point;—is that because of the easier junction of the tramway system with the railway system? Yes. I have not studied the question closely; but so far as I have studied it, that would be the better connection for both railway and tramway purposes.

Benjamin Crispin Simpson recalled and further examined:—

- B. C. Simpson. 222. *Chairman.*] I believe you desire to modify the evidence you gave in reply to Questions 8 and 9? Yes. The questions and answers are given as follows:
- 15 Nov., 1898. 8. You propose, I understand, to increase your span? Yes; I have left the clause otherwise as it stands, because it is my intention to carry out the bridge in that way. If the Committee desire I shall be happy to amend the clause, but it is really unimportant. The plan which Mr. Darley has had prepared shows that if the piers were brought in from 200 to 250 feet it would not interfere with the courses of the steamers. My reason for keeping the piers in that position are engineering reasons. Although it adds to the cost of the span and superstructure, we get a better foundation. You could put very satisfactory piers further out, but they would be at a great depth.
9. You are referring to the piers on the right-hand side;—are they covered by Blue's Point? Yes. Although I left myself power to put the piers in the position named in the Bill, I might not avail myself of it, because of the engineering difficulties. The answer I would substitute for those given is in these terms: Plan C shows an increased span, as I may probably keep the northern pier in its present position to avoid difficulties in the foundations of that pier; but I have left a minimum span of 1,200 feet unaltered in clause 18 of the Bill, as this span covers the whole of the fairway of the harbour, as will be seen by drawing a line on plan A between Milson's Point and Blue's Point. As therefore the 1,200 feet span covers the fairway, and clause 18 provides that the position of these piers shall be approved by the Minister before construction, I consider it better to leave the minimum span in the Bill as it stands, that the decision of the Minister may not be unnecessarily hampered in the selection of a site that may also be considered convenient for a railway bridge by the Engineer-in-Chief for Railway Construction.

223. *Mr. Cohen.*] I wish to direct your attention to Mr. Deane's statement that it would be necessary to have a 10-chain radius; I suppose there would be no difficulty in that? No.
224. You are prepared to make that alteration? I should explain that the railway will only follow the direction of the road bridge across the harbour. Directly the two bridges reach the shore they will be apart. The sharper the radius of my curve the less likely it is to interfere with the other work.
225. You will remember that this morning I asked Mr. Deane some questions in connection with the proposed railway station at French-street, and he said that he would have to go up to Bay-street to make the railway connection; in your answer to Question No. 3 you spoke of passengers joining the Milson's Point and Hornsby railway at French-street, Blue's Point Road? There are three connections involved. Two of these connections are by my scheme: One is the tramway which the Government are empowered to lay over my work, bringing passengers to the railway at French-street, and then the tramway itself would also connect with the North Shore tramway at Milson's Point. But if a railway bridge were built there would be a third connection, which connection would be quite independent of the tramway connection.

B. C.
Simpson.
15 Nov., 1898.

TUESDAY, 22 NOVEMBER, 1898.

Present:—

Mr. COHEN,	Mr. SAWERS,
Mr. J. C. L. FITZPATRICK,	Mr. D. THOMSON.
J. C. NEILD, ESQ., IN THE CHAIR.	

Bruce Smith, Esq., Barrister-at-Law, appeared on behalf of the promoters of the Bill.

Henry Gorman called in, sworn, and examined:—

226. *Chairman.*] You are a member of the firm of Hardie and Gorman, auctioneers and valuers? Yes.
227. Have you seen the plan of the bridge proposed by Mr. Simpson to be thrown across the harbour from Dawes Point to McMahon's Point? Yes.
228. Will you kindly look round the room at the plans A, B, C, and D, and say whether they are the plans you have seen? That is so.
229. I suppose the question of the land to be occupied by the site of the bridge on each side would be of more interest to you, and become more closely within your evidence, than any question of civil engineering? Certainly.
230. You possess a large knowledge of property on both sides of the harbour? Yes.
231. And necessarily a large knowledge of the movements of the travelling public from the north to the south? Yes.
232. In your opinion, would the position in which it is proposed to place the bridge be one convenient for the general traffic of the population on both sides? I think so.
233. It would not be so convenient as would ferry-boats for the lower level; but, in your opinion, it would be more convenient for the great bulk of the people? Yes.
234. Would the properties interfered with by the proposed bridge be of a specially valuable nature? No.
235. With reference to the traffic between the north and south side, which means of communication, in your opinion, would be the more convenient to the greater number—a bridge or a tunnel—regarding either as the exclusive means? I should certainly think a bridge.
236. Do you think a bridge would accommodate the greater number? Yes, and give greater satisfaction.
237. Do you think it would be more largely used than would a tunnel? A long way. I cannot imagine a tunnel being largely used. It seems to me to be against the spirit of the age.
238. In your opinion, persons would be more likely to stick to the ferry-boats than to plunge through a tunnel? Certainly. We have very little experience of tunnels here; but, at the same time, I think they are in opposition to what the people themselves desire.
239. You are aware that it is proposed in the Bill providing for the construction of this bridge that the Government should have power to run a tramway across? Yes.
240. Would that, in your opinion, add materially to the usefulness of the bridge, enabling the Government to connect their northern and southern tramway system? Certainly.
241. Have you any knowledge of the requirements of shipping in regard to headway? No.
242. Does your knowledge of local matters extend in any way to harbour requirements? No.
243. *Mr. Bruce Smith.*] I think you have studied this question of a connection between the North Shore and this side of the harbour for many years? Yes.
244. You have had many years' experience of the growth of population on the other side of the harbour? Yes; I have carefully watched it.
245. You have had large dealings in property on the other side of the harbour? Yes, very large.
246. What conclusion have you come to as to the necessity, in the first place, for a connection between the two sides? I have come to the conclusion that it is absolutely necessary to improve the means of communication between the north and south sides to meet the requirements of the large and growing population on the north side, and also to facilitate movements from the south to the north. Taking that view, it occurred to me that the very best means of communication would be a bridge, as now proposed, having the advantage of a connection between the Government tramway systems on both sides of the harbour.
247. Having regard to the course which shipping coming in and leaving the harbour take, in your opinion would it be possible, in the near future, to carry on a traffic across the harbour by means of ferry-boats? I think not; it is risky now. In the near future I think it will be positively dangerous.
248. Has the extension of the line from Milson's Point to Hornsby had any material effect upon the increase of population on that side? Yes, a very large effect. The population is growing now considerably.
249. In your opinion, some means of communication to supplement the ferry is absolutely necessary? Yes.
250. I understand you to have formed the opinion that a bridge is the best means of connecting the two sides? Yes; I think it will be most appreciated by the travelling public.
251. At what points on the two sides do you think it will be most convenient to the public to begin and terminate the bridge? I think it should go from Dawes Point to McMahon's Point.

H. Gorman.
22 Nov., 1898.

- H. Gorman. 252. That is the course this bridge is taking? Yes.
- 22 Nov., 1898. 253. In your opinion, as a citizen of many years' standing, do you think it would be desirable to give up the right to run a tramway over the proposed bridge to a company? No.
254. Or to have a section of tramway breaking in between two portions of the Government system? No; I understand the Government refused to sanction that years ago, and I think very wisely. I presume they would refuse equally in the future.
255. You think the provision in this Bill, preserving to the Government the right to run a tramway over the bridge, is a very proper one? I regard it as one of the strong reasons in favour of this proposal.
256. Have you studied the plans in order to ascertain the gradient for the tramway, and also for the general traffic? Only in a general way—not in any special way.
257. Which route for a bridge would interfere least with valuable property—Dawes Point to McMahon's Point, or Dawes Point to Milson's Point? Dawes Point to McMahon's Point.
258. If it were a question of taking a bridge from Dawes Point to McMahon's Point, or from Dawes Point to Milson's Point, which do you think would best serve the interests of the general public, having regard to future settlement and the enlargement of population? I think with regard to the future, the proposal to go to McMahon's Point is the better one, because you do away with the necessity for lifts. If you went to Milson's Point it would necessitate the use of lifts.
259. *Chairman.*] There is a large development to the north-west of McMahon's Point? Yes; and it is growing.
260. *Mr. Sowers.*] The bridge you favour would give a better connection with the Hornsby line? Yes; unquestionably.
261. *Mr. D. Thomson.*] To approach either bridge you would have to come by practically the same road? Yes.
262. *Mr. Bruce Smith.*] But in the case of this bridge you would avoid a tremendous dip and rise? Yes; the route proposed is the more direct, and is in every way more desirable.
263. There is a more continuous level? Yes.
264. Is the building and growth of population greater to the west or to the east after you have crossed the harbour? It has been greater to the east; it is greater to the west now. I think the east has extended pretty much as far as one might expect it would; but the west affords greater possibilities, and is being more largely availed of now.
265. *Chairman.*] The route you favour would absolutely strike the tramway route? Yes.
266. *Mr. D. Thomson.*] Do you consider that settlement on the railway line to the north has nearly reached its maximum? No; I think it has scarcely begun.

Francis Hixson called in, sworn, and examined:—

- F. Hixson. 267. *Chairman.*] You are President of the Marine Board? Yes.
- 22 Nov., 1898. 268. You have a very large and complete knowledge of the requirements of navigation in the harbour? I should have.
269. Have you seen the plan of the proposed bridge showing the suggested removal of the southern pier from a distance of a hundred feet from Dawes Point right on to the Point? I have not seen the plan before, but Mr. Simpson mentioned the matter to me. I approve very much of the alteration.
270. Would the removal of the pier in question to the foreshore of Dawes Point remove, in your view, any obstruction which the proposed piers might be expected to offer to the free navigation of the harbour? I think that by the suggested alteration all objections on that score have been removed.
271. You are aware that it is proposed that a distance of 600 feet in the centre of the bridge should have an altitude of 180 feet above high water? Yes.
272. In your opinion would that elevation be sufficient to meet all reasonable requirements of navigation? Certainly, to meet all reasonable requirements.
273. Occasionally, a vessel with unusually high masts might require to strike her top-gallant masts, but those cases would be very rare? That is so.
274. There would not, therefore, be, in your opinion, any justification for going to a large expense to achieve a higher elevation? I should think that a headway of 180 feet at high water and 185 feet at low water would meet all reasonable requirements.
275. As to the position of the northern pier, it would be within a line drawn east and west from Blue's Point to Milson's Point? Yes.
276. Suppose that pier were brought out even as far as the pencil-mark shown upon the plan, would its position offer any extraordinary obstruction to the navigation of the harbour? Not to navigation up and down the harbour, but it might obstruct to a little extent the small crafts using Lavender Bay.
277. They could go on the other side of the pier, could they not? Yes.
278. Is it the practice at the present time to moor vessels near the proposed site of the pier on the northern side? No, it is not.
279. Is there any rule of the harbour against it? Yes; any fairway is objected to for anchorage purposes.
280. But, so far as the access of small craft to Lavender Bay is concerned, the northern pier might be an obstruction? A slight obstruction.
281. Vessels which would seek admission to Lavender Bay would be either harbour steamers or small coasting crafts? Pleasure-boats and harbour steamers mostly.
282. In your view, a pier in that position would not offer any serious obstruction to navigation? No; at the same time, I should like to see it in as close to the Point as possible. I make no objection to the pier coming out to the point shown, but the closer it is in to the Point the better I shall be pleased.
283. So far as head-room is concerned, there would be abundance of head-room for craft which might desire to navigate that particular part of the harbour? Yes; the only obstruction would be the pier itself.
284. It would be no greater obstruction for craft of the kind to which you refer than would the ordinary traffic backwards and forwards? No; the only thing is that traffic is constantly moving, whereas the pier is there always.
285. But in view of the large convenience which bridge communication would afford to inhabitants on both sides of the harbour, you consider that the small possible inconvenience to small craft should be no reason whatever for objecting to the construction of a bridge with a pier as indicated? I do not think so.
- 286.

F. Hixson.
22 Nov., 1898.

286. You know that it has been for many years contemplated to throw a railway bridge across the harbour in about the position of the proposed bridge? I do.
287. Any railway bridge thrown across the harbour in this locality would, of necessity, be quite as great an obstruction to harbour traffic as would the proposed bridge? I think more so.
288. Will you kindly explain why you say more so? Because I fancy a railway bridge would require to be stronger. It would probably have more piers supporting it. This one-span bridge, to my mind, is about the best description of bridge that could be designed for the purpose.
289. *Mr. Bruce Smith.*] I suppose it would be only American ships, with exceptionally tall spars, which would require to house their topgallant masts, or royal masts, in order to get under the bridge? Yes, mostly.
290. Would it be costly? I have heard an estimate given; but I think the cost has been overstated. I should think it would be only a trifling expense. As a rule, the crew would be able to do the work themselves.
291. Without any additional expense to the ship-owners? I should think so. Possibly skilled labour from shore might be employed to save time.
292. But the total expense would be covered by one or two pounds? Yes, by a few pounds.
293. Are there, in your experience, many ships coming into the harbour which would require a greater headway than 180 feet? Not many; a few.
294. *Chairman.*] And it does not necessarily follow that they will desire to go to the upper harbour? No; they might go to Circular Quay, or Woolloomooloo Bay.
295. I suppose you recognise that in providing another 10 or 20 feet to accommodate every ship that may come into the harbour, you would be causing vehicular and pedestrian traffic to rise and fall the same distance? I quite realise that. 180 feet of headway would be a reasonable height for all conditions of traffic, in my opinion.
296. *Mr. D. Thomson.*] In your opinion, any pier on the southern side should be covered by Dawes Point? I would rather that that were so. I should like to see the pier either on the Point or inshore of the Point. The Point, in fact, should protect it.
297. As represented by the pier shown in red on plan D? Yes.
298. From your knowledge of the harbour traffic, is it, in your opinion, most important that that Point should be kept free from obstruction? I think so.
299. You have already said that the other pier indicated on the plan would be sufficiently out of the fairway? For the general up and down harbour traffic.
300. Even if a vessel or steamer were forced over there from any cause, would you consider the pier any great obstruction? The only interference or obstruction would be the pier itself. It is best to have clear water altogether; but I should not regard the pier as any great impediment, especially in these days of steam.
301. That is your sole reason for saying that you would like to have the pier in as close to McMahon's Point as possible? Yes. The great objection to these piers in the harbour would be in thick or foggy or squally weather, when a ship might be in difficulties for a short time. But in broad daylight the piers would offer no obstruction to speak of.
302. You said you considered 180 feet sufficient headway;—possibly you are aware that the headway drops to 167 feet at the piers? Yes.
303. You would not consider that an objection? No, not if there were a good width with a headway of 180 feet as appears on the plan. The fact that the bridge drops to 167 feet at the piers is not a matter of importance.
304. You do not think it is of any importance with this plan of bridge, but with a bridge as proposed in the last Parliament, with cantilever arches, it would be an objection? I like this proposal better than any other I have seen. There would be an objection under the conditions which you name.
305. I think you have said that a railway bridge would offer a greater obstruction than the bridge now proposed? In my opinion it would.
306. You mean that that would be the case if the bridge did not follow the lines of the proposed bridge—that is, if the piers were not in a corresponding position? Without knowing anything of the subject, I imagine that a railway bridge would require to be stronger and probably to have more supports. They would offer an impediment to navigation.
307. Are you aware that between New York and Jersey City there is a bridge with a span of over 3,000 feet designed to carry 6 lines of railway? I was not aware of that.
308. *Chairman.*] Do you know the distance between Miller's Point and Balmain? It is about 1,200 feet from Balmain to the shore of Darling Harbour opposite.
309. Therefore, the distance between the piers of the proposed bridge would be analogous to the distance between Miller's Point and Balmain? Yes.
310. The distance between Smith's wharf and Balmain would be similar to the distance between the piers of the proposed bridge? Yes.
311. You have not heard any suggestion that the entrance to Darling Harbour requires widening to accommodate the traffic? No.
312. The distance between the piers of this bridge will be ample for all purposes? Yes; I think that the proposed distance would be a little greater than the distance from Balmain to the Darling Harbour shore.
313. *Mr. Bruce Smith.*] In your answer to one of Mr. Thomson's questions you said, that if a vessel were coming up the harbour and were forced out of her way she might be to some extent inconvenienced by the northern pier;—would it not be an easy matter for her to go round the pier to Lavender Bay? She might do so, but I was referring to thick or foggy weather. I modified my answer by saying that in fair weather there would be very little, if any, objection to the pier.
314. You know that there is provision in the Bill for the efficient lighting of the lower bridge? Yes.
315. The lighting must be to the satisfaction of the Marine Board? Yes.
316. Then at a time of fog you could prescribe the necessary lights? You cannot see lights in a fog, but I think the provisions of the Bill in regard to lighting may be regarded as satisfactory.
317. *Mr. Sawers.*] You think it desirable that the southern pier should be actually on Dawes Point? Yes.
318. Do you go so far as to say that you think that essential? I should much prefer that it were so. At the same time I do not know that any great harm would accrue if it were not the case. I strongly advocate its being done however.

Benjamin Crispin Simpson recalled and further examined :—

- B. C. Simpson. 319. *Mr. Bruce Smith.*] The first schedule of the Bill properly describes the course of the centre line of the proposed bridge and its approaches? Yes.
 22 Nov., 1898. 320. Does the second schedule properly describe the land which may be appropriated or crossed over for the purposes of the work authorised under the Act? Yes.

John Mitchell Purves called in, sworn, and examined :—

- J. M. Purves. 321. *Chairman.*] What is your occupation? I am a land and estate agent.
 22 Nov., 1898. 322. You are an alderman of North Sydney, and you have been Mayor of North Sydney? I was Mayor last year.
 323. In your opinion, which is the best connection between the northern and southern shores of the harbour—a bridge or a tunnel? I think there can be no question but that a bridge would be by far the better means of connection. Tunnels are only used in places where it is almost impossible to put a bridge.
 324. How would you compare the two means of connection for the purposes of vehicular traffic? So far as that is concerned, it would be much more convenient and commodious to have a bridge.
 325. You have seen the proposal before the Committee? I have.
 326. In your opinion, does it fulfil the needs of the connection? Of course, I discard a tunnel altogether except for a tramway service. It might be more expeditious to run a tramway through a tunnel, because it might be possible to go at a greater speed, but the number of passengers carried would be limited. For general purposes, the bridge scheme is by far the best of the schemes which have been submitted. I think Mr. Simpson's scheme is the best, because there can be no question that if a railway bridge were taken over the harbour—and I suppose it will come some day—it can be constructed side by side with that bridge. You would not, therefore, increase the difficulties of traffic. If you took a road bridge across from Dawes Point to Milson's Point, and subsequently constructed a railway bridge, you would have two bridges at different angles, and you would thus offer considerable obstruction to harbour traffic. In addition to that, if you take the passengers over to Milson's Point, you cannot get them to the railway without a lift. It would be a difficult matter, I should say, to get people down on to the railway. The railway being almost on the water-level, and the bridge being a considerable height at that point, there would be that difficulty. If you adopted Mr. Simpson's route you would touch the North Shore at a point where the railway would have risen considerably, and there would be no difficulty in reaching it. I understand that it is proposed in Mr. Kenwood's scheme to have a private tramway across the bridge. That would be most inconvenient, involving as it would a change from one car to another. I understand that Mr. Simpson proposes to allow the Government to construct a tramway over the bridge, and by this means the Government would be able to form a connection between the northern and southern tramway systems. It is most important that this should be done, because the number of passengers carried across the harbour now is increasing very rapidly. The better the facilities, the greater the number of passengers there would be. We have a large area of vacant land at North Sydney which would be available for residence. It is one of the most popular suburbs of Sydney. I can give you a proof of the rate of increase of population in the borough of North Sydney. It is shown by the fact that, notwithstanding the fall in rents, our rates have decreased very slightly. That is to say, the amount of rates has been kept up by the new buildings. That is proof of a very rapid increase. Although rents have fallen 25 per cent. the revenue of the council is practically the same.
 372. Does that apply in the case of any other leading borough? I do not know the position of the other leading boroughs, but at Mosman's and also at Willoughby the population has increased considerably.
 328. *Mr. Bruce Smith.*] How far does your municipality extend? We join Willoughby about Dalton's property. Then we go down nearly to the St. Leonards railway station, and we take in all the point round by Ball's Head.
 329. And you say that within that radius the rates have kept up, notwithstanding the fall in rents? Yes.
 330. Is the increase of population beyond that radius greater than the increase within it, do you think? In the case of Mosman's the increase has been much greater, and also up the line, I believe, but I cannot speak of that as confidently. I do not think it is necessary that I should enter further into the difference between a bridge and a tunnel from the point of view of convenience, because it is a pretty well accepted fact that a tunnel would not meet the requirements of vehicular and passenger traffic. I doubt if anyone would get out of a tramway and get into a tunnel. I question whether they would not prefer to go across in a ferry unless they wanted to go to King-street. In the case of a tunnel they could land at only two places—either at the Quay or at King-street. If they went over a bridge in a tramway they could stop the tram anywhere. Suppose, for instance, a man had an office halfway between King-street and the Quay, it would be better for him to take the ferry. Besides, I do not think you could work lifts sufficient to carry the traffic. I have been through a great many of the tunnels in the Old Country. For example, there is a tunnel under the Mersey at Liverpool. There is an enormous lift there, but there is a considerable wait while the lift goes up and down. It only holds a certain number of people, and they are all jammed together.
 331. A certain number have to wait until the lift returns? They have to wait.
 332. In cases where a train leaves only once in forty minutes, as in North Sydney, it might be a matter of some importance;—there might be considerable inconvenience attaching to the missing of a certain train? Quite so; I should say it would be very inconvenient.
 333. You said just now that a tramway would be able to go through a tunnel faster than along a bridge;—on what ground do you make that statement? I presume that the authorities would not allow trams to travel at the same rate over a bridge that they would allow them to travel at in a tunnel. There would be no obstruction whatever in the case of a tunnel.
 334. *Chairman.*] What obstruction would there be in the case of a bridge? There would be the vehicular traffic. I suppose 6 or 7 miles an hour would be the maximum speed allowed. They would be able to go faster than that in a tunnel; but then again there would be only a limited number of passengers.
 335. In the case of a tunnel you would have to make allowance for the time occupied for the rise and fall of a lift;—do you think, taking that into consideration, that any time would be gained by the faster speed.

speed at which a tram might travel through the tunnel? Exactly; and you would have to go down to a particular spot to get to the lift, whereas if you were taking a tramway over a bridge to North Sydney you could get on or off at almost any point.

J. M. Purves.
22 Nov., 1898.

336. You have lived for many years at North Sydney? About five years.

337. Have you studied the broad question of the necessity for some means of communication beyond those which now exist? I have been trying to get the North Sydney Ferry Company to see that, although their service is a good one, there is great room for improvement, but beyond that the traffic has grown so fast that even now they can hardly discharge their passengers with a ten-minutes' service and load again. They are advertising now for a scheme which will enable them to discharge and load their steamers more quickly. They have offered a 10-guinea prize to anyone who will design a scheme by which they can get their passengers out and reload so as to keep up their ten-minutes' service. They must not run the ferry steamers too fast across the harbour, because it is dangerous. The danger is increasing every day with the increased number of boats.

338. Having regard to the immense traffic up and down the harbour, do you think the ferry service will ever be able to provide sufficient accommodation for all the vehicular and passenger traffic going across? I do not. I believe the Government have put £10,000 upon the Estimates for another horse ferry. They recognise that the present horse traffic cannot be carried by the existing service. You cannot manage it more quickly than once a quarter of an hour, because you must have time to load and unload your boats. Then, again, there is a good deal of cruelty involved. Every day you see dray horses go up the hill with loads which are killing to them. Every thing has to be dragged to a great height. They come down, to begin with, from York-street, Pitt-street, or George-street. Although you might not think it, there is a considerable fall in Pitt-street from Bathurst-street. You have to go down to the water-level, and you have to rise again on the North Shore to a height of at least 200 feet. The section of the population on the lower level at Milson's Point is comparatively small. The Point is pretty well built over, and there is not much room for extension. Leaving those people out of consideration, the bulk of the people will have to rise a great height. You take them down to the level of the sea, and you have to take them up again. You have only to calculate the number of vehicles, passengers, and goods, and the horse-power you would require to lift the weight up to the required height, in order to see what a great undertaking it is. I suppose you would have to rise on the average over 180 feet.

339. *Chairman.*] Is it not a fact that the steep gradients to which you refer are on those portions of the shore nearest the water? Yes.

340. After you have reached McMahon-street, where the proposed bridge strikes the roadway, you have easy grades up to the Reserve? Yes. The worst grade is from "Dind's Hotel" down to the water.

341. You have grades as steep as 1 in 10 or 11? I do not know exactly what they are. I know they are so steep that I cannot ride up them on my bicycle. When I get to "Dind's Hotel" I can ride the rest of the way easily. There is another thing I should like to mention with regard to Alfred-street. In laying the tramway they have taken the top of the road as the level, and they have allowed the road to fall very steeply into the gutter, so steeply in some places that it can scarcely be used. They have actually reduced the width the road nearly to two tram-lines. You can get a dray past in some places, but it is dangerous in other places. The footpaths and the kerbing and guttering will require to be altered in order to get the full benefit of the road. Heavy drays get on the tramway line and interrupt the traffic considerably, because with a heavy load you cannot easily swing about, and when once you get the horse into the gutter it is difficult to get out again. I saw a heavily laden dray there this morning with the shaft broken, no doubt from attempting to screw out from the steep place.

342. You have had a good deal of experience of horses, and apart from the cruelty you speak of in getting horses down to that level and getting them up again, is the present means of transit a safe method of carrying all classes of horses across the harbour? No, it is not at all safe. A restive horse beginning to back might do a tremendous amount of damage. It might even cause loss of life, because the passengers are mixed up with the horses. A big strong horse backing a dray and disturbing other vehicles might be very dangerous. One could not say what would happen.

343. You are an officer of the Sydney Lancers;—does the present method of communication between the two sides of the harbour admit of a squadron being taken across with any degree of ease? I think that if they knew we were coming, and had the boats ready, it would not take long to take across as many men as were wanted. You could easily put two or three squadrons on to one of the boats and take them over in seven or eight minutes.

344. *Mr. Bruce Smith.*] Apart from the convenience of the public, from the point of view of vehicular and pedestrian traffic on the bridge, would it be of any convenience to the population of North Sydney to have tramway connection with the city? It would be an immense convenience. Another point I was going to mention was the fact of our being cut off from the city in a case of fire. We have to depend upon the local fire-engine. If we had to wait when the boats are off at night until they could get up steam and bring their engines across in the vehicular boats, an enormous loss might occur. The danger is increasing, of course, with the increased number of buildings.

345. *Mr. D. Thomson.*] Leaving the character of the bridge out of the question, are you of opinion that a landing at McMahon's Point would be better than at Milson's Point? Yes; it is a shorter route to the main body of the people. The main body of the people lie behind Junction-street, where that street joins Miller-street. If you take that route you go straight to that point. If you take the other route you would have to come down Junction-street and Alfred-street, and it would be longer. You would land a little bit higher on McMahon's Point than at Milson's Point.

346. If the end of the bridge were placed near the Town Hall in Alfred-street, is it your opinion that, as compared with where the bridge before us would land the traffic, you would have to rise considerably to attain the same level? I do not know the relative heights of the different places. I do not quite know where Mr. Kenwood's bridge would land; but I thought it was lower down than the Town Hall.

347. I was endeavouring to institute a comparison between the merits of the two landing-places? That would be easily ascertained from a specific knowledge of the different heights.

348. *Mr. Sawers.*] The ascent from McMahon's Point would be the better of the two? Yes, because after you leave the Town Hall you go down hill again to the corner of Junction-street.

349. *Mr. Bruce Smith.*] Is it not necessary that a bridge should bring the traffic out near the railway at some point? I think it is absolutely necessary.

- J. M. Purves. 350. And if you were to bring the traffic out near the Milson's Point railway station, a lift would be inevitable? Yes, unless you make another station at the head of Lavender Bay.
- 22 Nov., 1898. 351. The bridge before the Committee, with a tramway run over it, would land the traffic close to a station without much descent or ascent? Yes.
352. You would land the traffic at a station beyond Milson's Point? Yes. I daresay you noticed that Mr. Young pointed out that he thought the Government should construct this bridge. From what I know of the Public Works Committee, I think they would want to see how the bridge was going to pay before recommending it. I think it would be almost too much to hope that the Government would ever get the proposal passed by the Public Works Committee. We should then be without this means of communication for years, unless we got private enterprise to carry it out. Then there are a great many persons who, if the Government built the bridge, would think that they should have the free use of it, because the Government have built bridges in other places.
353. You think that if the bridge were built by the Government, there would be a constant agitation to get the toll removed, in order to put the people in the metropolis on a level with people on different rivers, where the Government have built bridges? There is no doubt about that. The Government would have to face that question when they were considering whether or not they would build a bridge.

John Moore Smail called in, sworn, and examined:—

- J. M. Smail. 354. *Chairman.*] You are Engineer-in-Chief for the Metropolitan Board of Water Supply and Sewerage? Yes.
- 22 Nov., 1898. 355. You have perused a copy of the Bill introduced for the purpose of constructing the bridge, of which Mr. Simpson is the author? Yes.
356. Have you examined the plans? No. None of our works at present would be interfered with by the bridge—neither our sewers or our water-pipes.
357. Are there any matters connected with the Bill that have come under the notice of your Board upon which you desire to express an opinion? Yes; the original Bill did not contain any protective clauses, as far as our Board is concerned; but I understand that Mr. Simpson has since prepared some. I have seen a copy of his suggested amendments.
358. Would these amending clauses meet the requirements of your Board? Not quite. I should like to see another provision introduced. I have spoken to Mr. Simpson about it, and I think he agrees with me, so that there will be no dispute about the matter. I will quote the minute which I wrote to the Board on the subject. It is as follows:—"With regard to sewerage works, it is not likely that a sewer, metal or otherwise, would ever be required to cross the bridge, so that provision in this respect is not necessary. It may, however, be necessary in future to carry water-mains across the bridge, and provision should be made in the Bill to give the Board the right to do so. This could be done either outside the side members of the bridge, or underneath, as may best work in with the design of the proposed work. I think if the provisions were to include that, suitable provision should be made for carrying water-mains across the bridge free of cost, and subject to the approval of the Board's engineer, the interests of the Board would be amply protected." That would be an addition to the provisions Mr. Simpson has already included.
359. *Mr. Simpson.*] You would be satisfied if we gave you permission to lay water-mains in a position that might be agreed upon between us, over the bridge; but all the cost of laying you would bear yourselves? Of course.
360. We would give you the space; but all the expense incidental to supports, for instance, would be borne by yourselves? I do not think the Board would fight about that. The supports would be regarded as part of the pipes.
361. *Mr. D. Thomson.*] You do not mean that the bridge would have to be designed so as to allow of what you suggest? No; the pipes could either be slung, or put through the lattice.
362. *Mr. Bruce Smith.*] It would save the Board a great deal of money, as compared with laying the pipes under the harbour? We have already had experience of laying a main across the harbour near Balmain, and we do not want to repeat it.
363. What is the cost? It costs almost £2 a foot to lay even a small pipe. The divers only work four or five hours a day. They are expensive men to employ.
364. *Chairman.*] What would be the cost of the Balmain connection to which you refer? There are about 500 or 600 feet.
365. *Mr. Bruce Smith.*] If the bridge were constructed, the Board would find it advantageous for its entire length for their main—even as regards the approaches? Yes.
366. The bridge being a distance of nearly 5,000 feet, that would represent a saving of some thousands of pounds to the Board? The only saving would be where we should otherwise have to go under water.
367. But would it not be cheaper to sling your pipes than to go underground? Yes.
368. *Mr. D. Thomson.*] The water supply for North Sydney comes down the northern side of the Parramatta? Yes.
369. Do you anticipate that as far as North Sydney is concerned that will be sufficient for some time to come? Yes. I should like to point out that if the bridge were there, by carrying a pipe from the south side to the north side we should have a duplicate supply in case the Chatswood supply broke down. We have had to almost triplicate the size of the main pipe during the last twelve months.
370. Owing to the rapid increase in population there? Yes.
371. From the reports you have received as to the progress of this suburb do you anticipate that that increase of population will proceed in the same ratio? Yes.
372. *Chairman.*] You think it exceedingly likely that the Board would be glad to utilise the bridge in connection with the water supply? Assuming the bridge had been in existence, I would have proposed another scheme to the Board to bring the water from the Centennial Park reservoir.
373. If the bridge were constructed you would be likely to utilise it at an early date for a pipe connection? Yes.
374. I suppose you would get a somewhat better pressure by utilising the level of the bridge than by going down under the harbour? That would not affect the question. We have to pump the water from Ryde

Ryde to Chatswood 370 feet, and it gravitates almost to high-water mark at Milson's Point. If the bridge were constructed we should take the water from the Centennial Park reservoir for the lower levels and save the difference in the pumping.

375. You would restrict the delivery from the Chatswood reservoir to the higher levels of North Sydney? Yes.

376. What, roughly, would be the expense of the pumping? £2,000 a year.

377. Would you save that? About 33 per cent. of it.

378. *Mr. Bruce Smith.*] You would save a capitalised sum of £25,000 in addition to the saving effected by carrying the pipes across the bridge instead of under the harbour? Yes.

379. Assuming that there were a saving of one-third in the pumping there would be a total saving to the Department, capitalising that amount and adding it to the reduced cost of getting the pipes over, of about £30,000, £25,000 being the capitalised sum and £5,000 being the saving in crossing the harbour? I should think it would be something like that. If we could get a low-level supply pipe across the harbour without going under it it would be of great service to us.

J. M. Smail.
22 Nov., 1898.

WEDNESDAY, 23 NOVEMBER, 1898.

Present:—

MR. HAYES,		MR. SAWERS,
MR. F. B. SUTTON,		MR. D. THOMSON.
J. C. NEILD, ESQ., IN THE CHAIR.		

Bruce Smith, Esq., Barrister-at-Law, appeared on behalf of the promoters of the Bill.

Francis Clarke called in, sworn, and examined:—

380. *Chairman.*] You are Mayor of North Sydney? Yes.

381. You have been summoned by the Committee, not by the promoters of the Bill; we want your evidence on the subject of the proposed bridge connection;—have you seen the plans of the proposed bridge? I saw the plans previously submitted, but I believe there are some amended plans.

F. Clarke.
23 Nov., 1898.

382. It is proposed to put the southern pier absolutely on the shore at Dawes Point; having looked at the plans, do you, as Mayor of North Sydney, offer any objection to them, or have you any representation to make to the Committee in respect of them? No; I have no objection as far as this particular proposal is concerned.

383. You are aware that there was another bridge proposal for a connection with Milson's Point; in this instance, the proposal is to connect with McMahon's Point, in the vicinity of the railway, and at a higher elevation than the water-level;—which, in your opinion, would be the most convenient connection for the people of your important borough—a connection with Milson's Point, at a low level, connecting with that level by lift, or the proposed connection at French-street, on the Blue's Point Road? I think the connection on the Blue's Point Road would be the more convenient, because I understand that the right is given to the Government to construct a tramway over the bridge. If they thought it necessary to construct a tramway, a branch line could be made from Miller-street running down towards the bridge.

384. If it were demonstrated to you that the bridge would strike the present tramway, practically, in your view, the proposal would be one which would meet the convenience of the larger number of residents on the North Shore—that is, comparing it with the Milson's Point connection? Of course, some persons living down towards Milson's Point and Kirribilli would have to turn their backs upon their destination to reach the proposed bridge, but there may be other advantages which outweigh that inconvenience—which would have more weight than the convenience of those people.

385. While the convenience of those persons at the lower level you speak of would be met by the present ferry service, that proposition would not apply necessarily to those on the higher level? It would not apply to those at all. In the same way you might say that persons at the higher level would be inconvenienced in reaching a bridge down at Milson's Point, which would be convenient to persons living at that point and at Kirribilli.

386. I believe the matter has been discussed in your council? Yes; it was brought before the council some little while ago.

387. Have you any objection to telling the Committee whether your council arrived at any decision? We arrived at no decision as far as supporting any particular scheme is concerned, but I think I am safe in saying that we were unanimous in thinking that it would be better for the Government to take the matter up instead of its being handed over to private-enterprise.

388. But, supposing the Government are not willing to definitely undertake the work, I imagine, from what you have already stated, that your council would, as a body, give a preference to a proposal to construct a bridge *via* McMahon's Point than to a proposal to connect at Milson's Point? In the event of the Government absolutely declining to proceed with the work, then I certainly think the council would give its adhesion to one of the schemes before the House, but I cannot say which one.

389. But expressing your personal view, you think, as you have already said, that the present proposal would afford a large measure of convenience? Yes, I think it would, undoubtedly. There is one point I might mention, which is that, as I understand the matter, the bridge would not provide for a connection with the railway, and that is a great point so far as the people of Chatswood are concerned. Of course a tramway line might run alongside and shunt up to the platform at the railway station. I might mention that the people on the Hornsby line very strongly wish that whatever bridge is built should consult their requirements in that respect. Of course I do not appear here in their interests.

390. *Mr. Bruce Smith.*] But they represent a larger interest? They represent a greater area, but not the greatest number of people. There is great development going on there.

391. *Chairman.*] I suppose the probability is that in the future the development will be greater there than in any other part of the suburb? Not greater I should say, but certainly very great.

392. May I explain to you that the Engineer-in-Chief for Railway Construction has given to this Committee evidence that he can conveniently place a railway bridge alongside this bridge so that there would be no interruption to the harbour traffic at two points. The piers of the railway bridge would be practically an extension of the proposed piers in this instance. He pointed out that he would be able to connect

F. Clarke. connect with the Hornsby line at Bay Road. That evidence has been absolutely given to the Committee, so that this bridge would in no wise conflict with the proposal for a railway connection between the northern and southern systems? That would make the Bill all the more acceptable.

29 Nov., 1898.

393. *Mr. Bruce Smith.*] You have had very good opportunities for watching the very rapid growth of population and settlement in North Sydney? I have during the last five years.

394. Have you any doubt in your mind as to the necessity for some better means of communication between North and South Sydney? None whatever. I think there is a great necessity for improved means of communication.

395. Of all classes of communication proposed, in your opinion, a bridge is the best? Candidly, I must say no. To meet the passenger traffic I think the Government proposal to connect the two tramway systems is undoubtedly the best.

396. Over a bridge? No, by a sub-aqueous tunnel.

397. Would you kindly tell the Committee what are your reasons for preferring a tunnel? My reasons are these: That a tunnel would involve no interference with the navigation. It would be possible to take the tramway up at Ridge-street, and to be carried to a place of business in the city, and put down at any particular street-crossing. I consider that that is a very great advantage. There is also the question of cost. A tunnel, according to the Departmental estimate, would cost £280,000, including all land resumptions, and the Government will be able to get interest on their outlay by charging an increased fare. You would not expect the Government to construct a tunnel and not charge anything to passengers for the privilege of being carried across the harbour. If a bridge is built we may be handing over to a syndicate or company that which I do not think we ought to hand over, even though the Government may resume the work later on. The probability is that as soon as the Government acquired the work there would be an agitation at once for the abolition of the toll. That would not be likely to happen in the case of a tunnel.

398. Why not? Because the tramway would be under the control of the Railway Commissioners, and they would not be likely to give way to any agitation of that sort.

399. You know it is proposed to give the Government power to construct a tramway over this bridge? Yes.

400. Then, as far as a tramway is concerned, it would offer the same advantages on a bridge as in a tunnel, in the respect you name? Not quite, because first of all you would have to make a tramway from Junction-street down to Blue's Point Road. It would serve the people on the heights, but it would not serve the people down about Milson's Point and Kirribilli.

401. Are you supposing that the tramway to Milson's Point would be discontinued? No, not at all; but residents at Milson's Point or Kirribilli would be able to get on the tram wherever it suited them, and would be landed in any part of the city in the same way that people living on the heights would be.

402. I understood you to say that the advantage of a tunnel would be, that the Government would not be called upon to carry people for nothing, because they would be travelling in a tramway;—I ask you whether the same argument would not apply to people travelling in a tramway on a bridge? Yes. Of course people travelling in a tramway would have to pay; but in the proposed tunnel scheme there is a gradient without any lift at all joining on with the electric tram in George-street. The people of the whole of North Sydney will be benefited by that scheme, as far as passenger traffic is concerned. I am alluding only to passenger traffic.

403. You are aware that it is proposed to connect the tramway system of the city with the North Shore system by means of this bridge? But not in such a convenient position.

404. At which end? At the North Shore end.

405. If Mr. Deane is of opinion that at both ends there can be a convenient connection with the tramway system, and with the railway system, assuming him to be right, the objection you name would be got rid of? If Mr. Deane says that the bridge across to McMahon's Point from Dawes Point can be made to fit in with the present tramway conveniently and cheaply, then of course I have no further objection to offer on that score.

406. You gave just now as a reason for preferring the tunnel the fact that a bridge would interfere with the navigation of the harbour;—if Captain Hixson, the President of the Marine Board, and Mr. Darley, the Engineer-in-Chief for Public Works, express the opinion that, as proposed to be placed, the piers will not interfere with navigation, there being a headway of 180 feet, sufficient for all reasonable purposes, would not that fact operate upon your mind? Yes; personally I do not think there is any great objection as far as navigation is concerned. It is only one of those objections which one might expect to be raised.

407. Quite apart from your council, are you of opinion that of two routes the McMahon's Point route is preferable to the Milson's Point route for a bridge? As a bridge site.

408. Having regard to the fact also that all passengers carried by the Milson's Point route will have to rise or fall by lift at the Milson's Point railway station? Yes; I should certainly say that the route from Dawes Point to McMahon's Point would be preferable for a bridge.

409. *Chairman.*] Am I correct in thinking that you referred to a tunnel scheme as the Government scheme? Yes; I believe such a scheme has been prepared.

410. It has never seen the light of day? Only through the Committee which previously sat to deal with this question. Mr. Deane first of all referred to it, and I believe Mr. Fisher worked out the scheme in detail.

411. When you refer to a tunnel scheme and a Government tramway, you are referring to a proposal which has been prepared by officers of the Department, but which has never been brought before the House and the public? I believe it was recommended by one of the previous Committees.

412. *Mr. Bruce Smith.*] Assuming that the Government constructed a tunnel and continued to charge the public, and did not respond to the agitation that would be got up to get rid of the charge, and assuming also that the Government had power to run a tramway over this proprietary bridge, what would be the advantage to the public of having it in the hands of the Government instead of in the hands of private enterprise? It seems to me undesirable that private enterprise should step in and make a valuable connection such as this would be.

413. The fares would be subject to regulation under an Act of Parliament, and there would be power on the part of the Government to take the bridge over; the Government, in any case, would run its own tramway over the bridge;—where, then, is the advantage of Government ownership of the bridge over private ownership? Simply that the Government should have control of all such connections—the Government having, whether rightly or wrongly, catered for the carriage of the public ought to do it thoroughly.

414. But suppose the Government only, and not the promoters, had power to construct a tramway over the bridge? That is a valuable concession. F. Clarke.
23 Nov., 1898.
415. Then where does the advantage of Government ownership, as compared with private ownership, of the bridge come in? It is not easy to answer such a question off-hand, I was looking at the question on broad principles.
416. You know that the Bill gives the Government power to construct its own tramway? That is a valuable concession, no doubt.
417. Your objection is founded upon broad principles;—it has no special application to the present proposal? Quite so.
418. *Mr. D. Thomson.*] I think I understood you to say that you did not consider a tunnel a desirable means of connection for vehicles? No, I did not say that; but I say that the Departmental scheme providing for the conveyance of passengers by grades connecting the two tramway systems, the North Sydney system and the proposed George-street electric tramway, in my opinion, meets the convenience of passengers better than anything else, but it provides no means of bettering the condition of the vehicular traffic.
419. Supposing the Government decided upon the construction of a tramway tunnel connecting the two systems, would there not still remain an outcry for a better means of getting vehicles over more regularly and efficiently than at present? Yes. I daresay you are aware that there is a proposal now on foot to put on an additional horse-ferry service from Dawes Point to Blue's Point. If that is established, I have no doubt it will meet requirements for some years to come, and probably later on a roadway tunnel might be constructed—that is, a tunnel for vehicular traffic.
420. But in regard to the only proposal so far made for a vehicular tunnel, is it not your opinion that the circuit which it would have to take to get the necessary grades would render it practically useless as a vehicular tunnel? I have not looked into the matter of grades in the proposal at all as far as the vehicular service is concerned, but I have no doubt the grade would be necessarily steep. I admit, of course, that a bridge would be preferable, providing it were practicable and within easy attainment. It is a question of funds and of the work paying; it is a question of competition with other services.
421. What I mean is that while they can get a grade would they have such a long circuit, as in Mr. Sulman's proposal, coming down by Kirribilli Point; that it would practically become much cheaper and a great saving of horse-flesh to go over by the ferry, especially when heavy loads are being transported? Many persons might regard a bridge in the same way, because they would have to climb up on to it at this end.
422. You admit that a bridge has this advantage, that it provides for both descriptions of traffic? From an ornamental point of view and for many reasons I should like to see a bridge constructed, but I think a tunnel is more practicable and is easier of attainment.
423. On account of the cost? Yes.
424. *Chairman.*] You are referring to the suggested Government tunnel? Yes. Personally, I should prefer that the Government should construct the tunnel.
425. *Mr. D. Thomson.*] Is it your opinion that the proposal before the Committee is much superior to previous proposals, inasmuch as it avoids interference with the harbour? Yes; the removal of the piers inshore will, I think, remove a lot of objections which existed to the previous proposal.
426. *Chairman.*] Your objection to the private ownership of the bridge would apply equally to the private ownership of a tunnel? Yes: undoubtedly.
427. So that as far as that objection goes it applies to any and all of the bridge and tunnel schemes of a private character? That is so. My objection to the proposed tunnel with lifts would be stronger than to the proposal to connect the two sides of a harbour by means of a bridge. I regard the lift proposal as absurd.
428. *Mr. Sawers.*] You have expressed a preference for some tunnel proposal which was prepared by the Government officers, but which was never submitted to the public? Yes.
429. Which, I understand from you, would not be worked by a lift, but on a grade? Yes.
430. Where was that proposed tunnel to strike North Sydney? Close to Milson's Point. It was designed to connect with either tramway or railway.
431. You are aware, I suppose, that the traffic up Alfred-street is on a very heavy grade;—you must be aware from your observation that the dray traffic up there is very rough on the horses? Yes.
432. In fact, it is almost cruelty to horses? Quite so.
433. Following that up, would it not be still worse if the dray traffic had to come from a tunnel beneath the harbour, and still work up Alfred-street? I had in view the establishment of a ferry service between Dawes Point and Blue's Point. That would materially reduce the congested state of the traffic up Alfred-street.
434. But the serious objection to dray traffic, on account of the grade, would remain? Yes; taking the tramway line the horses have all they can do to keep their load without getting out of the way of the trams at all. We expect on the establishment of the Blue's Point ferry to relieve the congestion of the traffic.
435. *Chairman.*] At Blue's Point the grade will be quite as bad as the grade at Milson's Point? But there will be more room. There is no tramway there.
436. *Mr. Sawers.*] With the exception of the limited traffic going to Alfred-street itself the traffic going to the main business portion of North Sydney if it came across the bridge would overcome the difficulty in regard to cruelty to the horses? Yes; as far as that side is concerned.
437. *Mr. Bruce Smith.*] Are you aware that, if the proposed tunnel were to come out near Alfred-street, in addition to the grade which the vehicles have to get over now, there would be a further 120 or 130 feet to rise from the tunnel-level to the present level? I am not advocating a tunnel for vehicular traffic, or to carry a passenger traffic.
438. The tunnel scheme you mention did not deal with vehicles at all? No.
439. Is it not a fact that the present vehicular traffic across the harbour is becoming very dangerous to navigation? Undoubtedly.
440. *Mr. F. B. Suttor.*] Would not such a tunnel as you advocate to connect the two systems of tramway necessitate a very steep grade? It would not be considered a steep grade for an electric tramway. They can get an easier grade than they are now using to Mossman's Bay up to the Military Road, and they think that satisfactory.

George Arthur French called in, sworn, and examined:—

- G. A. French. 441. *Chairman.*] You are the Major-General commanding the Defence Forces of New South Wales? Yes.
 23 Nov., 1898. 442. We have asked you to attend in order that we may hear your views as to the importance of bridge communication between the two sides of the harbour from a defence standpoint;—you have seen the drawings of the proposed bridge known as Simpson's bridge? Yes.
 443. Do you yourself consider a bridge or a tunnel preferable as a means of communication? I should prefer a bridge.
 444. For military purposes? Yes.
 445. Having regard to the fact that a bridge would give 60 feet of roadway, whereas a tunnel proposes only 20 feet or 21 feet of roadway, would that be a further objection to a tunnel from your standpoint? I should say so.
 446. In your opinion, would a tramway connection across such a bridge as that proposed be an advantage from a military standpoint? It would be of great advantage, because you could push through from one side to the other rapidly a large number of men.
 447. Supposing there were a bridge connecting the two sides of the harbour, and that the tramway running upon it were in the hands of private individuals, would that be as advantageous for military purposes as if there were a continuous Government tramway? I should certainly prefer a continuous Government tramway.
 448. You are aware that there is a scheme before Parliament for the construction of a tunnel which would have a lift at both ends;—I suppose that would be utterly useless for your purposes? Yes, practically; it would involve too much loss of time.
 449. In the case of such a tunnel as you heard Mr. Clarke speak of, with a heavy grade from the exit to the top of North Shore, I suppose that if you had to send guns across you would find that grade very awkward? Yes. I see that a tunnel would necessarily be about 60 feet below water-level, whereas a bridge would be 180 feet above. You would have 240 feet to make up.
 450. In a short distance? Yes. It would be very inconvenient for guns and waggons.
 451. *Chairman.*] A connection involving the use of lifts would be absolutely valueless for cavalry and artillery? Yes.
 452. And also for ammunition waggons? Yes; for military transport generally.
 453. Lift connection would be valueless for that purpose? Yes, if you had any large number of men to deal with.
 454. And if you wanted to use a bridge at a time of actual warfare, you would undoubtedly want to use it for a large number? Yes.
 455. It would not be required for a mere handful of troops? The probability is that if it were used it would be to push a large number of men across at short notice.
 456. For the general purposes of the defence of the metropolis and district, the present ferry service is, in your opinion, wholly inadequate? Quite.
 457. You have no doubt noticed such ferry communication as there is? I see a good deal of it at Dawes Point.
 458. In your opinion it would not only be inadequate but dangerous for the rapid movement of artillery? Yes. You would lose a lot of time in taking artillery across in the ferry.
 459. And there would be some degree of risk with heavy loads of guns or ammunition? None of the teams would run ordinarily beyond 2 tons—that is, for field service.
 460. *Mr. Bruce Smith.*] For the transport of artillery and cavalry is there any comparison between a bridge connection and the present transit? No; a bridge would be infinitely superior.
 461. *Chairman.*] With a tramway across a bridge the movement of infantry would be infinitely more rapid than by any existing means? Yes.
 462. Generally, for the defence of the port and district the proposed bridge would have considerable value? Yes.
 463. *Mr. D. Thomson.*] In the event of war would a bridge be much more easily destructible than a tunnel? By artillery, yes. I suppose you mean by the enemy.
 464. From that aspect then a bridge would have a disadvantage as compared with a tunnel? If you wanted to make a tunnel absolutely impassable you could flood it, and when the flooding had answered its purpose you could pump it out again. A bridge is comparatively disadvantageous, because if you destroyed it at all you would destroy it altogether. On the other hand, you could command it from one side with guns and render it impossible for an enemy to cross it.
 465. I presume it could be reached from outside the Heads by powerful artillery? They would not hit it once a month.
 466. *Chairman.*] In view of the distance from the seaboard at which a man-of-war would have to lay to get a sufficient elevation there would be very little chance of the bridge being hit? There would be very little chance. We have so arranged the defences of the Heads, of Bondi, and Coogee as to make war vessels lay off so far that they could not even bombard Sydney.
 467. As far as any artillery fire on the bridge is concerned it would have to come from the shore on this side or from a vessel west of a north and south line about Bradley's? Yes.
 468. A vessel would have had to pass the forts at the Heads before she would be able to get sight of the bridge? Yes. If she fired at the bridge from outside the Heads she might go on for the best part of the year without hitting it. She could not tell what effect the shot was having.

Hugh McLachlan called in, sworn, and examined:—

- H. McLachlan. 469. *Chairman.*] You are Secretary to the Railway Commissioners? Yes.
 23 Nov., 1898. 470. Have you seen a copy of the Bill authorising the construction of the bridge which is under consideration of the Committee? Yes.
 471. Have you examined it? Yes.
 472. Have you seen the plans? Yes.
 473. On behalf of the Railway Commissioners, are you prepared to offer any remarks on the proposed bridge;—have you any objections or suggestions to offer? No. The Commissioners do not wish to

H.
McLachlan.
23 Nov., 1898.

to volunteer any evidence at all. So far as this proposal is concerned, they look upon the matter as one of policy for the Government. They hardly like to say whether they object or approve. The matter is not one in which they would be consulted. It is really a question of policy for the Government whether they will build a bridge or allow a bridge built.

474. *Mr. Bruce Smith.*] Does this scheme, as set forth and planned, interfere, in the view of the Commissioners, with the Government interests? No, I do not think so, to any material extent.

475. Assuming that the Government have power in a clause of the Bill to construct a tramway, and that they availed themselves of that power, would the connection between the two systems be likely to increase the tramway receipts? I would not like to say that. I do not see how you would create traffic by a tramway over the bridge.

476. Not from the centre of the city, connecting with North Sydney? No, because the traffic already goes to Milson's Point. We should have a competing line to a certain extent. Everything would depend upon the terms and conditions we should make with the company. Perhaps I misunderstand the question and your idea is that we should get the traffic which now goes to the Ferry Company.

477. Exactly;—would it not increase the tramway receipts if you had a tramway from the city running to North Sydney to connect with the other tramway and railway systems? Yes; what I thought you intended to imply was that it would benefit the existing tramway. If you established a new tramway you would get new business; but I question whether it would pay. It would depend upon the terms we made with the owners of the bridge.

478. Supposing they were satisfactory, I take it that it would be a source of increased revenue? Yes.

479. *Chairman.*] Would it not also be a distinct advantage in connection with your rolling stock to have a connection between your northern and city tramway systems? It would be an advantage to have the connection. We do not have a great interchange, but there is a certain amount.

480. *Mr. Bruce Smith.*] In the case of a bridge it would be a distinct disadvantage to have a separate tramway system under private enterprise connecting the two systems on the northern and southern shores? It would be much better that the connection should be in our own hands.

481. *Chairman.*] You are aware that there is a proposal before Parliament for a tunnel connection between the two sides of the harbour;—it is proposed to run in the tunnel a private tramway? Yes.

482. You would prefer a means of communication which would allow of a tramway connection being absolutely under your own control? Yes.

483. *Mr. Bruce Smith.*] Would you consider it desirable to have a means of communication with North Sydney which involved the carrying of passengers from a bridge to the railway station? No. Although we have had no experience of big lift work in this Colony, and although there has been very little elsewhere, at the same time, where you have what I might call a suburban business—a crowded business—lift working would be inconvenient unless you had tramways working at each end where you could fill carloads at a time. I take it that the bridge you are referring to would be built to take the railway traffic across into Sydney. Take the morning business train: it carries every morning 300 or more passengers. I do not know whether any lifts could cope with traffic of that kind at one time. There is a great advantage in having business done on a level. It is just the same as a man having an office on a ground floor instead of upstairs.

484. If there was a large number of people such as you mention coming in by train to Milson's Point, having to be put into a tram on a bridge at a higher level, they would have to go up in a lift by instalments? A lot of people would be kept waiting by that arrangement? They would have to go up in instalments, and we would send them off in tramloads as they came up, but there would be a large amount of waiting unless they had an extensive lift which would carry the 300 passengers at one time.

485. In the case of passengers from Sydney to the Milson's Point train having to descend by lift in instalments, would not that be a serious disadvantage, necessitating the train being kept waiting? Passengers would have to go earlier. We should have a fixed time-table, and the passengers would come over accordingly. They could come over to a waiting train by instalments.

486. Your experience of North Sydney is that its population is growing enormously? Yes.

487. More rapidly than in any other suburb? Yes.

488. *Chairman.*] Is it within your knowledge and information with reference to the trend of settlement that it is in the direction of Hornsby or more to the eastward? Our experience is that settlement is going towards Hornsby.

489. To the west rather than to the east? Yes.

490. In fact, the character of the soil and the elevation affords inducements for settlement on the Hornsby line and thereabouts which do not exist on the more rugged and barren country to the north-east? And particularly the facilities given by railway communication.

491. *Mr. Sawers.*] If in the future a railway bridge has to be constructed, have the Railway Commissioners any definite views as to the point at North Sydney to which the bridge should go; in other words, should it go to McMahon's Point or to Milson's Point? I should like to see the question of a railway bridge dissociated from the consideration of this question, because the Commissioners have an idea that that is a question which does not require to be faced for many years. They think that commercially there is no necessity for a railway bridge. Their idea in considering the scheme some years ago was that if you made a connection the best and most economical would be by means of a tunnel from the proposed Railway Station in Hyde Park, coming a little above Milson's Point; but that is a matter which they look upon as commercially very much in the future, and it cannot well be definitely considered at the present time. There is a growing necessity to provide at North Sydney for what you might call local business, particularly vehicular business; that is the way in which we think the question ought to be most directly looked at.

492. *Mr. Bruce Smith.*] You are aware that Mr. Deane considers that the preferable route for a railway bridge, if one has to be constructed in the future, would be *via* McMahon's Point? ———

493. He thinks it better to have a railway bridge and a bridge for vehicular and pedestrian traffic, one alongside the other, so as to have practically only one interference with navigation? I understand that he gave that evidence; but, commercially, the matter seems to the Commissioners to be a long way ahead.

494. *Mr. Sawers.*] You have no definite information on that point? The opinion of the Commissioners is that which I have expressed.

Richard Watkins Richards called in, sworn, and examined:—

R. W.
Richards.
23 Nov., 1898.

495. *Chairman.*] You are the City Surveyor? Yes.
496. You have seen a copy of the Bill authorising the construction of the proposed bridge? Yes.
497. Have you also seen the plans? Yes.
498. The evidence you propose to give is given on behalf and at the request of the Mayor and the City Council? Yes; but any expression of opinion by me will not bind them.
499. You are more particularly concerned with the take-off of the bridge on the city side? That is the only part we are concerned in.
500. It is possible that you may be able to give your evidence more speedily in the form of a statement? Yes; I see no objection whatever to the proposal. It seems to me to be the first step to improve that portion of the city known as Gipps Ward; there is great need of improvement there. In regard to the Bill, I see that in clause 7, providing for authority to construct over streets, mention is made of the Engineer-in-Chief for Public Works. I think the City Council should be given a similar power to that proposed to be given to the Engineer-in-Chief. The clause says, "shall provide a substitute way to the satisfaction of the body then having the care and maintenance thereof"; that body, I presume, would be the City Council. Then in clause 13, dealing with by-laws, the clause provides that no by-law shall authorise the closing of the said bridge, or any section thereof, at any time, whether by night or by day, except at such times as, in consequence of the bridge being out of repair, or from any other sufficient cause, it shall be necessary to close the same or any section thereof, of which necessity the promoter shall first obtain the written approval of the Transit Commissioners. I think the matter should be subject to the approval of the City Council; the Transit Commissioners cannot close any street in the city, that power being vested in the Mayor and the Council. The power which the City Council enjoy now under the Corporation Act applies to the Sydney streets. We can control the approach, of course, but you might close portion of the bridge over the harbour, and that is where the difficulty would come in. The term, "any other sufficient cause," also seems to me to involve a very wide provision.
501. Suppose the provision were subject to the written approval of the Minister? I think that might do, as far as that portion above the harbour waters may be affected.
502. If it were provided that with regard to the approach at North Sydney it should be in the hands of the Council having charge of the streets there, and that with regard to the approach on the city side, it should be in charge of the City Council, and with regard to the closing of any portion of the bridge itself, that that should be in the hands of the Minister, I suppose you would have no objection? I do not see any objection to that. With regard, however, to clause 19, dealing with lights, I do not think that is a matter which should be in the hands of the Transit Commissioners, and I would suggest that in line 39, the word "Minister" should be substituted for the words "Transit Commissioners." The portion of the bridge which is in the city should, of course, be lighted to the satisfaction of the City Council.
503. If that alteration were made you would have no objection to the clause? No. With reference to clause 21, it provides that the Governor may from time to time appoint any person for the purpose of inspecting and reporting upon the condition of the said bridge, and of making any inquiry that may be deemed necessary with respect thereto. I think that in this respect the Council should have the same power that they would have in regard to ruinous or dangerous properties. The last comment I have to make upon the Bill applies to clause 27. I see that by the interpretation clause, the word "person" includes corporation or company. The Council may think fit to enter a claim for compensation in respect of a bridge crossing their streets. The Bill seems to me to be a very fair one, from the point of view of an officer of the City Council. If I were asked to deal with it I could not put forward any serious objection to it.
504. In your opinion it would have the effect of improving city property considerably in that locality? Yes.
505. Providing the bridge is constructed as shown upon the plan, would it, in your opinion, without committing the Council in any way to your view, interfere with the traffic of the streets? I do not think it would.
506. In your opinion would a bridge which involves lifts being used to carry people up to or down from the bridge be desirable, having regard to the large amount of traffic? I think not. Where they can be avoided that should certainly be done.
507. Have you seen the outlet and inlet of the tunnel under the Mersey? I have not seen them, but I have particulars of them.
508. Are you aware that people have to go up from the train by instalments, and that it is a very slow process? Yes. It was thought, when that tunnel was constructed, that people would travel by it to save time, but up to the present time it has been unable to compete with the ferry service. The tunnel is not popularised yet.
509. You have lately been through England and the Continent, and I think you have seen several tunnels of a modern character;—do you think a tunnel to North Sydney would compare with the average of them? Certainly not to a bridge.
510. Either from the point of view of comfort, convenience, and rapid travelling? Not upon any consideration.
511. From what you have seen in your travels, are you disposed to think that persons desirous of crossing the harbour would prefer a tunnel connection to the existing ferry connection, for instance? I do not think they would.
512. You think they would stick to the ferry-boats? I think so. Then, in respect of width, the bridge offers facilities which are not offered by a tunnel. I am very much in favour of bridge construction.
513. Generally speaking, and without asking that your views should bind the City Council in any way, do you think the proposed structure, with the southern pier on the foreshore of Dawes Point, would be a work of large public utility to the metropolis? Yes, I think it would.
514. Beyond the detailed suggestions you have made as to verbal alterations in the Bill, you are not prepared to offer any opposition to the scheme; on the contrary, you are disposed to approve of it? I am favourably disposed to the scheme.

1898.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

REPORT FROM THE SELECT COMMITTEE

ON

SYDNEY AND NORTH SYDNEY BRIDGE AND
TRAMWAY BILL ;

TOGETHER WITH THE

PROCEEDINGS OF THE COMMITTEE

O

AND

MINUTES OF EVIDENCE.

ORDERED BY THE LEGISLATIVE ASSEMBLY TO BE PRINTED,
30th November, 1898.

SYDNEY : WILLIAM APPELEGATE GULLICK, GOVERNMENT PRINTER.

1898.

1898.

(SECOND SESSION.)

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.

VOTES No. 31. WEDNESDAY, 26 OCTOBER, 1898.

21. SYDNEY AND NORTH SYDNEY BRIDGE AND TRAMWAY BILL:—Mr. E. M. Clark moved, pursuant to amended Notice,—

(1.) That the Sydney and North Sydney Bridge and Tramway Bill be referred to a Select Committee for consideration and report.

(2.) That such Committee consist of Mr. Young, Mr. Henry Clarke, Mr. Reymond, Mr. Watson, Mr. Howarth, Mr. Henry Chapman, Mr. Spruson, Mr. Levien, Mr. Price, and the Mover.

(3.) That the Reports, Minutes of Proceedings, and Evidence of previous Select Committees on the subject of connecting Sydney with North Sydney by bridge, tunnel, or tunnel-railway, be referred to such Committee.

Debate ensued.

Question put.

The House divided.

Ayes, 30.

Mr. Jessop, Mr. Neild, Mr. Reid, Mr. Spruson, Mr. Cook, Mr. Lee, Mr. J. C. L. Fitzpatrick, Mr. Chanter, Mr. Anderson, Mr. Rigg, Mr. Archibald Campbell,	Mr. Hogue, Mr. Affleck, Mr. Hurley, Mr. E. M. Clark, Mr. Lyne, Mr. Macdonald, Mr. Smith, Mr. McGowen, Mr. Moore, Mr. Spence, Mr. Ferguson,
---	--

Mr. Ross, Mr. James Thomson, Mr. Alexander Campbell, Mr. Willis, Mr. Millard, Mr. Watson.	Noes, 4. Mr. Carroll, Mr. Dacey.
--	--

Tellers,

Mr. Phillips, Mr. Hawthorne.	<i>Tellers,</i> Mr. Thomas Brown, Mr. Bennett.
---------------------------------	--

And so it was resolved in the affirmative.

VOTES No. 44. WEDNESDAY, 30 NOVEMBER, 1898.

13. SYDNEY AND NORTH SYDNEY BRIDGE AND TRAMWAY BILL:—Mr. E. M. Clark, as Chairman, brought up the Report from, and laid upon the Table the Minutes of Proceedings of, and Evidence taken before the Select Committee for whose consideration and Report this Bill was referred on 26th October, 1898, together with a copy of the Bill as amended and agreed to by the Committee. Ordered to be printed.

(SECOND SESSION.)

 SYDNEY AND NORTH SYDNEY BRIDGE AND TRAMWAY BILL.

 REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report was referred on 26th October, 1898, the "*Sydney and North Sydney Bridge and Tramway Bill*," and to whom was referred on the same date, "*the Reports, Minutes of Proceedings, and Evidence of previous Select Committees on the subject of connecting Sydney with North Sydney by bridge, tunnel, or tunnel-railway*,"—beg to report to your Honorable House:—

That they have examined the witnesses named in the List* (whose evidence See List, p. 7. will be found appended hereto) and the Preamble, as amended, having been satisfactorily proved to your Committee, they proceeded to consider the clauses and schedules of the Bill, in which it was deemed necessary to make certain amendments.

Your Committee now beg to lay before your Honorable House the Bill, as amended by them, with an amended Preamble.

EDWARD M. CLARK,
Chairman.

*No. 3 Committee Room,
Legislative Assembly,
30th November, 1898.*

PROCEEDINGS OF THE COMMITTEE.

WEDNESDAY, 2 NOVEMBER, 1898.

MEMBERS PRESENT:—

Mr. Henry Chapman, | Mr. E. M. Clark,
Mr. Spruson.

Mr. E. M. Clark called to the Chair.

Entry from Votes and Proceedings, appointing the Committee, and referring the Reports, Minutes of Proceedings and Evidence of previous Select Committees on the subject of connecting Sydney with North Sydney by bridge, tunnel, or tunnel-railway, read by the Clerk.

Printed copies of the Bill referred, together with original Petition to introduce same, and copies of the Reports, &c., referred, before the Committee.

Present:—W. F. Brennan, Esq. (*Solicitor for the Bill*).

[Adjourned till to-morrow at *Eleven* o'clock.]

THURSDAY, 3 NOVEMBER, 1898.

MEMBERS PRESENT:—

Mr. E. M. Clark in the Chair.
Mr. Henry Chapman, | Mr. Spruson.

Present:—W. F. Brennan, Esq. (*Solicitor for the Bill*).

William Kenwood (*The Promoter*), sworn and examined.

Witness produced plan of the proposed bridge.

Witness withdrew.

Richard Alfred Fullford, called in, sworn, and examined.

Witness withdrew.

Ordered,—That the Secretary to the Railway Commissioners, the Engineer-in-Chief for Public Works, and the Engineer-in-Chief for Railway Construction, be summoned to give evidence next meeting.

[Adjourned till Tuesday next at *Quarter past Ten* o'clock.]

TUESDAY, 8 NOVEMBER, 1898.

The House having adjourned over till Thursday, 10th instant, no meeting could be held.

THURSDAY, 17 NOVEMBER, 1898.

MEMBERS PRESENT:—

Mr. E. M. Clark in the Chair.
Mr. Henry Chapman, | Mr. Spruson.

Henry Deane (*Engineer-in-Chief for Railway Construction*) called in, sworn, and examined.

Witness withdrew.

Ordered,—That the Secretary to the Railway Commissioners be summoned to give evidence next meeting.

[Adjourned till Thursday next, at *Eleven* o'clock.]

THURSDAY, 24 NOVEMBER, 1898.

MEMBERS PRESENT:—

Mr. E. M. Clark in the Chair.
Mr. Henry Chapman, | Mr. Watson.

Present:—W. F. Brennan, Esq. (*Solicitor for the Bill*).

Hugh McLachlan (*Secretary to the Railway Commissioners*), called in, sworn, and examined.

Witness withdrew.

Richard Watkins Richards (*City Surveyor*) called in, sworn, and examined.

Witness withdrew.

John Moore Smail (*Engineer-in-Chief, Water Supply and Sewerage Board*) called in, sworn, and examined.

Witness withdrew.

William Kenwood recalled, and further examined.

Room cleared.

Preamble considered.

Question put,—“That this Preamble stand part of the Bill.”

Committee divided.

Ayes.

No.

Mr. Henry Chapman,
Mr. Clark.

Mr. Watson.

And so it was resolved in the affirmative.

[Adjourned till Tuesday next at *Two* o'clock.]

TUESDAY,

TUESDAY, 29 NOVEMBER, 1898.

MEMBERS PRESENT:—

Mr. E. M. Clark in the Chair.

Mr. Henry Chapman, | Mr. Henry Clarke,
Mr. Watson.

Present:—W. F. Brennan, Esq. (*Solicitor for the Bill*).

Mr. Watson moved,—That the resolution adopting the Preamble, agreed to at the last meeting of the Committee, be rescinded.

Question put and passed.

Preamble further considered, and amended.*

Question,—“That this Preamble, as amended, stand part of the Bill,”—put and passed.

Clauses 1 and 2 read and agreed to.

Clauses 3, 4, 5, 6 read, amended,* and agreed to.

Clauses 7, 8, 9, 10, 11, 12, 13 read and agreed to.

Clause 14 read, amended,* and agreed to.

Clauses 15 and 16 read and agreed to.

Clause 17 read, amended,* and agreed to.

Clauses 18 and 19 read and agreed to.

Clauses 20, 21, 22, and 23 read, amended,* and agreed to.

Clauses 24 and 25 read and agreed to.

Clause 26 read, amended,* and agreed to.

Clause 27 read and agreed to.

Clause 28 read, amended,* and agreed to.

Clauses 29, 30, 31, 32, 33 read and agreed to.

Clause 34 read, amended,* and agreed to.

Clause 35 read and agreed to.

Clause 36 read, amended,* and agreed to.

Clauses 37, 38, 39, 40 read and agreed to.

Clause 41 read, amended,* and agreed to.

Clause 42 read and omitted.

Clauses 43, 44, 45, 46, and 47 read and agreed to.

[Adjourned till To-morrow at Two o'clock.]

WEDNESDAY, 30 NOVEMBER, 1898.

MEMBERS PRESENT:—

Mr. E. M. Clark in the Chair.

Mr. Henry Clarke, | Mr. Watson.

Bill further considered.

Clauses 48, 49, 50, 51, 52, 53, 54, 55, and 56 read and agreed to.

Clause 57 read, amended*, and agreed to.

Clause 58 read and agreed to.

Clauses 59 and 60 read, amended*, and agreed to.

Clause 61 read and agreed to.

Clauses 62 and 63 read, amended*, and agreed to.

Clauses 64, 65, 66, and 67 read and agreed to.

First and second Schedules read, amended,* and agreed to.

Third Schedule read and agreed to.

New clauses to stand, as clauses 7, 64, and 65 read and agreed to.

Title read and agreed to.

Chairman to report the Bill with amendments to the House, including amendments in the Preamble.

SCHEDULE OF AMENDMENTS.

Page 2, Preamble, lines 4 and 5. *Omit* “about the north-east corner of Glen-street, at its intersection of or with Alfred-street” *insert* “or about the intersection of Alfred-street and Willoughby-street.”

„ 2, „ „ 11 and 12. *Omit* “the north-east corner of Glen-street at its intersection of or “with Alfred-street aforesaid” *insert* “the intersection of Alfred-street and Willoughby-street in the said borough.”

„ 4, clause 3 *add* at end of clause: “And whenever in this Act the said William Kenwood shall be named or referred to, such naming or reference shall (save where there is something in the subject or context inconsistent with or repugnant to or excluding such construction) mean and include the said William Kenwood and his executors, administrators, and assigns, or the said William Kenwood, his executors, administrators, or assigns, as the case may be and as the context may require or allow, and this clause shall besides its ordinary construction be construed as an enlargement and not as a restriction of the provisions of Sections 2, 64, and 65 respectively hereof or any or either of them.

Page 4, clause 4, line 14. After “at” *insert* “or about.”

„ 4, „ 4, lines 18, 19, and 20 *Omit* “north-east corner of Glen-street, at its intersection of or with Alfred-street in the said borough, and distant seventy-eight chains or thereabouts from the said starting point” *insert*, “intersection of Alfred-street and Willoughby-street in the said borough.”

Page

Page 4, clause 4, lines 36 to 44. *Omit* "be supported upon a set of piers placed at or about the centre of such waters, and built of iron or steel upon a base of granite or trachyte masonry not exceeding one hundred feet square, and shall have two spans crossing the said waters of not less than seven hundred feet each in length, with a clear height or headway for shipping of not less than one hundred and eighty feet above high-water mark for a length of three hundred and twenty-five feet at the least along the central portion of each of such spans" *insert* "have one span of not less than fourteen hundred feet clear width over the fairway of the said waters to the piers on the northern foreshores thereof, the central portion of which span for a length of four hundred feet at the least shall have a clear headway of not less than one hundred and eighty feet over high-water mark."

.. 5, .. 4, line 1. After "and" *insert* "based on bedrock or,"

.. 5, .. 4, .. 10. After "same" *insert* "showing the location thereof."

.. 5, .. 5, lines 30 to 33 *Omit* "north-east corner of Glen-street, at its intersection of or with Alfred-street aforesaid in the said borough, and distant one mile forty-seven chains or thereabouts from the said starting point," *insert* "intersection of Alfred-street and Willoughby-street aforesaid."

.. 5, .. 5 line 37. After "Provided" *insert* "that the gauge of the said tramway shall be first approved of by the Railway Commissioners and,"

.. 6, .. 6, .. 27. After "Jackson" *insert* "and to reclaim so much of the said waters, at Dawes Point and at Milsons' Point respectively, subject to approval of the Railway Commissioners."

.. 6, .. 6, .. 29. After "bridge" *insert* and to excavate under the said waters for the purposes of construction.

.. 6, .. 6. *Insert* the following new subsection to stand as subsection (6.)

(6.) To employ gunpowder, dynamite, or any other explosive in connection with the excavation of any of the works hereby authorised subject to such reasonable conditions and restrictions as may be from time to time imposed by the Minister and the Municipal Council of Sydney.

Page 6, clause 6, line 40. After "Acts" *insert* "and construct, maintain, and use all other works"

.. 7. *Insert* the following new clause to stand as clause 7—

"7. The said William Kenwood may from time to time contract for the laying or conducting of wires or cables under along or over the said bridge for electric, telephonic, or any other purpose or purposes, or for the laying of mains or other means for conducting or transmitting gas or electricity, hydraulic, or steam power, along, under, or over the said bridge, or for the doing of any other acts or things of any and every kind whatsoever, along, under, or over the said bridge that may be for the public convenience."

Page 8, clause 14 15, line 44. After "affected" *insert* "on or over whose lands any easement or easements may be taken"

.. 10, .. 17 18, .. 25. After "seventy-five" *insert* "Provided that if, on the taxation of such costs, one-sixth thereof be taxed off the person claiming such costs shall pay the said William Kenwood's costs of the taxation thereof."

.. 11, .. 20 21, .. 20. *Omit* "the same condition as nearly as possible" *insert* "as good a condition."

.. 11, .. 20 21, .. 21. After "thereof" *insert* "and for a period of six calendar months thereafter shall maintain and keep the same in the like good condition."

.. 12, .. 21 22. *Insert* the following new subsection to stand as subsection (4)—

"(4.) This section shall only apply to such of the works or such part thereof as shall be in the vicinity of any such sewers, water-mains, works, house services or connections as are mentioned in this section."

Page 13, clause 21 22. *Insert* the following new subsection to stand as subsection (7) :—

(7.) The said Water and Sewerage Board shall be at liberty, free from the payment of any rent, to enter upon the said bridge, and to lay and place thereunder or therealong, as the said William Kenwood may direct, a steel water-main, not exceeding 18 inches in diameter, and to alter and remove such water-main from time to time, subject to the reasonable approval of the said William Kenwood, and at their own expense shall make good any damage they may do to the said bridge.

Page 13, clause 22 23, line 10. After "Minister" *insert* "and for the Railway Commissioners."

.. 13, .. 23 24, .. 30. After "Minister" *insert* "the Railway Commissioners."

.. 14, .. 26 27, .. 7. *Omit* "will" *insert* "shall."

.. 14, .. 28 29, .. 20. *Omit* "Metropolitan Transit Commissioners" *insert* "Municipal Councils of Sydney and North Sydney."

.. 15, .. 34 35, lines 22 and 23. *Omit* "in force for the time being in respect of the same class of goods or parcels on the Government Railways for the same distance" *insert* "to be fixed in respect thereof in the by-laws in that behalf hereinafter mentioned."

.. 15, .. 36 37. Add at end of clause "or to limit the remedy of the said William Kenwood against any such licensed pilot, or against the person or persons, or body corporate, or board of persons licensing such pilot, according to his, its, and their respective liability in respect of such damage as aforesaid."

.. 17, .. 41 42, line 32. After "cars" *insert* "and for regulating the disposal of all unclaimed goods, parcels, or luggage."

.. 18. *Omit* clause 42.

.. 20, clause 57, line 43. *Omit* "five" *insert* "six"

.. 20, .. 57, .. 44. *Omit* "fifty" *insert* "seventy-five"

.. 21, .. 57, .. 4. *Omit* "five" *insert* "six"

.. 21, .. 57, .. 8. *Omit* "fifty" *insert* "seventy-five"

.. 21, .. 57, .. 9. *Omit* "five" *insert* "six"

.. 21, .. 57, .. 11. *Omit* "fifty" *insert* "seventy-five"

.. 21, .. 57, .. 13. *Omit* "five," *insert* "six"

- Page 21, clause 59, line 31. After "Commissioners" *insert* "and for the Municipal Council of Sydney"
- " 22, " 60, " 4. After "Minister" *insert* "and for the Railway Commissioners and the Municipal Council of Sydney"
- " 22, " 62, lines 35 to 41. *Omit* "the amount of the actual cost of acquisition, purchase, construction, erection, and maintenance of the bridge, tramway, premises, and works so purchased by the Crown, with an amount added equal to three years' net profits on the working of the said bridge and tramway, and other works used in connection therewith, calculated on the basis of an average of the last two preceding years" *insert* "determined in case of dispute by arbitration in accordance with and subject to the provisions of the Arbitration Act of 1892, and for the purposes of arbitration thereunder, this Act shall be deemed to be an instrument or document between the parties within the meaning of the same. Provided the amount of such compensation shall not exceed the amount of the actual *bond fide* cost of acquisition, purchase, and construction of the said bridge, tramway property and premises, with an amount added equal to three years' net profits on the working of the said bridge and tramway and other works used in connection therewith, calculated on the basis of an average of the net profits on the working of the said bridge and tramway, and other works used in connection therewith for the last two years immediately preceding the date of such notice. The Arbitrator or Umpire shall in every case have power to direct how and by whom the costs of the reference and award shall be paid"
- " 23 " 63, line 2. After "any" (second occurring) *insert* "incorporated"
- " 23. *Insert* the following new clauses to stand as clauses 64 and 65.
64. Upon and after the completion of any such assignment, transfer, and release as are mentioned in the last section hereof, any such assignee or assignees and his and their executors, administrators, and assigns, or any such incorporated Company and its officers, agents, servants, and assigns may lawfully exercise and enjoy the rights and privileges hereby conferred, and shall respectfully be and continue to be subject to all the liabilities, obligations, penalties, and forfeitures to which the said William Kenwood, his executors, administrators, or assigns, or his or their officers, agents, or servants, or any person or persons authorised by him or them would have been entitled or subject had no such assignment, transfer, or release been completed. Assignee or assignees entitled to rights, privileges, &c.
65. Upon the completion of any such assignment, transfer, and release to any such incorporated Company as is mentioned in section 63 hereof, this Act shall be read as if the words "William Kenwood" were omitted wherever they occur, and the words "incorporated Company," referred to in section 63 hereof, were inserted in their stead, and as if the words "him, his, and their," as referring to the said William Kenwood, his executors, administrators, and assigns, and his and their servants and agents, and all other persons authorised by him and them respectively were altered to "it" and "its" as referring to the said Company, and as if all other proper and necessary corresponding alterations were embodied. Completion of assignment.
- Page 24, First Schedule, line 6. After "aforesaid" *omit* remainder of schedule, *insert* "thence by lines bearing northerly to the intersection of Alfred-street and Willoughby-street, in North Sydney aforesaid"
- " 24, Second Schedule, lines 21 to 24. *Omit* "about the north-east corner of Glen-street, at its intersection of or with Alfred-street, in North Sydney aforesaid,—the entire length of the said tramway being one mile and forty-seven chains or thereabouts, the said bearings, distances, and length being all respectively a little more or less." *insert* "about the intersection of Alfred-street and Willoughby-street, in North Sydney aforesaid"

1898.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON

SYDNEY AND NORTH SYDNEY BRIDGE
AND TRAMWAY BILL.

THURSDAY, 3 NOVEMBER, 1898.

Present:—

MR. H. CHAPMAN, | MR. SPRUSON,
MR. E. M. CLARK.

E. M. CLARK, Esq., IN THE CHAIR.

W. F. Brennan, Esq., appeared as Solicitor for the Bill.

William Kenwood, Civil Engineer, Sydney, sworn and examined:—

1. *Chairman.*] Do you produce a plan of the proposed bridge? Yes; I have a sketch plan. It is not a detailed plan, but it is absolutely correct in its main points. I may say that the scheme has been recently altered from a two-span to a one-span bridge, taking the waters from Dawes Point to Milson's Point. The first bridge I proposed with two piers in the water. We subsequently altered that to one pier, and about three weeks ago one span only was determined upon; and that is the reason why the drawing is of a special nature. It is perfectly correct with regard to its principal points, such as grades, spans, and proportions, but no details are mentioned, because there has not been sufficient time to give them.

2. Have you any statement to make? Yes; I put in the following written statement:—

I am a Civil Engineer, and a member of the Engineering Association of New South Wales. I am applying to Parliament for a Bill to enable me to construct, erect, and maintain a high-level bridge over the waters of Port Jackson, between the City of Sydney and the Borough of North Sydney, and to construct, maintain and work a tramway upon and over the said bridge, and between the City of Sydney and the Borough of North Sydney and its environs. The population of North Sydney and its environs, including Manly and the districts served by the North Shore Railway, numbers (according to the Government Statistician, and from information obtained from one of the aldermen of the said borough) upwards of thirty-four thousand (34,000), while the population of Sydney and its suburbs (excluding North Sydney and the other places stated) numbers between three hundred and seventy thousand (370,000) and three hundred and eighty thousand (380,000). The increase of population along the line of railway, from Milson's Point to Hornsby, during the past five years, amounts, I am credibly informed, to between three and four thousand. Communication between Sydney and North Sydney is effected by ferry-boats for passengers, and by horse-boats for horse and vehicular traffic and live-stock. These boats belong to the North Shore Steam Ferry Company (limited). This company has at present a large fleet of penny-ferry passenger-steamers running (1) between Sydney and Milson's Point; (2) between Sydney and McMahon's Point; (3) between Sydney and Lavender Bay; (4) between Sydney and Neutral Bay; and (5) between Sydney and Mosman's Bay, while there are large horse-boats running continuously throughout the day, until midnight, between Fort Denison and Milson's Point. The evidence taken before the Royal Commission appointed in 1891 to inquire into the City Railway Extension and North Shore Bridge connection, showed that the estimated passenger traffic on the ferry-boats during the preceding year was close upon 5,000,000, while 378,500 vehicles and 43,800 horsemen used the horse-ferry, and that the estimated annual revenue from this traffic was £45,000. The evidence given before the recent Parliamentary Committees showed that the annual revenue was between £45,000 and £50,000, and I am of opinion that the traffic must have increased fully 20 per cent. since 1891. The accommodation afforded

W. Kenwood,
3 Nov., 1898.

W. Kenwood.
8 Nov., 1898.

by the fleet of steamers referred to is the only means of communication and of traffic between Sydney, North Sydney, and the other places specified, as there is no communication by land, except by a detour of a considerable number of miles. The distance across the waters of Port Jackson between Dawes Point and Milson's Point is approximately 1,500 feet. I am applying to Parliament for authority to construct a high-level bridge between Sydney and North Sydney in order to afford the public the means of communication and facilities for traffic between the places named, that are so urgently needed, and have been so long looked for. The bridge I am prepared to erect will be constructed of steel and iron of the very best quality and description obtainable, and all the material used will be subjected to the severest tests. The workmanship will be of the very best class, and everything in connection with the bridge will be of the most modern and approved character and of the highest order that engineering science can devise. My design of the bridge in question commences at the extreme end of Princes-street, Sydney; it then runs across George-street North, Dawes Point, the waters of Port Jackson, and the Government Railway premises; thence by lines bearing northerly to the intersection of Alfred-street and Willoughby-street in North Sydney. I may add that the best bridge experts in England will assist in the designing of the bridge I propose, and in arranging the details of its construction. The tramway, which is inseparable from the bridge, for the public convenience, and for the construction, maintenance, and working of which I am also asking in this Bill for Parliamentary sanction, will consist of a double line of rails, and will commence in York-street, at the corner of Wynyard-street, will run thence along about the centre of York, Grosvenor, and Princes streets, to the bridge, and then over and along the bridge to about the corner of Alfred-street and Willoughby-street in North Sydney. At that corner, as well as at Milson's Point, the Government tramway running to and from Milson's Point will receive and set down any passengers desiring to alight from or go over the bridge tramway. I may here mention that the portions of York, Grosvenor, and Princes Streets along which the tram will run are not busy streets, and traffic will not be impeded by the proposed tramway. The tramway and bridge will operate to feed the Government Railway at Milson's Point and the Government tramways in North Sydney. Passengers wishing to go by tram from Sydney will be carried from the centre of the city across the harbour to the railway station, from thence the tram proceeds along the bridge to about near the Council Chambers. At the Milson's Point portion of the bridge there will be huge lifts working continuously, as well as footways and approaches, for the convenience of the public desiring to go by train or by the Government tramway or otherwise. My present intention is to use the electric traction for the tramways, but I am likewise asking for authority from time to time to use cable, steam, or other motive powers, accordingly as the Railway Commissioners may sanction. The cars will be of a handsome and approved pattern, somewhat similar to those in use on the Rose Bay electric line, and the number supplied from time to time will always be ample for the public accommodation. There will be waiting-rooms at convenient places along the line of route of the pattern and style of the Government waiting-rooms in Elizabeth-street and in Liverpool-street, Sydney. Referring to that portion of the bridge which crosses the harbour, there will be one span of 1,400 feet in width at the least, with a clear continuous headway for shipping of about 400 feet along the central portion of this span of 180 feet from low water. The bridge is to be 60 feet wide, and is arranged for tram, passenger, vehicular, and live stock traffic. Provision is made in the Bill I am asking for so that the whole of the works may be inspected during their progress by the Minister for Works and his engineers, and the works are to be done in a substantial and workmanlike manner and to the satisfaction in all respects of the Minister. Provision is also made that the bridge is not to be open for traffic until the Minister or his engineers certify it is efficiently built and thoroughly safe in all respects. The Minister and his engineers are also empowered to make such periodical inspections of the works as they may elect to make, from time to time, in the public interest; and by the Bill, I am compelled, from time to time, to do whatever works they require to be done for its maintenance and efficiency. In like manner the Railway Commissioners and their engineers have the supervision of the tramway during its construction, and have to certify to its efficiency before it can be used. They also have power to periodically inspect and order whatever they think necessary to be done for the maintenance of the tram-lines and the maintenance and equipment of the tram-cars, and I will be obliged from time to time to comply with their directions in that behalf. The route of the bridge I have already defined, but I desire to point out that in designing it I have so contrived that no portion of the streets in Sydney or in North Sydney are altered or diverted in any way. The grades on to and off the Sydney side of the bridge will be one in 20, and one in 24, and on the North Sydney side, one in 44, which are grades of an easy nature, for vehicular traffic. There will be very little land resumptions required in the carrying out of my project, while proper safeguards are provided in the Bill for the payment to owners in respect of all lands required, as well as for payment for the right to bridge over such lands as may be necessary to be bridged over. In arranging the table of tolls and fares, I have adhered closely to, and in fact have copied the fares and rates charged by the North Shore Steam Ferry Company for the conveyance of passengers, horses, vehicles, &c.; and while a distinction is, I understand, made for heavily-laden vehicles on the horse-boats, no distinction whatever is made in the toll for such vehicles crossing the bridge. Passengers using the bridge may go by tram or walk, at their discretion, for the same fare as they are carried in the ferry boats, namely, for 1d. each way; and the whole tram journey to and from the centre of the city from and to the Council Chambers in North Sydney is not to exceed 2d. each way; while the carriage of parcels is to be at the same rate as that charged on the Government Railway for the same distance. At the end of the thirty years' period the Crown will have power to purchase the works, &c., at any time; so it will be seen, that in applying for this Bill I am not in any way trying to obtain a monopoly. The bridge and tramway will operate largely to settle population in and around North Sydney and its environs, and along the line of Government railway from Milson's Point to Hornsby, covering a distance of about 13 miles. This line passes through a country acknowledged by everybody to be one of the sanatoria of the Colony, and which is at present comparatively unpeopled. The passenger approaches and lifts to the bridge at Milson's Point, and the approach at near the Council Chambers, North Sydney, will convenience every person having occasion to cross the harbour. It is expected that there will be from 300 to 400 skilled and other workmen constantly employed on the works for the four years they will occupy in their construction. The bridge will be lighted at night by electricity; it will be a most graceful and substantial structure, and from an artistic point of view a feature to the harbour. A petition signed by over 86,000 persons in favour of the adoption of the bridge and tramway previously designed by me was presented to and received by the last Parliament. I may add, that I applied to the last Parliament for a Bill empowering me to build a bridge to North Shore, with one pier in the fairway. This Bill Parliament refused to grant, because it was thought a pier in the fairway might somewhat impede navigation, and also on the ground that the approach to my then designed bridge monopolised the only bridge site on the Sydney side. I am now asking for power to build a bridge crossing the harbour in one span, and I have altered the approach to my bridge on the Sydney side, so that it gets rid of the objection raised as to the alleged monopoly of site. I now propose to start my bridge on the Sydney side from the extreme end of Princes-street; and as in this locality there is room enough for the approaches of more than one bridge to McMahon's Point the position of the approach to my bridge will not affect the approach of a bridge to that point in the slightest degree. While the alteration in the design will, of course, add to the cost of construction, I have no hesitation in saying, and am well satisfied, that the bridge I now propose is commercially possible of construction.

The question of taking the bridge to McMahon's Point presented itself to me, but I dismissed it from consideration, the objections to it being fourfold.

First.—I considered a bridge to such an out-of-the-way place (from a populous point of view) as McMahon's Point would not meet the requirements of the travelling public to anything like the extent a bridge to Milson's Point would.

Secondly.—I was confronted with the fact that a bridge to McMahon's Point would involve the construction of piers in the water, and it might be claimed that such piers would possibly impede navigation, whereas a bridge to Milson's Point, such as I now propose, would only have one span, without any piers in mid-stream.

Thirdly.—I had before me the fact that at various times a Government scheme for a railway bridge *via* McMahon's Point had been spoken of, and though such a scheme from a practical point of view was out of the question, because of the costly railway resumptions that would have to be made on the Sydney side, and the low levels of the railway to Milson's Point, and was only remotely possible, still there would probably be a strong opposition to granting a bridge to McMahon's Point in view of the fact that the route to that point might afterwards be required for a railway bridge.

And fourthly.—Assuming that a vehicular bridge to McMahon's Point were constructed, and that a separate railway bridge were afterwards built alongside of, but independently of, or even near to it, still the proximity of the railway to the vehicular bridge would always involve a large element of danger to the vehicular traffic on the vehicular bridge; for not only is it undesirable that road and railway traffic should pass over the same bridge, but it is equally undesirable that they should run over different bridges, constructed side by side or near to each other. In any such case it would be absolutely necessary to screen the railway from the vehicular traffic by a substantial screen, and this would materially add to the cost of a railway bridge, as the erection of such a screen would require a bridge of greater stability and rigidity to resist the added wind strain occasioned by the screen.

ON SYDNEY AND NORTH SYDNEY BRIDGE AND TRAMWAY BILL.

To the end of the altering of the design of the bridge, and otherwise, I desire the Committee to make amendments in W. Kenwood's Bill according to the following Schedule:—

3 Nov., 1898.

SCHEDULE.

To introduce the following after line 9 of page 4, as a special clause, to form part of the interpretation clause (Section 3) and before section 4. "And whenever in this Act, the said William Kenwood shall be named or referred to, such naming or reference shall (save where there is something in the subject or context inconsistent with or repugnant to or excluding such construction) mean and include the said William Kenwood and his executors administrators and assigns, or the said William Kenwood his executors administrators or assigns as the case may be, and as the context may require or allow: And this clause shall, besides its ordinary construction, be construed as an enlargement and not as a restriction of the provisions of Sections 2, 64, and 65 respectively hereof or any or either of them."

In line 14, page 4 (Section 4) after the word "at" insert "or about."

At page 4 (Section 4) to strike out lines 18 and 19, and part of line 20 to, and inclusive of, the word "point," and to substitute in lieu thereof the following:—"intersection of Alfred-street and Willoughby-street in the said borough."

In section 4, to strike out all the words in line 36, page 4, after the word "shall," and all words in lines 37 to 43 inclusive, and all the words in line 44 down to the word "spans," and to substitute in lieu thereof, after the word "shall" in the said 36th line—"have one span of not less than 1,400 feet clear width over the fairway of the said waters, to the piers on the northern foreshores thereof, the central portion of which span for a length of 400 feet at the least, shall have a clear headway of not less than 180 feet over low water mark."

In line 1, page 5, after the word "and," insert "based on bedrock or."

In line 30, page 5, strike out the words after the word "the," and strike out lines 31, 32, and line 33 to and including the word "point," and insert in lieu thereof the words "intersection of Alfred-street and Willoughby-street aforesaid."

After the word "Jackson," in line 27, page 6 (sub-section 4 of section 6), to insert the words, "and to reclaim so much of the said waters at Dawes Point and at Milson's Point respectively."

After the word "Bridge," in line 29, page 6 (Sub-section 4 of Section 6), to insert the words, "and to excavate under the said waters for the purposes of construction."

To introduce as sub-section 6 to section 6, between the 36th and 37th lines of page 6, the following:—"To employ ^{Use of explosive} gunpowder, dynamite, or any other explosive, in connection with the excavation of any of the works hereby authorised, subject to such reasonable conditions and restrictions as may be from time to time imposed by the Minister."

To alter the numbers of the present sub-sections 6 and 7 respectively, to sub-sections 7 and 8 respectively.

To insert after the word "acts," in line 40, page 6, the words, "and construct, maintain, and use all other works."

In line 44, page 8, section 14, after the word "affected," insert the words, "on or over whose lands any easement or easements may be taken."

In line 25, page 10, after the words "seventy-five," insert, "Provided that if, on the taxation of such costs, one-sixth thereof be taxed off the person claiming such costs shall pay the said William Kenwood's costs of the taxation thereof."

In line 7, page 14 (section 26), strike out "will," and insert "shall."

In line 45, page 15, after the word "of" insert, "or to limit the remedy of the said William Kenwood against any such licensed pilot, or against the person or persons, body or board of persons licensing such pilot according to his and their respective liability in respect of such damages as aforesaid."

In line 32, page 17 (section 41), to add after the word "cars," "and for regulating the disposal of all unclaimed goods, parcels, and luggage."

In line 37, page 22 (section 62), after the word "so," insert the words "to be," and strike out the word "with" on the said 37th line, and on the same page strike out lines 38 to 41 inclusive, and insert in lieu thereof, after the word "Crown" on the 38th line, the following: "together with an additional sum amounting to 10 per centum on the total amount of such actual cost, with an amount added, equal to five years' net profits on the working of the said bridge and tramway, and other works used in connection therewith, calculated on the basis of an average of the net profits on the working of the said bridge, tramway, and other works used in connection therewith, for the last two years immediately preceding the date of such notice."

In line 2, page 23 (section 63), insert before the word "company" the word "incorporated."

On page 23 insert the following as Section 64,— "Upon and after the completion of any such assignment, transfer, and release as is mentioned in the last section hereof, any such assignee or assignees and his and their executors and administrators and assigns or any such incorporated company and its officers, agents, servants and assigns may lawfully exercise and enjoy the rights and privileges hereby conferred and shall respectively be and continue to be subject to all the liabilities, obligations, penalties, and forfeitures, to which the said William Kenwood his executors administrators and assigns or his or their officers agents or servants or any person or persons authorised by him or them would have been entitled or subject, had no such assignment, transfer or release been completed."

On page 23 insert the following as Section 65,— "Upon the completion of any such assignment, transfer and release to any such incorporated company, as is mentioned in section 63 hereof, this Act shall be read as if the words 'William Kenwood' were omitted wherever they occur, and the words 'incorporated company' referred to in Section 63 hereof, were inserted in their stead, and as if the words 'him, his, and theirs' as referring to the said William Kenwood, his executor, administrators, and assigns, or to the said William Kenwood, his executors, administrators or assigns and his and their servants, and agents and all other persons authorised by him and them respectively were altered to 'it' and 'its' as referring to the said company, and if all other proper and necessary corresponding alterations were embodied."

Alter numbers of present sections 64, 65, 66, and 67 respectively, to sections 66, 67, 68, and 69 respectively.

On page 24 in the first Schedule, strike out all the words in line 6 after the word "aforesaid"; and strike out lines 7 to 12 inclusive and insert in lieu thereof the following:—"thence by lines bearing northerly to the intersection of Alfred-street and Willoughby-street in North Sydney aforesaid."

On page 24, strike out lines 21 to 24 inclusive, and insert in lieu thereof the following:—"about the intersection of Alfred-street and Willoughby-street in North Sydney aforesaid."

3. *Mr. Chapman.*] Have you altered the height of the bridge from your former design? No.
4. Have you allowed for ships of 2,000 tons, with lofty spars, to go under? Yes; there are very few ships higher than the bridge.
5. Have you taken into account the fact that when they discharge in Darling Harbour the height of the hull is increased? Yes. If you go on board a ship and ask the captain what is the height of his mast, he will give it to you from the stem to the truck. If the ship draws 18 or 20 feet of water, the remainder will be the height of the mast above high-water mark.
6. What is the rise and fall of the tide? About 4 feet 10 inches.
7. *Mr. Spruson.*] You mention a petition in your statement? Yes, that is the original petition for the first scheme.
8. Was that petition obtained in such a way that the person signing it was able to discriminate between a petition for a bridge to North Shore, and for your particular bridge? I take it that it was for any bridge, for that matter; but it was put to the public as Kenwood's bridge. I think a good many signed it feeling that they would much rather have a bridge than a tunnel. I have not the slightest doubt that if Mr. Simpson had taken the same action as I did, he would have got many of those who signed my petition to sign his.
9. What I want to find out is, whether the 86,000 people said they wanted this bridge, or a bridge? They signed Kenwood's petition for Kenwood's bridge.
10. But did they know what Kenwood's bridge was? I am not vain enough to suppose that none of the 86,000 people did not sign Kenwood's petition. I take it that a great many of those who signed were in favour of the bridge as against a tunnel.

- W. Kenwood. 11. *Mr. Chapman.*] What is the width of the proposed bridge? We propose to extend Princes-street. It is a *cul de sac*, so that it cannot be said that we are monopolising the approaches, because we are going to extend that street, which has a dead end to it. The bridge will be 60 feet wide. It is an unusual width for a bridge. The North Shore people, when we were preparing our first designs, were anxious to have a wide thoroughfare, and the people that I am connected with thought that, to further the interests of the Bill, if possible, they would make it 60 feet wide. Personally I think 50 feet would be wide enough.
- 3 Nov., 1898. 12. *Chairman.*] Is it proposed to put a road in the centre for vehicular and pedestrian traffic? I scarcely think that. It would be better to carry the trams in the same way as they are carried in George-street. We do not want a very wide footway, as there will be no shops for the people to gaze in on the bridge. If we have 8 feet on either side of the bridge for footways, we shall have footways quite as wide as any ordinary street.
13. *Mr. Spruson.*] Do you propose to design the bridge with a view to carrying a railway over it at any time? No; it is intended purely for vehicular and passenger traffic.
14. *Chairman.*] Would it be strong enough to carry a railway? Undoubtedly, any bridge that is strong enough to carry vehicular and passenger traffic would be strong enough to carry a railway. I may state that a railway bridge would not be so strongly designed, that is to say if it were only a railway bridge.
15. *Mr. Chapman.*] What weight do you calculate the trams would carry? There would probably be two cars to one motor. At certain times, no doubt, we should require to do the same as they do at Flemington, when, as was the case last Tuesday, there were many thousands of people to carry away.
16. Is your scale of tolls and freights similar to that of the North Shore Ferry Company? It comes exactly the same. We have taken the ferry as our guide.
17. *Chairman.*] I suppose that when you first designed the bridge you did not foresee the many difficulties which would be thrown in your way in regard to harbour traffic? I may say that the first bridge was designed, like everything of this nature, to get the maximum for the minimum; that is to say that my instructions were to design a bridge at a minimum cost, and to meet the requirements, so far as I could see them myself. In order to do that, I designed a bridge with two piers in the water. I took off all the weights, detailed the drawings, and made a careful estimate, and it would have been built for £460,000, but this bridge will cost fully £300,000. That, however, is only a rough estimate, inasmuch as I have not had time to take off the weights and make any details. Without the sectional areas having been calculated, it would be impossible to calculate the weight of metal which will be required, and until that is done it is impossible to make a correct estimate.
18. Will the proposed bridge get rid of all the objections which were raised by shipping people, the Marine Board, and others? My instructions were to get rid of all those objections, if possible.
19. Then you may say that this is a perfect bridge for the connection? Yes; I think we have a bridge now which should meet every requirement. It is a very liberally designed bridge.
20. Do you believe the revenue coming from it will pay for the outlay? I think it will.
21. Have you submitted a design to any of the Government officers? I have made a rough tracing of it to submit to Mr. Deane for his report.
22. *Mr. Spruson.*] When this matter comes before Parliament some objection will, doubtless, be raised on the score of suspected concession; what may be said in reply to a statement to the effect that the concession is to be granted to some individual in order that he may speculate on the London market? A matter of this kind must, of necessity, to some extent be placed on the London market, but I shall ask the London market for as little assistance as any other project of this nature which is before the House.
23. *Mr. Chapman.*] You ask for a period of six months from the passing of the Act before you pay a deposit? Yes.
24. So that there is no security for your contract being carried out for six months? No; we put six months in the Bill, but I do not think that term will be necessary. It may or it may not be.
25. You will only lose £5,000, even though you never go on with the bridge at all? Yes; but I may tell you that, as a matter of fact, the central portion of the bridge will not be made here. If it is commenced, there is not the slightest doubt that it will be continued and finished. One portion will be under construction in the old country and another portion here. We should not make the approaches without having the central portion to complete the work.
26. £50,000 is not much to spend upon the work in three years? We hope to build the bridge in less than that time; but in a Bill of this kind we must give ourselves ample time. When you are dealing with people who are 13,000 miles away you must allow yourselves as much time as possible. The expenditure of £50,000 is merely put in as a sum; but the chances are that three or four times that amount will be expended.
27. *Chairman.*] If the Committee thought it necessary to raise that amount to any reasonable extent would you have any objection? I have no objection, because I am perfectly satisfied that if the Bill is granted the bridge will be built.
28. *Mr. Chapman.*] We have to remember that if permission is granted you to build the bridge we shut out anyone else from building one; if you deposit £5,000 you will really have three years in which you need not start work, although the bridge is to be built in five years; if we grant you the concession we shall deprive all others from applying even for a Bill for the construction of the bridge? There is an apparent monopoly in that way.
29. Do you acknowledge that by paying £5,000 you can shut out anyone else for three years? Yes; at any rate, I shall be prepared to receive any reasonable amendment upon that. I am willing to leave that in the hands of the Committee to deal with as they feel disposed.
30. *Mr. Spruson.*] I understand that you are not able to give us any definite calculations as to the carrying capacity and strength of the bridge; you say, however, that it will be strong enough for all the purposes of a heavy roadway and tramway? In designing a bridge you first determine what you are going to carry upon it. The first thing would be to calculate your dead and live loads, and your sectional areas are computed accordingly, and from the sectional areas you get your dead weight and material used in the construction of the bridge itself, and from that you get the cost. I have not had time to work that out in connection with this bridge. This is the third bridge that I have designed for this connection; consequently, I have not been able to make a detailed estimate. But I have been able to make a rough estimate that the cost will be about £800,000.
31. Mr. Darley, in his evidence, gives it as his opinion that the bridge should be 70 feet wide; you propose that it should be only 60 feet wide? I think he must have had in mind the idea that it was going to carry a railway across it as well.

32. *Mr. Chapman.*] Do you propose to have two lines of trams? Yes. With a bridge, the wider you go with your road, the greater everything becomes. Your road determines your dead load and your live load, and if you increase your superficial area by road to 70 feet wide, it means something very unusual. You would not find a bridge of this nature in any part of the world 70 feet wide. Sixty feet wide is wider than I would have made it myself, if I had had my way, and had not to be guided by the feelings and desires of the public. Personally, I would have made it 50 feet wide, which would have been more in accord with bridges of this nature. W. Kenwood.
3 Nov., 1898.

33. *Mr. Spruson.*] We have before Parliament a tunnel scheme;—would you like to say anything with regard to a tunnel scheme as opposed to a bridge scheme? There is very little to be said. My people do not seem to be alarmed in any way with regard to a tunnel. They say that the experience at Home, and in other parts of the world, is such that if anyone is mad enough to construct a tunnel they can do it. It will not interfere with the bridge to any serious extent. People thought that the Blackwall Tunnel, London, was going to be a success, but it is regarded as a failure. The Mersey Tunnel is also regarded as a failure. We do not regard a tunnel as a serious competitor. Our bridge will be irrespective and independent of any tunnels whatever. The tunnel will have one advantage; it will bring people more into the city, nearer to Circular Quay than the bridge. The chances are that people having offices near the Quay will use the tunnel in preference to our bridge. On the other hand, people wanting to go near the Post Office and King-street will use our bridge in preference to a tunnel.

34. *Chairman.*] What about the vehicular traffic? There is no question about that. People are not going to take horses down inclines, and then have to get out of them, unless they are mad. The bridge will take them more direct. There will be a very easy grade right across. To go by tunnel you must necessarily make long detours and long climbs, and a horse will be tired before it gets through, or to avoid this, you must have huge lifts to raise or lower the vehicles at both ends.

35. *Mr. Chapman.*] Lifts are not a popular method of locomotion? Not for vehicular traffic. I think you would think twice before taking a horse up a lift to get from Sydney to North Sydney.

36. You provide for two footways of 8 feet each? Yes; I think that would be quite sufficient.

37. That will give you 44 feet for a roadway and tramways? Yes.

38. That is 2 feet more than we have in the ordinary streets? Yes. That is one reason why I say the bridge, to my mind, is a little wider than is necessary. At the same time we want to make it as acceptable as possible to the public; therefore we are going in for what I term rather unnecessary expense. Still the bridge will be all the better for it.

39. What is the width of the Nowra Bridge? You will not find any bridge of this character more than 50 feet wide; the Prymont Bridge is only about 30 feet wide.

40. *Mr. Spruson.*] You only propose to run the tramway from Wynyard-street; if the Bill is to become law, it might as well provide for perfecting the system, so as to bring a tramway to meet the King-street tramway; otherwise it leaves a gap? I do not think there is any doubt that connection will be made ultimately. We are afraid to ask for such a connection; but there is no doubt that that connection will ultimately be made, and you will then be able to get from North Shore to Rose Bay, if you like.

41. There would be a gap there, and you would have a monopoly of it, practically, because no one else would run a tramway from Wynyard-street to King-street? We anticipate that that will be dealt with in the same way as the Railway Commissioners now deal with the Lady Robinson's Beach tram. This connection would, most likely, be made by the Railway Commissioners.

42. Do you anticipate that they might run trams from Wynyard-street to King-street? I think it is possible an arrangement could be made whereby the Commissioners would run right over our line.

43. Do your piers on the North Shore side interfere with the present railway arrangements? No; I propose a reclamation on this side, which will give me my piers on the water side of the railway. I make a reclamation by decking over on iron piers or by filling in, and we shall get an approach to our lifts. I purposely arranged that, so that our passenger traffic coming to the bridge, if they wish to go by railway, can get into the lifts and drop down on the level to the railway station, and take the train to Chatswood or anywhere they like. I explained that matter yesterday to Mr. Deane, and he could see no objection to it. We shall not encroach on the railway ground.

44. Do you think it is necessary to add any further evidence to the commercial evidence which has been given in connection with the previous inquiry? That evidence was given some time ago, and I think the estimate might now be increased. The railway and the ferry traffic is increasing rapidly every month.

45. Has the North Shore Council taken any action with regard to the bridges? I think there is something in the paper this morning. I believe they are going to interview the Government with a view of ascertaining what they propose to do.

Richard Alfred Fullford, clerk in the office of Mr. Brennan, solicitor, Sydney, sworn and examined:—

46. *Mr. Brennan.*] Did you deliver and post copies of the Bill to the following departments in October last:—The Commissioner for Railways, Town Clerk, Sydney, Water and Sewerage Board, Crown Solicitor, Secretary for Public Works, Council Clerks, Willoughby, North Sydney, Lane Cove, and Mosman? Yes. R. A. Fullford.
3 Nov., 1898.

THURSDAY, 17 NOVEMBER, 1898.

Present:—

MR. SPRUSON, | MR. H. CHAPMAN.
E. M. CLARK, ESQ., IN THE CHAIR.

W. F. Brennan, Esq., Solicitor, appeared on behalf of the promoter of the Bill.

Henry Deane sworn and examined:—

47. *Chairman.*] You are Engineer-in-Chief, Railway Construction Branch? Yes.

48. You gave some evidence before some previous Committee upon the matter of a bridge connection with North Shore? Yes. H. Deane.
17 Nov., 1898.

49. Also upon the proposed tunnel connection with North Shore? Yes.

50. You have had submitted to you some revised plans, some amended proposals of Mr. Kenwood, in regard to his proposed bridge? I have. 51.

H. Deane.
17 Nov., 1898.

51. The Committee will be glad to know if you have any objections to urge in regard to those proposals? I notice from the title of the Bill that the measure includes powers to "construct, maintain, and work a tramway upon and over the said bridge." It will be a very difficult matter for a private company to work a section in between the Railway Commissioners' lines. Arrangements would probably have to be made with the Railway Commissioners to work the traffic across the bridge.

52. *Mr. Spruson.*] Do you mean that it will only be inconvenient; or do you object, on principle, to a private company having anything to do with a metropolitan tramway? I point out the objection, and it will be for the Government to deal with it.

53. Is it an objection on the ground of policy? Yes. It will be inconvenient to have a private company's tramway running in between the Government tramways, on the north and south shores. I notice that the headway proposed on the plans is 180 feet above low water. I understood that that should be 180 feet above high water. Mr. Darley and I were instructed to go into that matter some time ago, by the Minister for Works, and our recommendation was that it should be 180 feet above high water. It is only a matter of a difference of about 5 or 6 feet. I wish to recommend that provision be made in this Bill, as has been proposed in the case of other Bills dealing with the North Sydney connection, that plans shall be submitted to the Minister for Works for approval, both as to design and location, before the commencement of the work, and that the work, as a whole, or in part, as the case may require, should be submitted before commencement to the authorities interested. The authorities are the Minister for Works, the Railway Commissioners, the Board of Water Supply and Sewerage, the City Council, and the North Sydney Council.

54. *Mr. Chapman.*] I think you will find that provision is made for that in clause 4, on page 5? It says that a plan or design, and specification of the same shall be submitted to, and approved of by, the said Minister, or by the Agent-General in London for the Colony of New South Wales. I should like the location to be specially mentioned. That proviso covers the matter fairly well, except as to location.

55. You would suggest the insertion of the word "location"? Yes; a plan or design may be subject to modifications in regard to location. It is an important thing. The location should be approved as well as the plan. I also wish to point out that the Agent-General is not the proper authority to submit the location of the work to.

56. The work might be started 100 yards or more from the place exhibited on the plan? Yes. I think there is a provision in the Bill for the deviation of the work; but I think it is far too vague, and that it should be restricted in the way I suggest.

57. Is it not located by clause 4? Yes, but only in a general way.

58. *Mr. Spruson.*] The words "a plan or design" are rather indefinite; I understand that you wish that you should practically have a working plan—details? Yes.

59. *Mr. Chapman.*] If we say in the clause "plans, designs, and specifications," with the location of the same, would that meet it? Yes.

60. The words should be "plans, designs, specifications, and location"? Yes; I think it should be a complete design.

61. And no deviation afterwards? No. I am really only recommending what is practically done in the British Isles, under the Board of Trade. I do not think there is any proper provision for applying to the Water and Sewerage Board and the City authorities with regard to any permission or privilege of work which would necessarily come under their jurisdiction. It is very important, as regards the deviation of streets and headways, and so on, that the City Council and the North Sydney Council should be consulted. I do not think that section 23 is quite sufficient. It wants not only proper notice, but application should be made for approval with regard to anything that is done. It would really be in the interests of the proprietors to take such steps beforehand so as to avoid difficulties. In making the reclamations proposed on the North Shore connecting the outer cylinders of the bridge with the North Shore Ferry Company's Point it would be necessary to provide that the Railway Commissioners and the North Shore Ferry Company should retain their frontage. I do not think there is anything in the Bill as to how that is to be done. As shown on the plan, it looks as if the reclamation was to be made and to become the property of the Bridge Company, whereas, I should doubt very much whether that could legally be done; whether anything of that sort in the Bill would not really be *ultra vires*; whether the owners of the land fronting the water have not the sole right of reclamation. At any rate it is a very important point, because if that land were reclaimed, on that portion of the water-frontage, and the Railway Commissioners were robbed of their frontage, it would be a very serious loss to them. They might find it necessary at any time in conjunction with or in opposition to the North Shore Ferry Company, to make a landing stage and run steamers right up opposite the railway station. I find that otherwise the headway proposed to be given under this sketch for the bridge would be sufficient, or nearly sufficient. I take it that the Bill would in no way bind the Government to agree to the lower line of the superstructure as shown on the plan.

62. Have you gone into the question as to the width of the bridge? A 60-foot roadway is, I think, quite enough. In the city one would like to have 66 feet or more; but on a bridge like this there will be no standing vehicles, and it makes a great difference. My former remarks would also apply to the proposed reclamations on the South Shore, though that is Government property. On previous occasions I objected to Mr. Kenwood's design on two grounds: First, that the bridge had its southern end at Dawes Point, and going over to Milson's Point would clash with a railway bridge; because I considered that there would not be room for two abutments and approaches at the southern end, and that the piers that were proposed on the North Shore, at that time, would seriously interfere with the further development and extension or widening of the railway station there. I find that the present design as regards the northern end, is, in this respect, unobjectionable; it permits of a widening of the station towards the land, although not towards the water. As regards the south side, of course the new location proposed, to some extent, gets over the objection that I formerly made. I think it is quite possible that by bringing the abutments so far east as is shown on this plan, to get a railway bridge across to McMahon's Point, and make the approaches to the road bridge without seriously interfering with the future railway bridge. It will require a great deal of scheming, but I think it might possibly be done.

63. *Mr. Spruson.*] If a railway bridge were to be built there at a future time, it would require the use of Princes-street for the purpose of a railway track? No; I do not think it is necessary to adopt any special location there. It might be north or south of Princes-street.

64. The Bill proposes to grant powers to lay down tramways along Princes-street;—would not that make it impracticable for a railway? I should not put a railway in Princes-street. The road approach would have

have to go under the railway bridge, and I should like to insist that provision be made in the Bill that the design must be such as not to clash with the railway. If Mr. Kenwood can show that that can be done, I should not object to the location. It would mean the taking of a lot of levels, and doing a good deal of work before you can show that that can be done. H. Deane.
17 Nov., 1898

65. You think that the location of Mr. Kenwood's bridge, although it would not necessarily preclude your building a railway bridge to McMahon's Point, would stand in the way of a second bridge being built in the Milson's Point direction? I do not think it would interfere with a second bridge to Milson's Point; but I do not believe that a railway bridge would ever be made across to Milson's Point. A higher point is necessary for the northern end of the railway bridge, and from Milson's Point there would be a detour through valuable property to join on to the existing railway. There is only one other matter to which I would refer, and that is, this new location on Dawes Point Battery ground. Probably it would be desirable to get the opinion of the Military authorities on that.

66. *Mr. Brennan.*] Your previous objection to the Bill with the altered design no longer holds as to the location on the Sydney side? No. The objection which I made before does not hold to the same extent, but the conditions abovementioned should be imposed.

67. *Mr. Chapman.*] You say that the bridge should be 180 feet above high-water mark? Yes.

68. *Chairman.*] Have you had any consultation with Mr. Darley since the altered plans have been submitted to you? Yes, I have had some conversation with Mr. Darley and, showed him the plans; he thought that as regards the navigation the scheme was unobjectionable; but, that, if necessary, the underslope of the cantilever could be raised.

69. I suppose you have not consulted the Railway Commissioners? I have seen them, but there are so many points in which the Railway Commissioners' interests are affected that I think they would prefer that Mr. McLachlan should give evidence.

THURSDAY, 24 NOVEMBER, 1898.

Present:—
MR. H. CHAPMAN, | MR. WATSON.
E. M. CLARK, ESQ., IN THE CHAIR.

W. F. Brennan, Esq., appeared as Solicitor for the Bill.

Hugh McLachlan, Secretary to the Railway Commissioners, sworn and examined:—

70. *Chairman.*] I understand that you desire to give some evidence in connection with this proposal? H.
McLachlan.
24 Nov., 1898.
The Commissioners had no special desire to give any evidence in regard to the policy of the Bill or the policy of constructing a bridge. They look upon that as being a matter for the Government to consider. The point in which the Commissioners are concerned is in regard particularly to the proposal to encroach on lands they occupy at Milson's Point; you will notice by the plan of the bridge that the promoters of the Bill propose to have a pier or piers practically on our property at Milson's Point; we have not too much room there; we have a water frontage, and if we extend the station, as no doubt we shall have to extend it, the extension will probably be on the water side, and it is a question whether the pier or piers for the bridge would not block our probable extension, the promoters of the Bill proposing to make a reclamation; if that reclamation be made, will that land belong to us? Of course we must have some consideration for our water frontage being taken. If the reclamation were given to us and we still retained a water frontage, we should to some extent be in the same position as we are now. That is one point which the Commissioners particularly wish should be provided for. The Commissioners are much affected by this proposal, and they should be consulted. Take, for instance, clause 6. It gives the promoters of the Bill power to enter upon Crown lands and private lands, and also provides that the promoters shall obtain the approval of the Minister or, in other cases, the approval of the Municipal Council of Sydney, or the borough of North Sydney, previous to the carrying out of the proposed works. As the Commissioners are so much concerned, they think that they also ought to be consulted, and have power of approving or otherwise any plan, so far as it affects their property.

71. *Mr. H. Chapman.*] They are not taken into consideration in the Bill? Apparently not.

72. *Chairman.*] The addition of the words "Railway Commissioners" in connection with that clause would meet that? Yes; I think so.

73. Then what power is given to the promoters of the Bill with regard to the reclamation; are they to make the reclamation, and is the land to be given to them;—are the Commissioners to be deprived of a valuable water frontage, and shut out from any extension? That is one matter the Commissioners specially desire the Committee to make provision for. The Commissioners should also be mentioned in clauses 21, 22, and 23. In other places where the Minister and the Municipal authorities are mentioned the Commissioners should also be mentioned.

74. *Mr. H. Chapman.*] You want the Commissioners treated just the same as the Municipal Council of Sydney or the borough of North Sydney? Yes; where they are affected.

75. In regard to the railway, do you see any objection to giving the promoters of the Bill permission to run a tramway—will it clash? It would be a very considerable competitor with the North Shore tramway.

76. That would be in case the Government erected a bridge afterwards? No; I mean in this way: The promoters of the Bill propose to run their tramway from a convenient point in Sydney across the harbour to the North Sydney Town Hall, or to some place above it—comparatively near the end of the first section of our tramway. Many of the people who now travel by boat, and then take the tramway up to the end of our first section, or to some point on the first section, would very likely take the promoters' tramway and go straight across, and would not use our tramway at all. No doubt the greatest competition would be with the ferry company, but to a considerable extent this proposed tramway would be a competitor with our cable tramway.

77. *Mr. Watson.*] Is it not a fact that a very large proportion of people go up as far as Walker-street by the cable tramway, and if this proposed tramway were constructed, it is likely they would go by it as far as this tramway went, and then walk the short distance to Walker-street? I think that on the average about one-fourth of the traffic on the North Shore cable tramway is on the first section only, and the traffic of that section would be largely affected by a through tramway from the city over the

H.
McLachlan.
24 Nov., 1898.

the bridge. That is where we would be affected by the construction of the bridge. Speaking of the tramway, there is a minor matter I may mention. I do not know whether the Committee would consider it a matter of importance. The Bill does not provide for the gauge of the tramway. The matter is important in this way only—that the Bill provides for the Government having power to resume the proposed line; it is usual to provide for the gauge. All the tramways we have have a gauge of 4 ft. 8½ in. I think the Commissioners should have power to deal with the question of gauge. I submit the matter for the consideration of the Committee. There are one or two matters of detail which I have noticed. For instance, clause 34 is a little indefinite about the charges. A parcel is charged for by us the same if carried for 10 miles as for 1 mile; we have a common rate now—I to 22 miles. But, perhaps, this matter would be regulated by another clause, referring to the by-laws. If the by-laws are to be approved of by the Government that might be sufficient. Perhaps clause 41 may sufficiently provide for it. But I do not think that I would leave the open door provided for in clause 42—that the by-laws shall be deemed to have been approved of if submitted to the Government one month and not disapproved of meanwhile. I would provide absolutely that they must have the approval of the Government. It would be safer to leave clause 42 out altogether. In regard to the resumption under clause 62, I prefer the provision that has been made in a number of other Bills,—that failing a satisfactory settlement being arrived at in regard to the compensation to be paid, the question shall be settled by arbitration, as provided for in the "Land for Public Purposes Acquisition Act," instead of providing merely for some supposed basis. The clause says that the Crown on resumption shall pay "the amount of the actual cost of acquisition, purchase, construction, erection, and maintenance of the bridge, tramway, premises, and works so purchased by the Crown." That provision as to the payment of the cost of maintenance would be an absurd thing to leave in the Bill. I think that the promoters of the Bill cannot be serious in putting that in, but that it has got in by mistake. Maintenance is really a charge on working expenses. The bridge might cost a lot for maintenance in thirty years, and it would be absurd to ask the Government to pay the actual cost of the maintenance. I think that the words "and maintenance" should be struck out.

78. *Mr. H. Chapman.*] What about the conveyance of goods by the proposed tramway? That would be covered by clause 41, and, of course, competition would, I think, prevent excessive charges; but, perhaps, a safer thing would be to leave out clause 34, because clause 41 provides for the matter. The matter might be provided for in the by-laws.

Richard Watkins Richards, City Surveyor, sworn and examined:—

R. W.
Richards.
24 Nov., 1898.

79. *Chairman.*] I understand that you desire to give some evidence on this Bill? Yes; I have been instructed by the City Council to appear here; but any views that I may express will not bind them as regards any judgment they may arrive at.

80. *Mr. H. Chapman.*] Have you read the Bill through? I have.

81. It is now before the City Council, but not dealt with? Not dealt with.

82. Have you furnished a report upon it yet? I have furnished a report, but not in full. I have examined the Bill, and the late City Solicitor also wrote a report, which, I think, I had better read. He says:—

Section 15 should, I think, provide for compensation for improvements. After the word "taken," in the eleventh line of such section, the following words added would meet the case:—"And in the case of streets in the city of Sydney the compensation payable to the Municipal Council of Sydney shall be calculated by adding to the freehold value of the land taken the cost of the improvements thereof."

83. *Mr. Watson.*] That is practically to provide for the amount you have expended on the street? Yes, in addition to the freehold value.

84. *Chairman.*] I think that this Bill does not give the promoters power to take any streets at all. Clause 11 provides—

It shall be lawful for the said William Kenwood and all persons acting under him to enter upon any lands being within a distance of not more than 100 yards from the nearest point of any works, and to occupy the same as long as may be necessary for the erection, construction, maintenance, reconstruction, repair, alteration, addition to, or extension of any works.

And under clause 20 the promoters of the Bill ask for power to enter upon streets.

85. You have some further evidence to give, have you not? Yes, a little. As regards the construction of a double line of tramway under clause 5, I do not think that power should be conferred upon any private person or company to construct tramways within the city of Sydney; but in the event of such a concession being granted, the company should pay to the City Council a rate upon the assessed value of such construction, and also a share of the profits derived therefrom. That is the practice in the cities of the United Kingdom. In regard to constructing the tramway to the general level of the street under clause 24, from my knowledge of the streets through which the tramway would go, I say that it would be necessary to alter the levels in some places, because one side of the street is higher than the other, and provision should be made for the cost of such alteration, to be borne by the promoters of the Bill, and they should be rendered liable for any compensation that might be claimed by citizens on account of such alterations affecting their property. I think that wherever the word "Minister" occurs in the Bill in regard to approval of construction, the words "Municipal Council of Sydney" should also be inserted, as regards the approval of such portion of the proposed work as would be situated within the City of Sydney. In some cases I noticed that that has been omitted. Clause 28 provides, among other things, that the promoters of the Bill "shall keep and maintain (on the bridge) such other lights thereon as the Metropolitan Transit Commissioners for the time being may consider necessary." The words "Municipal Council of Sydney" should be substituted for the words "Metropolitan Transit Commissioners." The lighting of the City is controlled by the City Council. In clause 59, after the words "Railway Commissioners," the words "and the Municipal Council of Sydney" should be added. In clause 60, after the word "Minister," the words "the Municipal Council of Sydney or its authorised officer" should be added. That is all I have to say in regard to the Bill, except that under clause 20 the term of maintenance of the restored surfaces should be at least six months.

86. *Mr. Watson.*] You were in England recently on behalf of the City Council? Yes.

87. You indicated in your remarks a little while ago that in the larger cities of the United Kingdom they have an arrangement for rents or royalties or some other form of payment to be made by the tramway company to the local Municipal Council? The trend is altogether in that direction. The City Council

of

of London assess all the under ground railways on the value of their construction. A rate is imposed accordingly, and the railways pay to the City Council of London those rates.

88. It is not construed as rent, but merely as a rate, in the same way as the rates on other properties? It is construed as a rent. I put the question distinctly to the Town Clerk in London, and I have a reply in writing to the effect I have just given.

89. Is it the same in the case of other cities, such as Manchester? The Manchester municipal authorities are exercising every possible effort now to obtain powers of control over everything in the city. They have the electric lighting and the gas, and I believe also a section of the tramways.

90. They themselves run a section, or own a section? Yes.

91. The section they do not own, do they charge any rental for? I cannot say in regard to Manchester.

92. Do you know instances where such a charge is made? Glasgow did make such a charge, and on 13th October this year Glasgow operated upon its powers and opened its first electric tramway, and expects next year to acquire the present system of tramways, which has been in operation the last twenty years.

93. But from the inception the Glasgow Municipal Authorities have been charging rent for the use of their streets? Yes; and throughout the cities of the United Kingdom every service that passes over, upon, or under a street, is charged for in some way—for instance, telephone wires.

94. The companies have to pay for the use of the street? Yes.

95. In the form of direct rent, or assessment? Direct rent.

96. Not assessment on capital value? No.

97. *Chairman.*] The same thing would apply, of course, to 'bus companies, or the owners of any vehicles using the street? I think so. A 'bus company, of course, has no permanent occupation of the road.

98. *Mr. H. Chapman.*] Do you know what arrangement there is in Melbourne between the Tramway Company and the City Council? I believe they are rated, but I cannot say from memory.

99. Is it a fact that the different tramways there are to revert to the Melbourne City Council? Yes; after a certain term.

100. There is a tramway trust there? Yes.

101. In which, I believe, each of the municipal bodies is interested? Yes.

102. It is virtually a concession to the Councils there in the shape of royalty? Yes; I think there is a rate upon the mileage and the value.

103. *Chairman.*] Of course, the same thing as would apply to this proposal in regard to rent in connection with a bridge and tramway would also apply to an underground railway? Yes; as far as it went through the city.

104. I suppose you have made a similar proposal in regard to that? In giving previous evidence some years ago I made the same proposal in regard to the proposed tunnel.

105. Not lately? No. At the time Mr. Sulman's scheme was before a Select Committee—I think in 1895 or 1896—I made the same statement in regard to rates, and I was questioned about the underground railways of London; and therefore when I was in London I took the opportunity of inquiring into the matter, and the information which I obtained I have given.

John Moore Smail, Chief Engineer, Water and Sewerage Board, sworn and examined:—

106. *Chairman.*] I understand that you desire to give some evidence? Yes. The matter which I now propose to bring under the notice of this Committee, I also brought under the notice of the North Shore Bridge Committee, and the Committee in regard to the tunnel proposal. I may read a minute which I addressed to the Board, which embodies practically what I wish to state. The matter was remitted to me for me to give a professional opinion as regards sewers and water-mains. The minute is as follows:—

With regard to sewerage works, it is not likely that a sewer—metal or otherwise—will ever be required to cross the bridge; so that provision in this respect is not necessary. It may, however, be necessary in the future to carry a water-main across the bridge, and provision should be made in the Bill to give the Board the right to do so. This could be done either outside the side members of the bridge or underneath, as might best work in with the design of the proposed work. I think, if the provisions were to include that suitable provision should be made for carrying water-mains across the bridge free of cost, and subject to the approval of the Board's engineer, the interests of the Board would be amply protected.

I may say that that suggestion was agreed to by the engineer representing the promoters of the other bridge, and it was arranged that their solicitor should draft a short clause, and submit it to the Board, which would cover that provision. It simply means that we shall have a right to lay a pipe across the bridge—of course at no expense to the bridge people.

107. *Mr. H. Chapman.*] The same as you would take possession of a street? Yes. The tunnel people have consented to give us a certain section of the area, and in the case of the bridge we could take the water-main through the lattice underneath.

108. *Chairman.*] In connection with bridge work generally, provisions of that character are made? Yes; we have water-mains across all bridges. We should simply want to lay a pipe not exceeding 18 inches, and that only for water purposes. There is no provision required for sewerage.

109. *Mr. H. Chapman.*] You think that otherwise the interests of the Water Supply and Sewerage Board are protected? Yes; they are amply protected.

110. You have, I suppose, read clause 21? We have had an amended clause prepared which covers everything.

William Kenwood recalled and further examined:—

111. *Mr. Watson.*] With regard to clause 62, would you have any objection, as the promoter of the Bill, to its containing a provision to the effect that the amount of purchase-money to be paid by the Crown in the event of resumption at the expiration of thirty years or subsequently, shall be settled by arbitration in the ordinary way in connection with the acquisition of land for public purposes, but with a maximum amount fixed; that course was adopted in respect to the tunnel Bill which has recently been before another Select Committee, and it was agreed to by the promoters of that measure? I do not think there is any objection to that.

REPORT FROM THE SELECT COMMITTEE

ON

MORT'S DOCK AND ENGINEERING COMPANY
(LIMITED) ENABLING BILL;

TOGETHER WITH THE

PROCEEDINGS OF THE COMMITTEE,

MINUTES OF EVIDENCE,

AND

APPENDIX.

ORDERED BY THE LEGISLATIVE ASSEMBLY TO BE PRINTED,
7 December, 1898.

SYDNEY: WILLIAM APPLIGATE GULLICK, GOVERNMENT PRINTER.

—
1898.

1898.

(SECOND SESSION.)

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.

VOTES No. 27. TUESDAY, 18 OCTOBER, 1898.

3. **MORT'S DOCK AND ENGINEERING COMPANY (LIMITED) ENABLING BILL**:—Mr. Hawthorne presented a Petition from Flora Rodger, wife of James Rodger, of Mort-street, Balmain, representing that she is the owner of property in Mort-street, Balmain, which is proposed to be closed by this Bill, and praying the House to reject the Bill, or so amend it that the Company should provide compensation for any loss incurred by the Petitioner; and also for leave to appear by counsel or attorney before the Select Committee now sitting on the Bill.
Petition received.

VOTES No. 39. THURSDAY, 17 NOVEMBER, 1898

8. **MORT'S DOCK AND ENGINEERING COMPANY (LIMITED) ENABLING BILL (Formal Motion)**:—Mr. Wilks moved, pursuant to Notice,—
(1.) That the Mort's Dock and Engineering Company (Limited) Enabling Bill be referred to a Select Committee for consideration and report.
(2.) That such Committee consist of Mr. Dick, Mr. Gormly, Mr. Nicholson, Mr. McGowen, Mr. Gillies, Mr. Law, Mr. Rigg, Mr. Hayes, Mr. J. C. L. Fitzpatrick, and the Mover.
Question put and passed.

VOTES No. 40. TUESDAY, 22 NOVEMBER, 1898.

6. **MORT'S DOCK AND ENGINEERING COMPANY (LIMITED) ENABLING BILL**:—Mr. Wilks (*by consent*) moved, without Notice, That the Petition of Flora Rodger, praying for leave to appear by counsel or attorney before the Select Committee on "Mort's Dock and Engineering Company (Limited) Enabling Bill," be referred to the Select Committee now sitting on the said Bill.
Question put and passed.

VOTES No. 46. TUESDAY, 6 DECEMBER, 1898.

26. **MORT'S DOCK AND ENGINEERING COMPANY (LIMITED) ENABLING BILL**:—Mr. Wilks, as Chairman, brought up the Report from, and laid upon the Table the Minutes of Proceedings of, and Evidence taken before the Select Committee for whose consideration and Report this Bill was referred on 17th November, 1898, together with Appendix and a copy of the Bill as amended and agreed to by the Committee.
Ordered to be printed.

(SECOND SESSION.)

MORT'S DOCK AND ENGINEERING COMPANY (LIMITED) ENABLING BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report was referred on the 18th October, 1898, "*Mort's Dock and Engineering Company (Limited) Enabling Bill*," and to whom was referred on 22nd October, 1898, a *Petition from Flora Rodger*, "*praying for leave to appear by counsel or attorney before the said Committee*,"—beg to report to your Honorable House:—

That they have examined the witnesses named in the List* (whose * See List p. 5. evidence will be found appended hereto), and the Preamble having been satisfactorily proved to your Committee, they proceeded to consider the clauses and Schedules of the Bill, in which it was deemed necessary to make certain amendments.

Your Committee now beg to lay before your Honorable House the Bill as amended by them.

WILLIAM H. WILKS,
Chairman.

No. 2 Committee Room, Legislative Assembly,
6th December, 1898.

PROCEEDINGS OF THE COMMITTEE.

WEDNESDAY, 23 NOVEMBER, 1898.

MEMBERS PRESENT:—

Mr. Gillics,		Mr. Gormly,
Mr. Hayes,		Mr. Law,
Mr. Nicholson,		Mr. Rigg,
	Mr. Wilks.	

Mr. Wilks called to the Chair.

Entries from Votes and Proceedings appointing the Committee, and referring the "Petition of Mrs. Flora Rodger, praying for leave to appear by Counsel or Attorney," read by the Clerk.
Printed copies of the Bill referred, together with original Petition to introduce same, also Petition of Mrs. Flora Rodger, before the Committee.

Parties called in.

Present:—G. E. Rich, Esq. (*Counsel for the Promoters*).F. Curtiss, Esq. (*Messrs. Curtiss and Barry, Solicitors for the Promoters*).A. J. Kelynack, Esq., and H. R. Curlewis, Esq. (*Counsel for Mrs. Flora Rodger*).H. Wolstenholme, Esq. (*Messrs. White and Wolstenholme, Solicitors for Mrs. Flora Rodger*).James Laidley Mort (*Chairman of Mort's Dock and Engineering Company, Limited*), called in, sworn, and examined.

Witness handed in plan showing portions of streets proposed to be closed, and proposed new wharf in the vicinity of Mort's Dock and Engineering Company's Works. [See Appendix.]

William Hilson Pigott (*Solicitor*) called in, sworn, and examined.

Witness withdrew.

James Peter Franki (*Manager of Mort's Dock and Engineering Company, Limited*) called in, sworn and examined.

Witness produced Memorandum of Agreement between Mort's Dock and Engineering Company (Limited) and the Borough of Balmain.

Witness withdrew.

George Dingwall (*Sailmaker*) called in, sworn, and examined.

Witness withdrew.

George Clubb (*Land Agent*) called in, sworn, and examined.

Witness withdrew.

William Moffatt Burns (*Land Agent*) called in, sworn, and examined.

Witness withdrew.

John Archibald James (*Ferry-boat Master*) called in, sworn, and examined.

Witness withdrew.

William Henry McLean (*Secretary to the Balmain Ferry Company*) called in, sworn, and examined.

Witness withdrew.

George Edward Young (*Returning Officer for Balmain North*) called in, sworn, and examined.

Witness withdrew.

Frederic Curtiss (*Solicitor*), sworn, and examined.

Witness produced Certificate of Registration of Mort's Dock and Engineering Company (Limited).

James Macdonald (*Architect and Surveyor*) called in, sworn, and examined.

Witness withdrew.

[Adjourned till Wednesday next at Eleven o'clock.]

WEDNESDAY, 30 NOVEMBER, 1898.

MEMBERS PRESENT:—

Mr. Wilks in the Chair.

Mr. Law,		Mr. Nicholson,
	Mr. Rigg.	

Present:—G. E. Rich, Esq. (*Counsel for the Promoters*).F. Curtiss, Esq. (*Messrs. Curtiss and Barry, Solicitors for the Promoters*).A. J. Kelynack, Esq., and H. R. Curlewis, Esq. (*Counsel for Mrs. Flora Rodger*);H. Wolstenholme, Esq. (*Messrs. White and Wolstenholme, Solicitors for Mrs. Flora Rodger*).

William Hilson Pigott recalled and further examined.

Witness withdrew.

Gilbert Curtiss Murdoch (*Mayor of Balmain*) called in, sworn, and examined.

Witness withdrew.

John Campbell Hamilton (*Auctioneer and Land Valuer*) called in, sworn, and examined.

Witness withdrew.

John Yelverton Mills (*Land and Estate Agent and Valuer*) called in, sworn, and examined.

Witness withdrew.

George Bishton called in, sworn, and examined.

Witness withdrew.

Samuel Patrick Boyd (*Plasterer*) called in, sworn, and examined.

Witness withdrew.

Mrs. Flora Rodger (*wife of James Rodger, of Mort-street, Balmain*) sworn and examined.

Room cleared; Committee deliberated, and decided to hear addresses of Counsel.

Parties called in.

Mr. Kelynack addressed the Committee.

Mr. Rich addressed the Committee.

Mr. Kelynack replied.

[Adjourned till Tuesday next at Two o'clock.]

TUESDAY,

TUESDAY, 6 DECEMBER, 1898.

MEMBERS PRESENT:—

Mr. Wilks in the Chair.

Mr. J. C. L. Fitzpatrick,
Mr. Nicholson,

Mr. Hayes,
Mr. Rigg.

Present:— G. E. Rich, Esq. (*Counsel for the Promoters*).

F. Curtiss, Esq. (*Messrs Curtiss and Barry, Solicitors for the Promoters*).

H. R. Curlewis, Esq. (*Counsel for Mrs. Flora Rodger*).

H. Wolstenholme, Esq. (*Messrs. White and Wolstenholme, Solicitors for Mrs. Flora Rodger*).

Room cleared. Preamble considered.

Question,—“That this Preamble stand part of the Bill,”—put and passed.

Parties called in and informed.

Clauses 1 to 5 read and *agreed to*.

Schedules A and B read and *agreed to*.

New Clause to stand as Clause 5 read and *agreed to*.

New Clause to stand as Clause 6 read.

Mr. Rigg moved to leave out in line 6 the word “twelve” with a view to the insertion of the word “nine.”

Question put,—“That the words proposed to be left out stand part of the clause.”

Committee divided.

Ayes.

Noes.

Mr. J. C. L. Fitzpatrick,
Mr. Hayes,
Mr. Nicholson,
Mr. Wilks.

Mr. Rigg.

And so it was resolved in the affirmative.

New Schedule to stand as Schedule C read and *agreed to*.

Title read and *agreed to*.

Chairman to report the Bill with amendments to the House.

SCHEDULE OF AMENDMENTS.

Page 4. Insert the following new clauses to stand as Clauses 5 and 6:—

5. The said indenture of 1 January, 1896, shall be read as altered in accordance with this Act, and shall for all purposes, until discharged, be held to be a valid security.

Indenture of 1
January, 1896,
to be a valid
security.

6. Notwithstanding anything in this Act contained it shall be lawful for Flora Rodger, wife of James Rodger, now of number seventy-two Mort-street, Balmain, near Sydney, in the Colony of New South Wales, engineer, her executors, administrators, and assigns, to sue the said Company for and recover from the said Company compensation for the injury or loss (if any) suffered by her or them in respect of her or their right, title, and interest, in or to the land described in Schedule C hereto by reason of the exercise by the said Company of any of the powers conferred by this Act, at any time within a period of “twelve” months from the exercise of the said power.

Power to Flora
Rodger to sue.

Page 4, insert the following new Schedule to stand as Schedule C.

SCHEDULE C.

All that parcel of land situate in the Borough of Balmain, Parish of Petersham, County of Cumberland, and Colony of New South Wales, being lot 3 of the subdivision of the southern portion of the 2 roods 35 perches block between Trouton-street (formerly known as John-street) and Mort Bay (formerly known as Waterview Bay), conveyed by the late Mr. T. S. Mort to Mort's Dock and Engineering Company, as shown on plan in possession of the said Company: Commencing on the southern side of the new made portion of Mort-street, at a point distant easterly 86 feet from Trouton-street, and bounded on the north by a portion of the said side of Mort-street bearing easterly 33 feet to lot 4; thence by the western side of that lot, bearing southerly 117 feet to a right-of-way 12 feet wide; thence by the north-western side of that right-of-way, bearing south-westerly 25 feet to Trouton-street; thence by a portion of the north-eastern side of that street, bearing north-westerly 22 feet 6 inches to lot 2; and from thence by the eastern side of that lot, bearing northerly 117 feet to the point of commencement, be the said several dimensions a little more or less.

LIST OF WITNESSES.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

MORT'S DOCK AND ENGINEERING COMPANY (LIMITED)
ENABLING BILL.

WEDNESDAY 23 NOVEMBER, 1898.

Present:—

MR. GILLIES,		MR. LAW,
MR. GORMLY,		MR. NICHOLSON,
MR. HAYES,		MR. RIGG.

W. H. WILKS, ESQ., IN THE CHAIR.

Mr. Rich, instructed by Messrs. Curtis and Barry, appeared for the promoters of the Bill.
Mr. Kelynack, with him Mr. Curlewis, instructed by Messrs. White and Wolstenholme, appeared for Mrs. Flora Rodger.

James Laidley Mort called in, sworn, and examined:—

1. *Chairman.*] What position do you occupy in connection with the Mort's Dock Co.? I am Chairman of Directors. J. L. Mort.
2. Will you explain to the Committee the object of the Bill? The object of the Bill is to give us a larger water-frontage for the purpose of our business. It is very desirable that we should have as much water-frontage as possible, and by moving the street as proposed we shall obtain a greater unbroken water-frontage for the purpose of laying ships alongside, without, at the same time, doing any injury to the public convenience. 23 Nov., 1898.
3. *Mr. Rich.*] I believe your company have agreed with the Council of Balmain as to certain works that are to be carried out—for instance, the erection of a new wharf as shown on the plan? Yes; a new wharf and a waiting-room.
4. *Chairman.*] Do you hand in a plan of the proposed works? Yes. [*Appendix A.*] The portion of Mort-street proposed to be closed is shown on the plan by a green colouring, and the deviation is shown in pink, which is also the colouring of the proposed new wharf at the end of the deviation.
5. The proposed new wharf will give better access to the ferry by land and by sea than the old wharf at the end of the portion coloured green on the map? I do not think the land access will be in any degree injured, and the sea access will certainly be better.
6. And your company has agreed with the Balmain Council to erect a new wharf and a new waiting-room at the end of the deviation marked pink on the plan? Yes; and we have also agreed to form the proposed new road.
7. To form the road and to construct a footpath and kerbstone and all accessories? Yes.
8. And the borough on their part consent to the portion at the foot of Mort-street being closed, and also the portion marked green on the plan, extending from Cameron-street further back? Yes.

- J. L. Mort.
23 Nov., 1898.
9. On the plan there is a long red line, beginning at Cameron-street and coming down to a point near the proposed new wharf; this is the new drain for sewerage matter to be constructed in lieu of the old method of allowing the drainage to run off into the bay; that has also been agreed to on behalf of the Council? Yes.
10. The property marked in blue lines on the plan is the Dock property? Yes.
11. And the two blocks of land marked yellow, extending from Mort-street to Trouton-street, are the property respectively of Mrs. Rodger and Mr. Dingwall? Yes; I believe Mrs. Rodger is the owner of the block near number "152" on the plan.
12. The whole of the land marked with blue lines belongs to the Mort's Dock Company, subject to a security to certain debenture-holders whose trustees are Mr. Kelso King and Mr. Knox? Yes; I believe that is so.
13. It would be a great advantage and a convenience to the company to have this extended facility for the purpose of dock work by closing up the portions of the roads shown on the plan? The unbroken frontage would be a great convenience without doubt.
14. *Mr. Kelynaack.*] The effect of this deviation will be to close the patch marked green at the water side? Yes.
15. And the wharf, which is now at that place, will be moved to the point, at which there is a boat coloured pink on the plan, at the foot of Thames-street? Yes.
16. Do you know the gradients of Mort-street and Thames-street? I do not.
17. I suppose Thames-street is not steeper than Mort-street? It is infinitely steeper than Mort-street. It is a steep hill. Mort-street lies in the valley, as it were, and Thames-street is on the side of a hill.
18. But both Mort-street and Thames-street lead up to the central part of Balmain? Of course, there is Balmain and Balmain; but nearly all the passengers by the boats go up Mort-street.
19. At present they do, because the terminus is at the foot of Mort-street? The people who want to go by way of Thames-street use a sufferance passage which we give them. The part marked yellow on the map is not a sufferance passage, but a right-of-way. Below that, on the Company's ground, there is a sufferance passage which leads the public up past the pointed end of Mrs. Rodger's land, and anybody wanting now to go by way of Thames-street goes up that passage.
20. Still Thames-street leads up to Balmain just as Mort-street does? I should prefer that you asked that question of a resident of Balmain, because I have very seldom been up Thames-street.

William Hilson Pigott called in, sworn, and examined:—

- W. H. Pigott.
23 Nov., 1898.
21. *Mr. Rich.*] You are a solicitor of the Supreme Court of New South Wales? I am.
22. You are acting as solicitor for Messrs Kelso King and Mr. Knox as trustees for certain debenture-holders? Yes.
23. And these trustees or debenture-holders hold security over certain land belonging to the Dock Company? They do.
24. You have read the Bill and have seen the plan before you? Yes.
25. These trustees or debenture-holders have assented to the plan and the proposed scheme? Yes; on the understanding that a clause is inserted in the Bill to the following effect:—

The said indenture of 1st January, 1896, shall be read as altered in accordance with this Act, and shall, for all purposes, until discharged, be held to be a valid security.

The main object of that is so that the debenture holders can find no fault with the trustees.

26. That would come in at the end of line eight in the recital? I do not mind where it comes in. I thought it might come in as new clause 5. It would, perhaps, be better to include it in the enacting part of the Bill; but that could be arranged afterwards.

James Peter Franki called in, sworn, and examined:—

- J. P. Franki.
23 Nov., 1898.
27. *Mr. Rich.* You are manager of Mort's Dock Company? I am.
28. You have read the proposed Bill, and have seen the plan before you? Yes.
29. Will you explain to the Committee the convenience and advantage it will be to the company to extend their works to provide improved dock accommodation, and for that purpose to be enabled to close up certain portions of roads as marked on the plan? For the last four or five years it has been very troublesome indeed, and very inconvenient to deal with the number of ships that require the use of the dock and the establishment. The only way we saw of facilitating operations and of avoiding danger in the moving of one ship into the dock and moving another out, while other ships were lying in front of the works, was by getting permission to extend the wharfage accommodation from the entrance of the dock along to Thames-street, which would give us about 130 feet more wharf frontage, and by that means we could shift the ships 120 feet further towards Thames-street, and thus keep the entrance to the dock much clearer. Sometimes there are three and often four ships lying outside the wharf, and they almost block the entrance entirely. We cannot go further back on account of the ferry. The ferry is often interfered with when we have a vessel going on the slip and when ships are moving to and fro. At present, owing to the position of the wharf, the ferry-boats often have to take even a much greater curve than that shown on the plan in order to get to Snail's Bay wharf. It will be seen by the plan that by moving the ferry wharf to Thames-street, steamers will be able to go from there in a direct line to Snail's Bay wharf, and there will be no interference with vessels lying either in front of the wharf or going into dock or on to the slip. It is perfectly clear to all business men that the more accommodation we can give the more vessels will come to the establishment, and every vessel that comes there makes it all the better for the Balmain inhabitants. The more ships that go there the more people there are. They take a walk up Balmain, and, of course, they spend money; so that every ship that comes to the works is of benefit to the shopkeepers and the public generally who have trade in Balmain. I have stated briefly the advantages to the dock. The advantages to the public are these:— In the first place, the ferry-boats carrying the travelling public will not be interrupted by having to wait while the ships go on the slip, as they will be quite outside the operations of the dock, and will be able to go straight across to and from Snail's Bay. Consequently, business men will not be interfered with in their appointments, and time will be saved in getting to Sydney. If the Committee take evidence from
some

- some of the people who travel there, they will find that this place is very often blocked, but under the proposed scheme the ferry-boats will have a clear course. I understand there is opposition to the Bill, and a petition has been presented to Parliament on the ground that it will injure the property of Mrs. Rodger. If the directors of the company thought for one moment they were doing an injury to any person whatever they would be the very first to compensate that person. We object to any clause being inserted in the Bill giving a right to compensation. The company are already compensating the Council of Balmain. We have to pay the Council £1,200 cash for allowing us to close one street and open another. We give a strip of land to make the new street, equal in width to Mort-street. We have written two or three letters to Mrs. Rodger stating that the only compensation we intend to admit or allow to be paid is the £1,200 we have agreed to pay to the Council. Mrs. Rodger has two cottages on her property, one fronting Trouton-street and the other fronting a little blind lane down as far as Mr. Dingwall's property, which is next door. Mrs. Rodger claims that the passenger traffic will be diverted up Thames-street, but Thames-street has an inclination of 1 in 8. It is only a 30-foot street, and the footpath on that side is only about 4 feet wide; whereas Mort-street has only a very slight inclination from the bottom of Thames-street right up, and it has a footpath 9 feet wide, properly asphalted. The length to travel over is 129 feet shorter by going the proper way by Mort-street, instead of going up Thames-street and down Trouton-street. Under these circumstances is it reasonable that passengers landing at Thames-street will go out of their way to go up an incline of 1 in 8, and then go down Trouton-street, returning back into Mort-street? Is it reasonable to suppose they will make that detour? On the other hand, there is no doubt with regard to the vehicular traffic. No vehicle would ever go up Thames-street, with a grade of 1 in 8, when there is a beautiful 40-foot street to go along, with only a very slight incline. Mrs. Rodger's property is next to Mr. Dingwall's. We do not propose to alter that street at all, until after we pass Mr. Dingwall's; and by making that detour we get a lower grade than the present grade of the street by the fact of lengthening the distance over which you have to travel to get into Thames-street. This gives a very much easier grade. Mrs. Rodger claims that the whole of the traffic now going to Mort-street will be directed up Thames-street. That I leave to the Committee's own judgment. They will say if it is reasonable that any person will travel 477 feet up an incline of 1 in 8, when he can go 348 feet 4 inches, or 129 feet less, with a very easy incline. At the present moment the whole of Mrs. Rodger's frontage is on the lane and Trouton-street; so that she will have the same convenience as she always had, and if she wants to put up a building on the piece of land fronting Mort-street it will be exactly in the same position as it was, with the advantage that it will have a better approach. Vessels will be encouraged to come to Mort's Dock, owing to the extra accommodation; and if more vessels come to the dock, then, if Mrs. Rodger wishes to make that a business site, the value of her property will be enhanced by the extra business which ships will bring to the dock.
30. *Mr. Kelynaek.*] Looking at the plan, which shows the points of the compass, and taking south-east from Thames-street, is there not a large population in that direction? There are a few—not very many.
31. How many? I could not tell you; but not very many.
32. What do you call not very many? I cannot tell you the number.
33. Are there a thousand? I would not like to commit myself to numbers. The great bulk of the travelling public come down Mort-street.
34. But are there not a considerable number living to the south-east of Thames-street? Yes.
35. If those people land at Thames-street they will, I suppose, go up Thames-street? Naturally.
36. Whereas at present they go up Mort-street, and go past Mrs. Rodger's property? They do not go up Mort-street now; they go up the lane.
37. The ferry is at the foot of Mort-street, and the passengers go partly up Mort-street, and then past Mrs. Rodger's property? They go up the private right-of-way, past some cottages.
38. But still they go past Mrs. Rodger's property? Yes.
39. If they go up Thames-street they will not? The lane exists only on sufferance, and can be closed at any moment.
40. Then they would have to go in front of Mrs. Rodger's property if they did not go along the sufferance lane? They would still go in front of Mrs. Rodger's property.
41. The people living at the south-east of Thames-street you admit would go up Thames-street;—if the proposed alteration is made, and the ferry lands the people at the foot of Thames-street, all the persons who live south-east of Thames-street will go straight up that street? Yes. But the greater number of the people on that side go by the Stephens-street ferry. After you get to Waterview-street, the people go by the Stephens-street ferry.
42. Have you had Thames-street surveyed? Yes. It was surveyed for the levels when this plan was made.
43. Where does it say that Thames-street has a grade of 1 in 8? I know it is 1 in 8 from our surveyor, but you will get that in evidence from the surveyor who made the plan.
44. I believe you have property yourself in Thames-street? Yes; there is a little bit there—up Thames-street, away on the top of the hill.
45. Just near Trouton-street? No; right on the top of the hill.
46. Still, Thames-street leads directly up to your property? As it happens it does.
47. In regard to other property, the portions marked yellow on the plan, I suppose, are the only portions which are private property? Yes.
48. Take the piece next to Mrs. Rodger's;—that is occupied I believe by somebody of the name of Dingwall? Yes.
49. He is a sail-maker? Yes.
50. And employed by Mort's Dock Company? No; he has nothing to do with Mort's Dock Company.
51. Does he not work for you? No.
52. Does he not work for the ships that come to the Dock? He may work directly for the ships. He tenders himself for work on the ships.
53. So that he is interested in the work at the Dock? Well, it does not matter to him very much. He goes on board the ships and gets the tender from the people.
54. But he is dependent, I suppose, for his business on the ships, and partly dependent at any rate on the success of the Dock Company? No; not at all.
55. You say that he does not get any business from the ships that come to the Dock? He may get odd things. He may get some work, but generally he gets work from ships about the harbour. He does not confine himself to Mort's Dock. He is a big contractor.

