Parramatta, 14 June, 1872.
Sir,
7onry In reply to your letter of the 12th instant, requesting me to furnish certain information which has been called for by the Legislative Assembly, in connection with the discharge of a boy named Pilbean from this Institution, I have now the honor to forward :-

1. Copy of letter from W. Tunks, Esq., dated 18th January, 1872.
2. Copy of reply of the Master to Mr. Tunks's letter, dated 20th January, 1872.
3. Copy of Matron's letter of 13th February to the Principal Under Secretary, recommending discharge of lad named Pilbean.
4. Copy of Mr. E. Suttle's application for an Orphan School apprentice.
5. Copy of Principal Under Secretary's letter of the 16 th February, 1872, approving of Frederick Pilbean being apprenticed to Mr. E. Suttle.
6. Copy of undertaking by Mr. Suttle, dated 9th March, 1872, to execute Frederick Pilbean's indentures when called upon.
7. Copy of Frederick Pilbean's indentures.

I may explain, with reference to paper No. 6, that when this lad was assigned to Mr. Suttle, I had expended all the indenture forms for male apprenticcs in my possession, and on application to the Government Printer, female apprentice forms were sent, the others not being in stock. As Mr. Suttle required the boy urgently, and I did not wish to retain him here while fresh forms were being printed, I took an undertaking from him to sign the usual indentures when called upon; and before they were finally completed by Mr. Suttle, the lad was accidentally killed.

I have, \&c.<br>M. BETTS, Matron.

(1.)
W. Tunks, Esq., M.L.A., to The Master of the Protestant Orphan School, Parramatta.

St. Leonards,
18 January, 1872.
Dear Sir,
Mr. Elijah Suttle, carrying on an extensive business here, is desirous of obtaining a boy from your Institution as an apprentice for five years, to learn his trade of bread baker. Mr. Suttle is willing to board and lodge the boy, and to pay him, in lieu of clothing, during the first year, the sum of four shillings per week, and for the second year six shillings and six pence per week, and so on, increasing two shillings and sixpence per week each year, being fourteen shillings per week for the fifth year. I shall feel obliged by your informing me whether you have a strong and willing lad fit to be apprenticed to learn a trade on the above (in my opinion) excellent terms?

$$

& \text { I am, \&e., } \\
& \text { WILLIAM TUNKS. }
\end{aligned}
$$

Consulted Mr. Byrnes, and he cannot allow Pilbean to go, except on usual terms.-E.M.B., 13 February, '72.

Wrote to Mr. Tunks to say I had selected Pilbean, and would send papers on at once; meantime Mr. Suttle can see Pilbeau if he wishes.-E.M.B., $9 / 2 / 72$.
(2.)

The Master of the Protestant Orphan School, Parramatta, to W. Tunks, Esq., M.L.A.
Protestant Orphan School,
Parramatta, 20 January, 1872.
Dear Sir,
In reply to your note of the 18th instant, I beg to enclose a form of application for Mr. Elijah Suttle to fill up and return. His offer is a very liberal one, and I will endeavour to find him a suitable lad.

The indentures, under which the children are bound, provide that the masters should clothe them, but I believe an arrangement so obviously favourable to the apprentice as the one proposed in your letter could be entered into. On receipt of Mr. Suttle's application, I will again communicate with you on the subject, and in the meantime I can lay your letter before the Trustees.

> I am, \&c.,
> E. M. BETMS.
(3.)

The Matron of the Protestant Orphan School, Parramatta, to The Principal Under Secretary. Protestant Orphan School, Parramatta, 13 February, 1872.
Sir,
I am directed by the Trustees of this Institution to recommend that the Honorable the Colonial Secretary will be pleased to approve of the lad named in the margin being apprenticed to Mr. Frodercek Elijah Suttle, of North Shore (whose application is enclosed), as a baker, for the term of five years. ${ }_{142} 14$ yeanra

Male Apprentice.
Thrs Indenture, made the 9 th day of March, in the year of our Lord one thousand eight hundred and seventy-two, between the Honorable James Byrnes, Esquire, and Mrs. Martha Betts, Trustees duly authorized and empowered by His Excellency the Governor of the one part, and Mr. Elijah Suttle of the other part: Whereas by a certain Act of the Governor of the Colony of New South Wales, with the advice of the Legislative Council, passed in the fifth year of the Reign of His Majesty King William the Fourth, entitled "An Act for apprenticing the Children of the Ifale and Female Orphan Schools, and other poor Children in the Colony of New South Wales," it is amongst other things enacted, that it shall and may
be lawful for the Governor of the said Colony, from time to time, by any writing duly aigned by him, to authorize and empower any two or more fit and proper persons to bind any of the male or female children admitted into the said Orphan Schools, and all such other poor children as shall from time to time be sent out from any part of the Enited Kingdom to this Colony, at the expense of Her Majesty's Government, or of Parishes or Charitable Institutions, to be established and provided for, as in the said Act is stated, when they shall have respectively arrived at fit and proper ages to be apprentices to such masters or mistresses, and such trades, as shall be approved of by His Excellency the Governor: And whercas the said James Byrnes and Martha Betts have been authorized and empowered by His Excellency the Governor, in the manner required by the said in part recited Act, to bind such male children as aforesaid apprentices: And whereas His Excellency the Governor has approved of Frederick Pilbcan, aged fourteen and a-half years, who is one of such male children, being bound apprentice to Mr. Elijah Suttle, of St. Leonards, to learn the trade or business of a baker: Now this indenture witnesseth, that the said James Byrnes and Martha Betts, in pursuance of the said in part recited Act, have put, placed, and bound, and by these presents do put, place, and bind, the said Frederick Pilbean to be an apprentice with the said Eijijah Suttle, and as an apprentice with the said Elijah Suttle, to dwell, unto the full end and term of five years, from thence next following, to be complete and ended, during which term the said apprentice his said master well and faithfully shall serve in all his lawful business to the best of his power and ability, his secrets keep, his lawful commands everywhere gladly do, and honestly, orderly, and obediently in all things behave himself towards the said Elijah Suttle, and towards all other persons having lawful charge of said apprentice, during the said term ; and in all things as a faithful apprentice he shall behave himself towards his said master, and all his family during the said term; and the said Elijab Suttle, for and in consideration of the faithful service of the said apprentice, as aforesaid, doth hereby, for himself, his executors, and administrators, promise and covenent to the said James Byrnes and Martha Betts, Trustees aforesaid, and each of them, their and each of their executors and administrators, and their and each of their successors as Trustecs for the time-being, and to the said apprentice, that he the said Elijah Suttle, in the craft, art, or business of a baker the said Frederick Pilbean shall and will teach, instruct, and inform, or cause to be taught, instructed, and informed, in the best way and manner that he can; and that he the said Elijah Suttle shall find, allow, and provide the said Frederick Pilbean with sufficient, competent, and suitable meat, drink, clothing, washing, lodging, bedding, and all other things needful and meet for an apprentice during the said term; and also that the said apprentice shall attend Divine Service-when practicablc-at least once on every Sunday during his said apprenticeship ; and the said Elijah Suttle shall and will pay and have particular attention paid to the morals of the said Frederick Pilbean; and also that the said Eljak Suttle shall and will pay unto the Savings' Bank of the said. Colony, in the name of the said apprentice, the yearly sum of two pounds for each and every year during the last three years of the said term; and for the true performance of all and every the said covenants and agreements the said Trustees bind the said apprentice, and the said Elijah Suttle bindeth himself, his heirs, executors, and administrators firmly by these presents.

In witness thereof, the parties aforesaid to these indentures have interchangeably set their hands and seals at Parramatta, in Her Majesty's territory of New South Walcs, the ninth day of March, in the year of our Lord one thousand eight hundred and seventy-two.

1st Trustec--JAMES BYRNES.
2nd Trustee-MARTHA BETTS.

# LaND ADJOINING NEW SCHOOL OF INDUSTRY. 

Ordered by the Legislative Assembly to be printed, 20 June, 1872.
(See Answer to Question No, 6, in Totes and Proceedings No. 15, of Wednesday, 19th June, 1872.)
To His Excellency the Administrator of the Government, and the Honorable the Executive Council of
New South Walcs.
The Petition of tho undersigned Roman Catholic Archbishop of Sydney,--

1. That in the year one thousand eight hundred and thirty-seven an acre of land, on the eastern side of Her Mnjesty Gaol at Darlinghurst, was, at the solicitation of your Petitioner, granted by Governor Sir Richard Bourke to certain gentlemen, in trust, for the erection thereon of a house to be used as a refuge for Destitute Females, and that the said land within the last four weeks has been resumed by Government as a forfeiture, because a condition, requiring the erection of a house within two ycars from the date of grant, had not been fulfilled.
2. That although a house was not built on the said land within the required two years, yet a house, such as was possible to us, and sufficient for a time, was built there twelve years ago, and has ever since been 1859 . in full operation, supplying, under direction of a Matron, a temporary home to servant women out of place.
3. That Government approved the dedication of the charity to the kind of relief and to the class of person for whose protection it has been exercised. In verification of this assertion, your Petitioner desires to reffr to the correspondence with which he was honored by Government on the subject in the year one thousand cight hundred and fifty-seven.
4. That to resume the land without a word of notice or warning in past years, after it had been so long in possession of the Trustees, and after it had been, if not from the stipulated moment, yet at any rate for the last twelve years, actually occupied, as it was designed to be occupied, must appear to all a procedure scarcely in accord with the usually benignant consideration and forbearance of our Government in dealing with the promotion of public charities.
5. That if it be alleged the said "Servants' Home" was not intended for Roman Catholic servants exclusively, your Petitioner has to answer that others bave on no occasion been excluded. It has been under the manarement of Catholics simply because they alone have undertaken the task, and as a natural consequence of the fact that your Petitioner originally solicited the grant, and that the majority of the Trustees were Roman Catholics.
6. That your Petitioner therefore is not officiously assuming a needlcss prominence when he ventures to submit to your Ficellency and Honorable Council, as he now does, the consideration that the Roman Catholics of the Colony have not descrved ill of the Governuent and 1heir fellow-colonists in excrtion and sacrifice to take a good share in the buildings and public charities that adorn and benefit the City of Sydney. Your Petitioner asks to be allowed to point out, that in St. Vincent's Hospital, open to all classes, and on the Convent, from which it is served, a sum of not less than fifteen thousand pounds has been expended, and again, on the "House of The Good Shepherd," also open to all, there lias been laid out, from the beginning to the recent handsome addition, upwards of eight thousand pounds; again, on this very land in question Roman Catholics alone have, on the fencing and the existing building, spent during the last twelve years more than six hundred pounds.
7. Your Petitioner does not presume to question in any way the right of forfeiture, which has been in this case so unexpectedly and summarily excrcised, but he very respectfully and anxiously submits the premises as not unworthy of some indulgent consideration, and thereupon he prays your Excellency and Honorable Council,-..

That the instant proccedings of ejectment and demolition may be stayed, and that a fresh grant of the said land may be accorded, either on the original terms, or with such reasonable modifications of tenure and application as under the circumstances may to your wisdom and indulgence seem most fitting.

And your Petitioner will ever pray, \&c.,
$\dagger$ J. B. POLDING, Sydniensis.
Sydney, May 23rd, 1872.

# HOSPITAL FOR THE INSANE, GLADESVILLE. <br> (REPORT FOR THE YEAR 18i1.) 

The Mentcal Suphrumendent of the Hospital for tue Insane, Gtadestidee, to The Cotontat. Sebretary.

Hospital for the Insane, Gladesville,
1 Mareh, 1872.
$S_{\text {IR }}$,
I have the honor to present, for your information, a Report on the condition of the Hospital under my superintendenco during the yoar 1871, with an Appendix of Statistical Tables.

As shown in my Report dated January 30th, 1871 , thenumber of patients in Hospital on December stattstive. 31st, 1870 , was 500 , of whom 254 were males and 246 were females.

The admissions during the year have numbered $277-172$ males and 105 females. Of this total number, 222 were admitted for the first time, and the remaining 55 had been at some time previously in Hospital.

The total number under care during the year was $777-426$ males and 351 females, and the average daily number resident was 513.

The number discharged during the year was 257 , of whom 93 had recovered, 13 were relieved, and 151 were discharged to other Institutions for the Insane as not inproved.

The deaths were $35-27$ males and 8 females,--and these make up a total of 292 patients discharged and died during the year.

On Decembor 31st, 1871, the number of patients in Hospital was 485-of whom 229 were males and 256 were females.

Thesc figires are set forth in a tabular form in the Appendix (Table I).
The number of admissions (277) is 50 in excess of that for the year 1870 , and upwards of 50 in admlssions. excess of the number admitted during any previous year in the history of the Institution,

The main cause of the increase is, I belicve, due to the rapid increase of population, bringing with it its given ratio of insane persons; but a special cause which has helped greatly to swell the number is the general monetary and commercial depression from which the whole Colony has suffered. This cause has acted in a threefold manner:-
1.st. As a directi producer of insanity.

2 nd . By excluding from employment the partially insaue and weak-minded who, in times of prosperity, find work, but in timos of depression and struggle, fail to obtain it, and fall into the hands of the police as vagrants, or else seek shelter in Benevolent Asylums, and are, in either case, sent on to the Hospital as soon as their mental peculiarity is discovered.
3rd. By obliging persons who, in prosperous circumstances, maintain the idiotic, harmlessly insane, and imbecile members of their families at home, to cast them upon the Governnent for support.
It is in the latter modes that the action of adverse times has been most apparent. A large proportion of the admissions have been imbecile children, or chronic and more or less harmless lunatics-both classes serving to swell the great and increasing number of incurable cases.

Of the 55 cases readmitted during the year, 12 had been only temporarily absent from the Hospital, having been transferred to other Institutions for the Insane, owing to want of room, and readmitted when additional accommodation had been afforded; and 4 lad been previnusly discharged to the care of friends, still insane, but more or less quiet and harmless. The relapsed cases werc therefore 39, and the average time of absence from Hospital was 3 years- the longest being 20 years, the shortext 14 days.

The relapses and consequent re-admissions are sometimes regarded as an opprobrium to Asylum management and treatment, but there is $n o$ reason to think that relapse is more freguent after discase of the brain than after disense of the lungs, heart, liver, \&c. The daily experience of all of us, whether medical men or not, shows that an organ which has been weakened by disease is loss able to withstand untoward influences, and more liable too diseased action than one which has hitherto been healthy; and is especially subject to distrobance from the same canses which set up the original mischief.

After every care that can be exercised in placing the patients, when discharged, in favourable circumstances, after caution and advice abundantly reiterated, it large number return to circumstances and surroundings, to habits and influences, which have been in many cases the direct cause of, and in others, have had a large share in predisposing to the original attack. Not a few are, on discharge, friendless, penniless, and alone, and have to commence again the battlc of life with heavy odds against them. The difficulties attending the discharge of patients, and the fear of relapse, are from this causo alone much greater here than in Great Britain, and it is not surprising that a number return to Hospital.

One of the relapsed cases was admitted for the seventh time, and, as the type of a class, besidos being the instance in which the relapse has been most frequent, is here particularly noted.
M. E., aged 70, a lively old Irishman, much given to drink, has served his Country in the Army for some years, and has now a pension of a shilling per day. He was first admitted in July 1858, and the present is his seventh attack of mental excitement-all being due, more or less, to intemperate habits. The total time spent in Hospital during the last 13 years and 8 months has been 2 years and 5 months-the total time away from Hospital has been 11 years and 3 months: so that even in this extreme case of relapse the Hospital has been of service, inasmuch as it has been the means of restoring to the individual his reason, and the possibility of obtaining a livelihood, for more than threo-fourths of the total period siuce he first came under treatment.

The general bodily condition of the patients on admission has again been very satisfactory-they have as a rule been clean and free from marks of violence--a condition which is highly creditable to the officers of the Police, of the Grols, and especially to the staff of the Lunatic Reception House at Darlinghurst, through which a very large number of the cases now pass on their way to Hospital. (Vide Return, Appendix A.)

After much correspondence, I now receive, in almost all cases, either copies of the medical certificates, or depositions, or "Statement of Particulars"; but in many cases the history thus afforded is scanty in the extreme, and is not unfrequently confined to a fev social particulars, such as age, number of children, residence, \&c. By a reading of the sections 1 and 2 of the Act 7 Victoria, No. 14, the correctness of which I venture to question, a large number of patients are transmitted to Hospital without any prior signature of medical certificates. A deposition containing merely an cxpression of opinion on the part of two medical practitioners that the patient is a dangerous lunatic, without any reason being given, is considered sufficient. The corroborative evidence is, in many instances, of the vaguest description, and not unfrequently has reference to times long antecedent. The grounds, therefore, upon which patients are considered of unsound mind, are not stated at the time, and there are no means of ascertaining them subsequently. Such a record, of what are in many cases the earlier symptoms, as would be afforded by medical certificates, setting forth the facts indicating insanity, would be of the greatest service, because these symptoms have, in many cases (owing to the length of time which has elapsed) subsided or totally changed when the patients are admitted. I have no hesitation in saying that under the present system patients have been sent to me who should not have been, and to whom justice has been scantily done by as speedy a discharge as possible, and attention to purely physical ailments in the interim.

I should be glad to see such an alteration of law or practice as would necessitate the production of a medical certifcate setting forth the facts upon which the opinion as to unsoundness of mind is formed, in every case, before the patient is sent to Hospital.

The recoveries during the year have been 93, a percentage on the admissions of $33 \cdot 57$. This percentage of recoreries, which is about equal to that obtained in England* during the year 1870 (the latest return which has reached me), is less than the percentage during the two preceding years, and is not so satisfactory as I either expeeted or desired. The falling off is to some extent accounted for by the hopeless character of a large number of the cases admitted. The exigencies of statistics have required the calculation among the admissions of twelve cases of a chronic character, which were only temporarily absent from the Hospital, haring been transferred to other Institutions for the Insane, and readmitted when additional buildings were erected. The proportion of recoverics, calculated on the admissions, is thus lowered by 2 per cent., and it should be remarked also that the milder cases of insanity do not now reach the Hospital, but are discharged from the Receiving House.

One of the events of the year was the recovery and discharge of a Chinaman,-the first instance for some years, and I believe the second or third since the establishment of the Institution. I have now had 28 natives of China under my care, 17 were in Hospital prior to my taking charge as Medical Superintendent, and 11 have been admitted since. Though, as a rule, treacherous and suicidal patients, they present every variety of unsoundness of mind, but seem all alike unamenable to treatment. They, as a rule, speak but little English; communication with them is difficult, and the impression so often made by reasoning and persuasion, and by the association with those of sound mind, is altogether lost to them. Even in case of apparent recovery the reality of the event is doultfful, owing to the means of examination being wanting, and the discharge is a matter of anxicty and care. I have not failed to avail myself of the assistance of a Chinese Interpreter, I have specially encouraged the visits of Chinese friends whenever they have appeared, but I must confess to a want of success which is far from cheering.
Pationts
relieved.
The number of patients relieved, and so far restored to sanity as to be able to return to the care of friends, was 13. Under a law allowing a more prompt and ready discharge to the care of friends, or a discharge on trial, this number might have been considerably increased, with advantage to the patient and with perfect safety both to the patient and to the public.

The amended Regulations for the discharge of patients, issued July 18, 1869, have been virtually useless, owing to a bond (a formidable legal document) being required from the friends, and to the absence of any provision for a speedy return to Hospital in case of an exacerbation of the mental disease.

The impossibility, under the present lunacy law, of discharging patients on trial, has in some instances a very prejudicial effect. A certain class of patients, by means of the quiet and order of the Hospital, and the care bestowed upon them, recover from the acute symptoms of their malady and progress far on the road towards sanity, but make no improvement beyond a certain point. At this stage the restraints of
H.ospital

[^12]Hospital kecp up an irritation and worry, in some temperaments, which is directly antagonistic to complete recovery. The stimulus of out-door life and congenial occupation, which would lift the patient into sanity, or the soothing influences of home life, which would smooth the path thither, are wanting, and the patient too often sinks into what has somewhat unjustly been termed an "Asylum-made lunatic."

To bring the statistics of this Institution in accord with those of similar Institutions in Great Patiente dibBritain, all the cases of discharge by transfer are placed under the heading of "not improved," and the charged cho large number of 151 thus appear in the statistical tables. Of these, 126 were transferred to the Lunatic Asylum, Parramatta, 12 to the Licensed House for Lunatics at Cook's River, and 13 to the Asylum for Imbeciles, \&c., at Newcastle. As a matter of fact, ar large number of those transferred could not have been sent from this Hospital unless very considerable improvement had taken place in their mental condition. Many who when admitted were noisy, destructive and violent, left the Hospital quiet, comparatively harmless, and fit to occupy the associated dormitories which form the almost entire accommodation at Parramatta, Cook's River, and Newcastle.

The donths during the year were 35 , and gave a percentage of 6.82 on the average number resident. Deaths. The mortality among the females, as in 1869 and 1870 , was much less than among the males, -the former being only 3222 per cent., whilst the latter was 10.18 per cent. The small mortality speaks highly for the general sanitary condition of the Institution.*

The causes of death are set forth in the Appendix, Table อ. In 7 cases, death was due to maniacal or melancholic exhaustion; in 5 , to epilepsy; in 4, to general paralysis ; in 5 , to dysentery and diarrhea; and in 2 , to the very rare form of disease-cancer of the brain; whilst pulmonary consumption, so fatal in English Asylums as to generally cause about 10 per cent. of the mortality, reckoned only a single victima fact I beg to commend to the attention of those who are studying the at present vexed question of the climate of Australia in relation to phthisis.

No case of suicide or of fatal accident has occurred during the year-a result mainly due to the vigilanco and care of the staff under my direction, and for which I am deeply thankful. The minor accidents have been few and trivial.

The general healtin of the inmates has been very satisfactory-much more so indeed than could Gencrat health have been expected, consideriug that the number has been greatly in excess of the accommodation, and that an average number of 513 patients have been maintained in rooms calculated to hold at the utmost 400. A low form of purpura has at times been troublesome, and a few cases of idiopathic erysipelas have appeared in the female division.

In Table X will be found such a tabulation of the probable causes of insanity, apparent or causation of assigned, in the admissions, discharges, and deaths during the year, as the very imperfect information at my command will allow me to make. This tabular statementi I do not intend to analyze, far less can I enter at length into the vast and difficult question of the causation of insanity, but some few notes may neither be out of place or unacceptable.

The expcrience of another year has strengthened the opinions $I$ hare before cxpressed in reference to drunkenness as a cause of insanity. My own returns show it as a direct cause in 14 out of 277 admissions, - $a$ number doubtless below the truth. The Victoria Returns for the year $1870 \dagger$ give the proportion of 19 per cent., and these Mr. Paley analyzes, in his masterly Report for the year, and shows the proportion stated to be probably in excess of the reality.
"It is singular," writes Mr. Paley, "that among the whole of the male admissions during the year, only two persons were to be found connected with the sale of intoxicating liquors."
"Among the female admissions, intemperance was, without doubt, a very small cause, and the number assigned to it is probably slightly in excess."
"Intemperance is a cause so readily seized, so casily packed into one word, it comes so easily under the notice of a patient's family, his friends, or the public, that a few striking instances cugross the mind, and unconsciously, count for more than a dozen others who, without any obrious cause, enter unnoticed into the Asylum."
" Upon the great majority of the male patients, and upon all the females, with few exceptions, loss of reason has fallen as a calamity from natural causes, and not as a result of any personal indulgence."

I an not anxious to bolster up my opinion on this subject by a citation of the views of English writers, but the following from the Lancet $\ddagger$ written within the year, is so apposite and so telling, and leads ime so naturally to what I have to say on another head, that I cannot omit it. "For our own part we have no wish most assuredly to speak lightly of the curse of alcoholic intemperance, but this particular charge against alcohol we are by no means prepared to accept. Let us take, for example, that very County, Wiltshire, where the total population of lumatics to population, and also the increase of recorded lunacy during recent ycars, are most distinct. The wages of the miserable agricultural labourers of Wilts are, to our personal knowledge, less than ten shillings a week on the average. Can much beer be drunk out of tlis? Scarcely."
"Now, in looking backwards over the last twenty or thirty years, and asking ourselves what is the probable cause of the large and increasing amount of lunacy among the Wiltshire poor, it seems to us that there is far greater probability that insufficient food than that excessive drink was the main cause, and though lunacy has also much increased in many other districts where the excessively low diet cannot bo supposed to have bcen the cause of the mischief, yet other causes than that of intemperance could be easily named, as, e.g., the gencral increase of rapidity both of thought and of action in recent times, the keen compotitive strife for existence which must sorely try the nerves of the artisans in manufacturing districts. Heaven knows that alcohol has enough to answer for, but it will take much more stringent proof than anything we have yet seen to convince us that it ought to bear this special blame, nay, we even sincerely lament the fact that attention has been so much concentrated on this hypothesis of the cansation of insanity, since it has probably been diverted from other matters, and especially that of insufficient food, which ought to havo been more generally studied."

Even

* Tho proportion of deaths to the average number resident has during the last three years areraged $7 \cdot 3$ per cont.; whilat the English average for the last twolvo years has been 10.33 per cent.
+ Report of the Inspector of Asylums on Hospitals for Insane for the year 1870: Victoria. Presented to both Houscs of Parliament, by command.
$\ddagger$ The Larcet.-Reriew of Insanity and its treatment, by G. Ficlding Blandiord, M.D. February 18tin, 1871.

Even in this land of general abundance there are not unferyent cases of absolute destitution, and insufficient or improper food is a frequent cause of insauity. Fourtcen cases among the admissions during the year were attributed to "fever, ill heallh and want," and theso by no menns represent the total number of cases in which general debility, and the physical or physiological want due to scanty or improper food were active, if not sole causes. Insanity is in a large number of cases a disease of debility many of the patients, on admission, are wan and miserable, from continued over-work, over-anxiety, and undue or improper sustenance, and, in some cases, wholesome and nutritious food is the main if not the sole agent in their recovery. The pernicious habit of constant and repeated tea-drinking lans much to answer for ; it is not only in itself directly injurious, but it prevents more solid and wholesome food being taken, and so both directly and indirecily does harm. The histiory of several cases which hare come under my care during the year have been a simple story of rea-drinking without milk or sugar, and with the most scanty accompaniment of food, morning, noon, night, and "between whiles." Young women living up country and nursing their children take tea repeatedly during the day, to still the craving and want which their labour and their condition cause; they do not trouble to cook or eat during their husband's absence from home, and on his return at night are too worn and too enervated to share his evening meal. Body and mind fail under such a regimen. If tea is taken more than once a day, it should be accompanied with a liberal allowance of milk, sugar, and some solid food. Tea at all times of the day, and alone, is only one degree less pernicious than dram-drinking. Dr. Willis, one of the foremost of the physicians of the last generation, who had a large practice in this speciality, stated what he owed half his practice in cases of insanity to the effects of tea, and lis opinions have been shared by others.* A bountiful and nutritious dict is in many cases of service in warding off threatened attacks of insanity, or arresting it in its early stages.

The cause of insanity in no fewer than fifteen of the admissions during the year was stated to bo "sunstroke," and there can be no doubt that extreme heat, either alone or in connection with other influences, is a frequent couse of insanity in this climate, and that to its effects ou the cerebral circulation are duc many slighter attacks of illness which are usually assigned to other causes. The population of the Colony generally do not seem aware of the risk they run from this cause, or further precautions would be adopted to avert the ill effects of extreme heat and glare. The wearing of a black hat, without covering or the use of an umbrella, in the summer in this climate, is in itself little less than suicidal, whilst the exposure of the uncoverod had to the sun might be fairly reckoned as an cridence of insanity itself

Injury to the head bas been assigned as a direct cause of insanity in nine of the cases admitted during the year, and recent inquiries have proved that it is, especially indirectly, a frequent causc of mental aberration. It is in cases predisposed by injury, that sunstroke, intemperance, excitement, and other causes, light the fire that is already laid. I have found marks of injury to the head more or less severe in thirty per cent. of the cases admitted during the year.

Isolation is credited with the causation of thirtecn cases during the year, and the number is possibly below the reality. Under this term is included the isolation of the shepherd in remote districts, the loncliness of the wife whose husband is often for days, weeks, or months together away from home, and the isolation and limited range of sympathy which individuals, especially new comers, expericnce even in our towns. It is sad to find the number of instances in which patients are absolutely friendless, or have no friends or aquaintances nearer than the Mother Country, and the number of cases in which wife or husband deserted by the partmer of thcir lives (for the marriage tie seems singularly easy) are completely alone. A system which encourages individual instend of family emigration has something to answer for in this respect. The cause is a special and peculiar one in young Colonies.

Hereditary predisposition is given in Table 10 as the canse of insinity in 17 of the cases admitted, but this number by no means represents the full operation of this cause. The 17 cases tabulated under: this heading are those only in which no other moral or physical cause was apparent or assigued. J. have been able to establish an undoubted hereditary predisposition to iusanity in 34 of the cases (a proportion of 12 per cent.) admitted during the year. In these cases there was absolute insanity in the ancestors of the patients. In a further number I ascertained the existence of a lindred neurosis, evidenced by neuralgia hysteria, epilepsy, \&c., aud in not a few cases in which I could ascertain no history or hereditary predisposition, I was able to recognize the insane neurosis or nervous degeneration in the immediate relatives who cane to visit the patients. In a very large majority of the cases, as might hare been expected where the peculiar social circumstances of the Colony are cousidered, nothing whaterer of the antecedents of the patients themselves, much less of their family history, could be ascertained. In some cases husbands knew nothiug whatever of the families of their wives, many were unable to state even the nationality of their grandparents, and in ouly 25 cases, ont of the 277 admitted, could a direct negative of hereditary predisposition, so far back as the grandparents, be definitely given. With these facts in view, the statement that hereditary predisposition was ascertained to have existed in 1.2 per cent. of the admissions has a large significance ; and one is almost tenpted, with $\dagger$ Dr. Maudsley, "to think that no person gocs mad, save fron palpable physical causes, who does not show more or less, by gait, manner, gestures, habits of thought, feeling and action, that he is predestined to go mad," and to be "more and more convinced, with tho increase of experience, of the inportant part which hereditary predisposition plays in the causation of insanity."
for the Towards the closc of the year some of the dormitories of the new wing of the Hospital were opened for the accommodation of the patients, and a temporary relief for the overcrowding was thus obtained. The rest of the buildings, which have been fit for occupation for some months, remain unused until the privacy which will admit of their occupation is secured by the purchase of an adjoining property and the crection of the necessary fences. Three small dornitories have been erected for the accommodation of the nurses, and a substantial and commodious cottage has been built for the gardener. The kitchen, laundry, and storerooms are in the same unsatisfactory condition as when I took charge of the Hospital, three years ago. I know of no public Institution of this size in any part of the World in which the kitchen arrangements are so defective. Yarious minor improvenents have been effected in the garden and grounds, and in the wards of the Hospital. The Institution througlout has a brighter, more checrful, and more homely appearance. The whole of the repairs to tho wood-work of the Hospital during the year have been crccuted by
patients,

* Lancet, May 14, 1870.-Oration by'Francis Mraon, at Medical Society, Loudon.
† The President's Address at the Annual Meeting of the Psychological Ássociation, 1871.
paticuts, under the supervision, and with the help of the carpenter attached to the linstitutiou; and a large amount of new fittings and furniture, besides ilterations and additions of some maguitude, have been executed in the same manner.

The amusement of the patjents has not been neglected, and to this end many kind friends hare con- amusements. tributed their aid. To Mrs. Isler I. am again indebted for the use of a cricket-paddock, at a nominal rent. Mrs. Darvall, of Ryde, has on several occasions sent presents of fruit, ind has always displayed a most kindly interest in the welfare of the Institution. The Australian Christy Minstrels have again volunteered their services, and have given an excellent evening's amusement. Early in February, Mrs. Cordner, Miss James, Messrs. Andrew Fairfax, Hall, Ackland, Hare, and Packer, gave a concert which was cordially appreciated and is pleasantly remembered; and in May a concert was given by amateurs living in the neighbourhood, who in this ewd many other ways have shown a most lind interest in the welfare and success of the patients and the Institution. Mr. James M‘Donald exhibited the magic lantern, Messrs. Lees and Webster, at a great sacrifice of time and trouble, gave an entertainment, consisting of sleight of hand and ventriloquism, interspersed with comic and character songs. Weston's troupe and the Phillips family also performed at the Hospital. Since the beginning of September, a dance, at which a number of the patients have always been present, has been held every fortnight. Ithe annual pic-nic in October was not held, owing to the daugerous illness of the Assistant Medical Officer at that time.

The proprietors of the following newspapers,-the Burrangong Argus, Bathursti Free Press, Bathurst Donations. Times, Cumberland Times, Clarence and Richmond Examiner, Dubbo Dispateh, Deniliquin Chronicle, Goulburn Herald and Chronicle, Grafton Observer, Illawarra Mercury, Kiama Independent, Mudgeo Advertiser, Moruya Telegraph, Kiama Pilot, Monaro Mercury, Maitiand Mercury, Macleay Herald, Nowcastle Chronicle, Queanbeyan Age, Southern Argus (Goulburn), Wagga Wagga Express, Wagga Wagga Advertiser, Western Examiner (Orange), and Tass Courier,-have forwarded a copy of every issuc during the year ; and the proprietor of the Abstainer has sent a copy of each issue during the last four months. These newspapers, so liberally given, and so punctually scut, bave been of the greatest service to the pationts; they are always most gratefully received, they have brightened many a face, and have lightened many a weary hour. I owe many thanks to the gentlemen who have sent them, for the privilege of being the almoner of their bounty.

The Director of the Botanic Gardens, Mr. C. Moore, has supplied a large number of young trecs, shrubs, plants, \&c., for the gardens and grounds of the Institution, and has also kindly given me a pair of silver pheasants, a pair of wild ducks, and a New Zcaland pheasant, for the aviary.

The Agricultural Society presented me with six transferable tickets for the Society's Exhibition, held in August, and I. was thus enabled to send several of the patients to the Exhibition at a small cost. The Manager of the Parramatta Steam-boat Company kindly placed a weamer at my disposal for the return of performers to Sydney, on the oceasion of a concert given at the Hospital ; and Messrs. Moss and Co . sent six bottles of schiedam schnapps, which were used for medicinal purposes.

I have very thankfully received during the year the following special donations:-Mrs. $0, \ldots 10$ (to be expended at my discretion) ; Capt. McLerie, 1 pair black swans; Jas. Barnet, Esq., 1 swan, 2 pairs of bantams; Mr. Alfred Roberts, 3 wallabies and several plants; Mr. T. Small, 4 young swans; Mr. J. HazeJand, 5 magpies; Mrs. M'George, Goulburn, 1 pair of swans; Mrs. Barton, 1 native bear, 3 pigeons, Senior Constable Samuels, 2 mallabies, opossum, and sparrow-hamk; Mr. Carter, 2 pair ring-doves; Lady Manning, box of plants, \&c.; Mrs. Darvall, Ryde, 3 loads of fruit-oranges, pears, \&c.; Miss West, dolls, toys, illustrated books, \&c. \&c. ; Mr. Leigh, 7 lithographs of the Exhibition Building; Union Club, illustrated and other papers (monthly donation) ; Mr. Thomas Salter, illustrated and other papers, several donations, Mrs. Docker, Blackwood's Macrazine, five years complete : Mrs. Edye Manning, Illustrated London News; Mr. Wm. Maddock, illustrated papers; Mr. J.. Devlin, the Australian Advocate (twenty-four numbers); Mrs. Gibson, Pitt-street, Mlustrated Jondon News; Mr. Wigzell, illustrated paperb; Mr. B3. P. Rodd, magazines, \&c. ; Mrs. B. Buchauan, books; Mrs. Templeton, illustrated papers; Mrs. Lenehan, illustrated papers ; Messrs. Greenhill and Broadhurst, illustrated papers; Mr. John Clark, illustrated and other papers; besides anonymous donations of the Sydncy Mail, two copies weekly; the Australasian; packets of the London Journal, Revnolds' Miscellany, \&c., dc.

The general principles on which I have striven to conduct the Institution are, thatits chicf function should bo that of a curative Hospital for a special class of nervous disenses, and its secondary purpose, tho care of such chronic cases of mental disense as cannot be sct at liberty; that the utmost degree of liberty consistent with their own and the public safety should be given to the inmates, and the freest communcation compatible with their welfare permitted between then and their friends; that, as a public establishment, the linstitution should be at all times open to the inspection of those who take an interest in the care of the insane generally or individually; and that, as a medical establishment, the lullest liberty granted to the members of the nedical profession to examine special cases, or to study tho general subject of discases of the nervous system. In carrying out these views, and in the general management of the Institution, I bave to acknowledge a liberal and kindly assistance at; your hauds, but I have still much to wish for to render the Trstitution thoroughly efficient and satisfactory.

In conclusion, I have much pleasure in acknowledging the valuable assistance given mo by Dr. T. Morgan Joseph in the preparation of this Report and the accompanying Statistical Lables.

I have, dc.,
F. NORTON MANNING, M.D.,

Mcdical Superintendent.

| Licensed House for Lunatics, Cook's River |  | $\ldots$ | 6 | 31 | 37 § |
| Total number under official cognizance on December 31st, 1870 |  |  | 879 | 508 | 1,387 |
|  |  |  | 811 | 478 | 1,289 |
| Increase during the year |  |  | 68 | 30 | 98 |

Besides the number coming under official cognizance there are a few supported in private houses and from private resources, but of the number of these no estimate approaching to accuracy can be given.

The estimated population of the Colony on December 31st, 1871, was 519,163 ; and as the Census was taken on the 2nd of April in this year, this estimate may be taken as more than usually accurate. The number of insane persons in the Colony at the same date was, as above stated, 1,387 , and the proportion to population therefore, 1 in cvery 374 .

The enormous increase of 98 patients during the year has raised the proportion of insanc to population, from 1 in 389 at the close of the year 1870, to 1 in 374 at the close of the year 1871, but it is well to remark that this proportion is still lower than that in the Mother Country. By the latest returns to which I have been able to attain access, the proportion of insane to population in the United Kingdom of Great Britain and Ireland on December 31st, 1870 , was 1 in every 354 , the proportion being 1 in 400 in Fngland and Wales, 1 in 350 in Scotland, and 1 in 314 in Ireland. These returns confessedly represent only an approximation to the truth, as it has been found almost impossible to make any accurate calculation of the number of insane and idiotic persons maintained by friends in private honses. The larger proportion given in the Irish statistics represents only the exact information as to the number in private houses which has been obtained by means of the Irish Constabulary. It is probable that inquiries conducted in the same accurate and painstaking manner as those undertaken by Dr. Jarvis, for the State of Massachusetts, in the yenr 1855, would give results in any civilized communty not markedly differing from those obtained by him, and show that the proportion of insane to population is about 1 in every 300 .

The Institutions for the Insane at Gladesville and Parramaita have for a long time been grently orersubmitted for the conversion of the buildings originally erected for Barracks, and lately occupied as an Industrial School for Girls, at Newcastle, into an Asylum for Imbeciles and Idiots. This proposal met with your approval, and carly in October, some minor repairs and alterations having been authorized, 100 patients, consisting chiefly of feeble-minded children and aged imbecile men, were transfcrred from the Lunatic Asylum, Parramatta. 13 others were subsequently transferred from this Institution, and the number at the close of the year was 113. The staff was mainly drawn from Gladcsville, Parramatta, and the "Vernon," and was supplemented by such additional assistance as seemed necessary.

The buildings have been found well adapted for the accommodation of the class of inmates selected, and are capable of holding with comfort 150 patients and the staff necessary for their care. The Institution, in spite of some difficulties at starting, has been, on the whole, a success, and the relief afforded to this Institution and the Lunatic Asylum, Parramatta, by its establishment, has been most important. It should, however, be borne in mind that this relief is a very temporary one, and that the lapse of a ycar and a half, with the present rate of increase, will serve to obliterate it entirely, and to render the Establishments for the Insane as overcrowded as beforc. A. full consideration of the best method of providing for the increasing number of insane in the Colony is important, both in a social and financial aspect, and will scarcely admit of longer delay.
Lawa relating to
I would beg to call your attention to the necessity for a large amendment, if not a complete alteration of the Laws relating to the Insane. The present laws regulating admission prosent difficulties in some cases and permit irregularities in others. The practice of treating an insane patient as a prisoner, and technically regarding lunacy as an offence against the Law, is a cruelty and a wrong. The delay in the transmission of patients to Hospital is frequently excessive and unneccessary, and their discharge is surrounded by difficulties which are prejudicial to the patients themselves, and which not unfrequently entail a cost on the Goverument which would be borne by private individuals under a better system.

The present difficulty of dealing with the estates of insane persons, and the great loss which results therefrom, is in itself a great reason for some alteration of the law. Under present circumstances, no provision exists for dealing with the estates of insane persons, except when they are of sufficient value to warrant the expenses incident to a Commission in Lunacy; and the consequence is, the waste and ruin of many small properties which might be collected by the Goverument, and in many cases would pay for the maintenance of the patient and leave a handsome residue in case of death. Under the Victorian Lunacy Statute, $£ 2,000$ a year is in this way collected by the Master-in-Equity, and applied to the maintenance of patients, whilst in New South Wales valuable properties are left for neighbours to quarrel over or appropriate, pensions due from the Imperial Government are left uncollected, sums due for wages and debts remain unpaid; whilst the owners, pensioners, and creditors, are maintained at a considerable cost to the Goverument.

The

* At the Lunatic Asylum, Parramatta, 9 "inralids" ( 2 of whom are convicts), and st the Newcastle Asylam, 12 "invalids," are maintained in addition to the numbers here given.
$\dagger$ British couvicts, still at the charge of the Imporial Treasury.
$\ddagger$ Confined under Criminal Lunacy Acli, 24 Victoris, No. 19, NiS.W.
$\S 25$ of these are maintained at the public expense.

The Board of Management of the Government Asylums have, in their Reports for the year 1870 and previous years, expressed an opimion that a necessity exists for some enactment similar to that in force in the Colony of Victoria, by which lunatic, idiotic, deaf, dumb, blind, or infirm persons arriving by ship, who are likely to become a charge on the public, are prohibited from landing at any port, unless under bond to Her Majesty for the repayment of expenses which shall or may be incurred within the space of five years for the maintenance or support of such persons. I hare already intimated my concurrence in this opinion. Several patients admitted within the year and maintained at the public expense were insane when they arrived in the Colony. One was taken from a Lunatic Asylum in Queensland, where he had been upwards of three yenrs, and brought direct here, although he had become insane and was domiciled in Queensland. Another was sent from New Caledonia as a lunatic by the authorities of that Settlement, because be was said to be a British subject, though he has undoubtedly resided in New Caledonia for some years. The Colony of New South Wales was no doubt chosen because prohibitory statutes exist in the neighbouring Colonies. In both these instances the patients are young, and likely to be a burden upon the Colony for years. Theckoning the average duration of life in iusane persons, and the average annual cost for maintenance, these two patients will in all probability cost the Colony not less than $£ 700$. The enactment here recommended having reference to other dependent classes beside the pauper insane, would more fitly find place as an Amendment to the Passenger or Navigation than to the Lunacy Statutes.
F. NORTON MANNING, M.D.,
Inspector of the Insane.

## APPENDIX.

The Tables in this Appendix consist of,-(1st) those recommended by the Medien-Psychological Association for general use in Institutions for the Insane, and approved by the English Commissioners in Lunacy; (2nd) those having a domestic character, or a more immedintely local interest. The rerised series of statistical tables, recommended by the Medico-Pyschological Association, and which have been already adopted in most of the English and Scottish, and in some Colonial Institutions, are ten in number. They are confined to medical statistics, and include the main and more important facts required for statistical comparison.

Table I gives the number of admissions, readmissions, discharges, and deaths, with the arenge numbers resident during the year, the sexes being distinguished under each head

Table II gives the same results for the entiro period the Asylum las been in operation.
Table III furnishes a history of the yearly results of treatment since the opening of the Asylum.
The table also embraces a column for the mean population or arerage numbers resident in each year. In other columns are shown, for each year, the proportion of recoveries calculated on the admissions, and the menn ammal mortality, or the proportion of denths, calculated on the average numbers resident. It is of the first importance that these two principal results under Asylum treatment, when given, slould be calculated on a uniform plan, and according to the methods here pointed out.

Thable IV gives a history of each year's admissions: how many, for example, of the patients admitted, say in 1855, have been discharged as cured, how many have dicd, and how many remnined in tho Asylum in 1865.

The value of this table, in regard to the vexed question of the increase of insanity, is evident. The table is adopted from the Somerset Asylum Reports.
lablo $\nabla$ shows the causes of deaths, classified under appropriate heads. This form is adopted from the Reports of the Commissioners in Lunacy for Scotland, with some addition and modification. It appears sufficiently detailed for etatistical purposes.

Lable VI gives the length of residence in the Asylum of those discharged recovered, and of those who died, during the cear.

Table VII shows the duration of the disorder on admission, in the admissions, discharges, and deaths of each year, according to the four classes recommended by Dr. Thurnam in his work on the Slatistics of Insanity.

Thble VIII shows the ages of the admissions, discharges, and deaths of each year, in quinguemuial periods.
Iable IX shows the condition, in reference to marriage, of the admissions, discharges, and denths of the year
Table X shows the causes, apparent or assigned, of the disorder, in the admissions, discharges, and deaths of the year.
As statod in my Report for the year 1869, in which the first six of the tables were giren, it has been found impossible, owing to the form in which the records of this Institution have been kept, to make the returns retrospective, without an amonnt of labour allogether out of proportion to the value of the result ; the statistics therefore commence with the year 1869

Table I. Showing the admissions, discharges, and deaths, during the year 1871.

+ Table II.-Showing the admissions, readmissions, and discharges, from 1st January, 1869,* to Ist December, 1871.

Table MII.-

* The readmissions for the year 1811 fnclude 12 patients- 2 males and 10 femaies-who were temporarily absent from the Iastitution, having been transferred to other Institutions for the Insane, and 1 eadmititel when sddltiousi buildings were erected. sylum hats been in nperation. ## NEW SOUTIH WALES.

# NAUTICAL SCHOOL SHIP "VERNON." 

(REPORT FOR YEAR GNDING 30 JUNE, 1872.)

## The Superintendent to The Petncipat, Under Sfecretart.

N.S.S. " Vernon,"

16 July, 1872.
Sir,
1 have the honor to transmit, for the information of the Honorable the Colonial Secretary, a Report of this Institution for the past year, ending 30th June.

The general health of the boys has been most satisfactory. The last few weeks several unaccountable cases of itch appeared, but prompt and energetic measures were taken to stamp it out, which proved effective, so that at the present moment all are clean and in excellent health. Very many of the boys, when received on board, were crawling with vermin, clad in rags, covered in filth, and altogether in a deplorable woe-begone state, with a vicious, furtive, distrustful expression of countenance. What with a plentiful use of soap and watcr, clean clothing, regular and wholesome diet, kind but firm treatment, and regular work, in a short time their appearance so changed and improved that they could scarcely be recognized as the same lads.

One poor boy, when received on board, was so far emaciated and constitutionally broken, that with all the care and attention we could give him, together with the skill of the medical staff of the Sydney Infirmary and nurses, he could not be restored to health, but passed away. This was the only death during the year.

Dr. Erans is now raccinating all those boys who have not yet been done, to secure them as far as possible from small-pox.

When the weather permitted, on Sunday, all the boys not under punishment were landed and marched to their respective Churches, under the charge of officers; but when detained on board through boisterous and wet weather the Church of England Service was read by Mr. Waller, or myself, to the Protestant boys.

They were also visited during the week by clergymen of the Church of England, Roman Catholic, and Presbyterian persuasions, for imparting religious instruction; the latter denomination only prior to the removal of the ship from her former anchorage, (table 11) contains a record of their visits.

The educational return attached (table 1.2) gives a general riew of their attainments; they have been attentive in school, and made fair progress.

In pulling in boats, trades, and work with the pick and shovel on the Island of Cockatoo, they have all made good progress; but in gun-drill they have done little, and in seamanship they know little or nothing; since the removal of the ship to this anchorage, as the work required to be done on the Island of Cockatoo has been heavy, and fully occupied all our time (with the exception of keeping the ship clean and in order) -in fact some of the labour performed by these small boys on the island has been worthy of record, such as taking out stone, some of which had to be quarried with iron wedges, putting in earth to plant trees, digging the garden over three times before it could be cropped, it previously having been permitted to go to wreck and lay idle-the ground had become so hard that it required to be broken with a pick; all this work was done as expeditiously and as well as it would have been by a gang of ordinary labourers; now, that it is all finished, we will be able to resume the ordinary routine of the Institution.

Table 9 will show a list of the articles made on board, and their estimated value.
Admissions during the year bave been 60 ; discharged and apprenticed, 53 ; discharged to relatives, or otherwise, since the inauguration, 68 ; to Lunatic Asylum for Idiots and Imbeciles, 2 ; died, 3 ; deserted and not caught, 1 ; apprenticed, 168 ; number remaining on board, 30th June, 1872, 101 ; total passed through the books to 30 th June, 1872, 343.

Table 10 shows a statement of their conduct, as far as I can obtain a report and trace the career of the boys; some, who were apprenticed, absconded, and got re-committed to this Institution, have been apprenticed again to other masters, and are now doing well.

The master of one of them reports:-" C . W. has conducted himself to my satisfaction during the time he has been with me."

A lady, who had two boys, reports :-"M. C.'s time expired with me in April last; he is now in respectable service in this neighbourhood, with good wages, and is considered a useful lad ; J. S. is now becoming useful in the farm, and conducts himself well ; he seems quite happy and contented."
341.-A.

Another

Another person reports of his apprentice:--"C. L. conducts himself in a very proper manner indeed."

Another master says:-" My apprentice has not conducted himself in the most highly satisfactory manner, but would be unwilling to part with him."

A master in Sydney reports:-"W. J., my apprentice, I can certify that he has conducted himself, as long as he has been in my service, in a highly respectable manner; he still is at school in the evenings, and I have cerery reason to believe that when his time has expired that he will be both a credit to me and himself."

Another writes about his apprentice:-"Ho bas done very, well, and is getting quite useful and strong, and I think he will be of great use to me after another year."

Another says:--"The boy has conducted himself to my entire satisfaction."
A gentleman near Sydney reports:-"I have much pleasure in being able to make a favourable report of the conduct of the apprentice from the N.S.S. 'Vernon.'"
A. gentleman in the Hunter River District writes:-"I think you will be pleased to hear that J. M. has become a valuable serrant; it is evidence of the value of the Institution of which you have charge; doubtless, many of the boys sent to the 'Vernon,' like him, only require to be removed from evil influences to become, as he bas done, a respectable lad and a valuable servant. I believe the reason many fail with the 'Vernon' boys is, their want of tact in their management."

Another writes from the Clarence:-"It affords me the greatest pleasure to be able to inform you that the boy has behaved himself admirably since he came; he appears to be a very willing and obedient boy."
$\Lambda$ gentleman, who has the name of being a very strict and hard master, writes :-"My apprentice has conducted himself, with few exceptions, as well as I could wish, and promises to be a good boy, being both attentive to his Church, as also his learning worldly matters in general."

Another gentleman from another district says:-"My apprentice, J. W., has conducted himself very satisfactorily, and made himself very useful."

Another writes:-"The lad has conducted himself in a proper manner; is willing and obliging. I am much pleased with him, and should be sorry to have to part with him."

Another gentleman in Sydney writes:-"My apprentice, M. O'B., has conducted himself entirely to my satisfaction, and, I must say, his previous training deserves the highest encomium."

These are a few of the characters given out of a number of the same tenor. Some are dissatisfied that they did not get a stronger lad than was sent; but it was impossible to give everyone a full grown lad when the greater number on board were small children.

At present we have fifty applications for apprentices, but it will be quite impossible to supply that number for a long time to come; if we could turn out two hundred per annum I believe situations could be readily procured for them.

Some time back several gentlemen made an effort to find employment for the idle boys about Sydney in a Porter and Shoeblack Brigade; however, after losing a great deal of time and moncy, it was abandoned, and proved a failure, not from the unwillingness of the boys to take employment, but it was found impossible to deal with the boys, on account of the evil and pernicious influence of their parents. For example: If a boy was placed on a station, and earned any money, which they all did, the mother (it was mostly the mothers) came round at regular intervals, and got the money from the boy, telling him to give in a shilling or two at night and say that was all he had earned; and if the parent was attempted to be reasoned with she would tell us that she was not going to have her children degraded by being so low as shoeblacks.

I know that many of these parents sent their children to steal in preference to their permitting them to take a situation, or obtain steady work. Two of these same boys have since come to this Institution: One has been apprenticed away, and is doing well; another we have on board at present, and he is one of the most orderly and well conducted boys in the ship.

These remarks, I think, will not be quite out of place in a report of the working of this Institution, for I wish to point out that an Institution of this description is the most successful way of permanently reclaiming the vagrant youths of this Colony, and experience teaches me that the farther they are removed from the influence of their relatives and former companions the better it is for the lads, and the greater the probability of a certain reformation and reclamation to society.

Many of the boys who have been discharged to their friends and relatives I have frequently met, and in sereral instances they have fallen back into their former disreputable habits and filthy appearance; in some cases the parents have come to me and deplored their action in obtaining the boy's release.

The parents of a boy who was discharged some short time back regretted that the lad had not been apprenticed from this ship instead of given up to them. This boy was walking and lounging about the wharves of Sydney, until a gentleman was good enough to give him a berth in one of his vessels, at my request, and much to the lad's delight. One boy, who was discharged to his mother, upon the understanding that they were going to quit the Colony, after an interval of fourteen months was committed under another name.

If all the persons who obtained apprentices from this Institution took into consideration, and made some allowance for the previous habits of the lads, taking a little trouble themselves in looking after their welfare, treating them as human beings, and not entirely handing them over to the tender mercies of their servants, or taunting them with being "Vernonites," we should hear of fewer absconders.

The cost per head is less than it was last year, although the daily average number of boys has been less. Since the ship has been at her present anchorage we have not purchased any vegetables, but grown all that we required on the Island of Cockatoo. A copy of the last half-year's report from the gardener is appended.

Everything that is worn by the boys is made on board; by giving credit for the estimated value of articles made the cost per bead will be under £30.

Notwithstanding the up-hill work we have had to contend against in ondeavouring to conquer tho prejudice entertained by a large and influential section of the community against this Institution, I think the facts as shown in the tables appended, together with a reference to my prior reports, will bear out my statement that it has proved a success and one of the most useful Institutions in the Colony.

I am still of opinion that if the suggestions thrown out in my reports of the 3rd May, 1869, and 29th July, 1870, were permitted to be carried out, the success and usefulness of this Institution would be increased largely.

I have, \&c.,
J. S. V. MEIN.

Cockatoo Island,
26 June, 1872.
Sir,
Sinco my report in Decenber last, I hare been enabled to maintain a steady supply of useful vegetables for the ship. The whole of the gardens are in good order, cither fully cropped, or in course of rotation, affording a good supply of the most useful regetables.

The piece of ground formerly held by Mr. Johnston having been handed orer to me, I have had it thoroughly cleared and cropped, and from its sheltercd position is a valuable addition to tho grounds.

The gardens reforred to by me in my last report as the Magistrate's gardens, after haring been thoroughly cleaned and cropped were handed over to the Magistrate, since which period they have not been under my control.

The peach trees, occupying the ground mentioned as No. 2, or peach orchard, being found uscless, have been taken from the centre, giving an additional piece of excellent ground.

At interrals during the past six months a portion of the boys have been engnged preparing holes, round the Island, for planting trees; this work they have accomplished in a praise worthy manner. I have much pleasure in stating that the boys generally are rery tractable, oboying my instructions, and working as well as I can expect; they are now understanding the use of the tools, and some of them can use them in a workmanike mamer. I feel much plensure in teaching them, and sparo no pains in my endeavours to make them assiduous; and, I need scarcely add, no effort of mine shall be wanting to carry out your orders and wishes.

## I have, \&c., <br> JAMES DUNCAN

Gardener.
Preeent supply of vegetabies :--Carrots, onions, turnips, celery, parsley, lettuce, cabbage, cauliflower, parsnips, and pumpkins.-च.D.

## Legislative Assembly.

# INDUSTRIAL SCHOOL FOR GIRLS, BILOELA.  

Ordered by the Legislative Assembly to be printed, 11 June, 1872.

The Supmintendent, Binoela, to Tie Principal Under Secretary.

In accordance with the instructions contained in the Honorable the Colonial Secretary's minute of the 19th instant, 17,120, I do myself the honor to forward herewith a return showing the number of girls admitted and discharged from this institution, since its formation in 1867 to the 25 th April, 1872.

207 girls have been admitted into tho institution, of which 187 were received at Newcastle, and twenty at Biloela; of these, forty-one have been discharged to their parents and friends, and four for special reasons-two as being over eighteen years of age, one to the Benevolent Asylum as being under age, and one to the Lrunatic Asylum. Eighty-four have been apprenticed, one of whom has been sent to the Roformatory, for stealing, and twelve have beon re-admitted. Of this twelve, eight have been re-apprenticed, two discharged to the care of their parents, and two remain in the school.

Only one death has taken place in the institution.
The preseut number is seventy-seven.
Of the girls apprenticed, with tivo or three exceptions the accounts are very satisfactory, but the police report unfavourably of a great proportion of those taken out by their parents.

GEORGE LUCAS, Superintendent.

NUMBER of Girls admitted and discharged to the Industrial School for Girls, from the year 1867 to 1872, Biloela and Neweastle.

Industrial School for Girls,
Biloela, 25 April, 1872.
GEORGE LUCAS,
Superintendent.

## Legislative Assembly.

NEW SOUTH WALES.

# INDUSTRIAL SCHOOL FOR GIRLS. <br> (RELATIVE STATISTICS OF ESTABLISHMENTS AT NEWCASTLE AND BILOELA.) 

Ordered by the Legislative Asscmbly to be printed, 7 August, 1872.

## RETURNS showing:-

1. The whole number of girls received into the Industrial School at Newcastle, during its existence.
2. The number of such girls that were transferred to the Biloela Industrial School, distinguishing their ages.
3. The number of girls that, during the existence of the Newcastle School, went into private service.
4. The number of such girls that were returned from any such private scrvice for misconduct, or were otherwise punished for misconduct, after inquiry by any competent Court, distinguishing each of the last-mentioned two classes of cases.
5. The poriod that the School existed at Newcastle.
6. The whole number of girls received into the Biloela Industrial School, up to the 1st July last.
7. The number of girls in that School on the lst July last, distinguishing their ages.
8. The number of girls that have, since the establishment of the School, gone into private service.
9. The number of such girls that have been returned from any such private service for misconduct, or have been otherwise punished for misconduct, after inquiry by any competent Court; distinguishing each of the last-mentioned two classes of cases.
10. The period that the School at Biloela had existed up to 1st July last.
1.-Nemcastle Industrias School.

*Childron must be twelve years of age, and must be a year in an Induatrial School before thry ean be apprentieed. See section 11 of Induatrial Sclools Act of 1 sfit.
2.-Biloela Industrial School.

* Inciuding 105 brought from Neweastle.

# UNIVERSITY OF SYDNEY. <br> (REPOTVT FOR 1871.) 

REPORT of the Senate of the University of Sydney, for the Feav 1871.

1. The Senate of the University, in accordance with the Act of Incorporation, have the honor to transmit to the Honorablo the Colonial Secretary the Report of their procecdings during the year 1871, for the purpose of being laid before the Governor and Executive Council.
2. In Leent Therm sixteen strudents who passed the statutory examination were admitted to Matriculation.
3. During the year the following degrees were conferred, after examination of the candidates,

IJ工.B.
Archibald Gilchrist.
Thomas Roseby.
Joseph David Sly.
M.A.

David Cooper.
H. Montague Faithfull.

Joseph ITector Garrick.
Daniel Placid Quirk.
James White.
Allan Ycomans.
M.B.

James Barrett.
William Irench Clay.
4. The following students passed the examination for B.A. in Michaelmas Term, and qualified themsclyes for that degree, viz. :-

The honors obtaiued at the B.A. examination were as follows :-

| Classics:- | Mathematios:-- |
| :--- | :--- |
| lst Class. | 1st Class. |
| C. Coghlan.* | T.T. Plomley.* |
| F. T. Plomley. | C. Coghlan. |
| 2nd Class. | 2nd Class. |
| T. Sloman. | T. Sloman. |

Physics:-
Gold Medal-F. D. Kent.

$$
\begin{gathered}
\text { Professor Pell's Prize for Mathematics:- } \\
\text { F. T. Plomley. }
\end{gathered}
$$

5. The Scholirships were awarded as under :-
"Deas Thomson" (Physics)-F. D. Kent.
"Barker" (Mathematics)-F. T. Plomley.
"Cooper" (Classics)-C. Coghlan.
"Lithgow" (for a second-year man)-A. Backhouse.
"Levey" (for a first-year man)-T. Robertson.
General University Scholarships:-
Third year-F. T. Plomley.

| Second year- | $\left\{\begin{array}{l}\text { S. Kclly. } \\ \text { D. A. Hynes. }\end{array}\right.$ |
| ---: | :--- |
| First year- $\left\{\begin{array}{l}\text { G. Hurst. } \\ \text { E. Butler. }\end{array}\right.$ |  |

6. The prizes were awarded to the following students, viz. :-

> Hon. George Allen's Medal-(Greek Iambics):-
R. M. Sly.

Professor Smith's Prizes for Physics, at the Annual Examinations:-
S. Kelly.
E. Butler.
7. The Honorable Edward Dcas Thomson's term of office as Chancellor having expired in Lent Term, that gentleman was unanimously re-elected. At the same time the Rev. Canon Allwood and Professor Pell were re-elected neverally Vice-Chancellor and Dean of the Taculty of Arts.
S. An application having been made at the close of the year 1870 , by the promoters of the Prince Alfred Memorial Hospital, for a grant of land, a resolution was passed by the Senate declaring its approval of the appropriation of 12 acres of the land reserved for a Wesleyan College, provided that it should be ascertained on inquiry that the Wesleyan Body had abandoned the idea of establishing a College within the University. Certain conditions as to the nature of the hospital and buildings, and the establishment of a medical school, were attached to the proposed grant. On the assumption that the Wesleyans did not intend to take up their land, application was made at the commencement of the present yenr, by the Council of St. Andrew's College, for a part of the land in question. In a communication from the Colonial Secretary, requesting to be favoured with the views of the Senate on the subject, it was stated that it was his opinion "that the question of the ultimate disposal of the land should not be dealt with otherwise than on the supposition that the Wosleyan Body would not go on with the erection of their College." On the 4th May a letter was addressed by the Seuate to the Chairman of the Wesleyan Conference in Sydney, pointing out that fifteen years had elapsed since the issue of the deed of grant, by the terms of which it was prorided that, failing the incorporation and establishment of any College within five years, the land should revert to the University, and that the whole or any part of it should be subgranted for any College or Colleges to be established in connection with the University, only with the consent of the Governor and Executive Council. The Senate further requested that it might, be favoured with defimite information as to the intentions of the Wesleyans with regard to the establishment of a College within the meaning and intent of the Affiliated Colleges Act, in order that the applications of Saint Audrew's College and of the Prince Alfred Hospital Trust might be at once dealt with. A reply was received from the Chairman on the 12th May, to the effect that, "though anxious to avail themselves at the earliest period possible of the advantages which the erection of a College would confer, the Wesleyans found insuperable difficulties in the way of giving practical effect to their wishes, and it did not appear likely that, if they could build immediatoly, they would find such a number of students for matriculation as would warrant the expense to the Country which such a College would occasion; that for the present, therefore, they proposed to make the institution at Newington as efficient as possible, in order to meet their educational wants." Finally, "the dedication of the land to any other purpose was deprecated," in the hope that before many years a sufficient number of students would be forthcoming. $\Delta$ copy of this letter was sent to the Government, with an expression of opinion on the part of the Senate, that, inasmuch as the Chairman's letter did not indicate a sufficiently definite prospect of the erection of a Wesleyan College, it did not feel justified in recommending that the land originally set apart for that purpose should be any longer withheld from other uses in accordance with the object for which the University was founded. A partition of the land for the Hospital and St. Andrew's College was at a later period proposed by the Senate for the consideration of the Govermment, according to which eleven acres were allotted for the former, and seven for the latter, in substitution for the eighteen acres - originally intended for li, fourteen of which it was decided to appropriate for any other College or Colleges which might hereafter bo founded, and four for a general cricket ground. It was subsequently suggested by the Hospital Authorities that for hygienic reasons a modification of the scheme of partition would be desirable, and as it appeared that the views of the parties intercsted would be best ascertained if a conference were held, a meeting was, on the invitation of the Colonial Secretary, held at his office, at which the leading members of the Wesleyan and Presbyterian bodies, and of the promoters of the Hospital were present. After discussion, a new partition was proposed by the Colonial Secretary, and met with the approval of the majority of the meeting. Under it ten acres were appropriated for the Presbyterians, ten for the Wesleyans (as soon as their Council should have become qualified under the Act to claim it), and eleven for the Prince Alfired Hospital and the Medical School in connection with the University. A plan showing the several divisions was forwarded to the Senate on the 25 th September, and elicited the following resolution:-"The Senate approves of the arrangement proposed by the Colonial Secretary, on the 25th September, 1871, as to the distribution of the land available for Colleges within the University; provided that the parties interested in the Presbytcrian and Wesleyan Colleges, within three years comply with the conditions contained in the second section of the Affiliated Colloges Act, 18 Victoria, No. 37, and that the Committee of the Prince Alfred Hospital commence building within three years, and that not less than the sum of $£ 15,000$ shall be devoted exclusively to the erection of Hospital buildings, and upon auch further conditions as are contained in the Registrar's letter of the 14th November, 1870, to the Colonial Secretary."
9.
9. Leave of absence of one year was granted to Professor Smith. Apart from the consideration of his health, which necessitated a change of climate, he was desirous of visiting America and Furope, with a view to making himself acquainted with the discoveries in physical science which had been made since he last left the Colony. The duties of the Chair are being performed by Mr. Charles Watt, to whom was confided the same task on the occasion of Professor Smith's previous absence on leave.
10. It is with deep regret that the Senate announces the death of Alexander Morrison Thomson, Esq., Dr. Sc. and Professor of Geology in the University, and it desires to record its deep sense of the loss which the Institution has experienced, and its appreciation of the value of his services, which gained him promotion from the office of Reader to that of Professor. Immediately after his decease, a notification of the fact was made by telegram to Sir Charles Nicholson, in London, with a request that, in association with Mr. Merewcther and Professor Smith, he would at once arrange for procuring a qualified person to fill the office of Reader in Geology and Mineralogy, and Assistant in the Laboratory. The presence of Professor Smith on the spot will facilitate the task, and be a guarantee of the fitness of the person to be appointed.
11. A change has been made in the By-laws for regulating the Faculty of Medicine. At the close of the year 1875, the power to dispense with the degree of B.A. or equivalent examination in the case of candidates for the degree of M.B. who have been in bona fide practice for ten years, will be abrogated. In the case of the degree of M.D., in addition to the "thesis" hitherto cxacted, the following will be the requirements:-The candidate must produce evidence of having spent two years in hospital practice, or one year in practice, either private or in the Public Service. He must further produce a cortificate from the Superintendent of a public Lunatic Asylum, of diligent attendance at such Asylum for three months, such attendance being either before or after his obtaining the degree of M.B. He must also pass an examination in psychological medicine, provided he has not previously passed suth an examination in proceeding to the lower degree of M.B. A copy of this By-law is appended (A).
12. Considerable changes have been made in the regulations for conducting the Public Examinations. Owing to representations made by the Council of Education, as to the disadvantage under which pupils of the Public Schools laboured, in being required to take up History in order to pass in the English section, when that branch of study could not be pursued in school, from the want of a text book which would be accepted by all portions of the community, that subject has been placed in a Section by itself. A similar rulc has been followed in the case of Geography, and a new distribution made of the Classical and Mathematical subjects. Various other changes in the details of the examinations, which past experienco showed to be required, have been made. A copy of the Regulations is appended to the Report (B). Following the practice of the British Universities, the Senato determined to throw open the Public Examinations to female candidates. The result may be deemed satisfactory, inasmuch as eighteen names were entered in November. As au inducement to them, prizes of $£ 20$ and $£ 10$ wero given by John Fairfax, Esquire, for the greatest proficient in the Semior and Jumior Examinations. The total number of candidates entered for the late Public Examinations was 179 , of whom ninety-seven passed, viz., twenty-two senior, sixty-four junior, and cleven preliminary. Ihe Government laving accepted the offer made by the Senate to render these examinations available for persons seeking clerical employment in the Public Service, twenty-eight candidates presented themselves, of whom thirteen passed-their cxamination being restricted to Section I (i.e. the preliminary). The residents in the country districts have on this occasion extensively availed themselves of the opportunity afforded them of testing the qualifications of their children. Out of the total number of 179 , fifty-one competed at the following centres, viz. :-Yass, Goulburn, Kiama, Wollongong, Maitland, Bathurst, and Armidale. From information received, it is known that schools in several of the more remote districts intend to participate in the Examinations of 1872. With a view to supply information in the minutest detail, a Manual has been published by authority of the Senate, containing the Regulations, examination papers, list of candidates, \&e. The Report of the Examiners is also published therein; but as many of the opinions expressed in that Report are now under the consideration of the Senate, it must merely be considered as embodying the Examiners' views.
13. A sum of $£ 300$ was prescnted by His Excellency the Right Honorable the Earl of Belmore to found an annual Gold Modal to be given to Graduates or Undergraduates of the University for proficiency in Geology or Chemistry, with special reference to Agriculture. This amount has been invested in Government Debentures, and the interest thereon will be applied to the purposes in question.
14. A return of the Roceipts and Expenditure of the Uuiversity during the year, duly audited, is appended hereto (C).

This Report was adopted at a duly convened meeting of the Senate held on the

Registrar.

## APPBNDDX A.

## BY.LAW-CAP. XV.

## Facelty of Medicings

Clabses 3 and 10 of chapter 15 of the By-laws are hereby repealed, and in lieu thereof the following are substituted, viz. :-
III. "Such candidates must lodge with the Registrar of the University satisfactory certificates of having taken the degree of B.A., or some cquiralent degree, in this or any of the Universities hereinbefore mentioned as those from which Under Graduates will be admitted ad enadem statum. Candidates who have not takell such degree must pass un examination similar to that preseribed for the B.A. Degree in this University: Provided nlways that it shall be in the power of the Scuate nif their discretion at any time before the end ol' the year 1875, to dispense with this examination, in the case of candidates who have beon in bona fide medical or surgical practice for not less than ten years.
X. "The candidate must produce eridence that after haring obtained the Degree of M.B. he has spent two years in hospital practice, or one year in hospital and one year in practice, either private or in the PublicService, or three years ${ }^{2}$ practice cither private or in the Public Service. He shall also be required to produce a certificate from the Superintendent of $a$ public Lunatic Asylum, of diligent attendance at such Asylum for three months, such altendance being eifher hefore or ofter his obtaining the degree of M.B. Further, ho shall be required to prepare and defend a thesis on some ancdical subject to be selected by himself. Such thesis shall be in the Latin or English language, and if approved by the Senate, on the report of the Board of Examiners, may be printed; and he slall be required to pass an examination in Psychological Medicine, provided he has not preriously passed such an examination in proceeding to the Degrec of Mr.B."

## APPENDLX 3.

Mantal of Public Examinations, containing Report of Examiners, names of successful Candidates, amended Regulations for future Examinations, Examintation Papers of Norember, 1871, in English, French, Latin, Greek, Geometry, Algebra and Itigonometry, Geography, Mistory, \&c., \&c.