J. P. Franki.
23 Nov., 1898.

- J. P. Franki. 56. To whom does the land marked yellow on the plan at the corner of Trouton-street and Thames-street belong? To different people. I do not know who they are.
- 23 Nov., 1898. 57. Do you remember Mort's Dock Company selling that piece of land that Mrs. Rodger now has to her? Yes.
58. Do you remember having any conversation yourself about it? No; I do not remember any conversation.
59. You will not swear you did not? I do not remember any conversation.
60. Will you swear you did not have a conversation with her? I cannot tell you. What sort of conversation?
61. Any conversation about the purchase by Mrs. Rodger of this land? No. I had nothing to do with the purchase; she bought it at auction.
62. Were you on the ground at the time she bought it? Yes; but I was not the auctioneer.
63. Did you hold the plan of sale during the time Mrs. Rodger was looking at it, at the time of the sale? I do not think so.
64. You do not remember? No. In fact, I am sure I was not acting as auctioneer's assistant.
65. I do not suggest that, but you are manager of Mort's Dock Company? It is not at all likely when the matter was in the hands of the auctioneer that I would go there and hold the plan out to the buyers.
66. You are the manager of Mort's Dock Company, are you not? Yes.
67. And Mort's Dock Company sold this property? Yes; they were not the auctioneers.
68. Did they sell the property? No; the auctioneers sold it for the Dock Company.
69. Did you suggest to Mrs. Rodger that she should buy this property for the purpose of a coffee palace? I do not remember.
70. *Mr. Rich.*] As a matter of fact, the people who live on the south-east side of Thames-street go by another ferry, do they not? Yes; nearly all, except a few from this side of Waterview-street. There are not many on the south-east side who travel by this ferry.
71. The bulk of them go by another ferry? Yes.
72. *Mr. Gillies.*] You referred to a grade of 1 in 8 in Thames-street;—do you not think the Council will make that a proper grade when they take over the street? No; they could not cut it down—that is, the general inclination of Thames-street, right up to the top.
73. You say you would compensate the Council, and that is the only party you would compensate? We have an agreement to pay them £1,200.
74. *Mr. Law.*] Do you know who owns the allotment next to Mrs. Rodger's? Mr. Dingwall.
75. Has he claimed any compensation? No.
76. What is the depth of these two allotments? I think about 80 or 90 feet.
77. And Mrs. Rodger's cottage is in Trouton-street? One is in Trouton-street, and one is in the lane.
78. With a depth of less than 100 feet it would be impossible to build on the other frontage also, as there would not be sufficient land? No; there is not sufficient land for a coffee palace, or any building of the sort.
79. When the proposed deviation is made there will be very little difference in going up to Darling-street? The distance will be 129 feet less going up Mort-street as compared with the distance going up Thames-street.
80. *Chairman.*] You hand in copy of the agreement between the Council of Balmain and the Mort's Dock Company with regard to the closing of Mort-street? Yes. It also includes the compensation the company pays for College-street. In addition to the payment of £1,200 the company have to make a road from Mort-street to the proposed new wharf; so that we estimate that the total cost of the proposed change, as far as the company are concerned, will be £2,000.
81. *Mr. Rigg.*] Are there any claims for compensation in respect to property to the south-east of Mrs. Rodger's property? No.
82. Reference has been made to Mr. Dingwall;—I suppose he would get the same orders from vessels visiting the Dock, irrespective of where he lived? Yes; he would get the same if he lived anywhere else.
83. The fact of his living there does not help him in regard to orders he gets from vessels that visit the Dock? Not a bit; he visits the ships before they come to the Dock.
84. He is not under the control or jurisdiction of the Dock Company? Not in the least. If a ship wants a tarpaulin or a sail it may go there to him for it; and, of course, if we want a sail made we naturally send to him and get a tender from him as well as from people in Sydney, and if he is the lowest tenderer he gets the work, but not otherwise.
85. It would not matter if he lived there or further away? No.
86. I understand you to say that the proposal that the ferry boats should take a course direct from the new wharf to Snail's Bay is in the interests of the people travelling between Balmain and Sydney? Yes.
87. That is, that the ferry traffic will not be likely to be congested or interfered with by vessels coming to the Dock for repairs? Exactly.
88. At present many stoppages take place in the course of the ferry boats from the Mort-street wharf to the Snail's Bay wharf? Yes; there are two slips, and vessels while they are going on and coming off have to lie in position for some time before we can get the cradle under them to take hold of them.
89. What other advantage would be given to the travelling public by the proposed change? After landing they would get a much easier grade owing to the extra distance. The incline would be much less to take vehicles up than it is now.
90. While they gain that advantage to the vehicular traffic, is there any complaint from the travelling public about having to go the greater distance? No; not the least. I am sure they would not object, because the road is made so easy.
91. You have said that for the closing of College-street and Mort-street you give the Balmain Council £1,200 and construct a new street? Yes.
92. Was it not another condition that the £1,200 was to be used to construct a sewer? That is what the Council intend the money for; but we have to pay £1,200 for that land.
93. But in your agreement you say, "The Directors are now willing to give the Council £1,200 payable in instalments after the passing by Parliament of an Act, and so on, as may be required as the work for making the sewer progresses—that is conditional." Certainly. The Council cannot spend the money in any way they like; they have to make the sewer.

94. The Council practically get £1,200, and give you two streets and construct a sewer? Yes; but they would have to construct the sewer, and otherwise they would have no money for the purpose. They would have to spend the money anyhow. J. P. Franki,
23 Nov., 1898.
95. You had a lot of trouble with the Council of Balmain over this very matter of the sewerage? Yes.
96. You would not allow the sewage to pass through your property, and the Council having to construct the sewer, this agreement was made? Yes. The sewerage goes down through the Dock now. As soon as the Bill is passed the Council have to commence to make the sewer. If the Bill does not pass they will have to make the sewer all the same, but they will get nothing from us.
97. But if the Bill does pass, they get £1,200 from you and you make the new street; you get from the Council two streets—College-street and the lower portion of Mort-street? Yes.
98. You take from them the bottom of Mort-street, and give them in return portion of property bordering on Thames-street and a roadway right through of 50 feet? Yes.
99. And you construct a new waiting-room? No; we shall not build a new waiting-room. We construct a new wharf and remove the old waiting-room.
100. The general public have not made any protest against having to go along this distance? Not the least. It will be an advantage to them, because what they lose by going a few extra feet they gain by the time saved by the steamer not being delayed.
101. There has been no claim for compensation except from Mrs. Rodger? None whatever.
102. The hotel-keeper at the corner has not complained? No.
103. Although they will lose the use of College-street as a back entrance they do not claim compensation? No.
104. Has Mrs. Rodger made any personal claim to you? Yes.
105. Privately, some time back? Since we commenced proceedings in connection with this Bill.
106. Did you give Mrs. Rodger any encouragement to believe that you would compensate her? I told her we would not give her anything. I said I did not see where any injury was done to her in any shape or form, and I considered it was a sort of attempt to levy blackmail upon us.
107. *Mr. Kelynaek.*] When did you say that? When she spoke to me about it.
108. Where did you see her? In the street.
109. You wrote to her, did you not? That was when she wrote to me.
110. You never said anything about blackmail in your letters? No, it was not likely; but I told her so.
111. *Mr. Curlewis.*] You say the Council has to make this sewer, anyhow? Yes.
112. Are the areas coloured green on the plan correctly given in the Schedule of the Bill where they are given as "1 rood and 12·6 perches" and "23·23 perches"? I did not survey the land; the surveyor will be able to answer that question.
113. In Schedule A the area given, namely "1 rood 6·50 perches," is, I suppose, correct? I did not survey it. As far as I know the areas given are correct, because we employed the surveyor to measure them.
114. These areas being correct, it appears that the Dock Company gets as much land as it gives? We give the Council more land than we take away. We give them the whole of the street right across.
115. How much more land do you give the Council than you take from them? You will see by the difference between the portion coloured pink and that coloured green at the bottom of Mort-street.
116. But there are two portions coloured green? The value of College-street was placed by itself, and then the width of Mort-street, 21 feet, had to be put on to Thames-street, and the balance we had to give.
117. Taking into consideration, the land coloured green, marked A and B, how much more land does the Council get than they give? They get £1,200.
118. But I mean in area? I could not tell you anything about the area. I am not a surveyor, and did not survey the land.
119. *Chairman.*] Is it a fact that your company are not so interested in passing this Bill as they were some twelve or eighteen months ago? That is so.
120. What is the reason that you are not so anxious to pass the Bill as you were before? When this matter was first mentioned we were going to put the new dock in a position in close proximity to the old dock. Our first application to the Council was with a view to construct another dock alongside the present one; but the Council, in their wisdom, did not consider it advisable to allow us to close College-street unless we made the sewer, and of course we objected. We offered them £1,000, and they wanted us to make the sewer as well, but we would not do that. Negotiation then dropped, and the company looked elsewhere for another site. That site having been purchased, the actual necessity of the case as regards College-street was done away with. The Council subsequently approached us to entertain the scheme again, and it was at their instance that negotiations were opened up afresh, the company being desirous of providing better egress and ingress for ships coming to the dock.
121. Did Mrs. Rodger in any conversation with you place a valuation on her property? Yes; she said something about £1,000, but it was perfectly ridiculous. I laughed at her.
122. Did Mr. Dingwall make any offer to sell his property to you? None whatever.
123. Did you ever attempt to purchase this land from either Mr. Dingwall or Mrs. Rodger? No; we did not want the land. We had no object in acquiring it. I told Mrs. Rodger at the time it was no object to us, and we did not want the land—that we had some there which we could sell her if she liked.
124. Then I understand the land belonging to the company, surrounding that belonging to Mrs. Rodger and Mr. Dingwall, is practically vacant land which the company do not use? We have no use for it, and would be glad to sell it at any time.
125. And with regard to the new street, have you given an undertaking to the Council that you will grade the street with a view to vehicular and passenger traffic—I refer to the new street from Thames-street to Mort-street? Yes, that will be graded. It is required to be done to the satisfaction of the Council's surveyor.
126. Is that provided in the agreement? I think so.
127. You say that the new street will be used more because the grade will be less than that of Thames-street? In consequence of the greater length the street will naturally be more level.
128. And the land through which portion of the street will pass will be reclaimed land? No; it does not pass through reclaimed land.
129. *Mr. Bigg.*] You say you would be prepared to sell the land surrounding the property of Mrs. Rodger and Mr. Dingwall;—what would you be prepared to sell it for per foot? I am not prepared to say. That would be a matter for the Directors.

- J. P. Frankl. 130. Thames-street you consider an additional advantage to the public? I do.
- 23 Nov., 1898. 131. They would have two roads instead of one as at present—they would get an additional street in Thames-street? Exactly. At present the people living to the south-east have to go up Mort-street and along Trouton-street.
132. At present they are confined to one roadway, and under the new scheme they will have two roadways? Yes; they will be able to go down Thames-street.
133. *Chairman.*] I suppose most of the travelling public to the south-east are served by the Stephen-street ferry? Yes.
134. You are not warranted in saying that a great number of people living in that vicinity would travel by the Mort's Dock ferry? Only those would do so who live this side of Waterview-street, and I do not suppose they number more than 200.
135. And this right-of-way you speak of, is that on sufferance only? That is all.
136. You might close it at any time? Yes.
137. And prevent the people going past Mr. Rodger's and Mr. Dingwall's property? Yes.
138. *Mr. Kelynaek.*] If you closed the right-of-way at present, instead of going past the back of her property they would pass the front of her property? No; Mrs. Rodger faces the lane.
139. She faces Mort-street as well? No; she does not face Mort-street—not the present entrance to her house.
140. But her land does? Yes.
141. *Mr. Rich.*] Do I understand from you that at present the Council, by permission of the Dock Company, drains the sewerage into the dock? Yes.
142. And under the new arrangement they will make the sewer as marked red on the plan, beginning at Cameron-street, and ending near the proposed new wharf? Yes; that is right.
143. And in any event, whether this Bill is passed or not, the Company will not allow them to carry the sewerage across their property into the bay? That is so.
144. As a matter of fact, the present sewerage silts up the bay? It silts the front of the dock up.
145. And the Council are obliged to go to great expense in dredging to get the silt away;—is that the case? At the present moment we have agreed to keep the front of the dock clear ourselves, and the Council have undertaken to clear the drain down to the dock head.
146. *Mr. Kelynaek.*] Which way does the sewer come now on the map? It comes down from the head of Cameron-street into the dock. It goes into the water by a drain at the side of the dock.
147. *Mr. Gornly.*] Will you explain where Mort-street terminates at present? It terminates at the portion coloured green, and marked "B" on the plan.
148. Is that a road of access now? Yes.
149. Where do the ferry boats land their passengers? At the portion coloured green, and marked "B."

George Dingwall called in, sworn, and examined:—

- G. Dingwall. 150. *Mr. Rich.*] You are a well-known sail-maker? Yes.
- 23 Nov., 1898. 151. Looking at the map you see two pieces of land coloured yellow, one belonging to Mrs. Rodger and the other belonging to you? Yes.
152. You have seen this plan, and know the proposed Bill? Yes.
153. Do you think your land is affected prejudicially by the proposed deviation of the road? I do not think so.
154. You are not claiming compensation in any shape or form from the company? No.
155. *Mr. Kelynaek.*] You are a sail-maker? Yes.
156. And, of course, it is convenient for you to be near to the water? It is.
157. I suppose you do not want to use your property for any other purpose than that for which you are now using it? At present I do not.
158. You get work through Mort's Dock Company, do you not? Very little.
159. You do get some? Yes; but very little.
160. You have got some now? I have not.
161. Did you tell Mrs. Rodger the other day you had? No.
162. You remember her coming to you about giving evidence for her, and you suggested she should not call you? I told her I should come here if I had to come, and I would state the truth; it did not matter whom I offended.
163. But did you not tell her not to call you? No, I did not.
164. That you had work from the Dock Company? No; I did not.
165. On last Monday;—was that the day you had the conversation with Mrs. Rodger? The last time I spoke to Mrs. Rodger was on Saturday, when I was going home to lunch.
166. Did not Mrs. Rodger ask you then to come and give evidence for her? She did not ask me to give evidence for her. She asked me if I was to give evidence for the Dock Company, and I said I was not. "But," I said, "if I have to give evidence I shall tell the truth." That is about all I said to her. As for telling her I had work, or was doing work for the Dock, that is not correct.
167. But you are doing work for the Dock? I am not doing work for the Dock. I have done work for the Dock.
168. And I suppose you do work also for the ships that are in the Dock? Yes; for ships all over the harbour.
169. But ships that are in the dock particularly—you get work from them? I do from ships all over the harbour, and sometimes they come to the Dock.
170. You get work from ships which come to Mort's Dock? Some of them.
171. It suits you, therefore, to be close to where these ships come to dock? It suits me in a way, but I get very little from vessels that come to the Dock. It is mostly deep-water ships that come to the Dock, and they all carry sail-makers of their own, and do not require much, unless in the case of a vessel coming in dismasted, which will very likely go to the Dock; but I have that work apart from the Dock altogether.
172. Still, it is convenient for you to be near the Dock? It is convenient for me to be near the water.
173. And the Dock too? No.

174. But if you were away from the Dock I suppose someone else would go there who is a sail-maker and get the work from the Dock that you now get? No; I do not think so.
175. Why not? Because they are just as handy to me in Sydney as in the Dock. It is only when the vessels go into the Dock that I find it handy.
176. But being at the Dock you find it handy? I do when I have work there.
177. *Chairman.*] Is your work by tender? It is mostly by tender. If it happens that a ship comes to the Dock it comes all the handier to me, but that is the only benefit I derive. The work I do for these ships is mostly by tender.
178. I suppose the bulk of your work is yachting work? At this time of the year it is principally yachting work; but, as it happens, I have work from deep-water ships, and they are all over the harbour at present, and it is not likely that any of these vessels that I am working for now will go to the Dock. If they did it would be very convenient for me, but I do not get any further advantage.
179. You were on the land when it was sold? Yes.
180. And saw Mrs. Rodger there? Yes.
181. Did you hear her have a conversation with Mr. Franki? I would not swear to that. Mr. Franki was there and Mrs. Rodger was there, but I was a stranger among them, and did not hear any conversation.
182. You saw them both there? Yes.
183. *Mr. Law.*] What do you value your land at? I do not suppose it is worth more than half of what I paid for it.
184. What do you value it at now? I think its value is about £5 or £5 10s. a foot.
185. It comes within the land tax exemption? Yes.
186. *Mr. Rigg.*] Do you consider that the proposed deviation will depreciate the value of your land in any way? No; I do not think so.
187. Do you think it would still retain its value if the proposed new street were constructed? I shall be much handier to the water when the street is formed as proposed.
188. *Mr. Kelyack.*] Why will you be handier? I shall be nearer the Dock then, if the shipping is any benefit to me; but I do not see it would make any difference either way. I do not see that it would benefit me in any way.
189. You would not be nearer the ferry? There will be very little difference if you take the two angles. I am on an angle to the ferry now. I suppose it would be about a few feet further from my place to the ferry than it is now.
190. What did you pay for your land? I think between £8 and £9 a foot.
191. Was it £8 10s.? Yes, it was all that, if not more.
192. *Mr. Law.*] How long ago was that? Sixteen years ago. It was in September, 1884.
193. *Chairman.*] Have you been urged at all to go for compensation against the Dock Company in regard to this matter? No; I would not be urged by anyone.
194. Has any one attempted to urge you? No.
195. Do you consider that Mrs. Rodger's property is injured by the proposed deviation? I would not like to say. That is for her to say herself; I would not like to interfere.
196. But what is your own opinion, after seeing the plan, and knowing the traffic, and so on? I would not say anything about it. I would only say it does not affect me in any way.
197. It would not affect you, and the adjoining property to you is Mrs. Rodger's? That is so. I have other property as well—other property not a stone's throw from this property—property more valuable than this.
198. Have any of the Dock people approached you in regard to this matter? No, never.
199. You have not been approached at all by anyone interested in this matter? No; they asked me if I would sell a piece of my land. They intended going a little higher up, and I agreed to sell them about 15 feet of my land further back from Mort-street.
200. Did you ask a good figure for that 15 feet? No, I consider I did not. I asked only £20, and it is worth far more than that.
201. You have no knowledge about Mrs. Rodger purchasing the land with the idea of erecting a coffee palace, or anything like that? She told me herself she thought a coffee palace would do very well there.
202. Did she tell you that recently, or some years ago? She told me that before I went home to England.
203. Before any Bill was mooted at all? That I could not say, because this Bill has been mooted for some time. I could not say to a month or two.
204. You have no interest in giving evidence in support of the Dock by reason of any trade you might get? I have no interest in the Dock. I could do without the little work I get from the Dock. I have more work than I can do independently of the Dock.
205. The work for the deep sea vessels is all open to contract? Yes.
206. And whether you were in Sydney or at Mort's Dock you would tender for it just the same? Yes; not only if it were in Sydney, but all over the Colony.
207. *Mr. Hayes.*] Did Mrs. Rodger buy her allotment of land at the same time that you bought yours? She did.
208. Do you remember the price she paid—was it the same price that you paid? No; she paid more than I paid, because I know it should have been my land, as the bid was mine. However, I did not want to raise any question, and I let Mrs. Rodger have it.
209. Do you consider her property has depreciated in value since the purchase to the same extent that yours has? That I could not say. Land has gone down considerably since that purchase.
210. You bought your land at £8 10s. a foot, and you now value it at about £5;—has Mrs. Rodger's property depreciated to the same extent? Her property is different from mine. She has dwelling-houses and I have merely a sail-loft.
211. I am speaking of the unimproved value? I should say it has depreciated to the same extent, because there has been a similar depreciation in the value of land of mine in other parts of Balmain.
212. *Chairman.*] Did you ever consider that the Dock Company would purchase your land as well as Mrs. Rodger's, and so complete their block there? No.
213. You have never wondered why they have not done that? No; I did not want them to. I would not care to part with my land.

- G. Dingwall. 214. *Mr. Gillies.*] Would it not be possible for this proposed alteration to enhance the value of your property by reason of your occupation, and yet reduce the value of Mrs. Rodger's property? I do not see that it would make any difference to me, except that I would be nearer the Dock.
- 23 Nov., 1898. 215. Consequently the value of your property would be enhanced? It would make very little difference.
216. *Mr. Curlewis.*] Where are these other properties of yours? They are in Clayton-street, about 20 or 30 feet from Mrs. Rodger's property across the road.
217. At the corner of Clayton and Trouton streets? Yes.
218. Have you any property to the south-east of Clayton-street? No; it is all on the south-west.
219. Are there many people living south-east of Thames-street? There are a good many people living south-east of Thames-street.
220. Do many of them travel by this ferry? That I could not say. A good many I know travel the other side, because they have an interest in the other ferry.
221. *Mr. Rigg.*] How far is that other ferry from this one? About five minutes' walk.
222. *Mr. Gillies.*] What is the distance? I could not tell the distance. I could do it in five minutes.

George Clubb called in sworn, and examined:—

- G. Clubb. 223. *Mr. Rich.*] You are living in Balmain? Yes.
- 23 Nov., 1898. 224. You are a land agent there? Yes.
225. You have had considerable experience in land values? I have.
226. Will you look at the plan before you; you will see two allotments of land, one belonging to Mrs. Rodger and the other belonging to Mr. Dingwall;—are you acquainted with those properties? Yes.
227. Have you seen the plan of the proposed deviation before? I saw the proposals up to October, 1896, when I resigned as an alderman. I think there has been some modification since then.
228. On the plan before you, you see the land that is proposed to be closed, consisting of two pieces marked "A" and "B" respectively, and coloured green; and then there is the proposed deviation, coloured pink, with the new wharf at the end—that is the plan you are acquainted with? Yes.
229. In your opinion, does the proposed deviation affect the value of the two pieces of land belonging respectively to Mrs. Rodger and Mr. Dingwall—I mean as to depreciation? In my opinion it does not.
230. *Mr. Gillies.*] Do you not think a deviation will depreciate the value of any property? It might in the case of business premises, but not in the case of a private dwelling. It would be rather looked upon as an advantage.
231. But what is your opinion regarding the site as a business one? I do not know that in this particular case the value of the land, even for business purposes, is affected detrimentally. I do not think it is.
232. *Mr. Law.*] What do you value the land at per foot? I suppose from £4 10s. to £5 would be a fair value for the land.
233. *Chairman.*] You are not at all interested in the Dock alterations and the deviations? Not at all.
234. You have no interest in the question of whether this land is taken, or whether it still remains idle for further sale, or anything of that sort? None, whatever.
235. You are simply here as an independent witness? Exactly. I may inform the Committee, having had a large local experience, that the project of the alteration of the wharf, as shown here, to the foot of Thames-street, has been looked upon favourably by the general public, inasmuch as former interruptions to the ferry traffic are not likely to occur under the altered arrangements.
236. Then, I am to understand that, as a public man, both in the position as alderman and as an Parliamentary representative, you have heard no complaint from the travelling public in regard to the proposed deviation? I have not.
237. *Mr. Rigg.*] You are an old resident and also an alderman of Balmain? I have had fifteen years' experience as an alderman and as Mayor.
238. Do you consider the proposed new street, called Thames-street, will be an additional convenience to the public of Balmain, as affording them two means of access to the ferry instead of one as at present;—do you think that will be a convenience to the public of Balmain generally? Undoubtedly, because people on the southern side of Thames-street will now have a nearer access to the ferry than they had formerly.

William Moffatt Burns called in, sworn, and examined:—

- W. M. Burns. 239. *Mr. Rich.*] You are a resident of Balmain? Yes.
- 23 Nov., 1898. 240. And you are a land agent, having had large experience in land values in Balmain and elsewhere? Yes.
241. Are you acquainted with the plan before you, and the proposed Bill? Yes.
242. You see Mort-street on the plan, and two pieces of land, one belonging to Mrs. Rodger and the other belonging to Mr. Dingwall; and you see the proposed deviation marked pink, and at the foot of that is the new wharf; you are acquainted with all those details? Yes. I may say that I have assessed the borough of Balmain for the Borough Council, and naturally this locality would come under my observation.
243. In your opinion, does the proposed deviation prejudicially affect the two pieces of land referred to—take Mrs. Rodger's? I should not think it did.
244. In your opinion it does not? No.
245. You have no interest whatever in the proposed deviation? None whatever.
246. *Mr. Rigg.*] What do you consider the allotment of land owned by Mrs. Rodger is worth? I should say from £3 10s. to £4 per foot.
247. *Mr. Kelynaek.*] You are a land agent? I am.
248. Have you any land for sale in the vicinity? I have.
249. In Mort-street? Yes.
250. Whereabouts in Mort-street—near Mrs. Rodger's? Yes, above Mrs. Rodger's.
251. What is the depth of it? I should say between 80 and 90 feet.
252. How much are you willing to place it under offer for? £4 a foot.
253. Is that near this particular piece of land? No; I have no property for sale near that.

254. *Chairman.*] The property you value at £4 a foot is nearer to the centre of the town? Yes.
255. *Mr. Kelynack.*] But much further away from the ferry? Yes; it is within five minutes of the ferry.
256. How far is Mrs. Rodger's land from the ferry? Within a minute.
257. *Chairman.*] I suppose you are aware that the question of the proposed deviation and alterations to Mort's Dock has interested the public of Balmain a good deal? It has.
258. Have you any recollection, some few months ago, of addressing a public meeting against the action of the Council in refusing to come to terms with the Dock Company? Yes.
259. Do you recollect that I, in my capacity as a public man, endorsed the action of the Council on that occasion as against the Dock Company? Yes.
260. And the present scheme was the result of further negotiations between the Dock Company and the Council? That is so.
261. You consider the Council are being well repaid for the closing of the streets by a sum of £1,200, and the construction of a new wharf and the sewer given in? I do.
262. You consider that the Council have not lost by the arrangement, and that the public of Balmain has not lost by it? I consider the Council have a very good bargain.
263. And the public, by a deviation of the traffic, are not put to any disadvantage? No; I do not think they are.
264. Do you consider that Mrs. Rodger is placed at any disadvantage by the action of the Dock Company? I do not think Mrs. Rodger will suffer in any way by the deviation. If anything, it will concentrate the traffic. In the event of Mrs. Rodger desiring to build on this frontage, she would have a better opportunity of letting her place. Apart from that, it will be a great convenience to the public as far as the steamer traffic is concerned. I do not often travel that way; but I have, unfortunately, done so when we have been blocked.
265. To the south-east of what is called Thames-street there is a fair population? Yes.
266. Do they travel by the Stephen-street ferry or the Mort's Dock ferry? They travel by the Stephen-street ferry, because they can get to Sydney quicker that way than by Mort's Dock, Stephen-street being the first stopping-place from Sydney, whilst Mort's Dock is the last. The bulk of the people, therefore, to the south of Thames-street would undoubtedly go to the Stephen-street ferry.
267. *Mr. Rigg.*] If this new scheme were carried out, would it be more convenient for a number of the people who at present travel by the Stephen-street ferry to come to Thames-street and take the Mort's Dock ferry? Yes, in a measure it would.
268. So that it would bring more traffic there? Yes.
269. And the fact of bringing more traffic there, you think, would increase the value of property in that immediate neighbourhood? Yes; it would be an advantage to the travelling public to embark at the foot of Thames-street instead of embarking at the foot of Mort-street.

W. M. Burns.
23 Nov., 1898.

John Archibald James called in, sworn, and examined:—

270. *Mr. Rich.*] You are master of one of the ferry-boats running to Mort's Dock? Yes.
271. Have you seen the plan of the proposed deviation? No.
272. You know where the proposed new wharf is to be? Yes.
273. You see on the plan a piece of land marked "B," coloured green, with a boat shown. That is the present wharf. At the present time the ferry-boats are sometimes inconvenienced, and the traffic is congested, owing to the ships going into the dock and on to the slip;—is that so? Yes.
274. Do you think the new wharf will be an advantage to the travelling public and prevent this interference with the ferry traffic? Yes, I do. I believe it will take the ferry-boats clearer of the ships going on to the slip, and also into the dock.
275. You think the access by sea will be freer and more beneficial to the travelling public than is the case at present? Yes.
276. Are you a resident of Balmain? Yes.
277. From your knowledge as a resident, do you know that the Balmain public are anxious to have this proposed scheme carried out, and believe it will be advantageous? I have not considered that part of it at all.
278. You have not heard them speak about that? I have heard some say it will be an advantage, and I have heard some say they did not think it would be any advantage.
279. *Chairman.*] Have you heard any conversation on the boats to this effect: "The Mort's Dock people are getting an advantage, and the public are placed at a disadvantage";—have you heard any general talk about that on the boats? Yes; every day I hear somebody speaking about it one way or the other. The majority of the people seem to think it will be for the benefit of the residents of Balmain.
280. *Mr. Kelynack.*] What part of Balmain do you live in? Short-street.
281. Where is that? Barely ten-minutes' walk from the Mort's Dock wharf.
282. *Chairman.*] Do you know Mrs. Rodger's property in this particular locality? Yes.
283. How long has been your experience with the Balmain ferry? Altogether I have been there sixteen or seventeen years, but I have been away. I have been there about five years or more this last time.
284. Do a great number of the travelling public go along Trouton-street and through the by-way from the portion coloured green on the map? No; the traffic is not very great from the Mort-street wharf in that direction. It has not been for some time past.
285. You think most of the people will continue to go up Mort-street? Yes.
286. If the proposed alterations were carried out, would the bulk of the people come up the new street and along Mort-street? I am inclined to think the bulk of them would come up the new street.
287. Have you heard any public expression with regard to Mrs. Rodger being at a loss, or with regard to compensation? I have heard a lot about it, but it did not interest me much, so I did not take much notice of it.
288. *Mr. Rigg.*] You are in the habit of going into Mort's Bay daily at frequent intervals? Yes.
289. I believe an accident occurred there a short time ago, caused by one of the vessels sliding off the slip? Yes.
290. Going into the wharf your steamer will be at right-angles with the slip? Yes.

J. A. James.
23 Nov., 1898.

- J. A. James, 291. Do you consider the shifting of the ferry from the end of Mort-street to the end of Thames-street would conduce more to the safety of the public than if the boats continued to take the course followed at present; in the event of an accident occurring similar to that which happened some time ago, do you think it would be safer for the public if the boats went into Thames-street instead of continuing the present course to Mort-street? I think if a similar accident occurred again the further you were away from the slip the less danger there would be.
- 23 Nov., 1898. 291½. You consider that it would be more advantageous to go to Thames-street than to Mort-street? Yes; that is my opinion.
292. Do you consider that the construction of a wharf at the end of Thames-street would divert a portion of the traffic which at present goes to Stephen-street—would it be more convenient than going the other way? Yes; I believe it would.

William Henry McLean called in, sworn, and examined:—

- W. H. McLean, 293. *Mr. Rich.*] You are Secretary to the Ferry Company? Yes.
- 23 Nov., 1898. 294. Are you acquainted with the proposed Bill and the plan? I have seen the plan; I have not seen the Bill.
295. The Mort's Dock Company I believe has made an arrangement with your company to shift the wharf from its present position to Thames-street? I am not aware of any arrangement.
296. You are personally not aware? No.
297. But you know of this proposed arrangement? I understand it is proposed to move the wharf from the one point to the other.
298. In your opinion, will the proposed arrangements be beneficial to the travelling public? I think it will.
299. *Chairman.*] Did the liquidators of your company sell some property to the Mort's Dock Company some time back? Yes.
300. Will you explain the position of the property that the Mort's Dock Company purchased? A strip of land from the water frontage to Trouton-street.
301. Was a power of reclamation which the Dock Company exercised? Yes.
302. Have you heard anything in regard to compensation with respect to Mrs. Rodger's property? No.
303. Have you heard any objections on the part of the travelling public to travelling the further distance from Thames-street? I have not.
304. Practically you are not in touch with this question at all? Not personally.

George Edward Young called in, sworn, and examined:—

- G. E. Young, 305. *Mr. Rich.*] You are a resident of Balmain? Yes; I am the Returning Officer for Balmain North.
- 23 Nov., 1898. 306. Are you acquainted with the proposed scheme? I am.
307. You see on the plan the proposed deviation, and the new wharf and the old wharf? Yes.
308. You are one of the travelling public? I travel this route myself nearly every day.
309. In your opinion, is this proposed deviation beneficial to the travelling public and to the people of Balmain generally? Very much so.
310. Is that opinion shared by the great bulk of the travelling public? I think almost entirely, as regards those who use this particular ferry.
311. *Chairman.*] Have you any knowledge in regard to Mrs. Rodger's claim for compensation from the Dock Company? I have heard something about it.
312. You say you are a constant traveller on the route? Yes.
313. You see by the plan that the route will be deviated; at present the travelling public, by sufferance, pass the frontage of Mrs. Rodger's property to Trouton-street, and also *via* Mort-street? Yes.
314. What, in your opinion, will be the effect on Mrs. Rodger's property if the proposed alteration is made? I think it will be an advantage rather than otherwise.
315. You do not think it will be detrimental to the property or cause a depreciation of value? Not at all, because it is quite competent for the Dock Company at any time to close the right-of-way. I suppose not more than one in ten of those who travel by the steamer avail themselves of the passage.
316. The bulk of the people travel *via* Mort-street? Yes; and they will travel by the deviation, which will be a continuation of Mort-street.
317. You have no interest in the Mort's Dock Company? None whatever.

Frederic Curtiss called in, sworn, and examined:—

- F. Curtiss, 318. *Mr. Rich.*] You are a solicitor of the Supreme Court, and member of the firm of Curtiss and Barry? I am.
- 23 Nov., 1898. 319. And your firm are solicitors to the Mort's Dock Company? Yes.
320. The company is a registered company, carrying on business at Balmain? Yes. I hand in the certificate of registration.
321. The company is also seized in fee of certain land described in the Schedule of the Bill? Yes; the property of the company is shown on the plan in blue lines. The land included in the proposed deviation, marked pink on the plan, is also the property of the company. The land on both sides of College-street belongs to the company, and also the land above and below the deviation.
322. That is the whole of the land fronting or abutting on those portions of the roads or streets? Yes.
323. I understand you know of your own knowledge that the company has agreed with the Borough of Balmain to the closing of these portions of roads and streets and to the deviation as proposed in the Bill and shown on the plan? Yes, and a copy of the agreement has been handed in.
324. Do you travel by this ferry every day? Yes.
325. What is your opinion with regard to the convenience of the new scheme? As far as the ferry-boats are concerned there is no doubt it will be a very great advantage. The boats are frequently incommoded by the steamers about the wharfs, and it would be a great convenience if the wharf were removed as proposed. In regard to the interference with the traffic, I think that would be very small. Perhaps about

about eight or nine of us will make a change in our approach to and from the ferry. I live in Thames-street, at the top of the hill, and with some others, I always go through the small right-of-way in front of Mrs. Rodger's, and Mr. Dingwall's property. We never go round by way of Mort-street, because it is a long way round; but the bulk of the people in this locality, except those in Clayton-street, and a portion of Trouton and Thames streets, go by the other ferry. It is a quicker service. The difference in distance is very slight.

F. Curtiss.
23 Nov., 1898.

326. Do you know what is the gradient of Thames-street? I cannot go into figures; but I know it is very steep.

327. Whereas the gradient of the deviation will be comparatively flat? I imagine so, from the appearance of the land.

328. *Mr. Kelynaek.*] I suppose you will go up Thames-street? Yes, because it will be the nearer route.

329. *Mr. Rigg.*] And what would apply to you would apply to others in the immediate neighbourhood? Yes; but there are not a great number who go by that line.

330. *Chairman.*] Then we understand that if you would take that course all the people who now pass along this right-of-way would naturally take the same course from Thames-street? Yes; except those who go into Clayton-street.

331. *Mr. Kelynaek.*] Even those who go to Clayton-street would rather go by Thames-street? No; I think they would go round the deviation and up the right-of-way.

332. That is, if the right-of-way is going to be left open? Yes.

333. It can be closed at any time? Yes.

334. The Dock Company may cut it off at any moment? Yes; but I do not think they have the remotest idea of doing so.

James Macdonald called in, sworn, and examined:—

335. *Mr. Rich.*] You are an architect and surveyor? Yes.

J. Macdonald.
23 Nov., 1898.

336. You prepared the plan which you see before you? Yes.

337. Can you give the Committee the gradients of Thames-street? At the top part it is 1 in 8.

338. And what will be the grade of the deviation? The deviation, as it is continued from Mort-street to about the junction to Thames-street, is about level; then for some distance towards the wharf it is 1 in 17, and further on 1 in 20.4. That is a very easy grade.

339. You are a very old resident of Balmain? Yes; I have been there about forty-seven years.

340. *Chairman.*] You were an alderman for many years? Yes, for twenty-three years.

341. *Mr. Rich.*] You know the two pieces of land shown on the plan as the property of Mrs. Rodger and Mr. Dingwall respectively? Yes.

342. In your opinion, does the proposed deviation affect the value of those lands? I do not see where it does in the least.

WEDNESDAY, 30 NOVEMBER, 1898.

Present:—

MR. LAW,

MR. RIGG.

MR. NICHOLSON,

W. H. WILKS, ESQ., IN THE CHAIR.

Mr. Rich, instructed by Messrs. Curtiss and Barry, appeared for the promoters of the Bill.

Mr. Kelynaek, with him Mr. Curlewis, instructed by Messrs. White and Wolstenholme, appeared for Mrs. Flora Rodger.

William Hilson Pigott further examined:—

343. *Mr. Rich.*] I believe you wish to correct portion of the evidence you gave on the last occasion? All I wish to say is that Question and Answer No. 26 are not quite clear. It would appear from that as if I were content that the new clause should be inserted in the preamble of the Bill. What I desire is that the proposed new clause should be inserted in the enacting part of the Bill.

W. H. Pigott.
30 Nov., 1898.

Gilbert Curtiss Murdoch called in, sworn, and examined:—

344. *Mr. Rich.*] You are Mayor of Balmain? Yes.

G. C. Murdoch.
30 Nov., 1898.

345. You are acquainted with the Mort's Dock Enabling Bill? Yes.

346. And are familiar with the plan before you showing the proposed deviation? Yes.

347. The Mort's Dock Company and the Council of Balmain have come to an arrangement in writing for the closing of portions of certain streets, marked "A" and "B" on the plan and coloured green, and for the proposed deviation? Yes.

348. As Mayor of the Council you are satisfied with that arrangement—you think it is a good arrangement? Yes, so far as the Council is concerned.

349. It was the subject of long negotiations between the company and the Council, was it not? Yes.

350. And they resulted in this arrangement? Yes.

351. *Chairman.*] Was the Council unanimous with regard to the agreement? Yes, I think the Council were unanimous, as far as I can remember.

352. Have you any recollection of Mrs. Rodger, whose property is said to be affected by the deviation, appealing to the Council for assistance in the matter? There were some letters written to the Council by Mrs. Rodger, objecting.

353. Did the Council go into the matter at all? They did not consider Mrs. Rodger's objection. All they had to consider was the greatest good to the greatest number.

354. And, from your knowledge of the Borough of Balmain, these proposed alterations are not, in your opinion, to the disadvantage of the public? Not to the travelling public.

- G. C. Murdoch.
30 Nov., 1898.
355. And the agreement was practically the best bargain you could obtain under the circumstances? Yes.
356. As to the disputed matter of sewerage, the sum of £1,200 to be paid by the Dock Company is to be used in constructing a new sewer? Yes, entirely. It must be so used. It could not be used for any other purpose except to construct that sewer.
357. And the Dock Company obtain College-street and portion of Mort-street, in lieu of which they provide a new wharf similar to the present wharf, and a sum of £1,200, which is to be used in constructing a new sewer? Yes.
358. You found that it was imperative to construct a new sewer on the closing of the streets at your own cost? It was absolutely necessary to construct that sewer.
359. It was imperative upon the Council to construct it at its own cost—it had no legal outlet through the Dock premises? If College-street had not been closed, and we were compelled to construct the sewer at our own expense, we should have brought the sewer down College-street to the site of the present wharf at the end of Mort-street; but in consequence of the closing of College-street we have to take the sewer under the Dock property at the corner of Mort-street, and down Mort-street, and carry it all the way to Thames-street.
360. Have any objections been made to the Council officially in regard to this matter besides the objection by Mrs. Rodger? None that I am aware of.
361. The public of Balmain have not brought under the notice of the Council any disadvantage in which they are placed by the proposed alteration of the streets? We have not had a petition from any of the ratepayers.
362. As one of the travelling public, you are acquainted with the site of this ferry? I do not use it very much.
363. But you have travelled by it? Yes.
364. Is the Borough-Engineer satisfied with this proposal? Yes; he has to be satisfied, because the Council is satisfied.
365. But is he satisfied with regard to the engineering facilities? Yes.
366. He does not consider that there will be any drain upon the Council in the future, in regard to the matter of sewerage? No, none whatever.
367. *Mr. Nicholson.*] In your opinion, will the proposed deviation in any way injure Mrs. Rodger's property? That is a matter I have not to consider. I am not a valuator, and I could not tell you that.
368. If the property were your own, do you think the proposed deviation would injure it in any way? If I were speaking simply as a citizen, I should say that the deviation would not exactly interfere with Mrs. Rodger's property, but still it might make the route a little longer. It is shorter to go by Mrs. Rodger's property to the wharf at present than it will be to go to the wharf by Thames-street when the proposed alteration is made. I am not acquainted with land values in the locality, so that I could not tell you what depreciation there might be on that account; but so far as this increased distance is concerned, that is a consideration. Otherwise I could not form any idea.
369. Do you think it would in any way depreciate the value of that property? Well, she would still have the same street. I could not say one way or the other. I would not like to say.
370. *Mr. Rigg.*] Do you consider that the agreement you have made with the Mort's Dock Company is to the advantage of the public at Balmain? The travelling public.
371. Do you think the agreement you have made with the company will result in greater convenience to the public? There is no doubt that it will be a benefit to the ratepayers.
372. At present they conduct their sewerage from Cameron-street on sufferance, do they not? Yes.
373. And this other sewer, of course, will be a permanent work; it will be there for all time, the property of the ratepayers of Balmain? Yes; it will really be a storm-water sewer.
374. You consider that the bargain the Council have made on behalf of the public is a good bargain? Yes; so far as the Council are concerned.
375. *Mr. Rich.*] You spoke, just now, of its being shorter to go by Mrs. Rodger's property to the present wharf? Yes.
376. You referred to the lane to which Mrs. Rodger's land has a frontage, marked yellow on the plan? Yes.
377. That lane is continued through the Dock property marked with blue lines? Yes.
378. You are aware that people who pass through the right-of-way do so on sufferance only? I know that.
379. *Mr. Kelynack.*] You know that Mrs. Rodger's property at present extends to Mort-street? Yes, I believe it runs right back to Mort-street.
380. Whatever tenants she might have on that property, as the wharf is at present, would go down to the patch coloured green on the plan and marked "B"? Yes.
381. That would be down Mort-street. If the deviation is made they will have to go either round the road coloured pink, and marked "deviation," or along Trouton-street and down Thames-street? Exactly.
382. That is to say, in any case, whether the lane is blocked up or not, they will have a further distance to go? Yes. How far that would depreciate the value of the property I am not in a position to say.
383. *Mr. Rich.*] You do not know the actual distance they would have to travel? Only approximately.

John Campbell Hamilton called in, sworn, and examined:—

- J. C. Hamilton.
30 Nov., 1898.
384. *Mr. Kelynack.*] You are an auctioneer and land valuator? Yes.
385. You were a member of the firm of Garrard and Hamilton? Yes.
386. You are now carrying on business on your own account? Yes.
387. How long have you been in the land business? Fifteen or sixteen years.
388. When you were in the firm of Garrard and Hamilton I believe you had large experience with regard to property in Balmain, and knew the values of property? Quite so.
389. Looking at the plan before you, you see there are two pieces of property with a frontage on Mort-street, one belonging to Mrs. Rodger, have you seen that land? I have.
390. For the purposes of this case? Well, it was not at the time; but I have seen the property.
391. What would you say was the value of Mrs. Rodger's land under present conditions? About £6 per foot.

J. C.
Hamilton,
30 Nov., 1898.

392. If the proposed deviation is made, do you think it will have any effect upon the value of her property? Yes, I do.
393. In what way? I think it will reduce it from a business, and a possible improving business site, to an ordinary residence site.
394. I believe Mrs. Rodger's land is a little higher than the level of the road? Yes.
395. What would you reckon to be the depreciation in value of Mrs. Rodger's land if the deviation is carried out? About £99.
396. How do you arrive at that? I consider its present value is £6 per foot, and after the deviation its value would be only about £3 per foot. As it has a frontage of 33 feet, that would represent a total depreciation in value of £99.
397. You are acquainted with Thames-street? Yes.
398. Is that an unusually steep street for an approach to the wharf? It is a steep approach; but there are other approaches which I think are quite as steep—exits from the city.
399. Would you give examples? Considering the length of the approach to the railway station at Redfern, I do not think this is any more severe. I mean to walk the distance. It would be as much fatiguing to take the George-street route to the railway station, going up the hill, as it would be to take this route by Thames-street to the proposed wharf at the ferry.
400. And comparing it with Erskine-street? I think Erskine-street, as an approach to the city, would be more severe, although not so long as the approach to the railway station.
401. I believe you have not a large acquaintance yourself with the traffic which goes across this way? I do not know the amount of traffic which would take place, but viewing the matter as a valuer going to value property, and in that way having some idea of the amount of settlement round there, I should say it was thickly populated.
402. To the south-east of Thames-street is there a good population? Yes, there is a fair population there.
403. If the alterations were made it would be closer for those people to go down Thames-street to the wharf, or to go up Thames-street from the wharf, than to go *via* Mort-street? Yes, I think so. And it would be a better approach for the people generally than to go round by the dock works, which would be somewhat of a back way to the wharf. People usually take the most agreeable approach.
404. At present there is only one approach to and from the wharf? Yes.
405. And that is *via* Mort-street? Quite so.
406. And all persons who go by that ferry, must now go past Mrs. Rodger's property? Yes.
407. *Mr. Rich.*] How long ago is it since you saw this land? It was in September last.
408. Were you then in partnership with Mr. Garrard? No.
409. How long ago is it since you were in partnership with Mr. Garrard? Four years ago.
410. When you looked at the land did you look at the frontage and depth of Mrs. Rodger's property? I did.
411. What is the frontage? Thirty-three feet.
412. And the depth? 107 feet.
413. Was the land divided off in any way? Yes, a portion of it was built upon—at the Trouton-street corner and the right-of-way.
414. The portion facing Trouton-street and the lane was built on? Yes.
415. What was erected there? Two cottages.
416. What sort of cottages? Brick cottages. I did not value the cottages, and I did not go into them.
417. With regard to the back portion facing Mort-street, is that fenced off in any way? It is newly fenced.
418. It was newly fenced when you were there, you mean? Yes.
419. And that is not built on in any way? No.
420. What area, then, would there be available for building on? There would be a frontage of 33 feet to Mort-street.
421. And what depth? I think about 60 feet.
422. Have you any land for sale in Balmain? We have, in different parts.
423. In Mort-street? No, not in Mort-street.
424. Anywhere near that locality? No, not immediately in this vicinity.
425. Are there any shops or houses in Mort-street? There is a small shop at the ferry.
426. What sort of a shop? A small fruit shop; and beyond that there is a hotel.
427. The hotel is up at the junction of Trouton and Mort Streets? Yes.
428. There are two there, are there not? Yes.
429. But the only shop there is a little fruit shop? Yes.
430. *Chairman.*] You said that the deviation would convert Mrs. Rodger's property from a business site into a residential site? Yes.
431. Would you mind stating your reasons for thinking so? Simply because the traffic would be diverted up Thames-street.
432. I suppose you are aware that Mort-street is to be continued by the proposed deviation, as shown on the plan coloured pink? I do not say for a moment that Mort-street will not be used; but at the same time the greater portion of the traffic will be taken up Thames-street. The Mort-street route will go by the dock works, and people would naturally take the better road.
433. Then you consider that Thames-street, which you said was a steep street, is a better one than Mort-street, with an easy grade? I think, on the whole, the people would find Thames-street the most convenient thoroughfare, and the surroundings are better.
434. Does the bulk of the traffic lie to the east or the west of the ferry? I have seen the traffic going from the ferry, but I have not followed it up to see in what direction it went. What I wish to convey is that when the proposed alterations are made the traffic in Mort-street will not be anything like so great as it is at present, because Thames-street will then be a direct route right down to the wharf, and people will naturally go by the more direct route. There is no reason why they should turn off and go along Mort-street.
435. You think they will take the more direct route, and you consider Thames-street the more direct route? I think so.
436. *Mr. Law.*] You said that the value of Mrs. Rodger's land would be reduced by the deviation to the extent of 50 per cent. or from £6 to £3? I think so.

J. C.
Hamilton.
30 Nov., 1898.

437. There are a number of streets leading up from the various ferries in Balmain? Yes.
438. Can you give a parallel case where in any street in Balmain, 66 feet wide, property within two minutes from the ferry would be reduced in value by 50 per cent.? It is the deviation that will cause the alteration in value. The frontages in Thames-street would be correspondingly improved.
439. Can you get land anywhere in Balmain for £3 per foot in a 66 feet street, within two minutes of the ferry? When these improvements to Thames-street are completed it will be found that the depreciation which will have taken place in Mort-street will be more than put on to the properties in Thames-street within the same distance. The frontages in Thames-street along the portion coloured yellow on the plan at the corner of Trouton-street ought to be improved in a degree corresponding with the depreciation in Mort-street.
440. *Mr. Rigg.*] Have you made any sales in this particular locality? No, not lately; it has been very hard to make any sales at all.
441. Have you made any at any time? This land was originally sold by Mr. Garrard before I joined him.
442. Have you made any sales in this locality during your sixteen years' experience? Yes, we have had several sales.
443. Where has been the nearest sale to this particular property? I could not say without looking the matter up.
444. Then, in valuing this land at £6 a foot, on what do you base your valuation—sales made by other auctioneers in Balmain? I base the valuation on my experience generally as a valuer of real estate.
445. And you consider this property would be depreciated by the deviation of Mort-street to the extent of 50 per cent.? I think so.
446. What traffic is there at the present time to the foot of Mort-street from the south-east portion of this locality, which under the new scheme will be tapped by Thames-street;—is the traffic large from that particular part—I mean south-east from Mort-street wharf;—is there a large traffic from there, or are the people supplied by the Stevens-street ferry? I think most of the traffic comes right down Mort-street.
447. I am speaking of the south-east portion; at the present time people going from there to Mort-street have to go along Trouton-street and then into Mort-street? Yes; that is, the people within a certain area—between (say) Darling-street and Trouton-street. They might have to go that way. The others higher up would go along Darling-street down Mort-street.
448. The opening of Thames-street would give a more direct course for them to the Thames-street wharf? Yes.
449. Would the construction of the proposed new wharf at Thames-street bring any additional traffic to that ferry from the Stephens-street ferry—that is from the south-east portion? I do not know that it would.
450. The whole of the traffic from the wharf towards Cameron-street would still continue to go along Mort-street, would it not? Not necessarily.
451. Is it your opinion that it would go along Thames-street? I think that the immediate surroundings of the Mort-street approach to the ferry might, in some measure, interfere with that, being the regular route.
452. Would not the route indicated by the red line on the map be the nearest and most direct course? It would not be nearer than along Trouton-street.
453. *Chairman.*] If the traffic went along Trouton-street it would pass Mrs. Rodger's property? Yes.
454. Looking at the plan you will see that Trouton-street and Thames-street are at right angles, while Mort-street takes a curved line; do you not think the distance is shorter along that curved line than along Trouton-street and Thames-street? Yes; but it is very questionable whether people would prefer the Mort-street route. What they look at in most of these cases is the exertion necessary in travelling from one point to another.
455. But it is shorter along the curved route? It is by this plan.
456. With regard to the question of grade,—is not the grade by this curved line far easier to travel than the grade up Thames-street? I think if you took the whole grade you would find there was not such a great difference.
457. Do you know what the grade in Thames-street is? No, I do not.
458. Looking at it as a casual observer is it not very steep? It is steep.
459. And along the deviation marked pink is not the land very flat? Yes; I do not know whether you understand what I mean. If you are travelling a longer distance with a less grade, it will cost the same amount of exertion or fatigue to anyone who is regularly walking to and fro in that distance as it will for a shorter distance with a steeper grade.
460. Starting from the steamer and going up Thames-street, and then along Trouton-street to the corner of Mort-street, would not far greater exertion be required, going that way, than going along the curved line by the proposed deviation from the wharf to the same point in Mort-street? Of course you rise to the same level when you once go Cameron-street. Taking that as an illustration, the exertion required to go along Mort-street, including the deviation, might not certainly be as great as that required to go from Thames-street straight up to Cameron-street. Of course you could not well include that portion of Cameron-street.
461. For this purpose we do not want to go further than the corner of Mort-street and Trouton-street;—is it easier to go to that point by the curved line along Mort-street, than to go by Thames-street, and along Trouton-street to the same point? I do not think there would be very much difference in the distance to the junction of Mort and Trouton streets, between the route *via* Thames-street and that along the proposed deviation and up Mort-street. At the same time the former would probably be the more agreeable outlet.
462. Do you not think that for business purposes the bulk of the passenger traffic would still continue along Mort-street? I do not think so. People, as a rule, do not like regular traffic past works; if they can get a more agreeable route they will take it.
463. Are the works in this immediate neighbourhood;—is it reasonable to suppose that they would face Mort-street? A high fence runs right up to Mort-street now, and I see by this plan that the joiners' department comes right on to it.
464. *Mr. Rich.*] You see where the joiners' department is on the plan? Yes. 465.

465. The offices are next door? Yes; but the company would not allow the vacant piece of land there to lie idle. They would be sure to utilise a valuable water-frontage like that, and put something on it which would probably not be so agreeable.
466. With regard to the traffic, do you think the vehicular traffic would go up Thames-street? Of course there would not be a very great amount.
467. Suppose there is a vehicular traffic, which way would it go—up Thames-street or up Mort-street? I think it would depend to some extent, upon what part of Balmain it was going to. Unless in the case of any special traffic I think it would probably go the way that was handiest to them, because the grades are somewhat the same.
468. Do you know, as a matter of fact, that at present they do not go down Thames-street, they stop at the corner? Because they cannot go further. When I was there they could not go right down to where this street is proposed to be made.
469. They could not go right down to the foot of Thames-street? No.
470. Why not? Because the approach is not as good as that down to Mort-street; but that would be made good, I presume.
471. You are assuming that Thames-street would be made good? Yes.
472. With regard to the grade in Thames-street? If you take the short piece in Thames-street from Trouton-street to the junction with the proposed deviation and take the deviation into Mort-street there would not be much difference.
473. But you do not know as a matter of fact? No; only from having walked over it.
474. You do not know accurately? No.
475. *Mr. Kelynaek.*] As a matter of fact, what vehicular traffic goes down to the foot of Mort-street or Thames-street? Not much.
476. I suppose an odd cab or two? I do not think there is much reason for vehicles to go down there.

J. C.
Hamilton.
30 Nov., 1898.

John Yelverton Mills called in, sworn, and examined:—

477. *Mr. Kelynaek.*] You are a land and estate agent and valuer? Yes.
478. How many years experience have you had? Nearly thirty years.
479. You are the Mr. Mills who was a member of the firm of Mills and Pile, at one time? Yes.
480. You are acquainted, I suppose, with land values in Balmain? Generally, yes.
481. Looking at the plan before you you see a block of land marked yellow belonging to Mrs. Rodger? Yes.
482. I believe you have seen that land and valued it? Yes.
483. You will see a green patch on the plan marked "B," near the water, which represents the position of the present ferry? Yes.
484. And you know that it is proposed to close that ferry and make a deviation along the line marked pink to the foot of Thames-street? Yes.
485. Taking things as they are, with the wharf in its present position, what would you say was the value of Mrs. Rodger's property? I looked at the portion affected by the deviation of the street.
486. What part did you look at? I looked at the northern end fronting Mort-street.
487. With the wharf in its present position—what would you reckon would be the value of that? About £200 for the land.
488. If a deviation were made as shown on the plan, would it, in your opinion, depreciate the value of Mrs. Rodger's property? I think it would.
489. To what extent? I think about £100.
490. Would you explain your grounds for believing it would be thus depreciated in value? As a business site it would be reduced in value 50 per cent. by the deviation.
491. You consider, then, that it will cease to be a business site if the deviation is made? It will not be so good a one.
492. In your experience of traffic passing from a terminus, does it go, as a rule, by the more direct route, even though that might not be of so low a grade as another route? The whole tendency is to save time. People do not care so much about spending a little energy; if by a little more energy they can save time, they will go that way.
493. Are you of opinion then that the deviation will cause the traffic which now goes up Mort-street to go up Thames-street? Yes, a great portion of it. Of course, as regards all the traffic tending south-easterly, I do not think the people would go round Trouton-street.
494. All south and south-east of Thames-street? Yes.
495. All that traffic will then cease to go past Mrs. Rodger's land? Yes.
496. At present all that traffic must go past Mrs. Rodger's land either by the lane and the right-of-way over the Dock property—which may be closed at any time—or it must go round into Mort-street, and then pass the other frontage of Mrs. Rodger's property? Yes.
497. The traffic is compelled to go into Mort-street one way or the other? Yes.
498. *Mr. Rich.*] How long ago did you value this land? I have not the exact date in my memory, but I think some time within the last twelve months.
499. Did you see what was built on Mrs. Rodger's land facing Trouton-street;—was it built on at all? I think there was a cottage there.
500. One cottage? I think so.
501. The portion you valued was the frontage facing Mort-street? Yes.
502. What was the frontage and the depth? The depth was sufficient to allow of a building on the Mort-street frontage. I think it was 50 or 60 feet.
503. *Mr. Kelynaek.*] Could you refresh your memory if you referred to your valuation? Yes.
504. Is that the valuation you made on the 8th October, 1897 [*Document produced*]? Yes; it is as follows:—

J. Y. Mills.
30 Nov., 1898.

I have inspected the property of Mrs. Rodger, at Mort and Trouton Streets, Balmain, with a view to estimating the damage (if any) she will sustain by reason of the removal of the Ferry Wharf from its present position to the foot of Thames-street, for the benefit of Mort's Dock Company. I understand Mrs. Rodger bought her land, having 33 feet frontage to Mort-street, and 22 feet 6 inches to Trouton-street, and 25 feet to a side lane, from the Mort's Dock Company, because of its

J. Y. Mills. its position as a good prospective business site in regard to the Dock and Ferry Wharf. The proposal now is made by her original vendors, for their own benefit, to close the Ferry Wharf, and remove it to the foot of Thames-street, and make a cross street connecting Mort-street with Thames-street. This arrangement will shift the public traffic from its present only outlet along Mort-street, past Mrs. Rodger's property, to a position where quite half the traffic will go another way. In view of this I think Mrs. Rodger's property will be depreciated in value £100 (one hundred pounds).

30 Nov., 1898.

505. *Mr. Rich.*] Do you know, of your own knowledge, that the people living south-east of Thames-street use the Mort's Dock Ferry. I do not know from personal knowledge. I should only presume that those living near enough to it would do so. Balmain is surrounded with ferries.
506. Do you know a ferry called Stephen-street Ferry? Yes; I know there is a ferry called Stephen-street.
507. Have you any land for sale along Mort-street? No.
508. Have you effected any sales there recently? No.
509. Have you done so during the last ten years? That I could not say.
510. Do you know, of your own personal knowledge, what traffic goes along Mort-street—either passenger traffic or vehicular traffic—and the same along Thames-street? I could not say.
511. Did you look at Mort-street to see whether there were any other business places there—take the distance from the junction of Trouton-street and Mort-street, to the present wharf;—do you remember seeing any business houses? I do not remember.
512. Do you remember seeing where the hotels were, or if there were any? I did not see any hotels there.
513. Do you know anything at all about the difference between the gradients in Thames-street and along the proposed deviation;—did you notice which was the steeper? I think Thames-street is the steeper.
514. I understood you to say you are not acquainted with either the vehicular traffic or passenger traffic that goes along Mort-street or Thames-street? I never had an opportunity of standing there and watching it.
515. Do you know anything about the traffic? I only know in a general way that there is a good deal of traffic there.
516. How do you know that? I have been backward and forwards very frequently.
517. To Balmain? Yes.
518. You do not live at Balmain? I do not; but my business takes me everywhere.
519. But you have no accurate knowledge of the present traffic? I could not give you any statistical information.
520. What was the knowledge on which you based your report—you say:—
- This arrangement will shift the public traffic from its present only outlet along Mort-street past Mrs. Rodger's property to a position where quite half the traffic will go another way.
- There you have given some sort of statistics—you say half the traffic by this proposed deviation will go up Thames-street and be diverted from Mrs. Rodger's property? Yes, I believe that.
521. But you know nothing accurately about the place? I do not.
522. *Mr. Nicholson.*] I understand you to say you do not quite know the volume of traffic that will be diverted by the change of route? I can only form an idea in a general way.
523. I want to know by what method you arrived at the conclusion that the property would be depreciated in value by £100? If you give the public two outlets instead of one you will certainly take a lot of the traffic away.
524. And you fix the depreciation at 50 per cent.? Yes.
525. *Mr. Law.*] You will notice that Mort-street is 66 feet wide—you say that the 33 feet of frontage to Mort-street alone is worth £200 or a fraction over £6 per foot? Yes.
526. At what do you estimate the whole of the land? I did not go into that calculation. I merely went there to see what damage would be done to the part that could be built on facing Mort-street.
527. Do you not think that £3 a foot is an inordinately low value for property within two minutes of the ferry, in a street 66 feet wide? Balmain is blessed with very few wide streets, and where they exist land is more valuable.
528. Even after the proposed alterations the property will still be close to the ferry, and in a 66-foot street. The deviation will not alter the width of the street? No, it will not alter the width of the street.
529. Do you not think that £3 a foot is an inordinately low figure? I think Mrs. Rodger's property occupies a site that would do for a place where people could get their lunch, or have a cup of coffee or anything of that sort. It is not exactly a question of the width of the street, it is a question of taking the traffic away.
530. But down at the ferry there is a place where people can get coffee, and lollies, and cakes? Yes.
531. I want to know the method by which you arrive at the extraordinary reduction of 50 per cent;—do you say that land two minutes from the ferry in a 66-foot street will not be worth more than £3 a foot? Yes; I say that as a business site it will be reduced in value by one-half in consequence of the deviation.
532. You did not estimate the value of Mrs. Rodger's land as a whole? No, I did not go into that calculation.
533. Would you be surprised to hear that the whole of the land comes under the land tax exemption of £240, though you value only the portion fronting Mort-street at £200? I would not be surprised at anything in connection with the land tax.
534. *Chairman.*] Do I understand, that in dealing with this property of Mrs. Rodger's you have divided it and dealt only with the Mort-street frontage? Yes.
535. And you say that the diversion of the traffic by the proposed new road would cause a loss in the value of the property of something like £100? Yes, that is my estimate.
536. At the present time there are two outlets, one by Mort-street past the Mort-street frontage of Mrs. Rodger's property, and the other by a bye-lane past Mrs. Rodger's Trouton-street property? I did not reckon there was any right-of-way, because I did not take it that sufferance was a right.
537. But that is the only other way of exit from the wharf besides Mort-street? But the lane only goes half way.
538. But that is the only way they have to get out? I did not consider there was any right in a sufferance, and therefore I considered there was only one way out. I did not take it that a sufferance was a right. The right-of-way might be closed at any time.
539. After the proposed alteration, it is only natural that the population living in the south-east portion will come up Thames-street? Yes.

540. Then it is a matter of calculation whether the traffic that way is half the present traffic coming up Mort-street? I think at the time I looked generally at the plan of Balmain and saw what was the density of the population, and I took it it was about equal. Everything goes now for a saving of time, and people would not go round by one route if they could go straight by another. J. Y. Mills.
30 Nov., 1898.

541. And you base your estimate of the depreciation upon a calculation that half the population will travel in that direction? Yes.

542. And you say the site of Mrs. Rodger's property is now reduced from a business site to a residential one? Yes; at present there is only one outlet, and the people are compelled to go that way.

George Bishton called in, sworn, and examined:—

543. *Mr. Kelynaek.*] What is your occupation? Just now I am bringing out a patent. G. Bishton,
30 Nov., 1898.

544. You are a resident of Balmain? Yes.

545. And have been for some time? About fifteen months.

546. You know the property shown on the plan? Yes.

547. And you see the proposed deviation of the road? Yes.

548. If the approach to the present wharf is closed, and a deviation is taken down to the foot of Thames-street, what, in your opinion, will be the effect on Mrs. Rodger's property? A depreciation in value.

549. You are not a land valuer? No.

550. You do not pretend to give figures? No; I know nothing at all about Balmain as to the value of property.

551. Upon what ground do you base your opinion as to depreciation in value? Having a piece of land with a frontage on a main street, the whole of the traffic passing the door, if a deviation is made which turns the traffic at least 300 or 400 feet away, and gives access to the ferry by another street, the effect must be to depreciate the value of that property. At present there is only one access to the ferry—down Mort-street, past Mrs. Rodger's land.

552. *Mr. Law.*] Do you think there is a remote possibility of anybody getting a living off that land at the present time, as a business site? I do not know anything about the traffic there now. If I were purchasing that piece of land at the present time I should purchase it as a business site, with the traffic in front. If I were in a new country, looking upon that land as a business site, I should say that if the traffic were divided by a deviation of the road it would be no use for business purposes. That is the way I look upon it, because I know nothing about the traffic.

553. *Mr. Rigg.*] I presume you have seen this property? Yes.

554. Do you know this particular part from which it is proposed to form Thames-street? No, I do not.

555. Do you know Thames-street? No, I do not.

556. Do you know Mort-street? I only know Mort-street.

557. What kind of a grade is there there;—is there an easy access from the ferry right along? It is not at all a heavy grade.

558. An easy ascent? Yes.

559. What kind of a grade is there in Thames-street? I can only say from memory. I should think it was a steeper grade.

560. Do you think it would be suitable for vehicular traffic? I cannot say; I have not been along it to inspect it.

561. You have no knowledge as to the traffic coming down to this particular place? No.

562. Is there much vehicular traffic down to the wharf from Balmain? I could not say; I know nothing about it as far as that is concerned.

563. Do you live in this locality? No; I live in Beattie-street.

564. You very seldom travel down Mort-street? Very seldom. I only looked at the property as a stranger, and as to whether I should purchase it as a business site.

565. And you have not calculated whether the traffic would be diverted, and would go up Thames-street? I only know that if you close a street, and divert the traffic, you must deteriorate the value of the particular piece of land, because you shift the traffic away further.

566. The street is not closed? No; but the traffic is diverted 300 or 400 feet away.

567. You have no knowledge of the habits of the travelling public there? No.

Samuel Patrick Boyd called in, sworn, and examined:—

568. *Mr. Kelynaek.*] You are a plasterer by occupation, and you reside at Balmain? Yes, in College-street. S. P. Boyd.
30 Nov., 1898.

569. Looking at the plan, you see an allotment of land marked yellow, with the name of "Mrs. Rodger" upon it? Yes.

570. Do you know that piece of land? Yes.

571. Is there a good population to the south and south-east of Thames-street? There are lots of houses. I could not say exactly the population.

572. They are occupied? Yes. Going round that way, I generally see that they are let to people.

573. Then there will be a fair amount of traffic by the Mort's Dock Ferry, of persons who come from the south and south-east of Thames-street? Yes; I have noticed that myself.

574. At present, anybody wanting to approach this ferry from the south or south-east of Thames-street must go past Mrs. Rodger's property, either round Mort-street, or round the lane opening from Trouton-street? Yes.

575. If the proposed deviation were made, I suppose people would go direct down Thames-street, as it would be much nearer? Certainly; people would not go round by Mort-street if the ferry were shifted to Thames-street.

576. *Chairman.*] Are you well acquainted with the traffic landing at the present time at Mort-street? Yes.

577. You are an old Balmain resident? Yes.

578. In which direction does the bulk of the traffic now go? I could not say. A lot of the traffic goes up the lane, and down Trouton-street. I have not taken much notice.

S. P. Boyd. 579. Would the bulk of the traffic go by the lane or along Mort-street? I could not say.

580. Does the ferry serve the people more on the east side or the west side? It would be hard for me to say.

581. Are you aware whether a number of people on the east side travel by the Stephen-street Ferry? I could not say exactly how many; there may be a few. I know there are a lot who travel this way, because I have noticed them going round.

582. You could not give any statement as to the direction in which the bulk of the traffic goes? I could not say exactly. I know lots of people who come this way.

583. And if that were closed they could come up Thames-street? Yes.

584. But that would not interfere with the present traffic that comes down Mort-street? It would interfere with people coming from this direction.

585. Under the new conditions the travelling public would come down Thames-street, and Mrs. Rodger would lose the advantage of those people passing her property? Yes.

586. But you do not think it would affect the Mort-street traffic? I could not say. A lot of people might come this way, and a lot might come that way.

587. You recognise that a certain number of the travelling public would not pass this property, but would go up Thames-street? Yes. They would not come from the steamers, and then go up Mort-street, and down the lane.

Flora Rodger called in, sworn, and examined:—

F. Rodger. 588. *Mr. Kelynaek.*] You are the wife of James Rodger, of No. 72, Mort-street, Balmain, an engineer? Yes.

30 Nov., 1898. 589. You are owner in fee-simple of the land marked yellow on the plan, with your name on it? Yes.

590. When did you purchase that land? Fourteen or fifteen years ago.

591. From whom? From the Dock Company.

592. Will you inform the Committee of the circumstances under which you purchased that land? I had a piece of ground at the corner of College and Darling Streets, and I sold it for £700. The Dock Company had some property to sell, and Mr. Garrard sent me a plan, and I went over to the sale in Snail's Bay. Mr. Franki, manager of the Dock Company, said to me, "Mrs. Rodger, aren't you going to buy some here." I said, "No; there might be something down in Mort-street," and he said, "You buy No. 3 block; it will be a splendid site for a coffee palace, as the ships clear the galleys when they come into dock." Then Mr. Dingwall bought his first, and gave £8 10s. a foot for it. My husband was not willing for me to have any transactions with the Dock Company, because, he said, "If you do I will not work there." But Mr. Franki said he was very foolish; that it was such a good business place, and we would make more profit out of it than we did out of the other. My husband and Mr. Aikenhead, one of the shareholders in the Dock Company, I believe, were standing by, and Mr. Franki held this plan by one corner and I had the other, and he said, "Do not let it go, for it is a good business block." I bought the land for £9 5s. per foot.

593. Did Mr. Franki make any statement to you after you purchased it? He wanted me to buy the whole of these allotments in the angle piece. He proposed that if I bought them he would arrange with the directors to give me the title of one to enable me to build on it; but Mr. McDonald, the architect, told me not to buy them, because they were not profitable.

594. What is the depth of your land? 117 feet, and it has a frontage of 33 feet to Mort-street.

595. And you have, I believe, a couple of cottages at the Trouton-street frontage? Yes.

596. At present there is a lane by the side of your house and Mr. Dingwall's, and people come through the Dock property down to the present wharf? Yes; that lane was given for Mr. Dingwall's use and mine.

597. After you get to the end of the lane you come on the Dock property? The ground at that time belonged to the Ferry Company, but for the convenience of Mr. Franki and other gentlemen living handy, an arrangement was made with the Council to have a little lane down to the wharf.

598. If the deviation is made as proposed, and the present wharf at Mort-street is removed and taken to the end of Thames-street, do you believe the traffic will be diverted from Mort-street to Thames-street? Certainly; I believe the effect will be to improve Thames-street, and take the value off my property.

599. How long have you been living there? Twenty-seven years.

600. You know the traffic which comes across to the wharf? Yes.

601. Do many people come to the ferry from the south and south-east of Thames-street? Yes, a great many.

602. Do you live on the property? We have lived for twenty years in No. 27 Mort-street, further up.

603. You are constantly travelling to and fro? Continually.

604. I suppose you see people whether they come down Mort-street or whether they come from the direction of Thames-street? Most of the traffic comes down past our place.

605. Where you are residing in Mort-street? Yes.

606. Do you see people coming from the direction of Thames-street towards the ferry? They take the lane.

607. Are there a number of people who come that way? A great many. The better class of people live on that side.

608. If the ferry is brought to Thames-street from Mort-street these people will come up Thames-street instead of coming up Mort-street? I do not know that they will all come up Thames-street. I think some will come down Clayton-street.

609. And then come into Thames-street? Yes.

610. You had a conversation with Mr. Dingwall about this case? Yes.

611. And, about whether he would give evidence for you? He told me it would improve his place. He said the deviation from Mort-street would make his frontage.

612. That the deviation would come along the side of his land? Mr. Dingwall said it would depreciate the value of my property. In a conversation I had with Mr. Dingwall on Saturday, I said, "Mr. Dingwall, I might ask you to give evidence." He said, "Do not ask me, Mrs. Rodger, because the Dock and I are very friendly, and I do work for them occasionally"—which I know for a fact he does. I have known it on several occasions.

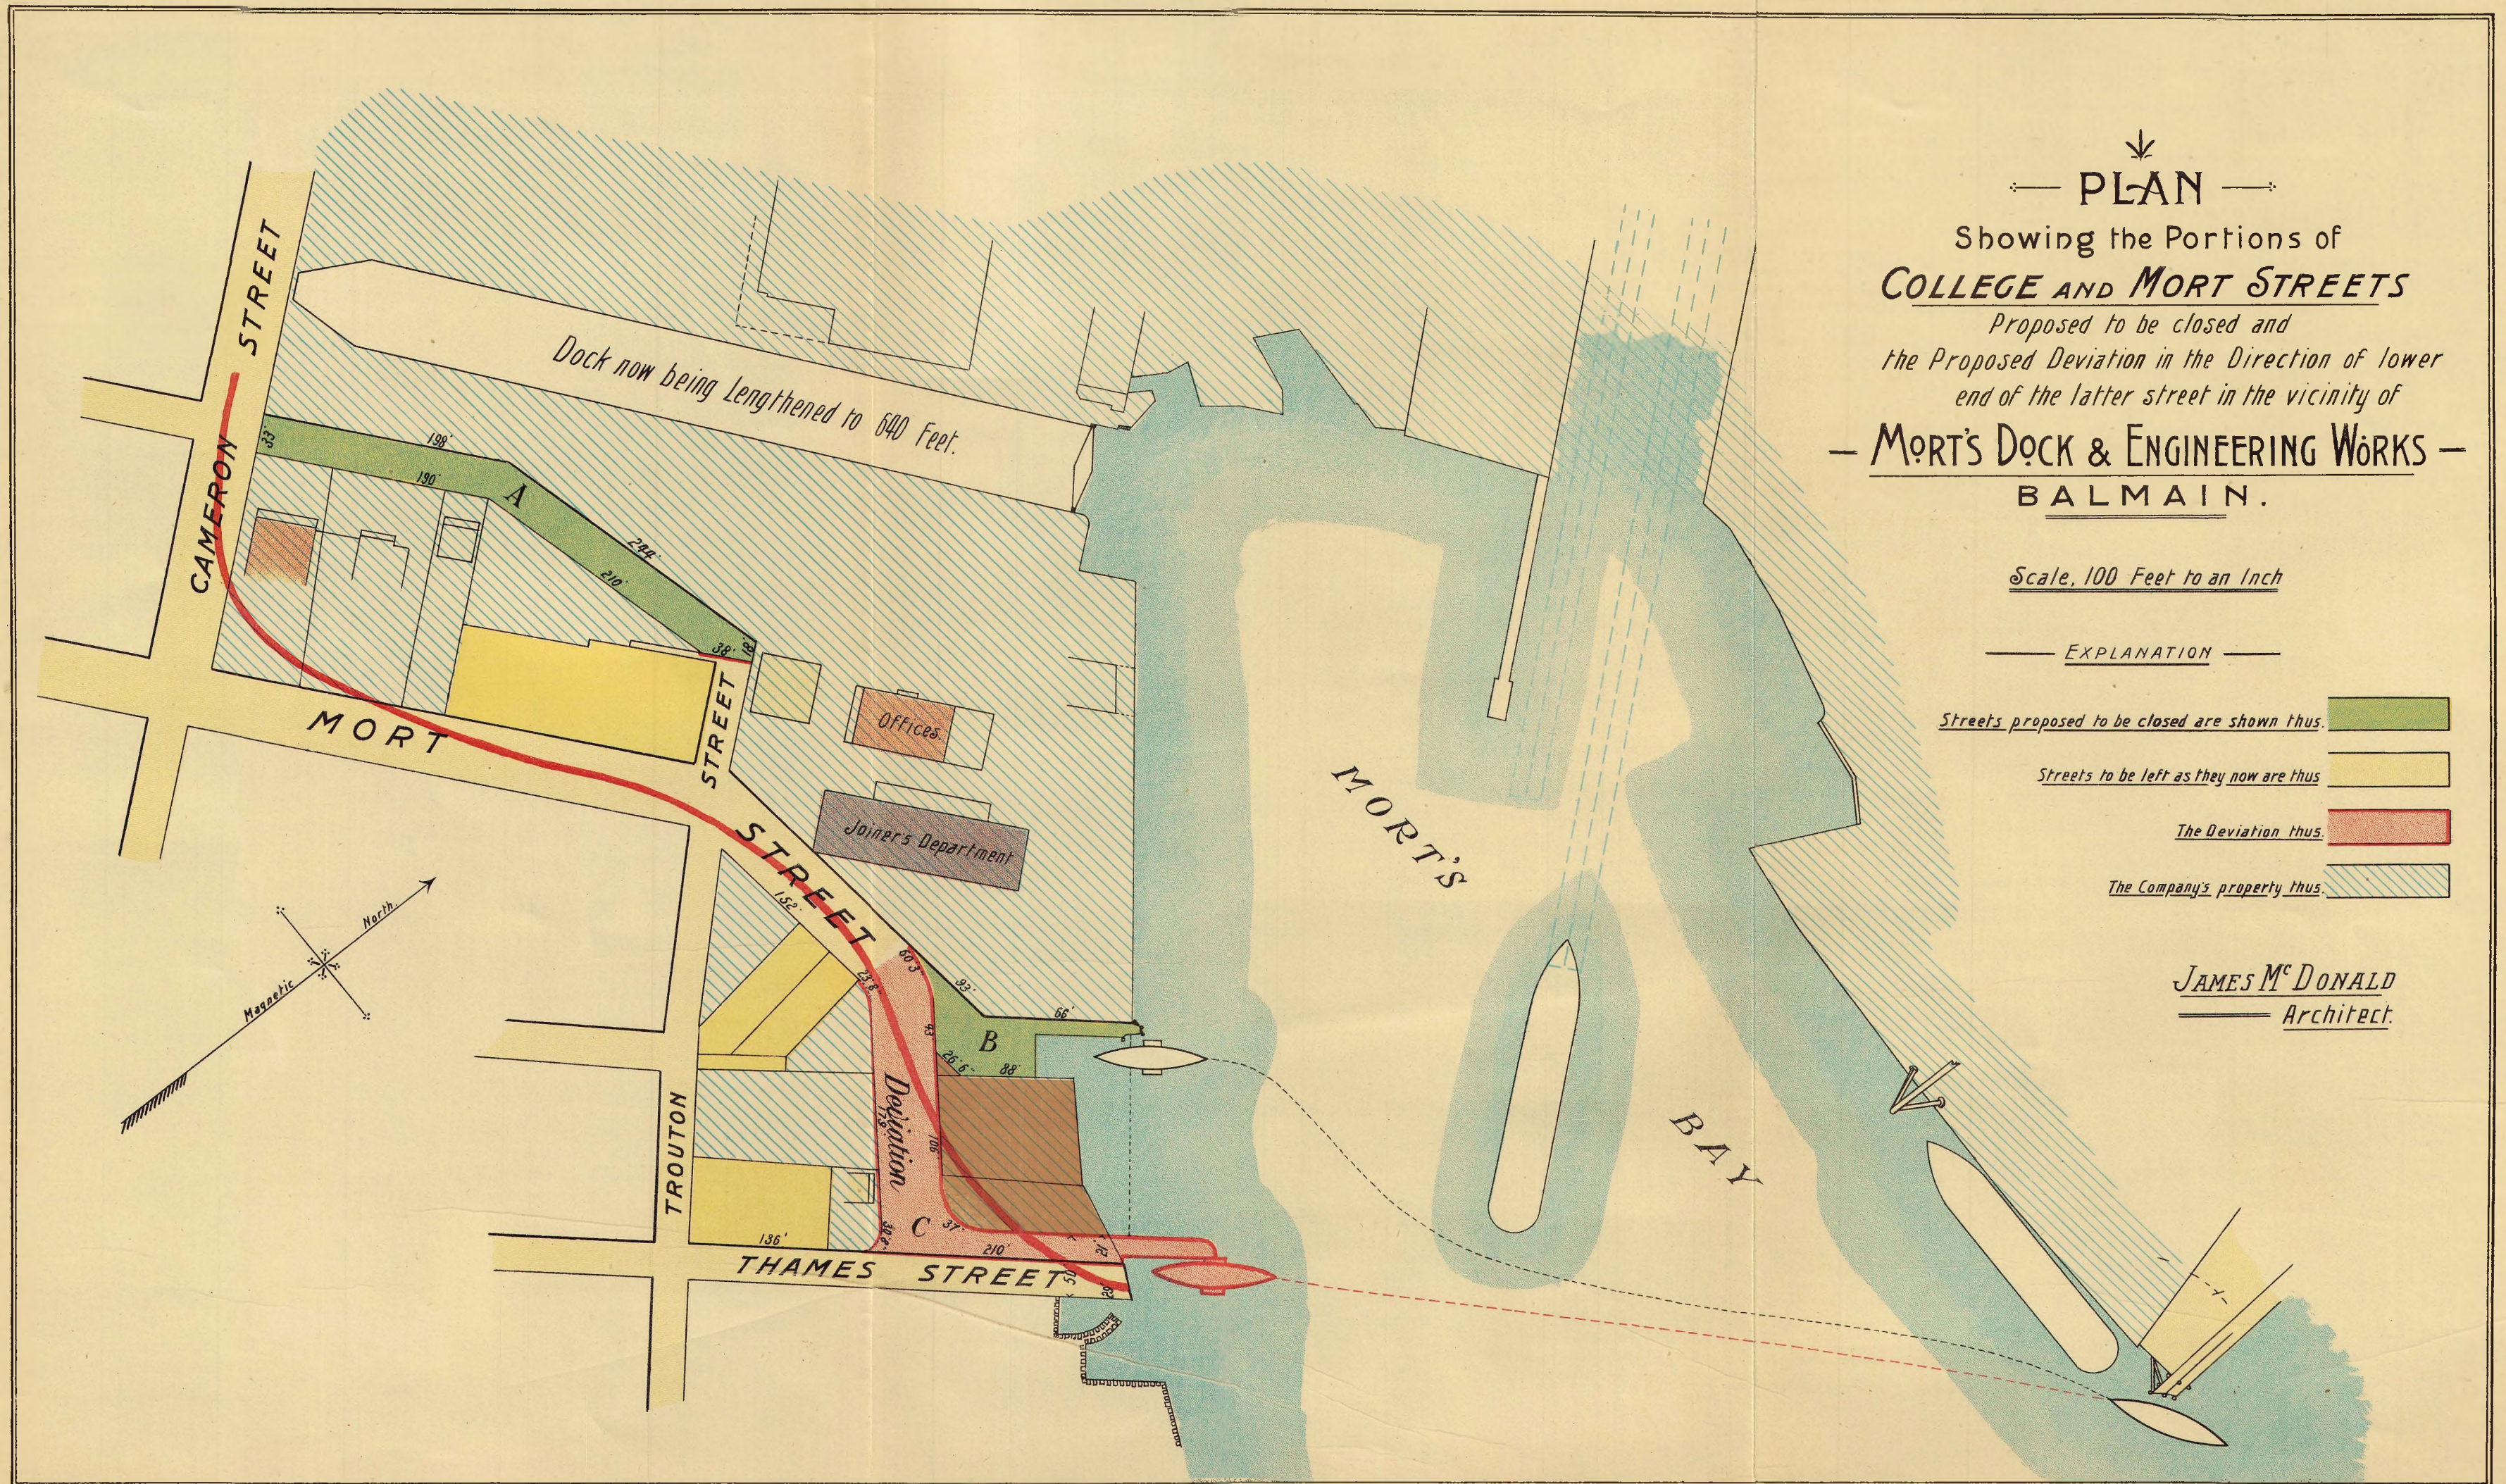

F. Rodger,
30 Nov., 1898.

613. There was another man you asked to come as a witness—a man named Chester? Yes.
614. He is engaged in the dock? Mr. Chester is working in the Dock. It is a very hard thing to get people to come and give evidence when they have work in the Dock. All the people in the street who work for the Dock are in favour of the street being kept open; but they dare not say so.
615. You have had a difficulty anyhow in getting witnesses, and one particular man who promised to come has since got work in the Dock, and he cannot come or does not care to come? Yes; that is Mr. Chester.
616. *Mr. Rich.*] I believe you have had this land for fourteen or fifteen years? Yes.
617. During that time what have you built on it; did you build those two cottages facing Trouton-street? Yes; I built those six months after I got the land.
618. Have you built anything on the land facing Mort-street during the whole of these fifteen years? No I could not, because I could not get the title.
619. Did you get the title to the piece facing Trouton-street? No; I built two cottages without a title—seven years before I got the title, and then they tried to keep it from me.
620. When did you get the title? Five or six years ago.
621. Since then you have built nothing on the land at all? No.
622. Never tried to build anything on it, I suppose? Oh, yes; I got it valued, and I got the money from Mr. Thomas Leader—£500—to build; and Mr. Franki told me he could not give me the title; that by the conditions of sale I could not get it until the expiration of seven years—that Sir Joseph Abbott had lent £100,000 on the property, and they could not give me a title.
623. One of the conditions of sale was that you were to pay by instalments? Yes.
624. And you got the title when you paid the instalments? I had a great deal of trouble to get the title.
625. One of the conditions of sale was that the purchase-money was payable by instalments; is that so? Yes.
626. When you completed the whole of these instalments did you get your title? No, not for about a month after.
627. So that, as soon as you paid your purchase-money, or about a month afterwards, you got your title, and from that day to this you built nothing on the piece of land facing Mort-street—either cottage or business premises? No.
628. *Mr. Kelynack.*] Will you give your reasons why you have not built? Because the Dock Company were applying for the last three years to get permission to close this street. I built the cottages with the balance of money from the property I sold in Darling-street; and I could not build unless I got the title. There were some shareholders who would not sign the deed of sale. I do not know why, but Mr. Dowling had a great deal of trouble; and then I asked Mr. Curtis about it, and he said there was a dispute about some of the shareholders not signing. For the last three years they have been talking about closing the street.
629. So that you have not known what to do? They have been making application to the Council for the last three years to close the street.
630. *Chairman.*] Have you made any request for compensation for damages to Mr. Franki or Mr. Curtis? No; I have written to them, and I have copies of all the letters. I said that in the event of their closing Mort-street it would depreciate the value of my property, and I would sue for compensation.
631. You made an application to the Municipal Council to protect you? Three times.
632. Did they give you any reply? No, they wrote to the Dock Company.
633. Did they give you any reply? No.
634. Neither written nor verbal? No; they made an acknowledgment of my letter.
635. But they passed no opinion? The Council thought I would suffer an injury, and that there would be trouble about it.
636. You heard Mr. Murdoch's evidence in regard to that matter when I asked him the question? Mr. Murdoch was not willing for the deviation of the street in the first instance. It was decided by a majority of the aldermen.
637. You heard Mr. Murdoch say the decision was unanimous? No; I did not quite hear what he said. Mr. Murdoch told me he thought it would depreciate the value, but he was not going to come here to give evidence.
638. Still, he made the statement privately that it would depreciate your property? He did not tell me privately; it was in Council business. I asked him why they were going to give away the rights in the street when my property was there.
639. Have you any recollection of paying me a visit on this matter? Yes.
640. Do you remember what I told you? Yes, I remember what you said.
641. Was this the substance of what I told you—that I would pass no opinion about the matter, as I was likely to be Chairman of the Committee, but that I would hear the evidence, and if you could prove your case I would fight for the substantiation of your claim and your obtaining damages? Well, a gentleman sent me to you; I do not think you were very well pleased at my calling on you. I had to go outside of Balmain to introduce my petition.
642. You heard Mr. Dingwall give evidence here the other day? I did.
643. When he denied the statement you made just now? Yes; but people deny statements, and tell falsehoods. Mr. Franki said here that he told me I tried to blackmail him. He never said such a thing.
644. *Mr. Rich.*] You are the owner of other property in Balmain? Yes.
645. You live in your own house? My husband has property in Mort-street.
646. *Mr. Nicholson.*] Did I understand you to say you borrowed money for the express purpose of building on the Mort-street site of your property? Yes, before I got the title. What money I had, £700, was sunk in this allotment of land. Mr. Arthur Dowling was very angry with me for doing it without consulting him, as he knew the debentures on the Dock property were for seven years. He said, "You have done a very foolish thing. You have laid out £600, and you have no security."
647. You were prevented from building owing to the action of the Mort's Dock and Engineering Company? Yes.
648. Have you ever been in business? No, but my husband goes to sea, and I have had to do all the business in the house, acting as his agent.

- F. Rodger.
30 Nov., 1898.
649. You are satisfied in your own mind that the deviation and the formation of a new street will depreciate the value of your property? I am quite sure of it. I appealed to the House to preserve my rights, and it is a proof that there is depreciation when my petition was granted.
650. *Mr. Rigg.*] Did you apply for your deed before you borrowed this £500? Mr. Franki told me he would give me the deeds if I bought the three.
651. You made no formal application? Mr. Dowling did.
652. Did Mr. Dowling make application for the deed? Yes.
653. Was he refused? Yes.
654. For what reason? They did not answer the letter to Mr. Dowling. Mr. Dowling said I had better go away and see if Mr. Franki could fulfil his promise. This was after Mr. Franki came out from England, and he said, "You built while I was in England." He said he could not do it. I said, "You know you promised," and he said, "We cannot do it; Mr. Dowling knows there are debentures over the property."
655. Is it not a fact that you bought under certain terms and conditions? Yes.
656. Certain instalments had to be paid within a given time? Yes.
657. Was the time up when you borrowed this £500? No; it was only a promise Mr. Franki had given me.
658. Does the bulk of the traffic at present go along Mort-street? Yes.
659. How many persons go along Trouton-street at the present time, as compared with the number of persons who go along Mort-street? I really could not say; but I know there are a great number. The better class of people live on that side.
660. In your opinion, do as many people go along Trouton-street at present as along Mort-street? No; that is only a little narrow lane.
661. Would there be half the number? I suppose there might be half the number. The greater portion of the public go up towards Curtis-road and Short-street.
662. Would that be up towards Cameron-street? It is higher up, just a little above the Dock.
663. *Chairman.*] You said just now you had to go outside Balmain to lodge your petition;—did you make any request to me to lodge the petition? No, I did not; but I was told you would not do it.
664. You were only told; you were not told by me? No.
665. You visited Mr. Brunker about this matter? I wrote to Mr. Brunker, and I wrote to the Colonial Treasurer too.
666. Are you aware that, in regard to this very petition, it was I who moved, as Member for the district, that you be heard? No.
667. *Mr. Rich.*] Did you actually borrow that money to build, or did a friend offer to lend it to you? It was all arranged.
668. But you had not actually borrowed the £500? I had borrowed the money.
669. Had you the money in the Bank then? Waiting for the deeds. Mr. Dowling was doing the business.
670. Money had not passed; there was no mortgage; merely someone had expressed their willingness to lend you the money? Yes, to build a coffee palace.
671. You knew the conditions of sale when you bought the land? Yes.
672. Was not one of the conditions of sale that the deed would pass to you as soon as you paid the purchase-money? No; there was trouble about that.
673. Was not one of the conditions of sale that the purchase-money should be payable in instalments? Yes.
674. And those instalments extended over some years? Seven years.
675. *Mr. Kelynack.*] Was this arrangement about borrowing the money before the agitation for the closing of the road? Yes, some four or five years ago.
676. That would be before the Mort's Dock people moved to have this deviation made? This present deviation—yes.
677. *Mr. Nicholson.*] What damage do you estimate you will suffer from the change of thoroughfare? I could not really tell you.
678. You have not arrived at any definite conclusion? No; all I know is that it will take the traffic quite another way; it will go along Thames-street.
679. *Mr. Rich.*] You did not name £1,000 to anybody as the amount you wanted? This property cost me £1,100.
680. Did you ask for £1,000 compensation? No, I never asked for any compensation. Mr. Arthur Dowling said to me —
681. He was your solicitor? He was until I found he was related to Mr. Mort, and I had to get someone else.
682. Did you name a sum which you thought was compensation you ought to receive? Not one farthing.
683. What sum do you think you are entitled to receive? I have no idea.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MORT'S DOCK AND ENGINEERING COMPANY (LIMITED) BILL.

(PETITION FROM FLORA RODGER, OF MORT-STREET, BALMAIN, AGAINST.)

Received by the Legislative Assembly, 18 October, 1898.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of Flora Rodger, wife of James Rodger, of number seventy-two Mort-street, Balmain, near Sydney, in the Colony of New South Wales, engineer,—

RESPECTFULLY SHOWETH:—

1. That your Petitioner is the owner in fee-simple of a parcel of land situate at Balmain, near Sydney, in the Colony of New South Wales, which said land has a frontage of thirty-three feet to Mort-street in Balmain aforesaid, and is situated about fifty yards from the foot of Mort-street aforesaid, where the terminus wharf of the Balmain Steam Ferry Company, Limited (in liquidation), at Mort's Dock is situated.

2. That Mort-street aforesaid is the only street or thoroughfare in Balmain which leads to the said terminus wharf, and all passengers and traffic to and from the said terminus wharf pass the said land of your Petitioner, situate in Mort-street aforesaid.

3. That a Bill, intituled a Bill "to enable Mort's Dock and Engineering Company (Limited) to close portions of certain streets at Mort Bay, in the Borough of Balmain, being a portion of College-street and the north-east end of Mort-street, and to establish a new street in lieu thereof, and for other purposes in connection therewith," has been introduced into your Honorable House, which said Bill has been, or is about to be, read a first time, and has been, or is about to be, referred to a Select Committee of your Honorable House for consideration and report.

4. That the said Bill, if passed, would empower the Mort's Dock and Engineering Company (Limited) to close Mort-street aforesaid from a point between your Petitioner's land and the said terminus wharf to the said terminus wharf, and would empower the said company to prevent all persons whomsoever from using the said terminus wharf.

5. That the erection of a wharf and waiting-room at the foot of Thames-street in Balmain aforesaid in lieu of the wharf at Mort-street aforesaid, as provided by the said Bill, will cause almost all the traffic which now passes from the said terminus wharf at Mort-street aforesaid and past the said land of your Petitioner to be diverted and pass up Thames-street aforesaid and away from the said land of your Petitioner.

6. That the forming, making, and completion as a road or street of the piece or parcel of land described in Schedule A to the said Bill will not prevent the divergence of the traffic above-mentioned.

7. That by reason of the traffic which now passes from the said terminus wharf at Mort-street aforesaid, up Mort-street aforesaid, and past the said land of your Petitioner, the said land of your Petitioner has a value as a business site; and that if such traffic is diverted, as it will be if the said Bill is passed, the value of the said land of your Petitioner as a business site will be utterly destroyed and the value of the said land will be greatly depreciated.

8. That the said Bill makes no provision for compensating your Petitioner for the loss which she will incur if the said Bill is passed, and the powers and rights thereby conferred are exercised by the said Company; but that on the other hand the said Bill if passed would absolutely debar your Petitioner from obtaining compensation for any loss incurred by her in the event of the exercise of the said Company of the powers and rights thereby conferred on the said Company.

Your Petitioner therefore humbly prays,—

1. That your Honorable House will be pleased to reject the said Bill; or, in the alternative, that your Honorable House will amend the said Bill so as to provide for the compensation by the said Company of your Petitioner for any loss which may be incurred by your Petitioner in the event of the exercise by the said Company of the powers and rights conferred on the said Company by the said Bill.
2. That your Honorable House will not proceed with the said Bill until your Petitioner may be given leave to appear, and has appeared, by counsel or attorney before the Select Committee of your Honorable House appointed to consider and report upon the said Bill, for the purpose of tendering such evidence and calling such witnesses as may be desirable as your Petitioner may be advised.
3. That your Petitioner may have such further or other relief as the circumstances of the case may require, and as to your Honorable House may seem meet.

And your Petitioner, as in duty bound, will ever pray.

Dated the seventeenth day of October in the year of our Lord one thousand eight hundred and ninety-eight.

FLORA RODGER.

VOTES No. 46. TUESDAY, 6 DECEMBER, 1898.

6. ILLAWARRA HARBOUR AND LAND CORPORATION ACT FURTHER AMENDMENT BILL:—Mr. Donaldson presented a Petition from A. Armstrong, Managing Director of the Illawarra Harbour and Land Corporation (Limited), stating that on the 20th December, 1890, the said Corporation was empowered by Act of Parliament to form and maintain an entrance and passage between the South Pacific Ocean and the waters of Lake Illawarra, and to construct, maintain, and in certain respects control a harbour within the waters of the said lake, to make, establish, and control wharfage and shipping accommodation therewith, and to construct and work a line of railway to connect with the said harbour, and to reclaim, purchase, take, and occupy, and otherwise acquire land on certain terms, provided that the said harbour and channel should be commenced within two years, and be made and completed for the admission of certain vessels within the term of seven years from the passing of the Act referred to; that, by the Illawarra Harbour and Land Corporation Act Amendment Act of 1895, the time mentioned in the Principal Act for the completion of the harbour and entrance was extended for a further period of one year from the 20th December, 1897; that the Corporation has already expended £44,312 16s. 9d., under the provisions of the Statute, upon surveys, plans, and works in connection with the construction of the said harbour, and in a line of railway connecting the said lake with the Ocean Colliery; that the said Corporation has introduced a Bill before your Honorable House to further extend the time for the completion of the works, which Bill has been before a Select Committee of the Legislative Council, which has taken evidence and carefully deliberated thereon; that such Bill has been referred to a Select Committee of the Legislative Assembly; and praying that leave may be granted to the Corporation aforesaid to be represented by its legal advisers at and during the sittings of such Committee, and also that the said Corporation may be represented before the Bar of this Honorable Assembly during further discussion upon the Bill.
- Petition received.

11. ILLAWARRA HARBOUR AND LAND CORPORATION ACT FURTHER AMENDMENT BILL:—
- (1.) Mr. Ferguson (*by consent*) moved, without Notice, That the Select Committee on this Bill have leave to bring up a Special Report.
- Question put and passed.
- (2.) Whereupon Mr. Ferguson, as Chairman, brought up a Special Report from the Committee, which was read by the Clerk, by direction of Mr. Deputy-Speaker, as follows:—
- The Select Committee of the Legislative Assembly, for whose consideration and report was referred, on 2nd December, 1898, a.m., the “Illawarra Harbour and Land Corporation Act Further Amendment Bill,” and to whom was granted on the same date “leave to sit during any adjournment of this House,” have the honor to report the following resolution:—
- “That the Chairman report the question to the House as to whether Mr. Neild is eligible to sit on “the Committee in accordance with Standing Order 348.”
- No. 1 Committee Room, Legislative Assembly,
5th December, 1898.

WM. J. FERGUSON,
Chairman.

Referred by Sessional Order to the Printing Committee.

- (3.) Mr. Neild, as a matter of *Privilege*, moved, That Mr. Neild, the Honorable Member for Paddington, be discharged from further attendance upon the Select Committee sitting upon the Illawarra Harbour and Land Corporation Act Further Amendment Bill.
Debate ensued.
Question put and passed.
- (4.) Mr. Ferguson (*by consent*) moved, without Notice, That Mr. Wise and Mr. Lyne be discharged from attendance upon the said Committee.
Question put and passed.
- (5.) Mr. Ferguson (*by consent*) moved, without Notice, That Mr. Cohen, Mr. Cann, Mr. Ashton, and Mr. Waddell be added to the said Committee.
Question put and passed.

VOTES NO. 47. WEDNESDAY, 7 DECEMBER, 1898.

- G. ILLAWARRA HARBOUR AND LAND CORPORATION ACT FURTHER AMENDMENT BILL (*Formal Motion*):—
Mr. Donaldson moved, pursuant to Notice, That the prayer of the Petition of the Managing Director of the Illawarra Harbour and Land Corporation (Limited), presented to this House on the 6th December, 1898, for leave to be represented before the Select Committee and at the Bar of the House during the proceedings on the Illawarra Harbour and Land Corporation Act Further Amendment Bill, be granted.
Question put, and voices given,—Mr. Deputy-Speaker stated his opinion that the *Ayes* had it.
Whereupon Division called for, and Mr. Deputy-Speaker having, in accordance with Standing Order No. 213, directed the members to take their seats to the right and left of the Chair respectively, declared the determination of the House to be in the *affirmative*, as there were only four Members in the minority who had challenged his decision.
The following are the names of the Members in the minority, viz.:—Mr. Pyers, Mr. Macdonald, Mr. Edden, and Mr. Thomas Brown.

VOTES NO. 49. TUESDAY, 13 DECEMBER, 1898.

12. ILLAWARRA HARBOUR AND LAND CORPORATION ACT FURTHER AMENDMENT BILL:—Mr. Ferguson, as Chairman, brought up the Report from, and laid upon the Table the Minutes of Proceedings of, and Evidence taken before the Select Committee for whose consideration and report this Bill was referred on 1st December, 1898; together with a copy of the Bill as agreed to by the Committee.
Referred by Sessional Order to the Printing Committee.
Mr. Ferguson then moved, That the Bill be read a second time To-morrow.
Question put passed.

(SECOND SESSION.)

ILLAWARRA HARBOUR AND LAND CORPORATION ACT FURTHER
AMENDMENT BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, to whom was referred on 2nd December, 1898, a.m., for consideration and report, the "*Illawarra Harbour and Land Corporation Act Further Amendment Bill*," and to whom was granted on the same date "*leave to sit during any adjournment of this House*," and on 6th December, 1898, "*leave to bring up a Special Report*," and to whom was referred on 7th December, 1898, a *Petition from Andrew Armstrong, Managing Director of the Illawarra Harbour and Land Corporation (Limited), praying for leave to be represented by its legal advisers at, and during the sittings of the Committee*,—beg to report to your Honorable House :—

That they have examined the witnesses named in the List* (whose * See List p. 1 evidence will be found appended hereto), and considered the Bill referred, in which it was not deemed necessary to make any amendment.

Your Committee now beg to lay before your Honorable House the Bill without amendment.

WM. J. FERGUSON,
Chairman.

No. 1 Committee Room, Legislative Assembly,
13th December, 1898.

PROCEEDINGS OF THE COMMITTEE.

MONDAY, 5 DECEMBER, 1898.

MEMBERS PRESENT:—

Mr. Archibald Campbell,	Mr. Carroll,
Mr. Ferguson,	Mr. Haynes,
Mr. Lyne,	Mr. Neild,
Mr. Sleath,	Mr. Wise.

Entry from Votes and Proceedings appointing the Committee, and granting leave to sit during any adjournment of this House, *read* by the Clerk.

Mr. Sleath moved,—“That Mr. Ferguson be Chairman of this Committee.”

Mr. Neild moved,—“That Mr. Wise be Chairman of this Committee.”

Question proposed by Mr. Sleath,—“That Mr. Ferguson be Chairman of this Committee. Committee divided.

Ayes.	No.
Mr. Sleath,	Mr. Neild.
Mr. Archibald Campbell,	
Mr. Carroll,	
Mr. Haynes.	

And so it was resolved in the affirmative (Messrs. Wise and Ferguson not voting).

Mr. Neild moved,—“That the Press be admitted to the sittings of the Committee.”

The Chairman ruled the motion out of order.

Mr. Neild having moved,—“That, under Standing Order No. 364, strangers be admitted to the sittings of the Committee,”—

Mr. Sleath referred to Standing Order No. 348, and called attention to Mr. Neild's presence on the Committee, and contended that he was personally interested in the inquiry.

Mr. Neild contended that the House, having appointed him with a knowledge of the facts as to his personal interest, it was not competent for this Committee to order his withdrawal; and therefore he intended to remain.

Mr. Sleath moved,—“That this Committee adjourn till Wednesday morning at 11 a.m., and that the Chairman report the question to the House as to whether Mr. Neild is eligible to sit on the Committee in accordance with Standing Order 348.”

Mr. Neild intimated that, with a view to facilitate the inquiry, he would take no part in the proceedings pending the settlement of the questions raised.

Mr. Sleath pressing his motion,—

Question put,—

Committee divided.

Ayes.	Noes.
Mr. Archibald Campbell,	Mr. Carroll,
Mr. Haynes,	Mr. Wise.
Mr. Sleath.	

And so it was resolved in the affirmative.

[Committee adjourned accordingly until Wednesday next at *Eleven o'clock*.]

WEDNESDAY, 7 DECEMBER, 1898.

MEMBERS PRESENT:—

Mr. Ferguson in the Chair.

Mr. Cann,	Mr. Carroll,
Mr. Cohen,	Mr. Archibald Campbell,
Mr. Nicholson,	Mr. Sleath.

Entries from Votes and Proceedings in reference to the discharge of Messrs. Neild, Lyne, and Wise from attendance upon, and the appointment of Messrs. Cohen, Cann, Ashton, and Waddell to the Committee, *read* by the Clerk.

[Adjourned till To-morrow at *Eleven o'clock*.]

THURSDAY, 8 DECEMBER, 1898.

MEMBERS PRESENT:—

Mr. Ferguson in the Chair.

Mr. Ashton,	Mr. Archibald Campbell,
Mr. Cann,	Mr. Carroll,
Mr. Cohen,	Mr. Nicholson,
Mr. Sleath,	Mr. Waddell.

Entry from Votes and Proceedings, referring the Petition of Andrew Armstrong, the Managing Director of the Illawarra Harbour and Land Corporation (Limited) to the Committee,—*read* by the Clerk.

Messrs. E. P. Simpson and W. H. Moseley (*Solicitors*) appeared on behalf of the Illawarra Harbour and Land Corporation (Limited).

Robert

Robert Matteson Vaughn (*Civil Engineer*) called in, sworn, and examined.
 Witness produced conveyance, W. R. Styles and others and R. M. Vaughn to T. A. de Wolf.
 Witness withdrew.
 Thomas Andrew de Wolf (*a Director of the Illawarra Harbour and Land Corporation, Limited*)
 called in, sworn, and examined.
 Witness withdrew.

[Adjourned till To-morrow at *Eleven* o'clock.]

FRIDAY, 9 DECEMBER, 1898.

MEMBERS PRESENT:—

Mr. Ferguson in the Chair.
 Mr. Ashton, | Mr. Archibald Campbell,
 Mr. Cann, | Mr. Carroll,
 Mr. Nicholson. | Mr. Sleath,
 Mr. Waddell.

Messrs. E. P. Simpson and W. H. Moseley (*Solicitors*) appeared on behalf of the Illawarra
 Harbour and Land Corporation (Limited).
 Ernest Ludwig Adolph Weinberg (*General Manager of the Smelting Company of Australia*) called
 in, sworn, and examined.
 Witness withdrew.

[Adjourned till Monday next, at *Eleven* o'clock.]

MONDAY, 12 DECEMBER, 1898.

MEMBERS PRESENT:—

Mr. Ferguson in the Chair.
 Mr. Ashton, | Mr. Archibald Campbell,
 Mr. Cann, | Mr. Cohen,
 Mr. Carroll, | Mr. Sleath,
 Mr. Waddell.

Messrs. E. P. Simpson and W. H. Moseley (*Solicitors*) appeared on behalf of the Illawarra
 Harbour and Land Corporation (Limited).
 Thomas Andrew de Wolf recalled and further examined.
 Witness withdrew.
 Walter Andrew Harper (*Civil Engineer*) called in, sworn, and examined.
 Witness withdrew.
 Andrew Armstrong (*Managing Director of the Illawarra Harbour and Land Corporation, Limited*)
 called in, sworn, and examined.
 Witness withdrew.
 John Randall Carey called in, sworn, and examined.
 Witness withdrew.

[Adjourned till Tomorrow at *Eleven* o'clock.]

TUESDAY, 13 DECEMBER, 1898.

MEMBERS PRESENT:—

Mr. Ferguson in the Chair.
 Mr. Ashton, | Mr. Archibald Campbell,
 Mr. Cann, | Mr. Carroll,
 Mr. Cohen, | Mr. Haynes,
 Mr. Nicholson, | Mr. Sleath.

Messrs. E. P. Simpson and W. H. Moseley (*Solicitors*) appeared on behalf of the Illawarra
 Harbour and Land Corporation (Limited).
 Alfred Hugh Beresford Conroy called in, sworn, and examined.
 Witness withdrew.
 William Robert Styles called in, sworn, and examined.
 Witness withdrew.
 Thomas Andrew de Wolf recalled and further examined.
 Witness withdrew.
 Bill considered.
 Clauses 1 to 5 read and *agreed* to.
 Preamble read and *agreed* to.
 Title read and *agreed* to.
 Chairman to report the Bill without amendment to the House.

LIST OF WITNESSES.

	PAGE.
Armstrong, A.	28
Carey, J. R.	35
Conroy, A. H. B.	40
De Wolf, T. A.	4, 21, 42
Harper, W. A.	25
Styles, W. R.	41
Vaughn, R. M.	1
Weinberg, E. L. A.	14

1898.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

ILLAWARRA HARBOUR AND LAND CORPORATION ACT
FURTHER AMENDMENT BILL.

THURSDAY, 8 DECEMBER, 1898.

Present:—

Mr. ASHTON,
Mr. ARCHIBALD CAMPBELL,
Mr. CANN,
Mr. CARROLL,Mr. COHEN,
Mr. NICHOLSON,
Mr. SLEATH,
Mr. WADDELL.

W. J. FERGUSON, Esq., IN THE CHAIR.

Mr. E. P. Simpson (of Messrs. Johnson, Minter, Simpson, & Co.) and Mr. W. H. Mosley appeared on behalf of the Illawarra Harbour and Land Corporation.

Robert Matteson Vaughn sworn and examined:—

1. *Mr. Simpson.*] What is your occupation? Civil engineer.
2. I believe that, with Mr. Styles, you were the owner of some land which formed the subject of a sale to the Illawarra Harbour and Land Corporation? Yes.
3. What interest had Mr. Styles in that land and how were you associated with him in the matter? In the first place, Mr. Styles informed me casually that he owned some land at Lake Illawarra, or in the mountains at the back of Lake Illawarra. I thought something could be done with it. I took up two blocks at the back of that coal land, with the view, at the time, of forming a company. I endeavoured to get the Government to make a harbour at Lake Illawarra, or at Kembla—I did not care which—but I was not successful. They declined to spend any money whatever there. Then I heard afterwards that a syndicate owned this land at Lake Illawarra, and I put myself into communication with them, and it resulted in my selling this land to the syndicate.
4. At what price? £8,160.
5. Was there not other land, and was not the total price £25,000? £25,000 for the whole.
6. I asked you to refer to the whole of the land? I made a mistake—it was £25,000.
7. Is this document [*produced*] a conveyance from yourself and Mr. Styles? It was from myself. Mr. Styles was not in it. I made the sale to Mr. de Wolf myself.
8. Is not the purchase money in this deed mentioned as £25,000? Yes. I put in the conveyance.
9. You mention the price as £25,000; but, in addition, were not shares in the company allotted to yourself and Mr. Styles? There were four syndicate shares of £4,000 each allotted to us.
10. What did the land actually cost you? About £8,500.
11. So that the difference between £8,500 and £25,000 represented profit? Yes.
12. Did Mr. Styles participate in that profit? He did.

R. M. Vaughn.
8 Dec., 1898.

- R.M. Vaughn. 13. To what extent? Equally with myself.
 14. So that Mr. Styles in reality made a handsome profit by the transaction? He did.
 8 Dec., 1898. 15. Did Mr. Styles himself put anything into the purchase? Not a shilling.
 16. Can you tell me whether or not he was in a position to have done so at that time? I am sure that he was not, from this fact: that I lent him £50 before there was anything said about selling the land or joining the syndicate. I lent it to him on his promissory note, and I have it now. I subsequently lent him other sums.
 17. Having nothing, he risked nothing, and made a handsome profit out of the transaction? Yes; that is the fact.
 18. *Chairman.*] I believe you are a partner of Mr. Styles? In some things I was—in some coal lands at Illawarra. We took some of the coal lands up together—that is, at the back of the range.
 19. I mean the property which was sold to Mr. de Wolf;—were you partners in that property? No, we were not. I bought that myself, and I am the only one responsible for dealing with it. I sold it personally to de Wolf, and for bringing the property under my notice I gave Styles two syndicate shares—the same as myself.
 20. You say that both of you were partners in this land—that you took it up together? Yes; there was freehold and some leasehold land. Two blocks were taken in his name and one in my own. I purchased personally the 400 odd acres of freehold land, and transferred it to the company.
 21. Was not Mr. Styles interested in that as well as yourself? Yes.
 22. Did you not sell it afterwards to de Wolf with Styles' consent? I did not.
 23. This document shows a sale from you to de Wolf;—must not Styles have been a part-owner, or he would not have given you power of attorney? No; Styles was a partner among the original holders—some six or seven of them—from whom I purchased it, and Styles was not in it at all. But afterwards I transferred two syndicate shares to him. That was the whole transaction from the beginning to the end. He received his shares in the company when it was formed, and I suppose he has them yet, if he has not disposed of them. He had the same number of shares as I had.
 24. Did not Styles sell to de Wolf the two coal properties? No; I sold them.
 25. Is that what they call the Ocean Colliery? Yes; I sold them. Styles would have to transfer his 640 acres, of course, it being in his name; but all the balance was in my name. It was my own transaction with de Wolf. I was legally responsible for anything that occurred, and Styles was not.
 26. Was Styles aware of this sale between you and de Wolf? Yes.
 27. Did you do it with his consent? Yes; he did not make any objection.
 28. Did he know about it? Certainly; he knew every step of it.
 29. *Mr. Simpson.*] Did you distribute a share of the profit on the transaction with Styles? Yes.
 30. Part of it was in cash, and the other part was in shares? Yes.
 31. *Chairman.*] The balance of the purchase money was by mortgage? Yes.
 32. Has that ever been paid? Yes.
 33. Did Styles receive it? Styles was not the mortgagee; he had nothing to do with it. He received his share of it.
 34. Did he receive his share of the mortgage? He received as much as I did.
 35. Were not these shares of Styles' afterwards forfeited? I do not know; I believe a call was made of £10 a share, but what was done with regard to Styles' shares I do not know. I was a director for some time; but at this time, when the call was made, I had left the company. I was not a director any more, so I could not tell. I do not know what transactions took place between Styles and the company after I was director.
 36. You say the balance of the purchase money has been paid? Yes.
 37. To you? And to Styles, too; he received it. I do not understand what allegations Styles has made.
 38. I am not talking about any allegations he has made; I am only asking you the question; he has not been here? Styles has been fully paid his share of the transaction.
 39. By you? Yes.
 40. And the full amount, the balance of the purchase money, has been all paid? Yes.
 41. *Mr. Cohen.*] Is this a conveyance purporting to be made by Styles and others on the one part, and you on the other part, and Mr. de Wolf as purchaser;—you had agreed to purchase this property from Styles and other people for £8,160? Yes.
 42. You had not completed that agreement;—de Wolf, after he purchased, paid Styles and the other people £8,160? That was to save expense; that is correct.
 43. That £8,160 was paid to Styles, Hughes, Cope, Gallagher, and Hitchcock? Yes; they were the original holders.
 44. When was the £16,840 paid? At various dates.
 45. It was paid subsequently? Yes.
 46. That was paid to you? Yes.
 47. Who participated in that £16,840 besides yourself? Styles received his share.
 48. Did Styles receive half of this? Yes; it only amounted to £12,000.
 49. There was £25,000 in all; what became of the balance? I was not expecting to be called here to give evidence when I left home, and I have not brought accounts with me; I am only speaking from memory. There were four syndicate shares of £4,000, and that would make £16,000.
 50. Then you got no cash? No cash; but these shares.
 51. You got £12,480 and four shares? Yes. Styles had two of those shares and £6,000.
 52. *Chairman.*] Styles owned some land there before you took up the two blocks? Yes.
 53. You took up two blocks, and the whole lot—Styles' and your own—were sold to the company? Yes.
 54. What was the land you bought from these people? Some farming land on the face of the cliff where the coal crops out.
 55. That includes the original property Styles had down there? Yes; that is the property. It was a dairy farm originally.
 56. Then Styles got £8,000, and you only got £6,000? About that. I cannot state the exact amount without referring to my books.
 57. The shares were £4,000 each, paid up to £1,000? Yes.

R. M. Vaughn.
8 Dec., 1898.

58. *Mr. Campbell.*] How much cash passed between you and Styles? I could not explain that without my books.
59. *Mr. Simpson.*] Was it all cash excepting these shares? Yes
60. You spoke of the company;—did you mean Mr. de Wolf? The Illawarra Harbour and Land Corporation.
61. And when you speak of Mr. de Wolf, do you mean that company? Yes.
62. According to your showing, Mr. Styles made a profit? Yes; a big profit too.
63. The syndicate shares were £1,000 each? £4,000 each, but paid up to £1,000.
64. *Chairman.*] Are you on the Board of Directors of this company now? No.
65. Have you any connection with it? Only as a shareholder.
66. Do you know anything about this Lake Illawarra scheme, bar being a shareholder? I know a great deal about it for the last thirty-five years. I know the district well.
67. Do you know the whole of the transactions of this company from the start? Yes.
68. In whose name is the first deed? What deed do you refer to?
69. The first transactions with this as a company at all? Transactions with me?
70. Not necessarily;—you said you sold to de Wolf? I sold through Mr. Armstrong, who was a land agent at that time.
71. There was an agreement with Thompson, Armstrong, Newton, and others? They were all connected with it in some way; I cannot explain it.
72. You do not know all the transfers? No; if I knew them I would be glad to state them, but I do not.
73. *Mr. Cohen.*] Are you interested in the smelting works? No; I am interested indirectly.
74. *Chairman.*] Do you think it necessary for the Smelting Company to have this harbour in order to carry on their operations successfully? I think so.
75. Have they not carried them on so far without it? It would make a great difference to the cost of treating ores if they had the harbour with a railway running up to the smelting works.
76. Do you think the Harbour Company would make any profit out of this harbour if they had it? I can scarcely say. I do not think it would be a very large profit. I do not know much about maritime matters.
77. You do not know whether it would be of any use to them if it were constructed? It would be to the Smelting Company.
78. But that is not the company asking for it—it is the Harbour Company which is asking for it? I think a trade would be made there.
79. In what way? In the way of bringing in ores or merchandise, and sending away coal.
80. Do you not think that the Port Kembla scheme would be just as good as this one, as far as sending away coal is concerned? I do not know that my opinion would be worth much in comparing the two.
81. Do you think that if they had the Port Kembla scheme, looking at it from the Smelting Company's point of view, there would be any necessity for having the other scheme? I think there would be a necessity for opening the lake.
82. What for? For traffic.
83. I mean if the Port Kembla scheme were carried out, would not the Smelting Company have their outlet there? They have an outlet now by Wollongong or Sydney, but you must remember the cost.
84. But the Kembla scheme is different;—if it were constructed, would it not be as useful to the company as the other scheme? I think not.
85. Why? Because in the Illawarra scheme they propose to make a railway, so that the ores could be unloaded from the trucks and carried right up into the works for treatment. That is only a short distance, but the other would be a long, round-about way from Port Kembla, and would of necessity be more expensive.
86. When this company was originally formed did they anticipate that they were going to make a profit out of the Illawarra harbour works? Undoubtedly.
87. From the harbour itself, I mean? Yes.
88. That was to be a source of profit? Yes.
89. But Mr. de Wolf says no? I always understood it was so. To my mind it was.
90. *Mr. Carroll.*] Do you still hold two shares in the original company? Yes.
91. Do you hold any other interest in the Lake Illawarra Company? No.
92. Have any calls been made upon them? There was a call of £10 made, but I do not know much about it.
93. Did you pay the calls? No.
94. Are your shares still good in the company? Yes.
95. Did not the original company go into liquidation, or go broke? No.
96. The original company is still good? Yes. It is the only company, I think, that has held its own and paid everybody 20s. in the £ since the financial crisis.
97. *Chairman.*] You say you still hold shares on which a call has been made, and which you have not yet paid, and that the shares still hold good? Yes.
98. And that other shares upon which a call was made were forfeited for non-payment? I do not know of any.
99. Were you a director when that call was made? Yes; but I left just immediately afterwards.
100. You were a director when the call was made? Yes.
101. And the call was made on shares which you held, and which you did not pay, but they still hold good? Yes. I may mention that Mr. Styles held his shares as well.
102. *Mr. Cohen.*] How many original shares were in it? Sixty.
103. *Chairman.*] But were not Mr. Styles' shares forfeited? Not that I am aware of.
104. But you were a director? But I have explained that I left the company immediately after the call was made. I do not know what was done afterwards.
105. Who were the directors at the time the call was made? Armstrong, de Wolf, and myself. There were so many changes made that I cannot tell exactly who the others were.
106. You do not know whether Styles' shares were forfeited or not? Not to my knowledge.
107. Do you know whether Carey's shares were forfeited for calls,—do you? I do not know.
108. You do not know anything about any of them? No; not since I left the directorate.

- R.M. Vaughn. 109. *Mr. Campbell.*] Was there a call made all round on the shareholders? Yes; the call was made on all the shares.
- 8 Dec., 1898. 110. Do you know the locality well? Yes.
111. Do you know the position of the smelting works? Yes.
112. Do you know the way by tramway that you get from the smelting works to the lake? Yes.
113. What is the distance from the smelting works by that tramway to the edge of the lake? I should think about 2 miles.
114. What is the distance across the lake, and out into the deep water of the ocean? About 5 miles.
115. That would be 7 miles altogether? Yes.
116. So that in reality at present the smelting works are situated 2 miles from the lake? Yes; but I presume the railway would be made across to connect the two lines, and so shorten the distance to about $1\frac{1}{2}$ mile to the lake.
117. Still the smelting works is that distance from the lake, even if it were made a harbour? They would be that distance from the water.
118. So that in any case, even assuming the harbour were made, the ore would have to be conveyed 2 miles or $1\frac{1}{2}$ mile? One and a half mile.
119. What is the distance across the lake to meet the channel, and into deep water in the ocean? Seven miles altogether.
120. What is the distance by a railway between the smelting works and Port Kembla—that is, by a direct line of railway that could be made? I cannot answer that question, because I never looked at it. I do not think that it would be much shorter, if any, than the present line. I think it is about 13 miles from Port Kembla.
121. No, I was assuming that the channel is made through the lake, and out into the ocean for vessels, it would be between 6 and 7 miles between the smelting works and the deep water in the ocean? Yes.
122. From your knowledge of the locality, do you not think it is just about the same distance by railway or tramway that could be made along the edge of the lake between the smelting works and Port Kembla? I cannot tell the distance. No doubt a line could be made there, but I do not know the distance.
123. *Mr. Carroll.*] Were your shares such that calls could be made on them, or were they fully paid up? No; calls could be made on the shares.

Thomas Andrew de Wolf sworn and examined:—

- T.A. de Wolf. 124. *Mr. Simpson.*] I propose to ask you to give a short history of this Illawarra Harbour and Land Corporation right from the formation of the syndicate; this Committee will then have before them a full knowledge of all the circumstances relating to the scheme and all the events which have happened subsequently? I shall be very pleased to give any information. I told the Select Committee of the Upper House that anything they wanted to know I would tell them, but there were certain things which I considered not judicious to publish; I did not want to have them published in the Parliamentary papers. This business was started by me in the year 1888. The Lakelands property was brought under my notice with the idea of purchase for subdivision into farms.
- 8 Dec., 1898. 125. You mean the freehold estate of Mr. P. H. Osborne? Yes, of 2,920 acres. I then formed the idea of making a harbour down on the South Coast in connection with the coal trade. I decided to buy that property, and at the same time a property was submitted to me known as the Ocean Coal Property, consisting of 265 acres of freehold, and I think there were two permits attached to it belonging to Mr. Vaughn. I decided to buy this, and I paid a deposit. It is a long time ago, but I think it was £1,000 I paid on the one, and £500 on the other. However, I am not quite certain. I then went down to Melbourne, and I met Mr. Fink, of the Mercantile Finance Company, who was operating very largely on landed properties at the time, and I put the scheme before him. I had made some previous inquiries as to the feasibility of a harbour being made there. I had sent engineers down at my own expense, and was satisfied that we could make a harbour there. I put the business before Mr. Fink, and told him what I was doing. He agreed to join me in the purchase of properties, which he did. Mr. Armstrong was also connected with us in the purchase of the properties. We three then became responsible for the purchase money of these properties; that was £90,000.
126. *Chairman.*] What year was that in? In 1888, about June.
127. *Mr. Simpson.*] Will you explain how that purchase money was paid? I think it would be best to let me say how the things occurred. When I was down in Melbourne at that time I met Mr. John Newton. He was one of the owners of the Lakelands Estate, and I told him that I intended to form this syndicate, and that by making a harbour the property would become more valuable. I told him I had agreed to purchase the property, and had paid my deposit. He then said he would take up a share in the syndicate. That was a syndicate of £240,000 of sixty shares of £4,000 each, of which £3,000 was paid up, and the other £1,000 was to remain uncalled for a time. Mr. Newton took his share. On my return to Sydney I found that Mr. Armstrong had sold a portion of one of his shares to Mr. Friend, a personal friend of his. I think the price paid for it was £1,000, on the same basis. That was all the money that was paid into this thing originally for the purchase of these properties, outside of Fink, Armstrong, and de Wolf.
128. I think you have not explained that at that time Osborne had sold the property to a syndicate? Yes.
129. And you were really negotiating with the syndicate who had purchased the property from Osborne? If I mentioned Osborne's name it was a mistake. It was a syndicate with which I had no connection which had purchased the property some years previously from Osborne.
130. And who owed Osborne a certain amount on the purchase? As far as we were concerned, we took it over with a mortgage of £30,000 to Mr. P. H. Osborne. Then the members of the syndicate decided—of course, they could not carry on their business as a syndicate—that they would register themselves into a company, and at that time people's ideas of the values of properties and lands were very large. Mr. Fink, of Melbourne, was the principal shareholder in this syndicate, and he fixed the figures at the price at which we formed the company. We agreed, of course, to this. It was, perhaps, a mistake to make the capital so large, but in those times we had a great idea of the value of the property, and properties were rising in value. But nobody came into this company, nor ever put one shilling into it. We simply formed ourselves into a company; we took payment in shares, £500,000 paid up in shares with a liability of £500,000.

131. *Mr. Cohen.*] What was the capital of the company then? The nominal capital was £1,600,000; £1,000,000 of shares were issued to the members of the syndicate, paid up to £50 a share, the idea then being that we should take upon ourselves a further liability of £500,000. Whoever would hold those would have to take that liability as a security to the debenture holders—that is to say, whatever money we put into the properties would be security together with our personal securities. T. A. de Wolf.
8 Dec., 1898.

132. *Mr. Simpson.*] Do I understand that the company took over the liabilities of the syndicate as well? They took them over as well. The company was liable to the syndicate for £100,000, which represented the price paid for the property and the expenses, which I will show you presently.

133. So the company really owed the syndicate £100,000? Yes; for which they were to have possession of all the land, and all the work done up to that time.

134. *Chairman.*] The syndicate at that time were yourself and Fink? And Armstrong, Friend, and Newton, and afterwards Vaughn and Stiles. That brings us up to the registration of the company. I may mention now that for all the expenditure that has been made in connection with this company, nobody connected with the company that I know of, has ever received one shilling from the sale of a share, or in any way whatever, except that Mr. Stiles borrowed money on his share. But no other person connected with the company has done anything but pay out the whole time. There have been no receipts of money in any way—that is, for ten years. The company owed the syndicate £100,000. They were not in a position to pay that money, although the company practically consisted of the syndicate and their friends, and the thing was allowed to run along. No calls were made on the company for some years. The whole of the expenses of the company were found either by Fink, Armstrong, or myself from time to time. Interest on mortgages, the expenses of the office, surveys, and other very heavy expenses had to be incurred. In regard to the transfer of the property, I may say that up to that time the contract for the purchase of the property was between the original vendors and myself, I buying in the first instance, and taking the risk of the purchase. The company not having been in a position to pay me off, the property still remained in my name. It was necessary then at that time to find some more money for the company; and Mr. Fink and the Mercantile Finance Company, who were then financing the company, and finding a good deal of money for the company, requested that the property should be put in Fink's name instead of my name, as I held it as trustee for the company. I agreed, and the property was transferred to Fink as trustee for the company for the sum of 10s.—a nominal consideration.

135. But before you got to that, before the transfer from you to Fink, there was another transfer, was there not? No.

136. Was there not one to Champion, Armstrong, and Newton? No; they were the trustees for the syndicate. We had trustees for the syndicate, and trustees for the company.

137. There were two or three agreements, one after the other—there was another one in 1890? They were only agreements. Well, during all that time we were finding that our expenses were very heavy. We had spent a great deal of money, and this money at last was being found by the Mercantile Finance Company, and they insisted that we should make a start with the harbour works, which we did. We let a contract to Brand and Dryborough, but we had the power to determine the contract. The Mercantile Company at that time were very strong, and stated that they were prepared to carry out the whole of the works. We had offers at that time to the effect that if we would give up to them a portion of our interest in the company, they would find the whole of the money. It was some time early in 1894 that the Mercantile Finance Company suspended payment, and they left the company then with a considerable amount of indebtedness, and with this contract to Brand and Dryborough on hand; and they were unable to pay anything. Everybody knows, I think, the awful smash-up that occurred at that time, and the company that was supposed to be worth millions was absolutely unable to pay anything at all. We were, therefore, left in that position of having to carry on the thing ourselves.

138. You got to the point of the transfer from yourself to Fink,—do you know anything of a transfer from Fink to Wallach Bros? It was a little previous to that.

139. You got to 1894, but this was before 1894? Fink arranged with Wallach Bros., who were really Fink himself, to advance certain moneys for expenses and so on. He gave them a lien on the property.

140. That was done the same day as the transfer to Fink? About that time.

141. Then there was a conveyance in 1894 to the A.J.S. Bank? It was through the Joint Stock Bank that Fink obtained this money from Wallach Bros.

142. *Mr. Simpson.*] You might explain how the estate got back to the company? I decided then to go to England, as I found the Mercantile Finance Company had gone smash, and to raise money in England to put the company in a sound position, and bring in fresh blood. I arranged with Mr. Osborne, who was anxious to get the land put under Torrens' title, that he should give me, I think, six months to pay off the mortgages, so that the property would return to the company. It never had been in the company's name up to that time. Mr. Osborne, who is a personal friend of mine, said he would give me I think it was six months. I went to England, and I remitted promptly portion of the mortgage money, and finally remitted him the balance, and the property was clear of all encumbrances.

143. The conveyance was made from the Bank to Osborne? Yes.

144. For £300? Well, that was only the equity.

145. When you went to England, that was the position? There was a heavy mortgage on the property, and for a nominal sum the A.J.S. Bank transferred the security which Fink had given to Wallach Bros.

146. And then the mortgage of discharge came back in the company's name? In the company's name. In fact that was the first time it had ever got into the company's name.

147. You have not mentioned the actual purchase money which passed between the purchasers—that is to say, the syndicate—and the syndicate who bought from Mr. Osborne;—what was the total amount of the purchase money? I purchased the Lakelands property for £65,000. That money has all been paid. In addition to that, there has been a very large amount of money paid in Bank charges, interest, legal charges, and other expenses. The whole of that £65,000 has been paid in cash, and the deeds are here to show that that has been paid, and paid in cash. As to the other property, the Ocean Coal property, the deeds show that we paid £25,000; but out of that Vaughn and Styles received £12,000 in syndicate shares the same as we received. So that made £13,000 in cash which I paid to Vaughn, and £65,000 which I paid for the Lakeland Estate. That is £78,000 I have paid off in hard cash besides expenses.

T. A. de Wolf. At this stage, Mr. Chairman, I propose to put in an abstract of the deeds which relate to these transactions, and which show the considerations. The deeds themselves are here, but as they are original documents, I hope the Committee will be content with the abstract. Abstract of deeds put in as follows:—

8 Dec., 1898.

Abstract of the Title of the Illawarra Harbour and Land Corporation (Ltd.) to land at Dapto, known as the Lakelands Estate.

11 September, 1888.

By indenture of conveyance of this date, made between Edward Percy Simpson and James Thomas Atchison of the first part, the Illawarra Lakeland Company (Ltd.) of the second part, and Thos. Andrew de Wolf of the third part.

Reciting mortgage to P. H. Osborne, dated 12th May, 1888, registered 707, Book 341, in the sum of £35,000; and reciting payment of the sum of £5,000 of the principal of the said mortgage on the 1st May, 1887.

And reciting that E. P. Simpson and A. J. Atchison were trustees for the Illawarra Lakeland Company (Ltd.); and reciting agreement for sale for the sum of £35,000, subject to the said mortgage of P. H. Osborne.

It was witnessed that in consideration of the sum of £35,000 paid, &c., the receipt, &c., they, the said E. P. Simpson and J. T. Atchison did grant, bargain, sell, release, and convey unto the said T. A. de Wolf and his heirs.

All the land described in the schedule thereto, together with all houses, &c., and all the estate.

To have and to hold the same with the appurtenances unto, and to the use of the said T. A. de Wolf, his heirs and assigns for ever, subject to the said indenture of mortgage.

Usual covenants from vendors.

Schedule.

All the Lakelands Estate as therein described, containing 2,920 acres or thereabouts; duly executed and attested; receipt for consideration moneys signed and witnessed; registered No. 725, Book 3999.

By indenture of mortgage of this date made between the said T. A. de Wolf of the one part, and the Illawarra Lakeland Company (Ltd.) of the other part.

Reciting the payment of £1,000.

It was witnessed that in consideration of the sum of £25,000 paid, &c., the receipt, &c., he, the said T. A. de Wolf did grant, bargain, sell, alien, release, and convey unto the said mortgagee and its assigns.

All the land described in the lastly abstracted indenture; together with all houses, &c., and all the estate.

To have and to hold the same with the appurtenances unto and to the use of the said mortgagee, subject to redemption as therein mentioned.

Proviso for redemption: Usual mortgage covenants.

Duly executed and attested; receipt for consideration money signed and witnessed; registered No. 725, Book 399.

27 August, 1888.

By indenture of reconveyance of this date, endorsed on the hereinbefore abstracted indenture of mortgage, all the lands mentioned therein were reconveyed unto, and to the use of the said T. A. de Wolf, his heirs, and assigns, for ever.

Duly executed and attested; receipt for consideration money signed and witnessed; registered.

29 July, 1892.

By indenture of conveyance of this date, made between the said T. A. de Wolf of the one part and Benjamin Josman Fink of the other part.

Reciting sundry dealings between the said T. A. de Wolf and A. Armstrong, and the mortgagees.

It was witnessed that in consideration of 10s. by the said B. J. Fink, paid, &c., the receipt, &c., he, the said T. A. de Wolf, did grant, bargain, sell, alien, release, and convey unto the said B. J. Fink and his heirs, all the lands described in the hereinbefore abstracted indenture, together with all houses, &c.; and all the estate, &c.

29 July, 1892.

By indenture of mortgage of this date, made between the said B. J. Fink of the one part, and Wallach Bros., therein called mortgagees, of the other part; reciting that a certain promissory note had been made by Messrs. T. A. de Wolf and A. Armstrong, dated on the 9th April, 1890, in the sum of £8,920, due four months after date in favour of the said B. J. Fink, and by him endorsed to Wallach Bros., and by them discounted at the A. J. S. Bank at the request of the said B. J. Fink, and on his undertaking to give a mortgage over the Lakelands property to secure the payment of the same; and reciting that the said promissory note had not been paid, and with discounts, now amounted to £12,663 10s. 11d.

It was witnessed that in consideration of the said sum of £12,663 10s. 11d., and of £5,160 paid, &c., the receipt, &c., he, the said B. J. Fink, did grant, bargain, sell, alien, release, and convey unto the said Wallach Bros., and their assigns, all the land described in the hereinbefore abstracted indentures, together with all houses, &c.; and all the estate, &c.

To have and to hold the same with the appurtenances unto, and to the use of the said Wallach Bros. and their assigns, subject to the proviso for redemption therein contained.

Usual mortgage covenants; powers of sale in case of default, &c.

Duly executed and attested; receipt for consideration money signed and witnessed; registered 5th August, 1892, No. 777, Book 495.

29 July, 1892.

By indenture of mortgage of this date, made between the said Wallach Bros. (Ltd.) of the one part, and the A. J. S. Bank of the other part; reciting that the said Bank had commenced proceedings against the said T. A. de Wolf and A. Armstrong, in respect of the said promissory note, but had agreed to stay the same at the request of the said Wallach Bros.; and also to advance a sum of £5,160, to be paid to P. H. Osborne, in reduction of the principal and interest due under the hereinbefore recited mortgage of the 12th May, 1886.

It was witnessed that the said Wallach Bros. (Ltd.), did in consideration of the premise, assign unto the said A. J. S. Bank, all that the principal sum of £17,823 10s. 6d., and all interest, &c.; and it was further witnessed that in consideration, &c., the said Wallach Bros. (Ltd.), did grant, bargain, sell, alien, release, and confirm the said A. J. S. Bank and its assigns; all the land described in the hereinbefore abstracted indentures, together with all houses, &c.; and all the estate, &c.

To have and to hold the same with the appurtenances unto, and to the use of the said bank and its assigns, subject to the proviso for redemption therein contained.

Usual mortgage covenants, with full powers of sale in case of default, &c.

Duly executed and attested; receipt for consideration money signed and witnessed; registered, 5th August, 1892; No. 778, Book 495.

4 April, 1894.

By indenture of conveyance of this date made between the said A.J.S. Bank of the first part, Francis Adams of the second part, the A.J.S. Bank (Ltd.) of the third part, and Henry Osborne of the fourth part.

Reciting conveyance of the 1st May, 1886, from P. H. Osborne of the first part, Jas. Thos. Atchison of the second part, Ed. Percy Simpson of the third part, J. T. Atchison of the fourth part, and Sydney A. Want (therein called trustee) of the fourth part.

And reciting mortgage, dated the 12th May, 1886, the said E. P. Simpson and J. T. Atchison of the one part and P. H. Osborne of the other part; and reciting conveyance, dated 11th September, 1888, between the said E. P. Simpson and J. T. Atchison of the first part, the Illawarra Lakeland Company (Ltd.) of the second part, and the said T. A. de Wolf of the third part; and reciting mortgage, dated 11th September, 1888, the said T. A. de Wolf of the first part and the Illawarra Lakeland Company (Ltd.) of the other part; and reciting discharge of the said mortgage, dated 27th August, 1889; and reciting conveyance hereinbefore abstracted, dated 29th July, 1892; and reciting mortgage hereinbefore abstracted, dated July, 1892; and reciting mortgage hereinbefore abstracted, dated 29th July, 1892. (Wallach Bros., Ltd. to the A.J.S. Bank).

And reciting order of the Supreme Court in Equity, dated the 15th June, 1893, for winding up the said A.J.S. Bank, and the appointment of the said F. Adams to be the Official Liquidator thereof; and reciting an agreement made between the said F. Adams, as Official Liquidator of the said A.J.S. Bank, of the first part, the said A.J.S. Bank of the second part, and the A.J.S. Bank (Ltd.) of the third part, that all the assets of the A.J.S. Bank should become in Equity vested in the A.J.S. Bank (Ltd.).

And

And reciting that a demand had been made upon B. J. Fink, personally, on the 20th August, 1893. And reciting that a demand had been made upon Wallach Bros. (Ltd.) on the 21st August, 1893; and reciting that the principal sum and interest was now due and owing; and reciting agreement between the said A.J.S. Bank (Ltd.) and H. Osborne for the sale to him of the equity of redemption for £300, subject to the mortgage of 12th May, 1886. T. A. de Wolf. 8 Dec., 1898.

It was witnessed that in pursuance, &c., and in consideration of the sum of £300 paid cash, the receipt, &c., the A.J.S. Bank, by direction of F. Adams, as Official Liquidator, and at the request of the A.J.S. Bank (Ltd.), did grant, bargain, sell, and alien, release, and convey, and the said A.J.S. Bank (Ltd.) did grant and confirm unto the said H. Osborne and his heirs all the land described in the hereinbefore abstracted indenture, together with all houses, &c., and all the estate, &c.; to have and to hold the same with the appurtenances unto and to the use of the said H. Osborne, his heirs, and assigns for ever, subject to the thereinbefore recited indenture of mortgage of 12th May, 1886; covenants by the A.J.S. Bank (Ltd.) and F. Adams, that they had not encumbered.

Duly executed and attested; receipt for consideration money signed and witnessed; registered, 18th April, 1894; No. 73, Book 535.

The property was brought under the provision of the Real Property Act, and certificated title issued to H. Osborne, No. 1,159, fol. 101. The following endorsements appear on this certificate of title:—14th July, 1894, mortgage H. Osborne to P. H. Osborne; 3rd July, 1895, transfer H. Osborne to the Camden Syndicate of 500 acres; 3rd July, 1895, transfer H. Osborne to the Illawarra Harbour and Land Corporation, 2,410 acres; 3rd July, 1895, transfer H. Osborne to P. H. Osborne of 10 acres, promised to the Dapto Agricultural Society.

Certificate of title to the Illawarra Harbour and Land Corporation (Ltd.) of 2,410 acres as transferees from H. Osborne, vol. 1,117, fol. 87. Endorsements thereon:—2nd July, 1895, mortgage, the Illawarra Harbour and Land Corporation to P. H. Osborne; 28th March, 1896, discharge of above mortgage; 27th December, 1895, mortgage to R. A. Moss; 28th March, 1896, discharge of above mortgage.

Certificate of a title to the Illawarra Harbour and Land Corporation (Ltd.), 2,399 acres 1 rood 39 perches. Endorsements thereon:—18th December, 1896, caveat; 27th May, 1897, withdrawal of caveat; 2nd July, 1895, mortgage to P. H. Osborne; 23rd December, 1896, discharge of above mortgage; 27th December, 1895, mortgage to R. Amos; 23rd December, 1896, discharge of above mortgage; 23rd December, 1896, mortgage to R. Amos; 18th October, 1896, transfer of above mortgage from Amos to Union Bank (Ltd.); 8th June, 1898, mortgage to the Smelting Company of Australia (Ltd.) and to the Camden Exploration Company (Ltd.).

Note that the promissory note referred to in the hereinbefore abstracted indentures of 29th July, 1892, was duly taken up and paid by Messrs. de Wolf and Armstrong on 18th April, 1896.

148-9. *Chairman.*] Well, you went to England? Yes.

150. For the company? For the company. I remitted them sufficient money to relieve the company from all responsibilities at that time. They owned the properties without any encumbrance whatever. After that we decided to construct a railway.

151. *Mr. Simpson.*] Before you go on to that, was the contract cancelled which was originally let, on the strength of the Mercantile Finance Co. finding the money? Yes; we cancelled that, and paid the contractors. While I was in England we arranged with Robert Amos to construct this railway in anticipation of our floating debentures. I refer now to the audited balance-sheet of the company, a copy of which I can put in if necessary. I would like to emphasise this—that we have expended on harbour construction £3,503 15s. These accounts have from time to time been audited; I think it is by Christie and Murray, the company's auditors here. They have had vouchers during these years for all the different forms of expenditure.

152. Is that Mr. Christie the municipal auditor? I think so. I think he has always been the auditor of the company. We expended on the railway £41,008 5s. 1d., and we have paid £10,000 to the Government.

153. That is as a deposit? As a deposit in connection with this harbour scheme. We have paid out in legal expenses £4,279 18s. 10d. That would cover stamp duties and other expenses of that kind. We have paid on debentures—London charges, £3,101 6s. 9d.; on surveys, £516; general expenses, engineering, salaries, &c., for the ten years, £13,485. These amounts, including the actual cash which we have paid for our land, amount to £154,350. In addition to that, our interest and bank charges have amounted to £49,229. £78,000 in actual cash I put for the land, with no share business about it. The total of those two sums amounts to £203,579. That is the position of the company.

154. *Chairman.*] Those are the expenses of the company? That is the cash expenditure in connection with the syndicate and the company.

155. From the purchase of the land right down to now? Yes.

156. *Mr. Campbell.*] Does that include the branch line to the smelting works? No.

157. *Mr. Simpson.*] Now the Committee would like to know the circumstances relating to the formation of the company in London—of the two companies? When I arrived in London and met financial people there they absolutely refused to lend any money whatever to a company solely managed in Sydney; and, on the advice of my friends in London, I registered this company in London, with a London directory.

158. You cannot get a quotation for shares in the market unless it is so? They want to have some control over the debenture money. They are tired of lending debenture moneys to companies out here. They will have their trustees appointed in London, who will have the money absolutely under their control.

159. *Mr. Sleath.*] Was it an entirely new company that you floated in London, or were you simply establishing the head office in London? Well, you know the Sydney company, of course, is the head company, because it holds the concession and it holds the land. No cash passed between them, and no sales of shares were made whatever until afterwards, when I got some of my friends to take up preference shares in the company; but the company was registered in London, to enable us to issue debentures to finance the Sydney company; and to do that the Sydney shareholders received shares in the London company. No money passed in any way. The only money which passed was £1,000, which it cost me to register the company.

160. *Chairman.*] Practically, the London company was made up of friends of yours you had given shares to? No; they were men who paid their cash.

161. *Mr. Simpson.*] To what extent did the shareholders in the London company pay actual cash for their shares? They paid £20,000. I will be glad to give you, if you like, the names of some of the men who are preference shareholders there, because it has been stated that we have no men of standing. It cannot be denied that we started this company with great hopes and expectations, and trusted a great deal to Melbourne at the time we formed the company; but we were left on our own resources when the Mercantile Finance Co. and all the Melbourne people failed, and we have had to carry the burden on our own shoulders; but we have done so, and we are in a perfectly sound position. The whole of our indebtedness

is

- T. A. de Wolf. is represented by a portion of the cost of the railway. We owe nothing on our lands; we have them all free. We have our colliery free, and our railways are bringing us in now, although we are only using a portion of the line, a nice revenue, which is growing every year. These are the names of some of the shareholders who have found the £20,000 of preference shares:—Mr. Keswick, of Jardine, Matheson, & Co.; Mr. Arthur Wilson, of Wilson & Co. of Hull; Mr. Walter Saville, of Shaw, Saville, & Co.; Mr. John Fleming, of Robertson, Fleming, & Co.; the Smelting Company of Australia; the Camden Exploration Company; the Calderwood Syndicate; Mr. George Inglis; Mr. T. H. Haynes; and Mr. George Bush. These are all men of very high standing in London.
- 8 Dec., 1898.
162. *Chairman.*] Did these men buy their shares? They bought them.
163. The whole of them? The whole of them. Yes. I made an issue of £20,000 preference shares to be taken up at par.
164. *Mr. Simpson.*] And the cash so contributed for these shares was remitted to this company, and applied by this company in liquidating its debts? Yes.
165. *Mr. Sleath.*] I have not quite got the hang of this London company yet;—were these 20,000 shares issued in London—did they constitute the whole of the London company? Oh, no; the London company took over 9,970 shares, paid up to £60 each.
166. The company sold 9,970 shares, and they received in return for that the same number of shares in the London company? Yes.
167. What were they paid up to, and what was the actual cash paid? £10 shares, paid up to £10.
168. *Mr. Simpson.*] They became fully paid up when the cash was paid? Yes.
169. *Chairman.*] And there are 9,970 shares issued there? No; the shares issued are £600,000. There are 598,270 £1 shares issued in London paid up to that. They took over 598,200 £1 shares in the Sydney company—an equivalent amount, except £70 in shares which were taken by the seven subscribers of £10 each who had to take shares.
170. How many shares are there altogether now in the London company? 59,827 and 2,000 preference shares.
171. And the Sydney company? It is a different nominal amount, paid to £60. The others are £10 shares, but the sterling amount is the same, with the exception of the preference shares which have been issued.
172. There are 10,000 shares in the Sydney company? There were 10,000 shares. Thirty shares are kept here, because, according to the law, you must have about thirty shares to keep your company alive.
173. So, practically, you only transferred these shares to London? To the London register; that is all.
174. It is only like forming a London office for your company? That is all.
175. It is not practically another company? It is the same.
176. It was a company of 10,000 shares, and you transferred 9,970 to London? Yes.
177. Just with a difference in the amount of face value? Yes. At the same time, this company has £75,000 of preference shares to issue, of which they have issued £20,000; so they still have £55,000 of preference shares to issue in case we want any money.
178. *Mr. Sleath.*] And that is what I have never been able to understand:—as a matter of fact, the London company was simply formed for the purpose of taking over a portion of the shares of the Sydney company, just to enable you to register in London? And to obtain our debenture money.
179. *Mr. Ashton.*] Due to the fact that the Act precluded the alienation of your rights? We could not transfer the right to an English company.
180. All you could do was to transfer shares? Yes.
181. *Mr. Cohen.*] You had to form another company, practically? To get on the London register. We had no idea of doing this until we met with the refusal of the people to lend debenture money.
182. *Mr. Sleath.*] To all intents and purposes; they are one and the same company? Yes.
183. Each holding shares, only that thirty shares of the Sydney company have been kept here to practically keep the company alive;—had it not been necessary to do that, no doubt you would have transferred the lot? We would have transferred the lot.
184. And made a new issue? Yes; and the old company would have been wiped out. The business of the company here now is not, as a matter of fact, controlled by any directors in Sydney. It is controlled by the London Board.
185. The directors here are merely nominal directors? That is all.
186. *Chairman.*] And who are the representatives in Sydney? There are Mr. Armstrong, Mr. Neild, and Mr. Chippendall.
187. *Mr. Sleath.*] Who represents the London company here—those gentlemen too? Yes; for the present. We have practically done nothing. We have paid off our debts, and have got ourselves into a position to offer security for the issue of debentures. When that is done the London company take charge of the expenditure of the money, and of course the money is placed in the hands of trustees in London, who see to the proper administration of it.
188. *Mr. Campbell.*] The difference between the £60 shares in this country and the £10 shares in England, is that £50 is considered paid up in this Colony, without any cash at all, and £10 makes it £60? I do not quite understand the question.
189. I understood you to explain it this way: In this country you reckon that £50 is paid up and £10 in cash; that made £60; well, there has been no cash paid up for the £50—it is only considered paid; it is the £10 added to the £50 that makes the £60; that makes the corresponding £10 in England? The Sydney company have a nominal amount of £598,000 paid up.
190. But I am speaking about the amount of shares—the £60 and the £10 shares; you say the English shares are £10 each; £10 added to the £50 makes its £60; so it is practically that £10 without the £50 in England? Oh, no.
191. *Mr. Sleath.*] The shares were increased in number when the London company was formed? Yes.
192. Instead of having 10,000 shares, you really have 100,000, and the difference is that each share held in Sydney represents ten of the shares held in London? As a matter of fact, the position shortly is this: If this work is gone on with the company here must let its works, and be responsible for them. Now, under this arrangement, they have power to call on the London company to find £400,000.
193. *Mr. Simpson.*] It is practically calling on the same shareholders? Yes. This company here, if it incurs debts, has the power to call on the London company up to £400,000 on its uncalled share capital. This has been well thought out as security for the debenture-holders.
- 194.

194. Some doubt has arisen as to whether the deposit in this matter has been paid in cash to the Crown? T. A. de Wolf.
All I know is that we sent it out in cash.
195. Are you a director of the Smelting Company? Yes.
196. When the site for the Smelting Company was selected, was it selected having regard to the fact that this harbour would probably be constructed? Certainly. They had all the plans placed before them, and they had copies of our Bill.
197. Then, can I take it that the Smelting Company would never have been located in the present position if they thought the harbour scheme would not be carried through? It certainly would not. I was instrumental in forming the Smelting Company, and I can certainly say that we would never have dreamed of putting up the works if it had not been so.
198. *Chairman.*] The Smelting Company was an off-shoot from this syndicate? No; it was always perfectly independent.
199. But after the syndicate purchased this land, you sold portion of it to the Smelting Company? Yes.
200. What price did they give for it, if it is a fair question? £20,000; but I can hardly say that, because it was not sold direct to the Smelting Company. There were a great many other things that were included, a lot of other things that I put in. We put down the land nominally at £20,000.
201. Were you a director of the Smelting Company at the time of the sale? No. We did not sell to the Smelting Company, we sold to the Camden Exploration Company.
202. Were you a director of that company? Well, it was part of the formation of the company.
203. Was it the Camden Exploration Company; how does it come into this;—was it a separate company? A separate company. I formed this company when I went to London. It was formed for many purposes. We bought mines in this Colony and worked them.
204. They are on the London directory of this Lake scheme? Yes; they are shareholders. They are a finance company, with a capital of £200,000.
205. Did not this Camden syndicate buy some land from you people? They bought 500 acres.
206. This is the land that you disposed of to Fluk, and that he disposed of to Osborne? It is the same land, which always belonged to the company.
207. The Camden company was before the Smelting Company? Yes.
208. How much did they pay for it? We put it down at £20,000; but there were other things that were connected with it.
- 208½. *Mr. Simpson.*] Were there not a number of patent rights? Yes.
209. *Chairman.*] The 500 acres was part of this original land? Yes.
210. Well, that really belonged to the Illawarra scheme, did it not? Yes.
211. And you were a director of the Illawarra scheme? Yes.
212. And you sold it to the Camden syndicate? Yes; the Illawarra Harbour Company, of course, receiving the purchase-money.
213. And you, as director of the Illawarra company, allowed that company to pay £2,000 for land which they had already paid you for? I do not quite understand.
214. This company had paid you for the land, had they not;—you were one of the original vendors to the Illawarra Harbour Company? Yes.
215. Then you sold it to the Camden syndicate? Sold 500 acres of it—yes, on account of the Illawarra Harbour Company, not on my own account.
216. *Mr. Cohen.*] But you did not receive any of that yourself? No.
217. *Mr. Sleath.*] Then the Smelting Company bought from the Camden Exploration Company? They bought 300 acres of land.
218. Do you know what they gave for that? There was no particular price for that. There were a number of things sold to them. A number of other things were included in the one purchase.
219. *Mr. Carrill.*] What were the other things? There were patent rights; but I really do not think I should be asked to tell. Anything about my own business I do not mind telling, but I do not think I should be asked to tell other people's business.
220. *Mr. Sleath.*] 500 acres were sold to the Camden company, for which they nominally paid £20,000; did they pay that £20,000 in cash? They did.
221. There were 300 acres sold by the Camden company to the Smelting Company? Yes.
222. Now, if there were a million and one things included in a sale of that sort, the 300 acres of land would certainly be put down as representing a certain portion of the money to be paid for the whole. I do not want anything outside the land; only the land? Well, I really cannot tell you. I would tell you, but I really cannot call to mind whether that was included in a certain series. In fact, I am pretty sure it was. There was a sale to the Smelting Company of a series of things, including agreements and other things, for a lump sum. As far as I can remember, it was one lump sum for the lot.
223. *Mr. Simpson.*] The colliery was included? The lease of the Ocean Colliery, agreements for purchase of coal, the Lewis Ponds Mines and several other mines, and some rights in respect of one of the islands in the Mediterranean.
224. *Mr. Sleath.*] Did they pay for those 300 acres in cash, or in shares? They paid for them in shares. As far as the Illawarra company is concerned, I made an out-and-out sale of certain things. I should have received the cash myself, but I said, "I want money for the Illawarra Harbour, so put down the land at £20,000." I gave the Illawarra Harbour Company the benefit of the deal. All the money I got they got. I took shares for the other things I sold. We know that £20,000 for this land is a very big price. The Illawarra company did not actually receive that amount, but because I have been largely interested in this company, I said, "I will sell you so much; I want £20,000 cash, and that shall go to the Illawarra company. I will take shares in your company for the other things that you will get from me," and that was done.
225. *Chairman.*] When you went home to England this land was mortgaged to Osborne? Yes.
226. You financed the mortgage in London, and paid him back? Yes, for the company.
227. Do you know whether Amos the contractor paid this mortgage? No, he did not.
228. Did your people pay it? Yes; to Osborne. This balance-sheet shows that the only mortgage that Mr. Amos has is for £34,402 15s.
229. What was that for? That was on account of the railway, which cost us £41,000.

- T. A. de Wolf. 230. *Mr. Sleath.*] So you paid for the railway principally with debentures? No; we owe Amos £34,000; that is all we owe.
- 8 Dec., 1898. 231. Then he held debentures for that? No; he holds a charge on the property.
232. *Chairman.*] Is not the whole of that property mortgaged to Amos to secure his advance? The railway and one of the properties are.
233. And is not that assigned to the Union Bank? We only know Amos in the matter.
234. Well, he holds the first mortgage? Yes; but you must understand that that represents £7,000 less than the cost of the railway.
235. Still his mortgage is over it all? Yes; it is only a nominal thing.
236. *Mr. Cohen.*] You bought the property from Mr. Vaughn for £25,000? Yes.
237. You paid £8,160 to Styles and three other people? We paid £13,000 cash as far as I know. According to the deeds, as far as I have seen them, the original purchase money for this land was £5,000.
238. Here is a conveyance from Styles and three other people of the one part, Robert Vaughn of the other part, and yourself of another part. That recites an agreement between these people to sell to Vaughn certain property for £8,160, and it is contracted by you to purchase for £25,000. You pay £8,160 of that down, and instead of Vaughn paying to these people, you take over Vaughn's interest and pay it to these four people, and they receive that money? I do not know how it was done. I know I paid £13,000.
239. I understood Mr. Vaughn to say that he had got from you £12,840 cash; and that the four shares were £4,000 cash, of which £1,000 was paid up? No; he must have meant £1,000 liability.
240. The £12,000 paid up on the shares, plus the £13,000, made the £25,000? Yes. Mr. Mosely has deeds showing that originally they bought that land for £5,000, and they stuck us for £13,000 cash.
241. You paid £8,160 at the time of the conveyance? I do not know how it was paid, but I know we paid £13,000. If I am asked any question about Styles I want it understood that they bought this land for a small sum of money—I understand £400 cash with a mortgage. They represented they owned this land, and I agreed to buy it for £13,000 cash and £12,000 in syndicate shares. Out of that they made a profit of £8,000 cash and 12,000 syndicate shares.
242. *Chairman.*] Was the guarantee put up by the Harbour Company or the Smelting Company? Which guarantee?
243. Which is placed at the Bank? The London company arranged with the Smelting Company and the Camden company to guarantee an overdraft of £10,000, which was done.
244. Does the Smelting Company hold any other interests in this Harbour Company bar that? Yes; they own 30,000 shares.
245. Does the Camden syndicate hold any shares in it? Yes; I could not tell you exactly how much, but I think they have £2,000.
246. *Mr. Sleath.*] How were they paid for? They took a certain amount of preference shares, and I gave a bonus of ordinary shares.
247. *Chairman.*] Did not the Smelting Company advance the money to build the railway? They built their own branch railway. There is a small branch line which does not come under our Act.
248. Did they not advance this £20,000 to pay off the mortgage to Osborne? No.
249. Have not the Smelting Company got a second mortgage on this estate? Only for the £10,000. We owe nothing whatever except the amount to Amos and the £10,000 which we have deposited with the Government.
250. They have a second mortgage for the £10,000, and Amos has a first mortgage over the whole of it? No; only over Lakelands.
251. That was the original estate? We have our coal property as well, which we paid Styles and Vaughn for.
252. But as to Lakelands Estate, Amos practically holds the first mortgage? He has a mortgage for £34,000, and our expenditure on the railway has been £41,000.
253. The Smelting Company has a second mortgage for this £10,000? Yes.
254. What use is their second mortgage if the harbour is not constructed? We think our land is good, and that our railway is good. If the harbour is not constructed I suppose we will sell the land.
255. *Mr. Simpson.*] The land they have a security over, subject to Amos' mortgage, the land which was originally purchased for £65,000, the land which was purchased from Styles for £25,000, and also the railway that cost £41,000? Yes.
256. *Chairman.*] Practically, Amos owns the lot? Oh, no. I told Mr. Amos only a little while ago that if he liked to have his money paid off, and did not want to carry on the contract, I would pay him off at a fortnight's notice, but he would not take it.
257. *Mr. Simpson.*] At the present time I suppose there are a very large number of hands employed in the Smelting Company? Yes, a large number.
258. Running to over a 100? I think nearly 300.
259. Is there any contract now existing between the Smelting Company and the Broken Hill Company with reference to Broken Hill ores? Yes; we have a contract with the Broken Hill Junction Company for 16,500 tons a year of concentrates. That is, or was till lately, the whole of their output. I am Chairman of the Broken Hill Junction Company in London, and I made the contract myself.
260. One company made the contract with the other? Yes. The Smelting Company is taking 300 tons a week of their concentrates.
261. For what term? Twelve months.
262. *Mr. Carroll.*] When will it be up? I think somewhere about the beginning of next year.
263. *Mr. Simpson.*] Have these ores to come to Sydney? They are brought to Sydney from Port Pirie.
264. And then by train to Illawarra? Yes.
265. If this harbour scheme were constructed, what saving would that effect to the Smelting Company? The charges now are equivalent to from 8s. to 10s. per ton of the ore. I could explain that perhaps. It costs approximately about 4s. per ton of ore, and then 10s. per ton of lead to get it back from the works to the ship. The ores go over 60 per cent. of lead, so the total charge is equivalent to about 8s. or 10s. per ton of ore.
266. That is to say, you are handicapped to the extent of 8s. or 10s.? If we had direct shipment we would save that. On all lead ores there is a very small profit.

267. Are negotiations pending between the Smelting Company and any organisation in Noumea with reference to the transmission of ores from Noumea to the Smelting Company; if so, will you kindly explain those negotiations? It is with London companies carrying on business in Noumea. T. A. de Wolf.
8 Dec., 1898.

268. What kind of ores? Copper ores and nickel ores. My reason for coming out to Australia was that we had negotiations with these companies in London as to the treatment of their ores in Australia. At the present time they are shipping these ores to Europe, and the freight is about 35s. per ton. On inquiry we found they could get these ores down here for some 7s. or 8s. per ton, and in consequence of negotiations entered between the Smelting Company and the International companies in London I came out, and I have been to New Caledonia with Mr. Weinberg, the General Manager of the Smelting Company, to investigate their properties. The London companies are perfectly satisfied with our properties. They have had them reported on, and the facilities we have for treating their ores. When I left Noumea about a fortnight ago we had made arrangements up to a certain point, which we will have to determine in London, and the general manager is leaving Noumea by the next French boat to join me here, and to go with me to England to conclude our negotiations. I have a cable from him this week stating that he leaves by the next French boat.

269. *Mr. Sleath.*] But no contract has been entered into? No; that was said in mistake. I noticed that in the House the other night. No contract has been entered into, but we consider that the business will be settled. I may state definitely that one of the conditions made is that we have the power to make this harbour. I am not stating that with any idea of inducing the Committee to consider the thing any better, but as a matter of absolute fact. Mr. Higginson will be here in a fortnight's time, and will go on with me to England. When I left for Australia I had a cable to say the Bill had passed the second reading in the Upper House, and we all considered we would get our rights to an extension.

270. *Mr. Carroll.*] You are Chairman of the Broken Hill Junction Company? In London.

271. And you arranged that they would get this great quantity of ore to smelt? I arranged for it, but the contract was concluded in Adelaide by the Head Board.

272. Will you say that you are smelting that 300 tons a week at a profit? That is a matter of the business of the Smelting Company, which I do not think I am at liberty to disclose.

273. *Mr. Simpson.*] I think it is hardly fair to ask Mr. de Wolf for details with regard to the cost of working these ores, because there are other companies which are carrying on similar operations, and it would give them a clue to the details of the working of this company.

274. *Mr. Carroll.*] You are one of the directors, and this is a big contract that you have got;—you are just as much interested in the smelting works as you are in the Illawarra works, or in other companies, and you do not say whether you are smelting it at a profit or at a loss? Well, I have a pretty good idea.

275. You will not say—you do not care to answer? Not as far as the Smelting Company is concerned.

276. Have you sublet any of that 16,000 tons of ore? We have lately sold 4,000 tons.

277. To whom? Well, that is a question I should not like to answer. I do not think you should ask any questions connected with the business of the Smelting Company. I am not here as a director of the Smelting Company.

278. *Mr. Simpson.*] What amount of money has the Smelting Company expended on the work? Something over £200,000, besides, of course, a large working capital.

279. But as far as plant on the ground is concerned? About £200,000.

280. *Mr. Ashton.*] Would you mind saying what the determining considerations were with this Smelting Company in the choice of a site at Lake Illawarra? There were two points—one was the cheapness of coal, and the other was that they expected to get water-carriage for low-grade ores from the different colonies.

281. That was contingent on the construction of the harbour? Yes.

282. And if the harbour were not to be made, any other site inland would have suited the company as well, so long as the site was close to the sea by rail as at present? I could hardly say that, but those were the two material points, the cheapness of coal, and the advantage of having water-carriage for low-grade ores.

283. *Mr. Waddell.*] Water-carriage right to the point where the smelting would take place? Yes; the competition of these ores with Europe and with South Australian smelting works is very keen, and the profits are gauged by a very small margin per ton.

284. *Chairman.*] But in order to carry out smelting of that kind it is necessary to have lead ores? Yes; I think you must have lead.

285. *Mr. Cohen.*] Is there not sufficient lead in the ores themselves? The New South Wales ores are very deficient in lead.

286. *Mr. Campbell.*] Being a director of the Smelting Company you could explain how it was that when the company was selecting a site which would be convenient for water-carriage they did not have it immediately beside the Lake? They own the land there. The site was chosen by Mr. Howell when he came there, and it was open to him to put his works anywhere.

287. It is some distance from Tilawarra Point? There are a great many considerations in choosing a site, and one is elevation. They chose the most elevated site.

288. *Chairman.*] Did you recommend making the contract for the Junction ore? Yes.

289. I suppose you do not know anything about this Junction ore at all;—I suppose Mr. Weinberg would be the man to tell us? I am a large shareholder in the company.

290. Do you think it would pay to buy Junction ore? Well, there is nothing much in it at present.

291. *Mr. Simpson.*] I suppose it is used for fluxing with other ores? They use it for running down gold ores, but these are technical questions about which Mr. Weinberg can give information.

292. *Chairman.*] It has been represented that the harbour should be constructed for the benefit of the Smelting Company, but the Smelting Company is not asking for it? I think I can safely say, as a director of the Smelting Company, that if they do not have a harbour they will not spend any more money there.

293. But the only ores you have been getting are the Junction ores? But there are many other ores we can get if we have direct water-carriage.

294. *Mr. Waddell.*] If you do get a harbour, will the works be enlarged? I have no doubt of it.

295. *Chairman.*] You only rely on this harbour for the carriage of ore? And the shipment of bullion, lead and copper, and the general enlargement of trade. The whole London Board are convinced that with a harbour made there we shall increase these works to four or five times their present capacity.

T. A. de Wolf. 296. When Mr. Howell says that it does not much matter to the Smelting Company whether they have a harbour or not, how do you reconcile your statement with his? There are many statements of Mr. Howell which I would not like to explain.
8 Dec., 1898.

297. Mr. Howell said that before the Select Committee? I have not seen the evidence, but it is possible he may have said so.

298. That is the evidence Mr. Howell gave us at the time that he started these works;—he was the original manager of the Smelting Company's Works? Yes; I employed him to come out.

299. Well, he stated before the Select Committee that it would make no difference to the Smelting Company whether they had the harbour or not? I do not remember any evidence such as that.

300. At the time you asked for the extension of time for the completion of this work, it was stated that you had ample time to complete it with this last twelve months' extension? We asked for two years. I was in London, and all the information I got was that we were cut down to one year, and I considered that a great stumbling block in getting to work.

301. *Mr. Sleath.*] But your request was that you did not want any extension of time to complete the work, but that the only reason you asked for that extension was the fear of damage by storm or a visitation of Providence? Well, those were the reasons given out here. I suppose the people out here did not quite understand the reasons which actuated the people at Home, but as a matter of fact, the shortness of time did interfere with us very materially in starting the works. And there was another thing which interfered with us, and that was that at that time the Smelting Company had been expected to start their operations long before they did. There was a long delay in starting the operations of the Smelting Company, and there was actually no trade. It is only since the Smelting Company has been in operation that we have built up a trade.

302. But those were the representations put before the House here, and those were the representations upon which the extension was granted. So you see the House could not be held responsible if the people here who acted for you made really false representations? Well, I know they expected we would have plenty of time, but when we came to make arrangements for money, exception was taken to the shortness of time we had for completing the work.

303. *The Chairman.*] Mr. Henderson in his report says: "The railway is to be completed by 13th December next";—do you think the condition will be complied with? Most certainly.

304. Mr. Henderson in his evidence says:

The last work is to be completed by the 30th November, 1897.

Is there any earlier date for the completion of any other part of the work? Yes; the railway is to be completed by the 13th December next.

Do you think it likely that that condition will be complied with? Most certainly.

Will the works be completed within the time you ask? Yes; barring accidents, such as a spell of rough weather.

But in your opinion there is nothing but bad weather that will prevent the completion of the work by the 13th December? Nothing.

I believe we could complete the works, but you cannot induce financial people to take those risks. They say if the works are not completed within the time, the Government can take everything

305. Yes, but this was on the 13th November, 1897. Now you are asking for two years longer. You said if you had that extension the works would be completed by that time? No doubt if we had raised the money, then the works might have been completed within the time. But we explained that owing in the first place to the smelting works not having been started, and there being no trade to show people in England that there would be a revenue, and then again because of the shortness of time, we were unable to conclude our negotiations for raising money.

306. Well, you see it was on the evidence of this Select Committee that you got that extension of time, and the evidence shows that if you had that extension for twelve months the works would certainly be completed; now you are no further ahead than you were then? Oh, yes; we have a trade there now. We have our smelting works in full swing.

307. I mean as far as the construction of the harbour is concerned? Since that time we have done two things: we have completed our railway, which has taken some time, and we have also put up £10,000 deposit. By putting up that deposit we have shown our intention to proceed with these works. I have no doubt we will get the money we require, but if we fail we forfeit our £10,000, and I do not see that anybody is much the worse. That is the view I take of it.

308. In your earlier evidence you said, that, practically, the Smelting Company put up the money? But we owe it; we have to pay it.

309. But this harbour is practically for their benefit, and not for yours? We hope not.

310. Do you expect to make any profit out of it as a company? We have a large area of land. We went into this business in order to make this land valuable by starting industries. We have several industries we wish to start there. We hope to build up a township there. As far as the harbour is concerned, I would not give 2d. for it. If anybody else will make the harbour we will give the right. We do not wish to make it. We want to develop the district. If we can find employment for a large number of men, we expect to cut up our land into township lots and sell them. We will make a town there if we can. We have certainly been a long time over it, but we have put our own money into it and we have not had money out of anybody else. We have put up our deposit and we are willing still to make this harbour.

311. When you say "we" you mean the harbour people? Yes. In America if we went to the Government with a proposal of this kind they would give us a subsidy, but we have never asked the Government here for a subsidy.

312. *Mr. Ashton.*] When the last twelve months' extension was granted, and the statement was made by Mr. Henderson that the work would be completed within twelve months, I suppose if the money had been forthcoming the work would have been done? Yes.

313. But the financial people considered the time did not afford them sufficient security, and consequently they did not subscribe the money? The first objection that was raised was that the Smelting Company had not started working.

314. That is to say, the twelve months' extension did not afford them sufficient security? That is so.

315. And you position now is that if you get another two years it will afford them sufficient security and the money will be forthcoming? I have no doubt about it.

316. That is really the position on which you ground your application for extension and your explanation of the non-completion of the works during the last twelve months' extension? Yes. 317.

317. *Mr. Sleath.*] Some time in 1888 the four gentlemen composing the syndicate purchased this Lake-lands Estate of 2,940 acres? Yes. T. A. de Wolf.
318. You paid £35,000 for it? Yes, subject to a mortgage of £30,000. 8 Dec., 1898.
319. You bought it from P. H. Osborne? No, we did not buy it from P. H. Osborne; we bought from the Lakelands syndicate subject to a mortgage.
320. Were any of you interested? No.
321. Was that £35,000 paid in cash? It was paid during the twelve months, part cash, part in six months, and part in twelve months.
322. Was that £30,000 paid by you and your partners? Yes.
323. Not raised by shares? No; no shares have ever been sold.
324. And afterwards the mortgage was paid off? Yes.
325. Then in the same year you floated it into the Illawarra Harbour and Land Syndicate? Yes.
326. With a capital of £240,000? Yes.
327. When you floated it into this syndicate did you increase the number of shareholders? No; it was floated from the original syndicate shareholders. They called it £240,000 with £180,000 paid-up.
328. Nominally it was the same men that held it? Yes.
329. But did you not increase the number of shareholders? Only nominally; no money passed.
330. Was that the time when Mr. Barton became a shareholder? No.
331. What about Mr. Styles and Mr. Newton? They had syndicate shares, and these syndicate shares were turned into shares of the company with a liability. 12,000 shares was the profit made by Vaughn and Styles on the sale of the land.
332. So their interest in the syndicate was shares to the value of £12,000? Yes, four shares of £3,000 each.
333. Besides cash? Yes, they had £13,000 in actual cash.
334. With £12,000 value in shares? Four shares of £4,000 paid to £3,000, with a liability of £1,000.
335. Then, still in the same year, 1888, did the syndicate sell to the Illawarra Harbour and Land Corporation? Yes.
336. And the Illawarra Harbour and Land Corporation increased the nominal capital to £600,000? Yes.
337. Did any fresh shareholders come in then? No cash shareholders came in.
338. Was it cut up in this way—10,000 shares at £50 each? £100 each, paid to £50.
339. And £100,000 cash? Yes, that representing the cost of the properties.
340. So, you the original syndicate, that was really selling to this company were to receive £100,000 cash, and what share interest? Shares paid-up to £500,000, with a liability of £500,000.
341. So, for the property that you had given £90,000 for, you were then getting £100,000 cash and £500,000 worth of shares? Yes; as a matter of fact we never did get the cash.
342. That was what you were supposed to get? Yes.
343. If you transferred that property to Fink as trustee for the company to hand over, presumably, to the company, whenever the company was prepared to meet its obligations to the syndicate, how comes it that Fink, as trustee, mortgages this property, for which he was trustee, for nearly £9,000? At that time the company owed £100,000 on the property, and this sum of £9,000 was very much less, including the previous charges on the property, than the amount of £100,000.
344. That is so; but it seems to me strange that Mr. Fink, trading, presumably, under the name of Wallach Brothers, could mortgage this property for which he is only trustee for somewhere about £9,000? At that time, the company could not get possession of the property until they had paid £100,000. At that time they had paid nothing, and Fink was quite within his rights in raising money on it, so long as he did not exceed £100,000.
345. Fink endorsed this bill that he made in his own favour? Yes.
346. And Fink discounted it? Yes.
347. And gave some mortgaged land, is that so? Yes, I believe so.
348. That was somewhere in 1892; if we come to 1894, did the Bank then sell the land to Osborne for £300? They sold the equity.
349. And did Osborne redeem the land? Osborne was the mortgagee. I subsequently redeemed the land. He was always mortgagee for the £30,000.
350. In reality the £35,000 was paid in cash, but the other £30,000 still remained as a mortgage, is that so? Yes, the mortgage had two or three years to run.
351. The mortgagee had still the mortgage over that £30,000, and he bought the equity for £300, so in 1894 he became the owner of the land again? Well, he was the mortgagee in possession.
352. Osborne held the first mortgage, the Bank held a second mortgage, and they sold the second mortgage to Osborne for £300, then he became the final mortgagee of the lot? Well, he was only the mortgagee still. I think I am right in stating that the company agreed to that security being given to the Bank.
353. Could you tell me when Mr. Carey joined the company;—have you the share-register, first of the syndicate and then of this company? There was no share-register of the syndicate; the syndicate was not registered.
354. There was only nominally the four of you? Yes.
355. Have you the share-register of the Illawarra Land and Harbour Corporation? I think it is here. [*Articles of association produced.*]
356. If Mr. Carey signed the articles of association he must have joined the syndicate? These are the articles of the company. He was one of the first directors.
357. Did he join on the formation of the company? On the formation of the company. The company was registered on the 29th October, 1888.
358. What share interest did he hold, do you remember? Thirty shares.
359. With a face value of £100, paid up to £50? That is so.
360. Did he put in the £50 a share? He never paid a shilling.
361. Did he give any consideration for his shares? Nothing.
362. Was he holding these shares entirely in his own right, or in the interest of anyone else? Entirely in his own right.

- T. A. de Wolf. 363. I notice in these articles there is a gentleman of the name of Frederick Orr;—did he join the company at the same time as Mr. Carey? Yes, he was one of the original shareholders.
- 8 Dec., 1888. 364. What interest did he hold? He had 140 shares.
365. £100 shares paid up to £50, with a liability of £50 per share? Yes. These did not belong to him; they were my shares.
366. He was holding them for you? For me.
367. I want to see the share-register of the company when it was formed;—how many shareholders were there? I think you will find it in this list. [*Produced.*]
368. Newton is down here for twenty-six shares;—did he pay any money into the company? He was a syndicate shareholder.
369. He got shares from the first small syndicate;—there were four of you when you made it into a larger syndicate, and Newton came in and got shares then? Yes.
370. Was Cubitt in the same position? He was a partner of Mr. Newton's.
371. Wood? No; I think he was secretary, he had a few shares given to him.
372. "J. R. Carey, contractor, George-street, thirty shares";—did he join the company then? He signed the articles there, I think.
373. Did he pay any money? No.
374. What consideration did he give for his shares? He did not pay anything for them, he was made a present of them.
375. *Mr. Simpson.*] Was that in order to get him to take a seat on the Board? I suppose it must have been to qualify him.
376. *Mr. Sleath.*] "The Hon. Edmund Barton, thirty shares." Did he pay anything for them? No; Mr. Barton did not pay any cash, but he agreed to be a director and take no fees. According to the articles of association the fees were £500 per year, and it was agreed that the directors would take their fees in shares.
377. Was this book written up at the time? Certainly, that is the registered document, the signed articles of the association which must be signed at the time of the registration of the company.
378. And was Mr. Barton then a Member of the Legislative Council? He was a Member of one House, I do not know which one. The date on the certificate to the articles of association is 29th October, 1888. He is down in this book as a Member of the Legislative Council.
379. Did not Mr. Barton have charge of the first Bill? No. It was Mr. Sutherland, who had been a Minister, and who died shortly afterwards. Mr. Chapman put the Bill through.
380. Did Mr. Sutherland have any shares? No; Mr. Chapman took the matter up for Mr. Sutherland. He was a son-in-law of Mr. Sutherland, and, when Mr. Sutherland was taken ill, he carried the Bill through for us.
381. Did Mr. Chapman have any shares? No; he never had any interest.
382. "C. A. M. Billyard, thirty shares." Did he pay anything for these? No.
383. "John Black, Melbourne." Did he pay cash? No.
384. Did these gentlemen hold these entirely on their own? Some of these people had shares given to them in some cross business transactions. I do not know what they were exactly. It was simply asked that these people should have shares allotted to them.
385. As to the whole of these shares that appear on the share list, no actual cash was paid to the company for them? Not to the company.
386. Therefore when this company was floated with a capital of £600,000 the 500,000 shares were really distributed amongst the members of the syndicate? The syndicate and their friends, but those shares carried a corresponding liability. It would not be the same as getting fully paid-up shares, because a man who takes a heavy liability like that takes a big risk.
387. That being so, and as it was not intended that any money should be paid into the company, where was it expected the £100,000 should come from that you were to get in cash? From the working of the company. We intended to leave it for some time. We thought we would get to work and that our land would become valuable. It was the time of the land boom, and we expected to cut up our land and sell it at once, but we were a little bit mistaken about it. The land boom burst, and we could not do anything with the land.
388. Vaughn holds 140 shares;—does he hold them in his own right? He got them from his syndicate shares.
389. Moseley, 140 shares;—does he hold them in his own right or for any one else? He holds them for me.
390. Harper, seventy shares;—are they in his own right? No; I think he holds them for me.
391. Styles, 140 shares;—does he hold them in his own right? He got them from his syndicate shares.
392. John M'Allister Howdon, 150 shares;—did he hold those in his own right? He was a partner of Fink's. Fink had a large number of men in Melbourne who were interested with him in his syndicate shares.

FRIDAY, 9 DECEMBER, 1898.

Present:—

MR. ASHTON,
MR. CARROLL,
MR. SLEATH,

MR. WADDELL,
MR. ARCHIBALD CAMPBELL,
MR. NICHOLSON,

MR. CANN.

W. J. FERGUSON, ESQ., IN THE CHAIR.

E. P. Simpson, Esq., and W. H. Moseley, Esq., Solicitors, appeared on behalf of the Illawarra Harbour and Land Corporation.

Ernest Ludwig Adolph Weinberg, called in, sworn and examined:—

- E. L. A. Weinberg. 393. *Mr. Simpson.*] You are general manager of the Smelting Company? I am.
394. Will you tell us the amount of money the Smelting Company have expended upon their works, and which they have in their operations at the present time? Roughly speaking about £300,000.
- 9 Dec., 1898. 395. Including land, the improvements on the land, ores purchased and in transit? Yes.
396. What number of men do they employ in their works? About 200 now. 397.

397. Will you tell the Committee whether the works would have been erected upon their present site if this harbour scheme had not been contemplated? I do not think so. I understood that was the principal reason inducing the company to build the works where they are.

398. The construction of the harbour will be an important element in the future prosperity of the company? Certainly.

399. I understand that the company have now a contract for ore from Broken Hill? Yes.

400. To what extent? We have a twelve months' contract with the Junction Company for 15,600 tons.

401. How does that ore now come to your works? It is landed at Darling Harbour, trans-shipped to railway cars there, and comes down to our works by the line.

402. Supposing the harbour were constructed what saving would it effect for the company upon a contract of that kind? The ores vary; the Broken Hill concentrates are heavy lead; they contain from 60 to 65 per cent. of lead. We pay first of all 3s. 4½d. for railage. Then we pay 11d. for wharfage charges, checking, and supervision of loading. Then we have to ship the lead back again; upon the assumption that there is about 65 of lead in the ore we pay freight on a little over half. The railway freight to Sydney is now 10s. per ton on the lead. If we had a harbour I daresay we should effect a saving of about 8s. a ton.

403. So that upon this one contract alone of about 16,000 tons there would be a saving in round figures of £6,500? Yes.

404. I believe some negotiations are in progress with reference to the treatment of ore from New Caledonia? Yes. I have just returned from Noumea.

405. The construction of the harbour would form an important feature in that scheme? A very important one indeed.

406. Is it possible that that scheme might fall through in the event of the harbour not being constructed? I am afraid it would.

407. Are the company contemplating an extension of their works? Yes, some extensions are in hand now, we are building additional roasting furnaces which will be in operation in the middle of January. These furnaces will give employment to about forty-two more men.

408. Is it possible that the construction of this harbour would lead to a further extension? Yes, I am almost sure it would.

409. *Mr. Nicholson.*] Have you special rates from the Railway Commissioners for the conveyance of your ores? We do not pay the rates except upon contract ore in large quantities. Our clients pay the rates upon small parcels of ores which come to the works. We all enjoy the same privilege—that is one half-penny per ton per mile. That is the rate paid by everyone who ships ore by rail.

410. How do you reconcile that with the statement of the late manager that he had made such arrangements with the Railway Commissioners that he did not care whether the harbour were built or not? I do not think Mr. Howell realised the true position of affairs when he made that statement. The works were not then in operation. That statement was made by Mr. Howell, as far as I know, before they had purchased 1 lb. of ore at the works.

411. *Mr. Ashton.*] The fact is this—that the ores which come to your works, either from another part of the Colony or another country, could be landed at the smelting works at Illawarra cheaper if they could come all the way by sea instead of being landed in Sydney and then brought round to your works by rail? Yes.

412. In regard to the prospective Noumea contract, what you fear is that if you could not bring the ore all the way by sea you could not give enough for it to enable you to compete successfully? Yes. You must remember this, that the ore from New Caledonia will not be bagged. All the Broken Hill ore is bagged in order to prevent loss. The bulk of the New Caledonian ore is shipped in bulk, and you can understand that if this ore has to go to Darling Harbour and to be trans-shipped there, especially in a dry season like this, and then railed in other trucks down to Lake Illawarra there would be an enormous loss of weight in transit. I do not think our clients could stand it.

413. The gist of your evidence is that you could land the ore cheaper if it came all the way by sea than if the journey were broken and the ore trans-shipped at Sydney? Yes.

414. *Chairman.*] You hold a power of attorney for the company? Yes.

415. The company have so far made no contract with New Caledonia? Not yet, but Mr. Higginson will be over in about a fortnight's time to confer with me further on the subject.

416. What are the names of the persons who are urging on this contract with the smelting company for treatment of nickel ore? I am the person principally interested in it as the representative of the Smelting Company.

417. But on the other side? The company's represented by Mr. Higginson are the International companies, which are an off-shoot from the London Globe Finance Company. I suppose you know that they are greatly interested in some of the West Australian mines.

418. Have you ever had experience in the treatment of nickel ores? No practical experience.

419. At present you have no plant adapted for the treatment of those ores? No; but their treatment is so simple that any metallurgist with fair knowledge and some experience can treat them.

420. Do you, as a metallurgist, think that this contract would pay your company? Yes.

421. Are not the ores very silicious? Yes.

422. Would you refine the nickel at Dapto if you started work there? I could not say. It would depend entirely upon the development of the trade whether it would pay us to refine nickel. The refining of nickel matt. is not a very great problem.

423. You do not know the percentage of nickel in the ore? Yes, it varies from 6 to 7 per cent. The present contract with Europe for the New Caledonian nickel ore is based upon 7 per cent. They pay at present a freight of 31s. 6d. to 32s. 6d. from New Caledonia.

424. What would be the freight here? I should say that if we could bring the ores over direct in suitable steamers carrying from 2,000 to 3,000 tons of ore we could charter those steamers to bring the ore over for about 6s. a ton.

425. What is the value of nickel ore of the grade you have named in London? At present they are paying to the producers in New Caledonia 75 centimes per kilo. The purchaser has to pay the freight. As to the value in London, I should have to calculate it.

426. You still consider that ore of that grade from New Caledonia could be smelted at Dapto at a profit to you and to the producers? Certainly, at a very great profit indeed.

427.

E. L. A.
Weinberg.
9 Dec., 1898.

E. L. A.
Weinberg.
9 Dec., 1898.

427. *Mr. Ashton.*] The difference in freight as between Australia and Europe would give you a very great advantage? Yes; at the present time they pay to get 7 per cent. nickel ore home 31s. 6d. If they can get the same grade of ore over here for 6s., you can understand what an enormous saving there would be even if we concentrated here to a 50 per cent. nickel matt.

428. *Chairman.*] But your smelting charges at Dapto would be higher than at home? Not very much.

429. The balance-sheets from all the smelting works of Australia show that its costs more here. Take the one item of labour alone, there is a great difference there, then, also, as regards quantity, there is a difference? The statement you make applies principally to ores which contain heavy metal, lead ore and heavy copper ores. We have no market for these metals. We have to depend upon the home market for them, and also for the nickel; but you have to bear in mind that 7 per cent. nickel does not represent a large bulk, even if we run it only into 50 per cent. nickel matt.

430. But your contention is that the difference between the freight from New Caledonia to Dapto, and that from New Caledonia to the old country, would give you a profit? Yes.

431. As against that, you would have the extra charges for smelting and the subsequent carriage of the nickel to the Old Country for a market? Yes.

432. *Mr. Simpson.*] It is contemplated, is it not, that the ships which bring over nickel-ore to the smelting works would have a return freight in coal, which would be suitable for the treatment of some of the ore at New Caledonia? Yes. We should not charter any boats, unless they were provided with water-tanks for water ballast.

433. *Chairman.*] There will be a return freight of coal to New Caledonia? Yes. They pay at present on 7 tons 7 per cent. nickel ore—that is to get it home—£11 4s. If it came over here we should pay £2 9s. Take 7 tons of nickel ore, we could turn it into 1 ton of nickel matt. To get that home we should have to pay 25s. There would be the difference, therefore, between £3 14s. and £11 4s., namely, £7 10s., to cover profit and working charges. We do not pay any more than other people would pay for the nickel, and they must make a profit on the price paid.

434. You are presuming that the stuff will be carried at the price for which it is now carried? Yes. The freight I have named would be that arranged for a big contract.

435. How many tons of ore could you treat at the works? 4,000 tons a month to start with.

436. But you have no appliances there? That is of no consequence. If we got a contract, I would undertake to put up in six months a plant which would treat 4,000 tons monthly.

437. You calculate that you will get a shipping company to contract to bring the ore over for 6s. or 7s. a ton? I am certain of it.

438. You spoke just now of steamers carrying 2,000 or 3,000 tons, could a steamer of that size get into the harbour? I think so if there were 20 ft. of water.

439. You know that the Bill only asks for 15 ft.? Yes; I took exception to that. Fifteen feet would not do. They are going to provide more.

440. With a depth of 15 ft. of water, and with the silting up which would be likely to take place, you could not rely upon getting in boats of the size you have named? Unless that could be done it would be of no use building the harbour there, but I do not see any difficulty in it.

441. You have a contract, you say, with the Junction Company? Yes.

442. It has been in existence for some time? Yes.

443. It is for lead concentrates? Yes.

444. Lead is a necessity in smelting operations? Yes.

445. Whether it pays you to smelt or not, you would have to have lead? Not always; you can use copper.

446. For silver-smelting? For silver-smelting.

447. Did you ever do any silver smelting without a lead flux? Yes; I have done silver smelting with copper.

448. In bulk? Yes.

449. Does it pay you as well as lead? It depends entirely on the circumstances.

450. Is it not always the practice to have lead ore if it is possible to get it? I have been connected with work in which they never had 1 lb. of lead ore, and they did an enormous business in silver, copper, and gold.

451. Do you smelt the whole of the Junction contract to which you have referred? No; we resold 4,000 tons, pending the erection of twelve furnaces. That work is in hand now.

452. That is the reason you disposed of part of the contract? Yes.

453. With suitable roasting furnaces, would it still pay you to buy Junction concentrates? Yes.

454. At the price it now costs you to smelt? Yes.

455. Would you buy lead concentrates from Broken Hill if you could get them from Tasmania at the same price? I am not prepared to answer that question. I do not think you should expect me to expose our whole business.

456. But if you could get carbonates of lead from Tasmania at the same price, would you not take them? It is a matter of freight. The whole smelting business in Australia depends entirely upon freight.

457. If you could get carbonates of lead from Tasmania at the same price, would you still buy Junction concentrates? It is rather doubtful.

458. Does the ore most profitable for smelting come from Broken Hill? No, I do not think it does.

459. Where does it come from chiefly? From other sources.

460. Would you mention some? We buy all over the Australian colonies.

461. But you must know where your principal supplies come from now? From New South Wales and Queensland. Some parcels come from Tasmania.

462. Where do you get your limestone and ironstone from? New South Wales.

463. If a harbour were opened at Lake Illawarra would you be able to get them any cheaper? I think very likely that we should.

464. Where do you anticipate getting them from? I must decline to answer that question. You must see that there are certain matters in connection with our business about which I could not speak.

465. Would a harbour be of any use to you in getting limestone or ironstone? Yes.

466. Surely you can say where you think you could get them from? I know that we could get from Tasmania better ironstone than we are using at present.

F. L. A.
Weinberg.
9 Dec., 1898.

467. What about the limestone? I could not say. I have not investigated the matter thoroughly yet.
468. You would have to pay harbour dues, remember? That is quite true.
469. Making allowance for harbour dues, freight, and all that sort of thing, do you think that if a harbour were opened you would be able to get your flux any cheaper? I think we could.
470. You think you could get it more cheaply from Tasmania? Ironstone, but not limestone.
471. Would it be as good as the stuff you are getting now in Australia? We are getting excellent limestone but the ironstone might be better.
472. How much do you use here yearly, roughly speaking? With the prospects that are before us for next year, for instance, we should use, speaking roughly, from 15,000 to 16,000 tons of limestone, and from 10,000 to 12,000 tons of ironstone.
473. Would your coke come in through the harbour? No.
474. Would your coal come in that way? No.
475. How much coal do you use yearly, roughly speaking? We shall be using during next year, unless larger contracts come in, about 15,000 tons. We use from 15,000 to 17,000 tons of coke.
476. None of that would come through the harbour? No; it would all come by rail.
477. How much ore do you smelt yearly, speaking roughly? With our present contracts and supplies, going from 70,000 to 80,000 tons.
478. How much ore, besides the Junction contract ore, would come to your works through the harbour if it were there now? A good deal of our ore comes along the coast. I should say, speaking roughly, that about half of the ore would come coastways.
479. Over half of what you are smelting now? Yes.
480. Where would it come from? From Queensland and West Australia.
481. Out of the ore you are already treating, how much would come by rail? I could not define the exact quantity unless I went into the different localities.
482. You are arguing that if your works are to be carried on successfully it is necessary you should have a harbour;—I want to know how much ore you would get through the harbour? More than half.
483. Where would you get it from? We buy all over the Australian Colonies.
484. That is a very general statement;—where would you get the bulk of the ore likely to come through this harbour? We get some from Broken Hill, Tasmania, Queensland, and West Australia.
485. What ore from Queensland have you been smelting? We have been smelting the Ravenswood ore.
486. *Mr. Sleath.*] What sort of ore is that? Refractory gold ore. We get a good deal of copper ore from Queensland also.
487. From what mines? From the North at the back of Cairns, and also some from the Mount Perry district.
488. They would not be large quantities? No; they are small parcels, but in the year they count up.
489. Have your company any mines of their own? Only one at present. Webb's mine, at Emmaville.
490. The White Rock is a separate company? Yes.
491. Do you receive any ore from Lewis Ponds? No.
492. You do not expect any? No.
493. How much do you get weekly from Webb's mine? About 30 tons a week.
494. Both Webb's mine and Lewis Ponds belong to the Smelting Company? Yes. At Webb's we are going to put up a plant capable of crushing about 100 tons a day.
495. Do you get any quantity of ore from the Camden Exploration Company? No; not at present.
496. Do you know any of the mines owned by them? I know some of them by name; but I have never visited them.
497. You will remember that Mr. Armstrong said that your principal supply of smelting material came from the Camden Exploration Company? Yes. May I point out that Mr. Armstrong possibly meant from mines in which the Camden syndicate are interested. For instance, the Camden syndicate is greatly interested in the Junction mine.
498. Mr. de Wolf is interested in the Junction mine, but he is not the Camden syndicate? Still I know that the Camden syndicate hold a large interest in the Junction mine.
499. Have a sulphuric acid plant at Dapto? Yes.
500. Have you established a coke industry there? No; we buy our coke.
501. How long has the sulphuric acid plant been put up? It is just completed. Some little things are still wanting.
502. Mr. de Wolf said you had established a coke industry down there; that was his evidence before the Select Committee? We have no coke industry there. No doubt we are the largest consumers of coke, as far as that is concerned.
503. The Illawarra Harbour and Railway Company is a distinct company from the Illawarra Harbour and Land Corporation? Yes.
504. There is no connection between them except that arising from monetary assistance? Their interests are identical as far as the harbour is concerned; that is all.
505. Did not the Smelting Company pay money to avoid Mr. Osborne foreclosing upon his mortgage? I could not tell you. I am not well versed in the initial operations of the concern. I only took charge of the works during the year.
506. If that railway line had been foreclosed upon and anyone had got hold of it, your operations would have been practically at a standstill? I do not know; but I do not think the mortgagee could step in and prevent our using the line.
507. Supposing he did do so, it would, of course, have put your company in a bad way? Yes.
508. Who owns the land over which the railway passes? It belongs to the Illawarra Harbour and Land Corporation.
509. Do you know the area of land owned by the Corporation? I could not tell you the exact acreage.
510. Could the corporation sell land without your company's permission? I could not say.
511. You are an engineer;—could you tell us how much money has been expended upon the harbour works? I have never seen them. When I say that I do not mean it to be inferred that I have a lack of interest in the matter. The fact is that I am a very busy man, and if I were to look at the works it would mean going down to the mouth of the lake and making a careful examination.

E. L. A.
Weinberg.
9 Dec., 1893.

512. Who paid for the railway line which connects with the Illawarra Harbour and Land Corporation's land? I could not make a positive statement on the subject; but as far I know the Smelting Company advanced the money.

513. They paid for the line? I think so. I can tell you what our interest is, but I do not know anything about the earlier transactions. I know from my books and balance-sheets the interest we have in the Illawarra Harbour and Land Corporation, as far as pounds shillings and pence are concerned, but otherwise I am not acquainted with the earlier history of the concern.

514. *Mr. Simpson.*] What interest in money value have the Smelting Company in the Illawarra Harbour and Land Corporation? £25,000, made up of £10,000 in cash, £5,000 of guarantee in connection with the Camden syndicate, and the paid-up £10 shares. We received 1,000 ordinary shares, and 1,000 preferential shares, and we gave a guarantee with the Camden syndicate for the deposit with the Treasury of the £10,000.

515. Did the Smelting Company pay £20,000 to Mr. Osborne to get rid of his mortgage? I could not say. I know there was a cash transaction. We gave them £10,000; in what way that has been applied by the Illawarra Harbour and Land Corporation, I could not say.

516. Was not the first mortgage held by Mr. Amos, railway contractor? I cannot say. All these things are in the hands of the company's solicitor. When I have to look into the matter I get out the papers, but I am not versed in the earlier transactions of the concern. I really have had no time to look into these things.

517. As to the depth of water in the channel, you think 15 feet would be of no use? No.

518. No sailing vessels would come in? Not unless they were towed.

519. You will have to use steamers? Yes. In regard to the harbour matter, our contention is simply this: We are of opinion that with a harbour we can establish a large trade. That is our principal contention. If we do not get a harbour the smelting works will remain as they are. They will never be any larger.

520. But the whole of the ore you say that would come by sea would be practically the Junction ore? No; we should receive ore from Queensland and West Australia.

521. Of the ore you are already treating the bulk is Junction ore? Yes; but you can understand that if we had the harbour it would give us a very big pull indeed. You have been connected to a certain extent with mining as far as I know, and you know that the profits of smelting works are very small—in fact, the figures are often on the wrong side. Now-a-days if a smelting company makes a few shillings of profit they do very well. In heavy lead ores our profit is not counted by pounds, but by a few shillings.

522. *Mr. Simpson.*] That would point to the necessity for a large volume of business? Yes.

523. *Chairman.*] The only ore of that which you are now treating which would come through the harbour would be the Junction ore? That would be the principal ore, but we should receive other ore coastways.

524. *Mr. Ashton.*] You have stated that more than half the quantity of ore you treat comes seawards? Yes.

525. That would be about 40,000 tons a year? Yes.

526. Of which about 16,000 tons would be Junction ore? Yes.

527. Leaving a balance of from 18,000 to 24,000 tons to come also seawards? Yes. At present it comes to Darling Harbour, and has to be railed across from Sydney.

528. It would reach you through a harbour if one was there? Yes.

529. *Chairman.*] Outside of the quantity you receive from the Junction mine, you say that from 18,000 to 24,000 tons would reach your works through the harbour? Yes.

530. *Mr. Sleath.*] How would the ore from Mount Perry reach you if you had a harbour? That comes in very small parcels now.

531. And it always will? You cannot tell. There is a new district being opened at Canindie. I know the district fairly well.

532. But the district has been opened up for many years? Yes.

533. I take it that if you had a dozen harbours the small parcels of ore you receive from Mount Perry would not reach you through any one of them, because it would not pay large steamers to come there with the ore? Quite so.

534. In what quantities does Mount Perry ore reach you at the present time? In parcels of from 10 to 20 tons.

535. If you had a harbour at Lake Illawarra you would not have steamers bringing there such small parcels of ore as that? Not unless there were intercolonial boats making special trips, or boats taking coal away from the district.

536. But boats would not go to Lake Illawarra for coal, would they? I could not tell exactly.

537. The parcels of Ravenswood ore would be about the same in quantity as the Mount Perry ore? No; we receive larger parcels from Ravenswood.

538. The West Australian ore would also arrive in about the same parcels? I do not think so. We have received larger parcels from West Australia.

539. What has been the largest? We received 500 tons at one time.

540. *Mr. Waddell.*] I suppose you expect your trade to grow as your works become better known over Australia? Yes.

541. *Mr. Sleath.*] But with small exceptions even if there were a harbour at Lake Illawarra a lot of the stuff you treat would still come to Sydney and reach you by rail? It would depend entirely upon the development of the trade. Speaking of to-day you are quite right. A great deal of the ore comes in small parcels, and even if there were a harbour there some of those parcels would not reach us through it; but with the development of trade the channel and quantity supplied will change.

542. *Mr. Ashton.*] Putting your case in a nutshell, if you could save 3s. it would pay you,—that would be the difference in cost, according to your former evidence? That was a calculation upon lead-ore with the lead freight back.

543. Do lead ores form a large proportion of the ores you treat? Yes.

544. Suppose you spread the saving over the whole of the ores you treat, what would it amount to on the average—I mean the saving effected by taking sea-borne ores straight to Lake Illawarra? It would depend upon the amount of back freight you had to get rid of. Unless I went into figures it would be hard for me to make an estimate of that kind, but I should say that the saving would be between 3s. and 5s.

E. L. A.
Weinberg.
Dec., 1898.

545. Your case is this: That if you can save the cost of transshipment and the railage from Darling Harbour to your works, there would be the possibility of great development in your company's operations? Yes.

546. *Mr. Archibald Campbell.*] What you mean is that the ships by which you obtain ore, instead of going to Darling Harbour, would go to the Lake? Yes.

547. If you got those ships within 5 or 6 miles of your works, would it not answer the same purpose? We have a railway system there now, and, as far as I know, the wharfs will be in close proximity to our works.

548. Assuming that instead of your vessels going to Darling Harbour they went to Talawera Point, what would be the distance to your works? Not quite 2 miles. I think it is the same distance from Talawera Point as from the works to Dapto Station.

549. But it would mean two handlings, the same as at Darling Harbour? It would be a different handling altogether. I have already pointed out that the great bulk of the ore we expect to treat at Dapto will be shipped to us. It will not be bagged ore, and there is a difference between the carrying of such ore from Sydney to the works instead of only a distance of 2 miles.

550. But in either case there would be trainage? Yes.

551. And there would be two handlings? That is absolutely necessary in any case, because you would have to distribute your ore.

552. The reason I put these questions is that it was to be inferred from your evidence that the ore would be tipped out of the ship into your smelters? That is a matter for after consideration. If our people said they wanted special landing facilities for the ore, I suppose the Corporation would be quite willing to give them those facilities. At present the idea is to bring the ore right into the works in trucks.

553. If you had shipping facilities 6 miles from your works, instead of at Darling Harbour, would that be of great advantage to you? It would be of advantage if there were a railway connection.

554. If a ship came to you from New Caledonia and were within 6 miles of your works, how much of the 8s. of saving of which you have spoken would be retained,—I am speaking now of the difference between a point 6 miles from your works and Darling Harbour? It would depend upon how much we had to pay for railage over the 6 miles.

555. Assuming that the railway were your own? There would be a distinct saving in that case. The Government has a limit, and, even if we conveyed the ore only 5 or 6 miles, we should have to pay the same to the Government as if it were conveyed 15 miles.

556. *Mr. Simpson.*] The railage rates you have fixed with the Illawarra Harbour and Land Corporation are considerably below the Government rates? Yes; I can make that statement with confidence, because some time ago we approached the Government to take over the haulage from the Dapto Station to the smelting works, but they quoted me a figure I could not entertain.

557. *Mr. Archibald Campbell.*] Let me put an illustrative case: Suppose there were a ship lying at Port Kembla with 6,000 tons of nickel ore from New Caledonia, and suppose that nickel ore came into your works, which would be 6 miles away, what would the profit be, taking the average? I could not say.

558. It would affect the 8s. of saving which you have already quoted very much? Yes.

559. Is there any restriction to the effect that your company cannot contract with the Government railways, or with any other lines than those running through the Harbour and Land Corporation's property? No.

560. *Chairman.*] Your operations at Dapto, you say, would be increased, providing you had there a harbour by which you could receive ore from West Australia, Queensland, Tasmania, and other places? Yes; I think we could expect an increase of trade, but our principal object now is to get the New Caledonian trade for our works.

561. You have no contract signed yet? No.

562. You are only in negotiation? Yes.

563. The negotiations have been in progress for twelve months or more? They are dependent a good deal upon the opinion I may form as to the possibilities of such a trade. I could only form that opinion from paying a visit to New Caledonia. I did not know of the proposed combination with the Caledonian business until shortly before Mr. de Wolf came out from England, when I was instructed by the Home Board to make a full report upon the Caledonian matter.

564. Has your report been before the Board? No; I returned from New Caledonia only a fortnight ago.

565. Have you any reasonable expectation that they will go on with the contract, judging from your report? I think so.

566. Do you think the other parties would be willing to go on with it at your price? As the matter is not yet settled, I am not at liberty to express an opinion. The question is *sub judice*.

567. Your principal contention is, that this harbour is going to benefit your works, and the only reasonable ground for that contention is that this contract will be entered into? No. During the time I have had charge of the Smelting Company's affairs, I have not pushed our trade. I have directed my attention to the provision of facilities; but I am certain that if we got the harbour, and got the benefit of the few shillings of saving which we would derive from it so far as the ore is concerned, we should be in a position to extend our Broken Hill trade. I should try to do so.

568. You admit that the harbour cannot possibly be of any benefit to you so far as small parcels of ore are concerned? No; the benefit will arise from big parcels.

569. You have no reasonable hope of trade through the harbour except that arising from your trade with New Caledonia? I would not like to say that. If our trade were to be confined to the New Caledonia trade we might as well shut up now.

570. The West Australian ores will be treated at Fremantle in a short time? The Fremantle smelting works are shut down.

571. But they are not constructed? They started and were shut down.

572. So far as your West Australian trade is concerned, is it likely that your clients will pay freight all the way to Lake Illawarra when they have smelting works at Fremantle? You underestimate the advantage we have in the shape of cheap fuel. You are aware that the western smelters have to pay a fairly high price for fuel, and that gives us an enormous pull over them. Our steamers from Fremantle would bring ore here for a few shillings.

573. Because they have back loading? Yes.

E. L. A.
Weinberg.
9 Dec., 1898.

574. But do you not see that the ships which bring coal to Fremantle will have back loading in the shape of bullion? But not sufficient.
575. *Mr. Simpson.*] There is more coal than bullion? Yes.
576. *Mr. Waddell.*] On the average, how many tons of coke does it take to smelt a ton of ore? In coke smelting in large furnaces we use, roughly, about 4 tons of ore to 1 ton of coke.
577. With 1 ton of coke you can reduce 4 tons of ore? Yes.
578. Is that all the fuel you use? Some ores have to be roasted, and a certain amount of coal is used in roasting preparatory to smelting.
579. *Mr. Cann.*] With your method of roasting, could you give the Committee any idea of the quantity of coal used as compared with the ore roasted;—what quantity of coal, for instance, would you use to roast a ton of ore? It is impossible to say exactly. We have a new furnace building which we estimate to consume 1½ ton in the roasting of 5 or 6 tons of ore, but we have furnaces which put much more ore through in proportion to the fuel consumed.
580. An estimate giving 3 or 4 tons of coal for the reduction of 1 ton of ore you would regard as an absurd estimate? Yes.
581. *Chairman.*] Your position, narrowed down, is this: That the only advantage the harbour would be to your company would be the facilitating of the transit of big quantities of ore? Yes.
582. If you had fifteen or twenty harbours small parcels of 20 or 30 tons would still reach you through Sydney? Yes.
583. Your contract with the Junction Company expires next year? Yes, next May.
584. It has not paid you to treat the ore? I am not prepared to say that.
585. The only other source from which you anticipate getting ore is New Caledonia;—you have not yet completed a contract with the mines there, and you do not know whether your terms will be accepted? The probability is that they will be.
586. Suppose your terms are not accepted, and the Illawarra harbour is constructed, what trading advantages will it give you as far as you can see now? It will give us a very great advantage; we have never yet pushed our business.
587. There are other smelting companies with whom you have to compete; these companies are just now getting into full swing; when your works were mooted they were not in existence? Quite so.
588. You get your coke in the Colony? Yes.
589. Could you not get better coke in Germany than you could get here? No.
590. Then how do you account for the Broken Hill mines using German coke? I will tell you the reason. The coke that is made here as far as ash is concerned is not considered a good coke. The ash contents of all our southern coke may be put down at an average of 15 per cent. German and English coke is supposed to contain 7 per cent. You pay freight on 8 per cent., and you put 8 per cent. of material in your furnaces which requires so many units of carbon to be fluxed off again. If you are using coke for smelting purposes it pays you to buy the best coke you can get. It is a matter of freight. I suppose the persons to whom you refer at Broken Hill can practically bring out coke for the same amount which it would cost them for Newcastle coke.
591. *Mr. Sleath.*] You do not make coke yourselves? No.
592. Coke made in the colonies is generally very small? The coke we are getting now is, I consider, a fair furnace coke. It is a coke which stands a good burden.
593. *Mr. Carroll.*] Have you made any sulphuric acid yet? No.
594. *Mr. Sleath.*] How far are your works from where this harbour will be when completed? I think about 2 miles.
595. What would be the difference in cost between carting the ore 2 miles and 6 miles? In the case of the Government line there will be no difference, because both distances would be within the 15-mile limit.
596. But supposing you were using your own line? It depends entirely in the capital invested in the line, but the difference in the two distances would not amount to much.
597. Up to the present time you have no line constructed from your works to where the harbour will be? There is a line down to the place where the harbour will be already.
598. The ore you are expecting from New Caledonia will arrive in full shipments? Yes.
599. You would require a fair depth of water in the harbour to allow the ships to come in? That is right.
600. You have already explained that you have not been able to notice the harbour works? That is right.
601. Have your company considered the time which must elapse before the works can be constructed? Yes.
602. So that if you enter into this nickel contract you will have to arrange for the ore to be taken to your works by some means other than through the harbour? Yes; at the beginning very likely we should.
603. And for a number of years? Not for a number of years.
604. I mean judging from the rate at which the work has hitherto proceeded? I hope they will proceed a little quicker. Our friends in New Caledonia are bound down to Europe for another year. The nickel would not come here right away.
605. Then it might be another year before your nickel contract started? Yes; they are tied to European smelters for about a year.
606. As to the money your company has paid for their interest in the Illawarra Harbour and Land Corporation, your company bought 1,000 preferential shares at £10? Yes, and we hold 1,000 ordinary shares.
607. You have paid to the company £10,000 in cash? Yes, that is all we have in the concern.
608. In return for that you got 1,000 preferential shares and 1,000 ordinary shares all fully paid-up? Yes. On our taking up 1,000 preferential shares they gave us 1,000 ordinary shares. That was part of the bargain.
609. Does your company hold a mortgage for the £5,000 guaranteed? Yes, we have security.
610. The amount you have named is the only money you have had to advance? Yes.
611. *Mr. Carroll.*] Have your company entered into negotiations for an extension of their Broken Hill contract upon the same conditions? I have entered into negotiations for an extension of the contract under conditions more favourable to the company.
612. At present nothing is settled? Nothing.

613. One-third of the contract is sublet to a Melbourne firm? Yes; we are not prepared to renew the contract with the Junction people at the same figure. It is almost certain that they will fall in with my ideas. I had nothing to do with the making of the contract in the first instance; 4,000 tons were resold, because we ourselves had not roasting facilities for the ore. You all know that freights have set in very high, and if we had to pay a premium on re-selling it has been brought about simply by the conditions of freight.

E. L. A.
Weinberg.
9 Dec., 1898.

614. If the Government constructed a harbour at Port Kembla you would regard it as being better than no harbour at all? Yes; provided we obtained railway facilities.

615. Carriage would come to a little more, but the harbour would be of great advantage to you? Yes.

MONDAY, DECEMBER 12, 1898.

Present:—

MR. ASHTON,
MR. ARCHIBALD CAMPBELL,
MR. CANN,

MR. CARROLL,
MR. COHEN,
MR. SLEATH,

MR. WADDELL.

W. J. FERGUSON, Esq., IN THE CHAIR.

Mr. E. P. Simpson and Mr. Mosely, appeared for the Illawarra Harbour and Land Corporation.

Thomas Andrew de Wolf recalled and further examined:—

616. *Mr. Sleath.*] On the share register appears the name of the Hon. Edmund Barton as the holder of thirty shares? Yes.

T. A. de Wolf
12 Dec., 1898.

617. I think you stated that he never paid anything for those shares, and that he received them in consideration for going on the Board, or something of that sort? In lieu of directors' fees. According to the articles a sum was set on one side to be paid in cash, and the directors decided they would accept payment in shares.

618. Is Mr. Barton still on the registered share list? He is on the London register.

619. For how many shares? £3,000.

620. I think you said that in January, 1894, there was a call made on the original thirty shares? Yes.

621. A call of £10 per share? Yes.

622. Did he pay that call? No. I am not certain whether he transferred his shares before that or not. He paid no call on them.

623. If he had transferred his shares previously, his name would not have appeared on the London register? Yes, because it was arranged that on transferring these shares they were to have the same number of shares in the London company.

624. Whether the call was paid or not? Yes. Well in this case it was arranged, and in several others.

625. Did Mr. Carey also hold shares to the same amount? Yes.

626. When the call was made, did he pay the call? No; he paid a portion of it—£250.

627. Is he still a shareholder in the company? No; he refused at that time to take the liability. As I explained before there were very heavy liabilities on the company at the time he refused to share his shares with the liability he requested me to take a transfer of the shares.

628. What is the liability on the £3,000 worth of shares of Mr. Barton in London? No liability.

629. So that if Mr. Carey had taken the same interest in the London company as Mr. Barton, there would have been no liability? No; I may explain that at that time the debts of the company were heavy, and it was a question whether I would be successful in my efforts in London to finance the company. If I had not been the company would have had to be wound up, and people would have had to pay up.

630. *Mr. Simpson.*] Had the Smelting Company been formed at that time? No.

631. *Mr. Sleath.*] Were there 10,000 shares in the company when the call was made? Yes.

632. And a call of £10 per share was made? Yes.

633. How many shares paid up that call? All the shares that remained were paid up.

634. That would mean, then, that £100,000 was paid? I explained before that the company owed £100,000, representing the amount due to the syndicate for the purchase of the properties.

635. So that when the call of £10 was made, is it a fact that a good deal of that call was paid up merely as a question of book-keeping? Yes; to settle the debts of the company. There were cross entries.

636. For instance, the syndicate representing a number of shares in the company, and having £100,000 due to them by the company, they simply squared the two things by cross entries? Yes. It was rather a complicated account, because there were accounts between the syndicate and the original purchasers of the land.

637. So that the calls on Barton's shares, for instance, would be paid in that way? Yes; I took a transfer of the shares and I paid up the call.

638. Then were they transferred back to Mr. Barton? The shares in the London company were allotted to him.

639. Did he pay anything for them? No.

640. When did Mr. Neild first become a shareholder? I cannot vouch for the exact time. The date of the acceptance of the shares in the London company was in 1896.

641. Do you know when he first came on to the list of shareholders in the Sydney company;—when did he first become a shareholder in the original syndicate, or whatever it was? I have no knowledge. I received instructions from Mr. Armstrong when I was in London to allot 100 shares to Mr. Neild. That took place when I was away for four or five years.

642. But Mr. Neild is still a shareholder in the Sydney company;—do you know when Mr. Neild became a shareholder in the Sydney company? Yes; the date of the transfer of one share is the 28th July, 1897.

643. Previous to your being instructed by Mr. Armstrong in 1896, when you were in London, you knew nothing of Mr. Neild in connection with the company? Not in connection with the company. 644.

- T. A. de Wolf. 644. We had a good deal of information about Styles and Vaughn's transactions the other day;—you explained to the Committee that you bought this Ocean Colliery Company from Styles and Vaughn, who were partners? I bought it from Vaughn.
 12 Dec., 1898.
645. For £25,000? Yes.
646. Did you understand at that time that Styles was a partner? No; I only knew Vaughn in the transaction.
647. £12,000 of that was paid in cash? £13,000.
648. And £12,000 in fully paid-up shares? No; the shares had £1,000 liability. There were four syndicate shares, £3,000 paid-up and £1,000 liability.
649. So you did not know anything of the business between Vaughn and Styles? I ascertained afterwards that they were jointly interested, but all my dealings were with Mr. Vaughn with the exception that I was asked to put two of the syndicate shares in the name of Styles, which was done.
650. *Mr Cann.*] At whose request? Vaughn's.
651. *Mr Sleath.*] In July, 1894, were Styles' shares forfeited? Yes.
652. Did he pay the call? He never paid a shilling from the commencement of the company to the expense of the company.
653. So that, in 1894, his shares were forfeited? Yes. Most of his shares had passed out of his possession entirely at that time. He had borrowed money on them from the Mercantile Finance Company, who were also large shareholders. He borrowed money from Mr. Dyring, a storekeeper up country, and also from a money-lender here, named, I think, Phillips.
654. So that his interest in the shares was not what it might appear? No. Actions had been taken by these people to force him to pay this money back. That was some two years prior to the forfeiture of his shares.
655. Were all his shares forfeited? Yes.
656. What did the company do with those forfeited shares? They were open to anyone to take up who would pay the balance of the call.
657. As a matter of fact, you took up Styles' shares? Yes.
658. We were told something about the probable amount of money which you had expended for the purchase of the property; I would like to go over the figures very briefly again? There was £35,000 payment for the property, then £30,000, and £13,000.
659. Was that the total cash payment made for the property? Yes; for the purchase of the property, besides expenses. The total payment in cash for that purpose was £78,000. That does not include any legal or other expenses incurred.
660. The money that the company has received has been how much;—was not £20,000 from London the first amount? Yes, and a further £20,000.
661. And of course this £10,000 deposit is a liability? Yes.
662. You have received £40,000 in the company;—what are your liabilities, and I am not talking about the £10,000 deposit? I will give you the exact amount. This is the last balance-sheet dated 28th February, 1898. There is £34,402 due to Amos.
663. As against that you have spent, in railway construction, practically, £40,000? £41,465.
664. And in harbour works? £3,503, that is within a few pounds of £45,000.
665. In 1889 your first Bill went through? In December, 1890.
666. That is practically eight years ago? Yes.
667. During the whole of those eight years you have only expended in harbour works £3,503? Yes.
668. Did you give any instructions to Mr. Neild in October, 1895, when the previous extension was asked for? No.
669. Who would have represented the company then and given instructions? Mr. Armstrong.
670. Do you think that two years would be of any use to construct these works? Yes.
671. Do you think it would be possible to complete anything like harbour works there? Do you mean 15 feet?
672. Yes, even 15 feet? Yes; but our engineer here can give you these particulars better than I can. I can only give you what he tells me. I understand that it is a cheap and easy business to make a depth of 15 feet, but we shall probably try to make it deeper. We must make it deeper afterwards.
673. A good deal of the Smelting Company's affairs have crept into this evidence. Do you know how far the smelting works will be from the harbour when constructed? A very short distance.
674. I think Mr. Weinberg in his evidence on Friday said it would be 2 miles? It is just about 2 miles from where the ores would be unloaded; it is a trifle under.
675. Of course, all the same, handling of the ores must take place, as if the distance was 20 miles? It has to be handled.
676. So that the difference between the cost would be simply the cost of the haulage as between 2 miles and 20 miles? There are many other things. The difference of haulage, I suppose would be that.
677. *Mr Cann.*] What amount of money do you anticipate it will take to complete all these works as you intend to do them? About £150,000. We have a contract let to Amos—the balance amounts to £150,000.
678. What are your prospects of being able to raise that amount of money? I have not the slightest doubt that we shall get the money at once, as soon as I get to England.
679. Are you negotiating, pending the passing of this Bill? Yes. When I left England we had matters pretty well settled, unless something unforeseen happened. People will not bind themselves for twelve months to take up any business, but unless something unforeseen happens, these people are prepared to find the money.
680. *Mr Cohen.*] Do you feel fairly confident yourself that the money will be available? I sent £10,000 from London on my responsibility, and I would not have sent it out unless I felt that I could carry out the business. We have nothing to sell. All we have to do is to make the harbour, and make the land valuable.
681. *Mr Sleath.*] It was stated over and over again that the capital of this company is £1,600,000? That was a nominal amount for which the company was registered originally. The original Sydney company was registered for that.
682. You will see that Mr. Neild over and over again repeats that? That is the registered capital. We might have registered for £10,000,000; it would not have made the company any different; only we should have had to pay more stamp duty.

683. There would be no actual difference in the capital of the company if it were put down at £1,600,000 or £600,000? No. T. A. de Wolf.
684. What is the total indebtedness of the company at present? £45,000, including the £10,000 deposit. 12 Dec., 1898.
685. What is the balance due from the company to the syndicate? That is all settled.
686. That £100,000 is practically settled? Yes, in the way I have explained. We made the call, and settled it.
687. So that there is no money due to the syndicate now? No; the £10,000 deposit lodged comes back to us.
688. It is only a cross entry? Our total liability is £35,000, which is a great deal less than the cost of our railway.
689. *Chairman.*] Do you mean the liabilities of your present company? Both companies; there are no liabilities in London.
690. You mean the liabilities of the Illawarra Harbour and Land Corporation, and you do not include the Smelting Company? No; the Smelting Company is quite a different matter.
691. *Mr. Sleath.*] So that the London company took shares for their £20,000 cash? Yes.
692. So that is no liability? No.
693. If any firms were to undertake underwriting this, what would they want out of it? They get the usual commission.
694. Of 100 per cent.? No, not with us; we do not do business in that way.
695. *Chairman.*] Is it not often done by taking shares? Yes.
696. For instance, if they do not get the cash, you give them double the amount in shares? We very often give 2½ per cent. in cash and a commission in shares.
697. *Mr. Sleath.*] You actually did give them 100 per cent. They took up 20,000 shares, and you gave them another 20,000? We gave them a certain amount in shares.
698. Did you not give them £20,000 in shares? We are quite prepared to make the thing palatable to the English investor. He usually wants to have some interest in the company as well. We are quite prepared to do all that is necessary to see that we have the money this time, and make no mistake about it.
699. *Chairman.*] When Mr. Carey, Mr. Styles, and Mr. Newton were shareholders, I suppose they knew the whole of the transaction up to the disposal of part of your property to the Smelting Company? They had ceased to be shareholders before I went to England.
700. *Mr. Sleath.*] The call knocked them out? No, it was not the call; it was the fear of the liabilities.
701. *Mr. Simpson.*] Was it not on account of the Mercantile Finance Company? I arranged for a time to pay off the liabilities, but other people would not take the risk.
702. *Chairman.*] Did they know of the disposal of the property to Fink by you? Yes; that was ratified by the company.
703. Did these shareholders know it? Yes; they had notice of it.
704. Then Styles and Newton must have been shareholders up to the time of the formation of the Smelting Company? No; the transfer of the property to Fink occurred some years before; it was a nominal one.
705. They were shareholders at the time, and knew it? Yes, and subsequently.
706. Were they shareholders at the time you formed this company? Yes, they were the first shareholders.
707. At the time you formed the Smelting Company? No, they were out long before that.
708. The call on the shares put them out? As far as Carey and Newton were concerned, they refused to accept any further liability, they were liable for £40 a share, and they refused to hold them. Styles never paid one shilling.
709. Still they had their shares, and you disposed of the property to Fink? That was years before. I did not dispose of the property to Fink. It was in my name; I was only one shareholder. Mr. Fink or the Mercantile Finance Corporation would not agree to become security for further advances from the bank unless the property were put in their name instead of mine. They simply held it as trustees.
710. They were shareholders at that time? Yes.
711. When the call was made, practically Fink owned the property? No.
712. Was it not handed over to him? No; he took the same position as I did. I was trustee before.
713. *Mr. Sleath.*] When did Mr. Lyne become a shareholder? I cannot tell you. I got instructions from Mr. Armstrong to allot some shares to Mr. Lyne, but I understand that Mr. Lyne never accepted them.
714. *Chairman.*] You transferred this property from your name to Fink's, and the same day Fink discounted this bill? Yes; he got an advance.
715. To Wallach Brothers? Yes.
716. You say he discounted this bill when the property was transferred from your name to his, and he discounted it to Wallach Brothers? He got the money from the Bank.
717. They signed the mortgage to the A.J.S. Bank? Yes. I think when I gave my story of the company I explained all that as clearly as I possibly could. I pointed out that the company owed the syndicate a large sum of money, which they had not paid off, and Mr. Fink was quite within his rights in obtaining further advances for the company from the Bank, and giving security.
718. You and Mr. Armstrong own practically the whole of those 10,000 shares? No.
719. How many? We hold a pretty good number. I explained that we hold them to assist us in financing in London.
720. You do not know the exact number of the 10,000 in your name? I can tell you how many in my name.
721. *Mr. Sleath.*] Do you hold shares that are really not in your name? Yes.
722. *Chairman.*] How much do you calculate these harbour works will cost you? Mr. Harper can give you the exact figures of the contract. We have let a contract to Amos, and £35,000 of that has been spent. The railway has been finished.
723. The £150,000 would be outside the £34,000? Yes; we estimate the amount of the harbour and railway at £200,000. These are all done by schedule rates, and we may have to increase or decrease the amount. More stone may be required in the breakwaters and walls. The people in London estimate that we would require on the contracts about £250,000, to pay interest during construction, and so on.
724. *Mr. Sleath.*] Have you any estimate of the trade likely to be done when the harbour works are completed? No; we are satisfied that the Smelting Company's business will be sufficient to pay us interest on the cost.

- T. A. de Wolf. 725. *Mr. Carroll.*] What is the cost of the railway in Amos's contract? The cost of the railway was altogether £41,008.
- 12 Dec., 1898. 726. Has Mr. Amos been paid? He still holds £34,000.
727. And he holds a mortgage over the railway? Yes, and Lakelands Estate. This amount of Amos's is less a good deal than the cost of the railway. I sent out £6,000 worth of rails from London.
728. *Mr. Cohen.*] Did I understand you to say that you were prepared to pay off Amos at once if he wants it? I offered it to him, but he does not want it. If we do not get our Bill through, we will pay him off at once.
729. *Mr. Carroll.*] Have you any money in the bank—I mean the Illawarra Harbour and Land Corporation? We have a revenue of about £4,000 a year coming in. As we get the money in we pay our expenses, and we pay off Mr. Amos. We pay him off a little now and then.
730. Has the Illawarra Harbour and Land Company held monthly or quarterly meetings lately? No; they have not had a meeting for some little time. I have been away for some time.
731. Is it a fact that they have been two years without holding a meeting? I do not think so.
732. Have they been very nearly two years? I do not think so. Do you mean a meeting of shareholders?
733. No, a meeting of any sort? Yes; there have been meetings. The former secretary has gone to London—he could give the information.
734. Who can give us the information that the secretary ought to give? We can produce our minute-book. There is very little business to do.
735. *Mr. Simpson.*] Would not the meetings in London be sufficient to meet the requirements of the law? Yes.
736. *Mr. Carroll.*] Are all the shares held in London except thirty? Yes.
737. *Mr. Sleath.*] Are those thirty shares different from the shares in London? Yes, they are original shares.
738. Is one share of those thirty 1,600,000th part of the company? It is a 10,000th part; it is a £100 share paid up to £60. Nobody would care to hold a share of that description with £40 liability.
739. *Mr. Carroll.*] Are you aware that the Government have now passed a Bill with a view to constructing a harbour at Port Kembla? Yes.
740. What effect will that have on your scheme? We are quite independent, I think.
741. Will it not have a bad effect on the public at Home who may go in for speculation? I do not think so, because we have a trade of our own. I do not think we will be very much afraid of competition.
742. What trade have you got? We have the trade of the Smelting Company.
743. It is stated to be very little? We would not have put these works there unless we expected to do a very much larger business than they do now.
744. You have no contract with New Caledonia? No, we will not, unless we have a harbour made. If we have a harbour made, I think it is absolutely certain we will have that contract, and a very large one.
745. You do not wish to state whether the contract with Broken Hill is payable or not? I could not answer that question. We have European and Australian smelters competing with us, and if we said that we were making money, we might be charged more.
746. What is the reason for letting one-third of the contract to a Melbourne company? I do not know the business of the Smelting Company; but I do know that the reason for that was that we were short of roasting appliances. We are now putting up twelve roasting furnaces extra.
747. You said that you were going to have other works there;—have you any works for sulphuric acid? Yes.
748. Have you made any? No; sulphuric acid is a by-product, and would probably be used for superphosphate, but we cannot afford to bring that down to Sydney by the Illawarra line. You cannot make a chemical industry there without water-carrage.
749. It was stated eight years ago that if you got the Bill the first work you would construct would be the harbour;—how is it that that has been hung up so long? I have explained that.
750. How is it that you were able to start the Illawarra Smelting Works and not the harbour? It is a different thing entirely. I used my efforts with my friends to get them to put up the works, in order to create a trade for the harbour. I am largely interested in the harbour, and it was my business to try to establish a trade there. People might say that they would go into the Smelting Company when they would not go into the Harbour Company. They might put in £500,000 into that company, when they would not go into a harbour company.
751. *Chairman.*] You say the company has an income of £4,000 a year;—what is that from? From agistment and rentals and traffic on the railways.
752. How many acres of land now belong to the company? Originally there were 2,900 acres; 500 acres have been taken off, leaving 2,410 acres.
753. What do you think that is worth? I think it is worth a lot of money. If the harbour is made it will be worth very much.
754. What is the ordinary value of it now? For 2,900 acres I paid £65,000 ten years ago. We have 4 miles of water-frontage to the lake. We went into the thing intending to make the land valuable, and at the same time put up big works.
755. Would the harbour increase the value of this land considerably? Naturally it would—the harbour and works.
756. *Mr. Simpson.*] Have not the smelting works also increased the value of the land? Yes.
757. Do you think the Smelting Company's works would give a value to agricultural land? Yes; if you employ a lot of men about there the land becomes more valuable.
758. *Mr. Sleath.*] Have you sold any of the land in small blocks? Yes; but not much.
759. What price have you been getting for it? About £1 a foot.
760. About £300 an acre? Yes.
761. *Chairman.*] This company owes you practically £100,000? No, nothing.
762. They did not pay you any cash? The debts were owing, and we owed the debts. We had to write them off. Money was owing to us.
763. It was a system of book-keeping? The money was owing to us, and should have been paid.
764. *Mr. Carroll.*] Do you say there is no secretary now? Yes, there is a secretary, but he only joined during the last three weeks.

765. Who is the secretary? Neild.

766. Is he a relative of Mr. Neild? Yes.

767. *Mr. Simpson.*] Was Mr. Jarvis the secretary for a number of years? Yes, for five or six years.

768. *Mr. Carroll.*] It is reported that the sleepers in the railway line are rotting, and that the Government refuse to allow their engines to work on it;—is that true? Certainly not. I cannot help reports being spread about.

T. A. de Wolf.

12 Dec., 1898.

Walter Andrew Harper sworn and examined:—

769. *Chairman.*] Did you give evidence before the Committee in 1895? No; I was away.

770. *Mr. Simpson.*] I understand that under the Act the Government have power to appoint a consulting engineer? Yes.

W. A. Harper.

12 Dec., 1898.

771. In pursuance of that power, did they appoint Mr. Darley? Yes; as soon as the plans of the scheme were prepared, it was considered important that Mr. Darley should approve of them at that stage, because after the works were going on he might come and alter them. So we submitted the plans to him before entering into any contract.

772. What was done by Mr. Darley? He made a very small alteration in the entrance to the works. The width of the channel was altered 100 feet, or something of that sort.

773. With that exception, were the plans approved of by him as consulting engineer? Yes. There was a little difference in the construction of the breakwaters—a difference in the height and width of them, and also in the channel.

774. Are there any engineering difficulties in the way? No. I produce a plan which accompanied the Port Kembla evidence, as it was approved of by Mr. Darley. It is the official plan of the Illawarra entrance.

775. *Mr. Sleath.*] What was the width before? 200 feet at the entrance.

776. And you changed that to 430 feet? Yes.

777. *Mr. Simpson.*] Was your firm engineers for the Illawarra Corporation, and did they prepare the plans in connection with the scheme? Yes. I think the Committee will see by these plans that now that the tie-bank has been constructed there is practically a southern breakwater from Windang Island to the mainland, so that the breakwaters are really under the lee of the island.

778. *Mr. Cohen.*] Will that protection facilitate operations under the contract? Yes. It is made of light rubble, and is constructed to convey the stone to the breakwater, but it has stood very well, although the stones are only about 1 foot in diameter.

779. *Mr. Simpson.*] How long will it take to complete the harbour? The contract provides that it shall be done within two years.

780. Is that the present contract with Amos? Yes; it depends a great deal on the dredging power. Under the contract, the contractor will have to supply dredges, but I think the company will also supply a dredge of their own.

781. Have they the option of doing that? They have the refusal of a very large steam-pump belonging to Dr. Hay of Coolangatta. If they buy that, it would complete the work very much quicker. The contractor puts himself under a penalty to complete the work in two years.

782. You have no doubt that if two years' extension were given, it could be completed? No; it is very light work—it will only take £140,000 to complete it.

783. Is there much blasting to be done? No; none except to get stone out of the quarry. Soundings and borings have been taken by the contractors. We provided a clause in the contract that although the depths were given by us the contractor had to bore himself, and had to take the responsibility.

784. Has he done that? Yes.

785. Is there little or no blasting to do in connection with the excavation? There is no blasting at all in connection with the harbour works. There is at the quarry. There is nothing of that kind in connection with scouring out—it is sand-pump work; it is exactly similar to the Gippsland Lakes entrance, with the exception that we have this island. At the Gippsland Lakes it has been a perfect success with timber and breakwaters, and it is exposed to the whole Pacific Ocean; there is no shelter.

786. *Mr. Sleath.*] Can you tell us the length of the southern breakwater? The breakwater, as shown on the plan, is really divided into two. The latter portions of the breakwater are called training-banks from the tiebank towards the lake, and from there to the sea, breakwaters. The length of the southern training-wall is 1,650 feet.

787. And the breakwater? 1,815 feet.

788. I suppose the breakwaters are to be of stone;—what depth will you have to go to get something like a bottom, or will you put them on the shifting sand? The sand is quite solid, but the channel will be dredged—say to 20 feet. It will be lined with stone to that depth. The stone will be allowed to find its own bottom; it may sink to 15 or 20 feet; we have to put in whatever stone is necessary. My experience is that it sinks 5 or 6 feet, and beds itself in the sand. It is exactly like the Suez Canal—through the Bitter Lakes, where they have lined it with pitching. It has not gone below the bottom level of the canal. The stones are sunk a foot or two in the sand.

789. What is the size of the training-wall? Ten feet on the top with a batter of $1\frac{1}{4}$ to 1.

790. Will the breakwater be larger than the training-wall? The southern breakwater is very large. The width at the top is 15 feet; at high-water mark, 51 feet; at low-water mark, 66 feet, with a batter of $1\frac{1}{2}$ to 1 with 10-ton blocks.

791. What about the northern breakwater and training-wall? It is practically the same, it is a little shorter.

792. The distance from the mouth of the breakwater to the finish of the training-wall would be 3,465 feet? Yes.

793. What is the length of the canal channel? A little over 3 miles.

794. Do you intend to have a training-wall up both sides? No; it would be simply deepened just like an ordinary canal.

795. Do you think that will stand? Yes. Very much wider slopes are provided than are necessary. The Suez Canal slopes stand at 1 in 1. We provide 1 in 5, so that it is almost like a saucer.

796. This channel is only 100 feet wide? That is at the bottom.

797.

- W. A. Harper. 797. *Mr. Cohen.*] What is the height of the tide there? There is scarcely any in the lake. There would be about 2 feet when the work is completed.
- 12 Dec., 1893. 798. *Mr. Sleath.*] What will be the width at the top of this dredging? If you carry the slopes to water-level the width will be 330 feet.
799. With a batter of 5 to 1? There are 115 feet on each side of the central piece at 23 feet. I am taking that depth because I think it is really intended to take it to that depth. In the northern breakwater there is 139,000 tons—that is, the whole thing. In the southern breakwater there is 153,000 tons. The total cost is £52,924.
800. That does not include the training-walls and the channel? No. The cost of the total dredging, 3,600,000 yards, is £81,000—a lump sum contract. The contractor is responsible for dredging that, and at the completion of his maintenance time he hands over the channel at the theoretical slope.
801. Do the training-walls come under that estimate? No. There are 167,000 tons in the training-walls, and the cost approximately is £18,000.
802. As the engineer, and having made yourself thoroughly conversant with the whole surroundings, have you considered the possibility of silting up when the breakwaters are completed? Yes, fully. The last part of the breakwater, for about 50 yards from the end, is on solid rock. There is no sand shifting at the ends of the breakwater. Before any silting up could possibly occur it would be necessary for the whole of the area of the bight to reclaim to the eastern cape of Winding Island. That would take centuries. Before any sand could get round at all it would be necessary to do that.
803. But from the other side? There is no trend from there. The whole force is from the south, and the only sand which comes is in a heavy southerly. There is a little drift along the shore, but the breakwater is sufficiently large to keep all that; and there are fascine banks running parallel for half a mile south of the breakwaters, to trap any little travelling dry sand. The banks come to a very small sum. They are only to hold dredgings. They only amount to about £2,000 altogether.
804. What is the depth of water at high and low water marks at the eastern end of the breakwater? Twenty-six feet at low water.
805. With a hard rocky bottom? Yes.
806. What would be the corresponding depth between the breakwater and the training-walls? At the present time it varies according to the state of the lake. Sometimes there is a deep channel there, and sometimes there is no channel at all. Until these walls were built there was nothing to guide the channel or maintain it in any direction.
807. *Mr. Cann.*] When you make an opening into the channel, will not the level of the lake go down to dead low water? It will be dredged.
808. Will you not alter the level of the lake? No; when it is dammed up the lake rises sometimes several feet, but it never goes below low-water mark. All our calculations are to low-water mark.
809. *Mr. Sleath.*] What depth do you intend to dredge it right through from the eastern end? Twenty feet at low water.
810. *Mr. Cohen.*] Do you say that there will be a rise of about 2 feet? Less than 2 feet.
811. But there must be a rise of 4 or 5 feet outside? Yes; 5 feet at the entrance.
812. *Mr. Simpson.*] Has Mr. Darley seen these plans? Yes.
813. *Mr. Sleath.*] You say the width of the channel will be 430 feet;—do you see that Mr. Darley says that the width ought not to be less than 500 feet? He has altered his view since the plan was made. That is his document. I do not agree with him on that, and I should not give way any further. My opinion was that it might have been less. I am backed up in that by Sir John Coode, but at the same time I did not wish to fight on details with him, and I gave way to the extent of 430 feet, which we agreed upon.
814. He says that the entrance to the Amsterdam Ship Canal, a parallel case, is 800 feet wide, and that it is not so exposed? You can get plenty of instances the other way. It all depends on the current. I am certain that is ample.
815. Do you know the width of the entrance to the Tyne? No; but it is a very wide entrance, and then there is the river Tyne.
816. Mr. Darley gives the entrance to the Tyne at 1,100 feet, and the Tees 2,000 feet? You cannot compare these works. This is a lake; it is all still water, and the only scour we have is the tidal range. If we make them too wide we shall have too little scour, and if we make them too narrow we shall have too much.
817. *Mr. Cann.*] If you have a lot of wet weather, will you not have a great deal of scour? Not very much.
818. *Mr. Sleath.*] Do you know any work of this kind in the world with as narrow an entrance? I do not know any one exactly similar, but the plans that Sir John Coode made for Lake Macquarie provide for an entrance of 200 feet. That is the nearest case to this that I can imagine. On that point the Committee should be quite satisfied, because anything we do there will be done under Mr. Darley. If he insists on the width being greater the company will have to do it.
819. You say that Sir John Coode recommended an entrance of 200 feet to Lake Macquarie;—do you know that Mr. Moriarty increased that width very much? I think he widened it to 500 feet.
820. To 1,300 feet? I knew he altered it.
821. How long have you been engineer for this company? Since its inception, about eight years ago.
822. Have you done much work in connection with the harbour? No; only the tie-bank. We constructed the railways on shore.
823. Supposing this extension is granted, have you any arrangements made as engineer for the company to proceed with the work? We called for tenders for the harbour, and let a contract for that to Mr. Amos. He will carry it out. There will have to be certain alterations in his contract with regard to the depth. His contract is for £140,000 approximately; it was £200,000 including the railway.
824. How long is it since this contract has been entered upon? About three years.
825. So that three years ago you were exactly in the same position to proceed with the work as you are now? I do not think so.
826. I mean the contract was made the same as it is now? Yes.
827. What has been expended on harbour construction in the three years? About £4,000—between £3,000 and £4,000.

828. We had a witness here the other day who said he could not observe any harbour works? Then he has not been there. The tie-bank is shown in that plan as complete. One of the witnesses in the Upper House said he had ridden across the lake. W. A. Harper.
12 Dec., 1898.
829. *Chairman.*] What did you say was the total cost of this work? £140,000.
830. Is that without the railway? Yes.
831. In 1898, in giving evidence before the other Committee, you put it down as what? £170,000.
832. No, without the railway you said it would cost £250,000? That was our original estimate. We modified that very considerably as regards the works themselves, and prices have gone down very considerably.
833. Then, in September, 1898, a couple of months ago, you said it would cost £200,000? I said the contract was let for £200,000, and £40,000 of railway was done, which left it at £150,000.
834. No, in 1889 the harbour itself, without the railway, was estimated to cost £250,000; now, in 1898, at page 17, you put down the cost at £200,000? That is not quite right. The actual facts are that the contract for the harbour works and railways was let for £200,000, of which £40,000 has been spent on railways, leaving £160,000 for the harbour.
835. In your evidence in 1889 you put it down at £250,000 without the railway? It has never been altered; it was £200,000 including the railway.
836. *Mr. Simpson.*] Was that before the contract was let? Yes.
837. *Chairman.*] In 1889 you put it down at £250,000 without the railway; a couple of months ago, in September, 1898, you put down the cost at £200,000? We let the contract for £50,000 less than the estimates. That would have been more correct if it had said inclusive of the railway.
838. Do you think that if we wait for another two years it will come down to £80,000? No; where we come down between our contract and the estimate is in the work itself. Our ideas were very large as to the size of the work. We modified those and reduced the contract to £200,000.
839. *Mr. Cohen.*] Does that contract hold good? Yes; I think it is a fair contract.
840. *Mr. Sleath.*] Have you gone into the question as to the probabilities of the work paying, or are you merely as an engineer carrying out the work? Our official capacity is only that of engineers, but I am quite satisfied about its paying. I am so satisfied with the company that I have a very large share in it.
841. Is it not sometimes customary, in a case of this sort, for a practical engineer to give a report? I am satisfied myself that the Smelting Company's trade alone will pay interest on the debentures, and I do not care for anything else but the debentures.
842. *Chairman.*] Do you know the total amount of stuff that the company is dealing with at present? No. I know that they expect to deal with a very large quantity when the harbour is made, but I do not think my evidence on that point would be as good as Mr. Weinberg's.
843. You hold that opinion, but still it is only an opinion? The amount required to pay interest on £200,000 at 5 per cent. is £10,000. It is clear that the dues from the Smelting Company alone will come to that—that is, treating 200,000 tons a year.
844. That is for over-sea stuff? Yes.
845. You think the Smelting Company can treat 200,000 tons a year at their present works? Certainly not; but I am satisfied that if this Bill is granted, the New Caledonia business alone will be sufficient, even supposing they do not make larger contracts with Broken Hill, to pay interest on the whole affair.
846. But the New Caledonia contract is in the air; for instance, they could not make it for at least twelve months? Yes; they have large stacks of copper ore already.
847. Do you not know that the New Caledonia company is under contract with some English companies to take their stuff, which does not expire for twelve months? Not for copper—only for nickel.
848. *Mr. Sleath.*] But there is no proposed contract for copper with New Caledonia? Yes.
849. Mr. Weinberg does not say so? My evidence is only hearsay.
850. *Chairman.*] Is Mr. Henderson a member of your firm? Yes.
851. I suppose you have drawn all of these plans in your office? The one before the Committee is Mr. Darley's; the rest were done by us.
852. Do you think there is any danger of this harbour silting up after being constructed on this plan? Not the slightest. There is no movement in the lake; it is dead water.
853. Will it be after the channel is made? Yes, except between the walls.
854. Do you mean to say that with the sweep of the Pacific Ocean into this channel you will have no silting? Where the channel is confined within stone walls, if there was any silting it would take it away; but there is no reason to suppose that there will be any sand difficulty. I am perfectly clear on that point.
855. Do you think the harbour works on that plan can be constructed for the sum you mention? Yes, easily.
856. *Mr. Sleath.*] You say that this work would be constructed easily in two years? Yes.
857. To the depth specified? Yes.
858. You seem to differ somewhat from Mr. Henderson; would you be surprised to learn that he does not think it would be? I do not know that he ever gave that evidence.
859. Would you be surprised if he gave this evidence:—The company could not go to the public in London and get money now for carrying out a 20 feet channel in two years, because the time is too short? That is quite right. What he means is this: If you apply to a man for debenture money, he is not going to take contractor's risks, that the work will be done to a day in two years; it would be unfair to ask him. You must have at least a fair margin of time. A contractor will take the risk of doing a work within a certain time under a penalty of £500 a week, but if a debenture-holder lends his money, and the work is not done, he loses the lot. All that we have had to deal with in the other evidence is the 15 feet channel. That would be completed in two years.
860. Are you a large shareholder of this company? I have no shares in the Sydney company; I have in the London company.
861. Mr. Harper appears as a director of the London company? Yes, I am a director.
862. You are still a director? Yes.
863. I suppose you know the Sydney and the London company are practically the same? I do not know that.
864. Is it not all money raised to carry on the same work? The London company is undoubtedly the financing body of the Sydney company.

- W. A. Harper. 865. You are a director of the London company, and you ought to know ;—is it not a fact that the Sydney company has practically ceased to exist? No ; it cannot have ceased to exist.
- 12 Dec., 1898. 866. I do not mean legally, but practically ;—how many shares are held by the Sydney company? I cannot tell you.
867. Do you know how many are held by the London company? Yes ; nearly all the shares.
868. Do you know how many the London company have got out of the original 10,000? I cannot say.
869. Would you be surprised to learn that they took up 9,970? No ; because I know they have nearly all.
870. If they have 9,970 out of 10,000, is it not a fact that they are practically the company? They are the largest shareholders undoubtedly. It is rather an academic question. I can tell you that there are some first-class people in the London company. I will not be a director when the works start.
871. Did you undertake the survey and preparation of plans for this work at the request of the Illawarra Corporation? Yes.
872. Did they make a contract with you to do it? No ; they simply employed us professionally in the ordinary way. They pay us a fee on the work as carried out.
873. Supposing the work is not carried out, how do you stand for fees then? We do not get any.
874. Do they pay you in shares or in cash? In cash.
875. That is, if it is gone on with? In any case.
876. Did you buy the shares which appear in your name in London? No.
877. Were they given to you for some consideration? I do not think I should go into that. I devoted considerable time in London to this business, and Mr. de Wolf gave me the shares himself personally. I did not ask him for them ; they have nothing to do with my firm or business.
878. *Mr. Simpson.*] I presume your firm have been paid cash for their plans? The work has been carried out by my partners, and their payment has been the ordinary engineering commission.
879. And paid in cash? Yes.
880. *Mr. Sleath.*] Your interest as a shareholder is purely a personal interest, and it has nothing to do with the firm? Yes.
881. There is something in connection with Amos's contract that I want to ask. Mr. Amos says that the contract was verbally accepted. I suppose there is nothing really binding between you? There is a proper contract prepared by Allen and Allen, acting for Mr. Amos.
882. The reason why I asked the question was because Mr. Amos in his evidence said that there was only a verbal contract? I can explain that. The original contract was a binding contract, but subsequently there have been some alterations in the work. When those alterations were made he submitted a tender that will have to be embodied in a contract when the work starts. The first contract has been modified.
883. No. In the evidence it is stated that he produced the tender dated 22nd April, 1897. He was asked if it had been accepted, and he said it had been verbally accepted? I am not going to commit myself as to whether it is or not. As soon as we start the works we will have that contract embodied in a legal form.
884. But Mr. Amos may not be prepared to proceed? Yes, he is.
885. But you have nothing here binding him? We do not care much. The contract has been let, but there has been an alteration, and he submitted a fresh tender. There is no object in the company doing anything more with that tender until the work is started. Then it will be put in the contract that the solicitors will prepare.
886. *Chairman.*] That is made an affair contingent on this scheme being accepted by Parliament? Yes ; we are morally bound to Amos. He has done the work well ; he has got the contract ; and the delay has not been his fault.
887. I mean there is nothing binding whatever. He cannot hold you responsible ; you cannot hold him responsible ; but you are morally bound to him? I think he can hold the company responsible ; and if they do not conclude the contract with him they will have to pay a penalty.
888. You think that if the company does not finally arrange the contract they will have to pay a penalty? Yes.
889. *Mr. Moseley.*] At the bottom of page 27 you will see Question 637, "But there has been another contract—the terms and conditions are identical"? Yes.
890. *Mr. Sleath.*] But does it not say in that question that the company will have to pay 90 per cent. monthly on the work done? The contract is binding. If the corporation do not carry out that contract they have to pay Mr. Amos a certain penalty. I do not remember what it is. The schedule of prices which is embodied in the contract has been subsequently amended. That second schedule has not been embodied in the second contract.
891. *Mr. Cann.*] Was that contingent on the giving of notice to go on with the work? Yes ; or paying the penalty.
892. There is this reservation that you have to give notice to go on with the work—then he is liable, and you are liable if the notice has been given? Yes.
893. Then there is nothing in existence until that notice has been given? Yes.
894. *Mr. Sleath.*] Mr. Amos, in giving his evidence, was asked by Mr. Trickett, "You say that within two years of getting notice to proceed you will have the work done in accordance with the Principal Act"? He answered, "Yes, to a depth of 15 feet." Then he explains that Mr. Armstrong, the managing director, made a verbal contract? I think that is pretty nearly correct.
895. *Mr. Cohen.*] Were the detail plans submitted to Mr. Darley? Yes, every detail.
896. And he signed his approval? He returned the plans with this modification of the breakwater. We then adopted it, and resubmitted it.
897. Did he sign it? He never signed our plans ; we got his report approving of it.

Andrew Armstrong called in, sworn and examined :—

- A. Armstrong. 898. *Mr. Simpson.*] What is your connection with the Illawarra Harbour and Land Corporation? I am Managing Director of the Illawarra Harbour and Land Corporation in the Colony.
- 12 Dec., 1898. 899. *Mr. Sleath.*] You are Managing Director of the Sydney company? Yes.
900. Who are your co-directors? At present, Mr. A. B. Chippendall and Lieutenant-Colonel Neild.
901. How long has Mr. Chippendall been upon the Board? About three years, I think ; I could not give you the exact date.
- 902.

A. Armstrong.
12 Dec., 1893.

902. How long has Lieutenant-Colonel Neild been upon the Board? About two years.
903. When did Mr. Chippendall first become interested in the Company as a shareholder? He had some shares in the Illawarra and Land Corporation in the Colony before the London company was formed. He now holds one share in the local company.
904. How many in the London company? £500 worth.
905. How did Mr. Chippendall become a shareholder in the first place? He is my brother-in-law, and I gave him shares immediately the company was formed—in its early days. I divide many of my interests among several of my relatives and my children.
906. So that Mr. Chippendall did not pay anything into the company for his share interest? Nothing whatever.
907. When did Lieutenant-Colonel Neild first become interested in the company as a shareholder? By direct allotment by the London company after it was formed. Lieutenant-Colonel Neild was promised by me an interest in the syndicate when it was formed. I think in 1838. In pursuance of that promise, under my direction in London, certain shares were allotted to him after the formation of the company there. All the Colonial shares had heavy liabilities, and Lieutenant-Colonel Neild being a friend when the company was formed in London, I directed the allotment to him of a certain number of shares without liability. The shares were allotted to him without his knowledge, leaving it to him to accept them or not, as he pleased. He accepted them. The company was formed in November, 1895, but we had no knowledge of the formation of the company until February, 1896, and it was about May, 1896, before Lieutenant-Colonel Neild had any knowledge of any shares being allotted to him.
908. When did Lieutenant-Colonel Neild become a shareholder in the Sydney company? I had merely told him on the conclusion of some old things in which we were interested that I would put him into the company. He never had anything more tangible than that until the shares were allotted to him in May, 1896.
909. So that, although you had made this promise to him, he had no legal interest until May, 1896? That is so.
910. You remember that sometime in 1895 you were asking for an extension of your original right under the Act? Yes. We got a second Bill through in October, 1895.
911. Was Mr. Neild then in charge of that Bill? Yes.
912. Had he any interest in the company then? Nothing more than the promise I had given him long, long before that, that I would put him into something in consideration of the various losses we had had together.
913. *Mr. Ashton.*] He did not know that that promise applied to this particular company;—he did not know it at that time? I do not think he could have known it. His share had taken no tangible form. He was not, directly or indirectly, a shareholder.
914. Your statement is, that he did not know he was a shareholder? Quite so.
915. *Mr. Sleath.*] You say that he did not know that at the date you applied for your second Bill? I do not think he could possibly have known it.
916. *Mr. Ashton.*] He did not know that you were going to fulfil your promise by giving him shares in this particular company? No. He did not know anything about the fulfilment of my promise until I advised him that certain shares were allotted to him in the London company. That was about the end of February, and it was early in May, 1896, I think, when the shares were allotted. We had no knowledge at all that the company would be formed until late in December, 1895.
917. *Mr. Sleath.*] When did Mr. Neild become possessed of his shares in the Sydney company? I cannot fix the date exactly, but I should think it would be about April, 1896.
918. Do you remember giving evidence on the 11th October of this year before the Select Committee of the Legislative Council? Yes.
919. Do you remember stating that Mr. J. C. Neild had been interested in the company from the very start? Yes.
920. Can you explain now to this Committee, in your own way, the difference between the two statements;—you say to-day that up to April, 1896, Mr. Neild had no interest in the company? He was a registered shareholder at a certain date, and I recognised him as a shareholder at another date. I distinctly told him that I would put him into the first large thing I formed, and in my own mind he was a shareholder. On looking at the date, since I gave the evidence to which you have referred, I find that nothing occurred to put him in the position of a tangible or legal shareholder until May, 1896.
921. Do you not think, then, that the evidence you gave before the Select Committee of the Legislative Council is somewhat misleading? It may be misleading, but I think you will agree with me that it was in accord with my own mind in the matter—nothing more than that. I gave the evidence without the slightest intention to mislead.
922. But on reading the evidence now, does it not appear to you that it is slightly misleading? It is calculated to mislead, and I should regret very much having misled any select committee of Parliament. What I had in my mind was the distinct understanding that I would put him into something I mentioned to him in the early days, that when I was forming a large thing I would not forget our old losses together.
923. You have had a large experience in the formation of companies? Fairly large.
924. In those matters, is there not always the possibility of a change of directors from a variety of causes? Of course, the directors may resign or may retire in rotation.
925. So that if you wanted to put anyone into a particular concern you would put him down in the registered list of shareholders? That is rather a wide question. I do not wish to shirk any question, but I scarcely understand the full meaning of what you ask.
926. Suppose you were going to give me an interest in a company, you would put me down on the share register and transfer certain shares to me? As a rule, companies are formed by seven persons uniting and agreeing to the formation of a company. There must be seven. They generally put themselves down for one share and arrange the details afterwards. The directorate is afterwards formed according to circumstances. In some cases those forming the company are not competent to form the directorate, and in that case the directorate is formed of other persons.
927. What I mean is this: If you are going to give anyone an interest for a consideration—it does not matter what—it is done, as a rule, immediately after the company has been formed? It can be done at any time. We can transfer the shares to any particular person, but it is generally done as you suggest.

- A. Armstrong. 928. Mr. Neild is supposed to have obtained his share in settlement of many little transactions, as you put it? Yes; but they were transactions which left nothing binding against myself.
- 12 Dec., 1898. 929. Let me refer you to your evidence before the Select Committee of the Legislative Council; in reply to question 809, referring to Mr. Neild's interest in the concern, you said, "I agreed to put him into it, and I did put him into it in about the year of our starting the concern";—do you remember saying that? I said something like it, I perfectly remember. I have explained, as far as I can possibly explain up to the present, my meaning in giving that evidence. It was only in reality a continuation of the same line of evidence.
930. What you mean to say then is that you gave Mr. Neild an interest in 1888, and that he did not include that interest in his asset at the time of his insolvency? I was asked a number of questions at the meeting of the Select Committee of the Legislative Council which had reference more or less to Mr. Neild's insolvency, and portions of the answers were excised by the direction of the Chairman from the official record. Portions of my answers were purposely withheld.
931. *Mr. Ashton.*] Is that your explanation of this misleading statement? To a very great extent.
932. What you mean is that you fenced the questions? I do not mean that, but I was asked questions which were entirely beyond my position as managing director of the company. Matters entirely beyond my control or knowledge.
933. You admit that the answers you gave to questions asked you in the previous inquiry were calculated to mislead? Yes.
934. Is the reason you gave the answers which have been quoted in the particular form in which they appear that you wanted to shield Mr. Neild? No.
935. Let me refer you again to your answer to question 809;—the question was, "Was this arrangement between you and Mr. Neild giving him his interest in the concern in writing"? The answer was "I do not think it was." That is to say you were not sure whether it was in writing or not. Now you say that Mr. Neild did not know anything about it until 1895 or 1896? Exactly. I was not sure at that date whether the arrangement was in writing or not.
936. Had you any doubt in your mind whether Mr. Neild knew anything about the matter before 1896? I know that he was aware that I had told him that I would put him into the first big thing I was in.
937. The company might be so good that you might not deem fit to put him in? All all events that is all the knowledge he ever had. Yet in my mind I looked upon him as a shareholder in the company, and from the start my evidence I think conveys that impression.
938. He was a shareholder in your mind only? Exactly.
939. *Mr. Cohen.*] When you put Mr. Neild into the company did you not tell him that you would put him into a certain company, naming it? I think not. I wrote to him at the end of February, 1896, informing him that, following upon my old promise to him, I had recommended the allotment of certain shares to him in the London company.
940. You did not mention to him the name of the original company he was in? No. I said I think that it would be a company he could be put into without liability.
941. You say now that in 1896 you told Mr. Neild that, in consequence of your promise, you were giving him certain shares in this company? No; I told him that as far back as 1890, I think.
942. You told him then that you would put him into something? Yes.
943. And in 1896 you told him that you had recommended the allotment to him of 1,000 shares in a company formed in London to continue the operations of a company which had been formed in Sydney? Yes.
944. In May, 1896, Mr. Neild knew the exact interest he held in this company? Yes.
945. He knew the company and everything about it? Yes.
946. Prior to that year he was ignorant, you think, of what he was in? That is exactly what I mean to convey.
947. *Mr. Ashton.*] On page 31, in reply to question 747, referring to Mr. Chippendall's interest, you were asked, "How were the shares acquired"? and you said, "I do not know that I could tell you"; you were afterwards asked how Lieut.-Colonel Neild's shares were acquired, and you answered, "In the same way";—can you throw any light upon those two answers? I do not think they are at all anomalous. Mr. Chippendall was my brother-in-law, and I promised him a small portion of one of my syndicate shares.
948. Then, according to your answer now, you did know how Mr. Neild's shares were acquired? I knew that there was an allotment of shares to Mr. Neild by the London company. As far as I can recollect the question was put to me in such a form in the first instance that it could not be easily answered.
949. Could you not have very simply answered the question "How were the shares acquired"? That is explained fully in the answers which followed. The questions which were put at first developed other questions.
950. What I want to get at is the development of the answers? My answer as to Mr. Chippendall was that I had given him an interest in a portion of my syndicate share.
951. There is nothing in the evidence to show how Mr. Chippendall acquired his interest; in fact there is your direct statement that you do not know that you could tell the Committee? That question is developed in succeeding questions.
952. You say now that Mr. Chippendall had a small portion of your syndicate share; but listen to your answer to question 748:—The question is, "You do not know how?" and the answer you gave was "I know that he had a very small interest in the formation of the first syndicate and in the allotment or settlement of shares afterwards in the colonial company—all was transferred to Mr. de Wolf for the purpose of enabling him to finance in London." Mr. Chippendall got certain shares by virtue of a certain interest. The point is how did he acquire that interest; what was the basis of his share allotment. In answer to question 747 you said that you did not know that you could tell; then in the succeeding question with regard to Mr. Neild's interest you said that it was acquired in the same way as Mr. Chippendall's? Yes.
953. *Mr. Cohen.*] As Mr. Ashton has pointed out, you said in the first instance that you could tell how the shares were acquired; when you were asked questions upon this point to-day you said that he was your brother-in-law, and that he was given a small interest in your syndicate share;—from the form in which

which your answer was previously given when you said, "I know that he had a very small interest in the formation of the first syndicate," no one would assume that it was part of your interest? I admit that the answer to Question 748 is to some extent misleading.

A. Armstrong.
12 Dec., 1898.

954. *Mr. Ashton.*] You confess that, before the Select Committee of the Legislative Council, you said you were ignorant of how Mr. Chippendall acquired his shares, when you knew that you had given them to him? I think it is hardly fair to put it in that way.

955. Can you put any other construction upon it? The answers afterwards developed show that Mr. Chippendall came in as holding part of my interest.

956. I do not think the answers show that he held part of your interest? No questions were put to me by the Committee which permitted of my making the explanation in precise terms that Mr. Chippendall held part of my interest.

957. Why did you not tell the Committee at once that Mr. Chippendall held part of your interest instead of saying that you did not know that you could tell them how he acquired his shares? I had no intention of misleading the Committee.

958. *Mr. Cohen.*] Another point is this—you were asked how Mr. Neild acquired his shares, and you said in the same way as Mr. Chippendall? Yes.

959. Then are we to assume that Mr. Neild also had a small interest in the concern from the first? No.

960. *Mr. Ashton.*] There is nothing in the evidence which you gave before the Select Committee of the Legislative Council to show that Mr. Chippendall's share was a part of your interest? I did not feel at all clear that the question as put to me left me an opportunity of stating so. I certainly had no desire to suppress the fact that Mr. Chippendall acquired his shares through my syndicate interest.

961. *Mr. Carroll.*] Is Dr. Storer a resident of this Colony? No.

962. He has twenty shares, I understand? Yes.

963. *Mr. Cohen.*] Let me refer you to Question 801. In reference to Mr. Neild's interest you were asked—"How did he acquire that interest?" and you answered, "I really cannot tell you; but I may say at once that even if I could remember, I should decline to answer the question. Mr. Neild and I had many private and friendly transactions. We were in adjoining offices years and years ago. As a matter of fact, I do not remember the exact particulars. Even if I did, I would not go into them";—how do you reconcile that answer with your statement to-day? I can only continue my explanation by saying that this answer was given to badgering questions concerning Mr. Neild's insolvency. A great deal of the evidence has been purposely excised. What you see does not give a fair resumé of the questions as actually put.

964. Take your answer to Question 806; you were asked: "Was that arrangement, whereby Mr. Neild took an interest to the extent of £1,000, by virtue of the arrangement made between you and him in 1888?" your answer was, "Yes; by virtue of interest or rights in the company springing out of his transactions with me in 1888";—now, you say he did not know anything about the matter until 1896? Excepting my verbal promise in 1888 or 1890.

965. Referring to no particular company? Quite so.

966. *Mr. Sleath.*] Mr. Neild did not know that he had any interest at all in this company, or in any particular company, until May, 1896? No.

967. *Mr. Ashton.*] You must admit that the answers you have given to-day, side by side with the answers you have given to a previous Committee, are unsatisfactory; the explanation is, I take it, that you did have an arrangement with Mr. Neild in 1888 in regard to an interest in this company, and that Mr. Neild, probably because he looked upon the thing as nebulous, did not include the interest in his list of assets at the time of his insolvency? No arrangement was made then. I have endeavoured to explain to you that that arrangement was made entirely in my own mind. I intended to put Mr. Neild into the first big thing. The matter was entirely in my own mind.

968. *Mr. Waddell.*] You could scarcely call that an arrangement? There is no other arrangement, and, as I have said, Mr. Neild had no knowledge of it until 1896.

969. You adhere positively to that? Yes. When these questions were asked me, I did not know that I had written to him at all on the subject; but I have searched my letter-book, and I find that I wrote to him in May, 1896, informing him that he had been allotted a thousand shares in the company formed in London.

970. *Mr. Ashton.*] His first interest was in the company duly registered in London? Yes.

971. He did not hold any interest in the syndicate before he held these shares in the London company? No; there was nothing beyond my promise.

972. Then your statement that he had a small interest in the formation of the first syndicate refers only to the arrangement to which you have referred as being your own mind? There was merely the indefinite promise that I would put him into something. It is quite possible that in some way or other I may have mentioned this matter to him when I first began to form the syndicate in 1888.

973. *Mr. Cohen.*] Was it in 1888 or 1890 that you wrote to Mr. Neild that in pursuance of your former promise he had been allotted shares in this company? No; I wrote nothing to him on the subject until 1896.

974. *Mr. Sleath.*] How did Mr. Neild acquire his shares in the Sydney company? By being a large shareholder in the London company. Requiring a director, I suggested the matter to him, and I told him that he would have to be a shareholder in the Colonial company. He acquired one share by purchase. I am not cognisant of the circumstances. It is possible that he bought it for a trifle.

975. Will you refer to your answer to Question 811 on page 34. You have sworn that Mr. Neild acquired his share in the Sydney company by purchasing from someone, and that you had no knowledge of the transaction. In reply to Question 811, you said, "The share in the Sydney company means that he had a share in the company which was settled by the allotment in the London company. One of the shares he still holds here"? Yes.

976. Now will you refer to the following question and answer—"Has he held it long"? Ever since the date of the allotment to him under the old arrangement in 1888, to which I have referred? Yes, that is quite consistent with what I now say.

977. But you say now, that after acquiring these shares in the London company, he afterwards, outside of those shares altogether, and quite independently of you, acquired another share in the Sydney company;—will you explain the inconsistency? That is clearly an error.

978-9.

- A. Armstrong. 978-9. *Mr. Cohen.*] Which is the error—your former statement, or your explanation to-day? I do not think it is fair to put me in this position.
- 12 Dec., 1898. 980. *Mr. Ashton.*] But the Committee ought to know, surely, which statement is true? The evidence is contradictory. I clearly made an error in giving my evidence before the Select Committee of the Legislative Council.
981. The printed evidence you say is wrong? Yes.
982. *Mr. Sleath.*] You say that it is absolutely wrong? I am sure that Mr. Neild's interest in the local company was not acquired until long after he had held 100 shares in the London company. He obtained his share by transfer outside of my transaction altogether, simply in order that he might be elected to a seat on the Board.
983. You say now that your answers to questions 811 and 812 in the Legislative Council's Select Committee were absolutely wrong? Yes.
984. Question 813 is as follows:—"Is it a *bonâ fide* claim which he has in this company?"—and you answered, "It is a *bonâ fide* claim against me, settled by my putting him into the earlier syndicate"? That related to my promise; there was only my promise.
985. Did you promise to put him into the earlier syndicate? I promised to put him into the first good thing I had. I believe I advised him in 1890 that I had put him into the company. If I had said that by way of answer it probably arose from the belief in my mind that I had made the promise to him. That is what I had in my mind when I gave the answer to question 813.
986. You said in reply to question 813 that you had put him into the earlier syndicate; now I want you to answer this question: Did you or did you not put him into that syndicate? I only put him into it by my promise.
987. Did you put him into that syndicate, or did you not? I did not.
988. Although, on the 11th October, you swore that you did? My statements are a continuation of the same evidence.
989. *Mr. Cohen.*] You say now that you never put him into the earlier syndicate? Except as I have already explained, that there was my promise to him that he should be put into the first big thing I had.
990. *Mr. Archibald Campbell.*] Did you read the printed copy of the evidence taken before the Select Committee of the Legislative Council before it took its present form—the form in which it appears before this Committee? Yes; many alterations were required in consequence of portions being excised having reference to Mr. Neild's insolvency. The Committee determined that these portions should be excised, and the context was not clear.
991. You passed the evidence in the form in which it now appears? I presume so.
992. *Mr. Cohen.*] Were you present in the House a few nights ago when Mr. Neild explained how he became possessed of these shares? I was.
993. You heard his statement? Yes.
994. You heard Mr. Neild make a statement similar to that which you are making to us now? Yes.
995. That was subsequent to your giving the evidence from which quotations have been made? Yes.
996. *Mr. Sleath.*] We do not want to have any other Select Committee inquiring into your answers; I want you to clearly understand this question, therefore, before you answer it: How long have you been in Mr. Neild's company since the discussion in the House upon this question a fortnight ago? Three or four times for a few minutes.
997. For a few minutes only? Perhaps for an hour on one occasion.
998. Did you discuss this question at all? Certainly not.
999. You never mentioned it? No.
1000. You are positive about that? Quite positive.
1001. You quite understand that you are on your oath, and that your oath here is just as sacred and binding as it would be in any court of the Colony; I will give you an opportunity to correct your evidence if you choose to do so;—will you positively swear that you never in any way mentioned the affairs of this company to Mr. Neild on the three or four occasions you mentioned when you were speaking to him? We may have mentioned the affairs of the company, but to no point referring to his interest or to his share. I had occasion to meet him in reference to the affairs of the company.
1002. Did you not say just now that you had never mentioned the matter? Not matters arising out of my evidence.
1003. My question applied to the affairs of the company since the discussion in the House; you have, then, discussed with Mr. Neild some of the company's affairs? Yes.
1004. The question of the extension of time? No; most certainly not.
1005. You have not mentioned to him the probability or otherwise of the Bill passing the House? No; neither directly nor indirectly.
1006. Had you any reason for not doing so? I thought it was not proper to do so.
1007. Why? There was no occasion to do so. I thought it was not right under the circumstances to make any allusion to any subject of the kind.
1008. *Mr. Ashton.*] Would you have seen any impropriety in doing so? I should have thought it improper, in view of the fact that Mr. Neild was a member of the Select Committee.
1009. *Mr. Sleath.*] Have you had any conversation with Mr. Neild since the day when he practically resigned his seat from this Committee; you remember the day to which I refer? I do not think I have. If I had it was only for a few moments behind the Chair. I have not seen him otherwise.
1010. Is your memory fairly good? Yes.
1011. Did you not meet Mr. Neild in the passage here? I saw him there.
1012. Were you not conversing with him in the passage? No; I had no talk with him at all, either directly or indirectly, upon any matter connected with this inquiry.
1013. Is it not a fact that you are a strong personal friend of Mr. Neild? Yes; we have known one another for many, many years.
1014. You are very friendly? Yes.
1015. You are both interested in the passing of the Bill which has been referred to this Committee? I am interested in it. I do not know what interest Mr. Neild may feel in it.
1016. You know that he is a shareholder in both companies? Yes.

1017. Both of you being interested in both companies, and you being close personal friends, you swear that the affairs of the company were never mentioned between you on the three or four occasions to which you refer? We never mentioned the matter the Committee is now inquiring into. A. Armstrong.
12 Dec., 1898.
1018. The Committee is now inquiring into the Bill;—did you not mention the Bill to him? We have never discussed the Bill since his speech in the House.
1019. *Mr. Waddell.*] Although you have seen him several times? Yes.
1020. *Mr. Ashton.*] You say you revised the evidence you gave before the Select Committee of the Legislative Council? Yes.
1021. And the evidence as printed is as you revised it? Yes.
1022. You admit that in many particulars the evidence you gave before the Select Committee of the Legislative Council was incorrect? Yes.
1023. What has led you to alter your evidence? On what particular points?
1024. On the points on which you admit it to be incorrect? I fully believed that I had written to Mr. Neild to the effect that he should have an interest in the company. I quite believed that when I gave my former evidence.
1025. Why do you hold a different opinion now? I have since looked at my letter-book, and I find that I first wrote to Mr. Neild on the subject in 1896.
1026. Is your change of view or alteration of statement in this particular due to the fact that you heard Mr. Neild give a different version of the affair in the House? I do not think his statement influenced me a single bit. I simply looked up my correspondence.
1027. Why did you do that; you had revised your evidence; what suggested any doubt to your mind that you had given correct evidence;—what led you to suppose that you had given misleading or untrue evidence? Principally the statements which were made in the House.
1028. You said just now that it was not Mr. Neild's statement that induced you to alter your own statement? It was the statements generally in the House which led to this Bill going before the present Committee that induced me to look at the correspondence.
1029. That is to say, it was owing to the proceedings in the House that you made further investigation and found out that your former evidence was incorrect? That there were slight errors in my previous evidence.
1030. Was not the only statement which could have thrown any doubt upon the accuracy of your previous evidence made by Mr. Neild himself—that is to say, he gave a different version of the affair than that which you yourself gave before the Select Committee of the Legislative Council? I think he did.
1031. Is the version you have given to-day substantially in accord with the version given by Mr. Neild? That I could not say. I only heard it once.
1032. Will you admit that the version given by Mr. Neild in the House was a very different one from that given by you before the Select Committee of the Legislative Council as to the acquisition of Mr. Neild's interest? Yes; there were certain inaccuracies in that evidence. I think they were very unimportant, but they were inaccuracies.
1033. Mr. Neild, speaking in the Legislative Assembly on the 1st December, said, "Mr. Armstrong, over and over again, said to me—as long ago at least as 1884, I suppose—'Well Neild you have lost your money through my proposals, and I will take care that when I have something good you shall stand in with me, and it shall not cost you anything'; that was, it seems to me, a straightforward act, and it was stated by Mr. Armstrong to me often enough that I was to have an interest in this Illawarra matter";—is that a correct statement? I do not think it is. I do not remember telling Mr. Neild that.
1034. He also says, "Year after year passed by, and sometimes it would be mentioned when we met, but, as I say, it was chiefly forgotten";—is that correct? I have no recollection of mentioning the matter to him between 1890 and 1896.
1035. In what year did Mr. de Wolf go to London? In 1894.
1036. When was the London company formed? In November, 1895.
1037. *Mr. Archibald Campbell.*] A month after your Extending Bill was granted? Yes.
1038. *Mr. Cohen.*] When was the scrip forwarded to Mr. Neild? About May or June, 1896. You refer, I presume, to the scrip in the London company?
1039. Mr. Neild also stated in the House on the 1st December, "After Mr. de Wolf went to London and the London company was formed, I received one day from London, without any previous intimation, a notification to this effect: that 100 shares of the nominal value of £10 each in the company in London had been transferred into my name, and that the scrip could be obtained at the office of the Sydney company";—is that correct? Yes.
1040. He also said, "I say that the promise was made as far back as 1884, probably earlier, and I suppose it was towards the end of 1894 that the scrip was forwarded to me"? That is a mistake. There was no scrip in the London company until about January, 1896.
1041. *Mr. Ashton.*] You stated before the Select Committee of the Legislative Council, you may remember, that Mr. Neild had an interest in the thing from the commencement? Yes.
1042. I asked you here to-day how you came to make that statement, and your reply was that you had an impression that you had intimated to Mr. Neild, prior to 1896, that you had given him an interest in the company, but that on looking up your letter-book you found that it was not so? I found that the first letter I wrote to him on the subject was dated May, 1896.
1043. When you gave your evidence before the Legislative Council you thought otherwise? I thought I had intimated to him that I had given him a portion of my syndicate interest in the company, but I can find nothing to support the opinion I then had.
1044. Then, Mr. Neild also stated in the House that at various times subsequent to 1888 you did mention to him that you had put him into the syndicate? I have no recollection of having spoken to him about the matter during that time.
1045. Yet at the time you gave your evidence before the Legislative Council your recollection was that you had done so? There appears to be a discrepancy there.
1046. Mr. Neild recollects the same thing; now you say, although you recollected the circumstance when giving your evidence before the Select Committee of the Legislative Council, and although Mr. Neild himself recollected it when speaking in the Legislative Assembly, that you have no recollection of anything of the kind? The point seems to me to be merely a question of whether he held an interest under

- A. Armstrong. under the promise from me at that date or later. I do not remember making a communication to him between the dates you have named.
- 12 Dec., 1898. 1047. *Mr. Waddell.*] Who found the £10,000 which was deposited with the Treasury? Our attorney in London Mr. de Wolf.
1048. Did any of the original shareholders pay anything towards it? No.
1049. *Mr. Cohen.*] Was it not contributed by the Camden Exploration Company and by the Australian Smelting Company? These are matters about which you could get information a good deal more readily from Mr. de Wolf. I am merely managing director of matters at this end. I know nothing of the details of the matters to which you are referring.
1050. Was it from this end that the money was found? No; it was remitted from London.
1051. *Mr. Ashton.*] How much hard cash did you put into this enterprise? I can produce my cheque book showing that I paid £13,000. My account-book shows other charges amounting to a total of £18,000.
1052. What interest did that give you in the syndicate? Approximately one-sixth.
1053. You have not your cheque books with you? No.
1054. How were the local directors appointed;—were they elected at a meeting of shareholders? Yes.
1055. *Mr. Cohen.*] There are only three? There are only three at present. Until the harbour is started there is only the management of the landed estate required at this end.
1056. *Mr. Sleath.*] I was asking you if you had any conversation with Mr. Neild in regard to the affairs of the company since this Bill was referred to this Committee by the Legislative Assembly, and you said you had not;—is not that so? Yes; I had not.
1057. You are positive about that? Very positive.
1058. Although you had been in conversation with Mr. Neild three or four times, the conversation in one instance extending to an hour, you have not in any one instance discussed with him the affairs of the company? Not the affairs of the company as regards the matter being before Parliament, but I certainly had some company matters to discuss with him. For instance, I had to submit cheques for the payment of railway accounts and other things.
1059. Is it not a most important question for your company now whether or not you get this Bill? Undoubtedly it is.
1060. Is it not a most important question for the company? Yes.
1061. You are managing director, are you not? Yes.
1062. Mr. Neild holds what position? He is Chairman of the Board.
1063. Yet you say that on the occasions to which I have referred you never discussed with him the affairs of the company? No. We have had no meetings for the purpose. I have only met him in a casual way. For instance, I met him the other day at the door of this room. We did not then go into company matters, and we have had no meeting of directors since.
1064. What is your interest in the company? £100,000 worth of shares, one-sixth of the share issue.
1065. The shares are paid up to £10? Yes.
1066. With a liability of £50? With no liability; they are shares in London company.
1067. At the formation of the company only 10,000 shares were issued, paid up to £50? Yes.
1068. The payment of calls is a separate matter altogether? It is separate in some ways. Your question has rather a wide meaning.
1069. I will put it in this way—Your company was floated with 10,000 shares of £100 each? Yes.
1070. You were to get one-sixth? I was in the syndicate who formed the company.
1071. What was your interest? I took one-sixth interest in the whole concern.
1072. How much money did you put in? My cheque-books show that I paid £13,000, but my account-book shows that I paid altogether into the concern £18,000.
1073. *Chairman.*] That was for the purchase of the land originally? Yes.
1074. Did Mr. de Wolf pay part of that amount? No; no part of that. I am speaking now of my own payments.
1075. That £13,000 was paid by you for the purchase of the land? Yes.
1076. How much was paid altogether? £90,000. £65,000 for the Lakelands Estate, and £25,000 for the coal properties.
1077. Was that all in cash? No. The coal properties were purchased for half cash, and the balance of purchase money was in syndicate shares.
1078. That was purchased from Styles? No, we purchased nothing from Styles. The Lakelands Estate was purchased from a syndicate who had purchased from the Osborne family. The price paid was £65,000.
1079. How was that £65,000 paid? We bought from a syndicate. We did not purchase from the Osbornes direct, but we kept the terms.
1080. *Mr. Cohen.*] You were one of the syndicate which sold to your syndicate? No; I came into the syndicate after the syndicate was formed. I purchased a share in it.
1081. *Mr. Ashton.*] You were not in the selling syndicate? No, I purchased a share after the syndicate was formed.
1082. Were you in the syndicate which purchased from Osborne;—did you buy into the syndicate? No. I was not. I had nothing to do with that.
1083. *Chairman.*] It was Styles and Vaughn who purchased from Osborne? No. That was a different matter altogether.
1084. Who was it who owned the land in the first place? The Lakelands Estate syndicate was the syndicate which purchased from Osborne.
1085. Were you not in that? No; I never had any connection with that. I sold the land on their account to a syndicate formed in Melbourne by Mr. de Wolf.
1086. Were you in the syndicate who purchased? I bought into that syndicate afterwards.
1087. After the sale? Yes.
1088. That syndicate was yourself and Mr. de Wolf? Yes.
1089. Anyone else? Mr. Vaughn came into that syndicate as the holder of shares in part payment. He bought his syndicate share in part payment of the balance of his purchase money. He acquired his interest in the settlement of the property. He sold the property for £25,000—half cash and half shares.
1090. To whom did he sell the property? To Mr. de Wolf. 1091.

1091. Was that previous to the purchase of the Lakelands Estate by Mr. de Wolf? I think it was a A. Armstrong.
month or two afterwards.
1092. Whom did the syndicate consist of when they bought the Lakelands Estate—Mr. de Wolf and ^{12 Dec., 1898.}
whom else? Mr. Fink, of Melbourne.
1093. You are sure about that? Yes.
1094. Mr. de Wolf and Mr. Fink were the original syndicate which purchased the Lakelands Estate from
another syndicate which had purchased from Osborne? Yes; and I was the agent who sold.
1095. Whom else was in the syndicate with Mr. de Wolf and Mr. Fink? I think only Mr. Fink and his
brother-in-law, Mr. Howden. Mr. Newton bought into it in Sydney.
1096. Did Mr. Newton buy into the syndicate when the land was sold? No; the property was sold to
Mr. de Wolf, who formed the syndicate.
1097. He afterwards formed the syndicate? Yes. The syndicate was not formed until after the sale of
the land to Mr. de Wolf.
1098. So that you sold direct to Mr. de Wolf? Yes.
1099. You were the agent? I was the agent for the syndicate who sold.
1100. Who were they? I could not say; I was instructed by Mr. Atcheson.
1101. The agreement for the sale was with Mr. Thompson, and yourself, and Mr. Newton and Mr. Orr?
No; a syndicate was formed to acquire from Mr. de Wolf, purchasing in the name of trustees on behalf
of the syndicate formed by him.
1102. Was there not an agreement in 1889 between Mr. Thompson and yourself, and Mr. Newton and
Mr. Orr? There was one in 1888; the second agreement in 1889 was a modified agreement to the same
effect.
1103. The next was dated 24th April, 1890, between J. Thompson and Andrew Armstrong with the
Illawarra Harbour Land Corporation;—is that so? Yes.
1104. When you sold to the Illawarra Harbour and Land Corporation did you part with the whole of
your right in connection with the property? Yes.
1105. Do you know anything of an agreement between Mr. de Wolf on the one part and Mr. Fink on the
other for the transfer of the property from Mr. de Wolf to Mr. Fink? Yes. I think Mr. Fink, as the
preponderating shareholder, tried to pinch out the other shareholders, and to get possession of the whole
thing himself.
1106. Why did Mr. de Wolf try to transfer to Mr. Fink;—what were his reasons? I presume to allow
money to be raised to meet one of the terms of our payment. Mr. Fink had undertaken the whole of the
financing.
1107. What consideration was Mr. Fink given to undertake all this financing? The interest described in
either of the agreements you have mentioned, or some other registered agreement under which he came in.
I really cannot remember how he was to be paid for financing the matter. He was to take it home to
London through his being the managing director of the Mercantile Finance Company.
1108. When this property was transferred to Mr. Fink by Mr. de Wolf, did Mr. Fink have any power
over it by the transfer? Yes; it gave him very considerable power.
1109. Could he have sold it if he liked? Yes; the equity of redemption.
1110. Did he not mortgage it on the same day to Wallach Bros.? Yes.
1111. To meet one of the payments due to the syndicate? I think it was to meet a payment of £8,000
due at that time.
1112. *Mr. Sleath.*] Was not the payment on a promissory-note of your own and de Wolf's? To a certain
extent it was, although we had met all our payments in the syndicate and he had not. He induced us to
give a promissory-note to enable him to meet a certain payment due to the syndicate. We had to take
up that note afterwards to meet payments on the land.
1113. *Mr. Cohen.*] There was a little bit of cross financing among yourselves? Yes. Mr. Mosely was
the attorney for us all and kept a record. I daresay he could produce the abstract of title embodying the
whole of the particulars.

John Randall Carey called in, sworn, and examined:—

1114. *Mr. Sleath.*] When did you first become associated with the Illawarra Harbour and Land J. R. Carey.
Corporation? In October, 1888.
1115. You then became the holder of how many shares? I should explain that Mr. de Wolf asked me ^{12 Dec., 1898.}
to join the Board, and I demurred a little at first. He said I was a large contractor—that I was in a large
way of railway contracting—and that I would be of advantage to them considering, the work likely to be
carried out, and that he would be very glad if I joined the Board. After a little persuasion, he said,
“Sooner than that you should not do so I will make you a present of thirty shares, to which I am entitled
as one of the vendors.”
1116. *Chairman.*] Thirty shares of £100 paid up to £50, with a liability of £50? Yes.
1117. *Mr. Sleath.*] How long did you hold those shares? I had attended a few meetings before the
shares were allotted. I cannot absolutely state at this moment when the allotment took place, but the
minutes will show whether I attended any meetings after the allotment or not. I declined to take shares.
After attending the first few meetings, and seeing the position of the company, I declined to remain on
the Board or to have anything more to do with it. I said I would not take the shares, and I was told
that the shares were allotted to me on the 28th March, 1889.
1118. *Mr. Ashton.*] Was that after you had vacated your seat on the Board? That I cannot say. I
have not the necessary papers. I endeavoured to obtain them from my solicitor, but he has mislaid them.
1119. Was the allotment made to you after you had intimated that you did not want any shares?
That is the very point I want to get at. I cannot absolutely tell you. My solicitor had the papers,
but he has unfortunately mislaid them. The register shows that there were thirty shares allotted to me
on the 28th March, 1889. That date was found to be illegal by some means; I do not remember how.
In consequence of that I thought there would be no trouble about striking my name off the register, but
they altered the date on the register from the 28th March to the 16th April, without any minute on
the book authorising it, and without any re-allotment of shares.
1120. The shares were still left standing in your name? Yes.
1121. Notwithstanding that you had retired? Yes. I had an opportunity afterwards to search the
minutes right through. I obtained the books from the secretary, and took copious notes from the
minutes.

J. R. Carey.
12 Dec., 1898. minutes. I am speaking now from the notes that I have taken. There was some dispute a year afterwards between the Fink party and the de Wolf and Armstrong party. While the Fink party had possession of the books they allowed me to go through the minutes, and, as I have explained, I took copious notes of them. There was another allotment of shares posted in the register on the 25th April, 1889. No reference to that is made in the minutes. You will understand that I am speaking now of a fresh allotment of shares quite distinct from the first allotment. I made repeated application to have my name struck off the register on the ground that the allotment of shares was illegal, and that I had declined to accept any shares in the company. I had already declined, you will remember, to accept the thirty shares offered me by Mr. de Wolf.

1122. *Mr. Cohen.*] Why did you refuse to accept the shares? In the first place, I was not satisfied with the position of the company, and I did not want to have anything to do with it. I was dissatisfied with everything connected with the company, and I did not want to be connected with it. I was unsuccessful in my application to have my name struck off the register. As a further claim to have my name taken off the register, I may mention that the following gentlemen got their names struck off; Mr. W. H. Moseley, 139 shares; E. H. Crossman, seventy shares; J. A. Thompson, thirty shares. These were all solicitors, and their names were struck off on the 14th July, 1892.

1123. Were they struck off by the directors themselves or on application to the Court? That I cannot say. Their names were off the register when I saw it.

1124. Did you ask the Court to strike your name off the register? No.

1125. You made application only to the directors? Yes. My argument was that I was never properly on the register.

1126. You were kept on without your consent? Yes. Matters went on, and I never heard much more of them until March 23rd, 1892, when a call of £10 per share was made payable on the 12th April, 1892, by a Board consisting of the following directors present:—Mr. Howden, Mr. Vaughn, Mr. Amos, and Mr. de Wolf—Mr. de Wolf dissenting from the call. That is an extract from the minutes. Of that call I got notice. On the 12th April, 1892, the minutes disclose the following circumstances:—The Board resolved to issue a writ against de Wolf for all calls overdue upon shares in his name; and as regards the other shareholders, it was resolved that the solicitor should draw the necessary notices of forfeiture, and that the secretary should forward them. That entry is dated the 12th April, 1892.

1127. *Mr. Sleath.*] They were going to sue Mr. de Wolf for his calls, and to let others off? I do not know about that. But they were going to forfeit all the other shares. From what I gathered from the secretary at the time, there was a dispute between Mr. de Wolf and Mr. Fink. The minutes further disclose the fact that the calls of Mr. Aaron, Mr. Amos, Mr. Fink, Mr. Norton, Mr. Williams, Mr. Pickford, Mr. Masey, and Mr. Botchard, were paid by an order on the Illawarra Harbour Syndicate, amounting in all to a certain sum which I did not extract from the minute-book. But there is a minute, from which it appears that there was a threatened sale of part of the company's property by Mr. R. M. Vaughn. The following resolution appears to have been carried—"That the secretary take whatever steps may be necessary to protect that portion of the company's property should the necessity arise." We come now to the 18th April, 1892. I then received notice that unless the call was paid by the 4th May, 1892, my shares would be liable to forfeiture. I then made inquiries from the secretary about the position of the company, and I was allowed to go through all the minutes of the directors' and general meetings, from which I took copious extracts upon all subjects which might probably bear upon my position, which I intended to fight to the last. The secretary at that time advised me not to pay the call or to take any further notice of it until I heard again from him. The secretary, I think, was Mr. Barker. The books at one time were taken out of the hands of the Armstrong and de Wolf crowd and were taken over to the Fink crowd, and while they had this dispute between themselves I obtained all this information. On the 2nd May, 1892, Mr. de Wolf also told me not to pay the calls, as he never intended that I and others should have to pay any calls, and that he would see that that intention was carried out, or he would burst up the company.

1128. *Mr. Ashton.*] It was the Fink crowd, to use your own phrase, who were making the call? Yes. Mr. de Wolf objected to it. Mr. de Wolf then offered also on several occasions to take a transfer from me of the shares standing in my name, but I would not risk the liability I should be under for any calls which might be made upon Mr. de Wolf during the first twelve months. I was not satisfied that he was financially good enough to pay them, and I preferred to stand upon my contention that I was not legally a shareholder, although my name appeared upon the register. On the 5th April, 1893, I received notice of a general meeting at which a resolution was to be proposed to authorise Mr. J. M. Howden to proceed to London to arrange for the issue of debentures to the amount of £750,000, on such prices and terms as he might consider best for the company. On the 12th April, 1893, the secretary wrote to me asking if I still adhered to my demand that my name should be struck off the register, and if so, whether I would attend a Board meeting to be held on the 14th April, 1893, when the directors would consider my application. On the 13th April I replied to the secretary to the effect that if my name were still on the register I again demanded that it should be forthwith struck off. On the 14th April I attended the Board meeting, as requested, but there was no quorum, and therefore no business was transacted. On the 9th May, 1893, Messrs. Creagh and Williams, who were acting for me, received a letter from Mr. E. H. Crossman, who was acting for the company, asking whether I would consent to a conversion of my present shares into fully paid-up shares and deferred debentures, so as to get rid of my liability. There were various letters, particulars of which I need not give you, which passed, and on the 29th November, 1893, the Board consisting of Mr. de Wolf, Mr. Armstrong, and Mr. Vaughn, made a call of £10 per share, Mr. Vaughn dissenting,—the call to be payable on the 22nd December, 1893. Again on 10th January, 1894, Mr. Howden's seat was declared vacant through non-attendance by a Board consisting of Mr. de Wolf and Mr. Armstrong.

1129. *Mr. Cohen.*] I gather from what you say that different directors made the two calls? Yes. I should explain that one call they did not persevere in. I have the rough substance of a minute to this effect: that there was a claim upon Armstrong and Thompson, trustees for the vendors, for £54,000. The details of the claim were given, but I have not them with me.

1130. *Mr. Archibald Campbell.*] How many formed a quorum? The quorum was altered once or twice. It was fixed first at two, then at three, and I think it was afterwards fixed back at two. The minutes show in reference to Mr. de Wolf's extra claim that he asked that his calls should be carried to the credit of his claim, and also the calls of Mrs. Hamilton and Mr. E. Barton; and the same in reference

to

to Mr. Armstrong's calls, and those of sundry other persons who were named—Mr. Armstrong, Mr. Wood, Mr. Turnbull, Mr. Chippendall, Mr. Liddell, and Mr. A. G. Friend (seventy-three shares), representing a total of £12,210. On February 7th, 1894, it was resolved that steps be taken for the recovery of calls. I do not know who the parties could be. All the others were out of it, and there were left, I think, only Mr. Styles and myself. However, upon that point I am not quite clear. There was the further entry that Mr. Crossman should be removed from the position of solicitor of the company, and that arrangements should be made with another solicitor to act for them. Then in April, 1894, I was advised that it would be better for me to pay the £300 call, in order to get out of the difficulty, instead of fighting them and possibly having to pay my own costs.

1130. *Mr. Cohen.*] Did you pay that £300? Yes; I have a receipt for it.

1131. You are sure it was not £250? I have not the means at this moment of seeing what my cheque was, but I have a receipt for £300. The effect of that payment was to relieve me of all responsibility for twelve months. Then there was an agreement between Mr. Friend, Mr. Armstrong, Mr. de Wolf, and myself, Mr. Friend and myself being on the one side, and Mr. Armstrong and de Wolf on the other.

1132. The shares were paid up to £50, with a liability for another £50? Yes.

1133. They called up £10 before they entered into an agreement with you, under which they placed to your credit a certain sum to protect you against further calls during the twelve months of your liability under the Act? Yes.

1134. To whom were your shares then transferred? I could not say whether they were transferred to Mr. de Wolf or to Mr. Armstrong, but I think to Mr. de Wolf. I would not admit, of course, that the shares were mine at all. I signed the transfer to get rid of the whole thing.

1135. *Mr. Waddell.*] That ended your connection with the company? Yes.

1136. That was in 1894? Yes.

1137. *Mr. Sleath.*] Have you any further information you could give the Committee? Yes; I find that the Illawarra Harbour and Land Corporation was registered on the 29th October, 1889. Amongst the first directors were Mr. Edmund Barton, Mr. Goodchap, Mr. Billyard, Mr. J. Newton, Mr. T. A. de Wolf, and myself. Properties were sold to the company for £600,000 by a syndicate. The amount was paid by the issue to syndicate members and nominees of 10,000 shares of £100 each, paid up to £50, the balance—£100,000 cash—being payable at a later date. Five of the directors I have named held thirty shares each, Mr. de Wolf holding 768. The Act giving the harbour concession was granted in December, 1890. That speaks for itself. In 1892 there was a conveyance by Mr. de Wolf to Mr. B. J. Fink, of the Lakelands Estate—book 495,711, consideration 10s.

1138. Can you give us some explanation of that? What follows, I think, will satisfy you on the subject. It was simply a question of financing. I find that on the 29th July, 1892, on the very same date, according to book 495,777, there was a mortgage from Fink to Wallach Bros. of the same land, subject to the existing mortgage to Osborne in order to secure a promissory-note for £8,920 by de Wolf and Armstrong in favour of Fink, and by him endorsed to Wallach Bros.

1139. Who was the man who conveyed to Fink? De Wolf.

1140. Was not Fink trustee for the company? He could not be a trustee for the company, as the minute-book did not show any such appointment. It was a question of financing the company's property. On the same day, that is on the 29th July, 1892, according to book 495,778, there was a sub-mortgage by Wallach to the A.J.S. Bank against the discount of the promissory-note I have just mentioned.

1141. *Chairman.*] Whose promissory-note was that? It was a note by de Wolf and Armstrong in favour of Fink, and by him endorsed to Wallach Bros. It was a piece of financing with the company's property.

1142. *Mr. Sleath.*] They were financing their private affairs with the company's property? I can hardly say that, because I take it that the whole property was sold to the company originally.

1143. They were financing with the company's property in order to meet their own promissory-notes? I take it that that is so.

1144. *Mr. Simpson.*] Do you say that the proceeds of this financing were applied not to the benefit of the company, but to the benefit of private individuals? I do not say that. There is no proof that that is so. I take it that the land was sold to the company in the first instance, and that no right was given to mortgage it to anyone.

1145. *Mr. Cann.*] Were these persons in these transactions acting on behalf of the company? The records do not show that to be the case. On April the 3rd, 1894, the A.J.S. Bank sold the property subject to the existing mortgage to Osborne for £30,000—to Henry Osborne, his son, for £300. On about April 26th, 1894, the call of £10 per share on 10,000 shares was made. That is one of my troubles in the matter—that the call was made after the property was parted with altogether. The first mortgage was to Osborne, and the next mortgage was to the A.J.S. Bank, who sold their right under the second mortgage to Henry Osborne. The consequence was that the company did not possess the land at all. The first and second mortgagees took it out of their hands. I maintain, therefore, that the call had no right to be made under any circumstances. I think I explained in a previous part of my evidence that several of the calls were paid by Mr. de Wolf, Mr. Armstrong, Mr. Barton, and a number of others by book-keeping manipulations, leaving only a few of us upon which to make calls.

1146. *Mr. Simpson.*] Will you explain in what sense you use the word manipulations? I cannot tell you particularly how they manipulated the matter, but there was a certain amount claimed to be due to these gentlemen, and that amount was transferred from the one thing to the other.

1147. You mean that there were cross-entries? Yes.

1148. *Mr. Cann.*] No cash was paid? No.

1149. *Mr. Archibald Campbell.*] You did not get out of it so easily yourself? No; there were only three of us who had to pay. There were only Mr. Newton, Mr. A. G. Friend, and myself who ever paid in a shilling, except the amount put in in the first instance in connection with the purchase of the land. I do not know that I can say anything further, except from information I have gained. I can make no further statement as to the company's affairs from my personal knowledge.

1150. *Mr. Sleath.*] Do you know anything about Mr. Styles? No. I know his name is on the books for a few shares, and I know from the minutes that he was one of the vendors of portion of the land in the first instance. I also know from the minutes that his shares were forfeited. Mr. Friend, I find, is supposed to have rejoined the company.

1151.

- J. R. Carey.
12 Dec., 1898.
1151. Have they made any proposals for you to rejoin the company;—has anyone hinted at such a thing? Such a thing has been mentioned to me, but I said I would not have anything to do with the company in any shape or form.
1152. *Mr. Ashton.*] You say that when the Fink crowd made a call the de Wolf crowd made an offer to accept a transfer of shares from you? Yes. On more than one occasion Mr. de Wolf said he would take back the shares.
1153. But later on he was a party to making the call which you had to pay? Yes.
1154. How do you explain his changed attitude? I suppose it was a case of necessity,—when needs must the devil drives. They wanted money, and they were determined to get it where they could.
1155. *Mr. Cohen.*] After they had made this call of £10, did he say that he would take over your shares? No; it was prior to that.
1156. *Mr. Cann.*] Has there been any other dispute between you and the Board in reference to any other matter apart from the affairs of this company;—if anyone has said, for instance, that you were trying to blackmail the company, would there be any truth in the statement? No.
1157. Did you demand the £300 back again from the company? No; I said I would take it back if they would give it. I do not know even now that I will not sue them for it, because I think the money was illegally taken.
1158. I suppose your claim to this £300 is the blackmailing to which they referred? Probably. I do not know of anything else to which the statement can have reference.
1159. *Mr. Cohen.*] Did you ever sit at any of the Board meetings? I did at a few in the first instance. I cannot say now whether they were Board meetings or general meetings. I know that I sat a few preliminary meetings.
1160. *Mr. Steath.*] Have you had any other financial transaction with this company? No.
1161. In no way at all? None whatever.
1162. You never had any transaction with them outside the share transaction? Not in any shape or form.
1163. Therefore, the statement that you are attempting to blackmail the company can apply only to the transaction which you have explained this afternoon? Yes, and to nothing else.
1164. You are confident of that? Yes.
1165. *Chairman.*] From your knowledge of the company, and from your connection with it, were you satisfied that it was a *bonâ fide* company? I was satisfied that it was advisable for me to get out of it as soon as possible.
1166. *Mr. Ashton.*] That might apply to an enterprise the prospects of which you did not think were good? Yes.
1167. *Mr. Carroll.*] When you paid the amount you have named to get out of the company was there any understanding that in the event of the company being floated and getting on they would refund you the money? No. It was not put in that way. Mr. de Wolf promised that he would eventually pay back the £300.
1168. He regarded it as a debt of honor? I presume so, inasmuch as he had said on several occasions that I should not have to pay anything.
1169. *Mr. Simpson.*] I understand that you complain that the Board made the call after they had parted with the assets of the company;—as a matter of fact, have they ever parted with their concession? I did not mention the concession. I was referring to the property of the company. I do not call the concession property in that sense.
1170. You meant to except that? Yes; I was referring to freehold property.
1171. Are you not aware that the license from the Crown to construct was then in force, and that the company was formed, as a matter of fact, to construct a harbour? Yes.
1172. When you went into the company you knew that one of its objects was to construct a harbour? Yes; but there was ground attached to it, and without the ground the scheme was of no value.
1173. *Mr. Ashton.*] The ground was the only tangible asset? Yes.
1174. *Mr. Simpson.*] You are not sure how it was transferred to Mr. Fink, and for what purpose? I only know that there was a transfer.
1175. *Mr. Archibald Campbell.*] When you refer to the property of the company, you mean the land held by them? Yes.
1176. *Mr. Simpson.*] The information you have given to the Committee is derived from documents put before you without your having any knowledge of the transaction between Fink and the Mercantile Finance Co.? Except so far as the minute-book is concerned, and there is nothing in the minute-book to show that. If the Board endeavoured to do anything of that kind it should appear on the minutes.
1177. You do not know, except from what you have gathered from the deeds, anything of the circumstances under which the property was transferred to Fink? Only from that and the absence of minutes.
1178. You do not know, as a matter of fact, that Mr. Fink was closely allied with the Mercantile Finance Company? Yes.
1179. And that he was financing the Illawarra Harbour and Land Corporation to a large extent? I knew that he was connected with the corporation.
1180. Was he not finding the money the corporation had? I have heard so many accounts of the thing passed from one person to another that it would puzzle a Philadelphia lawyer to arrive at the true state of affairs.
1181. But, as a matter of fact, you heard that Mr. Fink was financing the corporation? No.
1182. Did you not know that there was a contract in existence to construct a harbour? I did not know that there was any contract in existence in 1889. All I knew was what I gathered from the minutes after I left the company, and I left the company early in 1889.
1183. What is the date of the receipt for the £300 to which you have referred? The date of the settlement between myself and Mr. Friend on the one side, and Mr. de Wolf and Mr. Armstrong on the other side, is the 26th April, 1894.
1184. You went upon the Board in 1889, and the shares were not transferred out of your name until 1894? That is so, I believe.
1185. I also understand that during 1889 and 1890 you attended several meetings of the Board? I do not think I sat upon the Board at all in 1890.

1186. Would it surprise you to see your name down in the minute-book as having attended a meeting of the Board in 1890? It would surprise me to see my name appearing in connection with any meeting in 1890. I could give you the definite information if I had all my papers with me. J. R. Currey.
12 Dec., 1898.
1187. Your resignation was accepted in April, 1890? I believe it was.
1188. When you attended the meetings you must have known that you attended them having a certain qualification? Yes.
1189. Do I understand that you now take up the position that you were never a shareholder? I say that the original allotment was illegal.
1190. How can you reconcile your attitude in attending meetings of the Board with your denial that you were a shareholder; to be qualified to sit upon the Board you must have held a certain number of shares, and your statement is that you should not have been upon the list at all? I was not then aware of the illegality of the original allotment. When I became aware of it I wanted to get out of the concern.
1191. In what respect was the original allotment illegal? I cannot say without looking at the papers. It was so illegal that the Board without authority altered the date in the register by way of making the allotment legal.
1192. You say now that you were under the impression that you were qualified? At that time I was.
1193. You must also admit that if you were qualified, a certain number of shares had been allotted to you? The first allotment was incorrect.
1194. In what respect was it incorrect? I cannot answer that question now. My solicitor might be able to answer it.
1195. As a matter of fact, does it not amount to this, that at a certain juncture you thought the company's prospects were not as bright as you had thought them in the first instance, and that in consequence of that, and not in consequence of the illegality of the allotment, you asked Mr. de Wolf to relieve you of your liabilities? I did not ask him to relieve me of my liabilities. He offered to relieve me, but I did not accept his offer because I did not think he was financially good enough to carry it out.
1196. Did you not afterwards accept the offer? In consideration of certain amount of debt being put to the credit of Mr. Friend and myself.
1197. Is it not a fact, that in consequence of the prospects of the company, so far as you were concerned, appearing not so bright as they appeared in the first instance, when you agreed to accept shares, you asked to be relieved of your interest in the company? No.
1198. On what grounds then did you seek to be relieved of it? I knew nothing about the company when I went into it. As time went on, I gained information as to the company, and I thought it was good enough to get out of it.
1199. Mr. de Wolf swears that Mr. Fink, at about this time, had got into difficulties, and that it was impossible to finance affairs without his aid? I knew nothing of those facts.
1200. Did you not, immediately you took your seat on the Board, make inquiries as to the position of the company? I did, and then I wanted to get out of it.
1201. You were sitting on the Board for a period of twelve months? Yes.
1202. The company was formed in October, 1888? Yes.
1203. You will see from the minutes that you attended a meeting on the 17th December, 1889? I think the 9th April, 1889 is the date of the last meeting I attended.
1204. Will you undertake then to say that these minutes are false? In that respect I should think they would be.
1205. *Mr. Sleath.*] Do you recollect being present at the meeting to which Mr. Simpson refers? No; besides that was a general meeting of the company—it was not a meeting of the Board. I cannot see any meeting of directors recorded at which I attended after April, 1889.
1206. *Mr. Simpson.*] You say you joined the company in October, 1888? Yes.
1207. And you attended either directors' or general meetings up to December, 1889? I do not say that.
1208. But the minutes show it? Yes, apparently.
1209. After looking at the minute-book, and seeing that your name appears there as having attended a meeting in December, 1889, will you say whether you did or did not attend that meeting? I do not see my name down as having attended a directors' meeting after April, 1889. That is the date, as far as my memory goes, of the last meeting I attended. You show me my name recorded as having attended a general meeting in December, 1889. I really cannot say whether I was there or not.
1210. *Mr. Ashton.*] You resigned in January, 1890? I resigned some time before I sent in a written resignation.
1211. Is it probable that you resigned about a month after the general meeting you attended;—is it likely that anything transpired at that general meeting which caused you to resign? No.
1212. *Mr. Cohen.*] Is it likely that your name would be recorded in the minute-book as having attended a general meeting if you were not present? No; I should think not.
1213. You see your name is recorded in the minute-book as having been present at the general meeting;—would you undertake to say that you were not present? I certainly would not say I was not present.
1214. *Mr. Sleath.*] Have you any recollection of being present? I have not.
1215. *Mr. Simpson.*] You say you were not present at any directors' meeting after April, 1889? I said that you had not shown me from the minutes that I was present at any director's meeting after that date.
1216. I will ask you to look at the minute-book, under date of 11th December, 1889;—you will see that you there took the chair at a meeting of the Board, at which the report of the company was actually adopted or approved by the directors present? I see that that is recorded.
1217. Will you say whether or not these minutes are correct? I take it that they are correct.
1218. So that on the 11th December, 1889, you actually approved of the report of the company? I was present at the meeting.
1219. So that although you thought in April, 1889, after some five or six months' experience of the company, that it was not a company in which you would like to remain, you attended a meeting in December of that year, at which you, as a director, expressed approval of the report to be submitted to the shareholders? I do not say anything of the kind. I have already stated that I could not say exactly when I left the Board. It was, I thought, in 1889. When I had been upon the Board long enough to gain certain information with regard to the company, I thought it good enough for me to get out of it.

- J. R. Carey. 1220. Did this information, upon which you came to the conclusion that the company was not one with which you ought to be identified, come suddenly to you? No; it came by degrees.
- 12 Dec., 1898. 1221. What was the information? First and foremost I got information as to how the property was bought and sold, and all connected with it; and when I came to consider the amount raised upon it, I thought it was good enough to get out of the concern.
1222. Still, in December, 1889, you actually approved of the report to be submitted to the shareholders? I do not say that I approved of it. It is not to be inferred merely because the report was approved by the meeting that I approved of it.
1223. But according to the minutes you were present at the meeting? I do not deny that.
1224. I presume the report and balance-sheet of the company would show the exact cost of the company? It would not show details, but it would show the total cost.
1225. So that any information you gained would have reached you between the meeting in December and the meeting in January? No; between October, 1888, and December, 1889.
1226. Is it true that you have said that unless this amount of £300, which you now say may have been £250, were repaid to you, you would stop this Bill from going through the House? Who says that I said that?
1227. I am asking the question of you;—did you say it? I never said such a thing.
1228. You are sure of that? Yes.
1229. Or anything like it? Or anything like it. I told one of the gentlemen that if they did not pay me back the £300 they had swindled me out of I would know the reason why—that is to say, that I thought I would sue them, and he said I could do my best.
1230. Although, acting on the advice of the solicitor, you came to an agreement under which you were relieved of responsibility in connection with the company on payment of £250, you now say that you are going to sue them for £300? Yes. In the first place, I was not then aware of the transactions to which I have referred. I did not know that the company's property had been disposed of, and that the first and second mortgagees had taken possession. If I had known when I paid the £300 what I know now, the amount would never have been paid. It was long after that that I found out the true circumstances of the case—that is to say, that the property had been taken out of the hands of the company for a considerable period.

TUESDAY, 13 DECEMBER, 1898.

Present:—

MR. ASHTON,	MR. CARROLL,
MR. ARCHIBALD CAMPBELL,	MR. SLEATH,
MR. NICHOLSON,	MR. CANN,
MR. CHAYNES,	MR. COHEN.

W. J. FERGUSON, Esq., IN THE CHAIR.

Mr. E. P. Simpson (of the firm of Johnson, Minter, and Simpson), and Mr. W. H. Moseley, appeared on behalf of the Illawarra Harbour and Land Corporation (Limited).

Alfred Hugh Beresford Conroy sworn and examined:—

- A. H. B. Conroy. 1231. *Mr. Simpson.*] Do you remember a conversation that took place somewhat recently between Mr. Carey, Mr. de Wolf, Mr. Harper, and yourself, with reference to the Illawarra Harbour scheme? Not with Mr. de Wolf; Mr. Harper, Mr. Carey, and myself, were present.
- 13 Dec., 1898. 1232. Was it with reference to the Illawarra Harbour scheme? Yes; Mr. Harper and I were coming up the street, and when we were going into the "Hotel Australia" we met Mr. Carey coming down the steps. Mr. Harper stopped and spoke to him. He said to Mr. Carey that he was going about telling tales against the company, saying that he had been done out of money or something. I may say that, at that time I knew nothing of any transactions which had passed. It was all new to me, and the conversation that I heard was only fragmentary. He spoke to Mr. Carey about it and said, "You were perfectly satisfied with the arrangement at the time. You thought it a fair thing." Then I heard Mr. Carey say, "Well, I will have my £300." The conversation began to get a little stormy between them, and Mr. Harper asked what he considered unfair. He said, "Having given up his shares." Of course you will understand that when I heard this, I did not know anything that had taken place before, and it was entirely new to me. Mr. Harper again repeated, "You were perfectly satisfied at that time." Mr. Carey said, "Yes, that was so, but I will have that money or something else."
1233. Did he say subsequently what he meant by "something else," or did he intimate that he would stop the Bill? Just then he stopped, and my attention was drawn to somebody else for a moment. I was away for a minute when I rejoined them. Mr. Carey said, "Well, if I do not get it I will block your Bill in the House, and I can do it there, and even if I fail there I will stop you at Home—I will stop you issuing at Home."
1234. Did he make any reference to the *Daily Telegraph*? He did. He said, "You know I have the paper behind me, and you know what I can do; so look out."
1235. Did the conversation end then? No; Mr. Harper got into a temper and said, "This is damned blackmail." He repeated that.
1236. *Mr. Cann.*] I understand you knew nothing about the transaction then? Nothing whatever.
1237. *Mr. Simpson.*] Are you interested in the scheme in any way whatever? No; not beyond the fact that I have friends interested in the Smelting Company.
1238. *Mr. Cann.*] But they have not got any interest in the Illawarra Company? No.
1239. No pecuniary interest? No. This occurred about a fortnight ago—last Wednesday or Thursday week. I think it was in the afternoon.