## PREFACI:

The special attention of Teachers and Students is directed to the following important changes in the Regulations, as set forth in this Manual :-

1. The Sections hate been differently arranged, and their number increased. Thus, History and Geography no longer form a part of Section II, but each of these is placed in a Section by itself. In the same way, Greek has been scparated from Latin, and German from French. The new distribution of the Mathematicnl subjects will be scon by referenee to Sectiona IV and $V$ of the Junior Examination, and IV, V, IX, of the Senior, as contained in the present: Regulations.
2. Not any two Sections, in addition to Section I, will be held sufficient for the Cerlfifuale; but of these two one must belong to the groups mentioned at the end of paragraphs 13 and 14 of these Regulations.
3. Another great change has been introduced as reygrds. Eng itsh History.-Hithento, caudidates desiring to pass in this Scction have been required to know the events of four reigns named for that purpose at the beginning of the sear. Henceforth no portion will be indicated; but a knowledge of the whole, from the Norman Conquest to the Accossion of Queen Victoria, will be expected of all who present themselves for examination in this branch
4. The History and the Geography of Seniors will differ in charantor from the IIistory and the Geography of Juniors.The differenco will be zeen on reference to Sections VI and VII of the Serior Examinations.
5. In the Languages, no other books can be brought wp by any candidate in place of those giren out in the Regulations; nor will any quantity less than that specified in them be deemed sufficient. -The concession made last year with regard to anthors aroso from the difficulty of procuring books. It was not intended to last, and is now finally withdrawn.
6. The portions of Greck, Latin, French, and German Authors mentioned in the Regulations as subjects of examination in those languages, are not intended only for the current year, bit for all future years.

The Report of the Examiners of the year 1871 is publiehed by the authority of the Sonate; but as there has not been sufficent time for discussing all the opinions contained therein, it mast be considered for the present as merely embodying the riews of the Examiners.

## UNIVERSIIY OF SYDNEY-BY-LAWS.

## Peblic kinamisatoxs.

1. Two Public Examinations shall be held every year; the one to be called the Junior Public lixamination shall be open to all candidntes under the age of sixteen ycars*; the other, to bo called the Senior Public Examination, shall be open to all candidates who may present themselves.
2. The Public Examinations shall be held at fuch times and at such places as the Scnate may from time to time appoint
3. The subjects of the Junior Public Exumination shall be tho English Language and Jiteruture, History, Goography, the Tatin, Greek, French, and German Languages, Arithmetic, Aigebra, Geometry, and such other branches of learning as the Senate may from time to time deternine.
4. The subjects of tho Senior Public Examination shall be those mentioned in Section III, together with Trigononsetry, Conic Sections, Natural Philosoply, Chenistry, Experimental Physies, and Geology and Paleontology
5. Every candidate who shall pass either of these Examinations, or such portions of cither of them as may be sequircl by the Regulations of the Senate in forco for the time being, shall recoive a certificate to that effeet, specifying the subjects in which he shall have passed, and signed by the Dean of the Facults of Arts and by the Registrar.
6. No person fhall be admitted to cither of the Public ixmminations until he sholl have paid auch fees as may be required by the hegulations of the Senate in force for the time being
7. The Professors and Assistant Professors not engaged in tuition, execpt publicly within the Universitr, together with such other persons as the Semate may from time to time appoint, shall form a 3 oard for conducting the Public Examinations: and of such other persons as he semate may from time to time appoint, shall form a Board for conducting the Publie Exam
this Boare the Dean of the Faculcy of Arts, or in his absence the Professor next in reniority, shall be Chairnan.
8. At the conclusion of each Examination, the Board shall transmit to the Sconte a Report of the restut, signed by the Chairman and at least one other Member.
9. Subject to these Br-laws, the Public Examinations shall bo couducted accorting to such Regulations as the Senato may from time to time chact.

Geverar Regthations.

1. The Public Examinations shall be held anmually at the University in the month of November, commeucing ou the first Monday in that month.
2. The fee for admission to the Junior Public Examinations shall be \&2, and to the Senior Public Examinations, e3. Candidates holding cortificates of having passed the Jumior Public Examination shall be adnitted to the Senior Public Examination upon parment of an additional fee of $£ 1$.
3. Candidates who shali hare failed to pass the Senior Examination may, if they display suficient merit, obtain a certificate of haring passed the Junior Examination.
4. A candidute holding a eerlificate of having passed the Jumior Wxamination shall be admitted to any subsequent Junior Examiution in any of the Sortions in which he has not alrendy passed, without the payment of any additional fee ; mad in case of his passing in any such Sections he shatl receive a certificate to that cffect. The samo rulo shall apply to candidatos holding certificatos of having passed the Senior Examination; but no such eandidate will be allowed to competo for honora in any Scetion in which he has alreedy passed. These exemptions slanl extencl to one additional Fxamination only.
-. Candidates who shall have failed to pass the Examination may be admitted to any subsequent Examination without the payment of any additional fee, but this exemption shail not extend to wore than two Examinations.
5. In addition to the regular Examination in November, the Boarl of Examiners are authorized, at their discretion, to hold Junior Public Examinations in Sychey at such other times as they may consider dosirable, provided that not more than one such Examination shall be beld in the same Term.
6. No candidate shall be admitted to cither of the Pablic Examinations unless he shall have notified to the Registrar his intention to become a candidate, specifying the subjects in which he elects to be examined, aud shall have paid to the Registrar the required fee, fourten days before the commencenent of the Examinution.
7. Illo Examimations shall bo conducted by means of writem or printed papers and wiza roce at the discretion of the Examiners.
8. Public Examinations may be held at a:ar phac) within tho Colony where a person, approved by tho Senate, can be found to conduct the Examination; provided always that the aggregatc anount of fees paid by candidates at any such place shall be sufficient to defray the expenses of such Examination
9. Local Ixaminations, as prorided for in elauec 5 , sla!l be held at the same time as those at the University, and shall be conducted as follows:-
(a) Copics of the paperg to be set at the Public Examinations at the University, together with such additional papers as tho absence of viva voce Examination may renter necessary, shall be transmitted under seal to the person appointed by the Senato to conduct the Local Examination.
(b) Candidates shall write out:answers to the questions set, in the presence of the person appointed to conduct the Examination, or of some person deputed by liim, and in accordauce with stch detailed instructious as may be furnished by the Chairman of the Board of Examiners.
(c) The written answers shall be transmitterl to the Board of Examiners, who slall examine them, and report thereon to the Senate.
(d) The person conducting the Local Examination shall receive such remanemation for his services as the Senate may in cach case determine.
10. The Senate may at their discretion send an Examiner or Examiners to conduct the Toceal Examinations at any place within the Colony.
11. Any candidate, although above the age of sixteen years, may be admitted to the Jumior Public Examination.

Junior Examention.
13. The subjects for the Juwior Public Examinations shall be those comprised in the following sections :-

Writing from dictation.
spcition $I$.
The rudiments of English Grammar.
The first font rules of Arithmetic--simple and compound, and the Rale of Three.
Geography.
The outlincs of English Ifistory since the Conquest ; that is, the succession of Sorcreigns, and the chief erents, of cach rign.
All candidntes will be required to pass in this section.
SFCTION 11.
English.-Language, Grammar, and Composition.
SECTHON III.
Latin.-Passages for translation from Casar's Commentaries, B. I.
Lasy passage for translation from some other Latin author.
short sentences for tramslation into Latin.
Questions on Historical and other allusions, and Parsing.
section iv.
Mathematics.-Arithmetic, Euclid B.I, Algebm to simple equations withont, surds. section $r$.
Mathematies.-Enclicl, B. IF, cxapting Props. 8, 9, 10, and B. MI. Algebrib to proportion, ineluding quadratic equations of one or two unknown quantitios and surds. SECTION VI.
English Jİstory.-From the Norman Conquest to the accession of Quecn Victoria. An acquaintonce with Dr. Smith's smaller History of Jingland, or any similar work, will be sufficient to enable a candidate to pass in this Scetion. SECTION VII.
Geography.-Physical features and politicel divisions. SECTION VIIL.
French.-Pussages for thanslation from Yoltaire's Iife of Clarles XII, B. I and IL, with a further examination similar to that in Latin.
shCHON x.
German-Pressages for transhation from Lessing's Fables, with a furtler examination similar to thatio in hatin.
sectios x.
Greek.-Yassnges for translation from Senophon, Amabasis, B. X, with a further examimation similar to that in Latin. Jivery candidate, in addion to section J, will be requied to pass in wo at least of the remaining sections, of which one at lenst musti be 1I., III, IY, or V .

Semor Examintion.
1:! ' 'lhe subjects for the Senior Public Examination shall be those comprised in the following sections:-
section I .
The same as for the Junior Examination. All candidntes will be required to pass this Section, exeept those who hold cortificates of having passed the Junior Exnmination.

SECTIO: II.
English.-Grammar, Analysis, and Composition.
section ir.
Latin.-Passages for tramalion from Liry, B. XXI, and ILorace, Odes, B. MI.
Questions on Historical and other allitsions, and Grammar.
Passages for translation from othor Latin works.
A passage of English for translation into Latin prose.

Arithmetic and Algebra, inciuding logarithms.
A satisfactory knowledge of Arithmetic and of Algebra to the Binomial Theorem inclusive, shall entitle a candidate to pass in this Section.
section t .
Geometry.-Euc., B. I, B. II, Props. 1-7, 11-14; B. III, B. IV, Props. 1-9, 15; B. V, Definitions; B. VI, Props. 1-3, 4-16, 19-21, 23, 33 ; B. X1, Props. 1-21
A satisfactory knowledge of the portions required of Books I-TV shall entitle a candidate to pass in this Section.

SEOTION YI.
IITiory.-Political and Constitutional IFistory of England, from the Norman Conquest to the Accossion of Quecn Victoria.

SECTION YII.
Geography.-Political, Physical, and Commercial.
SECTION VIII.
French.-Passages for trinslation from Guizot's Histoire de la Révolution d'Angleterro, and Racinc's Athalic, with a further examination similar to that in Latin.

SECTION $1 X$
German-l'assages for translation from Schiller's Thirty Years' War, B. II and III, with a further examination similar to that in Latin

SECTION X
Greek.-Passages for translation from the Ion of Euripides, with a further oxamination similur to that in Intin.

## SECTION XI

Gathematics.-Trigonometry, Analytical Geometry, Elementary Mechanics
A satisfactory lmowledge of either of these three subjects shall entitle a candidate to pass in this Section.
Books recommended :-Prigonometry, Todhunter's larger work; Analyticib Geometry, Todhunter's; Mechanics, Parkinson's.
gECTION EII
Chemistry.-Inorganic Chemistry, Organic Chemistry.
A satiafactory knowledge of Inorganic Chemistry shall entitle a candidate to pass in this Section.
SECTION XIII.
Geology.-Aeneral description and classification of rocks. Distribution of organic remains.
Every senior candidate, in addition to Section $I_{\text {, will }}$ be required to pass in two at lenst of the remaining Sections, of which one at least slall be II, III, IV, X, or XI, but no candidate will bo examined in more than six Sections in addition to the first.
15. The names of those candidates who shall pass the Junior Examination shall be arranged alphabetically.
16. The names of those candidates who pass the Senior Examination shall be arranged in classes, the names in cach class being arranged alphabetically. Separate lists shall be made of those who nay specially distinguish themselves in either of the following dirisions:-English Language and History and Geography; Classics; Mathematics, including Mechanics; Modern Languages; Experimental Physics and Geology; and in these lists the names shall be arranged in classes and in order of merit.
17. After the name of cach candidate in the above lists shall be added tho school or other educational establislment (if any) from which he comes to attend the Examination, and the name of his schoolmaster or tutor.

CIVII SERYICE EXAMINATION.
Colonial Secretary's Office,

- Sydney, 6th October, 1871.

Jis Excellency the Governor, with the advice of the Executive Council, and in accordnnce with an Address of the Legisiative Assembly of the 17 th February last, directs it to be notified for genemal information, that from and after the lst proximo, all persons secking appointment to a clerical office in the Public Service of the Colony, must produce a certificate sigued by the Dern of the Faculty of Arts and by the Registrar of the Sydney University, showing that they have passed a satisfactory examination in Section I of the subjects appointed by the University of Sydney for the Public Examinations held by the University, viz.:-

Reading nloud a passage from some standard English author.
Writing from dictation.
The rudiments of Euglish Grammar.
The first four rules of Arithmetic, simple and compound, and the Rule of Three.
Geography.
The outlines of English History since the Conquest ; that is, the succession of Sovereigns, and the chiof cvents of each reign.

JOHN ROBERTSON.

## DIRECTIONS TO CANDIDATES FOR THE PUBLIC EXAMINATIONS.

Candidates are requested to read these rules carefully and to olserve them strictly.
No books or manuscripts allowed to be brought into the exanination room, or into the building where the examination is hold.

No communication, by worl or otinerwise, between cendidatee, or with any one except the person presiding, is allowed during the examination.

No candidate to leaze his place during the examination without permission; but if he wishes to leave the room, or to communicate with the person presiding for any purpose, he moy stand up.

Any candidate riolating any of the above regulations is liable to be imenediately expelled from the examination room.
Each candidate is directed ${ }^{*}$
To write upon half-shects of foolseap paper, and upon one side only.
To place his distinclive number (which will be privately communicated to oach candidate before the examination) at the head of every paper which he sends up.
To attach to cach answer the letter corresponding with the question, and nothing else.
To write on the outside of his papers, when folded up, his number, the name of the subject, and the letter S ., J., or P., according as he is a candidate for the Senior, the Junior, or the Preliminary Esamination.

No candidate to write upon his papers his name or initials, or anything clse whatever, except the answers to the quastions and what is directed by these Regulations.

Candidates aro forbidden to communicate to any one the numbers by which they ure distinguished, until the result of the examination has been pablicly dectared.

In answer to the muthematical questions, the whole of the work must be sent up. No marks will be given for anewers only.

## INSTRUCTIONS TO PERSONS APPOINTED TO CONDUCT PUBLIC EXAMINATIONS IN COUNTRY Places.

The person conducting the examination, or some responsible person nppointed by him, to remain in the room with the candidates during the wholo time of the examination.

Arrangoments to be made so that in case a candidate is allowed to leave the room for any necessary purpose, thero may be security that ho remain under sufficient supervision during his absence.

The seal of the envelope containing the examination paper for the day to be broken at the appointed hour, and in the presence of the candidates.

At the conclusion of cach day's examination, the answers sent in by the candidates to be transmitted by post, as a book parcel, to the Chairman of the Board of Examiners, University, Sydney

Foolscap paper and other necessary stationery to be provided.
All expenses for postage, stationery, de., to he charged to the University.
Clergymen of any denomination to be allowed access to the examination room during the examination, subject to the condition of their observing the regulations and any reasonable requirements of the person conducting the examination.

A copy of this paper to be posted up in the examination room.

The successful candidates came from the following Educational Establishments, viz. :-
N.B.-This does not inelude canulidates for the Civil Service.

## EXAMINERS' REPORT

To the Ohancollor, Vice-Chancellor, and Senate of the University of Sydney.

## Gentlemen,

We have the honor to report that the Public Examinations commenced on the 6th and terminated on the 14th of November.

The names of 179 candidntes were entered, of whom 176 presented themselves for cxamination. Of these, forty-two were Soniors-thirty-five male and seven female; 137 were Juniors- 1.26 male and 11 female. 128 candidates were oxamined at the University, and fifty-one at rarious places in the country. The examinations were conducted according to the printed rules, of which copies are appended to this Report.

Full particulars concerning the candidates who passed the examinations are given in a tabular form in an Appendix. Mr. Fairfax sprize of $£ 20$ to the best proficient amongst the Senior female candidntes is awarded to Miss Anne Jane Bolton. The prize of $£ 10$ given by the same gentleman to the best proficient amongst the Junior female candidates is awarded to Miss Amelia Cummins Rennie.

The number of candidates haring been large euough to enable us to form an opinion as to the state of education in the Colony gencrally, we have thought it desirable upon this occasion to report more in detail than usual, and to explain our views as to the manner in which these examinations should be conducted, in order that they may exercise a bencficial influence, nad may afford to parents a real test of the value of the education which their children are receiring.

Whenerer an examination is instituted for any purpose, cundidates and their teachers unxiously demand that text books should be named, and that a knowledge of their contents should entitle a candidate to pass. It happens generaily that this demand is complied with, and everybling thus made casy to all concerned. The examinations yield results very brilliant in appearance, whilst in reality they afford no proof that a candidate possesses any true knowledge, or that he has been so far educated; but merely test his power of retaining in his momory, up to a given time, a large quantity of printed matter; or illustrate the skill with which perhaps he has been trained during a few weeks for a particular purpose.

The best possible examination would be one for which no preparation would serve, cxeept the continuous everyday intelligent system of instruction which would be most to the adrantage of the pupil if no cxamination were contemplated.

Our object has been to ascertain the real knowledge of the candidntes, and we lave endeavoured so to frame the questions as to give every admantage to knowledge of this kind over the remembrance of words or facts committed to memory without a full consciousness of their import. We have therefore aroided the too common practice of setting questions in such a form that they snggesti the recollection of a particular book, and may be answered by rote without any exercise of judgment or reflection.

## Fingish Canguage.

In the examination in English, a proper allowance was made for an exact, acquaintance with the parts of epeceh, as commonly divided, and for other brancies of parsing; but we endearoured likewise to ascertain how far the candidates were acquainted with the meuning of ordinary words, and the connection of various words belonging to a common root. It was also our ain to test their aptness in discerniug vulgar errors in the use of words, and faulty arrangements of sentences, such as are to be met with in the writings of unelucated persons.

We regret to eay that the results of this part of the cxamination were upon the whole far from satisfactory, and that the candidates generally showed muell more aptness in naming the parts of epeech and their granmatical connection in sentences given for that purpose, than in their knowledge of the English language; and it is our opinion that this deficiency arises from a too exclusive attention to the technicalitics of granmar, and the comparative neglect of eound English rending, necompanicd by suitable explanations aud exercises thereon. It is to the same canse that we attribute the many instances of very defective apelling which we have met with in the papers of many candidates, some of whom conld not eren spell correctils the technieal terms of grammar which they had been taught to employ.

## Histoley and Geograpity.

A great proportion of the answers both in History and Geography were far too scanty, and a great many of the candidntos committed gross errors in one or both of these branches, so that it was impossible to resist the impression that in many eases they lad beon got up as things to meet a particular occasion, rather than ns being worthy to be known for their own sakes. It cannot be doubted that many of the candidates would have shown much more proficieney in fistory if it had been studied in the Public Schools of the Colony, and we hope that the day is not far distant when so necessiry a branch of English education will be insisted upon by the Council. We beliere that there is no real impediment to this measure arising from the difference of religious belicf; for the ovents of history, and cren the characters of the actors in it, may be commented on to good purpose, and yet lave those questions open upon which men of different persunsions entertain different opinions. A text book prepared in this spirit would in our opinion receire the sanction of the heads of our screral religious bodies, so that it could be introduced into the Public School system without complaint or remonstrance of any hind. If such a book were adopted, not only would our public cducation be delivered from the reproach of omitting Mistory, but Geography also, which is now in comparatively lifoless and repulsive stady, would become interesting, und would therefore be more ensily learnt

## Mathematics.

A large proportion of the male candidntes elected to be examined in this section, and wo are glad to say that the results of this part of the examination are upon the whole satisfactorg. In Arithmetic especially the candidates generally acquitted themselves with credit. Tho majority even of the younger candidates acem well nequainted with tho ordinary arithmetical processos, which nineteen ycars ago the Profegsor of Mathematies was obliged to teach in his class-room to candidntes for academic honors. A considerable number of those who otherwiso failed to pass the examination displayed a competent kuowledge of this subject.

With the result of the examination in Algebra we are on the whole satisfied. The lenowledge of the younger candidntes of a subject so difficult to beginners is of course very small; but as far as it goes, it appears to be real knowledge, and affords eridence of judicious teaching.

With respect to Geometry, we cannot report so favourably. A great number of the candidates appear to have no knowledge of the subject beyond the bare text as usually studied. In conducting this part of the examination we felt considcrablo difficulty. It has been the usual practice to set a number of propositione, in the cxact words of the text, and candidates able to write out the demonstrations have been held entitled to pass, although it is obvious that they may, in reality, have no knowledge whatever of Geometry. We are quite aware that to require cvery candidate to solve the simplest of deductions would be to set up a standard which could not be gonerally attained. There are many students who can perfectly understand and remember the proofs of geometrical propoeitions which are set before thom, and derive much advantage from the study, through the illustrations which it affords of the dofinite use of words and of exact processes of reasoning, and are yet incapable of originating a proof of the simplest proposition which could be stated. We wish to encourage these, and to rccognize their knowledge, when it is a real knowledge of Geomotry, and not of Euclid's text only. In distinguishing between these cases the diffculty lies. It will hurdly, we think, be considered too screve, if we hold that a candidate has no real knowledge who cannot rccognize a well-known proposition when thinly disguised by a verbal alteration in the statement.

## Languages.

In the Classics and Modern Languages we have to make the same observations which we have often made before, both in these and other examinations. The belief seems to be still prevalont amongst many students, and perhaps teachers, that a candidate who can translate with tolerable correctncss one or two short extracts from a book given out a twelvemonth before, has a right to be considered as having some knowledge of the language; but these cfforts of memory cannot deceive any one Who has been in the habit of reading almost faultlesg versions, written by candidates who are innorant of the inflections of the commonest verbs, and cannot turn the simplest English phrase into the language required, without the grossest blunders. We have, therefore, steadily refusid to let any Senior or Junior pass in French, or Germun, or Latin, or Greck, unless he was tolerably accurate in his inflections, and could turn English phrases, suited to the Junior and Senior classes, into something intelligible and tolorably accurate.

Among those candidates who have acquitted themselves with credit, there are several whom we would recommend to the Senate as ontitled to matriculation, without any further trial. Thore are others whom we would also have recommonded for the same exemption, but for the absence of Greek from the list of the subjects in which they elected to be examined; and we would respectfully urge it upon your serious considerution, whether this is not an additional reuson for making the stady of that language, under certain conditions aud restrictions, optional. If the Public Schools of the Colony, which have becn brought into contact with the Univorsily, by theso examinations, are ever to send students to it in uny considerable numbers, it must be through this concession; and even in the case of private schools, or those among them where Classics aro usually taught, many who aro now deterred from procceding to the Univorsity by an consciousness of the groat diflicully of mastering Greek, would matriculate, aud do credit to themsel ves and to this place as good Latin scholars and mathematicians. We beg to point out that this suggestion is not, as it may seem, forciga to the mattor of our Report, but arises from the exporienco which the Public Examinations have given us of the extremoly low state of this study in the Colony. We have observed with much pain that the answers of candidates in this soction show that a great deal of time and labour have been expended to little or no purpose.

You are aware that the Government has given notice that candidates for elerical employment in the Civil Service will in futuro be required to pass the Preliminary Examination, and that in consequence twenty-one candidates entered for that Section only. Of these, eleven passed, and will receive certificates to that effect. You will obsorve, however, that the ordinary cunlidates who pass the Preliminary Section, but who otherwise fail, are not entitled, under the existing regulations, to any certificate, and no list of their names is published or reported to you. With your approval, we intend to adhere to this practice. Of the unsuccessful candidstes, a considersble momber failed in Section I, and we do not wish to subjoct them to the additional unpleasantness of secing their names omitted from the list of those who passed the Proliminary Examination.

Tho same examination is now used for two different purposes, and there are obvious reasons for keeping them as distinct as possible. We intend, therefore, subject of course to any instructions which we may receive from you, to refusc the Special Certificate for tho Civil Service, except to those who enter expressly for it. It will be understood, of course, that the usual certificate of haring passed the Junior or the Senior Examination includes what is required by the Government, and is a qualification for cmployment in the Civil Service.
$\left.\begin{array}{l}\text { M. B. PELL, } \\ \text { CHARLES BADHAM, } \\ \text { HUGH KENNEDY, }\end{array}\right\}$ Eraminers.

## PUBLIC EXAMINATION PAPERS.

## Preliminary (for Dionamon). Monday, 6 th November.

We must take care to distinguish dissembling from feigning, though they are not always separate in fact. The former is a suppression of the truth, the latter a suggestion of the opposite. While one leares you in your own orror, the other beguiles you, by deceitful practices, into a false beclief, from which you were previously exempt. The effects of both are very mischicvous; for the welfare of many familics is brought into jeopardy and peril, and sometimes to irrctrievable ruin, by want of candour and straightforwardness. It is, thercfore, not marrellous that the shafts of satire have often been levelled at these offences.

## Preliminary Englisif.-Skitois and Juniors.

Monday, 6 th November. 930 to 11 A.M.
(a) Parse the following sentence, giving to each word its name, as a part of speech, and writing down the infinitive of cach verb :-

Although time and suffering had wrought grievous changes on his once rigorous frame, he forebore from complaining, and went through all his dutiea manfully."
(b) Write down the past tense and past participle of the following verbs :- to sit, to flec, to strive, to wring, to weave, to smite, to forego. Exclasion is the noun denoting the act expressed by the vorb to exclude. In like manner, write down the substantives denoting the acts expressed by the verbs-to compound, to dissolve, to hinder, to postpone, to impose, to infringe, to restrain, to compel.
(c) Write down the meaning of tho following words:-abate, bewray, collusion, campaign, detract, forecast, derision, deprecotas depreciate, malign, identity, lax, compensation, refrain, refuto, purpose, purport, maunal, verbal, scdentary, and sapple.
(d) Correct the following :-

Tho man whom you promised would call upon me, together with his two sons, have just left me.
His services could not be availed of, though I should have been glad to have been able to have done so, if it hadn't have beon for objections as I pointed out to yon, and will be repeated the first time as ever wo meet.

Preliminary

## Preliminary abithictio.-Seniors and Juniors.

Monday, 6th November. 11 A.м. to $12 \cdot 30$ Р.м.
(a) Muitiply one hundred and fifteen millions threa thousand and forty-seven by one thousand seven hundrod and three.
(b) Multiply f478. 6d. by 9 and also by 129.
(c) Divide the last product by $\mathbf{1 7 5}$.
(d) If 7 articles cost $£ 1$ 11s. Gd., how much will 29 articles of the same kind cost?
(c) If a man can walk 352 yards in four minutes, how many miles can he walk in four and a holf houre ?
(f) A certain sample of gold is worth $£ 315 \mathrm{se}$. per oz. Find the value of 3 dwts .8 grs . of the same.

## Preliminary History and Gbograpitx.-Semiors and Juniors. <br> Monday, 6th November. 2 to 5 P.m.

(a) Name in order the threc kings who succeeded Henry II.
(b) Give a very short account of $a$ few of the principal events in the reign of Elizabeth.
(e) What kings, since the Conquest, died riolent deaths, or were expelled from the throne?
(d) State briefly the circumstances under which Charles II became King of England.
(e) Name some (not more than five) of the important battlos which occurred during the reign of Goorge III, stating where and against whom they were fought.
( $f$ ) In what reigns did the following events occur?
The murder of A'Bockett.
The Reformation.
The union of the Crowns of England and Scotiand.
The loss of the last of the English possessions in France.
The conquest of Wales.
The Reform Bill.
(g) Give the names of the principal independent States in Europo, and of the Capitals of each.
(h) Name in order the countries upon the Mediterranean, or as many of them as you remember.
(i) Give the names of the Presidencies and of a few of the towns in British India.
(j) Explain as particularly as you can the positions of the following places :--Liverpool (in Europo), Belfast, Aberdeen, I3oston, Jamaica, the Gulf of Guinca, Cape Town, Carpentaria, Mauritius, Jupan.
(k) Name five of the great rivers in the World, and the countries through which they flow.

## Latin.-Seniors.

Thesday, 7 th November. $9.30 \mathrm{~A} . \mathrm{M}$. to $12 \cdot 30$ P.M.
A. Tranglate into Latin-
(a) Being asked who had written the book, he answered that he did not know; and that if any one had told him that it was about to be writton he would have prevented it.
(1) Ye will remember my counsel when your folly has borne its fruits.
(b) Ye wili remember my counsel when your folly has borne its fruits.
(c) Although I pity the man, I cannot nse his labour in the works which I have undertaken to perform.
(e) There is nothing which he hears more gladly than the praises of his son, in cducating whom he took such great pains.
(f) Ho survived many thousand dangers in war, to perish in an obscure place by an unknown hand.
B. Give the genders of apex, crux, fax, margo, nix, plebs, turris, pallis.
C. Write down the perfects and supines of aufero, abscindo, dometo, divido, faveo, precaveo, projicio, rosilio.

Tranglate into English-
X.

My. Tam ubiubi erit inventum tibi curabo, ot mecum adductum
trum Pamphilum : tu modo, anime mi, noli te macerare.
PA. Mysis. Mrx. Quis est? Ehem Pamphile, opportune to mihi offers.
PA. Quid est?
My. Orare iussit, si se ames hera, iam ut ad se renias:
videre nit te cupere. Pa. Fah, perii : hoc malum integrascit.
Siccine mo atque illam opera tua nunc miseros sollicitari?
Nan idcirco adcersor, muptias quod mi adparari sensit.
CII. Quibus quidem quam facilc potnorat quiesci, si hic quiesset.

DA. Age, si hic non insanit satis sur sponte instiga. Mr. Atque edepol
en ros est : proptereaque nunc misera in moerore est. Pa. Mysis,
per onnes tibi adiuro deos, numquam eam me deserturum;
non, si capiundos mihi sciam esse inimicos omnes homines.
IInnc mi expetivi, contigit : convoniunt mores : valeant,
qui inter nos discidium volunt: hanc, nisi mors, mi adimet nemo.
My. Resipisco. Pa. Non Apollinis magis verum, atque hoc responsum est.
Si poterit fieri, ut ne pater per me stctisso credat,
quo minus hee fierent nuptiae, volo. Scd si id non poterit,
id faciam, in proclivi quod est, per me stetisse ut credat.
Quis videor ? Cf. Miser aeque, atque cgo.
Y.

Hoc illud est, quod Pisistrato tyrano a Solone respousum est, cum illi quaerenti, qua tandem ro fretus sibi tam nuflaciter obsisterct, respondisse dicitur 'senectute.' sed vivendi est finis optimus, cam integra mento certisque sensibus opus jpsan suum eadem quae congmentavit natura dissolvit. ut navem, ut aediffium idem destruit facillime qui construxit, sic lominem eaden optime quac conglutinavit natura dissolvit. iam omnis conglutinatio recens acgre, inveterata facilc divellitur: itar fit ut illud breve vitac reliquum nec avide adpetendum senibus nee sine causa deserendum eit; velatque Pyilhgoras iniussu imperatoris, id est dei, do pracsidio ct statione vitae decedere. Solonis quidem satpientis est elegium, quo so negat velle suam mortem dolore amicorum et lamentis vacare. volt, credo, se esse carum suis, sed haud scio an melins Ennius:
neme me lacrumis decorct, neque funera fletu
faxit. cur? volito vixos per ora virum.
non conset lugendam esse mortem, quam immortalitas consequatur.
Z.

Atque ego no utilem quidem arbitror esse nobis futurarum rerum scientiam. Quae enim vita fuissct Priamo, si ab adolescentia scisset quos crentus sonectatis esset habiturus? abcanus f fabulis, propiora videamus, clarissimorum hominum usstrao civitatis gravissimos exitus in Consolatione conlegimus. quid igitur? ne omittmus anucriores, Marcone Crasso putas utile fuisse, tum cum maxumis opibus fortminque florebati, scire sibi jnterfecto Publio filio excrcituque deloto trans Euphratem cum ignominia et dedccoro csse percundum? an Cn. Pompeium conses tribus suis consulatibus, tribus triumphis, maximarum rerum glorit lizetaturum fusse, si scirot ec in solitudine Aegyptiorum trucidatum iri amisso exereita, post mortem vero ea consecutura, quae sine hecrimis nou possumus dicere?
$N . B$ - Candidates are not expected to translate more than one of the two extracts $X$ and $Y$, but all, whatover author they bring $u p$, are expected to do their best mith evtract $Z$.

Tusday, 7 th November. 930 A.s. to $12: 30$ P.m.

## A. Translate into Latin-

(a) If he had been at Rome we should have receired a letter from him
(b) They say that he will come into the camp.
(c) There is no doubt but that he has read many books.
(d) The scholur obcyed his master that he might plesse his father.
(e) The way was so long that the soldiers were unt seen before night:
$\left(f^{\prime}\right)$ Having left the ship, the sailors wandered into the fursts which they had seen from the shore.
B. Write down the accusatives, singular and plural, of cardo, crus, grus, limen, mare, sensus, tus, fas.
C. Write down the perfect and supine of colo, findo, gero, pungo, tero, vincio.

Translate into English-

## X .

Cr. Quid istic? Si ita istuc nimum induxti esse utile,
nolo tibi ullum commodum in me claudier.
Sr. Merito te semper maxumi feci, Chreme.
CII. Sed quid ais? SI. Quid? Ch. Qui scis eos munc discordare inter so?

Si. Ipsus mihi Daros, qui intimust eorum consilis, dixit:
et is mihi suadet, nuptias quantum queam ut maturem.
Num censes faceret, filium nisi sciret eadem haec velle?
Tute adeo iam eins rerba nudics. Weth, evocate hue Darom.
Atque cccum : video ipsum foras exire.
Y.

Quid igitur timeam, si aut non miser post mortem aut bentus etian futurus sum? quamqunm quis est tam stultus, quamris sit adulescens, cui sit exploratum se ad vesperum esse victurum? quin ctiam aetas illa multo plures quam nostra casus mortis habct: facilius in morbos incidunt adulescentes, gravius aegrotant, tristius curantur. itaque pauci veniant ad senectutem; quod ni ita accideret, melius et prudentius viverctur : mens enim ct ratio et consilium in senibus est; qui si mulli fuissent, nullae omnino civitates fuissent.

## 2.

Atque ego no utilem quidem arbitror esse nobis futurarum rerum scientian, Quac enim vita fuisset Priamo, si ab adolescentia scisset quos eventus sencetutis csset hubiturus? abeamus a fabulis, propiora vidennus. clarissimornm hominum nostrac civitatis gravissimos exitus in Consolatione conlegimus. quid igitur? ul, omitlamus superiorcs, Marcone Crasso putas utile fuisse, tum cum maxumis opibus fortunisque florebat, scire sibi interfecto Publio filio exercitugue deleto trans Euphratem cum ignominia et dedecore esse pereundum? an Cn. Pompeium censes tribus suis consulatibus, tribus triumphis, maximarum rerum gloria laetaturum fuisse, si sciret se in solitudine Aegyptiorum trucidatum iri amisso exercitu, post mortem vero ca consecutura, quae sine lacrimis non possumus dicere?
N.B.-Candidates are not expected to translate more than one of the two extracts $X$ and $Y$, but all, whatever author they bring up, are expected to do their best vith extract 2 .

## Trenchi-meniors

Tuesday, 7th November. 2 to $4.30 \mathrm{p} . \mathrm{m}$.

A. Translate into French-
(a) Have no fear. I will remember it.
(b) As for my honore, it is he who gave them to me; I do not think he wishes to take them from me.
(a) There is no better fable of La Fontaine than that of the animuls with the magie lautern.
(d) Have you any ideas to gire me on the suhject of which I am about to treat?
(e) However grent may be his success, be owes some part of it to fortunc and not all to foresight.
(f) Would you beliove that the author of that book was a commorcial traveller?
(g) The affeir seems to be much nore scrious than we beliered it to be at the beginning.
(h) Buy me some pastry such as I bought last year.
B. Write down the first person singular, past tensc, of écrire, coudre, lire, vendré, craindre, naitre, plaire.
C. Write domn the first person, present tense, of acherer, jeter, concevoir, sortir, finir, cmployer, fatiguer.
D. Translate--

## $X$

Qu'est-il besoin, Nabal, qu'i tes yeux je rappelle
De Joad et de moi la fameuse querelle,
Quand j'osai contre lui disputer l'encensoir
Mes brigues, mes combats, mos pleurs, mon désespoir?
Vaincu par lui, j'entrai dans une autre carrière,
Et mon ûme à la cour s'attacha tout entière.
J'approchai par degrés de loreille des rois;
Et bientôt en oracle on śrigea ma voir.
T'étudini leur cour, je flattai leur caprices,
Jo leur scmai de fleurs lo bord des précipices
Près de leur passions rien ne me fut sacré ;
De mesure et de poids je chaugeois a leur gre.

## $Y$.

(l) $2 a-3 x, 2 a+3 x, 4 a^{2}+9 x^{2}, 16 a^{4}+81 x^{4}$
( $m$ ) Find the greatest common measure of
Find the multiple of $\quad x^{3}-2 x^{2}-2 x-3$ and $x^{4}-2 x^{3}-3 x^{3}+x-3$
(o) Simplify the following
$3(a-x), 12\left(a^{2}-x^{2}\right), 4(a+x), a^{2}-2 a x+x^{2}$

Solve the equations
$10=\frac{15}{15}$
(q) $\quad(x+a)(x-b)-(x-a)(x+b)=a^{2}+a b-2 b x$

$$
\begin{equation*}
2 x^{2}-15 x+7=0 \tag{r}
\end{equation*}
$$

$$
\begin{equation*}
3 x+4 y=27\} \tag{s}
\end{equation*}
$$

$$
7 x-9 y=8\}
$$

$$
\begin{equation*}
\sqrt{\sqrt{2} x+10}-\sqrt{\sqrt{x+1}}=2 \tag{}
\end{equation*}
$$

## Geometry.--Senions.

Wednesday, 8th November. 2 to 5 P.M.
(a) State in order the first three propositions in Book I which relate to parailel lines.
(b) In the proof of which of these propositions is the twelfth axiom required?
(c) Show that the opposite sides and angles of parallelograms are equal.
(d) Show in what cuses the diagonale of a parallelogram are perpendicular to one another.
(d) Show in what cuses the diugonals of a parallelogram are per
(e) Describe a square which shall be equal to a given rectangle.
(f) Show that angles in the same ecgment of a circlo aro equal.
(f) Show that angles in the same eegment of a circle aro equal. cat the circle.
(h) Describe a circle which shall touch cach of three given straight lines, no two of which are parallel to one another
(i) State Proposition I, Book VI; and assuming its truth for triangles, show that it holds for parallelograms.
(j) Show that equiangular paraliclograms bear to one another the ratio compounded of tho ratios of their sides.
(k) If the sides of two equiangular parallelograme be 5,3 and 4, 6 respectivoly; what is the ratio of their areas?
(o) Describe an equilatoral triangle whose area shall be three times that of a given equilateral triangle.

## Grombtiy.—Juniors.

Wednesday, 8 th November. 2 to 5 p.m.
(a) Define the terms, parallel lines and parallelogram.
(b) Show that any two sides of a triangle are together greater than the third side.
(c) Show that the straight lines drawn from the extremitics of the base of an isosceles triangle to the middle points of the opposite sides are equal.
(d) Parallelograms upon equal beses and between the same parallels are cqual.
(e) If a straight line be divided into any two parts, the equires of the whole line nod of one of the parts, are together cqual to twice the rectangle contained by the whole line and that part, together with the square of the other part.
(f) Straight lines in a circle which are equally distant from the contre, are equal.
(g) If from the extremities of a diameter of a circle two parallel chords be drawn, show that they are equal.
(i) In the diameter of a circle produced find a point such that the rectangle contained by the part produced and the line made up of the dinmeter and the part produced, may be equal to a given equare.
(i) Describe a circle about a given triangle.
(j) In what cases will the contre of the circumscribed circle be upon one of the sides of the triangle?
( k$)$ Describe a circle which shall pass through the middle points of the sides of an isosceles triangle and touch the base.

English. -For Jumions only.
Friday, 10 th November. 930 A.M. to 12.30 r.m.
A. My frienda help. Shos that these words are cibable of four differche significations, according to four different manners of writing them.
B. Give examples to show that the verb sometimes differs from the noun of the same root (a) in aecent only, (b) in pronumeintion only ( $c$ ) in the change of a single letter, ( $d$ ) in the change of one letter into two.
C. Give all the changes by which nouns are made pluyul, and give an examile of oach.

## SENIORS AND JUNIORS.

D. From what words are the following inflected :-Utier, hindmost, nether, first, furthor, rather, riddle, settle $P$
E. What is the origin of thore, then, and the adverb the?
F. Give examples of (a) words which, because they lookod like plurals, have since been used as such; and (b) worrls whioh, though plaral, have been employed as singular.
G. What is the common distinction between adjectives ending in ble and ive? Give examples of both terminations being used in the opposite sense.
H. Fxplain the following phrases :-Implicit belief, condign punishmont, approximate statoment, express stipulation.
I. Give the subject and predicate in each of the following sentences:- (a) "That you have wronged me doth appear in this." (b) "There are more things in heaven and earth, Horatio, than are dreamt of in your philosophy." (c) More men are capable of writing poetry than have ever tried. (d) All that I am and all that I shall be I owe to education.

## FOR JUNIORS ONLI.

J. Give the subjects and predicates in-Strange as it may soem, it was the French who first proclaimed war.
K. Give the etymology of sedate, debate, vixen, reckless, intense, sloth, several, poultry, osler, spital, sundry, photograph, analysis.
I. Corroct the following :-When living in a remote place from the rest of the world, we are norry to say for the credit of human nature that men show a boorish avergion to any strange face, that proves how much our benevolence is not founded on reflection but habit.
M. Many persons looked upon the flight of King James as a - abdication, and a-m of his rights. Supply words to moan that it was as good as, or had all the force of an abdication, und that he gave up his rights,
N. Julins Casar made himself __, but when he began the war he did not _. Till up the gaps so as to say that he set himself above lato, and that he did not entertain suth a purpose.
O. Write down cquivalents of the following phrases :-A pardonable weakness, a mighty uehicrement, a prolix exposition, desultory occupation.

## Geography.-Seniors and Junions. <br> Friday, 10th November. 2 to 3.30 r.m.

(a) Draw a map of Australia, showing the bounderies of the scveral Colonies, and the positione of the principal towns and rivers
(b) Name in order the senboard counties of England, or as many of them ns you can remember.
(c) Give the names nud describe briefly the positions of the principal English possessions in North America.
(d) Describe, as particularly as you can, the positions of the following places:-Glasgow, Hull, Iceland, Mimilla, Halifnx, Yucatan, Sierra Icone.
(e) What islands may be eighted on the ordinary voyage from London to Sydnoy by the Cape of Good Hope?

The following questions are for Soniors only.
(f) Draw a map showing the principal watersheds of Europe. -
(g) Why is there lithlo or no tide in the Mediterrancan? How do you account for the current through the Stiraits of Gibraltar?
(h) What is the general dircction of the current on the coast of Now Soutin Wales, and how do you account for it?
(i) What effect has this current on the climate of this Colony?

Candidates are directed to put up their History and Geography papers separately.

## History or England.-Senioks.

Friday, 10 th November. $3 \cdot 30$ to 5 p.m.
(a) Whom did Henry VII marry, and what political objects wore attained by the marriage?
(b) By what means did Trenry VIl amass a large amount of treasure?
(c) Why may tho period during which Ienry VII reigned be regarded as an era in tho history of Europe?
(d) What opinions bave you formed as to tha motives of Honry VIII in the following acts:The divorce of Catherine of Arragon.
The suppression of the Religious Houses.
(e) Give an account of the life of Cranmer, and of the opinion which you have formed of his character.
$(f)$ How do you account for the great incrense in the royal prorogative under the Tudors?
(g) What means had the Sovereign at his disposal during this period for the defence of the kingdom and the suppression of insurrections ?

## History of England.-.Juniors.

Friday, 10th November. 3 -30 to 5 r.m.
(a) Whom did Henry VII marry, and what political objects were attained by the marriage?
(b) What childron had Henry VII, and from which of them is tho prosent Soveroign descended?
(c) Give a short account of the principal events in the reign of Ifenry VIII.
(d) Who were the claimants to the throne at the death of Edward VI, and what was the resuit?
(s) Deseribe the character of Mary, and the chicf events of her reign.

Avgebra and Trioonometry --Seniors.
Saturday, 10 th November. 9.30 A.m. to 1 r.m.
(a) Prove the formula for the sum of $n$ terms of an arithmetical progression.
(b) Sum the series
$30+28+26+\ldots$
(d) Assuming the formala for the number of permutations of $n$ things $r$ together, find the number of pormutations of $n$ thinge all together, when $p$ of the things are akike.
(e) Expand $(2 x-3 y)^{5}$
(f) Expand $(1-2 x)^{\text {i }}$ to five torms.
(g) Can such an expansion as the last be in any case of any practical use?
(h) Wan such an expansion as the lown the $(r+1)^{\text {th }}$ term of $(a+b)^{n}$
(i) Find tho seventh term of $\left(a^{2}-b^{2}\right)^{1}$
(j) Find the fifth term of $(1-2 x)-{ }^{3}$
(k) Define the term logarithm, and from the definition prove the formuln
$\log _{a^{4} m^{n}}=p \log _{a} m$
( $)$ Explain the use of the above formula.
( $m$ ) What are the logarithme to the base 10 of

$$
1000, \quad 01, \quad 100 \sqrt{10}, \frac{\sqrt[3]{10} \times \sqrt{10}}{0001}
$$

(n) Trace the changes in sign and magnitude of the cotangent of an angle as the angle increases from 0 to $180^{\circ}$.
(o) If $\tan A=\sqrt{3}$, find all the other trigonometricn ratios of $A$
(p) Prove the formula

$$
\cos 2 A=\frac{1-\tan ^{2} A}{1+\tan ^{2} A}
$$

(q) Show that tax $150=2-\sqrt{3}$.
(r) Investigate a formula by means of which the angles of a trinugle wny be determined when the sides are given.
(s) Show that one of the angles of the triangle whose sides are
$\sqrt{3+1}, \quad \sqrt{3}-1, \quad \sqrt{6}$
is $60^{\circ}$.
(t) Explain by what measurements and calculations the distance between two inaccessible objects, in the same horizontal plane with the observer, may be determined.

Grerh.-Sentors aid Jdurors.

## For Juniors.

## For Jthions and Siniors.

B. Give the Greek for the advorbs better, best, less, more, more quickly, more wisely, most shamefully.
C. Write down the first person of the present, future, perfect, and aorist in use, of àk $\delta v \omega$, $\beta a l y \omega$, $\gamma\{\gamma \nu 0 \mu a$, , $\delta \in\{\kappa \nu \nu \mu$, $\pi \rho \circ \phi ¢ \rho \omega, \phi a t \nu \omega$.
D. Translate into Greek :
(a) I should not hare heard him, if I had not been heard by him.
(b) I would go with you, if you would show me the way
(c) He said that they would become wiser, if they became better.
(d) Do not bring forward this accusation ( $\neq \gamma \kappa \lambda \eta \mu a)$, lest I should appear to have betroyed ( $\pi \rho 0 \delta \delta \delta \omega \mu \mathrm{l}$ ) him.
W. Translate-

## For Semtors onit.

F. Translate into Greek-
(a) When she perceived that sho had been betrayed, she was easily persuaded to drop the poison into the cup.
(b) If they had not beea priry to the exposure of the child, they would not have told so many lies.
(c) She asked whither she should flee so as to escape her encmics.
(d) He did all this hoping that he should escape notice : but I knew tant he would be caught.

## Exglish Subject.-Senions.

Monday, 13 th Notember.-Time alloved, 3 hours.
A. What are the probable sources from which Shasespere derived the first outline of the Tempest?
B. Briefly describe the characters of Caliban, Sebastian, Gonzalo, and Miranda.
C. Give an account of the followivg scenes, quoting such lines or expressions as you may happen to remember.
(a) The conspiracy against the lifo of the King of Naples.
(b) Ferdinand bearing logs, and Miranda.
(c) Meeting of Prospero and Alonzo.
D. Quote as munh as rou can remember of-
(a) The description of Aricl's imprisonment.
(b) Caliban's account of Prospero's first coming
(c) Caliban's speech beginning "I'll show thee the beat springs."
(d) Prospero's speech in which he gays that the world is as perishable as the vision he has conjured up.
(c) Prospero's specch beginning "Ye elves of hills, brooks, standing lakes, and groves."
E. Montion any words or constructions occurring in the Tlempest which have now fallen into disuse.
F. Mention any passages or expressions in the 'Iempest which hare struck jou in the course of reading, and specify what ron thought remarkable in them.

Isorganic Cfremistris.

## Tuesday, 14th November. 2 to 5 S.M.

1. State the difference between an element and a compounct.
2. Gire a list of the elements which exist as gases at ordinary atmospheric temperature; and the chief chemical characteristics of each.
3. Write the formula for water; and stato the volumeltio proportions in which its constituents rombine.
4. Give the composition of water by weight.
5. Write the formule for oxide of carbon and carbouic acid gas. State how the former may be converted into the latter ; and give a method by which they may be distinguished from each other.
6. Write the formule for sulphuric, nitric, and hydrochloric acids.
7. Gire the formula for ammonia; also for the compound formed when it is united with hydrochloric acid.
S. State the bulk of hydrogen, at $60^{\circ} \mathrm{F}$., and 30 inches pressure, obtaimble by the action of suflicient hydrochloric acid upon 100 grains of pure zinc, and the buik that the gas would occupy at $70^{\circ} \mathrm{IF}$, and 29 inches pressure.
8. State the products of combustion, in air, of the following: -Any compound of carbon and hydrogen, sulphur, and plosphorus.
9. State the acid mistures employed for dissolsing gold, and the compound of gold formed.
10. Write the formula for the following minerals:-Fluor spar, gypsum, dolomite, cryolite.

## ANalytical Gyoumetry.

Thesday, 14 th Novomber, 2 to 5 e.m.
(a) Explain generally and give a particular instance how a plane curve may be represented by an equation.

Show what are represented by
$(b)$
$(c)$
$(d)$
$2 x+3 y=6$
$y^{2}=4 x^{2}$
(a)
$x^{2}+y^{2}=4 y$
$y=x+x^{2}$
( $f$ ) Find the equation to the etraight line which passes through the point ( $x y$ ) and is perpendicular to the straightline $y=m x+c$
(g) Show that the equation to the tangent to a circle is
$x x^{1}+y y^{1}=a^{2}$
(h) What docs $x x^{1}+y y^{\mathrm{I}}=a^{2}$ represent when $e^{x^{1}}, y^{1}$, is an cxtermal point.
(i) Find the locus of middle points of parallel chords in a parabola.
(i) Two tangents to a parabola are perpendicular to one another, show that they meet on the directrix.
(k) Show that the sum of the focal distances in an ellipse is $2 a$.
(l) The rectangle contained by the perpendiculars from tho foci on the tangent to an ellipse is constant.
(m) Define an asymptote.
( $n$ ) Prove that the straight line $y=\stackrel{b}{a}$ is the asymptote to an hyperbola.
(o) Find tho equation to the lypperbola $x-y-a^{2}$ referred to the asymptotes as axes.
( $p$ ) Trace the curpe $x y=x x-\overline{1 x-2 .}$.

## APPENDIX

RETURN of the Reccipts and Expenditure of the University of Sydney, for the Year 1871.

* Reducible to hic extent of $£ 280$ 17e. duc to the Commercinl Bank on Building Finnd Account.

WITLIAM CLARK, Accountant HUGH KENNEDY, Registrar.

# SYDNEY GRAMMAR SCHOOL. 

(REPORT, \&c., FOR 1871.)

The Shcretary to me Irdisters, Sydnex Grammar School, to The Colonlal. Secretary.
Sydney Grammar School, 20 May, 1872.
Str,
I have the honor, by direction of the Trustees of the Sydney Grammar School, to transmit to you, for the purpose of being laid before the Parliament, the following Report of their proceedings and the progress of the School, during the year 1871.

At a Special Meeting of the Trustecs, held in February, Professor Pell and Arthur M. a'Beckett, Esq., were respectively elected Chairman and Vice-Chairman of the Board for the current year. At this meeting tho seat of the Honorable William Charles Windeyer, as a Trustee of the School, was declared racant, by reason of his acceptance of office in the Government.

A report was also received from the Examiners of Candidates for the appointment as "Free Pupils," stating that "eight candidates presented themselver, but the Examiners did not feel justified in recommending any candidate for appointment."

At the March meeting, Edward Butler, Esq., was unanimously elected a Trustee, in the room of the Honorable W. C. Windeyer. In accordance with a recommendation received from the Head Master, E. H. Rennie, Esq., B.A., of the Sydney University, was appointed to the oflice of lleacher of Chemistry and Natural Philosophy, as well as the ordinary branches of education, ati a salary at the rate of £200 per annum.

At the July meeting the Honorable George Allen was elected Vice-Chairman, in the room of Arthur M. a'Beckett, Esq., deceased. At this meeting, Arthur H. C. Macafee, Esq., was duly elected a Trustee, in tho room of the above lamented gentleman.

The number of pupils in attendance during the year areraged 237 , being the maximum yearly average since the foundation of the School.

The result of the Public Examinations, recently beld at the Uuiversity, affords a reliable criterion of the average state of education at the Grammar School, and encourages the Trustees to believe that the Masters engaged in the Institution are performing their work in a satisfactory manner.

The Volunteer Cadet Corps attached to the School is in a flourishing condition, and has already supplied several recruits to the local Volunteer Corps.

Since the date of tho last Report the Trustees have not found it uecessary to make any further regulations for the government and discipline of the School.

The amount of the whole income and expenditure of the School during the year will be found in the annexed Appendix.

I have: \&., W. H. CATLETI,
Secretary.

## APPENDIX.

Examined and found correct,-

## REPORT

OF THE

# COUNCIL OF EDUCATION 

UPON THE CONDITION
or the

## PUBLIC SCHOOLS

FOR

## 1871.

SYDNEY : THOMAS RICHARDS, GOVERNMENT JRINTER.

$$
462
$$

To His Excellency Sir Aifred Stephev, Kuight, a Companion of the Most Honorable Order of the Bath, Chief Justice and Administrator of the Government of the Colony of New South Wales.
May it please your Excellency,
As required by the proxisions of the Public Schools Act of 1866, section 27, we, the Council of Education, have the honor to submit, for your Excellency's information, the following Report upon the condition of the Public Schools under our superintendence during the year 1871.

## I.-COUNCIL.

At the close of the year the Council was composed of the undernentioned members :-
The Honorable George Allen, Member of the Legislative Council.
The Honorable William Munnings Arnold, Speaker of the Legislative Assembly.
The IIonorable Sir James Martin, Momber of the Legislative Assembly.
John Fairfax, Esquire, J.P.
Robert Archibald Alison Morehead, Esquire.
Of these, Sir James Martin and Mr. Arnold werc reappointed for four years from 1st January, 1871, the term for which they were originally appointed having expired on 31st December, 1870. As intimated in our Fourth Annual Report, Mr. Fairfax was appointed in place of Mr. Parkes, for a term of four yoars. On Professor Smith's resignation of office, on his departure from the Colony, Mr. Morehead was appointed, on 11th July, 1871, to fill the vacancy thus caused for the unespired portion of the term for which Professor Smith had been reappointed.

The office of President having also become vacant by Professor Smith's retirement, the Honorable George Allen was duly elected President for the remainder of the year.

## II-GENERAL STATISTICS.

live years having elapsed since the passing of the Public Schools Act, the following statistics may be regarded with interest, as showing the progress made during that period in supplying and improving the means of elementary education in the Colony.
1.-Schools.

|  | 3S6\%. | 1888. | 1569. | 1870. | 1871. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Public ....................................... | 288 | 318 | 336 | 359 | 378 |
| Provisional .................................. | 31 | 103 | 146 | 164 | 181 |
| Half-time.... | 6 | 38 | 61 | 82 | 96 |
| Donomizational | 317 | 289 | 264 | 24.1 | 223 |
| Total... | 642 | 748 | 807 | 846 | 878 |

2.-PUPIIS.

|  | 1867. | 1868. | 1809. | $18 \%$ \% | 1871. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Public ...................................... | 28,434 | 34,284 | 37,593 | 39,731 | 43,494 |
| Provisional ................................... | 733 | 3,113 | 4,788 | 5,185 | 5,633 |
| Holf-time.... | 267 | 593 | 1,242 | 1,445 | 2,267 |
| Denominational | 35,306 | 35,930 | 37,026 | 36,460 | 35,919 |
| Total.. | 64,740 | 73,920 | 80,649 | 82,821 | 87,313 |

3.-School Fees.

|  | 1567. | 3868. | 1809. | 1870. | 1871. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Public | $\begin{array}{ccc}\mathcal{E} & \text { c. } & \text { d. } \\ 14,404 & 0 & 10 \frac{1}{2}\end{array}$ | $\begin{array}{ccc}\text { £ } & \text { s. } \\ 17.588 & 8 & \text { d. } \\ 11\end{array}$ | $\mathcal{E}$ 日.  <br> 20,658 19 d |  | $\begin{array}{ccc}\text { £ } & \text { s. } & \text { d. } \\ 24,824 & 0 & 8\end{array}$ |
| Provisional | 162125 | 1,099 1411 | 1,981 979 | 2,077 106 | 2,154 23 |
| Half-time.. | $\begin{array}{llll}18 & 9 & 7 \frac{1}{2}\end{array}$ | 771511 | 174138 | 234, 010 | $\begin{array}{llll}284 & 4 & 3\end{array}$ |
| Denominationnl | 16,134 510 | 15,398 310 | 16,803 1011 | 16,158 $3102{ }^{\frac{1}{2}}$ | 16,240 $14 \quad 6$ |
| Total. | 30,71988 | 34,16436 | 39,618 1311 | $39,583 \quad 3$ | 43,503 18 |

Notwithstanding that several Public Schools established to supply temporary needs-such, for example, as arise in convection with railway works-and others situated in sparsely populated localities have been closed or converted into schools of a different class, and notwithstanding that certificates have beeu withdrawn from a large number of Denominational Schools, a net increase of 236 schools has taken place in five ycars. The aggregate number of pupils enrolled has been augmented by 22,573 , and an addition has been made to the amount of school fees paid to the extent of $£ 12,783$ 1.2s. 11d. On the other hand, the number of free scholars has risen from 5,754 to 7,069.

Some further information as to the attendance of pupils may be obtained from the Return hereto appended.

## III.-PUBLIC SCHOOLS.

The number of Public Schools reported to be in existence in 1870 was 359 . Of these, Carrarawell, Lower Hawkesbury, M‘Donald River Upper, and Pleasant Valley, are now returned as Half-time Schools, each of them being carried on in conjunction with some other school. Five others, situated at Bolwarra, Croom Park, Carrawa, Mundooran, and Murrumburrah, were closed on account of the small attendance, and are not included in the Returns for 1871: Another, Gunning, was temporarily closed, pending the erection of new buildings. The following Table cxhibits the changes that hare taken place in the number of Public Schools during the year:-

| In operation in 1871 | ... | $\ldots$ | $\ldots$ | ... | ... | $\ldots$ | 359 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Closed or otherwise dealt with | ... | .. | $\ldots$ | $\ldots$ | $\ldots$ | $\cdots$ | 10 |
|  |  |  |  |  |  |  | 349 |
| Schools opened in 1871 | $\cdots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | 29 |
|  |  |  | Total | ... | $\ldots$ | ... | 378 |

Thirty-two new schools were erected during the year, and material improvements were made to sixteen others.

Thirty-one applications for the establishment of Public Schools were received in 1871. Nincteen of these were agreed to, seven were declined, and five are still under consideration. These schools were intended to provide the means of education for 1,361 children, and the applications were signed by 491 parents, whose religious denominations were-

| Church of England | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | 260 |
| :--- | ---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | ---: |
| Romau Catholic | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | 123 |
| Presbyterian | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | 44 |
| Wesleyau | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ |
| Others | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ |

## IV.-PROVISIONAL SCHOOLS.

Appendix D.
Of the 164 schools of this kind returned in 1870, twenty-seven were closed in 1871 , or trausferred to other classes, and forty-four new ones were added. The total number of Provisional Schools in operation was consequently 181, and they were attended by 5,185 pupils.
Appendix E.
Eighty-five applications for aid to new Provisional Schools were received in 1871, of which fort5three were granted, twenty-two were declined, two were withdrawn, and eighteen are still under consideration. By these applications provision would have been made for the education of 2,416 children, whose parents were of the undernentioned denominations:-

| Church of England | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | 34.8 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | ---: |
| Roman Catholic | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | 335 |
| Presbyterian | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | 69 |
| Welleyan | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ |
| 68 |  |  |  |  |  |  |  |  |  |
| Others | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ |
|  |  |  |  |  |  |  |  |  |  |

## Y.-HALS-TIME SCHOOLS.

Some of the Half-time Schools in operation in 1870 were discontinued last year. The new schools Appendix F . established in 1.871. raised the number, however, from eighty-two to ninety-six.

The Schedule appended gives a list of applications for New Half-time Schools at forty-four places. Appendix G . One of thesc was declined, two are still under consideration, and the remainder were agreed to. The education of 81.8 children was contemplated by these applications. The parents applying were, as usual, of various denominations:-

| Church of Englaud... |  |  |  | ... | ... |  | 164 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Roman Catholic |  |  | ... | ... | $\ldots$ |  | 71 |
| Presbyterian |  |  | $\ldots$ | $\ldots$ |  |  | 37 |
| Weslcyan | ... | ... | $\ldots$ | $\ldots$ | $\ldots$ | ... | 30 |
|  | $\cdots$ | ... | ... | $\ldots$ | $\ldots$ |  | 2 |
| Others |  |  |  |  |  |  | 304 |

## VI.-INSPECTION.

In the month of April the following changes werc made in the apportionment of Districts : -Mr . Allpass was removed to Sydney; the Newcastle District, thus vacated, was placed in charge of Mr. Dwyer from Maitland, and his place was filled by Mr. Bradley who had previously been acting as Assistant Inspector in Sydney.

During the year, 741 schools were fully examined and reported upon, but numcrous others were visited by the Inspectors. The following Table shows the number of Schools or Departments inspected in each District:-

| District. I | Number of Schools or Departments. | Number vixited. | Number unvislted. |
| :---: | :---: | :---: | :---: |
| Albury ..................................................... | 48 | 42 | 6 |
| Armidale .................................................. | 93 | 87 | 6 |
| Bathurst .................................................. | 148 | 106 | 42 |
| Crmden.... | 129 | 90 | 39 |
| Cumberland ................................................ | 92 | 83 | 9 |
| Goulburn ................................................... | 173 | 111. | 62 |
| Maitland .................................................. | 90 | 89 | 1 |
| Nowenstle ................................................... | 90 | 88 | 2 |
| Sydncy ..................................................... | 99 | 99 | ...... |
| Total ......................... | 962 | 795 | 167 |

It will be seen from this Table that in the three Districts of Bathurst, Camden, and Goulburn, a considerable proportion of the schools were not visited in 1871. Eren under the most favourable circumstances it would be altogether inpracticable for an Inspector to examine all the schools in cither of these Districts, and, withonti an increase of the staff, more than a hundred schools would be left unvisited annually. As schools were multiplied, the number thus neglected would continue to increase. It seemed urgently necessary, thercfore, to aigment the staff of Inspectors; and accordingly at the close of the year two new Districts-Braidwood and Mudgee--were created, and Inspectors appointed. Mr. J. C. Maynard, of the Goulburn Public School, was placed in charge of the Braidwood District, and Mr. G. O'Byrne, of St. Mary's Certifed Denominational Roman Catholic School, was appointed to the Mudgee District. By this arruggement, the three Inspectors who have hitherto bcen overburdened with work, in consequence of tho excessive number of schools under their supervision, will be to a great extent relieved.

VII-CONDIMION OF SCHOOLS INSPECTED.
Extracts from the General Reports of the Inspectors are appended hereto. Firom these, the Appendurif. condition of Schools in the several Districts may be ascertained with some fulness of detail. The following Table exhibits the general results obtained at the Inspection, as regards the efficiency of the Schools:-

| Schools or Deprartments. | Below standard, | Equal to standari. | Above standard. | Total. |
| :---: | :---: | :---: | :---: | :---: |
| Public . | 171 | 121 | 36 | 328 |
| Prorisional | 108 | 23 | 4 | 135 |
| Half-time ...... | 46 | 10 | : | 61 |
| Gertified Denominational | 138 | 63 | 16 | 217 |
| Tot | 463 | 217 | 61. | 741 |

Subjoined is a Table showing the estimated proficiency of the pupils examined during the past year. Considering the irregularity of the attendance in a large number of schools, and the early ago at which children, in country districts especially, are removed, these statistics may fairly be viewed as indicating a satisfactory degree of progress, so far as the character of the teachers for efficiency is concerned. It is also necessary to bear in mind the fact that the figures contained in the Table include returns from all parts of the Colony: from the Darling River to the Coast, and from the Northern boundary to Twofold Bay. Further, schools of all classes are included-Public, Provisional, Half-time, and Certified Denominatinnal; and many of the worsti instructed, as well as some of the best, are comprised in the Return.

|  |  |  |  |  |  |

* Denominational Schools are not included in this number.

## VIII.-TRAINING.

This department was in constant operation during the year. Forty-three male and thirty-four female candidntes were enrolled, but two of the former and three of the latter roluutarily withdrew. The total number trained was consequently seventy-two-forty-one males, and thirty-one females. Besides these, fifty-four applicants for admission were found, on examination, not to possess the prescribed qualifcations, and were accordingly rejected.

The usual course of instruction was followed, including the undermentioned subjects :-
Readiny, with dictation and derivation.
School Books: A knowledge of the School Series of the Irish National Bourd to end of Third Book. Grammar: Parsing and analysis, and the elements of composition.
Geography: Physical and descriptive.
School management: Organization, discipline, and method.
Arithmetic: Simple and compound rules, vulgar and decimal fractions, reduction, practice, and proportion.

Drawing: Free-band and elementary perspective.
DFusic : Tonic-sol-fa method, the requirements for elementary certificatc.
The candidates also received practical training in school-work during one day in each week, when they were required to attend the Model School for the purpose. Physical training was also introduced to a limited extent, the male candidates having been subjected to instruction in the elementary portions of military drill, and the females to a course of calisthenic excrcises. Their proficiency in these branches was tested by requiring them to disciplinc a class of boys or girls in accordance with the methods they had been taught in the Training School.

A larger proportion than usual of the candidates had been pupil-tenchers, and owing to this circumstance, the results of the examinations were more favourable than in former years. Pupil Teachers form, on the whole, the most eligible class of candidates for training. Although not necessarily possessed of greater attaiuments than others, they exhibit greater readiuess in applying their knowledge to a practical use, and, what is even of greater importance, their previous training in school-work enables them to manage a class with greater tact, and to instruct their pupils by more effective methods.

All the candidates trained were successful in passing the requisite examinations. The following Table shows the number of candidates that gained the sereral grades of classification :-

| Classification. | Males. | Females. | Total. |
| :---: | :---: | :---: | :---: |
| Class III. |  |  |  |
| Section A | 12 | 16 | 27 |
| : 3 ........................................................ | 15 | 9 | 24 |
| , C ....................................................... | 14 | 7 | 21 |
| Total | 41 | 31 | 72 |

Experience has shown that many persons of education and even of talent fail to become good teachers from their deficiency in tact in imparting instruction, and from want of power to govern rightly. In this fact will be found a partial explanation of the low classification obtained by twenty-one of the candidates. As regards diligence in study, careful preparation, and moral character generally, the candidates of the past year have not been excelled by any previously trained.

## IX.-Tiachers.

The favourable estimate, stated in former Reports, of the claracter of teachers in the Council's servico has been fully sustained during tho past year. Though teachers, with few exceptions, are not devoted to study for self-improvement, the general efficiency of the body is reported to be gradually rising. During the year 1871, only such teachers as were unclassified or held the lowest grade were summoned to the annual examinations. This fact will account for the large number of failures disclosed in the subjoined Return of teachers examined for promotion :-

Total ...

$$
162
$$

Of those that succeeded, a large proportion consisted of teachers who applied voluntarily for examination. Besides the teachers who obtained higher classifications by examination, twenty-five others were promoted in accordance with the provisions of article 39 of the Regulations, for threc years' good service, making a total of ninety-one promotions during the year. The whole number of teachers seeking promotion under article 39 was eighty-two, but the applications of fifty-seven were declined. In some instances the applicants were assistant teachers whose case was not contemplated by the Regulation; others had never been examined and were inoligible on that ground ; while many had not fulfilled the prescribed conditions as regards the length or the efficiency of their service.

The emoluments of teachers are improving yearly. There are, however, some counterbalancing circunstances to be taken into account, axising principally out of the small attendance of pupils in certain schools. The attention of the Council had been frequently drawn to the fact that the minimum average attendance required by the Regulations was not secured in a large number of schools, and numerous complaints wero received of the indifference of parents on the subject. Hence it resulted that the cost of education in many schools was nearly double the amount that would hare been required had a proper attendance been maintainod. After allowing nearly five years to clapse, the Council deemed it necessary to enforce the provisions of Article 46, which states that the classification rates of salary "apply only to teachers in whose schools an average daily attendance of thirty scholars is maintained. If in any case the attendance fall below that number, a reduction may be made in the amount of salary awarded, as the Council may see fit." Circulars were accordingly fssued, by which it was notified to teachers that the amount of their salaries would be determined by the number of pupils in attendance, in agreement with the following scale:-

| For an attendance below 25, but not below 20 | $\ldots$ | $\ldots$ | £48 per annum. |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $"$ | $"$, | 20, | $\#$ | 15 | $\ldots$ | $\ldots$ | 36 |
| $"$ | $"$ | 15, | $"$ | 12 | $\ldots$ | $\ldots$ | 24 |

If the attendance fall below 12 , no "salary to be paid.
It was found that this measure had a very beneficial effect upon the attendance in a majority of the schools to which it applied. To the teachers, however, it was in some instauces productive of considerable loss; for, at a time when their remuneration from school fees was reduced by the absence of pupils, they also lost, generally without positive fault on their part, a portion of the salary paid by the Council. The Council endeavoured to mitigate the evil thus inflicted, by removing, whencver practicable, the teachers who suffered these reductions of salary, to schools better attended. Notwithstanding these efforts, however, considerable hardship was entailed upon teachers by the loss of emoluments to which they were subjected. Exemptions have been granted when the low attendance was distinctly traceable to sickness, floods or excessive rains, or harvesting operations. The question of raising the rates of salary allotted to teacbers of the lower grades had been brought under the Council's notice on a former occasion, but was then left undecided on account of the inability of the Council to meet, from the amount voted by Parliament, the additional expenditure involved. The sume reason still exists in equal if not in greater force than when the question was first mooted, and the expediency of any addition to the rates of salary now paid is readered oven more doubtful by the prevalence of irregular attendance in a large number of schools iu charge of third-class teachers.

The pupil-teacher system continues to work very satisfactorily. Of 1.18 applicants for the office examined in 1871, seventy-threo succeeded in passing, whilo forty-five failed. The number appointed in that year was fifty-six. The result of the annual examination which pupil-teachers are required to pass was, on the whole, favorable, although sixty-seven out of the 210 examined failed to gain the usual grade of promotion. The following statement shows the number of each class promoted:-

| From | IV | Clas |  |  |  |  |  | 65 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| " | III | : | II |  |  |  |  | 34 |
| " | II |  | I |  | $\cdots$ | $\ldots$ | $\ldots$ | 25 |
| " |  | Trai | g | School | $\ldots$ | ... | $\ldots$ | 19 |
|  |  |  |  | Tota |  | ... | $\ldots$ | 143 |

## N.-LOCAL SUPERVISION.

Except in the Albury District, it does not appear that the character of the supervision excrcised by Local Boards has materially improved. While there are undoubtedly many of these bodies, whom it would be invidious to specify, that take an intelligent interest in the schools nomer their care, the prevailing sentiment seems to be one of indifference.