William

William Robert Styles sworn and examined :—

W. R. Styles.
13 Dec., 1898.

1240. *Chairman.*] Are you one of the original syndicate which held the Lakelands Estate? Yes.
1241. Do you mind telling the Committee how you became possessed of that in the first instance? A syndicate was formed. First of all I sold, partly with Mr. Vaughn, the Ocean Colliery.
1242. Were you partners? I took him as a partner. He came in on velvet. It cost him nothing.
1243. Did you and Mr. Vaughn purchase this Ocean Colliery? I bought it first (265 acres), and then I took up 640 acres at the back of it—which consisted of Crown lands—on permit.
1244. Were you and Mr. Vaughn the owners of this Ocean Colliery? I formed it into a syndicate after I opened up eight seams of coal, iron ore, and kerosene shale. I put in a few years' work there. I had to pay my part. I had one-third interest in the concern. This syndicate wanted to sell. They put it into my hands, and I took Vaughn in at the time.
1245. *Mr. Ashton.*] You and he did not own the property? There were twelve shares. I had four out of twelve. At that time Mr. Vaughn came in.
1246. On what terms? He paid nothing; but it was intended that we should sell this property for a further sum.
1247. That was, he was going to manage the business? Of course, along with me in a way. We sold this property to de Wolf and Armstrong. Vaughn made the sale when I was in Melbourne.
1248. Did he hold a power of attorney from you? Yes.
1249. *Chairman.*] Did you sell the Ocean Colliery to de Wolf for £25,000? Yes.
1250. Was a portion of that sum paid in cash? Yes, about £11,000 altogether.
1251. And was the balance taken out in syndicate shares? After the contract was made and signed, and for some months after they bought the Lakelands Estate, they wanted us to take two shares each. I would not consent for a long time. They wanted me and Vaughn to take two shares each. After refusing to consent for some time I did take them. Afterwards I believe they said they had £180,000 to the credit of the syndicate, but I believe only a few shares were sold. They have taken part of the other shares and put them in their own pockets without paying anything. They represented that the shares had been all taken up and paid for up to £180,000.
1252. Was the balance of your purchase money payable by mortgage? Yes, in instalments.
1253. Has it ever been paid? No.
1254. Was there not some arrangement made between de Wolf and Vaughn, he holding your power of attorney? He might have done something without my consent. He turned round with them, and I could not get any information for years.
1255. Mr. Vaughn held a power of attorney from you, and with this power of attorney he disposed of the property to Mr. de Wolf—that was with your consent? Of course, with my consent at the time; but after I came back from Melbourne to Sydney, and had been here for a length of time, the power of attorney was revoked.
1256. At the time he disposed of the property the power of attorney was in force? Yes.
1257. Did Mr. de Wolf write any letters to you on this matter? Yes, several.
1258. *Mr. Ashton.*] What were the precise terms on which the property was sold? £25,000—£11,000 in cash, and the other was taken out in syndicate shares.
1259. Was that in accordance with the agreement? No.
1260. What was the agreement? £13,000 in cash. We took syndicate shares. £11,000 was what they were supposed to have paid in cash.
1261. Was the agreement £13,000 in cash and £12,000 in shares in a syndicate? Yes.
1262. How much cash did you get? They paid £11,000 in cash. When they paid that there was £6,000 to be paid besides.
1263. What do you mean by that? Because when they were paying instalments we were paying for our shares in instalments; we were paying £1,000 at a time on each share; so they failed to pay the last instalment; but Mr. Vaughn has made some arrangement to make up for that.
1264. They paid you £11,000 out of the £13,000;—they still owe you £2,000 out of the £13,000? Yes.
1265. Did they give you any security? No; they simply owe the £2,000.
1266. *Chairman.*] Did they not give you a mortgage? They gave it to Mr. Vaughn.
1267. Was that for the £2,000? Yes.
1268. Was the mortgage over the whole property? Over the freehold.
1269. Does that mortgage stand at the present time? I do not think so. It was transferred to Mr. Fink in Melbourne afterwards.
1270. Did Mr. Fink pay it off? He paid it off. He borrowed money from the bank, and the bank got it.
1271. Did Mr. Vaughn accept the mortgage under your power of attorney? No, because I revoked the power of attorney years before that.
1272. £13,000 was the amount you were to receive in cash;—you received £11,000, and the other £2,000 was secured by mortgage, which you agreed to? I was agreeable to take my shares—that means £6,000.
1273. Were you agreeable that the remainder of the purchase money, £2,000, should remain on mortgage? No; I was all the time asking for the money.
1274. Was it not secured by mortgage to Mr. Vaughn, and you agreed to it? I did not agree to it.
1275. He had two of the shares, as well as yourself? Yes.
1276. The amount in dispute between Mr. de Wolf and you is this sum of £2,000? Yes, and the shares.
1277. Do you say that you agreed to accept £12,000 in shares, in addition to £13,000 cash? I found out that the other shareholders had not paid for them the same as I did. Of course, I did not accept.
1278. *Mr. Ashton.*] You accepted them on certain conditions? Yes.
1279. *Chairman.*] You said you had some letters from Mr. de Wolf to you on this matter;—have you got them with you? Yes, I produce them.
1280. *Mr. Ashton.*] Is the position this, so far as the sale of the property is concerned: You agreed to accept £13,000 in cash and £12,000 in shares? Yes.
1281. That undertaking was satisfied by the purchasers with the exception that they still owe you £2,000 cash? Yes, and interest; and the profits, of course, in the syndicate. I was supposed to get a profit from the syndicate as well. The syndicate, of which I was one, sold the property and made £100,000 profit. I found they were deceiving me. They told me that all the syndicate shares—60 at £3,000 each—

W. R. Styles. each—had been paid for; but I found after a length of time that only a few shares had been sold, and they pocketed all of them themselves.

13 Dec., 1898.

1282. *Chairman.*] All the letters which you have handed in so far are requests by de Wolf that you should do certain things which you refused to do; is there anything more definite;—is there anything which you did do finally? No, I did not sign anything they asked. I could see that they wanted to get me in and to get me out at the same time.

1283. Did they get you out by making a call on the shares which you refused to pay? Yes.

1284. Did you receive notice of the call? Yes, after a length of time.

1285. Those shares were paid up to £50, and were liable to a call of £10 to be made at any time by the board? Of course, there was no board at the time.

1286. But they were liable to that call if the board made it? On the face of them they were liable, but I was objecting all the time that there was fraud at the commencement; that those in the syndicate never paid for the shares as I did. My shares were paid up.

1287. Were not the shares part of the purchase money? No; we were paying for them the same as other people. Though they were paying instalments we were paying for them. We were paying for the syndicate shares in instalments.

1288. *Mr. Carroll.*] Out of your own money? Yes.

1289. *Chairman.*] You had shares paid up to £50, and they were liable to a call of £10? They made a £10 call.

1290. Did you refuse to pay that, and did they forfeit your shares? Yes.

1291. Is that the position now? Yes.

1292. Your ground of complaint against the syndicate is practically that they forfeited your shares, and you say they had not power to do so? Yes.

1293. And that they have not yet paid the £2,000, the balance of the purchase money? Yes.

1294. And the profits accruing thereon? Yes.

1295. Are those the grounds of your Equity Suit? Yes.

1296. *Mr. Cann.*] I understand Mr. Vaughn had a power of attorney to act for you while you were away? Yes.

1297. I will now read a passage to you from a conveyance between W. R. Styles and others of the first part; R. M. Vaughn, Esq., of the second part; and T. A. de Wolfe, Esq., of the third part; and I will ask you to give an explanation of the matter. The passage is as follows:—

And whereas the said Robert Matteson Vaughn has since agreed with the said purchaser for the absolute sale to him of (*inter alia*) the lands, hereditaments, and premises hereafter described and intended to be hereby assured, and the inheritance thereof in fee simple in possession, free from encumbrances, at the price of twenty-five thousand pounds. Now this Indenture witnesseth that, in pursuance of the said agreement, and in consideration of the sum of eight thousand one hundred and sixty pounds to the said vendors, paid by the purchaser at or before the execution of these presents, and of the sum of sixteen thousand eight hundred and forty pounds at or before the execution of these presents, paid by the said purchaser to the said Robert Matteson Vaughn (the receipt of which said several sums of eight thousand one hundred and sixty pounds and sixteen thousand eight hundred and forty pounds, making together the sum of twenty-five thousand pounds, the said vendors and the said Robert Matteson Vaughn respectively do hereby acknowledge); and from the same do and each and every one of them doth hereby release the said purchaser, his heirs, executors, and administrators. They, the said vendors, at the request and by the direction of the said Robert Matteson Vaughn, testified by his being a party to and executing these presents, do and each of them doth hereby grant, bargain, sell, alien, release, and convey; and the said Robert Matteson Vaughn doth hereby release and confirm under the said purchaser and his heirs all those, the lands, hereditaments, and premises set out and particularly described in the schedule hereto.

Can you explain that? That £8,000 was the price of the first syndicate. I was one of them. Without them I had 640 acres at the back of the freehold. I had it from the syndicate, and I took Vaughn in to sell it, and we sold it to de Wolf—at least Vaughn did. I could have sold it in Ballarat and Melbourne at the same time for the same figure, and I could have got cash down.

1298. That accounts for £8,130. How do you account for £16,840. This is a receipt from Mr. Vaughn for that amount? The two together make up the £25,000. Before the deed was handed over, the £8,130 was paid for the 265 acres in the first syndicate. That money was not paid altogether at first.

1299. *Chairman.*] You say that this action of theirs has rendered you comparatively a poor man;—are you living in Queensland? I am going backwards and forwards temporarily.

1300. What is your business? Mining.

1301. Did they not pay you this sum in cash? Some of it in cash.

1302. Were you a poor man at that time? No.

1303. Are you a poor man now? Yes; I have lost all.

1304. If that is so, how is it that you can come all the way down here from Queensland, and that you are going to proceed with an Equity case against this company;—do you find the money for all that? Certainly.

1305. Then you cannot be very poor? I am, comparatively.

1306. Are you sure your case has not been taken up by some solicitors for nothing? No; I am sure enough of that. I do not believe that solicitors, as a rule, work for nothing. They want cash in hand.

1307. Can you give us any information about this company other than what is involved in this Equity Suit? I can explain with regard to the commencement of it until now, so far as what they have been doing and what they ought to have done when they got the Bill through.

1308. *Mr. Nicholson.*] Do you know of your own knowledge whether the syndicate have paid for the land which they have purchased or resumed for railway purposes? No.

Thomas Andrew de Wolf recalled and further examined:—

T. A. de Wolf. 1309. *Mr. Ashton.*] Mr. Carey in giving his evidence yesterday dealing with those mortgage transactions, in which Mr. Fink so largely figured, expressed the opinion that the company's property had been used for the purpose of private financing, and he said the history of the dealing in the matter seemed to him to bear that complexion;—can you give us a short and succinct statement of the mortgaging of those properties, the transfer from you to Mr. Fink, and the matter of that now notorious half-sovereign? I think I can do so, and I have already done so.

13 Dec., 1898.

1310. Will you give us a statement of the acquisition of the land from the syndicate? Under the agreement between the syndicate and the company, the company were to pay £100,000 in cash—that is to say, before they could get possession of that property they had to pay to the syndicate, who were the vendors, £100,000 and shares.

1311.

T. A. de Wolf.

13 Dec., 1893.

1311. What were the shares? £500,000—10,000 shares paid up to £50.

1312. That was the consideration given by the company to the vending syndicate? Yes, the company, as a matter of fact, did not pay anything. They had not paid any cash at all. It was necessary to pay off further instalments on the property, and the Mercantile Finance Company, who were then providing funds for the company through Mr. Fink, agreed to find a further sum of money. The property had never been transferred to the company. It was held by me until the company paid the money. In the meantime the vendors had paid large sums of money on account of these properties.

1313. It was necessary to find more money, and the Mercantile Finance Company agreed to advance a certain sum;—that is to say, the vendors to the company had not completed their arrangements with the sellers? It was either that or debts of the company—I do not know which. Money was wanted for the company; the Mercantile Finance Company then insisted that the property, instead of being held in my own individual name as one of the vendors, should be put into Mr. Fink's name, who was also one of the vendors.

1314. *Mr. Nicholson.*] Fink's name jointly with yours? No; it was solely in my name originally until the company had fulfilled its obligation to pay £100,000 in cash, which they never did until we made the £10 call. In the meantime we were finding the money for the purchase of the properties. In order to obtain further funds we arranged to get this advance from the Australian Joint Stock Bank through the Mercantile Finance Company.

1315. *Mr. Ashton.*] What was the amount? I think £8,900.

1316. It was then transferred to Fink? The property was held by Fink in the same way as it was held by me as trustee until the company had fulfilled its obligation.

1317. Did Fink enter into any agreement or undertaking as to defining the conditions on which he held that property, or was the transfer an absolute one. For instance, Mr. Carey suggested yesterday that that was an improper transfer to Fink, by reason of the fact that he could have done anything he liked with the property after that transfer? I think the deeds showed it, but I am not certain. The transfer to Mr. Fink was sanctioned by the shareholders.

1318. Was that practically an absolute transfer, and is Mr. Carey's statement correct that after that transfer was effected Mr. Fink might have done anything he pleased? Most certainly not; he held it just as I held it. The property was vested in my name previously as one of the vendors. It was only transferred to Mr. Fink in exactly the same position as I held it.

1319. Taking your own position;—were you legally the absolute owner of that property, or were your powers restricted by any undertaking which you gave to your co-owners? We had our contracts to the company, which were registered against the land. We had no right to part with or dispose of the land.

1320. Except for an express purpose? Yes.

1321. *Mr. Cann.*] Have you put in any of these deeds as evidence? No.

1322. *Mr. Ashton.*] As I understand the matter, it is somewhat in this form: I am aware that when a property has been taken home to London for sale the man who has the offer made to him requires that an absolute transfer shall be made to him, in order that it may be readily disposed of; and he, in turn, enters into a contract with the vendors proper agreeing that he shall do certain things with the property; but the fact remains, as I understand, that although he might, as the result of that transfer, do whatever he pleased with that property, yet, under another agreement, he would be liable by law for specific performance of the contract;—was that the position here? No; I understand that the contracts were registered as against the land, and the land could not be dealt with until those contracts were satisfied.

1323. Suppose Fink had the land transferred to him, as he had for half a sovereign, and he sold it to somebody and pocketed the money, what recourse would the other members of the company or the syndicate have against Fink? First of all, I suppose, they would put him in gaol.

1324. What for? For selling property that belonged to him nominally, but which belonged to other people.

1325. Did it not belong to him when it was transferred? Certainly not.

1326. What detracted from his absolute ownership legally? That is a legal point. I know the thing was done under the advice of our solicitors at the time, and I cannot tell what deeds were entered into. It did not make any difference to the company whether the property was held by me or Fink; but, as a matter of fact, we got the consent of the company and all the shareholders to the transfer to Fink.

1327. Would this represent the state of things that the land was transferred to Mr. Fink, who entered into a contract to take over your agreement to the Board that, on certain things being done by the company, it would be retransferred to the company? Yes.

1328. That was the restriction on Fink's right to deal with the property as he pleased? Yes.

1329. I want to know what legal restriction there was on Fink to prevent him doing anything whatsoever he pleased with the land? He could not deal with it any more than I could.

1330. *Mr. Cann.*] Was there any time limit during which that restriction was to remain? I really cannot say.

1331. You could understand a man entering into an agreement that something should be done, but surely there would be some specified time? This property was absolutely sold to the company, and deeds were registered against the land. When I held this property in my own name I could not deal with it for my own benefit without giving the company the right to redeem that property when they paid the price they agreed to pay.

1332. What time had the company to pay the £100,000? I cannot remember.

1333. *Mr. Ashton.*] Mr. Carey made a statement here yesterday to the effect that there was nothing in the minutes by way of authorisation of this mortgage transaction. Here is the minute-book. Do you find there any authorisation of the transfer of the property from yourself to Mr. Fink? Yes.

1334. Do you produce the minute-book containing a minute of the proceedings of a special general meeting of shareholders dated 29th July, 1892, authorising the transfer of the property from yourself to Mr. Fink? Yes; it is as follows:—

Reported that, in connection with the rearrangement of the liabilities upon the company's property, that T. A. de Wolf, in whose name the title is, should transfer it to Mr. B. J. Fink, a request from the members of the vendors' syndicate to consent to the transfer of the same was read. Resolved that such consent should be given.

1335. That does not say anything about any former obligation on your part that should devolve on Mr. Fink? I say that Mr. Fink took this over with the knowledge of the shareholders and with their consent. I simply transferred to him what I had.

1336.

- T. A. de Wolf. 1336. On the same conditions that you held it? I could not do anything else. It was certainly on the same conditions as I held it.
- 13 Dec., 1898. 1337. *Mr. Ashton.*] Had that transfer to Fink for its ultimate object an advance from the A. J. S. Bank? Yes.
1338. What steps were taken in order to secure that advance;—do you know the exact steps by which Wallach Bros. came into the proceedings? We simply received a cheque for the money.
1339. From whom? I think from Wallach Bros.
1340. You cannot give any explanation as to how Wallach Bros. came into the matter, except that you know that Mr. Fink was a partner of Wallach Bros.? Fink was practically Wallach Bros.
1341. It was probably more convenient on account of the business connection with Wallach Bros. that it should come in that way? The A.J.S. Bank made the advance to Wallach Bros., who were largely interested with Fink in this syndicate.
1342. *Mr. Cann.*] When this advance of money was made was the property mortgaged to the party who advanced the money? Yes, a mortgage was given.
1343. Was there not a time limit in the mortgage as to when you should pay back this money, and otherwise would not the property go completely out of your hands? I cannot tell. The property could not go out of our hands. We had the equity of redemption.
1344. In ordinary mortgages there is a time limit. You must pay the mortgage within a certain time;—what were the conditions attached to this mortgage? I cannot tell you, it was left to the lawyers to settle. A man might have a mortgage on his property, but the property belongs to him if he pays off the mortgage.
1345. *Mr. Ashton.*] After this transaction with the A.J.S. Bank, what was the next financial transaction;—I want to find out how Fink got out of it himself? I do not know.
1346. Was the Bank paid off? The Bank assigned this mortgage to Osborne.
1347. What are the obligations on the property now? Only the debt to Amos, £34,000.
1348. And the cost of the railway itself was £41,000? Yes; all these things have been settled up. Everything is cleared off. That is the end of all the financial transactions in connection with the mortgage and the company. A mortgage now rests on it of £34,000 to Amos, which was given to him, I think, as part payment for the construction of the railway pending the issue of our debentures.
1349. What connection, if any, has Mr. Fink with the company now? None at all.
1350. How did he cut his connection with it? At the time of the failure of the Mercantile Finance Company Mr. Fink owed me a good deal of money, and also the Mercantile Finance Company, under contracts. They were not prepared to carry on the business any longer, and we made a settlement with them by which they went out of it.
1351. Would you have any objection to tell the Committee the names of those who are interested in the company at the present time;—the object of the question is this—one of the main points in connection with this inquiry is, of course, the probability of something being done if this extension is granted. That largely depends on the *bona fides* and financial status of the persons interested in the company? I have already given that. I gave the names of our principal shareholders—the London shareholders. The Australian shareholders are not all strong financial men.
1352. What proportion of the shares are held in London? The bulk of them. I think four-fifths—hardly so much perhaps.
1353. Would it be possible to enumerate precisely the interest held by different people in the company? I have not got the list of share holdings, but I have a list of the principal shareholders.
1354. Is that information not on this side? I gave all the names to the Upper House Committee that I could remember, and I gave the names here of the principal men.
1355. Do you say that four-fifths of the shares are held in London and that the list of shareholders in London comprises men of the highest standing and of great financial strength? Yes; there are a number of shares which we are holding to assist us in the flotation of our debentures which probably we would have to give to the debenture holders. There are people who are not very keen about advancing money on debentures unless they get an interest in the company as well. We have a number of shares in reserve, which will be used probably to assist in getting debenture money.
1356. The company has an equity suit pending with Mr. Styles. Mr. Style's account of the sale of the coal property, which I think substantially agrees with yours, is that the consideration, was £13,000 cash and £12,000 in shares? Yes.
1357. He says that £11,000 out of the £13,000 was paid, and that the balance of £2,000 was left due and remains due at the present time? That is not true.
1358. Do you maintain that the whole of the purchase money was paid? Yes; in fact there was more.
1359. *Mr. Moseley.*] By that, do you mean that some portion of it was paid in shares? Not of the £13,000. There was more than £13,000, because I had to take up an advance which they had got from a bank of £1,000, and that did not come into the £13,000. £13,000 was paid in cash, and I had to pay something extra in cash.
1360. What is the nature of this equity suit? Mr. Styles claims that his shares were not properly forfeited. We claim that he never paid a shilling towards the expenses of the company, that he never contributed in any way. When we made a call he refused to pay, and we forfeited his shares.
1361. *Chairman.*] Is he practically in the same position as Carey on that point? No; Carey insisted upon getting rid of his liability. He paid off something on account of the call, but Mr. Styles never paid a shilling. We have spent £78,000 in the expenses of the company, but Mr. Styles has never paid anything.
1362. *Mr. Simpson.*] Is not Mr. Styles' case exactly the converse of Mr. Carey's;—does he not want to get shares in the company, while Mr. Carey wants to get out of the company? Yes.
1363. *Mr. Cann.*] At which particular time did you give the names of the London shareholders? I gave the principal names to this Committee.
1364. I understand the directors of the Smelting Company have nothing to do with the directors of this company? No; except that I am a director of both companies.
1365. To-day you stated that you had given them before the Upper House? Yes; as far as I could remember them.

1366. *Mr. Ashton.*] You gave here a list of those who were interested in the Illawarra Company? Yes, T. A. de Wolf, of the men who had found the £20,000. I have the paper outside, and I can get it if it is wanted.
1367. There have been a number of suggestions made by various witnesses that the affairs of this company have been manipulated in the instance of certain individuals;—have you made any profit out of the company? No; I have not made a shilling out of it. I have put money in every year for ten years.
1368. And you are actually out of pocket? I am out of pocket between £20,000 and £30,000;—nearer £30,000 than £20,000.
1369. *Mr. Nicholson.*] As a matter of fact no profits have yet accrued from the venture? No one has made a shilling; the only man is Styles, who got advances on his shares.
1370. *Mr. Campbell.*] Did the Lakelands property at any time revert from the company back to Osborne? An arrangement was made by which the property should be put under Torrens title, and when I went to England we arranged with Mr. Osborne that that should be done, and he gave me then six months to pay off his mortgage, which I did.
1371. It was in a state of suspension for six months, as it were? In the meantime they put the land under Torrens title.
1372. I suppose that was the time when Mr. Osborne gave the Dapto Showground out of the estate? Yes.
1373. The company consented to that? Yes.
1374. *Mr. Ashton.*] What interest does Mr. Armstrong hold in this company? He holds shares in the London company of the nominal value of £100,000.
1375. Is there any liability on those shares? No.
1376. The personnel of the company has very radically changed during the last two or three years since these London men came on? Yes, very much. We consider ourselves to be in a stronger position now.
1377. You consider that the change in the personnel of the company betters the prospects of the company—that is, of the work being carried out to a successful conclusion, as compared with the time when you were previously before Parliament? Naturally, because these men who have already put the money into the company are very wealthy men, and are very anxious to have this work carried out. They will support us in every way in financing the business in London.
1378. What is the amount of money which these men have put in? £20,000. The interests of the Smelting Company, too, are very much mixed up with the interests of the Harbour Company. It is very necessary that they should have this harbour.
1379. And the periodic delays which have taken place—the absolute non-fulfilment of the company to carry out its undertaking in regard to the harbour works;—do you say that that is due to the evil times financially which the company fell upon through being connected with such a man as Mr. Fink and the Mercantile Finance Co.? For the first few years it certainly was.
1380. If the Mercantile Finance Co. had continued they certainly would have found the money to carry out the harbour works? They were quite able to do so. When they failed we were left to our own resources with a heavy debt, which we have had to liquidate since.
1381. *Mr. Simpson.*] Is it not a fact that it is also due to the Smelting Company not having started its operations? When we applied for the last extension of time we applied for a two years' extension, but we were only granted a one year's extension. We were then under the impression that the smelting works would be in operation in nine months. Mr. Howell gave evidence before a Select Committee that they would be in operation in nine months, but, as a matter of fact, it was over two years. When I got to a certain point with the people in London about the financing, they all said you had better wait till the smelting works gets started; the business would go so much better then.
1382. *Mr. Ashton.*] That is to say, the cutting down of the extension from two years to one year really lessened the security in the minds of those who might have found the money? Yes; in the first place we lost time, because the smelting works had not started,—instead of being started in nine months, they were not started for two years. Then the time got very short, and when we found that we got only one year's extension, the people refused to go on. If we had got that other year, I am quite convinced that there would have been no occasion to ask for this extension.
1383. That is to say, the money would have been forthcoming? Yes; if we had got the extra year. I do not think that there would be the slightest occasion to ask for an extension under this Bill.
1384. *Mr. Campbell.*] How do you account for your people out here stating definitely before the Select Committee that that extension of time was only being asked for in case of a contingency, such as bad weather—that everything was in readiness? I was not here; I was in London at the time.
1385. *Mr. Nicholson.*] Since you have been down there has it ever been your opinion that the Port Kembla Harbour scheme and the Illawarra Lake scheme are rival schemes? I used to consider that they would be to a certain extent, but I do not see that there should be very much rivalry between them now. In any case, we want a harbour for the smelting works.
1386. In any case, you can see from the situation of the Lake that you can never expect to have much coal shipped from there? We do expect to ship coal from there, whether Port Kembla Harbour is built or not, because we will have vessels coming with ore which will take back a cargo of coal. We shall be large buyers of coal for shipment.
1387. For the benefit of your own particular industry? Yes.
1388. At the same time you can never expect ocean-going steamers to go near Lake Illawarra for a load of coal? We often hope things.
1389. *Mr. Campbell.*] Are Mr. Barton and Lieutenant-Colonel Neild the only Members of this Parliament who are members of your company? I think so. I explained that. I got instructions in London to allot some shares to Mr. Lyne; but when I arrived here I found that Mr. Lyne has never accepted them, and that therefore he was not a shareholder.
1390. Did his name appear on the London share list? Yes; but you cannot allot shares to a man unless he accepts them; otherwise we might all get presents.

1898.
(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

ILLAWARRA HARBOUR AND LAND CORPORATION ACT
FURTHER AMENDMENT BILL.

(PETITION FROM A. ARMSTRONG, MANAGING DIRECTOR OF THE ILLAWARRA HARBOUR AND LAND CORPORATION (LIMITED), PRAYING FOR LEAVE TO BE REPRESENTED BEFORE THE SELECT COMMITTEE AND AT THE BAR OF THE HOUSE DURING THE PROCEEDINGS ON.)

Received by the Legislative Assembly, 6 December, 1898.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales in
Parliament assembled.

The humble Petition of the Managing Director of the Illawarra Harbour and Land Corporation
(Limited),—

SHOWETH AS FOLLOWS:—

1. By a private Act assented to on 20th December, 1890, the Illawarra Harbour and Land Corporation (Limited) were empowered to form and maintain an entrance and passage between the South Pacific Ocean and the waters of Lake Illawarra, in the county of Camden, and to construct, use, and maintain, and, in certain respects, control and regulate, a harbour within the waters of the said lake and of Windang Bay, in the said county of Camden, and to make, establish, maintain, and control wharfage and shipping accommodation in connection therewith, and to construct, work, use, and maintain a line or lines of railway to connect with the said harbour all or any coal-bearing lands situate between the Ocean Colliery on the north and the Macquarie River on the south, and to reclaim, purchase, take, occupy, and otherwise acquire land on certain terms, provided that the said harbour and entrance thereto and channel should be commenced within two years, and be made and completed in accordance with the provisions of the Act, and opened throughout for the admission of vessels of a draft of 15 feet within the term of seven years from the passing of the Act, failing which all rights and privileges acquired under the Act should be null and void, and all reclaimed lands should revert to the Crown, excepting certain lands in the said Act mentioned.

2. By the Illawarra Harbour and Land Corporation Act Amendment Act of 1895 the time mentioned in the Principal Act for the completion of the harbour and entrance thereto and channel was extended for a further period of one year from the 20th day of December, 1897.

3. The corporation have already expended a sum of £44,312 16s. 9d. under the provisions of the statute upon surveys, plans, and works at the entrance of the said Lake Illawarra, and in constructing a line of railway connecting the said lake with the Ocean Colliery, and also connecting same with the smelting works and the State line of railway.

4. The corporation has introduced a Bill before your Honorable Parliament with the following preamble:—

Whereas the Illawarra Harbour and Land Corporation (Limited) (being a joint stock company duly incorporated and registered under the Companies Acts of 1874 and 1888, and hereinafter called the corporation) obtained on December twentieth, one thousand eight hundred and ninety, legislative authority to form and maintain an entrance and passage between the South Pacific Ocean and the waters of Lake Illawarra, in the county of Camden: And to construct, use, maintain, and in certain respects control and regulate, a harbour within the waters of the said lake and of Windang Bay, in the said county of Camden: And to make, establish, maintain, and control wharfage and shipping accommodation in connection therewith, and to construct, work, use, and maintain line or lines of railway to connect with the said harbour all or any coal-bearing lands situate between the South Coast Colliery on the north and the Macquarie River on the south: And to reclaim, purchase, take, occupy, and otherwise acquire land in certain cases, and on certain terms as to acquisition, compensation, payment, rent, investiture, and otherwise: And to levy, receive, and recover rates, tolls, and dues for the use of the said entrance, harbour, and accommodation, and for towage, and fares, freights, and other charges for the use of the said railways, and to confer and impose upon the said corporation certain

powers, rights, duties, and liabilities: And to extend the rights of owners of the foreshores of the said lake: And for other purposes: And whereas the Act authorising such work was by an Act amended on December twelfth, one thousand eight hundred and ninety-five: And whereas in connection with the rights, powers, and privileges granted important industries have been established: And whereas the corporation have expended large sums, totalling forty-four thousand pounds, under the provisions granted: And whereas undertakings which have arisen out of the operations of the corporation have necessitated the construction of a branch line of railway not specifically included within the Principal Act: And whereas the construction of such branch line over a parish road received the full authority of the Central Illawarra Municipal Council, and it is advisable that such branch line and sanction should receive legislative approval: And whereas it is advisable that provision should be made for adding further branch lines within the lands owned by the corporation: And whereas the rights of transit-charges and other matters should be more clearly defined by enactment: And whereas under the provisions of the Illawarra Harbour and Land Corporation Act Amendment Act of 1895 the corporation have lodged with the Colonial Treasurer the sum of ten thousand pounds: And whereas the corporation requires still further time to carry out the remainder of its objects: Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Legislative Council and Legislative Assembly of New South Wales in Parliament assembled, and by the authority of the same, as follows,—

Which Bill has by the Honorable Legislative Council been referred to a Select Committee, who have taken evidence and carefully deliberated thereon, and have, by the unanimous action of the Committee, declared such preamble proved:

And the Bill is now before your Honorable Assembly for concurrence.

And upon motion for its second reading such Bill was referred to a Select Committee of your Honorable House.

The corporation believes that this action on the part of this Honorable Branch of the Legislature places the Bill under those Standing Orders which have direct reference to Public Bills, and thus bars the right of the corporation to be represented by counsel learned in law or other legal adviser at or during the sittings of such Select Committee.

Your Petitioner, therefore, humbly prays that leave may be granted to the corporation to be represented by their legal advisers at and during the sittings of such Committee; and also that they may be represented before the Bar of the Honorable Assembly during further discussion upon the Bill.

And your Petitioner, as in duty bound, will ever pray.

A. ARMSTRONG,
Managing Director of the Illawarra Harbour and Land Corporation (Limited).

1898.

REPORT FROM THE SELECT COMMITTEE

ON THE

BOROUGH OF LITHGOW VALIDATING BILL ;

TOGETHER WITH THE

PROCEEDINGS OF THE COMMITTEE

AND

MINUTES OF EVIDENCE.

ORDERED BY THE LEGISLATIVE ASSEMBLY TO BE PRINTED,
8 *December*, 1898.

SYDNEY : WILLIAM APPLIGATE GULLICK, GOVERNMENT PRINTER.

1898.

1898.
(SECOND SESSION.)

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE
LEGISLATIVE ASSEMBLY.

VOTES No. 45. THURSDAY, 1 DECEMBER, 1898.

- 6. BOROUGH OF LITHGOW VALIDATING BILL (*Formal Motion*):—Mr. E. M. Clark moved, pursuant to Notice,—
 - (1.) That the Borough of Lithgow Validating Bill be referred to a Select Committee for consideration and and report.
 - (2.) That such Committee consist of Mr. Brunner, Mr. Rigg, Mr. Thomas Clarke, Mr. Hughes, Mr. Richards, Mr. Ferris, Mr. Spruson, Mr. Ashton, Mr. Perry, and the Mover.
 - (3.) That the Report, Minutes of Proceedings, and Evidence of the Select Committee of 1896 be referred to such Committee.
 Question put and passed.

VOTES No. 46. TUESDAY, 6 DECEMBER, 1898.

- 3. BOROUGH OF LITHGOW VALIDATING BILL:—Mr. Wright presented a Petition from William Briggs, Thomas Saywell, Thomas Wilton, and William Bragg, representing that a Bill had been introduced into this House to validate certain assessments and rates made by the Municipal Council of the Borough of Lithgow; that such Bill had been referred to a Select Committee; that Petitioners were largely interested in the questions to be considered by such Committee; and praying that they may be granted permission to appear before the said Committee in person, or by solicitor or counsel, and to examine and cross-examine witnesses before such Committee.
Petition received.

VOTES No. 48. THURSDAY, 8 DECEMBER, 1898.

- 7. BOROUGH OF LITHGOW VALIDATING BILL:—Mr. E. M. Clark, as Chairman, brought up the Report from, and laid upon the Table the Minutes of Proceedings of, and Evidence taken before the Select Committee for whose consideration and report this Bill was referred on 1st December, 1898, together with a copy of the Bill as agreed to by the Committee.
Ordered to be printed.

BOROUGH OF LITHGOW VALIDATING BILL.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, for whose consideration and report was referred, on 1st December, 1898, the "*Borough of Lithgow Validating Bill*," and to whom was referred on the same date, "*the Report, Minutes of Proceedings, and Evidence of the Select Committee of 1896*," and to whom was also referred, on 6th December, 1898, "*a Petition from William Briggs, Thomas Saywell, Thomas Wilton, and William Bragg, praying for leave to appear in person, or by Solicitor or Counsel, before the said Committee*,"—beg to report to your Honorable House:—

That they have examined the witness named in the margin* (whose evidence will be found appended hereto), and the Preamble having been satisfactorily proved to your Committee, they proceeded to consider the Bill, in which it was not deemed necessary to make any amendment.

* J. W.
Spooner.

Your Committee now beg to lay before your Honorable House the Bill, without amendment.

EDWARD M. CLARK,
Chairman.

No. 1 Committee Room,
Legislative Assembly,
8th December, 1898.

PROCEEDINGS OF THE COMMITTEE.

WEDNESDAY, 7 DECEMBER, 1898.

MEMBERS PRESENT :—

Mr. E. M. Clark,
Mr. Perry,

Mr. Thomas Clarke,
Mr. Rigg.

Mr. E. M. Clark called to the Chair.

Entries from Votes and Proceedings, appointing the Committee, and referring the Report, Minutes of Proceedings, and Evidence of the Select Committee of Session 1896, and also in reference to the Petition of William Briggs, Thomas Saywell, Thomas Wilton, and William Bragg, praying for leave to appear in person, or by solicitor or counsel, before the Committee, read by the Clerk.

George Wallace, Esq. (*Solicitor*), appeared on behalf of Messrs. Briggs, Saywell, Wilton, and Bragg.

John William Spooner (*Mayor of Lithgow*) called in, sworn, and examined.
Witness withdrew.

[Adjourned till to-morrow at *Two o'clock*.]

THURSDAY, 8 DECEMBER, 1898.

MEMBERS PRESENT :—

Mr. E. M. Clark in the Chair.

Mr. Thomas Clarke,

Mr. Hughes.

Mr. Ferris,

George Wallace, Esq. (*Solicitor*), appeared on behalf of Messrs. Briggs, Saywell, Wilton, and Bragg.

Mr. Wallace intimated that he did not propose to call evidence.

Room cleared.

Preamble considered.

Question,—“That this Preamble stand part of the Bill,”—put and passed.

Clauses 1 and 2 read and agreed to.

Title read and agreed to.

Chairman to report the Bill without amendment to the House.

1898.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON

BOROUGH OF LITHGOW VALIDATING BILL.

WEDNESDAY, 7 DECEMBER, 1898.

Present:—

MR. E. M. CLARK,	MR. THOMAS CLARKE,
MR. RIGG,	MR. PERRY.

E. M. CLARK, ESQ., IN THE CHAIR.

Mr. G. Wallace, Solicitor, appeared on behalf of Messrs. William Briggs, Thomas Saywell, Thomas Wilton, and William Bragg.

John William Spooner, Mayor of Lithgow, called in, sworn, and examined:—

1. *Chairman.*] Have you anything to add to the evidence given by the Select Committee which inquired into this Bill in October, 1898? Nothing whatever.
2. The Council is still desirous of proceeding with the Bill? Yes.
3. Have very many of the ratepayers, whose assessments you desire to legalise, not paid their rates? No; there is only £274 4s. 9d. owing now.
4. These ratepayers represent certain collieries? Yes. The following statement will show the outstanding rates:—

J. W.
Spooner.
7 Dec., 1898.

LITHGOW BOROUGH COUNCIL.

STATEMENT of Outstanding Rates for the Municipal year 1894-5. General rate, 1s. in the £; Lighting rate, 4d. in the £.

Ward.		General.	Lighting.	Total.
		£ s. d.	£ s. d.	£ s. d.
Lithgow	Lithgow Valley Colliery Co.	19 1 4	8 9 6	27 10 10
	Lithgow Valley Pottery	20 5 0	9 0 0	29 5 0
	Various properties.....	24 14 7	9 19 10	34 14 5
Clwydd	Vale Colliery	13 9 11	5 19 11	19 9 10
	Vale of Clwydd Colliery	20 8 11	9 1 9	29 10 8
	Various properties.....	29 13 0	13 4 1	42 17 1
Eskbank.....	Oakey Park Colliery.	21 4 1	9 8 6	30 12 7
	Zig-zag Colliery.	16 5 4	7 4 7	23 9 11
	Hermitage Colliery	19 2 1	8 9 10	27 11 11
	Various properties.....	6 6 4	2 16 2	9 2 6
		190 10 7	83 14 2	274 4 9

Mr. Sandford, who was most heavily indebted, has paid all his rates.

J. W.
Spooner.
7 Dec., 1898.

5. *Mr. Perry.*] The rates for 1894 were not paid at all in the cases to which you refer? No.
6. The only reason they had for not paying is that the Council struck differential rates? Yes; and that in trying to strike a fresh assessment, no call of the Council was made, but only an ordinary meeting held.
7. The Bill has been introduced simply to cure an error? Yes. By-law 52 says:—

No motion, the effect of which, if carried, would be to rescind any resolution, order, or decision of the Council shall be entered on the business paper unless a call of the Council has been duly made and granted for such purpose.

8. *Chairman.*] The illegality lay in not making a call of the Council? Yes.
9. Have you any idea as to what was the total amount of the rates struck for the year 1894-5? Speaking from memory, about £900.
10. The whole of that amount has been paid with the exception of £274 4s. 9d.? Yes.
11. Not only have the Council not been paid those rates, but they have also lost the Government endowment which they represent? Yes. In that year the Government endowment amounted to 15s. in the £.
12. It has already been pointed out that a considerable amount of work was carried out near these properties in anticipation of getting the rates? Yes; a lot of work was carried out that year.
13. *Mr. Wallace.*] Virtually, all the rates owing have been paid, except those owing by the colliery proprietors, who fought this matter out in the courts? Yes.
14. *Mr. T. Perry.*] Are the collieries working now? Yes, all of them.
15. *Mr. Clarke.*] Is the amount you have named only for one year or for two years? For one year. I may say that in nine years we have spent over £10,000 upon the roads of the borough.
16. *Chairman.*] On the roads leading to these properties? No; on the leading roads in the borough.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

BOROUGH OF LITHGOW VALIDATING BILL.

(PETITION FROM WILLIAM BRIGGS, THOMAS SAYWELL, THOMAS WILTON, AND WILLIAM BRAGG,
PRAYING FOR LEAVE TO APPEAR BEFORE SELECT COMMITTEE IN PERSON, OR BY SOLICITOR,
OR COUNSEL, AND TO EXAMINE AND CROSS-EXAMINE WITNESSES ON.)

Received by the Legislative Assembly, 6 December, 1898.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in
Parliament Assembled.

The humble Petition of William Briggs, Thomas Saywell, Thomas Wilton, and William Bragg,—

RESPECTFULLY AND HUMBLY SHOWETH:—

1. That a Bill has been introduced into your Honorable House, in pursuance of leave in that behalf given, intituled "A Bill to Validate certain Assessments and Rates made by the Municipal Council of the Borough of Lithgow."

2. That such Bill has been referred to a Select Committee appointed by your Honorable House for consideration and report.

3. That your Petitioners being largely interested in the questions to be considered by such Select Committee, your Petitioners are advised that it is desirable they should be represented before such Select Committee.

4. Your Petitioners therefore humbly pray that your Honorable House will be pleased to grant them permission to appear before the said Select Committee in person, or by Solicitor or Counsel, and if necessary to adduce such evidence and send for such persons and papers as your Petitioners may be advised, together with power to examine and cross-examine witnesses called before the said Committee.

And your Petitioners, as in duty bound, will ever pray.

WILLIAM BRIGGS.
THOMAS SAYWELL.
THOMAS WILTON.
WILLIAM BRAGG.

The Superintendent, Government Labour Bureau, to The Minister for Labour and Industry.

Sir,

Sydney, 5th August, 1898.

I have the honor to submit the sixth Annual Report of the Government Labour Bureau for the year ending 30th June, 1898.

Labour and Industry.

The operations at the Labour Bureau for the year clearly indicate a distinct falling off in the number of unemployed applying to the Department for employment, passes, and other forms of assistance.

The number of persons registered, and the number sent and assisted to work, show a marked decrease to that of any previous year.

It is only natural to expect that the number registering on our books each year would diminish; but when there is a considerable reduction both in the number registered and the number sent out, it is reasonable to conclude that there is a distinct falling off in the number of unemployed generally.

49—A

To

To the proof of this the following table of the number registered and sent out each year since the establishment of the Bureau (17th February, 1892, making it now six and a half years in existence) will amply testify:—

Year ending—	Number Registered.	Number Assisted and sent to work.
1893	18,600	8,154
1894	12,145	10,349
1895	13,575	16,380
1896	14,062	20,576
Intermediate period	3,283	5,327
1897	6,427	13,718
1898	4,167	7,817
Totals	72,259	82,321

The intermediate period referred to was between 18th February and 30th June, 1896. In making our year assimilate with the financial year, the above period of four months was occasioned.

It may seem strange that the number assisted and sent to work should so much exceed the number registered. It is due to the fact that a man is registered only once, but there is no limit to the number of times he may be sent or assisted to work.

The large totals of registrations and those sent and assisted to work for 1895 and 1896 was due to the great number sent in those years to work on the Centennial Park, Church and School lands, and other relief works, in addition to those dispatched to employment in the country on railway passes, &c.

The only Government works for the benefit of the unemployed during the year were railway deviations, Botany Sewage Farm, Shea's Creek, Glebe Island, and the scrub-cutting at the West Bogan. (The first-mentioned and Shea's Creek works have for the present ceased.)

These, however, can scarcely be called relief works, as they are all reproductive, and will ultimately provide a return upon the cost. The works would, furthermore, have been carried out whether there were any unemployed or not.

The continued drought from which the Colony has so severely suffered for the last three or four years, particularly in the Riverina and Western districts, inflicting terrible losses in stock and crops, the prevailing want of confidence and enterprise through the banking crisis and failure of financial institutions in 1893 (still felt and likely to be felt for some time), together with the great depreciation and fall in the value of property, both in the city and country, have been disheartening and discouraging, and have materially affected labour and industry throughout the Colony, preventing investment, speculation, and the distribution of capital which would have found employment for many of our own unemployed mechanics and labourers.

The effect of these financial disasters, together with rash speculation in bogus mining ventures, serious disputes between capital and labour, and the immense losses sustained by many of our wealthy as well as many of our industrial colonists, has done more to create the unemployed difficulty than anything else; and until the injurious effect is removed, and confidence restored, improvement will be slow; but the experience, severe as it may have been, will make it safe and sure.

It is said there is plenty of capital in the Colony, but being locked up, is of little use to its owner or anyone else. The reaction and improvement which is doubtless now setting in will, I think, induce its investment in sound and payable industries, of which there are plenty available, to the mutual benefit of investor and labour generally throughout the Colony.

Yet, notwithstanding all these difficulties and disadvantages to contend with, I think it can be truly and fairly stated that the condition and position of the Colony generally in all matters relating to trade, labour, and industry is improving and progressing.

As an evidence of this, the returns of the railways for last year might be mentioned, which, in the aggregate, was a record. I also understand that for this year the returns already indicate that it will be equal to, if not greater, than last year.

Furthermore, the large areas of land which have been cleared during the last two years, and which are still in progress to a greater extent this year with the necessary preparations for the coming season, will, I think, without doubt, go to prove that there will be a far greater area of land under cultivation this year than ever before in the Colony.

In support of this, I may quote the following extract appearing recently in the Press:—

"Wheat-growing.—It was pleasing to hear from the country visitors in town (during the Sheep Show and Sales) of the energy that has been given to grain-growers by selectors and squatters. Men who a few years ago would have thought it *infra dig.* to grow anything but wool are now giving their best attention to getting large areas under wheat, either by their own hands or what is known as the half system. Men who only had hundreds of acres in last year have thousands this. Although not a good harvest, they have tasted of the profits to be obtained from cultivation; and, from the present aspect, it is safe to predict that New South Wales will be an exporter for the world's market next season should we experience a propitious harvest. This deserves all encouragement. Instead of importing our bread-stuffs, New South Wales will be able to increase her revenue by exportation."

The dairying industry is also largely on the increase in the Colony, and many new factories are in process of erection.

It is, furthermore, safe to anticipate a continuance of improvement in these important industries, as it is thought by scientists and others (with whom the subject is a study) that the late general rainfall throughout the Colony, which has proved of immense value to the pastoralists and farmers, is evidence that the severe series of droughts from which the Colony has been suffering has broken up.

This has caused a feeling of hopefulness that some good and fruitful seasons may be expected, which will materially affect the unemployed difficulty, and largely add to the general progress and prosperity of the Colony.

As already mentioned, the late rains have been of immense value to the pastoralists of the interior, and will greatly increase the wool clip this year. The lambing also in several of the country districts will be very good. In one case a pastoralist informed me that the increase on his station would be equal to 96 per cent., and in other districts from 70 per cent. to 80 per cent.

Trades and Callings.

The following is an abstract of a few of the trades and callings registered, and of the numbers sent out during the last five years, showing a general reduction for each period:—

Trades and Callings.	Registered.					Assisted and sent to work.

By request, we have forwarded to the Governments of South Australia and Western Australia copies of all forms and books we have in use, together with explanatory notes, showing our methods in the working of the Labour Bureau.

In both these Colonies they contemplate opening labour bureaux to deal with the unemployed accumulating there.

When in Queensland recently I visited the Labour Bureau in Brisbane, and was surprised at the small amount of work done as compared with that of our own Department. The forms in use at Brisbane are the same as ours, copies of which were furnished them some years ago.

I understand that the forms, &c., in use at the New Zealand Labour Bureau are also the same as ours, copies of which, together with details of our methods, were furnished, by request, to the New Zealand Minister for Labour some years ago.

The Minister's recent instructions, directing that in future all applicants to the Bureau for registration, passes, or other forms of assistance, must first produce their elector's right, or some other satisfactory evidence to show they are *bonâ fide* colonists, has caused some peculiar revelations. It has been found that hundreds of men, some of whom have all their lives been in the Colony, had not only failed to enter their names on the electoral rolls of their districts, but had never in the whole course of their lives been in possession of an elector's right and had never recorded a single vote at the ballot-box.

In compelling these to procure electors' rights we have, during the last two months, added considerably to the electoral rolls of the Colony.

During the year we have received communications and reports from labour institutions in the United States of America and Austria, requesting copies of our publications, which were duly forwarded.

The returns of the Government Statistician show that the increase of population for the year ending 30th June is equal to 24,360, which is a very large increase to the consumers in the Colony. It also means that there will be an increase of thousands of young men just entering into manhood, most of whom will be competitors with the industrial classes in the battle of life, requiring increased avenues of employment to enable them to successfully do so.

Wages.

Wages.

The rates of wages offering at the Bureau and in the country is about the same as last year.

As is generally known, the Bureau does not interfere with the terms or conditions of employment. Its main object is to bring employer and employee together, leaving it to the parties themselves to make their own arrangements.

In cases, however, where an employer offers what is considered a very low wage, we sometimes point out that he cannot expect to secure a good man at his rate of wages; and frequently by these means an increase is obtained for the man, and a better standard of labour for the employer, thus disproving the groundless assertion made at times that the Bureau has been the cause of a reduction in wages generally.

It must be self-evident to any reasonable mind that while there is a large number of unemployed appealing for work a reduction of wages is sure to result. Work and wages are governed by the law of supply and demand, like anything else. If an employer requires fifty men and 150 apply, wages will decrease; but if only ten apply they will be sure to increase. It is a strange fact that many female domestic servants in several instances receive better wages than an able-bodied man. In many cases the fault lies with the men themselves, as instances are not wanting where, when work has been found for them, they fail to remain at it or try to give reasonable satisfaction to their employer.

The rate of wages paid to-day, when compared with that paid some ten or twelve years ago to skilled and unskilled labour, shows a very great reduction, in many cases from 25 per cent. to 40 per cent. This, however, is not peculiar to New South Wales, the same thing (excepting the different professions and perhaps shearers) having occurred in all the other Colonies. The reduction in the remuneration for labour has been in operation by slow degrees for a number of years throughout Australia.

As an illustration of the decline in the earnings of labour, I might refer to the Newcastle coal industry.

In 1880 coal was selling at 14s. per ton, and the miners were receiving as high as 5s. 2d. per ton for hewing. In 1891-2 there was a great drop in the selling price of coal, which came down to 8s. per ton, and a reduction in the hewing rate to 3s. 10d. and as low as 3s. 6d. per ton. In 1883 the vend was in existence, and the selling price of coal was fixed at 11s. with a hewing rate of 4s. 2d. per ton. This lasted for ten years, when, in 1893, it was abolished.

Competition set in and has continued ever since, reducing the selling price of coal and the hewing rate until, at the present time, the former is from 5s. 6d. to 6s. 9d. per ton, and the latter from 1s. 10d. to 2s. 11d. per ton, thus showing a reduction all round, in those years, of 50 per cent. The present price leaves hardly a margin of profit to the colliery proprietors and the hewing rate hardly a living to the miners.

During the existence of the vend the miners could earn from 10s. 6d. to 15s. per day, while at the same time there was a fair rate of dividends for the proprietors.

In 1880 and up to 1883 there were only some eight or nine collieries in the Newcastle District; whereas at the present time there are about eighteen, or double the number, and the miners have increased proportionately.

It may be somewhat difficult to definitely account for this great reduction. Keen competition has had a great deal to do with it, and unreasonable and ill-advised disputes and strikes have also assisted to occasion it. Every strike which took place in the Newcastle District reduced the foreign trade and assisted in opening up a coal trade in other parts of the world which became their competitors, until the foreign trade formerly enjoyed by the Newcastle collieries has to a large extent disappeared. Very few of the many strikes which took place had the effect of benefiting the miners; indeed, in almost every instance they returned to work worse off than when they left it.

Newcastle, under reasonable conditions, should be the most prosperous district in Australasia.

There is, I am pleased to say, a strong probability of the selling price being raised to 8s., and a proportionate increase in the hewing rate.

The alien question is one which, even at the present time, affects the standard of wages, and which, if not soon remedied, will materially reduce the wages of our own workers in the future.

There are constantly arriving in the Colony large numbers of Hindoos, Mahomedans, Afghans, Cingalese, Syrians, Greeks, and other foreigners. Many are engaged by employers seeking cheap labour, to the detriment of our own people. These foreigners can live on so little, as compared with Australians, and their habits of life being so different, that they become very dangerous competitors in the avenues of employment which they enter.

Only recently, two Hindoos or Afghans, I am not sure which, applied at the Bureau for work. They described themselves as carpenters, and said they would work cheap. Not being in possession of electors' rights, we refused to register them.

At the present time, the market-gardening is monopolised by Chinamen as well as the distribution of vegetables, not to speak of the large hold they have on the cabinet-making trade.

The retail fruit and fish industry is monopolised by the Italians; and the hawking and peddling chiefly by Assyrians.

The great danger is in the industry and perseverance of these people; and their mode and habits of living are such that our own colonists cannot compete with them. At the same time, our people would do well to emulate their industry, perseverance, and determination.

The reduction of wages, generally, was first due to the completion of our large public works in 1885. From 1880 to 1885, the sum of £5,242,807 was expended on public works, and while these were in progress work was brisk and wages good. Then we had the memorable land boom (1882 to 1891), which collapsed in 1892-3, the effect of which proved most disastrous to the Colony. Depression became marked; and soon work of all kinds became scarce, with a general reduction in wages. This condition of affairs was accentuated by the maritime strike of 1890. However, as already mentioned, there are indications of better times in the near future.

The Building Trade.

The building trade is still very much depressed. Very few buildings (with the exception of the Queen Victoria Markets) affording work for any length of time have been erected during the year.

The chief cause of the depression in this trade is undoubtedly due to its having been overdone during the land boom and building society mania of 1891-3, which had so blighting an effect on the hopes and prospects of so many of our industrious colonists.

The severe depreciation in the value of house property, and the great decline in rents, have made house property a very poor investment, and have consequently stopped almost all investment in that direction.

The number of empty houses in the city, and more especially in the suburbs, clearly shows that the supply far exceeds the demand.

The reduction of wages, together with the want of permanent employment, is the one great cause of so many empty houses. Large numbers of married men with families, through irregular employment, in some cases a few days in a month, or a few months in the year, and this at a much lower rate of wages than prevailed some years ago, find they are unable to occupy and pay for the rent of a house to themselves, have to put up with a room or rooms instead, or remove to some low and unhealthy neighbourhood where rents are lower, often to the sacrifice of their physical well-being. But it can also be truly said that in many of these cases the fault is their own. What little they earn is spent in dissipation, and ultimate loss of employment.

On the other hand it is pleasing to note that many of our best mechanics and labourers have, by energy, care, and some sacrifice, adapted themselves to the altered circumstances of life, and by the aid of the reduction in rents, habits of industry and sobriety, have managed to live a worthy and honourable life, which never fails to stick to such men in making an honest living.

Fossickers.

The serious droughts from which the Colony has been suffering, as already mentioned, has affected this industry materially. Fossicking and gold-mining cannot succeed without an abundance of water; and the want of rain during the last year and a greater portion of this prevented many from following this occupation.

As a recognised industry, fossicking has been in operation for the last five years, during which time no less than 26,644 men have been assisted to mining centres all over the colony—some to old and abandoned gold-fields, while others have succeeded in discovering new ones, such as Wyalong, where there are at present thousands of men employed.

Many of the fossickers have done well, others fairly well, and others have just for a time made a living.

As illustrating the success of some of the fossickers on old and abandoned fields, reference might be made to an instance mentioned in my last Report, where a man and his mate who received passes at the Bureau and joined a party working some ground in the Parkes District, which had been abandoned some twenty-five years ago, after sinking only 3 feet a very rich reef was struck, for which they had been offered £14,000 cash and 6,000 shares by a company that wished to buy them out.

During this year only 937 men were dispatched fossicking, being a decrease of 710 compared with the number sent out last year, viz., 1,647.

A large number of those sent fossicking have combined it with other occupations, such as farming, poultry-rearing, &c., and have sent for their wives and children to join them. In this way many hundreds of families have been permanently settled on the land.

It is worth noticing that since this industry has been in operation at the Bureau, the gold won in the Colony has on the whole been steadily increasing, and fossicking is, I think, justly entitled to some credit for this large addition to the wealth of the Colony, while at the same time providing an independent living for a large number of industrious men and their families.

The following table will show the value of gold won in the Colony since 1891:—

Year.	Oz.	Value.		
		£	s.	d.
1891	...	153,336	558,305	12 3
1892	...	156,870	569,177	17 4
1893	...	179,288	651,285	15 8
1894	...	324,787	1,156,717	7 7
1895	...	360,165	1,315,929	0 0
1895-6 (intermediate period)	...	111,024	402,590	0 0
1896-7	...	275,285	1,014,077	2 3
1897-8	...	318,692	1,178,492	0 0

Casual Labour Farm.

The Casual Labour Farm is situated near Pitt Town, in the Windsor District, and was formerly the Pitt Town Village Settlement (containing about 2,000 acres), which was established by Act of Parliament in 1893 on the Co-operative and Communistic or Socialistic principle. About 100 men were placed on the settlement, having wives and children numbering 265—90 married men and 6 single men.

It remained in existence up to the latter part of 1896, when it became a complete failure. It progressed for a time fairly well, while the Government provided the funds to support the settlers and their families. Altogether the State spent £7,705, or thereabouts, in the hope that ultimately it might become self-supporting; but when the Government stopped further assistance, and informed the settlers they must endeavour to support themselves by the production and exertion of their own labour, "a change came o'er the spirit of the dream," and in a very short time Socialism gave way to Individualism. One by one the settlers left and found employment elsewhere. The last of them left in the beginning of 1897.

In the latter end of 1896 the site was vested in the Hon. the Minister for Labour and Industry, who at once set to work to establish and prepare the settlement for a Casual Labour Farm, on lines very similar to that of Leongatha Labour Farm in Victoria.

The

The object of the Casual Labour Farm is, in brief, to provide a temporary refuge for those who are destitute, homeless, and unable to find employment.

The men sent to the farm are fed and housed, and receive a small weekly wage, which can be increased to a limit on the result of their own exertions and the amount of labour done.

The Minister appointed Mr. A. Hutchison as manager, who immediately commenced to fence in and protect the farm from stray cattle, &c.; clear and grub areas for cultivation of vegetables and fruit; and making accommodation for the men. The work already performed in this direction reflects the greatest credit on the management, considering the few employed.

A considerable amount of farm produce, vegetables, and fruit from the orchard was the result of the first season.

With fairly good seasons, should the Minister decide to dispose of the surplus produce, the Casual Labour Farm can be made to a large extent, if not altogether, self-supporting.

The first batch of ten men were sent to the farm in January, 1898. Some have left, having obtained employment elsewhere, and at present the number of men on the farm (30th June) is twenty-four, and will be increased to about sixty.

In addition to vegetable and fruit cultivation, there is an immense quantity of timber at which the men are employed felling and splitting, to be disposed of as firewood.

Another object in view will be to make the farm a sort of training-school to those sent there.

As they become competent in farming, vegetable gardening, and orchard work, they will (as applications for such kinds of labour come to the Bureau) be selected, as already has been done in some cases.

All men sent to the farm are selected at the Bureau, and upon the applicant signing the conditions and regulations under which they are accepted, they are sent.

The men at present on the farm have expressed themselves as being well satisfied with the conditions and their treatment; indeed, the sturdy, robust appearance of the men is a pleasing contrast to the appearance of many of them when they first applied to the Bureau to be despatched to the Casual Labour Farm.

Registry Offices.

I believe the Honorable the Minister for Labour and Industry has prepared a Bill to license registry offices. When passed into law it should be of great value in protecting members of the working classes and unemployed generally from being victimised, as they frequently are, by many of these so-called registry offices.

My experience of many of them during the existence of the Bureau has not been very favourable. A great many abuses exist in connection with them which might, and would, be remedied if the Bill referred to were passed.

Several of these offices have been prosecuted for obtaining money under false pretences.

In cases which have from time to time come before my notice, two, three, and four applicants have paid fees for some situation, which, in the end, turned out to be bogus. Others have been sent to places to be told, on arrival, they were not wanted.

In some cases it has been found that the employer has forwarded the fare to the registry office for the despatch of their employee, and, instead of paying the man's passage by rail, have held the money, and endeavoured to obtain a railway pass for him through the Bureau; but, by wiring to the employer from this office, the fraud has been detected, and the pass declined, at the same time debarring the registry office from all future Bureau assistance.

West Bogan Scrub-clearing.

This work was commenced in 1896. The first batch of fifty men, in gangs of ten each, was despatched on 14th September, 1896, and the work has been in operation ever since.

Notwithstanding all the criticism levelled against it, and the small wages earned by some of the men, the West Bogan scrub-clearing has been the means of providing employment for about 1,850 men, at a time, too, when work was scarce and difficult to find.

Last year the average wages earned were from 2s. 6d. to 12s. per day, averaging all round 6s. This year the earnings have been from 2s. 6d. to 9s. 6d. per day, or an average of 5s. 6d. It is but reasonable to expect that the earnings of some of the gangs would be small compared with others. On inquiry, however, the cause has invariably been traced to their own fault, the chief reasons being quarrelling among themselves, dissension, laziness, &c., &c. Others have found the work unsuitable.

The butty-gang system (in operation at the Bogan) does not always prove satisfactory. My own opinion is, the gangs are too large. Five in a gang would work better, there being less prospect of disagreement and dissension, as five men are likelier to agree and work together than ten. This, however, would necessitate increased cost in supervision and management.

The men select and form their own gangs. The gangers are always advised to be careful, in forming their gangs, to select men favourably known to them as agreeable and willing workers. If, among the gangs thus formed, indifferent men are included, and their efforts for that reason prove unsuccessful, the fault is theirs. The gangs when formed are selected by ballot, the method being as follows:—When instructions arrive at the Bureau for the despatch of (say) six gangs of ten men each for the Bogan, a notice in accordance is placed in the yard on a board, with complete information for all the men as to the conditions, price per acre, plan of blocks, &c. A stated time is allowed in which the men form gangs among themselves, appointing one of their number as ganger. If more than the requisite number of gangs apply, the gangers representing their gangs participate in a ballot, and the successful gangs are then despatched.

The cost of living at the Bogan is from 7s. 6d. to 10s. per week.

It has been proved beyond doubt that the gangs that work amicably and unitedly together can earn fair wages at this work.

The wives and families of married men (desiring it) in the gangs are advanced a weekly supply of provisions (till they earn sufficient to send down money to their families), the cost of which is deducted from the men's earnings.

Attendance and Conduct of Men employed.

The average daily attendance of unemployed at the Bureau was about 150. On occasions of selections of men for Government works the attendance was from 600 to 750.

The men come and go all day. When they find there are no suitable vacancies for the day they leave and seek work elsewhere.

As a rule the men are quiet and orderly, and willingly submit to the rules of the Department; but frequently I have to deal with men who think they can do as they like. These have to be treated firmly, as much in their own as in the interest of good order prevailing among the general body of those attending the Bureau.

Female Servants.

The demand for female servants has considerably increased during the last six months, which we often find it difficult to supply.

The wages offered for servants to go into the country are liberal. To further our efforts to secure what they required, employers have in several instances sent us money to advertise.

The Bureau is so well and favourably known throughout the Colony for supplying all kinds of labour free of charge to either party, that most of the large station owners and managers, and also tradesmen, prefer writing to the Bureau, and thus save themselves the excessive fees charged by some of the registry offices.

Relief.

The total amount of rations issued by the Government Labour Bureau for the year ending 30th June, 1898, was £344 13s. 4½d., and is made up as follows:—

	£	s.	d.
Rations to special miners, ordered and paid for by the Mines Department	140	17	3
Rations advanced to families in Sydney of men employed on the Bogan, the cost of which is a charge on their earnings	64	3	11½
Free rations to families in Sydney of men absent in the country looking for work	139	12	4
	£344	13	6½

The only relief granted to country districts was £50 to the New Lambton Council and £100 to the Adamstown Council on the £ for £ principle, the Council adding a like amount, the whole to be spent, in accordance with conditions issued by the Minister, on useful and necessary works in the respective municipalities.

The granting of these sums was occasioned by the closing down of the Waratah Colliery and the serious accident which occurred at the Dudley Mine, throwing out of employment a large number of married men residing in the towns referred to, and who as a consequence were rendered destitute.

Old Men and Methods of Relief.

There are still about fifty old men who are past heavy manual labour continually applying at the Bureau for light employment. Some of these cases, having large families depending on them, seem very deserving.

In every case of relief there is an inquiry and inspection before any assistance is granted.

My experience in this Department has clearly proved the necessity of this, even when the applicant has been strongly recommended.

While State relief is absolutely necessary in many cases of destitution, sickness, widows, and other deserving conditions, indiscriminate charity often does more harm than good.

The new charity organisation, in the formation of which the Premier and other philanthropic citizens took so active a part, will, I have no doubt, prove both effectual in relieving the truly deserving and preventing imposition and overlapping by those with whom it is a profession.

Refunds.

The amount of refunds received from all sources for the year was £2,801 19s. 11d., or a decrease of £62 19s. 7d., as compared with the preceding year. This total represents the sum received for rations, miners' rights, and all other miscellaneous items.

It also includes the amount received as refunds of rail and steamer fares, totalling £2,741 1s. 5d., or a return equal to 72 per cent. on the cost incurred for rail and steamer fares. This is very satisfactory. The grand total amount of refunds up to the end of June was £17,420 8s. 3d.

There is, however, still a considerable amount due to Department.

A strict system of monthly circulars is in force to those indebted to the Bureau.

In the collection of fares I am much indebted to the assistance (in extreme cases) of the police, who, through the courtesy of the Inspector-General, Mr. Fosbery, have collected items in remote districts, &c., which would otherwise have been lost. The agents of our different country branches also render valuable assistance in the collection of fares due to the Department.

Country Branches.

According to the reports of the forty-two agents in various parts of the country, there are not so many unemployed as is generally supposed.

With the exception of Cooma, Dubbo, Grafton, Lithgow, Mudgee, and Maitland, all the agents report there have been very few during the year, and that, through the late rains, work has been found for most of those unemployed formerly.

According to the branch reports, the ruling rate of wages in the different districts show little or no alteration to that of the year previous.

The

The total number registered at the branches was 715, and the number sent and assisted to employment equal 288, at thirty-one of the branches; eleven branches reporting nil registered and sent out.

Through the frequent changing of Clerks of Petty Sessions (who act as our agents), and through the outgoing officer not instructing his successor, who may be entirely new to the duties of labour agent, many errors occur in the returns furnished us, necessitating extreme care at the Head Office in checking their figures, and causing a considerable amount of correspondence and wiring to correct same.

The Clerks of Petty Sessions receive no remuneration for their services as labour agents, and I fear that, generally speaking, they do not, as a consequence, take that interest in their work which they otherwise would.

The branches generally are of great assistance in supplying local knowledge to the Head Office when required; in detecting various forms of imposition; collecting refunds of fares, and furnishing the state of labour and industry throughout the Colony.

The reports of the country agents are hereto attached.

Summary.

The total number registered at the Bureau (Head Office) was 4,167, or 2,260 less than that for the preceding year. There were 1,542 married men, representing 4,160 children, of which 2,852 were dependent on their parents and 1,308 self-supporting, while the number of single men registered was 2,625.

The total number assisted and sent to work was 7,817, or a decrease of 5,901 as compared with the preceding year.

The number of fossickers sent out was 937, showing a decrease of 710 compared with that of the previous year, due no doubt to the drought experienced during the first eight or nine months of the year.

The number of arrivals from the other colonies and foreign parts was 667, or a decrease of nine to the previous year.

The number arrested for drunkenness, and other offences in the city and suburbs, and whose tickets were taken from them and forwarded with a report as to the nature of their offence by the police, was eighty-two, or 128 less than that for the preceding year. I cannot say if this decrease is to be attributed to the fact that the unemployed are becoming more temperate, or that they had less money to spend.

Whatever the cause, the figures indicate a marked difference for the better.

I am frequently asked if I can estimate the number of unemployed in and around Sydney, or in the Colony. Although it is my business to take note of all matters relating to the unemployed, it is impossible for me or anyone else to give the exact numbers. At best it is only an estimate of the probable number, and even that is most difficult to arrive at, as all through the Colony employment has been so irregular that one month there may be from 4,000 to 8,000 unemployed, which the very next month may be reduced to 2,000 or 4,000, through half of them securing temporary employment for a few weeks or months. Furthermore, during the winter months, the number of unemployed in Sydney always increases through slackness of work in the country at the close of the summer season, when they immediately flock to Sydney.

There is, however, ample evidence to show that there is a considerable decrease in the number of unemployed in and around Sydney this winter to that of previous years, as is borne out by the absence of agitations, public meetings, and processions of the unemployed as formerly.

There is still, however, a large number of men who can only obtain perhaps one or two days' work per week. These can only be classed as casual unemployed. On the other hand, there are always numbers of so-called or self-styled unemployed, who never seek employment, or accept it when offered.

These men are not only a menace and nuisance to the public, but a disgrace to all men who desire to live by honest labour and industry.

Of this class I estimate there are from 300 to 400 about Sydney. They are, however, to be seen in all large cities, preferring to lead a lazy life, some by begging and cadging, others by theft and robbery, but never by honest labour.

There is one other blot on our civilisation to which I wish to refer. I allude to the number (increasing daily) of bootless and ragged boys and girls, mere children, who infest our public streets, offering for sale matches, bootlaces, collar-studs, and other trifling articles with a view to attracting the sympathy of passers-by. Many of these children are bright and intelligent, but unless something is done to stop a course which, in most cases, can only lead to a worthless and, perhaps, degrading future, it will ultimately reflect very seriously on the Colony.

I believe if most of these cases were inquired into it would be found, in many of them, that the trifling earnings of these children go to support parents who would ruin the future of their own offspring in order to live an idle, dissipated life. In some there may be extenuating circumstances—in cases of aged or helpless parents unable to make a living, which unfortunate condition renders the assistance of their children necessary.

In any case, these little ones are allowed to pursue a very dangerous course. The old adage of "Train up a child in the way it should go," is brought to mind. The future of these children, if allowed to continue in their present mode of life, is sad to contemplate. Reform will be out of the question when they mature.

In conclusion, it affords me pleasure to state that my staff very cordially co-operate with me in carrying out the operations of the Government Labour Bureau.

I have &c.,

JOSEPH CREER,

Superintendent.

The Labour Agent, Armidale, to The Superintendent, Government Labour Bureau, Sydney.

Sir,

Labour Bureau, Armidale Branch, 18 July, 1898.

I have the honor to inform you that during the year ending the 30th June, 1898, there were only two applicants for employment at this office, one of whom was sent to Tamworth the other to Tenterfield. There is at present no demand for labour or employment here. The current rates of wages in the district, so far as I can ascertain, are as follows:—Mines, per shift—miners, 8s.; truckers and labourers, 7s.; engine-drivers, 9s.; smelters, 9s. 2d.; carpenters, 9s. to 10s.; tool-sharpeners, 8s., and boys from 8s. 4d. to 5s. Farm labourers, from 15s. to 20s. and found.

I have, &c,

C. SMITH,

Agent.

The

The Labour Agent, Albury, to The Superintendent, Government Labour Bureau,
Sydney.

Sir,

Labour Bureau, Albury Branch, 4 July, 1898.

I have the honor to report that no business of any kind was transacted at this branch during the year ended 30th June, 1898, and that no inquiries were made by either employers or persons seeking employment.

I furnish hereunder a list of the current rates of wages paid in the district:—

Flour-mill hands	45s. per week.
Blacksmiths	50s. per week.
Carpenters	8s. per day.
Wheelwrights	50s. per week.
Coachbuilders	60s. per week.
Bricklayers	9s. per day.
Stonemasons	9s. per day.
Brickmakers	7s. per day.
General labourers	6s. per day.
Agricultural and vineyard labourers	20s. per week and board.
Tinsmiths	45s. per week.
Saddlers	45s. per week.
Tailors	45s. per week.
Compositors	40s. per week.

I have, &c.,

W. JAMIESON,

Labour Agent.

The Labour Agent, Bega, to The Superintendent, Government Labour Bureau,
Sydney.

Sir,

Department of Labour and Industry, Bega, 4 July, 1898.

Since my last yearly report the following rates of wages have been paid in this district:—

Blacksmiths	£2 to £2 15s. per week.
Carpenters	£2 10s. per week.
Shop Assistants	£3 per week.
Junior Shop Assistants... ..	£2 per week.
Storemen	from 10s. to £1 10s. per week.
Coach painters	£2 10s. per week.
Barbers	£2 5s. to £2 10s. per week.
Compositors	£1 10s. to £2 10s. per week.
Labourers	6s. to 7s. per day.

The state of the labour market in this district may be stated as being generally dull throughout the preceding twelve months. This may in a great measure be accounted for by the severe drought experienced for some months. The absolute dryness of the summer had the effect of destroying the grass, and, consequently, cattle suffered severely. And during the early part of this year serious floods occurred, which ruined many fine crops of maize: in addition to this, a large number of cattle died. Since then, however, we have had beneficial rains, and the winter promises to be a good one. No marked change has, in my opinion, taken place in the labour market to warrant me in saying that last year was a successful one, but it cannot be taken for granted from this that a number of unemployed are seeking work. From the fact of there being no applications received by me for this period, I must say that work must have been obtained by those seeking it by their own efforts, and a reference or registration at this office was not necessary.

I have, &c.,

W. E. O'BRIEN,

Agent.

The Labour Agent, Bathurst, to The Superintendent, Government Labour Bureau,
Sydney.

Sir,

Court-house, Bathurst, 7 July, 1898.

I have the honor to forward herewith my report for the year ended 30th June, 1898. This branch has been found useful to persons seeking employment in other districts; they have been provided with railway passes; but I regret to state that employers of labour in this district did not take advantage of this branch when requiring labour of any class.

I have interviewed several employers, contractors and others, and they report that "We experience no trouble in getting competent men in any of the classes (stated in accompanying list) provided a fair rate of wages is paid"; occasionally skilled workmen cannot be obtained in this district.

I have, &c.,

W. G. R. SMITH,

Labour Agent.

Class.	Wage	Class.	Wage.
Accountants	40s. to 60s. per week.	Engine-drivers... ..	50s. to 60s. per week.
Bakers	35s. to 40s. "	Farm hands	15s. to 20s. per week and keep.
Barmen	20s. to 30s. "	Fellmongers	30s. to 45s. per week.

Drapers	30s. to 65s. "	Wheelwrights	40s. to 50s. per week.

The

The Labour Agent, Bourke, to The Superintendent, Government Labour Bureau, Sydney.

Sir,

Department of Labour and Industry, Bourke, 6 July, 1898.

I have the honor to submit you a report in connection with this branch of work done during the twelve months ending 30th ultimo.

Three persons have during that time registered themselves for employment. Refunds on account of railway passes granted have been made to the extent of £28 8s. 9d.

Matters in connection with the labour market have invariably been quiet, and there has been no desire, with the exception above stated, either by employers or employees to avail themselves of any advantages this branch may afford.

As far as I can see this branch in regard to its usefulness in bringing employers and employees together is unsuccessful.

I have, &c.,

O. A. S. FITZPATRICK, C.P.S.,
Agent.

The Labour Agent, Broken Hill, to The Superintendent, Government Labour Bureau, Sydney.

Sir,

Department of Labour and Industry, Broken Hill, 16 July, 1898.

I have the honor to report that owing to the fact that the large mines in this district have their own private labour bureaus, my office has had no influence at all upon the local labour market during the past year.

A few men, mostly newcomers, have registered their names (as per my monthly reports), but I have never seen them afterwards, and have no doubt that their services have been quickly utilised and retained if found capable.

Mechanics are easily obtainable from Adelaide when required, and the supply of miners from New South Wales and the adjacent colonies is quite equal to the demand.

I have issued no railway passes during the year, nor have I received any refunds from persons who have obtained Government aid to proceed to their employment here. Rates of wages attached.

I have, &c.,

JAMES WATT,
Labour Agent.

Rate of wages paid at Broken Hill.

Apprentices—machine shop.....	4s. to 5s. 6d. per day.	Locomotive drivers	10s.	per day.
Blacksmiths—machinery smiths...	10s. 6d. "	" stokers	8s. 4d. "

Lathe hands—machine shop	8s. to 10s. 6d. "	Overseers	25s. "	

The Labour Agent, Braidwood, to The Superintendent, Government Labour Bureau, Sydney.

Sir,

Braidwood, 2 July, 1898.

I have the honor to forward herewith the annual report of this branch for the year ended 30th ultimo. The operations at this branch during the year have been exceedingly small, only one applicant having been registered, who obtained employment and refunded the amount of his railway pass.

There are very few unemployed in this district, which is perhaps owing to the fact that there are no industries beyond that of mining, and that industry being very slack for some time past there is really no attraction to induce men to come here.

The most of the miners in the district are simply fossicking, and earn just about sufficient to make a living. The rates of wages prevailing average as follows, viz.:—

Miners	20s. to 30s. per week.
Labourers... ..	5s. to 15s. "
Cooks	10s. to 18s. "
Mechanics	25s. to 30s. "
Grooms (about)	15s. "

During the early part of this year the continued dry weather greatly interfered with farming and mining operations, but the abundant rains that have fallen recently render prospects in these directions more hopeful; but the supply of labour is quite equal to the demand, and is likely to remain so unless some great developments take place in mining, which is the principal industry of the district.

I have, &c.,

G. A. HYDE,
Labour Agent.

NOTE.—The refunds during the year amounted to £1 6s. 3d.

The Clerk of Petty Sessions, Coonamble, to The Superintendent, Government Labour Bureau, Sydney.

Sir, Department of Labour and Industry, Coonamble, 10 July, 1898.
I have the honor to report that during the year ended 30 June, 1898, the work—as regards this branch of the Government Labour Bureau—was practically nil. No applications were made either for registration by men seeking employment or by employers for men. The condition of the labour market remains unaltered, excepting, perhaps, that there are less men to be seen loafing about waiting the advent of shearing as formerly. It may be, however, that it is rather early for the usual annual influx for that purpose. There is no demand for any class of tradesmen. The builders, saddlers, coachbuilders, and wheelwrights keep about the same number of men employed, but not constantly; these, with few exceptions, are old hands. The rate of wage current is the same as shown in last year's report—i.e., carpenters and builders, 8s. to 10s. per day; coachbuilders, wheelwrights, and blacksmiths, from 1s. to 1s. 3d. per hour; saddlers from £2 to £2 10s. per week; bakers, £2 per week; and labourers and station hands no fixed rate. During the year, three amounts of £2 6s. 6d. each were collected from men to whom railway passes had been granted.

I have, &c.,
C. DILLON, C.P.S.,
Coonamble.

The Labour Agent, Cowra, to The Superintendent, Government Labour Bureau, Sydney.

Sir, Court-house, Cowra, 19 July, 1898.
I have the honor to inform you that during the year ending 30th June, 1898, three persons only registered their names in the books of this office, to each of whom a pass was granted to proceed to shearing.

The following are the rates of wages and occupations in this district:—

Station hands	from 12s. to 25s. per week.
Cooks	„ 10s. „ 20s. „
Wheelwrights	„ 50s. „ 55s. „
Blacksmiths	„ 50s. „ £3 „
Carpenters	„ 50s. „ £3 „
Shearers	„ 18s. „ 20s. per 100 sheep.
Rouseabouts	„ 15s. „ 20s. per week.
Drapers	„ 30s. „ £4 „
Grocers	„ 25s. „ £3 „
Miners	„ 45s. „ 50s. „

During the past year, a considerable increase in the avenues of employment has occurred in this district owing to mining operations and increased cultivation.

I have, &c.,
JAMES MILLER,
Agent.

The Labour Agent, Cobar, to The Superintendent, Government Labour Bureau, Sydney.

Sir, Cobar, 16 July, 1898.
In forwarding my report for the past twelve months, I have the honor to state that the condition of the labour market has been good, owing to the flourishing state of the mining industry. I estimate that there are about 900 men employed in the various mines in the district, the current rate of wages being as follows:—

Underground foremen	10s. per day.
Miners	8s. 4d. per day.
Underground labourers	7s. 6d. „
Engine drivers	8s. 4d. to 10s. 6d. per day.
Smelters	7s. to 9s. per day.
Carpenters	8s. „ 10s. „
Blacksmiths	7s. „ 9s. „
Engineers and turners	8s. „ 10s. „
Surface labourers and firemen	7s. per day.
Boys	3s. to 6s. per day.

There have only been four persons registered for employment during the year, it being the custom of the men to apply personally at the mines.

There are many good mines in the district, and when they are more fully developed the labour market will improve accordingly.

Refunds amounting to £14 2s. 6d. have been received at this office during the past twelve months for railway passes issued from other districts.

I have, &c.,
JNO. B. GIBSON, Acting C.P.S.,
Bureau Agent.

The Labour Agent, Cooma, to The Superintendent, Government Labour Bureau,
Sydney.

Sir,

Court-house, Cooma, 2 July, 1898.

I have the honor to submit my report:—

1. Number of men registered at this office during the past twelve months, 29.
2. The amounts paid direct to this office as refunds of railway fares totalled £72 7s.
3. Railway passes issued from this office from 1 July, 1897, to 30 June, 1898, total—28.
4. *Labour Market*.—There has been a slight, but steady, improvement during the past year. Inquiries for employment have been less numerous, and there are not so many of the unemployed to be seen as formerly. Gold having been found in apparently payable quantities near Cooma, a small rush took place, and all the available auriferous land was applied for by local men. This rush has absorbed from 75 to 100 men. The finding of this gold had the effect also of sending out several more men prospecting. Road-making in this district also finds work for a good many hands.
5. Grazing is the principal industry. The uncertainty of the Monaro climate renders agriculture a precarious pursuit. There are about two hundred (200) men employed as goldminers.
6. Wages—Goldminers 7s. per diem.
Contract labourers 6s. "
Ordinary labourers 5s. "
Mechanics 6s. "
Bush labourers, boundary riders, &c., about 20s. a week, with rations.

I have, &c.,

EDWARD GOMM,
Agent.

The Labour Agent, Cootamundra, to The Superintendent, Government Labour
Bureau, Sydney.

Sir,

Department of Labour and Industry, Cootamundra, 4 July, 1898.

I have the honor to inform you that for the year ending 30th June, 1898, as per my monthly returns, five persons registered at this Branch. These were people who had work to go to, but were unable to reach their destinations without help from the Bureau, so railway passes were issued to them. On the whole, during the last twelve months, there have been few *bona fide* unemployed in this district, and at the present time the town and district are singularly free from those who really want work and cannot get it. Since my last annual report, very important works have been carried out near this town. I refer to the deviation works on the railway line at Frampton, on the south of Cootamundra, some 7 miles from the town, and the deviation works at Jindalee, some 4 miles north of Cootamundra. These works gave employment to some 600 or 700 men for nearly a year, and although the bulk of labour was introduced (I think through the Head Office), yet employment was given to several of the local unemployed, and residents with horses and drays, &c., &c.; also, during the last six months work has been going on close to the town in connection with the new water supply. This work is nearing completion. In farming matters, ploughing is still going on, the late rains having proved very beneficial to farmers in this respect, and a larger area than last year will be put under cultivation. The rates of wage at present obtaining in this district are as follow:—

Book-keepers	average	£3 per week.
Clerks	"	15s. per week.
Masons (cutters)	"	9s. per day.
Carpenters	"	8s. per day.
Bricklayers	"	8s. and 9s. per day.
Millers	"	£2 10s. to £4 per week.
Grocers	"	£2 15s. per week.
Assistants	"	15s. per week.
Drapers	"	£1 10s. to £2 10s. per week.
Bakers	"	£1 10s. per week, and board.
Wheelwrights and Blacksmiths	"	8s. per day.
Plumbers	"	8s. per day.
Blacksmiths' apprentices	"	5s. to 15s. per week, and board.
Butchers	"	15s. to 25s. " "
Farm labourers	"	10s. to 15s. " "
Labourers	"	6s. per day.

The foregoing list is, I think, a pretty comprehensive one as far as labour in this district is concerned.

I have, &c.,

G. ADDISON,
Labour Agent.

The Labour Agent, Dubbo, to The Superintendent, Government Labour Bureau,
Sydney.

Sir,

Labour Bureau, Dubbo, 11 July, 1898.

I have the honor to report as follows on transactions of this Branch for the year ending 30th June, 1898:—

Registration of Unemployed.—Only five men registered their names at this office during the past twelve months.

Passes Issued.—Five passes were issued with approval of Head Office.

Refunds.—13s. 3d. received.

State of Labour Market.—No demand for labour here—local supply sufficient. Police report numbers of unemployed are camped on the reserves near the town.

Employers of Labour.—No advantage has been taken of this branch by employers of labour.

Rate

Rate of Wages.—Farm hands (good), 15s. to £1, with rations; day labourers, 5s. to 6s. per diem; scrub cutting, ringbarking, timber getting are done by contract, wage earned varies a good deal.

Town Industries.—Flour-milling, coach-building, saw-milling, brewing, &c., wages average 8s. per diem; wool-washing and boiling-down establishments, wages 7s. to 8s. per diem.

Remarks.—There has not been a single instance of a man obtaining employment through the agency of this office since the establishment of this Branch.

I have, &c.,

R. T. McNEVIN,

Agent.

The Labour Agent, Forbes, to The Superintendent, Government Labour Bureau,
Sydney.

Sir,

Department of Labour and Industry, Forbes, 19 July, 1898.

Herewith I submit annual report of operations of this office in connection with Labour Bureau.

1. *State of labour market.*—Only three inquiries during the year for employment. Those employers seeking labourers never make use of the office as a medium.

2. No difference in the rate of wages since last report.

3. The local office is very rarely made use of by those out of work, as a means of assistance to employment, and only one pass was issued during the year from this district.

I have, &c.,

H. S. HORNIMAN,

District Agent.

The Labour Agent, Grafton, to The Superintendent, Government Labour Bureau,
Sydney.

Sir,

Department of Labour and Industry, Grafton, 3 July, 1898.

I have the honor to submit the annual report as to the operations of the Grafton Branch for the year ending 30th June, 1898.

The work done during the year has been very little indeed; only three men registered. With that exception, neither employers nor employees have made any use of this branch, either to secure labour or obtain employment.

There are a fair amount of unemployed in the district, but not in any great numbers, and employers find no difficulty in obtaining unskilled labour.

Of the various works in the district, the Ramornie Meat-works employed a good many hands during the year, but at the present time, owing to the tick scare, the work has fallen off a good deal.

Ordinary unskilled labourers get from 18s. to 25s. a week and a cooked ration. Tallow-makers, extract-makers, and firemen average from 35s. to 45s. a week and a ration.

Butchers make about 60s. a week, but receive no ration.

Contractors who do most of the skilled work themselves make about £6 a week.

The men working in the tinsmiths' portion of the works average from 40s. to 60s. a week.

The Fresh Food and Ice Company employ a good many hands, and have a fair number of applicants for work on their books.

The rates of wages at the sawmills are—Circular sawyer, 8s. 4d. a day; machinist, 7s.; launch-driver, 8s. 4d.; drayman, 6s. 8d.; engine-driver, 6s. 8d.; and other ordinary hands, 6s. per day.

There are a good many men looking for work of this class, but not so many as a few months ago.

Ordinary road labourers receive from 6s. to 7s. a day.

I have, &c.

OSMAN A. EDWARDS, C.P.S.,

Agent.

The Labour Agent, Glen Innes, to The Superintendent, Government Labour
Bureau, Sydney.

Sir,

Department of Labour and Industry, Glen Innes, 1 July, 1898.

I have the honor to forward herewith my annual report for the year ending 30th June, 1898, annexed hereto.

I have, &c.,

F. BURNE.

ANNUAL Report by the Labour Agent, of the Labour Bureau, Glen Innes, for the year ending the
30th June, 1898:—

Number of men registered during the year, 1.

„ obtaining passes during the year, 1.

„ „ employment during the year, 1.

„ receiving miners' rights during the year, Nil.

„ unemployed in the district, very fluctuating; the few men out of work are now absorbed in the public works in progress in the district.

New industries started in the district, Nil.

CURRENT Rate of Wages in the District:—

Carpenters	8s. per day.
Labourers (ordinary)	6s. „
„ (farm)	15s. per week, and found.
Butchers	40s. „
Station-hands	12s. 6d. per week, and found.
Tinsmiths	7s. to 8s. per day.
Carters	30s. per week.
Blacksmiths	8s. per day.
Bricklayers and Stonemasons	9s. „
Miners	7s. 6d. per day.
Painters	8s. „
Drapers	50s. per week.

The

The Labour Agent, Goulburn, to The Superintendent, Government Labour Bureau, Sydney.

Sir,

Court-house, Goulburn, 13 July, 1898.

The transactions at this branch during the year ending 30th June last have been unimportant. Twenty-six names were registered during that period, and railway passes issued to thirty-six persons to enable them to proceed to employment in other parts of the Colony, including one gang of twelve men for the Government scrub-clearing works at the West Bogan.

No applications were received from private employers of labour, and there has been no local demand for labour of any kind.

The sum of £63 14s. 6d. was received on account of refunds for railway passes issued, and duly forwarded to the Treasury.

The rates of wages obtaining in this district are shown on list attached.

I have, &c.,

C. P. S. HEHN,

Local Agent.

WAGES obtaining in the Goulburn district during the year ending 30th June, 1898:—

Miners	35s. to 40s. per week.
Bootmakers	30s. per week.
Carters	30s. to 40s. per week.
Slaughtermen	25s. per week.
Labourers	36s. "
Cooks (men)	20s. to 40s. per week.
Drovers	15s. and keep.
Millers	60s. per week.
Wheelwrights	40s. to 50s. per week.
Shop Assistants	20s. to 70s. "

The Labour Agent, Hillston, to The Superintendent, Government Labour Bureau, Sydney.

Sir,

Hillston, 5 July, 1898.

I have the honor to report that no business was transacted at this Branch during the year ended 30th June, 1898.

One person applied to me for passes for himself, wife, and child, but the distance being over 60 miles to where his employment was I communicated with the head office as prescribed, but he being anxious to leave here at once I advised him to endeavour to obtain the needed assistance privately. This he was successful in accomplishing. As regards the district generally I have to report that there are practically no unemployed.

The industries are the pastoral and agricultural for the most part, wages ranging from 10s. to 20s. per week and rations; and the supply of labour is equal to the demand.

I have, &c.,

W. LION VOLCKMAN,

Labour Agent.

The Labour Agent, Hay, to The Superintendent, Government Labour Bureau, Sydney.

Sir,

Government Labour Bureau, Hay Branch, 11 July, 1898.

During the year ended 30th June last, only one person in want of employment was registered at this branch, and no applications for labour were made by employers. The collection of refunds for railway fares to the amount of £7 1s. 9d., and the rendering of monthly reports, principally nil, to you comprised my operations. The public have been made aware that the branch exists, but both masters and men appear to prefer dealing directly with each other. The disastrous drought, extending almost continuously over the last three years, has greatly reduced the demand for labour in this, practically, pastoral district, and enforced economy on the employers, which the employees have had to share. The ruling rates of wages in the principal branches of employment are subjoined:—

Blacksmiths	8s. to 9s. per day.
Bricklayers	10s. "
Carpenters	8s. to 10s. "
Wheelwrights	8s. " 9s. "
General labourers	6s. " 7s. "
Blacksmiths' assistants	20s. " 30s. per week.
Horse drivers	20s. " 25s. "
Gardeners and cooks	15s. " 30s. "
Boundary-riders	15s. " 25s. " and rations.

I have, &c.,

J. BURNETT,

Agent.

The Labour Agent, Junee, to The Superintendent, Government Labour Bureau, Sydney.

Sir,

Department of Labour and Industry, Junee Branch, 4 July, 1898.

In submitting my report for the year ending the 30th June, ultimo, I have the honor to inform you that I had no applications during the year by either men for work or employers of labour; there appearing to have been no genuine unemployed in the district. There were the usual men who go round from house to house cadging what they can, too lazy to work.

The

The principal industries of the district are wheat and wool-growing, goldmining, iron-foundry, soapworks, and coach-builders, &c., and steam chaff-cutters.

It has been a very bad season for the farmers and graziers—in fact, all the industries—on account of the very dry weather, the rainfall in the district for the last twelve months being exceptionally small. For the year the following rates of wages were paid, viz.:—

Goldminers	from 40s. to 50s. per week
and per shift	7s. 6d.
Agricultural labourers	20s. per week and board.
General labourers	from 15s. to 20s. per week and board.
Blacksmiths and wheelwrights... ..	from 30s. „ 60s. „ „
Moulders	up to 60s. „ „
Steam chaff-cutter labourers	5s. per day, and rations. „
Carpenters	20s. to 30s. per week.
Painters	20s. „ 25s. „

I have, &c.,

W. THEO. GARLAND,

Labour Agent.

The Acting Clerk of Petty Sessions, Jerilderie, to The Superintendent, Government Labour Bureau, Sydney.

Sir,

Department of Labour and Industry, Jerilderie Branch, 2 July, 1898.

I have the honor to forward herewith my annual report on this Branch for the year ending 30th June, 1898.

Only three men registered during the year. One found employment locally, and the other two registered with the intention of obtaining work under Government on the Berrigan to Finley railway extension, to which they think their registration ticket will entitle them.

Refunds for railway passes have been received, amounting to £4 3s. 8d.

The industries in this district are few, principally pastoral and farming.

The current rate of wages for the class of labour usually required, namely, station and farm-hands, is from 15s. to 20s. per week, with rations.

The long drought seriously interfered with agricultural operations and the employment of workmen.

From 1st January to date of report not quite 3 inches of rain has fallen in this district.

I have, &c.,

JOHN CURRY,

Acting C.P.S.

The Labour Agent, Kempsey, to The Superintendent, Government Labour Bureau, Sydney.

Kempsey, 30 June, 1898.

THE operations of this Branch in finding labour for employers, work for employees, or in assisting the unemployed by the issue of miners' rights, passes, &c., have amounted to nil, there having been but two registrations during the year, and no inquiries of any other nature.

From inquiries I have made it appears that employers of labour requiring skilled workmen obtain the same direct from Sydney, instead of availing themselves of the advantages of this Branch, or of the Bureau. Of unskilled labour there is an ample supply in the district to meet present and future requirements.

The year has been, financially, in this district a successful one, largely owing to increased operations in dairy-farming and associate pursuits, and the consequent advance in price of stock. Money has been more plentiful and more generally distributed than has obtained for some years, but still there does not, as far as I can ascertain, appear to be any increased demand for labour. The usual harvesting operations have taken place, and the crop has, I understand, been relatively a good one, but all the necessary labour has been obtained locally, without difficulty. I have made personal inquiries from many of the employers of labour in this district, and they all agree that the local supply is more than the demand.

In order to afford the Department as much information as possible in regard to labour in this district, I have obtained, and submit hereunder, reports, very kindly forwarded to me, from three representative gentlemen—*i.e.*, David Houson, Esq., District Engineer for Trial Bay and Macleay District; E. F. East, Esq., Manager, Messrs. Foley Bros. Factory; and T. Hennessy, Esq., Proprietor Alpha Sawmills—which will, no doubt, be read with interest.

Mr. Houson reports:—“(1.) There has been a surplus of labour throughout the whole year in connection with works under my charge, both day labour and contract. (2.) Rates of wages paid: Inspectors and foremen, 10s. to 15s.; blacksmiths, 8s. to 11s.; ships' carpenters, 9s. (finding own tools); powdermen and gangers, 8s.; steam drill drivers, 7s. 6d.; labourers, 7s.; boys, 3s. to 5s. (3.) Importation of more machinery on works is likely to decrease rather than increase number of men employed, and there will, therefore, be less demand from outside sources for next twelve months on works. (4.) The local labour, being mostly farm-hands, is not suited for class of work we require. Still, numbers of them have, by steady attention to work, made themselves serviceable.”

Mr. East reports:—“In reply to yours of 24th, I may state that the wages paid range from 15s. to £3 per week; the former being for the general hands (boys), the latter being rate paid engineer. *Re* your inquiry as to obtaining labour locally, I may mention that all the hands at the Central Creamery had to be obtained outside the district, with exception of generals, in which supply has been more than required, the number of hands employed at Central and Branch Separating depôts being at present nine; possibly, however, the number will be increased during the next twelve months.”

Mr.

Mr. Hennessy reports:—"Your letter to hand of the 24th *re* the labour market of the district. I have not experienced any difficulty in obtaining men to do the work I required; in fact it is the other way about—I have more applicants than I have work for. The rates of wages generally paid are from 27s. 6d. to £2 per week. *Re* the prospect of there being an increased demand for labour during the next twelve months, I do not think there will be any great demand for labour. The only time the demand might increase is about Christmas-time—that is, about the time the timber trade is brisk, from December to about June or August."

The current rates of wages remain largely the same as reported to you last year, and may be scheduled as follows:—

Bullock-drivers	26s. to 30s. per week, and rations.
Bricklayers	8s. to 10s. per diem.
Blacksmiths	6s. to 8s. "
Carpenters	6s. to 12s. "
Carters	9s. to 10s. "
Farm labourers	10s. to 20s. per week, and rations.
Labourers	5s. to 6s. per diem.
Mill-hands	5s. to 7s. "
Plasterers	10s. to 12s. "
Painters	7s. to 10s. "
Station-hands	10s. to 20s. per week, and rations.
Wheelwrights	6s. to 10s. per diem.

I have, &c.,

HERBERT PHILLIPS,

Government Labour Agent.

The Labour Agent, Lithgow, to The Superintendent, Government Labour Bureau, Sydney.

Sir,

Court-house, Lithgow, 4 July, 1898.

I have the honor to submit for your information my annual report with regard to this Branch. During the past year only six men have registered their names, and six found employment. Six railway passes have been issued, and the amount of refunds collected amounted to £2 7s. 3d. There are nine collieries in the district, which employ about 230 men; but owing to the railway contract having gone for at least half the trade to other districts, about sixty or seventy men have been dispensed with, and one colliery has shut down for the present. The ironworks have been constantly kept going, giving employment to about 200 men. The smelting-works employ 104 men. The Coorwull woollen-mills employ about twenty-three men, besides about twenty women, boys, and girls. There are also two breweries, employing about twenty-five men. I should estimate the number of men unemployed in the district at sixty.

The wages current here are as follows:—Miners receive 1s. 8d. per ton hewing rate, and average about 5s. per day; smelters, from 7s. 6d. to 9s. 6d. per day; labourers, from 6s. 6d. to 7s. 6d.; bricklayers, 9s.; carpenters and blacksmiths, 8s.; weavers earn from 22s. 6d. to 35s. at piecework; engineers and engine-drivers average 9s. per day.

I have, &c.

B. M. COHEN,

Labour Agent.

The Labour Agent, Lismore, to The Superintendent, Government Labour Bureau, Sydney.

Sir,

Department of Labour and Industry, Lismore, 2 July, 1898.

In submitting my annual report for the year ended 30th June last, I have the honor to inform you that, so far as this branch of the Labour Bureau is concerned, there has been practically no business done, only one name being registered on the books, and one person found employment. No inquiries from the employers, and the only assistance given was that of issuing a railway pass to enable a family to proceed to the Tweed from Lismore.

In order to get the most reliable information concerning the district, I communicated with Messrs. F. S. Murray, resident engineer, of Lismore; W. T. Yeager, timber merchant, of Coraki; J. McBride, manager of the Rous Sugar-mill; J. Wyness, manager of the Colonial Sugar Company's Sugar-mill at Broadwater; and several other leading business men, all of whom very kindly supplied what I asked, and from these, besides my own personal observations, I am enabled to say that just at present there appears to be a number of unemployed in the district, most of whom, if not all, will be engaged in various ways during the cane season, when the sugar-mills will be in full work, and because of the good demand in Queensland, where almost double the quantity of any previous sugar crop has to be harvested. Many of the hands unemployed now would not have been only for the excessive wet weather during the past half-year. There have been over 50 inches of rain registered, making it impossible for the road contractors to go on with their work, and also causing the roads to become so bad, where not metalled, that it has been difficult to proceed with any kind of out-door work.

The Hindoos are not so much in evidence this year as last.

The dairying industry continues to thrive, there being many newcomers to the district during the year. Farms close to creamery centres are being much sought after, and freely taken up. I have heard of one farm of 500 acres, about 9 miles from Lismore, being let at £1 per acre per annum, for dairying purposes, whilst the reports from the various managers are highly satisfactory. As I stated last year, there is still a large area of valuable Crown land available for selection, especially under the homestead selection area, but being some distance out, and there being no roads, they are not being taken up; but whenever any reserve adjoining the populated places is thrown open there are always many applicants. I expect over 200 applicants for 125 acres at Newrybar on the 21st instant, the price per acre being £3 10s., whilst at Byron Bay last week a block of Crown land was purchased by a local resident at the rate of £600 per acre.

The

The cane crop promises to yield splendid returns this year, the season having been suitable, and, so far, no frost to destroy; and should the £3 per ton duty be retained, this industry is likely to look up again and prosper side by side with the dairying.

The timber trade is also active, though the bad roads has retarded it somewhat; nevertheless, all the saw-mills are in full work, several of them working overtime to complete large orders; and this points to the activity in the building trade. Several large buildings are being erected in Lismore, and others are spoken of, so that with the increased population of the district the town of Lismore is steadily advancing and holding its own as the "Queen City of the North."

The following is a list of the current rates of wages being paid throughout the district, viz.:—

Skilled Labour.

Engineers, fitters, and engine-drivers	27s. 6d. to 60s. per week, and found.
Firemen, &c.	27s. 6d. to 35s. " "
Carpenters	7s. per day.
Masons	8s. "
Bricklayers and plasterers	8s. "
Boilermakers and fitters	9s. "
Painters	6s. 6d. "
Plumbers	7s. 6d. "
Shipwrights	9s. 6d. "
Copper and brass workers	9s. "
Moulders	9s. "
Miners	7s. "

Contract Labour.

The average earnings per man in the cane-cutting gangs is 7s. 2d. per day, ranging from 6s. to 11s. per day; ditto, for bullock team and driver, 14s. 1d., ranging from 10s. to 22s. 6d. per day; ordinary labourers, working for contractors, 5s. to 7s. per day and found; ditto, on farms, &c., 15s. to 22s. 6d. per week and found; old men and youths get 10s. to 15s. per week and found.

The average number of men employed each month on roads and bridges in the Lismore District has been 140. During April 241 were employed. The number of employees at the Rous Sugar-mill during the crushing season is about 195, and during the off season, 93.

I have, &c.,

ANDREW T. COCHRANE,

C.P.S. and Labour Agent.

The Labour Agent, Mudgee, to The Superintendent, Government Labour Bureau,
Sydney.

Sir,

Mudgee, 8 July, 1898.

In forwarding the annual report for the year ended 30th of June last, I have the honor to state that during the past year no registrations were effected, and only one railway pass was issued. I took over the duties on the 16th ultimo, since when no applications have been made to me, and judging from my predecessor's reports, this office is not extensively used as a means of bringing employer and employee together. I cannot hear of any demand for labour, and there seems to be a number of unemployed about the district at present. Mining matters are quiet, with the exception of an alluvial find some 27 miles from here, which has yet to be proved. I have, therefore, to conclude my report by stating that at present the current rate of wages for mine labourers is 7s. 6d. per diem; farm labourers, 5s. per diem; and station-hands average 20s. per week with keep.

I have, &c.,

D. G. M'DOUGALL,

Agent.

The Labour Agent, Molong, to The Superintendent, Government Labour Bureau,
Sydney.

Sir,

Molong, 2 July, 1898.

I have the honor to report that during the year ended 30th June, 1898, no applications, either by employers or by persons seeking employment, have been made at this office. The same report was made for the year ending 30th June, 1897.

The labour register at this office does not contain a single entry. The only work performed during the year was the furnishing each month of reports to the effect that no names had been registered; no refunds of any description made, and that the state of the labour market remained unaltered. The prevailing rate of wage for the class of labour usually employed, namely, farm and station-hands, being from 12s. 6d. to 15s. per week with rations.

This report as to the state of the labour market applies to the whole year.

I have, &c.,

F. S. MURRAY,

Labour Agent.

The Labour Agent, Maitland, to The Superintendent, Government Labour Bureau,
Sydney.

Sir,

Court-house, Maitland, 1 July, 1898.

I have the honor to submit the following report on the operations of this Branch for the year ending 30th June, 1898.

Forty-four persons have been registered at this office during the year. Of these twenty-eight were granted passes as approved by you.

This Branch has not been largely used during the past year, as there has not been a great demand for labour, nor on the whole has there been employment sought.

There

There has been a great many tramps in the town who have not sought permanent work, but have been content with odd jobs, and then move on. These tramps do not actually want work, but as long as they can beg tucker are quite content; of course there are a few exceptions.

The principal industries in the district are mining and farming, and these are well supplied with all the labour that they are likely to require during the ensuing year.

The rate of wages during the year have been as follows:—Ordinary labourers, 5s. to 6s. per day; miners, 6s. to 8s. per day; mechanics, 6s. to 8s. per day; carpenters, 7s. to 8s. per day; bricklayers, plasterers, and masons, 8s. to 10s. per day; farm labourers, 10s. to 12s. per week.

I have, &c.,
W. MARSH,
Labour Agent.

The Labour Agent, Moree, to The Superintendent, Government Labour Bureau,
Sydney.

Court-house, Moree, 1 July, 1898.

I HAVE the honor to report that during the year ending 30th June, 1898, the operations of the Moree Branch of the Labour Bureau have consisted principally of forwarding the monthly returns showing the rates of wages for the district, the information being obtained, as suggested by you, through the sergeant of police, whose long experience in this district and accurate knowledge of local conditions can be relied upon in such matters. It will be observed that the rates of wages are much the same. The extension of the town is delayed in consequence of difficulty in obtaining timber, grass being scarce; teams are therefore not available. Rain, however, has recently fallen, and during the coming year there will be a large number of houses erected. There should be therefore employment for persons in the building trade. The houses built here are nearly all of wood. An application was made a few months ago by a local contractor for six carpenters and forwarded to the Government Labour Bureau, Sydney.

The construction of the Moree to Inverell railway has during the past few weeks brought a considerable number of men to the district.

There have been no entries made in the unemployed register during the year, and, except the application above referred to, there has been no applications for employment. On the whole, the Moree Branch of the Government Labour Bureau has worked smoothly, there has been no friction of any kind, and it has no doubt filled satisfactorily the object on which it has been established.

I attach hereto the rates of wages paid by employes in this district.

I have, &c.,
T. G. ADRIAN, C.P.S.,
Labour Agent.

Rates of Wages at Moree to 30th June, 1898.

	£	s.	d.	
Station clerks	50	0	0	per annum, and rations.

Fencers	1	10	0	per week.
Gardeners	1	5	0	"
Station-hands	1	0	0	"

The Labour Agent, Muswellbrook, to The Superintendent, Government Labour
Bureau, Sydney.

Sir,

Muswellbrook, 30 June, 1898.

I do myself the honor to report that matters in connection with this branch of your Department have for the last twelve months (ending to-day) been quiet, and the refunds to this branch amount to £17 0s. 9d.

As far as I am able to ascertain, wages in this district are as ruling generally, and there does not appear to be any unemployed.

I have, &c.,
J. KINGSMILL,
Agent.

The Labour Agent, Newcastle, to The Superintendent, Government Labour Bureau, Sydney.

Newcastle, 18 July, 1898.

SCHEDULE showing approximately the number of persons employed, the number unemployed, and the rates of wages in the various trades mentioned, in the Newcastle District to June, 1898.

Class of Employment.	Rates of Wages.	Number employed.	Number unemployed.
Wharf labourers	1s. per hour	80	50
Carpenters	8s. to 9s. per day	300	50
Bricklayers	9s. to 10s. "	30	40
Plasterers	9s. "	20	30
Shop assistants	35s. per week	500	40
Carters	35s. "	550	49
Miners	2s. 11d. per ton hewing rate	5,000	200
Joiners	9s. per day	60	10
Bricklayers' labourers	8s. "	40	30
Printers	8s. "	70	10
Stone masons	9s. to 10s. per day	60	12
Clerks	35s. per week	600	70
Plumbers	9s. to 10s. per day	60	10
	Total	7,370	592

Miners' average earnings, 7s. 6d. to 9s. per day when in work. The miners unemployed are chiefly those at Dudley Colliery.

During the year 1st July, 1897, to 30th June, 1898, 165 applicants for employment have been registered in the books of the Newcastle Branch of the Government Labour Bureau, and 137 persons have been assisted with passes. Refunds of railway fares have been made to the amount of £70 19s. 6d. by persons assisted to employment by the Branch.

There is not likely to be any demand for outside labour in the district during the ensuing year.

W. ROBERTSON,
Agent.

The Labour Agent, Nowra, to The Superintendent, Government Labour Bureau, Sydney.

Sir,

Department of Labour and Industry, 2 July, 1898.

I beg to report that during the year ended the 30th June last no employers applied for registration at this office, and only three men applied to be registered for employment.

The state of the labour market in the district has been satisfactory, and from reports obtained by me I ascertained that there were few unemployed to be found.

Mechanics, such as carpenters and builders, appeared to experience most difficulty in obtaining suitable employment, but farm labourers and others could obtain employment at a fair rate of wages.

Numbers of men found employment on the gold-mines in the district and received good returns.

The district being chiefly an agricultural one very little change takes place in the labour market, and men can always be found locally to supply the demands of the district. I submit hereunder the average rate of wages:—

Bricklayers	8s. per diem.
Carpenters	7s. "
Stonemasons	8s. "
Painters	7s. "
Labourers	6s. "
Farm labourers	20s. per week, or 10s. with board.
Plumbers	7s. 6d. per diem.
Bakers	30s. per week, with board.
Butchers	25s. " "

I have, &c.,
W. F. MARKS,
Agent.

The Labour Agent, Nyngan, to The Superintendent, Government Labour Bureau, Sydney.

Sir,

Nyngan, 4 July, 1898.

In furnishing my Annual Report, I have the honor to state that during the year ending the 30th June, 1898, the following business was transacted at this Branch:—

Men registered	286
Refunds collected	£4 19s. 6d.

It is not to be understood that the large number of unemployed registered was contributed solely by this district—90 per cent. of the total number consist of men attracted from foreign districts to the West Bogan Scrub work provided by the Government, the remaining 10 per cent. representing district unemployed who sought the assistance of the Bureau.

There is little variation in the state of the local labour market from time to time, save a few deserving men. The unemployed element is supplied chiefly by periodical workers, who work only when other resources fail. For local men, who are genuine in their desire for employment, the steady development of agriculture and the increasing occupation of surrounding Crown land will ensure a regular means of earning a livelihood.

I have, &c.,
M. G. McMAHON,
Local Agent.

The

The Labour Agent, Narrabri, to The Superintendent, Government Labour Bureau,
Sydney.

Sir, Department of Labour and Industry, Narrabri, 9 July, 1898.

I have the honor to forward herewith the Annual Report for this Branch for the year ended 30th June, 1898.

The following are the particulars of the work done at this Branch for the period above mentioned :—

Passes issued	Nil.
Registrations	Nil.
Refunds received	Nil.

During the early part of the past year, work appeared to be scarce, but since January, 1898, work in the building line has been fairly good and still continues so. The district pursuits being chiefly pastoral only the ordinary station-hands are generally employed, the wages paid being as follows :—

Boundary riders	20s. per week and rations.
General hands...	15s. " "

The meat preserving and chilling works, which were in operation last year, have since been converted into a butchering business, the wages there paid being as follows :—

Butchers—							
Slaughtermen	45s. per week.
Assistant slaughtermen	30. "
Carters	30s. and rations.
General hands	24s. to 30s. per week.
Store hands—							
Drapers	from 70s. per week.
Grocers	from 50s. "
Carpenters	from 7s. to 8s. per day.
Bricklayers	8s. per day.
Stonemasons	9s. "
Quarrymen	9s. "
Wheelwrights, &c.	from 8s. to 10s. per day.

There are a number of timber-cutters employed in the district now carrying out some large contracts for ironbark railway sleepers, but I understand they are paid at per sleeper.

I have, &c.,
WALTER SCOTT,
Labour Agent.

The Labour Agent, Orange, to The Superintendent, Government Labour Bureau,
Sydney.

Sir, Department of Labour and Industry, Orange, 1 July, 1898.

I do myself the honor to submit my report for the year ended 30th June, 1898.

Men Registered.—Five men were registered during the year, four of whom were found employment.

Railway Passes.—Four railway passes were issued under instructions from Head Office.

Demand for Labour.—There has been no demand for labour.

Rate of Wages.—Farm labourers, from 15s. to 20s. per week with rations; miners, from 30s. to 45s. per week.

Refunds.—The sum of £23 12s. 5d. was refunded for railway passes.

I have, &c.,
HENRY J. LEARY,
Local Agent.

The Labour Agent, Queanbeyan, to The Superintendent, Government Labour
Bureau, Sydney.

Sir, Department of Labour and Industry, Queanbeyan, 1 July, 1898.

I have the honor to submit the following report on the operations of this Branch during the year ended, 30th June, 1898.

Twenty-four applicants for labour were registered, of whom thirteen found employment, and one, who asked only for a miner's right, is since dead.

The applicants were in all cases either local men or from the immediately adjoining districts.

Beyond a few Government road contracts there is little work now going on in this district and insufficient to supply the local needs.

I append a list of current rates of wages:—

List of current rates of Wages.

Carpenters	7s. to 10s. per day.
Bricklayers	9s. per day.
Stonemasons	7s. to 10s. per day.
Plasterers	10s. per day.
Painters	8s. to 10s. per day.
Tinsmiths	9s. per day.
Labourers	5s. to 7s. per day.
Boundary riders	15s. per week, and rations.
Station-hands	15s. " "
Blacksmiths	40s. to 50s. per week.
Wheelwrights	40s. to 50s. "
Compositors	30s. to 40s. "
Storekeepers' assistants	20s. to 50s. "
Saddlers	30s. to 35s. "
Clerks	20s. to 30s. "
Cooks (female and general servants)	8s. to 14s., and board.
Housemaids	4s. to 8s. per week, and board.
Laundresses	4s. per day.
Butchers	15s. to 25s. per week.
Bakers	50s. per week.
Carters	5s. per day.

H. J. JEFFREYS,
Labour Agent.

The Labour Agent, Tamworth, to The Superintendent, Government Labour Bureau,
Sydney.

Sir,

Tamworth, 5 July, 1898.

I have the honor to inform you that very little work has been done in this Office during the year ending the 30th ultimo. I give heroin the rates of wages, but there is nothing in this district from one year's end to another that can possibly materially effect the condition of the labour market, or the rate of wages, and it is therefore to be regretted that time has to be taken up month after month in writing the same particulars to you for perusal. There are not many unemployed here now though it would be difficult to state a number. The work in connection with the water supply is almost completed, and the contractors for the Tamworth to Manilla railway line seem to have no difficulty in obtaining men.

Only three persons have had their names registered during the past year, one person was granted a pass, and no employers have inquired here for men.

RATES of Wages.

Saddlers and harness-makers	45s. to 70s. per week.
Grocers	40s. to 50s. "
Drapers	40s. to 60s. "
Butchers	30s. to 42s. "
Hairdressers	40s. to 60s. "
Ironmongers	40s. to 50s. "
Store-carters	30s. to 40s. "
Millers	50s. to 63s. "
Carpenters	42s. to 60s. "
Bootmakers...	30s. to 42s. "
General labourers	5s. to 8s. per day.
Municipal labourers 6s. "
Coach and body builders	42s. to 50s. per week.
Painters and finishers	42s. to 50s. "
Blacksmiths...	42s. to 50s. "

Of course indifferent workers earn less and good men more in some instances than the rates given.

I have, &c.,

LACHLAN W. BROUGHTON,
Labour Agent.

The Labour Agent, Tenterfield, to The Superintendent, Government Labour
Bureau, Sydney.

Sir,

Department of Labour and Industry, Tenterfield, 11 July, 1898.

I have the honor to submit herewith my Annual Report for the year ending 30th June, 1898. During the past year no persons have made application for registration of their names for employment. The usual road and bridge work in the district has been carried out by contract and day labour, but the amount of work going on has been scarcely sufficient to absorb the local demand outside of those in regular employment. The Chilled Meat Works have ceased operations, and the Boot Factory has not for some time been employing the full complement of hands.

The

The ruling rate of wages in the district for labour of all classes is as below :—

Bakers	25s. to 30s. per week.
Butchers	25s. to 30s. „
Tinsmiths	8s. to 10s. per day.
Carpenters	8s. to 10s. „
Blacksmiths	8s. to 9s. „
Labourers (ordinary)... ..	7s. per day.
Do (farm)	15s. per week, with rations.
Compositors, bootmakers, &c.	40s. „
Drapers and grocers... ..	40s. to 50s. per week.
Domestic servants	7s. to 10s. „ and keep.
Carters and stockmen	15s. to 20s. „ and rations.

I have, &c.,

W. C. GEIKIE,
Labour Agent.

The Labour Agent, Wagga Wagga, to The Superintendent, Government Labour Bureau, Sydney.

Sir,

Court-house, Wagga Wagga, 5 July, 1898.

With reference to the labour market in this district, I have the honor to report that for the past twelve months the demand for tradesmen in the building trades has been better than the previous year. The labouring classes have severely felt the effects of three previous years' drought.

The supply of ploughmen has been far in excess of demand, good and regular hands receiving about £1 per week. Contracts for grubbing, clearing, &c., have been far fewer this year than last, thus materially affecting ordinary unskilled labour and entailing more distress than formerly. Labouring men, married and single, in town have in a number of cases been put to sore straits to avoid destitution.

Rate of wages of ordinary bush labourers, 15s. to £1 per week; old men and boys less.

One second-class railway ticket issued to J. A.—— in August, 1897; 5 second-class railway tickets issued to Mrs. H. S. R.——, May, 1898.

PHILIP E. ELDERSHAW,
C.P.S., and Labour Agent.

The Labour Agent, Walgett, to The Superintendent, Government Labour Bureau, Sydney.

Sir,

Labour Agency, Walgett, 18 July, 1898.

In accordance with your instructions, I have the honor to forward you an Annual Report for year ending 30 June, 1898. No applications for employment have been made, and no engagements have been made through this Branch. During the past year the labour market in this district has been well supplied, and was quite equal to the demand for labour. The labour portion of the district is a moving one, and during the shearing season a large number of persons arrive in the district in search of employment in connection with the wool industry.

During the off season numbers of men are to be seen travelling in search of employment at the various stations throughout the district. As this district is purely a pastoral one, there is no great demand for labour, except in connection with the following occupations, the current rate of wages being as follows :—

General hands	15s. to 20s. per week.
Cooks	15s. to 30s. „
Boundary riders	15s. to 20s. „
Shearers	17s. 6d. to 20s. per hundred.
Teamsters	20s. per week.
Burr cutters	15s. „

The only industries in the district comprise wool-washing, saw-milling, and a wheelwright and blacksmith's shop, and the average rate of wages paid is from 6s. to 7s. per day. A good deal of ring-barking has been carried on throughout the district during the past year, owing to a number of new settlers taking up land; but this work is generally carried out by Chinese, at from 5½d. to 9d. per acre.

Employers throughout this district appear to have no difficulty in obtaining men when required, and consequently do not make use of this Branch when in search of employees.

I have, &c.,

W. STURROCK,
Labour Agent.

The Labour Agent, Wilcannia, to The Superintendent, Government Labour Bureau, Sydney.

Sir,

Court-house, Wilcannia, 30 June, 1898.

I have the honor to report that since the Government Labour Bureau Agency has been established here there have been no applications either by employers or employees. The principal labour employed in this district is station-hands, and the current rates of wage is: Married couples, £65 to £75 per annum; teamsters, 25s. per week; cooks, 20s. to 25s.; boundary-riders, 15s. to 20s.; general hands, 15s. to 20s.; shearers, 20s. per 100 sheep; shed-hands and rouseabouts, 20s. to 25s. per week. The demand generally is far less than the supply.

I have, &c.,

J. W. FLETCHER,
Labour Bureau Agent.

The Labour Agent, Wollongong, to The Superintendent, Government Labour Bureau, Sydney.

Sir,

Court-house, Wollongong, 6 July, 1898.

I have the honor to report nine persons seeking employment were registered at this branch during the year ending 30th June, 1898; four of these received railway passes to go to employment elsewhere. The trades of those registered were blacksmiths, 1; labourers, 3; farmers, 1; engineers, 1; coalminers, 2; goldminer, 1; 5 were married and 4 single.

The amount of £2 6s. 6d. was received as refund.

Practically there has been no business of importance transacted during the year. The employers of labour have not sought the assistance of the branch.

The ruling rate of current wages is as follows:—Carpenters, 6s. to 8s. per day; blacksmiths, 9s. per day; strikers, 5s. to 6s. per day; coalminers, 30s. to £2 per week; navvies, 6s. to 7s. per day; labourers, 6s. per day; bricklayers, 8s. to 9s. per day; farm labourers, 8s. to 12s. per week with board; bushmen and fencers, about 30s. per week; butchers, 30s. per week and meat; bakers, £2 10s. per week; barbers, £1 per week and board; grooms, 10s. per week and board; wharf labourers, 6s. per day; coal-trimmers, about 15s. to £1 per day; compositors, £1 to £1 15s. per week; moulders, 8s. to 9s. per day; fitters, 8s.; brass finishers, 8s.; iron-turners, 7s. 6d.; coach-body-makers, 8s.; coach-trimmers, 8s.; coach-painters, 8s.; brickmakers, 6s. 6d. to 7s.; tailors, 7s. to 8s.

H. S. BINGLE,
Labour Agent.

The Labour Agent, Young, to The Superintendent, Government Labour Bureau, Sydney.

Sir,

Labour Agency, Young, 7 July, 1898.

I have the honor to report that during the year ending 30th June last five railway passes were issued to persons who had obtained employment elsewhere, as follows:—One to Groongal, two to Cobar, and two Nyngan. Owing to the severe and protracted drought which the district has experienced, the demand for labour has been much in excess of requirements, but the recent rains have given an impetus to mining and farming operations, and there would not appear to be, at the present time, many unemployed in the district. The following are the rates of wages ruling throughout the year:—Miners, 50s. per week; carpenter, 8s. to 10s. per day; bricklayers, 9s. to 10s. per day; blacksmiths and tinsmiths, 40s. to 50s. per week; painters, 8s. per day; stonemasons, 11s. per day; and farm labourers, 15s. to 20s. per week.

I have, &c.,

P. W. COLLINS,
Labour Agent.

NEW SOUTH WALES.

BOARD FOR INTERNATIONAL EXCHANGES.

(REPORT.)

Printed under No. 1 Report from Printing Committee, 6 September, 1898.

The Chairman of the Board for International Exchanges to The Chief Secretary.

Sir,

Board for International Exchanges, Sydney, 8 August, 1898.

On behalf of the Board for International Exchanges, I have the honor to submit a report of the work done by the Board since its reorganisation, as published in the *Government Gazette* of 11th September, 1896, to the 31st December, 1897.

Number of letters and circulars despatched, 608.

Number of parcels despatched, 1,119.

Number of cases despatched, 23, containing 76 parcels.

Number of cases received, 21, containing 268 parcels for transmission to local addresses.

Number of documents received and presented by the Board to various Government Departments, 1,130.

Recognising the importance of placing most of the official publications received from foreign countries in a centre where they would be accessible to all Government Departments in common with the general public, the Board decided that the Public Library of New South Wales was the most suitable place, and so out of 1,130 documents received 874 were handed to that institution.

The expenses of the Board, as shown by cheques drawn, during the period of fifteen months were £89 10s. 9d.—a small sum considering the amount of work done. The Board has exercised the greatest economy wherever possible, and has considerably reduced the expense of transmission by using the book and parcel posts when convenient.

A system of regular exchanges has been established between this Colony and the Governments of Great Britain, United States, France, Belgium, and Germany, and it is hoped that the system will be further extended during the year 1898 to include the individual States of the United States of America.

While the Chairman was in England in 1897 he had several interviews with the Agent-General and the Colonial Office, and was successful in inaugurating a system whereby the most important of the publications of Her Majesty's Stationery Office will be forwarded during 1898 in monthly instalments, instead of annual consignments as heretofore, thus saving a delay varying from twelve to twenty months.

The Chairman also obtained, through the Board, for the Public Library of New South Wales, the whole of the valuable publications of the Library and the Natural History Department of the British Museum, now in print. The money value of this donation is over £400.

One of the first things the Board did on taking office was to send a circular to the Departments asking to be furnished with a list of the official publications regularly received by them from other countries, and a list of such publications, not now received, that were desired. The replies have been tabulated, so that the exchanges received by the Board may in future be allocated to those Departments to whom they will be most serviceable.

HENRY C. L. ANDERSON,
Chairman.

(SECOND SESSION.)

**LAND FRONTING THROSBY AND COTTAGE CREEKS, SOLD BY
A. A. DANGAR, ESQ.**

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly appointed on the 30th August, 1898,—“to inquire into and report upon the sale of land by A. A. Dangar, Esq., at Wickham, fronting Throsby Creek and Cottage Creek,” and to whom was referred on the same date “the Minutes of Proceedings and Evidence of the Select Committee of Session 1896,”—have agreed to the following Report:—

Your Committee having examined the witness named in the margin* (and ^{H. J. Brown.} considered the evidence referred), find:—

1. That in 1840 20 acres of land fronting Throsby and Cottage Creeks, which forms the subject of the Committee's inquiry, was bought from the Government by Richard Tasker Furlong for the sum of £240.
2. That some years afterwards the land passed into the possession of Albert Augustus Dangar, to whom it was devised by his mother, a relative of Richard Tasker Furlong.
3. That between the periods from 1874 to 1885 portions of the land were sold by Mr. Dangar by public auction, and the purchasers were of opinion that there was no reservation of the foreshore, which opinion is endorsed by Mr. H. J. Brown, a solicitor of large experience in conveyancing.
4. That some years later the Government notified the various purchasers that the land which they had purchased, being on the foreshore, was the property of the Crown, and also intimated that preference would be given to the then holders of the land to purchase from the Government.
5. That the case of George Edward Redman, cordial manufacturer, is one of peculiar hardship, he having bought at one of these auction sales a portion of land for which he paid £1,000, and on which he subsequently placed improvements to the value of £1,100.
6. That Redman was offered and accepted £5,000 for the land; but subsequent investigation disclosed a defect in the title, and the Bank, which had advanced him a large sum in connection with his business, foreclosed, and took possession not only of the land which Redman had purchased, but also of a large portion which he had added to it by reclamation.
7. That the Bank had subsequently to pay the Crown £2,000 for the land which Redman had purchased and improved, and before he could resume business operations he had to pay the Bank £2,500.
8. That the Government, in resuming the land contained within the 100 feet reservation, have inflicted great hardship on the purchasers at the auction sales above mentioned, who, prior to the claim made by the Crown, considered their titles to the land were valid.

Your Committee therefore recommend the cases of the holders of land fronting Throsby and Cottage Creeks to the favourable consideration of the Government.

JOHN L. FEGAN,
Chairman.

1896.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

LAND FRONTING THROSBY AND COTTAGE CREEKS,
SOLD BY A. A. DANGAR, ESQ.

THURSDAY, 30 JULY, 1896.

Present:—

MR. TRAVERS JONES, | MR. NICHOLSON,
MR. WHEELER.

J. L. FEGAN, ESQ., IN THE CHAIR.

John Mann called in, sworn, and examined:—

1. *Chairman.*] What position do you hold? Clerk in the Registrar-General's Department.
2. Do you produce the grant made to Richard Tasker Furlong? Yes.
3. Can you give the Committee a copy of that grant? I do not think there will be any objection to that. J. Mann.
30 July, 1896.
4. Will you read it? Yes.

LAND PURCHASE.

Grantee Richard Tasker Furlong; Date 17th July 1840; County Northumberland; Acres 20.

Victoria by the Grace of God of the United Kingdom of Great Britain and Ireland Queen Defender of the Faith and so forth.

To all to whom these presents shall come Greeting

WHEREAS at a public auction held in conformity with the Regulations made for the sale of Crown lands in our territory of New South Wales Richard Tasker Furlong of Newcastle has become the purchaser of the land hereinafter described for the sum of two hundred and forty pounds sterling Now know ye that for aul in consideration of the said sum of two hundred and forty pounds sterling by the said Richard Tasker Furlong to the Colonial Treasurer of our said territory for and on our behalf well and truly paid before these presents are issued in the manner hereinafter mentioned And in further consideration of the quit-rent hereinafter reserved we have granted and for us our heirs and successors do hereby grant unto the said Richard Tasker Furlong his heirs and assigns subject to the conditions reservations and provisos hereinafter mentioned all that piece or parcel of land in our said territory containing by admeasurement twenty acres be the same more or less situated in the county of Northumberland and parish of Newcastle at Swamp Creek in the vicinity of Newcastle allotment number one commencing at the eastern extreme of the line once marked as the northern boundary line of the Australian Agricultural Company's land and bounded on the north by seven chains of that line bearing west on the west by a south line of eleven chains and twenty links to the Newcastle Road on the south by the Newcastle Road easterly to the Bridge over Swamp Creek and on the east by that creek downwards to the river and by the river westerly to the eastern extreme of the line once marked as the northern boundary of the Australian Agricultural Company's one thousand five hundred acres Grant Reserving an Occupation Road fifty links wide being the land sold to the said Richard Tasker Furlong as lot 20 in pursuance of the advertisement of 18th September 1839 and in part payment for which a remission of one hundred and fifty pounds sterling was allowed to him as a retired Captain from Her Majesty's 80th Regiment of Foot under fifteen years service in accordance with the regulations of 1st August 1838 the balance of the purchase money amounting to the sum of ninety pounds sterling having been duly paid to our said Colonial Treasurer on 14th February 1840 with all the rights and appurtenances whatsoever thereto belonging To hold unto the said Richard Tasker Furlong his heirs and assigns for ever yielding and paying therefore yearly unto Us our heirs and successors the quit-rent or sum of one farthing for ever if demanded Provided nevertheless and We do hereby reserve unto Us our heirs and successors all such parts and so much of the said land as may hereafter be required for a public way or public ways in over and through the same to be set out by our Governor for the time being of our said Territory or some person duly authorised in that respect And also all stone and gravel all indigenous timber and all other materials the produce of the said land which may be required at any time or times hereafter for the construction or repair of ways and bridges for naval purposes and for public works together with the

right

J. Mann. right of taking and removing the same And also all land within one hundred feet of high water mark on the sea coast and on every creek harbour and inlet And also all mines of gold of silver and of coals with full and free liberty and power to search for dig and take away the same And also the right of full and free ingress egress and regress into out of and upon the said land for the several purposes aforesaid And we do further reserve unto us our heirs and successors full power for us or our successors or for the Governor for the time being of our said territory to resume and take possession of all or any part of the said land not hereinbefore reserved which may be required at any time or times hereafter for any public purpose the value of the said land not hereinbefore reserved or of so much thereof as shall be so required and of any building standing on the said required land being paid by the Government to the party entitled thereto at a valuation fixed by arbitrators chosen as hereinafter mentioned And we do hereby declare that in every case of arbitration which may arise under and by virtue hereof one arbitrator shall be chosen by the Governor for the time being of our said territory and one by the then owner or owners of the said land which two arbitrators (before they enter upon the said arbitration) shall elect a third as umpire who shall determine any disagreement between the two said arbitrators But if the owner or owners of the said land shall refuse or neglect to choose an arbitrator on his her or their part within one calendar month after being required so to do by public advertisement in the *Government Gazette* or otherwise then both arbitrators shall be chosen by the Governor for the time being of Our said territory which arbitrators shall also elect an umpire in the manner above mentioned Provided always that if the conditions reservations and provisos herein contained or any part thereof be not duly observed and performed by the said grantee his heirs and assigns then the said land shall be forfeited and revert unto Us Our heirs and successors and these presents and every matter and thing herein contained shall cease and determine and become absolutely void to all intents and purposes and it shall be lawful for Us Our heirs and successors by Our Governor for the time being of Our said territory or other person duly authorised in that behalf to re-enter upon the said land or any part thereof and the said grantee his heirs and assigns and all occupiers thereof therefrom wholly to remove In testimony whereof We have caused this Our grant to be sealed with the seal of Our said territory.

Given under the hand of Sir George Gipps Knight our Captain-General and Governor-in-Chief of our said territory and its dependencies at Government House Sydney in New South Wales aforesaid this seventeenth day of July in the fourth year of our reign and in the year of our Lord one thousand eight hundred and forty.

Signed and Sealed in the presence of,—

[L.S.] GEO. GIPPS.

H. WATSON PARKER.

ENTERED on Record by me this fourteenth day of September one thousand eight hundred and forty the following alterations having been previously made viz. the words "in the manner hereinafter mentioned" interlined after "issued" in the thirteenth line this Registration being now a verbatim copy of the original Deed as executed.

E. DEAS-THOMSON,
Colonial Secretary and Registrar.

I CERTIFY the above and preceding page to be a true copy of the entry or copy of the original Deed of Grant from the Crown kept as of record or for public or official purposes in the office of the Registrar-General of the colony of New South Wales.

H. W. GILLAM,
Dep. Registrar-General.

Registrar-General's Office Sydney 31st day of July 1896.

5. *Mr. Travers Jones.*] Can you identify that abstract [*produced*] as the same grant, leaving out the reservation? The description is the same.

6. The only difference is that in the original 100 feet is specified as reserved, but it is not in the abstract of title? No; I do not see it.

7. *Mr. Nicholson.*] When you come to the words "usual reservation," would you infer that 100 feet was meant thereby? Some of these are printed differently from others. In some the reservations are not put in.

8. Have you ever known a case in which the reservation was stipulated to be at low-water mark instead of high-water mark? No; but I could not tell you anything about that. They could tell you at the office. There is a man in charge of these things, and he would understand more about it.

Edward Arnold Bronsdon called in, sworn, and examined:—

E. A. Bronsdon. 9. *Chairman.*] What position do you occupy? I have charge of the Alienation Branch at the Lands Department.

30 July, 1896. 10. Have you any knowledge of the grant known as Furlong's Grant? Yes.

11. Have you got a description of it here? I have the original plan of it. And I produce the sale list of the 13th November, 1889, showing the sale of the land to Richard Furlong.

12. What was the price? £240.

13. Paid by whom? Richard Tasker Furlong.

14. Have you any conditions of sale? No, the book which I have here only gives a description of the land.

15. You could not say that there was a reservation of 100 feet there? Not from this book. This other book is an office record with regard to the grant. There was a reservation of all the land within 100 feet of high-water mark.

16. How long have you been in charge of this Branch? Six years.

17. Therefore a large number of sales have come under your notice? Yes.

18. Are there not lands sold right down to low-water mark? I have never known any.

19. You have never known any sold with water frontage? Not by auction.

20. Is it not a fact that land has been sold with water frontages? Only to high-water mark.

21. To high-water mark without the 100 feet limitation? Yes.

22. Are there any coal reservations in this grant? Yes; it says, "all mines of gold, silver, and coal."

23. They are reserved? Yes.

24. *Mr. Travers Jones.*] Does that abstract refer to the same land? Yes; there is no doubt about it.

25. Have you a plan here? Yes; it is a very old document.

26. Is the reservation of 100 feet marked on that plan? It is marked in pencil. The plans do not usually show a definite reservation.

27. *Chairman.*] Is it usual to put them in pencil? It is not usual to show reservations on the plan. I should assume that that has been put on within recent years.

28. Do you not think it would be better, when land is sold, to have accurate plans showing the reservation? Of recent years land has not been sold subject to reservations of that nature.

29. Do you sell the whole of it now? The Government would mark a definite boundary. If they wished to reserve 100 feet, the description would not go down to high-water mark.

WEDNESDAY,

WEDNESDAY, 5 AUGUST, 1896.

Present:—

MR. TRAVERS JONES, | MR. WHEELER,
MR. NICHOLSON, | MR. O'SULLIVAN.
JOHN LIONEL FEGAN, Esq., IN THE CHAIR.

Edward Arnold Bronsdon recalled and further examined:—

30. *Chairman.*] You sent a letter to the Clerk intimating a desire to correct some of your evidence? Yes; the first correction I wish to make is the answer to the question No. 14, "Have you any conditions of sale." I stated that the book I produced did not contain any conditions of sale. I find on further search that that is not correct. I produce the book to which I was then referring. It is a manuscript book, and I find the conditions of sale are in it. Condition of Sale, No. 4, has a bearing on the case, and is as follows:—

E. A.
Bronsdon.
5 Aug., 1896.

Deeds of Grant will be completed and issued in each case as soon as practicable after payment in full of the purchase money, and will be delivered to the grantee by the Colonial Treasurer, on payment of the regulated fee as fixed by the Government notice dated 9th January, 1832. Each lot will be granted to the purchaser by deed poll under the hand of His Excellency the Governor and the official seal of the Colony, to be held in free and common socage, and subject to the conditions and reservations contained in the form No. 3, Land Purchase, as published in the *Government Gazette* of 1st November, 1838.

I produce a copy of the Notice of 1st September, 1838, which shows the "Land Purchase Form, No. 3," and it embodies a number of reservations:—

* * * * * Provided nevertheless and we do hereby reserve unto us, our heirs and successors, all such parts and so much of the said land as may hereafter be required for a public way or public ways in, over, and through the same, to be set out by our Governor for the time being of our said territory, or some person duly authorised in that respect: And also all stone and gravel, all indigenous timber, and all other materials the produce of the said land, which may be required at any time or times hereafter for the construction and repair of ways and bridges, for naval purposes, and for public works, together with the right of taking and removing the same; and also all land within one hundred feet of high-water mark on the sea coast and on every creek, harbour, and inlet; and also all mines of gold, of silver, and of coals, with full and free liberty and power to search for, dig, and take away the same; and also the right of full and free ingress, egress, and regress into, out of, and upon the said land for the several purposes aforesaid; and we do further reserve unto us, our heirs and successors, full power for us, or our successors, or for the Governor for the time being of our said territory, to resume and take possession of all or any part of the said land, not hereinbefore reserved, which may be required at any time or times hereafter for any public purpose, the value of the said land, not hereinbefore reserved, or of so much thereof as shall be so required, and of any building standing on the said required land, being paid by the Government to the party entitled thereto, at a valuation fixed by arbitrators chosen as hereinafter mentioned.

The next correction is in regard to question No. 19, "You have never known any sold with water frontage?" To this I answered, "Not by auction." If that was the question as put I misunderstood it. As a matter of fact, land is sold with water frontage, but I explained in answering the next question that, except under special clauses of the Act providing for sale below high-water mark, the land sold is only down to high-water mark. I produce a certified copy of the original plan. [*See Appendix A.*]

Henry Wheeler Gillam sworn and examined:—

31. *Chairman.*] You are Deputy Registrar-General? Yes.
32. Have you any copies of grants of land conveying the water frontage to the grantees? Yes; I have a number of forms which we use when certified copies of grants are required. I have brought a number to show that in some cases there is a reservation of 100 feet above high-water mark, and in others there is no reservation. In the first one I have here there is no reservation.
33. Where is that situated? I do not produce the grants themselves, but the authorised forms which are filled up in connection with various grants.
34. *Mr. Travers Jones.*] When did that form come into use? It is dated 1830.
35. There is no reservation in that form? No.
36. *Chairman.*] Can you supply the Committee with the various grants of land along what was known as Swamp Creek and what is now known as Throsby Creek? I dare say I can.
37. *Mr. Nicholson.*] Is the particular form which was issued in 1830 applicable only to certain kinds of land, or do you use it indiscriminately? To certain kinds of grants.
38. Then there are still grants issued up to date without any water frontage reservation whatever? Yes.
39. Can you tell me for what number of years back such grants have been issued? I could not definitely say when they commenced to reserve. I find that from 1856 to 1862 reservations have not been continuous.
40. But it has been the common practice in the past to issue grants without any reservation of water frontage? Sometimes they would reserve it and sometimes they would not.
41. *Chairman.*] Can you find out when they commenced to make reservations? Yes, about October, 1831; before that there were special reservations for particular purposes.

H. W. Gillam.
5 Aug., 1896.

Edward Twynam, Chief Surveyor, Department of Lands, sworn and examined:—

42. *Chairman.*] Do you know the land fronting Throsby and Cottage Creeks? I know the locality.
43. When was your first survey made there? I believe about 1838.
44. Have you the original plan with you? Yes [*produced*].
45. On this plan there is no qualification as to 100 feet reservation? That is not shown on plans at all. It is merely a reservation introduced into the deed of grant.
46. But is it not a fact that you show the 100-ft. reservation on some of your plans at present? No, not on original plans, and there are no reservations of that sort made now.
47. You sell the whole right out now? Yes. The reservation of 100 feet above high-water mark was first introduced into deeds of grant about the year 1828.
48. Have you a copy of your last surveys made there? I can show you the latest plans illustrating the locality. The date of the plan I have produced is 1839.

E.
Twynam.
5 Aug., 1896.

E.
Twynam.
6 Aug., 1896.

49. *Mr. Travers Jones.*] Is the 100 feet included in the 20 acres? Yes.
50. So that the 100 feet would be actually taken off the 20 acres shown on the plan? Yes; the reservation is in the deed of grant, but is not shown on the plan.
51. *Chairman.*] So that there are 20 acres, less 100 feet? Yes.
52. Which really does not give the owner the 20 acres as originally intended? There are decisions of the Supreme Court to the effect that the 100 feet reserve is Crown land.
53. And if the Government sell an acre of land they have the right to deduct 100 feet from it? Yes.
54. Because it fronts a river or outlet? If a man sells an acre of land on which there is a reservation of 100 feet the Government can claim to exercise a right over the reservation at any time.
55. Which, I suppose, it always has done? Yes.
56. *Mr. Travers Jones.*] After the purchaser has paid for it? Yes.
57. *Chairman.*] Do you know of any instances in which the Government have waived their claim to the 100 feet reservation? I do not know of any.
58. Do you know of any exchange which took place between Cooper and the Government for Bellevue Hill in lieu of Double Bay? No.
59. How long is it since you took a survey of the land in question? The last survey was made lately in connection with the drainage of Newcastle, which shows all the houses and buildings all over the land, and I have had a copy compiled for you showing the present state of the land. In the first instance I will exhibit the present town map of Newcastle, showing the 20 acres coloured red. I also produce a tracing illustrating the present state of the land. [*Appendix B*].
60. *Mr. Travers Jones.*] Are you of opinion that it would require an actual survey on the ground to define the 100 feet reservation as it originally stood? It is impossible; the high-water mark has been completely altered by reclamations.
61. *Mr. O'Sullivan.*] In the event of any of this land being washed away by the influence of the tide, the high-water mark still counts from the beginning of the water—not from the old mark? I understand that there are legal opinions to that effect. The 100 feet reserve can be claimed from the high-water mark as it recedes or goes forward.
62. So that in the event of 20 or 30 feet being washed away the reservation would still run in 100 feet from the present high-water mark? Yes.
63. *Chairman.*] If the people reclaim so many feet from the tide, will they have a right to high-water mark? They can only reclaim with the consent of the Government, and the reclamation makes a new high-water mark. They cannot make the reclamation until the owner has acquired the 100 feet reservation.
64. *Mr. Nicholson.*] With regard to the 100 feet reservation encroaching on the 20 acres, the 100 feet reservation would not be deducted from the actual measurement of the 20 acres? No, it is included in the 20 acres. As a rule, the reservation is included in the area.
65. And that means that the actual purchaser of the grant of 20 acres would only receive 19 acres? Yes, or whatever it might be. I think you asked when the reservation ceased to be put into the grants. It was first introduced about 1828, and it ceased to be introduced into grants of land about 1844, but it is still introduced into grants for volunteer land orders, on the ground, I think, that a volunteer land order is, to a certain extent, regarded as a free grant; but, as you are aware, very few volunteer land orders are outstanding now.
66. *Chairman.*] You have stated that several Supreme Court cases have decided the 100 feet reservation? Yes, two or three. There was one well-known case at North Harbour. I will send you the title of the cases.
67. You say that a comparison of the surveys would not lead to anything? No, it would not. The surveys produced are of very old date indeed, and to reproduce the water frontage line as it was in 1839 would be impossible.

THURSDAY, 6 AUGUST, 1896.

Present:—

MR. DICK,
MR. EDDEN,

MR. WHEELER.

MR. TRAVERS JONES,
MR. O'SULLIVAN,

JOHN LIONEL FEGAN, ESQ., IN THE CHAIR.

Edward Arnold Bronsdon, Esq., recalled and further examined:—

E. A.
Bronsdon.
6 Aug., 1896.

68. *Mr. O'Sullivan.*] What documents do you produce to-day? I have the documents connected with a number of applications to purchase different parts of the 100 feet reserve on the frontage of Throsby Creek.
69. What do those papers show? They show the details of the application and the action taken upon it, leading up in most cases to the purchase of the land from the Government.
70. Do they in any way indicate the boundaries? There are tracings with some of the papers. I have not the original plans of the separate pieces.
71. Do you produce the papers showing the date of the claim by the Government for payment for land sold by A. A. Dangar? No; so far as I have been able to trace the matter no claim has been made by the Government until after the persons have made application to purchase.
72. By whose authority was that claim eventually made? The claim was made in pursuance of the application. The party applied to buy the land from the Government. The application was dealt with in the way prescribed by law, and, of course, after a certain time payment was asked for in the usual way.
73. *Mr. Travers Jones.*] Do your papers show that the reservation of 100 feet is within or outside the measured portion of 20 acres? I think the original plan which I produced yesterday shows that.
74. The plan shows that the 100 feet has been measured, and is within the 20 acres—but do any of your papers show it? It is stated in the Crown Solicitor's report that the land is within the 20 acres granted to Furlong, being part of the 100 feet reservation. The sale by the Government to Furlong excluded the 100 feet. There was a reservation out of the grant.
75. But stat the 100 feet was within the surveyed 20 acres? Yes.

76.

76. That is what the plan shows? Yes.
77. *Mr. O'Sullivan.*] Have you any papers to indicate at what date the Government abandoned the 100-ft. reservation throughout the Colony? So far as I know, there has never been a general abandonment. So far as I am aware, since the Act of 1861 came into force the deeds of land have not contained this reservation.
78. Virtually, then, there has been an abandonment, although no law has been passed to bring it about? Since 1861, so far as I am aware, it has not been the custom to reserve the 100 feet. If the Crown did not wish to sell the 100 feet adjoining high-water mark, it would distinctly describe the land as being above that 100 feet.
79. *Mr. Travers Jones.*] And would not be included in the survey? No.
80. *Mr. O'Sullivan.*] Then it amounts to this: The Crown still retain the right to 100 feet reservation, but do not apply it in all cases? No; I do not think so. If the Crown sells to high-water mark now the grant would contain no reservation, and, of course, the land to high-water mark would pass to the purchaser.
81. *Mr. Dick.*] Is it not a fact that in every deed of grant this reservation is either explicitly excluded or included? I think not.
82. *Mr. O'Sullivan.*] Have you anything to show definitely whether that right still remains with the Government? No.
83. *Mr. Edden.*] And is there nothing to show whether Mr. Dangar ever owned this 100-ft. reservation? I think that is clear from the evidence I gave the other day that the grant to Dangar excluded the 100 feet. There was a reservation of all land within 100 feet of high-water mark.
84. You said something the other day with regard to the applicants making application for the 100-ft. reservation? Yes.
85. Who were the people who made the reservation? There are several; Stephen Durrant Lott is one. The date of that application is April, 1887; the deposit was paid on the 16th April, 1887.
86. Did the Government, in any case, grant the applications? Yes.
87. And when they granted them they found the land was already in the possession of other people? It was in possession of the applicants.
88. But houses have been built on some of the foreshore prior to 1887? That may be; but this land was in the possession of the man who then applied to purchase it. He claimed to be the owner, as having derived a title through the sale by Mr. Dangar.
89. Was it ever Mr. Dangar's to sell or to give a title to? The Crown say not.
90. Mr. Dangar, I suppose, would have to sign a transfer, and if the Government had the title how did these people get hold of the deeds of the property? That our documents do not show. That, of course, would be a transfer between private parties, of which the Lands Department has no information. You might obtain information through the Registrar-General's Office on a point like that.
91. Would it be possible for deeds to be issued without the Lands Department knowing anything about them? Yes; transfers between private parties.
92. Supposing I sell a piece of land, I sign a transfer. I can readily see that the Lands Office might know nothing about that. Mr. Dangar might have the deeds for the whole of this block. The people to whom he sells certain portions have deeds outside his deed, which would have to be granted on the strength of his transfer, after cutting the land up into blocks? I think not. I think you will find the deeds these people have, apart from the transfer from Mr. Dangar, are the deeds issued in pursuance of the applications I have produced. Those are the only deeds we have knowledge of, except the transfers through Dangar.
93. *Chairman.*] What about the case of the man Hudson, who occupies the "Bellevue Hotel"? I have the papers here. Hudson applied in January, 1882, to buy that land from the Crown. The deposit was paid on the 28th January, 1882. I might mention that the deed eventually issued from the Crown to Hudson in pursuance of that application. The deed was forwarded to the Registrar-General on the 21st May, 1885.
94. Is it not a fact that a *Gazette* notice was issued to the effect that these people had built their properties on the 100-ft. reservation, and were they not informed that they would have the privilege of buying it before any one else? I have not come across any trace of such a document.
95. Do you mean to say that these people, after paying their money and building homes, are asked now to purchase the land without receiving any prior notice from the Government to the effect that they are trespassing? I have not been able to trace any notice from the Government.
96. Would you be surprised if I were to show you such a document? No.
97. Does it not seem strange that these people, after paying for land, and building their homes upon it, should now apply to the Government to be allowed to repurchase it? I think not.
98. It is not what any business man would do? If he found he had not a title to the land, and had built upon it, I assume he would seek to get a legal title to it.
99. But how would he know he had no title to it? I cannot say; it may be that some solicitor has been asked to transfer one block and has discovered the fact that the man had no title.
100. *Mr. O'Sullivan.*] Do the papers you have show the whole history of this case? No; these papers begin with the applications by the various parties to purchase the land.
101. Have you no papers prior to these? The only papers I have been able to get hold of are two old documents referring to the sale to Furlong, but they throw no light upon this matter. They are dated 1840.
102. Furlong was the original purchaser? Yes.
103. *Chairman.*] Have you the names of those who applied for grants from the Crown, along the creek? Yes; there is the A.J.S. Bank, Stephen Durrant Lott, Miller, J. B. Hudson, Robert Claxton, William Henderson, George Dawson, Shadrach Morgan. I think those are all, excepting one—Goodsir—the papers in connection with which I could not get hold of.
104. You have not given us the grants along the creek outside Dangar's sale? I have a parish map which might show it.
105. *Mr. Edden.*] Then we understand you to say that the Crown never parted with the 100-ft. reservation to Mr. Dangar? Yes.
106. And it never belonged to Mr. Dangar? No.

E. A.
Bronsdon.

6 Aug., 1888.

- E. A. Bronsdon.
6 Aug., 1896.
107. *Mr. Dick.*] Is it a fact that the Government have made no claim whatever upon these people either for the purchase of the land or for rent? So far as I have been able to ascertain, they have made no claim until the people themselves applied to buy the land.
108. Has your search been exhaustive? I cannot say that. I got the notice yesterday afternoon, and I have had clerks searching from then until this morning in various directions, and so far we have not been able to find anything of the sort.
109. Is it not a fact that claims of that kind do not issue from your Department? A claim like that would come from our Department, as a rule.
110. *Mr. O'Sullivan.*] I desire to ask a question concerning a survey of 20 acres applied for Richard Tasker Furlong. In this survey the 20 acres appear, including the 100-ft. reservation;—do you know if that 100-ft. reservation was sold with the 20 acres? The contention of the Crown is that the 100-ft. reservation was not sold, because it was excepted under the grant.
111. Then this must be an excess area? I cannot say.
112. *Mr. Travers Jones.*] The evidence yesterday proved that the 100 feet is within the 20 acres? I agree that it is within the survey.
113. *Chairman.*] Have you the payments which have been made for the land and the payments which are due? Yes. George Dawson paid £32, on the 23rd July, 1886; Henderson, £195, on the 11th October, 1884; Claxton, £284, on the 9th July, 1884; Hudson, £234, on the 9th July, 1884; Morgan, £146 11s. 3d., on the 8th October, 1885; Stephen Durrant Lott, £480, on the 19th April, 1890. Miller has been called upon to pay £144 7s., and has paid £50, on the 26th June, 1894.

WEDNESDAY, 12 AUGUST, 1896.

Present:—

Mr. EDDEN,
Mr. O'SULLIVAN,

Mr. NICHOLSON,
Mr. SLEATH,

Mr. WHEELER.

JOHN LIONEL FEGAN, Esq., IN THE CHAIR.

Albert Augustus Dangar sworn and examined:—

- A. A. Dangar.
12 Aug., 1896.
114. *Chairman.*] Do you know the abstract of title produced? Yes; I believe that was the abstract submitted to all the solicitors for the purchasers.
115. In this abstract of title I notice the usual reservations;—what do you think they meant in connection with your sale of the land? I am not competent to say just now.
116. Before selling the land you made yourself thoroughly satisfied that it belonged to you? My solicitors did, and I believed it belonged to me.
117. Of course you are responsible for your solicitors? I believe I am.
118. And you are perfectly satisfied that the whole of the 20 acres rightfully belonged to you? It was bequeathed to me by my mother.
119. And you believed it rightly belonged to you? Yes.
120. I suppose you have seen the original deed or grant to the purchaser? I suppose I saw it in the first instance; but I do not remember the contents of it.
121. Do you know that 100 feet was reserved? To the best of my belief, and as far as my recollection goes, it was not reserved.
122. Then you sold the land believing the 100 feet was not reserved? The question never arose. The whole title was submitted to all the Newcastle and Maitland lawyers. Mr. R. W. Thompson, solicitor, of West Maitland, was himself a purchaser.
123. You sold some of the land to George Redmonds? I think he was a purchaser.
124. And John Ash? Yes.
125. And Shadrack Morgan? Yes.
126. And other purchasers? There is a very large number. There were four distinct sales, extending from 1874 to 1885.
127. I suppose you know that the deeds were accepted by the solicitors? Yes.
128. Does the indenture of Mr. Miller refer to part of the land? It is impossible to say, unless I closely examine it. I see it is Mr. H. J. Brown's preparation as a conveyancer. James Miller was not one of the purchasers from me. It seems that John Ash sold to George Miller. If I have to answer many questions of this character I shall have to ask you to allow me to call my solicitor.
129. *Mr. Edden.*] Who is your solicitor? Messrs. Creagh and Williams, of Bridge-street.
130. *Chairman.*] You believed, when you sold the 20 acres, there was no 100-foot reservation? I cannot remember the contents of the original deed. I went to Mr. Creagh's office this morning, but he unfortunately is ill in bed, and I could not get at that point. He had the handling of the whole business of the four sales, and no doubt he would be able to answer the question.
131. But does not the abstract of title [*produced*] show it? No; it refers to the usual reservation, and the 100-foot reservation is in regard to some of the land sold to the purchasers. There was a certain portion of frontage in the land and a good deal of back land.
132. Some of which was within high-water mark? No doubt.
133. *Mr. Sleath.*] Has your impression been that there was a reservation of 100 feet? I was under the impression that there was no reservation.
134. *Chairman.*] If you were under that impression you will admit that the purchasers would be under the same impression? I take it that that is so; otherwise they would not have paid me the money they did—£16,000, all of which was spent in Newcastle.
135. Do you know that the Government have demanded payments for certain of the land which was purchased from you? I have heard so from you, and I have gathered so from Mr. Miller.
136. Do you not think the purchasers should be compensated in some way by somebody? If the purchasers—first, second, or third hand—have any claim upon anybody, I hold that it is upon the Government.

137. Do you think the purchasers, who bought land under the belief that there was no reservation, have ^{A. A. Dangar.} a moral or legal right to pay for it a second time if called upon to do so? They have no claim upon me, and I have expressed myself to that effect in writing. I wrote to Mr. Fegan on 16th October, 1893, as ^{12 Aug. 1896.} follows:—

J. L. Fegan, Esq., Legislative Assembly,—

Union Club, Sydney, 16th October, 1893

Dear Sir,

Your note of the 9th instant reached me just as I was leaving home, or I would have replied to it sooner.

Mr. Miller wrote me himself on the same subject, and I daresay you have seen my reply to him. It seems a very hard case, but altogether made so by the unjust and unfair action of the Government. I sold, in perfect good faith, my title, approved of by a number of purchasers' solicitors, was seemingly good enough, no reservation ever having either been claimed by the Government previously, and now, nearly twenty years after, and after the land had been sold by the man who bought from me, the Government come down on the present holder and demand from him the value of it again.

There is no justice or equity about it, and such a case should be made public.

I decline, however, to interfere, and bring a hornet's nest about my ears, for if I assist one I may make up my mind to assist the whole. The onus of such an unjust action must rest with Mr. Copeland if he is determined to press it to the bitter end. I am sorry for Mr. Miller; same time, I hope I make my position and intentions clear to you.

I am, yours truly,

A. A. DANGAR.

138. *Mr. Edden.*] You have admitted that if those who purchased the land have to pay for it again they are entitled to some compensation? From the Government, but not from me.

139. If the Government never sold you that land, why are they entitled to compensation from the Government;—you appear to have sold land which never was yours, and you have no title for it? I deny that.

140. Do you consider, under the circumstances I have mentioned, the Government have a right to compensate the people to whom you sold the land? I may mention that the land did not come to my mother from the Government.

141. I again ask you whether, under the conditions I have mentioned, the Crown would be justified in compensating the people to whom you sold the land? I decline to answer the question put in that way without my solicitor being present. I say I did not attempt to sell land without a title.

142. *Mr. Sleath.*] You were under the impression, when the land was sold, that there was no reservation by the Crown? I was.

143. You sold the land in all good faith, believing you had a proper title to it? Yes.

144. But afterwards you found out otherwise, I suppose, and that a mistake had been made on the part of your solicitors probably? I have not found anything. You are trying to make me find out something.

145. You still claim that there is no reservation? I do; to the best of my belief there was not.

146. If it is proved that there was a reservation at the date of sale, and that the land was sold by you, or on your behalf, which really did not belong to you, and money was received for it, would it be a fair thing to ask the Government to reimburse those who have paid money to you for land which did not belong to you? It would seem to me so under the circumstances. If the Government are not responsible, I take it that the solicitors who proved all the titles are.

147. *Mr. Edden.*] Can you show any title to the land about which there is a dispute? There is an abstract of it [*produced*], and it was submitted to all the solicitors of Newcastle and Maitland. Even Mr. R. W. Thompson, the oldest solicitor in West Maitland, was a buyer. I have said the sales extended from 1874 to 1885, and there was time enough for the Government to take action to stop me selling the land if it was their property.

148. *Mr. Wheeler.*] You say that Mr. R. W. Thompson was a buyer? He was a buyer at the sale. Whether he bought frontage or back lands I cannot say just now.

149. *Mr. Sleath.*] But is it not a fact that previous to the last sales it became known to you and to intending purchasers that there was this reservation, although it was not specifically set out at the sale? I was aware that the Government had been stopping in and claiming under some reservation. How much it applied to me I could not say.

150. Previous to the sales? I do not think so. The first serious mention I heard of it was when Mr. Fegan wrote to me about Mr. Miller in 1893.

151. If you look at Mr. Brunker's remarks on the motion for the appointment of a Select Committee you will see that he went there as a purchaser? Brunker, Woolf, and Badgery were the sellers of all that land. I never remember Mr. Brunker saying a syllable to me about any reservation.

152. *Mr. Edden.*] How much land did you sell altogether? Getting on for 20 acres. It was the Furlong Grant. If you wish I will give you my reasons for selling the land. Mr. Black said in the House:—

Whether that was the case or not, it must have been known to the man who purchased the land from the original holder that he had not a proper title. Possibly that was one reason why he tried to get rid of the land.

I can give that an emphatic denial.

153. *Mr. Sleath.*] Mr. Brunker said in the House:—

I happen to know something about the circumstances of the case, because I know the piece of land in question, and I remember that on the day of sale I left Maitland intending to buy it. Assuming that Mr. Dangar had the right to the water frontage, the land was a piece which might have been made very valuable by reclamation.

? He does not say he was the auctioneer there.

154. He also said:—

Before the sale I ascertained that the Crown had reserved 100 feet frontage.

Did you know even before the last sale that the Crown insisted upon their claim to the 100 feet reservation? No, I did not; I should have had the question settled had I known. It is an extraordinary thing that Mr. Brunker should say that he knew that existed when every solicitor who attended the sale and passed the conveyances never said a syllable about it. I do not remember Mr. Brunker saying a word about it.

155. And were Messrs. Creagh and Williams your solicitors at that time? Yes; throughout the whole sale. Mr. G. P. Slade was the solicitor in the first instance.

156. *Chairman.*] Does the Crown reserve the coal under that land? I do not think so.

157. Is there coal under the land? I believe so.

158. Have you received royalty for it? Yes. You know the story about the Ferndale Colliery. I was pretty well slated over that, and had a narrow escape from being heavily punished in a monetary sense.

159.

- A. A. Dangar. 159. *Mr. Sleath.*] You say you did receive royalty? Yes; I sold land without reserving the coal. It is a long story, and I cannot tell it to you now.
- 12 Aug., 1896. 160. You sold the land believing there was no reservation? I did.
161. From what you have since heard, do you now believe there is a reservation of 100 feet? I am doubtful about it. I have never heard a direct claim made by a direct purchaser.
162. Then you are not actually aware of any reservation existing on the land? I am not by ocular demonstration.
163. If you sold the land, which is the reservation and for which you have been paid, you think if any compensation is given it should be given by the Government? It seems so to me. I know I have often expressed an opinion to that effect, and I hold it still.
164. In what year was your last sale? 1885.
165. Did that sale include water frontages? I cannot say without reference to the deed of grant.
166. *Mr. Sleath.*] Would your solicitor be able to give that information? He might be able to do so.
167. *Mr. Edden.*] You admitted once you sold all the land to the water's edge under the belief that it belonged to you? Yes.
168. Do you still think so? Yes.
169. And you think the title deeds show it also? I never looked at them. When all the solicitors in one district passed the title a man naturally thinks it is all right, and I knew nothing to the contrary.
170. *Mr. Sleath.*] What we want to know is what the title is, and by getting the information from your solicitor you ought to be able to tell us definitely? It might involve a very important question at law, and I could scarcely be expected to answer it.
171. *Mr. Edden.*] Will it not be better to have your solicitor here to answer the question? I telephoned to him this morning, but he is ill in bed.
172. It seems to me there must have been a doubt about the matter, seeing that the question was referred to all the solicitors of Newcastle and Maitland? I mean that a number of solicitors were employed by the buyers, and they would not pass the title unless they thought it was good.
173. *Chairman.*] Can you give us the names of the solicitors? George Wallace, T. B. Slater, Redhead and Son, G. T. Chambers, A. F. Richardson, R. W. Thompson, and W. W. Capper.
174. What were the conditions of sale? This is one:—

Subject to all the foregoing terms and conditions of sale, we whose names are hereunder written do hereby respectively acknowledge that we have this day purchased at the public auction before mentioned from Brunker, Woolf, and Badgery, acting for and on behalf of the said vendor, all his right, title, and interest of, in, and to the several lands, and so on.

175. *Mr. Sleath.*] Messrs. Brunker, Woolf, and Badgery were the auctioneers of that sale? Yes; and that was the principal sale. This was one of the conditions of sale by Woolf and Badgery:—

The vendor will at the time of sale deliver to the purchaser, his solicitor, or the auctioneer, an Abstract of his Title.

That all objections which, under these conditions, the purchaser can take to the title, shall be made and delivered to the vendor's solicitor within seven days of the day of sale, and all objections not so taken shall be deemed to be waived, and within fourteen days the purchaser shall at his own expense tender to the vendor or his solicitor a conveyance for execution.

176. *Mr. Edden.*] And you never had any objection? No.

177. I suppose you signed transfers, transferring the land from you to the purchasers? I signed conveyances.

178. *Chairman.*] I notice that Furlong's title, a copy of which has been produced, contains the 100-ft. reservation. It says:—

And also all land within 100 feet of high-water mark on the sea-coast, and on every creek, harbour, and inlet.

Does not that make it clear that you have sold land which does not belong to you? I do not think it does myself. As a matter of fact, the rights at that period were never exercised by the Government.

179. *Mr. Sleath.*] According to this title there can be no doubt which did not belong to you;—if this is a correct copy of the original deed of Richard Tasker Furlong, there can be no doubt that you sold land, or land was sold on your behalf, which did not belong to you, and you received money for it? I never heard a word about it at the time. Queries arose during some of the sales as to what lands were reserved and what were not reserved. There was an in and out arrangement along the line of water. Some were supposed to have a reservation and some were not. I do not remember anything arising about it in my case.

180. As a matter of fact, if this is a correct copy of Furlong's title, you will see that the Crown did reserve 100 feet, and, although you were ignorant of it at the time, still, if it has come to your knowledge now, you will see that land was sold for your benefit which did not belong to you? I suppose, as a matter of fact, there were hundreds and thousands of feet of frontage sold prior to my sales under the same condition, and no action was taken.

181. *Mr. Edden.*] We can admit that; but surely you will admit at once that if this is a true copy of the original deed, land has been sold which did not belong to you, although you may have known nothing about it? I will not admit that.

182. If that is a true copy of the deed it must be so, must it not? I am not going to answer that question now. May I call attention to a statement by Mr. Crick on the motion for the appointment of the Committee. He said:—

I understand that the deed of grant sets out that the usual reservations are made without specifically stating that there is a reservation of 100 feet above high-water mark.

183. *Mr. O'Sullivan.*] Did your mother purchase from Furlong? My father did.

184. And the land was bequeathed to you by your mother? Yes.

185. Then you sold to the parties who now complain? No; there has been no direct complaint. The complaint comes from second and third purchasers.

186. *Mr. Sleath.*] Is there a possibility of the abstract of title not being correct? That is not for me to argue.

187. *Mr. Wheeler.*] A short time ago you expressed a wish to make known to the Committee the reason why you sold the land? I remember making up my mind, without there being any question of title or anything in the world arising in connection with it, to sell the whole block of land. I knew it was of good

good value, and it was the only land in Newcastle under which I had a direct title. I hold other property in Newcastle, but I have only a life interest in it. I had to spend £5,000 or £10,000 over the "Great Northern Hotel," and that decided me to sell the land to the best advantage. Every penny I got from it was spent in Newcastle. I could not sell any of the other land, and I made up my mind to sell that. It was sold in good faith, and I believed every inch of it belonged to me.

A. A. Dangar.
12 Aug., 1896.

THURSDAY, 13 AUGUST, 1896.

Present:—

MR. EDDEN, | MR. NICHOLSON.
JOHN LIONEL FEGAN, ESQ., IN THE CHAIR.

George Colquhoun sworn and examined:—

188. *Chairman.*] You are the Crown Solicitor? Yes.
189. I suppose your advice has been taken upon deeds of grant conveying foreshores, and also upon deeds of grant reserving foreshores? I have had scores of them before me.
190. Is this a copy of one of them [*produced*]? I should take that to be a copy. There is nothing on the face of it to show that it is a certified copy, but it is the usual form of copy. In this copy it says, in reference to the 100-ft. reservation: "And also all land within 100 feet of high-water mark on the sea coast and on every creek, harbour, and inlet."
191. What would you take "within 100 feet" to mean? You take high-water mark at one point, and go 100 feet back.
192. Do you know anything of the grant to Tasker Furlong? No.
193. The Crown in this case has sold 20 acres, but the reservation, according to the deed of grant, refers to "all land within 100 feet of high-water mark";—would that 100 feet be included in the 20 acres, or would it be apart from it? It is all included in the 20 acres.
194. Has any case similar to this been before the courts of the Colony disputing the Government's right to the high-water mark? At the present moment I cannot recollect a case, but I know I was the defendant in a case the other day in connection with land at Tom Ugly's Point. There was a curious reservation in that instance of 100 feet for a road, but it was not particularly defined. It was rather a vague reservation, but still there was a reservation, and we won the case upon it. They wanted to get £1,000 less from the purchase money, and we declined, and said, "You bought the land, and the title deeds are there for you to see them." The same thing occurred at Cremorne—Milson's place. The reservation has been well known in this country for the last fifty or sixty years.
195. Do you know of any exchange which took place between the Cooper family for Double Bay and Belle Vue Hill? There was a case there in which there was a 10-acre reservation, and they considered it was void on account of uncertainty, but it was not. The Crown could take that 10 acres wherever they liked out of the grant.
196. Is it not a fact that they handed it over to the Cooper family—the Crown did not press its claim? I believe they reserved it, and that is how the question arose. If I had thought the matter was going to be referred to I would have looked up the case before coming here. They said, "You cannot take that 10 acres of reservation, because you have not any fixed position for it." That contention was not upheld, and they were able to take it wherever they liked.
197. According to this grant, it appears the Crown sold 20 acres to Richard Tasker Furlong? Yes. The eastern boundary of that is by the creek down to the river, and by the river west of it, to the extreme western end of the line.
198. So that the Government did not part with 20 acres of land? They sold 20 acres, subject to the right to resume at any time 100 feet from high-water mark.
199. That is 20 acres, less 100 feet? Less the right to resume it—not 20 acres, plus the 100 feet. They sold the 20 acres with the right at any time to resume 100 feet out of it, so that if they resumed at any time it would diminish the 20 acres by the actual area of 100 feet.
200. How do the Government go about the matter when they resume the land? That would depend upon the terms of the grant. We could resume at any time.
201. You would have to go through certain formalities? We could get a writ of intrusion. Supposing I wanted to take 100 feet in a certain place, I should inquire who were the occupiers of it. I should then give notice to them asking for possession. In the event of their declining to give possession I should file a writ of intrusion, which is the mode in which the Crown brings an action for ejectment.
202. How would that writ be served? It would be served upon the occupiers personally, in the same way as you would serve an ordinary writ if you wanted to recover £1,000.
203. If the writ were not served personally, the Crown could not take action? I should serve it on the occupier.
204. But supposing the writ were not served, would you have any claim? We have any time in which to serve it.
205. But it would have to be served before you had any claim? We have the right to the claim. We need not put it in force until such time as we choose. When we make up our minds we say, "Give us possession of that 100 feet."
206. But in the event of the writ not being served, the Crown does not make its demand properly? We are not bound even to make a personal demand. We can serve a writ at once if we choose.
207. What if the writ is not served? We rest upon our rights then.
208. But what if it is proved that the Crown has made no demand for the foreshores? That does not matter. We have any time in which to make our demand.
209. In this case a certain man is supposed to buy land from Mr. Dangar fronting the creek; he finds out that it is within the 100-ft. reservation; without serving the writ, the Crown through the *Government Gazette* make a claim;—is that legal or not? Perfectly legal.
210. Without serving any writs? Yes; because the parties themselves might say, "We bought this, subject to the 100-ft. reservation; there it is." Of course the writ is the last resource. We generally say, "We want the 100 feet and you must give it up; if you do not we must make you."

G. Colquhoun.
13 Aug., 1896.

- G. Colquhoun. 211. *Mr. Nicholson.*] Is it usual for the Crown to pay for any improvements effected on the reservation? I have never known it done. I apprehend that any person purchasing would purchase with his eyes open.
- 18 Aug., 1896. *Caveat emptor*—let the purchaser beware—is an old legal maxim.
212. Would you consider a notice given in the usual way, by advertisement, of a public sale of land, when the original abstract of title showed that there was a reservation of 100 feet frontage, sufficient to indemnify the vendor from any charge? When an abstract of title is furnished it is generally prepared by the vendor's solicitor, the vendor personally knowing very little about it. An abstract of title will be prepared, generally speaking, upon a contract or an advertisement of the sale of the property, which is the basis of everything. In the event of there being no particulars in connection with that contract, such as a reservation, then any purchaser would have to look out for what his abstract discloses. The abstract being prepared, is handed over to the purchaser or his solicitor. It is then the duty of the purchaser's solicitor to examine and compare the abstract with the original title. If the conditions of sale are such that a purchaser has to make his objection to the abstract within a certain number of days, and he does not make objection, the law considers he has waived all objection to the title.
213. *Chairman.*] What about the abstract of title? This is the abstract of the title for 20 acres of land.
214. With the usual reservations? Yes; the usual reservations of public ways, &c.
215. Would you take that to mean the 100-ft. reservation as well as other reservations? I should take it to mean a notice to me, if I were the purchaser's solicitor, putting me upon inquiry as to what those usual reservations were. In examining my deed, I should take good care to see what was put down.
216. Would not you think it strange if a man in the position of Mr. Thompson, solicitor, bought under the same conditions? No, I should not. It depends a good deal on when the sale to the sub-purchasers took place.
217. That was in 1875? As a matter of common knowledge, these reservations of 100 feet were not looked upon as anything very serious in those days. That, however, is not a legal answer. Of course, if a man buys with that reservation, he buys with his eyes open.
218. I suppose that if a man occupies the land including the reservation for twenty-one or thirty years, it does not give him the right to it? Not as against the Crown.
219. But as against a private individual? That is a different thing altogether. The Statute of Limitations comes in, and you are bound by the twenty years.
220. Then the Crown never parts with its right? No. We say that there is no Statute of Limitations against us in the Colony. It is still a moot question whether we are bound by the sixty years—that is what is called the *Nullum Tempus* Act. We have tried to get the Privy Council to decide it, and they have shirked it, but they will have to do it in a case I am sending Home now.
221. *Mr. Edden.*] Does it appear to you that if Mr. Dangar sold these foreshores to private individuals he sold that which does not belong to him? I do not know what the contract was, therefore I could not answer that question; but I will assume that he sold right up to the boundary line, not knowing about the reservation, and that the purchaser examined the title, and saw the reservation. He had it in his power then to say, "Mr. Dangar, you cannot sell me that; I decline to complete the purchase." He could have taken his objection, and refused to complete his purchase on that ground.
222. Yesterday Mr. Dangar was asked a question with reference to compensation. In Mr. Dangar's opinion, if the Government resume, the people who purchase the land have a right to compensation from the Crown;—what is your opinion? I cannot pass any opinion upon that. If they choose to make any claim against the Crown, I shall be quite prepared to meet it, but it would not be fair for me to pass an opinion at present.
223. *Chairman.*] Who is legally responsible for the mistake which has been made in regard to the 100-ft. reservation;—is it the solicitor, or Mr. Dangar? Certainly not the man who sold it. He must have sold it in all good faith. He did not sell simply the 100 feet. I suppose he sold a large piece.
224. Yes—£16,000 worth? How is it divided?
225. Into allotments [*plan produced*]? The plan does not show the usual subdivisions, but it shows how the property stands now. There is no doubt on my mind that it was the duty of the purchaser's solicitor to see that the title was all right.
226. Then, in your opinion, the solicitors were responsible? They were at that time; but I think it is too late now for them to be responsible. The time in which you can bring an action for negligence against them has lapsed.
227. How many years are supposed to elapse? Six.

TUESDAY, 18 AUGUST, 1896.

Present:—

MR. CARROLL, | MR. TRAVERS JONES,
MR. O'SULLIVAN.

JOHN LIONEL FEGAN, ESQ., IN THE CHAIR.

James Miller, wood-turner, Hannell-street, Wickham, sworn and examined:—

- J. Miller. 228. *Chairman.*] You bought some land originally sold by Mr. Dangar fronting Throsby Creek? Yes; I bought it from Mr. Ash.
- 18 Aug., 1896. 229. Who drew up your deeds? H. J. Brown.
230. Did he raise any objection to the title? None.
231. You signed the title? Yes.
232. When was it pointed out to you that it was defective? Not until after it was paid for and I was living on the land. I must have been living upon it from four to six months.
233. Did you ever mortgage the land? Yes; to the Newcastle Permanent Building Society.
234. Did they accept the deeds as correct? Yes; and I borrowed £100 from them.
235. When did you first know there was any stipulation as to a reservation? The first I heard of it was when M. T. Garrett applied to mine for coal under some reservations on the banks of the Hunter. I then made inquiries from Claxton, and he said he believed it was where we were living on. There had been different meetings got up by the residents on the land, and that was how I came to find that a reservation existed.

236. Did the Department send you notice to the effect that you were on the 100 feet reservation? I made application to the Land Board, and then I found I was on it. After I had paid the mortgage to the Building Society I made application to the Land Board to purchase the land, the reservation of which had been rescinded. J. Miller. 18 Aug., 1896.

237. Did you receive a letter in answer to yours? Yes; I received the following letter:—

[Am. 93-10, 125; S.P. 91-94.]

Sir,

Department of Lands, Sydney, 15 August, 1893.

I am directed to call your attention to the notice in the *Government Gazette* of to-day, from which you will perceive that you will be allowed to purchase, under the 63rd clause of the Crown Land Act of 1884, portion of land containing 7½ acres, in the parish of Newcastle, county of Northumberland; and I am to request that you will be good enough to pay into the Colonial Treasury the sum of £144 7s., being the price at which the land has been appraised, inclusive of the deed fee and costs.

Under the 213th clause of the Regulations of the Crown Lands Act of 1889, the amount stated must be paid in the manner pointed out within three months from the notice in the *Government Gazette*, under a penalty of an addition of 10 per cent. to the price; and should the price, together with such penalty, not be paid within a further period of three months, the claim to purchase will lapse.

The sum of £7 18s. out of the deposit, paid on the application, will be credited as part payment of the purchase-money, the balance being retained, in accordance with Regulation No. 209, to cover the part of costs incurred in connection with the application.

I have, &c.,

WILLIAM HOUSTON,
Under Secretary
(per A.B.).

James Miller, Esq.,
Hannell-street, Wickham.

238. That is in regard to land which you paid for in 1879? Yes; I paid £150 for it.

239. How much of the £144 have you paid? £57 18s.

240. Have you asked for time in which to pay the balance? Yes; every three or six months.

241. Why? I have not been in a position to pay the money.

242. What were the meetings to which you have referred? To protest against having to pay a second time for the land. I thought when I bought the land it was mine, and that no one else had a right to it.

243. Who was the solicitor connected with the building society which mortgaged your land? Mr. Capper.

244. Your title to the land was accepted by H. J. Brown, and by Capper, of Newcastle? Yes.

245. What did you do when you found that the land was within the 100 feet reservation? I wrote to Mr. Dangar, and received the following reply:—

Sir,

Barona, Whittingham, Great Northern Railway, 26 September, 1893.

I am in receipt of yours of the 25th instant, and, in reply, do not see what claim you have upon me in the matter, or how I can assist you.

The allotment you allude to is, I suppose, one that Mr. J. Ash bought at my sale in 1875, when the land was sold in perfect good faith by me, and my title to it passed and approved of by all the solicitors of the various purchases, and again, I suppose, by your solicitor when you purchased from Mr. Ash.

It seems a most unjust thing that after all these years the Government can make such a demand as you say they are making upon you; but although, no doubt, Mr. Ash paid me for the land, I do not see why I should now, eighteen years after, refund you the money, or any portion of it.

I am, &c.,

A. A. DANGAR.

Mr. J. Miller, Wickham.

246. Have you any buildings on the land? Yes; I reside upon it and have a workshop there. It is worth £300 or £400. I pay 34s. or 35s. a year rates.

247. Then if you cannot pay the balance due to the Government, to all appearances you will lose everything? Yes; and I am not in a position to pay at present.

248. *Mr. Travers Jones.*] Have the Government made a recent claim for the balance? Yes; and they have given me an extended time—until December next.

249. *Chairman.*] But time after time you have received demands from the Lands Department for the remaining portion of the money? Yes; with 5 per cent. added.

250. *Mr. Travers Jones.*] Will you be in a position to pay the balance in December? No; but I should be in December, 1897, when I shall receive some money in connection with a Life Assurance.

251. If the Government ejected you from the land, would you lose your buildings and business? If they tried to do that I should have to endeavour to borrow the money. Otherwise I should have to lose my home.

George Edward Redman, cordial manufacturer, Hannell-street, Wickham, sworn and examined:—

252. *Chairman.*] Did you buy any land on the foreshores of Throsby Creek from Mr. A. A. Dangar? Yes. I will read what I have to say: I bought lot 6, section E, at auction from Messrs. Wolfe and Badgery, auctioneers, for the sum of £1,015, to be paid for on the following terms:—One-third cash, balance at one and two years at 7 per cent. interest; I paid the balance off in the first year at Maitland; at the time I paid such balance, Messrs. Wolfe and Badgery's clerk handed over to me the deeds; such deeds I did not order them, or anyone else, to make out; I accepted such deeds in good faith, thinking they were all right; I brought them home; next day I submitted them to Mr. George Wallace; he advised me they were quite correct, and the only thing that was wanting to complete, was to be sent to Sydney to be registered, which was done; in full faith that the title was good, I commenced to fill up the swamp; I may state, at the time I asked Mr. Badgery if I could reclaim any portion of the swamp, he informed me I could reclaim as much as I wished—in fact, it was such inducement held out that decided me to purchase this land; I was filling up the swamp for about five years; at times I had as many as six drays going at a time; in 1880, Messrs. Hume and Pegrum, Sydney, visited my place several times with a view to purchasing the whole of the land and property thereon; I sold the land and my business to them for £5,000; they paid me a deposit of £25; they sent the contract, together with the deeds, to Messrs. Pigott and Trickett, solicitors, Sydney; they pointed out the defect about the 100 feet from high-water mark; consequently the deeds were sent back as no good, and Messrs. Hume and Pegrum declined to purchase my business owing to the defect in the title of the land; the bank then went to law with me, with the result that I lost the land and had to compromise with my creditors in Sydney; I handed to them everything I had in the world; the trustees took possession, and run the business for seven months, with my assistance—for a living for those depending upon me; at the expiration of that time, they sold the business and everything I gave them; a few of my friends bought the business in for me; such business I have carried on until the present.

253. Who drew up the deeds? The auctioneer or Mr. Dangar got George Wallace to draw them up.

254. You found out that something was wrong when you had closed a bargain to sell the land for £5,000? Yes.

G. E.
Redman.

18 Aug., 1896.

- G. E. Redman.
18 Aug., 1896.
255. Had the deeds been good you would have put £5,000 in your pocket? Yes. I lost the lot, and started again without a shilling.
256. What did it cost you for filling up the land? £1,100. I lost all that.
257. If you had known it was Crown land would you have filled it up? No. I thought by reclaiming the land I could employ my men in the winter. I thought the land was part of my bargain, and that the purchase gave me the right to fill it up.
258. Did you lose the land you filled up? Yes, I lost it all. The bank claimed it. I owed the bank £1,500 on account of a mortgage which I got upon the land, in order to erect my buildings.
259. The bank had to purchase again from the Crown? Yes.
260. How much did the bank pay for it? £2,000.
261. The filling up you made was, I suppose, looked upon as an improvement? Yes.
262. Had the bank to pay for the Crown's improvements? Yes.
263. Had it not been for the improvements you made would the Crown have got so much? They would not have got 1,100 pence.
264. But on account of the filling up they got £2,000? Yes.
265. And then you had to buy from the bank again? After many years I bought back from the bank for £2,500.
266. So that, altogether, you are at a loss of £7,000? About that.
267. How many cordial manufacturers were there in Newcastle at that time? Myself and Mr. Moore.
268. So that you were injured considerably when you were sold up? Yes; I lost my trade and everything else.
269. How much do you think you lost altogether through the transaction? Fully £5,000. I was out of business for a year, and it took me years to pull up the business I lost. I have lost more than £5,000 if I include the loss of business.
270. *Mr. Travers Jones.*] Had you been allowed to carry on your business you could have done well? Yes.
271. And the defect in the title deed ruined you? Yes.
272. Are you still in the same line of business, and doing fairly well? Yes; but not so well as formerly.
273. *Mr. Carroll.*] When the deed was sent to Sydney was it registered? Yes, and it was handed back to me.
274. Was the land you bought all dry? Yes, at that time. When Mr. Dangar sold me the land he sold me 2 roods 16 perches.
275. *Mr. Travers Jones.*] The 100 feet of reservation was of no value until you filled it in? No. I do not think anyone would have had it as a gift. My labour and money made it worth £2,000. Formerly it consisted of mangroves and a swamp, and through my exertions, and the expenditure of £1,100, I made it good land.
276. *Chairman.*] Seeing that this land has been made of great value through the expenditure of your money, you think you should receive some concession from the Crown? Yes; if I could only get back what I spent there I would be quite satisfied.
277. Had you to compromise with your creditors on account of the solicitors, Messrs. Pigott & Trickett, finding out that the land you paid £1,000 for was within the 100 feet reservation? Yes.

THURSDAY, 27 AUGUST, 1896.

Present:—

MR. CARROLL,

MR. EDDEN.

JOHN LIONEL FEGAN, Esq., IN THE CHAIR.

Job Butler Hudson sworn and examined:—

- J. B. Hudson.
27 Aug., 1896.
278. *Chairman.*] Have you resided in Wickham? Yes.
279. Do you know anything of the sale of land by Mr. A. A. Dangar, at Cottage and Throsby Creeks? Yes.
280. Were you an original purchaser? Not from Dangar. I was present at the sale, and I bought by public auction, on the ground, from Mr. Croker.
281. Was any stipulation made as to the 100 feet reservation? None whatever. I bought, as Mr. Wood, solicitor, described it, with a thorough, good title.
282. Have you any information to give to the Committee? I bought the land on 2nd May, 1878, and gave £660 for it. I immediately called for tenders to build. I was informed by Mr. Hogue, the Wickham Council Clerk, that I was going to build on the footpath. He put a peg in, and informed me the street was 1½ chain wide. I had to stop my contract. I then asked Mr. Hudson, who was surveying for Dangar on the opposite side, when he cut up the other portion of his paddock, to put a peg in for me, and he did so.
283. Did the pegs vary? Yes, by 3 or 4 inches. I then wrote to Croker, and he came down, and I told him what was the matter. He went to George Wallace, the solicitor, who advised that I should go to arbitration and settle the matter. I agreed. He appointed J. C. Benares to act for me, and I appointed Wm. Grizzell, now deceased. The decision of the arbitration was that I should receive £170 14s., which Mr. Croker paid to me the same afternoon as compensation for the footpath. I was there for some years as an hotelkeeper when the Government surveyor came along, and a man drove a peg close to my tank in the yard. I asked him what he was doing, and he said he was carrying out orders. The surveyor came up and asked me if I was aware I was on a reservation of 100 feet from high-water mark. I said, "I am not." A meeting of purchasers was held, and afterwards I came to Sydney, and went to the Registrar-General's Office, and found out that in a copy of a deed which Dangar submitted to Tasker Furlong the words "usual reservation for public ways" were used instead of "a reservation of 100 feet from high-water mark." I produce a copy of the abstract of title which I received, but it is not a true copy; it only refers to the "usual reservations for public ways." Ultimately I had to buy the land from the Government. I paid them £233, and £1 for my deeds; and also £20, and £1 for deeds in respect of 2¼ perches upon which my stable was standing.
284. When you bought from Croker, you did not know there was any 100 feet reservation? No, nor did Croker.
285. *Mr. Carroll.*] What was the difference in time between Dangar selling to Croker and you buying from Croker? I could not tell from memory, but I think within two or three years.
286. *Mr. Edden.*] Your property is on the 100 feet reservation? Yes, and I had to re-purchase it from the Crown.

1898.
(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE.

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

LAND FRONTING THROSBY AND COTTAGE CREEKS,
SOLD BY A. A. DANGAR, ESQ.

WEDNESDAY, 21 SEPTEMBER, 1898.

Present:—

MR. EDDEN,
MR. NOBBS,

MR. NICHOLSON,
MR. PERRY.

J. L. FEGAN, ESQ., IN THE CHAIR.

Henry Joseph Brown, solicitor, sworn and examined:—

1. *Chairman.*] You are a solicitor practising at Newcastle? Yes.
2. Do you remember Mr. Dangar selling land fronting Throsby Creek and Cottage Creek? Yes.
3. Did you act as solicitor for some of the purchasers? Yes, for some of them.
4. Have you heard that the Government have demanded payment for land which several purchasers bought from Mr. Dangar? In several instances the Government have claimed and have been paid compensation for the land within 100 feet of high-water mark.
5. As solicitor for a number of the purchasers you examined the title to the land? Yes.
6. You were perfectly satisfied that everything was proper so far as the reservation was concerned? I ascertained by comparing the abstract with the grant that the reservation existed.
7. Was not this land within the 100-foot reservation? Yes.
8. How then could you give a deed for such land? Of course Mr. Dangar conveyed what interest he had, and the purchasers took the title under various conditions, either because they could not help themselves under the circumstances or thought they could purchase the Crown right on easy terms.
9. Did the purchasers accept that title knowing that they had no right to the 100-foot reservation which really they had bought? Well, in some cases they did, believing as I have said that the reservation was merely nominal and that it could be rescinded at a nominal rate. In other cases the purchase money was paid in full or the land was built on before the purchasers came to me to prepare the conveyance, and then I explained matters, and it was thought that nothing could be done but take the land as it was.
10. You have in your hand the abstract of title to the land sold at auction? Yes.
11. Does it make any reservations? There is no mention of any reservation here of the land within 100 feet of high-water mark. I am usually considered a little over particular, and I always make it a point to compare the abstract with the deeds, to see that nothing is left out; that is to say, of course, when an opportunity offers. In these particular cases I did make that inquiry, and I saw that the 100 feet had been reserved.
12. *Mr. Edden.*] You had nothing to do with this grant until the purchasers came to you to get deeds for them? No.
13. You had nothing to do with Mr. Dangar at all? No.

H. J. Brown.
21 Sept., 1898.

H. J. Brown. 14. *Chairman.*] Did the persons who came to you to draw up their deeds, have anything before them but that abstract of title? They would not have even that. The abstract would come to me, as their solicitor, after the sale.

21 Sept., 1898.

15. Is it possible, do you think, that Mr. Dangar would sell that land without knowing that there were certain reservations in the grant? It is quite possible—it is quite probable indeed.

16. Do you think it is probable that a business man of Mr. Dangar's capacity could hold land without knowing how much belonged to the Crown, or what reservations were in the grant? The land came to him from his father. Mr. Dangar, senior, purchased the land, and Mr. A. A. Dangar, in all probability, would not trouble to make an inquiry on that point. I recollect that in one case the purchaser did give up for sale, on my pointing it out to him. In another case the purchaser said, "Well, it may be worth my while to take the land, and I can settle with the Government afterwards." I should say that in those days this reservation, as a rule, was not looked upon as being worth very much—it was considered that it was intended that the Crown should resume the land if they required it for public purposes, but not claim it otherwise, and that in any case the reservation could be got rid of by a comparatively nominal payment.

17. You have known Mr. Dangar for many years? Yes.

18. Do you think it is possible that a man of his business capacity would not know what reservations there were in the grant of that land? I think it is quite possible. He would know his father had purchased 20 acres, and probably would not consider it necessary to inspect the deeds; he would leave that to his solicitor.

19. Do you think you would own a piece of land without knowing what reservations were on it? As a solicitor, I should inspect the title, and see that everything was all right.

20. I suppose Mr. Dangar is a professional man too? No; he may never even have seen the deed.

21. There were 20 acres granted in the first instance to Richard Tasker Furlong? Yes.

22. In the advertisement in the *Government Gazette* of the 18th September, 1839, there is no reference made to any reservation? No; so far as I can see, the wrong is not with Mr. Dangar, who probably believed that he had a right to sell, but with the Government in demanding payment for land for which they had already been paid.

23. How is that? I cannot trace exactly which is the particular description from the advertisements in that *Gazette*, but none of them indicates that the water-frontage would be reserved. Of course, if the Government advertise land for sale, the meaning is to be taken as described or specified in the advertisement.

24. There are three or four advertisements in this *Gazette*? Yes, they are all on the same lines. You will notice that the length of the lines is not given, but it is stated that they will be sufficiently long to include 20 acres. The Government professed to sell and were paid for 20 acres, but there ought to be another advertisement in a later issue of the *Gazette* showing when the sale was to take place, and giving fuller particulars.

25. *Mr. Perry.*] Did the plan show a reservation of 100 feet? No. If I could see the Government conditions of sale or the advertisement under which the land was sold, it would set the matter at rest.

26. It says in the abstract "the usual reservation of public ways"? Yes.

27. That, I take it, is the usual thing, giving a right to the Crown to resume land for a roadway through any part of the grant? It is hard to say what is usual because these reservations vary—and I speak from an experience of forty or fifty years.

28. There apparently was a roadway reserved, what is termed here an occupation road, that is, a 50-links wide road? That occupation road simply started at the water's edge, and went within the 100 feet all along or nearly so. If it were intended that the 100 feet should be the property of the Government at the time of the sale they would never have reserved a road out of what belonged to them. The advertisement would lead any one reading it to believe that there was not to be a reservation of water-frontage.

29. *Mr. Nobbs.*] Are the creeks mentioned in this paper tidal creeks? In my opinion they are not creeks at all within the meaning of the deed. One is a water-course, and one is a channel.

30. Are they tidal channels? One is a tidal channel, and the other is a water-course taking its rise some little distance back, and it is no doubt backed up by the tide. Throsby Creek is a tidal channel and Cottage Creek is a fresh-water creek affected by the salt water at high tide.

31. It is really a tidal creek occasionally? Yes. At present it is a storm-water drain.

32. Was there a reservation of 100 feet to high-water mark made in the grant? Yes; but these grants are prepared by the Government after the sale, and the purchasers do not know what they insert. They might lie for years in the Treasury and no one would know what had been granted to him till some solicitor found it out.

33. As a matter of fact, a reservation of the land within 100 feet of high-water mark is contained in the grant of this land? Yes.

34. Mr. Dangar, in selling this land, sold under his title and he showed a plan in which there was no reservation whatever? I do not think it is shown on the plan.

35. The land comprised in the reservation was sold as if it was his land under the Crown grant? Yes.

36. He had no right whatever to sell Crown land? That is a legal question, but he had a moral right to do so, inasmuch as the Government have been paid for that land.

37. No application was made to the Government to resume this land in the ordinary way? No; not by Mr. Dangar, as far as I know.

38. Therefore it is really a flaw in the title? That is, assuming that the so-called creeks are creeks within the meaning of that Act.

39. If you were acting for a purchaser would you not, if you knew that the land was fronting salt-water creeks, examine the Crown grant to ascertain if it contained a reservation of that kind? Yes.

40. And if it did contain a reservation of that kind you would at once demand from the vendor the refund of a certain amount, that is the value taken off the land, or advise your client to throw up the land altogether? Yes, I would explain the whole matter to my client and let him act as he thought fit, as I did in these cases.

41. If it were shown afterwards to be a bad title you would consider yourself responsible to your client if you had not given that explanation to him? Yes.

42. If you had given that explanation to your client, and he had taken the title with all faults, he would be responsible? Yes. H. J. Brown.
43. And that purchaser, in selling again, would be exactly in the same position? Yes; as I have already stated, in those days there was not very much weight attached to these reservations. 21 Sept., 1838.
44. *Mr. Perry.*] It is laid down that the duty of a purchaser is to see that the title to the land is good? Yes; where he is afforded an opportunity.
45. Has it been ascertained whether the grant contains 20 acres with the 100 feet reservation taken out of it. I cannot say from the description. There is some muddle in this description in the grant. It refers to a proclamation of the 18th September, 1839. There are things not in that proclamation which are mentioned here as being in it. For instance, it says, "Being the land sold to the said Richard Tasker Furlong as lot 20, in pursuance of the advertisement of 18th September, 1839." There is no number of the allotment here at all, evidently there must have been another advertisement, because this is only a preliminary notice that this land would be sold.
46. *Chairman.*] Would not the first advertisement be gazetted in 1838? No; this is the first advertisement, that His Excellency purposes at an early date to put up the land for sale.
47. *Mr. Perry.*] Suppose there had not been that flaw in the title, would that land have brought more at auction? I do not think so, at the time; it was not known when the land was purchased.
48. Do you know of any case where there has been a reservation, and the Government have afterwards taken or used the land, and paid the owner for the land? I do not know of any instance in reference to a water-frontage; but I have an impression that the Government have paid for land granted with other reservations. I would like to point out to the Committee that the descriptions in this *Gazette* relate to a number of lots similarly situated. From the advertisement it is evident that it was intended to convey 20 acres. The length of the lines is not given, but it is stated that they are to include the full quantity. The land would be sold at auction at so much an acre; and if 20 acres were paid for, it was evidently intended by all parties that 20 acres should be retained by the purchaser. On a rough calculation, an acre and a half of land would be taken away from the grant by the reservation. This occupation road is all, or nearly all, within the 100-feet reservation, and the Government would not reserve a road out of property which belonged to themselves.
49. *Chairman.*] What conclusion do you draw from that? My conclusion is that the Government have sold the land, and have been paid for it twice. A number of other allotments fronting Throsby Creek were, later on, sold on or about the same day, and in some of these grants the reservation is inserted, and in others it is not, and for no apparent reason; they were all sold under the same circumstances. I am very much inclined to think that it is just a matter of chance what reservations are in a grant; that it all depends upon what pigeon-hole the clerk took the form of grant from.
50. You know that a number of persons have built their homes on this land? Yes.
51. You fully believe that the Government did not own or had no claim to the land? I have no doubt that a great many persons purchased the land under that impression; though after the purchases, in the case of my clients, they would know otherwise.
52. *Mr. Perry.*] Is the road on the river-bank? Yes.
53. Is it absolutely necessary that there should be a road along the river-bank? Yes; the road is now called Hannell-street.
54. The reclamation right was given in virtue of ownership of land fronting the creek? Yes; but I should say that in these cases the proprietors had paid for the rescission of the water frontage so far as regards their pieces. They did that in virtue of the ownership, although as a matter of fact, in some cases the whole of the land was within the 100-feet reservation.
55. Therefore the Crown must have recognised the private ownership of this 100-feet reservation? They did in a way at all events.
56. Were reclamation rights granted to the owners of the land comprised within the 100-feet reservation? The Government had granted a right to reclaim in cases where the reservation had been rescinded so far as regards the piece concerned, and in some cases the rescission had been allowed where the whole of the land was wholly within the 100-feet reservation. It was a kind of recognition of title.
57. *Mr. Nicholson.*] This goes to prove that the Government in every case did not exercise their privilege as to the 100-feet reservation from high-water mark? I think it was a matter of chance what particular form of grant was filled up. A gentleman in Newcastle has four separate allotments which were all bought at the same time under the same conditions. Three of them are without the reservation and the fourth has it.
58. *Mr. Perry.*] At the time this land was sold land was of very little value, and the Government were not very particular in their description? I know that some of the descriptions in the Government deeds are perfect curiosities. I have seen a deed of land in George-street, bounded on the west by George-street and nothing more. I have seen a deed of another piece, bounded on the north by the Hawkesbury River, and on all other sides by mountains. If I were arranging for the sale of this property for a client, and I intended to reserve 100 feet for high-water mark, I should instruct the surveyor to make his description so as to show that reservation. Instead of the land being bounded on the north or east, as it might be by a creek, it would be bounded by the line distant 100 feet from and parallel to high-water mark.
59. *Mr. Nobbs.*] This land was sold by an auctioneer? Yes.
60. Under the ordinary conditions of sale? Generally.
61. Was there any reservation mentioned in the conditions of sale? At the first sale I know that there was no mention made of the reservation. Whether there were subsequent sales in which there was a condition stating that the property was sold subject to the reservations in the Crown grant, I do not know, but there may have been - I do not say that there was in this particular case.
62. A reservation such as you mentioned would include the reservation of the water-frontage? Yes, it is so generally considered, but I have some doubt.
63. You cannot say that it was mentioned that it was reserved? No.
64. If purchasers bought the land at an auction sale, and it was not mentioned in the conditions that such a reservation existed they simply bought at their own risk, and they would be responsible for any loss which might be sustained? Yes, if they accepted the title.
65. Where a reservation of this kind exists, it is a usual thing for vendors, in order to protect themselves, to state it in the conditions of sale? Yes. I do not think that would be quite sufficient, or ought to be sufficient.

H. J. Brown. sufficient, because people do not listen to these things when they are read; and it ought to be distinctly stated that the water-frontage—which really means the land itself—is reserved. There are reservations of rights of drainage, and all that kind of thing. Perhaps this reservation is really an exception.

21 Sept., 1898.

66. *Chairman.*] If the owner believed that every foot of this land was his property—on account of its requiring this slip of 100 feet to make up the quantity of 20 acres mentioned in the grant—would it be possible for him to let the purchaser know that there was a reservation of 100 feet from high-water mark, when he himself did not know that there was? People who buy small pieces of land are generally not very conversant with the law relating to real property, and, as a matter of fact, many professional men are not, not that I say that they are defective in knowledge, but simply because it may not come within their particular branch of the profession.

67. And from taking too much for granted? No. There are some three or four branches of the profession, and a man may be a specialist in one branch, and have only a very moderate knowledge of the others.

68. If Mr. Dangar, who was sole owner of those 20 acres, did not know that the Government were claiming 100 feet from high-water mark, how would it be possible for him to let the purchasers know that they were. The purchaser would be just in the same position.

69. *Mr. Nobbs.*] As a matter of fact, purchasers generally look to their solicitor? Yes. It was Mr. Dangar's father who purchased the land. The water there is very shallow. The principal use of the water-frontage in those days would have been simply for the purpose of getting boats to take goods and things wanted for a house from the steamer. There are no fewer than four bridges across Throsby's Creek at present.

70. *Chairman.*] Four bridges and a small causeway? Yes; nothing more than an ordinary skiff could get under sail there, and then only at low tide.

71. Somebody must be in the wrong from the fact of these people having to pay twice for the land they bought? No doubt.

72. In your opinion, who is in the wrong? I should say from what is before me the Government undoubtedly are.

73. You have given this matter your very careful consideration? Yes. That opinion might be modified if I saw the advertisement announcing the sale of the land, and the conditions of sale. I observe that in his evidence before the former Select Committee, the Crown Solicitor, in answer to question 190, stated that the usual form of deed preserving foreshores contained these words: "And also all land within 100 feet of high-water mark on the sea-coast and on every creek, harbour, and inlet." The Committee will notice that it does not say anything about a river. If it had been intended to take a creek in the ordinary acceptance of the term, certainly the word "river" would have been used, as a river is more important than a creek. You would hardly reserve water-frontage in Cottage Creek, which is, perhaps, all mud at low tide, and exempt a river if it did not mean a creek in the legal sense of the term. Mr. Miller, in his evidence before the last Committee, says that I did not raise any objection in his case. He must have been mistaken when he gave that evidence.

74. Why? In the recital it says: "Whereas the said John Ash some time since sold and was paid for the land," and the land was subsequently sold to Mr. Miller. What has really taken place is this: The Government sold 20 acres, and, apparently, without letting the purchaser know anything about it, they gave him a deed for 20 acres, less 100 feet water-frontage, and they ought to rectify it.

75. Have not the following solicitors also accepted the title as good:—George Wallace, T. B. Slater, Redhead and Son, G. T. Chambers, A. F. Richardson, R. W. Thompson, and W. W. Capper? Yes.

76. It would be strange if they accepted a title which was of little value? As I say, they may have been in the same position as I was in, in some cases, and were instructed to do so by their client; or their client may have paid for the land, and was glad to get what he could.

77. *Mr. Nobbs.*] What does this reservation amount to in all? Over an acre and a half, I think.

78. You contend that this place is neither a creek nor a harbour nor an inlet within the meaning of the grant? Yes.

79. I see, from page 2 of the evidence taken by the former Committee, that the grant contains a reservation of 100 feet of all land within 100 feet of high-water mark on the sea-coast and on every creek, harbour, and inlet? Yes.

80. In your opinion, do these creeks come within either of these terms? I do not think so.

81. How would you describe these creeks? I should describe Cottage Creek as a water-course, and Throsby's Creek as a channel or ana-branch separating Bullock Island from the mainland.

82. In acting for a purchaser, you took that view of it? I did not act on it, but I say that where I accepted a title I either did it under instructions or because my client could not help himself—either from the conditions of sale or because there had been sub-sales by people who had been paid and could not refund the purchase-money, or the land had been built on. I am not sure that Mr. Dangar's second sale did not comprise that condition. Purchasers from the Government are, to a very great extent, at their mercy—the Government prepare the deeds, and no one knows what they put in them. For instance, in the early sixties some land was conditionally purchased at Lake Macquarie, and the description in the application which was accepted extended to the shores of the lake. When the purchase-money was paid in full, and all the conditions of the sale complied with, a grant was issued, and it contained a reservation within 100 feet of high-water mark. I pointed out that what my client bought was the land up to high-water mark, and that there was no mention of any reservation in the acceptance of his application. The Government admitted it, and struck out the reservation, and no doubt that should have been done at the time in these cases which are before the Committee. My impression is, so peculiar were the ways in which they made out these deeds, that probably some of the grants of land on the Blue Mountains contain reservations of land within 100 feet of high-water mark. I have been referred to the evidence of a former witness who gave extracts from the conditions of sale by the Crown, which refer to the reservation of land within 100 feet of high-water mark; but purchasers might come in too late to hear the conditions read, and if they did hear them might take no notice of them, and trust to the advertisement which showed clearly that the whole land up to high-water mark would be sold, particularly when it was sold and paid for by the acre. In these cases the position of the Crown would be legally correct; but morally speaking, I think the purchasers, having no idea that they were purchasing only part of the land they paid for, would have a claim to rescission.

83. *Chairman.*] Is there any other evidence which you would like to give? I think not.

PATENTS AND TRADE MARKS ACTS.
(RETURN RESPECTING RECEIPTS AND EXPENDITURES IN CONNECTION WITH THE ADMINISTRATION OF.)

Printed under No. 6 Report from Printing Committee, 13 October, 1898.

[Laid upon the Table in answer to Question No. 1, Votes No. 25, 12 October, 1898.]

Question.

- (1.) Patents and Trade Marks Acts:—*Mr. O'Connor*, for *Mr. Spruson*, asked the Minister of Justice,—
(1.) What were the total receipts and expenditure in connection with the administration of the Patents and Trade Marks Acts, from 1st August, 1887, when the Patents Law Amendment Act of 1887 came into effect, to the end of the last financial year?
(2.) The same for the last financial year?

Answer.

(1.) The receipts of the Patents Office from 1st August, 1887, to the end of the last financial year were £36,956; and the expenditure (without charges for printing, advertising, and stores), approximately, £22,324. The receipts under the Trade Marks Act for the same period were £13,686. Expenses connected with Trade Marks have been borne by the Registrar-General's Department, and no separate account has been kept. Since 13th May, 1890, the sum of £571 has been refunded to applicants for the registration of Trade Marks in cases of refusal and withdrawal. I cannot ascertain particulars of refunds in Trade Marks cases prior to the date mentioned.

(2.) The Patents receipts for the last financial year were £3,849, and the expenditure (without the before-mentioned charges), £1,235. The Trade Marks receipts for the same period were £1,546. Refunds in Trade Mark cases during that year amounted to £165.

P. P. PACKHAM,
Acting Examiner of Patents.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

NECROPOLIS—ROOKWOOD.

(INFORMATION RESPECTING CEMETERIES AT.)

Printed under No. 9 Report from Printing Committee, 27 October, 1898.

[Laid upon the Table in accordance with promise made in answer to Question No. 4, Votes No. 29, Thursday, 20 October, 1898.]

- (4.) **ROOKWOOD CEMETERY**:—Mr. Nobbs asked the Minister of Justice,—
- (1.) What are the names of the trustees and secretaries of the various denominational cemeteries of the Necropolis, Rookwood?
 - (2.) What are the amounts of allowances, salaries, &c., paid to each of the above?
 - (3.) The addresses of offices of such trustees and secretaries, and the amounts paid for rent for each?
 - (4.) The names and salaries of cemetery managers, distinguishing those residing within their management?
 - (5.) The names and salaries of clerks to managers?
 - (6.) The number of labourers employed in each denominational ground, and if preference is given to residents within the district?
 - (7.) Must masons, undertakers, &c., attend offices in Sydney for permits before commencing work at or upon graves?
 - (8.) Can payment be made at Necropolis for graves; if so, have receipts to be obtained from offices in Sydney for such payments, or what is the usual course?

Mr. Lee answered,—I will lay the information desired upon the Table in the form of a return at an early date.

The Under Secretary of Justice to The Trustees of the Church of England Cemetery of the Necropolis.

Gentlemen,

Department of Justice, Sydney, 21 October, 1898.

I have the honor, by direction of the Minister of Justice, to forward herewith a copy of questions asked by Mr. Nobbs, M.P., in the Legislative Assembly, respecting the Necropolis at Rookwood; and to request that you will be good enough to furnish me, at your earliest convenience, with the desired information so far as it relates to the Church of England Cemetery, in order that the Minister may be in a position to answer the questions.

I have, &c.,

GEORGE MILLER,
Under Secretary.

NOTE.—A similar communication was sent to the Trustees of the General, Presbyterian, Wesleyan, Roman Catholic, Primitive Methodist, Jewish, and Independent Cemeteries, respectively.

Answers to Questions referred to.

CHURCH OF ENGLAND CEMETERY, NECROPOLIS.

Church of England Cemetery, Necropolis Office,
42, Elizabeth-street, Sydney, 189 .

1. John Dawson, Esq., Honorable James Watson, Dr. Andrew Houston, Alfred L. Bray, Esq., William Coles, Esq. (Trustees); Florence George Chippendale Hanslow (Secretary).
2. No allowances of any kind are made to the trustees. The secretary, £250 per annum.
3. 42, Elizabeth-street, Sydney; £78 per annum.
4. Charles Oliver Kimberley, officer-in-charge of the cemetery, and residing within the cemetery; £250 per annum.
5. Oliver Kimberley, at Rookwood, £50 per annum; John Bede Carroll, at Sydney, £50 per annum.
6. Eighteen. No preference is shown.
7. Yes.
8. Yes.

F. G. CHIP. HANSLOW,
Secretary.

GENERAL CEMETERY, NECROPOLIS.

General Cemetery, Necropolis Office,
42, Elizabeth-street, Sydney, 189 .

1. Honorable James Watson, Honorable George Thornton, Dr. Andrew Houston, Alfred L. Bray, Esq., William Coles, Esq. (Trustees); Florence George Chippendale Hanslow (Secretary).
2. No allowances of any kind are made to the trustees. Referring to the remaining questions, the sum of £38 per annum is paid to the trustees of the Church of England Cemetery, whose employees do whatever work is necessary.

F. G. CHIP. HANSLOW,
Secretary.

PRESBYTERIAN CEMETERY, NECROPOLIS.

Dear Sir, 37, Wentworth Court, Sydney, 24 October, 1898.

I have the honor to acknowledge the receipt of your communication of 21st instant, and to forward herewith answers as required therein.

1. Messrs. R. T. Moodie, R. Miller, D. Elphinstone, W. Wood, J. H. Goodlet, and L. C. Henderson.
2. R. T. Moodie, managing trustee and secretary, £200 per annum; 37, Wentworth Court.
4. Alexander Watt, sexton, £120 per annum.
5. Minister, an honorarium, £120 per annum, without responsibility of trustees as to his functions.
6. Three or four as required from the district, having service from twenty to three years.
7. Yes.
8. Yes.

ROBT. T. MOODIE,
Managing Trustee.

AMENDED Rules and Regulations for the Presbyterian Cemetery, Necropolis.

1. The manager shall, under the direction of the trustees, have the charge, management, and control of the said cemetery, and of all matters connected therewith, and shall prosecute all offences against the Necropolis Acts of 1868 and 1884, and also all offences against the rules and regulations made under the authority of the said Acts.
2. The trustees may erect vaults for urgent cases, and may dispose of the same to any person on payment to the manager of the purchase money for the exclusive right of burial in such vault, and the cost and charges of erection, &c.; but in case any person should desire to erect his own vault, the work shall be performed according to the plan adopted by the trustees, and under the direction or supervision of the manager or officer-in-charge of the cemetery.
3. All vaults to be erected of stone set in cement, and all interments therein must be in lead coffins.
4. The kerbing for all graves and vaults shall be of stone, clean cut—for graves, 6 x 14 inches; for vaults, 8 x 15 inches; and if railing is erected, it shall be of iron, painted, and subject to the manager's approval. Areas for graves, 3 x 7 feet; for vaults, 8 x 10 feet to 12 x 10 feet.
5. The trustees may sell and grant land within the said cemetery for the exclusive right of burial, in perpetuity, or for any given period, in each and every section of the said cemetery; and also the right of erecting any vault, monument, tomb, tablet, gravestone, or monumental inscription; and such rights as aforesaid shall be considered as the personal estate of the grantee, and may be assigned in his lifetime or bequeathed by his will, subject nevertheless to all the by-laws of the said cemetery.
6. The trustees may order the removal or alteration of any vault, monument, tomb, tablet, gravestone, monumental inscription, kerbing, railing, or other erection which shall have been erected or placed in any of the said divisions of the said cemetery, which may be contrary to these by-laws, or any of them, or which may have been erected or placed there without the authority of the manager or officer-in-charge.
7. The trustees may charge and receive, for and in connection with the interment of bodies in the said cemetery, and for the erection of any vault, or for the enclosure of any land, for the exclusive right of interment therein, and for the right of erecting or placing therein or thereon any monument, tablet, gravestone, kerbing, monumental inscription, or other erection, the fees and charges provided in the schedule annexed, marked B.
8. Each proprietor to enclose his land with stone kerbing as above described, and cut thereon the number of the grave or vault within six months from the date of purchase.
9. No trees or shrubs shall be planted in any enclosure except such species as the trustees shall approve.
10. Masons and other workmen shall clear away all refuse made by them, and shall repair and make good all damage caused by or through them or their servants, to the satisfaction of the manager or officer-in-charge.
11. Masons and other workmen shall, before commencing any work in the ground, deposit with the manager or officer-in-charge the sum of ten shillings, which shall be forfeited if Rule 10 is not complied with.
12. All tombs and monuments must be erected on stone foundations 6 feet deep, or to rock, and a copy of every inscription and drawing of every tomb or monument must be approved by the trustees previous to the erection.
13. Every grave (where possible) shall be 6 feet deep, and not more than two adults shall be interred in each grave.
14. Notice of all interments and the legal certificate of death, also the length and breadth of the coffin, must be delivered at the office of the manager, in Wentworth Court, Sydney, and all fees, costs, and charges paid to him or the secretary prior to the issue of the order for interment, &c.; but in cases of emergency corpses will be received and interred in the said cemetery without the usual order: Providing the aforesaid information is supplied, and all fees, costs, and charges paid to the sexton or officer-in-charge of the cemetery. And any person depositing a corpse within the said cemetery contrary to this rule shall for every such offence, on conviction thereof, forfeit and pay the sum of five pounds.
15. The undertaker or person taking out the order for interment shall forward the same to the sexton or officer-in-charge of the cemetery at least eight hours prior to the time fixed for the interment, and the order of the manager or secretary shall be the proper authority to the sexton and other officers of the cemetery for the interment of every corpse mentioned therein.
16. The consent in writing of the owner of the exclusive right of burial in any grave or vault must be delivered at the office of the manager with the notice of interment.

17. The trustees shall, at their discretion, be permitted to authorise the manager to remit the charges for the interment of any poor person.

18. The trustees will, upon due notice and payment of the costs and charges, undertake the removal and replacement of head and foot stones, kerbing, slabs, monuments, &c. when graves or vaults are required to be opened, but will not be responsible for any damage which may occur in the performance of such work; but if due notice is not given, and the costs and charges are not paid as aforesaid, the trustees will not undertake the reopening of such grave or vault.

19. Every order issued by the manager or secretary must be delivered to the sexton at the said cemetery before any work is commenced or materials delivered, and all such work shall be carried on to completion without delay, and under the direction and supervision of that officer.

20. No heavy materials shall be drawn over the roads or paths in wet weather.

21. No person shall ride or drive any animal or vehicle over the roads or paths of the cemetery, nor shall any person work near a grave during the performance of a burial service.

22. No slab shall be placed over any grave where there has not been an interment, nor shall any person circulate any business cards within the said cemetery.

23. A plan of the selected sections for graves and vaults is kept at the office of the manager, and by the sexton or officer-in-charge of the cemetery, which may be inspected on application.

24. Any person desiring to have a tomb, monument, or place of burial kept in order in perpetuity may do so by depositing in the hands of the trustees, for the general purposes of the said cemetery, any sum of money not less than fifty pounds sterling, and the said trustees, or the trustees for the time being, shall cause to be expended on the said tomb, monument, or burial place, at their discretion, the interest on such sum at the rate of five pounds per centum per annum.

25. Any person offending against any of these rules and regulations shall, on conviction thereof, before any Justice of the Peace, forfeit and pay any sum not exceeding ten pounds nor less than ten shillings.

26. All rules and regulations heretofore published are hereby repealed, but the trustees reserve to themselves the right to make alterations from time to time in the fees and charges, and in the rules and regulations now and heretofore adopted by them.

Made and passed by the trustees of the said cemetery, this 25th day of January, 1898.

J. H. GOODLET, Chairman.
R. T. MOODIE, Manager.

Made and passed by the trustees of the said cemetery, this 25th day of January, 1898.

J. H. GOODLET, Chairman.
R. T. MOODIE, Manager.

Trustees, R. C. Cemetery, Necropolis, 13, Castlereagh-street, Sydney.

1. (1.) The Rev. J. P. Moynagh, P.P., Patrick McMahon, J.P., John Hourigan, J.P., John Lane Mullins, Edmund O'Farrell. (A vacancy at present exists owing to the death of the Rev. Thos. Long.) (2.) Alexander James McNeil.

2. (1.) None; only out-of-pocket expenses being paid, viz.:—Train fares to cemetery on business connected with the trusts, which in 1897 amounted to £1 10s., and to date in 1898, £1 10s. (2.) The secretary's salary is £150 per annum.

3. (1.) 13, Castlereagh-street, Sydney, near Hunter-street. (2.) £46 16s. per annum.

4. Edward Keating; salary, £120 per annum; resident within cemetery.

5. None.

6. Six (6) (eight at present, two being employed temporarily). Preference is always given to local residents, if suitable.

7. (1.) Masons must submit, either personally or by post, copy of inscription to be cut on headstone, and design of headstone, for the secretary's approval. When such has been approved, the fees may be paid either at Sydney or Rookwood office before commencing work. Kerbing permits may be taken out at either office on payment of fee. (2.) *Re Undertakers.*—Regulations Nos. 14 and 15 are as follows:—14. Notice of all interments, and the legal certificate of death, must be delivered at the office of the secretary, 13, Castlereagh-street, Sydney, and all fees, costs, and charges, paid to him, prior to the issue of the order for interment, &c. And any person depositing a corpse within the said cemetery contrary to this rule shall, for every such offence, on conviction thereof, forfeit and pay the sum of five pounds. 15. That before an order for interment shall be given, the certificate of a clergyman, to the effect that the deceased had a right to interment in the Catholic burial-ground, must be produced. By resolution of trustees at meeting on 29th May, 1894, the above rule was made applicable only to those firms carrying on business this side of Summer Hill on Suburban line, those higher up the line being allowed to transact business direct and pay fees at Rookwood office.

8. At such times as Sydney office may be closed, or in case of urgency, those undertakers mentioned in reply 7, as having to transact business at this office, may transact and pay fees at Rookwood office. Payments of all descriptions may be made at cemetery. Separate receipt and order books are kept at Rookwood office, and receipts given on payment of various fees.

A. J. McNEIL,
Secretary.
PRIMITIVE

PRIMITIVE METHODIST CEMETERY, ROOKWOOD.

1. Revs. Geo. James, B. Kenny, M. Reavley, Thos. Davies, Jas. Green, W. Pettinger, Phillip S. Young, and Mr. G. F. Crozier; Rev. J. W. Holden. Secretary, 439, Riley-street, Surry Hills.
2. No allowances or salaries are paid.
3. Each minister in city and suburbs write out orders for interments. No rent is paid for offices. The secretary's address is given under section 1.
4. No salaried manager engaged. We only pay for digging graves, viz., 7s. 6d. for each adult grave.
5. No salaries paid to any clerks or managers.
6. No labourers at present permanently employed.
7. Yes.
8. Receipts obtained from secretary.

Sir,

I judge the foregoing answers are what you require.

Yours, &c.,

J. W. HOLDEN,
439, Riley-street, Surry Hills, Sydney.

Sir,

Great Synagogue, Elizabeth-street, Sydney, 24 October, 1898.

I have the honor, on behalf of the trustees of the Jewish portion of the General Cemetery, Rookwood, to forward you the following answers to questions asked by Mr. Nobbs, in so far as our portion of the Necropolis is concerned:—

1. Trustees: Mr. Justice Cohen, Messrs. Louis Phillips, George J. Cohen, Moritz Gottself; Simeon Frankel, Secretary.
2. Allowances, salaries, &c., nil.
3. Great Synagogue, Castlereagh-street; nil.
4. None.
5. None.
6. One regularly, sometimes more; yes.
7. Not necessarily; it can be done by letter.
8. Yes, if necessary; but as a rule our appointed supervisor of burials collects the amount after the funeral, when receipt is issued from this office.

I have, &c.,

S. FRANKEL,
Secretary to Trustees.

INDEPENDENT CEMETERY, ROOKWOOD.

1. Trustees: Sir James B. Fairfax, Josiah Mullens, Dr. P. Sydney Jones, Thomas B. Rolin, Samuel Thompson, and Joseph Palmer; Secretary: William Bell.
2. Trustees receive no remuneration; Secretary, £50 per annum.
3. Trustees and secretary's office, 173, Pitt-street; rent paid by secretary.
4. Alfred Fathers, sexton; salary, £9 15s. per month, including residence.
5. None.
6. One permanent labourer, with occasional extra man when required. Always a resident within the district.
7. Yes; except in cases of interment.
8. Yes. Payment can be made to sexton, who gives an interim receipt—official receipt being issued from secretary's office in due course.

Sydney, 24th October, 1898.

W. BELL,

Secretary to the Trust.

To the Honorable Minister of Justice,—

Sir,

381, George-street, Sydney, 25 October, 1898.

In answer to yours of the 21st instant, *re* Rookwood Wesleyan Cemetery, I have to submit the following:—

1. Trustees: William Bailey, T. P. Reeve, Thos. Cummins, E. Dawson, W. H. McClelland, and R. D. Sippe; Rev. Paul Clipsham, Registrar.
2. Trustees, honorary. Registrar, £125 per annum.
3. 381, George-street, Sydney; £50 per annum.
4. William Bailey; £2 2s. per month.
5. None.
6. Two. Yes.
7. Not necessarily.
8. No.

I am, &c.,

PAUL CLIPSHAM,
per M.H.H.

1898.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

INDECENT ADVERTISEMENTS BILL.

(PETITION FROM WILLIAM SAUMAREZ SMITH, D.D., ARCHBISHOP OF SYDNEY, PRESIDENT OF THE STANDING COMMITTEE OF THE SYNOD OF THE DIOCESE OF SYDNEY, IN FAVOUR OF.)

Received by the Legislative Assembly, 2 November, 1898.

To the Honorable the Legislative Assembly of New South Wales in Parliament assembled.

The Petition of the undersigned, William Saumarez Smith, D.D., Archbishop of Sydney, President of the Standing Committee of the Synod of the Diocese of Sydney,—

RESPECTFULLY SHOWETH:—

That a Bill intituled "A Bill to Suppress Indecent Advertisements" is now before your Honorable House.

That, in the opinion of your Petitioner and of the Standing Committee of the Synod of the Diocese of Sydney, the Bill referred to is calculated to advance the cause of social morality and civic welfare.

Your Petitioner, therefore, humbly prays that your Honorable House will be pleased to pass the said Bill.

And your Petitioner, as in duty bound, will ever pray.

WM. SZ. SYDNEY.

Similar Petitions were received,—

On 2nd November, 1898, from E. A. Rennie, President, and Robert Dey, Hon. Secretary, of the Council of New South Wales Branch of the Evangelical Alliance.

On 2nd November, 1898, from F. E. Harry, President, and Frederick Hibberd, Secretary, of the Baptist Union of New South Wales in Annual Session assembled.

1898.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

INDECENT ADVERTISEMENTS BILL.

(PETITION FROM SUSAN R. REA, PRESIDENT OF A CONFERENCE OF MEMBERS OF THE WOMEN'S CHRISTIAN TEMPERANCE UNION, IN FAVOUR OF.)

Received by the Legislative Assembly, 10 November, 1898.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales in Parliament assembled.

The humble Petition of the undersigned, the President of a Conference of Members of the Women's Christian Temperance Union and others, held at the Wesleyan School Hall, Newtown, on Tuesday, 11th October instant,—

SHOWETH:—

It was unanimously resolved that this Conference recognises the enormity of the evils resulting from the distribution of indecent literature, and the appearance in certain newspapers of advertisements relating to sexual disorders and other similar matters; heartily approves of the provisions of the Indecent Advertisements Bill introduced into the Legislative Assembly by Dr. James Graham; and prays the Parliament to pass the measure as speedily as possible.

And your Petitioners, as in duty bound, will ever pray.

Signed for and on behalf of the Conference,

SUSAN R. REA,
President.

1898.

(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

BRITISH NEW GUINEA LAND SYNDICATE.

(PAPERS IN CONNECTION WITH THE PROPOSED CONCESSIONS TO THE.)

Printed under No. 1A Report from Printing Committee, 1 December, 1898.

Telegram from The Premier of New South Wales to The Premier of Victoria.

19 May, 1898.

REFERRING to Ordinance No. 1 of 1898, British New Guinea, as to acquirement of lands, I have telegraphed to Premier of Queensland in following terms:—"Confidential. Ministers strongly condemn provisions of agreement with Land Syndicate. We propose to do all in our power to prevent the completion of the transaction, but before doing anything would like your views."

Telegram from The Premier of Victoria to The Premier of New South Wales.

19 May, 1898.

Re land concessions in British New Guinea. I have already written to Queensland Government, asking to be furnished with views and particulars, and stating that matter is one respecting which the contributing colonies should have been consulted. Will co-operate with you in any future proceedings if we can do anything.

 GEORGE TURNER.

Cablegram from The Premier of New South Wales to The Acting Agent-General.

19 May, 1898.

The Administrator of British New Guinea has passed an Ordinance authorising a land transaction of great magnitude, and with powers of choosing land, which have aroused very strong public opinion against the proposal. The New South Wales Government have determined to oppose the project most unreservedly, and so, probably, will the Government of Victoria. Kindly make such representations to the Colonial Office as will prevent allowance of the Ordinance until the matter has been maturely considered.

G.H.R.

The Premier of Queensland to The Premier of New South Wales.

Sir,

 Chief Secretary's Office, Brisbane, 19 April, 1898.

I have the honor to enclose, for the information of the Government of New South Wales, a signed and sealed copy of Ordinance No. 1 of 1898, British New Guinea, to enable certain persons to acquire and occupy lands not exceeding in the aggregate 250,000 acres in area, and for other purposes subsidiary thereto.

I have, &c.,

THOMAS J. BYRNES,

Cabinet consider that the Imperial Government should be requested not to advise assent to this Ordinance pending consideration by the Colonial Governments of the matter.—G.H.R., 17. Telegram to Premier of Queensland and copy to Premier of Victoria.—G.H.R., 18.

1898.—Queensland.

CONCESSIONS MADE TO BRITISH NEW GUINEA SYNDICATE.

(Correspondence respecting.)

Presented to both Houses of Parliament by Command.

(1.)

The Under Secretary of State, Colonial Office, to Sir Hugh Nelson.

Sir,

Downing-street, 28 May, 1897.

I am directed by Mr. Secretary Chamberlain to transmit to you for your consideration a copy of a letter from Mr. J. Lowles, M.P., submitting a memorandum of the aims and proposals of the British New Guinea Syndicate, described as being established for the purpose of effecting preliminary arrangements justifying the formation of a company, having for its object the systematic institution and development of general commercial and trading operations in that colony.

I am to enclose copy of the reply which has been returned to Mr. Lowles, and to state that Mr. Chamberlain will be glad to be favoured with the expression of your views on the subject of these proposals.

As the arrangement under which Queensland, Victoria, and New South Wales make an annual contribution of £5,000 each to the cost of the administration of British New Guinea expires next year, Mr. Chamberlain proposes to avail himself of the opportunity presented by the presence in this country of yourself and the other Australian Prime Ministers to discuss with them the question of the future administration of the territory, and also the question raised in the despatch which he recently addressed to Governors of the Australian Colonies, of which a copy is enclosed, suggesting the incorporation of the Protectorate over the Solomon Islands with British New Guinea.

Knowing the great personal attention which you have devoted to the affairs of New Guinea, Mr. Chamberlain would be much obliged if you would favour him with a full expression of your views on the question of the future administration of that territory, and also on the suggestion as to the incorporation of the Southern Solomons with it.

A copy of the report furnished by Mr. Woodford, the Resident in the Solomons last year, is enclosed for your information.

I am, &c.,

JOHN BRAMSTON.

[Enclosure 1 in No 1.]

Mr. J. Lowles, M.P., to The Secretary of State for the Colonies.

Sir,

House of Commons, 17 May, 1897.

I have the honor, on behalf of the parties interested in the matters referred to in the enclosed papers, to ask your favourable consideration of the proposals therein contained.

I may state for your information that Sir Charles Malcolm Kennedy (late of the Commercial Department of the Foreign Office), Sir Somers Vine, and I are authorised to represent the parties concerned, and to approach you in reference thereto.

The members of the Syndicate already admitted include individuals of high standing and thorough respectability in commercial and trading circles.

You are probably aware that in one direction of the proposed operations—viz., the rubber-tree industry—an exceptionally large demand, with every probability of vast extension, has been manifested in the manufacturing districts of this country, particularly in the Midlands.

It is the feeling of those on whose behalf I now address you that the known and admitted suitability of British New Guinea for the growth and development of this important product alone justifies their anticipations and wishes in proposing to expend capital within the confines of the territory wholly under the British Crown, and intimately connected with British, Imperial, and Colonial administration.

I venture to express the hope that the enclosed papers will satisfy you that a strictly honest and businesslike institution of a comparatively new channel for British trade and commerce is contemplated.

Practically the proposals now submitted do not differ from the facilities at present given for the acquisition of land in British New Guinea by the Administration, except in spreading the time of payment over a limited period, viz., eight years, but with this important consideration in addition, that a specified sum of money is necessarily to be expended during that period in actual development work.

I have had the pleasure, in company with Sir Charles M. Kennedy and Sir Somers Vine, of personally explaining the intentions and objects of the Syndicate to Sir John Bramston (permanent Under Secretary of State for the Colonies) within the past few days.

The agent engaged by those interested is Sir Somers Vine, whose recognised powers of organisation and personal acquaintance with the whole of the Australasian Colonies renders him peculiarly fitted for discharging the duties proposed to be entrusted to him by those with whom I am associated in this matter.

May I ask you to be good enough to commend the agent of the Syndicate to the consideration of the local Administration and the Colonial Governments concerned in this Conference with them on behalf of the Syndicate.

I have, &c.,

JOHN LOWLES,

Haggerston.

[Sub-Enclosure in Enclosure 1 in No. 1.]

MEMORANDUM prepared by Sir J. R. Somers Vine (late Assistant Secretary of the Imperial Institute), Sir Charles Malcolm Kennedy (late of the Commercial Department of the Foreign Office), and Mr. John Lowles, M.P.

The British New Guinea Syndicate.

This Syndicate is established with a capital of £5,000 (registered under the Limited Liability Acts) by three commercial and financial associations in the city of London, and several merchants, traders, and others, for the purpose of effecting preliminary arrangements justifying the formation of a company with ample capital (which would be available and at command if the Syndicate is enabled to obtain the reasonable options and privileges it has in view), having for its object the systematic institution and development of general commercial and trading operations in British New Guinea.

The Syndicate propose to send out a qualified agent to negotiate with the local administrative authorities of British New Guinea for the taking up—with the friendly concurrence and assistance of the Administration and the Colonial Office and other authorities concerned—of tracts of land suitable for the operations of the Company proposed to be formed. It is desired in the first instance to secure a lease of the lands direct from the Administration and from the natives (in the latter instance where such a course would be needful or desirable), by a nominal payment for a limited period to be defined. Before the expiration of that period, and subject to active measures being taken, it is further desired to obtain the confirmation of the lease of the lands temporarily assigned for an extended beneficial period, or in perpetuity so long as certain payments are made to the Government and other parties with rights of ownership at a rate to be agreed upon.

The temporary assignment of the lands to the Syndicate for a nominal payment would come to an end if active operations of the working and development Company were not commenced within the period to be reasonably defined.

One of the principal methods of development contemplated is the laying-out of "rubber-tree" and other plantations (strongly recommended by competent authorities, amongst others, Mr. H. O. Forbes, one of the pioneers of New Guinea exploration, as an almost certain remunerative speculation), whereby the administrative authorities will secure the easy improvement of the country which is essential to its welfare and that of its inhabitants.

It is, however, desired to include any and every product which the lands to be leased may offer for the operations of the Company, and to introduce to the country manufactured articles from the United Kingdom and the adjacent colonies.

It is particularly contemplated to employ existing agencies—so far as they can be usefully and properly engaged—such as recognised mission and other establishments, shipping firms, and respectable individuals who know the country and the natives, and can be depended upon to legitimately promote the details of development.

The organisation of native labour under instructed and intelligent control would be an important consideration.

The co-operation of firms, agencies, and persons of good standing and already carrying on trade in and with the country would be sought, and, if possible, secured.

The concurrence of the Colonial Governments interested in the subsidies now paid in connection with the territory would be sought and secured, so far as it could be reasonably and properly accorded.

It is hoped that the Colonial Office will testify its sympathy by recommending the agent of the Syndicate to the friendly consideration of the local Administration and the Colonial Governments directly concerned in respect of the negotiations and temporary agreements he would be authorised to enter upon. The paramount wish of the parties to the Syndicate is that their ultimate operations should be carried on under the complete supervision of the local authorities and to the full approval of the Imperial and Colonial authorities.

The parties interested believe that the time is now ripe and promising for the prudent investment of capital in an entirely British possession, which, at this moment is practically untouched by organised methods, whilst it is rich in natural resources—believed to be capable of profitable development and extension—within easy reach of regular communication and practicable transport between the United Kingdom and several important neighbouring colonies.

As far back as the year 1886, it was stated that the German New Guinea Company had been most fortunate in its operations (*vide* statements of Dr. Knappe, formerly German Consul at Samoa), and that the exercise of its privileges would be of enormous value in the future.

The report of the late Sir Peter Scratchley (presented to the Victorian Parliament in 1886) accurately describes the aims and hopes of all interested in the present venture. Sir Peter Scratchley desired the formation of a trading company on a basis somewhat similar to the British North Borneo Company, and he recommended that some portion of the territory (estimated at more than 85,000 square miles) should be handed over to a company for administrative and commercial purposes. The question of administration other than that absolutely connected with the commercial and trading operations of the Company as a company would, however, perhaps—and it would be the desire of the parties to the Syndicate that it should be so—be best left to the sole responsibility of the Government-appointed officials.

British New Guinea Syndicate.

The following is a basis of the arrangement which it is suggested to be proposed to the Administration:—

1. The granting of a Government Ordinance giving the Syndicate the right to take up, say, 250,000 acres of suitable lands not yet appropriated for a period of one year (from 1st January, 1898, to 31st December, 1898), by a cash payment of £1,000, payable in four quarterly instalments, and to continue the same thereafter to the Syndicate, its successors and assigns, until a sum of £30,000 in all shall have been paid (at any time within eight years from the date of the granting of the Ordinance), when the Syndicate, its successors and assigns, are to be confirmed in the freehold of the lands and all their products, subject to paying a special tax of 2½ per cent. on the net export value of all products taken out of the country from the lands occupied.

2. The Syndicate, its successors and assigns, to be required as a condition of the continuance of the option before referred to after the 31st December, 1899, to submit proof of an expenditure of not less than £10,000 within that period (or rather two years from the date of the Ordinance), on the institution of actual trade operations, and in like manner to submit proof that at the end of eight years from the date of the granting of the Ordinance the sum of £30,000 on trade operations and works of development in the country.

3. During the period of eight years from the date of the Ordinance, the Administration to undertake not to increase the export duties and import duties as now imposed, so far as regards the operations of the Syndicate, its successors or assigns.

4. The Syndicate, its successors and assigns, to be accorded such powers of primary administration as distinct from its purely business direction as the local Administration and the Colonial Office may agree in respect only of the lands, &c., assigned.

5. Subject to the foregoing limitations, the Syndicate, its successors, and assigns, to be granted as far as may be reasonably possible the powers and privileges which distinguish the British North Borneo Company.

6. The Syndicate, its successors, and assigns, to be free to take up further lands (over and beyond the 250,000 acres first conceded) as may be mutually agreed with the local Administration and the Colonial Office.

[Enclosure 2 in No. 1.]

The Under Secretary of State, Colonial Office, to Mr. J. Lowles, M.P.

Sir,

Downing-street, 28 May, 1897.

I am directed by Mr. Secretary Chamberlain to acknowledge the receipt of your letter of the 17th instant, submitting the proposals of the "British New Guinea Syndicate," and requesting that their agent may be furnished with a letter of introduction to the Queensland Authorities.

I am to inform you that the control of the Administration of British New Guinea is, subject of course to the Secretary of State for the Colonies, vested in the Government of Queensland, which acts on behalf of the other colonies—namely, Victoria and New South Wales—which contribute to the expense of such administration.

Mr. Chamberlain is of opinion that before the Syndicate send any representative to Queensland their proposals should be discussed by you and your colleagues with the Premier of the colony, who, as you are aware, is now in this country, and to whom a copy of your letter has been sent.

I am, &c.,
JOHN BRAMSTON.

[Enclosure 3 in No. 1.]

The Secretary of State for the Colonies to The Governors of New South Wales, Victoria, South Australia, Western Australia, Tasmania, and Queensland.

My Lord,—Sir,

Downing-street, 22 March, 1897.

Your Ministers are no doubt aware that, although a British Protectorate was declared in 1893 over the Southern Solomon Islands, until last year no steps have been taken to inaugurate a local Administration.

During last year the High Commissioner for the Western Pacific temporarily appointed Mr. C. M. Woodford, British Resident in the group, and Mr. Woodford, who had had some previous experience there, has, after revisiting the principal islands, furnished a valuable and interesting report on them, copies of which are enclosed.

It will be seen that there is already a considerable development of trade and commerce with the Protectorate, and that planting also has commenced, and some speculative purchases of land have been made.

The risks attending industrial enterprise in the Solomon Islands, from the character of the natives, are, unfortunately, too well known, and it is imperative, therefore, that the initial steps for the establishment of law and order should not be longer deferred.

I need scarcely remind your Ministers that the main object of Her Majesty's Government in establishing the Protectorate over these islands was to prevent the injury to Australian interests which would have resulted from their passing under the control of a foreign Power.

What is already taking place shows that it will be by Australian capital and enterprise that the Protectorate will be developed, and it is desirable, therefore, that the responsibility for the administration should rest with the Australian Colonies, and that it should be conducted in accordance with Australian rather than English ideas.

The

The Australian Colonies and New Zealand have already proved by their conduct in regard to British New Guinea, the Cook Islands, and Norfolk Island that they are prepared to relieve the Imperial Government of responsibility in regard to the Pacific Islands, which they are in a better position to discharge than Her Majesty's Government, and I have no doubt that they will be ready to act in a similar manner in regard to the Solomon Islands.

It has occurred to me that the best arrangement for the administration of the islands would be to add them to British New Guinea, with which the group is geographically connected, and as the agreement under which that Possession is now administered expires next year, its renewal might be discussed on the basis that the Solomon Group will be incorporated with it.

In the meantime, as will be seen from Mr. Woodford's report, it is expected to raise a local revenue of about £300 a year, and Her Majesty's Government have agreed to ask Parliament to vote a sum of £1,200 this year for the establishment of a Residency, which will enable a beginning to be made in the administration, and allow time for the Colonial Governments to discuss the question of providing for the future of the group.

The High Commissioner has been instructed to make all appointments provisional only, so as to afford perfect freedom in regard to future arrangements, as to which I shall hope to have an opportunity of full discussion with your Prime Minister when he arrives.

I have, &c.,

J. CHAMBERLAIN.

[Sub-Enclosure in Enclosure 3 in No. 1.]

Report on the British Solomon Islands by Mr. C. M. Woodford.

(Not printed.)

(2.)

Sir Hugh Nelson to The Under Secretary of State, Colonial Office.

Queensland Government Office,

Westminster Chambers, 1, Victoria-street, London, S.W., 7 July, 1897.

Sir, I have the honor to acknowledge the receipt of your letter dated 28 May last, with which you transmit, by direction of the Right Honorable the Secretary of State for the Colonies, for my consideration, a copy of a letter from Mr. J. Lowles, M.P., submitting a memorandum of the aims and proposals of the British New Guinea Syndicate, together with a copy of the reply which has been returned to Mr. Lowles, and request me to furnish Mr. Chamberlain with an expression of my views on the subject of the proposed formation of a company, having for its object the systematic institution and development of general commercial and trading operations in the Possession of British New Guinea.

Since the receipt of your letter under reply, I have had the advantage of personal interviews with the promoters of the Syndicate referred to, and I have given careful consideration to their proposals. Although considerable progress has been made since the declaration of Sovereignty over British New Guinea in the development of the country, especially from an administrative standpoint, it will, I think, be generally admitted that it is extremely desirable that the development should proceed more rapidly. The distinguished services rendered by Sir William MacGregor in establishing order and good government among the natives, and in exploring the interior of the country, are, I feel convinced, too well known to the Secretary of State to require mention here, but it would be manifestly difficult for the Lieutenant-Governor, whose time and energies are fully occupied with his arduous administrative duties, to do more for the expansion of agricultural, commercial, and industrial enterprise in the territory than he has already done. It appears to me that few better means for assisting this expansion could be devised than the formation of a company on the lines now suggested, and I am not disposed to regard in an unfavourable light the proposals which have been submitted. But it must be borne in mind that the enterprise would be attended with many and grave difficulties, some of which, such as the labour question and the popular aversion existing in the contributing colonies to syndicates in general, I have forcibly brought under the notice of the promoters. Much would, however, doubtless depend upon the character and experience of the directors appointed to locally control the Company's affairs. In any case it is imperative that, before any further steps are taken in the matter, the approval and support of Sir William MacGregor should be obtained. I have accordingly advised the promoters of the enterprise to depute an agent or agents to visit the Possession and to lay the proposals before the Lieutenant-Governor. If the Secretary of State is satisfied of the *bona-fides* of the Company proposed to be formed, and of its financial soundness, I see no objection to his furnishing the gentleman so appointed with letters accrediting him to Sir William MacGregor. I have assured the members of the Syndicate that if the Lieutenant-Governor is favourably impressed with their ideas, the Government of Queensland will give the most careful consideration to the whole project, and will consult with the Governments of the other contributing colonies with a view to submitting some definite recommendation to the Imperial Authorities.

I do not propose to deal here with the wider question of the administration of British New Guinea after the expiration of the present arrangement, whereby Queensland, New South Wales, and Victoria make an annual contribution of £5,000 each towards the cost of government, or with the proposal to incorporate the Solomon Islands Protectorate with the Possession, concerning both of which an expression of my views is asked in your letter under reply. These matters will form the subject of official correspondence on my return to the colony, when the attitude to be adopted by the several Governments concerned has been definitely decided upon.

I have, &c.,

HUGH M. NELSON.

(3.)

The Under Secretary of State, Colonial Office, to Sir Hugh Nelson.

Sir, Downing-street, 24 August, 1897.

With reference to previous correspondence respecting the British New Guinea Syndicate, I am directed by Mr. Secretary Chamberlain to transmit, for your information, copies of further correspondence with Mr. Lowles, M.P., and also copy of a despatch which has been sent to Lord Lamington on the subject of the proposals of the Syndicate.

I have, &c.,

C. P. LUCAS.

(Enclosure)

(Enclosure 1 in No. 3.)

Mr. J. Lowles, M.P., to The Under Secretary of State, Colonial Office.

Sir,

House of Commons, London, 15 July, 1897.

Referring to my previous correspondence with you and our meeting in respect of the proposed operations of the British New Guinea Syndicate, I now beg to state that, acting in accordance with the suggestion you were good enough to make, I have had several interviews with the Premier of Queensland and the Attorney-General of that Colony in respect of those proposed operations.

I am glad to be able to inform the Secretary of State for the Colonies, through you, that the Premier of Queensland has expressed to me, and through me, the corporations and gentlemen interested in the enterprise, his approval of the general principles of the suggested negotiations with the Administrator of British New Guinea. In stating this approval Sir Hugh Nelson has pointed out that the Colonial Office alone can properly request the Administrator to consider and advise on the proposals to be submitted by the agent of the Syndicate, although he (Sir Hugh) on behalf of his Government is willing to afford such countenance and assistance as he can properly and reasonably extend in the matter.

I understand from Sir Hugh Nelson that he has conveyed to you in effect the result I have now described.

I have to express the hope that the Secretary of State will be pleased to supply our agent—Sir Somers Vine—with a formal letter of introduction to the Administrator, and to ask that officer to give his best consideration to the proposals it is desired to submit to him. Sir Hugh Nelson has suggested that it might be possible and advisable to arrange a meeting with the Administrator at Brisbane in the course of October next.

I and some of the other gentlemen interested in the scheme are quite prepared to wait on the Secretary of State, should he be pleased to wish to see us.

I have, &c.,

JOHN LOWLES.

(Enclosure 2 in No. 3.)

The Under Secretary of State, Colonial Office, to Mr. J. Lowles, M.P.

Sir,

Downing-street, 9 August, 1897.

In reply to your letters of the 17th of May and the 15th of July, I am directed by Mr. Secretary Chamberlain to acquaint you that he has been in communication with the Prime Minister of Queensland on the subject of the proposals of the British New Guinea Syndicate.

Mr. Chamberlain is, of course, anxious to assist, as far as he properly can, any scheme for furthering the development of British New Guinea, and the Queensland Government are animated with the same desire.

The details of any arrangement between the Syndicate and the local Administration must, of course, be discussed and settled with the Lieutenant-Governor and the Government of Queensland, subject to the approval of the Secretary of State, but Mr. Chamberlain desires me to state at once that he could not approve of any arrangement comprehending the sections numbered 3, 4, and 5, in the basis of arrangement enclosed in your letter of the 17th of May, having the effect of limiting the powers of the Government in respect of taxation, and of conferring administrative or legislative powers on the Syndicate or its assigns.

I am to enclose an extract from a letter of Sir Hugh Nelson (p. 4), from "But it must be borne in mind" to "accrediting him to Sir W. MacGregor." I am therefore to ask that Mr. Chamberlain may be furnished with the names of the associations and gentlemen referred to in the opening paragraph of the memorandum enclosed in your letter of 17th May.

I have, &c.,

ED. WINGFIELD.

[Enclosure 3 in No. 3.]

Mr. J. Lowles, M.P., to The Under Secretary of State, Colonial Office.

Sir,

Ingram House, 165, Fenchurch-street, London, E.C., 14 August, 1897.

I beg to acknowledge the receipt of your letter of the 9th instant.

I have already heard from the Prime Minister of Queensland—with whom I and Sir Somers Vine have had several interviews—that he has been in communication with the Secretary of State, and is, like Mr. Chamberlain, anxious, as far as he properly can, to assist any scheme for the development of British New Guinea and its resources.

The British New Guinea Syndicate has from the first recognised that the details of any arrangement must be settled in the manner described in your letter, and it was with that object the subscribers invited Sir Somers Vine, who is personally acquainted with the Queensland Ministers and the Administrator of British New Guinea, to conduct the negotiations on their behalf. It has been the anxious desire of the Syndicate to hold itself clear of all governmental responsibilities as distinct from purely commercial and trading operations, and they consequently accept without question the non-approval of the Secretary of State of any arrangement comprehending sections 4 and 5 in the basis of arrangement enclosed in my letter of the 17th of May last. With respect to section 3 they, with equal readiness, accept the non-approval of the Secretary of State thereto, so long as it is clearly understood that the preliminary operations of any organised development are not totally crippled by the imposition of duties and charges which would preclude the reasonable possibility of the institutions and individuals who are ready to provide the necessary capital securing a legitimate and moderate return for their speculation and investments.

I am prepared to say, on behalf of the Syndicate, at once, that the contributing colonies shall have the power, under any form they may suggest, of approving or disapproving of the directors or others who may be appointed to locally control the Company's affairs, so long as such action is reasonably exercised, as we assume it would be, in perfect good faith and intention.

Sir Hugh Nelson's advice to us to depute an agent or agents to visit the Possession, and to lay the proposals before the Lieutenant-Governor, has been given prompt effect to by Sir Somers Vine being authorised to proceed to Australia and New Guinea, and empowered to negotiate and conclude—subject to the approval of both sides—a reasonable and business-like arrangement. His letter of instructions, drafted by Sir Charles Kennedy, approved by the Board of the Syndicate, and concurred in by Sir Somers Vine, is at the service of the Secretary of State, and a copy shall be forwarded to you if you are of opinion that the Secretary of State would like to be cognizant of its contents. I may mention here that, with the full approval of the Syndicate, I have consented to co-operate with Sir Somers Vine on the spot in the discharge of the duties entrusted to him, and leave for Australia in company with Sir Hugh Nelson on Saturday next, the 21st instant, *via* Cape Colony and Hobart.

Sir Somers Vine leaves on Friday, the 27th instant, by way of Brindisi and the Royal Mail route. I have communicated with him, and he is quite prepared to hold himself at the convenience of the Secretary of State for the Colonies on any day prior to his departure should his attendance at the Colonial Office be desired.

The Syndicate with much pleasure, comply with the very proper request of the Secretary of State, as expressed in the last paragraph of your letter.

The Syndicate at this moment comprises the following corporations and individuals:—

- (1.) The British Empire Finance Corporation (Limited), whose directors are:—
 - Hon. Sir Charles Tupper, Bart., G.C.M.G., C.B., M.P., Ottawa. (Late Prime Minister and ex-High Commissioner for Canada.)
 - Hon. Richard C. Grosvenor, Director-General, Life Assurance Company (Limited).
 - W. D. Cairney, C.A., Director, Scottish Alliance Insurance Company (Limited).
 - John Fergusson (Messrs. Ramage and Fergusson (Limited), shipbuilders, Leith), Chairman, Octagon Explorers (Limited).
 - John Lowles, M.P., Director, New Gold-fields of B.C. (Limited).
 - James McKillop, M.P., Director, James Nimmo & Co. (Limited), coalmasters, Glasgow.
 - R. J. Price, M.P., Director, Rhodesia (Limited).
 - Arthur Williamson, Director, London and Foreign Contract Corporation (Limited).
- (2.) The New Gold-fields of British Columbia (Limited), whose directors are:—
 - Hon. Sir Charles Tupper, Bart., G.C.M.G., C.B., M.P., late Prime Minister and ex-High Commissioner for Canada, Ottawa, Chairman.
 - John Lowles, M.P., Ingram House, Fenchurch-street, E.C.
 - Sir Charles Malcolm Kennedy, K.C.M.G., C.B., Exmouth.
 - G. Brooke Mee (Messrs. Mee, Billing, & Co.), 23, Leadenhall-street, E.C.
 - F. E. Harman, F.G.S., M.I.M. and M.F.C.S., 55, West Cromwell Road, S.W.
 - C. Ashworth, Esq., late London Manager of the Bank of Montreal, 60, Cranley Gardens, S.W.

(3)

- (3.) The European and Colonial Investment Syndicate (Limited), whose directors are :—
 W. H. Durrant (of the firm of Good and Durrant, Australian Merchants).
 John Crowle, Chairman of Slaters (Limited).
 R. G. Schwartz, Chairman of the Excelsior Tobacco, &c., Company.
 Sir Somers Vine, C.M.G.
 George Wright, J.P., Managing Director of the East Acton Estate Company.

The Under Secretary of State, Colonial Office, to Mr. J. Lowles, M.P.

Sir,

Downing-street, 20 August, 1897.

I am directed by Mr. Secretary Chamberlain to acknowledge the receipt of your letter of the 14th instant, respecting the British New Guinea Syndicate.

Mr. Chamberlain has forwarded copies of all the correspondence to Lord Lamington for communication to his Ministers and to Sir William MacGregor, who will therefore be prepared for the arrival of the agent of the Syndicate.

I am, &c.,
 C. P. LUCAS.

(4.)

The Secretary of State for the Colonies to The Governor of Queensland.

My Lord,

Downing-street, 20 August, 1897.

I have the honor to transmit to you for communication to your Ministers, and to the Lieutenant-Governor of British New Guinea, the accompanying correspondence respecting a syndicate formed for conducting trading, planting, and other operations in British New Guinea.

You will observe that the various corporations mentioned in Mr. Lowles' letter of the 14th instant, as interested in the Syndicate, are "financing" or "promoting" companies.

I have, &c.,
 J. CHAMBERLAIN.

(5.)

Sir Somers Vine to The Prime Minister of Queensland.

British New Guinea Syndicate.

Dear Sir Hugh Nelson,

Brisbane 22 December, 1897.

I enclose you herewith copies of memoranda I have prepared and transmitted to His Excellency the Governor, and having for their intention the further information of His Lordship and Sir William MacGregor.

We lunched with His Excellency on Sunday, when he stated that he was afraid it would be difficult for him to arrange an interview before next Monday, the 27th instant.

Believe me, &c.,
 J. SOMERS VINE.

Memorandum

Memorandum No. 1.

[Enclosure 1 in No. 5.]

20 December, 1897.

THE proposal to be first considered by the Administrator is that set out in the memorandum and supplements submitted to the Colonial Office in the summer of the present year.

It has been agreed in writing to eliminate the paragraphs Nos. 3, 4, and 5 of the suggested basis of arrangements (*vide* Colonial Office, Letter No. 15,334-97), but, in lieu thereof, the Syndicate will accept in general principle the powers contained and expressed in Appendix No. 25 of Mr. G. Seymour Fort's report, presented to Parliament in 1886.

The exclusive powers contained in this above-quoted appendix would constitute a monopoly only within the area of country to be operated upon by the Company suggested to be established. The like powers outside the operated-upon area would be exercisable by individual enterprise in common with the Company.

For all practical purposes the only general monopoly sought by the Syndicate is the right to select suitable districts. Without such a primary concession it would be hopeless to expect capitalists and investors to risk their moneys even as a pure speculation.

The nominal capital of the suggested Company has been discussed on a basis of £250,000 as a maximum and £100,000 as a minimum, with power to increase. Of this £100,000 the sum of £60,000 would be put aside to meet the requirements of clauses 1 and 2 of the basis of arrangement, the other £40,000 being applied partly to the expenses of the formation of the Company, and partly as a reserve for extended operations within the first (say) eight years.

The representation of the Governments of the Possession and of Queensland on the directorate (to the extent of one-third thereof) would be agreed and without the necessity of financial qualification by such nominated representatives.

What is desired at this stage is that the Administrator will express, in writing, to the Syndicate his willingness to recommend, with the concurrence of His Excellency the Governor of Queensland and the Government of Queensland, to the Colonial Office, subject to the consideration and settlement of details, the granting of the concession described in the papers previously and now submitted.

Memorandum No. 2.

[Enclosure 2 in No. 5.]

20 December, 1897.

AFTER the proposal to be first considered by the Administrator had been placed with the Colonial Office, and almost immediately precedent to the departure of the authorised agent of the Syndicate from England, he and Mr. Lowles, M.P., were requested to submit the following general proposal for the views of the Administrator:—

1. The whole area of the country not yet allotted or appropriated to be conceded (subject to existing agreements and rights) to the Company, by the Syndicate, for exclusive trading and commercial operations, as generally defined in the papers already submitted, and particularly set out in the Appendix No. 25 of Mr. G. Seymour Fort's report in 1886.

2. The Company to provide a sufficient sum of money to be invested in securities to be approved, to ensure a contribution to the revenue of the Government of £10,000 per annum.

3. The Government of the Possession to retain its present sources of revenue, but to transfer to the Company any surplus of revenue which may accrue in excess of an agreed annual estimate of administrative expenditure by the Government.

4. The rights of the Company hereunder to lapse at any time after twenty-five years, on its being paid the actual equivalent of its expenditure in the country, with 10 per cent. interest thereon. At any time after fifty years the rights to lapse on payment of the duly assessed then existing value of its works and property—other than land—in the country.

5. The Governments interested to be represented on the directorate in the proportion of not less than one-third of its number.

(6.)

British New Guinea Syndicate.

MEMORANDUM of proposals following Conference with His Excellency the Administrator of British New Guinea at Government House, Brisbane, on 27th December, 1897, and present thereat His Excellency the Governor of Queensland (Lord Lamington) and the Right Honorable Sir Hugh Muir Nelson (Premier of Queensland).

1. The Government by a special Ordinance concedes to the Syndicate the option of taking up within five years an area of one hundred thousand (100,000) acres of Crown lands within the territories of the Possession. Twenty-five thousand (25,000) acres or thereabout of Crown lands now available to be at the immediate option of the Syndicate after the issue of the Ordinance.

2. The Ordinance to concede the further option to the Syndicate of taking up an additional one hundred and fifty thousand (150,000) acres of land—being two hundred and fifty thousand (250,000) acres in all—within a further period of three years (being eight years in all) from the date of the Ordinance.

3. The price to be paid by the Syndicate to the Government for the land taken up shall be 1s. per acre for the twenty-five thousand (25,000) acres of land now available and at immediate option, and for all future purchases the sum of 1s. per acre plus any actual expenditure to which the Government may be put in acquiring the land so as to make it available for selection under the operation of the Crown Lands Ordinance.

The mode of payment shall be as follows, *viz.*:—25 per cent. of the purchase money to be paid in cash immediately upon the exercise of the option upon each block or area of land offered to the Syndicate, and the remaining 75 per cent. by instalments spread equally over the period during which the full option runs—*viz.*, eight years.

4. The Syndicate is to have the first option of taking any lands made available from time to time by the Government, and a reasonable period shall be defined wherein the option is to be exercised.

5. If within the period of five years from the date of the Ordinance the Syndicate fails to take up the lands made available and offered to it by the Government, then the option of the Syndicate shall lapse to the extent of the area proffered and not taken, provided always that the lands made available and proffered by the Government shall be reasonably suitable for the purposes of tropical cultivation or have afforded reasonable indications of comprising or containing mineral deposits of a marketable description.

6. At the end of eight years from the date of issue of the Ordinance the right of option exercisable by the Syndicate shall altogether lapse, if within that period the maximum area of 250,000 acres of land shall have been made available and proffered to the Syndicate, and any area up to 100,000 acres made available and proffered (in accordance with paragraph 5 hereof) within the first five years from the passing of the Ordinance, and not taken up, shall be calculated against the maximum amount of the option exercisable by the Syndicate.

7. The Syndicate shall be entitled to the full benefit of the products of the lands taken up by it whether on the soil or below it.

8. The Syndicate shall have a period of six months from the date of the Ordinance being conveyed to and placed with it wherein to exercise any or either of its options.

9.

9. The Ordinance conveying the rights shall recite that the primary objects of the Syndicate and its assigns (the larger company to be formed) are the cultivation and procurement of the rubber-plant in its various forms, and all other tropical and agricultural produce, and the acquisition of mineral and other deposits.

10. The Company to be formed by the Syndicate will include in its Articles of Incorporation the powers* set out at foot hereof, and the Ordinance conceding the rights to the Syndicate shall refer to and take note of these powers.*

(7.)

The Lieutenant-Governor of British New Guinea to The Governor of Queensland.

My Lord,

Brisbane, 28 December, 1897.

I have the honor to direct your attention to a most important point that has occurred to me in connection with the proposals of the British New Guinea Syndicate, and which it seems to me I should frankly and fairly set before your Excellency at once. To enter into a contract of the scope and kind of that now under consideration would practically be a settlement of the vexed question of Queensland employers ever obtaining plantation labourers from New Guinea. Whether the Government now gives a formal promise to the Syndicate that the available labour would not be removed from the colony, or left that to be implied, the result would probably be the same.

It would not be fair or reasonable to the Syndicate that, after they began operations in the Possession, labourers should be recruited there for Queensland.

Of course, I should regard the settlement of the contract with the Syndicate as very desirable from this point of view, because it would provide employment for a large number of natives in their own country, and it would practically render their recruitment for elsewhere impossible.

I have already stated more than once the ground on which I could not regard it as desirable that the available labourers of the Possession should be taken elsewhere. My opinion is quite unchanged; but your Excellency's Government may have other views and different interests to consider.

I have, therefore, deemed it my duty to bring this matter under your notice without delay.

I have, &c.,

WM. MACGREGOR.

(8.)

The Prime Minister to His Excellency the Governor.

Dear Lord Lamington,

Chief Secretary's Office, Brisbane, 29 December, 1897.

I have perused the draft form of agreement signed by Sir William MacGregor, as Lieutenant-Governor of New Guinea, and by Sir J. R. Somers Vine and Mr. John Lowles, M.P., for and on behalf of the British New Guinea Syndicate (Limited), and I see no objection on behalf of the Queensland Government to the agreement being approved of.

Yours very truly,

HUGH M. NELSON.

(9.)

The Lieutenant-Governor of British New Guinea to The Governor of Queensland.

My Lord,

Brisbane, 31 December, 1897.

With reference to your despatch No. 72 of 30th September, and its enclosures, I have now the honor to forward herewith a copy of the Memorandum of Agreement, which, as Administrator, I have signed with the accredited representatives of the British New Guinea Syndicate—Sir Somers Vine, C.M.G., and John Lowles, Esq., M.P., &c.

2. As the several points of this agreement have been more than once discussed in your Lordship's presence, and as you have so patiently, at the cost of considerable time and at some inconvenience, personally examined each article in detail, it is not now necessary that I should deal with the matter so minutely as would otherwise have been the case. But it may be well that I should put on record the principal considerations that have weighed with me as Administrator in coming to the decision at which I for my part arrived in respect of the agreement.

3. The undertaking of this Syndicate or Company would be on a scale sufficiently extensive to give a new and strong impetus to several economic industries, and to provide a large amount of employment to the natives of the colony in their own country. During the first three or four years of the existence of the Queen's Government in British New Guinea the natives were not sufficiently pacified to render it safe or desirable to encourage European settlement on a large scale. For some time the pacified centres were small, officers were untrained, and there was no constabulary force to protect settlers until time was had to collect and organise a sufficient number of the natives of the country for that purpose.

But during the last four or five years many districts have been quiet enough for the settlement of Europeans; the Government has been in a position to offer reasonable protection; liberal land laws have been in force, by which land has been under offer to *bonâ fide* settlers at a cheap rate; the engagement of natives as labourers has been facilitated and made easy; yet the amount of settlement effected by Europeans has been disappointingly small.

This was, perhaps, only what was to be expected if it were taken into consideration that New Guinea has the reputation of being a very unhealthy country; that it is next door to Queensland, which is a white man's country, a seller of good land on easy terms, offering a considerable local market, and with the comforts of civilisation within reach. Let it be added to this that the tropical agriculturist has had prominently before him of late years the nearer and more attractive field of Africa.

Thus, in spite of the efforts of the local Government to encourage the development of the country, the results as regards the utilisation of the soil have been disappointing. It has now become very clear that it is highly desirable to favour any reasonable scheme that would present the probability of a more speedy development than has hitherto taken place.

The

* Appendix No. 25 of Report of 1886, with sundry alterations.

The British New Guinea Syndicate seems to me to present itself opportunely as a new and different means for fostering agricultural and allied industries. Unless some encouragement is given to a company of that sort there is no apparent prospect of any great progress being made for some time in opening up and developing the agricultural resources of the country.

4. The most important clauses of the agreement are the first two. The chief concession to be made by the Crown to the Syndicate is the sale of 250,000 acres of land at the price of 2s. an acre, on deferred payments.

The principal advantage that would accrue to the colony would be from the improvement conditions, under which the Syndicate would have to expend at least 2s. an acre on the land; one-fourth of that sum within the first two years. There is now ready for settlement, and could be prepared for transfer to the Company, some 25,000 acres of land, and within twelve months from now so much land—probably 100,000 acres—could be offered to the Syndicate as would within that time open up employment for many natives from the settled districts, while it would add considerably to the imports and exports of the colony, and bring it probably near to the point at which it would be self-supporting.

I have by no means lost sight of the fact that the area to be offered to the Syndicate is a large one, and that the Government may require probably three or four years to find that amount of available and suitable land. But the larger the area and the more speedily the land is handed over to the Syndicate, so much the greater will be the utilisation of land now lying unproductive; and in like proportion so much earlier will be the expansion of trade, and of the revenue of the country.

Clearly, therefore, the Government should try to find the land at as early date as might be possible.

This is further desirable to remove obstruction to other intending settlers, to whom any lands offered to and declined by the Syndicate would be open.

5. It will be noticed that the general preferential right of selection to be given to the Syndicate will not interfere with the opening of mission stations or of trading stations.

6. The Syndicate would have an exclusive right to the minerals in or under the land, but they would pay a royalty of 2½ per cent. on the net value of the gold or any metals of the platinum group they might find.

This arrangement would no doubt lead to the thorough examination of the Syndicate's lands for mineral deposits.

7. It is understood by the Syndicate that they would be free to engage local coloured labourers, subject only to the laws and regulations regarding that matter in the colony.

It is also foreseen that the supply of local labour might be insufficient for the Syndicate's undertakings, and that it is very probable that at many points a small nucleus of more highly-trained coloured labourers might be desirable. Although it is not specifically expressed in the memorandum of agreement, the Syndicate would, should the need arise, expect that the Government of British New Guinea would be prepared to pass the necessary legislation, and to take the other steps required to enable the Syndicate, or those that become its assigns, to obtain labourers from the Solomon or other available Pacific Islands, or from India.

But these are matters that the Government would naturally have to deal with in studying the interests of settlers and planters, whether connected with a Syndicate or not. They could not, therefore, be looked upon as being in the nature of a concession.

8. I may state that, in my opinion, this agreement, if entered into definitely, and carried out with reasonable care and diligence, will prove of great advantage to the Possession.

May I be allowed to thank your Lordship and Sir Hugh Nelson on behalf of the colony for the really large amount of trouble you have taken over this matter. I feel sure the labour cannot be lost, for if this Syndicate's proposals should fall through, what has been done will facilitate negotiations with others.

I have, &c.,
WM. MACGREGOR.

[Enclosure in 9.]

British New Guinea Syndicate.

MEMORANDUM of Agreement following conference with His Excellency the Administrator of British New Guinea at Government House, Brisbane, on 27th and 29th December, 1897, and present thereat His Excellency the Governor of Queensland (Lord Lamington) and the Right Honorable Sir Hugh Nelson (Premier of Queensland).

1. The Government shall pass an Ordinance giving the Syndicate the right to take up 250,000 acres of Crown lands not yet appropriated at the price of 2s. per acre gross.

Twenty-five per cent. of the purchase money is to be paid in cash on the Syndicate exercising its right of option in respect to each several block put under offer to it, and 75 per cent. to be paid by instalments spread equally over the next subsequently eight years after the Syndicate exercises the right of option of each several block put under offer to it.

2. The Syndicate, its successors or assigns, shall be and are hereby bound to expend upon the lands passing into their possession a sum equivalent to the purchase money of the said lands—viz., 2s. per acre; 25 per cent. of which must be spent within two years of the land being acquired, and the remainder in the same proportion and within the same period as the instalments of purchase money are payable upon the said blocks.

3. The Government reserves to itself the right to give or sell land for purely mission purposes, or for any public purpose, and small areas not exceeding 10 acres (and not contiguous to any area offered to or taken by the Company) for trading or residential purposes.

4. Any pasture land taken up shall be sufficiently fenced, the cost of such fencing to be reckoned as money spent on improvements.

5. The Syndicate is to have the first option of taking any lands made available from time to time by the Government, such option to be exercised within six months from the offer being made to the Syndicate by the Government.

6. If within the period of eight years from the date of the Ordinance the Syndicate fail to take up the lands made available and offered to it by the Government, then the option of the Syndicate shall lapse to the extent of the area proffered and not taken, provided always that the lands made available and proffered by the Government shall be reasonably suitable for the purpose of tropical cultivation, or for pasture, or have afforded reasonable indications of comprising or containing mineral deposits of a marketable description.

7. The Syndicate shall be entitled to the full benefit of the products of the lands taken up by it whether on the soil or below it, but in the event of any gold or metals of the platinum group being found on such lands a royalty of 2½ per cent. on the net value shall be payable to the Government in respect thereof.

8. At the end of eight years from the date of issue of the Ordinance the right of option exercisable by the Syndicate shall altogether lapse, if within that period the maximum area of 250,000 acres of land shall have been made available and proffered to the Syndicate, but the right of option shall continue until the said 250,000 acres shall have been made available and proffered to the Syndicate. No claim at law for any shortage shall, however, lie against the Government if it shall be found impossible to complete the whole area, provided that all reasonable effort shall have been made to provide the said area of 250,000 acres.

9. The Syndicate shall have a period of six months from the date of the Ordinance being conveyed to and placed with it, wherein to exercise any or either of its options.

10. The Ordinance conveying the rights shall recite that the primary objects of the Syndicate and its assigns (the larger company to be formed) are the cultivation and procurement of the rubber plant in its various forms, and all other tropical and agricultural produce, and the acquisition of mineral and other deposits.

11. The Company to be formed by the Syndicate will include in its articles of incorporation the powers set out at foot hereof, and the Ordinance conceding the rights of the Syndicate shall refer to and take note of these powers.

1 to 10 approved. No. 11 I consider to be a matter for the Crown Law Officers to deal with.—W.M., 29/12/97.

WM. MACGREGOR,
Lieutenant-Governor,
29/12/97.

Agreed,—

SOMERS VINE, } For and on behalf of the British
JOHN LOWLES, } New Guinea Syndicate.

(10.)

The Lieutenant-Governor of British New Guinea to The Governor of Queensland.

My Lord,

Brisbane, 31 December, 1897.

With reference to my Despatch No. 83, of 31st December, I would respectfully suggest that a draft Ordinance should be prepared in the Crown Law Office here to give effect to the Memorandum of Agreement enclosed in the Despatch mentioned above.

If this could be done, much time might thereby be gained. If, however, this cannot be effected without expense to the Possession, I think the draft had better be deferred until it could be prepared by Mr. Winter.

I have, &c.,

WM. MACGREGOR.

The Hon. the Chief Secretary for favour of reply.—L. The Attorney-General.—H.M.N., 12/1/98.
The Under Secretary, Department of Justice.—H.S.J., B.C., 12/1/98. It is better that draft should be prepared in New Guinea.—T.J.B., 20/1/98. The Secretary, Prime Minister.—W.G.C., 20/1/98.
H.M.N., 1/2/98.

(11.)

The Lieutenant-Governor of British New Guinea to The Governor of Queensland.

My Lord,

Union Club, Brisbane, 17 February, 1898.

With reference to my Despatch No. 84, of 31st January, 1898, I have now the honor to submit the draft of an Ordinance to give effect to the Agreement between the Government of the Possession and the British New Guinea Syndicate.

2. Should your Lordship be able to convey to me your sanction to this measure before I leave Thursday Island, I should be in a position to pass it into law at Daru, during my inspection of the Western district, on the arrival there from Port Moresby of His Honor F. P. Winter.

I have, &c.,

WM. MACGREGOR.

The Honorable the Chief Secretary.—L. H.M.N., 23/2/98.

[Enclosure in No. 11.]

(Confidential.)

BRITISH NEW GUINEA.

No. of 1898.

AN ORDINANCE

(Enacted by the Administrator of British New Guinea with the advice and consent of the Legislative Council thereof)

To enable certain persons to acquire and occupy Crown Lands not exceeding in the aggregate two hundred and fifty thousand acres in area, and for other purposes subsidiary thereto.

Preamble.

WHEREAS an association of certain corporations and persons has been formed under the name or style of "The British New Guinea Syndicate" for the purpose amongst other things of acquiring and occupying Crown lands in the Possession of British New Guinea, and the cultivation thereon, and procuring therefrom, of the rubber-plant in its various forms, and of all other tropical and agricultural produce, and for the purpose of exploring and opening up such Crown lands, and for the purpose of discovering, working, and developing mines and mineral deposits thereon, and of getting and winning gems, metals, minerals and mineral ores therefrom: And whereas the said British New Guinea Syndicate has duly made application to be permitted to so acquire and occupy, with the objects aforesaid, such Crown lands not exceeding in the aggregate two hundred and fifty thousand acres in area: And whereas the terms, conditions, and stipulations upon which the said British New Guinea Syndicate should be permitted to so acquire and occupy such Crown lands have been provisionally agreed to by and between the said British New Guinea Syndicate and the Administrator of British New Guinea by a Memorandum of Agreement dated at Brisbane, in the Colony of Queensland, on the twenty-ninth day of December, one thousand eight hundred and ninety-seven: And whereas it is desirable that the said British New Guinea Syndicate should be permitted to acquire and occupy Crown lands in the Possession of British New Guinea, not exceeding in the aggregate two hundred and fifty thousand acres in area, with the objects aforesaid, and that for this purpose effect should be given to the said Memorandum of Agreement: Be it therefore enacted by the Administrator of British New Guinea, with the advice and consent of the Legislative Council thereof, as follows:—

Short title.

1. This Ordinance may be cited as "The British New Guinea Syndicate [or Company] Ordinance of 1898."

Interpretation.

2. In this Ordinance, unless the context otherwise requires, the following terms shall have the meanings set against them respectively, that is to say:—

The Company.

"The Company"—The association of corporations and persons known as "The British New Guinea Syndicate," their lawful assigns or successors in interest.

Suitable lands.

"Suitable Lands"—Lands of the Possession available for occupation by the Company, and reasonably suited for agricultural or pastoral purposes, or affording reasonable indications of the existence therein of mineral deposits of commercial and marketable value.

Right to acquire lands.

3. Subject to the provisions of this Ordinance, the Company shall be entitled to obtain from Her Majesty an estate in fee-simple in suitable lands not exceeding in the aggregate two hundred and fifty thousand acres in area, and the Administrator in Council may from time to time sell such lands to the Company.

Lands available for purchase.

4. The Company shall, for the period of six months and no longer after the date of the passing of this Ordinance, have the sole right to purchase under the provisions of this Ordinance the whole of or any suitable lands which have heretofore been declared to be and which still remain available for occupation:

Save, as hereinafter provided, when and so often as any suitable lands are declared to be available for occupation, the Company shall, for the period of six months and no longer after the date on which such lands were respectively declared to be so available, have the sole right to purchase the whole or any of such lands under the provisions of this Ordinance until the Company has purchased lands amounting in the aggregate to two hundred and fifty thousand acres in area.

5.

5. If during the period of eight years from the date of the passing of this Ordinance suitable lands amounting in the aggregate to at least two hundred and fifty thousand acres in area have been from time to time available for purchase by the Company under the provisions of this Ordinance, but the Company has not at the expiration of that period purchased the total area of land which the Company is entitled to purchase, then the Company shall no longer have the sole right to purchase any lands then available or thereafter made available for occupation. Limitation of right of purchase.

But if during that period lands amounting in the aggregate to at least two hundred and fifty thousand acres in area have not been from time to time available for such purchase, then the Company shall continue to have the sole right, subject to the provisions of this Ordinance, to purchase any suitable lands then available, or thereafter made available for occupation, until such time as the Company has purchased the total area of land which the Company is entitled to purchase. Unless suitable lands have not been available.

6. Nothing in this Ordinance shall be construed to give or confer upon the Company any right of action for damages or compensation, or as for breach of contract or otherwise howsoever, by reason of any failure or inability to declare any land to be available for occupation under the provisions of this Ordinance, or to declare a sufficient area of land to be so available, or by reason of any default or delay in declaring any land to be so available. Company to have no claim for damages, &c.

7. The price to be paid by the Company as the purchase money for all lands purchased under the provisions of this Ordinance shall be at the rate of two shillings for every acre thereof. Purchase money.

8. When and so often as the Company desires to purchase any lands under the provisions of this Ordinance, the Company shall make an application for the purpose to the Government Secretary in such form as the Administrator in Council approves. Company to make application for lands.

The Company shall with every such application pay to the Government Secretary a part of the purchase money equal to sixpence for every acre of land comprised in such application. Deposit.

9. When the Company has made application for any suitable lands, and has paid the part of the purchase money hereinbefore required to be paid with such application, the Company shall be entitled to obtain from the Administrator a provisional grant of such lands in such form as may be directed by the Administrator in Council. Provisional grant to issue.

Every such provisional grant shall be prepared in duplicate, one copy of which shall be recorded by the Registrar-General in the manner in which instruments are directed to be recorded under "The Real Property Ordinance of 1889," and the other copy shall be given to the Company on the payment of such fees as would be payable for the issue of a Crown grant.

Upon the issue of such provisional grant, or upon receipt from the Government Secretary of a letter authorising the Company to take possession of any land, the Company shall be entitled forthwith to enter into possession of the lands comprised in such grant or in such letter.

10. The residue of the purchase money of lands granted to the Company shall be paid to the Government Secretary in eight annual instalments, each equal to twopence farthing for every acre of land comprised in a provisional grant or letter as provided in the last preceding section. Residue of purchase money.

11. During the period of eight years next after the issue of a provisional grant or letter as aforesaid for any lands to the Company, the Company shall be required to expend in *bona fide* improvements upon the lands comprised in such grant or letter a sum equal to two shillings for every acre of such land; and the Company shall be required to expend such moneys within the times following, that is to say—

During the period of two years next after the issue of the provisional grant of such lands, a sum equal to sixpence for every acre of the lands;

During each of the next succeeding six years, a sum equal to threepence for every acre of the lands.

12. The Administrator in Council may, if he thinks fit at any time so to do, extend for any period not exceeding one year, the time hereinbefore limited for the payment of any purchase money or the execution of any improvements under the provisions of this Ordinance. Improvements.

13. The Company shall be required to enclose all lands suitable for pastoral purposes granted to the Company with a good and substantial fence. Such fence shall be erected during the period hereinbefore limited for the execution of improvements, and the moneys expended in erecting the same shall be deemed to be moneys expended upon improvements within the meaning of the last preceding section. Extension of time.

14. When all the conditions and stipulations hereinbefore mentioned have been complied with by the Company with respect to any lands, the Administrator in Council shall, on the surrender of the provisional grant of such lands, order the issue of a Crown grant for the lands. Fencing pasture lands.

No fee shall be charged for the issue of a Crown grant under this section.

15. If the Company, at the expiration of any period hereinbefore limited for the payment of any purchase money, or the execution of any improvements by the Company, or at the expiration of any extended period as by this section provided, has not paid such purchase money or executed such improvements, then the whole or any part of the lands in respect of or upon which such purchase money ought to have been paid, or such improvements ought to have been executed, may forthwith, without re-entry or other proceeding whatsoever, by or on behalf of Her Majesty, be absolutely forfeited. Issue of grant.

16. Notwithstanding the provisions of "The Crown Lands Ordinance of 1890," or of any Ordinance amending or in substitution for the same, and notwithstanding the provisions of any Ordinance in force for the time being relating to mining, upon the issue of a provisional grant of any lands, the Company shall have the sole property in all products of the lands so granted, and especially shall have the sole property in all mines and mineral deposits thereon or therein, and shall, without payment of any fee or other sum of money other than the moneys hereinbefore required to be paid and expended by the Company and the royalty hereinafter mentioned, be the sole persons entitled to dig for, win, take, and acquire in and from the lands so granted all gems, metals, minerals, and mineral ores: Property in products of the lands; mining.

There shall be payable to Her Majesty a royalty of two pounds ten shillings for every one hundred pounds of the net value of all gold and metals of the platinum group won, taken, or acquired by the Company from the lands granted under the provisions of this Ordinance. Royalty on gold, &c., to be paid.

17. The Company may from time to time let the lands or any part thereof granted to the Company under the provisions of this Ordinance. Power to let.

During the period of such letting the person to whom the same are let shall, so far as the letting extends, have the same rights, powers, and privileges, and be subject to the same duties, obligations, and penalties as the Company has and are subject to.

18. To secure the payment of any money borrowed by the Company for the purposes of purchasing, acquiring, or developing the lands or any of them granted to the Company under the provisions of this Ordinance, the Company may from time to time issue debentures or give and execute mortgages or other charges or securities of or over such lands or any part thereof. Such debentures or securities shall be in such form and contain such provisions as the owners think expedient and the Administrator in Council approves. Power to mortgage.

19. The Company may from time to time assign or transfer to any person all or any the rights, powers, privileges, authorities, and concessions, which the Company has or may exercise under the provisions of this Ordinance; and also all or any right, title, and interest of the Company with respect to or in or over any lands granted under the provisions of this Ordinance. Upon every such assignment or transfer, the assignee or transferee shall, so far as the assignment or transfer extends, have the same rights, powers, and privileges, and shall be subject to the same duties, obligations, and penalties as the Company has and are subject to: Power to transfer rights, &c.

Provided that no assignment or transfer under the provisions of this Ordinance to any corporation or joint stock company shall be valid unless or until such corporation or joint stock company has been duly registered in some part of Her Majesty's dominions, in accordance with the laws in force therein with respect to companies, nor unless the objects or some of the objects for which such corporation or joint stock company is established are stated in the memorandum of association thereof to be as follows, that is to say—

- (a) To purchase lands, rights, privileges, concessions, and titles to land in the Possession of British New Guinea which have been acquired under the provisions of "The British New Guinea Syndicate [or Company] Ordinance of 1898" by the British New Guinea Syndicate, at and for the sum of _____ pounds; and to deliver to the said Syndicate in full payment of such purchase, paid-up shares in the capital of this Company, for distribution *pro rata* among the members for the time being of the said Syndicate, in accordance with the terms of an agreement dated _____, one thousand eight hundred and _____. To apply to the Administrator in Council of the said Possession from time to time for further suitable lands in the said Possession. To negotiate for the purchase of any lands in the possession of natives or others within the said Possession as may from time to time be deemed necessary to the purposes of the Company, and, agreeing upon the terms thereof—subject in all such cases to the approval of the said Administrator in Council being first obtained—to purchase, pay for, and take possession of the same. Objects of company to be stated.

(b)

- (b) To cultivate, farm, sell, rent, lease, exchange, or parcel out for allotment any portions of the lands of the Company, and to erect farm cottages, homesteads, factories, machinery, and buildings thereupon. To fence in and use any lands of the Company for agricultural or other purposes. To employ native or other labour. To co-operate with native or other inhabitants of New Guinea for the cultivation and growth of rubber, gain, sugar, tobacco, beet, and other like plants or cereals, and to supply seeds or plants for the purpose thereof upon such terms as to profit as may be from time to time arranged.
- (c) To plan and erect, or aid in the work of erecting, suitable dwellings for workpeople on the lands of the Company. To construct, or aid in the construction of, roads, canals, drains, or other surface works necessary to the lands and the purposes of the Company, both within and, by agreement, outside the boundaries of such lands. To purchase, construct, or aid in the construction of, carts, waggons, boats, barges, sailing or other vessels, or machinery for the transit and transhipment of materials, live stock, or other freight for use of the Company or others, either by sea or land. To construct, or aid in the construction of, sea or river defences, harbours, and wharfares to and upon any sea or river frontage bordering the lands of the Company, or contiguous thereto.
- (d) To buy, sell, breed, and keep horses, cattle, sheep, or other animals; to buy and sell timber or any other native product or deposit of the said Possession, and to manufacture the same into articles of commerce; to buy, import, manufacture, and sell building materials, mining, farming, and other implements, minerals, waggons, and machinery; and to export, sell, trade, or barter therein, and in the produce of the lands of the said Possession.
- (e) To erect trading establishments, store-houses, and farm buildings upon the lands of the Company; to purchase, manufacture, and trade in stores of all kinds, including coals, seeds, implements, tools, and all such other articles and materials as may be and are usually necessary for domestic, agricultural, or manufacturing purposes.
- (f) To erect, or aid in the erection and support of, agricultural and industrial schools adjacent to the trading establishments of the Company, and to employ European teachers in connection therewith.
- (g) To construct, purchase, or rent premises for the purposes of the Company, and to sell, sublet, or exchange such premises or any parts thereof.
- (h) To mine and develop any drifts or deposits of gold, or other precious metals, lead, tin, copper, antimony, nickel, bismuth, coal, or other minerals or gems; dig and quarry stone, brickearth, clay, or other deposits discovered within the lands of the Company; to erect buildings, machinery, and appliances for mining, and, by agreement, to acquire water-way rights, easements, or other privileges necessary to such purposes, or any of them, outside the boundaries of such lands; to rent or lease mineral properties within the said Possession; to explore, develop, furnish, maintain, and equip such properties with all necessary appliances, and to carry on the business of a mining, reducing, and smelting company.
- (j) To grant leases or take-notes for mining purposes in or over any of the lands of the Company, either at dead-rents or royalties, or both, as may be agreed upon; to accept paid-up shares or debentures in other companies as consideration for granting such leases or take-notes, and to hold, sell, or otherwise dispose of such debentures or shares as may be deemed expedient.
- (k) To purchase and erect on the lands of the Company, buildings, machinery, and all necessary appliances for refrigerating meat, and to carry on the business of purveyors of preserved meat, for sale or for exportation.
- (l) To carry on the business of land and financial agents; to act as brokers or agents, either separately or in conjunction with others, in the promotion and issue of any loan or loans of money which may hereafter be borrowed by the Government of British New Guinea in Great Britain; and to undertake, on commission or otherwise, any other agencies which may be conveniently conducted with the Company's business; to establish agencies in Great Britain for promoting emigration to the said Possession; to make advances of money on security, or afford assistance to intending emigrants thereto; and to aid in locating and, if practicable, in providing work and labour for immigrants introduced by the Company into the said Possession.
- (m) To apply for grants of land from the said Administrator in Council by way of subsidy for each statute adult introduced into the said Possession by the Company; to apply for like grants of land for each trading establishment and for each agricultural and industrial school built and opened by the Company; and also to apply for such like grants in consideration of any outlay in roads, works, or erections in the Colony which, in the judgment of the said Administrator in Council, may be deemed permanently advantageous to the trade and growth of the said Possession.
- (n) To apply, from time to time, for grants or loans of money from any public fund voted by Her Majesty's Parliament in aid of immigration, colonisation, or colonial land improvements.
- (o) To borrow on debentures or other securities, and take up moneys at interest for the purposes of the Company to the extent of one-fourth of the subscribed capital of the Company: to pay off the same, and, if necessary, in like manner to re-borrow from time to time as the directors may consider essential to its interests.

20. Nothing in this Ordinance shall be construed to prevent or limit or take away the power of the Administrator in Council from at any time issuing grants in fee-simple—

- (a) Of any lands for any public purpose;
- (b) Of any lands to any person in trust for any mission body for religious purposes;
- (c) Of any lands for trading or residential purposes not exceeding ten acres in area in any grant, and not contiguous to any lands granted to or applied for by the Company.

(12.)

The Chief Secretary to His Excellency the Governor.

Chief Secretary's Office, Brisbane, 24 February, 1898.

THE Chief Secretary submits his duty to your Excellency, and, in returning Sir William MacGregor's Despatch No. 10 of the 17th instant, with enclosed draft of an Ordinance to give effect to the Agreement between the Government of British New Guinea and the "British New Guinea Syndicate," has the honor to recommend that your Excellency's sanction be given to the introduction of the Ordinance in the Legislative Council of the Possession.

Sir William MacGregor's Despatches Nos. 83 and 84, both dated 31st December, 1897, are also returned herewith.

HUGH M. NELSON.

(13.)

The Lieutenant-Governor of British New Guinea to The Governor of Queensland.

My Lord,

Daru, 21 March, 1898.

I have the honor to forward herewith six signed and sealed copies of an Ordinance, No. 1 of 1898: To enable certain persons to acquire and occupy lands not exceeding in the aggregate 250,000 acres in area, and for other purposes subsidiary thereto. This Ordinance was approved in your despatch of 24th February, 1898, and it has been passed without material alteration.

2. Would your Lordship be so good as to intimate to Sir Somers Vinc, by cablegram, that the Ordinance has been passed.

3. I shall post for that gentleman, direct from Thursday Island, copies of the Ordinance as passed by the Council. The *Gazette* copies will not be published for some little time, until the papers are returned to Port Moresby.

I have, &c.

WM. MACGREGOR.

Read and returned.—H.M.N., 13/4/98.

[Enclosure

[Enclosure in No. 13.]

See Enclosure in No. 11.*

*NOTE.—The only difference between the Draft Ordinance and the signed and sealed copy is the insertion in section XI, after the words "During the period of two years next after the issue of the provisional grant," of the words "or letter aforesaid authorising possession to be taken."

(14.)

The Prime Minister of Queensland to The Prime Ministers of New South Wales and Victoria.

Sir, Chief Secretary's Office, Brisbane, 19 April, 1898.

I have the honor to enclose, for the information of the Government of New South Wales, a signed and sealed copy of Ordinance No. 1 of 1898, British New Guinea, to enable certain persons to acquire and occupy lands not exceeding in the aggregate 250,000 acres in area, and for other purposes subsidiary thereto.

I have, &c.,
THOMAS J. BYRNES.

(15.)

Telegram from Mr. J. Lowles, M.P., to The Governor of Queensland.

London, 14 April, 1898.

INFORM MacGregor we proceed directly Colonial Office approved.

LOWLES.

T.J.B.—18/4/98.

(16.)

The Prime Minister of Victoria to The Prime Minister of Queensland.

Sir, Premier's Office, Melbourne, 25 April, 1898.

I have the honor to acknowledge, with thanks, the receipt of your letter of the 19th instant, furnishing me with a signed and sealed copy of Ordinance of British New Guinea No. 1 of 1898.

I have, &c.,
GEORGE TURNER.

(17.)

Paraphrase of Telegram from The Agent-General for Queensland to The Chief Secretary.

London, 7 May, 1898.

NEW GUINEA Syndicate has made preliminary payment of £1,000.

(18.)

The Chief Secretary to His Excellency the Governor.

Sir, Chief Secretary's Office, Brisbane, 10 May, 1898.

I have the honor to inform you that I received yesterday from the Agent-General for the Colony a telegram, dated London, 7th instant, of which the following is a paraphrase:—

"New Guinea Syndicate has made preliminary payment of one thousand pounds sterling."

I now beg to recommend that an intimation to the above effect be conveyed to His Excellency the Lieutenant-Governor of British New Guinea.

I have, &c.,
For the Chief Secretary,
JAMES R. DICKSON.

(19.)

Mr. J. Lowles, M.P., to The Governor of Queensland.

London, 6 May, 1898.

INFORM MacGregor Ordinance settled. Paid Agent-General £1,000.

LOWLES.

(20.)

The Prime Minister of Victoria to The Prime Minister of Queensland.

Sir, Premier's Office, Melbourne, 11 May, 1898.

I have the honor to forward herewith, for your perusal, an excerpt from *The Age* of yesterday, respecting certain land concessions said to have been made by His Excellency the Lieutenant-Governor of British New Guinea to a British syndicate.

I shall be glad to be favoured with an expression of your views on the subject.

I have, &c.,
GEORGE TURNER.

[Enclosure in No. 20.]

(From *The Age*, 5 May, 1898.)

A NEW GUINEA CONCESSION.

FAVOURING BRITISH EXPLOITERS—AN AMAZING MONOPOLY.

SOME little time ago attention was called in *The Age* to certain negotiations that were in progress between Sir J. Somers Vine, of Imperial Institute fame, as representative of a British syndicate, and Sir William MacGregor, Administrator of British New Guinea, for extensive land concessions in British New Guinea. It was pointed out that ever since British control had been established over part of New Guinea Australian enterprise in this direction had been severely discouraged, if not absolutely blocked, by the stringency with which all proposals to develop the resources of the island were treated, whilst the apparent tendency was to favour British exploiters. Now we learn that the syndicate negotiator has met with amazing success in his dealings with the Administrator, for an Ordinance published in a recent *British Papua Government Gazette* announces that an agreement has been completed between the representative of the British syndicate and the Administrator for the sale of no less an area than 250,000 acres of land to the Syndicate, on terms which cannot fail to astonish and excite resentment, especially in the Australian Colonies, which pay so handsomely for the retention and government of southern New Guinea as a British possession.

The

The favoured syndicate is to have the 250,000 acres in fee-simple for 2s. per acre, on condition that they spend a further 2s. per acre on improvements within eight years. Queensland, New South Wales, and Victoria did not contemplate such a sacrificial disposal of the territory when, in order to secure it as belonging to the Australasian sphere, they agreed to pay between them £15,000 a year towards the cost of its government. But the ridiculous nominal value placed on the land is not the most extraordinary feature of the transaction. The application made and granted was not for a particular area of 250,000 acres, but for whatever available area or areas the Syndicate may covet after due inspection and appraisal. Still more remarkable—the Syndicate is not bound to select the land at once, but is given eight years in which to pick the eyes out of the Possession! It receives a monopoly of selection against all comers.

Whatever claim the humble and self-reliant prospector from an Australian colony might have, as soon as the land he desires, and which he, perhaps, has explored and discovered at the risk of his health and life, is available for occupation, the much-favoured company can calmly step in and take possession of it at the rate of 2s. an acre, whatever the other man's offer for the same selection might be. And with the land goes under this agreement the right to all mineral deposits found thereon. If, therefore, a prospector should happen on a large mineral deposit, or find a great gold-field, the Company can again step forward and peg out the whole lot at 2s. per acre. Furthermore, it is agreed that if at the end of those eight years the Papuan Government have not declared available a total of 250,000 acres, the privilege of priority held by the Syndicate will continue until the required area is thrown open. Accordingly, the interesting *status quo ante* of monopoly will very likely continue at the end of the eighth year, and the Syndicate be enabled to still reap where others have sown, at the rate of 2s. per acre.

In the Ordinance mentioned, the Syndicate sets forth its plans and intentions. It will occupy Crown lands and "take rubber therefrom"; explore and open up Crown lands; discover, work, and develop mines and mineral deposits thereon; and get and win gems, metals, minerals, and mineral ores. Also, they propose to carry on business as land and financial agents, to act as brokers, or agents, either separately or in conjunction with others, in the promotion and issue of loans which hereafter may be borrowed by the Government of British Papua in Great Britain. They will lend money to settlers, obtain land subsidies from the Government for every adult introduced, on commission; apply for a share of subsidy granted by the Imperial Government to promote colonisation; borrow on debentures, acquire more land from the natives (with the permission of the Administrator), grant mining leases, acquire shares, refrigerate meat, erect buildings; buy, sell, breed and keep horses, cattle, sheep, or other animals; buy or sell timber, buy or sell farming and mining implements, build boats, construct waggons and barges, sea and river defences, harbours and wharves. But, however hard this monopoly may press on other commercial or agricultural settlers, it is the clause in the Agreement relative to mining that needs special attention:—

"Notwithstanding previous legislation relating to mining, or any amendment thereof, upon the issue of a provisional grant, the Syndicate shall have the sole property, in all the products of the lands so granted, and especially shall have the sole property in all mines and mineral deposits thereon or therein, and shall without payment of any fee or other sum of money other than the 2s. per acre (6d. is sufficient to obtain the provisional grant and a monopoly of the minerals) be the sole person entitled to dig for, win, take, and acquire from the lands so granted all gems, metals, minerals, and mineral ores. A royalty of £2 10s. for every £100 of the net value of all gold and metals of the platinum group won must be paid to the New Guinea Government. The Syndicate has the right to sublet its lands, mines, or rivers, and to issue debentures, give mortgages, &c."

The position has been summed up as follows:—The Syndicate undertakes absolutely no responsibility whatever in exchange for a vast monopoly, which allows them to comfortably sit down, keep their hands in their pockets, and their purse out of danger, while badly-equipped private individuals roam the country, risking health and money in the exploration of the unknown interior. Then, should the pioneer's persistency and courage meet with success, and he returns with the news of a great mineral find, perhaps the Syndicate solemnly arises and acquires the choice morsel for 2s. an acre. And an acre might be worth a fortune. And so, without risk or work, they will utilise the achievements of other men, and propose literally to live on the sweat and blood of the pioneer and prospector. A more effectual way to frighten off genuine settlers could not have been discovered.

(21.)

Telegram from The Prime Minister of New South Wales to The Prime Minister of Queensland.

Sydney 18 May 1898.

CONFIDENTIAL Ministers strongly condemn provisions of Agreement with Land Syndicate We propose to do all in our power to prevent the completion of the transaction but before doing anything would like your views.

G. H. REID.

(22.)

The Chief Secretary to The Deputy Governor.

Sir,

Chief Secretary's Office, Brisbane, 20 May, 1898.

It will doubtless have come under your notice that considerable popular excitement exists both in the southern colonies and in Queensland in regard to the concessions granted by the Government of British New Guinea to the British New Guinea Syndicate, which are embodied in the Ordinance, of which signed and sealed copies accompanied Sir William MacGregor's despatch to His Excellency Lord Lamington, of date 21st March last. On the 16th instant a letter was received by me from Sir George Turner, enclosing an extract from the *Age* newspaper, in which the concessions in question were referred to, and asking for an expression of the views of this Government on the subject; and on the 18th instant Mr. Reid telegraphed that the Government of New South Wales strongly condemned the provisions of the agreement entered into with the British New Guinea Syndicate, that they proposed to do all in their power to prevent the completion of the transaction, but that before doing anything they would like an expression of the views of this Government in the matter.

Upon examining the papers connected with this subject, I find that the provision of Clause 20 of the Amended Proposals for the Administration of British New Guinea, as set forth in the Second Schedule to "*The British New Guinea (Queensland) Act of 1887*," which requires that the Government of Queensland shall consult the Governments of the other contributing colonies in all matters other than those of ordinary administration, has apparently, in this instance, not been complied with. Sir Hugh Nelson, who was Prime Minister at the time when the negotiations between Sir William MacGregor and the Syndicate were concluded, may possibly be able to throw some light on this particular phase of the subject, but, as you are aware, he is at present in New Guinea, and is not expected to return to Queensland until early next month.

Under the circumstances, it would appear exceedingly desirable that steps should be taken to delay the final completion of the Ordinance under which the concessions to which exception is taken are made, and I would therefore ask you to be good enough to communicate by telegraph with the Right Honorable the Secretary of State for the Colonies, asking him, for the reasons above stated, to advise Her Majesty to withhold Her assent in the meantime to the Ordinance in question.

I have, &c.,

For the Chief Secretary,

JAMES R. DICKSON.

(23.)

15

(23.)

Telegram from The Chief Secretary to The Prime Ministers of New South Wales and Victoria.

Brisbane 20 May 1898.

Re British New Guinea Syndicate it does not appear from papers connected with matter that requirements of Clause 20 of Amended Proposals for Administration of British New Guinea have in this instance been complied with but Sir Hugh Nelson who was Premier when negotiations between Sir William MacGregor and Syndicate were concluded and who might throw some light on this matter is now absent in New Guinea. It would therefore appear desirable to await his return before taking further steps but I have asked Deputy-Governor to telegraph Secretary of State requesting him to advise Her Majesty to withhold assent to Ordinance in the meantime.

For the Chief Secretary,
JAMES R. DICKSON.

(24.)

Paraphrase of Telegram from The Chief Secretary to The Agent-General.

Brisbane 20 May 1898.

CONSIDER it desirable to advise that public opinion excited at concessions made to New Guinea Syndicate. It does not appear from documents dealing with subject that Governments of New South Wales Victoria consulted with in accordance with clause 20 Amended Proposals Administration New Guinea Nelson who might throw light on this phase of subject out of the colony. As Governments referred to threaten to oppose completion of transaction I have asked Deputy-Governor communicate with Secretary of State for the Colonies by telegraph requesting that assent of Her Majesty be withheld in the meantime.

(25.)

Telegram from The Administrator of the Government to The Secretary of State for the Colonies.

Brisbane 20 May 1898.

WITH reference to British New Guinea Ordinance enclosed in Despatch No. 19 5th April my Government requests me to inform you that as far as can be ascertained Governments of New South Wales and Victoria were not consulted with respect to terms of contract with Syndicate prior to Governor of Queensland giving directions for introduction of Ordinance by Lieutenant-Governor of British New Guinea as required by provisions of clause 20 British New Guinea amended proposals Government of New South Wales Government of Victoria now remonstrated strongly Nelson who was then Prime Minister now absent from the colony. My Government requests that question of exercise of power of disallowance may be reserved until there is an opportunity for all three Governments expressing opinion on Ordinance for consideration of Her Majesty's Government.

(26.)

The Prime Minister of Victoria to The Prime Minister of Queensland.

Sir,

Premier's Office, Melbourne, 17 May, 1898.

In continuation of my letter of the 11th instant, No. 1,744, relative to certain concessions of land in New Guinea made to a syndicate, I now beg to enclose further newspaper cuttings on the subject, and to state that I shall be glad to be furnished with full particulars of the matter.

I have up to the present time received no official intimation of the concessions, which, if the reports be true, are of a very important and extensive character, and of such a nature as would, I should have thought, have formed a fitting subject for consultation amongst the contributing colonies before any engagements were made by the Lieutenant-Governor.

I have, &c.,

GEORGE TURNER.

[Enclosure 1 in No. 26.]

(From *The Age*, 11 May, 1898.)

ONE is obliged to rub his eyes over the special New Guinea article published in *The Age* of yesterday, and to ask himself whether the Imperial Government is going back to the colonial policy of 300 years ago, when it sought to settle America by the establishment of huge landed monopolies. The concessions made to the British syndicate, engineered by Sir J. Somers Vane, amount to the shutting up of New Guinea against the pioneering settler for the next two or three decades. The policy pursued is one evincing the most incredible mapatude, when viewed from the colonising standpoint. Ordinary settlers and pioneer explorers have been virtually warned off New Guinea by the Imperial Administration there of Sir William MacGregor. There have been rumours of gold discovery, and enterprising people would have penetrated the island and tested the land; but, instead of this being favoured, discouragements have been thrown in the way. In a single word, white settlement is not wanted from the colonies. The General Administrator makes his annual report and furnishes copies to all the colonies in return for the £15,000 a year furnished to him; but beyond that he stands as much aloof from Australia as if he were a subject of the Grand Lama or a denizen of some frozen island off the Siberian Coast. For the pleasure of hearing once a year that a few British officials in New Guinea draw their salaries and endeavour to teach the Papuans the advisability of burying their enemies rather than eating them, the Victorian taxpayers pay £5,000 per annum. The money has never been begrudged so far, because the settlement was undertaken in order to prevent the island falling into the hands of hostile foreigners.

But this new departure of handing that island virtually over to a company of monopolistic exploiters will excite very different feelings in the bosoms of our colonists. The recent official Ordinance promulgated by Sir William MacGregor gives to a British syndicate the right to absorb every acre of land which may be declared open for settlement for the next eight years, to the extent of 250,000 acres; and as it is very unlikely that that area will be proclaimed, it virtually shuts out every private and individual settler. The terms of the new agreement are all in favour of the Syndicate, and all against the public. The land is to be sold in fee-simple for 2s. per acre, together with every mineral it may contain. The Syndicate must spend 2s. per acre in improvements; but it need not take the land in blocks, but may pick the "eyes" out of the island; and should a rich gold-field be discovered anywhere, the Syndicate may peg it all out and claim it as a private possession, even though it were worth hundreds of millions sterling. In fact, no private enterprise can find any footing alongside this gigantic monopoly created by Sir William MacGregor. The Syndicate means to settle and work the land, sell the same, prospect for minerals, and warn everybody else off. It will exist without responsibility, being able to take or leave the land as it pleases, and spend or not spend, with almost sovereign rights over the land. It is, in fact, a great contrivance for retarding the free settlement of New Guinea, and handing over a virtual appanage of Australia into the hands of a rigid monopoly. The colonies have, perhaps, no legal power of preventing the consummation of this disastrous policy; but they hold the power of the purse, and it ought not to require any hesitation as to what the contributing colonies will do in the face of this monopolistic Ordinance. Sir George Turner might at once communicate with Queensland and New South Wales with a view to joint action in withdrawing from any further subsidy after the year 1898. It is impossible that Victorians will consent to pay for the maintenance of an establishment which seeks to set up in British territory, at the end of the century, one of these petty trading sovereignties like the East India Company, which a couple of centuries ago were tolerated only for the lack of a more efficient means of colonisation.

[Enclosure

[Enclosure 2 in No. 26.]

(From *The Age*, 11 May, 1898.)

THE Premier's attention has been attracted by the description published in *The Age* of yesterday of the astonishing transaction by which an enormous area of land in British New Guinea has been granted to an English syndicate on nominal terms, with conditions constituting a close monopoly. As Victoria is a contributor to the cost of administering British New Guinea, this colony has a right to say something about administration carried on in this fashion. The colonial subsidy is about £15,000 per annum, of which Victoria this year pays £5,000. Victoria has so little interest in, or benefit arising from, the New Guinea administration that the Premier recently proposed to withdraw our contribution altogether, and it was only after a consultation with Sir Hugh Nelson, the Queensland Premier, and Sir William MacGregor, Administrator of British New Guinea, that he consented to wait the result of some negotiations with the Imperial Government on which Sir William MacGregor has gone to England. If British New Guinea is to be exploited in this style, however, the Victorian Premier will be less inclined than ever to continue the subsidy. Official communication between New Guinea and the southern colonies is conducted through the Queensland Government, and Sir George Turner will make inquiries of the Queensland Premier to ascertain more particularly the circumstances of this land transaction.

[Enclosure 3 in No. 26.]

(From *The Age*, 16 May, 1898.)

THE NEW GUINEA CONCESSION.

WAS THE GOVERNMENT CONSULTED?

It cannot be too strongly urged upon the Governments of Victoria and New South Wales that it is their duty to interfere to prevent the realisation of the project for the exploitation of New Guinea by a so-called "British" syndicate. Further inquiry into the matter has shown that *The Age*, in the article the other day describing the nature of the concession, has unearthed what looks like a very ugly scandal. The purely commercial and utilitarian aspect of the transaction in the practical handing over a vast territory to a huge monopoly would warrant a vigorous protest on the part of the colonies that have for over ten years contributed to the maintenance of British New Guinea. But the affair has a political, and possibly an international, significance that raises it above mere considerations of settlement and trade, and demands the serious attention of those responsible for the well-being of Australia.

The agreement between this highly favoured Syndicate and the Lieutenant-Governor of New Guinea, Sir William MacGregor, provides for the transfer to the former of 250,000 acres in fee-simple for 2s. per acre, on condition that a further sum of 2s. per acre be spent on improvements within eight years. No particular area is defined. Sir William MacGregor has virtually said: Go and pick out any land you like; it need not be in one piece, but you can select the choicest spots you can find in any part of the colony. What is more extraordinary, the Syndicate is not bound to choose the land at once, but may take eight years in which to leisurely inspect the entire Possession, and make sure that they get only the cream of the country. If the Administrator had sold New Guinea outright, as if it were a suburban allotment, he could not have more effectively parted with the control of the land or more emphatically exclaimed "hands off" to any venturesome prospector or explorer from the mainland. The Ordinance gives power to explore and open up Crown lands, use rivers, develop mines, gather rubber, fell timber, construct harbours and wharves, and actually provide sea and river defences. The Company, it is presumed, in order to protect its interests from foreign invasion or domestic envy, will have an army and navy, and probably declare war. We have already referred to the iniquity of the charter of the Company with respect to mining. The development of the undoubted mineral wealth of New Guinea is a proper sphere for Australian enterprise. Plucky prospectors from the continent will always be visiting the Possession in the hope of making a good find; but now should the explorer happen upon a rich mineral field, down will come the Company and absorb the treasure, paying for it 2s. an acre, and acquiring all the adjacent land through which the reefs or leads may run at the same extravagant figure. A more salutary method of warning off genuine settlement could not have been devised.

The grant made to this British corporation entirely subverts the policy hitherto pursued in respect of New Guinea. Mr. Theodore Bevan, the well-known New Guinea explorer, to whose courage and enterprise we owe so much of our knowledge of the New Guinea interior, has been endeavouring for years past to obtain land concessions from Sir William MacGregor, but that high-minded patriot has always repudiated with pious horror the thought of allowing land grants for speculative purposes. Mr. Bevan's experience in endeavouring to do something with the country to which he has rendered such valuable service fully bears out our observation of the other day, that Australian plans for the development of what is really Australian territory have been thwarted, checked, or coldly discouraged by the Administrator. As far back as 1888, after Mr. Bevan had explored the rivers of the Gulf of Papua, he applied to the then Administrator, Mr. John Douglas, for a large area. That claim was considered excessive, but it was freely admitted that the intrepid explorer's services deserved generous recognition. In 1890 Mr. Bevan applied for a grant of land, and was informed, in reply, that it was contrary to the policy of the Government to give "exclusive" exploiting privileges to anybody. If, however, the applicant would specify any particular part he wished to lease or purchase, steps would be taken to ascertain if it could be made available. In reply, Mr. Bevan described an area of 100 square miles on the Purari River, for which he was willing to negotiate, and would have been prepared to take up on any reasonable terms. Sir William MacGregor took several months to consider this proposal, and in May, 1891, replied that it was perfectly hopeless to obtain 100 square miles in any part of the Possession, because it was "not the policy of the contributing colonies to sell land for speculative purposes." That reply so completely scouted the idea of any considerable scheme for exploiting the country that Mr. Bevan did not pursue the matter. He did not want land to grow potatoes, but for general exploration purposes; and as there appeared not the faintest probability that such an enterprise as the British New Guinea Syndicate would ever be countenanced, he let the whole subject drop.

In March, 1897, however, the question was reopened by an inquiry from Mr. Bevan as to whether the policy of the Possession was of a more progressive character than had been the case seven years previously—was it still to be understood that no large areas would be granted? Sir William MacGregor intimated his willingness "to advocate any reasonable concessions." The reply was that Mr. Bevan and his friends were able to provide £20,000 for exploration work, and that they would prospect for gold and coal, and work the india-rubber and timber resources. Another five months elapsed, and the applicant was then informed that only inquiry made upon the spot, and with reference to some definite tract of country, could lead to practical results. Mr. Bevan, in a letter dated 7th February, 1898, reiterated his demand for concessions in the Papuan Gulf country. That letter was crossed by one from Sir William MacGregor of the same date. This letter is worth quoting in full, because it introduces a new feature into the business in the person of the "Honorable Duncan Gillics," and shows clearly that certain Melbourne interests were strongly concerned in the negotiations, that ended so successfully for the British syndicate. The communication is as follows:—

"Sir,

"Brisbane, 7 February, 1898.

"I am directed by His Excellency the Lieutenant-Governor to inform you that he has received your letter of 21st December last, addressed to Mr. Dutton, Private Secretary to the Prime Minister of Queensland. This had as an enclosure copy of a letter from the Government Secretary of British New Guinea to yourself, dated 14th August, and of a communication from yourself to that gentleman dated 30th August.

"2. The Lieutenant-Governor is not in a position to state whether any reply has been sent from Port Moresby to your letter of 30th August; but it appears to His Excellency quite clear that nothing whatever of a conclusive nature could have been arrived at, as no details of any intended transaction have yet been submitted by you. It would rather appear that you wish to have these made to you by the Government. The object of the letter of the 14th August of the Government Secretary to yourself was to elicit from you a definite proposal, in the absence of which the Government is not in a position to deal with the matter, except by the tedious process of a long correspondence of question and answer. In the interim a strong company has made to the Government a definite and complete proposal, so formulated that its details could be dealt with at once, and be accepted or rejected.

"This proposal is now under consideration, and, if finally approved of by the directors, it will take up as much land as the Crown will wish to alienate at present, with the exception of small areas for trading settlement.

"3. Sir William MacGregor has, however, been given to understand that the company referred to are desirous of obtaining your aid and co-operation, and would wish to incorporate yourself and your friends in their undertaking. If this could be arranged it would be a matter of special gratification to the Lieutenant-Governor, who believes that your knowledge and experience of the country would particularly qualify you for rendering valuable services to the company as a director

director or manager. Sir William MacGregor has been given to understand that the Honorable Duncan Gillies has become a director of the new company, and the Lieutenant-Governor would venture to suggest that you should confer with Mr. Gillies on the subject, and if possible join your forces with those of his friends in this transaction. Mr. Gillies will be in a position to acquaint you with details.

I have, &c.,

“ARCHY B. McDOWALL,

“Private Secretary.

“Theodore F. Bevan, Esq., Melbourne.”

Naturally the presence of a director of the new company in Melbourne facilitated explanation, and Mr. Bevan called on Mr. Gillies at the Athenæum Club. That gentleman asked for the Administrator's letter to be left with him, which, of course, was refused. Mr. Bevan desired an early interview, but Mr. Gillies absolutely declined to discuss the matter. The fact stated in Sir William MacGregor's letter, that the Syndicate was anxious to secure his services as director or manager, made Mr. Bevan suspicious that his name had been used in securing the concession to the Company, but Sir William replied that his name was never mentioned. In subsequent correspondence, Mr. Bevan, commenting on the grant made to Vine and the shabby treatment of himself after the perils he had endured, the service rendered, and the money he had spent in the country, hoped that His Excellency would pause, and, if necessary, cancel the negotiations by cable. He even demanded the common rights of first application, which were recognised all over Australia. But further negotiation was simply ignored.

Mr. Bevan then approached Sir George Turner on the matter, and, with the limited knowledge gained from a paragraph in *The Age* of 3rd February as to the character of the concession, he pointed out to the Premier that if the Syndicate was granted all the land the Crown would wish to alienate at present the effect would be to make those interested people, who might be only “astute boomers,” a cash present worth anything from £50,000 upwards on the London market. It would make them the heirs and inheritors of all that had been done in British New Guinea up to date. It would be granting to people who had probably never seen New Guinea the most exclusive privilege that could possibly be conceived. It would stultify the whole policy pursued in respect of New Guinea, and would not further the progress of the country. How was it possible, Mr. Bevan asked, to fix guarantees which would ensure that after the promoters had had their day the shareholders could be tied down to conditions which would prevent land from lying idle; and he warned the Premier that the transaction would not only be generally denounced, but that it had all the elements of a grave public scandal. The Premier of Queensland, in answer to a complaint made by Mr. Bevan as to the manner in which he had been treated, stated that any application he might make for a similar concession to that granted to the British corporation would receive favourable consideration, and be treated in a liberal spirit. “But,” asks Mr. Bevan, “how is it possible to treat any other person with liberality under the terms of the Ordinance? If the Syndicate has sufficient influence to engineer this great scheme it would be powerful enough to get its own Governor appointed, and as one of the conditions is that the Syndicate, with the permission of the Administrator, may buy land from the natives, it is easy to see that on the plea of native rights they may monopolise the whole country, and compel every prospector to go cap in hand for permission to explore. Concessions of large areas are necessary in such a country where capital is urgently required for development, but there was no justification for hurriedly and foolishly constituting a few people in London or elsewhere the ground landlords of the future Australian New Guinea.”