## XI-MTMANCE.

Appendix I.
The usual statement of receipts and disbursements is appended lereto. It will be seen from this return that, at the end of the year, there was a balance at debit of the Council amounting to $£ 2,4130 \mathrm{~s} .11 \mathrm{~d}$. In explanation of this fact, it should be stated that; in the year 1.868 , a sum of $£ 12,000$ was returned to the Treasury in the belief that there would be no necessity for its expenditure. It was afterwards found, however, that claims, amounting in all to more than $£ 17,000$, were made upon the Counci's funds, on account of buildings and repairs to schools, on the faith of pledges made by the late. Boards of Education, prior to the passing of the Public Schools Act, and also on account of grants promised by the Council in 1867 . Payment of these charges, together with the increased expenditure caused by the establishment of more than a hundred new schools in 1868, rendered it necessary to postpone many of the claims then originated to the succeeding year, and the rapid multiplication of schools since that time has effectually prevented the Council from making arrangements by which all claims properly belonging to a given year can be satisfied within that year. The Coumcil is however taking steps to obtain a refund of the above-mentioned sum of $£ 12,000$ paid to the Treasury.

The total expenditure upon schools, so far as is known to the Council, was-

| From | Public Fund |  |  |  |  |  | £113,158 | 9 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Local Contrib | ns | o build |  | .. |  | 3,404 | 4 |  |
| " | School Fees | ... | ... |  |  |  | 43,503 | 1 |  |
|  |  |  | Total | $\ldots$ | $\ldots$ |  | $£ 1.60,065$ | 15 |  |

The value of school sites given by private persons to the Council is not included in the amount of local contributions. .

As regards the cost of education, detailed information is furnished by the subjoined Table:-

| Cost culculated from- | From F'ublic Funds. | Local Contributions. | Fecs. | Total. |
| :---: | :---: | :---: | :---: | :---: |
|  | $\pm$ s. d. | £ s. d. | \& s.d. | $\pm \mathrm{s} . \mathrm{d}$. |

| Average Quarterly Attendance......... | 2127 | 0.1818 | 102 2 | 314 42 |

## XI-SUMMARY.

From the statements now submitted, it will be seen that a further increase has been made to the number of schools in operation, new school buildings have becn erected in numerous cases, and the material condition of schools generally has been improved. As regards discipline and the proficiency of the pupils, they continue to be fairly satisfactory. The inspection of schools was more extensive and effective than in the previous year, and the training of teachers was carried on with more than ordinary success. Local supervision has not yet become sufficiently general and efficient to be productive of the benefit it was intended to secure.

We submit this our Report upon the Public Schools for the year cuding 31st December, 1871; and, in testimony thereof, we have caused our corporate Seal to be affixed hereto, this twenty-eighth day of March, one thousand eight hundred and seventy-two.

GEORGE ALLEN, President.
TAMES MARTIN.
R. A. A. MOREHEAD.

## W. WILKINS,

Secretary.

## APPENDIX A.

Abstract of Returns from Public, Provisional, and Halftime Schoole, under the Conncil of Education.

## A.PPENDIX B.

Retcran of the Attendance of Children at the Public Schools of New South Wales, as certified by the Public School Boards, for the Quarter onding 31st December of the year 1871, or for the last Quarter of that year in which the Schools were in operation.

* In cases thus notod the local quota of cost bad been paid in the previous year, wholly or in part.

APPENDIX B-continued.

APPENDIX B-conlinued.

* In cases thus noted the local quota of cost had been paid in the previous year, wholly or in part.

APPENDIX B-continued.

* in eases thus noted the local quota of cost had been paid in the previous year, wholly or in part.
$\dagger$ A' 300 paid from local contributions for a new site ; $£ 260$ now at credlt of school from same source.

APPENDIX C .

Sonmour of Applications for tho Establishment of Public Schools, received during the Year 1871.

Schedule of Applications for the Establishment of Half-time Schools, received during the Yenr 1871.

## APPENDIX H .

Extracis from Reports of Inspectors upon Schools in the
Albury,
Armidale,
Bathurst,
Camden,
Cumberland,
Goulburn,
Maitland,
Vowcastle, and
Sydney Districts.

## ALIBURY DISTRICT.

## Tyspeotor's Generar Report.

I have the honor to submit, for the information and approval of the Council of Education, this General Report upon the condition of the Public, Prorisional, and Certified Schools of the Albury District, for the year 1871.

In my report for the previons year, it was stated as the result of inquiries made respecting the educational wants of the district, that in towns, on the Gold Fields, and throughout the exclusively pastoral localities, the means of edncation were fairly suppliod by existing schools; but that the wants of the agricultural settlements were as yet but inudequately met. It was further pointed out that the echools brought into operation during 1870 were, withnut exception, situnted in the last-named centres of population, and that two-thirds of the applications for aid to new schools were made by the inhabitants of such lationt: and
localitics.

The adilitional information obtained through corrospondence and by persoulal inquiry during the lapsed year is in larmony with the foregoing statements, and the subjoined tables will serve to show that the schools opened during the period ombraced in this report, the applications for aid to now schools, and tho steps taken in rarious localities for the establishment of schools, are each calculated to, in part, supply the wunts reforred to, and extend the operations of the Public Schools Act to some of the most isolated and nowly settled portious of the Colony.

Table I.-New Schools opened in 1871.

| Locality. | 3istance of <br> nearest Scliool. | Cluss or Schaol. | Prevailing Occunation of |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Inlabitants. |  |  |  |

'Labue Ir.'-Schedule of Applications for the establishment of Sehools.

| Toenlity. | Distan nearesi | of chool. | Class of School. | Prevailing Occupation of Inhabitiants. |
| :---: | :---: | :---: | :---: | :---: |
| Blowering | 10 miles |  | $\begin{array}{cc}\text { Provisional } \\ \text { "..... } \\ & \text {. }\end{array}$ | Agricultural. |

| Gadora .. | (i) |  |  | : |
| Gocup .... | 7 : |  | Public | ", |
| Goombargannah | 18 ", |  | Provisional |  |
| Nnruandera | (0) |  | Public | Pastoral and agricultural. |
| Wellaregang | 25 , | :... | Provisional | Agricultural. |
| Woomarganals. | 0 " | $\cdots$ | Public | " |

Iu addition to tho foregoing, npplication was made to convert the Gilmore Upper, Provisional, to a Public School, and for a certificate to the Roman Catholic School at Adelong.

Table III--Localities visited with a view to collecting and affording information relative to tho cstablishmentit of Schools:-

| Locsility. | Distanre of neareekt School. | Prevailing Occupation of Inhabitants. |
| :---: | :---: | :---: |
| Brck Creek | 30 miles | Agricultural. |
| Mundarloo | 15 " |  |
| Recdy Crock..... | 10 " | do. |
| Tareutia, Lower .. | $8{ }^{8}$ | do. |
| Tarcutta, Upper | ${ }_{35}^{17} \quad$ " | do. |
| Ten-mile Oreck... | 20 " | do. |
| Urana | 35 ", | Pastoral and Agricultural. |

With extremely fow exceptions, the inlabitants of the various iocalities risited appearect deeply anxious to provide, the merns of education for their clildren; and, in severul instances, the local efforts made, or being wade, to this end, arc of a srlf-sncrificing character. There is every reason to belicere that a desire for education is steadily increasing in the outlying settlements, and it is not improbable that in the course of a very few years, schools aided by the State will be found in most localities having a population suffient to secure an arerage shily atiendance of from twelre (12) to (15) fiftecn pupils.

The schools in operation for the year admit of the following classification :-
Twenty-three Public Schools, comprising twenty-five departments
Seventeen Provisional Schools.
Six Certified Denominationnl Schools,
making in all, forty-six schools, comprising forty-eight departments. Of theso, forty-two departments underwent "general" and "regular" inspection ; and the following table has roference to the remnining six (6):-

| School. | Class. | Cause of Non-Inspection. |
| :---: | :---: | :---: |
| Booligal.. | Prorisional | Closed at date of visit to locality. |
| Mount Patrick. |  | New school. Not opened until November. |
| Round Water-hole |  | Closed in March-Visited incidentally. |
| Sandy Creck | do. | Temporarily closed at date of visit. |
| Tumbarumba | Public .. | Temporarily closed since March. |
| Wilcannia. | Provisional | Temporarily closed at date of visit. |

In the course of the ycar the boundaries of the district were temporarily enlarged so as to inclurdo six (6) Public und three (3) Certificd Denominational Schools at or near Binalong, Burrowa, Young, and other localities, in the South-western portion of the Bathurst District. The total number of schools visited was, therefore, fifty-one (51). These are are scattered over an area of at least 50,000 square miles; bomnded by the Darling and Murray Rivers, from their junction at Wentworth to the towns of Wilcannia and Albury, and by lines connecting these towns with Burrowa on the Lachlan River. The schools in the Western portion of the district are in several instanecs over 80 miles apart, and their risitation can only be accomplished with any degree of certainty at particulnr eeasons; the oxcessire heat of summer and the flooded statc of the country in winter rendering travelling n work of considerable difliculty, and not unfrequently one of danger.

The inspection of the various schools was, as horetofore, in strict accordance with the prescribed instructions. It took cognizance of the materinl state of each departmont risited; the character of the government and general discipline was minutcly observed; and the value of the instruction measured by the standard of proficiency. But the scope of inquiry was not limited to the mere appraisement of results; it was also to a certnin extent co-operative. Conference was invariably beld with the teacher, and where necessary with the School Board or Committec, as to the best means of obviating or overcoming local hindrances to the progress of the respective schools, and otherwise enlarging the sphere of their usefulness.

3 Iaterial state of schools-As regards situation, buildings, nccommodation, and supply of furniture, tho material condition of the schools in 1his district is of fair average quality, and those vested in the Council are, as a whole, excellently well equipped. It is satisfactory to note that the number of rested schools is steadily increasing. During the year contracts were entered upon for the erection of rested buildings at Howlong, Jereelderie, Menindie, and Tumbarumba, places whereat the Public Schools have hitherto been conducted in unsuitable premises. Superior buildings, capable of nceommodating over 300 pupils, and occupying onc of the best sites in the town, are approaching completion at Wagga Wagga; and arrangements are being made for the erection of substantial buildings at Wilcannia, Mosma, Narrandera, and Woormagama. The buildings erected for school purposes at Sebastopol and Mullengandra, though of rather primitive design, are deserring of special mention, inasmucla as the entirc cost of each was defrayed by local subscription,-a gratifying proof of what may be done by oven small communities when actuated by the desire of having their clildren educated. The vested premises at Balranald and Deniliquin lave been put in astate of thorough repair, and some necessary improvements are about being effected at others-Albury and Thurgoona especially.

Provisional schoolhonses of a comparatively good description have been erected and opened at Kimo Recf and Monnt; Adrah; and in several localities hitherto unprovided with schools of any sort, buildings of a similur kind are being put up. The provisional promises at Lacmalac and Wondalgn have been considerably improved; the South Gundagai Church of England Schoolhouse has been rebuilt, and the Tumut Roman Catholic School supplied with additional farniture and outbuildings. The past ycar: therefore has beon marked by a very decided degree of progress as regards the erection and equipment of schools; and it muy be said that a very fair proportion of those now in operation are amply found in the ordinary appliances of teaching; and that, so far as regards internal arrangements, their organization is of a satisfactory character. $1 t$ is to be regretted, howerer, that the external appearancos of the genernlity of the school premises is of a much less favoumble doscription than their internal economy. Flower gardens, neatly bordered walks, trees for shade, hedgerows, and such other improvements as might not, unreasonably be expected wherever the premises are securely fonced and the school sufficiently long established, are to be met with only in rare instances ; and there is a still greator dearilh of appliances for physical exercise. Indeed it would appear as if the health and recreation of the pupils were of so little consequence as not to be worth the trouble and trifling expense by which playgrounds could be made really worthy of the name. It is to be hoped that in future the true value of this portion of echool organization will be more practically recognized, and that a more cheering state of things will have to be chronicled in succceding reports.

The supply of apparatus and books was found to be amply sufficient in more than nine-tent hs of the schools visited, and the teachers report that the arrangements mado at the commencement of the vear with a view to securing prompt delivery of the annual grant allowed by the Council, fully answered the end proposed. It affords mo much pleasure to state that, in every school risited, due carc had eridently beon taken by the teacher to prevent unnecessary waste or wilful injury to the stock of working materials.

The school records were, on the whole, more neatly and correctly kept than those for the preceding year, and it was oniy in some of the newly established Prorisional Schools, or those of the same class in which a change of teachers had taken place recently, that any material crrors or imperfections were discovered. It is extremely desimble, however, that tenchers generally should excreise a greater degree of care in the compilation of the annual and quartcrly returns. These are not unfrequently furnished in an incomplete or incorrect state, and much delay and inconvenicuce have arison from the necessity of referring them back for correction.

The subjoined dable indicates the material condition of ull the schools visited in the district; details of the several classes-Public, Provisional, and Certified Denominational-are amexed*:-

Discipline.-The charactor of the attendance in day schoole, especially thoso in country districts, depends no doubt to a very great extent upon circumstances beyond the control of the teachers, and it not unfrequently happens that tho most carnest and vigorous offorts to secure a reasonably high degroe of punctuality and regularity cither end in failure or meet with but partial success; yet it appears to me that failure might occasionally be averted, and the desired end attained, if teachers would endeavour to mako the elder pupils their allice, instend of regarding them as opponents, in the issue. It need hardly be pointed out that in rural localities and small towns many of the grown up children in attendance have to milk cows, cut wood, assist in the housework, or go on crrands before conning to morning school; and that, in numcrous instances, the attendance of the younger members in a family is conditional upon that of the elders,-more particularly in the case of those living at any great distance from the school, and having to travel over bad roads, or to ford bridgeless crecks. In one family, the eldor child or children, if anxious to be punctual, will get quickly througd the assigned task; in another, they will dardle over the work, and either arrive late or be absent for the day-because of their distaste for school. It follows, therefore, that the character of the nttendance is ecnsibiy influenced by the feelings and wishes of the pupils themselves, and I am strongly of opinion that there are few more effectual weans by which it could be improved than the one here suggested, viz., by securing the co-operation of the elder pupils, and ranging their influcnce on the side of the teacher. Once they are brought to regard it as a duty and a pleasure to attend school regularly and punctually, they will not bo slow in giving expression to their opinions at home; and if they do this, it is not too much to hope that few parents will be so cruel and unwise as to oppose the carrying out of their wishes.

With regard to the considerable number of children living in localities provided with schools, but who are never found to be in attendence thereat, it seems to me that the only means by which they can be rescued from the state of barbarism and ignomnec in which they are being brought up is the enactment of a law mabing the instruction of children residing within a reasounble distance of any school supported or subsidised by the State compulsory upon the parents. This law would not oblige pareuts to send their children to the schools supported by the State; the necessary instruction might be imparted at home, or at such selools ns parents deemed it judicious to select, and the operation of the law would not extend to localities where no menns of education existed. This would be the most effectunl way of making the education of the musses, which is now a matter of accident, one of tery geueral certainty; and judqing by the almost unanimons opinion as to the necessity for some coercive mensure to overcome the indifference or ignorance of the parents of such children as those referred to, there is reason to beliere that the adoption of a compulsory enactment would bo hailed with satisfaction by the thinking portion of the community.
that thero has been a considerable increase in tho number of pupils enrolled and in average daily attendance during 1871, as compared with those for the previous year, will be made orident by a comparison of the following numerical statements :-
I.-Numbers on Rolis.

| Quarter of Year. | 1870. | 1871. | Increase in 1871. |

A further comparison of the returns from which tho foregoing statistics were compiled gives the following results, viz.:-
(a) In 1870 the average daily attendance was 66.0 per cent. of the numbers on rolls.
(b) In 1871 the average daily attendance was 69.0 per cent. of the numbers on rolls; and
(c) In each year the numbers prosent at date of inspection was $7 \boldsymbol{7} \cdot 0$ per cent. of the numbers enrolled.
It is pleasing to be able to report a still more satisfactory improvement in the remaining features of the discipline (more especially in the Public and Provisional Schools), and, taken as a whole, it may be said that threc-fourthe of the schools visited ranked from fair to good, as regards cleanliness, order, and judicious government.

The following table contains a summary of the statistics contained in Annex $B$, relating to the moral condition of the several classes of schools :-

| Details. | Good. | Fair. | Tolerable. | Indifferent. |

Instruction.-There is a vory decided improvement observable in the classification of the pupils in the schools generally, and most teachers appear to be fully conscious of the importance of this essentinl element of school management being based on well defined and intelligent principics. Foremost among these is the necossity for so grouping the pupils that children of the same or nearly equal attainments and mental capacity may receive the same lessons. Where this is not attended to profitable teacining need not be expected. In most schools it has been reasonably compassed by the formation of threc classes, of which the "first" or lowest is subdivided into two drafts for reading, but is treated as a whole as regards ull other subjects. Wherever a more minute classification obtains in schools haring but one teacher the valuc of the instruction will be lowered thereby. This was very clearly shown in the case of the five schools wherein a decidedly injudicious classification was noticeable during the year. In three of the日e there were
as many as eight resding classes, and jet the pupils' ability to rend was of a very unsatisfactory cast; thoro was a etill more minute classificetion for arithmetic, and the answering iu this subject was equally low. In the great wajority, the classification tras found to be reasonably judicious, aud the numbor of classes in harmony with the teacling power. Another important principle in connection with the classification is that upon which the promotion of pupils to higher clases is made. This inus received considerable attention during the past year, and most of tho ticachers are now fully alive to the fact that unless a fair proportion of tho pupils are annually advancod to the higher grades, the proficiency of the classes in the sereral subjects prescribed by the "standard" cannot be aecepted as satisfactory cridence of suecessful teaching. At the exanination of prpils in each school the number of promotions since last visit of inspection was carefully ascertained, and the increase by admission of new pupils to the varions classes noted. inspection was carefully ascertained, and the increase by admission of new pupils to the varions classes noted.
The data thas obtained were duly considered in forming an estinate of the usefulness of the respective Tho data thas obtained wexe duy considered in forming an estimate of the usefulness of the respective
schools. It has already been staned thant a judicions classification depends in a great measure nyou equality of attainments aud mental capacity as regards the pupils; but whero the rango of classification is necessarily limited by the teaching power, considerable disparity will be found to exist in the several groups or classes. Some of the members, either from the possession of quicker perecptions and mental power, or because of their more regular attendance and its corrclative adrantages, will soon be found in adranco of those less favoured by wature or by sarrounding ciscumstances. This disparity, instend of being looked upon as an impediment, is regarded as an adrantage by the skilful teacher. Without in the lcast disturbiug the classification, he so regriates the instruction as to mnke it profitable to all ; lut in the various suhjects a nore prompt and intcligent style of answering is cxacted, and a higher degree of mental effort is required from those forming the adranced section of ench class than are expected from the less proficient juniors. At some appropriate time, once in ench year at least, the classification is revised, the adranced section of each class is promored, the juniors succeed to the vacaut seats, and their places are in turn occupied by those adranced from the lower grades. And thus systematic progress is daily made in the courge of instruction, while the classiñcation upon which it is based remains unaltered A timo-table and lesson programmes were found in all the schools visited except two, but in five others they were of no practical assistance to the teachers, and it would appear that ther were compiled merely in compliance with the Regulations. In more than two-thirds of the remaining schools they were found to bo arranged with a very fair average degree of judgment and due regard to the requircments of tho standard.

The average degrec of skill by which the methods of teaching are clanracterized is somewhat higher than it was for the preceding year, but this is due more to the closer attention paid to matters of detail and the increased degree of zeal and attention by which the instruction was generally marked, than to a more mature acquaintance with the principles upon which good methods are based. In fully one-third of the schools the quality of the teaching reached to an average of very fair, in nbout an equal number it was tolerably appropriate, and in the remaining schools it ranged from indiferent to moderate. There was not more than one school however in which the methods were so decidedly imappropriate as to be in all respects deserving of the estimate contrined in the following excerpt from an article lately written upon the subject of "Education-Public and Prirate"; yet if taken singly there is scarcely a feature in that elaborate sketch of bad methods that may not be recomised in one or other of the seliools referred to in this report. The writer states:-"Hitherto in the matter of instruction what has been the course pursued? We take a child and we cram his mind with an indigestible mass of words and facts; we do not feed-we simply stuff him. To that child these words and facts have no resl meaning-they convey nothing, they symbolize nothing; they are often repuisive in character, and are alwost always excessive in quantity; they are administered withont reference to his matural capacity, or the strength of his mental digestion-without regard to the particular bent or the receptive and assimilative power of his tender intellect; they are often beyond his ability to understind, and equally beyond his ability to tender intellect; they are often beyond his ability to understand, and equally beyond hus absinty to
retain; they may conduce neither to his mental health nor to his mental growth, sometimes they are positively repulsive to him-he asks for bread, and we give him a stouc. He needs gentle and gradua illumination, and we place him in a foreing.frame exposed to the broad glare of the untempered, sun-light, so that his powers, instend of slowly cxpandiang from within, are withered and destroyed from without He is like a delicate plant, and we deal with him as we should with a robust and sturdy tree." It is to be hoped that these are not the true charactoristica of method as applied to the work of teaching generally. If so, it may be said that the work of instruction is more skilfully conducted in this Colony than in other countrics, as there are many schools to which the converse of what is here stated would be more strietly applicable, than is the statement itself to eren the worst conducted schools in this district taken as a class. The methods employed in the better class of sehools under thic Council's superrision might bo more justly described as conducing to the gradual, healthy, aud full development of the pupils facultios and to the cultivation of such habits of thought and inquiry as will enable them in after life to think and reason for themselves, and apply their mental powers to the investigation of any ordinary subject that may be brought before them.

Statistics showing the character of the instruction and the ostimated proficiency of the pupils in *Anneres C\& E the Public, Provisional, Certificd Denominational Schools are appended*; together with u detailed statetAnex F. ment of the general condition of each school visited in the course of the year, $\dagger$ and the subjoined summary of the Tables contained in Annex E has reforence to the nggregato mumber of pupils examined in the several subjects of instruction, and the proficicncy attained in each.

Position of all schools as regards the requirements of the standard of proficiency :-
Schools above the standard
" up to standard ......
10tal............ 42

* Certified Denominational Schools are not ixciuded in the estimates of this subject.

The progross made and results obtained in the ordinary subjecta of instruction will be perhaps best seen from a comparison of the estimates in the foregoing Table with those in a similar summary of the estimated proficiency for the previous year, from which it appears that-
In 1870, 56 per cent. of the Reading ranged from fair to good; in 1871, 64 per cout. was of this quality.

| $"$ | 55 | $"$ | Writing | $"$ | $"$ | 76 | $"$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $"$ | 21 | $"$ | Arithmetic | $"$ | $"$ | 53 | $"$ |
| $"$ | 30 | $"$ | Grammar | $"$ | $"$ | 52 | $"$ |
| $"$ | 40 | $"$ | Greography | $"$ | $"$ | 47 | $"$ |
| $"$ | 23 | $"$ | Object Lessons | $"$ | $"$ | 35 | $"$ |

It has to be remarked, in reference to these estimates, that the increased proficiency in the subjects generally, and as regards Arithmetic and Grammar more especially, was confined to the elementary portion of each subject in the majority of schools, and it was only in a few of the larger and more efficiently managed Public Schools that the attainments of the pupils in the advanced classes exhibited a proportionatc increase. Fair progress has also been mado in the remaining subjects of the course of instruction, and it may be said of the schools genemally, that a reasonable degree of success has marked the efforts made with a view to the realization of sutisfactory results.

Teachers.-The number and clussification of Teachers in the schools of this district are as follows:-

| Employed in | Class 1. | Clnas IL. |  | Clase IIT, |  |  | Not classified. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Sec. 13. | Sec. A. | Sec, B. | Sec. A. | Soc. 1 . | Sec. C. |  |
| Public Schools | 1 | 1. | 4 | 8 | 9 | 2 | 4 |
| Provisional Schools.................... | ...... | ...... | ...... | $\ldots$ | .... | .... | 14 |
| Certified Denominational Schools... | , | ...... | ...... | 3 | 2 | 1 | 1 |
| Totals........... | 1 | 1 | 4 | 11 | 11 | 3 | 19 |

In the course of the year scven teachers were examined in conformity with the provisions of Sec. II., Art. 37, of the Regulations. Of these, five succeeded in obtaining promotion and two failed. In addition to the fifty (50) teachers, there are three papil-tenchers-two of whom were examined and promoted one step. It will readily be admitted that the ultimate success of any system of instruction, no matter how well devised, and the degree of popularity to which it may worthily atfain in the State, depend to a rery well devised, and the degree of popularity to which it, may worthily atain in the state, depend to a rery
great extention the competency and moral worth of the teachers, who, after all, are the chief agents in its administration. Hence it is very gratifying to report that, with few exceptions, the teachers cmployed in the schools of this district have in the past year manifested a lnudable degrec of zeal, earnestness, and sustained industry in the discharge of their duties, and in other respects lave so regulated their conduct as to merit the esteem and respect of those among whom they reside. In many instances the efforts made and the anxicty evinced to raise the schools to a higher state of cficiency were deserving of the most unqualified praise; and it was only in a few that the want of proficiency on the part of the pupils conld, with any amount of certainty or justice, be attribnted to a corresponding lack of energy in the tracher. The character of the teachers us a body may therefore be considered as satisfactory; and, laving regard to the many and grave responsibilities of the oflice, and the average success with which the entailed duties are discharged, it is a matter of regret that the amount voted by the State is not adequate to nflord a more liberal recognition, by way of salary, of the services performed by the teachers, especially those in the middle grades of classification, say from II B. to III B.

Local Supervision. In fully one-half of the schools the local supervision excrcised during the past year was of a more or less beneficial character, and there is reason to believe that in several instances the attendance of pupils has been augmented and made more punctual by the netion of the Local Boards or Committces. In order to secure a more systematic risitation, some of tho Sehool Boards have formed a roster ; the members having the necessary time at their disposal taking upon themselves by turn the duty of visiting the school at least once a week. At each visit the names of absentec pupils are callod over, and a list of those who are found to be habitually irregular is supplied to the Board, and considered at, nud a list of those who are found to be habitually irregular is supplied to the Board, and considered at,
their monthly or quarterly meeting. It is understood that each member will make it his busincss to call upon the parents of the absentecs residing in his neighbourhood, or oree whom he may be likely to hare
some influence, and urge upon them the necessity for sending their children to school regularly and punctually. The success of this plan depends no doubt very largely upon the character and business habits of the Secretary. Where he is found to possess reasonable energy, and a moderate degree of interest in respect to the sehool, all goes well. He arranges for the mectings, summons the members, reminds them of the rarious duties they have to perform, and gradually trains them to take an interest in the work. All this can searcely be cxpected in connection with ruxal selools; but if it were more penerally practised in towns thero would be less grounds of complaint as to irregularity of attendance. In the course of the various tours of inspection conference was held with most of the Local Boards, by which much reliable and valuable information as to the actual condition of thc schools was frequently obtained; and in all cases there was much intcrest evinced in the general welfare of the teachere. It was afterwards asceriained that in many instances the interest was not well sustained, and some teachers complainingly represent that the promises made to the Inspector are soon forgotien by the Boards-one writes that they must have passed from the minds of his Board about the time the Inspector had passed out of the tomnship. There appears to be no rery feasible way by which the superrision could be made more effective. I am.disposed to think that by more specificully defining the duties to be performed, and making their performance a condition of office, a more satisfactory supervision of the great majority of schools wonld be sceured. $\Delta t$ present it is of $a$ nominul character in nearly half the number in operation in this district.

Summary--From the forcgoing statements it may be inferred (1) that the means of education are being extended to many localities hitherto unprorided with schools; (2) that the material condition of existing selhools is of fair arernge quality, and that the buildings vested in the Council are with fer exceptions in good repair and amply equipped; (3) that sereral new schools of a substantial character are being erected; (4) that the attendance of pupils lins largely increased, and is marked by a greater degree of regularity and punctuality; (5) that the moral claracter of the sehools generally admits of favourable report; (6) that the quality of the instruction has been sensibly improved, and much higher results attained as compared with the preceding year; (7) that the local eupervision, though still of a nominal character in a large proportion of schools, is tolerably effective in one-half those now in operation ; and (8) that it appears desirable to take into consideration the question of compulsory education, with a view to the cnactment of a law by which the parents of children residing within a reasonable distance of nuy school supported or subsidized by the State would be compelled to place them under instruction.

Inspector's Office,
Albury, 19 February, 1872.

EDWARD H. FLANNERY,
Inspector, Albury District.

## ANNEX $F$.

Detailed Statement of the condition of Schools in the Albury District, visited during tho year 1871.
I.-PUBLIO SCHOOLS.

Adflova :-Visited 31st July and 1st August.
Present at examination:-Boys, 65 ; girls, 31 ; total, 36.

1. The school-room is much too small for the ordinary attendance, the supply of furnituro is inadequate, and a lavatory is necded, otherwise the organization is reasouably good. 2. Execpt an regards punctuality, the discipline is healthy and well maintained. 3. The course of instruction is complete and the teaching is of very fair average still. 4. The papits acquit themselves creditably under examination and the averago proficiency ranges from fair to very fair. The usefulness of the school is fully recognized in the locality, the attendance being now double what it was when the present teacher took charge some fourteen months ago.

> Absiong Crossing:- Visited, 27th July.
> Present at examination :-Boys, 20 ; girls, 10 ; total, 30.

1. The materinl condition is good, and the grounds have been improved since last inspection. 2. As a whole, the discipline is reasonably effective. 3. Moderate still is evinced ne regards method, and the instruction is woll regulated. 4. The profteiency ranges from moderate to tolerable, but the actual progress made since previous examination is fair. $\qquad$
Adelong Upier :-Visited, 16th August.
Present at examination :- Boys, 10 ; girls, 13 ; total, 23.
Some repairs aro needed to roof of achoolhouse, but the material state is otherwise fair, and the organization is rery good. 2. Owing to the decrease of population, the attendance has for some time past fallon below the prescribed minimum, The moral aspect of the school is pleasing. 3. Considerable energy and fair skill characterize the instruction. 4. The average proficiency exceeds fair.

> Albvey (P.):-Visited, 13 th, 14 th, and 18 th December.
> Present at examimation :- - Boys, $71 ;$ girls, 46 ; total, 117.

1. The fencing is in part old and dilapidated, suitable lavatories are required, and some minor improvements nceded; the material state is otherwiso satisfactory, aud the internal organization is good, but the grounds noed to be more neatly kept. 2. Since last report the discipline has become more thorough, and the moral aspoct of the school is pleasing. 3. The instruction is well regulated, and the methods of teaching are of more than fair average skill. 4. The proficiency ovinced in the various subjects ranges from fair to good, the average being very fair.

> Albutiy (Infants) :-Visited, 15 th December.
> Prosent at examination :--50 boys; 41 girls ; total, 100.

1. The schoolroom is in every respect suitable, well organized, and lastefully kept. 2. The order, attention, and geaeral behaviour of the pupils evidence jadicious and effectivo government. 3. The instruction ombraces all the subjects prescribed for infant schools, and is imparted with zoal and a fair degree of skill. The proficieney is very fair, and considerable progress has been made since previous visit.

Bowna (P.):-Visited, 1.st December.
Present at examination: -8 boys; 13 giris ; total, 21.

1. Some indispensable improrements have been made by the School Board recontly; the intornal organization is good, and commendable taste is manifested in the general arrangements. 2. The attendance has recently declined, owing chiefly to the removal of some families to other localities, and partly to the reopening of a school supported by the Roman Catholic Clergy of the district. In all respects the discipline is healthy and effective. 3. Tho instruction is regulated by the prescribed documents; the teaching is exceedingly painstaking and reasonably profitable. 4. Many of the pupils evince remarkable abiity under examination, and the attainments of the several classes rank as very fair.

Balranaids:--Visited, 9th October.
Present at examination:-Boys, 13; girls, 14; total, 27.

1. Since last inspection the schoolroom has been put in thorough repair, and the premises fenced in. Additional furuiture and better means of tentilation are alone needed to render thr mnterial equipment full and complete. 2. The pupils are neat in dress and reasonably punctual, but are disposed to be noisy at lessons. The government is reasonably eficient, but not sufficiently watelful in matters of detail. 3. The work of instruction is carried on with much vigour and zeal, but the teacher is only partially experienced. 4. The average proficiency is tolerable; and the results, as a whole, indicato a reasouable degree of progress during the time the present teacher has had charge of the school.

Deniliquin :- Visited, 15th and 16 th November.
Present at examination:-Boye, 34; girls, 14; total, 48.

1. Substantial repairs and improvements, including an addition to the teacher's residence, wore being effected at the date of visit. When these are completed the matcrial state of the school will be excellent. The grounds also are to bo planted and otherwise improved. 2. The general discipline, though still susceptible of improvement, is more efficient than it had been at former visit. 3. Tho instruction is very well regulated, and the tcaching is of fair average skill. 4. The average proficiency approaches fair, and a reasonable proportion of the pupils have been promoted to the ligher grades within the past year.

## Euston:-Visited, 17th October.

Present at examination:-Boys, 4; girls, 6 ; total, 10.

1. In consequence of the resignation of the teachor this school had been closed on 1st October ; but as he was still residing on the promises, he undertook to assemble the pupils for cxamination. The organization is, on the whole, of a very unsatisfactory character. 2. The discipline appears to bave been reazonably judicious. 3. The instruction included all the prescribed subjects, and was evidently painstaking. 4. The proficiency evinced under examination was reasonably satisfactory.

GudndagaI:-Visited, 29th and 30th August.
Present at examination:-Boys, 41; girls, 21; total, 62.

1. The school buildings need repairs, the playground is not divided for the sexcs, and the matcrial condition is also defective as regards laratory, playshed, and supply of water. 2. The attendance is still of a very irregular character, many of the pupils are slovenly in attire, and the order is indiffcrent. The government requires to be of $a$ firmer and more uniform claracter. 3. The instruction is very fairly regulated, and reasonably skilful. 4. The average proficiency is tolcrable.

## Hay :-Visited, 8th November.

Present at examination:-Boys, 18 ; girls, 22 ; total, 40.

1. The situation is low, the grounds are subject to inundation, and in wot weather the approach to the school is often impassable. The buildings are in every way suitable and well organized. 2. The attondance has steadily increased during the past six months, notwithstanding the active opposition of certain members of the Local Committee, who have established a private school in the township. On the whole the discipline is reasombly effective. 3. The instruction embraces all the prescribed subjecta except singing; the teaching is intelligent, but the individual method is too generally practised. The average proficiency is tolerable, and in some subjects tho answering was very satisfactory.

## Howlong: --Visited, 21st September.

Present at examination :--Boys, 16 ; girls, 21 ; total, 37.

1. The temporary premises in which the school is now held are in most respects unsuitable, but the necessury arrangements have becu made to erect substantial vested buildings. 2. Owing to the unfavourable weather prevailing at date of visit, the attendance was unusually small. The pupils are restless under instruction, and the government is neither vigorous nor judicious. 3. The instruction includes all the prescribed subjects, but is badly regulated, and only partially effective. 4. The general proficiency is very moderate.

Jeremiderin:-Visited, 18th November.
Present at examination :--Boys, 19 ; girls, 9 ; total, 28.

1. A full supply of furniture and working materials has been provided since previous visit, but the school is still conducted in very unsuitable premises. Vested buildings, are, however, in course of erection. 2. The disciplino is very effective, and the moral tone is high. 3. The instruction is very fairly regulated, the teeching is vigorous, reasonubly skilful, and very painstrking. 4. The attainments rank is fair, but the actual proficiency attained during the time the present teacher has had charge is good.

Lafe Adbert: - Tisited, 27 th Norcmber.
Present at examination:-Boys, 18; girls, 20; total, 38 .

1. The whole materin state of the school is goo! ; the grounds have been plunted, and the teacher's garden is a model worthy of general imitation. 2. The discipline is somerwat inprored of late, but the attendance is still of a very irregular and fluctating character. 3. The instraction is fairly well regulated, but neither skilful nor effective. \& The arerage proficiency lies between indiflerent and moderate.

Menmpif:--Visited, 26th October.
Present at examination :--Boys, 14 ; girls, 14 ; total, 28.

1. Vested schoolbutdings are being erected, and the school is nt present conducted in premises situated at some distance from the tornship. It is fairly found in working materinals, mad very neatly kept. 2. Tho discipline is reasonably good, and the pupils are very attentive unter instruction. 3. All the prescribed subjects except singing are taught; the methorls cmployed nre fairly effective. 4. The arerage proficiency ranges from tolerable to fair.

Moama :- Visited, and October.
Present at exnmination :--Boys, 16 ; girle, 19 ; total, 35.

1. The selool is held in private premises, and the rent paid by the teacher. The site is low, and subject to inuadation, the accommodntion is inadequate, and the furniture of bad quality and limited supply. Steps are being taken for the erection of rested buildings. 2 . The attendauce has seasibly increased, and the general discipline is pussably healthy. 3. The instruction is fairly regulated, and the methorls aro tolerably skilful. 4. The average proficiency ranges from moderate to fair, the average being tolerable.

Mourdmein :- Visited, 11th October.
Present at examination:-Boys, 4; girls, 4; total, 8 .

1. The premises sustained considerable injury from the floods of 1870 , and ave in need of repairs. 2. The population for some years past has gradually declined, and there are not more than trenty children of the school uges in the locality. Nearly all of these are enrolled, but the elder oncs were assisting at sheep. shearing on the date of visit. Those present were orderly and otherwise rell-behaved. 3. The instruction is imparted with fair skill. 1. The arerage proficiency is fair.

## Mulleaghandra:--Visited, 30th November.

Present at examination:-Boys, 12 ; girls, 21 ; total, 33.

1. This school is held in a slab building roofed with shingles and amply found in furniture. A residence for the teacher was being erected at the date of visit, and the entire cost has been subscribed by the residents of the locality: 2. The attendance is regular and remarkably punctual, and in its various details the discipline is judicious and effective. 3. The instruction is marked by intelligent methods and commendrble industry. 4. The attainments fairly accord with the requirements of the standard, but the progress made since the opening of the school deserves a much higher estimate.

Sebastorol:-Visited, $1 /$ May.
Present at examination :-Boys, 24 ; girls, 12 ; total, 36.
The schoolroom is a slab building roofed with bark, amply furnished, and provided with the necesary out-buildings; the cost of the whole was provided by local sabscriptions. 2. The attendanec is reaeonady regular and punctual, and the general discipline is tolerably effective, but the government gavours of barshness. 3. The instruction is confined to the more ordinary subjects, and is imparted with zavaurs ond industry. 4. The arerage proficiency is moderate.

Tembarumba :-(Not visited).
This school was closed on 31at March, in consequence of the resignation of the teacher; and owing to the want of suitable premises it was not re-opened for the remainder of the year. Vested buildings are now being erected, and when completed the sehool will be again brought into operation.

## Wagaa Wagga (Boys) :-Visited, 23 and 24 Norember :- <br> Present at examination, 83.

The accommodation afforded by the present promises is limited, but it is expected that the now buildiugs now in course of crection will be ready for occupation at the opening of the ensuing jear. There is a full supply of working matcrinis, and the organization is as good as circuustances will permit. 2. The attendance is increasing, and the general discipline healthy. 3. The course of instruction iacludes all the prescribed subjects, and the teaching is based upon good methods. 4. The arerage proficiency is very fair, and in some subjects moet satisfactory results late been attninet.

## Wagga Wagca (Girle) :-Visited, 22 and 23 November.

Present at cxamination :--53.

1. So far as the teacher is accountable for it, the organization is as good as the poor accommodation will permit. 2. The discipline is much more eatisfactory than at previous visit, and there has been a considarable increasc in the attendance. 3. The teaching is fairly skilful, and the instriction is duly regulated. The arerage proficicncy is mow firly up to standard, nud evidences substantial progress since previons examination of pupils.

## Tuxer:- Visited, 8 and 9 August.

Present at examination :-Boys, 43 ; girls, 39 ; total, 82.
The schoolhouse is a well designed and spacions brick building, suitably furnished, and amply found in the nocessary applinuccs. A residence and play-shed are required; the organization is otherwise complete, and the external appearance of the premises is much enhanced by a flower-garden and other improvements made br the teacher. 2. The moral aspect of the sehool is in every way satisfactory, the pupils being regular, punctual, and remarkably neat in dross; they are well behaved under instruction, pupils being regular, punctual, and renminamer. 3. The instruction is well regulated, and marked by very and exhibit cousiderabie refinement of manner. 3. The metruction is well regulatea, and namards general efficiency this school takes rank with the best in the district.

Wentworth :-Visited, 20 October.
Prosent at examination :-Boys, 19 ; girls, 12 ; total, 31.

1. An excellent schoolhousc, amply equipped, and having a teacher's residence attached; fencing and a playshed hare yet to be provided. 2. The attendance is unsatisfictory, and the gencral discipline indifferent. 3. The instruction is badiy regulated, and the methods of teaching are inappropriate. 4. The average proficiency is small; a trained teacher was appointed at the close of the yoar.

The following Schools situated in the Southwestern portion of the Bathurst District, were also visited:-

Bivalova:--Visited, 27 th April.
Present at examination:-Boys, 11; girls, 14 ; total, 25.

1. The school occupics an execllent site, but presents a most uninviting appearance. The fencing is dilapidated, the roof of schoolroom needs repair, the floor and windows are very dirty, and the whole premises are carelessiy kept. 2. The attendance is tolerably punctual, and the moral aspect of the school is in other respects moderate. 3. The course of instruction is incompiete, the lesson documents are of little practical utility, and the teaching is productive of very partial results. 4. The averago proficiency rauges from moderate to tolerable.

Burrowa :-Visited, 3 May.
Present at examination:-Boys, 29 ; giris, 13 ; total, 42.

1. The school buildings are well furnished and fairly organized, but tho grounds are as yet in an tmimproved statc. 2. The discipline is not effective as regards junctuolity nnd neatness of dress, but otherwise the moral aspect of the school is fairly pleasing. 3. More vigour noeds to be infused into the teaching. 4. The average proficiency ranges from moderate to tolcrable.

Oexningar:-Visited, 25th April.
Prescnt at examination:-Boys, 14 ; girls, 19 ; total, 33.

1. The floor and walls need some repairs ; in othor respects the organization is good. 2. Thero has been a steady increase in the attendance for some time past, and the general discipline is deserving of fivourable report. 3. Fair skill and reasonable industry mark the work of instruction, and the lesson documents, are on the whole suitable. 4. The average proficiency is tolerable.

Marevao :- Visited, 25th April.
Present at examination:-Boys, 12 ; girls, 12 ; total, 24.

1. A substantial stono building, well equipped except as regards furniture, but this was being provided at the date of visit. The external organization is yct incomplete, and the teacher's residonce affords very poor accommodation. 2. The pupils are punctual, neat in dress, orderly, and attentive under instruction. The prepailing tone of the school is rery pleasing. 3. The instruction nceds to be better regulated, but the teaching is painstaking, and reasonably skilful. 4. The arerage proficiency is fair.

Yodna:-Visited, 10th May,
Prosent at examination:-Boyg, 31 ; girls, 16 ; tolal, 17.

1. The school buildings are in good repair, and amply furnished. The internal organization is good, but tho grounds arc unimproved aud carclessly kept. 2. The attendance is irregular and only moderately punctual, the pupils are listless under instruction, and the governnent requires to be moro vigilant to mako it cffective. 3. The coursc of instruction includes all the prescribed subjects except singing; the lesson documents are suitable, and the classification is reasonably judicious, but the teaching is productive of but very partial results. 4. The average proficiency is moderate.

Wombat :-Visited, 13th May.
Present at examination:-Boys, 12 ; girls, 17 ; total, 20.

1. The school buildings are new, cuitable, and well equipped. 2. The attendance is regular and punctual, good order is muintained, and the government is vigorous rather than judicious. 3. Drawing and needlewori require increased attention; as rerards the other ordinary subjects, tho teaching is systematic and fairly skilful. The average proficiency is fair, and reading is excollently well taught, in the junior class especially.

## II.-PROVISIONAL SCTOOLS

Brg Ben Crefe:-Visited, 31st August.
Present at examination :-

1. The schoolroom is a substantial slab building, well furnished and orgnnized; outbuildings are needed to complete the material equipmept. 2. The attendance is regular and punetual, the order good, and the government firm and reasonably judicious. 3. The teaching is painstaking, and the methods fairly appropriate. 4. Considerable progress has been made since previous risit, and the attaimments are, fairly appropriate. 4. Consi
as a whole, reasonably good.

Bungowaknam :--Wisited, 5th December. Present at examination:-boys, 9 ; girls, 9 ; total, 18.

1. The bark hut hitherto used as a schoolroom being untenantable in hot wenther, the school has recently been transferred to the neighbouring Anglican Church building. The furniture is limited in supply. 2. The discipline is passably healthy. 3. The instruction is tolernbly well regulated, and the teaching reasonably skiiful. 4. Tolernble progress has been made within the year, but the classification dors not extond beyond the scoond grade.

Coulendina :-Visited, 26th September.
Present at examination:-Boys, 8 ; girls, 13 ; total, 21.

1. The schoolroom is a slab building, roofed with bark, floored with bricks, badly furnished, and unprovided with outbuildings. 2. There is no well defined system of discipline, but the childyen are reasonably well-behaved. 3. The teaching is moderntely effective. 4. The average proficiency is indifferent, but there is a prospect of better results under the present teacher's management.

Gilmore Upper:-Visited, 17th August.
Prescut at examination :-Boys, 14; girls, 19; total, 33.

1. Increased necommodation is much needed, otherwise the organisation is reasonably appropriate 2. The discipline has been much improved, and is now fairly healthy. 3. Fair skill and commendable industry mark the work of instruction. 4. The average proficiency ranges from fair to very fair.

Huon:-Visited, 21st Deceraber.
Prescnt at examination:-Boya, 8; girls, 13 ; total, 21.

1. The material state of the school is defective as regards flooring, fencing, furniture, and outbuildings, but the supply of working materials is passably good, and the premises are neatly kept. 2. The discipline is on the whole well sustained, but there appears to be a falling off as regards personal cleanliness. 3. The instruction is regulated by the prescribed documents, and the methods are appropriate. 4. The average proficiency approaches tolerable.

## Kimo Reef:--Visited, 24th August.

Present at examination:-Boys, 7; girls, 8 ; total, 15.

1. The schoolroom is a well-designed slab building, auitably furnished and tastefully kept. 2. The attendance is reasonably good, and the general discipline fairly satisfactory. 3. The instruction is imparted with tolerable shill, and much energy. 4. Having regard to the comparatively short time the school has been in operation, the attainments are satisfactory.

Lacmalac:-Visited, 21st Augut.
Present at examination:-Boys, 10 ; pirls, 8 ; total, 18.

1. Since last inspection the schoolroom has been floored and otherwise repaired, additionsl furniture provided, and out-offices erected. 2. The attendance is reasonably regulnr, but in general the discipline is slack. 3. The instruction is badiy regulated, and of only indiferent quality. 4. The averago proficiency is small. The present teacher is but a short time in charge.

Mount Adrail:-Visited, 2nd August.
Present at cxamination:--Boys, 13 ; girls, 13 ; total, 26.

1. A well designed slab building, roofed with shingles, and in every respect suitable. The supply of furniture is rather scanty, and on the date of visit the books and apparatus granted by the Council had not arrived. 2. There is a decided improvement as regards regularity of attendance, and the discipline is on the whole reasonably effective. The preseribed lesson-documents have not yet been compiled, and the teaching, though marked by a considerable degree of earnestness, lacks intelligent method. 4. Moderate proficiency has been attained in the ordinary subjects, and higher results may be expected.

Mulwald:-Visited, 27 th Scptember.
Present at examination :-Boys, 18; girls, 12 ; total, 30.

1. A supply of suitable furniture is absolutely necessary, and the premises are much in need of repair. 2. The attendance is good, but, in its more general details, the discipline is very unsatisfactory. 3. The prescribed lesson-documents have been protided, bat, owing to the injudicious classification, they are practically useless. 4. Moderate proficiency has been attained in reading and writing, but in other subjects the attainments are very meagre.

## Major's Puanss :-Visited, 6th December.

Present at examination :-Boys, 6 ; girls, 9 ; total, 15.

1. The necessary out-buildings have not yet been provided, and additional furniture is needed. 2. The pupils are wanting in punctuality, but otherwise are reasonably well disciplined. 3. The lessondocuments are not properly compiled; and the teaching, though passably ekilful, is necessarily desultory. 4. The average proficiency is moderate.

Wanganelila :-Visited, 10th November.
Present at examination:-Boys, 10 ; girls, 10 ; total, 20.

1. The school is held in a brich building, latoly parchased by the Local Committee; furniture, out-offices, and some minor repairs are much wanted. 2. The moral aspect of the school is passably pleasing. 3. The classification is unnecessarily minute, and the lesson-documents are imperfect; but the teaching is characterized by fair intelligence. 4. The average proficiency is moderate, and some of the pupils have received instruction in the standard requirements for a Fourth Class.

Wonjmulat:-Visited, 15th August.
Present at examination :- Boys, 13 ; girls, 11 ; total, 24.

1. Since last inspection a book-press and black-board have been provided, and water-closets, a playshed, and lavatory erected. The school is armply found in working materials, and is vory cleanly fept. 2. The discipline has been considerably improved, morc especially as regards personal cleanliness and neatness in dress. 3. The instruction is fairly regulated, and the teaching is reasonubly effective. The attainments range from tolerable to fair.

## ARMIDALE DISTMICT.

## Ixspectoh's Genoral Report for 1871.

Though the limits of the disirict assigned to me are the same as those described in former reports, the area of ny operations has been enlarged by the increase in the number of schools. The population of the district is steadily increasing in its inland southern parts by farmers from the Hunter River and other districts, and in its coast regions by families attracted by the important and promising new industry of sugar production. In some places the iucrease of sehools keeps steady pace with the incrense of populntion ; but, in others it is not as rapid as could be wishel, owing to the sentored claaracter of households and to the consequent diffculty of gathering the children in groups suitable for instruction. Considering that there are but ferw and thinly attended private schools in the district, it is very plain that there is yet a large number of children not attending the schools of the Council. Some of those may be receiving instruction at home from tutors or covernesses; but the bulk of them, the children of shepherds, stockmen, miners, carriers, and free selectors, are I believe getting none at all. From an approximate calculation based upon the Census Returns of the District for 1870 and upon these ren apple assumptione that l-5th of tho population ( 49,498 ) are of school age, from 4 to 14 , -that tho a that 7-10ths of such children ought to bo at school at the same time,-it appears that there are 2611 not enrolled in the Council's schools. Many of these doubtless live within the influence of schools already established; but tho majority, living at such places as the Nambuccra River, the Lower Bellenger River, Kincheln Creek, Gosswick, Attunga, M'Gowan Creek, Reid's Swamp, Terrible Vale, Timbarra, dc., have as yet no schools to go to; sud considering the facilitice afforded by the Council for the ostablishment of schools, $I$ am unable to explain such a elow progress in school extension, otherwise than by ascribing it to the apathy, ignorance, or selfishness of some parents, and to the want of vigour, persevernance, and unanimity of others. The erection of school buildings is about the greatest bar to educational progress, and I beliove it will always be so until funds for sach a purpose be raised by the lovy of local rates or from the ronts of school lands, or until the rising gencration be trained to value and interest themselres in school matters.

The following table shows the increase of schools since the passing of the Public Schools Act of 1866, the numbers being those of schools in operation during the whole or part of the year :-

| Class of Schools. | 1867. | 1868. | 1569. | 1870. | 1871. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Public | 31 | 37 | 40 | 42 | 46 |
| Provisional | 6 | 15 | 25 | 31 | 31 |
| Half-time ....... |  |  | 2 | 2 | 4 |
| Donominational | 16 | 14 | 14 | 12 | 10 |
| Totals | 53 | 66 | 81 | 87 | 91 |
| Percentage of increase | $\ldots$ | 30. | 53. | 64 | 71 |

At the beginning of the year, five schools, viz., Wallaby Hills (Pror.), Yctman (Pror.), Darkwater Creek (Pror.), Yamba (Prov.), and Nundle (C.E.), being regarded as finally closed, were crased from my list, thus leaving eighty-two schools in operation, one of which, Glen Innes (C.E.), was chauged into a Public School. During the year, Public Schools wero opened at Aldavilla, Nundle, und Belmore River ; Provisional Schools at Fernmount, South Arm, Ramornic, and Harwood Island; and Half-time Schools at Stevo King's Plains and Tucki Tucki. Three schools were closed for low attendance, viz, Goonoo Goonoo (Prov.), Gunnedah (C.E.), and Gunnednh (R.G.); and the two departments of the Port Macquario (Prov.) were united, because that of the girts failed to maintain the minimum attendance. The Public Schools at Alumny Creek, Bogabri, Barraba, and Kinchela Creek, lanve not yet been opened, owing to the dolays in the erection of buildings. Applications have been farourally considered for the establishment of Pubtic Schools at Graymount, Murwillumbah, and Village of Cowper ; of a Provisional Scliool at Wombah; and of Half-timo Schools at Quirindi and Quipoli, Quirindi Creck, and Jacob and Joscoph Oreck; and also for the conversion of Ramornic (Pror.) and Talounbi (Prov.) into Public Schools. My time has been so fully occupied during the year in the inspection of schools, and in the performance of other duties, that I hare been able to visit but few places where schools are necded. I hare, nevertheless, made many inquiries into the educational wants of the district, the results of which induce me to count upon tho carly establishment of schools at the following places:--Towalba, Oban, Ulah, Gostryyck, Tcrible Vale, 'Timbarra, Keid's Swamp, Gumedah, Blaxlands, Burranbel, and M'Gowan Crecks, Hanging Rock, and the Bellenger and Nambucera Rivers.

The work of inspection proper began on the 27th February and ended on 25th December, the remnants of the ycar bcing occupied in ofice work. The favourable state of the weather which marked tho year enabled me to visit's all the schools except four, viz.:-Aldavilla, Belmore, and Nundlo (Public), and 'Thrncr's Flat (Prov.), the first threo of which wore not establisher when I visited their districts. The total number of visits paid to schools was one hundred and twenty-fire (125) 81 regular inspections, 10 ordinary, and 34 incidental, the results of which are given in the body of this report, and in the appended summaries of reports alrendy furnished the Council. The plan of risiting schools without giving prerious notice has been rigidly adhered to, with a piew of placing all teachers and children upon equal footing; but, though in the majority of cases, it enables me to judge of the normal condition of the schools, and relieves teachera, children, and myself from the embarrassing and occusionally unhealthy influences of visiting parents and strangers, it is frumght with some inconvenienco and injustice: lst, becnuse it eometimes prechdes me from conferring with the entire body of a School Board or Committec upon iungortant material defents; and 2ndiy, becusec, where my stay in $n$ distriec is necessurily prolonged, a few tenelhers to whom it becomes known placo their schools in an attitude of preparation unl maintain them so for days together, thus striving to gain an uujust advuntage over their follow teichors with regard to relative professional standing. In the regular inspections the standards of proficiency have been strictly obscrved; aud close attention has been given to the principles of cxamination laid down in Appendix A of the Council's Progress Report for 18677. The ratio of pupils presented for camination was 77.3 per cent. of those curollecl, the aremge ratio for the threc previons years being 79 per cent. ; but the number of scholars examined this year is 18 per cent. increase upon those presented last year. The ordinary inspections have been few but useful, and it is to be regretted that they cannot under existing circumstances be nade more frequently. They have cuabled me not only to confirm or correct my estimute ol' the practical skill of teachers, by obsercing more minutely their character, system of mamagement, and methods of instruction, but ulso to correct, assist, and encourage them in their work as occasions required. In the incidentul inspections, which are mostly of brief duration, I have chiefly aimed at ascertaning with what regularity the sehool records and school operations are observed, in what condition the schoolroom and its exterior are in with regard to neatnces and clenaliness of appearaner and with what apirit both tenchers and children perform their work; and I regret to rejort that in several cases the results hare not been satisfactory, especially as regards the condition of the sehoolroom and school documents.

The sites of the newly established schools are reasounbly suitable. Those of inland schools are gonerally such as not to injuriously affect the attendance; but the character of those of schools in the coast parts may be partialy inferred from the fact that, during the third weck in Jennary, no less than sixtcen schools were closed on account of flooded rivers and mindy river-bank roads. A.

A steady improvement coutinues to manifest itself in the character of school-buildings. Now and roomy brick structures have been erected at Nundle, Alummy Creck, and North Grafton, which last are very superior in size and completeness of design, besides being the best in the district. Now slab or weatherbonrd schoolhouses have also been built at Aldavilla, Belmore Kiver, Fernmount, Ranornie, Harwood Island, Sherwood, Tynednle, Stevo King Plain, and Tucki Tucki, all of which zre reasonably suitable. Substantial repairs have been made to the following school-buildings:-Bullina P., Chatsworth Island P., Ulmarra P., Woodford Park Prov., and Armidale R.C. New schoolhouses are greatly needed at Bingera, Glen Innes, Wyrallah, Strontian Park, Wauchope, Rose Hill, and Gundarinula; and repairs to those of Armidale P., Narrabri P., Port Macquarie P., Sumnerland P., Tamworth P., and Warialdit P. With the exception of four non-vested cases, the teachers of Public Schools are provided with residences of very fair quality, and all but three of which are kept with praiseworthy care. The teachers of Provisional very fair quality, and all but three of which are kept with praisemorthy care.
and Half-time Schools, though in the roceipt of much inferior emoluments, are worse off in this particular, and Half-time Schools, though in the roceipt of much inferior emoluments, are worsc off in this particular,
only twenty bcing provided with dwellings, of which eight are of moderate and four of wretched character. Seven out of ten teachers of Denominational Schools are provided with fair class dwellings. Thus, there are no less than twenty-four teachers without residences, none of whom receive compensation for bouse-ront. Many of them consider their position in this respect a hard one, and some still complain of the difficulty of securing quiet and comfortable homes, which are especially needed by young teachers desirous of inproving themeelves by study.

The possession of well-organized playgrounds-spacious, level, clean, and nicely fenced, ornamented and adequately shaded with flower borders and trees, and prorided with such essentials as well designed outoflices and larutory, supply of water, bell, weathershed, and gymastic apparatuz--is of great importance to well disposed teachers as means for the moral and physical training of their pupils. Playgrounds of this description, however, do not as yet exist in the district, but there are eeveral that fairly approximate to the standard. About one-third of the teachers iutcrest thembelves in garden culture, and a few have found the means of providing their pupils with simplo gymmastic appliances or with ericketing and croquet materials. Speaking generally, hovever, playground improvements advance but slowly, which I ascribe partially to the difficulty of raising funds for the purpose, but particularly to the apathy manifested by teachers and School Boards in the matter. The playgrounds of Public Schoois may be classed as fair, of Denominational Schools passable, and of Provisional Schools indifferent, and the general condition of the whole mar be partinily inferred from the fact that thirty-five are without fences, general condition of thentoflice without outofles, fifty without proper provision for a supply of water, eighty'five withouli twonty-fire without outoffices, fifty without proper provision for a
lavatories, cighty-nine without weathershecis, and fifty without bells.

The condition of the schools is slowly improving as regards the quantity, quality, and arrangement of the furniture, but there is still much to be done before they can be fully regarded as being comfortably and well furnished. Several schools are still marked wholly or in part by ill constructed and arranged desks, and by the absence of clock, tablet boards and bookpress, picture brackets and hatpegs; sud in the majority of them there is to be seen neither table, chair, water-bottle and gong, nor window blind, doormajority of them there The to befects are in great measure due to the difficulty of raising funds, and partly mat and footscraper. the want of zeal ortelligence on the part of teachers and School Boards; but I think that the diffito the want of zeal or intelligence on the part of teachers and School Boards; but I think that the diffi-
culty of remedying them and others that must incidentally arise yearly in every school, might be convencuntly orercome by the creation of a petty expense fund, to be raised by exucting from pupils small weekly or monthly sums independent of their school fees. Publie Schools in general are furnished very fairly, Denominational Schools fairly, and Prorisional and Half-time Schools moderately. It thus appears that the last, named schools labour under grent disadrantages both in this and other particulars ; nud Local Committees feel such a wenkness of their prosilion, for 1 have not unfrequently heard it aseerted by them that the pupils of such sehools are justly entitled to the sume benefits as those enjoyed by Public School children : complaining of the injustice of being compelled to build and furnish their schools without partial State Aid, and urging that the Penny Post principle of school ccouomy should be carried out more liberally that it is.

Speaking generally, all the schools are furnished with a rensomable supply of books, maps, slates, \&ce. coprbooks excepted. I say reasonable, because the wise and cconomical plau is adopted of not providing schools, particularly those of recent establishment, with more working materials than are absolutely needed to meet the requirements of the average nttendance and the intelloctual adrancement of the pupils. There consequently exists a great disparity in the condition of all tho schools in this particular, the difference being wholly attributable to the accumulation of yearly supplies and to the scrupulous care of the teachers. The usual annual grants of school requisites have been made to all the schools, except a fow from which the necessary applications were not sent in ; and it is gratifying to report that with fow exceptions the teachers have manifested both good jul!gment and economy in their requisitions. The average allowance for each child enrolled has been sid., the maximum and minimum being 20d. and 11d. respectively, and the average allowance made for each child enrolled in the differeut classes of schools has
 To prevent misconception, it should be explained that the Provisional Schools were more liberally dealt with than the others, because many of them of two, three, or four years standing, were in need of with the of superior maps, to meet the wants of adranced pupils. It is gratifying to report that many of the schools lave at length been supplied with sets of sixteen illustrations of Australian Fauna, the art displayed in which is of superior merit; but it would be still more pleasing to report that the teachers were helping themselves to increase their stock of educational applinuces, exercising their ingenuity in the diverting task of forming cabinets of animal, regetable, and mineral products, paper terrestrial globe, millbonrd geometrical figures, portfolios of assorted prints or engravings, cards of coloured wools, \&e., \&c. As it is, extremely few schools are furnished with other articles beyond those supplied by the Council. It is worthy of mention, howevor, both on account of its novelty and the example it affords to teachers, that in the Armidale Public School, a library of 200 volunes has been formed, consisting of works on History, Biography, Travels, Adrentures, \&s.. At present it is self-supporting, but sufficient time has not yet elapsed to tost the success of the scheme; it is pleasing, however, to observe the avidity with which the elapsed to test the success of the scheme; favourito books are sought after, and also, the healtay mental shmulus
sequent thought and conversation the pupils derire from reading them.

Notiwthstanding the great importance thet is attached to the accuracy, regularity, and neatness with which teachers kcep their school records and furnish their Returns, and the explicit printed instructions given them for keeping such, as well as the clearly expressed penalies they are liable to for errors or wilful falsification of entries, it is my unpleasant duty to report that the condition of four-ninths of such documents lave not been entirely satisfactory. The examination of them this ycur has been more than wsually strict and penetrating; and I hare found them marked by oue or more of these defects : want of neatness, crrors :nd omiesions of entries, discrepancics between different recorls, and want of relinble, necuracy in the Class Rolt entries. In some cases the teachers lave been eensured by the Council for their glaring defaults; and in two, the feachers have been virtunlly dismissed for the wilful falsification of the Class Roll entries. The Quarterly Returns have been transmitted with greater punctunlity and sccuracy this year than last; but in sereral instonecs I have found the school copics of them not kept in accuracy this in fow prorrese, and gpenk so favourably of the Amnual Returns, nenrly one-third of which were returned for correction of discrepancies,

The following Table shows the Material Condition of the Schools：－

Discipline．－Turning to the disciplinary condition of the schools，the first matter for report is the claracter of the attendance，as to its regularity，punctuality，and the times at which the pupils begin and close their school career；for according to the degrees in which，these features manifest themselves educational efforts will，ceteris paribus，be rewarded．Moreover，it is found that such features do manifest themselves more or less eatisfactorily according to the completeness of the material organization of the schools，the healthy tone of their government，and the attractive，complete，and effective character of the instruction given in thom．Speaking generally，the punctuality of attendance is fair．In several schools it is good， aud in others unsatisfactory，such differences being duo to variations in the personal influcnces of the teachers，and to whelher or not their schools are furnished with clocks and bells，or with appliances to cngage the pupils in their out－door amusements．Where the spirit of the playground runs high and is judiciously encouraged and regulated，small diffecilty is cxperienced in getting an early attendance except where the papils live unusally far from school or where the arrangements of their homes are ill regulatel． This latter lindrance is not unfrequent，and is especially aggravating to tcuchers when the late comers， though living near the school，are the children of the members of School Boards or Committees．

As regards the regularity of the attendance，there is ground for a little congratulation，notwith－ atinding the concern that must be felt for the many children，as has been already shown，not yet brought under school influcnce，though living within its range．The sclool returns for the year show an increcuse both in the gross and averago attendances．According to the anmual returns，the number of children registered as having attended school one or more duys in the year has been 5,372 ，or 4 por cent．increase upon those registered in 1870；and the quarterly returns show that the average class enrolmenta and daily attendances for the year have been 4,317 and 2,909 ，or 17.7 and 21.3 centesimal increase upon last year＇s，the increase of schools being 4 per cent，and the ratio of regular attendance 67 per cent．Thas，there are 1，408，or 23 per cent．of the children，who，although enrolled，may or may not attend but four days in the yoar to justify such enrolment．But，although this is an extrene view of the ratter，it is nevertheless a possible and oven probable one，considering that some teachers are tempted to misrepresent the atten－ dunce，from fear of a reduction in their salarics．In a few instances I have obscrved that children have been enrolled，though not in attendanco for the whole of a quarter，and iu soveral others that they hare attended but a few days therein．I have also observed that the 23 per cont．of irregular attondauts are chiefly composed of pupils of the extreme school ages，from fonr to six and twelve to fourteen years．Again，adding these 1,408 irregulars to the 2,611 childreu who are not enrolled in the Council＇s schools，there appears to be no loss than 4,019 ，or 40 per cent．of the 9,898 children of school age in the district，who are under very doubtful instruction or none at all．This is certainly not a pleasing picture of the progress of education in the district；and the picture is further darkened by the fact that a large proportion of the pupils lave school before they have received adequate instruction，the truth of which is attested by the low standards of age and gencral proficiency attained in many of the third classes．The following table affords a viow of thic proportions of pupils of difforcit ages，who were enrolled on the days of examination，from which it will be seen thut there is in the schools only 5.25 per cent．of the pupils above the age of twelve，the bulk of whom are in the second and third classes，there being but three fourth classes in all，the pre－ scribed standard of proficiency of which whea attained no nore than fits a boy or girl to fill a reasonably responsiblo situation ：－

| 3 years of age |  |  | per cent． |
| :---: | :---: | :---: | :---: |
| 4 \％ | ．．．．．．． | $5 \cdot 06$ | ， |
| 5 ＂ |  | 6.66 |  |

| 15 |  | $\cdot 4$ |  |
| 16 |  | $\cdot 13$ |  |

There are beyond doubt many parents who，though anxious to provide their children with the best education they can afford，withdraw them from school upon finding that their promotion to a fourth or fifthe class，as the case may be，is rendered impracticable by a limited attendance aud therefore limited staff of teachers．To meet the exigencies of such cascs，it is urged by them that greater facilitios should be afforded teachers to teach the lighor subjects，providing that the ordinary subjects be not neglected； and tho fecling is not unfrequently expressed that towns like Kcmpsey，Tamworth，Arwidale，and Grafton require graded schools instead of rival oncs of equal yet limited pretensions．Bat thore is a large number of parents who though living within the limits of schools，regurd educution as a matter of secondary im－ portance to their solfish interests，to secure which some entirely neglect the education of their childaren， whilst others send theirs so irregularly to school that the instruction they get proves of littlelasting ralue．To prevent such negligence，and thereby not only protect such children but also to provide for the future well－ being of the Colony，it is yery requisite that some remedial nad effective legislative necasure be passed．I do not think，howerer，that as sweeping compulsory enactment is desirable or could be fairly carricd out； but I．do think that under reasonable circumstanees of distance and population that people should be com－ polled to contribute towards the erection and maintenance of school buildings where required，and that Local Magistrates or District Bonrds should be empowered to deal summarily with clearly proved cases of parents umreasonably neglecting to send their children to school．

Neatncss ant cleanliness are important fentures of school discipline. A clean, well-aired, and nicelyordered schoolroom and well kept, phayground are needed, both on acsount of the sanitary, moral, and esthetic influences they exercise over tho children, and also the hoalthy tone they inpart to the general routins of the school. It is cqually important, also, that children and teachers should appear at sehool scrupulously clean and decently attired. The observanco of cloanliness should be stringently and steadily enforced, more especialiy where selioolrooms are overcrowded. Teachers and School Boarcis camot, under sueh circumstances, be too watchfil and ready to remedy such dofects as dirty walls, windows, and floors, dusty furniture and apparatus, foul drains or out-ofices, bad rentilation and supply of water, and want of washing appliances. Reviewing the schools according to these considerations, their condition in general is yery fair and improved, thero being but four very exceptional cases, the teachers in which are old and but indifferently efficient. Some tenchers deserve praise for the good results they hare secured in these particulars, even, in a few cases, under dificulties of defective orgauization, for they have made their schools patterns of neatness and cleanliness by dint of tutiring persererance, vigilance, and industry; others, on the contrary, require to pay grenter regard to their own personal appeurance, aud mauifest more diligence, tact, and stermuess of purpose, before they can hope to raise their schools to the proper standard in these respects. The daily inspection of the pupils as to their appearance must be less formal than it is, and stricter attention given to such mechanical details as the daily cleaning of the schoolroom and furnitare, the periodical dusting of walls and dingrams, and the proriding of such minor though requisite articles as towels, dusters, slate and pen cleancrs, door mats, and others that suggest themselres to tho experienced teacher.

The observance of order in all its details continues to be considered of paramount importance as regards the moral training of the pupils and the efficiency of their instruction; and the disciplinary condition of the schools in this respect has been measured by the same high standard as was indicated in my last report. The order maintnined in thirty-two schools ranges from rery fair to good; in forty, from passable to fair; and in twelve, from indifferent to moderate. Such estimates are based upon the results of the regular, ordinary, and incidental inspection, a combination of which is best culculated to discover the normal moral state of the schools. In a few instances teachers have been deservedly censured for laxity of discipline; but viewing the schools as a whole, an improvenent is observable in their moral condition. It is ploasing to mark the anxiety and success manifested by some teachers to mise their discipline to a good standard; but there are some who, though descrving of cucouragement and commendation, are unable to produce good results, from want of training and alequate schoolroem experience. The discipline of many sehools is still marked by one or more of the following defects: either the orderly gathering and dismissal of the pupils are laxly obscrved, the furniture and apparatus not tastefully arranged, or the marching and class movements of the pupils not performed with the requisite quietness, thoughtfulness, and precision. As regards the conduct of the pupils there is little cause for complaint, buti think that there is room for improvement in their mamers and demeanor. The school-work moreover requires, in several instances, to be performed with greater vigour, enthusiasm, and efficiency. One very marked defect in the disciplinary organization of the schools is the almost entire absence of an efficient system of drill. I think that military drill should be introduced into every school; and that, in order to secure in it efficient results, it should be made an indispensable subject in the examinations of teachers and pupils; for it is not only important as a means of physical truining, but is of political expedieney, considering that the Colony is in great meastre thrown upon her own military resoncees for protection from foreign aggression.

The claracter of the gorernment is in genemal mild and firm ; corporal panishment appoars to be very rarely used, only one or two cases of its infliction having come under my notice during the year. The children manifest a ready obedience to command, but are not always as mindful of them as they ought to bẹ. I still continuc to find children guilty of conying, but I am gind to find that most teachers are
trying to rid their schools of the evil. With fer exceptions, the teachers seem to possess the confidence of their pupils, and to manifeat a kindly intercst in them; but I think that in several instances they or their pupils, and to manifeat a kindly interest in them; but 1 thins enat, in several instances they
ought from them a greater amount of mental labour, animation, energy, and sustained attention, impressing upon them forcibly and untiringly the all important fact that the schoolroom is a workshop, in which slipshod work and a listless frittering away of time connot be tolerateil. I may add, tlat the most popular and successful teachers in tho district are those who exact from their pupils a fair day's work with unflinching firmness of purpose.

Table showing the Moral Condition of the Schools :-

## Inetrdotion.

The classificution of the pupils according to their intelligence and skill in reading is gradually improring, for teachers are begiming to see that the untimely promotions of pupils to upper classes tells against them at the examinations, as regards the marks placed against each class for mental culture and general proficiency. But it is not altogethor satisfactory as regards the numbers in each class, for there is too great a percontage of pupils in the lower classes, and this arises from feebleness in the instruction, irregularity of attendance, and a highly reprehensible artifice udopted by a fow teuchers of retaining pupils in the lower classes for purposes of false slow. The average number of pupils in each school is thirty-five, the centesimal distribution of which is as follows :-First Class, 46 ; Second Class, 31; and Third Class, 23 ; the avcrago ages of them being $6 \frac{1}{2}, 9 \frac{1}{4}$, and $11 . \frac{1}{2}$ years respectively. Considering that pupils should clear the Sccond Classes when 9 years of uge, and that the percentago of those above such age is altogether 357 , there appears to be nearly 127 per cent. of them who, under ordinary circumstances, ought to be in the Third Classes; and according to similar calculations there ought to be an additional 7 per cent. of pupils in the Second Classes. Although the evil is fast disnppearing, there are still a few (10) teachers who foolishly multiply their troubles nnd enfeeble the effects of their teaching by a needless subdivision of their classes, for it is quite enough, and in many ceses more than onough, to manage three divisions instead of four, five, or six. Therc are but three Fourth Classes in all; and in nine schoolschiclly Provisional, there are no Third Classes. The absence of 1Fourth Classes is due to the fact that the teacher's classification is low, or that the arerago attendance is not ligh enough to warrant the appointment of a pupil teacher or an assistant teacher ; and such absence is not unfrequently a matter of complaint or regret, and leads to the carly withdrawal of children from school. But a more serious and widoly spread complaint is that teachers in several cases of largo average attendance cannot do justice to those under them for want of assistance, and it is urged that pupil teachers should be appointed to schools where them for want of assistance, and it is urged that pupil teachers ahould be appointed to Echools where
there is an average attendance of 40 instead of 50 pupils as at present. If this suggested chango were there is an average attendance of 40 instead of 50 pupils as at present. If this suggested chango were
adopted by the Council, it would necessitate the appointment of at least thirteen additional pupil toachers, and the removal of nearly as many teachers to other schools on account of low classification, which latter consideration would ecneibly stimulate them to gain ligher ecrlificates.

The occupation of the pupils is regulated by Time-tables and Programmes of Lessons, the design of which is to show not only with what precision and efficiency the routine of the schools is regulated, but ulso, how long and to what extent each of the prescribed subjects is taught. So much importance is attached to thesc documents that the estimate which is formed of a teacher's charactor is greatly modified according to the care, intelligence, and taste manifested in their construction. It is gratifying to report that the teachers in general manifest a deaire to frame these documents and observe them to the best of their abilities, but there are some who treat them as more matters of form, or regard them as they do troublesomo children. I still continue to find $\mu$ fow of them made out on scraps of paper, the excusc of their framers being that the specimen forms aro not procurable, or that they are too expensive. In eight schools I found them wanting, owing partly to the indolence of the teachers, but mainly to their want of cxperience, and in the rest their character ranged from tolerable to good, a fow of them being considered as highly ereditable. A noticeable and too common a defect in the time-tables is that they do not ehow the times devoted to oral instruction, or that they are not made out on or according to the prescribed specimen form, and the Programmes of Lessons show in too many cases that each subject is not taught as systematically as it ought to bo. Closely connected with theso matters is tho condition of the Leason Hegieters. Most of them are carefully and faithfully kept, but in the rest the entrics made are so meagre ne to be worthless for purposes of examination. A fow teachers still make weekly instead of daily ontries of their lessons, but it is hoped that this defect will not be a matter for report next year.

The prescribed course of secular instruction is not as strictly followed ra it ought to be, for there are still a few teachers who omit from their Time-tables cither grammar, geography, objcct lessons, drawing or scripture lessons, cither from negligence, an inability to teach them, or an anxiety to ground their pupils first in the primary subjects,-reuding, writing, and arithmetic. Special religious instruction is given in one school only, and the teaching of sewing is maiuly confined to Public and Denominntional schools. The character of the instruction, though somewhat improved both in spirit and form, docs not keep pace with the moral charncter of the schools. The lower classes are still too much neglected, and the methods of teaching still too mechanical and feoble. Many of the programmes of lessons still show an nbscnce of proper system in the succossion of lessons, especially under such heads as reading, writing, arithmetic, geography, or object lessons, and the individual lessons I have heard hnve been more or less wanting in onergy, vivacity, intelligence, or improssivencess of treatment. $\Delta$ very common defect that either manifests itsolf before me in the teaching or is attested by the results of the cxaminations is, that of not closely questioning the pupils at the close of a lesson or serics of lessons, with a view of testing to what extent and with what depth of attention they bave been received; besides which, most of the programmes of lessons contain no provision for quarterly or half-yearly examination of the classes. Again, I hare obserred that sufficient attention is not given to the important distinction between teaching, instructing, informing, and educating, and to the necessity of blending them together in the course of a lesson. There appears to be too much importance attachect to 0 knowledge of bare facts, and too little attention deroted to the acquirement of skill, mental culture, and a knowledge of principles. Thesc remarks apply with rarying degrecs of force to the character of the instruction given in most of the schools, more especially those in the hands of untrained teachers. In one-eighth of the sehools the methods of instruction may be considered as rery fair or good; in nine-fourteenths, as passable or fair ; and in the rest as indifferent or moderate. Compared with those of last year these estimntes show a reasonable improvement in the character of the teaching; but I think that a much greater improvement could be effected, if many
of the teachers would but apply thenselres more diligently to the study and practice of the best methods, and there is the greater demand for such improvenent considering the early age at which the bulk of the pupils leare school. Not only must the methods and processes of teaching be improved and more enthusiastic rigour be thrown into it, but also greater attention be giren to the lower classes, to oral instruction mid examinations, and to the preparation of lessons.

Table showing the Claracter of the Instruction:-

| Subjects. | d'ublic. |  |  | \| Provisimal and Hall-time. |  |  | Derominntional. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Classification | 25 | 16 | 3 | 15 | 10 | 5 | 3 | 5 | 2 |
| Oceupations. | 23 | 17 | 4 | 8 | 13 | 9 | 3 | 6 | 1 |
| Method....... | 10 | 30 | 4 | ... | 17 | 13 | I | 7 | 2 |

In a fer echools the reading is sensibly improved and satisfactory; but in the majority it is still marked by hesitancy or over-rapidity, indistinctness and feeblencss of utierance, or an almost total digregard of pausation, rhythm, and modulation. Though I make it a ruie to hear each child read two, three, or four sentences, it is often painfully tedious to listen to the succession of their monotonous drawls, blunderings, or almost inaudible utterances. The method of trenting the subject is obriously faulty. The rcading books are too exclusively trented as stores of information than as a means of instructing the pupils in the principles of elocution. The clildren of the third classes still manifest but rague conceptions of what good reading is, and are not unfrequently unnble to express the sounds of the letiers or properly resolve a word into its syllables. Moreover, the programmes of lessons afford no eridence of the methodical treatment of the subject, the only use made of them being to show how many pages of a book are to be read, instead of also indicating the gradations by which the rules of good reading are to be taught, illustrated, and practised weekly throughout all the classes-not in the higher classes alone, but in the lower; for the formation of correct habits of reading and speaking must start from the beginning of a child's school life. "The highest art springs from the soundest philosophy, and the best method from both." It is indispensable that the teacher should first acquire not only-a full and accurate knowldge of the rules of elocution, but also a ready skill in applying them, before he can teach them effectvely. Some of the teachers, however, do not seem to be influenced by euch considerations, if I may judge from the mechanicul tone of their teaching the subject, and, in 4 fers instances, the provincialisma of their specch. The results of the examination prose that the matier of the reading lessons is not as fully, clearly, and impressively explained ns it ought to be ; though I have occasionally obscrved a tencher ruming to the other extreme. Simaltaneous reading appeare to be little practised, notwithstanding its superior merits when it is judiciously regulated; and but indifferent attention is bestowed upon recitations, vocal exercises, or the committal to menory of choice classical extracts. An improvement is gradually manifestiag itself, however, as regards teaching reading to the first classes: the method of treating the subject is becoming moro intelligent and skilful, the blackbourd is more frequently used, and the classification is less minute. The estimates of the reading in the different classes of schools are giren along with those of other subjects in Appendix A.

A decided improvement in the general chnracter of the writing has manifested itsolf during the year; and the success with which the subject is taught may be regarded as very fair. The methods of teaching it are better, and are applied with greater vigour than they were last year. The copybooks appear to be more closely inspected by the teachers, and prove that the pupils are acquiring better and correcter habits as regards cleanliness and painstaking, and the sitting postures of the body, respectively. Some teachers are particularly successful in teaching the subject, and I ascribe this to thcir common sense, tact, and unceasing and untiring encrgy, superadded to a spirit of intolerance as regards remissness of attention and waste of time ; but there are others so culpably negligent in the matiter that I am not surprised at the complaints of parents and the curly withdrawal of their children from school on account of glow progress. The writing in the dictation cxercise is less satisfactory than that exhibited in the copybooks, and the spelling in them is but slightly improsed. The majority of the teachers still require to manifest more patience, care, and intelligence in treating thesc important exercises, which are valuable tests both of a pupil's power of memory, depth of attention, and collcctedness of thought in general, as well as of his familiarity with the forms of language. Again, I rarely find the pupils of the upper classes eapable of punctuating their mriting, and I ascribe this defect to the small attention given by the teachers to the teaching of composition. Each child provides its own copybooks, but this fcature of the school's orguaization is attended by difliculties; for the parents of some pupils are cither too poor or negligent to purchase them, or umable to procure thoso of an approred kinl. These difficulties might, I think, be purchase them, or unable to procure eal depots for the distribution of school materials, and the retailing to overcome by the establishment of local depots for the distribution of school materials, and the retaing to pleasing instances of pupils either writing with stumps of pencils, or cleaning their shates with the sleeves or skirts of their dresses; but it is to be hoped that I shall not be required again to call attention to such objectionable practices, more especially the latter.

The teaching of arithmetic, however, contraste unfarourably with that of writing, and is perhaps the most unsatisfactory feature of the school instruction, for although this year's questions in the subject have been of the same simple, practical, nud almost identical character as those proposed last ycar, and the plan of examination has been strictly adhered to which I described in a former report, yet, the results obtained now are cten worse than they were then. The majority of the pupils manifest but moderate intelligence and still in the subject, and but a very small number of them are in its higher rules. I hare often felt surprised at, the low results obtained in the third classes, even when the proposed questions have been those prescribed for second class children in their third or fourth quarter of enrolment. Thas, in the third classes of 33 schools, 198 out of 235 pupils were unable to subtract 901 from 1000 ; in 12 schools, 86 out of 120 failed to solve a simple problcm inrolving the alternate addition and subtraction of four simple numbers of two digits; in 20 schools, 110 out of 168 failed to find the third parl of 4,308 ; in 13 schools, 101 out of 131 could not work a simple problem involving the continued multiplication of threo low numbers; and in 7 schools, 58 ont of 73 could not tell me the product of 9 and 8. In the compound rules the ratio of failures is cren freater, particularly so if the question requires a little thoughtful consideration. Thus, in 10 schools, 113 out of 134 failed to work out a simple shop question incolving the addition of three or four small sums of moner, and the subtraction of their shop question total from £2. Agnin, in 27 schools, 164 , out of 273 conld not subtruct $10 \frac{1}{2} d$. from $E 10$; and in 13
schools, 92 out of 119 could not subtract 10 inches from 10 feet. Where clildren were alleged to be sehools, 92 out of 119 could not subtract 10 inches from 10 feet. Where children were alleged to be
learning Proportion, I found in 5 schools 42 out of 44 unable to find the cost of a farm when $\frac{2}{4}$ of it were ralued at $£ 600$; and in 6 schools, 36 out of 47 were unable to find the cost of 300 articles sold at the rate of $2 \mathrm{~s} .7 \frac{1}{2} \mathrm{~d}$ a couple. I have noticed, howerer, that where questions of a set or routine character are proposed the results are better. It is obrious that in the majority of instances the methods of treating fice subject are not as intelligent and pructical as they ought to be. The first principles of the acience are
not suffcionldy understoon and applied. Teachers are too fond of dealing with high numbers, and do not observe fulness of variety in the forms of their questions; besides which, they do not present the subject in a sufficiently concrete form to the lower classes. The tables are learnt, but they are not clearly understood. They are learnt just as they occur in the table-book, fon attompte being made to found them on the simple continucd addition and subtraction of numbers. I find little variation in the order in which the parts of the subject are presented to the pupils, it being very plain that more respect is paid to Colenso or Walkingame than to the excreise of original thonght and intentireness. It is to be hoped that the teachere will apply themselves nore to the etudy of tho subject, and strive to present it to their pupils in more attractive and intelligible forms; for it is only from a fulness of knowledge of it, combined with an insightit into the mental peculiarities of children, that a right mothod can proceed.

Grammar bas botll the disadrantage und advantage of arithmetic in the course of school instruction ; for on the one haud it is more abstract and less appreciable by young minds, whilst on the other the results of teaching it admit of less accurate tests. Thercfore, though there may be a higher number of passos in it, it cloes not follow that it is better traught. In a few schools its teaching is steadily improving, owing mainly to the intense carnestness thrown into it; but in the majority of the schools, chiefly Provisional, Half-time, and Denominational, it is taught with but moderate efficiency and rigour. The method of treating the subject by most teachers is more or less warked by the same defects enlarged upon in my report of last year: it will therefore be unnecessary for me to do more now than invite attention to the more objectionablo oncs. The teaching is too mechanical, and too much confined to parsing; besides, the Programmes of Lessons attest in too many instances that the subject is not syetematically handled. The facts of grammar aro not sufficiently generalized; for I frequently find pupils unable to answer intelligibly questions on the principles of expressing tho numbers and genders of nouns, the tensos of verbs, ctc. It is still apparent, also, that several teachers instruct their pupils in the subject more than they teach them. The subject requires to be more practically applicd to the speech and writings of the scholars; and its method to be more analytic and inductive, especially in the lower stages. The the scholars; and its method o be more analytic and inductive, especially in the lower stages. The cultivation of formal thought in the pupils, is taught in most of the schools with varying degrecs of success. In a few Public Schools it is handled with creditable ability, and the good results of its teaching are clearly shown in the compositions of the scholars ; but in the majoritr, the results are of its toaching and in some, meagre-more cspecinlly in the Prorisional, Half-time, and Denominational Schools. It still requires to be applicd more successfully in the teaching of reading, and to be more elosely accompanied by synthesis or composition, instruction in which should begin early. The subject, also, docs not appear to be traght with. the requisite precision, for I not unfrequently perceive errors of speceh or spelling in the oral or written excrisses of the pupils. The upper classes, again, require to be much oftener and more offectively drilled in the oral and written transposition and paruphrase of language; and I think it would not be going too far to expect eren the first class pupils to transpose some of the short and simplo sentenecs of their reading books. Finally, it is highly important that the pupils should be trained to express, when occasion requires, their answers to oral questions in a precise, full, and formal manner.

Geography, when hundicd by an able teacher and good geographer, who possesses an impressive, winning, and graphic power of describing near and distant scencs or cvents, and who is skilled niso in the roading of maps, is perhaps the most attractive and popular subject of echool instruction. Notwithstanding these adrantages, however, the result of the instruction given in it do not show well in the exnminations generally. These fhort-comings spring from defects in the organization, from a want of fulness and versatility of knowledge on the part of most teachers, and to the want of a due appreciation of its highly practical worth as a monns of mental culture and of furthering civilization. Tho only appliances in the schools for teaching the subject are maps; there being, except in very fow instances, neither globe, nor diagrams illustrativo of tho various features of our earth, physical or political, commercial or socinl, which defect, I consider, docs uot speak well for our philosophy of education. The unknown is made to takc precedence of the known, and tho far of the near. In all the schools I find a map of the Colony, Austrailia, or Europe ; but in few, a map of the district or plan of the town, and it is very rare to find tenchers storing their schools with materials, real or pictorial, for the illustration of their lessons. As regards the method of treating the subject, it is in most, instances too dry, tame, and mechanical. The pupils aro not suffiently intercsted in the subject ; they are too exclusively drilled in the memory of lifeless names or incomprehensible areas, hoights, nnd distances, and too little in that of the surrounding scencry, nud of pictures representing the vertical contours of this and othor countries, with their ammuls, plants, and busy fields, towns and rillages. I fimmly believe, that if a simply constructed diormma of the pictures contained in such works as the Miss Kirby's "World and Home" were exhibited to pupils, and accompanied by the appropriate conversational remarks and descriptions that characterize that work, they would acquire a more real, lasting, and useful lnowledge of geography in a month than thoy do now in twelve or more. Again, if the teachers would only frane their lessons on the same genetic principles, and clothe them in the same pleasing and intelligible form as is illustrated in the charming description of the "Voyage of the Grasshopper," they would experience little dificulty in getting their pupils to understand and renember the nomenclature of the subject; the treatment of tho subject appears to be marked by the opposite defect that cbaracterises the trentment of Grammar. There is an excess of synthesis and a lack of aualysis. Skeleton maps marked in paint on the slates or blackboard there are none, nnd map drawing is rarely practised. In the examinations maps are rarely used, except when I find it necessary to test the perceptive nower of tho pupils. I find that the fancy and imagination of the scholars are not sufficiently cullirated and developed, for in most instances they aro unable to follow me in an imaginary descriptive voyage or tour from one place to another. Local geography needs minuter nud more gencral attention, and greater prominence should be given to the drawing of plane of the schoolroom and grounds, road, or district. Physicul geography is proscribed as a subject only for fourth classes ; consequently it receires but very limited nttention, there being but three or four such clasees in the district. Summing up, the results of the examinations in the subject are from fair to good in fire schools, and from indifferent to tolerable in seventy-fire, which results are a slight improrement on those obtained last year.
Object Lessons proper are of

Object Lessons proper are of high and peculiar importance in a scheme of home or school instruction, because they afford the only direct means of excrcising and maturing the powers of sense and perception, reflection and reasoning in the pupils, all other subjects of instruction being more or less of nm nbstract elaructer, engaging the attentiou more with symbols of things than with the things themselves. They possess also the distinctive and raluable feature of being purely oral, thereby enabling teachers to infuse into their pupils a spirit of obscrvation, rcasoning, und inquiry. They are given in all the schools but five Provisional ones with rarying degrees of success. Speaking genernlly, the results of the examination in the subject are not satisfactory, being from fair to good in fourteen schools only, and from indifferent to tolerablo in sixty-two. Most of the teachers do not seem to realize an adequate sense oither of their practical importance of tho end to bo attained, of the matcrials required, or of the methods to be pursued. As I. said last year, these lessons aro injudicionsly given, more upon unseen things and pictures than upon objects that can be secu and handled. What is most objectionablo however is that too much stress ia laid upon the generic differences of things than upon their specific or peculiar ones. Again, thero is not sufficient varicty in the subjects solected for such lessons, and in many instances I perceive the absenco of design and completeness in the succession of them. Considering the brief period of sehool life, objects of typical character should be eclected for such lessons, and they slould be elosen with a view not only of imparting information tiat will be useful to a child in after life, but more particularly with a vien of cultivating the strength and versatility of his mind and fostering in lim an anxiousness to acquire a knowledgo of subjects not prescribed in the course of secular instruction, viz., history and physical science. Again, the forms in which these lessons are presented to the pupils are oftern too abrupt and didactic. The
children
children require to be oftener indulged and their spirit of curiosity and inquiry to be cultivated by pleasing descriptions of imaginary risits to the mine, formdry, flour-mill, aviary, battle-ficld, or Hougc of Parliadescrip
ment.
Singing is taught in thirty-nine schools only : twenty-five Public, eight Provisional, and six Denomimational, and in very few of these is instruction given in the theory of music, according to the Tonic-sol-fn method. In no instance is the estsblished notation employed in the teaching, because there are no fifth classes, for which only it is prescribed, so that the pupils leave school withont an nbility to read a simple piece of musie in its ordinary form. In twelve schools the quality of the singing ranges from very fair to good, and in the rest from indifferent to tolerable. Part music is practised in a few schools ony, and pleasing efforts in this particular have been made by the teachers of the following echools:-Armidnic, P.; Bowling Aller, P. ; North Grafton, P.; South Grafton, P.; and Kempsey, Pres. In several schoole the singing is marked by the following defects: It is not sweet, full, and agreenble; the tones are too dental ; the enunciation of the words of a song are not sufficiently distinct and audible; the requisite attention is not given to the piano, mezzo-forte, and forte qualities of the intonation. Grcater attention to the emission of the voice is needed, and greater prominence should be given to rocal excrcises on the rowels, particularly $\overline{0}$ and $a(\mathrm{ah})$.

Drawing is taught in a larger proportion of schools and with a little greater success than it was last year. The results of the exnmination of sixty-six schools in the subject are from fair to good in twontynine, and from indifferent to tolerable in thirty-seren. The method of teaching the subject is, in the majority of instances, marked more or less by the same defects I described in last year's report. The majority of instances, marked more or less by the same defects I described in last year' report. The
elcementary stages of the art are still too much neglected; the pupils are advanced too rapidy from one figure to another; the instruction is not sufficiently oral : and the directions for drawing the lines in various directions are not strictly observed, there being too many noisy umnecessary shiftings of the slates instead of the proper and quiet oncs of the hands. Increased attention is given to drawing figures from memory, but very little to drawing from the solid object.

Sewing is taught in 42 schools,- 33 Public, 2 Provisional, and 7 Denominational,--the other schools being in the charge of umarried teachers. Greater interest is manifested in the subject, and a perceptible improvement has been made in the method of teaching it. The character of the needework is from fair to good in 14 schools, and from indifferent to tolerable in 28 . Greater prominence is given to plain sewing, which in a fow schools rellects great credit upon the teachers. Complaints are still made by some teachers that parents are more or less negligent in providing their children with working materinls; but thore are however in a ferm instances counter ones about the inferiority of the needlework done in the schools. In only one school, the Public School at Armidale, is the teaching of the subject regulated by a programme.

Scripture Lessons are given to the pupils of the third and fourth classes in most Public Schools with fair efliciency; but they are ruther neglected by the teachers of Provisional Schools, some of whom entirely omit them from the Timo-table.

Geometry, Algebra, and Latin, aro tanght to the fourth class boys in four Pablic Schools with fair average efficiency.

## Teachers.

Soveral changes in the condition of the staff of teachers have been made during the year. A few teachers have gained promotion for good service, whilst a ferw others have obtained higher classification by success in their examination. The teaching staffs of the Public Schools at Tenterficld and Grafton have been increased on account of inereascs of attenduuce, and the sularies of severai Prorisional School teachers have been augmented for the same reason. Several changes have also occurred in consequence of a few rosiguations, deaths, or dismissals. The great majority of the teachers are respectable, intelligent, and attentive to their duties, courtcous and anxious to receire euggestions. I do not think, however, they aro as studious in their habits and as cnthusiastic to gain promotion by examination as they ought to be, judging from the extremely few applications that have beon received from aspirants to promotions and judging from the estremely few applications that have beon received from aspirants to promotions and from the want of proparation manifested in many of the lessons I hare heard. Those of Provisional Schools
are untrained, notrithstanding which defect they are in several instances doing passable work. The condition of many of them is, bowerer, a hard one, for they aro without residence, their sohool-foes are precarious or low, and the average amount of their omoluments is only $£ 5517 \mathrm{~s}$. for the year. Surely something ought to be done to better their position, and thereby render it a more attractive object for intelligent young men or women to attain.

Littlo or no improvement is observable in the character of the echool fecs as regards either the rates or the regularity of their payment. Some teachers still complain of the unreasonableness of such rates, and others of the difficulty and cven impossibility of getting the parents to pay the school money. A satisfactory ecttlement of the question is needed.

The number of froe scholus in tho schools is 4 per cent. of that of the pupils ourolled, or 46 per cent. increuse npon those admitted last year. This increase is, in my opinion, not due to the increased porerty of the parents, but to the sugar-plum policy adopted by some teachers of admitting clildren free in order to sustain the proper average attendance. I am inclined to think also, that in instances where different class schools are situated nienr cach other, certnin teachers remit the echool fees to gain the adrantage of a larger attendance over their colleagues.

The character of the local supervision is much the same as that described in former reports.

ANNEX B.

Stumary of Reports upon Public Schools inspected in 1871.

> ALDAyILLA, P. (V.)

Not established when I visited the district.

Armidale, P. (V.) :-Incidental inspections: Five. Regular inspection, 17th, 18th, 19th, and 20th October, 1871.
Numbers at the examination :-Boys, 87 ; girle, 86 ; total, 173.

1. The old schoolhouse needs renovating ; otherwise, the material condition is good and well cared for, and the organization in general is complete and very good as regards accommodation for teachers, boarders, and scholars; and ns to the supply of working materisls, to which has been recently added a uscful library of 200 volumes. The achool records are well kept. 2. The attendance is very punctual steadily maintained, and rery fairly regular; the government is vigilant, judicious, and effective; tho pupils are cheerful, orderly, diligent, aud decently attired; and the moral tone is on the whole rery pleasing. 3. The usual subjects are taught, inclusive of Latin and the higher mathematirs, besides which spocial instruction in Eirglish History is given to adranced scholars on Saturday mornings. The occupation is well regulated, and the teaching continucs to be marked by zeal, painstaking, industry, and intelligence. The attainmenta range from very fair to good. The boarding department is well managed ae regards the physical and intellectual und moral well-being of the fifteen pupils enrolled.

Bamina, B. (V.) :-Regular inspection, 13th and 14th November, 1891.
Numbers at the examination:-Boys, 37 ; girls, 27 ; total, 64.

1. The schoolhouse, residence, \&e., have been thoroughly repaired; the general aspect of the property is satisfactory; and the supply of material appliances is rcasonably adequate and fairly arranged and preserved. The school records are kept with care and apparent accurncy. 2. The attendance has increased, and is very fairly regular. The discipline is barely passablo as regards the conduct of the pupils, and the quictness, order, and efficieney of the sehool operations. 3. The usual subjects aro tanght, pupis, andine quet increased attention needs to be given to ecwing and Object Lessons. The occupation is moderately well regulated, and the teaching, though apparently earnest, is only moderately puinetaking and effective. The attainments are moderate.

Belmore Riyer, P. (V.)
Not established when I risited the district.

Bendemier, P. (V.) :-Regular inspection, 24th August, 1871.
Numbers at the cxamination:-Boys, 17 ; giris, 20; total, 3 7.

1. The buildings lave boen removed tio a better site and placed in goorl repair. The out-offices are inferior, and lavatory and weather-shed are needed. The organization is on the whole fair and improved. 2. The attendanco has increased, and is fairly regular; the government is frirly intelligent and effective, and the pupils are neat and eleau, fairly orderly, diligent, and self-reliant. 3. The usual subjects are taught, the occupation is tolerably well regulated, and tho teaching is tolernbly diligent and intelligent. The attainments range from moderate to tolerable.

Bingera, P. (N.V.) :-Incidental inspection, 28th September, 1871. Regular inspection, 29th September, 1871.

Numbers at the examination :-Boys, 12 ; girls, 14 ; total, 26.

1. The schoolhouse is old, dilapidated, and unsuitable; the teacher's residence is wretched; the play-ground is without fence, out-oflices, bell, and supply of water; the furniture is inadequate and unsuitable; and the stock of working materials is moderate. The school records are not kept with the requisite regularity and reliable accuracy. 2. The attendance is low and unpunctual; and the discipline in general is lax and empirical. 3. The instruction is very clementary and ill regulated; the classification is inappropriate; and the teaching is mechanical and indifferently effective. The attainmonts are snall, and the whole spirit of the sclool is unsatisfactory.

Boriling Aluey Pornt, P. (V.):-Regular inspection, 1st September, 1871.
Numbers at the examination:-Boys, 16; girls, 24; total 40.

1. The material organization is on the whole good, and the school records are kept with apparent regularity and accuracy. 2. The attendance is reasonably punctual and tolerably regular ; the government is healthy and improved; the pupils are clean, orderly, and well bchaved, and the moral tone is on the whole very fair. 3. The usual subjects are taught, and the occupation is very fairly well regulated. The teaching is earnest, painstaking, and fairly intelligent; and the attainments are fair and progressive. Drawing, singing, and sewing are deserving of special attention.

Bundakra, P. (V.) :-Incidontal inepection, 5th October, 1871; regular inspection, 6th October, 1871. Numbere at the cxamination :-Boys, 13; girls, 21; total, 34.

1. The material organization is on the whole good; and the school records appear to be properly kept. Diagrams are needed. 2. The attendance is steadily increasing, and is reasonably punctual. The government is healthy and firm; the pupils are cloan, docile, and well behaved; the school operations are performed with very fair regularity, and the moral tone is in general very fair. 3. The usual course of instruction is observed and fairly well regulated; and the teaching is improved in diligence, and painsinstruction is observed and fairly well regulated; and the teaching is in
taking, and is fairly intelligent and promising. The attainments are fair.

Casivo, P. (V.):-Regular inspection, 22nd June, 1871; incidental inspection, 8th November, 1871. Numbers at the exmmination:-Boys, 21 ; girls, 15; total, 36.

1. The material organization is good in gencral, but the school records are not kept with the requisite regularity and accuracy. 2. The attendance is steadily maintained, and tolerably regular. The discipline is tolerably effectire. 3. The usual subjects are taught, except singing ; the classification is passable, and the occupation is tolerably well regulated. The teaching is earnest and tolerably intelligent, but wanting in spirit and vigour. The silent lessons need greator supervision and cramination. The attainments range from moderate to tolcrable.

Chatswortir, P. (V.) :-Ordinary inspection, 13 th June, 1871 ; regular inspection, 28th November, 1871. Numbers at the examination :-Boys, 18 ; girls, 30 ; total, 48.

1. Recont repairs have placed the school buildings in good condition. There is an ample supply of maps, books, \&cc., in good condition and arrangement. The school records are neat, clean, and apparently correct. 2. The attendauce is reasonably regular and punctual; and the discipline is in general healthy and pleasing. 3. The usual subjects are taught, and the lesson documents are carefully framed; but the classification is only passably appropriate. The teaching is carnest and diligent and fairly intelligent, but requires to be more paiustaking in the first class. The attainments range from moderate to very fair.

## Furora, P. (V.) :-Regular inspection, 23rd March, 1871.

Numbers at the examination :-25 boys; 20 girls ; total, 45.

1. Repairs to roof of school-house, additional desks, and the remoral of the partition are needed; otherwise, the material condition and orgavization are very fair. The school records are kept with neatness and care. 2. The attendance has increased and is fainly regular and punctaal. Tho discipline is healthy and strict; the school work is performed with quietness and order; the pupils uro clean, docile, and well behaved, but wanting in livelincss and vigour. The mornl tone is on the whole pleasing. 3. The usual subjects are taught, except singing; the occupation is fairly well regulated; and the teaching is carnest, painstaking, and tolerably intelligent, but requires to be more spirited and oral. The attainments range from moderate to fair.

Fernmodert, P. (V.) :-Regular inspection, 14th April, 1871.
Numbers at the examination :-12 boys; 19 girls ; total, 31.

1. The school building and detached residence are substantial, but not well finished slab structures, centrally situated. The stock of furniture and working materials is reasonably adequate; and the school records are neat, clean, and apparently correct. The material organization in general is good. 2. The attendance is rather low and irregular. The government is healthy and fairly effective; the pupils aro elcan, orderly, and tolerably diligent and seff-reliant, but posecseed of oniy moderate animation und mental culturc. Tho smaller maticrs of discipline require more attention. 3. The usual subjects are taught ercept singing and sewing ; the occupation is regulated with fair skill; nud the teaching is carnest tolerably intolligent, vigorous, and improved. The attainments are reasonably passable.

## Glan Innes, P. (N.V.) :-Regular inspection, 28th July, 1871

Numbers at the examination : -16 boys; 7 girls ; total, 23.

1. The material condition of the school-house is not satisfactory as regards size, lighting, ventilation, and gencral appenrance. Repairs to fence and a supply of water are greatly needed. There is a lair supply of working materinks, but they are not arranged and preserved with the requisite carc. The sehool records require to be kept with improved aecuracy and regularity. 2. The attendance is low and irregular. The pupils are fairly neat, clean, diligent, mid well belared, but manifest thoughtelcsyness in their speech, attitudes, and movements. The discipline requires to bo marked by greater firmness and watchfulness. 3. The usual subjects are taught, except singing and sewing; the occupation is fairly well regulated, and the teaching is animated and foirly inteligent, but not sufficiently painstaking and diligent. The attainments are passable but little improved.

Grafton, P. Primary (V.) :-Ordinary inspection, 2nd and 5th June, 1Sth. Regular inspection, 6th, 7th, and 21st December, 1871.
Numbers at the examination:-Boys, 85 ; girls, 72; total, 155 .

1. The material organization is rery defective and unsuitable for the large attendance, thereby rendering efficient school manngement in great measurc impossible. Such difficulties, however, will to a very grent extent be orercome when early next ycar occupation is then of the new, superior, and well furnished buildings. The school records require to be kept with greater neatness and care. 2. The attendance is increased, prnctual, and fairly regular. The pupils are clean, checrful, and decently dressed, docile and generally well behaved, but require to manifest greater animation und thoughtfuhness. The supervision of the playground is not strict enough. Considering material drambacks, the moral tone is sound and very fair. 3. Latin, Euelid, and Algebra are included in the usual course of instruction, which is appropriately regulated. The classification, howerer, necds amending. The teaching in general is marked by Periodical and searching examinations are required. The attumments respectait

Graftox P. (Infauts V.):-Regular inspection, 5th December, 187 L.
Numbers at the cyamination :-Boys, 27 ; girls, 40; total, 67.

1. Weather-shed, laratory, and suitable out-offices are needed, otherwise the material organization is fair. The selool records are clean and apparently correct. 2. The attendance is well sustained and punctual. The government is mild, judicious, and effective, but not sufficiently vigilant in tho playground. The clildreu look happy, clean, and respectable, are docile and well belaved, very fuirly attentive and intelligent. The moral tono in general is very fair. 3. The course of instraction is appropriate, and the beupation is well sustained. The teaching is correct, painstaking, and iutelligent, but requires additional rivacity. The answering is not sufficiently general. The range of attainments is very fair.

South Graftox P. (N.V.) :-Incidental inspection, 29th May, 1871.
Regular inspection, 8th December, 1871.
Numbers at the examination :-Boys, 20; girls, 25 ; total, 45.

1. New school buildings', weather-shed, lavatory, suitable out-offices, and additional furniture are greatly needed. The school records are kept with neatuess and improved regularity. 2. The attendance is well maintained, punctual, and rery fuirly regular, but too large for the accommodation. The moral aspect of the sehool continues to be very plensing; and laudable attention is bestowed upon the outdoor recreations of tho prpils. 3. The usual subjects are laught, inelusive of Latin. The occupation is well monated, and the teaching is earnest painstnking, and fairy inteligent. The attainments range from moderate to very fair.

Gundarimba P. (N.V.):-Regular inspection, 27 th Junc, 18t1. Incidental inspection, 10th November, 1871.

Numbers at the examination :-Boys, 11; girls, 12; total, 23.

1. The schoolhouse is too small, ill lighted, and vontilated. There is a fair supply of furniture, but neither bell, lavatory, weather-shed, nor suitable out-office. 2. The attendance is low and irregular, and the school records are not kept with sufficient neatness and eare. 'lhe government is henlthy; the pupils are foinly clean diligent, and well behaved, and possessed of moderatic animation and montal pulture are firry clean, diligent, and woll the occupation is regulated
 range from indifferent to fair.

Infbremi I. (Y.) :-Regular inspection, 4th and 5th October, 1871.
Numbers at the examination:-Boys, 29 ; girls, 15; total, 44.

1. The buildings hare been placed in good materinl condition; and the stock of furniture, books, etc., is adequate. The organization is on the whole good. The school rceords require to be kept with greuter regularity and nceuracy. 2. The attendance is rather irregular, and the government somewhat grax. The pupils are tolerably neat and clean, but not sufficiently diligent, ordcrly, and mindful of commands. The school operations require to be performed with more quictness and precision. The moral tone is moderate. 3. The usual subjects are taught, except singing; the classification is defective ; and ihe occupation is rather negligently regulated. The teaching is fairly intelligent, but hecks animation and painstaking. The attainments mange from moderate to fair.

Keliy's Plasis (P.V.)-Regular inspection, 3rd May, 1871.
Numbers at the examination:-Boys, 9 ; girls, 16 ; total, 25.

1. Bcll, lavatory, and bookpress are still needed; otherwise, tice matcrial organization is very fair. 2. The attendanee is low, irregular, und unpunctual ; the pupils are tolerably clean and well behuved, but the work of the school is done with ouly moderate quietness, painstaking, and regularity. The moral tone is deterion the and barely passable. 3. The usual subjects are taught, except singing ; the classification is injudicious, and the occupation is regulated with nooderate skill. The tenching is tolerably intelligent, injudicious, and the occupation is regulated with noderate is a manifest fulling of in zeal and painstaking. The attainments are moderate.

## Kempaer, P. (V.) :-Regular inspection, 22nd Mirel, 1871.

Numbers at the cxamination:-Boys, 19 ; girls, 21 ; total, 40.

1. The materin condition is fair, and the supply of applinuces edequate. The property is keptwith praiseworthy nealmess and eare. The school records are noat, cican, and apparently correct. 2. The altendance has failen off, but is punctual and fairly regular. The government is firm, vigilant, and effective, and the geocral moral tono very fuir. The supervision of the playground is not strict onough. 3. The usual subjects are tought with zeal, jainstaking, and fair skill; and the occupation is well regulated. The attimments are fair.

Lismone, P. (V.) :-Regular inspection, 26th Junc, t871. Incidental inspection, 9 th November, 1871.

1. The material condition is good, and the supply of school requisites adequate. The organization is good. The school records are not kept with proper efficiency. 2. The attendance is fairly regular, and the discipline is tolerably satisfactory. 3. The usual subjects are taught except singing ; the classification is defective, and the occupation is only moderately well regulated. The teaching is tolerably intelligent, but the methods are applicd with only moderate animation, prinstaking, and cflicicncy. The attainments are moderate.

## Natrabit, P. (V.) :-Regular ingpection, 22nd and 266h Scptember, 1871.

Numbers at the examination:-Boys, 19; girls, 10; total, 29.

1. Suitable hat-pegs and dry footpaths to the school are needed. The several ruptures in tho wails and arcles of the buildings need attention, otherwiso the material organization is good. 2. The attendance is low and irregular. The discipline is on the whole very fair. 3. The usual suljects are taught, but sufficient attention is not given to the sewing. The elassification is judicious, and the occupation is fairly well regulated. Tho teaching is carnest and fairly intelligent, and the attsiuments range from moderate to fair.

Palmer Istand, P. (N.V.):-Regular inspection, 14th June, 1871. Incidental inspection, 30 th Norember, 1871.

Numbers at the examination:-Boys, 20 ; girls, 20 ; total, 40 .

1. Toacher's residence, out-offices, bell, lavatory, and additional furniture are needed. The stock of working materials is fair. The material organization is barely passable. The school records are not kept with the requisite regularity and care. 2. The attendance hus increased, and is tolerably regular but unpunctual. Tho government is mild, but not sufficiently watchful and firm. The pupils are tolerably neat and clean, orderly, diligent, and well-bchaved. The school operations require to be performed with greater exactness. The moral tone is tolerable and promising. 3. The usual subjects are taught, except ginging sund sewing. The occupation is regulated with fair efficience, and the teaching is earncst, diligent, painstaking, and tolerably skilfill. The attainments range from modcrate to fair.

## Port Macetarie, P. (V.):-Regular inspection, 13th and 16th Marel, $18 \% 1$.

 Numbers at the examination:-Boys, 38 ; girls, 14 ; total, 52.1. Book-prees and repairs to residence, out-offices, fence, and school buildings, are urgently needed. There is an adcquate supply of school appliances, and the school records are kept with fair efficiency 2. The attendance is comparatively low, but fairly regular and punctual. The pupils are fairly neat and clean in their persons, but not sufliciently subdued in demeanour and attention to their work. The discipline requircs to be marked by more firmness and watchfulness. The moral tome is fair, but deteriorating. 3. The usual subjects are taught except singing; the classification is judicious, and the occupation is fairly well regulated. The teaching is fairly intelligent, but not spirited and painstaking enough. The attainments are fair.

Riinbow Reach, P. (V.) :-Regular ingpection, 30th March, 1871.
Numbers at the examination :-Boys, 15 ; girls, 15 ; total, 30 .

1. The site is unpleasant, and the playground is not yet cleared and fenced. The material organization is otherwise faix, but the property is not kept with thic requisite care. The school records are kept with pory fair efficiency. 2. The attendanec is tolerably punctual, but low and irregular. The pupils are clean, tolerably orderly, diligent, nad solf-reliant, and the discipline is fairly cffective. 3. The uaual subjects nre taught, but scwing is rather neglected. The occupation is regulated with fair skill, but the methods are still too mechunica?. The attainments range from moderate to tolerable.

Rocky Motist, P. (V.) :--Ordinary inspention, 12th Junc, 1871. Regular ingpection, 21st and 22nd Norember, 1871.

## Numbers at the examination :-Boys, 15; girle, 22; total, 37.

1. Tcacher's residonce, bell, additional furniture, and an enlargement of the schoolroomare needed. There is a very fair supply of working materials, and the school records are kept with improved regularity. 2. The attendance has increased, and is tolerably regular and punctual. The government is healthy, improved, and fairly effective. The pupils are clean, cheerful, and docile, diligeat, and fairly orderly in tileil movements; and the school work is performed with pleasing zeal and vigour. The moral tone in gencral is improved and pleasing. 3. The usual subjects are tanght, except singing and sewing. The printed instructional documents are nots strictly observed, otherwise the occupation is well regulated. The toaching is zenlous, painstaking, and diligent; and the attainments range from moderate to good.

Rocky Rrver, P. (V.) :-Regular inspection, 17th May, 1871. Incidental inspection, 22nd August, 1871. Numbers at the cxamination:- Boys, 21 ; girls, 22 ; total, 43.

1. Out-offiecs, lnvatory, and supply of water are needed to complete the otherwise satisfuctory organization. The school records are not kept with sufficient care and regularity. 2. The attendance has increased, and is fairly regular and punctunl. The pupils are tolerably neat, clean, orderly and well behaved, bont not anmated and diligent enough. The younger pupils need stricter supervision and firmer trentmoent. The moral tonc is passable. 3. The usuai subjects are tanglat, and the occupation is tolerubly well regulated. The teaching is earnost, riligent, and tolerably skiiftul, and the atiainments range from indifferent to tolerable. The results of the incidental inspection were not satisfactory.

Satamarkz Creek, P. (V.) :-Regular inspection, 12th May, 1871.
Numbers at the examination :--Boys, 12 ; girls, 5 ; total, 17.

1. The material condition has been improved by painting and internal linings. Bell, lavatory, and repairs to water spring are needed. The stock of furniture and working materials is adequate, but the latter are rather negligently arranged. The school records are fairly well kept. 2. The attendance is low and irregular ; and the discipline is less firm, vigilant, and effective than it was formerly. The schoolroom is not kept sufficiently neat and clean. The moral tone is tolerably satisfactory. 3. The usual subjects are taught with tolerable intelligence, but with lack of zenl, painstaking, and vigour. The occupation is fairly well regulated, and the attainments range from moderate to fair.

Sfyen Oaks, P. (V.) :-Regular inspection, 29th Marel, 1871.
Numbers at the oxamination:--Moys, 16 ; girls, 21; total, 37.

1. The material condition is fuir, and the supply of school requisites is adequate. The school rocords are kept with passable neatness and necuracy. 2. The attendance is rather low, irregular, and unpunctual. The pupils are tolerably orderly, well-behnved, and self-reliant, but not sufficiently tidy, unpunctual. The pupis are tolerabiy orderly, weli-behaved, and self-rena and clean. The echool work necds an infusion of more vigour and'vivacity. The moral tone is passable. 3. The usual subjects arc taught, except singing and sewing, and the occupation is tolcrably well regulated. The teaching is carnest, and moderately intelligent and cffective. The mental culture and attainments of the pupils are barely passable.

Smme's Flat, P.s(N.V.) :-Regular inspection, 19 and 20th December, 1871.
Numbers at the examination:-Boys, 16 ; girle, 15; total, 31.

1. Bell, lavatory, weathershed, aind supply of water are needed; otherwise the material organization is fair, and the supply of appliances is adequate and tolerably well arranged. 2. The attendance is below the minimum, but is fairly regular and punctual. The pupils are clean, docile, and well bebaved; the schoolroom is tolerably tidy, and the government is healthy and firm ; but the school work requires to be done with improred rigour and precision. Tho moral tone is fair. 3. The usual subjects are thught except singing. Tho oecupation is fuirly well regulated, and the teaching is fairly intelligont and puiustaking. The attainments are tolerable.

Southgate, P. (V.) :-Ordinary ingjection, 9th Jane, 1871. Regular inspection, 13th Docember, 1871. Numbers at the examination :-Boys, 14 ; girls, 18 ; total, 32.

1. The school buildinge need painting and repairing, and providing with guttering and water tanks; otherwise the material organization is good. The school records are kept with improved accurncy. 2. The attendance is rather low and irregular. The government is strict, vigilant, and very fairly effective. As regards the appearance and conduct of the pupils, the aspect of the schoolroom, and the character of the school work, the moral condition is very fair and improved. 3. The usual subjects are taught with fair ekill and improved rigour and painstaking. The occupation is intelligently regulated, and the attainments renge from moderate to good.

Strontlan Park, P. (N.V.) :-Incidental inspection, 21st December, 1871.
Numbers of pupils present:-Boys, 8 ; girls, 12 ; total, 20.

1. The schooihouse is old, ill-shaped, and unsuitable. Bell, lavatory, and supply of water are needed. The furniture, though tolerably suitable, is ill arranged, and the stock of working materinls is moderatc. The sehool records are in fair condition. 2. The attendance is low and irregular. The discipline appears healthy and fairly effective. The pupils are quiet, docile, clean, and well-behaved, but possessed of only moderate mental culture, 3 . The usual subjects appear to be taught, and the occupation is regulated by a lime-table, but by no Programmes of Icessons. The school work is done with only moderate vivacity and vigour.

Summeriand, P. (V.) :-Regular inspection, 29th and 30th March, 1871.
Numbers at the cxamination:-Boys, 23 ; girls, 22 ; total, 45.

1. The site is liable to floods. Bell, lavatory, supply of water, repairs to buildings, and additional desks are needed; otherwise the organization is fair. The school records are not kept wilh roliable accuracy. 2. The attendance has increased, and appears to be tolerably regular aud punctual. The accuracy, behaviour, but the discipline of the third class is not yot strict enough. The school work is done with fair order, but insufficient rigour and diligence. The moral tone is passable. 3. The prescribed subjects fare taught with earmestness and tolerable ekill, but examinations should be more frequent. The occupaare taught with earncstness and tolerable skill, but oxaminations should
tion is regulated with fair intelligence, and the attainments range from moderate to fair.

Swan Creek, P. (V.) :-Ordinary inspection, 8th Junc, 1871. Regular inspection, 12th December, 1871. Numbers at the examination :-Boys, 20 ; girls, 20 ; total, 40 .

1. The material organization is, on the whole, satisfactory, and the supply of apparatus is rensonably adequate. The playgroum needs draining, and the well a pump. The echool recorcls are nent and clean, but not strictly accurate. 2. The attendance is reasomably punctual and tolcrably regular; the pupils are clean, orderly, and well-behaved; and the school work is done with quiet order and diligence, but lack of animation. The moral tone is very fair. 3. The usual subjects are taught, and the diligence, but lack or amimation. The moral tone is occupation is well regulated, but the classification is defective. The teaching is earnest and pamstaking, but the methods are rather too mechanical, and are not applied with sufficient enthusinem. The attainments range from moderate to gond.

Tamwortw, P. (V.) :--Regular inepection, 28th and 29th August, 1871.
Numbers at the examination :-Boys, 27 ; girls, 27 ; iotal, 54 .
1 Repairs to well and to roofs of buildings are needed. The schoolroom is too narrow, and a class. room is required. The stock of working materials is ample and well arranged. The organization is fair, and the school records appear to be well kept. 2. The attendance is punctual and tolerably regular. The and ine are personally clean and decent, well-behared, und fairly orderiy, but deficient in mental vigour pupils are personally clean and decent, won-behared, and the echool work is done with fair order and and nnmation. The schoolroom is very neat and clean, and the school work is done with fair order and
efficiency.
efficiency. The moral tone is fair and prowising. 3. The ueval subjects are tanght, and good progress has been made in singing. The occupation is well regulated, but the classification is rather defective. The teaching is zealous, painstaking, and fairly intelligent. The interest manifested by the teacher's wife is deserving of special mention. The attainments are moderate, but the present teacher is not responsible for so low a standard.

Tientrafield, P. (V.) :-Regular inspection, 2nd and 3rd November, 1871.
Numbers at the examination :-Boys, 70 ; girls, 59 ; total, 129.

1. Laratories are necded, otherwise the material organization is goorl. The school recordsare apparently well kept. 2. The attendance has considerably increased, and is tolerably regular. The government is strict and rigilant, but rather harsh. The pupils arc orderly, docile, woll behaved, neat, clean, and very fairly diligent and self-relinat. The moral tone is very fair. 3. The usual subjects are laught, inclusive of algebra. The occupation is well regulated; and the teaching is in general animated, diligent, and fuirly effective. Examintions are not frequent enough. The attainments rango from moderate to good.

Uwmaria, P. (V.) :--Regular inspection, 14th and 15th Decomber, 1871.
Numbers at the examination :-Boys, 20 ; girls, 21 ; total, 41.

1. Substantial repairs and additions have been made to the property, and the supply of appliances is ndequate. Lavatories are necded. The organization is in general good, and the school records are kept with apparent accuracy and regularity. 2. The attendance is fairly regular and punctual. The pupils are clean, cheerful, docile, and well behared, attentive, und very fairly diligent. The schoolroom is neut and clean, and the school work is done with commendable diligence and quictness. The playground needs stricter supervision. The moral tone in gencral is very fair. 3. The usual subjects nre taught, excluding sewing, but including Latin und geometry. The teaching is diligent, painstaking, and fairly effective ; and the occupation is appropriatcly reguiated. The attainments range from moderate to good.

Uralla, P. (V.) :-Regular inspection, 18th May, 1871. Incidental inspection, 22nd August, 1871. Numbers at the examination:-Boys, 26 ; girls, 23 ; total, 49.

1. The material organization is good, the stock of matcrial appliances is adequate, and the gencral aspect of the whole property is pleasing. 2. The attiendance has increased, and is tolerably regular and rensonably punctual. The gorcrnment is healthy and effectivo; the pupils are neat and clean, orderly, docile, and well behared ; and the school work is done with pleasing energy and painstaking. The moral tone is good. 3. The usual subjects are taught with zeal, painstaking, and fair efliciency ; and the occupation is judiciously regulated. The attaimments rauge from tolerable to very fair.

Vrolet Daik, P. (V.) :-Regular inspection, 5th May, 1871.
Numbers at the cxamination:-Boys, 14; girls, 7; total, 21.

1. The schoolhouse and residence need painting and other repairs, and bell, havatory, and water are nheo required. An adequate supply of furniture and apparatus is provided, and the seliool records are pretty well kept. The organization is fair. 2. The attendance is low and irregular, and tho discijline is improved, promising, and fair. 3. The usual suhjects are taught with earnestness, painstaking, and tolerable snd promising skill; and the occupation is suitably regulated. The attainments range from indifferent to fair.

Walcha P. (V.) :--Regular inspection, 28th February, 1871.
Numbers at the examination :-Boys, 19 ; girls, 15 ; total, 34.

1. The material organization is fair, but the schoolroom, residence, and garden are rather negligently kept. The supply of school requisites is sufficient, but the school records are not kept with relinbic accuracy. 2. The attendaneo is comparatively low and irregular. The discipline is fair and improved. 3. The prescribed subjects are taught with fair energy and skill, but inadequate painstaking; and the occupation is regulated with fair judgment. More attention should be given to examinations aud recapitulation of lessons. The attainments are passable.

Walmabadai, P. (V.) :-Regular inspection, 4th and Eth September, 1871.
Numbers at the examination :-Boys, 29 ; girls, 20; total, 49.

1. The schoolroom is too emall for the attendance, the plarground is unfenced, and bell, larators, and additional out-office are needed. The school is fairly well found in furniture and working materials. The organization is fair. 2. The ittendance is increased, fairly regular and punctual. The pupils are reasonably neat und clean, tolerably diligent and self-reliant. The school work is performed with tolerable regularity and energy. The moral tone is tolerable. 3. The usual subjects are taught, the clnssification is defective, the occupation is not regulated with the requisito efficiency, and tho methods of instruction are too mechanical. The attainments and mental culture of the pupils are moderate.

Warialda, P. (V.) :-Regular inspection, and Octoler, 1871.
Numbers at the examination:-Boys, 11 ; girls, 8 ; total, 19.

1. Repairs to the schoolhouse, toacher's residence, and out-offices are needed. There is neither bell, lavatory, nor supply of water, and the stock of working materials is rather low. The school records are unatisfactory. The organization is barcly passable. 2. The aitendance is low, and moderately regular. The pupils are neat and clean, docile and well behaved, tolerably diligent, but only moderately well regulated in their movements. The school work is performed with moderate regularity. The moral tonc is passable. 3. The course of instruction is elementary, and is not properly regulated. The classification is rappropriate, and the teaching, though earnest and painstaking, is empirical and moderately effective. The attainments are low.

Wauchope, P. (N.V.) :-Regular inspection, 9th Mareh, 1871.
Numbers at the examination :-Boys, 16 ; girls, 12 ; total, 28.

1. The organization is defective as regneds the character of the school buildings and furniture, and the absence of bell, lavatory, and out-offices. The supply of working materials and appnatus is sufficient, but carelessly arranged. The school records are tolerably well kept. 2. The attondance is low and tolorably regular, but unpunctunl. The pupils are reasonably neat and clean, but only moderately diligent, orderly, and self-veliant. The schoolroom is rather dirty and untidy, and tho sehool work is done with
only moderate energy, quictness, and regularity. The moral tone is moderate and unimproved. 3. Tho instruction is clementary, the classification is defectire, the lesson documents are not strictly followed, and the teaching is not only mechanical, but wanting in euergy, painstaking, animation, and diligence. The attainments range from small to moderate.

Woodford Vale, P. (V.) :-Regular inspection, 12th July, 1871. Incidental inspection, 21st November, 1871.

Numbers at the examination :-Boys, 15; ginls, 9 ; totul, 24.

1. The buildings need painting and guttering. The property is kept with but moderate noatness and carc. The supply of working materials is fair, but not nicely arranged. The school records are not lept with reliable accuracy. The materinl organization is on the whole good. 2. The attendauce is low and irregular. The pupils in gencral are fairly neat, cloan, and well bebared; and the school-work is done with quietness and fair vigour, but with lack of precision and regularity. The aspect of the solhool and the class-room is unsatisfactory. The moral tone is passable and detcriorated. 3. The usund subjects aro taught with intelligence, fair diligonce, and painstaking, but insufficient vigour. The work of the first class requires closer supervision. The attaimments range from indifferent to fait.

Woodfond Lergh, P. (V.) :-Ordinary inspection, 11th July, 1871. Regular inspection, 30th November, 1871.

Numbers at the examination:-Boys, 22 ; girls, 30 ; total, 52.

1. The materinl organization is good, the supply of appliauces adequate, and the condition of the school records fairly satisfactory. 2. The attendauce is well maintained and fairly regular. The pupils are reasonably neat and clean, under good control, earnest, diligent, and attentivc, but diffident and awkward. The disciplino is on the whole very fuir. 3. The ustual suljects are taught except singing The lesson documents are framed with fair skill, but are not regularly observed. The tenching is carnest and painstaking, and fairly skilful in the clementary subjects. Stricter attiention to oral iustruction and examinations, and to geography, grammar, and object lessons is needed. The attainments range from small to good.

Wxratiath, P. (N.V.) :-Regular inepection, 10th November, 1871. Orilinary inspection, 28th June, 1871. Numbers at the examination:-Boys, 18 ; girls, 16 ; total, 34.

1. The site, size, and structure of the school-house are unsuitable, as also the playground and outofice. Bell, lavatory, and supply of water, are noeded. There is a fair supply of working materials, but the furniture is inadequate and inferior. The school records aro not kept with sufficient accuracy. The organization is unsatisfactory. 2. The attendance is tolerably regular and punctual. The pupils are fairly neat, clean, orderiy, und well behaved, with the csception of the younger oncs, who are too restless and inattentive. Considering material drawbacks, the discipline is fairly clifctive. 3. Tho usual aubjecte are taught except drawing, but the printed instructional documents are not strictly observed. The occupation is tolcrably well regulated, and the teaching is earnest and tolerably intelligent. The attainment range from moderate to fair.

## Summary of Reports upon Provisional Schools inspected in $18 \%$

Astrord Prov. (N.V.) :-Rcgular inspection, 30th October, 1871.
Numbers at the examination:-Boys, 6; girls, 8 ; total, 14.

1. The school-house is a commodious slab structure, defectively lighted and ventilated, and in need of repairs. The playground is still without fence, lavatory, bell, water, and out-offices. The furuiture is defective in quantity, quality, and arrangement, and the working materials moderatc in supply. The bchoolroom has a bare appearance, and the school records are moderately well kept. 2. The attendance is low, irregular, and unpunctual ; and the digcipline is very lax, unintelligent, and incfective. 3. The course of instruction is very elementary, the occupation of the pupils badily regulated, and the teaching very mechanical, though tolerably earnest and diligent. The attainments are small.

Breshgroye Pror. (N.V.) :-Regular inspection, 14th July, 18 h1.
Numbers at the examination :--Boys, 8 ; girls, 7 ; total, 15 .

1. The material organization is passable as regards the character of the building and furniturc. The playground is not fenced in ; and there is no bell, lavatory, or supply of water. The supply of working raaterials is reasonably sufficient. The school records are neat and clean, but otherwise unsatisfactory. 2. The attendanec is companatively low, irregular, and unpunctaal. Tho pupils are clean, fairly orderly and well-behared, but lack viracity and rigour in their work. The school worl is performed with moderate regularity and cfficiency. The moral tone is retrogressive. 3. The usual subjects are taught exeept singing. Thero are no Programmes of Lessons. The revister of lessons is almost useless, nud the Time table is not atrictly observed. The teaching is empirical, and the attainments rango from indiferent to fair.

Capionl, Prov. (N.V.):-Regulur inspection, 15̌th Septomber, 1871.
Numbers at the examination :--13oys, 10; girls, 9 ; totnl, 19.

1. The schoolhouse is suitablo in size and atracture, but requires additional furniturc. Fence to playground, on additional out-ofice, a bell, lavatory, and supply of water are needecl. The supply of material school appliances is passable. The school records aro not kept with the requisito efficiency. 2. The attendance is fairly satisfactory. The pupils are tolerably neat and clean, tolerably diligent and kelfreliant ; the schoolroom is rather untidy; and the school worls is done with reasonable quietncss, but with only moderate energy and regularity. The moral tone is passable. 3. The course of instruction is elementary; the occupation is moderately well regulated, and time texehing, though enrnest and diligent, is mechanical, aud moderately animated and eflective. The attainments range from small to fair.

South Casino, Prov. (N.V.) :-Regular inspection, 22 nd June, 1871; incidontal inspection,
18 hh November, 1871.
Numbers at the examination :-Roys, 16; girls, 12; total, 28.

1. The scloolbouse is a slab structure, defective in desigu, height, ventilation, and lighting. The furniture is defectivo in quality and arraggenent. The supply of echool requisites is adequate, and in very fair condition. Tho condition of the echool records is unsatisfactory. Bell, lavatory, water-tank, and outoffices are needed. Tlis organization is moderate. 2. The attenlance is tolerably satisfactory. The pupils are reasonably neat and clean, docile, and weil-behaved, under good control, and quiet and diligent at their
work. The school work is performed with apparent quictnoss and diligence, and passable precision. The moral tone is fair and promising. 3. The course of inatruction is elementary, and defectively regulated. The cinssification is imappropriate, and the methods are mechanical and but moderately effective. The nttainments range from moderato to fair.

Cockbunn Rever, Prov. (N.V.) :-Regular inspectiou, 2 üth August, 1871.
Numbers at the cxamination :-Boys, 8 ; girls, 11 ; total, 19.

1. The schoolhouso is well constructed, but the schoolroom is rather small. The playground is unfenced, and without out-ofices, lavatory, bell, and water supply. The furniture is fuiv in quantity and quality, but defectively arranged. The supply of books, maps, de., is adequate for the present. The school records are not satisfactory as regards accuracy and regularity of kceping. 2. The attendance is moderatoly regular, and the discipline is tolerably effective. 3. The usual subjects are taught except sewing, but the occupation is only moderately well regulated. The teaching is earnest, but mechunical and moderately effective. The attainments range from fuilure to fuir.

Coldgtneam, Prov. (V.) :-Regulur ingpection, 1äth December, 1871.
Numbers at the cxamination:-Bors, 12; girls, 8 ; total, 20.

1. The material condition is fair, the schoolroom conarred, and a small residence for the teacher crected. Additional furniture, bell, lavatory, and wator-tanik are needed; the organization is otherwise fair, and tho school records appear to be well kept. 2. The attendance is rather low and irregular. The pupils are clean, but rather untidy in their persong. Tho discipline is healthy, and fuirly effective as regards the maintenance of quietness, order, and diligence. The moral tono is fair and promising. 3. The usual subjects are tanght except sewing, and the occupation is well regulated. The teaching is carnest, painstaking, and tolerably intelligent. The attaiments range from moderate to tery fair.

Comari, Prov. (V.):-Regular inspection, 17th November, 18i1; incidental inspection, 29th June, 1871.

Numbers at the examination:-Boys, 15 ; girls, 23; total, 38.

1. The schoolhonse has been repaired and teacher's residence crected ; the material organization is in other respects very fair, and the school records are in general satisfactory. 2. The attendance is increased, fairly regular and punctual. The pupils are clean, docile, and woll behaved, fairly ordorly, diligent, and sclf-reliant; and the school routine is performed with creditable order and quietness, and otherwise fair efficioncy. The moral tone is healthy, fair, and pronising. 3. The prescribed course of instruction is followed, and regulated with fair skill. The teaching is zealous aud painstaking, tolernbly intelligent and improved. The attainments range from moderate to vory fair.

## Dondingariono, Prov. (N.F.) :-Regular inspection, 27th Mareh, 1871

$$
\text { Numbers at the examination:-Boys, } 7 \text {; girls, } 10 \text {; total, } 17 .
$$

1. The schoolhonse is airy, well lighted, and of fair size; the playground is now fenced in, buti boll, hevatory, out-offices, and water-tank, are still needed. The furniture is unsuitable in design and arrangement. There is a rensonable supply of working materials, and the school records appear to be well kept. 2. The attendance is low, irregular, and moderately punctual. The discipline is sound; very fair order is maintnined, and the pupils are clean, cheerful, docile, and well behaved. The schoolroom is tidily kept, and the moral tone is creditable. 3. The usual subjects, excluding singing, are taught with quict energy, painstaking, and tolerable and improved skill, and the occupation is pretty well regulated. The attainments range from moderate to good.

Fernbani, Pror. (N.V.) :-Regular inspection, 14th March, 1871.
Numbers at the cxamination:-Boys, 9 ; girls, 10 ; total, 19.

1. The cite is central, but otherrise unsuitable. The sehoolhouse is commodious, well lighted, but ill rentilated; and the supply of furniture is fairly adequate, but of unsuitable design. There is a fair supply of working materials, and the school records appear to be well leepl. A supply of water is greatly necded, as also bell, clock, and lavatory; otherwise the organization is passable. 2. The attendance is fairly regular and punctual. The govermment is healthy; the school work is perfonned with fair activity and rogularity; the pupils are reasonably clean and decent in appearance, allentive and fairly self-reliant, but awkward in thcir deportwent. The moral tone is fair and promising. 3. The usual subjects, excludiug singing, sowing, and drawing, are taught with ploasing zeal and tolerable intelligence, and the occupation is tolerably well regulated. The attainments range from moderate to tolerable.

Fennmount, Prov. (N.V.)
This sehool was not cstablished when I risited the district

Groovoo Goonoo, Prov. (N.T.)
This school was closed mhen I visited the district.
Finstucky, Prov. (N.V.) :-Regular inspection, 23rd Augusi, 1.871.
Numbers at tho examination :-Boys, 10 ; girls, 14 ; total, 24 .

1. A residence hats been provided; butb bell, havatory, out-ofices, and supply of water are still neederl. The supply of furniture and workiug materials is reasounbly sufficiont, and the organization is reasonably passable. The school records are not kept with strict aecuracy. 2. The attendance is irregular and unpunctual, otherwise the discipline is healthy and fitirly effectivo. 3. Tho weul subjects are taught oxcept eowing, but that of singing is a failure. The teaching is carneet, diligent, and tolerably shilful, and the occupation is fairly well regulated. The attainments range from failure to very fair.

Lammance, Prov. (N.V.) :-Ordianry inspection, 11th July, 187J. Regular inspection, lst December, 1871. Numbers at the examination :-Boys, 11 ; girls, 5 ; total, 16.

1. Whe schoolroom is commodious and suitable enough, but neels repairs. The supply of furniture, apparatus, and school requisites is rensomably adequate; but bell, lavatory, supply of water, fenco to plny ground, and suitable out-ofices are required. The organization in general is moderate. The school record are not lept with strict iccuracy, 2. The ettendance is comparatively low and irregular. The discipline
is healthy and firm, but requires to be more vigilant and exact in dotails. The moral tone is fair. 3. The usual subjects, exclusire of singing and sewing, are taught with earnestness, quiet encrgy, and tolorable skill, and the occupation is woll regulated. The attainments range from small to very fair.

## Nowendoc, Prov. (N.V.) :-Regular inspection, 2nd March, 1871. <br> Numbers at the cramination :-Boys, 11 ; girls, 5; total, 16.

1. The schoolhouse is suitable, and the sapply of furniture tolerably adequate; but there is noithor bell, lavatory, playground, nor out-office. The supply of school requisites is moderate. The school records are neat, clean, and apparently correct. The attendanco is low, but reasonably regular and punctual. The government is firm and judicious, and the pupils are clean, decently attired, docile, and well-behaved, and improved in viracity and self-reliance. The moral tone is very fuir. 3. The prescribed subjecte, exclusive of singing, sewing, and drawing, are taught with great energy, diligence, and improved akill. The occupation is tolerably well regulated, and the attainments rauge from moderate to fair.

Redbank, Prov. (N.V.) :-Regular inspection, 8th March, 1871.
Numbers at the cxamination:-Boys, 14; girls, 9 ; total, 23.

1. The material condition has beon improved. The supply of furniture is passable, but defective in quality. The supply of school requisites is moderate. The school recorls are fairly well kept. Bell, lavatory, snitable out-offices, and supply of water aro needod; otherwise the organization is passable. 2. The attendance is fairly regular, but rather unpunctual. The pupils are clean and fairly tidy in appearance, and their general demeanour is fairly satisfactory. The moral tone is in generul improved and fair. 3. The prescribed subjects are taught, except sewing and Scripture Lessous. The teaching is curnest and tolerably intelligent, and improved in vigour. The occupation is tolerably well regulated, and the attainments range from moderate to fair.

Ramornie, Prov. (N.V.) :-Incidental inspection, 19th December, 1871.
This school was not in operation at the time of my visit. A spacious, well-lighted and rentilated schoolroom is provided, mith a fair supply of furniture and apparatus; but bell, lavatory, out-offices, and supply of water are greatly needed. The school records are not properly kept.

## Robe Mill, Prov. (N.V.) :-Ordiuary inspection, 23rd June, 1871. <br> Numbers prescnt:-Boys, 11; girle, 11; tatul, 22.

1. The schoolhouse is too small, ill-conditioned, and unsuitable. The organization is in other respects passable, but the furniture and apparatus are very negligently lept. Tho school records are not satisfactory. 2. The attendance is comparatively low, irregular, and unpunctual. The pupils are tolerably neat and clean, but the schoolroom is disgracefully dirly and untidy. Whe Couvcil's Regulations in general are disregarded, and the work of the echool is conducted with small regard to quietness, order, and punctuality. The government is feeble, and the moral tone unsatisfactory. 3. The preseribed subjects are professedly taught, except singing and seving; but there are no Programmes of Lessons; the Time-table is dirty, unhung, and ill observed; the classification is defective, and the occupation is indifferently well regulated. The teaching is but moderately skilful, diligent, and painstaking. The pupils manifest emal progress.

Sangeox, Prov. (N.V.):-Regular inspection, 15th March, 1871.
Numbers at the examination:-Boys, 12 ; girls, 7; total, 19.

1. The site is central, but liable to floods. Tho schoolhouse is $\Omega$ slab structure, of fair design and size. Bookpress and hatpegs are needed; and also bell, laratory, out-offices, and supply of water. Tho organization is moderate. The school records are kept with improved efficiency. 2. The attendance is low, but fairly regular. The govemment is modorately efficient, being deficient in tact, firmness, and vigiInnce. The pupils are tolerably clean, but untidy, moderately orderly, diligent, animated, and self-reliant. The schoolroom is untidy, and the school work is done in too desultory a manncr. The moral tone is moderate. 3. The course of instruction is elementary, the classification dofective, and the occupation defectively regulated, there being no Programmes of Lessons, and the Time-table very incomplete. The teaching is apparently carnest, but wanting in viracity, energy, and ekill. The attainments and mental culture of the pupils are very moderate.

## Satmarez Ponds, Prov. (N.F.) :-Regular inspection, 11th May, 1871

Numbers at the examination:-Boys, 10 ; girls, 7 ; total, 17

1. The schoolhouse is a rough slab structure, the schoolroom is too small, and the furniture of rough design. The supply of working materials is modcrate. The school records are unsatisfactory. The organization is moderate. 2. The attendance is of doubtful regularity. The pupils aro fairly neat and clean, orderly, and well behared, but wanting in vigour, self-reliance, and animation. The sehool work is performed with passable regularity. Stricter attontion to details of discipline is needed. The moral tone is passable. 3. The course of instruction is clementary. The occupation is defectively regulated, and the teaching, though earnest and painstaking, is mechanical and wanting in vigour. The attainments are moderate.