We have already shown that this concession is an entire reversal of New Guinea policy; the Administrator's own correspondence indicates the outrageous departure now made. In an article on New Guinea in the *Scottish Geographical Magazine* for April, 1895, Sir William MacGregor says: “The policy of the colony is to sell land to *bona fide* cultivators, but not to encourage speculation by selling large areas to exploiting syndicates, or to grant concessions that would be immediately sold for what they might bring.” Instead of adhering to this cautious policy, or overstepping its limits only to a moderate extent, Sir William has out-Heroded Herod in going beyond it for the benefit—of whom? If one could only learn the secret history of this scandalous barter of a whole Possession—a Possession that has been maintained and managed by Australian money to the extent of over £150,000, it would open the public eyes to the real influences that have been at work. Surely Sir George Turner and Mr. Reid were never consulted in regard to the Syndicate's proposals, as they ought to have been, or, if they were, the all-absorbing demands of federation must have prevented their giving the matter proper consideration. Sir William MacGregor, in the article quoted, showed that the £15,000 a year contributed came from Queensland, New South Wales, and Victoria. “These colonies are, therefore, allowed to have much to say in the general direction of the lines of policy that mark the administration of New Guinea.” Quite so. The colonies pay the piper; they should have the privilege of calling the tune. Again, to quote Sir William: “It follows that the destiny of British New Guinea is to be a satellite of Australia, and if it is not mismanaged it will be a great and valuable dependency of the Commonwealth. . . . The three colonies mentioned alone are expending their money on it in the hope that they may turn to some good account the country and people we have been considering.” Precisely. Victoria and New South Wales have not spent between them £100,000 in order to hand over the country to a set of greedy land-boomers. But the most important point in Sir William's article *apropos* of the present state of things is the following sentence, and we would call Sir George Turner's special attention to it:—“The Government of the Possession is provided with the ordinary power of passing laws to suit its requirements, subject to the sanction of the Australian Colonies.” Did the Victorian Premier sanction this scheme? Was he consulted about it in any way? If not, if he has given no consent then the whole agreement is not worth the paper it is written on. Sir George Turner should take immediate steps to have the Ordinance quashed, and some more “reasonable concession” substituted, otherwise he should withdraw the subsidy, without which the New Guinea Government would come to a standstill. As we have hinted at the beginning of this article, the fate of Australia may be involved in what, on the face of it, may appear to be merely a smart business deal. If a mysterious syndicate, the members of which—outside Mr. Duncan Gillies and Sir Somers Vine—are unknown, can go in and take possession of a country, what is to prevent a foreign Power inspiring a mercantile corporation to do the same thing? Sir George Turner should lose no time in communicating with the other contributors of the subsidy, in order that this preposterous grab may be effectually defeated.

[Enclosure 4 in No. 26.]

(From *The Age*, 17 May, 1898.)

Outrageous as the monopoly proposed to be created in New Guinea for a British land-booming syndicate seemed when it first leaked out, it did not look nearly so bad as subsequent developments now show it to be. The letter from the private secretary of Sir William MacGregor, the Lieutenant-Governor of that island, to Mr. Theodore Bevan, the New Guinea explorer, published in *The Age* of yesterday, throws a lurid light upon a most extraordinary, not to say suspicious, transaction, and shows that although Mr. Duncan Gillies considered any attention to the material interests of Victoria during the term of his Agent-Generalship to have been incompatible with the dignity of his ambassadorial functions, he is not adverse to lending his name and influence to a British syndicate formed to exploit what is really Australian territory. The facts which have so far been elicited tend to point to a desire on Mr. Gillies's part to imitate the rôle of Mr. Cecil Rhodes, and to establish a kind of chartered company, with possibly a new Jameson raid in the future, for the proposed company of land-boomers has arranged to undertake even sea and river defences. It is impossible to say as yet what arguments or persuasions were brought to bear on Sir William MacGregor by the land-boomers, but they must have been very powerful, for they induced him to abandon entirely his formerly announced policy regarding concessions of land so far as to grant what is virtually a monopoly to a syndicate of which Mr. Gillies and Sir Somers Vine are leading members. There can be no doubt whatever on this point, for we have Sir William's own assurance on the subject. As long ago as 1891, when Mr. Bevan applied for a concession, Sir William distinctly recognised his paramount claim to anything which it might be in his power to grant, but assured him that it was utterly hopeless to obtain 100 square miles in any part of the Possession, because it was “not the policy of the contributing colonies to sell land for speculative purposes.” But in March, 1897, when Mr. Bevan again applied, the Lieutenant-Governor intimated his willingness “to advocate any reasonable concessions.” What had occurred in the meantime to bring about this complete change of policy? Had the “Honorable Duncan Gillies” exerted his eloquence with such success as to change the history of New Guinea? On this point we have no definite information, but the course of events certainly tends that such was the case, for when Mr. Bevan again asked for a concession he was told that, although the Government had changed its policy, Mr. Gillies's syndicate had been there beforehand, and had acquired a virtual monopoly. This is evidently the meaning of the letter addressed to Mr. Bevan by the private secretary of the Lieutenant-Governor, in which he says of the British syndicate: “It will take up as much land as the Crown will wish to alienate at present, with the exception of small areas for trading settlements.”

Tho

The real question now is, and to this question the people of these colonies, who have paid £150,000 towards the government of New Guinea, have a right to demand an explicit answer: "Why did Sir William MacGregor grant to Mr. Gillies and a British company what he refused to Mr. Bevan and his Australian friends?" It cannot have been a want of confidence in their financial ability, for the Australian partners were able to provide £20,000 for exploration work, and were willing to undertake to prospect for coal and gold, and work the india-rubber and timber resources. Moreover, Mr. Bevan is admitted by Sir William MacGregor to have a claim upon the New Guinea Government for his excellent exploration work, while, as far as we are aware, Mr. Gillies knows no more about the island than he knows about an octopus railway system in Mars. At a first glance it looked as if Mr. Gillies and his friends had made use of Mr. Bevan's name in order to obtain the concession, for Sir William's secretary wrote to Mr. Bevan stating that he had been given to understand that the British company was desirous of obtaining the explorer's aid and co-operation, and "would wish to incorporate you and your friends in their undertaking." So convinced was Sir William of this that he suggested to Mr. Bevan to see Mr. Gillies, but the latter gentleman, when applied to, sternly refused to even discuss the subject. Sir William subsequently stated that Mr. Bevan's name had never been mentioned to him in connection with the matter; but, all the same, it must have been suggested by someone, and this is one of the points which needs elucidation in this remarkable affair.

[Enclosure 5 in No. 26.]

(From *The Age*, 17 May, 1898.)

The position of affairs in relation to the New Guinea land scandal, as it is explained by the Premier, makes matters no better. Having read the article on this subject in *The Age* of yesterday, the Premier states that he had done all he could to forward the interests of Mr. Theodore Bevan in his New Guinea enterprise. As for the large concession which has been made to the English syndicate, Sir George Turner states that he was never consulted about it as a matter of administration, nor did he know anything about it till he saw it mentioned in the Press. The Administrator of New Guinea, Sir William MacGregor, is not under the control of the contributing Governments (Queensland, New South Wales, and Victoria), and he can do what he likes without their permission, but the practice is to inform or consult them. The bargain of the colonies named with the Imperial Government is that the Administrator of New Guinea is to consult the Queensland Governor with regard to legislative and administrative acts; that functionary refers to his Executive, and that body again consults the Governments of the contributing colonies. In small matters, Sir George Turner says, the Victorian Government concurs as a matter of course; on those which seem to require consideration the other contributors are consulted, and the Queensland Government is asked to investigate, as that Government manages New Guinea affairs for the contributing colonies. But in this land transaction the Victorian Premier was never consulted. Nothing official has ever reached him, and he knows nothing of the matter beyond what he has seen in the Press.

THE NEW GUINEA LAND GRAB.

Sydney, Monday.

Mr. C. E. Kennedy manager of the New Guinea Development Syndicate, and a resident of New Guinea, in an interview to-day, expressed emphatic condemnation of the Sir J. Somers Vine proposed grab of New Guinea territory, and said that if the scheme were carried out it would stop the development of New Guinea. At one time a person wishing to develop the resources of New Guinea could get land at 2s. 6d. per acre, but if the Vine scheme were carried out intending settlers would have to pay fancy prices to the Syndicate. Mr. Kennedy thinks the southern colonies should at once send a combined remonstrance to Mr. Chamberlain against the Somers Vine proposal.

(27.)

The Chief Secretary to The Prime Minister of Victoria.

Sir,

Chief Secretary's Office, Brisbane, 21 May, 1898.

I have the honor to acknowledge the receipt of your letter of 17th instant, in which, with reference to previous correspondence, you enclose further newspaper cuttings on the subject of the concessions made by the Government of British New Guinea to the British New Guinea Syndicate, and, while asking to be furnished with full particulars regarding the matter, state that up to the present time you have received no official intimation of the concessions reported to have been made.

A telegram which I caused to be despatched to you yesterday will have informed you of the action taken by this Government with the view to deferring the grant of Her Majesty's assent to the Ordinance under which effect is given to the Agreement entered into between Sir William MacGregor and the Syndicate in question, and I must ask that compliance with your request for further information on the subject be allowed to stand over until Sir Hugh Nelson's return from New Guinea, which is expected to take place early next month. In the meantime, I take this opportunity of reminding you that a copy of the Ordinance containing all particulars as to the concessions granted to the Syndicate was forwarded to you under cover of Mr. Byrnes's letter of the 19th April last, receipt of which was duly acknowledged by you on the 25th idem.

I have, &c.,

For the Chief Secretary,

JAMES R. DICKSON.

(28.)

Telegram from The Prime Minister of New South Wales to The Prime Minister of Queensland.

Sydney 23 May 1898.

AM in receipt of telegram intimating that you have requested Deputy-Governor to cable Secretary of State for the Colonies to advise Her Majesty to withhold assent to Ordinance No. 1 of 1898 British New Guinea.

G. H. REID.

Noted.—J.R.D., 26/5/98.

(29.)

Telegram from Mr. J. Lowles, M.P., to The Governor of Queensland.

London 21 May.

INFORM MacGregor everything in order here Agent prepared to start on receipt of cable from you Referring to protests Reid Turner if faith broken now will have permanently bad effect against colony here.

LOWLES.

Read. Copy by wire to Premier.—J.R.D., 25/5/98.

(30.)

Paraphrase of Telegram from The Secretary of State for the Colonies to The Deputy-Governor of Queensland.

London 24 May 1898.

REFERRING to your telegram of 20th May on receipt of Governor's Despatch No. 14 of 5th March agreement and draft Ordinance prepared with approval of Queensland Government were carefully considered. Draft Ordinance did not appear to sufficiently protect Government of Possession and I intimated to Syndicate that I should require modifications. This was accepted by them and on 3rd May I intimated to them on receipt of Ordinance giving effect to amendments. I would at once submit to Her Majesty for approval *see* my Despatch No. 21 of 3rd May. I do not see that your Ministers can now oppose allowance of Ordinance without breach of faith and I presume Nelson and MacGregor fully informed Premiers Victoria and New South Wales at Melbourne Conference as to agreement which was matter of notoriety and was I am informed freely discussed Agents for Syndicate with prominent public men and Ministers at Sydney and Melbourne. You should communicate all information concerning matter and this telegram to Government of New South Wales and Government of Victoria.

CHAMBERLAIN.

Read. Copy by wire to Premier.—J.R.D., 25/5/98.

COLONIAL Office (has) telegraphed Governor about New Guinea Syndicate.

(34.)

Telegram from Mr. J. Lowles, M.P., to The Governor of Queensland.

London 6 June 1898.

FOR MacGregor Chamberlain announced Commons to-day approval Ordinance as amended.

LOWLES.

(35.)

The Chief Secretary to His Excellency the Governor.

My Lord,

Chief Secretary's Office, Brisbane, 7 June, 1898.

I have the honor to acknowledge the receipt from your Excellency of a telegram, dated 6th instant, from Mr. J. Lowles, M.P. (returned herewith), having further reference to the British New Guinea Syndicate Ordinance, and to recommend that a copy of the telegram be forwarded to His Excellency Sir William MacGregor.

I have, &c.,

For the Chief Secretary,

JAMES R. DICKSON.

(36.)

Telegram from The Prime Minister of Victoria to The Prime Minister of Queensland.

Melbourne 10 June 1898.

I HAVE to-day cabled to our Acting Agent-General as follows. New Guinea Syndicate make again strong protest against ratification of Ordinance clause twenty of Amended Proposals for Administration requires Queensland consult other contributing Colonies on all matters other than ordinary administration. This was not done nor did Queensland give us any information whatever prior to passing Ordinance neither have contributing Colonies had any opportunity to ascertain or consider amendments proposed by Imperial Government. As we have already expended £50,000 in connection with New Guinea there is strong feeling here that before final ratification contributing colonies should be afforded opportunity of knowing all facts and fully considering matter as provided in clause twenty above-mentioned which being Schedule of Queensland Act has force of law. If we are not to be consulted with regard to such important questions it is useless our spending money in connection with New Guinea.

GEORGE TURNER.

(37.)

(37.)

The Secretary of State for the Colonies to The Governor of Queensland.

My Lord,

Downing-street, 3rd May, 1898.

I have the honor to acknowledge the receipt of your despatch, No. 14, of the 5th March, transmitting correspondence as to the agreement between the Government of British New Guinea and a Syndicate, together with the draft of an Ordinance to give effect to that agreement.

2. From the enclosed copies of correspondence with the solicitors acting for the Syndicate you will perceive that the Ordinance required amendment in certain important particulars, and that the Syndicate has accepted the amendments, which should be embodied in the Ordinance, or made the subject of an amending Ordinance, as the case may be.

3. The subsection proposed in the solicitor's letter of the 25th ultimo, though in substance sufficient, appears to require more precision in its language before it is embodied in the law.

4. I have caused the Syndicate's solicitors to be informed that, on the understanding that the Ordinance is amended as required, I shall be prepared to at once submit it for Her Majesty's approval.

I have, &c.,

J. CHAMBERLAIN.

For consideration of the Honorable the Chief Secretary, the advisability of forwarding copies of this to the southern contributing colonies, without awaiting the return of the Ordinance from the Lieutenant-Governor of British New Guinea.—LAMINGTON, 10/6/98.

Copies to Governments of New South Wales and Victoria, and prepare for publication in full.—J.R.D., 10/6/98.

[Enclosure 1 in No. 37.]

The Under Secretary of State, Colonial Office, to Messrs. Minet, Pering, Smith, and Company.

Gentlemen,

Downing-street, 22 April, 1898.

With reference to the letter from this Department of the 12th ultimo, I am directed by Mr. Secretary Chamberlain to inform you that he has now received from the Governor of Queensland a copy of the provisional agreement between the Administrator of British New Guinea and the British New Guinea Syndicate, and the draft of an Ordinance intended to give effect to that agreement, and has carefully considered those documents with your letters of the 18th of February and the 16th and 28th ultimo.

2. The agreement between the Government of British New Guinea and the Syndicate receives Mr. Chamberlain's approval generally, but he considers it necessary that the Ordinance to carry out the agreement, of which you have, no doubt, received a copy, should be amended in the following particulars:—

3. The Government is not sufficiently protected by the provisions of section 5 of the Ordinance in regard to the question which may arise as to the suitability of the lands made available for purchase by the Company. It is necessary that provision should be made for the question of the decision of the suitability if and whenever it arises by arbitration; and clause 5 of the draft should be amended accordingly.

4. Clause 5, paragraph (2), goes beyond the agreement with the Syndicate in extending the sole right of the Company to purchase lands until such time as the Company has purchased the total area of land which the Company is entitled to purchase. The intention, as expressed in the Memorandum of Agreement, is that the right should survive until such time as suitable lands, amounting in the aggregate to 250,000 acres, shall have been made available for occupation; and the clause must be amended accordingly.

5. The absence of any provisions for the survey of the lands purchased by the Company would give rise to serious difficulty hereafter, and it is necessary that the Ordinance should provide that before a Crown grant is finally issued in respect of any lands in respect of which a provisional grant has been made, such lands must be surveyed at the joint expense of the Government and the grantee, and that the final grant is to be issued for the area comprised within the boundaries set forth in the provisional grant only on the condition that any excess of the area stated in the provisional grant is to be paid for by the grantee, and that any deficiency is to be made up by the Government, either by the grant of other suitable lands or by restoring a proportionate part of the money paid under the provisional grant.

6. The provision for payment of royalty on the net value of gold and other similar metals does not commend itself to Mr. Chamberlain, but he is not prepared to insist on his objection to the provision if a clear and satisfactory understanding can be arrived at with the Company and expressed in the Ordinance as to the meaning of net value under the Ordinance, and upon the provision of a proper system of ascertaining the net value of metals won, taken, or acquired.

7. As regards the words in clause 3, subsection (b), of the Memorandum of Association of the British New Guinea Company, to which you call special attention in your letter of the 18th of February, I am to say that it appears to be immaterial whether they are inserted or not, as they would be implied in any case.

8. Mr. Chamberlain will await your reply to this letter before communicating with the Governor of Queensland.

I have, &c.,

C. P. LUCAS.

[Enclosure 2 in No. 37.]

Messrs. Minet, Pering, Smith, and Company to the Under Secretary of State, Colonial Office.

Sir,

81 Cannon-street, London, E.C., 29 April, 1898.

We beg to acknowledge the receipt of your letter, No. 7836-98, of the 22nd instant, addressed to us by direction of Mr. Secretary Chamberlain.

2. We have lost no time in communicating with those members of the Syndicate who have been entrusted by the subscribers generally with the conduct of its affairs, and after careful consideration given by them to your letter, we have been directed to state as follows:—

3. The Syndicate is in entire accord with Mr. Secretary Chamberlain in regard to clause 5 of the Ordinance. It will fully meet the views of our clients if a subsection to the following purpose is added to the clause:—"In the event of any difference of opinion arising between the Government and the Company as to the suitability of lands made available for the exercise of the option secured to the Company, such difference shall be, if need be, referred to the arbitration of competent persons selected by the Government and the Company respectively."

4. The Syndicate is in entire accord with Mr. Secretary Chamberlain in his construction of the Memorandum of Agreement as purported to be dealt with by paragraph 2, clause 5, of the Ordinance, and consent to the amendment suggested, so long as it is clearly and unmistakably admitted that no person or persons can be dealt with by the Government or accorded privileges similar to those conveyed to the Company until such time as suitable lands, amounting in the aggregate to 250,000 acres, shall have been made available, and, in consequence thereof, purchasable by the Company. Our clients understand that the point of Mr. Secretary Chamberlain's comment is that delay might be made by the Company in purchasing suitable lands made available, and thus fetter the Government in after operations for an indefinite period. That would, of course, be unfair to the Government, but, on the other hand, the Company must be protected against having the aggregate area of land or considerable portion thereof submitted to it as being suitable and available, and be expected to purchase the same before reasonable time has been allowed for examining into and judging of such suitability. Our clients have in mind the expectation that it is very likely the Company will, in many instances, be the first to discover suitable areas for occupation, in which case it could, and no doubt would, take the initiative in action as prescribed by paragraph 1, clause 8, of the Ordinance.

4. The Syndicate is in entire accord with the views expressed in paragraph 5 of your letter.

5. The Syndicate is of opinion that paragraph 6 of your letter is clearly answered by the enclosed memorandum they have obtained from their accredited agents on the subject.

6.

6. The general contents of your letter being dealt with in the foregoing paragraph 3, we are desired to request Mr. Secretary Chamberlain's attention to the following facts and circumstances. A cable message has been received by our clients from the Governor of Queensland, dated 25th March, to the following effect:—

"New Guinea Ordinance passed."

Since then the subscribers to the Syndicate have met, and further contributed the moneys necessary for all preliminary payments in connection with the suitable lands at this moment available for occupation, as referred to in our letter to your Department of the 23th ultimo; and, furthermore, considerable progress has been made in the direction of obtaining guaranteed capital for the company proposed to be formed. If operations have to be suspended until such time as the Secretary of State can communicate with and receive answers from the Government of British New Guinea, the delay will give rise to serious complication.

By the last inward Australian mail our clients are advised that certain parties in that continent have become acquainted with the nature of the negotiations which have passed, and are moving to seek privileges from the Government of British New Guinea in anticipation of the Secretary of State's approval to the Ordinance given to this Company. Our clients anticipate—and, indeed are absolutely convinced—that they will meet with nothing but straightforward treatment on the part of the Government of the Colony and the Secretary of State, but there is the possibility that unexplained delay in the conclusion of the business might afford pretexts in some quarters for discrediting the good faith and intentions of our clients, who are anxious that practical work should be commenced at the earliest possible moment.

We are, therefore, to suggest that the difficulty might be effectually met by the Secretary of State formally notifying his approval of the Ordinance subject to the details of amendments now agreed (the same to be set out in the form in which they could be added as subsections to the Ordinance) being accepted. We would then, on behalf of our clients, transmit a formal acknowledgment of the notification and full acceptance of the amendments. The adhesion by the Government of British New Guinea thereto would go without question.

7. The Syndicate is prepared to lodge with the Government of British New Guinea, at any moment, the preliminary purchase money for the lands already available.

We have, &c.,

MINET, PERING, SMITH, & CO.

[Sub-Enclosure in Enclosure 2 in No. 37.]

BRITISH NEW GUINEA SYNDICATE.

25 April, 1898.

MEMORANDUM.—The purport of paragraph 2, clause 16, of the British New Guinea Government Ordinance was very fully discussed with the Administrator, and he fully agreed illustrations of the application and meaning of net value propounded in the following sense by Sir Somers Vine:—

"Net value is to be regarded as the world's general marketable value of the particular product—per ounce or per ton—at the time it is shipped from the Colony in accordance with its quality. It is assumed that the Company would be required by the Government to supply returns of its exports under the head of minerals. &c., the Company would declare in detail the quantity and standard of quality of such exports, and the net royalty would be 2½ per cent. upon the market value of the product then existing in whatever part of the world it might be consigned to."

MINET, PERING, SMITH, & CO.

[Enclosure 3 in No. 37.]

The Under Secretary of State, Colonial Office, to Messrs. Minet, Pering, Smith, and Company.

Gentlemen,

Downing-street, 3 May, 1898.

I am directed by Mr. Secretary Chamberlain to acknowledge the receipt of your letter of the 25th ultimo, accepting the amendments which he considered necessary to be made in the British New Guinea Syndicate Ordinance of 1898.

A subsection to the effect of that submitted in the 3rd paragraph of your letter will be added to clause 5 of the draft Ordinance; but as the interest of the Government requires that the option granted to the Syndicate should be exercised within a reasonable time it will be desirable also to fix a reasonable limit to the time within which the arbitrators shall be required to report on any case referred to arbitration under the new subsection.

Mr. Chamberlain considers that "net value" should be more clearly defined in the Ordinance itself, and he apprehends that it will meet your view if it is declared to mean the wholesale market price of any given commodity in the market to which it is consigned, or in the London market, as you prefer.

As the amendments in the draft Ordinance are substantially accepted by the Syndicate, Mr. Chamberlain has transmitted copies of the correspondence to the Governor of Queensland, and has informed him that if the Ordinance is passed by the Legislature of British New Guinea containing the amendments required, he will at once submit it for Her Majesty's approval.

It does not appear necessary to draft the amendments here.

I have, &c.,

H. BERTRAM COX.

(38.)

The Chief Secretary to The Prime Ministers of New South Wales and Victoria.

Sir,

Chief Secretary's Office, Brisbane, 10 June, 1898.

With reference to previous correspondence on the subject of the concessions granted by the Government of British New Guinea to the British New Guinea Syndicate, Limited, I now do myself the honor to forward to you, for the information of the Government of New South Wales
Victoria a copy of a despatch, dated 3rd May ultimo, addressed by the Right Honorable the Secretary of State for the Colonies to His Excellency the Governor of Queensland, transmitting copies of certain correspondence which has taken place between the Colonial Office and Messrs. Minet, Pering, Smith, and Company, as representing the British New Guinea Syndicate, with regard to the amendments which Mr. Chamberlain considers necessary in the Ordinance by which effect is given to the agreement arrived at between the Syndicate and the Government of the Possession.

I have, &c.,

For the Chief Secretary,

JAMES R. DICKSON.

(39.)

Telegram from The Prime Minister of New South Wales to The Prime Minister of Queensland.

Sydney 13 June 1898.

UNDERSTAND Ordinance embodying Syndicate land grant goes back to New Guinea for amendment Surely Administrator will observe terms of New Guinea Act Amended Proposals and before going further ask the opinion of the contributing Governments through you Victoria has sent another strong message Home and we feel just as strongly here of which Colonial Office was advised some time ago.

G. H. REID.

(40.)

(40.)

Telegram from The Prime Minister of Victoria to The Prime Minister of Queensland.

Melbourne 13 June 1898.

NEW GUINEA SYNDICATE Reid has communicated to me his message to you stating that as it is understood Ordinance goes back to New Guinea for amendment surely the opinion of contributing colonies will be asked by Administrator through you as provided by amended proposals for administration of British New Guinea before the matter goes further I support New South Wales and fully expect to be consulted.

GEORGE TURNER.

(41.)

The Prime Minister of Queensland to Sir Hugh Nelson.

Sir,

Brisbane, 14 June, 1898.

I have the honor to enclose a copy of the correspondence which has taken place respecting the concession made by the Government of British New Guinea to the British New Guinea Syndicate, Limited, and to inform you that the Government will be glad to be favoured with any observations you may desire to offer on the subject of this correspondence, more especially with respect to the contention put forward by the Prime Ministers of New South Wales and Victoria that they should, under clause 20 of the amended proposals for the Administration of the Possession, have been consulted in regard to the agreement in virtue of which the concessions referred to are granted.

I have, &c.,

THOMAS J. BYRNES.

(42.)

Telegram from The Prime Minister of Queensland to The Prime Ministers of New South Wales and Victoria.

Brisbane 15 June 1898.

BRITISH NEW GUINEA SYNDICATE I shall communicate fully with you on subject in course of a few days and in meantime I have arranged that no further action shall be taken with respect to despatch from Secretary of State dated 3rd instant.

THOMAS J. BYRNES.

(43.)

The Prime Minister of Queensland to The Prime Ministers of New South Wales and Victoria.

Sir

Chief Secretary's Office Brisbane 17 June 1898.

Referring to my telegram of 15th instant I now do myself the honor to forward to you the accompanying printed copy of the correspondence which has taken place on the subject of the concessions granted to the British New Guinea Syndicate Limited and to inform you that on the receipt of a reply to my letter to Sir Hugh Nelson of 14th instant I shall address you further on the whole question of these concessions.

I have, &c.,

THOMAS J. BYRNES.

(44.)

Telegram from The Prime Minister of Queensland to The Prime Ministers of New South Wales and Victoria.

Brisbane 18 June 1898.

I HAVE posted to you a copy of the correspondence which has taken place on the subject of the concessions granted to the British New Guinea Syndicate.

THOMAS J. BYRNES.

(45.)

The Prime Minister of New South Wales to The Prime Minister of Queensland.

Sir,

Sydney, 22 June, 1898.

I have the honor to acknowledge the receipt of your letter of 17th instant, No. 98/3,819, transmitting a printed copy of the correspondence which has taken place on the subject of the concessions granted to the British New Guinea Syndicate (Limited).

I have, &c.,

G. H. REID.

(46.)

The Prime Minister of Victoria to The Prime Minister of Queensland.

Sir,

Melbourne, 23 June, 1898.

I have the honor to acknowledge, with thanks, the receipt of your letter of the 17th instant, No. 98/3,820, furnishing me with a printed copy of correspondence which has taken place relative to the concessions granted to the British New Guinea Syndicate (Limited), and I await receipt of the further letter which you propose to send me upon receiving a reply to the communication on the subject which you have addressed to Sir Hugh Nelson.

I have, &c.,

GEORGE TURNER.

(47.)

The Prime Minister of New South Wales to The Prime Minister of Queensland.

Sir,

Sydney, 23 June, 1898.

I have the honor to acknowledge receipt of your letter of the 10th instant (98.7,847, Gov., 98/3,628), forwarding, for the information of this Government, copy of a despatch dated 3rd May ultimo, addressed by the Right Honorable the Secretary of State for the Colonies to His Excellency the Governor of Queensland, covering copies of correspondence which has passed between the Colonial Office and Messrs. Minot, Pering, Smith, and Company, as representing the British New Guinea Syndicate, relative to the agreement arrived at between the Syndicate and the Government of British New Guinea.

I have, &c.,

G. H. REID.

(48.)

(48.)

Telegram from The Prime Minister of Victoria to The Prime Minister of Queensland.

Melbourne 27 June 1898.

NEW GUINEA concession I shall be glad if you will prepare a full statement of the objections to the proposal. The three Premiers can sign it. Reid and myself can also protest on the ground that we were never consulted.

GEORGE TURNER.

(49.)

Sir Hugh M. Nelson to The Chief Secretary.

Sir,

Brisbane, 18 June, 1898.

In accordance with the request contained in your letter of the 14th instant, I now have the honor to submit some observations on the correspondence that has taken place respecting the British New Guinea Ordinance No. 1 of 1898.

The correspondence begins with a letter dated the 25th of May, 1897, addressed to me in London by the Secretary of State for the Colonies. This letter was submitted by me to the Premiers of New South Wales and Victoria, as well as to yourself, and Sir Henry W. Norman was also consulted respecting it, although quite unofficially. To the best of my recollection, Mr. Reid took little interest in the subject, but suggestions made by Sir George Turner, Sir Henry Norman, and yourself are embodied in my reply dated the 7th July. We were all of one opinion—that the matter, while worthy of consideration, was one to be dealt with by the Administrator of the Possession, and after several personal interviews with the promoters of the Syndicate, at one of which you were present, I sent to the Secretary of State the reply dated the 7th of July. In that letter you will observe that I stated:—

“I have assured the members of the Syndicate that if the Lieutenant-Governor is favourably impressed with their ideas, the Government of Queensland will give the most careful consideration to the whole project, and will consult with the Governments of the other contributing colonies with the view of submitting some definite recommendation to the Imperial Authorities.”

That, as you will easily observe, was written under the impression that if the Administrator favoured the project he would be able to make a draft agreement with the promoters of the Syndicate under the existing Ordinances of the Possession, which, as an act of other than ordinary administration on his part, would naturally have been submitted as stated. But the Administrator found it necessary to proceed in the matter by legislation, and in no instance since the establishment of the Possession have the other colonies been consulted in respect of any proposed legislation. The invariable practice has been for the Administrator to submit drafts of Ordinances proposed to be introduced into the Legislature of British New Guinea to the Governor of Queensland, who submits the same to his Prime Minister, and he advises thereon, and makes any suggestions that may seem proper. The Governor then returns the draft to the Administrator, and intimates his approval or otherwise of the introduction of the Ordinance in the Legislative Council of the Possession. On the passing of an Ordinance by that body, the Administrator has authority to give his assent to it in the Queen's name. It is then immediately reported to the contributing colonies and transmitted to the Secretary of State, who has full power to advise the disallowance by Her Majesty of any such Ordinance, and with whom, therefore, the ultimate decision in all matters of legislation rests.

With regard to matters of administration, however, the other contributing colonies have always been consulted when such matters were considered to be outside the category of “ordinary administration”; and the 16th clause of the Second Schedule has always been carefully observed, no excess expenditure having been authorised until the consent of the contributing colonies has been obtained.

It is, therefore, not surprising that this method of procedure, in which New South Wales and Victoria have tacitly acquiesced for nine years eight months and a half of the ten years during which the agreement was to last, should have come to be regarded as a strict compliance with the stipulations contained in the Second Schedule of the British New Guinea (Queensland) Act.

Having regard, then, to what has taken place in the past, New South Wales and Victoria would not seem to have much reason to complain, in the present instance, of a breach of clause 20 of the Schedule, though, regarded from the standpoint of legal technicality, the practice hitherto adopted and acquiesced in by all the parties interested may not have been in strict accordance with the proper meaning of the language used in the Schedule, which, however, is sufficiently vague to be susceptible of more than one interpretation.

There is, however, in my opinion, no question as to the validity of the Ordinance passed, even although the stipulations of the Second Schedule were not strictly adhered to.

Under the Letters Patent of 8th June, 1888, by which the Possession of British New Guinea was constituted, the Administrator and Legislative Council are invested with full authority to make laws for the good government of the colony, subject only to the Crown's right of disallowance; and neither these Letters Patent nor the instructions to the Administrator of the same date contain anything which suggests subordination to the contributing colonies. The Administrator is enjoined to have regard to the instructions of the Governor of Queensland.

Having given the matter the fullest consideration since my return from New Guinea, I have arrived at the conclusion that, in accordance with the spirit of the Second Schedule, the Governments of New South Wales and Victoria should have had an opportunity of influencing the opinions of Queensland before action was taken, although such a course would have been contrary to the practice established and invariably adhered to. I have formed this conclusion, not from anything I have seen in the correspondence, but in consideration of the fact that this Ordinance is not one of general application: that it may affect materially the financial position of the Possession, and that it deals with specified individuals. I regret that such opportunity was not afforded.

At the same time, the correspondence discloses a strong probability that if the southern colonies had been consulted at an earlier date it would not have occurred to them to raise any objections to the provisions of the Ordinance. The Ordinance was forwarded by you to them on the 19th of April, and its receipt was acknowledged by Victoria without comment. It was not until the 11th of May that the Premier of that colony took any notice of it, and then only to enclose cuttings from a Melbourne newspaper.

newspaper. On the 17th May Sir George Turner forwarded further newspaper cuttings on the subject, and complained that he had received no official intimation of the concessions made to the Syndicate, although he must have had the Ordinance in his possession for at least twenty-three days; and in that letter he, for the first time, states his opinion that the matter was a fitting subject for consultation among the contributing colonies before the Lieutenant-Governor made any engagements.

The Government of New South Wales do not seem to have acknowledged the receipt of the Ordinance, but on the 18th of May they telegraphed expressing their disapproval of its provisions. It is noticeable, however, that they make no suggestion that they ought to have been consulted at an earlier date. It is reasonable, therefore, to assume that if they had been consulted they would have taken no notice of the matter within time to be of any practical effect; and if the draft Ordinances of the Possession are to be submitted to the contributing colonies, it seems to me that—considering the very imperfect means of communication we have with British New Guinea, and the delays that usually occur in obtaining replies from New South Wales—the legislation of that territory would be so much obstructed that the work of administration could not be carried out. A strong case in point respecting these delays on the part of New South Wales is the letter addressed to the Premier of that colony on the 16th February respecting the Conference of Premiers which took place on the 24th of January, no reply to which, except the bare acknowledgment of its receipt, had been received up to the time of my leaving office, nor has any, I believe, yet come to hand. Indeed, I am given to understand that the amended proposals in connection with British New Guinea, which were submitted to New South Wales in 1887, have never been assented to by that Colony; and the part of the agreement contained in clause 2 of the Second Schedule has never been carried out by either New South Wales or Victoria.

The deliberations of the Conference at Melbourne, on the 24th January, were confined solely to one subject—namely, the future finances of the Possession, and the affairs of the Syndicate were not referred to. At the same time the matter was one of notoriety. Many people in Melbourne mentioned it to me when I was there again in February. Probably the Premiers of New South Wales and Victoria would have made inquiries on the subject were they not evidently so fully occupied with Federation business.

If any default has been made by Queensland in this instance, it seems to have been cured by the force of circumstances, because the Secretary of State having returned the Ordinance for amendment, it consequently requires to be again laid before the Legislative Council of the Possession, and some months must elapse before it can again reach the hands of the Secretary of State. The contributing colonies will therefore have ample time to lay their objections to the Ordinance before him.

On the real merits of the Ordinance, nothing is said in the correspondence, and it would not be right for me to anticipate the arguments that may be laid before the Secretary of State by the colonies objecting to its provisions.

With regard to the Press, there is nothing, as quoted in the correspondence, that would carry any weight.

The argument used by the Press that, because three colonies have contributed to the expense of government in New Guinea the dwellers therein ought to have some right of priority over non-contributing colonies in the way of selecting the lands of the Possession, and, in fact, over the rest of Her Majesty's subjects throughout the Empire, is scarcely worthy of serious consideration, besides being distinctly contrary to the spirit of the Second Schedule.

The Possession was established, not for the object of conferring commercial or pecuniary benefit on the guaranteeing colonies, but as a safeguard against its being annexed by a foreign power, to the great danger of the whole of Australia, especially in case of war; and the continuance of it as a British Possession affects the interests of Australia in particular, as well as the honor of the whole British Empire.

The actual contributions up to date are as follow:—

	Date to which Contributions paid.	Amount contributed.		Amount due to 10th September, 1893.	
		£	s. d.	£	s. d.
Imperial Government	31 Mar., 1898.....	52,741	16 10	1,333	6 8
New South Wales.....	30 June, 1897.....	44,027	15 6	5,972	4 6
Victoria	30 Nov., 1897.....	46,111	2 2	3,888	17 10
Queensland.....	31 Dec., 1897.....	46,527	15 6	3,472	4 6
West Australia.....	31 Mar., 1897.....	1,294	14 0	323	13 6

The statement, also made by the Press, that the Syndicate have power to "pick out the eyes of the country" is quite unwarranted. They must exercise their option on lands declared by the Administrator to be available. They cannot even choose the districts in which the land is to be surveyed, nor the size of the blocks. The Ordinance in no way limits the powers of the Administrator to issue miners' rights to prospect on Crown lands any more than does the alienation of land in Queensland. Seeing that homestead selectors in Queensland can obtain as much as land as they desire at 2s. 6d. an acre, with healthy climate, police protection, schools, post and telegraph services, railway communication, and all the other advantages of civilisation, I consider that the price to be paid by the Syndicate for the land in the Possession, with the conditions attached, is fair value, as the country in my opinion is totally unsuited for settlement in the same way that settlement has been, and is now, taking place in Queensland and the other Australian Colonies.

As stated in my report of even date:—"I am quite convinced that the advantages that will accrue from the expenditure of capital, and the development of trade, will be more in favour of the Possession and of the Australian Colonies than of the Syndicate, who will necessarily have to take all the risks and expenses of pioneering, and can hardly expect to derive any profits from their undertaking for some years to come."

Sir William MacGregor has dealt with applications to take up land in large areas in the order in which they have been received, this being the first that was submitted to him in a specific and definite form. I wish here to state that the promoters of the Syndicate, when in Australia, assured me that they were extremely anxious to enlist the practical co-operation of the financial and commercial community of Australia; and with that object in view they, I believe, consulted with many prominent men both in Sydney and Melbourne.

The

The case of Mr. Bevan is referred to in the correspondence, but it is well summed up in Sir William MacGregor's letter of the 7th February, 1898, where he says:—

"The object of the letter of the 14th August of the Government Secretary to yourself was to elicit from you a definite proposal, in the absence of which the Government is not in a position to deal with the matter, except by the tedious process of a long correspondence of question and answer."

The fact of the matter is that Mr. Bevan has never formulated any business-like proposal, and it is important to notice that in none of his correspondence does he take the trouble to afford the Administrator any assurance or guarantee that he either has or could command the capital necessary to carry out his projects. If there are other capitalists willing to venture their money in the development of the Possession—although I may say that there is no evidence of such up to the present time—or if I may assume that others may be stimulated by the concessions granted to this Syndicate, then I would make the following suggestion, which I discussed with Sir William MacGregor during my recent visit to British New Guinea, before we had heard of the objections raised to the concessions made to the Syndicate, and which I am authorised to state has his full approval:—The Possession with its present income can only afford to employ one surveyor, which causes great delay in marking off lands suitable for cultivation and other purposes. Let the contributing colonies agree to an immediate excess expenditure sufficient to employ, say, half a dozen competent surveyors, each with his proper staff, who shall mark off with as little delay as possible 250,000 acres (out of the total area of 57,945,600 acres contained in the Possession) which could be put under offer to the Syndicate in terms of the Ordinance. If, in the exercise of their option, within six months thereafter they take up the whole of this land then the contract will be at an end so far as supplying land is concerned. On the other hand, whatever lands it may not be convenient for them to take up could be made available for other capitalists. I venture to say that no more surveys will be required for eight years, unless it may be to cut up into smaller areas the portions originally surveyed, the intention being in the first instance to survey the land in considerable blocks, say, 30,000 to 50,000 acres. Sir William pointed out to me localities like the Musa River, where he estimated that 100,000 acres could be so dealt with without in any way interfering with the native population. It would also be a great advantage that the surveyors should receive from the Administrator his personal instructions as to the districts most suitable for the purpose. If this recommendation is approved, prompt action will be necessary, as the Administrator's term of office will shortly expire, and it would be of great importance to the Possession to be able to utilise his knowledge and experience in this matter.

As the time has certainly arrived when the question of the development of the resources of the Possession must be taken up in some practical manner, and as the scheme authorised by the Ordinance in question is the only substantial proposal in this direction which has yet been submitted to the Administrator, it appears to me that the colonies objecting to the Ordinance should, before they agitate to inflict such a serious blow to the Possession as disallowance, formulate an alternative scheme to develop the resources of the country in some better way.

I have, &c.,

HUGH M. NELSON.

(50.)

The Prime Minister of Queensland to The Prime Ministers of New South Wales and Victoria.

Sir,

Chief Secretary's Office, Brisbane, 29 June, 1898.

Referring to my letter of the 17th instant, I now do myself the honor to forward, for the information of your Government, a printed copy of a letter, dated 18th instant, addressed to me by the Right Honorable Sir Hugh Nelson, containing certain observations on the correspondence which has taken place respecting the British New Guinea Ordinance No. 1 of 1898.

I also enclose a printed copy of report which Sir Hugh Nelson has been good enough to furnish on his recent visit to the Possession.*

I trust in the course of a few days to be in a position to address you at length on the question of the Ordinance mentioned in Sir Hugh Nelson's letter above referred to.

I have, &c.,

THOMAS J. BYRNES.

(51.)

The Chief Secretary to His Excellency the Governor.

My Lord,

Chief Secretary's Office, Brisbane, 30 June, 1898.

I do myself the honor to forward herewith, for Your Excellency's information, and for transmission to the Right Honorable the Secretary of State for the Colonies, copies (six) of a letter, dated 18th instant, addressed to me by the Right Honorable Sir H. M. Nelson, submitting certain observations on the correspondence which has taken place respecting the British New Guinea Syndicate Ordinance No. 1 of 1898.

I beg also to enclose, for a like purpose, a similar number of copies of a report which Sir Hugh Nelson has been good enough to furnish on the subject of the visit which, in company with Your Excellency, he recently made to British New Guinea.*

I would respectfully suggest that copies of both these documents should be sent to His Excellency Sir William MacGregor.

I have, &c.,

THOMAS J. BYRNES.

(52.)

The Chief Secretary to Sir Hugh Nelson.

Sir,

Chief Secretary's Office, Brisbane, 30 June, 1898.

I do myself the honor to acknowledge the receipt of your letter of 18th instant, in which you submit certain observations on the correspondence which has taken place respecting the British New Guinea Ordinance No. 1 of 1898.

I have, &c.,

THOMAS J. BYRNES.

(53.)

* See C.A. 52.—1898.

(53.)

The Secretary to the Prime Minister to The Secretary to the Agent-General.

Sir,

Chief Secretary's Office, Brisbane, 30 June, 1898.

I have the honor, by direction, to forward herewith, for the information of the Agent-General, a printed copy of the correspondence which has taken place relative to the concessions granted under the British New Guinea Ordinance No. 1 of 1898 to the British New Guinea Syndicate (Limited).

I enclose also a copy of a letter addressed by the Right Honorable Sir H. M. Nelson to the Prime Minister, submitting certain observations concerning the correspondence above referred to, and a copy of the report which Sir Hugh Nelson has been good enough to furnish on the subject of the visit which, in company with His Excellency the Governor, he recently paid to British New Guinea.

I have, &c.,

HENRY S. DUTTON.

(54.)

The Secretary to the Agent-General to The Secretary to the Prime Minister.

Sir,

Queensland Government Office, Westminster Chambers,

1, Victoria-street, London, S.W., 27 May, 1898.

I have the honor, by direction, to acknowledge the receipt, on the 20th instant, of the following telegram from the Chief Secretary:—

"Consider it better advise that public opinion excited by concessions made to New Guinea Syndicate it does not appear from documents dealing with subject that Governments of New South Wales and Victoria consulted in accordance with clause 20 Amended Proposals Administration New Guinea Sir Hugh Nelson who may throw light on this phase of subject out of the Colony As Governments referred to threaten to oppose completion of transaction I have asked Deputy Governor to communicate with Secretary of State for the Colonies by telegraph requesting that consent of Her Majesty be withheld in the meantime"

And to confirm the following reply sent by the Agent-General yesterday:—

"Colonial Office (has) telegraphed to the Governor about New Guinea Syndicate."

A copy of a letter received from the Colonial Office, with its accompanying copy of a telegram, which the Secretary of State for the Colonies has despatched to the Deputy Governor of Queensland on this subject, is enclosed herewith.

I have, &c.,

CHAS. S. DICKEN.

[Enclosure in No. 54.]

The Under Secretary of State, Colonial Office, to The Agent-General for Queensland.

Sir,

Downing-street, 25 May, 1898.

In reply to your letter of 20th instant, respecting the agreement entered into with the British New Guinea Syndicate by the Lieutenant-Governor of British New Guinea, with the cognizance and approval of the Government of Queensland, I am directed by Mr. Secretary Chamberlain to transmit, for your information, copy of a telegram which he has sent to the Deputy Governor of Queensland on the subject.

I am, &c.,

H. BERTRAM COX.

[Sub-Enclosure in Enclosure in No. 54.]

See No. 30.

(55.)

Telegram from The Prime Minister of Queensland to The Prime Ministers of New South Wales and Victoria.

Brisbane 2 July 1898.

AFTER very careful consideration of the question of the New Guinea Syndicate concessions I am of opinion that the issues involved which include the whole subject of the future administration of New Guinea are so numerous and of so complicated a character that any attempt to deal with them by correspondence must result in confusion and delay. The most satisfactory method of arriving at a solution of the important questions at stake appears to me to be by a conference of the Premiers of the contributing colonies and I earnestly commend the suggestion to your favourable consideration. If you agree the place of meeting is immaterial so far as I am concerned but in view of the meeting of our Parliament on 26th instant it is desirable from my standpoint that the conference should be held as soon as possible. I have telegraphed in similar terms to the Premier of { Victoria.

{ New South Wales.

LOWLES.

To the Chief Secretary.—I. I reserve any comments I may have to make.—T.J.B.

(62.)

Telegram from The Prime Minister of New South Wales to The Prime Minister of Queensland.

Sydney 6 July 1898.

Your telegram suggesting a conference of Premiers to New Guinea matters our general election is so near that a conference before it is practically impossible.

G. H. REID.

(63.)

The Prime Minister of New South Wales to The Prime Minister of Queensland.

Sir,

Sydney, 4 July, 1898.

I have the honor to acknowledge receipt of your letter of the 29th ultimo (No. 98.8803 N., 9814107), forwarding, for the information of my Government, a printed copy of a letter, dated 18th idem, addressed to you by the Right Honorable Sir Hugh Nelson, containing certain observations on the correspondence which has taken place respecting the British New Guinea Ordinance No. 1 of 1898.

I have, &c.,

G. H. REID.

(64.)

The Prime Minister of Victoria to The Prime Minister of Queensland.

Sir,

Melbourne, 5 July, 1898.

I have the honor to acknowledge, with thanks, the receipt of your letter, No. 4108, of the 29th ultimo, forwarding a printed copy of a letter, dated the 18th idem, addressed to you by the Right Honorable Sir Hugh Nelson in connection with the correspondence which has taken place relative to the British New Guinea Ordinance No. 1 of 1898; also a printed copy of a report furnished by Sir Hugh Nelson on his recent visit to the Possession.

I have, &c.,

GEORGE TURNER.

(65.)

The Chief Secretary to The Prime Minister of New South Wales.

Sir,

Chief Secretary's Office, Brisbane, 11 July, 1898.

I have the honor to acknowledge the receipt of your telegram of the 6th instant, informing me that, in view of the near approach of the general election in New South Wales, you will be unable to take part in the conference suggested by me of Prime Ministers of the contributing colonies on the question of the concessions to the British New Guinea Syndicate, and that of the future administration of the Possession. I have also received a telegram from the Prime Minister of Victoria, in which he states that owing to parliamentary business he would be unable to attend such a conference before the 17th instant, which would bring the meeting too near the date of the opening of the Queensland Parliament.

As it accordingly appears practically impossible to carry out my suggestion, I consider it necessary, in order to avoid further delay in dealing with the subject of the concessions to the Syndicate, to formally refer to the Governments of New South Wales and Victoria, under clause 20 of the "Amended Proposals for the Administration of British New Guinea," the Ordinance under which the concessions are granted, and to request that you will, at the earliest possible date, favour this Government with your views regarding the provisions of the Ordinance referred to, as they are desired to be amended by the Secretary of State for the Colonies.

I have, &c.,

THOMAS J. BYRNES.

(66.)

(66.)

The Chief Secretary to The Prime Minister of Victoria.

Sir,

Chief Secretary's Office, Brisbane, 11 July, 1898.

I have the honor to acknowledge the receipt of your telegram of the 4th instant, informing me that, for the reasons therein given, you would be unable to take part before the 17th instant in the conference, suggested by me, of Prime Ministers of the contributing colonies on the question of the concessions to the British New Guinea Syndicate, and that of the future administration of the Possession.

As the date named by you is too near that of the opening of the session of Parliament here to allow of my being absent from Queensland at that time, and as, owing to the impending general election in New South Wales, Mr. Reid is unable at present to leave his colony, it appears to be practically impossible to carry out my suggestion, and I therefore consider it necessary, in order to avoid further delay in dealing with the subject of the concessions to the Syndicate, to formally refer to the Governments of New South Wales and Victoria, under clause 20 of the "Amended Proposals for the Administration of British New Guinea," the Ordinance under which the concessions are granted, and to request that you will, at the earliest possible date, favour this Government with your views regarding the provisions of the Ordinance referred to, as they are desired to be amended by the Secretary of State for the Colonies.

I have, &c.,

THOMAS J. BYRNES.

(67.)

Telegram from The Prime Minister of Queensland to The Prime Ministers of New South Wales and Victoria.

Brisbane 11 July 1898.

As there appears no chance at present of arranging a conference to discuss the British New Guinea question I am writing you to-day formally referring to you in terms of clause 20 of Amended Proposals the Ordinance under which the concessions are granted and requesting you to favour this Government with your views regarding its provisions as they are desired to be amended by the Secretary of State. I shall be glad to receive your reply at the earliest possible date.

THOMAS J. BYRNES.

(68.)

Sydney 12 July 1898.

MUCH regret impossible to confer just now Will give best attention to your letter New Guinea.

G. H. REID.

(69.)

The Prime Minister of New South Wales to The Prime Minister of Queensland.

Sir,

Premier's Office, Sydney, New South Wales, 20 July, 1898.

I have the honor to acknowledge the receipt of your letter of the 11th instant (98, 101 Chf. Secs., 98172) requesting to be favoured with the views of this Government regarding the provisions of the Ordinance under which the concessions to the British New Guinea Syndicate are granted.

I have, &c.,

ANDREW GARRAN,

For the Premier.

Telegram from The Home Secretary, Queensland, to The Premier of New South Wales.

20 May, 1898.

Re British New Guinea Syndicate. It does not appear from papers connected with matter that requirements of clause 20 of amended proposals for administration of New Guinea have in this instance been complied with, but Sir Hugh Nelson, who was Premier when negotiations between Sir William MacGregor and Syndicate were concluded, and who might throw some light on this matter, is now absent in New Guinea. It would therefore appear desirable to await his return before taking further steps, but I have asked Deputy-Governor to telegraph Secretary of State requesting him to advise Her Majesty to withhold assent to Ordinance in the meantime.

JAMES R. DICKSON.

Telegram from The Premier of Victoria to The Premier of New South Wales.

23 May, 1898.

I HAVE cabled to our Agent-General as follows, namely:—Ask Secretary of State for Colonies advise Queen withhold for the present assent to British New Guinea Ordinance No. 1 of 1898, enabling Syndicate acquire 250,000 acres land. We were not consulted, as required by clause 20 of amended proposals for administration of the Possession, and, as matter very important, desire opportunity of carefully considering measure.

GEORGE TURNER.

Telegram from The Premier of New South Wales to The Premier of Victoria.

25 May, 1898.

CONFIDENTIAL. I communicated with Agent-General requesting him to ask Colonial Office to withhold assent to Ordinance. After doing that I got message from Queensland stating they had through Deputy-Governor cabled Home asking that the Queen's assent should not be given until matter had been inquired into.

Cablegram

Cablegram from The Acting Agent-General, London, to The Premier of New South Wales.

25 May, 1898.

REFERRING to your telegram of 19th instant, Colonial Office asks what are specific grounds upon which your Government object to agreement; says administration of New Guinea was discussed at Conference Premiers in February last without exception being taken to agreement, which had then become common knowledge. Secretary of State for the Colonies fears any attempt to reconsider the question at this late date might lead to serious complications, and suggests your Government please communicate with Government Queensland at once on the subject.

Cablegram from The Premier of New South Wales to The Acting Agent-General.

30 May, 1898.

AGREEMENT was not considered at Conference, nor did the Premiers know of it. Some of the provisions are so extraordinary that they have excited strong indignation. Besides, the terms of the law as per amended agreement scheduled to Queensland Act requiring consultation with us have not been complied with.

The Acting Agent-General to The Premier of New South Wales.

Sir,

Westminster Chambers, 27 May, 1898.

Referring to your telegram of the 19th instant, requesting me to make representations to C.O. to A.A.-G., the Colonial Office in order to prevent the allowance of an Ordinance passed by the Administrator of British New Guinea authorising a land transaction of great magnitude, I have the honor to forward herein a copy of a letter addressed to me by the Secretary of State for the Colonies in reply to my communication on the subject. 4,761, 25th May.

I telegraphed to you on the 25th instant the purport of the Colonial Office letter, but have since received a note from that office stating that the Conference of Premiers whereat the administration of New Guinea was discussed took place in January last, and not in February, as stated in their letter of the 25th instant.

I have, &c.,

DANIEL COOPER.

The Under Secretary of State, Colonial Office, to The Acting Agent-General for New South Wales.

Sir,

Downing-street, 25 May, 1898.

In reply to your letter of the 19th instant, enclosing copy of a telegram from the Premier of New South Wales, respecting the agreement made by the Government of Queensland and the Lieutenant-Governor of British New Guinea with the British New Guinea Syndicate, I am directed by Mr. Secretary Chamberlain to acquaint you that he would be glad to be informed what are the specific grounds upon which the Government of New South Wales objects to the agreement in question.

2. It was concluded in December last by the Lieutenant-Governor, with the full cognisance and approval of the Queensland Government; and the whole question of the administration of the Possession was subsequently discussed at the Conference of Premiers at Melbourne, with Sir William McGregor, in February* last, without any exception being taken to the agreement, which had then already become a matter of common knowledge.

3. In these circumstances, Mr. Chamberlain fears that any attempt to reconsider the matter at this late date may give rise to serious complications, and he would suggest that the Government of New South Wales should place themselves at once in communication with the Government of Queensland on the subject.

I am, &c.,

H. BERTRAM COX.

* Corrected by subsequent note to January.

Cablegram from The Acting Agent-General, London, to The Premier of New South Wales.

19 May, 1898.

I HAVE received your telegram of to-day about British New Guinea. I have communicated with Colonial Office.

The Deputy-Governor of Queensland to The Governor of New South Wales.

Sir,

Government House, Brisbane, 25 May, 1898.

I have the honor by direction of the Secretary of State for the Colonies to enclose copies of telegrams sent by me to him on the 20th May, and of his reply received to-day.

I have, &c.,

S. W. GRIFFITH.

20 May.
20 May.
25 May.

The Deputy-Governor of Queensland to The Secretary of State for the Colonies.

Translation.

20 May, 1898.

WITH reference to British New Guinea Ordinance, enclosed in Despatch No. 19, of 5th April, my Government requests me to inform you that, as far as can be ascertained, Governments of New South Wales and Victoria were not consulted with respect to terms of contract with Syndicate prior to Governor of Queensland giving directions for introduction of Ordinance by Lieutenant-Governor of British New Guinea as required by provision of clause 20, British New Guinea amended proposals. Government of New South Wales, Government of Victoria now remonstrate strongly. Nelson, who was then Prime Minister, now absent from colony. My Government requests that question of exercise of power of disallowance may be reserved until there is opportunity for all three Governments expressing opinion on Ordinance for consideration of Her Majesty's Government.

S. W. GRIFFITH,

Deputy-Governor.

The

The Deputy-Governor of Queensland to The Secretary of State for the Colonies.

Translation.

20 May 1898.

CONFIDENTIAL with reference to my telegram of to-day having regard to arrangements for future administration. Strongly recommend assent to request of my Government. Strong feeling growing up bearing on the subject.

S. W. GRIFFITH.

The Secretary of State for the Colonies to The Governor of Queensland.

London 24 May 1898.

REFERRING to your telegram of 20th May, on receipt of Governor's Despatch No. 14 of 5th March, agreement and draft Ordinance prepared with approval of Queensland Government were carefully considered. Draft Ordinance did not appear to sufficiently protect Government of Possession, and I intimated to Syndicate that I should require modifications. This was accepted by them, and on 3rd May I intimated to them, on receipt of Ordinance giving effect to amendments, I would at once submit to Her Majesty for approval (see my Despatch No. 21 of 3rd May). I do not see that your Ministers can now oppose allowance of Ordinance without breach of faith, and I presume Nelson and MacGregor fully informed Premiers Victoria and New South Wales at Melbourne Conference as to agreement, which was matter of notoriety, and was, I am informed, freely discussed by agents for Syndicate with prominent public men and Ministers at Sydney and Melbourne. You should communicate all information concerning matter and this telegram to Government of New South Wales and Government of Victoria.

CHAMBERLAIN.

Cablegram from The Acting Agent-General for New South Wales, London, to
The Premier of New South Wales.

7 June 1898.

In the House of Commons yesterday in reply to a question, Under Secretary of State for the Colonies stated New Guinea Conference concluded after full discussion at Brisbane. On being submitted to him with draft Ordinance he intimated to promoters and Queensland Government that subject to certain modifications he would be prepared to advise Her Majesty not to disallow it. Syndicate has accepted conditions. On receipt of amended Ordinance it will be his duty to submit it as promised. Say it is for Queensland Government not for him to consult Governments other contributing colonies on matters affecting administration British New Guinea. No reply received from Colonial Office your telegram of 30th ultimo.

Telegram from The Premier of Victoria to The Premier of New South Wales.

9 June, 1898.

New Guinea Syndicate land concessions. It is reported in *Age* to-day that you said that, as a matter of statute law, the proposals had to be submitted for the approval of the authorities in the contributing colonies. Do you refer to clause 20 of the amended proposals for the administration of British New Guinea, which reads thus: "The Government of Queensland to consult the Governments of the other contributing colonies in all matters other than those of ordinary administration, and to report to them all action taken." That clause being part of Schedule to the British New Guinea-Queensland Act of 1887 is statute law in Queensland. Is it so also in New South Wales, or do you refer to some other enactment? If the latter, please give me a reference to it, as I desire to co-operate with you.

Telegram from The Premier of New South Wales to The Premier of Victoria.

10 June, 1898.

NEW GUINEA Land Syndicate. My allusion was to the Act you quote from.

The Home Secretary, Queensland, to The Premier of New South Wales.

Sir,

Chief Secretary's Office, Brisbane, 10 June, 1898.

With reference to previous correspondence on the subject of the concessions granted by the Government of British New Guinea to the British New Guinea Syndicate (Limited), I now do myself the honor to forward to you, for the information of the Government of New South Wales, a copy of a despatch dated 3rd May ultimo, addressed by the Right Honorable the Secretary of State for the Colonies to His Excellency the Governor of Queensland, transmitting copies of certain correspondence which has taken place between the Colonial Office and Messrs. Minet, Pering, Smith, and Company, as representing the British New Guinea Syndicate, with regard to the amendments which Mr. Chamberlain considers necessary in the Ordinance by which effect is given to the agreement arrived at between the Syndicate and the Government of the Possession.

I have, &c.,

For the Chief Secretary,
JAMES R. DICKSON.

The Secretary of State for the Colonies to The Governor of Queensland.

My Lord,

Downing-street, 3 May, 1898.

I have the honor to acknowledge the receipt of your Despatch No. 14 of the 5th March, transmitting correspondence as to the agreement between the Government of British New Guinea and the Syndicate, together with the draft of an Ordinance to give effect to that agreement.

2. From the enclosed copies of correspondence with the solicitors acting for the Syndicate, you will perceive that the Ordinance required amendment in certain important particulars, and that the Syndicate has accepted the amendments, which should be embodied in the Ordinance, or made the subject of an amending Ordinance, as the case may be.

3. The subsection proposed in the solicitors' letter of the 25th ultimo, though in substance sufficient, appears to require more precision in its language before it is embodied in the law.

4. I have caused the Syndicate's solicitors to be informed that, on the understanding that the Ordinance is amended as required, I shall be prepared to at once submit it for Her Majesty's approval.

I have, &c.,
CHAMBERLAIN.

The Under Secretary of State, Colonial Office, to Messrs. Minet, Pering,
Smith, & Co.

Gentlemen,

Downing-street, 22 April, 1898.

With reference to the letter from this Department of the 12th ultimo, I am directed by Mr. Secretary Chamberlain to inform you that he has now received from the Governor of Queensland a copy of the provisional agreement between the Administrator of British New Guinea and the British New Guinea Syndicate, and the draft of an Ordinance intended to give effect to that agreement, and has carefully considered those documents with your letters of the 18th of February, and the 16th and 28th ultimo.

2. The agreement between the Government of British New Guinea and the Syndicate receives Mr. Chamberlain's approval generally, but he considers it necessary that the Ordinance to carry out the agreement, of which you have no doubt received a copy, should be amended in the following particulars:—

3. The Government is not sufficiently protected by the provisions of section 5 of the Ordinance in regard to the question which may arise as to the suitability of the lands made available for purchase by the Company. It is necessary that provision should be made for the question of the decision of the suitability if and whenever it arises by arbitration; and clause 5 of the draft should be amended accordingly.

4. Clause 5, paragraph (2), goes beyond the agreement with the Syndicate, in extending the sole right of the Company to purchase lands until such time as the Company has purchased the total area of land which the Company is entitled to purchase. The intention, as expressed in the memorandum of agreement, is that the right should survive until such time as suitable lands, amounting in the aggregate to 250,000 acres, shall have been made available for occupation; and the clause must be amended accordingly.

5. The absence of any provisions for the survey of the lands purchased by the Company would give rise to serious difficulty hereafter, and it is necessary that the Ordinance should provide that before a Crown grant is finally issued in respect of any lands in respect of which a provisional grant has been made, such lands must be surveyed at the joint expense of the Government and the grantee, and that the final grant is to be issued for the area comprised within the boundaries set forth in the provisional grant, only on the condition that any excess of the area stated in the provisional grant is to be paid for by the grantee, and that any deficiency is to be made up by the Government either by the grant of other suitable lands, or by restoring a proportionate part of the money paid under the provisional grant.

6. The provision for payment of royalty on the net value of gold and other similar metals does not commend itself to Mr. Chamberlain; but he is not prepared to insist on his objection to the provision if a clear and satisfactory understanding can be arrived at with the Company, and expressed in the Ordinance, as to the meaning of net value under the Ordinance, and upon the provision of a proper system of ascertaining the net value of metals won, taken, or acquired.

7. As regards the words in clause 3, subsection (b) of the Memorandum of Association of the British New Guinea Company, to which you call special attention in your letter of the 18th February, I am to say that it appears to be immaterial whether they are inserted or not, as they would be implied in any case.

8. Mr. Chamberlain will await your reply to this letter before communicating with the Governor of Queensland.

I am, &c.,
C. P. LUCAS.

Messrs. Minet, Pering, Smith, & Co. to The Under Secretary of State, Colonial
Office.

Sir,

81, Cannon-street, London, E.C., 25 April, 1898.

We beg to acknowledge the receipt of your letter, No. 7,836-98, of the 22nd instant, addressed to us by direction of Mr. Secretary Chamberlain.

2. We have lost no time in communicating with those members of the Syndicate who have been entrusted by the subscribers generally with the conduct of its affairs, and after careful consideration given by them to your letter, we have been directed to state as follows:—

3. The Syndicate is in entire accord with Mr. Secretary Chamberlain in regard to clause 5 of the Ordinance. It will fully meet the views of our clients if a subsection to the following purpose is added to the clause:—"In the event of any difference of opinion arising between the Government and the Company as to the suitability of lands made available for the exercise of the option secured to the Company, such difficulty shall, if need, be referred to the arbitration of competent persons selected by the Government and the Company respectively."

4. The Syndicate is in entire accord with Mr. Secretary Chamberlain in his construction of the Memorandum of Agreement, as purported to be dealt with by paragraph 2, clause 5, of the Ordinance, and consent to the amendment suggested, so long as it is clearly and unmistakably admitted that no person or persons can be dealt with by the Government or accorded privileges similar to those conveyed to the Company until such time as suitable lands, amounting in the aggregate to 250,000 acres, shall have been made available, and, in consequence thereof, purchasable by the Company. Our clients understand that the point of Mr. Secretary Chamberlain's comment is that delay might be made by the Company in purchasing suitable lands made available, and thus fetter the Government in after operations for an indefinite period. That would, of course, be unfair to the Government; but, on the other hand, the

Company

Company must be protected against having the aggregate area of land or considerable portions thereof submitted to it as being suitable and available, and be expected to purchase the same before reasonable time has been allowed for examining into and judging of such suitability. Our clients have in mind the expectation that it is very likely the Company will, in many instances, be the first to discover suitable areas for occupation, in which case it could, and no doubt would, take the initiative in action, as prescribed by paragraph 1, clause 8, of the Ordinance.

4. The Syndicate is in entire accord with the views expressed in paragraph 5 of your letter.

5. The Syndicate is of opinion that paragraph 6 of your letter is clearly answered by the enclosed memorandum they have obtained from their accredited agents on the subject.

6. The general contents of your letter being dealt with in the foregoing paragraph 3, we are desired to request Mr. Secretary Chamberlain's attention to the following facts and circumstances. A cable message has been received by our clients from the Governor of Queensland, dated 25th March, to the following effect:—"New Guinea Ordinance passed."

Since then the subscribers to the Syndicate have met, and further contributed the moneys necessary for all preliminary payments in connection with the suitable lands at this moment available for occupation, as referred to in our letter to your Department of the 28th ultimo; and, furthermore, considerable progress has been made in the direction of obtaining guaranteed capital for the Company proposed to be formed. If operations have to be suspended until such time as the Secretary of State can communicate with and receive answers from the Government of British New Guinea the delay will inevitably give rise to serious complication.

By the last inward Australian mail our clients are advised that certain parties in that continent have become acquainted with the nature of the negotiations which have passed, and are moving to seek privileges from the Government of British New Guinea in anticipation of the Secretary of State's approval to the Ordinance given to this Company. Our clients anticipate, and, indeed, are absolutely convinced, that they will meet with nothing but straightforward treatment on the part of the Government of the Colony and the Secretary of State, but there is the possibility that unexplained delay in the conclusion of the business might afford pretexts in some quarters for discrediting the good faith and intentions of our clients, who are anxious that practical work should be commenced at the earliest possible moment.

We are, therefore, to suggest that the difficulty might be effectually met by the Secretary of State formally notifying his approval of the Ordinance, subject to the details of amendments now agreed (the same to be set out in the form in which they could be added as subsections to the Ordinance) being accepted. We would then, on behalf of our clients, transmit a formal acknowledgment of the notification and full acceptance of the amendments. The adhesion by the Government of British New Guinea thereto would go without question.

7. The Syndicate is prepared to lodge with the Government of British New Guinea at any moment the preliminary purchase money for the lands already available.

We have, &c.,
MINET, PERING, SMITH, & CO.

Memorandum.

British New Guinea Syndicate.

25 April, 1898.

THE purport of paragraph 2, clause 16, of the British New Guinea Government Ordinance was very fully discussed with the Administrator, and he fully agreed illustrations of the application and meaning of net value propounded in the following sense by Sir Somers Vane:—"Net value is to be regarded as the world's general marketable value of the particular product per ounce or per ton at the time it is shipped from the Colony in accordance with its quality. It is assumed that the Company would be required by the Government to supply returns of its exports under the head of minerals, &c.; the Company would declare in detail the quantity and standard of quality of such exports, and the net royalty would be 2½ per cent. upon the market value of the product then existing in whatever part of the world it might be consigned to."

MINET, PERING, SMITH, & CO.

The Under Secretary of State, Colonial Office, to Messrs. Minet, Pering, Smith,
and Company.

Gentlemen,

Downing-street, 3 May, 1898.

I am directed by Mr. Secretary Chamberlain to acknowledge the receipt of your letter of the 25th ultimo, accepting the amendments which he considered necessary to be made in the British New Guinea Syndicate Ordinance of 1898.

A subsection to the effect of that submitted in the third paragraph of your letter will be added to clause 5 of the draft Ordinance, but as the interest of the Government requires that the option granted to the Syndicate should be exercised within a reasonable time, it will be desirable also to fix a reasonable limit to the time within which the arbitrators shall be required to report on any case referred to arbitration under the new subsection.

Mr. Chamberlain considers that "net value" should be more clearly defined in the Ordinance itself, and he apprehends it will meet your view if it is declared to mean the wholesale market price of any given commodity in the market to which it is consigned, or in the London market, as you prefer.

As the amendments in the draft Ordinance are substantially accepted by the Syndicate, Mr. Chamberlain has transmitted copies of the correspondence to the Governor of Queensland, and has informed him that if the Ordinance is passed by the Legislature of British New Guinea containing the amendments required, he will at once submit it for Her Majesty's approval.

It does not appear necessary to draft the amendments here.

I am, &c.,
H. BERTRAM COX.

Cablegram

Cablegram from The Acting Agent-General to The Premier of New South Wales.

11 June, 1898.

REFERRING to your telegram of 30th ultimo, I have received a letter from the Colonial Office stating matter one for your Government. Settle with Queensland Government. Latter responsible for agreement. Letter repeats terms reply recent question in the House of Commons, and adds matter now rests entirely with Queensland Government and Lieutenant-Governor, New Guinea.

Telegram from The Premier of Victoria to The Premier of New South Wales.

10 June, 1898.

I HAVE to-day cabled to our Acting Agent-General as follows:—New Guinea Syndicate.—Make again strong protest against ratification of Ordinance clause 20 of amended proposals for administration. Requires Queensland consult other contributing colonies on all matters other than ordinary administration. This was not done, nor did Queensland give us any information whatever prior to passing Ordinance, neither have contributing colonies had any opportunity to ascertain or consider amendments proposed by Imperial Government. As we have already expended £50,000 in connection with New Guinea, there is strong feeling here that before final ratification contributing colonies should be afforded opportunity of knowing all facts, and fully considering matter as provided in clause 20 above-mentioned, which being schedule of Queensland Act has force of law. If we are not to be consulted with regard to such important questions it is useless our spending money in connection with New Guinea.

GEORGE TURNER.

Minute by The Governor of New South Wales to The Premier of New South Wales.

11 June, 1898.

HIS Excellency the Governor begs to state, for the information of Ministers, that, upon the receipt of the telegram of the Right Honorable the Prime Minister, dated Nowra, the 11th of June, he transmitted to the Secretary of State for the Colonies a telegraphic despatch in the following words:—

“Ministers consider that action of Queensland, in not consulting New South Wales and Victoria, New Guinea Syndicate, is violation of law. Strongly object to some of conditions.”

HAMPDEN,
Governor.

The Acting Agent-General to The Premier of New South Wales.

Sir,

Westminster Chambers, 10 June, 1898.

In continuation of my letter of the 27th ultimo, P. 135/98, and with reference to your telegram of 30th idem, on the subject of the proposed concession to the British New Guinea Syndicate, I have the honor to enclose herewith copies of my telegrams to you of the 7th and 9th instant, together with the letters which have passed between myself and the Colonial Office hereon.

Copy
correspondence.

I also enclose a newspaper cutting giving the reply of the Secretary of State for the Colonies to a question in the House of Commons on the subject, respecting which I telegraphed to you on the 7th instant.

I have, &c.,
DANIEL COOPER.

The Acting Agent-General to The Under Secretary of State, Colonial Office.

Sir,

Westminster Chambers, 9, Victoria-street, London, S.W., 1 June, 1898.

In continuation of my letter of the 27th ultimo, in which I informed you that I had telegraphed to the New South Wales Government the purport of Mr. H. Bertram Cox's letter of the 25th idem, No. 11,228/98, asking to be informed what are the specific grounds upon which they object to the agreement made by the Government of Queensland and the Lieutenant-Governor of British New Guinea with the British New Guinea Syndicate, I have now the honor to enclose herein a copy of the telegraphic reply of the Honorable the Premier and Colonial Treasurer, Sydney, stating that the agreement in question was not considered at the Conference of Premiers at Melbourne, nor did the Premiers know anything of it. My Government also state that some of the provisions of the agreement are so extraordinary that they have excited strong indignation. Further, that the terms of law as per amended agreement schedules to the Queensland Act requiring consultation with the New South Wales Government have not been complied with.

In view of these objections, I beg again respectfully to ask that the Secretary of State for the Colonies will be pleased to prevent allowance of the New Guinea Ordinance on the subject until the question has been maturely considered.

I forward herein a copy of the telegram which I addressed to my Government on the 25th ultimo.

I have, &c.,
DANIEL COOPER.

The Under Secretary of State, Colonial Office, to The Acting Agent-General.

Sir,

Downing-street, 8 June, 1898.

I am directed by Mr. Secretary Chamberlain to acknowledge the receipt of your letter of the 1st instant, respecting the agreement made by the Lieutenant-Governor of British New Guinea and the Government of Queensland with the British New Guinea Syndicate.

In reply, I am to state that the matter is one for the Government of New South Wales to settle with the Government of Queensland, which is responsible for the agreement.

I am to add that the Government of Queensland has been fully informed of Mr. Chamberlain's views in regard to the agreement and the Ordinance which has been passed to give effect to it, and Mr. Chamberlain has intimated to the Government of Queensland and the Syndicate that if certain modifications which he has desired in the Ordinance are made, he will be prepared to advise Her Majesty not to disallow it. The matter, therefore, now rests entirely with the Government of Queensland and the Lieutenant-Governor of New Guinea.

I am, &c.,
H. BERTRAM COX.

The Times, 7th June, 1898.

ENTERPRISE IN NEW GUINEA.

MR. HOGAN (Tipperary, Mid.) asked the Secretary of State for the Colonies whether he had received an application from a British syndicate for the concession of a large tract of territory in New Guinea; whether he could state the actual area applied for, and the purposes for which it was sought; and whether he had arrived at a final decision in the matter; and, if not, whether he would consult the Australian Governments that provided the funds for the administration of British New Guinea, and ascertain their views on the proposal?

MR. CHAMBERLAIN (Birmingham, W.): An application for a concession in British New Guinea was made to me last year on behalf of a British syndicate, and the promoters were referred by me to Sir Hugh Nelson, the Prime Minister of Queensland, who was then in this country, as the Government of that colony is primarily responsible for the administration of New Guinea. Two gentlemen deputed by the Syndicate proceeded with him on his return to Queensland to discuss the matter with the Government of that colony and the Lieutenant-Governor of British New Guinea. An agreement, giving the Syndicate an option to purchase suitable lands to the extent of 250,000 acres, for the purpose of cultivation of rubber and other products, or for mining, was concluded, after full discussion, at Brisbane, and on its being submitted to me, with the draft of an Ordinance of the Legislature of New Guinea to give effect to it, I intimated to the promoters and to the Government of Queensland that, subject to certain modifications required to protect the Government of British New Guinea, I should be prepared, on receiving an Ordinance passed by the local Legislature with the amendments required, to advise Her Majesty not to disallow it. The Syndicate have agreed to my conditions, and if and when I receive the amended Ordinance it will be my duty to submit it for Her Majesty's pleasure as promised. It is for the Government of Queensland, not for me, to consult the Governments of the other contributing colonies on matters affecting the administration of British New Guinea.

MR. TOMLINSON (Preston): I should like to ask whether this reply will be reported in full in the newspapers, because we have not heard a word. ("Hear, hear!" and "Oh!")

MR. CHAMBERLAIN: Yes, Sir; but it is a very long one.

The Rev. Dr. Bevan to The Premier of New South Wales.

British New Guinea Concession.

Sir,

"Bella Vista," Parliament Place, Melbourne, 23 May, 1898.

I have the honor to enclose herewith, for your information, copy of letter which I have addressed to Sir George Turner on the subject.

I have, &c.,

THEODORE F. BEVAN.

The Rev. Dr. Bevan to The Premier of Victoria.

British New Guinea Concession.

Sir,

"Bella Vista," Parliament Place, Melbourne, 21 May, 1898.

I have the honor, in reference to *The Age* article of 16th instant, based on information and suspicions volunteered by me, to give a little further information *re* the suggested foreign influence. In doing so it is only fair to state that I do not for one moment suspect the integrity of any name that has been mentioned, or that I may mention, in this communication. If my theory is correct, the knowledge of the plot is confined, and will remain confined, to one or two men in a certain European capital.

Throughout my connection with New Guinea I have never forgotten the means by which the Germans obtained foothold in that part of Australian territory. In my interview with you of 11th January I made it plain that I should not have approached them at all save for the difficulty of doing anything with Sir Wm. MacGregor.

My negotiations with the Neu Guinea Compagnie, Berlin, have (N.B., just as this other enterprise has come to a head) been temporarily adjourned, on the pretext that they are negotiating for the transfer of their sovereign rights to the Imperial German Government; also owing to difficulties as to duration of lease and power of disposal.

They made me recently, as you may remember, an offer of a provisional concession of some 2,000 square miles, under conditions upon which one could have been ousted at any moment. After these disclosures they will not be any the readier to meet me half way, but that cannot be helped.

My discovery in 1887 of the Aird and especially the Purari Rivers provides the readiest means of access to a promising German district from which they are at present more or less shut out on their side by mountain walls. The notifications of these great rivers had, of course, previously been seen where they disembogue into 60 miles of the Papuan Gulf, but the real rivers themselves back from the coast had neither been ascended nor explored. They were erroneously confused with and conjectured to be affluents of the Fly River (*vide* "Sunday at Home," Religious Tract Society, London, volume for 1887, page 538, article by Rev. James Chalmers). My negotiations with the Neu Guinea Compagnie brought this fact prominently under the notice of the Berlin Foreign Office. In 1896 the Germans sent out an expedition from Stephansort (Kaiser Wilhelm's Land) towards the country at the head of the Purari. In October last a more ambitious enterprise with a similar objective was projected, also from their capital (Stephansort), distant probably in a right line less than 100 miles from the head waters of the Purari River.

In March, 1897, my father-in-law, Mr. James C. Taylor, of Sydney (who knew my objects, and that I had seen the German Consul here), visited Adelaide, and at the "York Hotel" a Mr. W. D. Bohm met him, and represented that he was connected with the Hirsches and Rothschilds. Through this introduction Mr. Bohm corresponded and asked me, amongst other things, "Can you secure any command of River Purari?" Mr. Bohm went to Europe in August.

As late as 14th January, 1898, a Mr. J. Stuart Thom, solicitor, of Athenæum Chambers, 11, Castlereagh-street, Sydney, wrote me a fishing letter by instruction of a London client (not named), who represented he had large influence with the German Government, and was often in Berlin. To this letter, of course, I made no reply.

In reference to an alternative proposal I recently made the Neu Guinea Compagnie, I was asked by a consular representative here whether German influence would be allowed on the Board. I learnt incidentally that the Neu Guinea Compagnie was restricted to German directors, and the thought occurred

occurred to me when I heard the terms and scope of Sir Wm. MacGregor's concession, whether similar British provision had been made. Otherwise, it is easy to see what a cheap opportunity might be afforded, not only of spying out the land, but also of securing eligible foothold which could be used to further either speculative or political ends. Even if worked wholly under an English exterior, the inspiration and the result quite feasibly might still be foreign.

While idle fears should not be allowed to retard the genuine development of the Possession, it must be remembered that the subtle quality of European diplomacy and the insidious character of foreign aggression have already been fully exemplified in New Guinea. New Guinea is not only part and parcel of the Australian geographical system, but is our natural limit boundary to the north. Just as the Indian Pamirs have been described as "the roof of the world," so are the Papuan Alps "the roof of Australia." It is the only available base close at hand for future foreign aggression. A worthy inspiration for our statesmen is the thought that not until the whole of it is British territory will the Australian dominion become intact.

I have, &c.,

THEODORE F. BEVAN.

The Rev. Dr. Bevan to The Premier of New South Wales.

British New Guinea.

"Bella Vista," Parliament Place, Melbourne, 16 June, 1898.

Sir,

I have the honor to enclose herewith copy of letter, which please substitute for the one sent to you yesterday.

You will, I believe, credit me with entirely subordinating the personal feeling. The evidence I adduce is intended merely to show that autocratic power can seldom be placed in infallible hands.

The stand taken by New South Wales is worthy of Mr. G. H. Reid.

Personally, I have no grudge or ill-will against Sir William MacGregor.

I have, &c.,

THEODORE F. BEVAN.

The Rev. Dr. Bevan to The Governor of Victoria.

Corrected and enlarged late fee letter forwarded to the Governor of Victoria, London, per R.M.S. "Cuzco," 15th June, 1898. (Postscript explained that time did not then permit the necessary alterations.)

British New Guinea.

"Bella Vista," Parliament Place, Melbourne, 15 June, 1898.

Your Excellency,

Herewith I beg to enclose cutting from *Age*, of 9th instant. Therein I state that the land on which the Syndicate has paid a deposit is not suitable for European settlement. It is malarial tropical land near the coast; to place European emigrants whereon (as hinted in the Ordinance) would be to drive them to the shambles, and draw down upon us the contempt and indignation of the civilised world.

I venture to express the opinion that Sir William MacGregor's faults are more those of the head than of the heart. He was brought up in the "Lilliputian" school of Fiji. What natives the administration has succeeded in getting much influence over—instead of being made indirect taxpayers, as they might be, in return for the advantages of the "Pax Britannica"—are liable to trial and imprisonment for what I think are merely peccadilloes in a fine permanent race of people, but one degree removed from a state of absolute savagery. (In official report for year ending 30th June, 1897, pages vi to ix, it will be seen that out of a total of 420 trials, convictions were registered amongst other offences for breaches of Roads and Burials Regulations, infringement of Beche-de-mer and Pearl Shell, Constabulary and Wild Birds Ordinances, disobeying Magistrates' orders, using threatening language, breaking out of gaol, and spreading lying reports and other trifles, when viewed from the abovementioned standpoint).

There are in New Guinea healthy sites, fresh-water rivers of the first magnitude, and payable resources, which, I believe, can be utilised for the equal advantage of both classes of Her Majesty's subjects, viz., Natives and Europeans.

I do not care to speak about myself, but there is one point that is not universally understood. There is no doubt that I am the actual discoverer of the two great rivers known as the Aird and Purari. In my hurriedly-published book in 1890, I said that Captain Blackwood, of H.M.S. "Fly," ascended the Aird for 20 miles. In Jukes' book, which describes the voyage, there is a map which clearly shows that they did not even reach Aird Hill. The channel they ascended being merely a salt-water estuary in the deltaic system of a river which the natives did not allow them to reach, and, therefore, they did not see.

As regards the Purari, first entered by me of any European *viâ* Bald Head in the early part of 1887, the Rev. James Chalmers, who had, like many others, seen the notifications of great fresh-waters rivers (in flood-time, palm-nuts, tree-trunks, and layers of fresh water are washed right out to sea) at the head of the bight of the Papuan Gulf—expressed the opinion, in an article published after my discovery, that all the rivers round Bald Head were in the delta of "the Fly River, which drains all Central New Guinea" (*Sunday at Home*, 1887, p. 538).

Sir William MacGregor does not bring these facts out very clearly, but, while recognising his many great qualities, I am well aware of his predilections. (In his official reports he almost ignores me as regards the Aird. In reference to the Purari, however, in a despatch to the Governor of Queensland, dated Port Moresby, 3rd May, 1893, he states: "Mr. Theodore Bevan was the first to ascend, to examine in detail, and to map these deltaic arms, and to see, traverse, and chart any part of the river itself." In a pamphlet published for sale by the London Missionary Society, being an report of an address on "Missions and Missionaries," delivered by Sir William MacGregor in Edinburgh on 11th March, 1895, my name is never even mentioned, but instead a statement is made that the Rev. James Chalmers "is the original discoverer of the great Purari River.")

The Aird and Purari are, to my thinking, the two most important strategic rivers in New Guinea, and I was quick to perceive from their general trend and magnitude, that their head waters must be either near or actually in Kaiser Wilhelm's Land.

The "Fijian" policy would appear to have entirely broken down as applied to Austral New Guinea in pretty well every respect. Please make any use of all this information in the public interest.

I have, &c.,

THEODORE F. BEVAN.

Telegram from The Premier of New South Wales to The Premier of Queensland.

(Copy of same also sent to Premier of Victoria.)

13 June, 1898.

UNDERSTAND Ordinance embodying Syndicate land grant goes back to New Guinea for amendment. Surely Administrator will observe terms of New Guinea Act amended proposals, and, before going further, ask the opinion of contributing Governments through you. Victoria has sent another strong message Home, and we feel as strongly here, of which Colonial Office was advised some time ago.

The Premier of Queensland to The Premier of New South Wales.

Sir,

Chief Secretary's Office, Brisbane, 17 June, 1898.

See printed matter herewith marked "A."

Referring to my telegram of 15th instant, I now do myself the honor to forward to you the accompanying printed copy of the correspondence which has taken place on the subject of the concessions granted to the British New Guinea Syndicate (Limited), and to inform you that on the receipt of a reply to my letter to Sir Hugh Nelson, of 14th instant, I shall address you further on the whole question of these concessions.

I have, &c.,

THOMAS J. BYRNES.

Telegram from The Premier of Queensland to The Premier of New South Wales.

18 June, 1898.

See printed matter marked "A."

I HAVE posted to you a copy of the correspondence which has taken place on the subject of concessions granted to the British New Guinea Syndicate.

THOMAS J. BYRNES.

Telegram from The Premier of Queensland to The Premier of New South Wales.

29 June, 1898.

See printed matter marked "B," and page 23, &c., of matter marked "A."

I HAVE posted to you this evening a copy of Sir Hugh Nelson's letter, containing his observations on the British New Guinea Ordinance No. 1 of 1898.

THOMAS J. BYRNES.

Minute by The Premier of New South Wales.

New Guinea Land Syndicate.

MR. REID presents his humble duty to His Excellency the Governor, and forwards papers on the above subject.

Mr. Reid suggests that the papers be laid upon the Table of both Houses.

G.H.R., 23/6/98.

Minute by The Governor of New South Wales to The Premier of New South Wales.

IN returning to you the papers on the subject of the New Guinea Land Syndicate, I beg to observe that I have deemed it expedient, before authorising these documents to be laid upon the Table of both Houses of the Legislature, to ascertain whether the Secretary of State for the Colonies is aware or not of any objection to the adoption of the course suggested in your minute of the 23rd instant; and with a view to this end I have to-day addressed a despatch to Mr. Chamberlain.

HAMPDEN,

Governor, 27/6/98.

The Premier of Queensland to The Premier of New South Wales.

Sir,

Chief Secretary's Office, Brisbane, 29 June, 1898.

See page 23 of printed matter marked "A."

Referring to my letter of the 17th instant, I now do myself the honor to forward, for the information of your Government, a printed copy of a letter dated 18th instant, addressed to me by the Right Honorable Sir Hugh Nelson, containing certain observations on the correspondence which has taken place respecting the British New Guinea Ordinance No. 1 of 1898.

See printed matter marked "B."

I also enclose a printed copy of report which Sir Hugh Nelson has been good enough to furnish on his recent visit to the Possession.

I trust, in the course of a few days, to be in a position to address you at length on the question of the Ordinance mentioned in Sir Hugh Nelson's letter above referred to.

I have, &c.,

THOS. J. BYRNES.

"B"

1898.—Queensland.

VISIT TO BRITISH NEW GUINEA.

(Report by the Right Honorable Sir H. M. Nelson on his)

Presented to both Houses of Parliament by Command.

To The Honorable the Chief Secretary,—

Brisbane, 18 June, 1898.

Sir,

In accordance with your letter of the 15th April, I have the honor to report that, in company with His Excellency the Governor, I paid a visit to British New Guinea. Leaving Brisbane on 16th April, we arrived at Port Moresby on 25th April, and we left Samarai on the return trip on 28th May.

Condition of public offices.

Whilst at Port Moresby I visited Government House and the various public offices, all of which seemed in good order with the exception of Government House itself, which, if it is to be utilised further, should be renovated and provided with a decent stock of suitable furniture. At present it is in an extremely unsatisfactory condition, only suitable for what we might regard as a rough bush bachelor's residence.

Places visited.

Later on I visited the following places:—Daugo (cocoanut plantation), Tupusulei, Kappakappa, Maopa, Aroma, Dedele, Mugula, *alias* Dufaure, Samarai, Miawarra villages, Mita, Awaiama (Chad's Bay), Taupota,

Taupota, Wedau (Bartle Bay), Sinapa (Phillips' Harbour), Porlock Harbour, Maisina, the Mambare, Tamata, Yewa village, Bola, several villages on the Gira, the Ope, and Kumusi Rivers, the mouth of the Musa River, Dingba, Barabua, Douglas Harbour, and Port Hennessey.

With regard to the natives on the south-east coast, they all appear to be healthy and happy; and they were delighted with our visit. They are on the best of terms with the Government, and are generally well conducted. There can be no doubt that the readiness with which they have accepted our laws has been to a large extent due to the labours of the missionaries, who for years have devoted their lives to the noble work of Christianising these people. Condition of natives.

I was very much struck on this long coast-line by the great numbers of young children and youths we saw at the villages, which convey the impression that the population in that part of the Possession must be on the increase. The same applies to the villages we visited along the north-east coast as far as Phillips' Harbour. From there, going westward, we found the natives much more shy, and evidently possessing much less confidence in the white man and the Government. From that point, right up to our boundary on the Gira River, I may state that, although we were able to interview the men of the villages and exchange greetings of friendship with them, on no occasion were the women and children allowed to come within our view. They had evidently been ordered into hiding places in the scrubs. At some villages the inhabitants ran away at our approach, although every effort was made to assure them that our intentions were friendly. At all such places we left tokens of friendship, and on the return journey the natives exhibited more confidence in us. Population; behaviour of natives.

I may state that previous to our visit to the Mambare, several of the wild tribes had banded together and made a raid upon the village of Yewa and massacred some of that tribe, the number being variously stated at from ten to fourteen, the reason assigned being that they were too friendly with the whites, and were giving the Government Agent information respecting the whereabouts of the murderers of Mr. Green. The raiders also carried off ten Yewa women, two of whom managed to escape. We saw one of the escapees at the new Yewa village formed at the junction of the Tamata and Mambare Rivers. This new village is surrounded by a strong stockade; it does not contain many inhabitants, but those we saw—men, women, and children—were very friendly. Yewa massacre.

As illustrating native character, I may state that we had with us a native of the village who had served a term of imprisonment and was being returned home, and his reception by his relatives and the whole village was most affectionate. Other incidents came under our notice which tend to show that the natives have very strong feelings with regard to relations and friends, and also great fondness for the place where they were born. The strongest example of this is shown by runaway carriers, who, when seized by nostalgia, start a journey of hundreds of miles around the coast to get "home." Strange as it may seem to Europeans, the training and discipline the man above-mentioned had received while undergoing his imprisonment, together with the education he gained through mixing with Government officials and others, made him well qualified for appointment as village constable, to which office he was duly inducted by His Excellency the Administrator, apparently to the immense satisfaction of the whole village. Nostalgia; village constables.

We spent four days on the Mambare and two nights at Tamata Station, where the unfortunate Mr. Green met his death at the hands of the natives in January, 1897. From all I could learn from the natives and others, there does not appear to have been the least animosity between them and the late Mr. Green, the incitement to the deed being the cupidity of the natives—the desire to make themselves the possessors of the stores and implements which they saw in his custody. Murder of Mr. Green.

On the Gira we visited several villages and interviewed the inhabitants, most of whom professed the greatest cordiality and friendship to the Government, but on no occasion were we honored with a view of "the fair sex" or children. The Gira.

With regard to the lands that we were able to inspect, my impression is that along the banks of the rivers they are most fertile and suitable for agriculture, but pioneers must make up their minds to have a very rough time of it for some years after starting operations. Towards the mouths of the rivers the banks are very low and seemingly subject to inundation, but this, I am led to believe, would not be any detriment to the growing of rubber. But these lands would certainly not be suitable for the growth of sugar-cane or like tropical products. As you ascend the rivers, however, the banks become higher, and tropical cultivation of every kind could be carried on there. Character of lands.

Without wishing to draw unfavourable comparisons, I may state that no lands came under my observation suitable for settlement in small areas; nor can any of them, in my opinion, compare with the lands on the Herbert, the Johnstone, the Daintree, and other rivers in tropical Queensland. The conditions of climate and other circumstances connected with the Possession are such as to lead me to form the decided opinion that none of the lands there are suitable for small settlers with limited means, or for what we call "close settlement." If the country is to be developed it can only be accomplished by companies or individuals having command of large amounts of capital. Nothing came under my observation that would lead me to believe that the inducements to settle on the territory are sufficiently strong to attract farmers or others from Queensland or the other Australian Colonies, where in addition to a healthy climate they enjoy all the advantages of civilisation—schools, police protection, railways, post and telegraph services, &c., all of which are as yet unknown in the Possession. Not suitable for "close settlement."

With regard to trade, at present it is carried on by a few traders, and the difficulty is that with such an extensive coastline—some 3,700 miles, including the islands—proper surveillance by the Government is impossible. The copra trade is dead at present, as no profit can be made therefrom. A little is being done in getting the natives to collect rubber, mostly from a vine, which they cut down to extract the juice; but their manipulation of the substance is so rude as to seriously depreciate its market value. Fibre is also got from the natives, the best being obtained from the aerial roots of the pandanus, but for the same reason—want of proper handling and the unevenness of the quality—it has not yet attained to any satisfactory value in the market. Some alluvial gold is being won on the Gira, some 20 miles from Tamata Station, but the accounts as to the permanency of the field vary. One storekeeper assured us that it is worked out, while another told us that the miners there are doing fairly well. Pearl-shelling is carried on to a limited extent, the quality of the shell obtained, though light, being of the very best. Trade.

His Excellency the Administrator cherishes great hopes of the future development of the Possession when the operations of the Company established under the British New Guinea Ordinance No. 1 of 1898—whereby it has been agreed to sell to the Company upon certain terms an area not exceeding 250,000 acres out of the total of the 57,945,600 acres which comprise the Possession—come into full effect. From the statement laid before me by the Administrator in December last, I was quite satisfied British New Guinea Syndicate.

of

of the advisableness of establishing the company referred to, and since I have had an opportunity of seeing something of the country, I am fully confirmed in that opinion. I am quite convinced that the advantages that will accrue from the expenditure of capital and the development of trade will be more in favour of the Possession and of the Australian Colonies than of the Syndicate, who will necessarily have to take all the risks and expense of pioneering, and can hardly expect to derive any profits from their undertaking for some years to come.

Mission work.

Only two of the four missions established in the Possession came under our cognizance—namely, the stations of the London Missionary Society, situated on the south-east coast, and of the Anglican Mission on the north-east coast. The former of these has been established for many years; the latter is of quite recent growth. Both of these work in conjunction, and co-operate with the Government—a feature which I consider is essential if the maximum of good work is to be attained. The result of their labours towards the civilisation of the natives is most gratifying. I was also pleased to find that both have made a commencement in the direction of imparting to the natives a knowledge of the English language. This, if persevered with, will have a highly beneficial effect in the way of facilitating intercourse and cultivating friendly relation between the natives and Europeans. We were prevented from visiting the Wesleyan Mission, which is situated in the islands, through my serious illness; and, in any case, time would not admit of a visit to the Roman Catholic Mission, as it is far away to the west, on the St. Joseph River. Our trip did not extend to that portion of the Possession lying west of Port Moresby.

Employment of Papuans.

So far as the employment of Papuans in regular work is concerned, Nature has been so bountiful to them that they have never been accustomed to anything like systematic or continuous labour. I do not think that the present generation, at any rate, could be induced to undertake steady daily toil.

As to the idea that has been mooted, of getting some of the natives over to Queensland to work for six months during the busy season on the sugar plantations, I cannot see any reason to give encouragement to the project. The family and home affections of the people are so strong that any lengthy absence from their villages would be most distressing to them, and form an obstacle that it will be very hard to overcome. If the experiment were made—to which, of course, the consent of the Imperial Government would be necessary—it would require to be carried out in the most careful manner. A small number, say fifty, would be the most that it would be advisable to introduce, and they should be accompanied by a European protector of long experience among the natives in New Guinea, who would reside with them, and generally look after their interests during their term of service. Considering that the Possession is practically free from any bad disease—an easily cured skin disease being the most prevalent malady—and that the natives as yet know nothing of alcoholic liquors, I fear that the experiment would be hazardous. Taking all the circumstances into consideration, I think our planters might as well at once abandon the idea of looking to New Guinea as a field from which to procure extra labour.

Laws and their administration.

The laws so far introduced, being chiefly directed towards the protection of life and property, readily commend themselves to the native mind. They have been, and are being, enforced gradually, without any violent rupture of native habits and customs, except perhaps in the matter of burials, and even the natives themselves are beginning to appreciate the law on this subject from a sanitary point of view, although they occasionally attempt to evade it. The administration of the laws is attended with as little formality as possible; everything is made clear to the parties concerned, and justice is tempered with mercy, reasonable allowance being made for the idiosyncracies and old customs of the people.

The practice of appointing ex-convicts to the position of village constables, in cases where a chief has not been found to take the office, has worked very satisfactorily. The native selected for this position has generally served a somewhat lengthy term of imprisonment, during which he has gained a knowledge of our civilisation, and has been instructed in the laws of the Possession, so that when installed into office he is able to impart considerable information regarding these matters to his people; and it is wonderful to note the amount of influence he acquires over the whole district, apparently by the mere prestige of his office.

Police.

I inspected the police at Port Moresby, and was very much pleased with their appearance and discipline, and the manner in which they performed their drill. They are recruited, as far as possible, from various parts of the Possession, so that they may be utilised as interpreters, one of the great difficulties Government officials, missionaries, and travellers having to contend with being the large number of dialects spoken. The sergeants are all able to speak a little English, sufficient to communicate with the Commandant and other officials, whilst the Commandant himself is able to hold converse with the natives in several of their dialects.

Altogether the administration of justice is carried on in a very satisfactory manner, considering the circumstances of the country.

Visits of inspection.

Although great progress has been made in the civilisation of the natives, it seems to me essential that they should be periodically visited by the Administrator, whom they look up to with great awe and respect. Although not giving any cause for alarm on the south-east coast, where the missions have been long established, yet they are a very excitable race, and no one can predict what might happen if agitators from the uncivilised tribes got amongst them. And, as I have mentioned, the effects of civilisation from Phillips' Harbour westward are not at present as marked as one could wish. The agents and police magistrates are efficient officers, and their number might be increased with great advantage, but their visits naturally do not carry the influence that a visit from the Administrator would do. To enable the latter to carry out his periodical visits of inspection it is necessary that a ship should be provided, and it is to be hoped that the "Merrie England" will be retained in the service for some time, although it would be advisable to replace her as soon as practicable with a more suitable and less expensive craft.

The work of the Administrator.

I should consider any report of my visit to British New Guinea incomplete which did not contain a record of my strong conviction of the special suitableness of the selection of Sir William MacGregor by the Imperial authorities for the work of organising a savage population, and imposing upon a wide and hitherto almost unknown territory the beneficial restraints of civilisation. As legislator, Administrator, and intrepid explorer, the impress of his personality is everywhere present. The work he has done in British New Guinea has increased the value of the country as a possession of the Empire, and although almost everything yet remains to be accomplished in the way of developing the resources of the territory, it is to Sir William MacGregor that the honor is due of having established the first conditions necessary for the success of subsequent Administrators.

I have, &c.,

HUGH M. NELSON.

Nor

NOTES OF TRIP TO BRITISH NEW GUINEA.

THE following notes were compiled for the information of His Excellency the Governor of Queensland and the Right Honorable Sir H. M. Nelson, K.C.M.G., P.C., during their trip from Brisbane to British New Guinea, which occupied from 16th April to 7th June, 1898 :—

SATURDAY, APRIL 16.—Left Brisbane in the A.U.S.N. Co.'s s.s. "Arawatta" at about 5 p.m., Mr. J. Gilligan, Principal Shorthand Writer, and Mr. Bailey, Colonial Botanist, accompanying the party. Had a large number of passengers, including Bishop Stone-Wigg, who was on his way to New Guinea to assume the direction of the work of the Anglican mission on the north-east coast.

SUNDAY, APRIL 17.—His Lordship the Bishop held divine service in the saloon, a large number of passengers attending. He preached an interesting sermon on the Resurrection, and Miss Florence Schmidt assisted the singing at the piano. The ship called at Sea Hill and Flat Top, from whence telegrams and letters were despatched.

MONDAY, APRIL 18.—At sea.

TUESDAY, APRIL 19.—Landed at Bowen about 9 a.m. Mr. Bailey inspected a supposed Princess Beatrice palm, brought in some years ago from the neighbourhood of Mt. Elliott, but was disappointed, the specimen proving a different species altogether.

Arrived in Townsville Harbour at 9:30 p.m. One of those who landed was a somewhat interesting specimen of humanity. A native of Tasmania; he was brought to Australia when about 2 years old; had lived ever since in the far West; could neither read nor write, and he had no recollection of having ever seen the sea or a ship. This was, therefore, a novel experience for him, and one of his remarks re the sea was that it was the largest lagoon he had ever seen without ducks on it. He was under arrest on a charge of being concerned in the crime of cutting the throats of eight horses belonging to a carrier out West about eight years ago. It was reported on board that he was likely to be acquitted—that, in fact, he was innocent, but could give important evidence which would criminate another man. His name was Chapman; married, and two children. He bitterly regretted his ignorance, and expressed his determination to "work his fingers to the bone" to educate his children. On arrival the Governor received a letter inviting him to avail himself of the privileges of the North Queensland Club—of which he is patron—to which His Excellency replied in suitable terms. Sir Hugh and the other members of the party were made honorary members of the club during their stay.

WEDNESDAY, APRIL 20.—We went ashore in Customs launch, reaching Townsville about 9 a.m. Walked to "Queen's Hotel"; posted letters, and sent telegrams. His Excellency took part in a game of golf; Sir Hugh visited Harbour Board and other offices. After lunch His Worship the Mayor, several aldermen, and leading townsmen waited upon His Excellency and formally welcomed him to Townsville, the interview drifting into general conversation on the condition and prospects of the town and district. After this His Excellency rode into the suburbs accompanied by Inspector Fitzgerald. His Excellency invited a small number of leading citizens, including Mr. Justice Chubb, to dinner, which occupied the time up to the hour of starting for the "Arawatta," about 8 p.m. Here we parted with Captain Harford and a goodly number of our other fellow-passengers, so that the cabin accommodation was more liberal and comfortable.

THURSDAY, APRIL 21.—The ship was made fast alongside the Cairns wharf by 10 a.m., about two hours later than we had hoped she would. Here we had the first public display in the presence of the Naval Brigade and the boys of the Anglican Church Brigade, with their fife and drum band drawn up on the wharf. The formation of the latter is the self-imposed work of the Rev. W. Maitland-Woods, and although of comparatively recent origin, it has taken well with the lads and their parents, and promises to extend. The power for good in such an organisation needs no special pleading; it is self-evident, and it is to be hoped that similar attractions to our youths will be cultivated and encouraged by those who have the means at their command to do so. As His Excellency stepped ashore, the ever-welcome strains of the National Anthem greeted his ears, the crowd respectfully uncovering, while the Brigade presented arms. By request His Excellency inspected both bodies, and complimented each upon making such a creditable display. To the boys he added a few special sentences of praise and encouragement, calculated to strengthen their loyalty and increase their desire to stand in the front rank as defenders of their country. Hearty general cheers followed. Then His Lordship Bishop Stone-Wigg, addressing the lads, also praised them for their turnout in such good form, and urged them to get others to join their ranks. Cheers for His Lordship closed this portion of the proceedings. Some disappointment was expressed at the visit being "informal," there being a desire to give His Excellency a "right royal reception." The party were next taken in charge by the Mayor and other representatives of local authorities, and conducted to a special train in waiting to convey them to "the Lion" of Cairns—viz., the Barron Falls. Invitations swelled the number of excursionists to between forty and fifty, and just before starting an incident which caused some amusement occurred. An old man named Chappell, whose eccentricities on the wharf had previously attracted attention, expressing a desire to see the Governor, was shown into the vice-regal presence. His first question to His Excellency was, "Are you a Sydney native?" Answered in the negative, he explained that he was the oldest digger in Australia, and hearing that His Excellency was going to New Guinea he had brought him a pick and washing-dish with which to prospect that country for gold. Whether he was not satisfied with the Governor's appearance as having the material out of which a successful digger might be developed, or the desire to retain possession of his precious utensils overcame his previous liberal intentions it is impossible to say, but he suddenly took his leave with his property, to the further amusement of the crowd. The run to the Falls is always full of interest to visitors, and even local residents never tire of the unique and splendid scenery which bursts into view as the train toils from point to point up the Barron gorge, and culminates in the magnificent spectacle of the Falls themselves. The view on this occasion was exceptionally fine, a large volume of water rushing to its precipitation of 700 feet, but not more than sufficient to create a slight veil of mist, which rather added to the beauty of the scene. Strange how long one can linger gazing at such a feature of nature! It stirs the poetic soul to elevated and elevating themes. And to the practical mind it suggests thoughts of how the almost inconceivable power here running to waste might be grasped by man's puny hands, confined and directed into channels whereby it might be made his obedient slave and potent factor in carrying on the industrial operations of the valley beneath. But the order, "All aboard," breaks into the reverie, and taking a last look at this grand cascade—perhaps the last—the downward journey is commenced and successfully accomplished. Although light refreshments were served at the Falls, the fresh mountain air had a most appetising effect, and on reaching "Hinde's Hotel," shortly after 2 o'clock, all were glad to find a substantial luncheon in readiness. The company, too, was enlarged by the presence of a considerable number of citizens, and a very enjoyable hour was spent in discussing the many good things for which Cairn's hospitality is noted.

The toast, "The Queen," having been honoured in the most loyal and hearty manner,

The Mayor briefly proposed the health of His Excellency the Governor, to whom he referred as a worthy successor to Sir Henry Norman, who had endeared himself to the hearts of the people, and proved one of the best Governors Queensland had ever had.

The toast was received with enthusiasm, "Lady Lamington and the little ones" coming in for a full share of the cheering.

His EXCELLENCY, after thanking the company for their hearty reception and generous hospitality on this his second visit to Cairns, said: Your Mayor has referred to my predecessor as having endeared himself to the people of Queensland. I only hope that I may be able to achieve the same happy position. It is certainly my desire to do so. (Loud applause.) It is especially gratifying to me to be entertained in this manner here to-day, because although I have enjoyed coming here under the good auspices of Captain Lee in the splendid ship "Arawatta," to-morrow or next day I shall have to embark on stormy seas in a much frailer vessel, therefore I want all the encouragement and fortifying I can get to embolden me to undertake this desperate venture. (Laughter, and Hear, hear!) Having again had the good fortune to witness something of your scenery, I think I cannot do better than repeat the compliment I paid last year—that you are the happy possessors of some of the finest scenery in Australia. (Applause.) At the time of my last visit you were somewhat anxious because of the want of rain. This, I understand, has been a bumper year in that respect, and that you are all rich and prosperous. The only drawback to this happy condition seems to be the unkindness of certain officials down south in refusing to receive shipments of your luscious and delightful fruit—the banana. (Applause.) I am glad, in spite of the warlike display we saw on the wharf this morning—and here I must say that not only was I pleased to see the Naval Brigade turn out in such numbers and with such good bearing and appearance, but I must congratulate the Rev. Mr. Wood on having got together in such a short period a large number of boys who will, I am sure, benefit very much by the training and discipline they will have to undergo. It is very essential that we should give our boys some impression of what is required of the citizens of every country in order that they may be able to properly undertake or maintain the defence of their own country. (Applause.) I say that I am very glad that in spite of this warlike ardour so successfully fostered in Cairns you have not sent a hostile expedition to Sydney. (Laughter and applause.) But I would point out that there is a movement

movement now under consideration which, if successfully accomplished, and in which, if you were to join, you would be able to properly have some controlling influence in the event of any sound grievance arising. I refer to the great movement going on in Australia for the federation of the various colonies. I do not know, and officially I do not wish to know, what are the feelings of the people of Cairns towards federation. It is not my prerogative to enter upon such a matter, but it is well within my prerogative to say that I consider there is no movement more calculated to bring about an increase of the prosperity of Australia than the breaking down of those barriers that prevent it from becoming a great and united nation. (Loud applause.) As to the Bill that is before the people, that I do not intend to enter upon. But there is one point in which the federation of Australia touches me very much. It has been suggested that this federation will lead to a diminution of the loyalty of Australians towards the great Empire of which they are at present parties. (Never!) Now, that I do not believe. I do not believe it for the simple reason that I regard our Empire as based upon common sense—that is, upon well-founded principles that are of direct material value to each and to all of us. It is not a false, sentimental idea that makes us call ourselves "British." By the mere fact of enrolling yourselves into a greater State than this of which you are at present the inhabitants, you will, so to speak, enlarge your horizon and see how essential it is in these days that one and all of us—no matter where we may be on the face of the globe—should be partners in one great kingdom. (Loud applause.) Our peace is secured, our commercial enterprise is established and fostered, and—most important of all—we are able to secure and develop those great institutions and characteristics of our nationality which I firmly believe have in the past proved all powerful factors in establishing our dominion throughout the world. (Loud applause.) This is not the occasion to pursue such a topic. I can only say that if you take a broad view of this matter and remember that all of us here in Australia are living under the regis of the British Empire, you will not be backward in enrolling yourself under the banner of a united Australia. (Loud applause.) I again thank you as the representative of the Gracious Monarch who is the embodiment of the strength and universality of our nation for the loyalty to which you have given expression. It touches and encourages me to receive such testimony of your love to our Monarch, and of your desire to be partners in the destiny of our great Empire. (Loud applause.) I can only assure you dwellers in Cairns that by becoming part of a united Australia you will find that those small checks offered by Nature to the development and enrichment of your district will be overcome, and that in course of time it will become one of the most fruitful and prosperous districts not only in Queensland but in Australia. (Loud and continued applause.)

Mr. MUNRO then proposed the health of Sir Hugh Nelson in highly eulogistic terms, making special reference to the Sugar Works Guarantee Act and the Tramways Act, which had proved of immense benefit to the district and were likely, if extended, to be still more beneficial.

Sir HUGH, responding, said: I desire to thank you all most cordially for the kind manner in which you have received the toast proposed by Mr. Munro. I think that if any reward was suitable to a person in the position I am in—about to retire from active political life—the best that he could have is to retire with the esteem and goodwill of his fellow-colonists. (Hear, hear!) I am extremely pleased to hear your expressions of opinion here to-day, and though it may seem to some extent self-flattery on my part, I think I retire from party politics with the goodwill and to a large extent the esteem of the men with whom I have been associated during the last forty years. (Loud applause.) I appreciate very highly what Mr. Munro has said with regard to the efforts of the Government with which I have been connected to further the interests of the northern part of the colony and of this district in particular. It is a great mistake for you to suppose that your interests are in any way neglected by any Government that may exist down in Brisbane. On the contrary, I think you will find that every Government that may come into office will always look upon the northern part of the colony as a place that must be encouraged and developed, and so its interests must be attended to. (Loud applause.) I do not think that any Government could live and neglect the interests of the north. (Hear, hear! and applause.) We all recognise that its development is essential to the progress of Queensland and of Australia, and I can assure you that anything that has been done lately has been done in the interests of the colony and of Australia as a whole. (Hear, hear!) I highly appreciate the eulogies Mr. Munro has been pleased to confer upon myself, but I wish to point out that, as far as carrying on the Government is concerned, one man by himself would be able to do very little, and whatever good has been accomplished by the Government of Queensland has been done, not by myself, but in conjunction with my colleagues. (Applause.) I have always been pleased to be able to say that my colleagues have always worked thoroughly in unison with myself: had they not done so I do not think we would have been able to do the little we have done for the advancement of the colony; and now that I have been kicked upstairs I leave the Government without any compunction, because the same men who have been carrying on our affairs for some years past are now offering their services to carry it on for the future—(applause)—and I hope that they will succeed even better than in the past. (Cries of "No, no.") You may think that that is very complimentary, but I do not take it in that light, because to a large extent it depends upon the people themselves. If they will stick together and assert their right to good government—especially to economical government, so that our finances may be maintained in a good position—if they will take advantage of the opportunity they will have in a year or so of insisting upon that at the poll—I have no hesitation in saying that Queensland will go on and prosper, and eventually become the richest and greatest colony of the whole group. (Loud applause.) I must assure you of this also: That it involves very great sacrifice on the part of any man to take office as a Minister, still more so the position of Premier. He has to give up the whole of his private business and devote his time and energies to the business of the country, and very often he gets nothing but abuse for all his work. (Hear, hear!) I feel extremely grateful therefore for receiving on this occasion some thanks from the community of Cairns. I know that they have always been well disposed towards the Government, but of course that is insignificant in comparison with their higher duty—a determination to maintain their rights and to see that good government is enforced throughout the colony. (Loud applause.) If they persevere in that their prospects are the very best, and as far as I am individually concerned, having made Queensland my home as long as I live, I can assure you that I shall do everything I can to promote her interests. (Loud applause.) I believe and hope that in the new sphere into which I am now entering I may be able to be of some influence in guiding the colony towards that end which we all desire. And I should like the people themselves to back up all such efforts and assert before the world that all those absurd ideas about socialism and the division of property are not going to be entertained in this colony at any rate. (Loud applause.) I again thank you most heartily for your good wishes. (Loud applause.)

"Our Visitors" having been proposed in suitable terms,

His Lordship Bishop STONE-WIGG was called upon to respond. In doing so he extended to all well-behaved citizens a cordial welcome to New Guinea, which presented many opportunities for enterprise and industry. Touching briefly on the nature of his work, he referred to the enormous benefits missionaries had conferred upon the world scientifically, commercially, and, above all, in spreading the gospel of "Peace and goodwill" to all men. The biographies of famous missionaries not only revealed their services in the extension of the borders of our knowledge, but were full of incentives to unselfishness and faithful devotion to God and man.

HIS EXCELLENCY, in proposing the health of the Mayor, again returned thanks to the citizens of Cairns for their generous hospitality.

The MAYOR acknowledged the compliment in a few suitable sentences, and the company separated.

Taking leave of our generous entertainers, the steamer cast off at about 5 o'clock, and anchored off Port Douglas at 9. Here a deputation of residents paid their respects to His Excellency, and expressed a hope that he would pay the district a formal and more lengthy visit before long.

FRIDAY, APRIL 22.—Daylight found the "Arawatta" alongside the wharf at Cooktown, where the party left her, not without feelings of regret, for the trip so far had been "through summer seas" and thoroughly enjoyable. The Governor and Sir Hugh were welcomed by the Mayor, Mr. E. P. Seagren, and the Town Clerk, and it was arranged that the party should partake of a *déjeuner* at His Worship's private residence at 11 a.m. It had been intended to visit the schools and other public institutions, but this being the last port of call in Queensland there was much to be done in the way of letters, public and private, and final telegrams, to say nothing of trans-shipping impedimenta to the "Merrie England," which was in port awaiting our arrival. To mark the event His Excellency directed that a holiday be given to the children attending the public schools. On Captain Curtis, of the "Merrie England," reporting himself to the Governor and Sir Hugh, he intimated that he was anxious—in order to carry out the wishes of His Excellency Sir Wm. MacGregor, Governor of New Guinea—to get underweigh as soon as possible. So 1 o'clock was fixed as the hour of departure. Although the notice to the townspeople was very short, the gathering at the Mayor's numbered about fifty of the leading residents of the town and district, and the collation was in Cooktown's best style, which is saying a great deal.

The toast of "The Queen" having been duly and heartily honoured.

The MAYOR expressed regret that the next toast—"His Excellency the Governor"—had not fallen into better hands, but he felt honoured in being able to welcome him to Cooktown, and to wish him a pleasant journey to and from New Guinea.

The

The company having responded to the call with musical honours,

His EXCELLENCY, replying, said: Mr. Mayor and gentlemen,—I thank you very much for your warm greeting of me to-day, and also for having given me this generous entertainment. It is not the first time that I have received kindness at your hands, for, as you are aware, Cooktown was the first place that I landed upon the Australian continent when I came here to take up the high office to which I had been appointed. I was therefore prepared in some degree to expect that you would be cordial in your welcome, but at the same time I hardly expected that you would put yourselves to so much trouble and inconvenience, meet together in such numbers, and give me so handsome a "send-off." As you are aware, Sir Hugh Nelson and myself are about to visit the British Possession of New Guinea, and it is essential for us to do so because this year the system of administration by which the Possession has hitherto been governed lapses, and a new agreement has to be entered into. It is almost, I should imagine, a unique system of government, inasmuch as I hold a sort of double office, first of all as the representative of constitutional government in the self-governing Colony of Queensland, and also of New Guinea, which is more directly under the control of the Secretary of State for the Colonies. I do not think that you will find elsewhere in the British Empire such a mixed system of administration, and therefore it is all the more necessary, in the interests of those colonies that have so largely found hitherto the supplies by which New Guinea has been kept going, that we should visit, as far as possible, the most important places in the Possession, and become thoroughly acquainted with the great—the wonderful work, I think, I may justly describe it—that Sir William MacGregor has accomplished during the last ten years in that country. It is doubtful whether any man in the service of Her Majesty has grappled with and overcome greater difficulties than Sir William has done. So we hope during our visit to be able to equip our minds with a fuller and better understanding of the condition of this Possession of the Colony, and what will be the best means of governing it for the future. As this port is often visited by Her Majesty's ships of war, you have direct and visible connection with our Empire; therefore you are able to thoroughly understand and to have wide views as to the freedom of government that prevails under the British flag, and at the same time the desirability of maintaining the closest union between all the different portions of the Empire that is compatible with allowing the fullest measure of local administration to the component parts. (Loud applause.) I can assure you that at the present time our Empire has more at stake, and is more in danger from attacks upon her commercial prosperity, than has been recorded in our history for, perhaps, 100 years. Therefore, you will understand that I thoroughly appreciate every occasion of seeing and of having paid me visible manifestations of your regard, loyalty, and devotion to the British Empire. (Loud applause.) Certainly since the days of Pitt, when that little island of the North Sea defied the most powerful forces in Europe, no such great stress has been placed upon Great Britain as during the last two years, and I do not think that we can believe that those times of difficulty and danger are yet passed. I can only hope that you will always give a responsive and cordial welcome to whoever may be the holder of the high office that has been entrusted to me. (Hear, hear! and applause.) I may here observe that I forgot to mention one matter connected with the object of my journey. I do not see that gentleman present, but I refer to the first Anglican Bishop of New Guinea, Bishop Stone-Wigg. (Applause.) We cannot forget the great enterprise upon which he is bound, nor can we forget what he has given up, not merely in a maternal sense, but also his good work in Brisbane, into which he had entered with all his heart and soul. That he has now abandoned for work in a new country where greater difficulties will await him, and, perhaps, with less response, less visible result of his strenuous energy and devotion. (Applause.) I only mention this point, because I do not think we should forget him or his work. As he pointed out yesterday at Cairns, the missionary is not merely a missionary, but also a great civiliser; therefore, he and those under him will play an important part in bringing the people of New Guinea under better and more civilised government. (Applause.) Thus having mentioned the principle of self-sacrifice, I would conclude by saying that I can conceive no more general proof of practical self-sacrifice than that every individual and every party in the State should be ready to join in the defence of their country—(hear, hear! and applause)—should be willing to give the best of their money, it might be of their blood, to maintain the freedom of their institutions, to preserve their independence, and to combine with every portion of that great world-spread Dominion over which Her Majesty Queen Victoria reigns for the security of all. (Loud applause.) I can only thank you again, gentlemen, for your kind welcome, and you, Mr. Mayor, for the good wishes you expressed regarding the journey I am just undertaking. (Loud applause.)

Sir HUGH NELSON, in proposing the health of the Mayor, said: His Excellency has expressed his opinion as to the feeling of loyalty displayed by the people of Cooktown, and I can say that on every occasion on which I have visited it—a good few now—the same spirit has been manifested. (Applause.) And although Cooktown is not able to boast that its trade and sphere of influence is extending—which I regret very much—I am sure that it is not at all due to any backward movement or want of enterprise on the part of the local authorities as presided over by your present Mayor. (Loud applause.) I understand that he has been living among you for the last twenty-five years, and I am sure that he is looked up to with esteem and honour by all classes in the district. (Applause.) I have very great pleasure, therefore, in asking you to drink his health.

This having been done, amid cheers, the Mayor briefly responded, and the party separated.

As the hour of departure drew near, a considerable crowd gathered on the wharf, including a good number of children in holiday attire. The gardens of the town had evidently been laid under tribute to supply testimony of loyalty and personal regard to the Governor in the form of flowers; and many and varied were the leave-takings of fellow-travellers per "Arawatta" and local friends. "A good trip," "pleasant voyage," "safe return," "come back whole," "don't be made kiki of" were the more common. The last led to rather personal remarks as to our condition for being served up, and the consensus of opinion appeared to point to His Excellency as the most appetising morsel. Dear old friend Bailey said he felt satisfied that he would be last to "grace the table," if indeed his "collection" of bones and skin would not secure him immunity from sacrifice. His only hope was that should he be disposed of in cannibalistic fashion, he might, when in the spirit, be permitted to view the tortures which those who partook of him were certain to suffer in the form of indigestion. But there must be an end to all things; and so there was to this good-natured, friendly banter, and at last the "Merrie England" steamed off to the cheering music of ringing cheers for "His Excellency the Governor." Alas, what a change from the "Arawatta"! We had heard that the "Merrie England" was pretty lively, but we expected that she would be at least fairly well suited to the climate and the waters in which her work has to be done. We found just the contrary. Even in the winter months the saloon is hot and stuffy; in summer-time it must be insufferable—"an ante-chamber to Tophet." As a crack yacht for the cold regions about the English Channel—for which purpose she was built—she may have done very well, but for equatorial waters she is most unsuitable. Being of wood is an advantage in seas studded with reefs and shoals, but her drawbacks far outweigh this. With sail and steam and everything in her favour she cannot do more than 9 to 10 knots an hour; her average draught is about 13 feet, and her carrying capacity, about 260 tons, is very inadequate to the rapidly-growing requirements of her sphere of operations. In fact, she is cramped for room for her own stores and equipment, which are so crowded together that they cannot but deteriorate. She is wet and generally uncomfortable, and when her decks are crowded, as they sometimes are, with native prisoners, native police, and their belongings, the effect is far from agreeable. The accommodation for the crew is also very inadequate. No sooner had we got into the Pacific, with a strong south-east breeze, occasional squalls, and a lumpy sea, than our troubles began. Now she sinks deep in the trough of a wave, then springs with the agility of a deer with sidelong bound to port; then down again with headlong rush to starboard at an angle so sharp that one wonders—Will she ever right herself? But her lead keel saves her, and away she flies like a bird that sights the hunter's snare to the opposite angle, so that it is a matter of holding on firmly to keep one's feet. Indeed, it is hard muscular exercise to stand on deck for an hour or so. As Sir Hugh aptly remarked, "It is hard work to sit still." In her gymnastics she ships large quantities of water, while those on the bridge are often treated to a heavy and unwelcome shower-bath. It is perfectly safe to assert that the "Merrie England" has provoked as many "swear words" as any vessel afloat, and the appellations substituted for "England" are many, most of them "unfit for publication." Having a good deal of deck cargo, and there being some danger of losing our live stock when we got outside the protection of the Barrier Reef, it was determined to anchor under the lee of Lizard Island for the night, much to the satisfaction of the party, all of whom, except Sir Hugh, had become victims to *mal-de-mer*. We anchored in 10 fathoms, a few hundred yards from the shore, and passed a pleasant night.

SATURDAY, APRIL 23.—The party went ashore after breakfast, Mr. Bailey to botanise, the others to explore. We landed on a beautifully white but somewhat coarse gravelly beach, composed largely of decomposed granite, close to the site where stood the residence of unfortunate Mrs. Watson, whose heroism and sad fate form such a pathetic story. Her husband was engaged in *bêche-de-mer* fishing, and had some Chinamen in his employ. During his absence in Cooktown, some natives who had landed from canoes swept down on the home and speared one Chinaman on the spot. Mrs. Watson, with her infant child and the other Chinaman, succeeded in pushing off in half of a 400-gallon iron tank that was lying on the beach, and drifted on to another island about 20 miles distant. Here the unfortunate woman, her child, and Chinese companion

companion perished from want of food and water. The people of Cooktown have erected a monument to her memory. Leaving our botanical enthusiast to revel in the luxurious vegetation near the beach, the rest of the party, eager for exercise after their enforced inactivity—except that compelled by the gyrations of the "Merrie England"—ascended the highest point on the island, 1,179 feet. The ascent is easy, but care is needed on account of the large loose stones covered with coarse grass 5 and even 6 feet high, a trip or a slip on which might easily mean a sprained foot or damaged cuticle. Led by His Excellency, we reached the top of the hill in about an hour. Here we found a cairn of stones about 10 feet high, in one of the crevices of which His Excellency discovered a bottle containing a paper with an inscription to the effect that the spot had been visited by Professor Agassiz and party, voyaging in the steamer "Croydon," Captain Thompson, in May, 1896. We added the following:—"On the way to New Guinea in the 'Merrie England,' 23rd April, 1898. Lamington; Stone-Wigg, bishop; J. Gilligan, P.S.W., F. Baird, seaman."

The view was splendid, but the long line of the Barrier Reef, well marked by heavy breakers, prompted unpleasant anticipations of the morrow. The verdure-clad isles close by stood out in strong relief, while the shallow waters intervening, reflecting the clear blue sky, produced marvellous combinations of colour—dark and pale green and blue, blending into turquoise, opalesque, and many other beautiful shades which our language fails to describe. The breeze too was most exhilarating. Returning to the beach the excursionists indulged in a delightful bath in the cool clear sea, the only danger being the temptation to prolong the immersion beyond the limits of prudence. Then, a drink of deliciously cool water from under the shade of a huge boulder, and we felt perfectly happy. At 2 p.m. up anchor and off we steam to face our fate outside the Barrier. In the course of an hour or so we are well within view of this gigantic natural breakwater which, covered in ever-recurring masses of foam and spray, lead us to fear a sad time when our lively sea sprite enters the realms where "the winds their revels keep." Passing through the mile and a-half opening in this coral belt we encounter a heavy cross sea with strong wind on our beam, which gave the "Merrie England" a further opportunity of displaying her athletics and compel most of us, including even some of the officers, to seek the lee side in sore distress. The water, too, found its way into His Excellency's cabin through the ventilator, and sundry drippings from leaks on the weather side of the saloon rendered the settees useless for sleeping purposes. Sleep! Alas, there was no sleep for anyone on board that night. The "Merrie England"

"Doth murder sleep."

The roar of the wind and waves, the rattle of culinary utensils or similar articles broken adrift from their fastenings, the crash of crockery or glassware, the din of chairs and other furniture dashing hither and thither, and above all the horrors of sea-sickness, render the occasion one to be remembered. It was rather exasperating than otherwise to the rest of us to see Sir Hugh calmly smoking his pipe all this time, as if the "Merrie England" were behaving in the most orthodox and satisfactory manner. And yet the weather was not very bad! What the condition of things must be in a gale it is hard to conceive.

SUNDAY, APRIL 24.—A melancholy, woe-begone lot we looked as we struggled on to the deck this morning—all but Sir Hugh, who still found solace and joy in his "clay"—verily a "pipe of peace." The day was uneventful. Beyond seeing a little drift timber, a flight of flying-fish, and a few sea-birds, nothing occurred to disturb the solemn silence which pervaded the company. Everyone seemed to be absorbed in introspection, utterly regardless of his neighbour. As we approach New Guinea coast we slow down considerably so as not to come near the reefs until broad daylight.

MONDAY, APRIL 25.—This morning was ushered in with rain squalls, driving us below to the hot saloon, or our hotter cabins, thus accentuating our discomfort. Perhaps there should be added to the list of advantages possessed by this "ocean greyhound," that of economy, for certainly the consumption of victuals on board when she is at sea is reduced almost to *nil*. At about 11 o'clock the mountains of New Guinea were discerned through a rift in the dense mass of clouds which had obscured everything but the sea since early morning. "Near, and near, and nearer still," came those magnificent heights, until at last we sight the houses at Port Moresby. Following a tortuous reef-bound passage, we enter the harbour, and drop anchor at 1 p.m.

PORT MORESBY.

Formerly the headquarters of the London Missionary Society, and now the seat of Government, this is one of the most important centres in New Guinea. It is a perfectly safe harbour running north and south between 5 and 6 miles, the one or two obstacles to perfectly free navigation in the outer branch—patches of reef—being beacons, while there is plenty of deep water all round. The inner branch, known as Fairfax Harbour, out of compliment to the admiral of that name, is completely landlocked, with bold shores and an average anchorage of 4 to 5 fathoms. The country is very irregular, the hills running down sharply to the sea, with a patch or two of sandy beach, and they are covered with what appears to be fairly good grass and stunted eucalyptus. The buildings occupied by the Europeans do not exceed about thirty; they are mostly of bungalow style, and being painted white, or nearly so, show out well in the midst of surrounding vegetation. Government House, situated on a pretty knoll about midway between the commercial portion of the settlement and the native village, is an unpretentious—a very unpretentious—bungalow, with airy apartments and wide verandahs, suited to the climate, but the apartments are few, the building is sadly in want of repair and paint, and is certainly unworthy of its title. The furniture well matches the building. A flagstaff stands in the centre of a grass plot, in front of which is an extensive garden enclosed with native fence, containing cocoanut, paw-paw, bananas, taro, sweet potatoes, sugar-cane, and other tropical products. A stone jetty affords a capital landing-place, and a walk of nearly a quarter of a mile around the cultivation enclosure leads to the house. Though the headquarters of Government, His Excellency Sir William MacGregor is seldom here for any lengthy period, being for ever on the move in order to properly and effectively govern and regulate the vast territory under his control—over 90,000 square miles. The native village Hanuabata, situated below the mission station, is a semi-marine collection of huts, raised on light piles and constructed of sago-palm bark and leaves sewn together with thin strips of cane, and neatly thatched with nipa palm leaves. Each has a small platform or verandah in front, and as a rule they are weather-proof and comfortable from a native point of view. A fire is usually kept burning in the centre of the floor, in an enclosure a few inches high specially prepared for the purpose so as to prevent conflagration, which would be a terrible calamity in a large native village. What the result would be can be imagined when it is stated that in this village and that of Elevara, which adjoins it, the population is about 1,200, although the whole area under dwelling does not exceed 2 or 3 acres. As intimated, some of the huts are built on piles in the water. The original object of this was to afford some measure of protection against the attacks of the hill tribes who frequently swooped down and killed their weaker brethren of the coast in hundreds, and looted their dwellings. Sometimes whole villages were exterminated. Thanks to missionary work, followed up by the vigorous, firm, yet pacific administration of Sir William MacGregor and his predecessors, those days of wholesale slaughter have passed away for ever. It seems marvellous that in the course of a few years the temper and habits of a naturally savage race could be so brought into subjection by peaceable means that the hundreds of tribes who inhabit the coast-line are now on amicable terms with their hereditary foes of the hills. Though this change has been effected, marine villages still exist, but they are dying out, their occupants gradually taking to the shore. The native is a strong conservative, clinging long to old habits and customs, even when the reason for their existence has passed away. One strong argument in favour of water villages is the sanitary feature.

Capital roads have been made in and about Port Moresby, all by prison labour. Considerable extensions have been carried out under the supervision of Sir William, and the work is still being pushed on up the valley of the Laloki and beyond, so that facilities for transit and settlement are steadily becoming greater. The Government have purchased about 1,000 acres from the natives at Port Moresby, and all transactions of that nature with "foreigners" must be approved of by the Government.

The principal—in fact, the only—firm doing general business is Burns, Philp, & Co., who, with praiseworthy energy and pluck, are extending their commercial ramifications throughout the Possession. This is undoubtedly a great advantage to the place, and it is to be hoped that it is so to the firm in a monetary sense. They have a fine store, well stocked, at Port Moresby, and among other improvements they have constructed a commodious wharf with tramline, &c., to the store.

As soon as we dropped anchor His Excellency Sir William, accompanied by the Hon. F. P. Winter, C.M.G., Chief Judicial Officer, the Hon. A. Musgrave, Government Secretary, and Mr. Mackay, Private Secretary to Sir William, came off in the Governor's boat, manned by a native crew in neat uniform; while the Commandant of Constabulary, Captain Butterworth, the Collector of Customs, Mr. Ballantine, and other officers were conveyed to the ship in the police boat, also propelled by a stalwart native crew. The Hon. W. H. Goss, representative of Burns, Philp, & Co., came off later. Introductions having taken place and greetings of old friends having been exchanged, the latest news from Queensland and elsewhere was imparted to our hosts, who reciprocated with matters local.

The

The next order was "Luncheon on board," and in a short time we were enjoying the best on board the "Merrie England." The word "enjoying" ought to be emphasised, for we voyagers had enjoyed nothing in the way of comestibles since leaving Cooktown.

We heard something of the indefatigable energy of New Guinea's Governor, so that we were not surprised when we found Sir Hugh Nelson's remark, as we steamed into the Port, "He'll have us off on some expedition before we know where we are," verified by the appearance of the steam-launch alongside ready to tow a boat containing the gubernatorial party—doubtly so now—to inspect the coconut plantation on the island of Daugo, about 2 miles distant. This island is apparently of submarine formation—sand, shells, broken coral, &c.—and is evidently well suited to the purpose to which it is now appropriated. The majority of the cocoa palms are doing well, but some show rather slow growth. They are set out in rows, sixteen to the acre, the island containing between 15,000 and 16,000. Two systems of planting have been adopted—the Ceylon method, placing the nut in a hole about 2 feet deep, and covering it with soil, and the native mode—just covering the nut with surface soil. Which is the better is a debated point, so that the experiment will be watched with interest. The palms are kept clear of weeds and undergrowth by native labour, and in the course of a few years this isle will be a most luxurious retreat—a perfect maze of coconut groves, with their splendid shade, to say nothing of the fruit in its various stages of development. Here, on arriving at the caretaker's hut, we were regaled with the milk of young cocoanuts—a cool, refreshing drink, highly appreciated by the thirsty traveller, whatever his colour may be. Many a young nut fell a victim to our appetites while in New Guinea, the fruit itself being very palatable besides the juice. The agility with which a native will climb a tree 50 to 60 feet high is remarkable.

Sir Wm. MacGregor is a strong advocate for planting cocoa palms on the islands and other suitable places on the Queensland coast, and his experience carries considerable weight. Apart from the economic aspect of the question, these palms, rising as they commonly do to a height of 60 and 80 feet, would be of great assistance to mariners at night or in thick weather. But, as Sir William points out, it is useless to enter upon such a work unless the plantations are under proper supervision, as the people for whose benefit they are chiefly intended are the very ones most likely to assist in destroying them. Some expense was incurred a few years ago by the Queensland Government in this direction, the result being very small for the very reason assigned by His Excellency.

Returning another route we reach the ship shortly before 6 o'clock. Lord Lamington and the Bishop go ashore with the Governor and sleep at Government House.

Mediocrity fairly describes the physique of the Port Moresby natives. Nearly all the women wear the ramie, a grass petticoat, reaching slightly below the knees, the men merely a string, which possibly had its origin in some superstitious prohibition, but which the natives can give no explanation of. When asked about it they simply say, "Our fathers and grandfathers did it, therefore we do it." As a rule, the hair is a thick matted mass several inches long, a natural "friz," which, without the aid of tongs or pins, would delight the heart of many a white maiden. A wooden comb, with several long sharp prongs, is always worn, which also serves for scratching. The common head ornaments are shell earrings, of which some of the natives wear a large number, the lobe of the ear being invariably pierced and the hole extended as wide as practicable. The septum of the nose is also made to carry a thin piece of bone, shell, or reed, and here and there you may see a native wearing feathers. Armlets and leglets, which serve the purpose of pockets, are common, and on festive occasions more and finer armlets, feathers of cockatoos, parrots, and cassowary, and ribbons of the pandanus leaf are brought into use.

Skin disease is very prevalent, the most common being *Tinea desquamans*, a kind of ringworm which covers the whole body. Even young children are covered with it; it causes great irritation, and at first has a very repulsive appearance, but one sees so much of it that this feeling soon dies out. It is easily cured, and was not so frequent on the east coast.

TUESDAY, APRIL 23.—This morning we inspected the police quarters, a commodious building a short way from Government House, fitted up with comfortable bunks, tables, seats, &c. It is far better than many shearers' quarters in Australia. Each policeman is supplied with a painted canvas bag, about 2 feet 6 inches long and 10 inches in diameter, in which he carries blanket and all other necessaries when travelling. These are made in the port at a low price, and are a capital invention, being quite waterproof and handy. Shoulder satchels and gun-covers are made of the same material. The men are armed with Snider rifles, and on being put through the manual drill by the Commandant, acquitted themselves most creditably, although several of them had only been recruited a fortnight previously. They are engaged for two years, their pay being 10s. a month during the first year, 20s. during the second, with rations of rice, tea, sugar, tinned meat, and occasionally a pig. The establishment of long-service pay is under consideration. They are a fine set of fellows physically, are thoroughly reliable, and are good shots at 200 yards. A target for practice is on the ground. The development of bone and muscle during six months' European diet is very marked. Their uniform is neat, serviceable, and cheap. In fact anything approaching extravagance or luxury is unknown in the New Guinea Government Service, the management of such an enormous territory with such a large population for about £15,000 a year necessitating the strictest economy.

The next item in the programme is a trip to the Astrolabe Range, a distance of about 18 miles. All arrangements had been made beforehand—some twenty carriers, mostly from an Astrolabe village, having been sent ahead with flies, hammocks, blankets, food, &c. Fine athletic fellows they are, equal to carrying heavy weights at a good pace over this difficult country. But the loads borne by the women are astonishing. As among all uncivilised people, the women do all the drudgery, though in some districts in New Guinea the men do a good deal of the heavier work, such as house-building, fencing, and the starting of gardens. Of course they do all the hunting and fishing. The women's share consists in carrying wood and water, cooking and keeping the house and village clean and the gardens in order, so that there is something like a division of labour. The women also share in carrying the camp baggage, suspended by a strap or band which passes round the forehead and down the back. To see a big "lord of the creation" piling up articles after articles on the back of his small spouse until the bulk was nearly as great as herself seemed very ungallant, to say the least of it, to our civilised vision, but it is the custom of the country—the women are trained to it from early childhood and take it as a matter of course. In many cases their load is increased by a human burden in the form of a baby, which she carries in a dillybag in front. The youths, too, are early broken in to carrying.

Our party consisted of Lord Lamington, Sir William, the Bishop, Mr. Mackay, and Mr. Gilligan, who, mounted on horses and led by George Belford, an experienced New Guinea traveller, made a start at about 10 a.m. from Government House. Sir Hugh, true to his Treasury instincts, preferred inspecting the Government Offices and the port generally, under the guidance of the Commandant; and Mr. Bailey thought he would be able to do better service by interviewing the local vegetation than by scaling mountains nearly 3,000 feet high. A short cut across the hills brought us to a well-made track following the contour of the sea-shore and affording a picturesque view of the hills, islands, and miniature bays and sheltered nooks along the route. Passing through several native villages, by 11:30 we reach Romana, the chief resident of which, Peter Lifu, has a considerable block of land under creditable cultivation. A native of Lifu, he has knocked about the world a little, speaks good English, and is a pushing, steady fellow. He has 50 acres altogether, principally under cocoanuts, and is now clearing for cotton, which ought to do well. He carries on operations with the aid of native labour, and appears to be regarded as a fair master. The houses are clean and comfortable, and Mrs. Lifu, in her neat, loose, flowing gown and kindly intelligent face, made us welcome. While we were being refreshed with limes, lemons, and cocoa milk, some of the carriers whom we had passed came up, and set to work on sago and boiled wallaby, the latter dark and not very tempting to the European epicure, but just the reverse to his coloured brother. Here a bright young native, named Tamassie, about 14 years of age, an orphan adopted by Peter, was told off to attend Lord Lamington. He left us at Cooktown to return home.

By a quarter to 2 we arrived at the junction of two clear running creeks, distant about 11 miles from town, and distinguished by the polysyllabic name Taramauhata. The carriers were just finishing their midday meal, and in a short time were humping their swags onward. We were soon engaged in stowing cold mutton and fowl and other necessaries into a space where they could be more easily carried than they had been, and had to experience our first little taste of roughing it. The knives and forks had gone on ahead, so "toll it not in Gath!"—we remembered that "fingers were made before forts," and used them. The sugar, too, was among the forward packages, but still the tea "went well," and anyone so disposed could regale himself with saccharine juice direct from mother cane.

Mounting again at 2:30, in a shower of rain, we push on, for although we have only 7 miles to go, it is by far the most difficult part of the journey. So far the country has been lightly timbered, chiefly with dwarfed and rather sickly eucalyptus and small belts of scrub. The grass, while very coarse and long in places, ought to support cattle. Now, as we penetrate into more mountainous regions, the grass is finer, and the vegetation everywhere is more dense, even to the mountain tops. Moving along a properly-cleared road, the more difficult parts of which had been made comparatively easy

easy by native prison labour, we suddenly come upon a curious spectacle—four native houses perched at the extreme point of the razor-like crest of mountain spur about 1,000 feet high, to which access appeared almost impossible—at least extremely difficult. The object of this appears to have been security from attack by hostile tribes, but thanks to the advent of civilisation, the necessity for such precautions is rapidly disappearing.

Our course now became very rugged and sinuous. At one time we are climbing the side of a mountain spur; a few minutes later we are descending the slippery bank of a creek at an angle so sharp as to tempt one, for very safety's sake, to dismount and negotiate the danger on foot, regardless of mud and slush and a certainty of wet extremities. But no! every man stuck to his steed, which with cautious but unerring step carried him with a rush up the precipitous bank on the other side. Later on we meander among gigantic conglomerate boulders—masses of large pebbles and other stones welded together in Vulcan's mighty forge with a peculiar-looking dark cement, and scattered about as if by "Titans at play." Most of them are surmounted by ferns, orchids, lichens, and like plants, which find root-holes in the crevices which have become filled with vegetable mould from the surrounding forest or scrub. But we are only now in the ante-chamber, so to speak, of the ascent. Soon we arrive at a point where we can see our destination about 1,000 feet above us in almost perpendicular line—great rocks and crags, all verdure clad, wherever seed can find sustenance, towering above and at times overhanging us, and reminding us how infinitesimal we are physically in the presence of Nature's majestic towers. Some of our horses proved the truth of the aphorism, "The spirit is willing, but the flesh is weak," for though good at heart, their strength—probably owing to deterioration from continuous in-and-in breeding—was not equal to the strain, and walking was the result. Most of the party, however, were not driven to this extremity, but reached the summit after dismounting once or twice over particularly difficult bits of road. This road, which follows the crest of precipitous spurs or is cut into their sides, reflects great credit on the engineering skill which planned it and the manner in which the work has been done—all the latter by prison labour, remember! To mount over 1,000 feet in about half-a-mile is no easy task, but here we have the antidote to the pessimistic thought of man's littleness in the subjugation of the mountains to his purpose. By continuous zigzagging, mostly at severely sharp angles, by excavations, by filling up or bridging small chasms, by stoning the steepest and most slippery places, a roadway averaging about 5 feet in width enables the traveller to attain the summit of Warriratta, the most western spur of the Astrolabe Range. What a change this piece of work has made to the traffic of this portion of the country! Even now the journey is not devoid of danger, and one can easily imagine what it was when—"A slip, and both horse and rider would fall to a hideous fate."

A light drizzling rain—common to this part of New Guinea in the afternoons—set in about 3:30 p.m., making things unpleasant for both horses and riders; but our rendezvous was reached about an hour later. Here we found a small native camp, in which were some fine-looking men—tall, straight, supple, and strong. Most of them were congregated in a sort of open kitchen, cooking their food—taro, sago, wallaby, &c. Three chiefs put in an appearance, the principal of whom, arrayed in crimean shirt—not over clean—and loose dungaree pants to match, and old straw hat set rather back on his head—not unlike latest fashion for ladies in Brisbane—called to mind a "Jack Tar" of the old school. He was very slow in his movements and his speech—presumably the attributes of kingly dignity in the Astrolabe. His ornamented lime-pot and carved stick—ultimately secured by Lord Lamington as a souvenir of the occasion—were in constant use. One of his fellow chieftains, not remarkable for physique or intellectual physiognomy, paraded, to his own evident satisfaction, in all the glory of a crimean shirt and an old tall opera hat, probably the gift of some humorous employee of Burns, Philp, & Co. The effect was ludicrous, and yet saddening. The whole scene recalled memories of the earlier and happier days of our Australian natives, when, innocent of drink and all its consequent devilry and devildom, they held a place in the land. This trifling incident threw into bold relief the degradation of that race through all its wretched stages of declension, and prompted an earnest though silent prayer that the New Guinean may for ever be guarded against this, a worse demon than the worst their most powerful sorcerers could conjure from the vasty deeps that surround their isle. Strange that we should make stringent laws to prevent the destruction of a barbarous race by this force, and yet place it within easy—far too easy—reach of our own people.

But reverie, avaunt! Sir William has his instruments fixed and is taking observations. Life is stirring around us. Flies—i.e., tent-covers—and hammocks are being erected; carriers are coming in—most of them women carrying heavy loads, while the men condescend to hump the lighter swags. All around is a sea of thick mist, which, however, lifts anon, and gives a glimpse of the valley of the Laloki River, with its undulations of hill and vale dwarfed into littleness from our elevated vantage ground. Masses of snow-like cloud are scattered here and there, and in the distance, looking south and west, Port Moresby and its neighbouring islands and reefs, set as it were in a sea of glass, are plainly visible. To the north, and trending to the west, the eye is at once attracted by the Owen Stanley Range, the loftiest and grandest of which has been named by Sir William after our beloved Queen, as emblematic of the sublime height of power, and nobility, and purity at which she stands as Ruler on whose dominions "the sun never sets." Although this mountain has been described as a single pyramid, Sir William walked over 20 miles along its rugged crest. Towering heavenwards nearly 14,000 feet, it is frequently enshrouded in cloud, and at times—as when its peaks stand out above the mists in clear outline against the blue sky—it is hard to believe that it is indeed solid earth. Seated thus in majesty, it seems appropriate that it should have as attendants such Titanic masses as Mount Huxley, Mount McIlwraith, Mount Service, Mount Scratchley, &c.—each over 10,000 feet high. The country between Warriratta and the foot of the main range is, as might be expected, very broken. The heights in other places would be called mountains, but here, overshadowed by the main range—

"So huge, so mighty, and so free,"

they are designated "hills." The valleys, too, though of considerable depth and extent, might more properly be styled glens when compared with the abysmal-like depressions which characterise the mountain country—the 10,000 feet gorge, for instance, which separates Mount McIlwraith from Mount Victoria.

The chief sent us a good-sized pig as a present, which Sir William insisted should be killed outside the precincts of the camp. The natives also brought us yams and taro, which, either roast or boiled, are a good substitute for potatoes.

Captain Curtis and Mr. Gors were expected at about 6 o'clock. The former, accompanied by Mr. Brown (representative of Burns, Philp, & Co., in the absence of Mr. Gors, who was not well), arrived shortly after that hour, and spent the night in camp. Refreshed by a hearty meal, tired nature soon called for—

"Sleep, gentle sleep,"

and though the surroundings were strikingly unique—the fly open at both ends, the unsafe looking but well stretched and strongly stayed hammock, the camp fires, dark forms gliding about with noiseless tread, sometimes with a firestick like a lurid ribbon of fire, the murmur of a Babel of native tongues in the distance—we were all soon in dreamland. During the night the temperature in Lord Lamington's tent stood at 66.

WEDNESDAY, APRIL 27.—We are all up soon after break of day, and get a clear view of the gap in the Main Range, 7,000 feet high, through which a road to the east coast will probably be made some day. Already a road has been cleared about 25 miles from Port Moresby to the Brown River, and is being continued by prison labour along the bank of this stream, it being considered safer to follow this route than to risk taking to the hills and very likely getting "bushed" in their intricate ramifications. Besides being of importance as a means of opening up the country, this road across the gap, which will be available for horse traffic, will be of great assistance to miners, and very useful for administrative purposes. Following the sinuosities of the route it will be between 120 to 150 miles from Port Moresby to the gap. Of course making a road over such rough country will take considerable time and cost a good deal of money.

It is understood that Peter Lifu is to be appointed Government Agent in this district. His principal duty will be the pacification of tribes at present hostile to each other, and to bring the natives to see the advantages of conforming to the laws established by the Government. The way has been well paved for this, as most of the fighting tribes say they have had enough of hostilities. Therefore, his task ought to prove easy of accomplishment.

After breakfast we got a splendid view of Mount Victoria and its satellites, which looked particularly grand in the early sunlight.

The chief sauntered leisurely into camp about 8 o'clock a.m., carrying in his hand several pieces of a kind of nettle, which he distributed among his followers, who at once commenced to flagellate their arms, shoulders, and legs with it. Inquiring the reason for this, we were informed that it is regarded as a remedy for rheumatism.

At Mr. Brown's suggestion we rode round the ridges to a picturesque bit of scrub where ferns were plentiful, and through which a rapid stream of deliciously cold water tore its way downwards. The descent to this spot was alarmingly precipitous and slippery, some of our horses sliding yards without a stop. To ensure safety, all but Lord Lamington dismounted. On the way we had a look at Burns, Philp, & Co.'s new storehouse, which is to form the centre of their coffee and cotton cultivation, and which will no doubt become the trade emporium of the district.

The

The return from Warriratta was performed in rather desultory fashion. Sir William and Mr. Mackay started soon after breakfast, having a lot of business to attend to at the Port. Lord Lamington, the Bishop, and Mr. Gilligan at about 10 a.m., and the others later still. As illustrating the steepness of the descent, it may be mentioned that Lord Lamington's aneroid registered a descent of 650 feet in twenty minutes, the distance in a straight line being less than half a mile. Making a short stay at Bomana, where Mrs. Lifu's hospitality was again enjoyed, the second section of the party arrived at the Port about 3:30, and spent the afternoon inspecting the native village. The rest dropped in by degrees, but up to a late hour the carriers had not arrived with our swags. In fact, some of them did not come in until next morning.

During our absence Sir Hugh, with Captain Butterworth as "guide, philosopher, and friend," inspected the public offices, Burns, Philp, & Co.'s store—a large one and well stocked—visited the native village, and saw pottery in process of manufacture. This port was at one time the chief centre of this industry, the natives bartering their wares for sago and other necessaries with other tribes along the coast. We had the pleasure of seeing a "lokotai" starting on one of these trips, which sometimes occupy months. This vessel is generally constructed of three large canoes lashed together, covered with flooring, on which is erected a strong wooden frame. This is overlaid with palm-leaves sewn together, so as to form a good protection against the weather. A platform between 2 and 3 feet wide is run around the vessel, which enables the crew to work. A sail shaped like a crab's claw is the propelling power, and the steering is done by three or four paddles at the stern. The trips are usually made when the trade winds are suitable.

Sir Hugh, accompanied by Messrs. Winter and Musgrave, also took a run up Fairfax Harbour, and called upon a Malay settler who has a fine garden, which shows that the climate and soil are capable of producing several tropical products. This man, who lives in a European-built house, is the happy (?) possessor of two wives and a numerous family—a condition unique in this country, polygamy not being recognised by the natives as the proper thing. When at Burns, Philp, & Co.'s, Sir Hugh was shown samples of sandal-wood, one of the principal items of export, also various kinds of rubber, the collection of which from indigenous trees and vines promises to become an important industry.

In the evening Sir William entertained his visitors at dinner at Government House, the other guests being His Honor Judge Winter, the Hon. W. H. Gors, the Hon. A. Musgrave, Captain Butterworth, Captain Curtis, Mr. Mackay, and Mr. Gilligan. This pleasant function over, Sir William set to work with Captain Curtis and arranged our "itinerary," but as it was not strictly adhered to, it is useless to place it on record. Then His Excellency was off to his observing-post, where he remained absorbed in stellar observations and calculations until after 11 p.m.

THURSDAY, APRIL 25.—This morning the visitors made a round of the settlement, and at 11:15 we start eastward in the "Merrie England" on our peregrinations coastwise. Our company is now enlarged by the presence of Judge Winter, Captain Butterworth, and Mr. Guibanetti, an experienced New Guinea naturalist and explorer, whose services proved of great value later on.

Our first stoppage (12:25 p.m.) was the village of Tapusuelei, which a few years ago was the largest marine village on the coast. It is now semi-marine, the inhabitants—no longer in terror of massacre by the hill tribes—gradually taking to the land. Observing that the piles which had supported no longer existing aquatic domiciles were very thick and heavy, and had been driven into the submerged earth so securely as to stand for years the strain of wind and wave, we inquired as to the mode of sinking them into the soil. This we learned was done by sharpening the end of the pile, and working it by hand as far as possible into the ground. Then, at high tide, a canoe filled with water—in some cases, stones—was lashed on to each side of it, and as the tide fell the weight drove the pile firmly into the earth. Rather a good piece of rough engineering skill!

The village is now the home of 700 or 800 natives, and is one of the stations of the London Missionary Society. The teacher, a native of Tonga named Sunia, one of the oldest in the service of the society, is said to be very successful in his work. Unfortunately, he can speak very little English, the aid of an interpreter being necessary. The mission-house is a fairly substantial building, built of native woods, and thatched in native fashion; it has been erected about twelve years, and was re-roofed about six years ago. The surrounding country is undulating and well grassed.

After salutations, the bell was rung, and in a few minutes nearly 100 children assembled in the church, which is also used as a schoolroom, scriptural texts and pictures and other evidence of the teachers' art hanging on the walls.

As a rule the children looked clean and healthy, the female teachers being dressed in frocks of coloured stuff falling loosely from the shoulders. These dresses are made by themselves, and the sewing is good—more strong than neat. The average daily attendance at school is about thirty-six. Discipline seemed to be well maintained, and we were led to understand that Sunia's influence is attributable to the fact that he does not follow "cast-iron" rules, but allows an elasticity by which his system accommodates itself to the habits and capacity of his people. Having sung a hymn in a very creditable manner, and with a heartiness which would put to shame some of our Sunday school classes, prayer was said, during which all knelt, closed their eyes, and assumed an appearance of earnest devotion. Then the elder scholars read a chapter from the Gospel of Mark, in the native tongue—Dr. Lawes having prepared and published a translation for the use of the natives—after which the whole assembly sang "God Save the Queen" in passable English, winding up with "Hip-hip-hurrah."

The party then walked through the village, which is laid out in narrow streets. The houses, raised about 8 feet from the ground, each with its verandah or porch in front, are well built. The usual mode of ascent to the houses here, as elsewhere in New Guinea, is a stout sapling or small log placed sideways at an easy angle. In some cases the log is upright with notches cut into it, and in others, but more rarely, a rough ladder. In the centre of the village we noticed four posts 14 or 15 feet high, and about a foot square, nicely carved. These, which we learned are simply used for ornamentation, are called "dubu," and show that the people take some pride in their settlement.