Sherwoov, Prov. (N.V.) :-Regular inspection, 28th March, 1871.
Numbers at the cxamination :-Boys, 12 ; girls, 12; total, 24.

1. A new, and centrally situated, and suitable school room has been provided. The supply of furniture and working materiuls is tolerably sufficiont. The organization is passable. 2. The attendance is fairly regular. The pupils are reasonably neat and clenn, docile and well bebuved, and fairly diligent orderly, and self-reliant. The details of discipline require more attention, othervise the moral tone is fuir 3. The prescribed subjocts are taught, except singing and sewing; and the occupation is tolernbly well regulated. The teaching is earnest and apparently diligout, but rather mechnaical. Greater prominence requires to be given to oral teaching. The attainments range from small to fuir.

South Arar, Prov. (N.V.) :-Regular inspection, 23rd November, 18 h1.
Numbers at the oxamination :--Boys, 16 ; girls, 11 ; total, 27.

1. The material organization is fair, but the school records are not satisfactorily kept. 2. The attendance is tolerably regular. The government is rather lax, and the school work is done in too desultory a manner. The pupils are tolerably ncat and clean, and well behaved, but only moderately orderly
orderly and self-reliant. The reading books require to be more carefully preserved. The moral tone is in gencrol moderate. 3. The course of instruction is elomentary, and the oceupation is defectively ragulated The teaching is mechanical, and wanting in vigour. The attainments range from failure to tolerable.

## Lower Southgatr, Prov. (N.F.) :-Regular inspection, 13th July, 1871. Incidental inspection, 21st November, 1871

Numbers at the examination :-Boys, 13 ; girls, 1.6 ; total, 29.

1. The site is central, and the schoolhouse suitable; but the furniture is defective in quantity, quality, and arrangement. The supply of working materials is reasonably sufficient, but carelessly kept. Fenco to playground, bell, lavatory, out-offices, and supply of water aro needed. The school records arc negligently kept. 2. The attendance is irregular, and the discipline lax and moderntely effective. The pupils are tolerably clean and decent, but only moderately orderly, diligent, and self-reliant. Tho school work is performed in a desultory manner, and with lack of spirit and vigour. The moral tone is moderate. 3. The course of instruction is elementary, and the occupation ill regulatod, there being no lesson documents or rocords. The teaching is mechanical and feeble. The attainments are indifferent.

Taloumebi, Prov. (V.) :-Incidental inspection, 30th November, 1871.
Ihis school was not in operation when I visitod the district. The schoolhouso is centrally situnted and fisirly suitable, and the supply of furniture and school requisites is passable. Bell, lavatory, out oflices, fence to playground, and supply of water are needed.

## Turner's Flat, Prov. (N.V.)

This school was not visited for want of opportunity.

Tynedale, Prov. (N.V.) :-Regular inspection, 23rd Norember, 1871.
Numbers at the examination :-Boys, 8 ; girls, 12 ; total, 20.

1. The schoolhouse is a new, unfinished, slab building, tolerably well situnted und suitable. The furniture is defective in quality, quantity, and arrangement. The supply of school requisites is adequate for the present, but carelessly arranged. Bell, lavatory, playground, and an additional out-office are required. The organization is moderate. 2. The attendance is irregular; the government is too lax ; the schoolroom is untidy; the pupils are but moderately diligent, orderly, and self-reliant; and the school work is done in an irregular manner. The moral tone is not satisfactory. 3. The course of inatruction is rather clementary, and is not regulated by Time-lable or Programmes of Lessons. The teaching is mechanical, moderately cffcctive, and wanting in vigour. The attainments range from small to fair.

Wardecr, Prov. (N.V.) :-Regular inspection, 15th Norember, 1871.
Numbers at the examination:-Boys, 18; girls, 9 ; total, 21.

1. The schoolhouse is suitable, but the supply of furniture is inadequate, clock, bookpress, and additional desks being required. Fenco to playground, bell, lavatory, supply of wator, and out-oflces are needed. The supply of school requisites is passable, and the school records are kept with care and apparent regularity. The organization is moderatc. 2. The attendance is low and irregular and unpunctual. The pupils are tolerably neat, clean, and well behaved, but only moderately diligent, animated, and self-reliant. The school work requires to be done with greater vigour and precision. The moral tone is moderato and unimproved. 3. The course of instruction is elementary, and is not properly regulated. The teaching is only moderately intelligent, vigorous, and cffective. Tho attainments range from smail to tolerable.

Wee Wai, Prov. (N.V.) :-Regular inepection, 25th September, 1871.
Numbors at the examination :-Boys, 11; girle, 5 ; total, 16.

1. The material organization is in general fair, and the supply of working materials is passablo The school records are kept with moderate efficiency. 2. The attendance is pretty regular and punctual The pupils are reasonably neat and clean, but only moderately animated, thoughtful, and solf-reliant. The school work is performed with moderate order and vigour. The mornl tone is modernte. 3. The usual subjects are taught with carnestness, but only moderute energy and intelligence. The oceupation is moderately well regulatod, and the attainments range from indifferent to fair.

Woodburx, Prov. (N.V.) :-Regular inspection, 16th November, 1871. Ordinary inspection, 30th June, 1871.

Numbers at the examination:-Boys, 3 ; girrs, 8 ; total, 11.

1. The schoolhonso is of suitable size and structure, and the supply of furniture and working materials is ndequate for the present. There is neither bell, lavatory, out-office, supply of water, nor fence to playground. The echool records aro fairly well kept. The attendauce is low and irregular ; the discipline is healdhy and firm; the pupils are reasonably neat and clean, fairly self-reliant, and active. The school operations are performed with fair efficiency. Stricter attention to details of managenent is required. The moral tone is fair. 3. The usual subjects are taught except sowing, and tho occupation is tolerably woll regulated. The teaching is marked by carnestness and cnergy, and tolerable intelligenco. The attaimments range from moderate to fair.

Woodyord Park, Prov. (N.V.) :-Regular inepection, 241/h November, 1871. Incidontal inspection, 12th June, 1871.
Numbors at the cxamination:-Boys, 9 ; girls, 19; total, 28.

1. The material condition is improved and passable. There is a fair supply of furniture and working materinls, and the school records are kept very fairly. 2. The attendauce bas increased, and is fairly regular; and the government is mild, firm, and very fairly effective. The pupils are cloan and under good control, but are wanting in animation and sell-reliance. Tho moral tone in general is fair. 3. Tho nenal subjects, exclusive of ainging and sewing, are taught with quiet energy, painstaking, and tolerable skill, and the occupation is fairly well regulated. The attainments range from small to fuir.

Harwoon Isman, Prof. (N.Y.) :-Incidental inspection, 30th November, 1871.

1. A suitable schoolhouse is provided, but the schoolroom is too small, owing to the presence of a partition. A suitable supply of furniture is boing made, but no working materinls had been supplied at the date of my risit. The playground is unfenced, ond the out-ofices are indifferent.

Sumary of Reports upou Half-time Schools inspected in 1871.

$$
\text { Beechwood, H.T. (N.V.) :-Regular inspection, 8th March, } 1871 .
$$

Numbers at the examination :-Boys, 6 ; girls, 6 ; total, 12.

1. The seloolhouse is new, suitable, and central, and the supply of furniture and working materinls is tolerably adequate. Bell, lavatory, out-offices, supply of water, and feneo to playground are not provided. The school rocords are kept with care and apparent regularity. 2. The attendance is toleribly regular, and the goremment is mild and very fairly eflective. The pupils are reasouably neat and clean, docile and well-beluved, but rether wanting in animation and rigour. The selool arramgements are very fair. 3. The usual subjects are taught, except singing and seving; the occupation is properly regulated, and the teacling is tolerably skilful aud rigorous. The attainments range from small to tolerable.

## Hontingnon, M.T. (N.V.):-Regular inspection, 7th March, 1871.

Numbers at the examination:-Boys, 8 ; girls, 7; total, 15.

1. The material condition and situation of the schoolhouse are not satisfactory. Additional desks and liat-pegs, bell, laratory, water-tank, and out-offices are needed. The stock of working materials is fainly adequate. The school records are kept with care and apparent regularity. 2. The attendance is increased and rensonably regular, The pupils are clcun, orterly, and well-beluved; the schoolroom ie tidily kept,
 and the diacipline is mild, strict, and very fairly eifective. 3. The usual subjects, exclusive of singing
and sewing, are taught with tolerable ekill and rigour, and the occupation is approprintely regulated. The attainments range from moderate to fair.

Stete King's Plans, H.T. (N.V.) :-Regular inspection, 17th November, 1871.
Numbers at the examination:-Boys, 4 ; girls, 4 ; total, 8 .

1. The schoolhouse is pleasantily but not centrally situated, and is large cnough, but defectively jighted and ventilated. The supply of working materials is passable, and that of furniture consists only of two forms and two desks. Fence to playground, out-offices, and supply of water, are not provided. The school records are not kept with proper necuracy. 2. The attendance is low, but reasonably regular. The pupils are clean and tidy, docile and well-behared, but low in mental culture. The schoolroom is rather untidy and the school work requires to be done with incrensed vigour and animation. Tho mom rather untidy, and the school work requirss to be done with incrensed
tone is passable. 3. The prescribed course of instruction is followed, the occupation is tolerably well tone is passable. 3. The prescribed course of instruction is followed, the occupition is the araltainments are morlerate, but progrossive.

Troki Tecki, H.T. (N.V.):-Regular inspection, 29th June, 1871.
Numbers at the examination:--Boys, 3; girls, 7; total, 10.

1. The organization is reasonably satisfactory, as regards the character of the school site, furniture, and working materials. The school-house is defectirely lighted and rentilated, but is otherwise suitable Bell, laratory, out-offices, supply of water, and fence to playground are not prorided. The school recorils are apparently well kept. 2. The attendance is low, but fairly regular. The aspect of the pupils and the schoolroom is creditable, and the school work is performed with quietness and seeming regularity. The discipline is mild and strict, but wanting in vigour. 3. The prescribed course of instruction is observed and tolerably well regulated. The teaching is empirical, but carnest and promising. The attainments, though moderate, are reasonably satisfactory.

## BATHURST DISTRICT.

Insmector's General Report on Schools for the year 1871.
At the close of the previous yen (1870) the returns from the various schools in operation during the quarter ending Decenber gave the following numbers as enrolled and in average attendance for that quarter.

| Public Schools | Roll | 4,131 | Average | 2,755.02 |
| :---: | :---: | :---: | :---: | :---: |
| Provisional Schools | " | 626 | ", | 401.76 |
| $\mathrm{Hall}^{\text {a }}$-time Schools.. | " | 53 | " | $28 \cdot 9$ |
| Church of England Schools | , | 626 | " | $402 \cdot 66$ |
| Roman Catiolic Schools ..... | " | 899. | " | $592 \cdot 69$ |
| Presbyterian School | " | 154 | " | 1209 |
| Totals |  | 6,489 | " | 4,301-93 |

For the corresponding quarter of 1.871 , the returns furnished supply the following information as to the eurolment and attendance :-

| Public Schools | Roll | 1,517 | Aternge | 3,07938 |
| :---: | :---: | :---: | :---: | :---: |
| Provisional Schools ...................................... | " | 673 | " | 451.66 |
| Half-time Schools......................................... | : | 74. | " | $27 \cdot 21$ |
| Church of England Schools ......................... | " | 633 | " | 4.26 .01 |
| Roman Catholic Schools.............................. | ," | 903 | " | 626.83 |
| Presbyterian School ................................... | \% | 153 | " | 1195 |
| J'otals | " | 6,953 | " | 4,730.59 |

From the preceding statements it will be reen that, with one very slight exeeption, the mumbers enrolled in all the schools have increased, the greatest increase (386) being in conncetion with Publie Schools, while that of Provisional and Half-time Schools has been 68, and that of Denominational Sechools 10. On calculation, it will also be found that the average attendance for the period in question of 1870 was 66 per cent. of the numbers enrolled, while that for 3871 was 68 per cent.

The areas of work and the composition of the Genernl Report for 1870 having occupied the first two months of the year, it was not until March that the netual inspectoral duties of the year began, ibe first school visited having been examined on the 9 th of that month.

On the lst of January, 1872, the following schools were on the list of those comected with the district:-

Public Schools ................................................................... 86
Provisional Sch 40
Half-time Schools 6
Church of England Schools.
Roman Catholic Schools 6
Roman Catholic Schools ......................................................
Presbyterian School
Total
In the foregoing numbers each department is entered as a separate school. There are, however, only five schools in the district which have two or more departments, viz., Bathurst Public, Bathurst C.E., Bathurst R.C., Mudgee Public, and Mudgee C.E. Schools, which unitedly form twelve departments.

Onc hundred and six (106) schoois have been risited and reported upon during the year, viz. :-

## Public Schools

 6522
Provisional Schools
Half-time Schools 22
2

Church of Eugland Schools 2
8
8
Roman Catholie Schools 9
Presbyterian School

## Total

 106The following statement will exhibit the number of schools reported upon under each of the prescribed forms ol' inspection:-

| Regular Inspections | 75 |
| :---: | :---: |
| General Inspections | 16 |
| Incidental Inspections | 15 |
| Ordinary Iuspections | 0 |
| Total | 106 |

Of those reported upon under the regular form of inspection, nine were risited and examined by the Inspector of the Albury District, in aecordance with instructions received from the Council. They were the following :-Binalong Pub., Burrowa Pub., Burrowa R.C., Cunningar Pub., Lambing Flat R.C., Marengo Pub., Wombat Pub., Young Pub., and Young C.E. On this account no notice of these schools appears under Annex F, but the genernl statistics respecting them have beon embodied in the other Amexes hereto appended.

Hive new Public Sehools have been opened, riz.:-Cargo, Crudine, Spring Flat, Tipperary Gully, and Upper Turon. The school at 'lipperary Gully was conducted for a short period as a Half-time School in conjunction with another at Three-mile Rush, but the numbers in attendance being sufficient for a Public School it has been established as such. The Half-time School at Pleasant Valley was formerly on the Public School list. The number of Certified Denominational Schools has been lessened by tho conversion of the Kelso C.E. School, on application in the usual way, into a Public School. One application for $n$ certificate to a Roman Catholic Denominational School at Grenfell was received during the year, and reported upon, after the usual inquiries.

The character of the inspection has been similar to that of preceding yeare, but it has been on the whole of a more careful and searching mature. More time has been occupied with the examination of the larger schools, nud the questioning has been such as to test more rigidly the mental power of the pupils, and to ascertnin how far habits of earnest application and of self-rcliance hare been developed by the discipline aud teaching of the school. The attention, demeunour, and general conduct of the pupils have been obscrred and noted, so as to furmish data for forming an opinion of the discipline maintained in the schoolroom and the character of the surveillance exercised orer the pupils in the plarground.

No notice has been given of visits to sehools except in ono instance where the circumstances rendored it neecssary. The opinion farourable to this practice expressed in the Reporit for 1870 has been further strengthened by the cxpericnce of the past year. Only a few schools however can be visited in any locality unexpectedly, as it becones rapidly known when an Inspector comes into the vicinity of a group of schools. As in former years, there has been no time to visit schools for the purpose of reporting upon them under the ordinury form of inspection. However desirable, the circumstances of this district have not hitherto admitted of it. The general results of inepection ann of the exumination of the pupils will be found in the vurious Annexes appended to this Report.

## TI.-Organization. (Annex B.)

Of the 106 schools visited during the year, 69 , or about 65 per cent., rank in respect of situations from fair to good, the remainder ranging from tolerable to indifferent. The Provisional and Non-rested Public Schools, the latter of whirh number about thirty, are generally speaking most faulty in regard to the sites occupied by the school buildings. The latter schools are for the most part conducted in premises not originally intended for school purposes. It would be well that School Committees understood clearly that at least tavo acres should be obtained for crery school site, and that, besides being central, it should be pleasmently situated, healtly, and casily accessible to the majority of the residents in the locality. In particular, Committecs should guard ngainst recommending ground of a wet or marshy character.

From rarious causes, no suitable site has yet been obtaincd in Bathurst for the crection of Vested Public School premises, which are very urgently required. It is to be regretted that so much delay should take phace in this matter, as the progress of the sehool is retarded by the want of suitable buildiugg, aud nothing can be done towards the establishment of a Model School for the district until a site is obtained

During the year new rested premises hare been completed at Crudine, Grenfell, Ironbarks, Upper Turon, and Wombat, while similar buildiups were either in course of construction or had been tendered For at the close of the year at Forbes, Gosling Creek, Hargrares, Hill End, Wattle Flat, Wilbertree, and Wyagdon. Repairs or additions have becn elfected or proposed at Blaney, Burkeville, Cudgegong, Erans' Plains, Guntawang, Hartley, Kirkconnell, Lowther, Lucknow, Marengo, Mendow FInt, Molong, Ophir Road, Orange, Rockloy, and Warrea Public Schools. So far as known to me, no improvements or additions hare been made throughout, tho year to the Denominational School buildinge in the district. The Provisional School premises ure, with fer exceptions, of an indifferent character. They are mostly constructerl of slal, with bark roof, but a few consist only of bark. They are generally speaking unfloored, and the sehoolrooms are narrow, comfortless, and uninviting, stifling in summer, and damp and cold in winter. It seems to be thought by some Committees that any sort of makeshift building is good enough for a school, or for the accommodation of the teucher.

Thirteen of the Public Schools insjected are without teachers' residenees, viz., Bnthurst, Duramuna, Grenfell, Hargraves, Ilford, Lucknow, Marchrale, Mount Tarana, Rydal, Tiudale's Hollow, Trunky, Wattle Fat, and Winburndale. These are noarly all of the non-vested elass. The Romau Catholic Schools at Bathurst (Boys), Mudgee, and Wellington, and the Chureh of England School at Young, are also without residences. The Roman Catholic Schools at Lambing Flat and Wellington are conducted in 1.3-H.
the Churches belonging to that denomination at these phaces. A few Provisional Schools have teachors' dwellings of an inferior kind, but the majority are without any, or have only one small room partitioned off from the schoolroom, for the teacher, who is generally a single person.

In consequence of the great increase of population at Hill End, the sehool premises are too small, and additions ure now in course of erection. Suitable premises on a more central site are still needed at Dubbo.

Playgrounds are rarely found septrated for boys and girls, or furnished with sheds to protect the pupils from the heat and the inclemency of the wenther. Among the improrements oflected in connection with the Orange Public School has been the erection of a large and substantial shed, and of a urinal. The latter desirable adjunct is now rarely omitted from new vested buildings. The Ilford Public and the Bathurst l'ublic and Roman Catholic Schools are still without suitable playgrounds. Fourteen Public Schools have unfenced playgrounds, two of thom being also uneleared, but thcy ure amost all furnished with the necessary out-offiecs. Provisional Schools are in rery muny instances found without suitable playgrounds, being neither cleared, fenced, nor provided with the necessury out-louses. The planting of trecs and flowers, and the formation of gardens, are still rathor exceptional than general, but more atten tion secms to be given to these matters than heretofore. On the whole, about 60 per cent. have playgrounds estimated at from fair to good.

The supervision of the playground does not appear to be estimated at its proper value by many teschers, or it would be attended to with greater earnestness and care. It is of great importance that this matter should not be neglected by the teacher; lis presence and kinilly juterost in tho amusements of the pupils would promote good feeling anong them, check many an angry word and act, and prevent ebullitions of temper and consequent quarrels, the results of which otherwise would cause him much dis comfort in his schoolwork, and hinder his success. As has been remarked, "the teacher must watch marrowly the conduct of his children at play, and there he will discover to what extent his lessons havo been bencficial in forming the character and the habits of those committed to his care. He who neglects. this docs only half his duty. Indeed, a school is better withont a playground, unless that playground bo superintended."

The furniture in Provisional Schools is, generally speaking, found to be scanty, inferior in quality, and objectionuble in point of arrangement. The desks are mostly, in the first instance, fastened to the wall, that being the easiest way of getting up something resenbling desks, though the worst possible position as respectis effective teaching, seeing that the pupil sits with his back to the teacher. In all the new Public Vested Schools the furniture is good and well arringed; and some others, formerly defective in this respect, lave been improred during the year by obtaining a supply of suitublo deaks. In onc Denominntiomal School now desks were found fastened to the wall. A considerable number of schools are without presses for the safe custody of books and school materials. Taking all echools into account, about 78 per cent. are from tolerable to good.

The supply of apparatus in the more important schools is suitable and ample in nearly all cases Provident and careful teachers so arrange as to get their schools properly equipped with these uppliances by obtaiuing them gruduully in the usual way annually by requisition. In a large number of Provisional Schools neither blackboards nor easels are found, and there are scarcely any with ball-frames, pictures, or diagrams. It is desirable that those lrovisional Schools that prove themeelves of a permanent character should obtain some pictures of animals, \&c. As to the care taken of the furniture, it may be remarked that scratches on desks with pins and pencils, scribbling with pens, and the ink stains thereon, indicate in a goodly mumber of echools a want of vigilance and thorough discipline on the part of the teacher, who should not forget that these silent witnesses lower the estimate formed of his sustained attention to duty.

The supply of books in eighty-nine schools is from fair to good; fourtecn are regarded as tolerable and threc as from indifferent to modorate. In one school-the Calabash Provisional-the books and school materials had not been received at the date of my visit. On the whole, therefore, the condition of the schools in this respect is satisfactory, and there seems no grood reason why teachers should allow their schools to fall into a faulty condition in regard to these appliances, since the Council supplies them anmually on application. On reference to Annex $B$, it will be seen that the condition of the school records is not so satisfactory as is desirable. In some schoole defecis exist from ignorance, but in others they nre evidently the result of sheer carelessness, stupidity, or the mant of earnest attention to the dircetions which accompany these registers. In some few instances, in echools of higher protensions, gross carelessncss was manifested in the state of these books. The most common defects observable are,-neglecting to register promotions from one class to another, or to mark off those who have left the school, and to re-enter their names when they return; failing to enter the totals at the close of each quarter in the Class Roll, and to keep the current quarterly as required by the Council; and onitting to make the cntries daily in the Report Book and Lesson Register, and to keep the School Fee Account Book carefully. In one case, where a school had not been visited for nearly two years, it was found that no entries had been mado in the latter book for that period, a rough memorandum only haring been kept by the teacher. On the whole, however, the general condition of the records is reasonably eatisfactory.
III.-Moral Character of Schools. (Annex C.)

The following Table will show, for the Last four years, the average Attendance and the rate per cent. of each quarter :-

| Year, | Avorage Attendance of pupils for the quarters named, and the rate per cent. of each. |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | March. |  | June. |  | Septembcr. |  | December. |  | Mrean Average. | 烒淢 |
| 1868 | 2,757.78... | 643 | 3,113 $28 . .$. | 65-5 | 3,351.59... | 66.5 | 3,465•15., | 673 | 3,171-93.. | 65.9 |
| 1869 | 3,483-35... | $65 \cdot 4$ | 3,549 61... | 66.4 | 3,731-88... | 68.2 | 3,906.69.. | $68 \cdot 1$ | 3,667-88.. | $67 \cdot 0$ |
| 1870 | 3,571.95... | $61 \cdot 1$ | 3,480 $65 \ldots$ | 592 | 3,961-97... | 665 | 4,301.93.. | $66 \cdot 3$ | 3,829 12.. | $63 \cdot 2$ |
| 1871 | 4,341:49... | 663 | 4,435-46... | 66\% | 4,471 $48 . \ldots$ |  | $4,730 \cdot 59$ | 68.0 | 4,494:75.. | 669 |

Leaving out of account the attendance for 1870, which, from its exceptional character, cannot fairly be taken into comparison with that of 1871, it will be observed from the preceding tablo that the percentage of attendance for 1871 is rather less, on the whole, than that for 1869, while it is only one per cent. greater than that of 1868 . From this statement, therefore, it appears that but little improrement has taken place, if any, iu the regularity of the pupils. As in past years, the same causes combine to produco similar unsatisfactory results. In agricultural districts, schools are thinned at different seasons of the vear by the various farming operations, on account of which parents rogularly withdraw their children. Harvesting, the planting and securing of corn and potatocs, watching pigs and cattle, and looking for horses, are among the causes which diminish the attendance at country schools. Making allowance for cases of necessity, it cannot be doubted that large numbers are systematically kept from school for the most flimsy reasons and on the most frivolous pretexts, nud that the teacher cannot do much to lessen the evil, although his influence may effect some improvement. Gencrally speaking, where the teacher is in high repute among the parents, and the discipline is thorongh, the irregularity is not so great as in other
places similarly situated. Something more stringent than now exists, howver, is needed to combat with success tho poverty and necessity, the ignorance, apathy, and cupidity of parents; and the only effective cure will, is stated in previous Reports, be brought, about by an Act to sccare compulsory attendance.

The punctuality in fifty-three, or one-half of the schools visited, ranks from fair to good, in thirtythreo it is estimated as tolerable, and in the remainder at from indifferent to moderate. As this is a matiter on which the teacher can exercise a more direct influence than with respect to regularity, it seems desirable that more eamest efforts should bo made by many teachers to make their pupils more puactual. Considering the value of such a labit, it is surely worth while to take pains to form it, and the earnest teacher will not fail to udopt all the expedients and to exercise all the tiact which his practical experience may consider nocessary to effect his purpose. In country schools, and especinlly in those of the Provisional kind, this defect is most observable. Sometimes the teacher lans neither clock nor watch, and a numbor of the settlers around are in the same position. It is desirable that every school should be furnished with a good clock and a bell, so that the teacher might be thus able to regulate the time of the locality in which the shool is placed. Punctunlity should beinsisted on by frecept und example; every late-comer should be questioued as to the cause of his lateness, and a record should be kept and the parents' attention called to the matter in overy instance where a pupil is vory unpunctual.

In the great majority of schools there is littile room for complaint regarding the cleaninoss of the pupils; they ure generally found to be tidy and clean, and us no intimation of visits was given to the teacher, the state in which the several schools thus inspected were found may be taken as a fair inder of their general condition. The out-ofices und playgrounds, howcver, are in many instances slopenly, and the schoolrooms do not nppesr to be washed, srept, and dusted as often as they should; while the dust and cobwebs on some windows are unmistakable cridence ol' neglect. Tr a few cases teachers buve been found who did not sct a good example to their pupils of cleanliness or tidiness in respect of dress, but it is only just to remark hatit nome of these were chassified teachers-being persons in charge of Provisioual Schools.

Good order in its materinl aspect supposes the whole organization of the school to be such as to afford the best possible aids to the quiet and systematic working of the school. The desks are sonrrauged, in parallel groups, as to place all the children under the eye of the teacher; the apparatus is so disposed as to be ready for use at once when required; the school materials are so placed as to prevent noise, confusion, or delay in obtaining them when they are needed by the classes; and the Time-table provides for the alternation of lessons with a riew to prerent clashing, and to provide for the pupils appropriate and raried subjects, which are arranged in detail on the Programmes of Lessons that accompany it. In this respect there is not much fuult to be found with the order in the majority of the Public and Denominational Schools, except in one case in the latter, where the desks are faslened to the wall. When the demeanour and conduct of the pupils come to be considered in comection therewith, bowerer, there is not so much ground for satisfaction. Thore are still mary schools in which the pupils are permitted to walk into school in an irregular and slovenly manner ; to talk and look about them in line; to take their seats in a noisy modo and to assumo listless lounging attitudes when sented; to pass slates and othcr materials without orders, or, when ordered, without alacrity ; and when at lessons, to show a want of interest and attention, without which no substantial progress can bo made. In a fow schools the pupils are carefully trained to steady and uniform morements, to prompt obecdience, and to sustained attention and habitual self-rcliance, and show, by their intelligent, counternanecs and checrful respectful demeanour, that work to them is a plasure and not a task. Such habits in the pupils are the result of great care, firmacss, pationce, and tact, on the part of the teacher ; but they are of such inestimable benefit as to repay all the pains bestowed on forming them. The condition of the school, in this respect, is a measure of the moral qualities of the teacher, and a test of his aptitude for the profcssion. Those teachers who do not possess enthusiasm and cnergy of character, firmness and earnestness of purpose, together with sympathy and enthueinem and conergy of character, firmness and earncstness of purpose, together with sympatay and lact in dealing with clildren, may succeed to a partial extent, but can nevor reuch so high a standard of
excellence as those persons who possess these qualities attain in their schools. Carcful and systematic drill is practised in ouly a few schools; its value as a disciplinary auxiliary does not appenr to be cstimated so highly as its importance demands. On the whole, about 46 per cent. of the schools rank from fair to good in point of order, 30 por cent. are about tolerable, and the remainder are from indifferent to moderate.

The governmont in most cases scens to orr on the side of mildness rather than of sererity. It is rare to hear complaints made of harshness or undue severity, although the cane is not discarded in most schools. In rery few instances is any record kept of the amomit of corporal punishmont inflicted, or the couse of its infliction, as required by Article 59 of the Council's Regulations. It is desirable that a book for this purpose should be added to the other school records, if this regulation is not to be looked upon as a dead letter. Anong the causes which coutribule to ineffective government may be mentioned the following : a wunt of prompt firmness in dealing with offences when they occur, and of vigilance to prevent their recurronce; a lack of sustained watechfulucss, which permitg the pupils at one time to commit faults without hindrance that on other occasions are checked and punished, and the absence of judgment in dealing uniformly and impartially with offences, which are treated as the mood or temper of the moment may prompt. The teachor in his government fhould have constant regard to the suppression of faults, and should exhaust all expedionts to prevent ruthor than to punish then.

## TV.-Instruction. (dunce D.)

With the standard of proficiency for a guide as to the requirements of each class, and a due regard to the mental power and age of the pupils, thero seoms to be no sufficient reason why good classificution should not prevail to a greater extent. About 50 per cent. of the schools range from fair to good under this head, about one-third being tolerable, and onesixith from indifferent to moderate. There are still in some schools-especially in those of the Prorisional kind-several divisions in the first class, and instanees are met with of premature promotions. In oue gnse a largo draft of pupils was removed from an Infunt to a Primary department, evidently without regard to their particular fitness for promotion, but for pecuniary reasons, as the teacher was not apparenily ashamed to confess, when his attention was called to the matter. It appenrs to me that such conduct, on the part of a teacher, is not creditable in auy point: of view. On the other hand, for obvious reasons, promotions aro delayed, and a considerable amount of the higher class work is done before the pupils nre noved to it. For instance, the compound rules are entered upon in the second class before the scholars are moved to the third. Where the practice does not arise from ignorance or inattention, the design is obviously to try to obtain a higher murk for progress under the requirements of the standard, as such pupils may be practically equal to the second and third quarters of enrolment under tho staudard, although nominally the first, which is actually correct ay regards the time in tho class. These comments, however, aro applicable to only a few teachers; the majority are houest, and disduin such diecreditablo practices.

In the Public and Denominational Schools the instructional documents are nearly almays found suspended as requircd, but, as might be expected, they exhibit very various degrees of care and skill. In the construction of Time-tables, the relative importance of the different subjects is in some cases not sufficicntly borne in mind, the less essentinl subjects having almost as much time deroted to thom as is given to some of those of primary importance. Again, the arrangement of subjects, in the several classes is not suelt as to prevent clashing, to furnish varied and suitable occupation, and to hare due regard to the vigorous exercise of the mental powers of the pupils. It may be added, that often the style of the Time table indicates a disregart of neatness, which is not creditable. As a document to be observed and scamed by visitors, it should alford the very best specimen which the teacher can furnish of his ability in this yespect. Programmes are gencrally in use, but in many cases they are profitless docuracnts, and the amount of care and practical gencrally in use, but in many cases they are profitless docuracnts, and the amount of care and practical
skill indicated in their construction is but sunall. They sometimes consist of headings stating the work
for the quarter, in each subject, as laid down in the "Standard of Proficiency"; and in the column underneath, the phrases " similar to last week," "similar cxercises," or to sare the trouble of writing eren these, dots, occur in nearly every weekly space. How such documents can be considered respectable productions dots, occur in nearly erery weekty space. How such documents can be considered respectable productions fit for suspension on the walls of any sehoolroom, seems strange, espectany when fornd in seachers. They are unworthy of teachers of the lowest attaiments and practical skill in Prorisional Schools. Gencrally speaking, the lessons aro registered daily, although occasionally weekly entries are discovered which are simply reproductions of those in the Progrummes. It appears to be forgotten that Registers of Lessons are designed to record the work actually done, while the Programmes show the work intended to be done. 'the ralue of the register is often much lossoned by tho want of specific information in the entries. For instance, sample questions in arithmetic should be recorded, and the figures drown should be sketched out or clearly indicated by reference to the book from which they are taken. Referonce to Annex D will show that twenty-four schools are estimated at from fair to good are taken. Referonce to Annex 1 whil show that twenty-our schools are estimated at from fair oo good, twenty-one as tolerable, and thitfy-six at from indifferent to moderate. In this, as in other respects,
Provisional Schools rank low, mineteen of the thiry-six last montioned belonging to this class. A conssiderable number of trained and classified teachers have a fairly satisfactory knowledge of good methods, but the number of teachers is small who have the puwer of applying those methods with intelligence and shill, so as to be productive of high results. To achiere these, an intimate acquaintance with the best; methods is necessary, but unless it is accompanied with energy, industry, and disciplintry power, the succes attained will not be of a thorouglly satisfactory character. With some, there is too slavish an adherence to some particular mode of teaching a certain subject; they appear not to bear sufliciently in mind that variety of methods is desirable, and that the intelligent teacher will adapt his methods to the peculiar requirements of his scholars, so as to secure the ond he aims at in their mental development, and in educating them to self-reliance and the power of sustaincd altention. Whenever the application of iny method renders the pupils simply receptive, and does not require on their part careful attention and some mental effort it cannot be considered cducative, and the results as respecte mental power must be poor. Pupils may be crammed and uentally dwarfed at the same time. The method used should vary with the subject taught, and to secure suecess care must be taken to see that the pupils have really mastered the lesson. For this purpose, thorough questioning, reproduction, and frequent practice in certain subjects, are necessary to ensure success, constant ropetition is needed, and nothing should be takion on trust. Lecturing the pupils should be aroided. It should be the aim of the teacher to reduce his tolking to the minimum requisite for the clear perception of the lesson, and to develop the thinking power of the pupils to its maximum. Whaterer the pupil can do for himself he should be expected and made to do. Principles should not only be enunciated and comprehended, but carried into practice.

## V.-Subjects. (Annex E.)

Reading.-This subject still continues to be taught in an unsatisfuctory manner in the majority of schools. With fer exceptions, the alphabetic method prerails in teaching the elements. The phonic or phonic-syllabie methorl is either not understood, or, in some cases, not practiserl, because the teucher weakly yields to the opposition of parents who, from ignornce of its value, may object to it. Spelling is associated with reading in the earlier stages, and the progress is retarded by tlis absurd modo of teaching the subject. The pupil should not be allowed to spell the worls before pronouncing them, books should be withheld until the cards are mastered, and, for the first lessons, the blackboard should be largely in requisition. It is of grent importauce that pains should be taken in the first class to render the articulation clear and distinct, and to make the pronunciation perfectly eorrect. Faults of this character when ullowed to pass at first withont check nre difilicult to cradicate, and cause a great denl of trouble in the higher classes. The teacher who studies the best interests of his school camot be indifferent or inattentive to this matter, as careless supervision of beginners must, recoil upon himself ofterwards, and lower the quality of the reading in all his classes. Erery error should be at once corrected, and the pupil required to give forcible utterance to every sound. The following extract from the Rev. J. Fraser's Rejort shows that the practice in America is to give the sounds of the letters. He says-"With regard to the reading lesson, I noticed that the first step taken before reading a fresh passage is, to pronounce the words simultaneously, with a good deal of deliberation and precision. If a hard word is approaehed, and a pause ensues, they are bidden analyse it, and-here is the noticeable thing-enuncinte not the names of the letters, but the sounds." In a note to the above paragraph he furthor says-and this may ho taken as the result of the method in question-"The articulation of Americans generally is very distiuct, and their speakers and preachers rarely fall into our bad habit of dropping the voice at the end of the period, thens cutting off, to the listener, the thought at its most vital point." .In the higher classes, intelligent and expressive rouding is exceptional rather than general. But little instruction in the art appears to bo given; good exemplar reading is rare ; and, in many instances, there is not suflicient pructice. A sifting analysis of the passage to be read is necessary; all important or difficuit words and phrases should be explained, and the pupils, after lienring the teacher read it, should be called upon to imilate his style. To do this, however, careful prerious study on the part of the teacher is requisite, and there are few; I regret to say, who seem to take the necnssary pains. As a final test of the reading, passages and not sentences shoud be read, and the teacher should listen to it without looking at the book, leaving the detection of mistakes to the ear alone. Judging from its almost total absence, the value of recitation as a menns of cultivating expressive reading does not appear to be estimated at its proper worth. The neglest of derivation alluded to in last year's Report still continues, and transposing and paraphrasing are attended to with equal indifference. As teuchers are rarely examined respecting their knowledge of derivation, it may be considered by them to be a matter of little importance. Oral spelling in connection with the lesson read is fairly satisfactory, but more is required in many sehools in regard to the revision of the spelling of previous lessons. In this, as in all other subjects, reproduction camot be onitted with impunity.

Writing.-The mriting of the first class is, in many schools, not supervised with sufficient, care, and quantify is too frequently accepted in liou of quality. Often the exercises are not properly graduated, and the indifferont character of the copies on the blackbonrd indicates a waut of care and practice. Generally speaking, where the copy is of good quality, and rigid cxamination, with clear illustration of defects, takes place, the results are of a fairly salisfactory character. The want of desks for this class, in many country schools, and the improper position, on that account, occupied by the pupils, tend to lower the quality of the writing. Uniformity and exact adherence to the lines are not insisted on so much as is desirable by some teachers. In copy-books, the frequent recurrence of mistakes without any marks of correction show a wnat of supervision. It some the head lines are of an unsuitable characier, and children are allowed to write in books which are not approprinte for their stage of adrancement. Copynetting on the blackboard for the upper classes is practised in af few schools, butt ouly in some cases with marked success. In dictation, punctuation requires more attention, and the results, as respects spelling, are, in many instances, very poor. This seems to arise from neglect to asecrtain and make the pupils rewrite the incorrect words. The passage dictated shoutd not be so long as to usurp the time necessary for thorough correction, on which the ralue of the exercise mainly depends. Trangcription of passages of the reading lesson from the blackboarcl would be a valunble nuxiliary, but it is little practised, and dictation on paper is but seldom found in the most adranced classes.

Arithmetic.-In the minjority of schools notation is fairly satisfactorr, the numbers dictatcil being generally written with reasonuble correctness and rapidity. In some selools it is all that can be desired, but in a fer it is weak, from the practice of writing down questions in the simple rules ou the blackboard instend of dictating them to the pupils. Considering its valuo as a mental discipline, when well tuteght, arithmetic does not receive so much attention as is desirable to render it effective for that purpose. As
gencrally taught, it fails to attuin that end to any very appreciable cxtont. The teaching is mechanical, and hence, when questions involving some amount of reasoning power in their solution are presented to the pupils, the results are far from eatisfactory. The development of the intellectual powers seems lost sight of, nud there is but little ingenuity slown in derising work having that effect in view. The illustration of principles is neither so full nor so clear as is desirable, und sufficient practice is not given in their application. The form of the question proposed is too much of a routine charucter, so that the rule under which each concs is apparent at a glance, und there is no room left for the proftable exerciso of the thinking powers. In third classes even, but few have been found who, after a fair allowance of time, would work correctly the following or some similar question, - How often can 6,758 be subtracted from $2,338,268$ ?" lna a considerable number of clusses the result was alnost total failure, showing the weakness of the nuental power, and the absence of thorougl grounding in the clements. In tho compound rules the working of questions on the tables has disclosed, in a number of instances, imatention to causing them to be committed to memory, and a disregard of the requirements of the "standard." In some schools the pupils are permitted to count their fingers at their work, and the consequence of causing them to abandon this practice, during an exanination, is apparent in the poor results obtained from them. Mental arithmetic in the first class is far from roceiving the amount of attention to which its worth entitles it, and in the higher classes it also fails to secure much adrantage in cnsuring either rapidity or accuracy in the work. On the whole, I cannot but regard arithmetic as one of the worst taught and least successfial subjects.

Grammar.-In the second class the definitions are not generally tatght in a common-sense and intelligent manner. Instead of training the children to deduce the definitions after carcful nad fall illustration by apposite and varied examples, the usual course adopted is to make the pupils commit them to memory and then apply them. It is scarecly necessary to say that this method reverses tho natural order, for the definitions should be the results arrived at, and should thercfore succeed, not precede, examination. The children should be furnished, first, with olear ideas on the subject, and then with the definition. In distinguishing the parts of speech in the reading lesson, care should be taken that the connection of the several words in the sentence be clearly understood, and nothing further than a thorough knowledge of them should be attempted in this class. The foundation being thus laid on a sound basis, future progress wonld be more rapid and thorough, and the after-work mado easier for both pupils and teacher. The grammar of the higher classes is only partinlly satisfactory. Oral instruction in the necidence is not so careful, systematic, and thorough as it should be, and hence the answering of tho in the nceidence is not so carefill, systematic, and thorough as it should be, and hence the answering of tho
pupils. is often rague and wanting in intelligence. The parsing is in many cases defective from a want of diserimination, the absence of which provents the pripil from perceiving clearly the connection of words in the sentence. Peculiaritics of construction are not sufficiently dwelt upon and illustrated, and the application of syntnctical rules requires more attention to be given to it. Analysis needs more careful treatment. The oral teaching in many schools is wanting in intelligence, and but little progress is made beyond the simple sentence. The relations of clauses and sentences are not well underatood, and, on tho whole, it may be said that the results show only a moderate amount of benefit from it in the way of mental culture. In regard to composition there is not much of a satisfactory nature to report. In a few schools care is bestowed on the reprodnction of certain oral lessons, but a systematic course of instruction therein is rare, and in general the proficiency attained is not sufficient to emable the pupil to expross himself with clearness and precision. Jeetter writing has but little uttention given to it, In Provisional Schools grammar is taught with only indiflerent success.

Geography.-As capable of being casily made interesting to the pupils, respectable results might reasonably be expected, but of 1,812 pupils examined therein, only 743 , or about 41 per cent., rank from fair to good. The elements do not appear to be tanght well. Tho definitions are learned by rote, and the blackboard is little used for the purpose of illustration, so that the memory is laden with names with which the pupil has associated no clear iden. The uses of a map aud the relative position of places thercon often receive little or no attention, and local geography is rery imperfectly understood. In the advanced classes the lessons in many instances are not arranged systematically, and too much is attempted to be done at once, while the revision of previous work is neglected. It is a safe principle for the teacher to distrust his apparent results, and to keep rigidly testing thom from time to time, as le may find oecasion. Frequent repetition is needed to render effective the teaching in this subject. Map-drawing is not much practised, there being few schools with fourth clasecs, and not very many teachers who have the skill necessary to guide their pupils in the matter. A similar map to that provided for New South Wales is required for the satiefactory tenching of the geography of New \%ealand.

Scripture- No examination on this subject takes place in Denominational Schools, and generally speaking thero are very fow in Provisional Schools who are sufficiently adranced to be competent to read the prescribed lessons, only seven pupils having been examined therein. Of those examined in Public Schools, about 62 per cent. rank from fair to good, 31 per cent. are tolerable, and the remainder is from moderate to indifferent. The results obtained are therefore of a reasonnbly satisfactory character.

Olject Lessons.-These lessons are very generally included in the subjects of instruction, but, as taught, they can scarcely be said to realize those effects which their intelligent treatment is calculated to produce. By some teachers their design seems to be misapprehended, and their manner of treatnent of them fails to produce observation and inquiry on tho part of their pupils; an attempt is made to cram, rather than to exercise the perceptive faculties. It appears to be forgoten that teaching is not a mer pouring of knowlelge into receptive minds, and that the contents of some text-book may be consmitted to memory without producing much mental culture. Want of preparation and of suitable arrangement, combined with a hack of skill and tact in handling them, and the absence of clear ideas as to their end, are among the causes which contribute to the imperfect attuinments in this enbject. $A$ systematic and thoroughly digestied course of object lessons is seldom met with. Tho Australian lithogruphs of animals published by the Council are in many schools almost uscless, the teachers alleging that they cannot give lessons on them from the want of a text-book to supply the necessary information respecting them. The results obtained give, on the whole, about 29 per cent. from fair to good, 37 per cent. tolerable, and 34 per cont. from indifferent to modorate.

Singing and Drazing.-In the majority of schools, except those of the Provisional kind, some time is devoted to instruction in those subjects, and in some, cases with creditable resulls. The lack of abiiity to draw a good copy on the blackboard is often a serious drawback to stecces, but somo improvemont in this respect is discernible. In schools under the charge of teachers who have passed through the Training School, singing is tanght according to the tonic sol-fa method, but it may be remarked that, in general, theoretical knowledge on the part of the pupils falls far short of their practical ability to sing, the requirements of the staudard being seldom reached in this subject. In drawing, of 1,412 pupils, 362 , or nbout 25 per cent., aro estimated from fair to good ; in singing, of 2,364 pupils, 392 , or nearly 38 per cent., ranls from fair to good.

Needlework--In general, scwing is not taught in Provisional Schools, or in those under the charge of unmarried male teachers. In only a few schools are the results in this particular good; in the majority it docs not receive careful attention. Conplaints were made by many that parents would not supply their children with working materials; that some would not allow their clililyen to receive instruction in it, as they could do it at home; and that they (the teachers) could not provide their pupila with the necessary requisites. Very froquently when specimens were not forthcoming it the exumination, it was stated that the girls took their work home, and it consequently could not be seen. Having dramo attontion to the mattor during the year, I expect to be able to report some improvement during 1872.

## VI.-Teachiers.

Thirty teachers were examined during the gear, of whom only seven were promoted, or receired classification from probntioner's rank. As these examinations were confincd, unless in special cases, to probationers and those holding Class III Section C, the number summoned was maller than usual. Tho annexed table shows the classifications held by the teachers in charge of the schools in operation during 1871 :-

\left.| Clasy I. |  | Class II. |  | Class III. |  |  | Probntioners. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Section A. | Section B. | Section A. | Section B. | Section A. | Section B. |  |$\right]$.

Under the head of Probationers are included the teachers of Provisional Schools, nono of whom are classificd, as they are not subjected to tho usual examination for that purpose. Fourteen pupil teachers are emplosed in the Public and Denominational Schools. The amount of fees paid during the year to the teachers of the last-named schools was $£ 4,68410 \mathrm{~s}$. 4d., being an incrense of about $£ 730$ as compared with the amount of 1870 . The following will exhibit the several amounts for the schools named during 1870 and 1871, and the increase or decrease in each class :-

| Schools. | $18 \% 0$. | 1871. | Increase. | Decreas. |
| :---: | :---: | :---: | :---: | :---: |
| Public | £ s. d. | $\boldsymbol{z}^{\text {s }}$ s. d. | E s. d. | £ s. d. |
| Chureh of England | 2,845 $10{ }^{7} 7$ | 3,530 410 | 684142 |  |
| Church of England | $46110{ }^{4}$ | $467{ }^{4} 76$ | 5172 |  |
| Rowan Catholic | 5541710 | 60230 | $47 \quad 5 \quad 2$ |  |
| Preabyterian | 91149 | 84150 |  | 6198 |
| Half-time | $28 \quad 5 \quad 0$ | 11179 |  | $16 \quad 7 \quad 3$ |
| Prorisional. | 365124 | 423109 | 57185 | ........... |

According to the numbers entered in the annual Returns received at the close of the year, the following is the percentage of free children in the several kinds of schools :-

$$
\begin{aligned}
& \begin{array}{l}
\text { Public Schools................................................................................................................... } \\
\text { Prorisional Schools......... }
\end{array} \\
& \text { Half-time Schools ........................................................................... } 11 \text { ", } \\
& \text { Church of Jingland ........................................................ 4.6 " } \\
& \text { Roman Catholic ........................................................... } 20 \text { " } \\
& \text { Presbyterian } \\
& 25 \quad "
\end{aligned}
$$

As a body the teachers are industrious and attentive to their duties, and, gencrally speaking, their conduct is exemplary. Few investigations into charges affecting their moral charncter have been held during the year.
VII.-Local Superviston.

The majority of School Boards do not hold regular meetings, many keep no record of their proceedings, and the Visitors' Book records but few visits of the several members. The gencral impression seems to be that where no complaints are made against the teacher interference is unnecessary. Fers set thenselves earnestly to work to support the school and teacher, by using their influence to induce parents to send their children to school and to keep them regulariy in nittendance. This is a direction in which the energies of the various members of School Boards might find beneficial employment. In many cases, except for signing documents, School Boards appenr usoless, and are an obstruction to the success of the school. A few, however, by their intelligence and energy show what might be done by all if they acted in a similur manner.

Sydney, 9th March, 1872.

> J. McCREDIE,

Inspector, Bathurst District.

## ANNEX $F$.

Detalled Statement of the condition of the Schools in the Bathurst District, inspected by me in 1871. PUBLIC SOHOOLS.

> Bathurst (N.V.-Infants) :-Regular inspection, 25th October, 1871.
> Numbers enrolled :-Boys, 52 ; girls, 39 ; total, 91.
> Numbers present:--Boys, $47 ;$ girls, 20 ; total, 67.

The schoolroom is too small, and without a gallery. The order and attention are fair, and the self reliance is tolerable. The lesson documents are fairly arranged, and tho teaching is animated and indugtrious. The discipline is fair, and the average proficiency is from tolerable to fair. At the time of ingpec tion there was no inistress in charge of the echool.

Bativest (N.V.--Primary) :-Regular inspection, 26th and 27th October, 1871.
Numbers enrolled:-Boyg, 93 ; girls, 61; total, 154.
Numbers present:-Boys, 79 ; girls, 45 ; total, 124.
The material condition continucs unaltered as respects a suitable playground, which this department is without. There is no teacher's residence. New premises on a central site are urgently needed. The pupils are fairly orderly and tolerably attentive. The instraction is properly regulated, and the work done . is carefully registered. The teaching is careful, but wanting in energy and impressireness. The discipline noeds greater watchfulness and vigour, and the arerage proficiency is about tolerable.

Buley (V.):-Regular iuspection, 12th Scptember, 1871.
Numbers enrolled :-Boys, 25 ; girls, 23; total, 48.
Numbers present:-Boys, 22; girls, 21; total, 43.
The fences are in meed of repair, and walls of the sehoolroom require pointing; the woodrork also needs painting. Since last ingpection a kitchen and another room have been added to the teacher's residence. The pupils are fairly orderly, attentive, and self-rcliant. The instruction is fairly regulated and the teaching is industrious and energetic. The government is firm and matchful, and the averago proficioney is from tolerable to fair.

> Bowenperss (V.) :-Regular inspection, 20th June, 1871.
> Numbers enrolled :-Boys, 38 ; girls, 12 ; total, 50.
> Numbers present :- - Boys, 29 ; girls, 8 ; total, 37.

The playground is not a good one, but on the whole the material condition is good. The pupils aro orderly, and fairly atientive and self-reliant. The lesson documents are fairly arranged, and the teaching is very careful and painstaking, but would be improved by greater amimation and encrgy. The discipline is quict and firm, but needs greater rigour. The average proficiency is about fuir, and the general spirit of the school is pleasing.

Burkeville (V.):-Regular inspection, 30th August, 1871.
Numbers enrolled :-Boys, 18 ; girls, 10; total, 28.
Numbers preseut:-Boys, 17 ; girls, 10; total, 27.
The building has just been painted and otherwise improved, without aid from the Council. The pupils are cleau, orderly, and attentive. The instructional documents are carefully compiled, and the teaching is carnest, intelligent, and industrious. The discipline is good, and the average proficioncy ranges from fair to very fuir. In every respect but the attondance this school is in a satisfactory condition.

Burbenduma (N.V.):-Incidental inspection, 17th Norember, 1871.

$$
\text { Numbers enrolled:-Boye, 21; girls, } 16 \text {; total, } 37 .
$$

Numbers present:-1Boys, 18 ; girls, 10 ; total, 28.
Some new forms are needed. The schoolroom is kept neat and clean. The pupils are fairly orderly, and ecem attentive. The subjects inught do not include singing or drawing. The instruction is regulated and registered as required. The echool records aro neatly kept. The writing is fair.

Cibia (Y.):-Regular inspection, 8th September, 1871.
Numbers enrolled :-Boys, 1.6 ; girls, 22 ; total, 38.
Numbers present:-Boye, 10 ; girls, 11 ; total, 21.
The material condition is reasonably satisfactory. The pupilsare clean, orderly, and fairly attentive. Tho instruction is fairly regulated, and the teaching is intelligent, industrious, and energetic. The disciplino is firm and vigilant, and the arerage proficiency is about fair. Owing to the decrease of popalation, the attendance has fullen off.

Coxonolas (N.Y.):-Regular ingpection, 13th December, 1871.
Numbers enrolled:-Boys, 24; girls, 14; total, 38.
Numbers present:-Boys, 13 ; girls, 6 ; total, 19.
Hat-pegs and suitable furniture are needed. The pupils are tolerably orderly and attentive, but only moderately self-reliant. Singing and drawing are not tanght. The instructional documents are moderately arranged, and the work done is tolerably registered. The teaching is industrious, but neithor intelligent nor thorough. The discipline is tolerable, and the average proficiency is baroly moderate. On account of harresting, the attendance was small on the day of cxamination.

Carcoar (V.):-Regular inspection, 5th September, $18 \% 1$.
Numbers enrolled:-Boys, 24; girls, 26 ; total, 50.
Numbers present:-Boys, 21 ; girls, 19 ; total, 40.
The playground is too small, and proper eteps should be put at the main entrance to the sehool. The pupils are fairly orderly and attentire, and tolerably self-reliant. The lesson documents are fairly constructed, and the teaching is intelligent, but wanting in avimation and cnergy. The discipline needs more promptness and wigomr, nad the average proficiency is about tolerable.

Cowra (V.) :-Regular inspection, 28th August, 1871.
Numbers eurolled :-Boys, 39 ; girls, 23 ; total, 62.
Numbers present: - Boys, 30 ; girls, 22 ; total, 52.
The mutcrial condition of the school is good. The pupils are orderly, attentive, and self-reliant. The instruction is well regulated, and the teaching is intelligent, carnest, and industrious. The disciplinc is vigilant and sustained, and the arerage proficiency is rery fair. Latin and algebra are added to the proscribed subjects. Allogether, the gencral spirit and condition of this school are very pleasing.

Ctdgegong (N.Y.):-Regular inspection, 22ad May, 1871.
Numbers enrolled :-Boys, 18 ; girls, 11 ; totul, 29.
Numbers present:-Boys, 16 ; girls, 10 ; total, 26.
The playground is not enclosed, and the out-houses are in bad repair. The teacher's residence has recently been made tenantable. The pupils are tolerably orderly, but only moderately attentive. Singing is not taught, and drawing only partially. There are no Programmes, but the lessons aro tolerably is not taught, nind drawing only partially. Tho teaching is tolerably intelligent, but not sufficiently thorough, and the arerage proficiency somewhat exceeds moderate. The government is genial, but too slaek.

Culuennone (N.V.) :-Yncidental inspection, 24th Norember, 1871.
Numbers enrolled:-Boys, 16; girls, 27; total, 43.
Numbers present:-Boys, 13 ; girls, 23 ; total, 36 .
The ground is unfenced, and the closet is in need of repair; the roof of the schoolroom naso requires attention, and the desks need replacing. The pupils seem tolerably orderly and attentive. The school records are correctly kept, and the lessons are moderately regulated and registered.

Dennis Istaxid (N.Y.):-Regalar inepoction, 31st March, 1871.
Numbers enrolled :-Boys, 18 ; girls, 13 ; total, 31.
Numbers present:-Boys, 16; girls, 9 ; total, 25.
The material condition is tolerably satisfactory. The pupils are fairly regular and punctual; they are clean, and tolerably orderly and attentive, but only moderately solf-reliant. The instruction is only modorately regulated, and is badty registered. The school records require wore care than is bestowed modorately regulated, and is bady registered. energy, and the altainments are only passable.

Dunbo (V.) :-Regular inspection, 1st December, 1871.
Numbers curolled :-Boys, 23; girls, 26 ; total, 49.
Numbers present:-Boys, 16 ; girls, 19; total, 35 .
Now premises are required on a more central site, and new desks are aleo nceded. The pupils are fairly orderly and nttentive. The lessons are fairly arranged and registered, and the teaching is fairly careful and intelligent. The discipline is fairly effective, and the aftrinments are from tolerable to fair.

Doramana (N.V.):-Regular inspection, 11th October, 1871.
Numbers enrolled:-Boys, 19; girls, 18; total, 37.
Numbere present:-Doys, 14; girls, 15 ; total, 29.
The ground is fenced, and a closet has been erected since last inspection. Thore is no teacher's reeidence, and another closet is needed. The pupils are fairly orderly and attentire, and tolerably selfreliant. The instruction is tolerably regulated and carefully registered, and the tenching is caroful and industrious. The discipline is fuirly effective, and the results are about tolerable.

Eghintos (N.V.) :-Regular inspection, 10th Octobor, 1871.
Numbers enrolled :-Boys, 10; girls, 13; total, 23.
Numbers present;-Boys, 7; girls, 12 ; total, 19.
The teacher's residence is too small, and a book-press and well are nceded; otherwise the material condition is fair. The pupils are neither regular nor punctual, and only moderately orderly and attentive. The instruction is not regulated, and the lessons are unregistered. The teaching is desultory, and wanting in care and industry. The discipline is slack, and the average proficiency is indifferent. The teacher is in bad health; she has since resigned.

Evass' Paans (V.):-Regular inspection, 21st March, 1871.
Numbers enrolled :-Boys, 18; girls, 17 ; total, 35.
Numbers present:-Boys, 15 ; girls, 14 ; total, 29.
The premises are in need of repair, to effect which, steps have been talen by the School Board. The pupile are irregular, but fairly orderly and attentive. The teaching is energetic, and is regulated with tolerable intelligence. The discipline is prompt and watchful, and the average proficiency is about tolerable. Singing is not included in the subjects of instruction.

Ftsp River Crfer (V.):-Regular inspection, 28th July, 1871.
Numbers enrolled:-Boys, 11 ; girls, 9 ; total, 20.
Numbers present:-Boys, 6 ; girls, 3 ; total, 9.
Tho chimney needs completion. The pupils are very irregular, but moderately punctual, orderly, and attentive. Their power of mental effort is emall. The instruction is neither regulated nor registered, and the teaching seems desultory, apathetic, and neither careful nor industrious. The discipline is slack, and the averago proficiency is barely indifferent.

Fredehicktowy (N.Y.) :-Incidental inspection, 19th December, 1871.
Numbers enrolled :-Boys, 15 ; girls, 14 ; total, 29.
Numbers present:-Boys, 3 ; girls, 5 ; total, 8 .
The organization has been improved by new and suitable desks. The closet is in need of some repair, but otherwise the material condition is satisfactory. The pupils present were clean, and eeemed The school records are kept with neatuess and coments are moderately arranged, and the work is registered. The school records are kept with neatness and carc. The attendunce was smaller than usual, from various circumstances.

Grevfell (V.) :-Regular inspection, 23rd August, 1871.
Numbers enrolled :-Boys, 56; girls, 85; total, 01.
Numbers present:-Boys, 38 ; girls, 27 ; total, 65 .
The material condition is very bad. The playground is unfenced, the building itself is wretched, and there is no teacher's residence. Since the date of inspection, however, the school has been opened in new and thoroughly suitable premises. The pupils are fairly clean and orderly, but they are barely moderately attentive, and are weak in mental eflort; they are aleo rory irregular. The discipline is is wanting in care, thoroughness, and penetrative force. The attendants nre tolerable, but the teaching is wanting in care, thoroughess, and penetrative force. The attendance since the new schoolroom wna
opened has been nearly trebled under the present teacher.

Girong (V.) :-General inspection, 21st December, 1871.
Numbers emrolled:-Boys, 26 ; girls, 26 ; total, 52.
Numbers present :-Boys, 24 ; girls, 25 ; total, 49.
The material condition of the school is good. The pupils aro clean, orderly, and fairly attentive. The lesson documents are fairly arranged, and the teaching is careful and industrious. The discipline is mild, but fairly firm and watchful, nnd the arerage proficiency somewhat excecds tolerable. Considering the previous condition of the pupils, fair progress has been made.

Gontawang (N.V. :-Incidental ingpection, 24th November, 1871.
Numbers onrolld $\mathrm{d}:-$ Boys, 14 ; girls, 23 ; total, 37.
Numbers prosent:-Boys, 9 ; girls, 16 ; total, 25.
The teacher's residence needs lining, papering, and painting, and the closet is in bad repair ; the eroction of a new one is necessary when the proposed schoolroom is being built. Tho pupils are fairly clean and orderly. The instruction is fairly regulated and registered, and the records are carcfully lept.

Hargrafks (N.V.) :-Regular inspection, 21st November, 1871.

$$
\begin{aligned}
& \text { Numbers enrolled :-Boys, } 30 \text {; girls, } 32 \text {; total, } 62 . \\
& \text { Numbers present:-Boys, } 25 \text {; girls, } 28 \text {; total, } 53 .
\end{aligned}
$$

The material condition is not of $a$ astiefactory character, the sehool being conducted in a temporary building. Steps are being taken for the crection of new premises. The pupils are clean, orderly, and seemingly farly attentive. The instruction is regulated, and the work dono is registered. The school
recorde are correctly kept.

Hartley (V.) :-Rogular inspection, 21et June, 1871.
Numbers enrolled:-Boys, 23 ; girls, 14; total, 37.
Numbers present:-Boys, 13 ; girls, 9 ; total, 22.
The roof, which is of bark, is in need of repair. A teacher's residence has been provided since the date of inepection. The pupils are tolerably orderly and attentive, and moderately self-reliant. The instruction is moderately regulated, and the tenching is energetic and tolerably intelligent, but wanting in penetrative forcc. The results range from moderate to tolerable, and the discipline is tolerably effective.

> Hmis End (V.) :-Gencral inspection, 15th and 17th May, 1871.
> $\quad$ Numbers enrolled :-Boys, 95 ; girls, 67 ; total, 162.

Numbers present:-Boye, 68; girls, 49; total, 117.
A new schoolroom is needod, the prosent one being far too small. The tank in its present cond dition is unserviceable; otherwise the material organization is good. The pupils are fairly orderly and tolerably attentive, but only moderately self-reliant. The instruction is tolerably regulated, and the teaching is industrious, but wanting in thoroughness and penctratise force. The government needs greater promptness and vigour, and the nttainmente are only partially eatisfactory.

Itrond (N.V.) :-Regular inspection, 1st June, 1871.
Numbers crrolled :-Boys, 23 ; girls, 24 ; total, 47.
Numbers present :-Boys, 19 ; girls, 16 ; total, 35.
The supply of working materiale and furniture is but seanty, and the school is without playground, closets, or tacher's residence. As soon as a suitable site is obtained it is intended to move for the erection of suitable vested promises. The pupila aro moderately orderly and self-reliant. The instructional documente are moderately arranged, and the teaching is careful, but only moderately intelligent or vigorous. The aperage proficiency is but moderate; the grammar and geography of the third class are specially defective.

Tronilars ( $\overline{\text { I }}$ ):-General inspection, 7th December, 1871.
Numbers onrolled:-Boys, 17; girls, 19; total, 36.
Numbers present:-Boys, 14 ; girls, 15 ; total, 29.
The school premises are ner and well furnished. The playground is fenced, and furnished with the necescary outhouses. The pupils are fairly orderly and attontive, and tolerably self-reliant. The lesson documents aro fairly arranged, and the teaching is energetic and fairly intelligent. The discipline is prompt and rigorous, and the attainments are from tolerable to fair. Owing to the remoral of families to Guigong, the attendance at this school has decreased.

Kirkoonnel (V.) :-Regalar inspection, 9th March, 1871.
Numbers enrolled :-Boys, 35 ; girls, 20; total, 55.
Numbers present :-Boys, 23 ; girls, 10; total, 42.
The closets are in need of repair ; otherwise the material condition is good. The pupils are clean, orderly, and fairly self-reliant. The discipline is healthy, the instruction is well regulated, and the attainments are reasonably satisfactory. The pupils are only tolorably regular, and the attendance is likely to decrease, owing to the removal of families from the district on account of the progress of the Railway.

Limelines (V.) :-Regular inspection, 28th September, 1871.
Numbers enrolled :-Boys, 17 ; girls, 9 ; total, 26.
Numbers present:-Boys, 13; girls, 5 ; total, 18.
The fencing needs another rail or paling to keep out cattle. The pupils are tolerably clean, attentive, and self-reliant. The lesson documents are fairly arranged, and the teaching seems careful, but wanting in energy. The discipline is tolerably effective, and the nverage proficiency is about tolerable. The attendance for the population of the locality is unsatisfactory.

Jowther (V.) :-Regular inspection, 26th June, 1871.
Numbers enrolled:-Boys, 9 ; girls, 6 ; total, 15.
Numbers present:-Boys, 9 ; girls, 6 ; total, 15.
The school is well furnished, and has a fair supply of working materials, but some repairs are needed to the building. The classification is rery injudicious, and the quarters of enrolment on the Programmes are grossly incorrect. The pupils are fairly orderly, attentive, and self-reliant. The discipline is tolerable, and the proficiency is nearly fair. The lesson documents are moderately arranged, and the teaching is energetic, but only moderately penetrative.

Luornow (N.F.) :-Regular inspection, 18th and 19th December, 1871.
Numbers eurolled:-Boys, 25 ; girls, 28 ; total, 53.
Numbers present:-Boys, 20 ; girle, 20; total, 40.
The playground is unfonced, and tho closot is in need of repair. The pupils are fairly orderly, and tolerably attentive and self-reliant. The lessons are tolerably arranged, and the work done is registered. The teaching is fairly iutelligent and tolerably careful, but should adhere more closely to the standard. The discipline is kindly but firm, and the avorage proficiency is about tolerable.

> Main Camp (N.V.) :--Regular inspection, 19th June, 1871.
> Numbers enrolled :-Boys, 4.1; girls, 29 ; total, 70.
> Numbers present:-Boys, $30 ;$ girls, 19; total, 49.

The schoolroom is fairly supplicd with working materials and furniture. The playground is unfenced. The pupils when under examination are tolerably solf-reliant; they are fairly orderly and attentive. The instructional documents are tolerably arranged, and the teaching-especially of the first. class-is careful and painstaking. The discipline is firm and watclful, and the arerage proficiency is from tolerable to fair.

Marcivale (V.) :-Regular inspection, 10th July, 1871.
Numbers enrolled :-Boys, 15 ; girls, 12; total, 27.
Numbers present:-Boys, 15 ; girls, 12 ; total, 27.
Thero is no proper teacher's residence, and the playground is unfencod, and withont closets; the schoolroom is also in need of repair. The regularity is bad, but the order and attention aro fair. The instruction is tolerably regahaled, and the teaching is eareful, industrious, ond thorough. Ihe discipline is henlthy, and the arerage proficiency is tolemble.

Mfanow Rat (V.) :-Regular inspection, 29th June, 1571.
Numbers enrolled :-Boys, 20 ; girls, 5 ; total, 25.
Numbers present:-Boys, 18 ; girls, 5 ; total, 23.
The sehoolroom is suitably furnished aud supplied with school materials. Some repairs are needed, for effecting which action has been tnken. The pupils' power of application is weak, and they are only moderately orderly and attentive. The Programmes are meagre, and the teacling is defection in energs and thoroughness. The government is weak, and the arerage proficiency is not satisfactory. The elagsification is iunppropriste.

Mitchell's Crfer (V.) :-Regular inspection, 30th June, 18 h1.
Numbers enrolled:-Boys, 40 ; girls, 32 ; total, 72.
Numbers present:-Boys, 32 ; girls, 25 ; total, 57.
The ceiling is in need of repair, and more desks aro needed for the present altendance. The classification is tolerable, and the instruction is moderately arranged. The teaching is careful, but wanting in mental rigour. The pupils are tolembly orderly and attentive; their arerage proficiency is modernte The government needs greater vigour. The attendance is satisfactory.

Mowosg (V.) :-Regular inspection, 11th December, $18 \% 1$.
Numbers enrolled :-Bors, 57; girls, 43 ; total, 100.
Numbers present:-Bors, 43 ; girls, 27 ; total, 70.
The arection of a new schoolroom, or of an addition to the present building, is desimble. The closets are in bad repair, and doorsteps and hat.-pegs are also needed. The pupils are fairly orderly attentive, and self-reliant, The instruction is fairjy regulated, and the deaching is earnest; but not sufficiently penetrative and thorough in the lower classes. The school records are badly kept, and indicate carelessness and noglect. The arerage proficiency of the whole school is from tolerable to fair. Inatin is taught in Bddition to the subjects preseribed.

Mount Macqcarie (V.):-Regular inspection, 6th September, 1871.
Numbers enrolled :-Boys, 16 ; girls, 18 ; total, 34
Numbers present:-Boys, 11 ; girls, 17 ; total, 28.
The schoolroom is in need of repair. Tho plastering has given way in rarious places, and the slabs have decayed and will need replacing. The pupils are tolerably orderly and attontive, but their power of application is only moderate. The lesson documents are not arranged in some cases with a close adheronco to the standard. The teaching is animated, but is wanting in thoroughness and penotrative force. The diecipline is mild, but not sufficiently prompt, and the results aro on the whole barely moderate.

> Modgre $(V .-$ Boys $):-$ Incidental inspection, 17 th November, 1871.
> Numbers eurolled :-Boys, 87 ; total, 87.
> Numbers present:-Boys, 51 ; total, 51.

The schoolroom is suitable, and properly furnishel. The pupils are orderly and attentive. The iustructional documents are properly arranged, and the lessons are registered. The sehool records aro neatly and correctly kept. Singing is not taught in this department.

Modgex (V.-Girls) :-Incidental inspection, 17th November, 1871.
Numbers enrolled:-Girls, 72; total, 72
Numbers present:-Girls, 44; total, 44.
The schoolroom is not a good one, but it is suitably furnished. The crection of new premises is desirable. The pupils appear clean, orderly, and attentive. The lessons are regulated and registered, the school records are correctly kept, and the discipline seems fairly effective

Midges (V,-Infants) :-Incidental inepection, 17ti Norember, 1871. Numbers emrolled :-Boys, 62; girls, 53; total, 115. Numbers presont:-Boys, 37 ; girls, 36 ; total, 73.
The material condition is fair, but the room is too small. The pupils are clenn, orderly, and attentive. The school records are correctly kept, the instruction is very fairly regulated, and the teaching seems conducted with energy and inteligence.

Offir Rosd (V.):-Regular inspection, 16th Marcl, 1871.
Numbers enrolled:-Boys, 18 ; girls, 10 ; total, 23.
Numbere present:-Boys, 10 ; giris, 8 ; total, 13 .
The building and fences are in need of repair. The pupils are clean, but the order and attention are indifferent. The subjects do not include singing or drawing. The instruction is indifferently regulated, and the teaching is defectivo in intelligence and energy. The goverument is weak, and the attainmonts are barely moderate. The pupils show little self-reliance, and do not answer with promptness or accuracy.

Oranol (V.):-Regular inspection, 15th and 18th December, 1871.
Numbers enrolled :-Boys, 76 ; girls, 44; total, 120.
Numbers present:-Boys, 67 ; girle, 37 ; total, 94 .
A shed and uriual hare been erected during 1871. The material condition is satisfactory. The pupils are orderly, ond fairly attentive and self-reliant. The instruction is properly regulated and registered, and the teaching is earnest and industrious, The discipline is fuirly effective, but scarcely strict enough, and the average proficiency is a little over fair. All the subjects prescribed are taught,
and the attendance has steadily increased during the year. and the attendance has steadily increased during the year.

Pres (V.) :-Regular inspection, 3rd May, 1871.
Numbers cnrolled:-Boys, 21 ; girls, 14 ; total, 35.
Numbers present: --Doys, 14; girls, 10; total, 24.
The roof is in need of some reparr, but otherwise the material condition is not unsatisfactory. The pupils aro clean, and tolcrably orderly and attentive ; they are only moderately self-reliant. The lesson documents are fairly arranged, and the teaching is careful, but is wanting in energy and penetrative force The average proficiency slightly excecis moderate. The discipline is too slack, and the average attendance is not of a satisfinctory character.

Piplctay Criek (V.) :-Incidental inspection, 23 rd Novcmbor, 1871.
Numbers enrolled:-Boys, 35 ; girls, 25 ; total, 60.
Numbers present:-Boys, 1.0 ; girls, 12 ; total, 31.
A detached kitchen is needed, and the school clock is out of repair. The pupils seem tolerably orderlg. The instructional documents are only moderately arranged, and the regular registration of the lessons seems doubtful. From the neglect of the teacker to apply for one, there is no fee account book in the school.

Rockiey (V.) :-Regular inspection, 30th March, 1871.
Numbers enrolled :- Boys, 15; girls, 21. ; total, 36.
Numbers present:-Boys, 15 ; girls, 19; total, 34.
The playground is unfenced, and the closet is in an indifferent condition. Some repairs have recently beeu effected on the building, but more desks are needed. The pupils are clean, tolerably orderly and attentive, and moderately self-reliant. The teacling is moderately regulatod, but is wanting in energy and intelligence. Tho discipline is strict, and the arerage proficiency somewhat exceeds moderate. Compared with its former condition, the state of the school is now promising.

Rydal (V.) :-Regular inspection, 28th June, 1871.
Numbers enrolled :-Boys, 37 ; girls, 24; total, 61.
Numbers prescnt:-Boys, 35 ; girls, 24 ; total, 59.
The playground is not fenced, and there is no teacher's residence ; otherwise the material condition is good. The pupils are orderly, and fairly attentive and accurate. Tho instructional documents are properly arranged, and the teaching is earnest and intelligent. The discipline is healthy, and the average proficiency is from tolerable to fair.

Ryistone (V.) :-Regular inspection, 14th November, 1871.
Numbers enrolled:-Boys, 28 ; girls, 36 ; total, 64 .

$$
\text { Numbers present :-Boys, } 24 \text {; girls, } 26 \text {; total, } 50 .
$$

The ercection of another room and of a verandah to the teacher's residence is dcsirable. The pupils are fairly orderly and self-reliant. The upper division of the first class should be in the second. The instruction is fairly regulated and registcred, but is not in some subjects kept close to the standard. The teaching is fairly intelligent and carcful, but needs more thorougloness in some subjects: The discipline is fairly effective, and the results are from tolerable to fair.

String Flat (N.V.):-Incidental inspection, 23rd November, 1871.
Numbers enrolled:-Boys, 17 ; girls, 22 ; total, 39.
Numbers present:-Boys, 16 ; girls, 18 ; total, 34.
There is a alab residonce of two rooms, with bark roof, in an unfinished state, and there are no closets. Part of the school ground is fenced. The schoolroom needs lining or plastering, and a chimney before winter. No provision is made for water. The pupils arc clean and tolerably ordorly. The school records are correctly kept, and the instruction is tolerably regulated and registered. The school has been only a short time in operation.

Sprtno Grove (N.V.) :-Regular inspection, 20th December, 1871.
Numbers enrolled:-Boys, 44; girls, 21 ; total, 65.
Numbers present:-Boys, 21 ; girls, 8 ; total, 29.
New desks hare been obtained since last inspection, and there is a moderato teacher's residence, but the playground is unfenced. The erection of new vested premises is proposed by the Board as soon as a euitable site can be obtained. The pupils are fairly orderly, but ouly tolerably attentive and selfreliant. The lesson documents are fairly arranged, and tho teaching is carcful but not sufficiently close to the "standard." The discipline is calim but firm, and the average proficiency is from tolerable to fair. Owing to harvesting, the attendance was much smaller than usual on the day of inspection.

Tambaroora (V.) :-Regular inspection, 16th May, 1871.
Numbers enrolled:-Boys, 39 ; girls, 38 ; total, 77.
Numbers present:-Boys, 33 ; girls, 28 ; total, 61.
The fences are in need of repair. The pupils are tolerably orderly, but only moderately attentive and self-reliant; they seem little inclined to mental exertion. About two-thirds of the scholars are in the first class. The instruction is passably arranged, and the teaching is intelligent, but is defective in thoroughness and penetrative force. The government is tolcrable, and the avcrage proficiency is from moderate to tolerable.

Teapor Swanip (V.):-Regular inspection, 19th and 20th April, 1871.
Numbers emrolled :-Boys, 16; girls, 17 ; total, 33.
Numbers present:-Boys, 13 ; girls, 15; totul, 28.
The faterial condition of the school is, on the whole, good. Tho pupils are very irregular, and only tolerably clenn, orderly, or attentive. Except singing, the subjects prcseribed are tanght. The lesson documents are tolerably arranged, and the teacking is industrious, but wanting in impressivencss. The discipline needs more promptness and rigour. The nttainments are not, on the whole, satisfactory; the average being about moderatc. The general attendnnec is small for the population.

Trndale's Howlow (N.F.):-General ingpoction, 5th April, 1871.

$$
\text { Numbers enrolled :-Boys, } 19 \text {; girls, } 22 \text {; total, } 41 .
$$

Numbers present:-Boys, 14 ; girls, 20 ; total, 34.
There are no elosets or tencher's residence, and the playground is not cleared: The building is suitable and well furnished. The pupils are in many eases irregular; they are fairly orderly and attentire, and their self-reliance is tolerable. The teaching is careful and industrivus, but wanting in energy. The government needs more promptness and vigour; the instruction is tolerably regulated, and the proficiency is tolerable. This is one of the temporary Railway scloois.

$$
\text { Trungex Cafer (N.V.):-General insjection, 18th April, } 1871 .
$$

Numbers enrolled:-Boys, 34; girls, 34; total, 68.
Numbers present:-Boys, 25 ; girls, 34 ; total, 59.
There is uo teacher's residence, and the seloolroom is in want of lining. A stove or chimney is also required. The pupils are clean, and tolerably orderly and attentive, but their power of mental effort is weak. The subjects taught do not include object lessons, singing or drawing, and the state of the school records shows gross carelessness. The instruction is neither regulated nor registered; the discipline is tolerable, and the proficiency is not satisfactory.

Walleiowang (N.V.) :-Regular inspection, 15th June, 1871.
Numbers enrolled :-Boys, 30; girle, 28; total, 58.
Numbers presont:-Boys, 19 ; girls, 17 ; total, 36.
The furniture is neither sufficient nor suitable: suitable desks are much needed. The pupile are very irregular, and only tolerably ordorly and attentive. Their answering is neither prompt nor accurate. The classification is injudicious. The instruction is passnbly regalated, nend the teaching is inductrious, but fails in vigour and penetrative force. The averago proficiency is only moderate, and the government needs greater oncrgy and vigilance.

> Watere Elat (V.) :-Regular inspection, 4th May, 1871.
> Numbers enrolled:-Boys, $50 ;$ girls, 57 ; total, 107.
> Nombers present:-Boys, 25 ; girls, 27 ; total, 52.

The material condition is rery bad, but steps have been taken to erect a new schoolroom. The pupils are very irregular; they are tolerubly clean, orderly, and attentive. The instruction is tolerably regulated, and the teaching is industrious and careful. The government is strict, and the average proficiency is nearly tolcrable.

Welinggtos (V.) :-Regular inspection, 29th November and 4th December, 1871. Numbers enrolled:-Boys, 49 ; girls, 34; total, 83. Numbers present:-Boys, 44; girls, 28 ; totul, 72 .
On the whole the material condition is good, but the crection of a shed and urinal is desirable The pupils are clean, orderly, and very attentire and self-reliant. The lesson documents are well arranged. and the tegehing is earnest, intelligent, and very careful. 'The discipline is good, and the aperage proficiency is very fair. The attendauce has largely increased under the prosent tencher. This sehool is doing well in every respect.

Whits Rock (N.V.)-Rogular inspection, 20th March, 1871.
Numbers emrolled :-Boys, 14 ; girls, 22 ; total, 36.
Numbers present:-Boys, 7 ; girls, 11 ; total, 18.
The material condition is only moderate. A supply of suitable desks is needed. The pupils are irregular, and neither orderly, attentive, nor self-rcliant. The instructional documents are worthlesg, and the teaching is neither encrgetie nor intelligent. The school records are badly kapt, the government is feeble, and the aitaiuments are very unsatisfactory.

Winbermdale (N.V.) :-Regular inspection, 27th March, 1871.
Numbers enrolled:-Boys, 9 ; girls, 10 ; total, 19.
Numbers present:-Boys, 9 : girls, 10 ; total, 19.
The material condition is indifferent. The building is in need of repair ; the furmiture is of a clumsy description, and therc is no playground close to the school. The pupils are fairly clean, but only moderately orderly or attentive. They are listless, and disinclined to mental exertion. There aro no Programmes, and the teaching is neither energetic, careful, nor inteligent. The discipline is not effective, and the proficiency is barely indifferent.

Windeyer (V.) :-Incidental inspection, 20th November, 1871.
Numbers enrolled :-Boys, 20 ; girls, 18 ; total, 38.
Numbers present:-Boye, 14; girls, 17; total, 31.
The playground requires clearing and fencing, and the verandah of the teacher's residence is in need of repair. The pupils seem orderly and tolerably attentive. Tho instructional documents are fairly arranged, and the lessons given are registered. The school records are neatly and correctly kept. Owing to the opening of another school about two miles off, the attendance has decreased.

## PROVISTONAL AND HALF-TIME SOHOOLS

Bace Crees:-General inspection, 25th August, 1871.

$$
\begin{aligned}

$$

A. new schoolroom has been crected, and the playground is being clenred. No closets have reti been erected. The pupils are very irregular, only moderately clean or orderly, and neither self-reliant, nor attentive. The instruction is unregulated, and the teaching is desultory, mechanical, and without animation or onergy. The governnent is feeble, and the attuinments ore unsatisfactory. The teacher has aince resigned.

Blackian's Fuat:-Regular inspection, 14th Jume, 1871.
Numbors enrolled:--Boys, 11 ; girls, 12 ; total, 23.
Numbers present:-Boys, 6 ; girls, 8 ; total, 14.
The building is tolerably suitable, but the plarground is neither cleared nor fenced. The stock of books is sufficient, but the apparatus is scanty. The pupils are moderately orderly, attentive, and selfreliant. The instruction is badly regulated, and the teaching is industrious, but of a mechanical character The avcrage proficiency and the government are indifferent.

Brack Sprivgs:-Incidental inspection, 22nd December, 1871.
Numbers enrolled :-Boys, 11 ; girls, 17 ; total, 28.
Numbers present:-Boys, 7 ; giris, 11 ; total, 18.
The schoolroom is rathor snmall, and the playground is neither fenced nor cleared, and is without closets. A ridgeboard is necded for the building. The echool records are incorrect in some particulars, and the programmes are meagre documents. The rato of feo fixed by the School Committee since aid was oblained for the school seems unreasonably low for the circumstances of the prople.

Burnt Yards:-General inspection, 7th September, 1871.
Numbers enrolled:-Boys, 16 ; girls, 13 ; total, 29.
Numbers present:-Boys, 7 ; girls, 5; total, 12.
The playground is unfenced, and there are no closets. The roof of the building needs repair, and the furniture is badly arranged. The site is not now central. The pupils are tolerably clean, orderly, and attentive. The lesson documents arc compiled with moderate skill, and the teaching is careful and industrious, though wanting in intelligence and energy. The discipline is mild, and the average proficiency is moderate.

Calabash :-Ctencral inepection, lith August, 1871.
Numbers enrolled:-Boys, 16 ; girls, 6 ; total, $2 \cdot 2$.
Numbers present:-Boys, 14 ; girls, 6 ; total, 20.
The building is tolernbly euitable, but is not properly furnisbed, and the playground is mfeneed and without the necessary out-houscs. No school materials had been received at the date of my visit The pupils are very unpunctunl, and only moderately clean and tidy. The classification is bad, the instruction is not regulated, and tile teaching is lifeless and mechnical. The discipline is slack, and the proficioncy is small. Butler's Roman Catholic Catechism was found in use in this school, but has since been discontinued. The teneher has resigned.

Catoola :-General inppection, 19th April, 1871.
Numbers enrolled:-Boys, 7 ; girls, 14; total, 21.
Numbers present :--Boys, 7 ; girls, 13; total, 20.
The building is only moderately suitable, and there are no closets or playground. It is proposed, howover, to build a new schoolrom. The pupils are clean, but neither orderly nor attentive, being restless, noisy, and talkative. The lessondocuments ure indifferent, and the teaching and discipline are alike freble. Singing and dratwing are not taught, and the average proficiency is barely moderate. The attainments are not likely to improve under such lax government:

Cow Flats :-Regular inspection, 4th April, 1871.
Numbers enrolled :-Moys, 1.3 ; girls, 1.5 ; total, 28.
Numbers present:-Boys, 12 ; girls, 13 ; total, 20.
Therc are no closets or teacher's residence, but aone new desks linve been provided since last inspection. The pupils are fairly clean, and moderately orderly and attentive, but weak in self-reliance The instruction is only moderntely regulated, but the teaching is earnest and industrious. The discipline is mild, but needs more promptness, and the attainments are not, on the whole, satisfuctory. Many of the pupils are very irregular.

Fitzonestd Valizis:-General inspection, 21st April, 1871.
Numbers enrolled :-Bors, 8 ; ginls, 12 ; total, 20.
Numbers present:-Boys, 7 ; girls, 12; total, 19.
The building is only moderately suitable, and is not well or centrully situated. The playground is neither cleared nor fenced, and is not furnished with the necessary outhouses. The echoolroom needs flooring. Singing and drawing are not taught; the instruction is neither regulated nor registered, and the teiching is meagre and mechanical. Tho pupils are neither orderly nor attentive, and seem unacuetomed to mental exertion; they failed in nearly every subject except reading. The teacher resigned soon nfter the examination.

Lagoon (Campheme's River) :-Regular inspection, 2sth March, 1871.
Numbers emrolled :--Boys, 8; girls, 13; tolal, 21.
Numbers present:-Boys, 7 ; girls, 13 ; total, 20.
The roof of the building is in need of repair. The material condition is moderate. The papils are fairly clean, but ouly moderately orderly and attentive; they are shy, and neither prompt nor accurate in answering. Thoir mental powor is amall, and their attainments are meagre. Programmes are in course of constmiction, and the discipline seems mild but watehful. The present teacher had just opencd the school, which is likely to improve under her charge.

Macquabie Pasins:--Regular iuspection, 4th Ayril, 1871.
Numbers enrolled :-Boys, 11 ; girls, 8 ; total, 19.
Numba enrolled:-Boys, 11 ; gins, 8 ; total, 19.
Numbers prosent:-Boys, 9 ; girle, 7 ; total, 16 .
Tho material condition is, on the whole, tolerable. The papils are tolerubly orderly and attentive, and show moderate power of application. The instruction is indifferently regulated, hut the teaching seems careful, though defective in intelligenco. The government is firm, and the average proficiency is barcly tolerable. Except drawing, the subjects prescribed are taught.

Mordigulay :-General inspection, 5th December, 18hl:
Numbers enrolled :-Boys, 11 ; girls, 12 ; total, 23.
Numbers present:-Boys, 6 ; girls, 10 ; total, 16.
The building is of bork, and is unfoored. The roof nceds repair. The playground is unfenced, and without closets. The furniture is of a rough, but tolerably suitable character. The pupils are tolerably orderly, attentive, and self-reliant. The instruction is regulated with barely moderato skill, and the teach ing seems painstaking. The discipline is tolerably effective, and the attainments are aboult tolcrable.

Mountain Run :-Regular inspection, 29th March, 1871.
Numbers enrolled :-Boys, 16; girle, 6; total, 22.
Numbers present:-Boys, 12 ; girls, 3 ; totai, 1 .5.
There aro no closets or teacher's residence, and the playground is neither fenced nor cleared; the schoolroom also nceds flooring. Altogether the material condition is unsatisfactory. The pupils are irre gular, and very unpunctual; they are tolerably clean, but only moderately orderly or aitentive. The teaching is careful, but wanting in method aud intelligence. The lesson documents are in course of conetruction. The discipline is mild, and tho attainments are meagro. The sclool has only recently been opened after being closed for some months.

Mouxt Vitroris :-Regular inspection, 13th Junc, 1871.
Numbers enrolled :-Boys, 1.2 ; girls, 11 ; total, 23.
Numbers present:-Boys, 6 ; girls, 6 ; total, 12.
The material condition is on the whole tolerable, and the sapply of working materials is sufficient The pupils are tolerably orderly and attentive, bat only moderately self-reliant. The lesson document aro indifferent, but the teaching is animated and tolerably intelligent. The arerage proficiency range from moderate to tolerable. The discipline is mild, but tolerably firm. The attendance was smalior than usual on the day of examination.

Mundorama Ponds:-Rcgular iuspection, 31st August, 1871.
Numbers curolled:-Boys, 10 ; girls, 13 ; total, 23.
Numbers present:-Boys, 9 ; girls, 10 ; total, 19.
The building is tolerably suitable, but tho playground is unfenced, and the stock of echool materiuls is scanty. The pupils are moderatcly orderly and attentive, but weak in self-application. The work is not properly registered or programmed, and the teaching is dosultory, though upparently industrious. Tho discipline is slack, and the arerage proficiency is from indifferent to moderate.

Nrwies :-General inspection, 6th December, 1871.
Numbers enrolled :-Boys, 1.5 ; girle, 16 ; total, 31.
Numbers present:-Boys, 9 ; girls, 7 ; total, 16.
The schoolroom and teacher's residence are both constructed of bark. The playground is unfenced, and the building nceds flooring and some repairs to the roof. The furniture is only moderately suitable The order, uttention, and self-application of the pupils are tolerable. The instruction is moderately regu lated, and the teachiug is tolerably intelligent and fuirly carcful. The discipline is tolerably effective, and the average proficiency is ncarly tolerable. The attendance was small, owing to barvesting oper ations.

Ponto:-General inspection, 30th November, 18\%1.
Numbers enrolled :--Boys, 11; girls, 13; total, 24.
Numbers present:-Boys, 7 ; girls, 9 ; totnl, 16
The sehoolroom is too narrow, is not properly furnished, and needs flooring. The order and attention are tolerable, and the power of self-reliance is moderate. The instruction is not properly regulated, and the teaching is careful, but wanting in animation.

Pyramide:-Regular inspection, 12th May, 1871.
Numbers enrolled :-Boys, 16 ; girls, 12 ; total, 28.
Numbers present:-Boys, 15 ; girls, 8 ; total, 23.
The building is unfloored, and the desks are badly arranged. The playground is unfeuced, and there are no closets. The pupils are tolerably clean, orderly, and attentive, but only moderately sclf reliant. The Programmes are moderately suitable, and the teaching is tolerably careful, but is defectiro in skill. Tho discipline is moderately clicetive, and the resalts range from moderate to tolerable. Action is proposed for the establishment of a Public School

Raglax :-Gcneral inspoction, 22nd March, 1871.
Numbers enrolled :-Boys, 9 ; girls, 9 ; total, 18.
Numbers present:-Boys, 6 ; girls, 6 ; total, 12.
The sedoolroom is too small, but is moderately supplied with furniture. The pupils are clean, tolembly orderly, and moderately attentive. The tenching is careful and earnest, but regulated with only moderate intolligence. The discipline is mild but firm, and the averago proficiency is about moderate. Singing and draving are omitted from the list of subjects taught.

Soutir Ausiey :-Regular inspection, 17th March, 1871
Numbers enrolled:-Boys, 15 ; girls, 17 ; total, 32.
Numbers present:-Boys, 5 ; girls, 6 ; total, 11 .
The building is rather small and badly lighted, and the furniture is scunty and clumsy. The pupils are very irregular; they are neither orderiy; attentive, nor self-reliunt. Thero are no lesson documents. and the teaching is desultory, meagre, and wanting in inteligence and eacrgy. The school records are badly kept, and the proficiency is far from satisfactory. The teacher has since left the service.

Tarus :-Gcueral inspection, 2nd June, 1871.
Numbers enrolled :--Boys, 11 ; girls, 9 ; total, 20.
Numbers present:-Boys, 11 ; girls, 8 ; total, 19.
Tho state of the building is disgracefal; it is almost roofless, and the wind hus free recess through the openings between tho slabs. Steps have since been taken for the erection of another building. The punctuality is bad, and the ordor and atteution are indifferent. The subjects do not include dictation, object lessona, singing, or drawing; und grammar aud geography are failures. The mental power of the pupils is foeble, and their attainments are meagre. The discipline is wanting in energy and vigilance, and the instruction is neither regulated nor registered.

Tifree-mime Resif (H.TT.) :-Regular inspection, 21st August, 1871.
Numbers eurolled :-Boys, 13; girls, 10; total, 23.
Numbers present:-Boys, 12 ; girls, 7 ; total, 19.
Tho playground is noither cleared nor fenced; the schoolroom needs flooring and saitable furniture, and closets are required. Somo of the pupils are neither clean nor tidy, and their power of attention is snall. The instruction is tolerably regulated and registered, and the traching is industrious. The average proficiency is indifferent. The present teacher has been only a slort time in charge.

Thperahy Golly (H.-T.)-General inspection, 21st April, 1871.
Numbers enrolled:-Boys, 14; girls, 24; total, 38.
Numbers present:-Boys, 13 ; girls, 21 ; total, 34.
The building is too narrow; the playground is unfencod and without closets, and the furmiture is insumfient. The pupils aro tolerably orderly and attentive, and moderately self-reliant. The discipline is tolerably effective, and the arerage proficiency is moderate. The lesson documents are tolerably arranged, and the teaching is careful und industrious. This has since become a Public School.

Trendon Grangr:-Regular inspection, 20th April, 1871.
Numbers enrolled :-Boys, 13; girls, 5 ; total, 18.
Numbers present:-Boys, 13 ; girls, 5 ; total, 18.
The tencher is furnished with a residence, aud thero is a good playgronnd, but it is unfenced. The pupils aro clenn, orderly, and attentive; they are self-reliant, and answer with reasonable accuracy. The teaching is crrnest, industrious, and thorough, and the results are of a satisfactory character. The discipline is prompt and effectire, and the children manifest consideruble mental power. Altogether the generul spirit and condition of this school are pleasing.

Vittoria :-Regular inspection, 26th September, 1871.
Numbers enrolled :--Boys, 14 ; girls, 16 ; total, 30.
Numbers present:-Boys, 8 ; 'girls, 13; totel, 21.
The phayground is neither cleared nor fencel, and is without closets. A chimney or stove is needed for the schoolroom. The pupils are moderately orderly and attentive, but their power of mental effort is weak. The classifiealion is bad. The lessons are not registered, and only partially programmed; and the tenching is industrious, but wanting in inteligence aud thoroughess. The government noeds -more rigilanee, and the averuge proficiency is iadifferent.

## CAMDEN DISTRICT-GENERAL REPORT FOR 1871.

In 1871 there were 130 schools, or departments, on the list for this district, riz. :-

> 53 Public Schools.
> 12 Half-tiune Schools.
> 20 Provisional Schools.
> 22 Church of Enghand Schools.
> 17 Roman Catholic Schools.
> 4. Presbyterinn Schools.
> 2 Wesleyan Schools.
> 130.

In the course of tho year the following changes took place:-The C.E. sehools nt Denham Court, Menangle, nd Kiama wore closed; the Wesleyau School at George's River was converted into a Provibional School; the Public School at Cararawcll and the Provisional School at Burriar were converted into Half-time Schools; new Public Schools were brought into operation at Bundywulla, Kiama, Kangaroo Faller, Toolcjoos, and Wilton; the necessary arrangements were made for the establishment of a Public School at Albion Park; and nid was granted to Provisional Schools at New Ran and Oakdale, and to Half-time Schools at North Hushisson and Now Bristol-Jervis Bay.

## Insfaction.

Ninety-one (91) "regular"" inspections have been made in the year. The time usualiy devoted to ench inspection has boon from four to seren hours, and the examination of the different clusses has been conducled with tho riew of ascertaining, as fir as practicable, the antainments and progress of each ponil. In addition to the schools regularly inspected, ten others havo been incidentally visited during the year.

The following is a numerical statement of the work done in the year:-

| Number of regular inspections | 91 |
| :---: | :---: |
| Number of pripils cxamined | 147 |
| Number of visits for inquiry and special investigatious | 40 |
| Number of teachers, pupil teachers, and candilates examined | 49 |
| Number of miles travelled | 4,78 |

The following tables show the ages und number of pupils curolled in the year, and in the quarter of inspection; and of those present at examination

Condition of the Sohools Inspictied.
L-Materiar Condidion.
Nearly all the schools inspected are well situated, and at three-fourths of them there is tolerably good playground accommodation. Thirty-four (34) schooi buildings--21 Public, 3 Prorisional, and 10 Certificd Denominational-are fuir, very fair, or good. Thirty-three (33)-8 Public, 3 Half-time, 8 Provisional and 14 Certified Denominational-are tolerable; and trentr-three (23)-6 Public, 7 Half-time, 6 Provisional, and 4 Certified Denominational-are indifferent or bad. The Public School buildings at Pyree are vers dilapidated and unsuitable. New buildings are also much needed for the Public Schools at Arncliffe, Peterboro, Monnt Keira, Ulindulla, and Worrarce ; for the Ealf time Schools at Tornulli Beloon, Marsden's, and Maxwell's; for the Provisional Schools at Bomaderry, Cordeaux River, and Broughton Vale; for the C.E. School at Liverpool; and for the Pres. School at Numba. New and suitable buildings bave been erected in the year for the Public Schools at Lirerpool, Bundywalla, Men angle, and Wilton ; a teacher's residence has been erectel at, Nowra; and substantial improvements have been carried out in the buildings at Marrickville, Picton, Meroo, Appin, Marshall Mount, and Cambe warra. Of the 63 Public Schools and Cert. Dem. Schools inspected, 19 are still unprovidod with residences for the teaclers. In 5 Public Schools, 6 Half-time Schools, 9 Pror. Schools, and 8 Cert. Dem. Schools, the furniture is unsatisfactory. As a whole, the schools inspected are well supplied with requisites. Except in a fow instances-principally met with in Provisional Schools-the school records aro now kept with neatnoss and punctuality.

## 2.--Disciplinz

In the majority of the schools risited the pupils are fairly punctual in their attendauce, but their regularity, though to some extent improved, is still unsatisfactorg. The punctuality of the pupils is generally satisfactory where the teacher is roally earnest about the matiler; but, unfortunately, such is not the case with regard to their regularity; here the teacher often meets with dircet opposition from the
parenta, and consequently his efforts are nearly uscless. Indeed they are, in some iustances worse than useless, for by earnectly and conscientionsly doing his duty with regard to the pupils' irregularity, and in tire collection of the school-fees, the tescher sometimes obtains for himself the parents enmity and illwili. Further, the irregularity of attendanco on the part of pupils now enrolled in our schools is not the only hindence to educationn progress in the Colony : therears in the different loculities for which schools have already been provided many children between the ages of 4 and 14 years, who hine not as yet been sent into the schools to receive any instruction whatever.

Nothing short of an emactment rendering school attendance compulsory would be effectual as a remedy for the evils complained of. Legislation has aiready carefully secured to all parents the right of education for their children; it siould now go a step further, and provide that no parent sball be aliowed to neglect his duty with regard to this all important matter.

Clean7iness.-Nothrithstanding that a largo majority of the echools visited are still without proper lavatories, the cleanliness of the pupils is genernlly satisfactory. 1 an not able to speak in such favourable terme, however, with regard to the school premises. As regards one-third of the schools risited, the premises were, in point of cleanliness, only moderately satisfactory. In this respect, therefore, there is considerable room for improvement.

Order and government.-In twelve of the schools visited the order is but indifferent, and the governmont is weak. In forty-two sehools the order and govermment are good; in thirty-sir they are tolerable or fair, and in trelpe they nre indifferent or bad.

Table slowing the Moral Condition of the Schools inspected.

## 3.-Instruction.

An improvement in the classification of the pupils is discernible in most of the schools visited. In nearly all the Public Schools, in three-fourths of the Denominational Schools, and in one-third of the Half-time and Provisional Schools, the instructional documents have been intelligently devised, sud they are carcfully attended to in the carrying on of the echool. In the majority of the echools visited the Iesson Register is not yet bept satisfactorily. In nearly one-half of the schools visited the proficiency of the pupils in reading ranges from fair to good, but in fourtecn schools it is still indifferent or bad. On the whole, however, the results are considerably higher than they were at previous inspections.

In writing and dictation satisfactory progress lus been mude since last ingpection. The same defects prerail in the teaching of arithmetic as were noticed in my reports for the last two years; a slight improvement is, however, discernible in the work of the last your. In grammar, geography, and object lessons, moderately satisfactory progress is being made. Singing is attempted in 63 schools, but in only 13 is it taught satisfactorily. Drawing is taught in nearly all the Public and Certified Denominational Schools. Necdlework is well taught in 17 Public Schools, in 2 Provisional Schools, and in 9 Oertified Denominational Schools. In the other schools inspected the teaching of it is only moderutely satiafactory. Euclid is tanght in 9 schools, Algcbra in 6, and Latin in 3.

The tables in Annex A will show the proficiency of the pupils in the differont schools.

## Teachers.

The general body of teachers in this district have shown themselves to be earnest, intelligent, and painstaking workers. During the year several of them have passed an examination successfully, and thus obtained promotion to a higher class. Of those who passed successfully, six were promoted to class $\Pi$. I am also able to report favourably of the attainments and skill of the pupil teachers. Of ten eramined in the ycar, eight passed successfully, and wero promoted to a higher class. The number of tenchers, assistants, and pupil teachers employed in the year was 145. Their classification is shown in the following table:-

| Schools. | Class I. |  | Class II. |  | Class III. |  |  | Probationers. | $\begin{gathered} \text { Pupil } \\ \text { Teachers. } \end{gathered}$ | Totals. |

School Fers.
The total umount of sehool fees reccived in tho yoar was $£ 3,491$ 12s. Of the pupils enrolled in the yenr, 1,140 , or 13.3 per cent., are returned as free scholars.

## Local Supertision.

Whe local superrision is still unsatisfactory. In a few instances monthly meetings are held by the Board, and the members pay regular risits to the schools several times in cach week. ln a large number of schools, however, little or no supervision is exorciged.

Separate detailed statements (Anvexes B and C) for Public and Certificl Denominational Schools will be found apponded to this Report.

Upper Bankstown,
J. HUEFER,

Inspector.
19th March, 1872.

ANNEX B.
Dbtarled Statement of the Condition of Schools inspected in 1871.
I.-Public Schools.

Aprin (V.) :-Visited, 30th October.
Numbers present:-Boys, 9 ; girls, 11 ; total, 20.

1. A detached kitchen has now been erected, and a supply of water prorided. A verandah is needed on the west side of the school building and residence, and the well should be properly finished. A pump is also necded. The school is rell supplied with requisites. 2. The pupils are fairly regular and punctual, except in harvest time; and the prerailing tone of the school is pleasing. 3. The classification is judicious. The subjects accord with the prescribed course, and the instruction is regulated by the usual documents. The methods are appropriate, and applied with intelligence and industry. 4. The proficiency in the 3 rd class ig fair, and in the 1st and 2nd classes it is tolerable.

Arxcelffe (N.V.) :-Visited, 31st July.
Numbers present:-Bojs, 13; girls, 16; total, 29.

1. The playground is not fenced ; and the schoolroom is too amall, and otherrise unsuitable. New buildings are greatly needed. 2. The pupils are fairly regular and punctanl, and tho gencral tone of the school is healthy. 3. The classification is appropriate. The prescribed course of instruction is followed, and the tencher is intelligent, and fairly skilful. 4. The general proficiency ranges from fuir to very fair.

Ashifibld (N.V.):-Visited, 1st and 4th August.
Numbers present:-Boys, 39 ; girls, 24 ; total, 63

1. The material condition of the school has not been improved since last inspection. There is no residence for tho teacher. A new vested building is much neoded. Tho supply of requisites is sufficient. 2. The pupils are fairly regular and punctual, aud their cleanlivess, order, and attention are satisfuctory. 3. The instruction accords with the preseribed course, it is properly regulated, and the methods used are appropriate. 4. The general proficiency ranges from tolerable to very fair.

Avondale (V.) :-Visited, 7th Norember.
Numbera present:-Boys, 12; girls, 1.7 ; total, 29.

1. The school buildings have been painted and repaired. There is a good supply of working materials. 2. The pupils are fairly reguiar and punctual. The order is fair, and the moral tone of the echool is healthy. 3. The classification is suitable, aud the instructional documents are carefully compiled. The prescribed subjects are taught-singing excepted. The methods are tolcrable, and are applied with panntaking industry. 4. The proficiency is tolerable. At the date of inspection a number of the elder and more adpanced pupils had recently been removed from the school.

Behkiey (V.):-Visited, 1st Novembor.
Numbers present:-Boys, 10 ; girls, 14 ; total, 24.

1. Some necessary repairs have been carricd out in the buildings since last inspection; further repairs and painting are still needed. The supply of requisites is sufficient. The whole property is kept with much care by the teacher. 2. The pupils are tolerably regular and punctual, and the moral tone of the school is healthy. 3. Singing is not taught; otherwise the prescribod course is followed. The teacher is intelligent and fairly skilful. 4. The proficiency ranges from tolerable to fair.

## Boolong (N.V.) :-Visited, 7th December.

Numbers present:-Boys, 18 ; girls, 27 ; total, 45.

1. The material condition and organization of the school are tolemble. The supply of working materisls is sufficient. 2. The pupils are regular and punctual, clean in appearance, aud fairly orderly materials is sufficient. 2. The pupils are regular and punctual, clean in appearunce, and faify ordery
and attentive. 3. The classification is fairly judicious; the instruction accords with the preseribed course, and it is fairly well arranged. Tho methods are tolerably appropriate, and applied with energy and painstaking. 4. The proficiency is nbove fair.

Brovanton Crees (N.V.) :--Visited, 8 th December.
Numbers present:-Boys, 26 ; girls, 24 ; total, 50.

1. The interior of the schoolroom needs painting, and the playground should be properly fenced. Doors to the out-offices are also needed. The school is well equipped. 2. The attendance has increased, and the pupils are fairly regular and punctual. The tone of the school is healthy. 3. The instruction is carefully regulated. The methods are appropriate, but need to be applied more vigorously. 4. The general proficioney is a little above fair.

## Brovghton Viliage (N.V.):-Tisited, 9th December.

Numbers present:-Boys, 23; girle, 24; total, 47.

1. The butiding at present used is too small for the number of pupils attending. Steps aro being taken to provide new rested buildings. There is an ample supply of requisites. 2. The pupils are regular and punctual, and the school has a healthy tone. 3. The prescribed course of instruction is followed, and the teaching is carrich on with energy and painstaking. 4. The proficiency is rery fair.

Belmore (N.V.) :-Visited, 12th September.
Numbers present:-Boys, 10 ; girls, 9 ; tatal, 19.

1. The phayground needs fencing, and more suitablo out-ofices should be prorided. The furnituro is only moderately suitable. There is no residence for the teacher. The school is well supplicd with requisites. 2. The pupils are moderately regular and punctual. The order and nttention aro good, und the pupils are clean and tidy in their appearance. 3. The clussification is appropriate. The prescribed subjects are taught, and the instruction is fairly well regulated. The methods are modern, and applied with tolerable skill. 4. The proficiency ranges from tolerable to fair.

## 81

Cambrwarra (V.) :-Visited, thi December.
Numbers present:-Boys, 21 ; girls, 25 ; total, 49.

1. A kitehen has been erected; and the schoolbuildings have been repaired and painted. Tho interior of the schoolroom has beca lined, but the lining has not yet been painted. The supply of requisites is suitable and sufficient. 2. The pupils are fairly regular and punctunl; otherwise the discipline is good, 3. The classification is judicious. The instruction uecords with the prescribed course, and it is given with energy, painstaking, and yery fair skill. 4. The proficiency is fery fair. Needlework is well taught to the girls.

## Camben (V.):- Visited, 17th May.

Numbers present:-Boys, 23 ; girls, 16; total, 39.

1. A laratory luas been crected siuce last iuspection. The teacher's residence is too small for the accommodation of his family; two additional rooms are wuch needed. The selool is well supplied with rorking materials. 2. Whe pupils are fiirly regular und punctual. The gencral discipline and tone of the school are fairly satisfactory. 3. The prescribed subjects are taught. The classification is appropriate The instruction is carried on with fair skill, but it is not sufficiently penetrative. 4. The general proficiency ranges from moderata to tolerable in the lower classes, and in the 4th class (3 pupils present) it is nearly
rery fair. very fir.

Crooryar (N.V.) :-Yisited, 20th November.
Numbers prosent:-Boys, 55 ; girls, 35 ; total, 90 .

1. The building is much too small for the number of pupils in attendance. If a suitable schoolroom were provided there would probably be an enrolment of from 200 to 300 pupils. The teacher's residence has recently been enlarged. The school has a full supply of requisites. 2. The pupils enrolled are fairly regular and punctual. The order admits of improvement. The prevailing tone of the school is healthy. 3. The classification is tolerably appropriate. The lesson documents aro arranged with carc. Tho methods are appropriate, but, as applied, they are only partinlly effective. 4. The general proficiency ranges from modernte to tolorable.

$$
\begin{gathered}
\text { Jambrroo (V.):-Visited, 20th Scptember. } \\
\text { Numbers present:-Bors, } 31 \text {; girls, } 17 \text {; total, } 48 .
\end{gathered}
$$

1. The buildings have been repaired :ud painted since last inspection. An additional room to the tcacher's residence is much needed, and a smpply of water should be provided. Tho school is well supplied with working matcrials. 2. Tho pupils are fairly regular and punctaal, and the attendance has considernbly improved under the prosent tencher. The order is good, and the prevailing spirit of the school is pleasing. 3. The classification is appropriate. The proscribed subjects are taught-singing excepted. The instruction is arranged with care. The methods are suitable, and aro applied with much earnestness and painstaking. 4. The proficiency ranges from fair to very fair.

Kissra (V.) :-Visited, 12th December.
Numbers presont:-Boys, 99 ; girls, 64 ; total, 163.

1. The playground and teacher's yard need fencing, and the girl's class-room should be erected without delay. These improvements are much required to complete the organization of the school. The school has been well supplied with requisites. 2. The pupils are regular and punctual. The general discipline and tone of the school are rery satisfactory. 3. The classification is appropriate. Latin is tuught in addition to the prescribed course. The instructional documents are arranged with care. The methods are suitable, and applied with intelligence and industry. 4. Considering the time the school has been in operation, the results arc very satisfactory.

Giedswoon (V.) :-Visited, 8th June.
Numbers present:--Bor, 1 ; girls, 2 ; total, 3.
(Since the date of inspection the teacher has been remored, and another appointed in his place. The attendance of pupils in now satisfactory.)

Kogamiar (N.V.) :-Visited, 7th Scptember. Numbers present:-Boys, 10; girls, 14; total, 24.

1. The playground is not fenced; a supply of water has not been prorided, and there is no residence for the teacher. The school is well supplied with working materials. 2. The number in attendance is not satisfactory, and screral of the pupils enrolled are irregular. The punctuality is fair. The pupils are orderly and attentive. 3. The prescribed subjects are taught. The classification is fairly appropriate. Tho instructional documents are only moderately satisfactory. The methods are suitable, and fairly well nyplicd. 4. The proficiency of the pupils rauges from tolerable to very fuir.

> Ifyerpoor (V.) :-Visited, 13th and 19th September.
> Numbers present :-Boys, 43 ; girls, 30; total, 73.

1. The schoolroom is commodious, well lighted, and suitably furnished; it is also well provided with working materinls. There is no residence provided for the teacher. 2. The pupils are regular and punctual, and their order and attention are fairly satisfactory. The gencral tone of the selool is henlthy. 3. The preseribed subjects are taughti. The classification is appropriate, and the instruction is properly regulated. The methods are suitable, but thoy are not appliod with sufficieut euergy. 4. The proficiency
ranges from tolerable to fair.

Marbickthle (V.):-Visitod, 21 st December.
Numbers present:-Boys, 69; girls, 31; total, 100.

1. Lavatories have not yet been providerl; in all other respects tho material condition and organization of the school are very satisfactory. 2. The pupils aro regular and punctual, and the attendance is increasing. The order is good, and the govermment suitable and effective. 3. In addition to the prescribed course, Euclid, Latin, and Algobra are taught. The classification is appropriate. The instruction is carefully regulated. The methods are modern, and they arc applied with intelligence and skill. 4. The proficiency is very fair in the lower classes, and in the upper class it is nearly good. The progress made under the present teacher is highly satisfactory.

Marsiall Mount (V.):-Visited, 8th November.
Numbers present:-Boys, 31; girls, 26; total, 57.

1. The material condition of the school is fair. New steps are needed at the schoolroom entrance Since last inspection a detached kitchen has been erected for the teacher. 2. The pupils are fairly reguar nud punctual. The attendauce has increased since last inspection. The moral tone of the school is healthy. 3. The classification is fairly judicious. Singing and drawing are not taught; otherwise, the instruction accords with the prescribed course, and it is regulated by the usunl documents. The methods are tolerably appropriate, aud they aro applicd with industry and care. 4. The proficiency ranges from tolerable to fair. Needlework is well taught to the female pupils.

> Meroo (N.V.):-Visited, 14th November.

Numbers present:-Boys, 18 ; girls, 19 ; total, 37.

1. The schoolroom has been enlarged, so that it will now accommodate 60 pupils, if necessary. The material condition is now fairly satisfactory. 2. The pupils are regular and punctual, and fairly orderly and attentive. The general tone of the echool is healthy. 3. Singing is not taught, otherwise the instruc tion is in accordance with tho prescribed course. The echoolwork is curried on with industry and painstaking. 4. The proficioncy is tolerable.

Mocty Keira (N.V.) :-Tisited, 23rd October.
Numbers present:--Boys, 15 ; girls, 14 ; total, 29.

1. The furniture and echool requisites are suitable and sufficient, but in all other respects the material condition of the school is very unsatisfactory. New vested buildings are greatly needed. , 2. The pupils are punctual, but only moderately reguar in their attendance. The order and attention are very fair The tone of the school is henlthy. 3. The prescribed subjects are taught-singing cycepted. The classification is fairly judicious. :The instruction is carefully regulated, and the methods are applicd with earnestuess and industry. 4., The proficiency ranges from tolcralic to fair.

Omega Retreat (V.):-Visited, 11th December.
Numbers present:-Boys, 48; girls, 30 ; total, 78.

1. The entrance porch and the out-oflices are in need of repairs. Additional hat pegs are also needed. The residence is too small for the accommodation of the teacher's family, aud hence the classroom is temporarily used ns a bedroom; this arrangement is, however, very objectionable. Onc-third of the amount necessary for tho cularging of the teacher's residence has been already provided by the Sehool Board. 2. The pupils are regular and punctual'; good order prevails throughout the school, and the moral tone is healthy. 3. The instruction accords with the prescribed course, and, in addition, the elements of algebre are taught to the pupils in the fourth class. The classification is tolerably judicious. The methods are fairly appropriste, and they are applied with zeul and industry. 4. The proficiency ranges from fair to very fair.

> Peterhorovah (N.V.) :-Visited, 2nd and 10th Novembcr.
> Numbers present:-Boys, 39 ; girls, 20; total, 59.

1. The schoolroom is much too small for the number of pupils in attedance, and it is also otherwise uusuitable. A new building is much needed. 2. The pupils ure regular and punctual, and the prevailing tone of the school is bealthy. 3. The classification is appropriate. The instruction is properly rogulated, and the methods are applied with intelligence and earnestness. 4. The proficiency of the pupils ranges from fair to very fair. Several of the pupils in the 4th class are well adranced in Euclid.

Pfree (N.V.):-Visited, 5th December.
Numbers present:-Boys, 16; girls, 11; total, 27.

1. The material condition is bad. The buildings are very dilapidated, and quite unfit for school purposes. There is a proper supply of requisites. 2. The pupile are fairly punctual, but their regularity is not satisfactory. The order is very fair, and the moral tonc healthy. 3. The classification is suitable, and the instruction is properly regulated. The methods are appropriate, and they are applied with fair akill and intelligence. 4. The proficiency ranges from tolerable to very fair. (The teacher is compelled to reside three miles from the schoolhouse, the residence there being unfit for occupation. Under these circumstances, the teacher's wife camnot attend the school to instruct the girls in needlework.)

SheluHarbous ( V ) :- Visited, 13th December.
Numbers present:-Boys, $21^{\text {T }}$; girls, 25 ; total, 46.

1. The school building is good, and well supplied with requisites. 2. The pupils enrolled are fairly regular and punctual. The attendance has been decreased, however, by the opening of a private R.C. sehool in the township. The order and attention are fairly satisfactory. The moral tone of the school is healthy. 3. All the prescribed subjects are taught. The classificition is tolerably appropriate. The instruction is fairly well regulated. The methods practised are fairly effective. 4. The proficiency ranges from tolerable to dair

> Stoxisy Creef (V.) :-Visited, 19th October.

Numbers present:-Boys, 9 ; girls, 14; total, 23.

1. The material condition is unsatisfactory. The schooiroom should be taken domn and rebuilt-it is now in a dilapidated condition. The supply of requisites is sufficient. 2. The pupils are very fairly regular and punctual. The order is fair, and the moral tone healthy. 3. The instruction is fairly regulated, but the methods need to be applied mith more vigour. 4. The proficiency ranges from indifferent to tolerable.

> Tomerong (N.V.) :-Visited, 17th Norember.

Numbers present:-Boys, 21; girls, 4; total, 25.

1. A new residence for the teacher is needed; otherwise, the material condition and organization are tolerable. 2. The punctuality is fair, but the regularity is only moderate. The pupils are clean and tids, and fairly orderly and attentive. The tone of the school is tolerably healtiy. 3. All the preseribed subjects, except singing and drawing, are taught. The iustruction is not well regulated, and the methods used are but moderately effective. 4. The proficiency of the pupils ranges from indiffercut to moderate.

Toolesoos (N.V.) :-Visited, 13th November.
Yumbers present:-Boys, 26 ; girls, 32 ; total, 58.

1. The achool building is commodions, and well supplicd with all requisites. 2. The discipline is good, and the general tone pleasing. 3. The preseribed subjects are taught. The instruction is well regulated, and the methods are applicd with intelligence and industry. 4. The proficiency is fair in list and 2nd classes, and very fair in the 3rd class.

Thuaborid (N.V.):-Tisited, 18th Norember.
Numbers prosent:-Boys, 18 ; girls, 20 ; total, 38.

1. The material condition is only moderate. New buildings and furniture are much needod. 2. The pupils are regular and puuctual. The order is good, and the moral tone of the school satisfactory. 3. The classification is appropriate. The inetruetion is carcfully regulated, and suitable methods aro appliod with intelligence and carnestness. 4. The proficiency ranges from fair to very fair.

Vholet Hiril (V.) :-Visited, 25th October.
Numbers present:-Boys, 21 ; giris, 18 ; total, 39.

1. The building has beon repairerl and painted since last jnspection. An aulditional verandal is much needed, and a better supply of water should be provided. The supply of working materials is sufficient. 2. The pupils are punctual and fairly regular in their attendance. The order and attention are satisfactory. The government is firm and judicious. The tone of the school is healthy. 3. The instruction is carcfully regulated; all the subjects preseribed, singing and drawing excepted, are taught, and the methods are applied with industry and painstaking. 4. The proficiency is fair.

Westbroon (V.):-Visited, 20th June, 1871.

$$
\text { Numbers present:--Boys, } 17 \text {; girls, } 17 \text {; total, } 34 \text {. }
$$

1. The material condition is only moderate. 2. The discipline and tone of the school are masatisfactory. 3. The prescribed subjects arc taught. The classification is defective, and the arrangement of the lesson documents is not suitable. The teaching is woak and ineffective. 4. The proficiency is indilerent.

Wolloxgong (T.-Boys) :- Fisited, 10th and 1sth December.
Number present:-36.

1. A lavatory and a wrinal are needed, and a part of the building requires to be repainted. There is un ample supply of working materials. 2. The pupils are puictual and fairly regular. The cleanliness, order, and attention nre satisfictory. The moral tone of the school is healtly. 3. The prescribed subjects are taught, careful attention is given to the drawing up of the instructional documents. The classification is fairly judicious. The methods are modern, and they are applied with earnestness and industry; the teaching, however, is not sufficiently penetrative. 4. The proficiency manges from fair to very fair.

> WoLlongong (V.-Girls) :-Visited, 16ti and 18tb December. 'Number present:-42.

1. A lavatory is needed, and a part of the schoolroom should be repainted. The supply of requisites is sufticient. 2. The pupils are fairly regular and punctual. They are clean, orderly, and diligent. The tone of the school is plensing. 3. The instruction accords with the prescribed course. Tho classification is appropriate. The methods are suitable, and applied with industry. 4. The proficiency ranges from fair to very fair.

> Woluongona (V.-Infant) :-Visited, 16 th December. Numbers present:-Boys, 15 ; girls, 17 ; total, 32.

1. The material condition is very fair. 2. The pupils are tolerably. regular and punctund, and the gencral tone of the echool is pleasing. 3. The instruction is in accordance with the course prescribed. The methods are fairly suitable, and they are applied with encrgy and painstaking. 4. The proficiency is fair.

Worragee (V.):-Visited, ath December.
Numbers present:-Boys, 12 ; girls, 7 ; total, 19.

1. The buildings are dilapidnted, and unsuitable for school purposes. The furniture and other appliances are fairly satiafactory. 2. The regulurity nud punctuality are very unsatisfactory. The prevailing tone of the school is but moderatcly pleasing. 3. The essentisi subjects are included in the course of instruction, but the teaching is weak, and only moderately effective. 4. The proficiency is moderate.

## HALF-TLME SCHOOLS

Beloon and Toontixit :-Visited, 26 th June. Numbers present:-Boys, 16 ; girls, 8 ; total, 24.

1. Suitable school buildings hare not yet been proviled. It is the intention of the residents to ercet a suitable schoolroom for cach station, and n promise was made that the work slould be completed before my next risit of inspection. The schools are now carriod on in private rooms, at two residences in the localities. The requisites and other appliances are fairly satisfactory. 2. The pupils are regular and punctual in their attendance, and their cleanliness, order, and attention are fuirly satisfactory. The prevailing tone in both schools is healthy. 3. The course of instruction uecords with that prescribed. The elassification is tolernbly judicious. The teaching is carried on with industry and tolerable skill. Tho proficiency at Beloon is moderate, and at Toonulli it ranges from moderate to tolerable.

Bimiow aris Maluxdi:--Visited, 22 nd and 23rd Junc.
Numbers present:-Bors, 8; girls, 10 ; total, 18.

1. Rough senool buildings hare been crected at these places, but in their present state they are ouly moderately suitable for the purpose. The residents have promised, however, to have then properly completed before my nest risit. Rough furniture, of a tolembly suitable kind. has been provided. The supply of requisites-exorcise books excopled-is sufficient at each station. 2. The enrolment is not as large as it
should
should be, but the pupils enrolled are fairly regular and punctunl. 'lye cleanliness, order, and attention are good, and the general tone of the schools is healthy. 3. The preseribed subjects are taught, the classification is appropriate, and the instruction is carefully regulated. The school worts is carried on with earnestness and fair akill. 4. The proficiency at both stations is fair.

Hayes's and Jonss's:-Visited, 27th Jume.
Numbers present:-Boys, 7 ; girls, 9 ; total, 16

1. The building at Hayes's is in a rough unfinished state, but the private room used at Jones's is fairly suitable for a schoolroom. Each school has a proper supply of requisites-exerciso books excepted 2. Tho pupils are only moderately regular and punctual. An increased attondance is expected The cleanliness, order, and attention at each school are fairly satisfactory. 3. The subjects prescribed are taught in each school. The classification is only moderately appropriate. The teaching is carried on with much carnestness, but it is only.moderately effective. 4. The proficiency is moderate.

## Marsden's and Maxwein's :-Visited, 24th Jume. <br> Numbers prosent:-Boys, 15 ; girls, 13 ; total, 28.

1. A suitable schoolroom is in coursc of erection at Marsden's, and one is also promised for Moxwell's. The material condition and organization of the schools in the present makeshift buildings are very unsatisfactory. Each school has a proper supply of requisites. 2. The pupils at Marsden's are fairly regular and punctual, but those at Maxwell's are only moderately so. The order and attention at each school are moderate. Most of the pupils are clean, and tolorably well clothed. 3. The instruction accords with the course prescribed, but it js only indifferently regulated, and the methods used are but moderately effictive. 4. The proficiency at Maxwell's is moderate, and at Marsden's it ranges from moderate to tolerable.

## Hushisson and New Batstol :-Visited, 22nd November.

Numbers present (at Huskisson's only):-Boys, 9; girls, 5; total, 14.

1. A tolerably suitable room has been provided at ench station, and both have been furnished with good desks and forms, sufficient for the number of children in attendance. The building for New Bristol has been erected about a mile distant from the Light-house at Cape St. George. It is a rery neat slab structure, with roof shingled, and doors and windows painted. Gach school has been furnished with a supply of requisites. A serere thunder-storm prevented the pupils attending at Now Bristol on the day of my visit, and hence I was not able to examine them. 2. The pupils at Huskisson are regular and tolerably punctual. Their cleanliness, order, and atticntion are fairly satisfactory. 3. The prescibed sub jects are taught with fair intelligence, and, considering the short time the school has been in operation with tolerable success. 4. The profioiency is nearly tolerable.

## PROVISIONAL SCHOOLS

Bammana:- $\overline{\text { isited, }}$ 6th December.

$$
\text { Numbers prescnt:-Boys, } 12 \text {; girls, } 12 \text {; total, } 24 .
$$

1. The old school building re-erceted by Mrs. Glanville is now racant, and could be again occupied for achool purposes. Some of the residenta, however, would prefer to have a new building erceted on the land granted to the Council. Under any circumstances, the school ought not to be carricd on suy longer in the present makeshift building. 2. The pupils are only moderately regular in their attendance. The prevailing tone of the school is not pleasing. 3. The more essential subjects are taught in the schoolobject lessons, singing, and drawing, being omitted from the courso as prescribed. Tho teaching is wenk and ineffective. 4. The proficiency ranges from indifferent to tolerable.

Bomadirry :-Visited, 6th December.
Numbers present:-Boys, 12 ; girls, 16 ; total, 28.

1. No improvement has been made in the school buildings since last inspection. The material condition is bad. 2. The pupils are fairly regular and punctual. They are clean, and their order and attention are tolerable. The general discipline is fairly healthy. 3. Object lessons, singing, and drawing, are omitted from the prescribed course. The instruction is moderately well regulated. The methods used are mechanical. 4. The proficiency varies from moderate to tolerable.

Botany Hfads:- Visited, 20th December.
Numbers present:-Bors, 14; girls, 5; total, 19.

1. A now kitchen recently erected is now used as a schoolroom. The room is much too small to accommodate the pupils in regular attendance, and it is also badly situated. 2. Tho pupils are regular and punctual. The general tone of the school is healthy. 3. All the prescribed subjects are taught. The instruction is not well regulated. The classification is defective. The methods used are only moderately suitable. 4. The proficiency varies from indifferent (in the 1st Class) to nearly fair (in the 3rd Class).

Broeghton Fals :-Visited, 9th December.
Numbers presont:-Boys, 9 ; girls, 14: total, 23.

1. The coudition of the school premises is only moderatcly satisfactory. The supply of requisites is rufficient. 2. There should be an enrolment at this school snfficient to warrant the establishment of a Public School. In the last quarter of 1871, howerer, the actual number eurolled was only twenty-cight. The pupils are punctual, but only moderately regular. The general discipline is only moderate. 3. The instruction accords with the preseribed course. The classification is defectire. The instruction is badly regulated, and the methods are unsuitable. 4. The proficiency is about tolerable.

Brownlow IIIms:-Visitod, Gth June.
Vumbers present:-Boys, 4; girls, 8 ; total, 12.

1. The furniture is unsuitable; otherwise the material condition of the selool is tolcrable. The supply of requisites is sufficient. 2. The pupils are fairly regudar and punctual. A local tea-meeting interfered with the attendance on the dny of inspection. The pupils are orderly aud attentive. The prevailing tone of the sehool is healthy. 3. The more essential snbjects of the prescribed course are taught. The lesson documents are fair. The teaching is carried on with industry rad zeal. 1. The proficiency ranges from tolerable to fiur.

Brook's Pornt:--Visited, 19th December.
Numbers present:-Boys, 10 ; girls, 3; total, 13.

1. The material condition of tho school is moderate. The schoolroom needs ${ }^{2}$ repairs, out-offices should be provided, and the school ground should be fenced. There is a fair supply of working materials. 2. The pupils are regular and punctual. The genernl discipline is healthy. 3. The prescribed subjects, drawing excepted, are taught. The classification is tolerably appropriate. The usual lesson documents nre but little understood by the teacher. The teaching is carried on with industry and tolerable skill. 4. The attainments of the pupils vary from moderate to tolerable.

Bulif Modntain:-Visited, 27 th October.
Numbers present:-Boys, 7; girls, 6; total, 13.

1. A new building is in courso of erection. It is of samn timber, and, whes completed, will be a suitable and substantial atructure. The sehool has been furnished with a supply of requisites. 2. The discipline is only moderately healthy. 3. The more essential subjects only are taught. Tho methods are suitable, but not well appliod. Nearly all the school documents have been negiected by the teacher. 4. The proficiency ranges from moderato to tolerable.

Cordsadx Ritsr:-Wisited, 25th October.
Numbers of pupils present:-Boys, 11; girls, 15; total, 26.

1. The material condition of the school is very indifferent. 2. The disciplino is moderately healthy. 3. The instruction accords with the preseribed course, cxcept that singing and drawing are excluded. The methods are indifforent. 4. The proficiency ranges from indifferent to tolerable.

Greenveld Ponnt :-Visitel, otll Decenber.
Numbers present:-Boys, 6 ; girls, 17 ; total, 23.

1. The material condition of the school is fairly satisfactory. 2. The pupils are regular and punctual, and the general discipline is satisfactory. 3. The instruction accords with the prescribed course. The teaching is carricd on with industry and painstaking. 4. The proficiency is fuir.

Jannera :-Visited, 17 Norcinber. Numbers present:-Boys, 7 ; girls, 18; total, 25.

1. A new building (of slabs and bark) has been erected; and a supply of new furniture had been ordered at the timo of my risit. There is a fair sapply of requisites. 2. The pupils are recular and fairly punctual. The tone of the school is healtly. 3. The course of instruction accords with that prescribed. The teaching is conducted with industry and carc. Tho instruetional documents are tolerably satisfactory. 4. The pupils' altainments range from toleruble to fair.

## Moorfields:- Visited, 16th August.

Numbers present:-Boys, 9 ; girls, 7 ; total, 16.

1. The matcrial condition of the school is fair. 2. The nitendance and general discipliue aro tolerable. 3. The instruction is attended to with careful industry. 4. The proficiency is fair.

> New Ruv :- Visited, 23rd $f_{\text {unc. }}$
> Numbers present:-Boys, 8; girls, 4; total, 12.

1. The building and farniture are rery rough, but they aro tolerably suitable for such a locality as New Run. The school has a fair supply of requisites. 2. The attendance, as regards both regularity and punctuality, is only moderate. The order and attention are passable. 3. The teaching is carried on with earnestness and painstaking. 4. The proficiency is moderate.

> OAKDALE :- Fisited, 28th June.

Numbers present:-Boys, 5 ; girls, 10 ; total, 15.

1. The echool ground needs fencing, and the windows of the schoolroom should be glazed. There is a suitsble supply of working materials. 2. The pupils are but moderately rcgular and punctual. The order is tolerable. 3. The instruction is carried on vith energy. The methods are tolerably satisfactory. 4. The proficiency is moderate.

Saggart Fifid: - Visited, 12th June.
Numbers presont:-Boys, 7 ; girls, 13; total, 20.

1. The desks are old and unsuitable; otherwise the naterial condition is tolcrable. 2. The discipline is fairly halthy. 3. The instruction is carried on very industriously. The methods are only moderately suitablc. 4. The pupil' attainments range from indifferent to tolerable. The school documonts have not been attended to with sufficient caro and regularity.

Therfsa Park:-Visited, 9th Junc.
Numbers present:-Boys, 10; girls, 11; total, 21.

1. The school buildings are tolcrably suitable. There is a fair supply of requisiteg. 2. The discipline and generul tonc of the school are tolerably satisfactory. 3. The teacher is curnest and painstaking. 4. The proficioney is tolerable.

> Weronibi :- Visited, 9th June.
> Numbers present:-Boys, 3; girls, 17; total, 20.

1. The site should be cleared and fenecd, and out-oflices should be provided. The school building is fairly suitable. The supply of requisites is satisfactory. 2. The discipline is moderate. 3. The instruction is very elementary. 4. The proficiensy ranges from indiferent to moderate.

## CUMBERLAND DISTRICT.

## Inspector's General Report upon the Condition of Schools, for the year 1871

During the year several important changes have occurred in the number and description of the schools in this district. The new Public School at Burwood was opened under favourable circumstances at the beginning of the year, and at a later pcriod a Publie School was established at Grono Park, whilst two Denominational Schools, the Lane Cove Wes. and the Enfeld C.E., were converted into Public Schools. Bearing in mind that the number of Public Schools in operation at tho close of 1870 was 28, it is evident that the number this rear has been 32. But it has to be noticed nlso that towards the close of the year two Public Schools-those at Upper MDonald and Lower Hawkesbury-were, beeause of small attondance, reduced to Half-time Schools, thus making the number of Public Schools in operation at the end of the year thirty (30).

Provisional Schools have been establighed at Blacktown, Kurrajong, Lower Hawkesbury, and Tottenham Park; and the Greendale R.C. School, from which the certificate was withdrawn in conscquence of diminished attendance, was conducted as a Provisional School during the last quarter of the year. Including, therefore, the ten Provisional Schools that existed at; the end of 1870 , there have been fifteen Provisional Schools in operation in the courge of 1871. One Provisional School, that at Upper MDonald, has been made a Half-time School, in connexion with what was till recently the Public School at Upper MrDonald. The Prorisional School at North hocks was closed two months from the end of the year, through small attendance. Hence the number of Provisional Schools in operation at the close of tho year is thirtcen (13). A Half-time School has recently been opened at Wiserman's Ferry, in connexion with the late Public School at Lower Hawkesbury. Dhere are now, therefore, six Half-time Schools at work in this district.

The Denominational Schools in opcration at the close of the year are 16 C.E., 11 R.C., 3 Pr. and 3 Wes :-total 33. Five Denominational Schools havo been closed during the rear--two of them being converted into Public Schools as already stated, and three-the R.C, at Greendajo, the Windsor Wes., and the Mulgoa C.F.-having, because of insufficient attendance, had the certificates withdrawn. The Windeor Wes. is unnecessary, and the Mulgoa C.E. will probably soon be replaced by a Provisional School. In no instance, notwithsianding tho number of clanges within the year will the iutcrests of education suffer, whilst the means of extending it have been considerably increased, ns will be secn from a comparison of the following tables. These tables give the numbers and description of schools that have been in operation, tho nambers of pupils that have been enrolled, the arerage daily attendances, and the amounts of school fees paid throughont the district in ench of three successire years.

1. Schools in 1869 :-

| No. of Schools. | Description of Schoois. | No. of Pupils cnrolled. | 8) aily Average <br> Attendance. | Amount of School Fees paid. |
| :---: | :---: | :---: | :---: | :---: |
| 25 | Public Schools | 2,375 | 1,226.8 | crer |
| 11 | Prorisional Schools .. | 415 | 1971 | 151162 |
| 2 | Half-time Schools.... | 36 | 18. | 4180 |
| 20 | Church of England Schools | 1,908 | 9248 | 1,055 4, 10 |
| 14 | Roman Catholic Schools | 1,216 | 584.9 | 378110 |
| 4 | Presbyterian Schools. | 306 | 164:8 | $13115 \quad 5$ |
| 5 | Weslcyan Schools ... | 368 | 188.8 | 202170 |
| 81 |  | 6,624 | 3,305.2 | $3,240 \quad 4 \quad 2$ |

2. Schools in 1870 :-

| No, of Schools, | Description of Schools. | No. of Pupils enrolled | Daily Average Attendance. | Amount of School Fecs paid. |
| :---: | :---: | :---: | :---: | :---: |
| 28 | Public Schools | 2,812 | 1,301.1 | $\begin{array}{ccc} \mathcal{E} & \text { s. } & \text { d. } \\ 1,506 & 14 & 8 \frac{1}{2} \end{array}$ |
| 12 | Provisional Schools | 499 | 212.5 | 1731311. |
| 2 | Half-time Schools. | 32 | 20.6 | 3198 |
| 19 | Ohurch of England Schools | 1,860 | $849 \cdot 2$ | 1,025 66 |
| 13 | Roman Catholic Schools | 1,159 | 5505 | 389110 |
| 4 | Presbyterian Schools.. | 288 | 141.2 | 98179 |
| 5 | Wesleyan Schools .... | 350 | $170 \cdot 3$ | 1911711 |
| 83 |  | 7,000 | 3,246 | 3,389 $\quad 5 \quad 4 \frac{1}{3}$ |

3. Schools in $1.871:-$

| No. of Schools. | Description of Schools. | No, of Pupils enrolled. | Dally Average Attendance. | Amount of School Fees paid. |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | £ в. d. |
| 32 | Public Schools | 3,291 | 1,648 | 2,055 311 |
| 15 | Provisional Schools | 580 | 2613 | 19370 |
| 6 | Half-time Schools | 98 | 38.9 | 131611 |
| 18 | Church of England Schools | 1,700 | $860 \cdot 9$ | 1,002 18 4 |
| 12 | Roman Catholic Schools | 1,056 | $529 \cdot 1$ | 380137 |
| 3 | Presbyterian Schools. | 317 | 148.4 | 125114 |
| 5 | Wesleyan Schools ... | 311 | $111 \cdot 3$ | 151150 |
| 91 |  | 7,353 | 3,597.9 | $3,923 \quad 6 \quad 1$ |

From the above tables it mill readily be gathered that this gear has been one of rery marked progress. Under each head there is gratifying increase.

## II. The wore of Ingpection.

Eighty-two schools rese examined during the jcar. The plan pursued, in endeavouring to ascertain and estimate aright the true condition of theae schools in oll particulars was little different from that followed in former years. It was equally thorough and searching, and the results discovered were generally more satisfactory. The schools were in almost every instance found in their ordinary condition, and thus it was easier to arrive at a correct judgment respecting their real character and efficiency. The information obtained coucerning the sclools examined, is giveu in a numerical and condensed form in the several Annexes and the Detailed Statement at the end of this Report. Closely allied to the inspection of the schools is the examination of teachers. What may be desigrated the passive examination of teachers, or that of which the demeanour, diligence, and proficiency of their pupils are the exponents has been in the majority of cases matter of satisfaction and pleasure. There has been crinced by the results, a laudable desire on the part of many teachers to increase their fitneas for their work, and to turn their attainments to better account in the instruction of their schools, and reasonable success has accompanied the efforts of eeveral among them. The tact to manage and the skill to teach, can only be ascertained through this passire examination, and the man who faithfully uses the gifts that ho possesses in a steady performance passire examination, and the man who faithfully, uses the gitts that ho possesses in a steady performance
of duty need not dread the result. His work's worth will in due time be acknowledged, and no one can of duty need not dread the result. His work's worth will in dac time be acknowledged, and no one can
come between him, as no one desires to come between him and his reward. This is fully borne out by the experience of many teachers in the last and former years.

Only a fer teachers were summoned to the active examination, or that by which their acquirements are tested; and these it must be observed did not make a creditable appearince. It was obvious that they had done littlc to improve their acquaintance with the subjects which they are expected to teach. Of nine pupil teachers who were examined, four were promoted. Twelve applicants for the office of pupil teacher were examined, but mainly from want of openings, only one appointment was made. It may be here remarked that as $a$ class the teachers, both male and female, who have been emploped throughout this district during the year are deserving of commendation. With but two or three exceptions which need not be more specially noticed, they have filled their respective situations with general satisfaction, and sustained before the eye of the world a blameless reputation. In the following table are given the numbers and classifications of teachers in the different schools at the end of the year:-

The neat table shows the numbers and descriptions of teachers that have been employed in the several kinds of schools during the year, togefher with the total amounts of salaries paid :-

| Schools. | Teachers. | Assistant Teachers. | Pupil Teachers. | Salaries. |
| :---: | :---: | :---: | :---: | :---: |
| Public | 22 | 8 | 10 | $\underset{3,792}{f}$ |

| Totals.. | 88 | 15 | 11 | 8,152 |

## III.-Organtzation.

Much has been accomplished within the year in the direction of providing good, suitable, and properly furnished school buildings. The new premises in course of erection for Public Schools at North Richmond and Contral MI'Donald referred to in last rear's report have been completed and occupiod New buildings have been erected for the Public Schools at Penuant Hills, Prospect, and Lower M'Donald. The onlargement of the Richmond Public School building in progress last yenr has been completed, and necossury ulterations and additions have been effected in the Pablic School premises at Manly and Ryde. New buildings are contemplated for the Pemrith, Lower Portlaud (Colo), and Wallgrove Pablic Schools A very neat schoolhouse has becn built for the Provisional School at Lower Hawkesbury by a fer of the inhabitants. Good and suitable buildings have been crected for the Roman Catholic School at Villa Maria; a teacher's residence has been built at Marsfield C.E. ; and a new school-house is in course of crection for the C.E. School at Rouse Fill. There are still, however, cnses that cannot be referred to in favourable terms. Something like absolute indifference marks the conduct of some Local Bonrds as regards the condition of the school promises. The material condition of the R.C. School at Penrith and the Pn. School at Parramatta remains as bad as formerly reported. If any action has been taken towards remedying the condition of these echools, its effect is as yet imperceptible. The Public School premises at Tuddenham need very considerable repairs. This sehool hats never been provided with suitable furniture. Repeated promisos luave been made on behalf of the Local Board thut the unount of local subseriptions required by the Comeil to warrant the necossury expenditure would be provided, but as yet only a very little has been done to meet the necessities of the case. New and suitable luildings are much needed for the Public School at, Lane Core, but at present a good site camot be obtained. The St. Alban's Public School is held in a most unsuitable building, and rery little is being done to provide a better. The condition of by far the grenter number of the schools, us regards furniture and apparatus, playgrounds and outbuildings, is very satisfactory. The instanees are now rery few in which, in these particularg, tho buildings, is rery satisfactory, The instances are now rery few in which, in these particulara, tho
condition is below tolornble. The school records, as a rule, ure neatly and accurately kept, and the exceptions to this are happily on the decrease.
IV.-Discipinae.