Bidding farewell to Tapusuelei we steam on to Kappakappa, off which we anchor at 5 p.m. Here the London Missionary Society have their headquarters in British New Guinea, the most important feature of which is the college for the training of native teachers. We can see the building from the deck of the ship about a mile distant "as the crow flies." On the top of a pretty wooded height it commands—as we discovered later on—a splendid view, and is one of the best houses in New Guinea. The station is in charge of the Rev. Dr. Lawes, one of the few left veteran missionaries, and his charming wife, whose unflinching zeal, tireless energy, and large-hearted hospitality have made her esteemed and revered by "all sorts and conditions of men."

Dr. Lawes, accompanied by Mr. English, the Government Agent, came off to the ship in his strongly-built and well-equipped boat the "Hisin-Bada," *Anglive* "Morning Star," manned by a stalwart crew in neat uniform bearing the letters "H.B.," the initials of the name of the boat. Introductions are followed by brief general conversation, after which we put off in boats for the shore. Part of the village is in the water, but the main portion is on land, and the houses are of the substantial New Guinea type. Everything is clean and orderly, and the people appear happy and blithe. A good number have donned holiday attire, and the scene is rather festive. Our attention is directed to a couple of young "bucks"—*alias* "mashers," or "dudes"—who were certainly dressed "to kill." In head-dress, armlets, noselets, ear ornaments, feathers, &c., they paraded arm in arm with jaunty air, well satisfied with themselves and the world at large, and no doubt to the admiring gaze of "the weaker sex," for whose captivation their regalia had been donned.

A buggy and saddle horses are at the service of the visitors, who are driven about a mile over the Government road, which is by no means as good as the portion—nearly another mile—which comes within the superintendence of the mission. This is well formed and drained, and is a creditable piece of work. Ascending a gentle slope we come to the foot of a much steeper hill, which is ascended on foot. On each side of the avenue, which is about 40 feet wide, the residences of the students are placed, the name of the donor of each being painted over the door. To explain this, it should be stated that each house, which consists of dwelling and kitchen, substantially built of indigenous materials, costs £5, and each subscriber of that amount has his or her name inscribed as stated. Near the crest of the hill, on the right-hand side, is the college, of European build, some 60 feet by 40, including verandahs, fitted up with desks and all other schoolroom requisites. It may here be mentioned that the curriculum includes English—a most important item—but the older students are very slow in acquiring it. Most of the female tuition falls on the shoulders of Mrs. Lawes—no light task, considering the patience and perseverance it requires. The average number of students, most of whom are married, is twenty-five. On the apex of the hill stands the missionary's residence, "Valorata," entirely of European design, and constructed of imported timber. One of its most admirable features is its 12-foot verandah all round; another, its open dining-hall in the centre of the building. These are especially suited to the climate.

Introduced to our amiable hostess and a lady visitor from Cooktown, we give the latest news from the outside world, and are supplied with much interesting information by our host and Mr. English, who also showed us a number of very good photographs taken by himself of native people, places, and things.

Inter alia, the rubber industry formed a leading topic, the increasing demand for that article causing special attention to be directed to it. The trees and vines are common to all the New Guinea scrubs, and cultivation is carried on in some places by getting the natives to bring in young trees of approved kinds, which, when planted out, grow very vigorously and rapidly. For instance, some in this district have grown from 30 to 35 feet in two years. They will also grow from cuttings and seed. Mr. English has from 15 to 20 acres under trees, the species called "Maki" being most favoured. This does not grow more than 5 miles from the coast. The trees ought not to be tapped under three years of age.

The African oil palm, cocoa, and vanilla are being tried on the flats, and do well, but vanilla would probably do better in the back country. Tea and coffee—in fact, almost any tropical produce—will grow well on the flats.

A substantial dinner, during which we were waited upon by native boys smartly attired in white trimmed with red, relieved our well-whetted appetites, and we started shipward shortly after 9 o'clock. As we descend the avenue an unusually pretty sight awaits us. At the bottom, arrayed in holiday attire, and each carrying a lighted lantern, stand all the students, who sing a hymn and the National Anthem in good style. Lord Lamington, through Mr. Lawes, complimented them on their good singing, and thanked them for the pleasant surprise they had given us.

Arrived at the beach, after a little difficulty owing to tide being far out, we are carried on board our boats, and safely deposited on the "Merrie England."

FRIDAY, APRIL 29.—This morning we pursue our eastward course in the face of a strong head wind and heavy sea, which compel us to again struggle with the eccentricities of the "Merrie England." Half-past 3 brings us off Paramana Point, in Keakaro Bay, where we land amid a number of friendly natives, who accompany us along the beach to Maopa, the principal coastal village of the Aroma district. On our way we came across some very large canoes lashed together *a la lakatoi*, and were struck by the ingenious method of stepping the mast. A stout sapling with several projecting lateral roots is chosen, and the latter are securely tied with strips of rattan cane to the deck. The tightness and strength of these canoes and other lashings is remarkable. These canes are also used as anchor lines, and are said to be made hundreds of yards long by splicing. The canoes themselves are generally dug out of trunks of the Marava tree, a fine-grained wood which the cobra insect will not touch, and which is also suitable for furniture. All canoes are fitted with outriggers and platforms, and will carry heavy loads. The village contains about 1,500 persons, and is the site of a mission station conducted by a Tahitian teacher named Taputu, and his wife and her sister, all of remarkably good physique, and evidently kind and amiable people. They had just completed a new mission-house, about 40 feet by 20, built of lime plaster on laths, and surrounded by a 6-foot verandah. The roof is thatched with unusual neatness and skill. The main portion of the building is used as church and schoolroom, the remainder as dormitories. The floors are covered by well-made mats of native manufacture, and the coverlets of the beds, worked in star pattern patchwork with bright colours, reflect great credit on the needle craft of the makers. Here, as at all the other London Missionary stations we visited, a photograph of Mr. Thompson, the energetic secretary, finds a conspicuous place.

A splendid cocoa palm grove belongs to the village, and here we first noticed "taboo." The trees belong to individuals or families, and anyone wishing to preserve his fruit plait a palm-leaf around the trunk. It is then "taboo," and no other native will touch it. The right of private property is also religiously observed in gardens, which are generally fenced or otherwise apportioned to the families who cultivate them, and so with other property. Sometimes a general "taboo" is ordered by the chief in a scarce season, or on the approach of a festival, so that the greater part of the crops—all that is not absolutely necessary for daily sustenance—is preserved.

All affairs of public importance are settled by the chief and headmen, so that they have practically a system of local government.

The people, as a rule, are of medium height, fairly well nurtured, and the crowd of children is amazing. The females all wear the "ramie," even the youngest toddler; the men the T string. They have always been a very strong and powerful tribe, and were frequently at war with neighbouring tribes. A few years ago they killed several Chinese traders who camped near them, the reason assigned being that they interfered with their women. Previous to Sir William MacGregor's first visit to them he received several messages to keep away, being warned that if he came there he would not see the sun for spears, that the sand would swallow him up, and that they would surely kill him. Yet by tact, determination, and kindness, he won a bloodless victory over 5,000 pugnacious people—i.e., the 1,500 inhabitants of the village and those of the surrounding district—an achievement of which he and the nation to which he belongs may well feel proud. But this is only one of many similar triumphs of his. These people now count among the strongest friends of the Government. The late chief, Koapona, a powerful man physically and mentally, led the way in this respect. He died about five years ago, and, as showing the esteem in which Sir William is held by his relatives, on the occasion of our visit they presented him with the most valuable memento they possessed, an ornamented bowl carved from a single piece of wood by the deceased himself. Sir William had previously given his widow a present. Among the crowd we observed a few natives in mourning, which in this portion of New Guinea consists in painting, or rather smearing, the body with black.

It may be well to enter a protest here against the New Guineans being called "blacks" and "niggers," as they are sometimes by Australians. They are not black. They are bronze or copper coloured of various shades, some so light as to suggest the idea of half-caste, but we did not notice one in the Possession who could be placed in that category. The only "black" we saw there was a native of Australia, who had come across from Thursday Island. In intelligence the New Guinea native is far ahead of the aboriginal of Australia.

The houses are peculiar in shape—a kind of elongated dome—not unlike the bottom of a small schooner turned upside down, only deeper. They are arranged in narrow streets, rather irregular as to alignment, and some of them stand from 25 to 30 feet high. All have the front platform, the sleeping apartment above, and eating accommodation below, a few feet from the ground. The village is kept clean and free from offensive smells.

We arranged foot races for the boys and girls, but the latter were so bashful that it was difficult to get them to enter the lists; we also distributed tobacco, which the youngsters clamour for as white children do for lollies. A scramble for the same delicacy caused lots of fun. The people have a good supply of pigs, some imported and of good breed. They exchange these with neighbouring tribes for other necessaries, such as large canoes, even as far as 60 miles away. Boars' tusks when grown so as to form as nearly as possible a complete circle are very valuable, and special efforts are made to get them to grow in this form. Their principal items of food are coconuts, bananas, peas, wallaby, taro, and other roots; also a little fish, the heavy surf on the beach being a bar to much fishing. After tea we had evening service, which consisted of singing hymns, in very good style too, the boys taking seconds with true musical instinct, then Scripture reading and prayer by Taputu. News was then brought that the villagers had arranged a dance for our entertainment, but heavy rain delayed the performance until after 9 o'clock. However, as soon as the sky cleared we marched to the centre of the village, where some hundreds of natives of both sexes were assembled. Lord Lamington and his friends were provided with a "private box," the verandah of one of the houses. Natives crowded everywhere, youngsters clambered into all accessible points to gain a view, and a few lamps assisted a pale moon to cast a dull light o'er the weird scene. Soon the entertainment began by some twenty male dancers in fanciful dress—armlets, anklets, crownlets of feathers, flowers, greenery, and streamers of ribbon made from pandanus and other fibrous plants—entering to the music of several native drums, also ornamented, and dancing to a monotonous chant. By-and-by a few girls, also gaily dressed, joined in. Very neat and graceful they looked, and certainly more modest in their movements than many a ballet-dancer. In fact, throughout the entertainment nothing occurred to arouse the susceptibilities of the most fastidious prudist. All kept excellent time, and the proceedings appeared to rehearse some incident in life. The tune was varied occasionally, and so were the movements, but the repertoire of the company seemed to be limited, and the performance gradually became tedious to the European onlooker. Not so, however, to the native, for we were told that once a dance is started it usually lasts all night, and sometimes longer at feast times.

Accepting the invitation of Taputu, we took up our quarters in the new house, and the hospitality of our host and hostess was taxed to the utmost to supply us with sleeping accommodation. However, they managed to make us very comfortable, and we enjoyed a good night's rest.

SATURDAY, APRIL 30.—After a refreshing cup of tea we take leave of our kind entertainers, and wend our way to the boats, escorted by a crowd of natives. As we pushed off from shore a pathetic little scene was enacted. One or two of our crew were taking leave of wives and relatives, and quivering lips, tearful eyes, and a look that never wandered from the boats, betokened the strength of feeling which stirs the hearts of these simple people. They show great affection for each other in ordinary life; their domestic relations are generally good, and they have strong love for the localities to which they belong. This is one of the difficulties of emigration. Snakes are reported to be troublesome in this district; natives are frequently bitten, generally on the instep, and seldom recover. The cause is attributed to sorcery, which is great source of mischief and evil throughout the island. Every misfortune, every trouble, every death was formerly set down as the work of evil spirits brought into action by means of sorcery. Of late, thanks to the missionaries and the establishment

of a regular form of Government under European magistrates and other officials, this serious root of violence and crime is losing some of its force, especially in the more settled districts, but the process is slow, and it will be many years before it will be eradicated. It seems almost impossible to neutralise it in the minds of adults, and the hope of the future lies in the education of the rising generation, to which every possible effort should be directed.

We parted from Mr. English here, and were sorry to have to do so, for his many years' residence in New Guinea has made his mind a perfect storehouse of information, which he is ever ready to impart to others, and that, too, in a most interesting way. It was 8 o'clock before we cleared the Aroma beach and again faced a fresh breeze and head sea on the "Merle England," which by this time we began to regard as "home." We steamed through the Two Cable Passage about 1.30 p.m., to the great relief of all on board, and anchored at Dedele, *alias* Dedere Point, the eastern extremity of Cloudy Bay, an hour later. The anchorage is good and well protected, being inside the second or shore line of reef. Several fair-sized rivers, which run right to the mountains, debouch in this bay. The soil is splendid; rubber-trees abound, and several white men are engaged collecting it. The natives are employed in this work in various places, but so great has been the destruction of trees through ruthless cutting that an Ordinance has been passed for their protection. For many years the natives of Cloudy Bay had an evil reputation, owing to several massacres having been committed by them, but under Sir William's *regime* all murderers and other criminals have had to be given up, and good order prevails. A trader named Anderson has taken up 650 acres at Dedele Point, where he has already a good grove of coconuts, and a garden growing magnificent pineapples, sugar-cane, taro, sweet potatoes, pawpaws, and he has recently put in cotton-seed, which is springing vigorously.

Although Sir William states that he has been urging people to come to New Guinea to take up land and settle, comparatively little has been done in that direction. But there is a movement which if carried out will probably prove an immense factor in settling the country. In December last year a provisional agreement was entered into between His Excellency the Governor and "The British New Guinea Syndicate," by which the Company have the right to purchase "suitable land"—i.e., land suitable for agricultural and mining purposes—to the extent of 250,000 acres at 2s. per acre, payable 6d. per acre deposit on application, and the residue in eight annual instalments of 2½d. per acre. During the first two years 6d. per acre is to be spent on improvements, and during the next six years a sum equal to 3d. per acre. When declared open the Company have for six months the prior right of selection, and the general right to acquire the 250,000 acres extends over eight years, provided that the total has not been put under offer to them in the meantime. The Company has sole property in all products of the lands, a royalty of £2 10s. per cent. being payable on all gold and metals of the platinum group obtained. An Ordinance covering this agreement has since been passed, and it is expected that the Company will soon commence operations. [Note.—This was written in New Guinea before anything was heard of the agitation respecting the Syndicate.] Taking into consideration the peculiarities of soil and climate, and the habits of the natives in regard to labour, the taking up of land is hardly likely to be remunerative without the expenditure of large capital, and even then success is problematical.

Lying on the beach we saw a large number of logs of the *Alzelia*-Byuga tree—a very heavy, close-grained timber of unusual hardness, with the valuable property of being white ant and cobra proof, and of great durability in water. For piles it is considered one of the best timbers in the world. It is called "Bedella" by the natives in this locality.

Having fixed an observation post on the point, Sir William revelled in constellations, degrees, and minutes and seconds, meridians, circum-meridians, &c., until he had piled up material for no end of calculations. He could not be induced to leave this "happy hunting ground" until after 10 p.m. This business is a great mystery to the natives, and even to Sir William's own retinue, one of whom was recently heard to remark to another, "When he be get in all stars, where he put 'm"? In the meantime Lord Lamington and a small party spent a couple of hours pigeon-shooting, and made a good bag.

A curious incident occurred here, which serves to illustrate native superstition. We had on board three Mambare men who had been arrested for complicity in the murder of Mr. Green, the Government Agent at Tamata Station, last year, and who were now being returned to their village—no "trac bill" having been filed against them. The cook's assistant, a bright, hardworking lad, had a few false teeth in front which he could move about. He had often puzzled the natives by doing so, and frightened them by removing and replacing them. On this occasion he had no sooner taken them out than one of these men in-had at him in terrific rage, and would have seriously injured, if not killed, him, had he caught him, which of course he was not allowed to do. He seemed to think that he was "devil-devil."

SUNDAY, MAY 1.—Sunday is, of course, closely observed on all mission stations; in fact, the question arises whether it is not too closely observed. For instance, this is what was told us as an outline of how the day is spent in some places: At 7.30 a.m. prayer at the teacher's house; then service in the church, which lasts over an hour; then another prayer meeting at the teacher's house occupying fifteen to twenty minutes, after which the teacher asks questions respecting the service held in the church. At about 9 a.m. another service in the church for about an hour and a half, followed by another prayer meeting in teacher's house. At 12 o'clock Sunday school; at 4 p.m. another service; another at 7 in the house or the church. Without opening up the Sabbatarian question, the thought arises whether such a curriculum is not too severe, especially in the case of natives who heretofore have enjoyed almost perfect freedom. Though prompted by the most laudable intentions, is it not calculated to weary, if not disgust, these "children of nature" and have a reactionary effect? In fact, it is said that the strain is so great that native teachers themselves, who have had most careful training and have entered upon their work with enthusiasm, have become lax and to some extent failures. Another weakness of the present system seems to arise from irregular, and in some cases infrequent, visitation of outside stations by superior officers. We all—even the best of us—know how easy it is to become lax, or rather how hard it is to keep from laxity when not in constant touch with fellow-Christians, and can we blame these people if they are "tempted to their fall"? *Forb. sup.* Service is also held on Wednesday and Friday mornings about 7 o'clock. School is held every day of the week but Saturday, which is allowed for recreation and to enable the children to assist in getting wood and water for the Sunday.

In their ordinary condition the natives appear to realise the adage "Time was made for slaves." They keep no account of it, and in making arrangements with a party—of carriers, for instance—to go a long journey, the practice is to tie on a string a number of knots representing the number of days it will occupy. On the return journey they cut off a knot for each day travelled, and at the last they should be at their destination.

This introduces the matter of counting, which is a source of trouble to Papuans as it is to Australian natives. We had an instance of this later on when a native of Yeva was trying to tell us how many of his people had been killed in the recent massacre. Having exhausted his fingers, he resorted to his toes until he got the required number, fourteen. What he would have done had his toes had not proved sufficient it is impossible to imagine.

Shortly before 8 a.m. we up-anchor and pursue our course through Orangerie Bay, which presents some pretty coast scenery. A noticeable feature is the "sail rock" which in the distance bears a marked resemblance to a ship under canvas. Passing close to the Orange rock, a small wood-crowned island usually frequented by lots of pigeons, we anchor at about 5 o'clock near Isikkoira, under the lee of Muguia, *alias* Dufere, *alias* Bona Bona Island, which rises 1,820 feet from the sea. Here one is amazed at the almost inaccessible ridges upon which natives cultivate gardens—places where white men would find a difficulty in getting foothold. These sites are generally selected on account of the fertility of the soil, of which dense scrub furnishes proof. Numerous instances of the same kind occurred during the trip. A peculiar aerial effect was observed here. Running along the crest of a sharp high ridge were a number of arica palms, whose slender stems were invisible in the distance, so that their graceful heads appeared as if suspended like "Mahomet's coffin," in mid-air. Several canoes full of natives, who are somewhat lighter in colour than their western brothers, came alongside the ship, amongst them the chief Magu, who is also the village policeman. They were all singing, apparently in high spirits, and shook hands on stepping on board. This European mode of expressing friendship is rapidly superseding the native fashion of rubbing noses, a by no means pleasant operation to the white man. The natural oleaginousness of the native, which is especially marked in their olfactory organ, is rather repulsive to the European, and when to this is added a dab or two of black or red paint, the performance is still more objectionable. Some of the natives delight in painting their faces with red and black paints in very fanciful and grotesque designs. As affecting their general appearance the use of the betel-nut, which is common throughout all parts of the islands that we visited, plays an important part. When chewed with lime and the root or bark of the pepper-tree, the teeth in course of time become quite black, the saliva and interior of the mouth are tanned to a blood-red colour, so that the *tout ensemble* is rather unpleasant. The chief Magu was presented by Sir William with a tomahawk, and tobacco was distributed among his attendants. The natives are rather short, but well nourished and sturdy, and have the reputation of being good workers. Landing at the village we found their houses substantial, but closer to the ground than at places previously visited.

The cemetery, we were told, was 200 or 300 yards from the village. The burial of the dead has been a troublesome matter to deal with throughout the territory. The most common burial-place used to be under or close alongside the house occupied by the relatives of deceased, generally about a foot or so in the earth. Sometimes the body was tied up like a mummy, and placed in a kind of wicker basket made of rattan canes tightly bound together, which was kept in the house or placed in the arm of a tree, the method varying in different localities. After a time the bones were secured and carried about as charms. Now the law is that the dead have to be buried in public cemeteries, and the natives in the settled districts conform to it pretty well, although they endeavour to evade it. The wearing or keeping of skulls or other human bones is also prohibited, but, no doubt, both are practised. To show the pertinacity with which the natives cling to old customs in this connection—whether from love or reverence for the deceased or superstition—we heard of a case where they kept the dead body in the house and made pretence of burial in the cemetery by substituting stones for it. This reaching the ears of the missionary of the village the "myrmidons of the law" were put in motion, and the unearthing of the false body was attended with some fine acting on the part of the natives, who pretended to be unable to proceed with the work on account of the smell. Of course this *ruse* did not succeed. The law had to be carried out.

At this village the house ornamentation consisted of painting the main supports in white rings, while the chief's dwelling was adorned with very crude representations of boats and animals. A cuscus, or New Guinea monkey—a light-coloured animal which gives the idea of a cross between an opossum and a native bear—was brought on board by some natives to-day in a cane cage, and was purchased from them. Another younger one was caught later on, but it died.

The Bishop conducted divine service on the fore deck, and preached a sermon on the building up of character, which was worthy of a cathedral congregation.

Guilhanetti busy getting ready to accompany Lord Lamington overland from head of Mullen's Harbour to Milne Bay on the north-east coast. They are to take six police and about twenty carriers.

MONDAY, MAY 2.—The natives came alongside the ship soon after daylight with bananas, fish, spears, and other trade. They seem a remarkably happy, merry lot—young and old.

The steam-launch started soon after 7 a.m. with the overland party, her destination being some 18 miles distant, Mullen's Harbour running into the land that distance. She did not return until nearly 2 p.m. During the interval our venerable botanist, upon whom our genial captain has bestowed the humorous appellation, "the gay and festive lycopodium," went ashore and delivered a lecture to the natives on plant life. The sandy beach was utilised as a sketch ground, and "the gay and festive" revelled in polysyllabic words and combinations to the great amusement of his audience, who understood not a word. But his diagrams, gesticulations, and the magnifying powers of his pocket lens conveyed to their minds the characteristics of certain plants he was anxious to get.

Two policemen were recruited here, the practice being to get men from as many different localities as possible, so that they may serve as interpreters. One "boy" who was returning home had a box full of a most heterogeneous lot of "trade," of which he was very proud.

It rained heavily during the night.

TUESDAY, MAY 3.—Still raining heavily. The natives brought us plenty fruit and vegetables. We started for Samarai at 7 a.m., and soon sighted the Eagle Rock, which, in the distance, very much resembles a dismayed vessel flying signals of distress, cocoa palms serving the latter purpose. Passed through some very pretty islands and coast scenery in the vicinity of Su-a-n Harbour, which affords splendid shelter to vessels. Just before 3 p.m. we open out Kwato Anglican Mission Station on Rogeia or Heath Island, which rises some 1,215 feet above the sea. It is in charge of the Rev. Mr. Abel and his wife, who are doing good work. Amongst other things they make a special point of teaching the natives English. A few more strokes of the propeller and we sight Samarai, the most important business centre in the Possession. In extent it is about 60 acres, with very pretty beaches and rocky foreshore; also a number of well-wooded heights and knolls in the background, the more convenient of which have been selected for residence sites. The principal business establishment is owned by Burns, Philp, & Co., who are practically the bankers of British New Guinea. They have something over £2,000 of paper money in circulation. As in Port Moresby, they have constructed a fine jetty here, with tramway right into their stores. Whitton Brothers also do a good general business. A few years ago Samarai had rather a bad reputation for malarial fever, the product of some 12 acres of swamp a few yards from the shore. This has been remedied by filling in the swamp with material from the surrounding hills by prison labour, and the site is now laid out as a recreation ground, including lawn tennis courts. A wide well-kept gravel walk lined with rows of cocoa palms forms, as it were, the principal street, and very charming it is. This leads up to the Government quarters, which are enclosed with a native fence—*i.e.* made of saplings lashed together with strips of rattan cane, nails being an "unknown quantity" in native architecture. The Government residency is on one of the hills, but the Resident Magistrate, the Hon. M. H. Moreton, being at present a bachelor, has good-naturedly handed it over to Mr. Symonds, Collector of Customs, &c., who is a married man. Mr. Moreton at present occupies a large native-built house, which is far from being in good repair, within the enclosure. Here also are the gaol buildings, police quarters, &c. A stone jetty is in course of construction; a retaining wall is also being erected—all by prisoners, of whom there were about sixty-five on the island at the time of our visit. The custom-house and court-house, close to Burns, Philp, & Co.'s jetty, are of galvanised iron, and a school of arts has recently been erected, the funds being raised by subscriptions. Brilliantly coloured crotonus abound; so do shade trees. Indeed it is surprising to see such luxuriant vegetation on what appears to be nothing but sand. There must be a large amount of vegetable humus in the soil. Some of the cocoa palms here attain a great height, one that was blown down during a recent storm measuring over 100 feet. Altogether Samarai is one of the prettiest islands in these waters. No shooting is allowed, so that birds make it their home. While here we saw a prisoner in a sulphur bath for removal of the skin disease so common in the country. Each bath occupies about twenty minutes, and about four or five applications effect a cure. We also saw five unfortunate women awaiting trial for breaking sepulture and eating part of a dead body. This is the outcome of some superstition, by which the sisters of a deceased person are supposed to gain strength or power by partaking of portions of the body. These ladies were sentenced to six months' imprisonment for the luxury.

We had also the opportunity of hearing part of the trial of a white man for the murder of a native by shooting. The scene—it was at night—was bereft of nearly all the formality attached to such a case in Queensland. The Judge was attired in ordinary dress, and the taking of the evidence—in this instance through two interpreters—was a simple though rather tedious process. The shooting was done to some extent in self-defence, and as the offender had been about six months awaiting trial, he was let off with a fine of £4.

Here, too, we saw a canoe of very different type and build from the ordinary outrigger dugout. She was over 40 feet long, constructed of thin planks sewn together, and caulked apparently with some mixture of rubber and clay. Her sides were painted with red and white bands, and further ornamented with representations of birds and fishes and clusters and strings of shells decorated her stem and stern. She hailed from the Engineer's group.

At Burns, Philp, & Co.'s store we saw a tempting ingot of Sudest gold, 117½ oz., worth £3 12s. per oz., the produce of reefing, which is still being carried on. Some Mambare gold was also shown to us—very coarse, and got evidently not far from the reef.

Here, too, we heard a tale which illustrates the fearful price gold costs to unearth. Four men started out in New Guinea. Two, then three, were taken very ill with fever; their mate spent most of his time nursing them until death relieved them of their suffering and him of his sad task. Result: 40 oz. gold. Cost—three lives, twelve months' labour, besides expenses of outfit, &c.

Among their many other ventures, Burns, Philp, & Co. have had prepared some bales of very fine flax, made from the long aerial roots of the pandanus tree, the same material from which the natives make their fishing lines and nets, which are very strong. Offered for sale in Sydney it did not realise expectations, so Mr. Ambouin, the Samarai manager of the firm, is sending samples to England.

WEDNESDAY, MAY 4.—Before breakfast, a few of the party circumambulated Samarai, "the gay and festive lycopodium" intent on botanical business, the others absorbing as much of his interesting disquisitions as was compatible with mental digestion, or searching among the rocks for conchological specimens, of which none of any value were obtained. Later on Sir Hugh and another section ascended to the highest point on the island, from whence a very fine view of the surrounding scenery was gained. At the same time stores on board the ship were being replenished, last letters and telegrams (the latter to be sent to Cooktown by first opportunity) written and posted to await first mail, and shortly after 2 p.m. we were steaming through the picturesque China Straits. A few hours later we enter Tanawarra or Milne Bay. This is a 27-mile indentation of the coast, with sharp-ridged hills from 1,000 to 1,500 feet high; some scrub-timbered in the glens and gullies, others well grassed and not unlike enormous pale-green velvet cushions. The various shades of verdure, an occasional cascade indicated by a silver thread, clouds and sunshine, and clear blue sea combine to form an attractive picture.

picture. Smoke, clearings, clumps and groves of cocoa-trees, and other evidences of cultivation mark native villages, which are numerous and populous. Arriving at the head of the bay at sundown, Sir William and his faithful private secretary are landed at a small island, where they remain for several hours "catch him star." At the same time Captain Butterworth proceeds by boat up a narrow and tortuous creek to the Miawarra villages, the place arranged to meet His Excellency Lord Lamington and Mr. Gulianotti. They had arrived there about 4 o'clock after a very rough trip. It rained most of the time, and the greater part of the march was through a jungle swamp, where walking was rendered very difficult by the water concealing a network of roots. It was not until the third day that they left level ground. One of the adventures of the trip was rafting over a river that was in high flood, which tried temper and muscle alike. The shooting was poor. Only two birds of paradise were got, but more could have been shot only His Excellency disliked killing them when not wanted particularly, much preferring to see them flying about. At Miawarra, Captain Butterworth—ever on the alert as to his staff—tried hard to get a fine native to join the police, but the missionary, who was present, evidently dissuaded the half-converted recruit. Returning to the ship, the wanderers, after narrating experiences and being duly refreshed, soon joined the somniferous brigade.

As this part of the Possession enjoys a regular and copious rainfall, it is well suited, when capital is available, for the cultivation of tea, cocoa, and like tropical products.

THURSDAY, MAY 5.—Up anchor soon after daybreak, and visit Mita village, which is presided over by a chief of rather Hibernian cast of feature, called Yokaba, who has been for nearly ten years a strong friend of the Government, having stood by them ever since the Ansell murder in 1850. Here also we were shown one portion of the process of ornamenting the palm-leaves that are used for mats. This is done by a sharp bit of shell, the pattern being traced rapidly and somewhat artistically by the women, after which the mat is placed in the sun. We were told that another stage is worked with boiling water or a firestick, but our visit was too short to see this. Yokaba manifested his regard for Sir William by presenting him with a drum, club, &c., which gifts were duly reciprocated. We rounded East Cape at about noon, and a few hours later we anchored within about 100 yards of the village of Awaiama, in Chad's Bay. This is an Anglican Mission Station, in charge of a teacher named Fred Menena, who keeps a boarding-school for boys. He is assisted by two other native teachers. The village is clean, the houses strong and neat, and the church, built native fashion (which is also used as a school), fairly commodious. The chief, Borogie, has a powerful face and figure, but the natives are of only average stature, and practise painting the face with thin black lines, curves, and circles, which produce a grotesque, in some instances a very comical expression. One novelty was the school bell—a hollowed log, the sound of which when struck with a heavy stick could be heard a considerable distance. Another was an unusually large platform or dubu under a shady tree, apparently a meeting-place—perhaps of the local Parliament. The youngsters, recognising Bishop Stone-Wigg, formed a strong but not very orderly bodyguard during his stay. Our inspection occupied about half an hour, and we proceeded on our way. As we did so the coastal range grew in boldness and rugged grandeur. If one could imagine the storm-whipped waves of the Atlantic rising 3,000 to 4,000 feet, then being thrown at a sharp angle and becoming instantaneously petrified and clothed with thin verdure, it would give some idea of the picture.

Taupota, a somewhat straggling village of 700 to 800 people, was our next calling-place. The mountains run down so close to the sea that only a narrow fringe of cultivable land is available, and further on it disappears almost entirely; population, of course, diminishes in proportion. The gardens at Taupota, however, are very prolific of native food; pigs are numerous, and the people in good condition. Their houses, some of which are habited on the ground floor, are comfortable, and we saw several meeting-places—each a circle of stones under a fine umbrageous tree.

Rounding the bold headland, Mount Curomeo, *alias* Cape Frere, at about 7 o'clock, we run into Bartle Bay, pass the village Wamira, which accommodates about 500 people, and anchor off Wedau, of somewhat smaller population. This is the headquarters of the Anglican Mission. The mission-house, named Dogura, a very fine solid structure of wood, roofed with galvanised iron, occupies the top of a plateau some 150 feet high, which appears to have been submarine at some remote period; and being itself elevated 10 feet from the ground, it presents a pretty picture from seaward. That great desideratum in a tropical climate, a 12-foot verandah, surrounds the house. The chapel, a neatly-furnished apartment—in which, in addition to Scriptural quotations in English and native languages, is a fitting mural entablature of brass in memory of the Rev. A. A. Macfaen, B.A., who established the mission in August, 1891, and fell a victim to malarial fever a few months later—is located in the centre of the edifice, being surrounded by the dormitories and other necessary accommodation for the missionaries and teachers. These, including the Bishop, number fourteen—seven white and seven coloured. Six additional white teachers and one more coloured were expected, and have probably joined the ranks since our visit. Some idea of the extent of the work of this mission may be formed when it is stated that the area of operations extends from Cape Ducie to German New Guinea, about 300 miles of closely-peopled country. This is exclusive of the more difficult mountain work. Homes for the native teachers and boarding accommodation for pupils are at the rear, the space between being used as a recreation ground where games are played, football being a great favourite. The pupils number thirty, a bright, intelligent lot. Some have been here six, some twelve months, and others two years, with home holidays occasionally. They sang us a hymn, chanted the 23rd Psalm, and expressed their loyalty by rendering "The National Anthem" in English. Day-school is conducted at the villages, but the great drawback to advancement here, as elsewhere throughout the Possession, is irregularity of attendance. It is spasmodic and intermittent, and adds very considerably to the labour of teaching, which at the best is a severe trial of patience and endurance. But since the advent of lady teachers here an improvement has taken place, and perhaps this experience will be taken as a guide by others engaged in this noble work.

The first native marriage, according to the rites of the Anglican Church, had been celebrated shortly before our arrival, the bride being about 15 years of age, but seemingly younger—a girl just entered her teens. Yet we were told that had it not been for the advice and influence of the teachers she would have been married a year or two before. Another girlish-looking woman had been married about eight years. These early marriages are common in New Guinea, and may account in some measure for the small stature which characterises certain tribes. The statements we heard re courtship indicate that human nature here varies little from its characteristics in other parts of the world. A boy and girl of the same village take a fancy to each other; this grows into a stronger passion: parents and relatives are consulted, and on betrothal the girl is tattooed on the thigh, the "boy" assisting in the operation, and sharing the blood which is collected with his intended bride. Then as soon as the "boy" is able to pay the price fixed for his bride, the marriage is celebrated by a feast. The marriage ceremony differs in various places, but one feature is each taking a bite of the same food and in other ways indicating a blending of their lives. Until a girl gets married she is allowed a good deal of freedom as to where she draws the line from a moral point of view, but after marriage infidelity is most vigorously punished.

The gardens produce plenty of food, the natives utilising the mountain streams for irrigation when required.

FRIDAY, MAY 6.—We make an early start—3 a.m.—and daylight ushers in a lovely view—

mountains
 "A sea of glass;"
 " — tipped with gold ;
 Line o'er line, terrace o'er terrace,
 Even to the blue heaven."

Out seaward, Sir William points to an island which emphasises the desperate straits to which the coast natives were at times driven by their savage and merciless foes—the hull-men. This part of the coast—Goodenough Bay—and Collingwood Bay were notorious a few years ago for massacres of this kind, and the survivors of one tribe at last took refuge on this precipitous island, and made themselves secure by drawing the ladders up after them—the same as is done by the tree-house natives. Now all this is changed. Peace and prosperity—which to the native means plenty of food and security from attack—prevail. As we go forward the coast hills recede, giving a deeper shade and more cultivation. Mount Victory, an active volcano, 5,080 feet high, is seen in the far distance, ejecting jets and small clouds of steam, with "Trafalgar" (4,000 feet) to the right. Our next anchorage is Phillip's Harbour—native, "Sinapa"—the site of the new Anglican Mission Station. What a comparison between the reception of the "Minnie England" to-day and her first visit! The voyagers were then regarded as celestial beings; the natives were in terror lest the masts would fall and crush them; they refused to taste the white man's food, fearing that it would cause death. One of the crew happening to light a lucifer match, the natives fled in the greatest fear! Now canoes come round, ready to trade, and the natives are perfectly fearless and happy.

Here we met the Rev. Mr. King, who had preceded us from Bartle Bay in the small missionary vessel, to superintend the erection of the mission-house, the material for which had just been imported from Sydney. The site is low and rather swampy at the back, but we were informed that it was the best they could get for their purposes in the locality, and that there had been protracted official delay in getting it granted—that, in fact, the matter was still hanging fire. However,

here

here they were going to settle, and one could commiserate with them in their task, for a more chaotic scene could scarcely be imagined, everything lying about higgledy-piggledy as landed from the boats. But no doubt the Rev. Mr. King with his twenty Bartle Bay students, aided by the carpenter, Mr. Tomlinson, would soon put a different appearance on things. A short service was held on the beach in the evening, the boys singing the hymns lustily.

The chief of the village, Bogagi, was among the visitors to the ship, and was invested with the customary shirt and red sarong. The natives are of slightly-better physique than those we recently visited, and they use canoes with unusually long outriggers and large platforms. Taking two boats, we start in tow of the launch, and after a couple of hours' run we arrived off Wanigala, where our approach was greeted with loud cries of "Oro! Oro!" by a crowd of wiry-looking villagers dancing and prancing about, one of whose peculiarities is that the hair is a mass of pipe-like ringlets, in some instances well plastered with mud. This is equivalent to "Peace! Peace!" Though friendly, they were at first uncertain as to our intentions; no females appeared on the scene, but the males brought us fruit, traded with us for curios, and gradually became familiar. On the way back to the ship we called at Maisina, the inhabitants of which had been notorious for making raids and committing outrages upon the villages to the eastward, but now, under the influence of the Government and the missionaries, all this is at an end. But travellers are now entering a region not so safe as that we have come through, and, however friendly the natives may appear, it is well to travel in fairly strong parties, and to be always on the alert for treachery. And the further north-west they get the greater grows the necessity for caution.

SATURDAY, MAY 7.—About 10:30 we wish our missionary friends success in their good work, and steer for Cape Nelson, a curious promontory formed of several deep fiords, the intervening country consisting of low grassy hills, wooded here and there on the slopes, and running down to the sea. Having to pick our way amid reefs in water beclouded with what looked like animalcula, our careful captain slackened speed, and passing inside the reef which bears his name, dropped anchor in Porlock Harbour at 6:30 p.m. Being quite close to Mount Victory we get a good view of that interesting spectacle. The slopes are wooded nearly three parts of the way to the top; then there appears to be a wide chasm from which springs an immense mass of barren perpendicular rock, on the rugged summit of which are cone-like protuberances and deep cauldron-like openings emitting jets and light clouds of steam which at times form into dense masses. We saw several canoes as we rounded the cape.

SUNDAY, MAY 8.—Another early start—4 a.m. Passing along, Sir William points out that one of the peculiarities of the rivers hereabouts is that they open out on sandspits instead of in the bays, consequently they may be overlooked by explorers. These spits are probably the result of frequent heavy land-slips and other debris carried down in flood-tide. There is said to be a large area of good agricultural land between the shore and the mountains, and a good many villages. The first striking object of interest was "Mitre Rock," which for some time was looked upon as on the 8th degree of latitude, and consequently the starting-point of our boundary, but this has been found by Sir William MacGregor to be some distance to the north. Mitre Rock, including vegetation, stands about 60 feet above the sea, by which it is pierced for nearly half its height. It is the home of numerous pigeons and cowrie shells, as we found later on. At 2:45 p.m. we anchor at the mouth of the Mambare River, of which we have heard a good deal lately, owing to the recent murders there. A small schooner, the "Wana Wana," owned by Whitton Bros., is at anchor, and on shore we see the Government store, a small galvanised-iron building, and two or three native-built houses occupied by police and prisoners, who cultivate a patch of garden. The foreshore is low, but the hills rise to a fair height a short distance back, and are well wooded. Mr. Shanahan, the Resident Magistrate, comes off and reports, *inter alia*, that there are about 30 diggers on the Gira River, all getting coarse gold equal to wages, including a 5-oz. and a 3-oz. nugget. These miners employ about 130 natives, chiefly as carriers, and as a rule treat them well. Any reliable reports of harshness generally result in the refusal of a renewal of the license to employ; and conviction of absolute cruelty is followed by penal consequences. These carriers are recruited from different parts of the coast, and after a while the feeling of nostalgia becomes so strong that they sometimes desert and start a journey of hundreds of miles along the coast to reach their villages. We picked up two who had been fed and cared for by the natives of foreign villages, who were openly praised and well rewarded by Sir William for their kindness. We heard of other runaways who had been similarly treated along the coast, and saw several at Tamata who were undergoing imprisonment for the offence. These had apparently undergone considerable privation. Cases of desertion from service are numerous, and suggest the question whether native labour is "cheap" in the ordinary acceptance of the word. It costs £4 to engage a "boy" for six months; you have to pay him 10s. a month, keep him in food, supply him with medicine and necessaries when sick, and he may "clear" before one-third of his term has expired. Then the process has to be repeated.

Here we learn full particulars of the murder of Mr. Green, the Government Agent and Assistant Magistrate at Tamata, the head station on the river, in January, 1897. It appears that Mr. Green, who had had considerable experience in New Guinea, was very kindly disposed towards the natives, and treated them with a confidence which, alas! cost him his life. He had some natives assisting him in clearing the site of the new station at Tamata, and in the erection of the residence and store. The night before his murder the natives told some of the police that they were afraid to come in to work because the police always carried their rifles, and that more would come in if the rifles were put away. Mr. Green, not dreaming of this cunningly-devised plot, ordered the police to lay aside their firearms. The natives came in in considerable numbers next day, and at a prearranged signal speared him as he was on the roof, and killed him on reaching the ground. They also killed four of the armed constables, three prisoners, and a native servant, the others escaping with difficulty. Then the place was looted, and this is supposed to be the primary object of the outrage. Some of the murderers or their accomplices have been arrested; so have several of the wives of others who are still at large; but a notorious scoundrel named Dumi, an ex-policeman, who has been "wanted" for nearly two years, and is supposed to have instigated this atrocity, is still at large.

The Yeva massacre, a full account of which we also gleaned here, affords a strong illustration of how crime begets crime. Probably encouraged by their success in the murder of Green, the Monata tribe got a number of the Apochi, Omi, Peu, and Koeni tribes together in council at their village. The visitors tried to persuade the Monata men to go and kill the police at Tamata. The Monata men said, "No; no good try kill police; always on watch. Let us go and kill the Yeva; they been acting as guides to the police." This was agreed upon, with the result that a night attack was made on these unguarded people, of whom fourteen were killed, while ten of their women were carried off.

As showing some of the ramifications of these tribal wars, the Yeva people sent word to friends of the Gira of what had happened, and the reply came back, "Never mind. We will come and kill the Koeni people; kill plenty."

We had almost forgotten that it was the Sabbath when the church-like toll of the ship's bell called us to service on the foredeck at 8:15 p.m. His Lordship the Bishop conducted the service, and once more gave his hearers much material for thought and the formation of good resolutions. It was a lovely night, the star-crowded dome above and pale moonlight making one feel that verily "the heavens declare the glory of the Lord."

We had exchanged some police, and, judging by the earnest talk and lively gesticulations of the Mambare "boys," they were painting a vivid picture of "the battles, sieges, fortunes" they had undergone.

MONDAY, MAY 9.—"The morning shone all clear and gay," and by 7:20 we cast off from the ship's side to enter upon the new experience of camping out in New Guinea, and to see what four days and nights on the Mambare will bring forth. The party were distributed in this order:—

Steam-launch—Guilianetti and Shanahan;
First boat—The two Governors, the Bishop, and Mackay;
Second boat—Sir Hugh, Captain Butterworth, and Gilligan.

Each boat carried at its bow a red flag, the New Guinea emblem of peace. Just before starting we saw four prisoners brought in by the police, charged with being concerned in Green's murder or the recent massacre.

There are three entrances to the Mambare, each with a bar, so that at the sea the magnitude of the stream is not apparent. The banks at the mouth by which we entered are low and covered with dense vegetation, in which the Nipa palm, with its magnificent leaves, stands out prominently. Innumerable vines, of varied hue and description, have climbed from tree to tree to the topmost branches, and, falling in graceful festoons or a lace-like veil of greenery, relieved by an occasional flower—such as that of the brilliant D'Albertis creeper—or bright autumnal leaves, produce a charming effect. Alternately with this, and indicating where the set of the current has recently cast up new and still growing banks, are patches of pampas-like grass 12 to 15 feet high, the efflorescence of which is very like that of sugar-cane.

Further on we come to thick, almost impenetrable, tropical jungle where the axe and knife of the settler or timber Vandal have not been at work. We have similar scenes in Queensland, but they lack the strength and grandeur that characterise the New Guinea picture. Pandanus trees grow to a height of 50 and 60 feet, and their aerial buttresses extend halfway up the stem.

About 3 miles steaming brings us to the main stream, which varies in width from 150 to 250 yards. Now and then we come to a fine reach, but as a rule the windings are tortuous, and snags are numerous, necessitating careful navigation, especially on the up trip, as their most dangerous points lie down stream. The banks show traces of a recent rise in the river, and although it is now pretty near its normal condition, the current is so strong that we do not make more than 4 or 5 miles an hour. As we ascend the banks rise gradually. We pass numerous clumps of sago-palm, a large proportion of which is ready for the axe, as indicated by the peculiar shrub-like flower that springs from its top. Fig and rubber trees and vines abound all along the banks, and breadfruit is abundant.

At one spot our attention is attracted by a loud twittering to a high tree, in which a number of swallow-like birds have built their nests, some fixed and others pendant. It may be mentioned here that the quantity of bird life seen on the rivers was disappointing. Two or three very small flocks of duck and a heron or two comprised the water-fowl, although the marshy country which is known to exist in the district would appear to be a capital breeding-ground. We saw a few flocks of small parrots, some hornbills, a number of pretty bronze brown hawks, with white neck and breast, similar to its Queensland congener, and heard the call of a pigeon or a pheasant at long intervals. More frequently we heard the note of the bird of paradise, this being what is called its "dancing season." Selecting a pretty high tree with open branches, they fly and jump about, flapping their wings, and uttering a shrill cry—not unlike the movements of our native companion when at play. But we startled from their daily slumbers two or three colonies of that abomination, the flying-fox.

Shortly after 11 a.m. we reach a deserted village, where we devote an hour to gastronomy in a mild form. About five hours later we arrive at another deserted village, Pen, where Sir William decides to make our first camp. From the number of houses, which are small and about 3 feet above ground, it must have had a large population in its day. In a few minutes nearly everyone is busy erecting flies and hammocks, and preparing for the night, under the able direction of Butterworth. Guilianetti is in charge of the commissariat and the culinary department, and a capital *chef* he made.

No one is allowed to go into the scrub without firearms, and at night we have an armed guard. One of the "boys" shot a well-plumed bird of paradise, which Sir William presented to Sir Hugh. A warm hearty meal made everyone happy with himself and his neighbour, and this followed by a smoke and chat, diversified by repelling the musical and vivacious mosquito, terminated the day.

TUESDAY, MAY 10.—Last night's supper was only efficacious in a temporary suspension of appetite, for at break of day we are delighted to see Guilianetti again studying something over the fire, and a little later on our admiration for him has further increased. At 7:30 we are again afloat, and pass several villages and gardens from which the people have fled for fear of the consequences of their recent treachery and crime—a self-inflicted punishment which should prove a warning to all evil-doers. At 11 a.m. we pass the village of Yeva, the scene of the recent massacre, now deserted of course. Comfortable dwellings and a large garden show that it had a fairly large and contented population. At 1:30 we lunch at Apochi village, of which Guilianetti, who is also our artist, took a snapshot. Started again at 2:15. The banks have now risen considerably, all fine alluvium; but as we approach the mouth of the Tamata, a small tributary of the Mambare, rock formation shows itself and increases as we ascend.

At the bend of the river opposite the Junction the survivors of the Yeva tragedy have started a new village. Their late terrible experiences have induced them to construct a high stockade around their dwellings, and being in close proximity to the Government Station they feel that they are safe under the aegis of its protection.

On entering the Tamata River Mr. Shanahan fired four shots as a signal to the station people of our approach. A sinuous course of a few miles against a strong current brings us in sight of the headquarters of civilisation on the Mambare. This palatial edifice is situated on the top of a ridge about 40 feet high, and commands a good view, which, however, is restricted to the cleared ground—some 20 or 30 acres—and the river bend. It is of galvanised iron, about 30 feet by 14, with verandah or balcony back and front. The dwelling and offices are some 10 feet from the ground, the lower portion being used as a store. A good-sized native-built house does duty as a kitchen. The other buildings are the gaol, of stout timber, and the police quarters, a large native structure. About 100 yards off, across a ravine, are about a dozen very strongly-built log huts—erected by permission of the Administrator—belonging to miners who, having made this their headquarters, have gone away to the Gira, leaving everything fastened up, but not sufficiently so as to be secure from the natives were the place not in sight of the police station. Whitton Brothers have also a store here, and amongst their ventures they brought nine horses here for carrying purposes. They were conveyed by steamer to the mouth of the river, and then rafted in batches of four and five to Tamata. One has died, and so far the others have not been utilised, the track to the Gira not being suitable for them at present. A log cabin of unusual strength and comfort is occupied by Mr. Clunas, who has had eight years' mining experience in New Guinea, and looks remarkably well. He regards the present field on the Gira as pretty well worked out, and was preparing to take a prospecting trip to the Zeddo Valley. He subsequently started, having arranged with Sir William for police protection. He regards the natives about here as a bad, treacherous lot, who are worse now than they were three years ago. "The best thing," he said, "you can do is to send them to Queensland for six or seven years, and civilise them." He has two fine dogs upon which he sets great value as protecting him from a surprise by the natives. At the Gira, Whitton's storekeeper says some of the miners still believe in it, and all are making wages; so that opinions vary. As to health, the miners suffer more from dysentery than fever, probably caused by working so much in the cold water. Some of them are turning their attention to rubber collecting as a means of augmenting their income, getting the natives to do the work. At Tamata several acres are under cultivation, European style, and more is being prepared—all being done by prison labour. It should be explained that, as a rule, the natives in making a garden do not clear out the stumps and roots as we do, but simply cut the trees down a foot or two from the ground and plant between. The digging process is performed by a number of natives of both sexes forming in a line on their knees, and turning over the soil with sharp sticks. The products here are sweet potatoes, taro, sugar-cane, pawpaws, limes, bananas, coconuts, melons, and pineapples; but the rich chocolate soil seems capable of growing anything tropical. In fact the dense vegetation which characterises all the low country of New Guinea, especially its river banks, which are subject to frequent inundation, justifies the opinion that the soil could be cropped for a long period without help from the "stercoraceous mound" or other fertiliser. The native system of cultivation affects only a few inches of the surface, and that for only a comparatively short time, as they frequently abandon one garden site for another. The Mambare country, Mr. Shanahan says, is pretty much the same all along the river, except close at its mouth—a strip of low land runs a few chains back and falls into swamp; then good country and more swamp alternate until the foot hills of the ranges are reached.

Our arrival caused quite a flutter, and on landing all the police on the station (four) formed a guard of honour. Again we have to thank Guilianetti for a hearty meal, soon after which we seek rest and sleep, and find both in our hammocks.

WEDNESDAY, MAY 11.—Leaving Sir William engaged in business, the rest of the party start in the launch and one boat to further explore the Mambare. At the Junction we call at the new village of the Yevas, who were very pleased to see us. Among them were several men of fine physique, and their women, notably their queen, were also exceptionally well proportioned. Their hair is in small ringlets, the men wear the T string, the women the sarong; there is little or no tattooing, but the arms and portions of the body are ornamented with raised cicatrisation, and they wear armlets, leglets, necklets, and chest ornaments. Several of them were in mourning—i.e., the body and head being smeared with clay, and the women wearing a hood and keeping secluded. Captain Butterworth—"Barua" in native tongue—was made much of as an old friend; in fact one of the leading men had named a child after him. We noticed a remarkably strong pig-net, also some well-designed and well-made fishtraps, and gothic-shaped shields. Running up the Mambare for two hours we arrived at the island Boka, nearly 50 miles from the mouth, where, despite the terrors of scrub itch, of which Guilianetti warned us, and the difficulty of scrambling up an almost perpendicular bank 9 or 10 feet high, we land, collect some botanical specimens for "the gay and festive," while Butterworth's stentorian, "Oro! Oro!" proclaim to the wilderness and its occupants that our mission is "Peace." The result of the gallant captain's vociferation is that before we have finished lunch a canoe is seen approaching carrying three natives of Umi village, accompanied by one of the scouts who had been sent out. One was a very handsome young man, admirably proportioned, and apparently of superior caste. The others were older men of good frame and condition. They kept calling "Oro! Oro!" and on coming alongside Butterworth, who they seemingly knew well, explained to them through an interpreter that the great desire of the Governor of New Guinea, and of the "Big fellow Governor of Queensland," was to get all the people to live peaceably and happily together; that if they did so they would be protected by the Government against all comers. We then sent them off with a present each. As they moved away another canoe came forward, and numerous natives, previously hidden in the long grass and other

other places, showed themselves, and "Oro! Orokaiva!" echoed on all sides. This Umi tribe has been a source of trouble for a long while, even before Green's murder, and it is suspected that one of the men who came alongside was concerned in his death. As far as could be gathered, all now want peace with the Government, but once let the cupidity of these people be aroused, and any party numerically weak or weakly armed would stand a poor chance. Our return to Tamata was made in good time.

THURSDAY, MAY 12.—Oshimbu, chief of the Omi tribe, and a great friend of Butterworth, came in this morning, accompanied by a newly-appointed village policeman, and received a present. He is a man of great physical power, and his massive head and commanding features would point to equally strong mental powers. Starting from Tamata at 9 a.m., the down trip was made rapidly—about 10 miles an hour. Nothing of interest occurred, except that at a few places the natives showed themselves and appeared less frightened than on the up trip. It should be stated that on the up journey every possible care was taken not to create any alarm, and no doubt the generally peaceful character of the visit had a good effect. Let us hope it will be permanent. We reached the mouth of the river at 5 p.m., and "home" shortly after. The evening was spent in preparing for the trip up the Gira.

FRIDAY, MAY 13.—In the morning it rained very heavily, and this continued until the afternoon, necessitating a postponement of our trip to the Gira until the weather cleared. Sir William being otherwise engaged, the majority of the party went to the Mitre Rock on a pigeon shooting-cum-oyster gathering expedition. We got some good oysters and cowrie shells, and sixteen pigeons, some of the latter being shot on the mainland.

SATURDAY, MAY 14.—The mouth of the Gira is only about 5 miles distant, so the steam-launch was used to tow the party in three boats—their Excellencies and Mackay in the first; Sir Hugh, Guilianetti, and Gilligan in the second; the Bishop and Butterworth in the third. There being a pretty heavy break on the bar, which would not admit in any case of the entrance of the launch, the party landed in a bight about 3 miles inside War Song Point, and walked to the river, where it was arranged we should meet the boats. By 9.30 this was accomplished, and being reminded that we were now in Kaiser Wilhelm's Land we forthwith drank "health and happiness" to that distinguished Monarch, the two Knights adding appropriate musical honours. No time was lost, for rowing up a river against a strong current is a slow process, and we wanted to see as much as possible of these "fresh fields and pastures new." Our crews on this occasion, as on all others when rowing had to be done, were the police. Running nearly southerly, the river enters British territory about a mile from its mouth. About 3 miles further it protrudes a sharp bend back into Kaiser Wilhelm's Land, then returns and continues in the Possession to its source. It has been proposed by Sir William that the middle of the river should be the boundary "from the sea to the most westerly point at which the river last crosses the 8th degree of latitude before entering into British territory," from which point it should continue along the 8th degree; and that navigation should be free to both colonies. It is probable that this will be agreed to, if it has not been already. For some distance from the mouth the land is low and swampy, but improves gradually. We soon get into country in which sago is very plentiful, and about half a mile up we pass an abandoned garden. Passing several empty canoes, we sight a tenantless village and push on as fast as five strong rowers with four "relieves" can propel us. "Fast" is perhaps the wrong word to use, for so strong is the current that we cannot make more than 2 miles an hour. The river is not so wide as the Mambare, but the vegetation and scenery are very similar. Perhaps the narrower stream, with equally lofty vine and creeper-clad trees and shrubs, presents the prettier picture. About 5 miles up the country assumes a more open aspect, and this characteristic is observable in a stronger degree higher up. One explanation offered is that the population being dense they have gradually denuded the river banks of the higher trees by frequently shifting their gardens, when the abandoned ground soon becomes overrun with young trees, which take many years to attain the height of the original forest. Sir William remarked, *apropos* of this, that there is scarcely an acre of virgin forest on the river, and probably he is right. On arriving at the village "Tetu" we found traces of a hasty flitting—fires burning, food cooking, and property of various kinds in the houses. Leaving a piece of red cloth as a peace-offering, we pass onward. We saw a good number of canoes fastened to the banks, and no doubt the late occupants were watching closely every move of ours from their hiding-places. Snags were even worse here than in the Mambare; the large boat had a narrow escape from capsizing on one. Had she done so, the result would probably have been serious, as the water was about 10 feet deep and "running like a mill stream" round a corner. On sighting Tobe village, Butterworth went ahead to try and get a talk with some of the natives. Again his stentorophonic "Oro! Oro!" proclaimed the object of our mission, but without practical result—at present. We pitched camp not far from the village shortly after 4 p.m., the operation being very similar to that on the Mambare, and with like results. While we were at tea some natives on the opposite bank hailed us, and a loudly shouted dialogue took place between them and some of our police. The former said they wanted peace, but were afraid that we wanted to arrest them. Shanahan had arrested four only a day or two ago, so that their suspicions were reasonable.

SUNDAY, MAY 15.—The natives on the opposite bank renew their vociferations, and we direct them to go on to the next village, and we will follow. Eight o'clock finds us "all aboard," and as we come in view of the village we see natives clearing off in three canoes, but those on shore make signs of peace—*i.e.*, putting the fingers in the ears, swaying the body to and fro, dancing a few steps, and crying "Oro! Oro! Orokaiva!" which at some places was varied by "Beggabegga-awari-begga" and "Tapo." Some of them brought coconuts and betel-nuts, but as we approached the bank fear became their master, and they all "cleared" but one fine young fellow, who was rewarded with a red sarong and given a shirt for the chief. We did not attempt to land, lest we should increase the alarm of the hidden. No sooner had we moved off than they again became brave, and we saw the chief don his shirt. As we went on the natives kept abreast of us on the banks, which they could easily do, our progress against the current being so slow. Gradually they gained confidence, and at Taututu village we did some trade with them, in which they showed keen business habits. At 9.30 a.m. we came to Dowata, where we did more trading, the natives from the villages we had passed still keeping up with us. Digada we found deserted; so was Evire, a neat, clean village on a small creek. One man, however, came forward and did some trade with us, and later on some others did the same. We lunched here, which occupied three-quarters of an hour. Pressing on, to relieve the monotony and heavy strain of rowing, about 3 o'clock the "boys" landed and towed the boats wherever the bank admitted of so doing. Our artist took occasional snapshots. Passing Wore village the river forms an extensive elbow, or loop, with what is apparently its old bed, and is about 400 yards wide. At 4 p.m. we camped at Tabara; dense black clouds to the south-west giving warning of a storm, or at least heavy rain. The natives from the village were very friendly, their chief, Jewaba, and others giving us a helping hand, but we kept a sharp eye on them, lest their education as to the rights of property had been neglected. Tomahawks and large scrub knives are a great temptation to natives, so for fear of accidents they were ordered to their village before dusk might add to their temptation. The rain came upon us before the camp was quite fixed, but it was lighter than we expected, and we did not suffer much. Butterworth camped in the native village, where there were about fifty men, but no women or children.

MONDAY, MAY 16.—Raining steadily, which makes things generally uncomfortable; but then "variety is charming." While the camp is being struck—of course, after a Guilianettian breakfast—most of the party, led by Butterworth, proceed to the village. Passing through a fine garden they came to a high stockade, entrance to which was through a small gateway which, when closed, was secured by a heavy log. Then other evidence was at hand that these Tabarains live in a state of continual fear of their neighbours. Inside the enclosure, and so arranged as to afford protection to all the houses, were thirteen fighting platforms, some of them fully 30 feet high, and provided with spears and other missiles to drive off the enemy. Access was by rough but strong ladders. The village was remarkably clean, and the tenements good, but alas! it was tenantless. Whether the natives had taken fright or were annoyed at their treatment last night it was impossible to say, but they had flown; and although we could hear them a short distance away, all our "Orokaivas" and "Beggabeggas" proved useless to induce them to come forward for a long time. At last one man—and he turned out to be a Mambare "boy"—made his appearance, and we purchased one or two articles from him. What a story this man will probably tell to his fellows—how he faced the powerful fire-eating white invader! "Alone I did it," he could truly say.

As an instance of the extraordinary growth of vegetation in this climate and soil, it may be stated that a kind of palm which was cut down last night showed new growth of nearly 2 inches this morning.

On the return journey the natives generally were much less timorous, and proclaimed their desire for peace. We bought considerable quantities of food from them; also a few curios, and no doubt the visit will lead to the establishment of better relations than hitherto prevailed.

Arrived at the mouth of the river at 2 p.m., and the party, with the exception of Sir Hugh, leave the boats, so as to lighten them for crossing the bar, and walk about 3½ miles towards the anchorage. Then Sir William took to the boat again, Lord Lamington, Guilianetti, and Gilligan walking the remainder of the distance, about another 3½ miles. They reached the station about the same time as the boats arrived at the ship, 4.20, and were glad to be "home" again.

TUESDAY,

TUESDAY, MAY 17.—Engines at work again at 7:30, and at 9:15 we anchored to allow Sir William to take observations opposite Mitre Rock. Several of the party landed at the same place, and went shell-hunting, &c., whilst others went up Douglas Harbour, a lovely spot, nearly semicircular in shape, with plenty of deep water, and thickly wooded hills all round. They got some orchids. This occupied us until 11 a.m. Arrived at the Ope two hours later. This river is on the southern side of Gumboro Hill, 600 feet high, and has rather a deceptive entrance around an acute-angled sandspit. It is only a small stream, but the scenery is very beautiful. The view from the mouth embraces a dense row of nipa palms along the left bank until terminated by a bend. Sweeping round a curve, the right bank exhibits a luxurious growth of trees, palms, ferns, creepers, interlaced in most graceful confusion. For long distances the festoons have become interwoven into beautiful masses, which hang like a curtain from the topmost branches of the highest trees even into the water. Others are like pendant streamers, and convolvulus blossom, white flowers, hibiscus, and coloured leaves assist in completing the picture. This continues all the way up, except where interrupted by villages or native gardens. The first native village, Diri, is less than half a mile up, the houses being raised about 4 feet from the ground, substantial-looking and clean. At the rear of this village is a pretty little precipitous hill, nearly 100 feet high, tree-clad and banana-capped. Behind this, with an intervening valley, is a much higher and more extensive hill, called Singora, also well-timbered and banana-crowned. This, it is understood, Sir William has offered to the Bishop as the site for a mission station. The second village is Dedora, where we saw three large canoes in process of being dug out. The third village, Kiara, is situated on a most picturesque reach of the river and at the foot of a very steep hill, from 400 to 500 feet high. This is so close to the water as to leave only a narrow strip for settlement.

It was observed at the entrance here, as also at the Mambare, Gira, and Kumusi, that the casuarina and other trees were decaying. This is due, probably, to a subsidence of the coast. For Sir William stated that a point at the mouth of the Mambare, where he camped some years ago, is now submerged by the sea.

On landing, the natives, led by the chief Tabe, made a great fuss over the party, especially Sir William, who decorated Tabe with shirt, red sarong, and leather belt. They were all ready to trade with us, and rather a touching incident happened in this connection. A young fellow was tempted to part with an ornament which probably carried with it the memory of some dear one, for he kissed it tenderly three times before parting with it. Another instance of strong feeling was shown by a native who embraced and kissed on each cheek one of the police "boys." Here also we found a runaway carrier, for whom the tribe appeared to have a great regard, he being well nourished and decorated with herbage and flowers. Whether this had been done with the hope of reward is not known. Let us hope not.

Sir Hugh amused the natives greatly by showing them his watch, and on this occasion he created everlasting friendship on the part of an old warrior by decorating him with a piece of red cloth. The old fellow was "at his heels" everywhere.

Lord Lamington, accompanied by one policeman, went up the river in a canoe paddled by a native. At the first village the people were friendly enough, calling out "Orokiava," while their women and children were running about. At Dedora the villagers were equally friendly, and he had got into conversation (through an interpreter) with a large crowd of men, when three natives suddenly made their appearance in warpaint and with spears, and put themselves in a threatening attitude. The policeman at once raised his rifle, and after shouting and yelling and much language on the part of the policeman the natives disappeared. His Excellency then turned back, and met Sir Hugh and one or two others in one of the boats going on a similar errand to his own—to see what was to be seen. He trans-shipped, and the boat went up to the same village, but no natives were to be seen. Pigs and dogs and fowls were running about, food cooking, "household gods" unmoved. The only semblance of protection to the latter was a mat or some other obstacle drawn or placed across the doorway. We had seen this at other deserted villages. We placed the recognised emblem of peace on a pole, and were pulling off when one of the natives emerged from his hiding-place and held conversation with our interpreter, who assured him of our peaceful intentions. Others, including some of those we had met on the beach, then came to the water's edge, and supplied us with coconuts, betel-nuts, bananas, taro, &c., *ad lib.*, receiving, of course, a *quid pro quo*. We were moving away again when Tabe came down stream in a canoe, and expressed a wish that we should visit his house. We followed him up the river a short distance, and stopped at the landing-place of his village, Kiara—apparently a large and clean one—but did not land. Our stock of coconuts was here further augmented, and we left, each party pleased with the other. It was subsequently explained that the natives who made the warlike display were visitors from a neighbouring tribe, and that they really meant fight.

On returning we found that the "Merrie England" had gone back to the Mambare with Butterworth, who is to take stores for a two months' patrol in these regions. The large steam-launch "Ruby," bound for the Mambare, passed about 4 p. m.

WEDNESDAY, MAY 18.—After breakfast Sir William, Lord Lamington, Sir Hugh, the Bishop, and Gilligan went up the river by boat. During the trip Tabe came on board with his four-year old son, who was decorated with a coloured sarong, and later on the Bishop presented him with a tomahawk; he was also given some beads. The poor little fellow did not seem happy in the presence of so many horrid white men, and was no doubt glad to get ashore. There he was soon surrounded by his playmates, who eagerly examined his gifts. We rowed about 4 miles up the river, most of the time in very heavy rain. On the run down we witnessed the native process of extracting sago from its native element. Sitting astride a felled tree, over a foot in diameter, was a native cutting away with great vigor and accompanying grunts the fibrous pulp, the instrument used being a round piece of hardwood about an inch and a half in diameter, fixed in a handle like a native tomahawk. This wood is made concave at the cutting end, so that the pulp is smashed up as well as cut off in small pieces at each stroke. It is then lifted by another native into an elevated sloping trough made out of a dug-out log. He next lifts water from the river by one of the most primitive buckets ever seen—a palm-leaf sewn together so as to form a rough triangular cone, and bound to the end of a stick—and pours it over the stuff, which is well stirred about so as to loosen and separate the fine sago. At the end of the trough is a strainer—the skeleton of a piece of old palm-leaf through which the macerated product passes. It then passes through a second trough and strainer, into a third, where it settles, and is afterwards taken out and prepared for food.

Shortly before 2 o'clock the "Merrie England" returned, and we learnt that the "Ruby," which had taken nine days to come from Samarai, had broken down completely, through her boiler-tubes leaking. She had several miners on board, and a considerable quantity of stores and material for Mambare station. These had to be taken on by the "Merrie England" subsequently.

We steam down to the mouth of the Kumusi, and anchor there about 4:15. The coast is very low, with swampy background, and the river has a double entrance, an island having been formed at its mouth. The upper one is similar to that of the Ope, but we found better water on the lower one. We camped on the best site available, but it was not very inviting. The swamp was too close. Finding, also, that we were short of "flies," Sir Hugh, the Bishop, and Bailey returned to the "Merrie England."

The natives—only men were to be seen—were a well-built, athletic-looking lot. They wore the leaf covering, and the hair mostly in small ringlets. We saw no tattooing, but some had cicatricial ornamentation. Though friendly with us, they gave the impression of being treacherous. They were already "cheeky," and, having a reputation for kleptomania, we kept them gently but firmly out of reach of mischief of that kind. The "Merrie England" left during the night for the Mambare, taking, besides the members of the party named above, Butterworth and Shanahan, to the latter of whom we bade farewell.

THURSDAY, MAY 19.—The small launch made an ineffectual attempt to cross the upper bar, but succeeded in getting round the island later on.

While waiting for her, a policeman showed us one of the native methods of producing fire. Taking a stout round stick he levelled a few inches of its surface, and rubbing it briskly up and down for a few minutes with a sharpened stick, first smoke, then fire appeared. One of the party tried it afterwards with like result.

Sir William being absorbed in calculations, Lord Lamington, Guilianetti, and Gilligan went up to Gopa village. All the natives fled at their approach, and the village proved the dirtiest and most malodorous that had been visited. Two graves, enclosed with small oblong framework covered with palm-leaves, were close alongside two houses, and part of a human skull was noticed among a heap of pig bones. The visitors were not sorry to take their leave, which was a signal for the return of the natives. Two or three followed us to the beach, and Lord Lamington bought a fighting spear and model canoe from one of them. On returning to the Kumusi a fresh start was made—Lord Lamington and Sir William in one boat (towed by the small launch), Guilianetti and Gilligan in another towed by the "Ruby," which had been patched up a little. Numbers of natives were seen, but on the boats steering for the shore they took to the bush. A landing was, however, made at Dingba, a small and rather poor village as far as houses were concerned. The natives were very friendly, and the chief was decorated in the usual fashion. One novelty noticed here was packets of very small prawns made up

in palm-leaves and baked in the ashes. Only a short distance further had been covered when the "Ruby" again became incapacitated. This involved rowing the second boat, and correspondingly slow progress. Large numbers of natives followed her along the beach, making the customary manifestations of peace and inviting the occupants to land, which they declined for the present. As the next large village—Basabua—was neared most of them turned back. Here we found Sir William seated on a public platform with the chief, whom he had just presented with a tomahawk as a recognition of the kindness of the tribe in extending hospitality to a runaway carrier. The natives seemed an active lot, and sharp traders. The party camped at a point near the Basari River, where some pretty orchids were got. The "Merrie England" had returned and anchored about half a mile off. Sir William stated that when he camped here a few years ago there was not a village within 5 miles. Now there are houses right up to the point. While taking observations Sir William and his private secretary felt a slight shock of earthquake. A few pigeons were shot among the mangrove islands. Sir Hugh complained of not feeling well; thought he had caught cold.

FRIDAY, MAY 20.—After taking more observations, Sir William and the shore section of the party returned to the "Merrie England," and her head was pointed to the mouth of the Musa.

Arrived off the Musa, Lord Lamington, Judge Winter, and Guilianetti proceed in a boat towed by the small launch up the Musa, the "Merrie England" going on to Porlock Harbour, with the "Ruby" in tow.

Sir Hugh still unwell; symptoms somewhat similar to bilious attack.

SATURDAY, MAY 21.—Aroused this morning by cries of "Orokaiva," and we are favoured by the visit of a canoe full of natives, one of whom, named Chiki, has a history. He was shot in the thigh by the police while taking part in a cannibal feast on the Mambare some years ago, and taken prisoner. The injured limb was set by Sir William on board the "Merrie England," and when able to get about Chiki was returned to his village, at the back of this harbour. He is lame, which may serve to accentuate his punishment for cannibalism, but he seems to enjoy a good reputation, is village constable, and generally gets a present when the "Merrie England" comes along.

After an early breakfast Sir William and Mackay start on a surveying tour, the captain and Butterworth assisting. Some of the party go ashore and have a rough experience among the mangrove trees and roots, evil-smelling swampy creeks, and stiff hill-climbing. Portion of the crew went ashore and got a good number of orchids.

The Musa explorers returned early in the evening, without having had any very interesting experience beyond shooting a few Gowra and other pigeons, hornbills, and ducks.

Sir Hugh about the same as last night.

SUNDAY, MAY 22.—Sir Hugh feels slightly better this morning. Proceeding towards Cape Nelson, the steamer anchored at 10 a.m. off a small river—the Duru—close to the foot of Mount Trafalgar, which Lord Lamington, who was accompanied by Guilianetti, made a traverse of. Our next anchorage (3 p.m.) was at Port Hennessy in 28 fathoms of water, about 100 yards from the shore. This is a beautiful fiord-like harbour, running into the land about a mile. Several small promontories, covered partly with grass and partly with scrub, project into it, forming charming nooks and inlets at its nearly semi-circular head. The afternoon was spent in exploring and collecting botanical specimens. The captain and Butterworth came aboard about 4 p.m. very tired.

Sir Hugh worse. It looks like fever.

MONDAY, MAY 23.—Learning from natives who came up the harbour in two canoes that there was a village not very far off, Lord Lamington determined to visit it. Taking with him Guilianetti and Gilligan, and a few police, they pulled to the head of the harbour, where they found some natives clearing land on the side of a very steep and stony hill. These undertake to act as guides. A walk of about 2 miles partly up the rocky bed of a small creek, and partly over a well-beaten track across the summit of grassy hills, brought them in view of an inlet very similar to Port Hennessy, and a further journey of nearly half a mile down an unpleasantly sharp declivity, at the base of which they had to negotiate a small creek and some patches of swamp, brought them to the village, the name of which was understood to be Tincaro. The natives as a rule were friendly. Some of their women and children were in sight, but a few of the men, one especially, looked dangerous. They were a well-made people and well nurtured. A few curios were purchased, and the party were about to depart when a strong effort was made to induce them to remain and take part in a taro feast, preparations for which had been made. The invitation was, however, declined, and the visitors returned "home."

A very convenient waterfall was found a short distance from the steamer, from which a fresh supply was procured for the remainder of the trip.

The afternoon was again spent in adding to the botanical collection. Sir William returned in the evening, and prescribed for Sir Hugh, who was much worse.

TUESDAY, MAY 24.—Sir William off again at 7:30 a.m. to continue survey, taking Butterworth with him. Captain Curtis remained to make a sketch of the harbour.

Sir Hugh is very ill indeed—a clear case of malarial fever—temperature, 104½. Others of the party complain of not feeling well, and several of the police are suffering from fever.

Leaving Port Hennessy at 9:30 a.m., we steamed into the most easterly inlet of Cape Nelson, a more expansive piece of water than Port Hennessy, surrounded with higher hills and equally impressive scenery. The water here, as all round the cape, is remarkably clear, and the "coral gardens" at the bottom are very beautiful. The bottom can be seen clearly at 39 feet.

A section of the party explored the various nooks and corners, which were very similar to those already mentioned. The natives were most friendly. The ship was completely surrounded with trading canoes, and the chattering amounted to a perfect babel.

Sir William returned about 5 p.m., and found Sir Hugh so ill that it was determined to return to Samarai with all possible speed, and then see how matters stood.

It being the birthday of Her Most Gracious Majesty, after tea all the party, together with the officers of the ship, assembled on the fore deck and drank "The Queen! God bless her."

WEDNESDAY, MAY 25.—Sir Hugh is slightly better this morning; temperature 3 degrees less than yesterday.

The screw is at work shortly before 8 a.m., and we cry "Barnatauka"—good bye—to the natives, who keep on trading until the last moment.

We anchored at Yasaia in the afternoon, and a few of the party went ashore, some to the village, which is very friendly, and others to explore a river close by, which, however, proved to be only a sharp indentation of the coast.

The Bishop, who had been ailing for a couple of days, was taken with fever this evening.

Sir Hugh is much worse. Everyone concerned and anxious.

THURSDAY, MAY 26.—Sir Hugh had a bad night. Temperature about the same. Sir William gave him more quinine. The Bishop, who had also taken quinine, had a good sweat during the night, and is slightly better.

Starting at 6:30 a.m., we arrive at Wedan, Bartle Bay, at 10:20. Here we say "Good-bye, and God bless you and your work," to the Bishop, whose condition, combined with Sir Hugh's serious attack, is rather dispiriting to us all. Pushing on as fast as steam and the intricacies of the navigation of these waters will permit, we arrive at Samarai at 8:30 p.m. Fresh milk is at once procured from the Kwato Mission Station for Sir Hugh, whose temperature stands at 102½.

The Queensland mail having been distributed, everyone is soon absorbed in letters or newspapers.

This morning Lord Lamington and Sir William visited Kwato, and were well pleased with the place and the work of the mission.

FRIDAY, MAY 27.—Sir Hugh is still seriously ill. At first it was proposed that he should remain here until convalescent so as to gain strength for the sea trip to Cooktown, and that during the interval, Lord Lamington should visit the D'Entrecasteaux Islands; but this was at once abandoned on Sir Hugh representing that he would rather get to Cooktown as soon as possible. Arrangements were made accordingly.

Mr. Bailey was stricken down suddenly about noon with fever; temperature 104. Mr. Gilligan was also found to have contracted a slight attack, and the chief engineer, Mr. Corfield, was ailing. The anxiety concerning Sir Hugh's condition in relation to what promised to be a rough trip in the "Merrie England" was so great that Sir William engaged the services of Dr. Vaughan, of Melbourne, who happened to be in port, to accompany the vessel to Cooktown.

SATURDAY, MAY 28.—Our farewell to Sir William and our Samarai friends was said about 10:30 a.m., and although we had been most hospitably treated, and had had a most interesting and pleasurable trip until the last few days, we were glad to feel that we were "homeward bound."

The trip across to Cooktown was rough, and attended with all the inevitable consequences when on board such a vessel as the "Merrie England," but Sir Hugh stood it fairly well—in fact, better than was expected.

MONDAY, MAY 30.—Made fast to the wharf at Cooktown at about 7:30 p.m., and at once took up quarters at the "Great Northern Hotel."

Sir

Sir Hugh soon showed signs of improvement, but was extremely weak up to the time of leaving for Brisbane. Mr. Bailey's attack was somewhat intermittent and not severe, and considering his age—71—he stood it and the sea trip well. Mr. Gilligan had a renewal of his attack at Cooktown, but it was very light.

During his stay at Cooktown His Excellency the Governor visited the hospital and public schools and addressed a few sentences of encouragement to both patients and scholars.

THURSDAY, JUNE 2, TO TUESDAY, JUNE 7.—The party returned together per s.s. "Maranoa," as far as Keppel Bay, where His Excellency transhipped to the "Lucinda," in which Lady Lamington had come north to meet him. They passed through the Narrows, travelled by special train from Gladstone, and arrived in Brisbane at 5 a.m. on Tuesday, 7th June. Sir Hugh and Messrs. Gilligan and Bailey continued their journey in the "Maranoa," and reached Brisbane at 8:30 p.m. on 6th June.

HOW IT STRIKES A STRANGER.

What strikes the visitor first and most is the gigantic fact that this immense colony, embracing over 90,000 square miles and a population, according to latest computations, of 350,000, has been brought under the direct control of British government within the last decade. It must be admitted that the way for this was prepared to some extent by noble-hearted self-sacrificing missionaries, but so far their labours have been confined to a narrow fringe of the coast-line, chiefly the south. In no case do they appear to have carried their work into the inland districts to any appreciable extent. There may be many reasons for this; perhaps the most potent has been their numerical weakness. "The harvest is great, but the labourers few." Giving the missionaries full credit for their work, still the great fact remains that nearly the whole of this warlike, savage, and cannibal race has been subjugated to a civilised form of government within some ten years by peaceful means. This is an achievement unprecedented in the world's history, one worthy of nineteenth century civilisation, and one which reflects the highest honour upon those by whom it has been accomplished, and the nation to which they belong. Their great motive power has been "Peace, Peace!" The principle underlying all their operations has been the desire to humanise, and the essential elements to the attainment of this object—sympathy, kindness, compassion—have been practised with eminent success. Physical force has only been resorted to in actual self-defence, and has always been abandoned the moment the occasion for its use has disappeared.

There is no doubt that this remarkable change is due almost entirely, if not quite so, to the energetic, determined, yet sympathetic policy pursued by the Administrator. The natives have come to learn that murder and outrage will no longer be tolerated, that the rights of property must be respected, and that all offenders must be surrendered to be dealt with under the law. Potent factors in Sir William's constitution and character are his utter fearlessness, his indomitable courage, and his great physical strength. This combination excites the admiration of the savage perhaps more so than that of his civilised brother, and backed up by tireless energy, by kindness to the natives in sickness and in health, and by rewarding kindness on their part to others—these appear to have been the elements of his great success.

Then the laws so far introduced are simply a means to the enforcement of right and the punishment of wrong—the protection of the natives from each other and from white men—and they have come to regard them as such and also to appreciate the vast change their operation has wrought in their conditions of life. An instance: Not long since a visitor to British New Guinea said to a native, "Suppose I go into your garden and take pawpaw when no one there?" The native said, "All right, you leave tobacco." "Suppose I no leave tobacco?" "Oh! I go yarn along Government about you." In other words, he would lay an information against him for theft.

Then, again, the application of the law appears to have been guided by the principle "*Festina lente*." There has been no hurry, no violent wrenching of old habits and customs. Even the burial regulations, which the natives, who are strongly conservative in most matters, at first disliked and endeavoured to evade, have come to be approved, at any rate on the south-east coast, on account of their sanitary advantages.

The administration of justice is bereft of nearly all formality. All the proceedings are fully explained to the parties concerned. The judge in the highest court sits in his ordinary dress, and takes the evidence in a most painstaking manner, judging by the one instance which came under notice, and the people seem to have confidence in him, and, as a rule, in the magistrates also.

The armed constabulary, composed entirely of natives under a European commandant, is an efficient body, good shots up to 200 yards, faithful and reliable in any emergency; and their discipline and training reflects great credit on their chief, Captain Butterworth, whose eight years' service in the Possession certainly deserves promotion. They are also capital boatmen, and sometimes do very hard work on the rivers, rowing, fixing camp, &c.

That the gaol should be made the school for the education of police seems an anomaly to the British mind, but the practice has worked with manifest success in New Guinea. A convict, during his term of imprisonment, is instructed in the ways and customs of Europeans, and also in the laws of the Possession, and on being returned to his village he is often appointed village constable. By this means a good knowledge of the laws is disseminated, and as a rule the policeman proves faithful to his trust. But this plan is not resorted to when the chief of the village is a desirable man to be appointed village constable; and where there is an opportunity for selection among the convicts, the most intelligent and otherwise suitable man is appointed.

The weak point in the present administrative system is the paucity of officers numerically.

The main coast-line measures 1,728 miles, the island frontages 1,936 miles = 3,664. To govern this extent of country there are about eleven officers, viz., the Administrator, Judge, Commandant, Resident Magistrates, and agents. There are a few other officers, but their duties are mostly clerical. To give some idea of the nature of the work to be performed, it may be mentioned that during the year ended 21st March, 1897, the "Merrie England" was under steam 180 days, consuming 800 tons of coal, and covering 16,250 miles. In addition to this there are two steam-launches which do a good deal of river and coastal work; these consumed 68 tons of coal in the same period. The cost of this branch of the service was £7,313 for the year. To further illustrate the position it may be stated that the district of the resident magistrate at Samarai extends from Magulu right up to our boundary, a coast-line of hundreds of miles thickly populated, to say nothing of inland work.

Then there are explorations into the interior—some scientific, others for the pacification or controlling of the natives—all of which cost time, labour, and money.

As a rule the natives we saw were of fairly good physique, those on the north-east being somewhat taller than the average on the south-east coast. They live in passably comfortable dwellings. Most of their villages are clean, and they are free from venereal and other serious diseases, the most common being a skin disease, which easily yields to the use of the sulphur bath. On the whole, now that tribal wars and massacres of coast dwellers by hillmen have ceased, the condition of the native is a tolerably happy and contented one.

Smoking is common all through the Possession, the natives using the wild tobacco leaf, but preferably the manufactured "trade" article when procurable. The pipe, or bau-bau, is a very different instrument from that in use among white people, and is far more economical. It is usually a piece of bamboo from 1 to 2 feet long and over an inch in diameter, one end being partially open, the other closed by being cut off close to the joint. Near the closed end is a small hole, like the aperture of a flute. Into this the native places his tobacco, which is rolled up in the leaf of a particular tree—or in paper if procurable—lights it and draws at the open end of the pipe until it is filled with smoke. He takes a few whiffs, and then the pipe is passed round to all who desire it, the smoker in most cases swallowing the smoke. In this way a little tobacco goes a long way. Their other luxuries are betel-nut and sugar-cane.

The land question is an important one, but that New Guinea will ever become closely settled by white people seems highly improbable. The country between the seashores and the mountains consists of agricultural and grazing land, and considerable areas of swamp or marshy soil. The river banks, especially towards the coast, are subject to frequent floods, which render them ill-fitted for cultivation, except it be of vegetation which can stand considerable moisture. Rubber-trees and vines abound, and the swamps would probably grow rice. The higher lands, also the valleys and plains, are suitable for tropical agriculture generally, while the pastures should support cattle, but sheep are not likely to thrive, strong spear-grass being too prevalent. But the climatic conditions, the heavy cost of clearing for European cultivation, and, above all, the liability to malarial fever of a severe type, are serious drawbacks. Unhealthy as is the climate in its normal condition, the overturning of the soil for European cultivation is certain to result in prostrating and long-continuing fever, perhaps in great mortality. The great local preventive and remedy is quinine, of which the residents take what elsewhere would be considered enormous doses—as much as 30 and even 40 grains a day. Then 2s. an acre for this land is not cheap, considering the price at which land can be procured in Queensland and other parts of Australia by small settlers, and if conditioned with another 2s. an acre expenditure in improvements the comparison is still more unfavourable, and this is leaving out all considerations of the hardships which must attend opening up a new country.

The

The inducements, therefore, to farmers from Australia or elsewhere to rush to take up land in New Guinea are infinitesimal. The only factor that will develop the country is capital, and plenty of it; and even then the return will be problematical for some years. Rubber is the only article likely to yield a present profit. Coconut and its products are almost unsaleable, and then, unless the trees are already on land purchased from the natives, they will have to be grown, which means several years waiting for fruit. Gold is always an "unknown" quantity, respecting which it is impossible to give any forecast; but it is safe to say that in New Guinea it has cost far more in labour, suffering, and life than it is worth. Osmiridium has been found, but in very small quantities. In fact, everything but rubber points to hard work, heavy expenditure, and accumulated compound interest before profit can be hoped for. The distant future may, however, present a brighter picture, but, as connected with every phase of pioneering and agriculture, the risks are great.

Another difficulty is the matter of labour. The native is a stranger to anything like regular daily toil. His wants are few, and almost all of them are supplied with very little exertion on his part. Coconut, sago, taro, bananas, and yams are his principal food, being varied occasionally by pig, wallaby, fish, and dog. Coconuts grow everywhere and yield fruit continuously and abundantly. Sago, bananas, and taro are plentiful, growing wild in many places. Most of the root foods have to be cultivated, but a few days' labour in the planting season—about July—is all that is necessary. Therefore, the native has no occasion to work regularly, and is not likely to be induced to do so even for wages unless it is pretty high. Their labour is certain to be spasmodic and intermittent, and not very hard. Of course, the rising generation might be trained up to systematic work.

The following figures will show the growth of the trade of the colony during the last nine years:—

Year.	Imports.	Exports.	Total.
	£	£	£
1888-89	11,108	5,943	17,051
1889-90	16,104	6,455	22,559
1890-91	15,530	8,434	23,964
1891-92	23,755	11,289	35,044
1892-93	23,261	14,966	40,227
1893-94	28,501	14,952	43,453
1894-95	28,367	16,215	44,582
1895-96	34,521	19,401	53,922
1896-97	51,391	35,654	95,737

Eighty-five vessels (exclusive of Government vessels), representing 13,650 tons, entered during 1896-7; 65, representing 15,174 tons, cleared. Total tonnage, 28,824, as against 19,759 tons in 1895-6.

The revenue has increased from £2,679 in 1888-9 to £10,663 in 1896-7.

The expenditure, which is limited by the Act to £15,000 a year, has grown from £10,769 in 1888-9 to £16,223 in 1896-7. The excess expenditure in this case, £1,228, was—as in all similar cases—sanctioned by the guaranteeing colonies.

NAMES OF EASILY RECOGNISED PLANTS OBSERVED BY LORD LAMINGTON'S PARTY DURING NEW GUINEA TRIP.

Some of the trees planted in the streets of Cooktown.

Tarocephalus cordatus (Leichhardt-tree), *Brassia actinophylla* (Umbrella-tree), *Poinciana regia*, *Wormia alata*, *Alstonia scholaris*.

LIZARD ISLAND.—*Stephania hernaudiifolia*, *Capparis nummularia*, *Polycarpea breviflora*, *Thespesia populnea*, *Canarium australasicum*, *Carapa moluensis*, *Indigofera euncaphylla*, *Cosalpinia Bonducella*, *Acacia Cuminghamii*, var. *Melaleuca leucadendron* (Tea-tree), *Drosera indica* (Sundew), *Melastoma Malalathricum*, *Scævola Koenigii*, *Hoya Keyssii*, *Tournefortia argentea*, *Justicia procumbens*, *Premna obtusifolia*, *Boerhaavia diffusa*, *Achyranthus aspera*, *Aristolochia indica*, var. *Excoecaria Agallocha* (Milky Mangrove), *Macaeranga Tanarius*, *Dendrobium undulatum*, *Curcuma australasica*, *Thysanotus tuberosus*, *Commelina ensifolia*, *Cyperus polystachyus*, *Arundinella nepalensis*, *Perotis rara*, *Sorghum plumosum*, *Anthistina ciliata* (Kangaroo-grass), *Diplachne loliiformis*, *Darallia elegans*, *Notholana vellea*.

PORT MORESBY.—*Polanisia viscosa*, *Bombax malabaricum* (Silk Cotton-tree), *Micromelum pubescens*, *Cardiospermum Halicacabum*, *Zornia diphylla*, *Canavalia obtusifolia*, *Crotalaria linifolia*, *Crotalaria trifolium*, *Sesbania aegyptiaca*, *Cassia mimosoides*, *Eucalyptus platyphylla*, *Eucalyptus papuana*, *Morinda citrifolia*, *Tournefortia argentea*, *Josephina grandiflora*, *Vitex trifolia*, *Euphorbia pilulifera* (Asthma Plant), *Hernandia peltata*, *Tacca pinnatifida*, var. *Sporobolus virginicus*, *Cynodon dactylon* (Couch-grass), *Anthistina ciliata* (Kangaroo-grass), *Heteropogon contortus* (Bunch Spear-grass), very abundant here and other parts.

FISHERMAN'S ISLAND.—*Heritiera littoralis* (Red Mangrove), *Melhania incana*, *Portulaca australis*, *Sesuvium portulacastrum*, *Jasminum*, sp., *Evolvulus alsinoides*, *Ipomea Pes-caprae*, *Oplismenus compositus*.

OPEE.—*Tacca pinnatifida*. Sir Wm. MacGregor says that the natives plait the fibre of the leaf-stems, and make it up into straw hats. *Hiatula winnice* (the Green-light Fungus).

KUMUSI.—Found a beautiful specimen of *Dictyophora tahitensis*, and on the logs a great quantity of *Guepinia spathularia*.

ASTROLABE RANGE (April 28).—*Pholidota imbricata*.

KAPPA-KAPPA (April 28).—*Cycas papuana*.

DEDILE (April 30).—*Calophyllum inophyllum* (Ndilo). This excellent timber, which I am told is to be obtained in quantity, is shipped to the various New Guinea settlements. A stack of logs was on the beach awaiting shipment at time of our visit. On the beach were some large trees of *Terminalia catappa* and *Erythrina indica* (Coral-tree), as well as *Hibiscus tiliaceus*, and the other common coast trees.

DUFAGRE ISLAND.—*Vitex trifolia*, *Cordia cordata* (a handsome useful shade-tree bearing showy flowers). Sir William MacGregor describes the wood, which is streaked with black and yellow, as very beautiful. *Leea sambucina*, *Artocarpus incisus* (Bread-fruit), *Pongamia glabra*, *Ocimum sanctum* (Holy Balm), *Triumfetta rhomboidea* (Chinese-burr), *Sophora tomentosa*, *Wedelia biflora*, *Orthosiphon stamineus*.

SAMARAI.—*Thuarea saunterosa*. This common coast-grass makes an excellent sward under the coconut trees, and thrives on spots where coal has been stacked. Shade trees—*Cordia cordata*, *Barringtonia acutangula*, *Calophyllum inophyllum*, &c.

MILNE BAY TO MULLIN'S HARBOUR.—Collected by Lord Lamington—*Curcuma australasica*, *Acanthus ilicifolius*, *Hoya australis*.

CHAD'S BAY.—The grasses about the landing-place were—*Eleusine indica* (Crow's-foot), *Oplismenus compositus*, *Thuarea sarmentosa*, *Panicum sanguinale* (Summer-grass), *Panicum distachyum*, *Panicum trichoides*. A large tree of *Erythrina indica* (Coral-tree) which had been cut down; the trunk measured 5 feet in diameter.

PHILLIP'S HARBOUR (May 6).—the only plant noticed here that had not met with at other places was *Smilax australasica*.

MAMBARE.—Some time before we reached this place the coast had the appearance of being covered with tall, erect Cypress Pines. These trees, however, proved to be only the normal upright growth of *Casuarina equisetifolia*, the wide-spread She-oak. Here we noticed *Caryota* (?), *Rumphiana*, and several other palms, specimens of which could not be obtained for examination, except the *Nipa puticans*, which densely lined the sides of the mouth of the river. *Ocimum sanctum* (Holy Balm), *Hibiscus tiliaceus*, *Scævola Koenigii*, *Thuarea sarmentosa*, *Eutana scandens* (Matchbox-lean), but only noticed on small green pod; *Phragmites communis* (the Common Bean), *Cesalpinia nuga*, *Paspalum scrobiculatum*, *Cynodon dactylon* (Couch-grass), *Centotheca lappacea*, *Panicum sanguinale* (Summer-grass), *Panicum distachyum*, *Imperata arundinacea* (Blady-grass), *Kyllingia monocephala*, *Pimbristylis miliacea*, *Jussiaea suppuritica*, *Acanthus ilicifolius*, *Vitis cordata*, *Flagellaria indica*, var. *Cordylone terminalis*, *Modceca populifolia* (?), *Nasturtium palustre*, *Albizia procera*, *Dalbergia densa*, *Asplenium nidus* (Bird's Nest Fern), *Acrostichum scandens*, *Polypodium acrostichoides*, *Canavalia obtusifolia*, *Mucuna pruriens*, var.

PORT HENNESSY (23rd May).—*Nepenthes Kennedyi* (Pitcher-plant).
 DOUGLAS HARBOUR.—*Tacca pinnatifida*, *Flagellaria indica* (probably a distinct form).
 HOLDICOTTE (20th May).—*Myrmecodia Altonii*, and a *Hydnophytum* in abundance. *Darallia solido*. On a small island near I saw for the first time in New Guinea, *Aricannia officinalis* (the White Mangrove).
 MUSC RIVER.—*Phaleria Blumci*, var. *Latifolia*, *Leca Tambucina*, *Coix Lachryma* (Job's Tears), *Ancilema giganteus*, *Pterolobium*, sp.
 BAYS AT FOOT OF MOUNT TRAFALGA.—A *Spathoglottis* in abundance; three species of *Hoya*.
 PLANTS NOTICED AS BEING USED IN A FRESH STATE BY THE NATIVES TO DECORATE THEMSELVES.—*Cesalpinia pulcherrima*; bright flowers. *Vitex trifolia*; scented foliage. *Anisomeles salvifolia*; ditto. *Orthosiphon staminens*; flowers. *Ocimum sanctum*; scented foliage. *Melastoma malabathricum*; bright flowers. *Evodia hortensis*; scented foliage. *Gomphrena globosa*; bright flower-heads. *Amaranthus*, several bright-coloured varieties; variegated leaves.

Telegram from The Premier of Queensland to The Premier of New South Wales.

2 July 1898.

AFTER very careful consideration of the question of the New Guinea Syndicate concessions I am of opinion that the issues involved which include the whole subject of the future administration of New Guinea are so numerous and of so complicated a character that any attempt to deal with them by correspondence must result in confusion and delay. The most satisfactory method of arriving at a solution of the important questions at stake appears to me to be by a Conference of the Premiers of the contributing colonies and I earnestly commend the suggestion to your favourable consideration. If you agree the place of meeting is immaterial so far as I am concerned but in view of the meeting of our Parliament on 26th instant it is desirable from my standpoint that the Conference should be held as soon as possible. I have telegraphed in similar terms to the Premier of Victoria.

THOMAS J. BYRNES.

Telegraph that the General Election in New South Wales is so near that a Conference before it is practically impossible. Send copy to Victoria.

5 July 1898.

I HAVE received following telegram from Sir George Turner *Re* proposed New Guinea Conference. I cannot well leave Melbourne at present as House is in Session and I have to prepare for several important Bills Financial Statement and Loan Proposals for Public Works. Monday 17th would suit me if you can arrange for Mr. Reid to be in Melbourne on that date but this may be difficult in view of his General Election being so close and his House in Session. I shall be glad to learn your decision as soon as possible.

GEORGE TURNER.

11 July 1898.

As there appears no chance at present of arranging a Conference to discuss the British New Guinea questions I am writing you to-day formally referring to you in terms of clause 20 of amended proposals the Ordinance under which the concessions are granted and requesting you to favour this Government with your views regarding its provisions as they are desired to be amended by the Secretary of State. I shall be glad to receive your reply at the earliest possible date.

Reply Much regret impossible to confer just now. Will give best attention to your letter New Guinea.

G.H.R.

The Premier of Queensland to The Premier of New South Wales.

Sir,

Chief Secretary's Office, Brisbane, 11 July, 1898.

I have the honor to acknowledge the receipt of your telegram of the 6th instant, informing me that in view of the near approach of the General Election in New South Wales, you will be unable to take part in the Conference suggested by me of Prime Ministers of the contributing colonies on the question of the concessions to the British New Guinea Syndicate and that of the future administration of the Possession. I have also received a telegram from the Prime Minister of Victoria in which he states that owing to Parliamentary business he would be unable to attend such a Conference before the 17th instant, which would bring the meeting too near the date of the opening of the Queensland Parliament.

As it accordingly appears practically impossible to carry out my suggestion, I consider it necessary, in order to avoid further delay in dealing with the subject of the concessions to the Syndicate, to formally refer to the Governments of New South Wales and Victoria, under clause 20 of the amended proposals for the administration of British New Guinea, the Ordinance under which the concessions are granted, and to request that you will, at the earliest possible date, favour this Government with your views regarding the provisions of the Ordinance referred to, as they are desired to be amended by the Secretary of State for the Colonies.

I have, &c.,

THOMAS J. BYRNES.

12 July 1898.

Re nomination of successor to Sir William MacGregor I fear that by some inadvertence the proper procedure has in this case been departed from I do not think that your Government should have expressed its concurrence without consulting Queensland especially when I had sought your advice in the manner that has quite recently been claimed by New South Wales and Victoria as the correct course I hope that your concurrence may be withdrawn or suspended until we have interchanged ideas.

Telegram from The Premier of New South Wales to The Premier of Queensland.

20 July 1898.

I HAVE just received through His Excellency the Governor a despatch from Mr. Chamberlain in reference to Sir Hugh Nelson's letter on the results of the Conference held in Melbourne in January on the subject of the future administration of British New Guinea. A copy of this despatch will be at once forwarded to you but in the meantime I think it expedient to inform you that the Secretary of State says he is unable to recommend any further grants from Imperial Exchequer but trusts that the colonies may be induced to continue their contributions so far as may be necessary with the aid of the accumulated fund to support the existing administration including the maintenance of the steamship "Mervie England" until such time as the dependency is self-supporting it is apparent from the tenor of the despatch that the Imperial Government wish to throw upon the Australian Colonies the whole responsibility of dealing with New Guinea and under these circumstances a new light is cast both upon the question of the New Guinea concessions and upon that of the recent nomination to the Administratorship. It seems impossible as I before stated to arrive at any satisfactory conclusions unless we meet and confer but the Secretary of State is pressing for an expression of our views on the subject of the concessions. May I accordingly urge that you will as soon as practicable reply to my letter of 11th instant. I have wired in similar terms to the Prime Minister of Victoria. New South Wales.

THOMAS J. BYRNES.

Telegram from The Premier of Queensland to The Premier of New South Wales.

22 July 1898.

I HAVE received the following telegram from Sir George Turner New Guinea. Some approximate statement should be prepared showing the probable amounts required from each colony during the next five years. It will be difficult to get our Parliament to agree to provide money as there is a strong feeling as to the Syndicate. Will send the formal objections early next week. (Signed) GEORGE TURNER. I have replied in following terms. British New Guinea. The revenue for the past financial year is estimated at £10,000 the expenditure being as usual £15,000 plus the £4,000 granted from the accumulated revenue fund towards the expenses of the "Mervie England". It will of course be preferable to set apart from the fund if the proposals of the Melbourne Conference are given effect to the whole sum requisite for any one year's expenditure leaving the revenue to accumulate as heretofore and to be used at the same rate until the Possession becomes self-supporting or the fund is exhausted and we have placed on our Trust Funds Estimates under the heading of "British New Guinea Accumulated Revenue Fund" a sum of £12,500 for the ten months September to July next the question as to whether so far as we are concerned any Parliamentary authority is required for the expenditure other than the formal Vote on the Estimates is a debatable one but I am of opinion that the Vote will be sufficient. It would however appear worthy of consideration whether it would not be advisable for your Parliament to formally place under our control subject to the conditions as to the administration of the Possession laid down in the amended proposals your colony's share of the accumulated revenue and I shall be glad to learn your views in the matter. I have communicated the purport of this telegram to Mr. Turner.

THOMAS J. BYRNES.

Telegram from The Premier of Queensland to The Premier of New South Wales.

23 July 1898.

CONFIDENTIAL. In view of the decision of the Imperial Government as conveyed in Mr. Chamberlain's despatch of 8th June not to contribute any further towards the expenses of maintenance of the s.s. "Mervie England" it appears to me matter for serious consideration as to whether we should consent to assume any further responsibility in regard to the Government of British New Guinea. I am prepared on behalf of Queensland to undertake the sole control of the territory if it be attached to this colony and I am confident that it could be administered under these conditions without difficulty. The present system is however so fraught with complications that I should be exceedingly reluctant to be a party to its continuance and in view of the present attitude of the Home Authorities I am of opinion that failing the alternative suggested the Possession should be taken over by Great Britain and administered as an ordinary Crown colony pending a decision of the three Governments. I feel disposed to convey an intimation to this effect to the Secretary of State and to withdraw my formal nomination of Mr. Dicken for the Administratorship. I earnestly beg that that you will at the earliest possible moment favour me with an expression of your views on the general question which will enable us to arrive at a definite agreement. I have telegraphed in similar terms to the Prime Minister of Victoria.

THOMAS J. BYRNES.

The Premier of Queensland to The Premier of New South Wales.

Sir,

Chief Secretary's Office, Brisbane, 20 July, 1898.

I have the honor to confirm the following telegram which I forwarded to you to day, and to enclose a copy of the despatch from the Secretary of State therein referred to, relative to Sir Hugh Nelson's letter on the results of the late Conference on the subject of the future administration of British New Guinea:—

"I have just received through His Excellency the Governor, a despatch from Mr. Chamberlain in reference to Sir Hugh Nelson's letter on the result of the Conference held in Melbourne in January, on the subject of the future administration of British New Guinea. A copy of this despatch will be at once forwarded to you, but in the meantime I think it expedient to inform you that the Secretary of State says he is unable to recommend any further grants from Imperial Exchequer, but trusts that the colonies may be induced to continue their contributions so far as may be necessary with the aid of the accumulated fund to support the existing administration, including the maintenance of the steamship 'Mervie England,' until such time as the dependency is self-supporting. It is apparent from the tenor of the despatch that the Imperial Government wish to throw upon the contributing colonies the whole responsibility of dealing with New Guinea, and under these circumstances a new light is cast upon the question

question of the New Guinea concessions and upon that of the recent nomination to the Administratorship. It seems impossible, as I before stated, to arrive at any satisfactory conclusion unless we meet and confer, but the Secretary of State is pressing for an expression of our views on the subject of the concessions. May I accordingly urge that you will as soon as practicable reply to my letter of 11th instant? I have wired in similar terms to the Prime Minister of Victoria."

I have, &c.,
THOMAS J. BYRNES.

The Secretary of State for the Colonies to The Governor of Queensland.

My Lord,

Downing-street, 8 June, 1898.

I have given very careful consideration to your telegram of the 16th February respecting the future administration of British New Guinea, and to the memorandum by Sir H. Nelson which you have since forwarded.

2. I understand the present proposals of the Premiers referred to by Sir H. Nelson to be that for the present the system under which British New Guinea is administered should be continued, but that the contributing colonies should stop their annual contributions, placing the accumulated fund of about £30,000 at the disposal of the Government of Queensland in aid of the revenue of the Possession for the next three or four years, by which time it is hoped that it will be self-supporting. At the same time a hope is expressed that Her Majesty's Government will be able to continue for a time a contribution of £3,000 a year towards the upkeep of the "Merrie England."

3. Further, it is stated that the Australian Colonies are not at present prepared to undertake responsibility for the government of the British Solomon Islands.

4. In dealing with these questions it must not be forgotten that British New Guinea was annexed only in response to the unanimous demand of Australia, and on the understanding that the Australian Colonies would pay for the administration of the new dependency, which was to be to all intents and purposes an Australian possession.

5. It is true that Her Majesty's Government have since materially contributed to the expense of the administration of the dependency, but each year it is becoming more difficult for them to induce the House of Commons to vote money for the administration of a Possession in which the taxpayer of the United Kingdom has so little direct commercial interest; it is felt that the time has come when the grant in aid which has been made for so many years should cease.

6. At the Conference last year of the Premiers of the self-governing colonies I reminded them that the Mother country had always a great deal on its shoulders, and that the colonies could not expect it to bear burdens which were properly theirs.

7. Now, in the case of British New Guinea, it is practically certain that if the Possession is to be developed it will be by Australian capital and enterprise. What trade it at present does—amounting to less than £40,000 a year—is carried on with Australia. Experience in Fiji shows that the only enterprises which have been successful on a scale worth mentioning have been those of Australian companies or individuals, and it is unlikely that the fate of New Guinea will be different. The Australians are practically on the spot, and they have unlimited command of capital. The Australian living in a sub-tropical country takes more kindly to tropical life and work than the native of the United Kingdom. Similarly, the trade of Fiji is wholly with Australia, and although, no doubt, some part of it is in goods from this country, or for export to this country, there is not, and probably never will be, any direct trade between the United Kingdom and Fiji. The distance is too great, and there is a sufficient market in Australia both to buy in and to sell in.

8. The interest of the English exporters, therefore, in the Pacific market is only indirect. It is part of the market of his Australian customer, and it is on the Australian intermediary that he must rely for the exploitation of that market. It is too small to make it worth his while to establish a direct trade, especially when he might thereby offend a large and influential supporter.

9. Nor is there in any case a prospect of an early market of any sort in British New Guinea, which is peopled at present by some 300,000 savages, perhaps one in a thousand of whom has begun to acquire the wants of civilisation. It has been suggested that the Government might introduce coolies, but such a suggestion does not take account of the difficulty of settling them. In ten years Sir William MacGregor has found some 25,000 acres of land suitable and available for settlement, and has hopes in another eight to make the amount up to 250,000 acres. The pacification of the country must precede settlement, and it advances slowly with such a primitive race of savages. The coolie is, moreover, adapted to produce rather than consume, and though he is better in the last respect than the Papuan, little in the way of a market for English products can be expected from him. Before coolies can be introduced there must be the capital to introduce them and to find them employment when they arrive, and I fail to see what there is to attract capital from this country to New Guinea rather than to the many other tropical possessions of the Crown, over which New Guinea has no special advantages to compensate for its remoteness.

10. Again, if, as seems not improbable, the territory should turn out to be a gold-producing centre of some importance, there can be no manner of doubt that the rush to it will come from Australia, and inevitably tend to link it more closely to Australia.

11. While, therefore, I have no objection to the continuance of the existing administrative arrangements for a time, I feel that as the Australian Colonies will reap all the direct and immediate benefit from the development of the territory, and there are numerous and pressing calls on the Imperial Exchequer for the development of territories in which this country is more immediately interested, I am unable to recommend that any further Imperial grants should be made towards New Guinea, towards which Her Majesty's Government have already contributed for seven years longer than they engaged to do.

12. I trust, therefore, that the contributing colonies may be induced to continue their contributions so far as may be necessary with the aid of the accumulated fund to support the existing administration, including the maintenance of the steamship "Merrie England," until such time as the dependency is self-supporting.

13. As regards the Solomon Islands, I will not for the present press further the proposal that the colonies should relieve Her Majesty's Government.

I have, &c.,
J. CHAMBERLAIN.

The

The Premier of Victoria to The Premier of New South Wales.

Sir,

Premier's Office, Melbourne, 26 July, 1898.

I have the honor to forward herewith, for your information, a copy of a letter which I yesterday addressed to the Honorable the Premier of Queensland, setting forth the objections entertained by this Government to the proposed concession to the British New Guinea Syndicate.

I have, &c.,

GEORGE TURNER,
Premier.

The Premier of Victoria to The Premier of Queensland.

Sir,

Premier's Office, Melbourne, 25 July, 1898.

I have the honor to acknowledge the receipt of your letter of the 11th instant, formally referring to this Government, under clause 20 of the "Amended Proposals for the Administration of British New Guinea," the Ordinance No. 1. of 1898, "to enable certain persons to acquire and occupy Crown lands not exceeding in the aggregate 250,000 acres in area, and for other purposes subsidiary thereto," and asking for an expression of the views of this Government regarding the provisions of that Ordinance, as they are desired to be amended by the Right Honorable the Secretary of State for the Colonies.

After having given the matter very careful consideration, I regret to have to inform you that this Government is unable to approve of the Ordinance, either as originally passed or as now proposed to be amended.

The reasons for such disapproval are as follows:—

1. Under the Ordinance the Syndicate interested is granted a monopoly of land selection, since it is to be allowed, for six months after any suitable lands may have been from time to time declared available for occupation, the *sole* right to acquire any of such lands up to the maximum of 250,000 acres. This concession would practically allow it to take the best parts available, leaving only the inferior and useless portions for others. An Australian pioneer, for instance, after discovering a piece of land would, upon its being, at his request, thrown open for selection, probably find such land, if really worth anything, taken by the Syndicate. Thus his trouble, risk, and expense in exploring would result practically in providing the Syndicate with a piece of good land, and that body would acquire the land without any labour, responsibility, or even expense beyond the payment of a very small sum to the Government. This policy would inevitably lead to the discouragement, if not the total suppression, of Australian enterprise, notwithstanding the fact that these colonies have contributed, and are expected to continue to contribute, largely to the cost of the government of a territory which is naturally and geographically a part of Australia, and which should be open in an especial manner to Australian enterprise.

2. The concession, too, is not simply that the Syndicate is to be at liberty to take up a large area of land, but that it is further to be allowed eight years during which to enjoy its monopoly and to acquire the choicest parts of the Possession. Nor is even this all; for if, within eight years, sufficient land has not been declared available to allow of selection up to the maximum permitted under the Ordinance, then the Syndicate's prior right of selection is to continue until such an area has been so declared available. The extent of territory of which the Administrator has obtained possession up to the present time is stated to be only 40,000 acres, and of that area probably a large portion is not such as could be declared suitable for occupation under the terms of the Ordinance, so that it is extremely doubtful whether the Syndicate's claims could be satisfied for very many years; meanwhile all other persons would be shut out, and could only look on while the Syndicate exercised its priority of choice. This is the position of affairs, even if the Ordinance be amended as suggested by Mr. Chamberlain; but under the terms of the enactment as originally passed the Syndicate was given the sole right to purchase lands until it had purchased the total area obtainable, a practically indefinite period.

3. The Syndicate, too, is a British one, with doubtless views of its own as to the development of the country. Those views may not, however, be at all in accord with Australian ideas. The arrangement proposed would practically hand over enormous powers to a company having its headquarters in London, and not animated in any way by Australian feeling, thus reducing to a shadow Australian influence in the Possession. The land policy which, in a new country like that of the Possession, is of peculiar importance, would be largely dictated by the Syndicate. The affairs of the Possession, instead of being conducted (as Mr. Chamberlain himself said in his despatch of 22nd March, 1897, they should be), "in accordance with Australian rather than English ideas," would be dominated by a powerful English corporation. The result of thus depriving the colonies of the control of the development of the Possession might be that they would ultimately be obliged to contribute even more largely to its maintenance, while on the other hand there is no provision requiring the Syndicate to share in any way in the expense of such maintenance. Surely Australian interests, supported by Australian contributions, should secure an adequate share of real Australian control.

4. Moreover, the Administrator has discouraged other applicants for large land privileges. One such applicant appears to have been informed that it was contrary to the policy of the Government to give exclusive exploiting privileges to anybody, but that if he would specify any particular part he wished to lease or purchase, steps would be taken to ascertain if it could be made available. The applicant then indicated an area of 100 square miles for which he was willing to negotiate, but Sir William MacGregor replied that it was perfectly hopeless to obtain 100 square miles in any part of the Possession, because it was not the policy of the contributing Governments to sell land for speculative purposes. That was a very different policy from the course which, without any concurrence on the part of the contributing Governments, is proposed in the case of the Syndicate.

5. The monopoly includes the right of mining subject only to payment to Her Majesty of a royalty. Mining is a form of enterprise in which Australians are especially interested, and as to which Australian Governments are particularly careful in the granting of rights. The resources of New Guinea in this direction may prove most valuable, but by the proposed concessions Australians would be absolutely prevented from participating in the benefit of any discoveries.

6. The abovementioned terms of the Ordinance are, it will be observed, all in favour of the Syndicate and all against the public. They do not allow, as they should, an equal opportunity to all who may desire to try their fortune in New Guinea, but instead they establish a monopoly.

7.

7. The Syndicate, too, appears to be merely a speculating body. Its capital is only £5,000, and the total purchase money to be paid for the land is only £25,000. The smallness of the risk clearly indicates the character of the undertaking. Powers are given which are manifestly intended to be exercised at the first favourable opportunity, of leasing or assigning to others any land acquired under the Ordinance, giving the lessees or assignees the same rights as those of the Syndicate itself. There is no power reserved even of controlling its actions, the appointment of its directors, or the transfer of its rights to improper persons, or even of preventing those rights from ultimately falling into the hands of foreigners. It is certainly not the policy of Australia to sell lands to any company for speculative purposes, much less to consent to concessions which might possibly have the effect of permitting any portion of the Possession to be acquired by people of other nationalities. Did the Syndicate intend itself to develop the lands, the concession, though open to objection as being a monopoly, would not be so dangerous as they become when there is an evident intention on the part of that body to dispose of its lands at a profit, and when there is nothing to prevent lands so disposed of by it from passing into unknown and, perhaps, highly objectionable hands.

8. There is no power reserved in the Ordinance to compel the Syndicate to do anything with the land after acquiring it, except to spend a very small sum in undefined improvements.

9. The power given to raise money may result in the lands originally obtained passing into the hands of mortgagees.

10. The permission given by clause 19, sub-clause A, as to the purchase of land from the natives (even with the proviso that such purchase is to be subject to the approval of the Administrator) is objectionable, and would certainly lead to trouble. At the Conference on New Guinea affairs held in Melbourne on 24th January last, Sir William MacGregor said: "One principle that we have always observed is that we will not take from the natives any land of which they are in occupation, and we do not buy land from them if it is land that we think they require, or that they are likely to require in the near future. No European or other person can buy land from a native, only the Crown can buy land. If a settler goes there and wishes to take up land, he has to go to the Crown to obtain it." But the very right which Sir William MacGregor, according to the extract quoted, declared was never given to private persons, is now proposed to be bestowed on the Syndicate or its transferees, and thus, unless the supervision of the Administrator were most vigilant, natives might be induced for entirely inadequate or even improper considerations to part with land which they occupy, and this would, in all probability, lead to misunderstandings.

11. By clause 19, sub-clause A, the Syndicate or its transferees are also given power to apply for other lands. Some arrangement should be made to prevent the grant of such other lands without the consent of the colonies.

12. I assume that the power conferred by clause 19, sub-clause C, to construct defences, does not mean naval or military defences; but if it does, it is decidedly one that should not be given.

I can only add, in conclusion, that although ample opportunities were available, Victoria was not consulted before the bargain was made with the Syndicate, and, therefore, is not bound now to concur. The interested colonies, too, are unanimous in condemning the proposals, and under these circumstances it will be difficult, if those proposals be persisted in, to induce the people of Victoria to further contribute to the maintenance of the Possession, as it is evident they can hereafter derive little if any benefit from such expenditure.

I have, &c.,

GEORGE TURNER,

Premier.

Cablegram from The Acting Agent-General, London, to The Premier of New South Wales.

1 August 1898.

BRITISH New Guinea Can you inform me when I am likely to receive your statement of objections to the Syndicate concessions I have received a letter from Sir George Turner setting forth the views of his Government and I am only waiting to hear from you before sending my reply to the Governor The delay is most embarrassing and unfortunate I notice in this morning's Press telegrams that Mr. Chamberlain has been in communication with Lord Hampden on the subject of the concessions This is I assume in reply to some representations made by you and I think it necessary to point out that the Queensland Government has always been hitherto recognised as the medium of communication between the contributing colonies and the Imperial Government in regard to New Guinea Any departure from this understanding appears to me likely to seriously weaken the controlling influence exercisable by the colonies.

THOMAS J. BYRNES.

Telegram

(Copy of same also sent to Sir George Turner.)

2 August 1898.

CONFIDENTIAL. Would like short conference between yourself Turner and me on the subject of the British Syndicate Ordinance and future control of New Guinea. Could be arranged so as not to interfere with Parliamentary work if at end say of next week. I am entirely with Sir George Turner in the views expressed in his letter of twenty-sixth July. Have sent copy of this message to him.

Minute by The Governor of New South Wales to The Premier of New South Wales.

4 August, 1898.

WITH reference to your request for authority to print and lay upon the Table of both Houses of the Legislature the whole of the correspondence on the subject of the New Guinea Land Syndicate, I have to state that the Secretary of State for the Colonies has informed me by cable that he has no objection to the adoption of this course.

HAMPDEN,
Governor.

Minute by The Governor of New South Wales to The Premier of New South Wales.

6 August, 1898.

THE following telegraphic despatch has reached me from His Excellency the Governor of Queensland, viz.:—"Her Majesty has been pleased to appoint Le Hunte British New Guinea. Inform Prime Minister. While giving due weight to his objections I consider Le Hunte's varied administrative experience rendered him in other respects exceptionally qualified. I am confident he will make every effort to carry out wishes of Government of Queensland with regard to British New Guinea. Repeat this telegram to Governors of New South Wales and Victoria. Signed Chamberlain."

HAMPDEN,
Governor.

Telegram from The Premier of Queensland to The Premier of New South Wales.

10 August 1898.

NEW GUINEA Syndicate. I have received through His Excellency the Governor the following telegram from the Secretary of State for the Colonies:—"London eighth August referring to my telegram of thirteenth June to Government of New South Wales as to New Guinea Syndicate remind Ministers that Ordinance having been assented to by Lieutenant-Governor is now in force if amendments are desired in addition to those required by me I should be glad to have them as soon as possible. Signed Chamberlain." I have replied stating that I have no knowledge of the telegram to the Government of New South Wales of thirteenth June but that I am considerably surprised at attitude now assumed by Mr. Chamberlain who in his telegram to our Deputy-Governor of twenty-fourth May as well as in his despatch to Governor of third May and in Colonial Office letter of that date to Minet Pering Smith and Company distinctly stated that when the Ordinance was amended it would be submitted for Her Majesty's approval. Governments of contributing Colonies have in consequence assumed throughout correspondence that as amendments had not been passed assent had not been given. I requested Governor in forwarding Mr. Chamberlain's despatch of third May to Sir William MacGregor to instruct him not to proceed with amendments until views of contributing colonies had been ascertained these views have now been expressed and are found to be opposed as well to Ordinance itself as to suggested amendments the position of affairs would be most extraordinary if it were found that all that has been done amounts to work of supererogation having no ultimate effect in regard to proposed concessions. I conclude by requesting Governor to telegraph Secretary of State informing him that contributing colonies object most decidedly to Ordinance and to amendments and that they desire that Her Majesty be advised to disallow the proposed measure.

THOMAS J. BYRNES.

Treasury Minute.

Subject:—The New Guinea Land Syndicate proposals and Minute of Sir Hugh Nelson, dated 18th June, 1898.

The Treasury, New South Wales, Sydney, August, 1898.

THE pressure of public business, and occurrence of a General Election, have prevented me from making any comments at an earlier date upon the above minute. I now propose to do so.

In the first place, I assert most distinctly that the proposals of the Syndicate were never brought under my notice in any business-like way during the time I was in London. Sir Hugh Nelson's letter to the Colonial Office, dated 7th July, 1897, abundantly confirms this statement.

Had I received adequate information, the whole project would not have been a complete surprise to me, as it certainly was when its true nature was brought out two or three months ago, through the Press.

I consider it simply extraordinary that, during the Conference held in Melbourne in the early part of this year between Sir William Macgregor, the Administrator of New Guinea, Sir Hugh Nelson, Premier of Queensland, Sir George Turner, Premier of Victoria, Sir John Forrest, Premier of Western Australia, and myself, not one word respecting this important concession was said by Sir William Macgregor or by Sir Hugh Nelson. I asked several questions respecting the spread of settlement and the introduction of capital, but none of these questions seemed to suggest an allusion to this vital concession. Sir Hugh Nelson says the matter was one of notoriety at that time. It is very strange that I never heard of it. It is also very strange that a well-known New Guinea explorer, Mr. Bevan, who saw me several times about opening up New Guinea to British capital and enterprise, knew nothing about it either.

Sir

Sir Hugh Nelson, admitting that the concession should have been submitted to the other contributing colonies, states that the practice was that anything in the nature of an Ordinance was not so submitted, it being submitted to the Government of Queensland alone prior to introduction.

That practice raised no objection, because so far the Ordinances themselves did not seem to call for interference.

In his minute under notice Sir Hugh Nelson says, "Having given the matter the fullest consideration since my return from New Guinea, I have arrived at the conclusion that in accordance with the spirit of the second Schedule, the Governments of New South Wales and Victoria should have had an opportunity of influencing the opinions of Queensland before action was taken, although such a course would have been contrary to the practice established and invariably adhered to." Long before Sir Hugh's "return from New Guinea," that is, in his letter of 7th July, 1897, to the Colonial Office, he says, "I have assured the members of the Syndicate that if the Lieutenant-Governor is favourably impressed with their ideas, the Government of Queensland will give the most careful consideration to the whole project, and will consult with Governments of the other contributing colonies, with a view to submitting some definite recommendations to the Imperial Authorities."

It was Sir Hugh Nelson's forgetfulness of this course of action which he marked out for himself at the right time (when in London) that has caused all the trouble.

It is obvious then, upon the practice which prevailed, that the return of the Ordinance to Queensland from the Colonial Office, places Queensland in a position to obtain our views.

Sir George Turner has gone fully and critically into the matter, as his despatch to the Premier of Queensland, dated 25th ultimo, shows. I have carefully considered his views and find myself unable to differ, in any material respect, from his conclusions.

However, now that the Ordinance has come back, I confidently look to the Premier of Queensland to see that it does not go back to England in its present shape.

Send copy to Sir George Turner and Mr. Byrnes.—G.H.R.

G. H. REID,
August 6, 1898.

SATURDAY 20th will suit me for proposed New Guinea Conference I shall probably leave Brisbane by steamer on Wednesday next and hope to stay some days in Sydney.

Telegram from The Premier of New South Wales to The Premier of Victoria.

15 August 1898.

We expect you on Saturday and propose to meet as soon as you like.

The Premier of Queensland to The Premier of New South Wales.

Sir,

Chief Secretary's Office, Brisbane, 11 August, 1898.

In further reference to your telegram of the 2nd inst., I have now the honor to enclose, for the information of the Government of New South Wales, a copy of a letter, dated the 3rd inst., which I have addressed to His Excellency the Governor, containing an expression of the views of this Government with regard to the concessions proposed to be granted under Ordinance No. 1 of 1898 of British New Guinea to the British New Guinea Syndicate.

I have, &c.,

THOMAS J. BYRNES.

The Premier of Queensland to The Governor of Queensland.

My Lord,

Chief Secretary's Office, Brisbane, 3 August, 1898.

Having at length received from the Governments of New South Wales and Victoria an expression of their views with respect to the provisions of the British New Guinea Ordinance No. 1 of 1898, as they are desired to be amended by the Right Honorable the Secretary of State for the Colonies, I now do myself the honor to forward for your Excellency's information, and for transmission to Mr. Chamberlain, a copy of a letter, dated 25th July ult., from Sir George Turner, setting forth the objections of the Government of Victoria to the concessions granted under the Ordinance in question, and to inform your Excellency that I yesterday received from Mr. Reid a telegram stating that he entirely agrees with the views expressed in Sir George Turner's letter.

I beg now to submit for your Excellency's consideration the following remarks on the subject of the Ordinance, and I would ask that they be conveyed to the Secretary of State, as embodying the opinions of this Government on the question. I may premise that I concur in every respect in the objections raised by the Prime Minister of Victoria. Sir George Turner has very fully dealt with the monopolistic character of the concessions proposed to be granted, with the prejudice which they must inevitably cause to Australian interests, and with the complications which may arise by reason of the powers given to the Syndicate to lease or assign their interests. I do not, therefore, propose to refer further to this phase of the subject.

During

During my absence in the northern part of the colony in May last, Mr. Dickson, who was acting as Chief Secretary, wrote to the Deputy-Governor, pointing out that considerable popular excitement existed both in the Southern Colonies and in Queensland, in regard to the concessions, and suggesting that, as the provisions of the Amended Proposals for the Administration of British New Guinea, which require that the Government of Queensland shall consult the Governments of the other contributing colonies in all matters other than those of ordinary administration had apparently in this instance not been complied with, steps should be taken to delay the final completion of the Ordinance under which the concessions were granted until the return from New Guinea of Sir Hugh Nelson, who was Prime Minister at the time when the negotiations between Sir William MacGregor and the Syndicate were concluded, and who, it was thought, might possibly be able to throw more light on this particular phase of the subject.

Sir Samuel Griffith accordingly telegraphed to the Secretary of State on the 20th May, requesting that the exercise of Her Majesty's power of disallowance be reserved until an opportunity had occurred for the Governments of the contributing colonies to express an opinion on the provisions of the Ordinance, and on the 24th May Mr. Chamberlain replied that the draft Ordinance did not appear to him to sufficiently protect the Government, and that he would require certain modifications, the purport of which had been communicated to the colony in a despatch dated 3rd May.

The Secretary of State said that he did not see that this Government could now oppose the allowance of the Ordinance without breach of faith, and added that he presumed Sir Hugh Nelson and Sir William MacGregor had, at the Conference held in Melbourne to consider the question of the future administration of New Guinea, fully informed the Prime Ministers of New South Wales and Victoria of the agreement with the Syndicate, which was a matter of notoriety, and was, he had been informed, fully discussed by the agents of the Syndicate with prominent men and Ministers at Sydney and Melbourne.

This telegram was at once communicated to the Governments of New South Wales and Victoria, and on the 10th June Mr. Chamberlain's despatch of 3rd May was received from your Excellency, and copies were forwarded to the contributing colonies on the same date.

On the 14th June, on Sir Hugh Nelson's return to Brisbane, I forwarded to him a copy of the correspondence which had taken place on the subject of the concessions, and requested him to favour the Government with any observations he might desire to offer, more especially with regard to the contention of the Prime Ministers of New South Wales and Victoria that they should, under Clause 20 of the Amended Proposals, have been consulted in regard to the agreement in virtue of which the concessions are granted.

In his reply, dated 18th June, Sir Hugh Nelson stated that the proposal had been brought under the notice of Mr. Reid and Sir George Turner in London last year; but they were not consulted at the later stages of the proceedings, because the matter dealt with required legislation, and "in no instance since the establishment of the Possession have the other colonies been consulted in respect of any proposed legislation." Sir Hugh Nelson explains that when, in writing to the promoters of the Syndicate, he assured them that if the Lieutenant-Governor were favourably impressed with their ideas, the Government of Queensland would give the most careful consideration to the whole project and would consult with the Governments of the other contributing colonies with the view of submitting some definite recommendation to the Imperial Authorities, he was under the impression that if the Administrator favoured the project he would be able to make a draft agreement under the existing Ordinances of the Possession, which as an act of other than ordinary administration would have been submitted as stated. As, however, the Administrator found it necessary to proceed in the matter by legislation the other colonies were, following the usual practice, not consulted. He proceeds to state that, having given the matter the fullest consideration, he has arrived at the conclusion that, in accordance with the spirit of the Second Schedule, the Governments of New South Wales and Victoria should have an opportunity of influencing the opinions of Queensland before action was taken, although such a course would have been contrary to the practice established and invariably adhered to.

I may at once state that I am strongly of opinion that the Amended Proposals under which the Possession is administered require that the contributing colonies should be consulted in all matters other than those of mere administrative detail, and especially in regard to proposals necessitating legislative sanction. That they have not, except in isolated instances and in matters involving expenditure, been so consulted, I am prepared to admit, but the practice adopted has probably arisen from the fact that Ordinances hitherto passed have dealt with no questions in respect to the policy of which doubts could exist as to the attitude of the several colonies.

In Mr. Chamberlain's telegram of 24th May above referred to, he presumes that the Premiers of New South Wales and Victoria were consulted by Sir Hugh Nelson and Sir William MacGregor, and I naturally inferred that the Secretary of State shared the opinions held in Australia, that this was a matter in which the colonies should have been consulted. We have since learnt that the matter was never alluded to at the Melbourne Conference, and so far from its being one of notoriety, as assumed by the Secretary of State for the Colonies, it was treated in the most confidential manner, even Queensland Ministers not having been informed of it, and the public Press having been kept in entire ignorance of the proceedings. I was greatly surprised to see it announced in the newspapers on Monday last that the Secretary of State had telegraphed to the Governor of New South Wales that the matter of the Ordinance was one of ordinary administration, and that the Queensland Government was not, therefore, strictly bound to consult the Governments of the other contributing colonies, though he assumed the Melbourne Conference had fully considered the matter. It seems scarcely possible to reconcile this statement with the opinion first expressed by Mr. Chamberlain, and I should be glad to know that the Secretary of State's message to the Governor of New South Wales is in this respect otherwise than as it has been reported.

If, as the Governments of the contributing colonies contend, the matter was not one of ordinary administration, it is obvious that the Ordinance passed by the Legislature of British New Guinea cannot be regarded as giving legal effect to the agreement entered into between the Administrator of the Possession and the Syndicate. It is equally apparent from the action of the Secretary of State in withholding the Royal Assent from the Ordinance, that the transaction is in no sense complete, and now that the views of the Governments interested have been ascertained, there would appear nothing to prevent Her Majesty from being advised to disallow the measure.

I am, I confess, quite unable to see why the Secretary of State, in replying to Sir Samuel Griffith's telegram, should have thought it necessary to use the words "I do not see that your Ministers can now

oppose allowance of Ordinance without breach of faith." Up to the present time, I may point out, the views of the Government have never been placed before the Secretary of State, all that has been done having been to request delay in order that the views of the other colonies might be ascertained. But as the words have been used, and as I now desire to urge the disallowance of the Ordinance, I may say that we are unable to regard our attitude as involving in any sense a breach of faith, inasmuch as leaving out of the question the change of Ministry which has recently taken place, the matter was never considered or approved by the members of the Queensland Government. To summarise the position, therefore, I would remind your Excellency that the Ordinance was never approved by your Ministers, that the Governments of the contributing colonies were never consulted in the matter, and that the Ordinance has not been approved by Her Majesty. The Governments and the people of the contributing colonies are unanimous in condemning the concessions, even with the modifications suggested by the Secretary of State, and I would accordingly request your Excellency to be good enough to urge the Secretary of State to advise Her Majesty to exercise her power of disallowance in respect of the Ordinance, so that, if necessary, the preliminaries that should have been adopted in the first instance may be observed, and the whole scheme duly considered by the contributing colonies in conjunction with the question of the future administration of the Possessions.

In conclusion, I may inform your Excellency that a Conference of the Prime Ministers of New South Wales, Victoria, and Queensland is being arranged to take place in Sydney during the week after next, and I hope at its conclusion to be in a position to advise your Excellency of the conditions under which the Governments of the colonies referred to will be prepared to make further contributions towards the cost of administering British New Guinea.

I have, &c.,

THOMAS J. BYRNES.

Conference of Premiers, Sydney, 20 August, 1898.

THE Conference affirmed the decision already communicated to the British Government, to the effect that the concession to the New Guinea Syndicate met with the strongest disapproval of the Governments of New South Wales and Victoria, and reiterated a request that Her Majesty should be advised to disallow the Ordinance giving effect to the concession.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

BOARD OF EXPORTS.

(RETURN RESPECTING.)

*Printed under No. 14 Report from Printing Committee, 1 December, 1898.**[Laid upon the Table in answer to Question No. 6, Votes No. 41, 23 November, 1898.]*

Question.

(6.) Mr. Chanter asked the Secretary for Mines,—

- (1.) On what date was the Board of Exports appointed?
- (2.) Who are the members of the Board?
- (3.) What are their duties?
- (4.) How often do the Board meet?
- (5.) What is the record of their individual attendances at each meeting since their appointment up to 30th June, 1898?
- (6.) What are the total costs incurred by the Board up to 30th June, 1898?
- (7.) From what Fund have such costs been defrayed?
- (8.) What speculations have the Board gone into, and with what net results?
- (9.) Are any of the members of this Board paid by salary or fee; if so, what is the nature of same, and the amount paid to each?
- (10.) Is there any staff connected with the Board; if so, what number and at what total cost to the 30th June, 1898?
- (11.) Have the members of the staff been taken from the Public Service, and with the approval of the Public Service Board; what are their respective salaries?
- (12.) Have the members of the Board or staff received any allowance for travelling by rail, steamer, or otherwise; if so, how much, and to whom paid?
- (13.) Have the Board made any report tabulating the various articles dealt with, and formulated any rules for the conduct of any trade or product; if so, will he cause a copy to be laid upon the Table of the House?

Answer.

- (1.) 4th November, 1895.
- (2.) G. Skelton Yuill, Esq., Chairman; The Hon. A. Kethel, M.L.C., Vice-Chairman; George Maiden, Esq.; Henry W. Lee, Esq.; Chas. F. Lindeman, Esq.; Thomas Jessep, Esq., M.L.A.; John Wildridge, Esq.; Thomas C. Worboys, Esq.; John L. Thompson, Esq.
- (3.) To act as a Board of Advice in assisting the Government to promote the interests of the producers of the Colony in British, Colonial, and Foreign markets.
- (4.) Weekly or fortnightly, as required.
- (5.) G. S. Yuill, 33 meetings; Hon. A. Kethel, 59 meetings; Thos. Jessep, 65 meetings; Geo. Maiden, 69 meetings; J. L. Thompson, 56 meetings; C. F. Lindeman, 47 meetings; T. C. Worboys, 33 meetings; H. W. Lee, 34 meetings; J. Wildridge, 53 meetings; Secretary, 90 meetings.
- (6.) £3,750, including salaries, rent of cold storage premises, and all contingencies.
- (7.) The Consolidated Revenue.
- (8.) An experimental shipment of oranges, which resulted in a profit of £143 13s. 7d. Since then further experiments, at a total cost of about £350, have been made in shipping mutton, poultry, eggs, fruit, preserves, &c., with a view to testing various methods of preserving, shipping, and finding fresh markets for produce. The Board also managed the large shipments which have been made of rabbits, hares, poultry, &c.
- (9.) Members are allowed a fee of £1 1s. per sitting to defray expenses, with the exception of Messrs Kethel, Jessep, and Thompson. No further allowances are made.
- (10.) The Staff consists of Secretary, paid to 30th June, £650; poultry expert and grader, paid to 30th June, £238 6s. 8d.; total cost of staff—2½ years—£888 6s. 8d.
- (11.) The Secretary was appointed before the Public Service Board was instituted; his present salary is £300 per annum. The expert and grader was selected by the Public Service Board from a number of applicants, for his special qualifications; his salary is £200 per annum.
- (12.) Country members get free railway passes to attend the meetings; officers get the usual Public Service Board allowances when in the country engaged on Departmental business. The only other allowance made was a sum of £14 incurred in travelling expenses by the Hon. A. Kethel, when visiting Victoria and Tasmania on the Board's business in 1896.
- (13.) Yes, and full particulars will be found in the report on the Department of Agriculture and Forestry, laid upon the Table of the House in June last.

(SECOND SESSION.)

 ESTATE OF THE LATE S. M. SWIFT, OF PETERSHAM.

 PROGRESS REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on 13th December, 1898, "*to inquire into and report upon the alleged evasion of probate duty by the executors in the estate of the late S. M. Swift, Esq., Petersham,*" and to whom was referred on the same date "*the Minutes of Proceedings and Evidence of the Select Committee of Session 1897,*"—have agreed to the following Progress Report:—

Your Committee have examined the witnesses named in the List,* have *See List, p. 6. resolved, owing to the advanced period of the Session, to report the evidence to your Honorable House, and, in view of the startling nature of such evidence, to recommend that the inquiry be resumed early next Session.

No. 1 Committee Room,
 Legislative Assembly,
 22 December, 1898.

W. M. HUGHES,
 Chairman.

1897.

PROCEEDINGS OF THE COMMITTEE.

WEDNESDAY, 13 OCTOBER, 1897.

MEMBERS PRESENT:—

Mr. Hughes,		Mr. McGowen,
Mr. McLean,		Mr. Parkes,
	Mr. Thomas.	

Mr. Hughes called to the Chair.

Entry from Votes and Proceedings, appointing the Committee, read by the Clerk. Committee deliberated.

[Adjourned till to-morrow at fifteen minutes past Two o'clock.]

THURSDAY, 14 OCTOBER, 1897.

MEMBERS PRESENT:—

Mr. Hughes in the Chair.		
Mr. McFarlane,		Mr. McGowen,
Mr. McLean,		Mr. Parkes.

Mrs. Elizabeth Swift called in, sworn, and examined.

Witness handed in attested copy of the will of the late Samuel Moffit Swift, of Petersham (*Appendix A1*); extract from the *Sydney Morning Herald* of 22nd February, 1884—notice of application for probate of the will of the late S. M. Swift (*Appendix A2*); copy of Affidavit sworn and lodged with application to obtain probate (*Appendix A3*); statement of S. M. Swift's liabilities and assets at the time of his death (*Appendix A4*); statement showing the total assets in the estate of the late S. M. Swift to be £376,225 (*Appendix A5*).

Witness withdrew.

[Adjourned till Wednesday next at fifteen minutes past Two o'clock.]

WEDNESDAY, 20 OCTOBER, 1897.

MEMBERS PRESENT:—

Mr. Hughes in the Chair.		
Mr. Dick,		Mr. McLean,
	Mr. Thomas.	

William Thomas Ball (*Accountant*) called in, sworn, and examined.

Witness withdrew.

[Adjourned till Tuesday at fifteen minutes past Two o'clock.]

TUESDAY, 26, OCTOBER, 1897.

MEMBERS PRESENT:—

Mr. Dick,		Mr. McGowen,
Mr. McLean,		Mr. Thomas.

In the absence of the Chairman, Mr. McGowen called to the Chair, *pro tem*.James William Johnston (*Solicitor*) called in, sworn, and examined.

Witness withdrew.

Thomas William Garrett (*Registrar of Probates*) called in, sworn, and examined.

Witness withdrew.

William Alexander Balcombe (*Chief Clerk in Equity*) called in, sworn, and examined.

Witness withdrew.

William Thomas Ball recalled and further examined.

Witness withdrew.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

THURSDAY,

THURSDAY, 28 OCTOBER, 1897.

MEMBERS PRESENT :—

Mr. Hughes in the Chair.

Mr. McFarlane,		Mr. McLean,
Mr. Thomas,		Mr. Wood.

The Clerk, by direction of the Chairman, read a letter from James Wm. Johnston, intimating that neither the present firm of Johnston, Minter, Simpson, & Co., nor its predecessors, ever acted for Mr. Swift or his executors or executrix.

William Alexander Balcombe recalled and further examined.

Witness withdrew.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

THURSDAY, 18 NOVEMBER, 1897.

MEMBER PRESENT :—

Mr. Hughes.

In the absence of a quorum, the meeting called for this day lapsed.

WEDNESDAY, 24 NOVEMBER, 1897.

MEMBERS PRESENT :—

Mr. Hughes in the Chair.

Mr. McFarlane,		Mr. McGowen,
Mr. Thomas,		Mr. Wood.

The Clerk having informed the Committee that Mr. John M'Donald, the witness summoned for to-day, was not in attendance,—

Resolved (on motion of Mr. Wood),—"That the non-attendance of Mr. John M'Donald, who was summoned to attend to-day, be reported to Mr. Speaker."

Ordered,—That Mr. John M'Donald be summoned to give evidence next meeting.

[Adjourned till Tuesday next at *half-past Two* o'clock.]

TUESDAY, 30 NOVEMBER, 1897.

MEMBERS PRESENT :—

Mr. Hughes in the Chair.

Mr. Dick,		Mr. McGowen,
Mr. McLean,		Mr. Thomas.

John M'Donald called in, sworn, and examined.

Witness withdrew.

Mrs. Elizabeth Swift recalled and further examined.

Witness *handed in* copy of memorandum of agreement of a partnership between John M'Donald and S. M. Swift, dated 8th February, 1881 (*Appendix B1*); copy of letter written by M'Donald to Hann, stating that original memorandum was drawn up by himself (*Appendix B2*).

Witness withdrew.

John M'Donald recalled and further examined.

Witness withdrew.

[Adjourned till To-morrow at *half-past Two* o'clock.]

WEDNESDAY, 1 DECEMBER, 1897.

MEMBERS PRESENT :—

Mr. Hughes in the Chair.

Mr. McFarlane,		Mr. Parkes,
		Mr. Thomas.

John M'Donald recalled and further examined.

Witness withdrew.

Mrs. Elizabeth Swift recalled and further examined.

Witness withdrew.

John M'Donald recalled and further examined.

Witness withdrew.

[Adjourned till Wednesday next at *half-past Two* o'clock.]

WEDNESDAY, 8 DECEMBER, 1897.

MEMBER PRESENT :—

Mr. Thomas.

In the absence of a quorum, the meeting called for this day lapsed.

1898.

PROCEEDINGS OF THE COMMITTEE.

THURSDAY, 15 DECEMBER, 1898.

MEMBERS PRESENT:—

Mr. McFarlane, | Mr. McLean.

In the absence of a quorum, the meeting called for this day lapsed.

1897.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

APPOINTED TO INQUIRE INTO

ESTATE OF THE LATE S. M. SWIFT, OF
PETERSHAM.

WEDNESDAY, 14 OCTOBER, 1897.

Present:

MR. HUGHES,
MR. MCFARLANE,

MR. PARKES.

MR. MCGOWEN,
MR. McLEAN,

W. M. HUGHES, ESQ., IN THE CHAIR.

Mrs. Elizabeth Swift called in, sworn, and examined:—

1. *Chairman.*] Are you the widow of the late Samuel Moffitt Swift? Yes.
2. What was he? He was a squatter. He died at "Hill Crest"—his private residence—Petersham, on the 18th February, 1884.
3. *Mr. McGowen.*] Did he leave considerable property? Yes; there were eight stations—Mungie Bundie, Boolooroo, Gravesend or Yaggaba (as it was known in the Lands Office), Baden Park, Mimosa, Browley, Snubba, and Tooma Falls.
4. Did he leave a will? Yes; I have a copy of it with me.
5. In that, did he set forth that he was the full owner of this estate? Yes; he did not make any provision for any partnerships.
6. *Mr. McLean.*] Who were the executors appointed under that will? Phincas Hann, Charles Hawthorne Croaker, and myself—Elizabeth Swift. We were the trustees and executors.
7. Do you produce a copy of the will? Yes; this is a copy of the will, duly attested. [*Appendix A1.*]
8. Did you in conjunction with these executors, apply for probate of your husband's will? May I give an explanation. My husband died on the 18th February, 1884; he was buried on the 20th. On the 22nd, without my hearing the will read, or knowing anything of it, they applied, through Messrs. Abbott and Allen, solicitors, for probate. Hann and Croaker put in an application, dated 22nd February, 1884, without my knowledge. I produce an advertisement that appeared in the *Sydney Morning Herald*. [*Appendix A 2.*]
9. Do Messrs. Abbott and Allen notify there that they apply on behalf of the three executors? Yes.
10. Do you swear you gave them no instructions to apply on your behalf? I had never seen Abbott and Allen, to my knowledge, and I never stood in their office. I took the advertisement which I have produced from the *Sydney Morning Herald*, in the library, a few days ago.
11. Did you see that advertisement in the *Sydney Morning Herald* at the time it appeared? No; I have only seen it within the last month.
12. Were you aware that application was being made for probate? No; and I had not heard the will read then.
13. *Chairman.*] At that time, I suppose you were entirely ignorant of business matters? I was, with regard to the will, because I never had any experience in a matter of that kind. My husband had taught me his business after we were married. With him I went through almost everything, and knew everything he was doing up to the time of his death. I had a good personal knowledge of all his affairs and assets and his transactions. He taught me to answer telegrams, and assist him in his business when we were living in Tumut.
14. *Mr. McGowen.*] When he died, did you know that you were appointed an executor? I knew, because he told me before his death.

Mrs. E. Swift.

14 Oct., 1897.

15.

- Mrs. E. Swift. 15. Did you know at that time that they had to apply for probate? No; I did not know what means they took when applying for probate.
- 14 Oct., 1887. 16. *Mr. McLean.*] At the time, or immediately after your husband's death, did you consult a solicitor or any other person as to what steps you should take? No; I did not know that that was necessary. I only knew afterwards that they should have brought the will to Hill Crest, opened it, and read it in my presence.
17. *Chairman.*] Did your solicitors not remind you of it, and notify you of it? To the best of my knowledge it was a month after that when I heard the will read. I was communicated with—I could not say exactly whether by Hann and Croaker or from Mr. Abbott's office—and asked to go to Mr. Abbott's office. I drove there one afternoon and Mr. Allen read the will for me.
18. The fact remains that you did not apply for probate? I did not apply personally, and I did not know they were applying in my name. I did not know what applying for probate was.
19. Did not the officials of the Ecclesiastical Court, when application was made by Hann and Croaker, and not by you in conjunction with them, send any official communication to you? No; not for a long time afterwards. I daresay the date could be ascertained in the Stamp Office. I then signed some paper in connection with the Stamp Office, but it was long after probate was granted.
20. At this time I suppose you had no reason to doubt but that the estate would be administered for your benefit and the benefit of your children in the usual way? It never entered my mind that anyone could take the estate from us, because it was left by my husband to myself and children wholly, and I had a good idea of what it consisted.
21. *Mr. McGowen.*] How many children did your husband leave, and what were their ages? Six children—four girls and two boys. The eldest then was, I think, about 12 or 12½ years; the youngest was 18 months or thereabout. There were about two years between each of them.
22. *Chairman.*] Has the estate been administered? No.
23. As far as you know? If it was administered we would have got the proceeds.
24. *Mr. McLean.*] Have you taken any part in the management of the estate since probate was taken out? They never allowed me to take any part. I think it was about the 18th October, 1884, that Hann and Croaker sent me down a mortgage given on one of the stations by them, and signed by them, to the Bank of New South Wales. They asked me to call at the bank and sign it. I wrote back and said I thought that under the will we, as trustees, had no power to mortgage any portion of Mr. Swift's property; that the instructions in the will were only to realise and invest it as the will directed; but that I would consult a solicitor and see if I was right. In the meantime I would not sign it. I asked to have the mortgage for a few days until I looked through it. I got the mortgage and took it to Mr. Abbott. Mr. Abbott wrote a letter to me saying that we had no power to give a mortgage over any of the property. I think that was the first time they asked me to take any prominent part in the estate matters.
25. *Mr. McFarlane.*] Did the executors request you to do that? Yes.
26. Was that done by letter? Yes; I can produce the letter. I have the letter-book.
27. Was it signed by the two trustees? No; it was a letter from Mr. Hann.
28. Have you got that letter? I believe I have. If not, I have a copy of it in Mr. Hann's letter-book in his own writing.
29. *Mr. McLean.*] Subsequent to that, did you sign any papers or take part in the management of the estate in any way? Not that I am aware of. I believe I have not signed any papers; in fact, I believe I can conscientiously swear that I did not.
30. With reference to the filing of these accounts, as to the value of his assets at the time probate was taken out, were those accounts submitted to you before they were filed in the Court? No; and I was never asked a question as to Mr. Swift's property, or anything in connection with it. Afterwards, I said that an accountant should be appointed; that Mr. Swift's properties were very large; that an accountant should collect all the assets and make up the accounts before probate was asked for, because how could two strange men living up at Wagga Wagga come down to Sydney and understand within a fortnight, or a few days, the extent of Mr. Swift's transactions and his properties. They could not possibly do so. There is not an accountant in Sydney who could have put his assets and properties and accounts together under at least three months.
31. When was that account filed? Probate was granted on the 5th April. I cannot tell when it was filed. They applied for probate on the 22nd February, and it was granted on the 5th April.
32. *Mr. McGowen.*] You did not take any steps, and you were not consulted until October? I was not consulted even then.
33. I mean in the administration of the estate? No.
34. You stated that, after consulting your solicitor, you refused to give your consent to the mortgage;—what happened then? The mortgage remained, and I believe the bank registered it.
35. Then the mortgage was effected? I believe so, because the bank still holds that station and that mortgage.
36. When you refused to sign the mortgage, did you know that probate was taken out? I knew, as far reports in the paper were concerned, that probate was taken out; but I did not understand what probate really was.
37. What was the next step? I may be allowed to go back to about May in 1884. I felt that, as they were not consulting me about the estate matters, that they might not quite understand all the things. They had sold 22,000 sheep in Queensland at what I considered to be under their value. They sold them for 14s. a head when they should have got £1 a head at that time when stock was very high. Then I inquired from one and another what was being done. I wrote a note to the General Manager of the Bank of New South Wales—Mr. Shepherd Smith. I thought that as my husband had such large banking transactions he would be the best one to assist me if anything was going wrong. He wrote a note to me, which I have, saying that he would be happy to see me at any time that I could make it convenient to call on him. I called on him some time in May, 1884, and he said he would be very happy to assist me in any way he could. Afterwards, when I called on him again, he said that he thought I had better go home and nurse my children, and let two honest men look after and administer my estate, and that I should not meddle in it at all.
38. Did you get any money? They opened an account for me at the bank, and paid in £100 and £50 at a time. They gave me, extending over two years, about £2,000. Mr. Shepherd Smith would never see me again after that.

39. Did you try to see him? Yes; the bank, of course, and Hann and Croaker managed the banking matters in connection with the estate. In July, 1884, I went up to Wagga Wagga to see Hann and Croaker, and to see what they were doing with the estate. I remained there a few days, and Mr. Hann promised to give me accounts of what he had realised, and what he had done up to that time. Afterwards he sent me accounts, and then I went to Mr. Abbott. I consulted him for a number of years in the estate matters, as they were going wrong. Mrs. E. Swift
14 Oct., 1897.
40. *Mr. McFarlane.*] Was Mr. Shepherd Smith managing the bank when this mortgage was lodged? Yes; he was the General Manager.
41. Was he managing the particular branch of the Bank of New South Wales where this mortgage was lodged as security? I suppose so.
42. That was the bank he was in? Yes; he resided at the bank in Sydney.
43. You understand the mortgage is the one they wanted your signature for? Yes. Then I had a communication from the bank over that mortgage, which I can produce. The manager of the bank wrote to me because I refused to sign the mortgage. The effect of the letter was that I was thwarting the winding up of my husband's estate by my obstinacy, and could not the solicitors for the bank and my solicitors confer together over it. Then I think Mr. Abbott replied to that. At any rate he directed me what to do in regard to that. I never signed the mortgage.
44. *Mr. McLean.*] Can you tell us when the stamp duty was paid in connection with this estate? Yes; I produce the cheque which was drawn. I cannot tell from what source it is drawn, or on what account it is drawn; but the cheque I produce is the one they paid the probate duty with.
45. Did you get that cheque from the bank? Yes; together with other cheques of Mr. Swift's on various accounts.
46. Is it signed by Hann and Croaker as executors? Yes.
47. *Mr. McFarlane.*] Have you any knowledge as to what was done with the money collected in the estate? It was paid into the bank.
48. By Hann and Croaker? Yes; and a greater portion of that which I realised I also paid into the bank.
49. To the same account? That I cannot say.
50. What account did you pay it into? Into an account which was supposed to be opened for the estate moneys in the bank.
51. Can you say whether it was a Trust Account? To the best of my knowledge, I do not think it was.
52. In what bank was it? The Bank of New South Wales, Sydney. I also produce a copy of the affidavit sworn and lodged with the application to obtain probate. [*Appendix A 3.*]
53. *Chairman.*] Was there not accompanying this a detailed list of assets and liabilities? Yes; I produce it.
54. *Mr. McFarlane.*] Were you ever consulted before that cheque was drawn out? No.
55. It is signed by the two other executors? Yes.
56. *Chairman.*] Are these the details of the accounts filed with them? Yes.
57. Are these the full details as supplied to the Court? That is all that has been supplied to the Court as far as I know.
58. That purports to be the whole explanation of the estate, as supplied to the Probate Court? Yes.
59. And it was upon that that probate duty was declared and paid? Yes; the figures in the assets correspond with the figures in that affidavit.
60. Probate duty was paid on how much? £46,914 18s. 7d.
61. Do you propose to show that this does not contain the whole of the items in your husband's estate? Yes.
62. This divides the estate of Mr. Swift into three portions? Yes.
63. One portion is the private estate of S. M. Swift, another is Swift and Hann, and the third is John McDonald & Co.? Yes.
64. Do you declare that this is not an accurate statement of the estate? It is not by any means.
65. The private estate of Mr. Swift shows a balance of £2,996;—is that accurate? No.
66. Not even the private estate? No.
67. In what direction is it not accurate;—ought there to be more? I can hardly explain that. It is like the partnership accounts. They cannot be understood unless you go through the whole of them and get proper accounts, but I can prove some of these that are not correct.
68. Does this statement make the total of Mr. Swift's private estate less than it ought to be? Yes; very much less.
69. *Mr. McLean.*] Had you any knowledge of these partnership transactions prior to your husband's death? Yes.
70. Did you know he was in partnership with Hann? Yes, in some transactions; but I can prove that they were all settled in my husband's lifetime.
71. Did you know of any partnership existing between Mr. Swift and Mr. Hann at the date of Mr. Swift's death? No.
72. Did you know of a partnership existing between Mr. Swift and Mr. McDonald at the time of Mr. Swift's death? No.
73. *Chairman.*] Did you know of any arrangement or agreement tantamount to a partnership? No; as far as Mr. Swift's property is concerned.
74. But you would not like to say, with reference to other assets of Swift and Hann, and Swift and McDonald? There were partnerships in certain transactions; but those were finished, and the money paid over to them before Mr. Swift's death.
75. *Mr. McLean.*] They were joint speculations really? Yes; outside the properties.
76. *Chairman.*] What kind of transactions were these, according to your personal knowledge? They were purchases of stock, and Mr. Swift invariably paid all the money. He financed the transactions, and the droving and expenses altogether were taken out of the money first after the stock was sold, and then what was left was divided into two or three shares, as it might be, and Mr. Swift sent his cheque to Hann, or whoever it might be.
77. Who furnished the money for these transactions? Mr. Swift entirely.
78. As far as your personal knowledge is concerned, were all these transactions financed by Mr. Swift? Yes.
79. Do you hand in a statement of Mr. Swift's assets and liabilities at the time of his death? Yes. [*Appendix A 4.*]

- Mrs. E. Swift. 80. *Mr. McLean.*] Do you hand in a statement showing the total assets in your husband's estate to be £376,225? Yes; and as we go along I can produce vouchers to show that there are a great many more assets, but I could not put them in and swear to them when I made up that statement. [*Appendix A5.*]
- 14 Oct., 1897. 81. The total assets shown in this estate amount to £376,225, and the liabilities to £138,475? Yes; as far as I know the liabilities.
82. Showing a surplus of £237,750? Yes.
83. You have handed in an inventory of assets and liabilities in your late husband's estate, upon which stamp duty was paid showing a surplus of £46,914? Yes.
84. The difference between that amount and the amount shown in your own statement is £190,735;—is that the amount upon which you say the Government have really been defrauded of stamp duty? Yes; and more to be added to it.
85. That is the lowest amount, according to your account, that we can estimate the Government have been defrauded of stamp duty upon? Yes; these assets actually existed at the time of my husband's death.
86. Where did you get the values that appear in this statement? I have documentary evidence for all but the stations. One station was sold for £5,000, and that would be the value of it. That money was paid into the bank.
87. *Chairman.*] Do I understand that the items in this list that you have ticked in red ink are the items for which you have documentary evidence with you? Yes.
88. *Mr. McLean.*] There are a number of items such as this at the end of your account—No. 70—35,000 acres freehold, cost 45s. per acre, £78,750;—do you simply put that down as the cost price? Exactly; I just took it what it cost.
89. Are you in a position to say whether it was worth more or less at the time stamp duty was paid? I am in a position to say so with regard to a few months afterwards.
90. What is your own opinion as to the value of that? I was offered £4 an acre for it a few months after my husband's death, but I do not put that value down for it in the list. I thought it was better to put down what it really cost. That was 25s. to the Government, and £1 an acre for improvements. I took all the purchased land at that. To-day, if it was offered, I am sure more than £4 an acre could be got for it.
91. *Chairman.*] With reference to the accounts passed by the Court, do you think that their judgment in the matter is to be considered final? May I explain that Hann and Croaker, or the Trustees, never filed accounts in the usual way until 1889. That was four years afterwards. They then put in before Mr. Garrett a form of accounts that you had better get in order to see the particulars. After that no accounts were put in until they were asked to supply accounts to the children, and to administer the estate in that way. They put in balance-sheets before the Master in Equity as directed by the Judge. At one meeting before the Master in Equity I got Mr. James Robertson to go in and show the Master that there was a difference in those balance-sheets of about £18,000. One balance-sheet finished on the 18th February, and the other commenced on it—that was three years before and three years after 18th February, 1884. No partnership accounts were ever made up until Mr. Ball made them up afterwards. When Mr. Robertson appeared before the Master and showed the difference in the balance-sheets, the Master directed Mr. Robertson to make up true accounts of Mr. Swift's estate. Mr. Robertson said he was an auditing accountant, and told me to go to Mr. Ball, who would go through and search into the accounts, and make up true accounts. It took Mr. Ball three months to make up the accounts. He made up the partnership account (the banking account) of Swift and Hann in about three months, and he made an affidavit to the effect that S. M. Swift paid in £50,000 odd into that account out of his own private money, and that Hann never paid in a penny, and that there was no partnership in it. Then Mr. Ball went to the Court and filed these accounts as ordered by the Master, but the Master, because the word "surcharged" was not on the back of them, refused to allow them, and he threw the whole lot out and shut up the case. Those are all the correct accounts that have ever been before the Court.
92. *Mr. McLean.*] Were you represented at that time by counsel or attorney? Yes.
93. Before the Master? Yes; but the Master would not hear him, and would not hear anyone for me. I went to the Equity Court, and the same thing occurred there. The Judge would not hear me, or anyone for me. He said it was taking up the time of the Court, and that I should do something else besides what I had done. Hann and Croaker came to the Court then to compel me to sign a release to McDonald on his supposed partnership.
94. *Chairman.*] Was that in reference only to the McDonald-Swift account? Yes. I refused to sign the release. I said that the accounts of the supposed partnership were never made, and that he had no ownership in it. I would not sign it. I could not conscientiously sign any release to them, for that release meant that we, the trustees, were to bind ourselves to prevent the children from ever taking any action against McDonald for any portion of Mr. Swift's estate. Therefore I did not feel justified in signing such a document and defrauding my children. Then the Court put me in gaol. I went to gaol.
95. What for? For not signing, I suppose. They did not know how to state it when I went there.
96. *Mr. Parkes.*] I suppose they called it contempt of Court? I suppose so. However, I went to gaol, and stayed there a month. Then the same Judge, Judge Owen, made an order that I was to get out of gaol. I was to bind myself to enter an action against McDonald, and support that action until it was carried through, or completed. I had to pay about £58 costs. I paid it. Messrs. Russell and Russell entered an action for me, and appeared for me from time to time; that went on until the suit was to be heard against McDonald. McDonald entered a defence, and in that he swore that the purchase money for Mungie Bundie station was supplied by his brother-in-law, J. H. Spiller, that J. H. Spiller gave McDonald his share of the purchase money, and that he also gave Swift his share of the purchase money. Then my solicitor subpoenaed Mr. Spiller. Mr. Spiller's evidence was taken by the Chief Clerk in Equity, because he wanted to go to England. We were willing to have his evidence taken, and to allow him to join the boat. That was about, I think, the Easter holidays. Mr. Spiller swore that he never supplied any money to Mr. Swift, and that he never supplied any money to Mr. McDonald. Then, on the Monday after that, our case came on for hearing, and the first thing Mr. McDonald's barrister—Mr. A. H. Simpson, now the Judge—asked was that he might withdraw that paragraph in the statement for the defence where McDonald swore about the purchase money of Mungie Bundie, and the Judge said he could not allow him to withdraw it. Then he raised three points of law why I should not be heard in the suit, and the Judge decided that they

they would argue those points before they would hear the suit. They argued the three points of law for three and a half days, and the Judge decided that because Hann and Croaker had already signed the release it was quite sufficient without my signing it, and yet I had been sent to gaol to compel me to sign it. I was not heard, and I have not been heard since. McDonald has the release signed by those two men.