The weather throughout the year has been gencrally furourable to school attendance, and to this circumstance, in some measure, may be due the very considerable incroase in the numbers of pupils that have been enrolled and that have attended the schools during the year. Mruch, however, of the increase is fairly attributable to greater watchfulness and firmness on the part of many teachers in exercising discipline, as it bears upon regularity of attendance. The spirit of such teachers has influenecd beneficinlly many parents through their children, and determined them to encourage the laudable efforts of the teachers to maintain regularity of attendince. Teachers feel and parentis acknowledge that regular attendance is indispensable to progress, and in in goodly number of schools the means used to secure it have been fairly succeesful.

As regards punctuality, there is still a considerable munber of schools in which it is very imperfectly observed. This want of punctuality was specially noticcable in the pupils of several Denominational Schools, whose teachers appeared to regard it as n matter of little consequence. In some of these schools, indech, pupils kejpt coming in for an hour and a half after the hour of opening. Notice of the inspection would no doubt have secured greater puncturlity for the day, whereas inspection without notice found these schools in their ordinary unpunctual condition. These remarks apply but to a rery few schools. With the vast majority of teachers punctuality is regarded as an essential, and they are fairly successful in securing it.

A regard for cleanliness is very genemily shown. There are a few exceptional cases in which tenchers might with ndvantage on this point support their teaching by their example more elearly than they now do. It is next to folly for any teucher to urge or to expect an habitual regard to cleanliness and tidincss in his pupils generally, unless he enforce it by the far more telling influence of his own example. Let him always be what in these respects he would have them to be, and he may confidently count upon pleasing results. It is of vast moment also that the pupils be assembled in a tidily kept playground, conducted into a clean, orderly sehoolroom, and surrounded with clean and well-arranged furniture and apparatus; in short, that cever thing with which they lanve to do within the school-grounds bear the impress of cleanliness and order.

In the teaching of their pupils most teachers readily admit the necessity of quict, diligence, and order, but comparatively few bave succeeded in producing these habits as the normal condition of their schools. Many are aiming at this, und making a fair approach to it, but there are yet some, and these not the worst of tenchers, who appenr indifferent to order or incapable of maintuining it:- Some of them seem to labour under the mistake that order is but of secondary importance, that teaching is their business; failing to comprehend the fact that the two are alike their business, and that the one must precede and lay thic foundation for the efficiont doing of the other. Let a school be well ordered and well governed, and there is thus furnished a guarantee that it will be well and efficiently taught. Let teachers not overlook what they aro apt to regard as little things, little irregularities, little faults, but let thern deal with them authoritatively, firmly, and at once, and they will rarely hare the unpleasantness of haring to deal with grave offences against proper sehool order and disciplinc.

Reverting to the point of achool attendance,-although it has increased considerably as compared with former years, it is still far short of what it might be, and ought to be. In moving about among schools, one cannot help being struck with the numbers of children of a school age seen playing about in the immediate neighbourhood of a sehool, and yet who are not sent to it. It has been confidently asserted during the year, that in not a few instances parents have reftred to send their children to sehool because of their inability to pay fees, notlawithstanding that they have had free education pressed upon them. They are either too ignorant of its worth, or too proud to take it on these terms. Thus the children are neglected. They are growing up in ignorance and opennoss to crime. It is carucstly to be hoped that, to meet this growing evil, the Legislature will soon see its way to render education compulsory.

The following tables give the numbers of schools in operation, the numbers of pupils enrolled, the daily average attendance, and the amounts of fees paid, during the last quarter of the past three years.
I. In 1869 :-

| Schools, | Number of Pupils errolled. | Daily Average Attendance. | Amount of Fees. paid. | Rate por head. |
| :---: | :---: | :---: | :---: | :---: |
| 25 Public | 1,847 |  | ¢ s.  <br> 333 d.  <br>  0  | ${ }^{\text {s. }}$. d. |
| 11 Provisional ...... | 360 | 226.9 | 46112 | 4.1 |
| 2 Hrlf-time.. | 22 | 17.7 |  |  |
| 19 Ohurch of England | 1,343 | 908.8 | 2570 | 578 |
| 14. Roman Catholic | 883 | 6011 | 10510 | 35 |
| ${ }_{5}^{4}$ Presbyterian | 243 | $175 \cdot 1$ | 3179 | 38 |
| 5 Wesleyan | 255 | $183 \cdot 3$ | $5817 \quad 3$ | 65 |
| 80 | 4,953 | 3,363.5 | 831181 |  |

2. In $1870:-$

| Schools. | Number of Pupils enrolled | Daily Averago Attendance. | Amount of Fecs paid. | Rate per hoad. |
| :---: | :---: | :---: | :---: | :---: |
| 28 Public | 2,164 | 1,420.4 |  | $\begin{array}{lll}\text { E. } & \text { d. } \\ 6 & 5 \\ 5 & 54\end{array}$ |
| 10 Prorisional | 336 | 203.9 | 410 2 | 433 |
| 2 Half-time... | 28 | 22. | 1148 | 17 |
| 19 Ohurch of England | 1,383 | 857.9 | 27641 | 65.4 |
| 13 Roman Catholic. | 826 | $555 \cdot 4$ | 105107 | 3 9 ${ }^{\text {2 }}$ |
| 3 Presbyterian | 207 | 141.4 | 2977 | 4.14 |
| 5 Wesleyan.. | 273 | 1737 | 5878 | 681 |
| 80 | 5,217 | 3,974,7 | 9721410 |  |

3. In 1871 :-

| Schools. | Number of Pupils enrolled. | Daily Average Attendance. | Amount of Fees pald. | Rato per liead. |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  | \& я. d. | s. d. |
| 31 Public | 2,4̌3 | 1,698.9 | $54310 \quad 7 \frac{1}{3}$ | 6 伃 |
| 14 Provisional | 443 | 293.3 | 59 0 0 | 4. $0 \frac{1}{4}$ |
| 6 Half-time. | 95 | 705 | 786 | 21 |
| 17 Church of England. | 1,184 | $810 \%$ | 239310 | 5109 |
| 11 Roman Catholic.. | 761 | $521 \cdot 4$ | 931111 | 37 |
| 3 Presbyterian | 239 | 164.8 | $37 \quad 2 \begin{array}{ll}37\end{array}$ | 46 |
| 3 Wesleyan.. | 170 | 1159 | 371010 | 6 51 |
| 85 | 6,345 | 3,675'3 | 1,017 $810 \frac{1}{8}$ |  |

It thus appears that in the schools collectively, there has becn an increasc in the numbers enrolled of 128, in the daily attendance of 3006 , and in the fees of $£ 44.13 \mathrm{~s}$. 2d d ., ns compared with the same period of 1870 ; but the increase in the Public Schools alone, for that period, was 289 in the numbers carolled, 278.5 in the daily average attendance, and $£ 8623.6 \mathrm{~d}$. . in the fees. The rate per head has varied but little; gencrally it is slightly lower.

What leas been stated under tho head of discipline, on which depends the moral aspect of tho schools, may be condensed as follows:-Four-fifths of the Public Schools rank from fair to good, and onefifth raries between indifferent and tolerable ; two-thirds of the Denominational Schools, taken collectively, range from fair to good, and the romaining one-third varies from indifierent to tolerable.

## V.-Instruction.

Although an improved classification has taken place in several instances, there are still not a few sehools in which it is injudicious. Too many of the pupils are found in the first or lowest class, which is made to contain an unnecessary and unprofitable number of subdivisions. Instead of drafting the more advanced regularly into the second class, the teachers whose schools are thus noticed detain them for an unduc length of time in the first. This course is probably followed to make the first class pass a more creditable examination than otherwise it would; and no doubt it would hare that effect were there no reference to data bearing upon age and time at school ; but as these are important points in estimating attainments, this undue detention in the class tends to lower rather than to raise the cstimate. But this is not the only evil effect detcntion in the class tends to lower rather than to raise the cstimate. But this is not the only evil effect
of such a classification. Those tenchera who are unwise enough to adopt it are compelled to bestow too much of their time upon the first class, if they teach it themselres, to the injury of the upper classes, whose instruction is thereby to some extent neglected or but partially attended to. This irrcgular classification forms a powerful obstruction to successful teuching, and the more competent and efficient teachers are carcful to avoid it.

In almost all the schools it has been observed that regard is had to the just distribution of time and apportionment of work. Carefully constructed Time-tables and well arranged Programmes of Lessons are to be found in four-fifths of the Public Schools, one-third of the Provisional Schools, and one-third of all Denominational Schools. In the remainder the charicter of these documents for usefulness ranks from indifferent to fair. The great fault of many of the lesson documents is their want of clearness and explicitness. They are too rague, showing that the teachers hare no distinct conception of the value of precision in constructing them, or of their importance as guides in the systematic and offective teaching of their schools, when skilfully arranged. Tho the eredit of nost of the teachers, however, to whom reforence has thus been made, it must be remarked that they exhibit a desire to render their lesson documents more generally serviceable. Only in one school was an utter disregard shown of the requirement to construct such documents; and the result, coupled with other neglect, has led to the teacher's remoral.

With respect to the methods in general usc, it need only be stated that, in the great majority of schools they are fairly appropriate, and in several good; and even where faulty wethods are mot with, there is a pleasing disposition on the part of the teachers to receive any suggestions that may help thent there is a pleasing disposition on the part of tie teachers to receive any suggestions that may help then and whom it is nest to hopeless to alter. They hare never lad any proper preparation for the work in which they are employed, and hence they have litile fitness for ity cflicient performaneo. Taken as al whole, however, the teachers have shown reasonable success in keeping their pupils profitably occupied, and in conducting them onward in the paths of useful knowledge.

Reading.-The teaching of this subject commences in some shape ns soon as a child enters school, and it would be well if the commencement wore in all cases properly made and well sustaincl throughout the whole school period. At the outset the learner is either taught to name the letters of the alphabet itdividually, and mat their forms 50 that he may readily reconize and name them wherever be wectg them; or to spell them in pairs forming words of one syllable. Practically it does not appear to matter much which is the first them in pairs forming words of one syllable. Practically it does not appear to matter much which is the first
step, provided that care and intelligence are ehown in guiding the pupil to a clenr apprelension of the vowel step, provided that care and intelligence are ehown in gluiding the pupil to a clenr apprelension of the vowel
sounds, and, as he adrances, of the modifications that they undergo in various connexions and combinations. sounds, and, as he adrances, of the modifications that they undergo in various comexions and combinations.
The nim in the first lessons in reading should be to train the eye readily to recognizo the letters, the car accurately to distinguish the various sounds produced in maming them, and the tongue firmly, clearly, and distinctly to speak them. Such minute and painstaking work as this, is looked upon by some teachers as a disagrecablo drudgery. They would like this work dono and well done by others, and if well done they would not refuse the credit of it-thus fully ncknowledging its valuo. It is not possibic in large achools for the master to give personal attention ofton to the teaching of the juniors, although in the end it might be better if he could be more frequently their teacher; but it is possible for him, by frequent obserration and examination, to correct inaccuracies aṇd prevent tho creeping in of improper enunciation. Teachers
may depend upon it that their after-success in teaching reading will bo in proportion to the pains and the skill with which they treated it in its earlier stages. Au obstacle to correct reading presents itself in the practice of several teachers of mispronouncing many words that cither begin or end with a vowel, or that begin with the letter $h$. Two or three forcible examples of this cril came out during examinations, when the tenchers were naked to dictate a passage for a class to write. Sevoral words of the kind referred to were misspelt, but they were spelt as they had been pronounced by the teacher. Whether in their wore misspelt, but they were spert as they her been pronounced puyils, teachers cannot be too careful to examples of reading, or in threir ordiuary conrersation with their pupils, teachers cannot be too careful to
uvoid innccuracies in pronunciation, and improprieties in expression. But putting aside the defects hinted uvoid inaccuracies in pronunciation, and improprieties in oxpression. But putting aside the defects hinted
at as still to some extent existing, there has been respectable progress made in the teaching of this subject. at as still to some extent cxisting, there has been respectable progress made in the teacbing of this subject.
The necessity of attaining to a better style of rending has been more fully realized, and greater attention has been bestowed upon the means of reaching so desirable an end. Generally, too, the ineanings of the words presenting any difficulty in the passages read have been better brought out by the pupils. There is need, however, for still greater attention to this point, for without a fair acquaintance with the meanings of the words used in the lessons, the subjeets about whieh the lessons treat can only be dimly compreonded. As the punils adrance, particular cure should be taken to instruct them in the derivation and composition of words. The capacity for reading well, with intelligent and interesting expression, is but indifferently developed. In a large number of instances littlo notice is taken of this very important point in the exercise of reading. What may be termed fair clocution is too little studied. Before this defect can be remedied, teachers requirc to attend more to thcir own clocution, and so prepare themsolves, as has on former occasions been suggested, for teaching by example, which is much more impressivo and effective than by any direction, howerer good. $\Lambda$ goodly number of schools might bo named in which the elocutionary part of reading is very fairly and successfully trented.

Writing.-It appenrs yery desirable that copy-books of one deseription slould be used in all the schools. This would tend to secure sreater general uniformity in the teaching of writing, and furaish a better test of the relative merits of the different schools in dealing with this particular branch of instruction. At present there is in use us great a vuriety of copy-books as there are schools; and in sereral schools there are various kinds and somo of them very oljectionable. The less that is doue on the copybook for the pupil the better. Let his helps to writing come muinly from his tencher, in the free use of the blackboard, or in specimens written for his imitation in his copy-book. There is a good deal of elovenly writing to be met with-badly formed lettors, disjointed and misspelt words running even through a whole nage without correction, and blotted carelessly kept books. All these are due to a want of proper supervision. This state of things is however gradually disappearing, and a considerablo number of schools might be namod in which good writing is shown, and in which the instruction and superrision of the classes when at writing are satisfactory.

Arithmetic.-In numeration and notation fairly satisfactory results have generally been produced. More intercst and care have evidently been taken in dealing with this part of arithmetic, and honce a greater number of correct answers either orally or written have been received to exercises under these heads. Defects in the mode in which slate arithmetic is taught to the more adranced classes, such as havo been referred to in formor reports, continue in force in too many instances. The exercises are not sufficiently varied, nor are they of that practical kind that is fitted to interest the pupils and call forth their reasoning faculties. Even when put upon the blackboard it is not seldom the case that they ure taken from some book, under some rule the words of which the pupils hare learned. All sums of a similar type cxpecsed in similar terms aro wrought pretty readily in the way the rule indicates, but gire even a simpio
 exercise to think or reason, but merely to perform a set of similar exercises afler a given pattern. In such casos arithmetic can hardy be said to be taught, inasmuch as one of its chief uses is lost sight of-the developing and sharpening of the mental powers of the pupils. This subject is most intelligeully, thoroughly, and effectually tanght by those teachers who slavishly follow no text, hooks, but who give plenty of examples, varied in kind, see that they are carofully and necurately porformed, and that the reasons for all the steps leading to the final results are fully understool. Tlien from the processes the pupils may bo readily led to see how given rules have been deluced, and the rules may be beneficially committed to remer the mot gone over, securo that their pupils shall not forget what they lave once learned.

Grammar--The exanimations conducted throughout the ycar have discorered a considerable improvement in the methods cmployed in teaching grammar. It is made less a subject of names and dry details than in many cases it was wont to be. If pupils are taught to give gramnatical names to words in their introduction to this subject, it is when they have some ideas of their sense or meaning and use, either aingly or in combination. Thus their intelligence is brought into exercisc, and the memory comes in to receive und to retuin names for the idea that the understanding has grasped. Both work together and in their proper order, being mutually helpful the one to the other. The learners in this way are accustomed to ask themselves wat unme should be given to particular words, and why, and to name and remember then acordingly. Parsing from ita more clementury to its advanced stames, is treated in like manner them acoo It is rery deabe the composition. There sre a fer schools in which it is carefully and profitably attended to, but in the majority it is otherwise, as is evident from the poor attempts at reproducing reading or object lessons. These are in many instances worthless, showing no ability on the part of the pupils to clothe ideas in any correct language of their own. This condition might be largely obviated were they at their reading lessons used to giving the meaning of what they read in words of their own choosing. A like course should be followed in the matter of reproduction, preventing it from being a mere verbal transcription.

Geography.-The manner of teaching this subject and the results attained have raricd little since last report. The definitions are generally pery fairly taught al; the outset, but there have not been wanting examples of an opposite kind. Pupils have been found remarkably ready in answering such questions as What is an island? What is a lake? correctly, but who, when the questions were yuried to what ig tho name for a portion of land surrounded by water, or for a portion of water surrounded by land hesitated or failed. Local geography also is often found to be either neglected or but indifferently taught. Thoro have been classes examined that could speak of rivers and mountains far away, and could not name those close to their own schools. It is fair to state that such cases are rare. In its more advanced stages geography is upon the whole eatisfactorily taught, unless in exceptional instances. Considerable adrantage would result were the instruction given less gencral in its character, more limited in its range, and more minute and exact in its application.

Object Lessons.-In some of the Provisional and a for of the Denominational Schools these lessons are omittcd. The teaching in this depariment ranks from tolerable to fair in three-fifths of the schools, from fair to good in one-fifth, and in the remainder it ean only bo regarled as very indiferent. In those instances in which teachers prepare the lessons well and thave a clear conception of the suhjects, and the best mode of presenting them to their classes, the instruction is inteligenily and interostingly communicated, and the rcsults are satisfnctory.

Singing.-The teachers of thirty-seren schools examined having received no proper training either in the theory or practice of singing, do not feel thenselves competent, and therefore they do not attempt to give ingtruction in it. There are a few others who accustom their pupys to sing a hitte by ear. Singing on the Tonic-Sol-Fin system is puactised in forty echools, and with rarions degrees of merit. One-third ranks from fair to good, and the remaining two thinds vary from moderate to tolerable.
Drawing.-Very creditable specinens of drawing are produced in a large number of schools, crincing thus increased skill on the part of the teachers, and $\mathfrak{a}$ growing interest and application on that of the
pupils. A more frequent usc of the black-board, and of dircetions and illustrations therefrom, is rery desirable. The mere placing of a copy, however simple and however excellent, before a class, whether in a book or on the board, is not of much use unless the teacher accompanies it with proper explanations, which he will find in the books anthorized by the Council. It is of importance that a closer adherence to these books should be obscrucd than is the practice of some teachers. It is time enough to introduce other drawing copies when a fair acquaintance with the subject has been attained by following out the prescribed course. It will also be sufficiently cariy to introdure the pupils to more adranced drawing when that course has been completed. It ought to bo bornc in mind, to use the words of Dean Dewes, that drawing, "as introduced into elementary schools, is not necessarily 'fine art' in the production of pictorial manifestations. Drawing, strictly speaking, should be looked upon as a mechanical excrcise, analogous, in fact, to writing, and regarded, if I may so express it, as graphic language-that, as ideas are expressed by words (i.e., orally) or by writing, so they may be cmbodied by drawing."

Scripture.-Through some mistaken notion the Scriptire Lessons have been neglected in two Public Schools, but in all the others they are regularly taught. In two Provisional and in the Half-time Schools they hare not yet been used, chiclly from the fact that the pupils have not renched that stage in reading at which they are introduced. These lessons are generally tanght in the same manner as the ordinary reading lessons, and the amount and kind of knowledge in Scripture truth thereby imparted are, upon the whole, very commendable

Needlework.-This is a subject receiving increased attention, and yet not so much as its importance deserves. In a few cases there has been discovered a disposition on the part of teachers to put it into a very small corner, and draw as little as possible upon the time of heir wives. Rather much prominenco is giren to fancy. work-to the neglect, or but partial teaching, of plain and useful sewing. It is often alleged that this is at the instigation of, and to please, parents; but pleasing parents, whilst with prudence it may be a teacher's desire, is not in all cases the surest way to adrance and bonefit their children. A faithful and consistent observance of the Council's instructions, and a dignified but conciliatory demeanour in performing the duties of their office, will enable them satisfactorily to overcomie any difficulties arising from the ill-judged interference of parents that are sometimes complained of.
VI.-Local Supervisioas.

It is matter of regret that no improrement upon forner statements under this head can be revorted. It is not uncommon to hear from a teacher such statements as, "My Local Board hoids no stated meetings"; "Seldom any member of it enters the school"; " T hardly ever see one of them but when I go to get my papers signed." Now, this is a most unfavourable state of things. When any difficulties-arise affecting the organization and discipline of the schools, the progress of the pupils, or the conduct and character of the teacher, how can such Boards bo in a position to render that assistance by their knowledge and advice which is expected of them, when they tuke no pains to inform themselves by personal obscrvation on any of these points? It is not alleged that the School Boards feel no interest in the schools which they are appointed to supervise, but that it is to a large extent passive,--it requires to be brought ont in action. And here the suggestion way be made, that the tenchers might do a good deal in the way of stimulating their Local Boards to a more actire and profitable interest in their schools, by, if the expression be allownble, courting their risits, and rendering thom plensing and profitable, through the healthy and prosperous condition of their schools. They appeal to their Local Boards in their difficulties,why not also invite them to witness their work, and mark the manner and cffects of its performance? A good friendly understanding would thus be begotten and maintained between patrons and teachers, and the best interests of the schools would bo harmoniously promoted.
VII.-Stmmary.

Viewed as a whole, the educational condition of the district during the year may belooked back upon with very fair satisfaction. Much has been done in the building and equipping of suitable schoolnouses, and still work in this direction remains to be done. It is of importance, in order to the proper ordering of schools, that they be not held in buildings fitted up as places of worship. Of these there is a pretty large number, and to proride suitable buildings for them is an erident necessity. In the general management and instruction of the schools, with a feve exceptions, steady improvement has been made; and the teachers as a body have shown earnestness and zeal in striving to adrance the interests that have been placed in their charge.

ALEX. L. FORBES, A.M
Riohmond, 9th February, 1872.
Inspector of Schools, Cumberland District.

## ANNEX A.

Table showing the Material Condition of Schools.

Detamed Statement of the Condition of Schools in the Cumberland Dietrict, examined during the year 1871.

## I.-PUBLIC SCHOOLS.

Bunwoon :- Fisited, 1st September.
Present at cxnmination:-Bors, 60 ; girle, 34 ; total, 94.

1. The whole material condition of the school is excellent, and the organization generally is satisfactory. 2. The discipline is bealthy ; the attendance is fuirly regular and punctual, and the cleanly appearance and respectful demeanour of the pupils are very pleasing. The teaching is conducted with quict steady carnestness, and the methods employed are good and effectively applied.: 4. The pupils are quiet steady carnestness, and the methods employed are good and eftectively applied.
well grounded in the rarious subjects of instruction, and their proficiency runks from fair to good.

Castleneagus:-Visited, 6th Scptember.
Present at examination:-Buys, 19; girls, 23 ; total, 42.

1. The buildings as $a$ whole are bad, but the condition of the closet is specialiy objectionable. 2. The pupils attend reasonably well; they are also clean, orderly, and industrious. 3. The teacher is zealous in the discharge of his duties, and the methods employed by him are fairly appropriato and effective. 4. The attainments genernlly are very fair.

## Colfton :-Visited, 8th May.

Present at exmmination:-Boys, 14 ; girls, 28 ; total, 12.

1. The school premises are in fair condition, and the organization is tolerably satisfactory. 2. The pupils give fair attendance, but sufficient attention is not paid to habits of cleanliness, order, and industry. 3. The work of teaching is carried on with diligence, but it is not marked by anination and rigour ; it fails to produce in the learners a desire and a determination to adrance. 4. The attainnents rank from very indifferent to fair.

## Dobroydr: - Visited, 16th Jnno.

Present at examination:-Boys, 9 ; girls, 18 ; total, 27.

1. The school-house is good, and woll supplied with suitable furniture, apparatus, and books. 2. The attendance is small and irregular, and the order is imperfect. 3. The instruction is tolerably regnlated. In the teaching therc is $\left\{\begin{array}{l}\text { want of animation and vigour. 4. The pupils are not sufficiently in }\end{array}\right.$ lated, In the teaching taerc is $\mathfrak{a}$ want of antimation and vigour.

Dundas :-Visited 15th November.
Present nt examination:-Boys, 32 ; girls, 29 ; total, 61.

1. The school premises are comparatively new, and in good condition. 2. Government is rather feebly administered. The pupils fail to gire ready and continuous obedience to orders. 8. Too little animation and vigour characterize the teeching; it is wanting in thoroughness and penetrativeness. 4. The attainments ranl from tolerable to fair,

## Five Dock :-Visited, 24th Norember.

Present at examination:-Boys, 25 ; girls, 18; total, 43.

1. The material condition of the school is fairly satisfactory. 2. The pupils give reasonably good attendance; and, as a whole, they are attentive and diligent. 3. In the matter of the instruction there is some departure from the regulations, but it is gencrally well regulated and diligently imparted. 4. The average proficiency is a little in cxecss of fair.

## Freeman's Resch:-Visited, 31st August.

Present at examiuation :-Boys, 26 ; girls, 8 ; total, 34.

1. The school buildings are in tolerable condition ; but from the frequency of floods, by which they have been seriously damared, the question has been raised of securing a morc elevated site for the school. 2. The cause that has injuriously affected the buildings has likewise diminished the attendance; it is now low and irregular. 3. The instruction is moderately regulated; the methods employed in imparting it are somewhat superficial. 4. The proficiency is tolerable.

Grono Park:--Visited, 20th November.
Present at examination :-Boys, 27 ; girls, 23 ; total, 50.

1. The school-house is a very rude wooden structure. There is a fair supply of moderately suitable furniture. The stock of books and apparatus noeds to be increased. 2. The discipline is fairly heolthy, securing reasonably good attendence, cleanlinces, order, and industry in the pupils. 3. The instruction is carefully regulated and energetically imparted. 4. The attainments, taking into consideration the time that the school has been in operation, exceeds fair.

## Henter's Mill :- Fisited, 1st March.

Present at examination :-Boys, 50; girls, 17 ; total, 67.

1. The material condition of this school is excellent, and the whole organisation good. 2. The attendance is fairly regular and punctual. The personal appearance of the pupils generally is pleasing. The corernment is mild, but rather weals. 3. The methods employed to impart instruction are appropriate, but they might with adrantage be a little more vigorously applied. 4. The proficiency, as a whole, is fair.

Lave Cove:-Visited, 1st Noyembor.
Present at examination:-Boss, 19; girls, 20; total, 39 .

1. The building being made to serve the two-fold purpose of chapel and school, is not well adapted for the latter. 2. The attendance is fair. The pupils are upon the whole clean and orderly, but they for the latter. 2. The atendres 3. Several of the prescribed subjects are omitted from the course of want carucstness and industry. 3. Several of the prescribed subjects are omitted from the course of instruction. The methods, whilst in themselves appropriate, are not applied with that carnestness and
cnergy which are requisite to render them effectire. 4. The progress made by the napils ranks from rery moderate to fair.

## Li,ANDfilo:--Visited, Sth September.

Present at camination:--Boys, 14 ; girls, 12 ; total, 26.

1. The teacher's residenco is in bad condition. There is nothing deserring the name of a closet. With furniture, apparatus, and books, the school is tolerubly well supplied. 2. The attendance is some what irregular. The gencral appearance of the pupils is pleasing, and with little exception they are orderly and diligent. 3. The prescribed course of instruction is followed, and the methods in use are appropriate. The intcligence of the pupils is being tolerably well developed, and their proficiency averages nearly fair.

## Lower Hawieebury:-Visited, 20th October.

Present at examination:-Boys, 6; girls, ${ }^{\text {oे }}$; total, 11.

1. This sciool is carried on in the Wesleyan Chapel, which, from the circumstance of its being largely occupied by othor than school furniture, is not well adapted for the proper arrangement and effective tcaching of children. 2. The attendance is very low and irregular ; greater cleanliuess aud tidiness are desirable in the pupils who do attend, and more earnestness and application. 3. The instruction is carefully regulated and steadily imparted. The animation and rigour, however, requisite for producing good results are wanting. 4. The pupils are not so well advanced as might reasonably be expected. Thei proficience renks from tolerable to tair.

Ledoentarar:-Wisited, 28tll April.
Present nt examination:--Bogs, 16 ; giris, 16 ; total, 32.

1. The school premises require very cousiderable repairs; suitable furniture is niso much needed for the school. Of apparatus and books thicre is a sufliciency. 2. The attendance is tolerably satisfactory, and the pupils are clean and orderly. The moral aspect of the sehool is upon the whole healthy. 3. The prescribed course of instruction is followed, and the teaching is conducted with industry and fair intelligence. The average attainments aro fair.

Manny :-Visited, 28th and 29th September.
Present at examination :-Boys, 42 ; girls, 20 ; total, 62.

1. The school organization generally is reasonably good. 2. The discipline is tolerably effectiveAt work the pupils are not steuds; their attention is too easily diverted, and they are rather inclined to be noisy. 3. The classification is fair, the instruction is tolerably regulated, and the methods are appropriate and applied with energy and intelligence. 4. The proficiency ranks from tolerable to fair.

McDoyald Ritis, Lower:- Visited, 16ith Octoker.
Present at examination:-Boys, 15 ; girls, 8 ; total, 23.

1. A good and well-furnisbed schoolroom has just been completed, closets have been crected, the ground has been enclosed, and the whole organization is now rery fair. 2. The discipline is effective. The pupils are clean, orderly, obedient, and industrious. 3. The instruction is well regulated, und vigorously and iutelligently imparted. 4. The profieiency ranks from fair to good.

> McDonalm Riter, Cuntray:--Visited, 196 h October.
> Present at examination:--Roys, $14 ;$ girls, 7 ; total, 2.

1. The furniture is af an inferior description, and detracts from the seemliness and comfort of the new schoolroom. The closets are in a rery disreputable condition. 2. The attendance is low. The pupils are fairly regular and punctual, neat and clean ; but they exhibit little mental activity and rigour 3. The instruction, whilst reguluted by programmes and systematically imparted, is poor as to resulte Tact and rigour do not mark the methods employed. 4. The proficiency ranks from very indifferent to fuir; average nearly tolerable.

North Ricmmond :-Fisited, 15th September.
Present. at examination :-Boys, 32 ; giris, 33 ; total, 65.

1. The whole of the premises is new, and the echool is in all respects weil equipped. 2. The nttendance is vory fair, and the pupils are neatly and cleanly dressed, and upon the wholo orderly; but in animation and earnest continued application to work they are deficient. 3. The elassification is irregular, and the methods used in teaching are not marked by sufficient liveliness and rigour. 4. The proficieney is nearly tolerable.

> Nonty Srdxey :-Visited, 25th August.
> Present at cxamination :-Boys, 12 ; girse, 17 ; total, 29.

1. Little has been done towards remedying the defects in the premises and furniture referred to last year. The fencing ulso needs repairing. 2. The pupils are fairly regular and punctual, and clean and orderis, but they cxhibit hittle niental readiness and wigour. 3. The usual course of instruction is followed, but the teaching is unsteady und foeble. 4. The proficiency is a little in excess of tolerable.

Parramistia :-Visited, 26th, 27th, and 28th July.
Present at exnmimation :--Boys, 147; girls, 66; total, 213.

1. The great defects in the material condition of this selinol are, that there is no toncher's residence, and that the playground is inconveniently small. The schoolroons are good, and well supplied with all requisites. 2. The moral aspect of the school is rery pleasing. 3. 'Lhe instruction is judiciously regulated, and the methods in use are appropriate, and intelligently and vigorously applied. 4. The attainments in some subjects reach to good ; as a whole, they rank from fair to very fair.

## Pramant Hills:-Visited, 2nd Norember.

Prescut at examination:-Boys, 26 ; girls, 27 ; total, 53.

1. New and suitable buildings hare at length been erected for this school. Its material state and general organization are now satisfictory. 2. The pupils are fairly regular and punctual; they are also neat and clean in their person and dress, and orderly and diligent at their work. 3. The instruction is carefully regulated :nd assiduously imparted. 1. The proficiency upon the whole elightly exceeds fair.

Peyritit :- Tisited, 22nd and 23rd Mareh.
Present at cxamination:--Boys, 73 ; girls, 57 ; total, 130.

1. A new and anitable schoolroom is very much needed, and measures are in progress for having this need supplicd. With respect to furniture, apparatus, aud books, the school occupies a very fair position. 2. The attendance is good, and the clemeanour and industry of the pupils are very pleasing. 3. The instruction, which embraces clementary Latin, is well regulated, and the methods in use are appropriate and vigorously and intelligently applied. 4. The proficiency ranks from fair to good.

Petebsham:-Visited, 11th and 12th July.
Present at cxaminatiou:-Bors, 41 ; girle, 38 ; total, 79.

1. Tho whole organization of the echool is fairly satisfactory. 2. The character of the attendance is but tolerable. Tho pupils are fairly clean and orderly; they are inclined to be talkative and negligent. 3. The classification is correct, the iastruction is carefully regulated, and the methods are practical, and upplied with industry. 4. The attainments are nearly fair.

Prospect: :-Visited, 8th Junc.
Present at examination:-Boys, 16 ; girls, 18; total, 34.

1. Little need be sail about the unsuitablencss of the present building, us new and proper premises will scon be ready to receive the school. 2. The discipline of the sehool is fairly effective, securing reasonably good attendnnce, cleanliness, order and industry. 3. The instruction is carefully regulated, and encrgetically and iutelligently imparted. 4. The proficioncy as a whole is fair.

Richmond :- Tisited, 29th and 31st May, and 1st and 2nd Junc.
Present at examination:-Boys, 60 ; girls, 49; total, 109.

1. The schoolroom has been enlarged, and an infant room has been added. Mnterially the school atands well. 2. As an rule, the pupils are very regulnr and punctual, and clean and woll conducted. 3. The inetruction is skilfully regulated, and appropriate methods are used in imparting it. 4. The proficiency is nearly very fair.

## Ryde:- Fisited, 15 th and 16th August.

Prescnt at cxamination:-Boys, 76 ; girls, 80 ; total, 156.

1. Important alterations and improvements have been effected in the schoolrooms and in the premises generaliy. The orgnmization is now rensomably good. 2. The attendance is fairly regular and punctunl, and the children generally are clean and well conducted. Betiter attention, greater self-reliance, and more carefulness in thinking and working are required of them. 3. The classification does not accord With the attainments of the pupils or the requirements of the standard; from some cause it is too low. The instruction nlso is not very sntisfactorily regulated. These observations apply to the Primary School Depurtment. There is a tendency towards show and superficiality in the teacling. 4. The attainments in the Primary School rank from tolerable to good,-average nearly very fair; in the Infant department they rank from very fnir to good.

Smithinield :-Visited, 20th Soptember.
Present at' examination :-Boys, 19; girls, 21; total, 40.

1. The schoolroom requires cleaning and whitewashing. The state of the closets is very unsatisfactory; in other respects the organization is fair. 2. The government is rather weak. Irregularities are cither tolerated or not checked with sufficient firmness. 3. The instruction is carefully regulated, and the methods employed are appropriate. 4. The proficiency is a little in oxcess of fair.

St. Adran's:-Visited, 19th October.
Present at cxamination:-Boys, 13 ; girls, 8; total, 21.

1. The school building is a very infcrior one, and littlo profitable effort has been put forth to procure a better. 2. The attendance, though small, is fair as regards regularity and punctuality. The pupils are likewise clean, and fairly industrious. 3. The preseribed subjects, with the cxception of singing, are taught with regularity and carc. 4. The proficiency generally reaches to fair.

## St. Mary's :-Fisited, 20th April.

Present at examination:-Boys, 23; girls, 13; total, 36.

1. The schoolroom is in fair condition, and tolorably well supplied with furniture, apparatus, and books. 2. The pupils generally are clcan aud orderly, but they lack mental oucrgy and application. 3. The teaching is wanting in precision and penetrativeness. 4. The attainments rank from moderate to fuir.

Wadigrofe:- Visited, 7th June.
Present at examination :-Boys, $14_{1}$; girls, 13 ; total, 27.

1. New and suitable premises are about to be provited for this school. 2. The attendance is fairly regular, but unpunctual. The pupils are tolerably clean and orderly, but inclined to be indolent. 3. The instruction is indifferently regulated, and the mental powers of the pupils are not well exercised. 4. The proficiency is barely tolerable.

Wrydsor :-Visited, 10th and 11th August.
Present at examination :-Boys, 79; girls, 81; total, 160.
3. The organization as a whole is highly satisfactory, the only exception being that the Infant-room is too small. 2. The attendance and cleamess of the pupils are good. The general discipline in the Primary School requires to be udministered with greater mimuteness, discernment, nud firmness. 3. The instruction is well regulated, and the methods practised are modern, and applied with intelligent earnestness. 4. The proficiency in the Primary School ranks from fair, and in the Infant, from very fair to good.

## II.-PROVISIONAL SCHOOLS.

Batufham Hilles:-Visited, 13th November.
Present at examination:--Boys, 21 ; ginls, 11 ; total, 32.

1. The organization generally is not satisfactory. Could a proper site and suitable buildinge be procured this ought to be a Public School. 2. The attendance is fair, and the pupils are tolerably clean and orderly, but they are not industrious, and they exhibit but little mental power. 3. The classification is very irregular, and the instruction is of a very superficinl nature. 4. The proficiency is only moderate:

Blackrown :-Visited, 23rd Norember.
Present at examination :-Boys, 10 ; girls, 17 ; total, 27.

1. The schoolroom is good, fairly furnished and supplied with apparatus and books. 2. The pupils are regular and punctual, neat and clean; but they are noisy, and unaccustomed to thoughtful, steady working. 3. The classification is indifferent. The instruction is moderately regulated. The teaching is lively and energetic, but unsteady and superficial. 4. The proficiency is tolerable.

Guildrord :-Visited, 21st September.
Prosent at examination:-Boys, 12 ; girls, 8 ; total, 20.

1. The material condition of the school is tolerable. 2. The pupils are respectful and obedient ; they work with considerable steadiness and intelligence. 3. The classification is correct, and the ingtruction is imparted with diligence and care. 4. The attainments are nearly fair.

Keyp's Crerit:-Visited, 21st April.
Present at examination:-Boys, 9 ; girls, 12 ; total, 21.

1. The state of the building is very indifferent; it needs flooring and plastering. 2. Tho attendance is irregular and unpunctual. As a whole, the pupils are clean, but iuattentive. 3. The instruction is tolerably well arranged, and imparted with fair diligence. 1. The proficiency is nearly tolerable.

## Kurrajong :-Visited, 28th November.

Present at examination:-Boys, 9 ; girls, 11 ; total, 20.

1. The building is in fair order, suitably furnished, and well supplied with apparatus and books 2. The pupils are neither regular nor punctual, but they are tolerably orderly and industrions. 3. Lesson programies are wanting. The work of teaching is, upon the whole, intelligently performed. 4. The proficiency ranks from tolerable to fair.

## Lower Hawhesbury :-Tisited, 20th October.

Present at examination:-Boys, 5; girls, 14 ; total, 19.

1. A very neat and suitable building has been put up for this school by the inhabitants; it is tolerably well furnished and supplied with upparutus and boots. 2. The attendance is very fair, and the pupils are clean and tidy. They are also fairly orderly and diligent. 3. The instruction is earnest and painstaking. 4. The attainments, on an atrerage, exceed tolerabie.

## Lower Poriland :-Visited, 10th March.

Present at examination:-Boys, 12 ; girls, 18 ; total, 30.

1. The school-house is very inferior, and very indifferently furnished. New premises, and the conversion of the school into a Public one, are contcmplated. 2. The attendance is tolerably regular and punctual. The pupils are clean, well-conducted, and diligent. 3. The instruction is carefully regulated, and imparted with energy and fair intelligence. 4. The proficiency ranks from tolerable to fair.

> Newingros: :-Visited, 4th August.
> Present at examination:-Boys, 22 ; girls, 10 ; total, 32.

1. This school-house is in all respents very unsuitable. From its irregular shape, small dimensions, and poor furnishing, anything like proper supervision and effectire teaching of so many pupils is next to impossible. 2. The attendauce is very fair. The diseipline is only moderate. 3. The instructional documents are rather carelessly drawn up, but the teaching is upon the whole painstaking. 4. The proficiency ranks from moderate in the arithmetic of the third class to nearly fair generally.

> Regextrules :-Visited, 13th October.
> Present at examination :--Boys, 8 ; girls, 20 ; total, 2 S.

1. The schoolroom is fairly auitable, but poorly furnished. 2. The attendance has considerably improved since last inspection; but the pupils in school are noisy, thoughtless, and inatientive. 3. The teaching is diligently conducted, but it wants method and penetrativeness. 4. Tho proficiency ranka from
moderate to tolerable.

## Sachville Reach :-Visited, 9th March. <br> Present at examination :-Boys, 18 ; girls, 7 ; total, 25.

1. The achool building and furniture are tolerably good. There is a fair supply of suitable apparatus and books. 2. The disciplino is rery fceble. 3. The pupils are irrcgularly classified and superficinlly tanght. 4. The proficiency is very indifforent.

## Sfancamore:-Visited, 26th April.

Present at examination':-Boys, 8; girls, 7; total, 15.

1. The material condition of the school is tolcrably satisfactory. 2. The pupils arc clean and orderly; they give but very little evidence of being trained to earnest self-reiiant working. 3. The methods employed in teaching are mainly obsolete and mechanical. 4. The proficiency is nearly tolerable

## 107

## Tottenham Park:-Visited, 22nd November.

Present at examination:-Boys, 12 ; girls, 5 ; total, 17.

1. The schoolroom is fairly suitable and tolerably furnished. The stock of apparatus and books is eufficiont for present requirements. 2. The discipline is tolerably effective. 3. The teaching is conducted with earnestness and industry. 4. The proficiency ranks from moderate to tolerable.
2. Hatp-time Schoous.

Colo :- Visited, 27th September.
Present at examination :-Boys, 7 ; girls, 4 ; total, 11.

1. The material condition of the school has been considerably improved. 2. The pupils are fairly regular and punctual in their attentance, but they want animation and vigour at their work. 3. The instruction is not judiciously regulated, nor is it imparted in an intercsting, energetic, und effective manner. 4. The attainments are only moderate.

$$
\text { Wheeney Creek: - Tisited, } 26 \text { th September. }
$$

Present at examination:-Boys, 6 ; girls, 5 ; total, 11.

1. The material condition of the school is moderatc. Too little attentiou is paid to cleanlinoes. 2. The attendance of the pupils is fair; they are in person and dress tolerably clean. The discipline, as it affects their babits at work, is fecble. 3. The instruction is but indifferently regulated, and the teaching wants animation, tact, and vigour. 4. The proficiency is a lititle in excess of moderate-

MoDonald River, Upper:- Tisited, 18th October.
Present at examination:-Boys, 3 ; girls, 0 ; total, 3.

- 1. The schoolroom is in fair order and sufficiently furnished. 2. The attendauce is very low at present, throngh removals from the district. 3. The teaching is marked by diligence, but little tact. 4. The attainments aro barely tolerable.

MoDoxald River, Lower :-Visited, 18 (h October. Present at examination :-Boys, 10 ; girle, 22 ; totul, 32.

1. The school is very poorly furnished. 2. The attendance is neither regular nor punctual. The pupils are tolerably clean, but they are not orderly, attentive, and industrious. The discipline is weak. 3. The classification is inappropriate, the instruction is indifferently regulated, and the methods employed are mechanical and littlo elfective. 4. The proficiency is nearly tolerable.

ALEX. I. FORBES, A.M.,
Inspector.

## GOULBURN DISTRICT.

## Lxspector's Gencral Report for 1871.

I beg to submit, for the iuformation of the Council of Education, my Goneral Report on the condition of the Public, Provisional, Half-time, and Denominational Schools inspected by me during the rear. A statement, including an abstract of my report on each school, is hereunto appended. The information contained therein chielly relates to the material condition of the schools, the organization, discipline, and moral training of the scholars, the subjects and methods of tuition, and the gencral progress of the pupils in learning.

## Schoors in operatioy.

At the close of the year 1870 there were 1.54 schools in operation, attended by 6,822 seholars for the last quarter of the yenr. The aggregate attendance of pupils at all the sehools in the district for 1870 was 9,344 , being an increase of 438 scholars for that year. Now, 31 December, 1871 , there are 158 schools, attended by 7,075 scholars. The following statoment shows the number of ench class of sehools in operation at the close of the year, with the attendance of pupils :-

| 51 Public Schools, attonded12 Provisional |  | 3,079 pupils ; average for each school, 60 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 1:276 | " | " | 30 |
| 40 Half-time | " | 698 | $"$ | " | 17 |
| 8 Church of England | " | 662 | " | " | 82 |
| 16 Roman Catholic |  | 1,321 |  |  | 82 |
| 1 Presbyterian |  | 39 |  |  | 39 |

- The aggregate attendance of pupils at all the schools in operation in the district in 1871 was 10,202 , being an increase of 858 pupils for the year. Public Schools were opened during the year at tho following places :-

| Cbatsbury. | Thena. |
| :--- | :--- |
| Cobargo. | Tantawanglo. |
| Gullen. | Bowning. |

The Public School at Mifurulan was re-opened, and Prorisional Schools were established at the following places:-

Nerriga.
Jellat yellat
Bundanoon.
Walner.
Kirkdale.

Brown's Mifountain
Chain of Ponds.
Parlesobournc.
Millbans.
Lower Mittagong.

Half-time schools were establishod at-
Burra nud M'Donald's Flat
Ginninderra and Parkwood.
Mullengullenga and Windellama.
Bombny and Colombo.
Cathcart and Bibbenbuke.
Delegato and Cragie.
Quialago and Berlang.

Thirty-two now schools were opened in the district during the year. Enrly in Junc last the Public School buildings at Araluen West were consumed by fire, and the scliool has not since been re-organized. Owing to the small attendanco of scholars, the Public School at Berlang was closed, and a Half-time School established in its place. At the request of the inbabitants, owing to the small number of pupils, the Prorisional schools at Giminderrn and Mullengullenga were organized as Half-time Schools. The teachers of the Provisionnl Schools at Laggan, Kangaloola Creek, aud Bobundarah, resigned the charge of these schools during the ycar, and no steps lave been taken by the Local Committecs to appoint successors. The Half-time Schools ut Kirkdale, Parkesbourne, Gullen, Gundaroo, Nerrign, Corang, and Crookwell, were closed early in the year, with the riew of establishing Provisional or Public Schools in their phaces. At Lochiel and Greig's Flat the schools were closed in November and December, owing to the illhealth of the teacher; and the schools at Snaphook, Burra Burra, Norougo, Winstone Valley, Arlaminaby, Boconnoe, Burra, and MrDonald's Fhat, were not in operation at the close of the ycar, either from the want of competent teachers or suitable school premises. The Church of Eagland school at Bega was closed at the request of the Local Board, and at Bombala the certificate was withdrawn in consequence of the small attendance of pupils, in accordance with the 28th section of the Public Schools Act. The Chureh of England School premises at Araluen were aceidentally destroyed by fire, in Junc last, and no steps hare been taken by the Local Board to re-organize the school. The Roman Catholic Schools in the district remain the same as at the close of last year.

## Work of Ixspection.

Owing to the large number of schools in the district, T have not been able to inspect them all within the year, nor to adhere strictly to my progranme, in consequence of the numerous unforesecn duties requiring my attention. Owing to the pressure of clerical work, and some other urgent dutics, I did not commence the regular work of inspection until the middle of tho month of April. My programme provided for the regular inspection of 97 schools, including nearly all the schools not inspected in 1870, together with those opened in the first quarter of the year 1871.

I furtier contemplated making a considerable number of incidental risits, as circumstances permitted in the course of $m y$ journeys, to schools in my route not included in my programme. During the greater part of the second quarter of the year the weather wats very wet, and there were several floods in greater part of the second fuarter of the year the weather wats very wet, and there were several floods in withstanding, bcfore the close of the year I succecded in inspecting 111 schools. 81 of these were regularly inspected, and to 30 I made incidental visits. The course of insplection and mode of examination were iu all respects the same as last year, and excepting in the case of a number of Malf-time Schools, I gave neither teachers nor School Boards any intimation of the dates of my risits. Fifteen visits were made to places where schools were proposed to be established, some time was occupied in the selection of siteg for new schools, thirteen teachers and pupil teachers were cramined, 1,463 communications were written on the business of the Council; and, in the discharge of the dutios of my office, I travolied $2,4,35$ miles,

## Organtzation.

The following statement shows the Material Condition of all the Public, Provisional, and Halftime Schools inspected :-

|  | Very Fair to Gond. | Fair. | Tolerable. | Minderate to Indfferent. |
| :---: | :---: | :---: | :---: | :---: |
| Public Schoois- |  |  |  |  |
| Sites ...... | 38 |  | 1 | 1 |

| Furniture .......................................... | 10 | ...... | 12 | 3 |
| Apparatus and Books.................................. | 24 |  |  | 1 |

The following statement shows the Material Condition of all tho Denominational Schools inspected:-

| Denominational Schools, | Yery Yair to Guod. | Fair. | Tolerable. | Modernte to Indifferent. |
| :---: | :---: | :---: | :---: | :---: |
| Sites | 19 | ...... | 1 | 1 |
| Buildings | 16 | 兂 | 3 | 2 |
| Playgrounds | 16 | ...... | 2 | 3 |
| Furnibure ... | 16 | ...... | 3 | 2 |
| Apparatus and Books ... | 20 | $\ldots$ | $\ldots .$. | 1 |

The sites of ninety-five of the schools inspected are suitalle in almost every respect, thirteen are fairly or tolerably suitable, and there are only seven of an indifferent lind. Sixty-one of the school buildings are suitable for the purposes of teacling, and in good repair; forty four are fairly or tolerably suitable, and there are only six of an indifferent kind. New school buildings were crected during the ycar at Mooroowoollen, Gunning, Bergalia, Nerriga, Merimbula, Chain of Ponds, Cobargo, Cochrune's Flat, Brown's Mountain, Oranmeir, Tomboy, Wyndham, Rossneath, and Inglewood Forest. Public School buildings were purchased at Lower Mittagong, and a residence built for the teacher of the Roman Catholic School at Jenabaicumbene. Arrangements have becu made for the erection of school buildings at the Currawang Copper Mines, Candelo, and Gullen, and important for the erection of school buidings at the Currawang Copper Sines, Candelo, and Gulien, and important
improvements aud repairs were made to the Church of England Sehools at Moruya, Braidwood, and Yass; to the Roman Catholic Schools at Goulburn, Braidwood, and Moruya; to the Public Sehools at Bombala, Cooma, and Myrtlerille, and to the Provisional Schools at Boli's Crcek and Parkesbourne. Ninety-five of
the schools have sufficient and suitable playground accommodation, and considerable improvement has been effected during the year in the performance of playground duty. Nine of the playgrounds are fairly or tolerably suitable, and there are only seren of an indifferont kind. Sisty-three of the schools are well furnished, in thirty-six the supplies of furniture are tolerable, and there are only twelve selools where the furniture is indifferent or of an unsuitable description. As regards apparatus and booke the schools are neariy all well supplied, and generally speaking the materials granted by the Council are used with caro and conomy. In some schools the pupils are subdivided into too many classes, but genorally speaking the clussification is judicious, and nilapted to the "Course of Secular Instruction." The Time-tables, with few exceptions, agree with the "Public Schools Act," and "Regulations," and provide for the constant and profitable cmployment of the pupils, but in some cases they are not fiithfully observed by the teachers. Programmes of lessons are now in use in nearly all the schools, they are generally suitable, but like the Time-table they are not at all times strictly observed. The school records are, with but few exceptions, neatly and correctly kept, but in some cases I found the daily attendance and promotions of the pupils had not been noted at the proper time, nor the class-roll duly closed at the eud of the quarter. But on the whole the school aceounts are cunofuly and houcsty bept, and with the cxception of some newly the The material condition and organization of the schools have been considerably improved during the year.

## Discipline.

So far as I have been able to ascertain, the regulations of the Council are faithfnily obserred in nearly all the schools, and the most pleasing feature in the discipline is the cieanniness of the seholars. Considerable improvement has been offected during the year, as regards the neatness, cleanlmess, and roper ventiation of the selbolroons, and the geveraltecping of the school promises. The school mexering on general are carcfuliy used, and not so mach wasted as in former rears. About $\mathbf{7 1}$ per cent. of the pupils onrolied are regular in attendance, but in a number of the schools the children are still not sufficiently punctual. The order maintained in some sehoois is not so bigh a standared as may be attianed, but gene rally speaking, the pupils are quict, obedient, and attentive to their lessons, ind their manuers and behari our are plensing nnd respectiul. The government of the schools is mild, and moral suasion is tie ruling principle, but I found only two schools where corporal panishment was wholly abandoned.

The following statement shows the character of the discipline maintained in the schools inspected :-

| Schoos.s. | Very Fair to Geod. | Fnir. | Tolerable. | Ifnderate to Indifferent. |
| :---: | :---: | :---: | :---: | :---: |

The following statement shows the classification of the pupils in the schools inspected:-

| Schools. | Cinssification of the Pupils. |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | First Class. | Second Class. | Third Class. | Fourth Class. | Totals. |
| Public Schools .................... | 519 | 552 | 316 | 36 | 1,423 |
| Provisional ....................... | 234 | 206 | 50 |  | 1,490 |
| Half-tinse .......................... | 116 | 135 | 43 | $\ldots$ | 294 |
| Chureh of Tingland................. | 124 | 944 | 49 | $\cdots$ | 272 |
| Roman Catholic ................. | 259 | 278 | 133 | 11 | 705 |
| Presbyterian ...................... | 16 | 13 | 4 |  | 34 |
| Totals ............. | 1,299 | 1,272 | 695 | 52 | 3,218 |

First Class.-Trom this statement of the classification if appears that about 40 per cent. of the pupils are in the first or lowest class. They learn to read nid write monosyllables with the simple addition of numbers not exceeding three pluces of figures, and object lessons on domestic animals. In addition to this course, in several schools, the younger children are taught to sing melodies. As regards the instruction of this class, in many schools the pupils occupy too much time in learning to read. Sufficient attention is not given to the meaning of the words in the reading lessons, and the writing is not, in come selools, sufficiently carcful. Unial the younger children can read and write monosyllables fairly, their progress in the other subjects is gencrally small. In all schools managed by one teacher, the jounger children generally reccive the lcast attention and carc.

Second Class.-In this chass there is nearly the same number of scholars as in the first. They learn to read and write casy narrative, with the simple rules of arithmetic and the clements of English grammar, geography, and lessons on common thinge. In a considerable number of the schools inspected, this class is taught to sing melodies, and to draw rectilineal figures. Generally speaking the second class is fairly taught, but the memory docs not receive sufficient cultivation, the children are not mado thoroughly acquainted with the lessons as they proceed, and the meaning of the words in the reading lessons are not taught with sufficient care. The clements of grammar and geography are fairly understood, and very considerable improvement has been effected in teaching notation and the simple rules of arithmetic.

Third and Fourth Classes.-In these classes about 20 per cent. of the pupils are enrolled. They learn to read and write ordinary prose, with the geography of the continents in detail, English grammar, analysis of sentences, composition, arithmetic as far as, and including fractions, with object lessons on natural history, manufactures, mechanies, and common things. Singing, draving, and Scripture aro taught to this class in a considemble number of the schools inspected, and in some cases, algebra, goometry, and Latin. In nearly all the Public, Provisional, and Denominational Schools under the management of female or married teachers, needlework is tanght to the girls. Generally spoaking, the third and fourth class pupila read and write fairly for the time undcr tuition. The reading is intelligent, and the writing is legible and performed with fncility. As regards arithmetic, considerable progress has been effected during the year. When the pupils fail in this subject it is the result of the wrant of sufficient practice; if they were to work more and the teachers to talk less, the progress, not only in arithmetic, but in geography, grammar, and object lessons, would be more satisfactory. In some schools there is no systerin of homo lessons adopted. This is much to be regratted, because no matter how efficient a teacher may be, cyery scholar's success depends very much on his own efforts. Ono object of school education is to teach the child how to educate himself, another is to train him to be iudustrious and solf-reliant, and I am of opinion home lessons are well calcuated to secure these ends. They extend the schoolhours, hare a good moral induence, show the amount of interest cach pupil takes in their work, crente home tastes, and are well regarded by parents. When there is a proper system of home lessons, the progrees in learning is far more satisfactory than in schools where all the teaching is oral.

## General Drficiency of the Schoons.

As regards the nature and cxtent of the instruction imparted, the cleanliness, order, and discipline maintained, the practical skill of the teachers, the proficiency of the pupils, and the general management;
tho following summary may be taken as a fair estimnte of the 81 schools which I fully cxamincd, in accordance with the requirements of the Course of Regular Inspection:-

| Schools. | Graule of eficiency. |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Very Fair to Goud. | Fair. | Tolerable. | Moderate to Indifferent. |
| Public Schools | 2 | 8 | 11 | 4 |
| Provisional. | 2 | 3 | 14 | 5 |
| Half-time | ; | 4 | 1.2 | 4 |
| Denominational,. | 3 | ...... | ...... | 4. |
| Total | 12 | 15 | 37 | 17 |

Atrendance of Pupels.
The following table exhibita the attendance of pupils at all the Public, Provisional, and Half-timo schools in the Goulburn District:-

|  | Boys. | Girls. | Total. |
| :---: | :---: | :---: | :---: |
| Pupils curolled in the schools inspected | 1,620 | 1,471 | 3,091 |
| Pupils present at examination | 1,177 | 1,030 | 2,207 |
| Pupils emrolled for the last quarter of the year | 2,672 | 2,381 | 5,053 |
| Average attendance for the same period | 1,896 | 1,649 | 3,545 |
| Total numbers who attended the schools in 1871 | 3,487 | 3,176 | 6,663 |

The following table shors the attendance of pupils at all the Denominational Schools in the district:-

|  | Bors. | Girls. | Total. |
| :---: | :---: | :---: | :---: |
| Pupils enrolled in the schools inspecterl | 736 | 623 | 1,359 |
| Pupils at examination ................... | 549 | 462 | 1,011 |
| Pupils enrolled for the last quarter of the year | 1,046 | 976 | 2,022 |
| Average attendance for the same period ...... | 765 | 707 | 1,472 |
| Total number who attended the echools in 1871 | 1,709 | 1,532 | 3,24.1 |

By comparing the figures in the forenoing statements, it may be observed that nearly 71 per cent. of the pupils enrolled for the last quarter of the yeur attended school daily, and that five-screnths of tho scholars enrolled in the schools inspected were prosent at examination. The average attendance of the pupils for the last quarter in 1870 was 68 per cent., which shows an inercase of 3 per cent. in the average attendance for the corresponding quater of 1871.

## Hair-time Schoots.

The number of Half-time Schools in operation at the close of the year 1870 was 44 , attended by 733 scholars. Nom, 30th December, 1871, there arc only 40 schools in operation, attended by 698 children, being an average of 17 scholars for each school, and a decrease apparently, during the year, of 4 sehools and $3 \stackrel{5}{5}$ pupils. Early in $18 \overline{7} 1$ the school at Crookwell was closed witl the view of establishing a Pro risional. At Gullen a Public School wna opened, which js attended by a large number of pupils: Tho schools at Corang and Bullamalita were closed owing to the small attendance of scholars, and a Provisional School was orgnized at Nerrign. At Burra Burra, Snaphook, Bombay; Colombo, Adaminaby, Boconnoo, Burra, and M'Donald's Flat, the schools were vacaut at the close of the year, pending the appointment of suitable teachers. At Norongo and Winstone Valley the schools were closed until auitable schoolrooms have been erected. New Halt-tine Schools were established during the year at Hullengullenga, Windellama, Catheart, Bibbenluke, Delegate, Craigic, Berlang, and Quinlago. Applications for Half-time Schools at Myalha and Curry Flat, on Monaro, at Stony Creck and Tarraganda, near Bega, at Rossmeath, and Inglewood Forest, nea: Bungendore, were under consideration at the close of the year. Of the 40 Halftime Schools in the district, 1 inspected 25 . I found 292 pupils present, classified as follows :-

$$
\begin{aligned}
& \begin{array}{l}
\text { First class ................................................................ } 135 \\
\text { Second class ........... }
\end{array} \\
& \text { Second class } \\
& \text { Third class .................................... } 43
\end{aligned}
$$

As regards the suitablencss and material condition of the schoolhouses, eight are good, and seventecen aro tolerable. Five are held in private dwellings. In five, the furniture is good, in five fair, in thirteen tolerable, and in two insufficient. In some instances out-buildings are needed. The general discipline is good in five schools, fair to rery fair in four, tolerable to fair in thirteen, and moderate in threc. As recards the instruction of the pupils, the proficiency in learning is rood in three sehools, very fair in four, regards the instruction of the pupils, the proficiency in ieatning of the trenty teachers in charge of the fair to very fair in six, tolerable in mine, and moderate in threc. Of the trenty teachers in chargo of the
schools at the closo of the year, eight are classified, and twelve are probationers. The average salary paid schools at the close of the year, eight are classified, and twelve are probationers. The average salary paid
to each by the Council is $£ 67$ per annum, with an atlowance of flo per anvum for forage. The arerage amount of school fees paid to cach teacher for last year was $£ 10 \%$ s. fal, making the total annual emolumente of each master about £87 7s. 6 d .

## AGFS OF SCTIOLARS EXAMINED.

Of the 3,218 pupils present at the time of inspection-
765 boys and 608 girls were 7 years of age and under

| 210 | 2 | 230 | $"$ | 8 | $"$ |  |
| ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| 208 | $"$ | 228 | $"$ | 9 | $"$ |  |
| 153 | $"$ | 1.63 | $\because$ | 10 | $\because$ |  |
| 123 | $"$ | 128 | $"$ | 11 | $"$ |  |
| 262 | $"$ | 272 | $"$ | 1.2 | $"$ | and above |

From this statement it may be observed that about 49 per cent. of the pupils cxnmined were not orer 7 years of age, that three in cight are between 7 aud 10 years, that one-tenth are 10 years, and that about one-fourth of all the children cemmined are over 10 years. l'hese proportions of the different ages are much the same in both Public and Denorainational Schools.

## Teachers.

About hulf the number of tenchers employed in the district are trained and classified. The untrained tenchers aro chiefly employed in Provisional and Hall time Schools. In consequence of my time being so fully occupied with other dutics during the year, very fer examinations of teachers were held; and although scereal removals, resignations, and fresh appointments were made, there are but few promotions, either by examination, or under article 39 of the Regulations. Geuerally speaking, the teachers are indusrious and pninstaking in the discharge of their duties. Many of them crince nuch onthusinsm in their work, some have little aptitude for teaching, but as a body they are respoctable, exemplary, and trustworthy. This is gratifying, because there is perhaps no office under the Government which so directly promotes the social well-being of the community. A good school forms the mamers and character of the people, it prevents crime, and no doubt alds to the security of property. Although the position of teachers may not socially be all that they could wish, their profession is as important as that of any other public functionary. At the close of the year thore were employed in this district--

145 teachers,
9 nssistants,
10 pupil teachers
121 were males, and
43 females.
70 wero cmployed in Public Schools.
42 in provisional,
20 in Holf-time,
11 in Church of Engiand, and
21. in Roman Catholic.

The subjoined table exhibits their classification:-

| Schools. | 1st Class, |  | 2nd Class. |  | 3rd Class. |  |  | Not classified. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Totals,....... | 1 | ... | 1 | 10 | 22 | 21 | 22 | 73 |

Cost of Education
From the Annual Returns it appenrs that the total number of pupils who attended the schools in the year was 9,904 , and the total annual salories of the teachers, with the cost of inspection, appuratus and school books added, amount to $£ 11,834$. The total amount of school fees paid to the teachers during the year was $£ 4,1480$ s. 1d. Now, if the grants mado by the Council for school buildings and permanent improvements are not taken into account, it will then follow that cach pupil who attended the sclools in 1871 cost the Council of Education fi 3s. 10d., sixpence more than last year; and the parconts and guardians about 8s. 1d., or sispence more than they paid in 1870 . From these results it follows that the Council pays about three-fourths of the cost of cach child's education, and the parents and guardinus one fourth.

## Free Scholdrs.

Although the number of schools in the district has been considerably increased during the year the free scholars lave decreased from 1,111 to 1,040 . As I observed in my report for last year, parents unless they are in cery poor circumstances or deroid of all self-respect, generally object to enrol their children on the indigent list. In general people place but little value on that which costs nothing, and for which they have made no sacrifice. It was for this reason, no doubt, that the celebrated Oberlin adopted it as a principle to give nothing quite grutuitously; he mado each pupil pay according to his means. I think it is a healthy sign of the administration of the Public Schools Act to find that, while the pupils are rapidly increasing in number, the free scholars are gradually decreasing. It proves that the education is valued, and that it promotes self-rcspect aud a spirit of independence anong the people. Children should not be admitted to school free with the view of increasing the number of pupils or competing with other teachers. In the teaching profession, success depends on the excellence and usefulness of the school and the efficioncy of the instruction. If a school is well mannged, as a general rule, fees seldom prevent the attendance of scholars. The free scholars educated in tho schools of this district during the year are as follows :-

In the Colony of Queensland it appears that free education suddenly increased the number of pupils nearly 50 per cent., and that the attendance is more regular than when fees were charged. I am not, however, in a position to state that the number of children attending the schools in Queensland in proportion to the population is greater, nor that the pupils are more regular in their attendauce than in Now South Wales.

## Looal Suprritision.

In many schools the local superrision is las. The School Boards and Local Committees do not gencrally erince sufficient interest in the success and uscfulness of the schools under their managerpent. Regular meetings and the visitation of the sehools are much neglected, and the sehool records are seldom inspected. The names of the frec pupils, and the ground on which they were admitted free, are not reported to tho Council quarterly, ns required, but they generally endearour to keep the echool-building in repair and properly furniehed.

- Coscludine

## Conctuding Remabis.

The results for the year may be summarized as follow:-Thirty-two new schools were cstablished and the number of pupils increased by 858. The material condition of the schools and the cleanliness of the school-rooms continue to improve- The general discipline, including playground duty, is fairly satisfactory. The instruction of the schools has been considerably improved, and the Inlf-time Schools are fairly efficient. The free scholars are decreasing in number, and the nmount of school fees paid to the teachers has increased. As regards the local supervision, it remains much the same as in former years, but in all the more important features of school management considerable progress has been effected during the year, and the Public Schools Act continues to increase in public farour.

Goulburn, 16 February, 1872.
W. MoLNTYRE,

Inspector.

## GOULBURN DISTRICT.-SUMMARY OF REPORTS FOR 1871.

THE following remarks are abridged statements of my detailed Reports upon the Condition of the Public, Provisional, and Hinf-time Schools inspected by me during the year 1871. The remarks chiefly relate to the material condition and organization of the schools, the general diecipline and moral training, the subjects and methods of instruction, and the progress of the pupils in learning.

$$

This school is managed in conjunction with the Half-time School at Boconnoc, which is about 12 miles distant. The school-house needs some repairs, and closets are required, but there js a fair supply of fumiture, apparatus, and books. The pupils are clean and orderly, and their progress in reading, writing, arithmetic, and the elernents of geography and English grammar, are fairly satisfactory for the time under tuition. The inclemency of the weather was the cause of the small attendance of pupila.

> Abatuen (V.) :-Visited, 28th May.
> Pupils enrolled :-Boys, 133 , girls, 106 ; total, 239 .
> Pupils present :-Boys, 118 ; girls, 94 ; total, 212.

Fencing is still required, but in other respects the material condition of the school is good. The pupils are very punctual, clean, orderly, and well conducted. The instruction is well regulated, and so far as I examined, tho proficiency of the scholars is very fair. The school is managed in an efficient and atisfactory manner. Since the date of my visit a department for the girls has been established.

Behl's Creer (Provisioual) :- Visited, 11th August.
Pupils enrolled :-Bors, 15; girls, 17 ; total, 32.
Pupils present :-Boys, 15; girls, 15 ; total, 30.
The school is held in a small slab builaing, roofed with bark. The schoolroom has been floored with eamn boards and properly furnished since my last inspection. The cleanliness, order, and attention of the pupils have been improved since the school was placed under the Council's supervision ; but the teaching is superficial, and although the teacher is very industrious she is much wanting in professional kkill. The progress of the pupilsin learning is barely passable.

Brambood (V.-Boys' Department) :-Visited, 16th August.
Pupils onrolled :--Moys, 71.
Pupils present:-Boys, 50 .
A well, an additional room to the teachcr's residence, and a bell, are much needed, but in all other respects the material condition of the sclool is good. The pupils are clean, orderly, and attentipe to their worl, and their educational attainmenta, so far ns examined, are in most respects very fair.

Braddwood (V.-Girls' department) :-Visited, 16 th August.
Pupils enrolled:--Girls, 50.
Pupils present:-Girls, 35.
The schoolroom is rather small, and two additional desks are required, but in othor respects the material condition of the school is good. The pupils are clean and orderly, but they are not all sufficiently punctual. So far as examined, the educational attainments of the girls are fairly satisfactory in most respects.

> Bombay (H.T.) :- Visited, 22nd August.
> Pupils enrolled :-Boys, 5 ; girls, 12; total, 17.
> Pupils present:-Boys, 5 ; girls, 10 ; total, 15.

This achool is managed in coujanction with the Half-time School at Colombo, which is about two miles distant. The schoolhouse is in good repair, and the supply of furniture, apparatus, and books is sufficient. The school has been abont two months in operation. The general discipline and progress of the pupils in learning are tolerable.

## Ballalaba (H.T.) :- Visited, 29th August.

Pupils enrolled:-Boys, 5; girls, 8; total, 13.
Pupils present:-Boys, 4 ; girls, 8 ; total, 12 .
This sphool is managed in conjunction with the Half-time School at Jembaicumbene Creek, which is nbout seren miles distant. The school is held in the room of a private dwelling-house. The furniture consiste of a ferv forms and a table, and there is a fair supply of other materials. The teacher does not adhere to the "Course of Sccular Instruction," there are no lesson documents in use, and although he is very attentive to his work, he is very deficient in practienl skill. The gencral disciphine and educational attainments of the pupils are moderate.

Bois Chere (H.T.):-Visited, 29th Norember.
Pupils enrolled :-Boys, 10 ; girls, 2 ; total, 12.
Pupils prosent:-Boys, 5 ; girls, 2 ; total, 7 .
This school is about five miles from Goulburn, on the road leading to Yass; it is managed in conjunction with the Half-time School at Run of Water, which is about three miles distant. The schoolroom is suitable, and there is a sufficient supply of furniture, apparatus, and books. The pupils aro clean, orderly, and obedient, and their progress in learning is rery fair. The small attendance of pupils was owing to the prevalence of whooping-cough in the neighbourhood.

$$

& \text { Pupils present :-Boys, } 1.3 \text {; girls, } 5 \text {; total, } 18 .
\end{aligned}
$$

The schoolroom is an old building falling into decay, but there is a fair supply of furniture, appsrutus, and books. The discipline is passable, and tho attaiuments of the pupils in reading, writing, and arithmetic are tolcrable, but the "Course of Sceular Instruction" is not strictly observed, and geography, object lessons, singing, and drawing are not taught. The School Board has promised to take measures for the erestion of a new sclool-house.

Bengonia (Provisional):-Visited, 23rd November.
Pupils enrolled:-Boys, 20 ; girls, 15 ; total, 35.
Pupils present:-Boys, 9 : girls, 9 ; total, 18.
The schoolroom is sufficient in size, in passabla repair, and fairly furnished. The children are tolorably clean and orderly, but not sufficiently punctual in attendance. The writing is careless, but the average attainments of the scholars are tolerable. There are no Programmes to regulate the echool work, but there is a fair supply of apparatus and books.

$$
\begin{aligned}
& \text { Boconnoc (H.T.) :-Visited, 8th May. } \\

$$

This scbool is managed in conjunction with the Half-time School at Adaminaby, which is about tweive miles distant. The schoolroom is too small, and suitable desks are much nceded. The pupils aro clean and orderly, and their progress in reading, writing, and aritlmetic, and the elements of Engtish grammar, and geography, are fairly satisfactory for the time under tuition.