Mrs. E. Swift.
14 Oct., 1897.

97. *Chairman.*] McDonald was not a trustee, and how did he come in? Hann swore that he was a half partner.

98. You must have known something, if not much, of the transactions of your husband with Mr. McDonald; what was he? He was a drover for my husband. He was employed by my husband. My husband opened an account with the Bank of New South Wales, at Tumut, and paid money into it. McDonald went and bought cattle, drove them, and sold them. As Mr. Swift directed him, he drew on that account. My husband supplied him and the account with the money.

99. Did he do that on more than one occasion? That extended over two years.

100. On the face of it, would it not seem rather improbable that he was a half partner? He was not an owner at all. He had no money of his in with Mr. Swift. There was no money of McDonald's in Mr. Swift's transactions, and there was no money of Hann's. I can prove this. Now I would like to refer to the probate. I will show you a few wrong things in this, and I will be able to show you more. For instance, with regard to the ownerships. They say that it is the deceased's half share. They do not say that it is theirs. He was the owner of the half share and the owner of the whole of it. They think they will get out of it by saying that it was Mr. Swift's half share. It was the same thing with regard to Swift and Hann. Mr. Ball's accounts will show that. With reference to the books and papers in my husband's estate, Hann and Croaker took them to Wagga, and they have not returned them. In fact, there are none of Mr. Swift's books to the fore. I would have no trouble if I had those books in showing the whole of Mr. Swift's transactions and assets.

101. Has Mr. Hann got them? I really believe he has. And I believe he is keeping them away on purpose.

102. How do you propose that the Committee should assist you? The Committee can make an order to produce them.

103. *Mr. McFarlane.*] Who took away the books and papers? Hann and Croaker took nearly all the books.

104. Where did they take them from? From Mr. Swift's office in Sydney.

105. About what time? Just about the time probate was granted.

106. *Mr. Parkes.*] Where was Mr. Swift's office? At Pitt, Son, and Badgery's, in George-street. Hann and Croaker told me I could not touch those books until the probate matter was gone through—that they actually belonged to the Court, and that I must not touch them until then. Hann and Croaker were down in Sydney over the probate matters when it was granted. That was about April. Mrs. Spiller was staying with me at the time, and I went to the railway station to see her off to Juneee. Hann and Croaker were going in the same train. I saw them take a box that came back afterwards to the Court with some papers in, and when I went in the next day to Mr. Swift's office to get the papers, they were all gone to Wagga; yet when I said to them at the railway station, that I supposed I could go in to-morrow and take the papers, they said, yes, I could; and at the same time they had them with them in the train. I drove into Pitt, Son, and Badgery's office, and to my surprise there was not a paper or book in it.

107. *Mr. McFarlane.*] Did they ask you for the books prior to the time they took them away? No; they came to Hill Crest; Mr. Swift had a room upstairs with a desk in it. I let them go there, not having any idea that they would destroy or do anything to the books and papers.

108. Do you say that they took the books and papers? I let them go into his room and his office, and they commenced to tear up papers. Then I objected, and would not let them touch any more papers at Hill Crest. They had a few papers that they took before from Hill Crest. Then they went and took all the papers from the office.

109. Did they ask you anything in connection with the books in the office? No; they told me at the railway station that I could go in next day to the office and get them. They never told me they were taking them with them.

110. How came it to your knowledge that they took the books from the office? When I went in the next day, the books were gone. I wrote to them, and I received a letter from Mr. Hann and another from Mr. Croaker, saying that they were only old papers and were only fit to be destroyed. I wrote and told them that if they destroyed any of them I would hold them both responsible, although I hardly knew at that time what I was saying.

111. I would like a direct statement as to the proof that it was they and no others who could have taken the box? I saw them with this box, and now I have this box in my possession; I can swear to that box; I can swear I saw them lift the box into the van at the railway-station.

112. It does not follow that Mr. Swift's books were in the box? They gave them back as Mr. Swift's papers.

113. Was it Mr. Swift's box? No; they bought it at Lasseters, and charged it to the estate.

114. *Mr. Parkes.*] When they returned it had it any books in it? No books of Swifts; only a few papers.

115. Were they from Mr. Swift's office? I do not know, but they related to Mr. Swift's business. They might have been from Hill Crest.

116. *Mr. McFarlane.*] Did you ever get any acknowledgment in writing, or verbally, that they had the books belonging to Mr. Swift? Yes.

117. An acknowledgment that they took the books? Yes; I have got the letter, or I can produce their letter-book, with a copy in it.

118. *Mr. McLean.*] Did Mr. Swift employ any secretary or clerk in his office? We lived in the country up to 1880, and then he had an office at Pitt, Son, and Badgery's.

119. *Mr. Parkes.*] Was not Mr. Muckeridge his clerk? Yes; originally; but he is now one of the firm of Pitt, Son, and Badgery, and they will not give me any information, because I have one or two heavy charges to make against them.

120. *Mr. McLean.*] You say you are very conversant with Mr. Swift's business matters? Yes.

Mrs. E. Swift. 121. Did he keep a complete set of books relating to his business transactions? He did not keep accountant's ledgers, because he had such a fearfully big business. He merely made entries of the different transactions, and to my knowledge I can swear to three large books that he had in his possession. I have made entries in them myself.

14 Oct., 1897.

122. Are you aware whether he kept a cash-book relating to his banking business—cash receipts and bills? He must have, because I fail to see how he could conduct a big business without a cash-book.

123. Did he have more than one banking account? He had about nine. I can produce all his pass-books for those accounts, and he financed them all himself. I have the pass-books from the beginning up to his death.

124. *Mr. Parkes.*] Do you know of two cheques of Mr. Hann's that went into his private account which were estate cheques? They belonged to the account of Swift and Hann, and should not have gone there.

125. Do you positively state that they went into Mr. Hann's private account? Yes.

126. Was that prior to Mr. Swift's death? One cheque was drawn by Hann—an open cheque—purporting to be for a drover's account. That was paid into Hann's private account within twelve or fourteen days of Mr. Swift's death.

127. Have you those cheques? Yes. Another cheque, purporting to be drawn to pay for rams within a few days of Mr. Swift's death, and that was paid into Hann's private account. Those two cheques together were an asset in Mr. Swift's estate, and Hann should have accounted for them when he was applying for probate, and he should have paid them back. While the action was going on in the Court for the release, my solicitor applied for a discovery order to get hold of those books. It was served on Hann and Croaker, and on McDonald, and they replied by affidavit. I suppose that they had no books other than what they had put into the Court. Then Mr. Russell served a subpoena on the book-keeper of Mungie Bundie. Mr. Granger, the solicitor, went out and searched, and took an inventory of the books in the office at the time, and I have that here. Although McDonald swore he had no books there are a great number shown.

WEDNESDAY, 20 OCTOBER, 1897.

Present:—

MR. DICK,

MR. McLEAN,

MR. THOMAS.

W. M. HUGHES, ESQ., IN THE CHAIR.

William Thomas Ball, Esq., called in, sworn, and examined:—

W. T. Ball.

20 Oct., 1897.

128. *Chairman.*] Are you a professional accountant? Yes.

129. Have you gone through all the papers in connection with the Swift and Hann account? Yes.

130. *Mr. McLean.*] What connection had you with this estate, and in whose interest did you become connected with it? I think it was on behalf of the late Mr. Swift's children.

131. Who retained you? Mrs. Swift.

132. Who paid you? I have not been paid anything yet.

133. Did you undertake the work on behalf of Mrs. Swift and her family? Yes.

134. Did you make a thorough investigation into the accounts? Yes; into the whole matter of the partnership of Swift and Hann—into all their dealings. I have got copies of the accounts I made up, and which were lodged in the Court.

135. Is this the balance-sheet on which they swore probate? That is a copy. I had a copy from the Court to compare with the statement I was preparing. I have a statement prepared after investigating all the books. I have a statement of assets and liabilities at the time of Mr. Swift's death; that is, for Swift and Hann.

136. *Mr. Dick.*] Can you make a general statement in reference to that matter? I have hardly had time to refresh my memory. It is three or four years since I did this work.

137. *Chairman.*] Here is an item, Baden Park station, £50,715? That is the valuation I put on it.

138. *Mr. McLean.*] That is to say, your valuation of Baden Park station corresponds with the valuation which was made for probate? Yes.

139. *Chairman.*] It is alleged that half this estate belonged to Hann;—have you any idea how Baden Park station was purchased? I have not the information at present, but I will produce it at another meeting.

140. Take the Snubba property;—how was that purchased? It was purchased for £600 by Mr. Swift.

141. Was that unstocked? Mr. Swift had rented it before that, and he had paid £200 on account of rent. I reckon the station cost him £800.

142. *Mr. McLean.*] When did he pay that? A cheque was given by Mr. Swift on 1st August, 1877; it went through his bank at Tumut. That was for £300. The other payment was a promissory note, dated 1st August, 1877, for twelve months, for £300. That is the way it was bought.

143. At the date of that purchase—1st August, 1877—were there any business relations to your knowledge between Swift and Hann? No.

144. They were not in partnership at that time? No; the partnership occurred afterwards.

145. Did Hann have any business relations of any kind that you know of with Swift? Not that I know of. There is nothing in the books and documents to show that there was.

146. What books and documents had you access to that would throw any light upon the partnership, if there was any? I had all the bank-books, cheque-books, and deposit slips. I have gone through the whole of them. I have a summary of them. I can show where everything paid into the bank came from, either from Mr. Swift or the sale of wool.

147. *Mr. Thomas.*] Were you in any way connected with Mr. Swift before his death? No; I did not know him. Mrs. Swift was the first I knew, and she came to me.

148. *Mr. McLean.*] Were those books which you had in your possession or had access to made up to the time of Mr. Swift's death? Yes, I think they were. I have not seen them for a long time. It must have been made up from the information we got from them—the bank-books especially. They were all right. There were a few small books there that you could not make head or tail of—they were sheets of foolscap pinned together.

149. Was there anything in connection with the accounts of Snubba run which you gathered from the books that would lead you to believe that Mr. Swift was in partnership with anyone else in connection with that property? No; nothing that I can remember.

150.

150. Was there any account of any kind from Mr. Hann in the books of that Snubba run? I cannot answer that question just now from memory. I do not think so; but I cannot speak from memory. W. T. Ball.
20 Oct., 1897.
151. Was there ever a distribution of profits in connection with that particular property? No; there was no distribution of profits in connection with any of the properties.
152. *Chairman.*] In your professional experience have you ever come across a case where one man put in all the capital and divided the profits with anybody else? I have known a case, but only in a small way, where a man would provide the capital and another man would provide the brains to carry on the business.
153. Have you any reason to believe that it was so in this case? No.
154. *Mr. McLean.*] In the course of your investigation did you come across any document or any information that would lead you to believe that Mr. Hann had any interest in these properties? No.
155. *Chairman.*] To the best of your knowledge and belief, did you have access to all the important papers? With regard to Swift and Hann, I had as far as the banking account would show you, and any books Mr. Swift had.
156. Is it the usual custom for a firm to pass all the moneys through a bank? Yes.
157. *Mr. Thomas.*] In your investigation, were you assisted at all by Mr. Hann? I never saw Mr. Hann.
158. In this inquiry, had you any standing which would enable you to demand any papers? Yes; we got all the cheques and deposit-slips from the bank.
159. But supposing Mr. Hann had any papers in his possession—could he refuse to show them to you if he chose? Certainly.
160. Did you ever ask him for any papers? There was an order from the Court for the production of all papers in the case "Swift and Hann."
161. Who obtained that order? Mr. Parsons, for the children.
162. Did you apply for papers yourself? I used to instruct the solicitor as to what papers I wanted, and he would apply to the Master for an order for their production.
163. Was he able to get every paper you asked for? I do not think so.
164. Can you tell us about any of those papers? We wrote on the 25th May, 1893, for the following books and papers:—All settlements sent by drovers, all orders drawn by drovers, a copy of Hann's pass-book, his accounts, and his dealings with the Commercial Banking Company of Sydney, at Wagga, from January, 1878, to January, 1893. Those we could not get.
165. Did you write to Hann for them? Mr. Parsons wrote, I suppose. I gave Mr. Parsons a memo., but he was unable to get those papers and books. I sent in the order for the production of books and papers.
166. You actually got an order of the Court for the production of these papers, and still you could not get them? Yes.
167. Was there any reason given by those people? The order was served on them, and the course would be to produce them at the Master's office. We sent up there, and found they were not deposited.
168. Did you take any further action? No.
169. *Chairman.*] As the Court ordered Hann to produce those papers, and he did not do so, I suppose the presumption is that they were not likely to be particularly favourable to Hann's contention? It would bear that construction.
170. *Mr. McLean.*] Did your people take any action when those papers were not produced? No; I attended the Court for some time, to see if they had been deposited there.
171. Was the attention of the Court called to the fact that its order was not complied with? I do not think so, but I cannot say positively. It would be for the solicitor to do that.
172. What was your reason for asking for all Hann's banking transactions from January, 1878, to January, 1893, to be produced? The desire was to go through them and see what moneys had passed through his account, and where they came from.
173. Why did you take the 1st January, 1878? That was the date the partnership was supposed to start from.
174. What partnership? The supposed partnership of Swift and Hann.
175. Did Hann produce any document at all showing that there was a partnership? No, not that I know of; I never saw such a document, and I never heard of one.
176. There are four station properties mentioned in this balance-sheet of Swift and Hann, having a total value of £100,365 10s.;—were they under mortgage to the Bank of New South Wales, or to any other bank? I cannot answer that question right off. There was an overdraft at the bank, which, presumably, would be for that. It amounted to £47,000.
177. You are not aware whether these properties were mortgaged? I could not say which of them, if any, were mortgaged.
178. Have you inspected any mortgage securities held by the Bank of New South Wales? No.
179. Have you endeavoured to inspect any of them? I asked for certain information at the bank, but I always got the cold shoulder—they would not recognise us.
180. *Mr. Thomas.*] Not after the orders of the Court? They produced whatever the Court ordered. We did not ask for mortgages. From what I gathered, some of the mortgages were given after Mr. Swift's death.
181. *Mr. McLean.*] I suppose there were considerable freehold properties in connection with those stations as well as the ordinary leasehold areas? Yes; but I could not give any definite information about that, except what was paid.
182. Did you ever see any deeds in connection with those properties? No; evidently the account would be in the name of Swift and Hann. This account at the Bank of New South Wales was in the name of Swift and Hann—that is, from 1878 up to the time of Mr. Swift's death. I have got all the amounts here which were paid into the bank, showing from what source the amounts came. They were paid into the credit of Swift and Hann with the bank at Wagga Wagga.
183. Does the debit balance of the Bank of New South Wales correspond with the amounts shown in the liabilities of the firm? The debit balance was £47,838 13s. 7d.
184. On what date? Up to the date of Mr. Swift's death.
185. That balance stood to the debit of the firm of Swift and Hann? Yes.
186. *Chairman.*] Do you know what Hann was doing on any of those properties? I cannot say.

- W. T. Ball. 187. *Mr. McLean.*] In your opinion, would this account, standing in the name of Swift and Hann at the Bank of New South Wales, and showing a debit balance of £47,638 13s. 7d., make Mr. Hann jointly liable with Mr. Swift for that indebtedness to the bank? That would all depend whether he signed the security or not. Mr. Swift would arrange the account, and say he was going to trade as Swift and Hann. Mr. Swift could choose to trade in the name of Swift and Hann, without Hann being necessarily a partner.
- 20 Oct., 1897 188. But is it not an established principle in connection with the law of partnership that a man who allows himself to be published as a partner in a concern becomes liable for the debts of the firm? There is no doubt about that. I might make a statement of this kind. It appeared to me, in going through the books, that Swift and Hann had been in the habit of dealing in cattle and sheep. That is how I think the partnership originated. They used to buy mobs of cattle and flocks of sheep, sell them off, and divide the profits. The cheques paying these profits to Hann were S. M. Swift's cheques on his private account.
189. Have you seen any accounts of their cattle-dealing transactions? I can produce them.
190. *Mr. Dick.*] Have you any evidence concerning the account of Swift and Hann in the Bank of New South Wales? Yes.
191. Can you give us the particulars from 1878 up to 1884? Yes; I have a copy of the payments made from May, 1878, up to 31st March, 1880. The amounts paid into the Bank of New South Wales at Tumut, where the account was kept at first, were as follows:—Moneys advanced by S. M. Swift, £18,204 1s. 7d.; proceeds of wool, sheep, &c., £37,983 18s. 1d.; proceeds of sale of corn and sundry other things, £7,465 18s. 3d.—total, £63,653 17s. 11d. From 31st April, 1880, to the 31st December, 1880, moneys received from Mr. Swift, £731 10s.; from sheep and wool, £26,095 13s. 8d.; from corn and sundries, £3,791 18s. 4d.—total, £30,619 2s. 1d. From 1st January, 1881, to 31st December, 1881, from S. M. Swift, £8,491 16s. 7d.; from sheep and wool, £53,672 4s. 8d.; corn and sundries, £7,241 12s. 3d.—total, £69,405 13s. 6d. From 1st January, 1882, to 31st December, 1882, from S. M. Swift, £5,319 15s. 9d.; from sheep and wool, £104,565 9s. 5d.; corn and sundries, £7,102 9s. 7d.—total, £116,987 15s. 1d. From 1st January to 31st December, 1883, from S. M. Swift, £9,618 0s. 5d.; from sheep and wool, £63,992 10s. 9d.; corn and sundries, £10,101 9s. 9d.—total, £83,692 0s. 11d. From 1st January to 11th February, 1884, S. M. Swift, £273 13s. 11d.; sheep and wool, £229 14s. 8d.; corn and sundries, £1,754 7s. 5d.—total, £2,257 16s. There were further amounts paid into the account of Swift and Hann with the bank in Sydney. The figures I have given were paid in at Wagga Wagga and Tumut, where they had the accounts. The following moneys were paid into the bank at Sydney from 9th September, 1882, to 4th January, 1884; S. M. Swift, £8,055 14s. 10d.; sheep and wool, £10,069 1s. 10d.; corn and sundries, £1,122 5s. 2d.—total, £19,947 1s. 10d.
192. *Chairman.*] In this account I see that the capital put in by Hann is nil? Yes.
193. *Mr. McLean.*] The amounts you have put down as coming from Mr. Swift were advances on capital account? Yes. Swift's own cheques paid in to Swift and Hann.
194. Have you traced his own cheques from his own banking account corresponding with those amounts? Yes; I have done that.
195. *Chairman.*] There are some big transactions here; how were they completed—with bills or what;—here is one item, 5th December, 1879, £3,499, made up of seventy-one items, "Sale of sheep and wool"? That was James and Spratt's bill for sheep sold. It was a bill.
196. Here is another item, 5th August, 1879, £3,813 10s.? That was for sheep sold; 6,917 ewes at 10s., 142 rams at 50s.
197. *Mr. Dick.*] There is an item of £3,441 5s. 6d., 18th August, 1882—what is that? That was S. M. Swift's cheque.
198. Was that paid into the account of Swift and Hann? Yes.
199. *Chairman.*] Did both Swift and Hann operate on this account? I think both of them did.
200. What were the signatures on the cheques? I produce a cheque—it is signed "Swift and Hann."
201. *Mr. McLean.*] Whose signature is on that cheque? Looking at the different documents, I think it is Hann's signature.
202. From your knowledge of the documents signed by Mr. Swift, is it his handwriting? No; he writes a different handwriting altogether from the signature on this cheque.
203. *Chairman.*] In any of the accounts with reference to this Swift and Hann statement, have you any evidence as to a division of profits? I can show that with reference to cattle and sheep.
204. What kind of division was there? I think it was an equal distribution between them of the profit. I have all those figures.
205. *Mr. Thomas.*] Have you any evidence of profit from the stations being divided? No; simply in the dealings with cattle and sheep.
206. *Chairman.*] Will you be able to give evidence at the next meeting with regard to Baden Park and Mimosa properties? Yes; I will get the particulars.

TUESDAY, 26 OCTOBER, 1897.

Present:—

MR. DICK, | MR. McLEAN,
MR. THOMAS.

J. S. T. MCGOWEN, ESQ., IN THE CHAIR.

James William Johnson called in, sworn, and examined:—

- J. W. Johnson. 207. *Chairman.*] Are you member of a firm of solicitors in Sydney? Yes; senior member of the firm of Johnson, Minter, Simpson, & Co.
208. Is that the firm which took out probate of the will of S. M. Swift? I really could not tell you.
209. Can you identify this memo.? Not in the least. All I can say about it is that I believe Mr. F. G. Fosbery was a clerk in our office in 1889, but he left us some years ago, and is now practising in Melbourne.
210. Then, as a matter of fact, it is not your firm that took out probate of that will? I do not know anything about it. All this document says is that probate was lodged, and was delivered to Mr. Fosbery in January, 1889. It also says that probate was lodged by my firm—that is, a previous firm of Want, Johnson, & Co. I was in England in 1889. I know nothing about this matter.
- 211.
- Oct., 1897.

J. W.
Johnson.
26 Oct., 1897.

211. Although at that time Mr. Fosbery was a clerk in your office? I think so.
212. Would it be possible for your firm to do the business while you were absent in England? Quite so.
213. Cannot you find anything in the records of your office? No. When I got this notice, I spoke to two or three clerks as to what this was about. I said I knew nothing about it. I am called upon to produce the probate of the will. From the inquiry I have made, we have not got it. We have not got it now, if we ever had it.
214. *Mr. McLean.*] Have you any knowledge of the affairs of this estate? None whatever.
215. Have you ever been professionally connected with the executors of this estate? No; I daresay my firm have. There were at that time four members of the firm, and we all have different work to attend to.
216. Were you a member of the firm in 1889? Yes.
217. Under whose special department would this business come? I cannot tell, we have a very large staff, something like thirty, besides the partners.
218. Is it possible that this might have been done in your office without your knowing it? Yes; quite possible.
219. Can you inform us what partner or officer of your firm would be likely to give us any information about it? No.
220. If your firm took out probate, in whose department would it be? I can name eight or ten clerks, in the hands of each of whom it might have been. Probably it would have been in the hands of this Mr. Fosbery. That is most probable.
221. I presume some member of the firm would have some information about the probate? I do not think it is very likely. In a matter of this kind Mr. Fosbery would be the solicitor. It would be given to him to attend to, and he would attend to it.
222. Was he an employee or member of the firm? He was an employee.
223. In that case the firm would be responsible for any of the acts of Mr. Fosbery? Certainly.
224. This probate, I presume, belongs to the trustees; and as the matter has been transacted by your firm, would it not naturally follow that some member of the firm would know something about it? I do not think that would follow.
225. Is it the custom in your firm to allow clerks to transact business in this manner, without any of the firm knowing anything about it? Yes; when it is in the hands of competent clerks, especially when they are solicitors. We have six or seven solicitors in our firm. We do not employ anyone unless we know he is thoroughly competent, and we take all responsibility.
226. *Mr. McLean.*] Do you swear that this probate is not in the custody of your firm at present? To the best of my belief.
227. Do you swear you never saw the document? Yes; and I swear, also, that I know nothing about the matter.
228. *Chairman.*] If the transaction was carried out in the manner you have indicated, even by a qualified solicitor in your office, would not your firm receive some monetary consideration for the services of that solicitor? There would be a book containing entries of any cash we received; but that would not show what was done with the documents. It would show all the disbursements and receipts.
229. Have you looked in your books for January, 1889? No.
230. *Mr. McLean.*] Did Mr. Fosbery keep a diary of his transactions on behalf of the firm? He would, appertaining to his own work.
231. That, I presume, is in the possession of the office still? I am not so sure of that. We do not keep those diaries for ever. They are destroyed in about six years.
232. Would it be possible for you, by looking up the books, to be sure whether this transaction was carried out in your office in 1889? Yes; I have every reason to believe that the memorandum which you have put into my hands is correct. I do not suppose anybody would write a falsehood there.
233. This is an extract from the Registrar-General's Office, and that is why we are somewhat surprised that you, as head of the firm, have no knowledge of the transaction? It is quite possible that this is correct, namely, that probate was delivered to Mr. F. G. Fosbery on the date mentioned; that is on or about January, 1889; but I know nothing about that, as I was in England. Even if I were not in England I would not know anything about it. If you will tell me what you want I will be happy to supply it.
234. We want you to identify this memo.? I will take a note of it. I am not aware that we acted for S. M. Swift. I will look up the matter, and send you an official communication.

Thomas William Garrett called in, sworn, and examined:—

T. W.
Garrett.
26 Oct., 1897.

235. *Chairman.*] What position do you hold? Registrar of Probates and other offices.
236. Do you know anything about the Swift estate? I have the papers in that estate.
237. Have you the papers with regard to the application by the executors of the estate of Samuel Moffitt Swift? I have the application for probate.
238. Do you produce it? Yes.
239. Would a document of the kind I show you, signed at Wagga, come to your head office? Yes; this is copied from our office. As far as this document is concerned, it is only filed for the purpose of the assessment of duties, and not for the purpose of probate.
240. Will you state what the estate consisted of and what duty was paid? I cannot tell you that. The Commissioner for Stamps is the only person who can deal with that. No duties are paid to our office.
241. Can you briefly tell us the particulars of the estate? I have made a statement from the Stamp Commissioner's affidavit, showing the different portions of the estate and the amount on which duty was paid.
242. When was the application made for probate? On the 9th April, 1884, it was granted. Mr. Swift died on the 18th February, 1884. It was granted to Phineas Hann, Charles Hawthorne Croaker, and Elizabeth Swift.
243. In April, 1884, was probate granted to those three executors? Yes.
244. Did they have to sign any document in your office? They swore an affidavit to well and truly administer the estate, and the ordinary affidavits to support it.
245. In this case did the three executors do that? Yes.

T. W.
Garrett.
26 Oct., 1897.

246. *Mr. McLean.*] Were those affidavits sworn on the same date by each of the executors? These are merely the ordinary affidavits setting forth the death, the execution of the will, and that they will well and truly administer the estate. Only one copy of the stamped affidavit was filed. That was forwarded to the Stamps Commissioner. Two years afterwards a rule was passed that the affidavit should be filed in duplicate.
247. *Chairman.*] Were those three affidavits signed by the executors under the will? Yes.
248. On the strength of that, as far as your office was concerned, was probate granted? Yes; there is an affidavit as to the due execution of the will.
249. In a case of that kind does your office look to them to file accounts? Yes; they file accounts at the expiration of twelve months. Accounts were filed in this case in 1889.
250. Then it is not imperative that they should file accounts? Before 1890, when the Probates Act was passed, it was not imperative.
251. Has there been any other account furnished except this one? Not in our office.
252. Is it not required? I fancy that the accounts were subsequently filed in the Equity Court.
253. Who furnished the accounts? It is sworn by Hann and Croaker.
254. Does the Act compel you to take the three executors or a majority? Neither. The affidavit of one executor binds them all, except on the ground of fraud.
255. Supposing one executor furnished an account at the end of twelve months, and you did not hear anything from the other two, would that be satisfactory? Yes, unless exception was taken by the other two, or by any person beneficially interested in the estate. These accounts were taken by me, and I think Mrs. Swift attended on the passing of the accounts.
256. Was that in 1889? Yes.
257. Was Mrs. Swift there? Yes.
258. *Mr. McLean.*] Did Mrs. Swift enter any objection? Mrs. Swift did not. There was a letter from Want, Johnson, & Co., on behalf of the Australian Mortgage, Loan, and Finance Company, and Mr. Minter attended.
259. *Mr. Dick.*] Did Mrs. Swift make any appeal in person? I am only speaking from memory. I think she was before me on several occasions, and I fancy she objected to the accounts; but there were no formal objections filed.
260. *Chairman.*] You say an objection was made by Want, Johnson, & Co.;—look at this memo., and see if it has anything to do with that? No; this memo. is in connection with an application under the Real Property Act. That is signed by the Deputy Registrar-General.
261. *Mr. McLean.*] Have you any knowledge as to the position of this estate at the present time? Not the faintest.
262. Is it still in the Probate Court? No; as soon as probate is granted, we are finished with it. Then the accounts are filed.
263. Are these accounts of 1889 final accounts? No; before the passing of the Probates Act of 1890, there was no way of compelling executors to file accounts, and the Probate Court had no jurisdiction over trustees, and it has not now, except the jurisdiction voluntarily given by trustees.
264. And at the same time the executors may not be discharging their trust? No; they do not accept a trust. Trustees accept a trust. There is a thin line between the two, which to the lay mind is very imaginery. These accounts have never been passed by the Court; they were passed by me.
265. Do you put in these papers? Yes; if they are required. I have made a rough extract from the stamped affidavit.
266. Will you hand in that extract? It is endorsed on the papers. The estate was divided into three different portions. The private estate was valued at £26,021 10s. 9d.; private debts, £23,024 15s. 7d.; leaving a net credit of £2,996 15s. 2d. to the private estate. Partnership, Swift and Hann: total assets, £51,392 4s. 2d.; debts, £33,723 17s. 9d.; leaving a net credit balance of £17,668 6s. 5d. Partnership, Macdonald and Swift: assets, £53,250; debts, £27,000; balance, £26,250; leaving an aggregate balance in the whole estate of £46,915 11s. 7d. on which duty was paid.
267. Are these the exact figures from the stamp affidavit? Yes.
268. *Chairman.*] Have the three executors furnished you with any statement beyond what you have mentioned since 1889 as to what was done with the balance of £46,914 18s. 7d.? No.
269. As far as you know did your office or the stamp office demand such a statement from them? No.
270. Did you say that those accounts have not been through the Court? These accounts have not been passed by the Court. Vouchers were produced to me by the executors for the different payments, but the accounts were never passed by the Court.
271. Does that mean that they could not operate on them until they were passed by the Court? No; it only means that the formal allowance by the Court of the accounts passed by me has not been given.
272. But the executors could operate on the estate? Yes; the moment probate was granted.
273. *Mr. Dick.*] In that statement of accounts does it set forth the operations of the executors up to the date of the statement of the accounts? It sets forth the operations of the whole estate, I presume.

William Alexander Balcombe called in, sworn, and examined:—

W. A.
Balcombe.
26 Oct., 1897.

274. *Chairman.*] What position do you hold? Chief Clerk in Equity.
275. Do you know anything with regard to the estate of S. M. Swift? No.
276. Have you been informed as to what you were required to give evidence about? No; I had a note to produce the papers in the case. There are several matters in the Equity Court with regard to Mrs. Swift, Swift and Hann, and Swift and McDonald. There are an immense number of books and papers—in fact about 1 cwt., and to bring them down is rather a large undertaking. If there is any way of singling out the papers or books required, I will produce them at once, or if all of them are required, I must be supplied with the means of getting them here. I can send for them. I laid the matter before the Judge, and he instructed me to produce the documents, but they are to be returned to the office every time the Committee rises.
277. Can you tell me what suits are pending in the Equity Court? I think they are all finished. The books were lodged in the office under the direction of the Master in Equity during the time the accounts were

were

were being taken. The suit has been disposed of. I was going to suggest that Mrs. Swift or the parties entitled could obtain an order for the books to be given up. Then they could go back to the proper owners, who could do what they liked with them. While they are in the custody of the Court we have to take care of them.

W. A.
Balcombe.
26 Oct., 1897.

278. If the Chairman gives an order as to what books are required, I suppose that is all that will be necessary? Yes.

279. *Mr. McLean.*] Can you give us particulars as to the equity suits and the decisions? Yes; I will bring down the pleadings and the decrees.

William Thomas Ball recalled and further examined:—

280. *Chairman.*] Have you any further evidence to tender? The only evidence I can give definitely is with regard to the partnership accounts of Swift and Hann. I have the accounts that I made up myself. I hand in a copy of the affidavit which I filed when I filed the accounts.

W. T. Ball.
26 Oct., 1897.

281. Have you been all through the books? I have been all through the books and documents that I could get—the bank-books and cheque-books.

282. Did you come across any record of the partnership other than the one between Hann and Swift? No.

283. Did you come across anything about a partnership with McDonald? I did not go into that. I only dealt with the Swift and Hann matter.

284. *Mr. Thomas.*] Last week you were asked some questions which you said you would reply to on this occasion? Yes; one was with reference to Swift's capital account. There does not appear to be any capital account in any of the books I had. The only things I can trace are the cheques drawn, and which went through the bank. They show that there was no capital paid in by Hann.

285. *Mr. McLean.*] Do you remember that at the last meeting you were not able to give any particulars about some of the properties? The only particulars I can give are about Snubba and Mimosa. I have nothing with regard to Baden Park. Baden Park must have been owned by Swift when the partnership of Swift and Hann commenced. On the last occasion I produced two cheques of Mr. Swift in payment for Snubba station. One cheque was for £300, dated 1st August, 1877, and a promissory-note for £300, dated 1st August, and due twelve months afterwards. Both of these are Swift's. There is a cheque for the overdue rent of Snubba, £200, payable to Robert Downey. In reference to Snubba station, in going through the correspondence, I have made certain extracts. On 21st January, 1884, Hann writes to S. M. Swift: "I have no money or desire to buy Snubba. I do not want the use of Tooma Falls. You refused to let or stock Snubba, and only wanted to sell." It appears from that there must have been some intention to sell Snubba. I will give you all the reference I have to Mimosa. It appears that on 5th December, 1877, Swift sent Hann a cheque for £1,500. This, with the letter following, seems to have been an offer as a deposit on the property. On the 30th January, 1878, Swift sent a cheque to Wagga Wagga for £2,500 to pay for Mimosa. Then, on the 23rd January, 1878, there appeared in the *Sydney Morning Herald* a telegram from Wagga, as follows:—"The Mimosa run, embracing an area of 53,000 acres, and which is considered just now one of the best watered runs in the district, was sold to-day by the mortgagees for 19s. a head, with 8,800 sheep." On 31st January, 1878, the following paragraph appeared in the *Sydney Morning Herald*: "Elliott, Fosbery, & Co., sold Mimosa West station to Mr. S. M. Swift, with 8,900 sheep, at 19s. The sale was forced by the mortgagees, and most people say the run has been absolutely thrown away at the price."

286. *Chairman.*] In that transaction the name of Hann does not appear? No; the report in the *Herald* says it was sold to Swift.

287. *Mr. Thomas.*] And Swift signs the cheque? Yes. About the time this transaction took place, Hann was in partnership with Wilkinson. The firm was Wilkinson, Hann, Minchin, & Co. They were stock and station agents. I produce the delivery note, and the cheque for the purchase money of Mimosa station. I produce the extracts I have referred to from the *Sydney Morning Herald*. There are further extracts from the papers with regard to Mimosa. "7th February, 1878. Wilkinson, Mann, Minchin, & Co. sold 2,000 maiden ewes and 5,000 toothed to S. M. Swift." That shows Hann was still in partnership with Wilkinson, and the sheep were sold to Swift. I think that is all the information I can give about those two stations.

288. *Mr. McLean.*] Have you any information about Baden Park station? No; I found no record in the books at all.

289. Have you seen all the books and accounts relating to Swift and Hann? All that were produced to the Equity Court.

290. You can find no record with regard to Baden Park station? No.

291. Have you a copy of the balance-sheet of Swift and Hann put in with the affidavits lodged with the application for obtaining probate? I have the copy made up by the executors at the time probate was granted.

292. Do you see an item in the assets "Baden Park station, as per valuation, £50,715";—have you any evidence to show that that station was worth more than is set forth in that affidavit? No.

293. Then, for all you know, that may have been the true value of the station? Yes; as far as I know.

294. Then there is the item "Mimosa station, as per valuation submitted, £29,123";—have you any evidence to show that that valuation is wrong? No.

295. Have you any evidence as to the value of the Browley and Snubba properties? No.

296. Then, as far as you are concerned, you cannot question the values set down in this balance-sheet? Not with regard to those stations. I have a record of the promissory-notes.

297. Were those valuations in the balance-sheet of Swift and Hann, presented at the time the application for probate was made, taken from the books of Swift and Hann? I cannot say whether they were taken from them, or whether a separate valuation was made for probate.

298. Have you ever seen a valuation? No.

299. I asked you a question last time about the overdraft on the liability side of that account, Bank of New South Wales, £47,581 15s. 11d.;—do you know exactly what was the nature of the security given, or have you found out anything regarding that since? No; I mentioned last time that the bank could produce the mortgages, and that that would settle the matter.

300.

- W. T. Ball. 300. *Chairman.*] Do I understand that you have gone through all the books and papers that were filled in the Court? Yes.
- 26 Oct., 1897. 301. In going through those, did you see anything about a partnership existing between Mr. Swift and Mr. Hann? No; except in name. I have made out a statement here showing the moneys paid into the account of Swift and Hann.
302. As far as you could see by going through the books there is no account of Mr. Hann paying anything into the credit of the firm? No; not one penny.
303. *Mr. McLean.*] Did he ever lend any money to the firm? Yes; Mr. Hann lent a sum of £6,000 to the firm of Swift and Hann. It was drawn out about two years afterwards.
304. Did he receive interest on that money? On the 14th October, 1881, Hann lent £6,000 to the firm. On the 15th February, 1883, Hann drew out the £6,000. On 19th April, 1882, Hann received an account of interest, £180; and on the 16th February, 1883, £114 7s. 4d. on account of interest.
305. *Chairman.*] Does it not appear from the evidence you have given that, in looking through the books, at certain periods Mr. Swift used to pay Hann a certain sum of money? Yes.
306. How do you account for that if you have no record of a partnership? These amounts are obtained by going through Swift's banking account. I produce cheques drawn on Swift's private account. These are all cheques payable to Hann. There are also promissory-notes. These date from December, 1887, to February, 1883, and they amount to £4,979 17s. 9d.
307. *Mr. McLean.*] Do you say that these cheques represent payments made to Hann as his share of the profits on certain transactions? Yes; outside of the stations. Here is a settlement of one lot. The balance paid was £78 17s. 3d., which is included in the cheques I have mentioned.
308. *Chairman.*] As far as you have traced them, are all those cheques made payable from the private accounts of S. M. Swift? Yes.
309. In your opinion there must have been some speculations in buying and selling stock between Mr. Swift and Mr. Hann, which they shared jointly? Yes.
310. *Mr. McLean.*] Was there anything like a cash-book kept in connection with Swift and Hann? No; I never saw one.
311. Then the whole of your accounts were compiled from the bank pass-book? Yes; I got them from the bank pass-book, the butts and cheque-book, and the deposit slips.
312. Were any payments made out of that account, so far as your knowledge goes, that showed there had been any distribution of profits at any time? Not with regard to the stations.
313. Were there any cattle-dealing transactions represented by payments made from the Swift and Hann account? No; not that I remember.
314. Were there any advances made either to Swift or Hann from the Swift and Hann account? No; Swift had his own private account at the time this account was running.

THURSDAY, 28 OCTOBER, 1897.

Present:—

MR. HUGHES,	MR. THOMAS,
MR. MCFARLANE,	MR. MCLEAN,

MR. WOOD.

W. M. HUGHES, ESQ., IN THE CHAIR.

William Alexander Balcombe, Chief Clerk in Equity, recalled and further examined:—

- W. A. Balcombe. 315. *Chairman.*] Have you all the papers and documents in the Equity suits which have been heard in connection with this case? Yes.
- 28 Oct., 1897. 316. Are you in a position to say how many Equity suits were instituted? There was the suit of Swift and Hann. There was afterwards the suit of Swift and McDonald, which was dismissed, I think, for want of prosecution or some technicality. Another suit was stated of Swift and McDonald, which went to a hearing, and afterwards to the Full Court on appeal. I have brought the documents in connection with the two suits which went to a hearing.
317. *Mr. McLean.*] What was the suit Swift and Hann? It was a suit brought by Margaret Moffitt Swift, Agnes Winnie Swift, Mary Elena Swift, Elizabeth Jane Swift, Samuel Moffitt Swift, and Richard Dean Swift, infants, by John Brown, their next friend, against Phineas Hann, Charles Hawthorne Croaker, and Elizabeth Swift, defendants. In that suit they prayed that an account may be taken of the trust property and effects which have, or but for their wilful default and neglect, might have been received by the defendants, Phineas Hann and Charles Hawthorne Croaker, or either of them. That, if necessary, an account may be taken of all partnership dealings and transactions between Samuel Moffitt Swift, the said testator, and the said defendant, Phineas Hann, and that the said defendant, Phineas Hann, may be decreed to pay to the credit of the estate of the said testator what shall, on taking such accounts, be found to be due by him. That the defendants may be removed from being trustees under the said will, and that the trusts thereof may be carried into execution, and the real and personal estate of the said testator administered under the direction of this Honorable Court, that the defendants, Phineas Hann and Charles Hawthorne Croaker, pay the costs of this suit, and that the plaintiff may have such further relief, &c.
318. What was the date of that suit? It was filed on the 28th August, 1889.
319. How was the suit disposed of, and what was the decree? What I have read was the prayer of the statement of claim. The defendants, Hann and Croaker, put in a defence to it. It came on for a hearing to the 26th March, 1890. The following is from the decree: This Court doth order and decree that the following inquiries and accounts be made, that is to say:—(1.) An account of the personal estate not specifically bequeathed of Samuel Moffitt Swift, the testator in the pleadings named come to the hands of the defendants, Phineas Hann and Charles Hawthorne Croaker, or either of them, or to the hands of any other person or persons by the order or for the use of the said defendants. (2.) An account of the testator's debts. (3.) An account of the testator's funeral expenses. (4.) An account of the testator's legacies and annuities (if any) given by the testator's will. (5.) An inquiry what parts (if any) of the testator's said personal estate are outstanding or undisposed of, and it is ordered that the testator's personal estate not specifically bequeathed be applied in payment of his debts and personal expenses in a due course of administration, and then in payment of the legacies and annuities (if any) given by his will. And it is ordered that the following further inquiries and accounts may be made and taken, that

that is to say:—(6.) An inquiry what real estate the testator was seized of or entitled to at the time of his death. (7.) An account of the rents and profits of the testator's real estate received by the defendants, Phineas Hann and Charles Hawthorne Croaker, or either of them, or by any other person or persons by the order or for the use of the said defendants. (8.) An inquiry of what incumbrances (if any) affect the testator's real estate, or any and what parts thereof. (9.) An account of all dealings and transactions between the said Samuel Moffitt Swift, the testator, and the defendant, Phineas Hann, as copartners; and it is further ordered that on the taking of the aforesaid accounts, the accounts mentioned in the defendant's statement of defence as filed in the Ecclesiastical Court, and the accounts as investigated by Mr. R. J. Mackenzie and by Messrs. Peel, Borrodaille, & Co., as in the said statement of defence mentioned, be received as *prima facie* correct, except as to items not vouched by the said Mr. R. J. Mackenzie and Messrs. Peel, Borrodaille, & Co., and in the Ecclesiastical Court; and that the plaintiffs be at liberty to surcharge and falsify any of the items and charges so vouched in any and all of the accounts as they shall be advised. On that decree the Master proceeded on the accounts, and certified the result to the Court. This is from his certificate:—That the defendants, Phineas Hann and Charles Hawthorne Croaker, two of the executors of Samuel Moffitt Swift, the testator, have received personal estate not specifically bequeathed, or there has come to their hands personal estate of the testator to the amount of £34,175 4s. 9d.; that they have paid or are entitled to be allowed on account thereof sums to the amount of £41,139 10s. 9d., leaving a balance due to them of £6,964 6s. on that account. That is the personal estate. The debts of the testator (with the exception of the two items referred to in the preceding paragraph) have been allowed as brought in by the said defendants, Hann and Croaker. They amount to £24,991 9s. The whole of the debts have been paid, with the exception of the item "amount owing by testator to Messrs. Pitt, Son, & Badgery, stock agents, Sydney, on an account stated, £350." The funeral expenses amount to £123 15s. 9d., which is allowed. The legacies and annuities given by the testator's will amount to £750, and, with interest thereon, remain due to the persons therein named. The outstanding personal estate of the testator consists of £4,436 16s. 1d., now lying to the credit of John McDonald & Co., at the head office of the Union Bank of Australia (Limited), Sydney. Now, this amount represents the testator's interest in the station properties, known as Mungie Bundie, Gravesend, Boolooroo, resulting from the realisation of the said properties, and consists of the particulars set forth in the balance-sheet prepared by Peel, Borrodaille, & Co., and shown in the first schedule thereto. He certifies that on the appointment to proceed with the accounts before him, on 10th August, 1892, all the parties were represented, and consented to the said sum being paid into the Court to the credit of this cause; and he approved of the authority of the three executors of the said deceased being given to John McDonald to pay the sum into Court to the credit of the cause. Then he certifies as to the real estate of the testator, that is contained in a schedule—"Hillcrest," the private residence of testator, Petersham, near Sydney. This, at the date of the testator's death, was under mortgage to the London, Liverpool, and Globe Insurance Company, to secure £2,400, and interest at 6 per cent. It was sold by order of the mortgagees, and realised £3,000. Thus producing a surplus which was, however, absorbed by the Australian Mortgage Land and Finance Company under an attachment. This property was leased for six months by the defendant, Elizabeth Swift, who received the rent and applied it to the maintenance of the testator's family. The amount of the rent was not known to the defendants, Hann and Croaker. Then there were 23 acres of land, part of the King's Grove Estate, situated at Cook's River, near Sydney, and held by the testator at the date of his death, and since sold by the defendants to John McDonald for £900. Mungie Bundie, Boolooroo, and Gravesend.—Testator was possessed of an equal half interest with John McDonald in the abovenamed station properties situated in the Gwydir district, near Moree, consisting of freehold and leased land. These properties have been mortgaged since testator's death by the surviving partner, John McDonald. These properties had been under mortgage to the bankers of the firm John McDonald & Co., for a number of years, and part of them, Mungie Bundie and Boolooroo, were sold by order of the mortgagees on or about 8th August, 1888, and realised the sum of £76,036 15s. 1d., the remaining property, Gravesend, was sold on or about 22nd May, 1889, and realised £11,020 9s. 5d.. Both these purchase amounts were made payable by bills extending over periods of four years and three years respectively. Those bills were retired under rebate as per sale contract before maturity and on the statement of accounts between the testator and his partner, John McDonald, as prepared by Peel, Borrodaille, & Co., the accountants of the firm: It is shown that the balance of £4,436 16s. 1d. remains in the hands of the said John McDonald to the credit of the estate of the testator. Baden Park, Mimosa West, Browley, and Snubba.—Testator was possessed of an equal half share and interest with the defendant, Phineas Hann, in the above pastoral properties, which comprised freehold and leasehold lands. These properties had been mortgaged by the testator and the defendant Hann. Testator was also possessed of one-third share or interest with Frank Badgery and W. Piper in the Tooma Falls run. It was eventually sold by the Sheriff under a writ of *fi. fa.* for a nominal sum. Since the death of the testator the properties known as Browley and Snubba have been sold by the defendants. Browley was sold on the 1st May, 1884, and Snubba on the 12th January, 1885. Shortly after the death of the testator the Bank of New South Wales, as mortgagees, went into possession of the properties known as Baden Park and Mimosa West, and are still in possession. The rents and profits were allowed as in the accounts. He certifies that the accounts of the partnership have been correctly kept as between Swift and Phineas Hann. They were properly vouched before the Master, and he allowed them. He certifies that these documents have been investigated by Mr. R. J. Mackenzie, professional accountant, from the beginning of the partnership to the testator's death, and by Messrs. Peel, Borrodaille, & Co., professional accountants, from the date of the testator's death, on the 18th February, 1884, up to the 18th February, 1887. Both accountants, Mackenzie and Peel, appeared before the Master and disposed on oath as to the mode of their investigation and its correctness, and they agreed in certifying that the partnership accounts for that period were correct. He certifies that the accounts of his dealings with the assets of the partnership have been carried by the defendant, Phineas Hann, from the 18th February, 1887, to September, 1888, when the properties were taken possession of by the Bank of New South Wales under their mortgage. The plaintiffs have not succeeded in establishing any surcharge or falsification in respect of the accounts for any of the periods mentioned. Afterwards there were applications to the Court to vary this certificate. Eventually, on the 20th August, 1897, the Court made a decree. (Decree read.)

320. Are Hann and Croaker still the executors of this estate? Yes, they have never been removed.

TUESDAY,

W. A.
Balcombe.

28 Oct., 1897.

TUESDAY, 30 NOVEMBER, 1897.

Present:—

MR. HUGHES,		MR. THOMAS,
MR. MCGOWEN,		MR. DICK,
MR. MCLEAN.		

W. M. HUGHES, ESQ., IN THE CHAIR.

John McDonald sworn and examined:—

- J. McDonald.
30 Nov., 1897.
321. *Chairman.*] You have been called to give evidence in connection with an allegation by Mrs. Swift, as to an evasion of the probate duty; do you know anything of it? No; I know nothing at all of the probate duty.
322. Did you know Mr. Swift personally? Yes, very well.
323. Were you engaged in any business transactions with him? Yes.
324. Of what nature were they;—were you a partner of his? Yes.
325. Was there ever a deed of partnership drawn up between you? Yes.
326. Is it, or a copy of it, in existence? I have no doubt there is; Mrs. Swift would have them.
327. Have you any objection to tell the Committee what chiefly were the transactions between yourself and Mr. Swift;—were they stock dealings? Principally stock dealings—stock and station matters.
328. For what length of time were you a partner of or engaged in transactions with Mr. Swift? I should think for about twenty years.
329. Then you would have rather an intimate knowledge of Mr. Swift's business transactions in general? Yes.
330. Were you, during the whole of the time you have mentioned, a partner of Mr. Smith? I think a deed of partnership was drawn out at a date subsequent to that at which we first started to deal.
331. Were you ever, during any part of this time, an employee of Mr. Swift? No, never.
332. You were all the time either a partner or were in business relations with him as an agent? Yes.
333. It is alleged by Mrs. Swift that a large portion of the estate of which her husband was seized when he died, and which should have come to her and her children, has not been administered, and that she has received nothing;—do you know anything at all of the matter? I know nothing about it.
334. Are you acquainted with her co-trustees, Mr. Hann and Mr. Croaker? Yes.
335. But you know nothing of the matter of your own personal knowledge? I know nothing of their business relations; I only know that they are trustees.
336. You are aware, of course, that Mrs. Swift has been engaged in litigation in the matter? Yes, I am aware of that.
337. Have you been before the Court in that connection? Yes; several times.
338. What was her object, or purpose, in calling you before the Court;—what did she hope to do? She challenged the accounts.
339. The accounts of the partnership between Swift and McDonald? Yes.
340. She asked you, I believe, to produce the books? Yes; they were produced.
341. You produced them? Yes.
342. I see that according to her statements a number of books were produced in Court;—were they the whole of the books in your possession in connection with the estate? Yes.
343. You have never had, in your possession, any other books relating to your partnership except those covered by your affidavit? I have only the books connected with the partnership between Mr. Swift and myself.
344. You have no other books? None relating to the accounts except those which I handed over.
345. I see from the Equity Court proceedings that you handed in some books and papers held by Peele, Borradaile & Co, in connection with Mungie Bundie;—do you remember that? I remember that that firm of accountants were appointed by Mrs. Swift, as they had had some business relations with her late husband. They audited the accounts for and on behalf of Mrs. Swift and her co-trustees. The books necessary for that purpose were handed to them by me.
346. I see that the receipt of the Equity Clerk for these books is dated the 5th September, 1890;—we may presume, therefore, that they were handed in? Yes.
347. There was one ledger containing entries from 1884–85 until 1890 in connection with the estate, and one cheque-book containing also a journal of entries from the years 1884–85 to 1890; there was also one station-ledge, one transaction-book, and four pass-books—three of the Union Bank of Sydney, and one of the Bank of New South Wales, Moree? Yes.
348. I see that your affidavit, after alluding to the books I have just enumerated in the schedule marked "A," says:—"I further say that according to the best of my knowledge, remembrance, and information, and belief I have not in my possession, custody, or power, or in the possession, custody or power of my solicitors or agents, or in the possession, custody, or power of any other person or persons on my behalf, any deed, account-book of accounts, voucher, receipt, letter, memorandum, paper or writing, or any copy of, or extract from any such document, or any other document whatsoever relating to the matters in question." So that according to your affidavit these were the only books or papers you had in your possession, or knew anything at all about? Yes, they were all I knew of.
349. It appears that on the 3rd April, 1896, Mr. Grainger, a solicitor at Moree, went to Mungie Bundie to subpoena a Mr. Jones and a Mr. Harkness in connection with this matter,—do you know those persons? Yes.
350. Who is Mr. Harkness? He was an employee of mine.
351. It appears that while subpoenaing Mr. Harkness, Mr. Grainger took a list of the following books in connection with this matter:—A wool-book, from 1875 to 1883, which was not included in your affidavit, and which it is alleged has some connection with the Swift-McDonald accounts;—do you know anything at all about that book? No.
352. In addition to that it is alleged that he found five day-books, dating from the 18th September, 1888, to 31st March, 1894, and that part of some of these books had something to do with the Swift-McDonald accounts;—do you know anything of them? No; and if I may be permitted to say so, it seems rather an absurd thing that a man going out to serve a summons should take particulars of these books.

353. It is alleged also that there was one store-book, dating from 26th August, 1876, to August, 1878; a J. McDonald. day-book dating from the 1st January, 1884, to the 18th February, 1887; a shearing-ledger dating from 1888 to 1893; a general ledger dating from 1879 to to 1880; "F. S. Falkiner," dating from 1889 to 1890; a ration-book dating from 1880 to 1888; a ledger for 1876, '77, and '78; part, 1888, '89, and '90; day-book (Gravesend), dating from 1883 to 1889; Letts' Diary, 1874; a bills receivable-book, day-book, March 1st, 1876, to December, 1878; land-book, showing lands purchased by Mungie Bundie, at Government auction sales, from 1875 to 1882; ditto, land improved; and a journal dating from 1879 to 1883. There were also, it is alleged, numerous stock returns, and papers connected with the station. It is further alleged that these books, or some of them, are wanted in connection with this matter, and that according to your affidavit you have not them in your possession. I should like to know from you—if you want any particulars as to the books you can have them—whether any of these books, or all of them having any relation to the Swift-McDonald accounts, may have been in your possession at that time? There were no books whatever relating to those accounts beyond those which I handed over. I handed over all the books bearing upon those accounts to the accountants. 30 Nov., 1897.
354. Were you connected with Mr. Swift in 1875? Yes.
355. At that particular time did you carry on business wholly or partly as a partner of Mr. Swift, or partly on your own account? There were three partners at one time.
356. Who was the other partner? Mr. Spiller.
357. The whole of the transactions were carried on for the joint benefit of the three partners? Yes.
358. Were you then carrying on business on your own account? No.
359. Supposing there is a wool-book, dating 1875, having to do with transactions of Mungie Bundie in and during that year, to what transactions can that book allude other than to those with which you, Mr. Swift, and Mr. Spiller were concerned? I have no idea without seeing the book.
360. You said just now the book had no connection with any matters between yourself and Mr. Swift. You were quite positive about that; Mr. Grainger's letter, under date 3rd April, 1896, is addressed to Messrs. Russell and Russell, solicitors, 359, George-street, Sydney. He gives a list of books which I have already read to you, and in the list is that wool-book dated 1875;—have you any recollection of a ledger covering the years 1876, 1877, and 1878, other than the book you put in in reply to the subpoena of the Equity Court, and covered by your affidavit? No; I do not remember any.
361. The affidavit mentions a ledger covering a period of 1884, 1885 to 1890, but there is no further mention of any ledger? There may be some explanation of this kind, although I do not know whether it would apply. When we bought Spiller out we had the accounts audited up to that date.
362. *Mr. McLean.*] About what year was that? I do not know. It was a long while ago.
363. Was it previous to 1884? Yes.
364. *Chairman.*] It was somewhere between 1875 and 1884? Yes. So that with the auditing of the accounts after Mr. Swift's death, one would necessarily begin from the point up to which we had settled. It is possible that there may have been old books not bearing at all upon the accounts as between Mr. Swift and myself. There will be accounts, for instance, applying to the period of the partnership between Mr. Swift, Mr. Spiller, and myself. All the books bearing upon the accounts between Mr. Swift and myself were sent to the auditors.
365. Cannot you fix a date with approximate accuracy when you and Swift went into partnership? There was the partnership between Mr. Swift, Mr. Spiller, and myself.
366. What was the date of your partnership with Mr. Swift only? There was none until Mr. Spiller joined us.
367. During the whole time you, Mr. Swift, and Mr. Spiller were in partnership you kept a joint account? Yes.
368. With regard to this general ledger dating from 1879 to 1880, does it cover any portion of the time in which Mr. Spiller, Mr. Swift, and yourself were in partnership? I really could not say unless I saw the dates.
369. Will you discover the date from which you and Mr. Swift alone were in partnership? It would be from the date when Mr. Spiller went out.
370. You could furnish us with the date when Mr. Spiller went out? I think I could.
371. At this moment you cannot say whether the general ledger, covering the period from 1879 to 1880, embraced operations during a period when you and Mr. Swift only were in partnership? I could not say. I can only repeat what I said before—that all the books relating to the partnership between Mr. Swift and myself were handed in to the auditors, and the accounts were made up from them.
372. The books enumerated cover a period from 1875 to 1893—a period of eighteen years; that is a good long time; but you are not prepared to say to-day during what portion of that period you were in partnership with Mr. Swift alone? We were certainly in partnership during portion of that period.
373. Any book covering transactions in connection with Mungie Bundie station can refer only to transactions between yourself, Mr. Swift; and Mr. Spiller, or between yourself and Mr. Swift, during that period? That is probably the case; but I could not say definitely without seeing the books.
374. Did you say that Mr. Hann had in his possession any of the books for which you were asked? I do not think he had, but I could not say definitely, at all events all the books bearing upon the accounts were handed over to the accountants. Mr. Hann and Mrs. Swift were constantly with the accountants. Both Mr. Hann and Mrs. Swift had access to the books, but the accountants could tell you more of that matter than I could.
375. I notice that under date of March 18th, 1887, in a note from yourself to Messrs. Peele, Borradaile, and Co., you say that you forwarded all the books or vouchers that they are likely to require;—are we to infer from that that you did not send all? I have just explained to you that Mr. Spiller was bought out; consequently, any transactions in the books previous to his being bought out would not be likely to be required for the purpose of auditing the accounts. It was only after Mr. Spiller being bought out—between that date and the date of Mr. Swift's death—that any of the accounts would be of use. We necessarily had to go into the accounts when we bought Mr. Spiller out to arrive at the value of the estate.
376. You do not think it possible that of the transactions in which Mr. Spiller was engaged can bear upon the matter? I feel sure they cannot.
377. You had a settling-up when you bought Mr. Spiller out? Yes.

Mrs. Elizabeth Swift recalled and further examined :—

Mrs. E. Swift. 378. *Chairman.*] We have here an affidavit by Mr. McDonald from which it appears that he handed in to your accountants a number of books and papers in connection with the estate? Yes; that was on a discovery order obtained by my solicitor before my case was heard in the Court.

30 Nov., 1897.

379. We have also a letter written by Mr. Grainger, a solicitor, of Morce, to Messrs. Russell and Russell, solicitors, of Sydney, in which he says that having to go to Mungie Bundie station to subpoena a man named Harkness, he made a list of books of which he furnished a list: we have asked Mr. McDonald about those books, and although he was unable to give us accurate information, the matters having transpired so long ago, he seemed to think that they were in connection with the partnership of Mr. Swift with Mr. Spiller and himself;—did you know anything of that partnership? Yes; at the end of 1873 my husband sent for Mr. McDonald who was then droving for him.

380. You mean to say positively that in 1873 Mr. McDonald was droving for Mr. Swift? I do; in that year and in 1872. I can produce the accounts at that time. Here are a few of the leaves of the accounts kept by Mr. McDonald when he was droving.

381. *Mr. McGowen.*] Do you swear that Mr. McDonald was in your husband's employ as a drover in 1872, 1873, and 1874? No; at the end of 1873 he went out and bought Mungie Bundie.

382. May he not have been droving and yet have been a partner of your husband? No; he was not a partner at that time. Mr. Swift opened an account at the branch of the Bank of New South Wales at Tumut, for Mr. McDonald's purposes as a drover, as he did also in the case of other drovers. He paid money out of his private account into that account. I have the pass-books showing the accounts, and I could produce to-morrow also the affidavit of the bank manager.

383. Who is Mr. Spiller? Mr. McDonald's brother-in-law. In the early days Mr. Spiller was a general hand on Tubbo station.

384. Was he working for your husband? No. Tubbo station belonged to Mr. John Peters, a wealthy man in England. Mr. McDonald's sister was a housemaid there and she married Mr. Spiller. The manager got killed and after some time Mr. Spiller was made manager; then Mrs. Spiller sent for her brother and he came out. He was for some years on Tubbo station carrying and doing all kinds of rough work.

385. How did Mr. Spiller come to leave the partnership? Mr. McDonald ran away from his sister and went on the roads droving; then he turned up at Ellerslie station near Adelong, close to where Mr. Swift was living. The station belonged to Messrs. Petersen and Sargood, of Melbourne. They sent home for their nephew to manage it, and when he came out Mr. McDonald was sent away. He then came on to Mr. Swift's station as a drover. He went out and inspected cattle and sheep and bought them. Mr. Swift paid the money into the account and McDonald drew upon it and paid the accounts.

386. Had Mr. Swift any other drovers in his employ whom he treated in the same way? Yes.

387. Can you name any? Yes, a number. There were Thomas Miller, B. P. Radford, J. M. Flanagan, and S. M. Byrnes. I could give you a whole list.

388. Did Mr. Swift pay into an account at the bank money upon which these men could operate in the same way as he did in the case of Mr. McDonald? Yes.

389. *Chairman.*] Can you prove it? Yes; from the pass-books.

390. Could you produce them to-morrow? Yes; I have every one of them.

391. You are sure Mr. Swift paid money into the account of each of these men in exactly the same way as he paid money into Mr. McDonald's account? Yes. They were in charge of the stock and they had generally two or three men under them. When they sold the stock they sometimes received money which was always paid into Mr. Swift's private account, and never into their own accounts.

392. The transactions as far as you are aware, between Mr. Swift and Mr. McDonald, were identical with the transactions with the other men you have named? Yes.

393. *Mr. Thomas.*] You have never seen any deed of partnership drawn up between them? I have seen what purported to be a copy of a deed of partnership, but I think that when you see it you will not be able to say what it is. Mr. McDonald refuses and has always refused to produce the original.

394. He said in his evidence this afternoon that you had it? Yes; I may mention that during the fourteen years my husband was in business, commencing in 1870-71 he paid into his own private account and his other accounts no less a sum than £1,374,548 2s. 8d. Those figures are compiled from the books. I mention that to show that he did not want any money from Mr. McDonald—to show you that he really was possessed of money.

395. *Chairman.*] What we want to arrive at is the nature of the books to which Mr. Grainger refers in his letters. For instance, there is the wool-book covering transactions from 1875 to 1883;—was your husband a partner with Mr. McDonald for any portion of the period between 1875 and 1883? He was. Perhaps it was thought at another time that he was a partner, because, it being difficult to communicate between Tumut and Mungie Bundie under two or three months in those days, when there was no railway and nothing but the boat and the coach which often broke down, Mr. Swift often gave him a power of attorney. Mr. Swift directed him what to do.

396. Can you prove that Mr. Swift gave him a power of attorney? Yes; if you will give me time, but I do not think I could do so by to-morrow.

397. You hand in a memorandum of agreement of a partnership between Mr. McDonald and Mr. Swift under date of 8th February, 1881? Yes; it is in Mr. Hann's handwriting. [*Appendix B1.*]

398. In whose handwriting was the original? According to what Mr. McDonald says in one of his letters it was in his own handwriting.

399. You hand in a copy of a letter which Mr. McDonald wrote to Mr. Hann, in which he states that the original memorandum was drawn up by himself? Yes;—[*Appendix B2.*]—he says "I will hunt up the partnership memo., for such it was, drawn up by myself; I think it is either with A. and A. or bank; will find it and send you copy."

John McDonald recalled and further examined :—

J. McDonald. 400. *Chairman.*] The Committee would like you to bring, to-morrow, the date of the partnership between yourself, Mr. Spiller, and Mr. Swift? I could get the date when Mr. Spiller went out; but as to any other dates, I am doubtful.

30 Nov., 1897.

401. You said early in your evidence that there was a deed of partnership between yourself and Mr. Swift? Yes.

402.

402. Will you be able to obtain a copy of it? Mrs. Swift has it; she will give you all the papers and dates. J. McDonald.
30 Nov., 1897.
403. Is the original document lodged with the Bank? I do not know where it is.
404. I suppose it was drawn up by solicitors? Yes.
405. *Mr. McGowen.*] You have no copy? No.
406. You have not the original? No; when the equity suit was on, I gave up the whole of the books and papers I had bearing upon the partnership.
407. *Mr. Thomas.*] You say a firm of solicitors drew up the deed? Yes; Messrs. Pigott and Trickett.
408. *Mr. McGowen.*] You had at one time a copy of the deed? Yes; some years ago.
409. Did you not send a copy to Mr. Hann? I think it very likely; I do not know where it is now. I handed in the whole of the papers in the course of the Equity Court proceedings.
410. Was it the original draft that you sent to Mr. Hann? I could not say whether or not it was the original copy. I do not know that I did send it to him; but it is very likely that I did. I have no recollection of having sent it. The date of the deed would be when Spiller was bought out.
411. Have you any idea of the terms of the agreement between yourself and Mr. Swift in reference to Mr. Spiller being bought out? I know that we bought him out between us.
412. Have you any idea what you agreed to pay him? I think it was £16,000.
413. Mrs. Swift has handed us a number of cheques; here, for instance, is a cheque upon the Bank of New South Wales, drawn 10th February, 1881, in favour of John McDonald & Co., for £1,950, signed by Mr. Swift;—have you any recollection of the receipt of that large sum of money? It would be impossible for a man to carry all these things in his memory; I dare say I could give you a possible explanation of a number of these things: Mr. Swift was a very large dealer, and he used often to be in monetary trouble, and on those occasions I used to assist him. Probably he would get a p.n. from me, and he might redeem it before the due date. Probably many of these things would be explained by transactions of that sort.
414. Were you in the habit of doing that sort of thing for Mr. Swift;—did you occasionally take his liabilities in that way? Yes.
415. He was a large speculator, was he not? Yes.
416. None of these cheques had anything to do with the purchase of stock or of Mungie Bundie station? No; the dates would show that.
417. Was the deed of partnership between yourself and Mr. Swift drawn in 1881? No, I think it must have been drawn in 1870.
418. Are you sure of that? As sure as a man can be of anything which has happened so long back.
419. Have you anything else which will help to fix the date in your mind? I believe the place was bought in 1874: consequently, the deed must have been drawn some time thereabouts.
420. I suppose you would not like to swear that it was not in 1881 that the deed of partnership was drawn. I would not.
421. Suppose the deed was drawn on the 8th February, 1881, two days from the date of the cheque I have shown you, would not the inference be that the £1,950 had some connection with it? It might have, taking that view of it.
422. But to the best of your knowledge and belief the date of the agreement was removed by some years from the date of the cheque? Yes.
423. *Mr. McGowen.*] Before entering into your partnership with Mr. Swift, you were in his employ as a drover, were you not? No; never.
424. Were you not droving for him in 1872 and 1873? No; for myself, and him occasionally.
425. Were there any other men—for instance, Miller, Radford, Flanagan, and Byrnes, working as drovers with Mr. Swift? That was years afterwards.
426. You say that in 1872 and 1873 you were not in Mr. Swift's employ as drover? I was never in my life in his employ.
427. Were you working in conjunction with him? Yes.
428. In what way? I used to buy fat stock and take them to Melbourne, and at other times store cattle, and take them to other places.
429. What interest had Mr. Swift in those transactions? He had one-half.
430. Was there a partnership? Yes; but there was no deed of partnership before Mr. Spiller joined us.
431. Mr. Spiller was not in partnership then in the droving business? No.
432. But you say that in 1873 you were buying cattle for yourself and Mr. Swift? Yes.
433. Did you also find men to buy the cattle? Yes.
434. And the transactions with Mr. Spiller came on much later? Yes.
435. Did you give any evidence in this case to the effect that Mr. Spiller supplied you with money with which to purchase Mungie Bundie station? I do not think so; although I believe Mr. Spiller found part of the money. I could not, however, say for certain. I know that there was some difference in the money transaction which was adjusted later on.
436. Did you enter any defence when Mrs. Swift was attempting to fight you as to the existence of any partnership in Mungie Bundie station—that your share of the purchase money of Mungie Bundie was supplied to you by your brother-in-law, Mr. Spiller? No; some bungling was made by my solicitor in that matter. We rectified that afterwards.
437. Did Mr. Spiller, as a matter of fact, supply you with the money? No.
438. The previous transactions between yourself and Mr. Swift in the purchase of cattle and the delivering of them to market for sale were transactions in a *bona fide* partnership? Yes.

WEDNESDAY, 1 DECEMBER, 1897.

Present:—

Mr. HUGHES,		Mr. McFARLANE,
Mr. VARNEY PARKES,		Mr. THOMAS.

W. M. HUGHES, ESQ., IN THE CHAIR.

John McDonald recalled and further examined:—

- J. McDonald. 439. *Chairman.*] Have you tried to obtain the information which I asked you to get? Yes. I find that the information is most likely to be found in the Equity Court. I thought I could get it through the bankers. The nearest I could get was that it was 1880 or 1881 when Mr. Spiller was bought out.
- 1 Dec., 1897. 440. Can you fix a date for the earliest partnership transaction between yourself, Swift, and any other person? I should say it was about 1870.
441. Are you fixing the date by any transaction? No; from recollection.
442. Have you given any thought to those other books;—is there any other explanation which you can offer, except that which you gave yesterday, as to what Mr. Grainger speaks about? No other explanation.
443. You believe they were books connected with the joint partnership of McDonald, Swift, and Spiller? I think that is probably what they would be.
444. Was that account wound up in 1880 or 1881? When Spiller was bought out.
445. So that whatever they contained they cannot bear upon the Swift-McDonald account? No.
446. Have you any recollection as to who audited the accounts when you bought out Spiller? Spiller, Swift, and I had a meeting. We mutually arrived at the assets and liabilities.
447. Are you quite sure there was never any relationship between you and Mr. Swift as employer and employee? Quite sure.
448. Are you disposed to tell the Committee who found the capital of the stock transactions between you and Swift, before Spiller joined you? Swift and I had each our joint capital; in fact, any capital there was in it originally, I had it. Swift was a civil servant, and had little or no capital.
449. At the time you and Swift had the original transactions was Swift not a man of means? He was quite the reverse.
450. Was he a very smart business man? Yes, he was a good business man.
451. When you, Spiller, and Swift were together did Spiller bring any capital into the business? Yes, he brought his one-third.
452. You put in an amount of capital, and drew out a separate proportionate return? Yes.
453. Do you still own Mungie Bundie station? Yes.
454. Did you come to an arrangement with the trustees with reference to that property? No; the bank took possession and sold it.
455. Did you buy it? No; I bought it subsequently from the party who bought it at the sale.
456. Was the property sold for an amount equivalent to what it was valued for probate purposes? I do not know what it was valued at.
457. For what amount did the bank sell the property? £75,000, as near as I can remember.
458. Was it security for an overdraft or mortgage? It was necessarily an overdraft, or they could not take possession.
459. What was the amount of the overdraft? That I cannot remember; but that will be seen in the pass-book in the Equity Court.
460. Do you say that you never, during any portion of your time, were an employee of Swift's, and that all the transactions in which you and Swift, and you and Spiller and Swift, were engaged, were transactions in the nature of an ordinary partnership? Yes.
461. That although a deed of partnership was not drawn up between you and Swift in your early transactions, yet they were of that nature? Yes.
462. The nature of the partnership was that the capital was supplied either by both parties equally, or originally by yourself alone? Yes.
463. And that at the first stage Swift had no capital at all? Yes.
464. What was he? He was a Crown lands bailiff.
465. In reference to an item in 1872 and 1873, it is alleged that you were droving for Mr. Swift, and in support of that it has been sworn that there was an account opened by Mr. Swift with the Bank of New South Wales at Tumut;—do you know anything at all about that? I could not tell you; I know I was not droving for him. Who makes that allegation?
466. Mrs. Swift? What support has she got for the allegation?
467. The only support we have seen is an extract from a ledger or day-book in which there was an account opened in the Bank of New South Wales, at Tumut, by Mr. Swift, which was operated upon by you? Very likely; if I remember rightly, we each had an account at Tumut.
468. *Mr. McFarlane.*] Had Mrs. Swift any intimate knowledge of Mr. Swift's business? Up to the time of his death, to the best of my knowledge she did not know anything about his business. To the best of my belief, when I was with him she knew nothing at all about his business.
469. Would she have any knowledge of the partnership or banking account? No; only what she may have picked up since she got crazy about this matter. She is a woman of indomitable courage; when she gets an idea into her head she goes right at it.
470. Would she have a knowledge of the value of station property prior to Mr. Swift's death? She could not have any knowledge of it; she never lived on a station.
471. Was she in the habit of visiting the station properties? No.
472. She made certain statements that there was no partnership further than joint business transaction concerning certain speculations, and that there was no fixed partnership? Up to the time Spiller joined us.
473. Was Spiller a partner? He was a partner, as Swift and I. When he joined us we had a proper deed of partnership drawn up, because he would not join us in the loose way of business we had. We trusted each other with anything. When Spiller joined us we went on a business footing.
474. Has that deed of partnership been produced? It is in the Equity Court.
475. Was the Mungie Bundie property sold by auction? Yes.

476. Did it realise the amount for which the firm were liable to the bank? Yes; there was a credit balance. J. McDonald.
477. What became of that balance? It was divided in proportion to the right of the estate to it. The balance was handed over to the trustees of Swift's estate. ^{1 Dec., 1897.}
478. *Mr. Parkes.*] Have you any idea whether the property of Swift's estate, when it was wound up, realised the amount on which probate was paid? To the best of my recollection, probate was paid on a greater value than the estate was worth.
479. That is, it was paid in anticipation of the estate being of a certain value, which it did not actually realise? Yes. Moreover, the trustees had probably an object in making it as valuable as possible.
480. Might it not be that for financial purposes they made it of greater value? Yes; that was the impression given to me at the time.
481. Was Mrs. Swift paid £2,000? I do not know.
482. Did you know anything of the trustees' business? No.
483. At the time you were under the impression that they paid more as probate duty than the estate would realise, and that they did that for financial purposes? Yes; that was my opinion.
484. *Chairman.*] This is a copy of your account with the Bank of New South Wales at Tumut;—how do you account for the fact that cash is paid in uniformly by Swift and not by yourself into this account; there are various amounts all paid in by Swift;—what is your explanation of that? We each had an account, and I would want to see a copy of the other account.
485. Here is your private account covering £926 8s. 6d.;—£600 in this private account of yours corresponds with this deposit slip of Mr. Swift's for the purchase of Mungie Bundie? That is the kind of thing I should like to look into. I cannot remember what occurred twenty years ago.
486. Here is your partnership account presumably, in which all the cash is paid in by Swift? This is one and the same account; there is no private account in either of these. They are both private, as far as my business with the bank is concerned, yet they are both partnership accounts.
487. How do you account for it that in your private account the cash is paid in uniformly by Swift;—where is the contra account? Show me Swift's account with the same bank, and you will probably find me paying into his credit.
488. Is that your explanation? That is the way we used to work in those days.
489. *Mr. McFarlane.*] Do you remember operating on this account at the Tumut branch of the Bank of New South Wales;—I see it is in your name, John McDonald? Yes.
490. In making these deposits, were they made by you in Swift's name? No; it was put in my own name, and he kept his own account in his name.
491. Am I to understand there were two banking accounts in this bank at Tumut? Yes; one of his, and one of mine.
492. Did you operate on Mr. Swift's banking account? No; on my own.
493. Would Mr. Swift operate on his own account? Yes.
494. You did not operate on each other's accounts? No; every now and again we used to have a straightening up. I used to pay to him, or he used to pay to me, as we finished each transaction or speculation.
495. In the event of a sale of property or stock, would the money be first paid into one account in the bank? Very likely; it might be paid into my account, and I would give him a cheque, or he would give me a cheque.
496. Would you adjust it before paying it in? No. We did not keep any books; we used to trust each other. I used to give him money if he wanted it, or he might give it to me. I bought a station from a man named Ryrie. At that time Swift was a stock and station agent. He, of course, sold the place for Ryrie, and I bought it. That accounts for Ryrie's name appearing in these banking accounts. I gave Ryrie so much in cash and the rest in bills. The promissory-note appearing in the account calls that back to my recollection.
497. *Mr. Parkes.*] Did you travel about very much? Yes, a good deal.
498. Did Mr. Swift travel about? Yes.
499. Was there any arrangement between you as to one doing the clerical work and the other doing the actual travelling? No.
500. There would not be one partner who would pay in constantly? No.
501. *Chairman.*] Here are some leaves from a book;—are they in your handwriting? Yes.
502. Was that a petty cash-book, or what was it? I could not tell you.
503. Anyhow, it is a book you kept, and it is dated 1873? Yes.
504. Were you in partnership with Swift at that time? I can hardly say whether I was or not. It seems to be very mixed up memoranda. There are men mentioned here who I had in my employ, and it refers to transactions at this place of Ryrie's.
505. You must have been in partnership with Swift at that time? Not in this station. He had nothing to do with this place. It was a place at Little River, near Yass—Cooradigby.
506. Some of these dates coincide with the banking account during the time you were operating on the account at Tumut? These are so mixed up that I cannot explain them, and I am sure nobody else can.
507. Here is a cash entry for a dog? Possibly, I bought a cattle-dog; that is twenty odd years ago.
508. According to these entries somebody was droving? It was a cattle station, and we had dogs to get the cattle.
509. Did you ever travel with mobs of your own cattle? Yes.
510. During 1873 there was an account opened;—were the operations on that account entirely out of the hands of Mr. Swift? Yes; he had nothing to do with that station except that he sold it. He used to sell stock off it for me. It was after I sold that place to which those figures relate that I joined Swift.
511. *Mr. Parkes.*] There is an item of £3,000 odd in that account;—can you throw some light on that? You mean the item £3,417?
512. Was that a deposit by Swift and yourself conjointly? Yes; that was when we bought the place that I am now on; that was the deposit money.
513. Paid by whom? Paid by both of us. The whole of the money that Swift and I had, to the best of my recollection, was lying to Swift's credit. I went up North to see if I could see any place suitable, and I saw this place then and arranged on a proper business footing that Swift, Spiller, and myself should

- J. McDonald. buy it. This, as far as I can see, was a transfer to the head office in Sydney of the Bank of New South Wales of our cash to pay this deposit on the property.
- 1 Dec., 1897. 514. That would be paid out of Swift's account, being the conjoint money lying to Swift's credit? Yes, at Tumut.
515. For convenience? Yes.
516. Would that account for all the deposits being in Swift's name? Yes. Spiller paid in his proportion independently.
517. *Mr. McFarlane.*] How long was the partnership in existence between yourself, Spiller, and Swift? It started about 1874, and ran on until about 1880 or 1881, when Spiller was bought out. He was dissatisfied with Swift's speculative propensities. He got frightened, and finally he offered to sell his share for, I think, £13,500. Swift and I bought him out.
518. During the time of the partnership, how often would you have a settlement of accounts, either before or after Spiller left? Pretty well every year before Spiller went out.
519. In adjusting the different shares, was everything amicably arranged, or was there any dispute? We never had a dispute.
520. Was Mr. Swift always perfectly satisfied with the adjustments made in connection with the partnership? Yes; it was only Spiller that was dissatisfied. Swift and I never had a word. We trusted each other with anything and everything.
521. Did he take sufficient trouble to see that the accounts were correct? I think he did so, because I remember the books being sent down here. I insisted on their coming down to some accountant he had in Sydney, so that there should be no doubt about it.
522. What was the result of that? He returned the books. He was perfectly satisfied. I forget who was the accountant, but it was one of his own.
523. Was it agreed upon by both of you to submit the books to an accountant? He did not want to bother about it, but I insisted upon it.
524. Was it merely an audit? Yes.
525. Were you both satisfied? Yes.
526. Did the partnership extend to all the stations? Yes, to all the operations we had; but he was in lots of places that I had nothing to do with. When I was moderately successful where I was, he got in with other partners. He got in with a man named Hann, and they got stations down near Wilcannia and Wagga. I had nothing to do with those transactions; in fact, he got into all sorts of speculations.
527. Was he successful generally in his speculations? Yes; he was very successful up to a point.
528. What point was that? Until within a few years of his death.
529. Did you meet with losses after that? No end of losses. The drought set in. He had a lot of stock floating all over the colony. He dragged me into one speculation much against my will, and to relieve the trustees I took his interest and my own also. There was a third party in it. I lost £4,000 by my good nature.
530. It has been previously stated that the accounts were operated upon after Mr. Swift's death for partnership accounts? Yes; the properties were carried on a year or two after his death by the trustees and myself.
531. The trustees represented the estate of one of the partners and yourself? Yes.
532. Would the moneys that would be received in connection with the sale of stations and stock be treated precisely in the same way as if Mr. Swift was alive? Yes.
533. Was his estate credited with the amount due to it? Yes.
534. Are there books to show exactly the nature of those transactions and the result? Yes; every transaction.

Mrs. Elizabeth Swift recalled and further examined:—

- Mrs. E. Swift. 535. *Mr. Parkes.*] How do you know that the amount paid into the banking account at Tumut was Mr. Swift's money? Because my solicitor, for the purpose of the suit that was coming on, searched out every payment by Mr. Swift from the beginning of his account up to his death.
- 1 Dec., 1897. 536. Who was that solicitor? Mr. Russell. He got the bank to come in and make these affidavits with regard to that. The very interest on account of McDonald is charged to my husband's private account.
537. Where did the money come from that was paid into that account? Out of Mr. Swift's private account.
538. Have you got that private account? Yes.
539. Do you know whether Mr. McDonald paid any money into Mr. Swift's private account, and trusted him to hold the lot? I know of my own knowledge that Mr. McDonald never had any money, and never paid any money into my husband's account, or to him personally.
540. What proof can you give beyond your statement? The bank pass-books right through.

John McDonald, Esq., recalled and further examined:—

- J. McDonald. 541. *Chairman.*] Here is a list of items of Mr. Swift's account in Mr. Swift's handwriting; here is an item—John McDonald, drover, £30 5s. 9d.;—can you explain that? He may have paid a drover of mine; I cannot say.
- 1 Dec., 1897. 542. Do you still adhere to your statement that you were not droving for him, and that the money was not paid to you as an employee? Yes.
543. We examined you with regard to the account at Tumut, in which moneys were paid in by Swift; you said that Swift's account would very likely prove that you had paid money into his account; here is Swift's account;—what is the explanation? The only explanation is that which I have given, that he was a stock and station agent, and in selling stock he used to frequently sell them on bills, and here is a proof of that in the entries for discount.
544. How do you account for the fact that in all banking transactions with yourself and Swift, Swift is the man whose name appears as paying in the cash? Not in all cases; if he sold the stock he would naturally get the cash.
545. You say that in the original transactions you advanced money to Swift to start it? I say that any money we had, I had it.

J. McDonald.

Dec., 1897.

546. Did you pay it into any account? No; we bought stock with it.
547. Did it pass through the hands of any banker? Yes; the Tumut bank was where we operated.
548. In whose name was that account opened? I had an account there, and he would have one if he had any money.
549. Who opened the account for him;—did you pay in the money? I suppose he had an account of his own in a small way before we got into a large way.
550. What do you call a small way? I presume he had nothing; I lent him money once before I joined him. I never go into a man's private business to ask him what he has.
551. Have you any recollection as to how many sheep were on Mungie Bundie when Mr. Swift died? No; but the accounts will show that.
552. Here is a copy of a report made by yourself to the trustees in May, 1887, in which you state there were on the station 85,241 sheep at the date of Mr. Swift's death? Yes.
553. Here is a return made by you, under the Stock Protection Act, in which you state that on Mungie Bundie and Gravesend there were 42,000 sheep;—how do you account for these figures not tallying? One of these returns was for 1887, and I think the other was for 1884.
554. How do you account for the increase from 42,000 to 85,241? The property consisted of two stations; one return would go to one office, and the other return would go to another office.
555. Here is a copy of a memo. of yours;—is it in your own handwriting? Yes.
556. It is addressed to Hann and Croaker; you here state that there are 60,000 sheep on the stations Mungie Bundie, Gravesend, and Boolooroo;—how do you account for the difference between 85,000 and 60,000? There must be a further explanation of these figures. There is no date to that; you cannot tell whether it refers to another date or not.
557. There were 85,000 sheep on the stations at the time of Mr. Swift's death; this document has to do with what happened at the time of Swift's death, at which time, according to this statement of yours, there were 60,000 sheep; you say that at the time of Swift's death there were 85,000 sheep;—which of these statements is correct? I see what you mean now; but you should read the whole of the report. I say there:—
- I will commence my report by referring to the returns of sheep, cattle, and horses with which I have furnished you copies. At sheep, in the year 1883 I sheared 60,204 sheep, and my returns show that 24,657 lambs were marked during that year. After adding 7,480 ewes purchased, and deducting 7,100 sold, there were 85,241 sheep on the properties at date of death of late S. M. Swift. Starting from that point it will be seen from my detail statement that amongst the sheep purchased in 1884, 911 rams are shown. Those rams, I may explain, were originally bought by the late S. M. Swift as a private speculation on his own account. They were taken over from Hann and Croaker as his trustees by our firm; 202 were afterwards sold to Messrs. W. Armstrong and Co., of Milroy, at a profit on the original price paid. The sales after 1884 shearing aggregated 8,771 sheep, and do not call for any comment. You will, however, notice that I show 1,629 sheep to have been lost over an exchange with Messrs. Swift and Hann. I sheared the 10,309 sheep and kept the wool and their lambs as a set-off against the deficiency in numbers received from Mercadool.
- It is a long account, but it shows here that the losses were very heavy.
558. Is that the explanation? Yes; there must have been loss according to my report.
559. Do you adhere to your statement that you advanced Mr. Swift the original capital, or found the original capital, to start these transactions? I did not say I found the original capital to start these transactions. I said whatever capital was there he and I found it, but neither of us had very much. We were not millionaires in those days.
560. Are you quite sure he did not find the capital? Quite.
561. You are quite sure you did not drove for him? Quite; I did not drove for him.
562. Your explanation in reference to this account is that it was a joint account, operated upon jointly;—although his name is at the bottom of the deposit-receipts we are not to assume that he paid in the money any more than you did? No; it was joint moneys.
563. *Mr. McFarlane.*] Were you at any time engaged on a salary from the time you first joined Mr. Swift? No; never at any period.
564. That is, a salary for services in connection with working the stations? I charged a salary as against Swift and Spiller, and if I went away I put a man in my place.
565. Was that when the three of you were in partnership? Yes. I credited myself when the three of us were in partnership with a salary for looking after their business.
566. *Mr. Thomas.*] Did you simply pay yourself so much for managing for the three partners? Yes.
567. That was on behalf of yourself and the other two? Yes; it was so arranged.
568. *Mr. Parkes.*] If you were absent would your substitute be paid? Yes.

1898.
(SECOND SESSION.)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

APPOINTED TO INQUIRE INTO THE

ESTATE OF THE LATE S. M. SWIFT, OF
PETERSHAM.

FRIDAY, 16 DECEMBER, 1898.

Present:—

MR. THOMAS, | MR. MCFARLANE,
MR. McLEAN.

W. M. HUGHES, ESQ., IN THE CHAIR.

George Sandell sworn and examined:—

1. *Chairman.*] What are you? A chartered accountant of England and Wales.
2. I understand you know something of this case; will you explain how you propose to proceed? I propose to exhibit the accounts in the same form as they were formerly submitted to your Committee. I refer to the accounts filed by the executors under the A.B.C. Statements. I have filed an account on much the same lines.
3. *Mr. McFarlane.*] What is your competency to investigate these accounts—have you been any length of time engaged in the capacity of chartered accountant in England? I have had upwards of twenty-five years practical experience in my profession.
4. Have you had any experience in New South Wales? Yes.
5. Have you undertaken to examine the accounts in the estate of S. M. Swift? Yes.
6. Did you go into these accounts from an accountant's standpoint? Yes, most minutely.
7. In what state did you find the accounts generally? I have had a large mass of evidence, books, papers, and documents presented to me from which I have constructed an account which I say should have been the account, and should have taken the place of that prepared by the trustees.
8. Have you seen the accounts prepared by the trustees? Yes, they are inaccurate, misleading in numerous instances, the assets were undervalued, and there has been great concealment of assets therefrom.
9. How does that statement compare with the result of your investigation—that is in the first place, with regard to the amount declared by the trustees to the Probate Court? The total surplus as per filed accounts by the trustees was £46,000 odd. I make a surplus of £236,268 5s. 8d.—roughly speaking £190,000 in excess of what they filed.
10. Did you go carefully into these accounts? Most minutely.
11. Are you prepared to swear that their statement is incorrect? The executors filed accounts are absolutely incorrect.
12. On what did you base your investigation;—what are the facts that induce you to swear so positively that the accounts are incorrect? After my examination of the books and documents I found that the executors suppressed a large number of assets belonging to the estate, and the greater portion of the assets which they did bring into the estate were undervalued. I also found that some of the assets of the estate entered in the statement made for probate as liabilities; that has had a double effect.
13. Seeing that it is some time since these valuations were made—how did you arrive at the fact that they were under valuations? I have examined the executors' letter books, the executors' account filed in the equity suit, and have estimated all the figures upon their further accounts; therefore, no valuation that I used in my accounts is my own manufacture; it is entirely the valuation of the executors themselves.

G. Sandell.
16 Dec., 1898.

G. Sandell.

Division A.—Under-valuation of the Estate Assets.

1. I have carefully inspected and examined the original valuations filed by the said executors, Mr. P. Hann and Mr. C. H. Croaker, with the application for probate, and that I find as follows:—
Baden Park and Moira Plains were supposed to have been valued by James Smith Lavender and H. Webb; Mimosa West, Browley, and Snubba, by Harvey Welman and Thomas Hodnett; and Mungie, Boolooroo, and Gravesend, by Mr. R. M. Pitt and Mr. H. S. Badgery.

The Valuator's connection with Mr. P. Hann.

The said valuator, James Smith Lavender, was a former partner of the said Mr. P. Hann's, *vide Gazette* notice, 6th September, 1878: "Mr. P. Hann retired from the firm of Messrs. Wilkinson, Hann, Minchin & Co. Witness—Hy. Berkley Fitzhardinge, solicitor, Wagga Wagga"; that the said Henry Webb was an employee in the services of the testator; that the valuator, Harvey Welman, was also a former partner of the said Mr. P. Hann, *vide Gazette* notice, 10th March, 1880; "Mr. P. Hann retired from the firm of Messrs. Welman, Hann, & Co. Witness—Hy. Berkley Fitzhardinge, solicitor, Wagga Wagga"; that the valuator, Thomas Hodnett, was also an employee in the services of testator. The said valuator, Messrs. R. M. Pitt and H. S. Badgery, had for many years prior to testator's death extensive business dealings, and at the time of his death testator occupied chambers in the same house of business. I am of opinion that these valuations were arranged by the executors, Mr. P. Hann and Mr. C. H. Croaker, with the object of under- valuing the estate.

Baden Park and Moira Plains Valuation, mortgaged after Testator's death by Mr. P. Hann and Mr. C. H. Croaker.

2. Extract from station press-letter copybook, No. 11, page 365, written by the said Mr. P. Hann to the said valuator:—"James Smith Lavender, 24th March, 1884. My dear Lavender,—I must get the assets certified to and valued by two competent disinterested persons. Now, I wish to know if you, from your general knowledge of the Baden Park country and stock, are willing to give a valuation for me, if I supply full details and particulars for you to do it on. Can you find another person about there who would do the same? Perhaps some person may be travelling through. Boulton, as sole valuator, would not do it without inspection of the station freeholds, &c. You might see Webb; he would be the very man."

Extract from press-letter copybook, No. 11, page 377, written by Mr. P. Hann to valuator, J. S. Lavender:—"26th March, 1884. My dear Lavender,—I have your message *re* Baden Park valuation, and have replied offering to send all particulars by wire if you can arrange with Webb to act as valuator with you, and I will send all particulars and my view by wire."

Extracts from press-letter telegraph book, No. 5, page 175, written and sent by Mr. P. Hann to valuator, Henry Webb, a station employee:—"26th March, 1884. See Lavender about particulars for valuation; he will explain." Same book, page 176, same date, telegram written by the said Mr. P. Hann to the said valuator, J. S. Lavender:—"Webb explains leaving to-morrow. If will act value with you, will supply all information by wire to complete to-day."

Extract from same book, page 177, same to same, same date:—"Baden Park, known as Moama Blocks S and T, Moira Plains A, worked together as one station, comprising an area of 208,000 acres; rental £75 per annum; fenced and improved; divided into eleven sheep paddocks and three small paddocks, one well, twenty-four large and small tanks, house, woolshed, huts, and buildings, working plant, including horses worth £1,800; stock, £31,000, as follows:—3,141 aged ewes, 7,032 four-tooth ewes, 9,124 two and four tooth ewes, 4,038 two-tooth wethers, 6,948 weaners, 200 ration sheep, value £50,000, with everything given in; 100 bales of wool, £1,000. 120 words."

Copy of J. S. Lavender and Henry Webb's valuation, filed by said executors, Messrs. P. Hann and C. H. Croaker.

Estimated value of Moira Plains and Baden Park station, the property of Swift and Hann:—

	£	s.	d.	
Sheep	15,000	0	0	
Country	17,000	0	0	
House, Working Plant, and Woolshed	5,130	0	0	
General improvements, Tanks, &c.	13,085	0	0	
				£50,715 0 0
	£	s.	d.	
Tanks, 105,900 yards at 1s.	5,295	0	0	
Fencing, 121 miles at £45	5,445	0	0	
" 67 " £35.....	2,345	0	0	
	£13,085	0	0	

(Signed) JAMES SMITH LAVENDER,
HENRY E. WALL.

Witness—C. H. ROOFE, Solicitor, Hay."

(No particulars or details of land or sheep.)

Copy of original in handwriting of Mr. P. Hann.

"Baden Park—Sheep shorn	23,382
" Expected stragglers.....	400
" Lambs.....	13,000
	<u>36,782</u>

Cattle and a number of Horses not wanted for working the place that Webb thinks ought not to be given in—Price £65,000.
Terms—Half-cash, balance 1 and 2 years, bearing 7½ per cent. per annum."

The following extract from Mr. P. Hann's letter to the Testator, dated 2nd May, 1883 (see press-letter copybook No. 31, page 153) —

	£	s.	d.
"Baden Park, 128,000 acres with 21,000 sheep at 40s.	42,000	0	0
Moria Plains with 12,000 sheep at 35s.	21,000	0	0
	<u>£63,000</u>	<u>0</u>	<u>0</u>

Points to the fact that the arranged valuation was an under valuation

Extract from Mr. P. Hann's letter, press-letter book No. 11, page 398, 29th March, 1884, to Valuator J. S. Lavender:—"Dear Lavender,—I have yours of yesterday with the Baden Park valuation, and thank you for being so prompt. I think the first memo. of Webb rather a high valuation, and should be glad to see such come out of the place. I find you did not estimate the value of about 100 bales of wool that Webb thought was on the place; and as your views exceeded mine by about £700, I am going to leave the wool out of the schedule altogether."

Extract from original letter written by Mr. R. M. Pitt, 9th April, 1884, to Mr. P. Hann:—"I have a buyer for Baden Park if you are willing to sell. I mentioned £50,000 as the probable price."

Extract from press-letter book No. 5, page 200—Telegraph from Mr. P. Hann to Mr. R. M. Pitt, 10th April, 1884:—"Want sixty thousand Baden Park; left map in room; if you cannot find it, advise; will bring mine down."

Extract from press-letter book No. 11, page 455, 10th April, 1884,—Mr. P. Hann to Mr. R. M. Pitt:—"My dear Pitt, Yours of the 9th to hand. I wired you to-day £60,000 for Baden Park. Lavender and Webb for valuing the place went into figures and brought it a little over £60,000 in its present state; with a change, and favourable season, it should bring £75,000 to £80,000 with 60,000 sheep on it."

Extract from press-letter copybook No. 12, page 63, written by Mr. P. Hann to Messrs. F. Bacon & Co.:—"Gunnedah, 20 June, 1884. Dear Sirs.—Your favours of the 12 and 16 to hand. Baden Park—I am not inclined to sell this property yet, as I consider season and everything else against doing so profitably just now. Although only 31,000 sheep now on it, and never having had stock losses there worth mentioning, still the property has cost me over £60,000, and no buyer would care to give £70,000 for it."

Extract from press-letter copy book No. 12, page 304, written by Mr. P. Hann to Mr. W. Bates, of Melbourne:—"15 June, 1885. Dear Sir,—Baden Park is for sale. I want £70,000 for it." Can

Can Mr. P. Hann state that this property was over-valued for business or financial reasons? I venture to say that G. Sandell. the valuation was improperly arranged, and that it was under-valued fully 25 per cent. 16 Dec., 1893.

3.—Mimosa West Valuation for Probate (see press-letter copy book No. 31, page 3), viz. :—

“Mimosa”—Rental, £50 per annum.

Original area, 49,500 acres, now reduced by conditional purchases; but we hold by Crown and other leased lands about 43,500 acres.

960 acres freehold land, cost	£1,043	0	0
320 „ conditional purchase	80	0	0
Fenced and subdivided into 13 large and small paddocks, 21 tanks, woolshed, huts, house, outbuildings, stables, hay shed, &c.; furniture and stores, £200; 14 horses, £114; 10 head cattle, £25; 28,000 sheep of about the following specifications (19,200 ewes, 8,400 weaners, 455 rams). Value of the run with improvements, 28,000 sheep, furniture, horses and cattle given in	28,000	0	0
	<u>£29,123</u>	<u>0</u>	<u>0</u>

(This valuation was written out by Mr. P. Hann and signed by the Valuers—Harvey Wellman and Thomas Hodnett.)

The probable value of the property.

Extract from Mr. P. Hann's letter to the Testator, 2nd May, 1883, see press-letter, copy book No. 31, page 157 :—

“Mimosa, 49,500 acres. 14 paddocks with 23,000 sheep at 25s.	£28,750	0	0
To this amount add difference in the number of sheep between dates, viz. : 2nd May, 1883, and 18th February, 1884, being an increase of 5,000 at 10s.	2,500	0	0
Land outside—in station interest—see Mr. Hann's letter-press copy book No. 31, page 437, 3rd Oct., 1883, not included in amount, £28,750.

IMPROVEMENTS.

Cost of fencing, per Mr. P. Hann	£3,178 15 0
Do tanks ,, ,,	950 0 0

£4,128 15 0

C. Hale and Hale, junr., are not allowed for, as they are not surveyed. 1,280 acres.

Compare this with the filed valuation;—can Mr. P. Hann say he did not conceal the land from probate? And in further confirmation that land was concealed I quote and refer to Mr. Hann's letter to Messrs. Wilkinson, Graves, and Lavender, 1st May, 1884; press-letter book No. 12, page 9, per following extract:—

960 acres freehold land;
640 ,, conditionally-purchased; and
7,516 ,, secured in different parts by selections, improvement purchases, and measured portions.

Can Mr. P. Hann state that this property was overvalued for financial and business reasons?

4. Browley valuation for probate, filed 5th April, 1884, see press-letter book No. 51, page 4, as follows:—

Browley, 12 miles from Narandra—

6,824 acres conditionally-purchased land;	
40 ,, freehold.	
6,864 ,, @ 30s.	£10,296 0 0
10,500 sheep, viz.: 3,700 aged ewes, 6,600 5-year old overflow wethers, poor, 200 mixed young ewes and rams, at per head for the whole 5s. 6d. ..	2,887 10 0
2 horses, £16; 6 head cattle, £18	34 0 0
Furniture and sundries	100 0 0
	£13,317 10 0

The land is all fenced, divided into several paddocks; three wells on it; six tanks; house, woolshed, huts, and drafting yards.—Wagga Wagga, 26 March, 1884.

(Note.—3,600 and 1,500 acres of pre-leases are not included in this valuation.)

The above property was sold 2nd April, 1884, three days prior to the filing of the probate account, to Messrs. A. and J. Mack, and the following are the particulars of such sale, viz.:—

	£	s.	d.	£	s.	d.
6,824 acres C.P.	12,012	8	9			
40 acres 1 rd. freehold—35}				634	11	4

	£5,262	10	0

Can Mr. P. Hann state that this property was overvalued for financial and business purposes?

6. If further confirmation of my statement that the following estate properties were undervalued is necessary, I refer to Mr. P. Hann's letter of 2nd May, 1883, written to testator, *vide* press letter copy book, No. 31, page 157, in which he gives the value of the properties as follows:—

	£	s.	d.	£	s.	d.
"Baden Park, with 21,000 sheep.....	42,000	0	0			
Morra Plains, ,, 12,000 ,,	21,000	0	0			
				63,000	0	0
Mimosa West, ,, 23,000 ,,				28,750	0	0
Browley, ,, 37,700 ,,				13,714	0	0
Snubba, none				2,500	0	0
	59,770			£107,964	0	0
Add thereto increased number of sheep at 18th Feb., 1884, 101,074						
Less, included in above	59,770					
	41,304	at 7s 6d.	15,489	0	0	
Additional value, Mimosa West.....			2,000	0	0	
Undervalue of Snubba			2,500	0	0	
				19,989	0	0
				£127,953	0	0

These various properties were represented by Mr. P. Hann and Mr. C. H. Croaker, as per their application for probate, on the 5th of April, 1884, to be of the value of £100,365 10s., or nearly 28 per cent. under his own statement of May 2nd, 1883.

Mungie Bundie, Boolooroo, and Gravesend Valuation.

7. Extract from letter of said Mr. P. Hann to Mr. John McDonald, Station Manager, March 19th, 1884, *vide* press letter copy book, No. 7, page 373:—"Dear McDonald,—To-day I have yours of the 14th from Boonook. I think it would have been much better to have talked over matters, and we could then have made out the statement of the station accounts necessary before we can ask for probate."

Extract from original letter of Mr. John McDonald, "Oxford Hotel," Sydney, March 20th, 1884, to said Mr. P. Hann:—"Dear Hann,—Herewith I send you approximate statement of our places, which you can make out to your own liking; these are quite near enough."

"Total leasehold, 190,000 acres, fenced and improved. Original freeholds on whole, 35,000 acres.

Sheep	60,000
Cattle	4,000
Horses	200
Plant, &c., worth (say)	£2,000

Extract from letter of said Mr. P. Hann to Mr. H. S. Badgery, March 24th, 1884, *vide* press letter copy book, No. 11, page 364:—"My dear Badgery,—You and Pitt kindly offered to give me the Mungie Bundie valuation, and if you are still prepared to do this I should be glad. Enclosed I send all the particulars that McDonald sent me to work upon, and I trust they will be sufficient for you."

Extract from original letter of Mr. R. M. Pitt, Sydney, to said Mr. P. Hann, 28th March, 1884.—"My Dear Hann,—Valuation of the station is as follows:—

	£	s.	d.
Land.....	45,000	0	0
Sheep	24,000	0	0
Cattle	8,000	0	0
Horses	1,000	0	0
Runs.....	10,000	0	0
Plant	2,000	0	0
	£90,000	0	0

"Do you consider this too low? If so, wire in the morning. I don't think it would realise any more just now even if as much, but with rain, of course, it would be worth considerably more."

Extract from letter of said Mr. P. Hann to Mr. R. M. Pitt, March 29th, 1884, *vide* press letter copy book, No. 11, page 393:—"I have yours of yesterday, and I think you are altogether too low in your valuations as a whole: separately they are right enough, but at least £10,000 more has to go on for value improvements on the freeholds and leasehold lands, and £3,000 to £5,000 more on the sheep. I think you overlooked the improvements; the bare cost of 35,000 acres of land at 25s. would nearly be £45,000. We had better put a reasonable value on, so as not to have any questioning over the matter, and I do not think that undervaluing will do the estate and partners good generally."

Extract from letter of said Mr. P. Hann to Mr. H. S. Badgery, 29th March, 1884, *vide* press letter copy book, No. 11, page 395:—"My dear Badgery,—I have your wire about wanting the separate quantities of freehold and selected lands on Mungie Bundie, Gravesend, and Boolooroo, and have wired McDonald to send them direct to you. I do not see any reason for specifying the acreage of each block and on each run, as it entails so much trouble and gives no better result. You can only give a general value of the land, and not separately value each block. The whole of the 35,000 acres is freehold. If they had any selections there in other names they could not place a value on them, and must treat them only as private leased lands. I am also writing to Pitt, as the valuations are too low. You only allow cost price for the land, and nothing for the value of improvements over the whole freehold and leasehold lands."

Extract

G. Sandell.
16 Dec., 1898.

Extract from original letter of Mr. H. S. Badgery to the said Mr. P. Hann:—"31st March, 1884. I have made the valuations, and handed them to Abbott and Allen."

After arrangements, the following appears agreed upon, and, as such, was filed by the executors, Mr. P. Hann and Mr. C. H. Croaker:—"31st March, 1884. We, the undersigned, hereby certify that we have personal knowledge of the runs hereunder mentioned, in which the late Samuel Moffatt Swift was interested at the date of his death, and that the fair and reasonable values of the same and the stock thereon are as hereafter set forth:—

"Mungie Bundie, Gravesend, and Boolooroo Stations, county of Couralie, Gwyder district, New South Wales.

"Total original leaseholds, about 190,000 acres, all fenced and improved.

"Freeholds land, about 35,000 acres, at 30s.....	£52,500
"Leaseholds and improvements thereon.....	15,000
"Plant and belongings	2,500
"60,000 sheep, more or less, at 9s.	27,000
"4,000 cattle, more or less.....	8,000
"200 horses, more or less	1,500
	£106,500"

The valutors never inspected the stations, and no details of the various portions of lands were given.

On the 4th May, 1887, Messrs. Peele, Borradaile, and Co., of Sydney, prepared a statement of accounts, made up to the 18th day of February, 1884. This said statement was signed by the said firm and Mr. John McDonald, with following certificate:—"The above balances have been taken from the ledger accounts prepared by us from the books and vouchers of Messrs. John McDonald and Co." The value of the freehold lands being therein stated to be 45s. per acre.

Extract from letter of testator to Mr. Maiden, 26th August, 1882, *vide* press-letter copybook, page :—"Testator's valuation of these properties, with 75,000 sheep and 4,000 cattle thereon, was £150,000."

There can be no doubt that the number of sheep on the stations was improperly stated, and in place of 60,000 sheep there should have been 85,211, the cattle being also under-stated as to numbers and values.

Extract from report written by Peel, Borradaile, & Co., and signed by said John McDonald, 4th May, 1887 (see press-letter copy):—"There were 85,211 sheep on the properties at date of death of late S. M. Swift," and this is confirmed as per original stock assessments made on the station returns—

42,000 sheep on Mungie Bundie, and
37,000 " on Boolooroo.
79,000

closely agreeing with the number given in the report of 4th May, 1887, proving John McDonald withheld 25,211 from the number stated to the valutors; there were also other properties withheld from the valuation, and will be found in Division B, Nos. 41 to 54, which should have formed part of the testator's estate and upon which duty should have been paid, bringing the total net value of this portion of the estate to £173,250 11s. 2d., instead of £106,500 as in the filed account for Probate—under Schedule B.

Can Mr. P. Hann say that these properties were over valued for financial and business reasons?

Division B.—Concealed Estate Assets, &c.

	£	s.	d.
1. Credit bank balance at Head Office, Bank of New South Wales—entered on the filed accounts as a liability, diverting probate duty double the amount, viz., £798 8s. 10d. (see Equity suit 5060, page 3)	399	4	5
2. Credit bank balance, Blackall branch, Bank of New South Wales—credit of T. Miller, <i>vide</i> Mr. P. Hann's letter, 5 August, 1884, page 352	232	0	0
3. Credit bank balance, at Wilcannia, credit Edward Luttrell, Commercial Banking Company of Sydney	100	19	7
4. 7,900 ewes purchased by testator, 11 October, 1883, of Mr. W. Bates, acting agent for vendors, Messrs. T. Brown & Co., for which testator gave his P.N., due 14 July, 1884; 7,580 of these ewes were sold by Mr. Bates, and delivered to Messrs James and Martin, for £4,614 17s. 6d. less commission (Mr. Bates' ledger is in my possession proves this statement)	4,490	0	3
5. Statement of the late Mr. Swift's horses, &c., left at Mungie Bundie by Halloran (see press-letter copybook, B 694), as follows:—			
1 Bay horse.....	12	0	0
1 Chesnut and roan	10	0	0
1 Chesnut	8	0	0
1 Bay draught mare	25	0	0
1 " horse	20	0	0
Cart and harness.....	10	0	0
2 Saddles	4	0	0
2 Tents, 35s.; 2 axes, 10s.; oven, 5s.	2	10	0
Sundries	0	10	0
			92 0 0
6. The following are admitted as having been received by Executors—Mr. P. Hann and Mr. C. H. Croaker—and entered in the "Receipts" portion of the account filed in the Equity suit 5060 (see pages 62 and 63). Not one of these assets were included in the accounts filed for Probate:—

43. Mungie Bundie wool in transit at Testator's death.....	1,814	18	7
Extract from letter of Testator to Mr. Sharp, of Newcastle, December 27, 1883. <i>Vide</i> press-letter copy book, marked B, page 609:—"Dear Sir,—Enclosed memo. refers to balance of Mungie Bundie clip of 1883. Please send me bills for it as soon as shipped and oblige." Clip of 1884 commenced October, 1884. See station ledger folio. On September 23, 1884, the Union Bank credit the account of John McDonald & Co. with this amount. See copy of Union Bank of Australia pass-book.			
44. L. Seaton & Co. (debt to Mungie Bundie), due at time of Testator's death. 3,000 ewes sold and delivered by Drover Halloran, January 7, 1884. Mr. John McDonald received a six months' p.n. See station ledger folio 577	1,200	12	0
45. Mr. G. Cook, debt to Mungie Bundie, due at time of testator's death. 2,100 ewes sold and delivered by Drover Sinclair, Feb. 8, 1884; cash received 21 Feb., 1884, and 18 April, 1884. See pass-book and station ledger, folio 571.....	413	10	0
46. Mr. P. McCormack, debt, entered in suit 5060, page 14, due at time of testator's death.....	129	0	0
47. Mr. R. Child, debt, entered in suit 5060, page 14, due at time of testator's death.....	88	0	0
48. Mr. J. Jurd, debt, entered in suit 5060, and bank pass-book as received 21 Feb., 1884	12	16	6
49. Cash in hand, entered in suit 5060, page 14	15	4	2
50. Gwydir River Pumping Co., entered in account filed in suit 5060, page 14, as an asset at time of testator's death	912	10	0
51. Refunds from Treasury, for 1883, received 8 March, 1884, £23; C. Wyndham, selection, £164 10s.; W. Emmett, selection, £160; see original H. H. Brown and Co.'s account	347	10	0
52. Rent adjustment. The rent for Boolooroo, Mungie Bundie, and Gravesend being payable for the year in advance, viz., £288, a proportion of these only should be debited to the station account to 18 Feb., 1884, and the other forms an asset	241	8	3
53. Testator's sheep on Mungie Bundie and Boolooroo, viz.:—8,184 Mercaool ewes, at 8s. 6d., £3,478 4s., purchased by testator from McLauchlin, see station ledger folio, 576; 5,641 ewes at 10s., £2,820 10s., see station ledger, folio 595	6,298	14	0
54. John McDonald, debt, overdrawn salary account at testator's death, see station ledger, folios 19 and 466.....	310	7	8

I state that there are a considerable number of other assets that I have not been able to fully prove to my own satisfaction, and, therefore, have omitted them from my affidavit.

Division C.—Partnership Claims.

1. Mr. Phineas Hann's.—This executor and trustee under the will of testator claims one-half share of the assets as disclosed in the accounts filed in the application for probate under balance-sheet "B." After most carefully examining the estate books, papers, and documents I have been unable to trace a single penny of the capital as ever having been introduced by him for the purchase of any part of the station properties; there is evidence that he was a co-partner in sheep transactions and divisions from time to time of such profits, and also with other persons; testator, on numerous occasions, offered Mr. P. Hann to share transactions in which testator engaged—"In or out, as you like."

Mr. Hann purchased from Mr. Bates, Melbourne, from 19th September, 1883, to 4th January, 1884, during testator's lifetime, for his own speculations, 30,646 sheep, and I find in numerous letters of Mr. Hann's to different people "that we are now speculating separately."

That Mr. Hann had been in several partnerships, and some of such were dissolved as per *Gazette* notices. It cannot be assumed he was unacquainted with the necessity of such deeds; but, without a balance-sheet of any kind, prepared before testator's death, and without any proof that Mr. Hann introduced a penny of capital, I am of the opinion that this claim is a fraudulent one.

2. Mr. John McDonald claims one-half share of the assets as disclosed in the account filed on application for probate under balance-sheet "C." I have examined certified copies of testator's banking accounts, from 29th June, 1867, till the date of his death, viz., 18th February, 1884, and have carefully examined certified copies of Mr. John McDonald's banking account, from 30th September, 1873, till 2nd December, 1880, which conclusively prove to my mind that Mr. John McDonald was never, up to that period, a man of means; the banking accounts were nearly always in debit, and he was, during that period, charged every half-year by the banks with interest on his small overdrafts. At the period when Mungie Bundie was purchased, Mr. J. McDonald gave to Mr. J. H. Spiller on 13th February, 1874, a p.n. at three months for £105, which, at its maturity, his banking account was unable to meet, and that Mr. Spiller received payment from testator on 18th May, 1874. Mr. J. H. Spiller then endorsed Mr. J. McDonald's p.n. to testator, "without recourse," for a brother-in-law and future partner, to do so places no financial confidence in Mr. J. McDonald. P.N. in my possession. Mr. John McDonald was the station manager, at a salary of £200 per annum, and, after testator's death, seems to have increased it without any authority to £500 per annum. See station ledger, folios 20 and 466. No partnership, no *Gazette* notice, and without sanction of the Equity Court, he seems to have carried on the stations to the present date. As in Mr. Hann's case, I have been unable to trace any capital as having been introduced by Mr. J. McDonald, and am of the opinion that this claim is also a fraudulent one.

Both these claimants fully understood the position, and, in conclusion, I produce an extract from a letter written by Mr. P. Hann to Mr. J. McDonald, see press letter copy book, No. 7, page 389:—"May 13th, 1884.—The bank and different lawyers have laid it down very clearly that nothing can be bought for either station except such as is necessary for the working of it towards the desired intention of sale and liquidation on behalf of the estate. Your bank solicitors explain the same. Death dissolves all partnership, and the surviving partners are the persons to wind up, and they are responsible to the executors for realisation."

Division D.—Lands Acts—Evasions and Dummies.

1. My affidavits of 26th April, 1898, submitted to the Minister for Lands, is now under the consideration of that Minister, disclose a systematic evasion of the Land Acts, and I have a considerable quantity of evidence in support of my allegations as to the estate Mungie Bundie and Mimosa West.

Division E.—Administration of the Estate by the Executors, Messrs. P. Hann and Charles H. Croaker.

After an experience of upwards twenty-five years, I can say that never have I seen such a mass of corrupt and fraudulent transactions; but as the scope of my investigations was to prove the value of testator's assets and liabilities as on 18th February, 1884, I have not thought it necessary to fully investigate this branch of the estate; but that portion that I have, from necessity, been called on to examine is most discreditable to all concerned, and most disastrous to those interested.

Division F.—Reply to Mr. Phineas Hann's unsworn statement of 27th September, 1898.

G. Sandell.

16 Dec, 1898.

1. That the said Mr. P. Hann affects to think his general denial, coupled with a modicum of abuse, an answer to the serious specific allegations contained in my affidavit of the 2nd of June last. Mr. P. Hann states, in paragraph 1, "That for financial and business reasons the whole of the station properties were over-valued when probate duty was paid." That this statement is untrue Mr. P. Hann proves by his admission, in paragraph 3 of his said statement, as he therein states: "There may have been individual items somewhat under-valued." My answer is that I challenge Mr. P. Hann to point out a single instance of any valuation being over-valued. The only properties that have been sold, viz., Browley and Snubba, were valued for probate at £20,527 10s., and realised £20,588 3s. 4d., proving that these properties were under-valued by nearly "fifty per cent." For particulars see Division A, Nos. 4 and 5.

2. That the said Mr. P. Hann, by paragraph 2, states that "The Cox, Dowling, & Co. papers did not belong to Mr. Swift, and that his estate had no interest in them." I say this statement is also untrue. The testator, by agreement dated 9th July, 1883, purchased from Messrs. Pitt, Son, and Badgery, acting as agents for the vendors, Messrs. Oliver, Smith, & Co., the Avington herd of about 10,909 head, at 45s. per head, and paid as deposit the sum of £250 to Messrs. Pitt, Son, and Badgery; subsequently one-third of the said agreement was endorsed by testator to and accepted by, Messrs. Badgery Brothers.

Extract from press-letter copy-book "B," page 217, of testator's own letter to Mr. C. S. Byrne:—11th July, 1883. "I bought Avington herd, 6,000 B's. and 4,000 Fm's.; good delivery."

Extract from same book, page 218, testator's letter to Mr. G. Ray, same date:—"I bought Avington; contract enclosed; see and arrange country safe and right."

Extract from same book, page 235, date 14th July, 1883, of testator's telegram to G. R. Ray, Blackall—"Avington contract posted 10th," &c.

Extract from same book, page 241, 17th July, 1883, of testator's letter to Mr. G. R. Ray:—"Mr. Badgery will explain to you how we are thinking of working this herd of Avington's."

Extract from same book, page 243, 17th July, 1883, of testator's letter to Messrs. Mann, Melbourne:—"I have bought the Avington herd on the Barcoo, near Blackall. As they are a grand herd they might suit your buyer," &c.

Extract from same book, page 258, 21st July, 1883, of testator's letter to Messrs. Pitt Son, and Badgery:—"Re purchase of Avington cattle. If Messrs. Oliver, Smith, & Co. will not accede to request of allowing time for Mr. Badgery or Ray to arrange country with manager at Avington, I accept the contract in its entirety, country as specified in contract," &c.

Extract from same book, page 265, 23rd July, 1883, of testator's letter to Messrs. E. and E. Mann:—"Yours of 20th instant to hand, re Avington's female cattle, &c."

Extract from same book, page 274, 25th July, 1883, of testator's letter to Messrs. W. Sloane, & Co., Sydney:—"I bought Avington herd—10,900, &c."

Extract from same book, page 348, 18th September, 1883, of testator's letter to Mr. T. Miller:—"I have sold all the females at Avington, about 4,500, to be delivered by me, Commara, Cox, and Dowling." I had a hard fight, as I had to take delivery of the females, &c. (a long letter.) Mr. F. Badgery, who has one-third share in them, goes up this boat with your Murdock. I pay his fare up, and from commencement of work give him £5 per week."

Extract from same book, page 354, 19th September, 1883, of letter signed by Frank A. Badgery to Mr. G. Murdock, drover:—"I have this day engaged you to proceed to Avington Station, Barcoo River, to assist in mustering and delivering cattle," &c.

Extract from letter written by Mr. P. Hann to testator, 30th September, 1883, vide press letter copy-book, No. 31, page 374. "Ray, in a letter to me, said the Avington's were 'a first rate thing; a lot of money in them, and he regretted I was not in them."

Extract from press-letter, copy book "B," page 464, of testator's letter to Mr. T. Miller, 19th November, 1883. "Badgery reports getting on well with Avington's."

Extract from same book, page 481, of testator's letter to F. A. Badgery, 26th October, 1883:—"I am trying Dowling at 45s. for the 82 steers."

Extract from same book, page 495 of testator's letter to F. A. Badgery, 2nd November, 1883:—"I have your wires, re Avington cows and steers. I hope there will be no difficulty with Dowling over short numbers."

Extract from same book, page 610 of testator's letter to Messrs. W. Sloane, & Co.:—"Sydney, 27th December, 1883. Dear sir,—I acknowledge receipt of your letter of this date, enclosing a p. n. from Messrs. Cox, Dowling, & Co. for £3,061 stg. at six months from 19th November, in payment for first draft of Avington cattle, also cheque for £191 12s. in payment for plant, being net amount after deducting commission on sale, &c."

The testator drew upon his account with the Bank of New South Wales the following cheques for the working expenses:—

1883—dated Sept. 28.	Cashed Oct. 8, 1883, for.....	£200 0 0
" " " 29.	" " 9, " ".....	100 0 0
" " Oct. 1.	" Nov. 16, " ".....	100 0 0

" " Dec. 11.	" " 11, " ".....	600 0 0
		£1,504 0 0

Testator sold to Messrs. Cox, Dowling, & Co., portion of the Avington herd, purchased through Messrs. Pitt, Son, and Badgery, agents, which testator delivered by his drovers, G. Murdock and Marial, on the following dates to Cox, Dowling, & Co. :—

1883—Nov. 19.	1,041 cows at 45s. }	£3,061 0 0
" " "	575 yearlings, " 25s. }	
" Dec. 3.	794 cows, " 45s. }	2,560 5 0
" " "	619 yearlings, " 25s. }	
Dec. 26.—	1,220 steers, at 42s. 6d.	2,592 10 0
1884.		
Jan. 21.—	135 steers, at 42s. 6d.	} 1,594 7 6
" "	355 cows, at 45s.	
" "	244 yearlings, at 25s.	
" "	20 bulls, at 200s.	

Testator received from Messrs. Cox, Dowling & Co., four promissory notes, of which the following are true copies, viz. :—

£3,061. 19th November, 1883—due 22 May, 1884.
Six (6) months after date, we promise to pay S. M. Swift, Esq., or order, the sum of three thousand and sixty-one pounds sterling. Value received.
Payable at the Bank N.Z., Sydney. Cox, DOWLING, & Co.
L.C.B., 2,665. Bank N.Z. Paid May 22, 1884. (On back in circles.)
Endorsed and signed,—S. M. Swift, Frank A. Badgery, and Pitt, Son, and Badgery.

£2,560 5s. 3rd December, 1883—due 6 June, 1884.
Six months after date, we promise to pay S. M. Swift, or order, the sum of two thousand five hundred and sixty pounds five shillings sterling. Value received.
Payable at the Bank N.Z., Sydney. Cox, DOWLING, & Co.
London C.B., 2,665. Bank N.Z. Paid June 6, 1884. (On back in circles.)
S. M. Swift, Frank A. Badgery, Pitt, Son, and Badgery.

£2,592 10s.

G. Sandell. £2,592 10s. stg. 26th December, 1883—due 29 June, 1884.
 Six (6) months after date, we promise to pay S. M. Swift, Frank A. Badgery, or order, the sum of two thousand five hundred and ninety-two pounds ten shillings sterling. Value received.
 Payable at the Bank N.Z., Sydney. Cox, DOWLING, & Co.
 L.C.B., 2,666. B.N.Z. Paid June 30, 1884. (On back in circle.)
 P. Hann and C. H. Croaker, Executors in the Estate of S. M. Swift; Frank A. Badgery, Pitt, Son, and Badgery, for the London Chartered Bank of Australia; J. Millet, pro Manager.

£1,594 7s. 6d. stg. 21st January, 1884.—due 24 July, 1884.
 Six months after date, we promise to pay S. M. Swift and Frank A. Badgery, or order, the sum of fifteen hundred and ninety-four pounds seven shillings and sixpence, sterling value received.
 Payable at Bank N. Z., Sydney. Cox, DOWLING, & Co.
 L.C.B. 2,667 and B.N.Z. Paid July 21, 1884. (On back in circles.)
 P. Hann, C. Croaker, Executors in the estate of S. M. Swift; Frank A. Badgery, for the London Chartered Bank of Australia (Limited); Pitt, Son, & Badgery.
 For the cattle so sold to Messrs. Cox, Dowling, & Co., being part of the Avington herd, Messrs. Pitt, Son, & Badgery sent the following invoice to the testator. [This original invoice is in the handwriting of Mr. R. M. Pitt.]—
 (Exact copy.) "Pastoral Chambers, Bank Chambers, Sydney, Jan'y 8th, 1884.
 Mr. S. M. Swift. Dr. to Pitt, Son, & Badgery.
 1883. Account Rendered.

The following cattle delivered on Avington Station, and being portion of the herd in terms of contract of date July 9, 1883:—

Oct. 13th—To 1,195 head delivered.	
" 31st— " 980 " "	
Nov. 15th— " 1,239 " "	
" 30 — " 782 " "	

4,196 head at 45s. £0,441 0 0

Payable by p.n. at 6 months, dating from 31st Oct., 1883.*

The p.n. given by testator to Messrs. Pitt, Son, & Badgery, acting as agents for Messrs. Oliver, Smith, & Co., included 631 head of cattle that had not been sold at date of testator's death. These were afterwards sold by Messrs. Pitt, Son, & Badgery to Messrs. Dangar & Bell, at 63s. per head.

Extract from letter written by Mr. P. Hann to Mr. Ray, March 1st, 1884 (see press-letter copy-book, No. 11, pages 248 and 249):—"Croaker and I met Frank Badgery and McDonald together in Pitt, Son, & Badgery's office, and had a good talk over the cattle transactions and arranging matters. It now stands as follows—that Badgery and McDonald relieve us from responsibility and working of the matter, just accounting to us for the balance either way when the transaction is finished. Under the Avington arrangement you will want to make up the accounts in full of all the moneys you spent on that account, &c., so that we may get repaid this money from Badgery & McDonald from the proceeds of the cattle sold to Dowling & Co."

Extract from letter written by Mr. P. Hann to Mr. W. Neild, March 4th, 1884, same book, page 259:—"Messrs. Badgery & McDonald are going to manage Avington stock."

In the Supreme Court, in Equity, No. 5,060. The executors, P. Hann and C. H. Croaker, admit having received (see page 3) the sum of £1,000. Extract from affidavit, viz.:—"Amount received from Pitt, Son, & Badgery, auctioneers and station agents, George-street, Sydney, as the amount advanced by testator in his lifetime to Messrs. Swift, Badgery, and McDonald, in connection with the purchase of Avington herd. £1,000."

Extract letter from Mr. P. Hann and Mr. C. H. Croaker to the General Manager, Bank of New South Wales:—"21st April, 1884. Dear Sir,—In consideration of your handing over to us two bills made by Cox, Dowling, & Co., for £3,061 and £2,560 5s., maturing 22nd May and 6th June respectively, we hereby undertake to, when required, give the bank security over Baden Park and 20,000 sheep thereon, provided the debt owing thereon to the Bank of New Zealand be paid by you now—about £5,500.—Yours faithfully, SWIFT & HANN. P. Hann, C. H. Croaker, executors in estate of S. M. Swift."

Extract not in my affidavit:—Hann's letter to My dear Lavender. April 25, 1884. Book 11, page, 500. "We have also arranged that the other partners in the Avington Cattle transaction shall take the whole thing into their own hands, so that we are gradually reducing our responsibilities."

Extract from original letter of Mr. R. M. Pitt to Mr. P. Hann, 6th May, 1884:—"I have release of Avington, signed by Badgery; am sending it on to McDonald for his signature."*

Extract from original letter of Mr. F. S. Badgery to Mrs. Swift, 27th September, 1887:—"Amount paid to the credit of Swift and Badgery, Blackall, by testator—

28th September, 1883	£200 0 0
29th " "	100 0 0
1st October, "	100 0 0
5th November, "	100 0 0
27th " "	404 0 0
Ray's payments	432 8 0
	£1,336 8 0
Amount received by executors	£336 8 0
Pitt's cheques	1,000 0 0
	1,336 8 0

Can Mr. P. Hann say that testator had no interest in these transactions?

3. Mr. P. Hann's admission in paragraph 3, "there may have been individual items somewhat under-valued," is in direct conflict with paragraph 1, wherein he states the "whole of the station properties were over-valued." We had no desire to under-value or anything to gain by doing so." I reply by quoting a few extracts from Mr. Hann's letters, which I say reveal his motive for under-valuing the estate properties.

Extracts from letter written by Mr. P. Hann to Mr. Webb, 10th March, 1884, vide press-letter copybook No. 11, pages 286 and 287:—"I shall make a struggle to retain Baden Park." "I want to keep on Baden Park, and must try and do so."

Extract from letter written by Mr. P. Hann to Mr. Webb, 25th April, 1884, same book, page 494:—"I shall not sell Baden Park if I can possibly hold to it."

Extract from letter written by Mr. P. Hann to his former partner, Mr. James Smith Lavender, 25th April, 1884, vide press letter book, No. 11, page 500:—"If I could sell Mimosa by-and-bye, of course, at a loss, I would then try and stick to Baden Park for myself."

4. Mr. P. Hann states "he regards some of the statements by George Sandell as impudent libels." I suppose he refers to the old adage, "Greater the truth, greater the libel." His discrimination is great and his self-condemnation complete, as some of the serious allegations are admitted and the others proved.

5. Mr. P. Hann says that the allegations of No. 7 of the affidavit "have already been the laughing-stock of the Court of Equity;" but I can aver that had the Court of Equity been in the possession of the evidence now before me a more serious conclusion might have been arrived at.

6. That I have been prompted and inspired solely by my professional duties to lay before the Select Committee the true facts as to the value of the estate the late Mr. S. M. Swift died possessed of, and that during that investigation I have been compelled to wade through some of the most noisome and fraudulent transactions, perpetrated by the executors, Mr. P. Hann, Mr. C. H. Croaker, and others, and, if the necessity should arise, shall not shrink for fear of threats from disclosing them.

Sworn by the deponent on the day first above-mentioned at Sydney, before me,—

O. P. CLAYTON, J.P.

GEO. SANDELL.

THURSDAY,

* Not in affidavit. Book 12, page 61, 21st May, 1884. Hann to Pitt:—The copy of the Avington contract will do for us; you keep the original.

THURSDAY, 22 DECEMBER, 1898.

Present:—

MR. MCLEAN, | MR. MCFARLANE,
MR. O'SULLIVAN, | MR. THOMAS.
W. M. HUGHES, ESQ., IN THE CHAIR.

George Sandell recalled and further examined:—

33. *Chairman.*] How do you arrive at the conclusion that Mr. Hann has undervalued the estate? By G. Sandell, comparing the concealed assets with the real assets.

34. *Mr. McFarlane.*] What do you regard as concealed assets? Those which were not disclosed to the Stamp Commissioner. I would suggest that you have placed before you the absolute concealed evidence, of which I have evidence that the executors—especially Mr. Hann—had knowledge prior to signing his statement. In the first place, I would submit to you a statement of the wool account, as follows:—

Late S. M. Swift Estate—Wool.

[Extract from the New Zealand Loan and Mercantile Agency Co. (Ltd.) Account.]

		£	s.	d.
27 Feb., 1884.	Advance on 76 bales, ex. "Dumbarton".....	876	3	4
31 Mar., 1884.	" 6 " " "Rome".....	65	11	6
3 April, 1884.	" 188 " " "Port Jackson".....	3,384	0	0
3 " 1884.	" 1 " " "John Elder".....	12	13	0
	Surplus from 188 bales.....	830	4	5
	" 76 ".....	839	18	1
		<u>£6,008</u>	<u>10</u>	<u>4</u>

[Extract from the Australian Mortgage, Loan, and Finance Co. (Ltd.) Account.]

13 Mar., 1884.	Advance on 98 bales.....	1,600	0	0
	Surplus from same.....	608	2	2
		<u>£2,208</u>	<u>2</u>	<u>2</u>

[Extract from the Bank of New South Wales Account.]

15 Aug., 1884.	Proceeds of 128 bales.....	1,418	5	9
	Total, 497 bales—Amount.....	<u>£9,634</u>	<u>18</u>	<u>3</u>

I would refer the Select Committee to the accounts filed by the executors, Messrs. Hann and Croaker, on the application for probate, 5th April, 1884. The Committee will see that not one bale of this wool was therein disclosed, and I say that it would be difficult to believe that Mr. Hann, who claims one half share partnership, and especially as the active partner, keeping the station accounts, could have been unacquainted with the existence of this wool, having the different bank pass-book in his possession; and on reference to Mr. Hann's letter to the New Zealand Loan and Mercantile Agency Company (Ltd.), of 29th March, 1884, and to Mr. Hann's letter to Mr. J. S. Lavender, the valuator, of 29th March, 1884, it is clear that Mr. Hann had a full knowledge of 188 bales and 100 bales prior to swearing to the affidavit of 5th April, 1884; and I say that such wool therein named realised £5,632 10s. 2d. I produce the bank pass-books for the Select Committee's inspection. With regard to the wool which I have now disclosed to you, amounting, as I say, to 497 bales, realising £9,634 18s. 3d., not one bale was ever disclosed in the testator's account which Hann filed on application for probate.

35. *Chairman.*] Was any mention made about that in any subsequent equity suits? Yes. Nearly the whole of that amount has been brought in, but there still remains a number of bales which have not been accounted for. On a former occasion I brought to your notice the concealed land of Mimosa West. If you refer to the valuations made by the executors you will find that they only disclose 960 acres of freehold land and 320 acres of conditional purchase; but on reference to Mr. Hann's letter, book 12, page 503, in Mr. Hann's handwriting, I find that he says that there should have been £5,789 worth of land additional. That has been taken up in various selectors' names; and on reference to Mr. Hann's letter to Mr. Lavender, you will see the reason why he omitted this land from his valuation. The land conditions had not been properly fulfilled, and if he had disclosed these lands it would have been apparent to the Stamp Commissioner that dummying had been carried on at the stations; hence the omission. The value of the land amounted to £5,789, every bit of which was withheld from the statement he filed on application for probate.

36. *Mr. McLean.*] To whom do the records show that land belonged? To the stations interested. Mr. Hann's words give you that in his letter. I produce a copy of the letter from the press-letter copy-book No. 31, page 437, in Mr. Hann's writing, where he gives the details of this run, and says—

Mimosa—Land—Freehold, 960 acres.
C.P's. S & H to Freehold, 640 acres.
C.P's. outside 3,848 acres in S and H interest.
I.P's. applied for 1,280 acres.
" " pre leases 1,520 acres.

That follows on a letter written on the 3rd October, 1883, so that Mr. Hann had a perfect knowledge that there was a large quantity of land on the 3rd of October, 1883; yet in making his statement to the Stamp Commissioner on 5th April, 1884, he only declared, as I have mentioned, 960 acres of freehold land and 320 acres of conditional purchase land, so that he withheld a large parcel of land.

37. *Chairman.*] Have you any accounts to put in? Yes; as far as regards the suppression of the Mungie Bundie Estate. There has been a great suppression of the assets as far as that estate is concerned. Here is a report made on the 4th day of May, 1887. This is in the handwriting of Messrs. Peale and Borradaile, accountants, and it is signed by John McDonald. He was the claimant to one-half of the estate, and this occurs:

There were 85,241 sheep on the properties at the date of the late Mr. S. M. Swift's death.

In his schedule to the valuers he disclosed only 60,000 sheep. I am merely instancing this as one of the gross deceptions or concealments of the assets of the estate. McDonald, by that statement, acknowledges he made a false statement, and that is corroborated by the Stock Assessment returns he made up and

G. Sandell. and sent in. That shows that there are 79,000 sheep upon which they paid stock assessment. I have the original statements which were sent in.

22 Dec., 1898. 38. *Mr. McFarlane.*] What was the amount filed on the whole of the estate? £16,000.

39. And after your examination what do you increase the amount by? By £190,000.

40. Do you arrive at that by an examination of the books and accounts? By an examination and analysis of the statements made by Hann and his co-executor. The evidence Mr. Hann gave before the various courts proves these valuations to be correct.

41. Some reference was made to the Cox-Dowling estate? Yes. I have examined a statement given by Mr. Hann in the action of Swift *v.* the Bank of New South Wales. Mr. Hann says this:

Bills of Cox-Dowling & Co. maturing on the 22^d of May and the 6th of June. The bank hand over the bills as well as the gross payments to the bank.

Mr. Hann admits that the bank handed over those notes to him and his co-executor, but in his statement of the 27th September last he says the testator had no interest in them. In his evidence he admits he received them as executor.

42. There is some mention in your statement with regard to wool in transit;—what does that refer to? The statement I have handed in will embrace that wool.

43. What does the wool refer to? At the time of the testator's death there was certain wool belonging to the station which had been given to the various banks for realisation, and the value of the wool was not declared at that particular time.

44. Would it be possible for the executors not to have any knowledge of that? They could barely send wool to the banks without having knowledge of it.

45. Did the executors send it? Yes.

46. I understand that the value of the wool in transit was not filed? Not one bale of wool was declared in the probate statement.

47. *Mr. O'Sullivan.*] From the tenor of your evidence, I gather that you are under the belief that wrong accounts have been filed? Fraudulent accounts. No man could make a wrong account.

48. Your opinion is that fraudulent accounts have been filed and the Government have been defrauded of a considerable amount of stamp duty in consequence? That is my opinion.

49. Have you made any estimate as to the amount of duty of which the Government have been defrauded? The probate on about £190,000.

50. What would that come to? At that period the duty was 1 per cent. The amount would come to £1,900.

51. That means that the filing of these fraudulent accounts has caused the Government to be defrauded of £1,900? Yes, practically.

52. *Chairman.*] Two things follow from that—one is that the Government have been defrauded, and the other is that the estate has been defrauded? I think the estate has been defrauded of more than that, because Mr. Hann has carried on these transactions "on his own," and he has sent great numbers of sheep to the various stations, using the stations, and the expenses against the stations, and making great profits on his own account.

53. *Mr. O'Sullivan.*] Then Mr. Hann has really been working some of the Swift properties for the benefit of Mr. Hann? Entirely. In fact, I can show certain transactions here of a very doubtful nature in which Mr. Hann sold to a partner of his then existing (Mr. Halloran) sheep of the station in which he was professing to be a half-share partner, which had already been sold to another person (Mr. Winter Irving) for a larger amount. He sold these sheep to Mr. Halloran at 8s., and he had already sold the sheep for the estate for 10s. He makes out one account for this doubtful transaction, and the estate lose the profit of 2s. a head on 8,000 sheep. I have the invoice of Mr. Bates—the gentlemen who sold the sheep—who says he sold them for Swift and Hann. Then Mr. Hann wrote back to this man at Melbourne, and says, "You must change these to Halloran." Halloran is Mr. Hann's partner; and Mr. Bates changes them to Halloran. He says, "It makes no difference to the purchaser; I am arranging the bills, as I want them to be." He sent the four bills, and Mr. Winter Irving signs them according to Mr. Halloran's arrangement. Two of them come into the estate, and two of them do not.

54. Do you know whether Mr. Hann is alive and flourishing? I do not know whether he is flourishing, but he is alive.

55. Is it not an extraordinary thing that that kind of thing can go on in a civilised country without being checked? There are more wonderful things still. Take the proceedings of the Bank of New South Wales so far as regards the mortgage. You will find that the Bank of New South Wales arranged with Mr. Hann to give him an overdraft after the testator's death. There are letters which Mr. Hann wrote to the Bank on the 25th February—seven days after the testator's death—asking the Bank to give him an overdraft, and to continue the account in the name of Swift and Hann. The Bank allowed him, but they required a further mortgage. Then Hann, in his private capacity, sends to the Bank of New South Wales, and says, "I will give you a further charge upon Baden Park and 20,000 sheep." Mrs. Swift declined to enter into this transaction. The Bank still presses, and Hann and Croaker carry out that mortgage after the testator's death. The Bank of New South Wales then tried to get a proper mortgage, but they, first of all, have to find out who holds the property. Mr. Brodribb, who had lent the testator £8,000 upon this property, had been paid off on the 3rd December, 1882, but still the runs remained in Mr. Brodribb's name, and they still remain. The testator, in the meanwhile, had obtained a loan from the New Zealand Bank for £8,000 odd, and had given no equitable charge upon the property, but intended to do so. The Bank of New South Wales wished to get hold of that property. The Bank of New South Wales go to the Bank of New Zealand, and pay the Bank of New Zealand, in March, 1885, £4,300; then they go to Mr. Brodribb and say to him, "Give us a transfer of these runs," placing the consideration value, £4,300, in the two transactions. They never gave a pennypiece to Mr. Brodribb, and obtained the value of that run. The value of the property they had thus acquired, which was a fraudulent transfer, for £4,300, amounted, from the Bank's statement, which I have in the bank manager's handwriting, to £60,000. During 1885, 1886, and 1887 the Bank of New South Wales received, by way of sales of sheep—I can give you the details—and the clips, £31,330 for their advance of £4,300 to the New Zealand Bank Company. What sort of a transaction do you call that? The Bank knew of the testator's death, and they knew perfectly well that Mr. Hann had no right to mortgage.

ESTATE OF THE LATE S. M. SWIFT, OF PETERSHAM.

APPENDIX.

A 1.

[To Evidence of Mrs. Elizabeth Swift.]

COPY OF WILL OF SAMUEL MOFFITT SWIFT.

I, SAMUEL MOFFITT SWIFT, of Petersham, near Sydney, in the Colony of New South Wales; grazier, hereby revoke all testamentary dispositions by me at any time heretofore made, and declare this to be my last will. I appoint Phineas Hann, of Wagga Wagga, in the said colony, grazier; Charles H. Croaker, of the same place, bank manager; and my wife, Elizabeth Swift, trustees and executors of this my will; and I declare that whenever the words "my said trustees" shall be found in this my will the same shall be taken to include, not only the said Phineas Hann, Charles H. Croaker, and Elizabeth Swift, but the survivors and survivor of them and the heirs, executors, and administrators of such survivor, and other the trustees or trustee for the time being of this my will. I direct the payment of my debts, funeral and testamentary expenses, as soon as conveniently may be after my decease and subject thereto. I give, devise, and bequeath all my real and personal property, of what nature and kind soever, and wheresoever the same may be situate, unto my said trustees, according to the nature and quality thereof respectively, upon the trusts and with, under, and subject to the powers, provisions, directions, and declarations hereinafter contained concerning the same—that is to say, upon trust, with all convenient speed, to sell and convert into money the whole of my said real and personal estate, or so much thereof as shall not consist of money either altogether or separately, and either by public auction or private contract, and with such conditions and upon such terms, either as to time and manner of payment, otherwise and generally in such manner as to my said trustees shall seem most advisable: Provided always and I hereby empower my said trustees to postpone the sale of the whole or any part of my said real or personal estate to such time or times as they shall in their discretion think proper. And upon such sale and conversion as aforesaid, I direct that my said trustees shall stand possessed of the proceeds of such sale and conversion and of the money forming part of my personal estate upon trust, thereout in the first place to pay to my brother, Richard John Swift, of Keriagh, in the county of Longford, Ireland, the legacy or sum of five hundred pounds, free of legacy duty, and also to pay to my sister, Mary Cody, wife of Matthew Cody, of Mimosa Station, near Wagga Wagga aforesaid, station manager, the legacy or sum of two hundred and fifty pounds, free of legacy duty. And after payment of such legacies, upon trust to invest the residue of my said estate and the proceeds thereof in or upon Government or real securities in: S. M. Swift; witnesses—J. P. Abbott, John A. K. Shaw: the colony of New South Wales, or the shares of any joint stock company carrying on the business of banking in the said colony, with power from time to time to vary any of such investments for others of the nature hereby authorised. And I direct that my said trustees shall divide the said investments into so many equal shares as shall be equal to one more than the number of my children living at my death, and appropriate one of such shares for the benefit of my said wife, and one of such shares for the benefit of each of my said children, and shall hold and apply the same in manner hereinafter directed. I direct that my said trustees shall stand possessed of the share appropriated for the benefit of my said wife upon trust during her life, or until she marries again, and pay to her the interest, dividends, and annual income of such share by equal half-yearly payments, with power to advance to my said wife out of the capital of such share such sum or sums as they shall think necessary for her maintenance, if the interest, dividends, and annual income shall be insufficient for that purpose; and in the event of her marrying again I direct that my said trustees shall settle the said share upon trust during the life of my said wife for her sole and separate use, without power of anticipation, and after her death in trust for such persons as my said wife shall, notwithstanding coverture by will, appoint, and, in default of any such appointment, or so far as the same if made shall not extend, in trust for such of my children as shall be living at the death of my said wife, and, if more than one, in equal shares. But if my said wife shall not marry again, then I direct that at her death her said share shall be held by my said trustees upon the same trusts upon which I have hereinbefore directed that it should be settled after her death in the event of her marrying again. And as to the shares hereinbefore directed to be appropriated for each of my said children, I direct that my trustees shall stand possessed of such share upon trust to pay and apply the interest, dividends, and annual income thereof for the purpose of maintaining and educating the child for whose benefit such share shall be so appropriated until such child, if a son, shall attain the age of twenty-five years, or, if a daughter, shall attain that age or marry with the consent and approval of my said trustees. And I empower my said trustees out of the capital of any such share: S. M. Swift; witnesses—J. P. Abbott, A. K. Shaw: to advance such sum or sums as they shall think proper for the maintenance, education, and advancement in life of the child for whose benefit such share shall have been appropriated. And I direct that the share of every son who shall attain the age of twenty-five, or die under that age having issue, shall, upon the happening of either such events, be held by my said trustees in trust for such son, his executors, and administrators absolutely; and that the share of every daughter who shall attain the age of twenty-five years, or marry under that age with the consent and approval of my said trustees, shall, upon the happening of either of such events, be settled by my said trustees upon trust for such daughter for her separate use during her life without power of anticipation, and after her death in trust for such persons as such daughter shall by will appoint, and in default of such appointment in trust for the persons who, if she had died intestate and unmarried, would have been entitled under the Statute of Distributions to participate in her estate. Provided always, and I hereby direct, that if any child of mine shall die under the age of twenty-five years without having lawful issue, if a son, and without having been married, if a daughter, the share of the child so dying shall go and be divided amongst my other surviving children, share and share alike. I devise and bequeath all estates vested in me as trustee or mortgagee to my said trustees, upon the trusts and subject to the equities affecting the same respectively. In witness whereof I have hereunto set my hand, and declare this to be my last will and testament (written on three sheets of paper), this twenty-second day of December, in the year of our Lord one thousand eight hundred and eighty-one.

Signed by the said testator, as and for his last will and testament, in the presence of us, }
 present at the same time, who, at his request, in his presence, and in the presence of each }
 other, have hereunto subscribed our names as witnesses, the alteration in the thirty-first }
 and thirty-fourth line of the first page having been previously made.

S. M. SWIFT.

J. P. ABBOTT, Solicitor, Sydney.
 JOHN A. K. SHAW.

We certify that the writing contained in this and the three preceding pages of brief paper is a true copy of the will of Samuel Moffitt Swift, the same having been examined therewith by us this twenty-fifth day of February, 1884.

[Extract taken from the Sydney Morning Herald at the Library.]

IN THE SUPREME COURT OF NEW SOUTH WALES, ECCLESIASTICAL JURISDICTION.

In the will of Samuel Moffitt Swift, late of Petersham, near Sydney, in the colony of New South Wales, grazier, deceased.

NOTICE is hereby given that, after the expiration of fourteen days from the application hereof in the New South Wales *Government Gazette*, application will be made to this Honorable Court, in its Ecclesiastical Jurisdiction, that probate of the last will and testament of the abovenamed deceased (who died on the 18th day of February instant) may be granted to Phineas Hann, of Wagga Wagga, in the said colony, grazier; Charles Hawthorne Croaker, of Wagga aforesaid, bank manager; and Elizabeth Swift, of Petersham aforesaid, widow, the executors and executrix named in and appointed by the said will.

Dated this 22nd day of February, A.D. 1884.

ABBOTT AND ALLEN,
Proctors for the Applicants.
Wentworth Court.

I.

FORM of affidavit to be sworn and lodged with the application for obtaining any probate or letters of administration relating to the estates of deceased persons, for the purpose of getting such probate or letters of administration stamped under Act 44 Vic. No. 3.

NEW SOUTH WALES, } In the will of Samuel Moffitt Swift, late of Petersham, in the colony aforesaid, grazier, deceased.
TO WIT. }

On the fifth day of April, one thousand eight hundred and eighty-four, Phineas Hann, of Wagga Wagga, in the colony of New South Wales, grazier, and Charles Hawthorne Croaker, of Wagga Wagga aforesaid, bank manager, being severally duly sworn, make oath and say as follows:—

1. We are two of the parties making application for the purpose of obtaining probate of the will of the abovenamed deceased.

2. The estate and effects of the said deceased, of which administration is sought to be obtained, as shown in the annexed inventory, after deducting the debts due and owing by the deceased, are under the value of forty-six thousand nine hundred and fourteen pounds eighteen shillings and seven pence, to the best of our knowledge and belief.

P. HANN.
C. H. CROAKER.

Sworn by the deponents on the day first above }
mentioned, at Wagga Wagga, before me,— }

HY. BERKELEY FITZHARDINGE,
A Commissioner for Affidavits.

Inventory referred to in the preceding Affidavit.

Full particulars and value of the estate and effects of the deceased.	£ s. d.	Full particulars of the debts due and owing by the deceased.	£ s. d.

[To Evidence of Mrs. Elizabeth Swift.]

[COPY.]

Sydney, 8 February, 1881.

MEMO. of Agreement entered into this 9th (ninth) day of February, 1881 (eighteen hundred and eighty-one), between John McDonald and S. M. Swift, both of Mungie Bundie, Moree, Gwydir District. They both hereby agree that, having purchased J. H. Spiller's share between them for the sum of £16,500 (sixteen thousand five hundred pounds sterling), that they further agree to draw every six months, and divide in two equal shares, the sum of £1,100 (eleven hundred pounds sterling), being the about bank interest on Spiller's share, and they further agree to carry on business in the name of John McDonald & Co. as hitherto, and from year to year under the management of John McDonald as formerly; and further that on the 31st December of each year that a balance-sheet be made out to enable us to meet any further arrangement that may be mutually agreed upon.

Witness—(L.S.) H. S. BADGERY.

(L.S.) J. McDONALD,
S. M. SWIFT.

B 2.

[COPY.]

Dear Hann,

30/1197.

I have your letters of 5th and 7th inst. re Swift matters. I would most willingly go to Queensland and do what I could for the estate if I could only spare the time; but by doing so I would be neglecting my work here. We have gone through such hardships here that everything is out of order, and will take me all my time to put them right before shearing. When in Sydney Mr. Kilgour promised that he would do anything he could for the estate towards getting paddocks for the sheep, &c. I mentioned this to Mrs. Swift. With reference to your remarks that being a partner longer than you, and therefore should go out and arrange matters, I will call your attention to the fact that entirely owing to that, and to try and relieve the private estate, I took over a purchase of £6,000 worth of sheep in the face of a season where I am likely to lose £2,000 for so doing; also, that against my advice the trustees held on to the Bunerah contract when they could, according to their own showing, have got out of it without any refunds whatever being paid out of the estate. And further, that you undertook a trust willingly, and now, owing to various reasons, things have got into a mess. It is not reasonable to suppose that I can neglect the trust that I have here and go and try to rectify things which I would have to learn all about, and which you should have at the ends of your fingers.

Re Abbott and Allen. They notified me to same effect re agreement not to sell. Their delay in not giving this earlier I do not know anything of. Their wanting to see me could not have anything to do with it, as the opinion is dead against my wishes in the case. As to your idea of changing them because they act for me, Mrs. Swift, and the estate, the work they have done trespass case, which is settled by defendant paying money into court. This, I hope, finishes my business with them. I understood Mrs. Swift consulted them on estate matters only. I will hunt up the partnership memo., for such it was, drawn up by myself. I think it is either with A. and A. or bank; will find it and send you copy. My books can be examined whenever your appointed accountant is ready. I have not made any statement or balance-sheet, as I suppose no accountant would accept it without having the books to verify it. Mrs. Swift may be party to what you say, but think, had you consulted with and explained matters as you now do, she would not have given you so much trouble. And this is just what I have been writing you, to give and take, and all pull together, instead of against each other. The sooner things are wound up the sooner you will settle into your places. I should think now would be the time to sell the summer runs, Saubba and Three Falls, as the plains are afraid of the season, and must either sell stock or get country.

Yours faithfully,
J. McDONALD.