> BobendaraH (Provisional) :-Visited, 15 th May.
> Pupils emrolled :-Boys, 13 ; girls, 13 ; total, 26.
> Pupils present :-Boys, 9 ; girls, 8 ; total, 17.

This school is held in a building constructed of elabs and zinc. The schoolroom is too small, and badly furnished, and the supply of books is insufficient. The pupils are attentive, clean, and orderly. About two-thirds of the number curolled are regular in attendance, but ther are not sufficiently punctual. The progress in learning is fairly satisfactory for the few months the school has been in operation.

Bombata (V.) :- Fisited, 25th May.
Pupils enrolled:-Boys, 4.0 ; girls, 29 ; total, 69.
Pupils present:-Boys, 28 ; girls, 14; total, 42.
The materinl condition of this school is good. A permanent supply of good water has been provided eince my last inspection, and there is an ample stock of furniture, apparatus, and books. About 66 per cent. of the pupils enrolled are regular in attendance, but they are not all sufficiently punctual. The cleanliness and order are good. The erlucational attainments of the jumior classes are below the standard, but the proficiency of the senior class is in most respects very fair. The inclemency of the weather was the cause of the emall attendance of the papils.

> Burragate (H.T.) :-Visited, 1st June.

Pupils enrolled:-Boys, 10 ; girls, 4 ; totaI, 14.
Pupils present:-Boys, 8 ; girls, 4 ; total, 12.
This school is managed in conjunction with the Half-time School at Wyndham. The achoolroom is a good building, and there is a good supply of desks, forms, apparatus, and books. The proficiency of tho pupils is fair in most respects. The children who learned the ulphabet three years ago can now read and write ordinary prose, know the sinple aud compound rules of arithmetic, and have made some progress in the elements of English Granmar, modern geography, and Scripture history.

Brown Mountan (Provisional):-Visited, 7th July.
Pupils enrolied :-Boys, 10 ; girls, 15 ; total, 25.
Pupils present:-Boys, 10 ; girls, 15 ; total, 25.
Tho schoolroom is smali and inadequatcly furnished, but a new schoolhouse is in course of erection, and propor furniture will be provided. The children are quiet und orderly, and they have mado good progress in reading and writing for the short period the school has been in operation.

> Bergaild (V.) :-Visited, 17th July.
> Pupils enrolled :-Boys, 14 ; girls, 12 ; total, 26.
> Pupils present:-Boys, $9 ;$ girls, 11 ; total, 20.

The schoolroom is a good building, and there is a fair supply of furniture, apparatus, and books. The pupils are clemn, orderly, and obedicnt, and so far as examined their educational attainments are fairly satisfactory. The teacher, owing to ill health, resigned the charge of the school on the date of my visit. A new schoolroom is in course of erection, and when completed the present building will be used as a residence for the teacher.

BegA (V.) :-Visited, ISth June.
Pupils enrolled :-Boys, 41; girls, 39 ; total, 80.
Pupils present:-Boys, 34 ; girls, 22 ; total, 56
Fencing, hat-pegs, a clock, a bell, a lavatory, and improvements to the echoolroom and teacher's residence are required. There is a fair stock of apparatus and books. The discipline is effective, the instruction is well regulated, and the progress of the pupils in learning is good. The School Board has promised to makc the improvemients required.

> Brrisva (N.V.) :-Vigited, 25th August.

Pupils enrolled:--Boys, 11 ; girls, 16 ; total, 27.
Pupils present:-Boys, 3 ; girls, 4 ; totul, 7 .
The schoolroom is a small building of slabs and shingles, in fair repair. Tho supply of furniture, apparatus, and books is sufficient, but there is no residence for the teacher. The small number of pupils present was caused by the inclemency of the weather. The discipline and proficioncy of the pupils aro tolerably satisfactory.

Collecror (N.V.) :-Visited, 5th December.
Pupils enrolled:--Moys, 34; girls, 19; totai, 53.
Pupils present:-Boys, 26 ; girls, 11 ; total, 37.

- This school is held in temporary premises. The schoolroom is rather small, but there is a sulficient stock of furnituro and working materials. About 65 per cent. of the pupils enrolled are regular in attendance, but they are not all sufliciently punctual. Lhey are clean and orderly, and their attainments are fairly satisfactors.

Cilarifgong (Pro) :-Visited, 7th September.
Pupils cnrolled :-Boys, 10 ; girls, 15 ; total, 25.
Pupils present:-Boys, 5 ; girls, 11 ; total, 16.
This school is held in the Union Chapel. It is a building sufficient in size, and well furnished. The grounds are fenced, and there are suitablo out-buildings. The supply of apparatus and books is sufficient. The instruction is well regulated, and the discipline and educational attainments of the pupils are fairly satisfactory.

Cooma (V.) :-Visited, 26 th April.
Pupils enrolled :-Bors, 43 ; girls, 20 ; total, 63.
Pupils present:-Boys, 32 ; girls, 18 ; total, 50.
The teacher's residence is too small, and the walls of the seboolroom need colonring. The roof and ceilings of the rooms require repairs, and the windows, doors, and paling fence are in much need of painting. Additional desks and hat-pegs are required. The pupils are talkatire and disorderly, and not sufficiently attentive to their work. The instruction is not well arranged ; object lessons, music, drawing, and needlework are not regularly taught. The average nttaimuents of the scholars aro tolerablo. Tho School Board has taken measures for the enlargement and repairs of the school buillings.

Clear Hilis (Prov.) :-Visited, 24th November.
Pupils enrolled :--Boys, 17 ; girls, 22 ; total, 39.
Pupils prescnt:-Boys, 8 ; girls, 1.6 ; total, 24 .
The schoolroom is constructed of slabs and bark, sufficient in size, and in fair repair. There is a fair supply of furniture and working materials. The pupils are clean and orderly, and attentive to their lessons. The progress in learning is tolerably satisfactory.

> Cotra Waila (Pror.) :-Visited, 22nd December.
> Pupils enrolled :-Moys, 24 ; girls, 18 ; total, 42.
> Pupils present:-Boys, 17 ; girls, 12 ; total, 29.

The schoolroom is a small slab building, with an earthen floor, and roofed with bark. Closets, fencing, a boarded floor for the schoolroom, and two additional desks, are much needed. Apartments for the teacher are in course of erection. The discipline is passable, and the progress of the pupils in reading writing, and arithmetic, is tolersbly satisfuctors.

> Curramavg (N.V.) :--Visited, 6th December.

Pupils enroiled:-Boys, 12 ; girls, 38 ; total, 80
Pupils present:-Boye, 39 ; girls, 24 ; total, 63.
This school is held in a small slab building, too small to accommotate half the number of pupils, attending with any degree of comfort. There is as much furniture as can be used in the room. Funds have been raised for the erection of suitable school-buildings. The pupils are clean, orderly, and their attainments are very fair in most respects.

> Chatsbury (V.) :-Visited, 11th Decomber.

Pupils enrolled:-Boys, 14; girls, 22 ; total, 36 Pupils present:-Boys, 10 ; girls, 16 ; tokal, 26.
The buildings have been recently cected; they are suitable, the schoolroom is properly furnished, and the grounds are fenced. The pupils are unpunctual, but in all oiher respects the discipline is satisfactory, and the general proficiency of the pupils in learning is yory fair for the time under tuition.

Candelo (V.) :-Visited, 4th July.
Pupils enrolled :--Bors, 25 ; girls, 13 ; total, 38.
Pupils present:-Boys, 25 ; girls, 13 ; total, 38.
The schoolroomis in good repair, and well supplied with furniture; apparatus, and books; but, it ismuch too smail, owing to the increase to the population of the district. During the recent rains and floods the pupils have becn irregular in attendance, and they are not sufficiently punctual, but they are clean and orderly, and their progress in the subjects of imstruction is fair. The School Board is making arrungements for the erection of a new schoolroom and the enlargement of the teacher's residence.

> Cobargo (V.) :--Visited, Ilth July.

$$
\text { Pupils earolled :-Boys, } 18 \text {; girls, } 14 \text {; total, } 32 .
$$

$$
\text { Pupils present:-Boys, } 17 \text {; girls, } 12 \text {; total, } 29 .
$$

The schoolroom is a small slab building, inadequately furnished, but there is a passable residence for the teacher almost completed. The supply of books is sufficient, but fencing, closets, a bell, and a clock aro required. The pupils are clean and orderly, but not sufficiently punctual, and the late rains and floods lave been much against their regular attendance. The school was established in liebruary last. The pupils are learning the mere elements of reading, writing, and arithmetic, and their progress is moderats.

> Coloumo (H.T.) :- Fisited, 22nd August.

Pupils enrolled:-Boys, 6 ; girls, 10 ; total, 16 .
Pupils present:-Bogs, 5 ; girls, 10 ; total, 15.
This school is managed in conjunction with the Half-time School at Bombay, which is about two miles distant. The school is a smull slab building, in fair repair. The furniture, apparatus, and books are sufficient. The school has been about two months in operation. The disciplino and progress of tho pupils in learning are tolerable.

$$

This school is held in the house of one of the settlers. The room in which the children are taught .was thoroughly clean. The furniture consists of a desk, two small tables, three forms, a black-board, and $a$ map of tho World. The children are clean, orderly, and attentive to thoir work. The school is managed in conjuncion with the Half-time School at Towamba, which is sixteen miles distant. It has been in operation about a year, and the pupils have receired twenty-three full weeks tuition. They learned the alphabet when it was established, and now ten can read and write monospliabic composition, and four easy narrative. The writing of the younger children is good, and of the older pupils excellent. Tho progress in tho elements of arithmetic and geography is good. Funds have been raised to build a school-house.

> Edex (V.) :-Visited, Sth June.
> Pupils curolled :- Boys, 27 ; girls, 21; total, 48.
> Pupils present:-Boys, 25; girls, 16; total, 41.

Threo more deske, an additional room to the teacher's residence, and some repairs to the fencing arc required, but the materia! condition of the school in other respects is passably good. Tho junior classes yequire more carcful teaching as regards the matter of their reading lessons and the meaning of the words, but the general disciplino and average attainments of the pupils in learning are fair.

Enobodala (H.T.):-Visited, 14lh July.

This school is managed in conjunction with the Half-time School at Turrallh, which is about 10 miles distant. The schoolroom is in rery fiair repair, but the furniture is not of a vory suitable description. The pupils are not sufficiently punctual, but in other respects the discipline is passable. The progross in learning ranges from tolerable to fair.

Gowdaroo (V.) :- Visited, 7th December.
Pupils eurolled :-Boys, 21 ; girls, 8 ; total, 29.
Pupils present:--Boys, 17 ; girls, 3 ; total, 20.
The material condition of this school is good. The building is new, and the schoolroom is well furnished. There is a sufficient supply of apparatus and books. More than half the pupils were late, the schoolroom floor was not clean, and the clock was slow. The habits of order, attention, and industry are much neglected, nud the discipline generally needs great improvement. The teacher is very deficient in professional still, the instruction is badly arranged, and the progress of the pupils in learning is unsatisfactory.

Goxdaroo (Pror.) :-Visited, 8th December.
Pupils enrolled :-Boys, 7 ; girls, 11; total, 18.
Pupils present:-Boys, 7 ; girls, 6 ; total, 13.
The echoolroom is in good repair and sumeient in size; it has teen stuecoed lately, and there is a good stock of furniture, apparatus, and books. The pupils are clean, orderly, and attentive to their lessons, and their attaimments ure fairly satisfactory.

> Grexa's Fiat (II.'I.) :-Visited, Gth Junc.

Pupils present:-Boye, 8 ; girls, 6 ; total, 14.
This school is held in a small wooden building with an earthen floor. There is a fair supply of desks and forms, but the stock of books is not quite sufficient. The discipline is very lax, the instruction is badly arranged, and the progress of the pupils in learning is but moderate.

Pupils curolled :-Boys, 19; girls, 16; total, 35.
Pupils present:-Boys, 7 ; girls, 8 ; total, 15.
The schoolroom is a rooden building, in passable repair. The furniture is sufficient, and there is a tolerable supply of apparatus and books. The discipline is good, and the attainments of the pupils are
very fair. very fair.

> Mommeld (V.) :-Visited, 28th November.

Pupils emrolled :-Boys, 23; girls, 21 ; total, 44.
Pupils present:-Boys, 19 ; girls, 17 ; total, 36.
This schoolhouse is a substantial stone building, well furnished with all necessary applisnces. The general discipline and average proficiency of the pupils in the subjects taught are tolerably satisfactory. .

Major's Creeik (V.) :-Visited, 25th August.
Pupils enrolled :-Boys, 52 ; girls, 48 ; total, 100.
Pupils present:-Boys, 33 ; girls, 31 ; total, 64.
Oring to the increase of pupils, the schoolroom is too small, and it is in much need of painting. A bell, $a$ book-press, some additional desks, and a supply of hat-pegs, are required. The pupils are clean and orderly. The wet morning tras the cause of the small attendance. Singing and drawing are not taught, but so far as examined, the attainments in the other branches are fairly satisfactory. The School Board have taken measures to enlarge and improve the schoolroom, and build a repidence for the teacher.

> Merimblas (Prov.) :-Visited, 7th June.

Pupils enrolled :-Boys, 18 ; girls, 12 ; total, 30.
Pupils present;-Boys, 16 ; girls, 11 ; total, 27.
This school is heid in the Presbyterian Church. It is a good wooden building, and sufficient in size, but closets, hat-pegs, and suitable seats for the younger children are much needed. The pupils are talkative and disorderly, and not sufficiently attentive, but they are clean, and tolerably regular and punctual in attendance. The teaching is conducted with considerable industry, and the progresp in reading, writing, and arithmetic, is tolerably sutisfactory.

## Mummeil East (N.V.):-Visited, 21st September.

Pupils enrolled :-Boys, 16 ; girls, 18; total, 34.
Pupils present:- Boys, 10 ; girls, 9 ; total, 19 .
The schoolroom is a bush building, in fair repair, constructed of slabs and bark. The supply of furniture is not quite sufficient. The grounds are fenced, but the closcts are in bad repair. The pupils aro punctual, and not sufficiently clean. Two additional dosks, hat-pegs, and a larger black:board, are required. So far as examined, the attaimments of the pupils are passable in most respects.

> Monitmee (N.V.) :-Visited, 15th September.
> Pupils enrolled:-Boys, 11; girls, 9; total, 20.
> Pupils present:-Boys, 11; girls, 8; total, 19.

Tho building needs painting, and repairs to the windows, floors, chimneys, and fircplaces. Closets and hat-pegs are much required. The School Board has commenced to make the necessary improvementa. The present teacher has been only of few days in charge of the school.

> Michalago (Prov.) :-Visited, 24th April.
> Pupils cnrolled :-Boys, 17 ; girls, 12; total, 29.
> Pupils present:-Boys, 15 ; girls, 12; total, 27.

The schoolroom is of stone, and in good repair. There are suitable outbuildings, the playground is fenced, and water is convenient, but there is no bookpress nor hat-pegs. The supply of apparatus and books is sufficient, but the teaching is not conducted with much earnestncss nor ekill; the discipline necdis improvement, and the attrinments of the pupils are barely tolerable.

Mittagong (Prov.) :-Visited, 28th March.
Pupils enrolled :-Boys, 10; girls, 13 ; total, 23.
Pupils present:-Boys, 6 ; girls, 6 ; total, 12.
This school is held in a small wooden building, which is in fair repair. There is a tolerable supply of furniture, apparatus, and books. The teacher has very little knowledge of the modern methods of tuition, the discipline is lax, and the attainmonts of the pupils are but moderate.

Mitingoxa Lower (V.) :-Visited, 2sth March.
Pupils earolled :--Boye, 22 ; girls, 12 ; total, 34.
Pupils present:-Boys, 20; girls, 11 ; total, 31.
The school furniture has not yet been supplied. The building is sufficient in size and in good repair, but closets, a supply of water, repairs to the fencing, playsheds to protect the pupis from sun and rain, and a residence for the teacher, are all required. The school has been in operation but a few weeks, and the pupils are learning the mere elements of reading, writing, and arithmetic. The School Board has taken measures to carry out the improvements required.

Marolan (N.V.) :-Visited, 20th December.
Pupils cnrolled:-Boys, 11 ; girls, 11 ; total, 22 .
Pupils present :-Boys, 5 ; girls, 6 ; total, 11.
There is no residence nor schoolhouse free of rent to the teacher. The schoolroom is in bad repair, and the furniture consists of a small table, two old forms, and two wooden slabs. The School Board promised to provide furniture, but it has not yet been supplied. The pupils are clean and orderly, and their progress in learning is tolerably satisfactory. The inclemency of the weather was the cause of the small attendance.

Mooroowoorises (Y.) :-Visited, 20th December.
Pupils enrolled :-Boys, 36 ; girls, 35 ; total, 71.
Pupils present:-Boys, 25 ; girls, 15 ; total, 40.
This school is conducted in temporary premises, but the erection of suitable school buildings has now been completed. About tivo-thirds of the pupils enrolled are regular and fairly punctual in attendance, and so far as examined, the progress in learning is tolerably satisfactory.

- Marindily (Prov.) :-Tisited, 26th September.

Pupils enrolled:-Boys, 16; girls, 16 ; total, 32.
Pupils present:-Boys, 10 ; girls, 1.2 ; total, 22.
This school is held in a comfortable building constructed of slabs and shingles. The grounds are fenced, and thero aro suitable closets. The desks and forms are too high, and hat-pegs are much needed. The school materials ore not used with sufficient care, the pupils are uapunctual, but they are tolerably clean and orderly. The classification is injudicious, there are no Programmes in use, and the progress of the pupils in learning is slow and unsatisfictiory. The teacher is very deficient in professional skill.

> Mivinenavilenge (H.T.) :-Visited, 18th December.
> Pupils onrolled :-Boys, 7 ; girls, 6 ; total, 13.
> Pupils preent:-Boys, 5 ; girls, 6 ; total, 11.

This school is held in the Engligh Church. It is an excellent: building, and supplied with good deaks and forms, but closets, a bookpress, and hat-pegs are required. There is an anple supply of apparatus and books. The pupils are punctual, clean, and orderly, and their attainments are tolerable in most respects.

New Stryfield (N.V.) :-Visited, 29th March.
Pupils cnrolled.-Boys, 15 ; girls, 26 ; total, 41.
Pupils prosent:-Boys, 13 ; girls, 26 ; total, 39.
This school is held in the Wesleyan Chapel. Tt is a commodious building and in gond repair, but the playgrounds are not enclosed. There is a fair supply of furniture, apparatus, and books. The teacher is advanced in years, and deficient in professional skill, but he is endearouring to improve the management of the institution.

Nerhiga (Prov.):-Visited, 5th September.
Pupils enrolled:-Boys, 12; girle, 20; total, 32.
Pupils present:-Boys, 9 ; girls, 17 ; total, 26.
This school was conducted for some time as a Half-time School in conjunction with Corang, which is about four miles distant, but in April lust, owing to the small number of pupils at Corang, the Provisional School at Nerriga was established. The echoolroom and teachcr's residence are built of slabs and bark, and there is a fair stock of furniture and working matcrials, but closets, fencing, and hatpers are much needed. The general discipline and attainments of the pupils are tolerable.

> Mrrtutimes (V.):-Visited, 11th December.
> Pupils enrolled :-Boys, $13 ;$ girls, $23 ;$ total, 36.
> Yupils present:-Boys, $6 ;$ girls, $12 ;$ total, 18.

The buildings and furniture hare been recently repaired, and the schoolroom line-washed. The supply of apparatus and books is sufficient, and the general discipline and progress of the pupils in learning are tolerable in most respects.

Nonmood (V.) :-Tisited, 22nd Decernber.

This school is held in the Roman Catholic Chapel, which is a substantinl stone building, but as there is no fircplace it is rery cold for the pupils during the winter. Therc are no closets nor fencing, but the supply of furniture, apparatus, and books, is uearly sufficient. The cleaniiucss, order, and attention, requirc much improvement, and the attaiments of the pupils are snall.

> Perrigradail (N.V.) :-Visited, 13th July.
> Pupils enrolled :-Boys, 14; girls, 14; total, 28.
> Pupils present:--Boys, 12 ; girls, 10; total, 22.

The schoolroom is in good repair, and there is a sufficient supply of furniture, apparatus, and books, but the grounds arc not fenced. The pupils are very irregular, but tolerably punctual, clean, orderly, and attentive. So far as examined, the progress in learning is fair.

Oranaeir (H.-T.):-Visited, 30th August.
Pupils enrolled:-Boys, 6 ; girls, 14 ; total, 20.
Pupils present:-Boys, 1 ; girls, 9 ; total, 13.
The teacher docy not adhere strictly to the "Course of Secular Instruction," and there are no Programmes in use. His knowledge of the inaproved methods of tuition is very limited, and the attainments of the pupils are but moderate. This school is conducted in conjunction with the Half-time School at Jerrabatgully. The gencral discipline of the pupils is passable.

> Panbvia (V.) :- Visited, 5th June.
> Pupils onrolled :- Boys, 22 ; girls, 29; total, 51.
> Pupils present:-Boys, 16 ; girls, 14; total, 30.

The old site and buildings thereon haring beon repcatedly flooded, at length became uninhabitable, and thes have been sold, with the view of building another schoolhouse in a dry and healthy position not linble to inundation. The school in the meantimo is held in a mmall weatherboard building. Inatpegs are required, but there is a fair supply of other inaterials. The recent rains and floods have been much against the usefulness of the sclool. The gencral discipline is passable, and the attainments of the pupils, range from tolerable to fair.

> Queasbeyan (N.V.) :-Visited, 20th April.
> Pupils enrolled :-Boys, 35 ; girls, 16 ; total, 51 .
> Pupils present:-Boys, 31 ; girls, 10 ; total, 41 .

The schoolroom is sufficient in size and in passable repair, but it is too near the main street. There is a tolerable supply of apparatus and books, but hatpegs and additional deske are mach needed. The gencral discipline and attainments of the pupile, so far as examined, are fair. Tho attendance of pupils is increusing.

> Quinjago (H.T.) :-Visited, 19th December.

This school is held in a small wooden building, and managed in conjunction with the Half-time School at Mullengullenga, near Lake Bathurst. The schoolroom is in passable repair, and there is a fair supply of materials. The pupils are clean and orderly, and their attainuents are tolerable in most respects.

> Woutmia North (V.) : - Visited, 30th June.
> Pupils cnroiled:-Boys, 24 ; girls, 19 ; total, 43 . Pupils present:-Boys, 20; girls, 10; total, 30.

The buildings have been recently paiuted, a bell is required, but in all other respects the material condition of the school is good. The recent rains and floods have been against the regular attendance of the pupils, but the cleanliness and order are passable. The progress in learning is unsatisfactory.

> Woutmia Socth (V.):-Visited, ôth July.

Pupils cnrolled:-Boys, 16; girls, 14; total, 30.
Pupils present:-Boys, 16 ; girls, 14; total, 30.
The eite is dry and healthy, and the material condition of the school is good. The general dig. cipline is passable, and the attainments of the pupils are very fair. In consequence of ill liealth, the tercher renigned the chargo of the sehool on the day of inspection.

Walker (Prov.) :-Visited, 27th September.
Pupils cnroiled:-Boys, 9 ; girls, 11 ; total, 20. Pupils present:-13ove, 8; girls, 11; total, 19.
The sehool is held in a comfortable wooden building. The supply of materinls is sufficient, and the grounds are fenced, but an additional wiudow in the schoolroom and a supply of bat-pegs are required. The general discipline and attendance of the pupils are tolerably satisfactory in most respects.

Wrepham (H.-T.):-Visited, 2nd June.
Pupils emrolled:-Boys, 10 ; girls, 15 ; total, 25.
Pupils present:-Boys, $\mathbf{7}$; givls, 13 ; total, 20.
This school is managed in conjunction with the Falf-time School at Burragate, which is about eight miles distant. The schoolroom is a good building, and thore is a supply of good desks, forms, apparatus, and books, but closets, fencing, a book-press, and hat-pegs, are required. The discipline is good; and the proficiency of the pupils is fair in most respects.

Yelbrarfie (H.-T.) :- Tisited, 14th December.
Pupils enrolled:-Poys, 10; girls, 7; total, 17 .
Pupils present:-Boys, 6 ; girls, 4; total, 10 .
This school is managed in conjunction with the Half-time School at Richlapds, which is about thres miles distant. The schoolroom is in passable repair, and there is a fair stock of working materisls. The pupils are irregular in altendnuce, being ofton cmployed in farming operations, but they aro tolerably clean and orderis, and the progress in learring is passable in most respecte.
Goulburn,
16th February, 1872.
W. MTNTYRE,

Inepectior.

## MAITLAND DISTRICT.

Insiector's General Report for the Year 1871.
My duties as Inspector of the Maitland District commenced on the 1st of April, 1871; but owing to the press of clerical matters consequent on the close of tho March quarter, the actual work of inspection was not begun until the 18th of that month.
I.-Nimber and Description of Schools.

At the close of the year 1870 there were in operation the following schools :-

| Public. | 30-comprising 37 departments. |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Provisional | 15 | " | 15 | " |
| Half-tine | 2 | " | 2 | ; |
| Certificd C.E. | 18 | " | 19 | " |
| Certified R.C. | 8 | " | 11 | " |
| Certified Pres. | 1 | " | 1 | " |
| Certified Wes. | 1 | " | 1 | " |
| Total | $\overline{81}$ |  | $\overline{86}$ |  |

Early in the year 1871, Mundooran and Four-mile Creek Public Schools were closed on account of the small attendance of pupila; and, for the same reason, at the close of 1870 tho certifcate was withdrawn from Blandford C.E. School. Millield Provisional has become Millfield Public School, and a Public School has becn established at Blandford mainly by the action of the promoters of the former C.E. School. In addition, Provisional Schools have been opened at Broke, Cookah, Doyle's Creek, Stockyard Creek, Summerhill, and Webber's Creek. With these alterations, the number of schools in the district in operation for eiticr the whole or part of 1871 is as folluws :-

| Public...................... | 36-comprising 37 departments. |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Provisional .............. | 20 | " | 20 | $\stackrel{ }{\square}$ |
| Half:time ................. | 2 | , | 2 | " |
| Certificd C.E. ........... | 17 | " | 18 | " |
| Certified R.C. | 8 | " | 11 | " |
| Certificd Pres. | 1 | " | 1 | " |
| Certified Wes. | 1 | " | 1 | " |
| Total | $\overline{85}$ |  | 90 |  |

Succoseful measures were also taken for the establishment of Half-time Schools at Sparke's and Junction Creeke, a Provisional School at Knockfin, and for the reopening of the Public School at Four-mile Crcok. None of these schools, however, came into operation before January, 1872, and are thercfore not included in the foregoing list.

## II.-Amount and Cilaracter of Inspection.

With the exception of Doylo's Creck Provisional School, which was not opened till the 9th of Octobor last, and would bave required a special visit at a very inconvenient time, erery school and departmont in the district has reccived the Regular Inspection. Four (4) Ordinary Inspections have also been made, and serenty-eight ( 78 ) lincidental ones-the hatter distributed among forty-trro (42) schools.

It is pleasing to be able to record so large a number of inspentions; and, in becoming acquainted with a district entirely new to me, I have been singularly fortunate in eseaping those interruptions from floods and bad roads that formed the prevailing featurc of $185^{\circ} 0$. It is to be regretted, howerer, that, even under such favournble conditions, so fow ordinary inspections can be made. These inspections afford opportunities for observing the school as conducted by the teacher himself, and of discovering defects in its management that, without them, year alter year may nand do escape notice. But beyoud this detective end of the ordinary inspection, there is a consequent and educative one. At present many of our schools are, and for somo time to come will be, conducted by teachers who have little natural aptitude and less special training for their work, and to such teachers these inspections are invaluable. Inspection for tho time being is dropped, and the Inspector becomes teacher; practically illustrating in his own management of the school the points upon which the teacher is ignorant. Although it is improssible fully to compensate for the absence of such inspections, I have endearoured, as far as circumstances rould admit, and where the case required it, to combine this latter feature with the regular inspection; and, except in the case of 3 very few echools, I have supplied the teachers with as detailed a report of tho results of the examination in the "Observation Book," as is given in the Sydney District. This of course involves much cxtra time and tronble; butt the spirit in which the suggestions and assistance thus given has been taken encourages the hope that the adrantages aceruing will be commensurate with the labour bestowed. The results of the teaching in the rarious schools have been testel manly br oral examination upon the subjects, and to the extent preseribed in the Standurd of Proficiency furnished to every teacher. Only in tho case of $a$ few smull schools, which the nature of my arrangements compeiled me to inspect on a Saturday, has notice of the inspection been giren. It is howover, impossible, to visit every school unexpectedly. Bush telegraphy is eflectual in making known the movements of an Iuspector; and where the teacher is so inclined, he has the opportunity oftentimes of makiug special preparations for his conning. In a few instances I hare heard from nembers of Local Boards expressions of dissatisfaction at the withholding of notice of a visit; but many more have voluntarily admitted both the propricty and desirability of such a course.
A. Summary of the Reports upon the Condition of the Schools in the District will be found in Annexes F and G.

## III.-Matehiar Condition of Schoors.*

All but about eighteen (18) schools have sites varying from fair to good, while only in the case of three (3), Nclson's Plains, Phenix Park, and Roughit, are they really bad. The two former schools are scarcely uccessible in wet weather; and, in flood-time they are partly under water. Roughit Public School is to a less extent liable to be flooted, but has no right-of-way to it; and is very uncentral.

Owing to losses by floods through a succession of seasons, the district generally has become greatly impoverished, and much that needs doing in the way of repairs to school-buildings has to be left undone for want of funds. Not a few of the minor repairs in Public Schools hare been effected either at the expense of the teachers themsolres or through their instrumentality. Should the scasons prove as favourable nest year as they have done during the latter half of this, better things may have to bo recorded. At the same time, it cannot be denied that the condition of school buifdings generally would leave little room for complaint if Local Boards were found taking a more active and intelligent interest in tho schools they represent than they do at present. New Public School buildings have been erected at Brokenback and Campsie, and new Roman Catholic Schools at Morpeth and Musclebrook are approaching completion. Important repairs and additions have also been made to the following Public sthools :Hinton, Lochinrar, Singleton, and Enst Mritiand ; and minor ones to the Publie Schools ut Cessnock and Sugarlonf, and to the Church of England Schools at Buchanan, East Maitland, and Scone. Gosforth Public School, which was destroyed by flood in April, 1870, has not since been yebuilt, and the school, which was for a time carried on in a small room of the teacher's dwelling, has been ciosed. Ipunmore Public School is a dangerous and uusightly ruin; and several others, though not quite so bad, call for extensive repairs. As a rule the Denominational Schools are reasomably well cared for, and in very fair condition. Amoug Provisional Schools, the best are those at Coolah, Uarbry, and Webber's Creek; the rest aro in general of a very inferior description.

Comparatively few schools hare good playgrounds, and not one is to be found whose playground aecommodation is all that could be desired-ample it extent, securely feneed, honlthily and pleusantly situated, planted with trees for shade and ormament, supplied with weathershed, laratory, and separate closets, and furnished with the simpler gymmastic apparatus for the physical training of the pupils. About the best in the district are those of the Singleton schools (3) and the one nt Coonamble.

In a little more than half the number of schools the supply of furniture is from fair to good; in the rest, from tolerable to bad. The stock of apparatus and books is, gencrally speaking, sufficicat and suitable. In Public and Denominational Schools fair care is taken for its preservation, but in many Provisional Schools this is not the case. In every instance where it appears from the requisition for school materials rendered yearly by teachers that the school stock is below what it should have been with the exercise of ordinary care and economy, they are called upon for an explanation; and, should such explanation prove unsatisfactory, they are required to make good the deficiency at their own expensc. According to a calcuunsaisiactory, they are required to make good the deficiency at their own expensc. According to a calcu-
lation bascd upon some sixty requisitions receired and passed since my appointment to the charge of the lation bascd upon some sixty requisitions received and passed sinec my appointment to the charge of the
district, I find that for books-not ineluding sechool records-aud appuratus, the average cost per head us per onrolment has been but a fraction above sereapence.

As a rule, a rery fair degree of neatness and accuracy is observed in the keeping of the school records. The Register of Lessons is the one least satisfactorily compiled. Instead of being made up at the close of each day's work, and containiug concise but epecific cutries of the lessous given-entries that would enable an Inspector to judge not only of the matter of the instruction, but, to some extent, of the method ulso--they have been in nearly crery instance mere transcripts of the Lesson Programmes, professedly made up weekly, but too often allowed to rum on unattended to for severyl weeks together. It is but fair to many teachers, chicfly thoso employed in and about Maitland, to state that my instructions in reference to the mode of keeping these documents are now receiving carefui attention. Quurterly Returns are not compiled with the uecessury neatncss and accumacy; and, on the average, about one-fifth of the number received erery quarter have to be eont back for correction.

## N.-Moral Cmaracter of Schoole. $\dagger$

In considerably more than half of the schools in the district, the degree of regularity and panctunlity of attendunce observed rates from tolerable down to bed ; in the remainder it is from fair to good. These results are far from satisfactory. Compulsory cducation is looked formard to as the cure for irregularily of attendance, but umfortunately compulsory education is not yet the law of the land, nor for some time to come does it nppear likely to be. Even when such 22 mensure is introduced, it is more than probable that many schoois will be situated in localities where its provisions will be all but inoperative. In the meantime, teachers can do much to improve matters thomselves. Thit they can do so is no mere supposition ; for, from tables now before me is derived this significant fact, that in almost every instmee in which the gorerument of a school is of a high order, the character of the attendance both as regards regularity and punctuality is from fair to good; and vice versa. The rule cstnblishes itself with such consis-
teney

* Aonez B. $\dagger$ Aunex $C$.
toncy that very irregular or unpunctual attendance, but especially the latter, may be taken as primd facie evidence of defective management. At the same time it must be admitted that in the case of scarcely uny school, oven with the best directed efforts of the teacher, can absolutely good regularity of attendance be secured. This is the great obstacle to successful teaching; and in country parts, where the evil is felt most, the teacher must be thoroughly imbued with a love for his work, and consciontions in its discharge, who does not under its disheartening influence, go through his round of duties in a spiritless and perfunctory manner.

The following Table shows for eacle quarter of the year the proportion of pupils enrolled who wero in average daily atteudance:--

| Class of School. | Per centage for March Quarter. | Per centage for June Quarter. | Per centage for sept. Quarter. | Per centage for Dec. Quarter. | Average percentage for tho Year. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Public, Provisional, and Halftime | 65 | 65 | 68 | 66 |  |
| Certified Denominational ...... | 65 | 63 | 67 | 69 | 66 |

The number of pupils emrolled on the day of examination was 5,198 ; and, of these, 4,002 , or nearly 79 per cent., were present. Thesc numbers cxceed those of last year by 237 in the enrolment, and by 463 in the actual attendance. In other words, there has been an increase of $5 \frac{4}{4}$ per cent, in the number of pupils enrolled, and of nearly 9 per cent. in the attendance at examination. A comparison between tho numbers for 1870 and 1.871 is presented in the following Table :-

| Year. | Class of School. | Number cnrolled. | Numbers present at Examination. |
| :---: | :---: | :---: | :---: |
| 1870. | Public, Provisional, and half.Time $\qquad$ <br> Certified Denominational $\qquad$ <br> Total $\qquad$ | $\begin{aligned} & 2,189 \\ & 2,772 \end{aligned}$ | $\begin{aligned} & 1,605 \\ & , 024 \end{aligned}$ |
|  |  | 4,961 | 3,629 |
| 1871. | Public, Provisional, and Half-time $\qquad$ <br> Certified Denominational $\qquad$ <br> Total $\qquad$ | $\begin{aligned} & 2,503 \\ & 2,695 \end{aligned}$ | $\begin{aligned} & 1,887 \\ & 2,205 \end{aligned}$ |
|  |  | 5,198 | 4,092 |

Cleanliness is a matter that receives a rery fair share of attention in most schools, and the results are, generally speaking, creditable-from fair to good in two-thirds of the schools, and from tolerable to indifferent in the other third. There are only five sehools in which the character for clempliness is bad, and, of these, four are of the Provisional class. Habits of cleanliness are taught much more effectualiy by example than by precept, and where the teacher's bas been a good one, cause for complaint seldom exists.

In about half of the schools in the district the order is cstimated at from fair to good; in nbout twenty (two-ninths), it ratos from indifferent to bad. Good order is the distinguishing characteristic of a bealthy discipline, and to secure it requires the exercise of firmness, tact, and discration,--qualities more rave than common. Without, it, the moral training of the pupils is defective in a rital point, and instruction, at best, will be but parbial in its effects. Order is a far more comprehensive term as applied to schools than some teachers appear to suppose. It implics quiet precision and uniformity of novenent, prompt and willing obellience to authority, intelligent and respectful attention to instruction; and it further takes into account the deporment of the papils when restraint is temporarily remored, as well as when the teacher's cye is upon them. As far as I am aware, cases of undue screrity in the use of corporal punishment are extremely rare; and only two formal complaints in reference thereto have been received by me. A few teachers in the district hive resolved to abolish corporal punishment altogether, but fuch a procedure is perlaps some what ill-advised. In the opinion of many educationists, the right, the power, and the determination to inflict it, are the basis of moral influence in school government. At the eame time, it should be resorted to only in special cases, nad when other influences have fuiled. The practice of caning for almost every tripial offence that occurs in school is as injurions as it is cruel and reprehensible; and doubly so from the fact that the majority of such offences are really chargcalle upon the teacher, arising as they do out of inability or neglect on his part to keep his pupils fully and profitably employed.

## V.-Instruction*

The necessity for a judicious classification cannot be too strongly insisted upon. With the nid of properly constructed Time-table and Lesson Progrummes, it enables the teacher to do the greatest amount of effective work in the least possible time. In country schools, where but one teacher is in charge, the aim ehould be to make as few classes as possible, consistent with securing a reasonable equality of attainments in each. Three will be found quite as many as even an energetic and skilful toncher can manage well, and will afford scope enough to aroid doing injustiec to the capacities of any pupil likely to attend. It is in dealing with the first or lowest class that errors are most frequently made. As many as four subdivisions of thjs class have been found in sereral selools; while in alarge number-the majority perhapsthe rule is to have three, the teuchers professing their inability to organize their schools with less. I am of opinion that this defective organization is mainly if not entirely owing to the unsuitable methods employed in teaching reading in its curlicst stages; and, until teachers discard the traditional but wearisome and profitless alphabetic method, and substitute the more modern and approved ones, their first class will continue to be, what eo many confess it is now, their chief source of cmbarrasement and a clog on the progress of the sehool. Whe character of the classification ranges from fair to good in half the number of schools, wud is indifferent or bad in six only-five of them being Provisional.

The occupation of the pupils is on the whole fairly protided for. Only in one school in the district were both Lesson Programmes and Time-table wanting. In Public and Denominational Schools these documents are, as a rule, judiciously compiled, und, to a satisfactory extent acted upon; but in Provisional Schools this is not the case ; some of the Time-tables are impricticable ; and the entries in the Programmes are often incongruons and very meagre.

Omitting Provisional Schools, the tcachers in which are mntrained, it is found that in one-eighth of the schools the methods vary from indifferent to bad, in onc-lalf they are of tolerable merit, and in threeeighths they range from fuir to good. This is reasonably satisfactory. But, in the mode of applying the methods used, there are many degrees of excellence, and many faults obsorrable. The most serious fault
that can be committed-and it occurs most frequently among the better ciass of teachers-is to do too much for the pupils-to explaiu a subject, figuratively speaking, to rags, so that no mental effort on their part is neeessary for its comprehension. This is telling, not teaching. Therc is a point at which the simplifying process in instruction should stop, and that point is noither below the level of a child's comprehension nor on a level with it, but just viihhin reach of it. The aim should be to develop the child's mental powers by presenting reasonable difficultics in such a way that he can, by the exercise of the mental effort proper to him, overcome them. And to very few children, if to any, would such exertion be distasteful. On the coutrary, its infuence will prove inspiriting and healthful, each fresh achievement affording incentive to still further effort. Under such a training sot only is the child's school life made pleasant and profitable, but its beneficial impress extends itself in a multitude of ways throughout his after life. There are other faults connected with the teaching processes, and of much more general occurrence than that above referred to. The more important are, neglect to test the eficacy of the work as it proceeds by direct searching examination, and the absence of proper recapitulation. These expedients may be applied by the untrained as well as by the trained teacher; and neither the one nor the other can dispense with them and feel sure of the soundness of his instruction.

* General proficisacy. - In all cases where the average proficiency'reaches the mark fair, or within a small fraction of it, the attainments have been regarded as eoming up to the requirements of the Standard." According to this estimate, it may be seen by reference to Aunex thet only abont onefourth of the schools reach or exceed these requiroments, whilo the remainder fall below them. These results, though low in themselves, show substantial improvement upon those of last year, which, judged by the same standard, give only one-seventh as the proportion meeting or exceeding it. The average proficiency in the several classes of schools is thus estimated:-

| Class of Schools. | No. of Schoois. | Estimated Proficiency. |
| :---: | :---: | :---: |
| Pubiic | 37 | Nearly tolcrable. |
| Erovisional | 19 | Small to indifferent. |
| Hall-time | 2 | Tolerable. |
| Certified C. E....................................... | 18 | Moderate to tolerable. |
| Certifed P. C. .................................. | 11 | Tolerable. $\dagger$ |
| Certified Pres.. | 1 | Tolerable. |
| Ccrified Wes.. | 1 | Nearly fair. |
| All Schools | 89 |  |

It will be seen from this table, that although so large a number of achools fail in fully satisfying the requirements of the Standard, it is ouly in the case of Provisional Schools that there is not, on the whole, a tolerable approach to it.

Subjecas : Reading.-As was before remarked, it is in treating this aubject in its earliest stages that teachers find their greatest difficulty, and where, as a rule, they fail. The so-called Alphabetic and Spelling 31ethots are adhered to with a pertinacity that would command success, if success were at all a likely product of them. Most teachers are ignorant, or at best have but a confused ideu, of the more modern methods employed in terching the subject to infunt classes; wnd of those that have a kuowledge of them, the majority appear to be deterred from putting it in practice, fearing the expressions of dissatisfantion that are sure to be used by many illitevate and foolish parents with whom one of the most tangible and convincing proofs of a child's eaily progress in the art is its ability to "say the A.B. C. forwards and backconvincing proots of a chids early progress in the art is its ability to "say the A.B. C. Forwards and back-
wards without the book." The extended introduction of tho First Australian Class Book has done much wards without the book: The extended introduction of tho First Australian Class Book has done much
towards setting teachers in the right track, but there are few that can be said to make an intelligent use of it, or who carry out effectively the design of its compiler. In the higher classes the mechanical part of tho reading is fairly sutisfactory; but beyond this littlo is attempted, or, if attompted, accomplished. Really good reading, natural and expressive, is seldom heard. In the majority of Public and Denominational Schools the subject matter of the reading lesson receives fair exposition, and the results of examination in this particular are, on the whole, pretty creditable. Under these circumstances it is the more remarkable that in such schools the rcuding is not of a better order than it is, as the proper oral readering of a passage is directly dependent upon the conception of its scope and meaning. But reading is to a large extent an imitative art ; and it is an allowable inference that teachers either do not as $n$ rule is to a large extent an imitative art; and it is an allowable inference that teachers either do not as a rule
make use of exemplar reading, or that, if they do, the imperfections of their pupils are but the reflex of make use of exemplar reading, or that, if they do, the imperfections of their pupils are but the reflex of
their own. Spelling is taught in connection with the reading lesson, but more effectually through the agency of the dielation exercise, The objectionable practice of compelling pupils to commit to memory the spelling of a long string of strange, and to most of them, meaningless words, is now fast disappearing.

Writing,-The results in this branch are, perhaps, better than those in any other,-not so much because better methods or greater care are employed in teaching it, but becanse it is a subject of a mechanical nature, depending for its acquisition upon the exercise of the perceptive faculties of the pupils. In nearly all schools the copy-books used contain engraved head-lines, and these often of an inappropriato kind; in a few, plain ruled books are used, and copies set on the black-board. Where, in inappropriato kind; in a few, plain ruled books are used, and copies set on the black-board. Where, in
the latter case, the copies are carefully graduated, and the points to be attended to in their execution the latter case, the copies are carefully graduated, and the points to be attended to in their execution
touched upon by the teacher at the commencement of the lesson, the results are always of a gratifying touched upon by the teacher at the commencement of the lesson, the results are always of a gratifying
find. The writing of about thirteen per cent. of the pupils is estimated at indifferent or below, while that of fifty-thrce per eent. ranks from fair to good.

Arithmetic.-In Prorisional Schools only about fifty per cent. of the pupils learn slate arithmetic ; in the other classes of echools the proportion is a littie over seventy per cent., distributed thus:-

Taking all classes of schools iuto the estimate, the percentages of proficiency are as follows:-

$$
\begin{aligned}
& \text { Fair.............................. in } 23 \text { per cent. } \\
& \text { Moderate to tolerable ......... in } 44 \text {, } \\
& \text { Indifferent to bad ................ in } 33 \text { " }
\end{aligned}
$$

These restits show little, if any, improvement on those of previous years. In the absence of the Ordinary Inspection, I am not in a position to speak of the methorls employed otherwise than as indicated in their effects. Judging by these, I am persuaded that, until teachers use their tongues and the blackboard to a much greater extent than at present, no noteworthy improvement will have to be recorded. It is to be feared that the majority of country teachers regard the arithmetio much in the same light as they do the writing lesson. Sums are "set," and the pupil is left to his own ingenuity or ignorance to
manage
manage or fail their eolution, while the teacher occupies himself exclusively with some other class and suhject. In many schools the children are found to be expeditious in the performance of what may be called the mechanical part of the work, but very few understand the reasons for the rarious processes involved. In dealing with the higher classes, teachers show a want of originality and resource in framing exercises for their pupils; and questions put by an Inspector, simple cnough in themselves, but proposed in an unusual form, seldon fail to perplex them. For example, in attempting to solve such a question as the follow-ing:-"What must be added to $£ 96$ 16s. $0_{4}^{3}$ d. to make $£ 1305$ s. $7 \frac{1}{2} \mathrm{~d}$., a great many third-class pupils added the two quantities, others experimented with rarious amounts, while comparatively fow discovered readily that the solution was to be obtained by the operation of subtraction.

Grammar.-In the leading Public and Denominational Schools this subject is taught with fair ekill and intelligence, and the results are proportionately good. But that the majority of teachers fail in their mode of trenting it may be gathered from the following percentages of proficiency :-

> Fair................. in 18 per cent. of schools. Moderate to tolerable ..... in 36 Indifferent to bad .......... in 46

Grammar is thus the worst taught of all the ordinary subjects. Whe comparatively poor results disclosed above are no doubt attributable to the following causes: (1) the imperfect fnowledge of the subjects possessed by teachers, (2) the use of unsuitable tert books, and (3) the necessity for more than ordinary ${ }^{\text {athill }}$ required in its treatment.

Geography.-Geographry may be said to be well taught in proportion as the subject is practically and athractively presented to the pupiis. The standard of proficiency is of great service in indicating tho amount and progressiou of the lessons proper to the rarious classes, and, where attention is paid to its provisions, moderate success is attainable by ceven the most unskilful teaciers. But, as a rule, the subject is not dealt with in either a practical or attractive manner. In the elementary classes definitions of terms are drilled into the ehildren's heads without the accompaniment, in many instances, of more than one or two musty examples culled from some antiquated text book; while river, valley, plainland, aud mountain within sight of the school-door receive neither thought nor mentiou. In teaching the advanced part of the subject, the blackboard is of inraluable assistance. Maps are useful ; but a nap of continent, country, or district!'built up by the teacher on the blackboard, step by step, and feature by feature, under the pupil's eyc, and to as great an extent as possible with his aid, will prove ten times more so. And no leseons on the physical geograpiy of a country should be counted complete until, by the help of such a process, the pupil is able to draw a tolerably correct map of it from memory.

Object Lessons.-Object lessons are professedly given in all but two or three Provisional Schools, and, as far as general answering is concerned, with results, on the averare, about tolerable. Too many teachers look upon these lessons as mercly intended to add to the child's stock of information, whereas such is really but a secondary object. The mere accumulation of facts in the memory is of trifling ralue, if unaccompanied by the derelopment, and training of the faculties. It is the education of the chitd's perceptive faculties that should be the great aim of the olject-lesson; for, with these dormant, the exercisc of the conceptive faculties can neither be active nor accurate. As Currie snys-"Its predominant aspect is the mental exercise it gives; it is meant to awaken the intelligence and to cultirate its different phases of observation, conception, and taste, without which little satisfactory progress can be mado in the child's future education. It is a disciplinary, not a utilitarian procesy ; the information it gires is a means, not an end."

Scriptare Lessons.-These are read in most Public Schoois, one Half-time School, and in the few Provisional Schools where a third class has boen formed. The results of examination show a tolcrable acquaintance with the leading Scriptural fucts as related in the Old and New Testament (No. 1.) lessons. In several instances, howerer, the extracts are simply raad by the pupils without the accompaniment of explanation or comment from the teacher

Sinjing.-This subject is taught in only forty-six schools-fifty per cent. of the whole-and in thirty-one of these by ear ouly, in many ceses with results far from onjoyable. The Tonic Sol-far method ia cmploged in eleren schools; but in only three of these hare the ieachers a creditable acquaintance with it, and in these only is fair proficieucy attained. In four schools Hulfah's mothod is used, and here the average results are fair also. The importance of vocal music as a means of discipline, in keeping alive a healthy tone and activity in the school, is readily admitted by most tcuchers; and it is a source of regret to many of them that their ignorance or imperfect knowledge of the subject precludes the possibility of its systematic and effective treatment in their echools.

Drawing.-Drawing is taught in about seventy per cent. of the schools in the district; thus an increase of about ten per cent. has been made within the year. The proficiency on the whole is not above tolerable ; and, such as it is, is in many instances the result of the almost unguided efforts of the pupil. There are few teachers who draw well themselves, or teach drawing well, although up to a certain point a knowledge of it is easily acquired and applied-much more so than is the case with music. In the clomentary stages, copies should invariably be set on the black-board, and be accompsnied by full explanation from the teacher.

Needlework.-On the whole, this subject reccives better attention in the Denominational Schools than in any of the rest. This is probably owing to the fact that nearly all such schools lie in or near the larger towns of the district. Altogether there are thirty-three schools in which necdlework is not taught, but about half of this number are of the Provisional class. The following is the estimated proficiency of the pupils whose work was inspected :-

| Fair to good | 57 per cent. |
| :---: | :---: |
| Tolerable |  |
| Indifferent or bad |  |

This is not unsatisfactory ; and notwithstanding that there are many difficulties in the way, my experience proves that, wherg the teacher's wife is competent to teach it well, and thoroughly in earnest, tho display of needlework on the day of inspection will in general be creditable.

Other Stbjects: Euclid, Algebra, Latin.-The extent to which these subjects have been introduced is shown below, the figures indicating the number of schools in which they are taught:-

## VI.-Teachers

The staff of teachers at the close of the year, as shown by the annual returns, consisted of-

Pupil teachera

The following table exhibits the number holding each grade of classification :-

During the year four teachers have reccired promotion for good service under the prorisions of Article 39 of the Council's Regulations-two from Class III A to Class II B, and two from Class III B to Class III A. According to the Council's instructions, only probationers and teachers in the lowest grade of the 3rd Class were summoned to examinution; but of 15 who presented themselves- 5 of whom made special application for cramination-only 3 succeeded in gaining promotion. Six candidates for the office of pupil-teacher were also cxamined, and all of these passed suceessfuily.

As a body, the teachers are persons of good moral character; and, although many professional defects have been noted, of a large majority it has been my pleasing duty to report a conseientious and painstaking attention to their work. I have invariably been treated courteously, and my suggestions, directions, and censure, have been taken in a epirifi that bodes well for the futurc.

The average income of teachers, principals only, derived from salary and school fees is as follows:-

| Teachers in | Salary. | School fees. | Total Averngo Income. |
| :---: | :---: | :---: | :---: |
| Public and Finlf-time Schools. | $\begin{array}{rrr}\text { E } & \text { r. } \\ \text { ¢ } \\ 86 & 18 & \text { c } \\ 45 & 0 & 0 \\ 82 & 8 & 0\end{array}$ | $\begin{array}{rrr}\text { f } & \text { s. } & \text { d. } \\ 28 & 1 & 5 \\ 10 & 7 & 5 \\ 43 & 16 & 6\end{array}$ | £ \%. ¢1. |
|  |  |  | 11.4. 1910 |
| Prorisional ", |  |  | 55 75 |
| Certified Denominational", |  |  | 126 4 6 |

While the incomes of some teachers are fairly adequate to maintain themselves and families in While the incomes of some teachers are farry adequate to maintain themselves and farin
comfort and respectability, with a rery large number it is not so. For their sakes, and for the sake of the profession to which they belong, which must ultimately suffer from such a state of things, it is hoped that an increased Parliamentary Fote for educationnl purposes may enable the Council to cast the salaries of teachers on a more liberal scale.

## VII.-Local. Supervision.

In more than tro-thirds of the Public Schools local superrision is merely nominal; official visits of the entire Board are rarcly or nerer made; and, in some instances, not a single member enters the school ns much as once in a twelvemonth. Teachors complain, and justly so, of the apathy displayed, and their efforts not unfrequently languish for want of the stimulus and encouragement that even an oceasional visit would give. In the casc of Denonimational Schoois the character of the local supervision is much better, though even here the active part of it devolves almost exclusively upon the clergyman who is the Chairman of the Board.

## ANNEX F.

MAITLAND DISTRICT.
Summary of Reports upon Public, Provisional, and Half-time Schools for the year 1871.
1.-PUBLIC SCHOOLS.

> Aberdern (N.V.) :-Regular inspection, 19th June.
> Numbers enrolled :-Boys, 24 ; gills, 21 ; total, 45.
> Numbers present:-Boys, $11 ;$ girls, 13 ; total, 24.

1. The premises generaily are in fair condition, but most of the furniture is but moderately suitsble for school purposes. Recently a book-press and two new desks bave been supplicd. Tho suitable for school purposes. 2. The attendance has fallen off, on account of the extension of the Railway general organization is tolerable. 2. The attendance has arienon, ou accum unproctual. The order is but to Scone. The children attend very irregularly, but are not as a rule unpunctual. The order is but
moderate-the various movements of the children beiag noisily conducted, and without pronptness and moderate-the various movements of the children being noisily conducted, and without promptnoss and
precision. 3. The lesson documents ure moderatoly well arranged, but the methods employed appear too euggestive, are wanting in vigour, and aford the pupils little mental training. 4. The average proficiency is moderate.

## Aberglassify (V.) :-Regular inspection, 20th October. <br> Numbers enrolled :-Boys, 31 ; giris, 17; total, 48.

Numbers present:-Boys, 21 ; girls, 8 ; total, 29.

1. The schoolroom needs whitewashing ; otherwise the premises are woll kopt, and in very fair condition. The furniture is sufficient and fairly suitable, and the organization is tolerable. 2. The attendance bas improved latterly, but was low on the day of examination, on account of the threatening weather The children are well behared, and, ou the whole, clean in appearance. The order, howerer, is but The chite. 3 The Time-table is imperfect, and the Lesson Programmes are unskilfully arranged. The moderate. 3. The Time-table is imperfect, and the Lesson Programmes are umskilfully arranged. The
methods are poor in themselves, but the teaching is marked by diligence and earnestness. 4. The averago methods are poor in themselres, but the teachin
proficiency is between indifferent and moderate.

Bishop's Bridgr (N.V.) :-Regular inspection, 18th October.
Numbers enrolled :-Boys, 34 ; girls, 19 ; total, 53.
Numbers present :-Boys, 30 ; girls, 14; total, 44.

1. Both schoolroom and furniture aro unsuitable and insufficient for present requiroments, and even a tolerable organization is impossible under the circumstances. The closets are in bad repair, and do not afford the necessary privacy. 2. The disciplipe shows signs of improvement, and is now about tolorable. 3. Drawing has been recently added to the list of subjects taught. The methods of instruction are bookish in charecter, and the teaching lacks rigour. 4. The average attainments range from moderate to tolorable, the rosults in the first class being considerably better than those of last year.

Blandford (N.F.) :-Regular inspection, 13th December.
Numbers curolled:-Boys, 20 ; girls, 29 ; total, 49.
Numbers present:-Boys, 12 ; girls, 19 ; total, 31.

1. The closets are out of repair, and a supply of hat-pegs is needed; in other respects the material condition and orgnnization arc fair. 2. The attendance is tolerably regular, but the discipline is not effective in securing punctuality. The appearanee, demeunour, and order of the children are fair. 3. All the prescribed subjects but singing are taught. The Time-table is defectire in some important particulars. The teaching is energetic, but rather too boisterous. The methods, though on the whole of tolerable morit, are meagro in their results; simultaneous answering is too much rolied on. 4. The average proficiency is barely moderate, but the school has only been in oporation three monthe.

Brantion (V.) :-Regular inspection, 8th August.
Numbers enrolled :-Boys, 33 ; girls, 28 ; total, 61 .
Numbers present:-Boys, 29 ; girls, 36 ; total, 55.

1. The promises genorally are in fair condition; the schoolroom, however, needs whitemashing. The atock of working materials is ample, and in good order. 2. The couduct and goncral appearance of the pupils are rensonably good, but the marching and other points of order require more careful attention. The attendance shows a very fair degrec of regularity und punctuality. 3. The course of instruction is complete, and judiciously regulated; and the methods, as a whole, are appropriate, and zealously applied. The classification is at present faulty-great disparity in attainments existing between the pupils of the second and third classes. Random answering is rather common, and the habit of attention neod strengthening. 4. The averuge proficiency is about fair.

Bromenback (V.):-Regular inspection, 12th May.
Numbers enrolled :-Boys, 25 ; girls, 37 ; total, 62.
Numbers present:-Boys, 12 ; girls, 22; total, 34 .

1. The achoolhouse is new and commodious, but the furniture is miserably insufficient and unsuitable. No water supply has yet been secured. Some of the sehool records are not kept with proper precision and punctuality. The organization, as far as tho teacher is accountable for it, is fairly satisfactory, but the schoolroom is not kept neat ind clean. 2. Recently the nttendance hus been affected by tho prevalence of bad weather, and on the day of examination about one-third of the pupils were absent from this cause. The punctuality is but moderately good; in other respects the discipline is fairly effective. 3. The lesson documents are compiled with very fair judgment. The methods are modern, applied with intelligence, and produce fair results. 4. Tho average proficiency approaches fair.

Campsis (V.) : -Regular inspection, 22nd July.
Numbers enrolled :-Boys, 1.7 ; girls, 19 ; total, 36.
Numbers present:-Boys, 15 ; girls, 17 ; total, 32 .

1. School is now conducted in the new building, recently completed. Proper furnituro has also been supplied. The promises have yet to be fenced and out-buildings provided beforo the material condition can be regarded as fully satisfactory. The supply of working materiuls is, on the whole, sulficient and suitsble, and in fair preserfation. 2. None of the pupils livo within a mile of the school, and not a few come from three to five miles, yet tolcrable regularity of attendance obtains, and in the case of only one family is the punctuality bad. "The order and general discipline are very fair, and a healithy moral tone prevsils. 3. The course of instruction is complete and well regulated. The methods are, in general, appropriate, and applicd with fair skill and industry. 4. The average proficiency is fair, and under examination the attention of the pupils is well sustained, and they gire cridence of fair mental training.

Cessmock (N.V.) :-Regular inspection, 9th Jume.
Numbers enrolled:-Boys, 28 ; girls, 33 ; total, 61
Numbers present:-Boys, 19; girls, 23 ; totai, 42.

1. The building is not large enough for the present attendance of pupils, and is rather out of repair. The furniture is but moderately suitable. Under existing circumstances the organization may be considered fair. 2. The pupils attend with fair regularity, and the degree of punctuality is good; their order, appearance, and demeanour are satisfactory. 3. Except singing, all the required subjecta are taught. Tho losson docunients are arranged with tolerable judgment, and the methods are appropriato and passably effectivo. 4. The averago attainments range between tolerable and fair.

Coosabarabray (V.) :-Regular inspection, 26th August.
Numbers enrolled :-Boys, 25 ; givls, 17 ; total, 42.
Numbers present:-Boys, 22 ; girls, 12 ; total, 34.

1. The school-buildings are new. They are well built, convenient, and plensantly situated; and, excopt that the school-room masy be found too small for future requirements, ure in all essentials suitable. There is a good stock of working materials, and the orgunization is correct. 2. Very fair regularity and punctuality of attendance are secured; in other respects the government is firm and offective, and tho gencrnl tone of the school is pleasing. 3. The coursc of instruction is complete and well regulated, and the teaching energetic, mothodical, and fairly successful. 4. The average proficiency ranges from tolerable to fair, and is creditable for the time the sehool has been in operation.

Coonairble (V.):-Regular inspection, 30th August.
Numbers curolled:-Boys, 26 ; girls, 17 ; total, 43.
Numbers present:-Boys, 17 ; girls, 11; total, 28.

1. The condition of the premises generally hins improved under the prosent teacher. The interior of the dwelling house has been renovated, a garden has been formed, and a tolerably appointed gymnasium fitted up for the use of the pupils. The organization is fuir. 2. The discipline has seusibly improvedseveral objectionable features noted at formor wisits having disappeared. 3. The instructional armangements are judicious, and the teaching is marked by fair skill and industry. 4. The general proficiency is between moderate and tolerable.

Downore (N.V.)-lhegular inspection, 19th April.
Numbers enrolled:-Boys, 28 ; girls, 27; total, 5 as.
Numbers preseut:-Boys, 24 ; girls, 23 ; total, 47.

1. The school-ground is unfenced, and the building a dangcrous, unsightly ruin. The furniture is odd und unsuitable. The stock of books and apparatis is ample, but its preservation in such a building is a matter of difficulty. The organizution is as good as can be expected under the circumstances. 2. Tho
pupils are, as a rule, regular and punctual, and a healtiy moral tone exists. Simultaneous movements are wanting in precision and quictness, but perfoction in this respect is at present simply imposaible. 3. Music is the only one of the prescribed subjects not taight, but is about to be introduced. The chassificntion is capable of improvement; in other respects the instructional arrangements are satisfactory, and
 sustained, and their answering indicates fair mental training. The average proficiency orceeds tolorable.

> Eulationg (N.V.):-Regular inspection, 15th May.
> Numbers eurolled :-Boys, 14 ; girls, 23 ; total, 37.
> Numbers prosent:-Boys, 13 ; girls, 16 ; total, 29.

1. The roof of the building is out of repair,' and a new and improved stock of furniture is much needed. There is a good supply of books and apparatus in very fair condition. 2. The pupils aro unpunctual ; otherwise the disepline is tolerably effective. 3. The methods employed are not penetrotive, and periodic examination of the pupils on lessons given is not resorted to. The attention of tho pupits is weak, and the degree of mental offort displayed very indifferent. 4. The general proficiency is about moderate.

Falbrooe (V.) :-Regular ingpection, 18th December.
Numbers curolled :-Boys, 16; girls, 20 ; total, 36.
Numbers present:-Boys, 10 ; girls, 14 ; total, 24.

1. The building has suffered much from the rarages of the white ant, and needs extensive repairs. A bookpress and hatpegs are required. The sapply of books nnd apparatus is adequate, and the organization is fair. 2. There is a temporary falling off in the attendance, on account of harvest operations. The government is firm and judicious, the order and moral tone very fair. 3. The lesson documents aro arranged with fair judgment, and the teaching is energetic and tolembly skilful. 4. The average proficiency is tolerable.

## Fishery Crfer (V.):-Regular inspection, 27th Norember.

Numbers enrolled :-Boys, 25 ; girls, 12; total, 37.
Numbers present:-Boys, 16 ; girls, 4 ; total, 20.

1. Externally the aspect of the place has been improved by the uddition of a neatiy kept garden; but the repairs and additions to the premises pointed out as necessary last year, and at the regular inspection in March, 1871, have not yet been attended to. The internal organization is fair. 2. Tho attenclance appears to be decreasing, and is marked by much irregularity. The children are attentive and well-behaved, but the general order of the school is not beyond tolerable. 3. Tho Lesson Programmes are constructed with but indifferent slill, and the Register of Lessons contains very meagre and unsatisfactory ntries. The methods are not effective. Singing is the only subject well taught; all others full below the standard, -reading, grammar, geography, arithmetic, and object lessons, to a considerable extent. the standard,-reading, grammar, geography, arithmetic, and abject lestons, tole a conside in the third.

Gosronyt (V.) :-Regular inspection, 22nd September.
Numbers eurolled :-Bors, 15; girls, 19 ; total, 34.
Numbers present:-Boys, 7 ; girls, 15 ; total, 22.

1. No steps have been token towards rebuilding the sehonl-house, destroyed by the flood of 1870, and the school is conducted in a room of the teacher's diselling, nbout ten fect square and seven feet high. The only legitimate article of furniture is a form six feet long, the other sitting accommodation consisting of slabs laid on blocks agrinst the walls of the roow. There is at tolerable supply of books and minor apparatus. 2. The attendance is but moderately regular and pructual, und has been below the prescribed minimum for some time past. With two or three uxceptions, the chidren are not didy in their appenrunce, but their behariour is better than as recorded at the last inspection. The order is indifferent, and the government lax and indulgent. 3. The lesson documents are prepared with moderate judgment, but the methorls are unsuitabic and feebly applied. 4. The pupils arv incapable of sustained attention, and their average proficiency is indifferent.

Hinton (V.) :-Regular inspection, 24th April.
Numbers enrolled :-Boys, 29; girls, 27; total, 56.
Numbers present:-Boys, 24 ; girls, 23 ; total, 47.

1. The schoolroom, teacher's residence, out-buildings, and fences are in a dilapidated state, but steps arc being taken for their imnediate repair. The school is fuirly organized, and well supplied wilh working materials. 2. Under the present teacher the moral tone of the school lans greatly improred; and tho attendance, which is reasonably regular and pumetual, has nearly doubled itself within $n$ twelvemonth. 3. The instructional arrangements are complete, and the methods of tenching are approprinte, but need a moro vigorous application. 4. The average proficiency is fair in the third class, from moderate to tolerable in the others.

Joxa (V.) :-Regular inspection, 26th April.
Numbers enrolled:-Boys, 11 ; girls, 14; total, 25.
Numbers present:-Boys, 0 ; girls, 14 ; total, 23.

1. The sehoolroom and teacher's residence are in better condition than they have been in for many years past. New out-buildings are required, and a water supply is a pressing want. The generna organization is good, und the stocls of working appliances ample. 2. A very fair degree of regularity and punctuality is secured. The discipline is not less satisfactory in other respects; the order is good, although corporal punishment is rarely resorted to ; and the general tone of the school is plensing. 3. The classification is judicious, the lesson documents are well arranged, and the teaching, intelligent and effective. 4. The averago proficiency is nearly fair.

Lochinvar (N.V.) :-Regular inspection, 20th September.
Numbers enrolled :-Boys, 33 ; girls, 24; total, 57.
Numbers present:-Boys, 22 ; girls, 18 ; total, 40.

1. The schoohroom is rather small, and of bud ehape; in other respects the material condition and orgnization are fair. The premises are now undergoing thorough repnir. 2. The attendance is about stationary, and is tolerably regular and punctual. The results of the discipline appear to have improved
since last inspection; but few of the pupils are disposed to exert themselves, and some of the older boys are still inclined to be pert. The governmest needs to be more firm and ripilant. 3. All the proscribed subjects are taught, and the documents regulating the instruction are tolerably woll constructed; but the methods are unskilful, and only partially effective. 4. The general proficiency is barcly moderate.

Maitland, East (N.V.) :-Rcgular inspection, 2nd, 3rd, and 6th Norember.
Numbers enrolled :-Boys, 78 ; girls, 57 ; total, 135.
Numbers present:--Boys, 72; girls, 50; total, 122.

1. The premises are well adapted for school purposes, but need extensive repairs. There is a full supply of working matcrials, and the gencral organization is good. 2. The attendance has increased slightly, and the pupils are, with few exceptions, regular and punctual. The order is very fair, but the discipline appears to be ratber harsh. 3. The course of instruction is complete and well regulated. Tho methods, as a whole, are appropriate and energetically applicd. In addition to the ordinary subjects, Latin and Algebra are taught. 4. Under examination the pupils show a very fair disposition to exert themselves. In the upper, second, aud fourth classes, the attainments approach very fair ; the arerage for the wholo school exceeds fair.

Merriwn (V.):-Regular inspection, 16th August.
Numbers enrolled :--Bors, 31 ; girls, 26 ; total, 57.
Numbers present:-Boys, 27 ; girls, 22 ; total, 49.

1. The roof of the school-house and teacher's residence is leaky; the closet is in a very dilapidated state, and a bell is needed. The accommodation is barely sufficiont for present requirements; and two more desks and forms, a book-press, nud hat-pegs are required. The solool stock is sufficient and in fair order. 2. The pupils are pretty regular in attendance, but only tolerably punctual; in other'respects the results of the discipline are fairly satisfactory. 3. Singing excepted, all the prescribed subjects are taught, and the lesson documents are arranged neatly, and with fair judgment. Too much is done for the pupils, otherwise the methods are suitable and fairly applied. 4. The average proficiency is nearly fair.

> Mrumield (N.V.) :-Regular inspoction, 16th May.
> Numbers enrolled :-Boys, 23 ; girl, 16 ; total, 39.
> Numbers present:-Boys, 14 ; girls, 15 ; total, 29.

1. The temporary premises in which the school is held are totally unfit for the purpose. The furniture is insuficicient and of tho rudest dcscription; and the organization, though necessarily indifferent, is as good as ean be expected. 2. Hair regularity of attendance is secured, but the children aro not punctual. The discipline is mild, but firm, and the order and general tone of the behool ure satisfactory. 3. The lesson documents are intelligently constructed, and the methods are appropriate, and narked by fair skill and energy in their application. 4. The arerage proficiency is nearly fair.

## Moreftii (V.) :-Regular inspection, 5 th, 6th, and 9th October.

Numbers enrolled:-Boys, 71; girls, 60 ; total, 131.
Numbers prosent:-Boys, 65 ; girls, 56 ; total, 121.

1. The premises are excellently adapted for school purposes, and are on the whole in good condition. There is an ample supply of furniture, apparatus, and books; and otherwise the organization is goorl. 2. In gencral the pupils are regular and punctual, clean in appearance, attentive, and in fair order. 3. The instruction is well regulated, and a judicious classification obtains. The teaching is carnest, the methods suitable, and applicd with vigour and fair effect. Algebra and Latin are extra subjects, taught in the highest class. 4. Under examination the attention of the pupils is fairly sustained, but thcy do not work as hard as is desirable. The arerage proficiency in the fouth class exceeds fair; in the others it lies between tolerable and fair.

> Muraurundi (V.) :-Regular inspection, 27 th June.
> Numbers enrolled :-Boys, 28 ; girls, 16 ; total, 44.
> Numbers present:-Boys, 26 ; girls, 15; total, 41.

1. The school buildings and furniture are in the same unsatisfactory state as was noted on the occasion of former inspections. There is a very fuir stocl of working materials, but otherwise the organization is indifferent. 2. The attendance is low for the place, and the pupils appear to be only moderately regular and punctrial. The govermment is fecble, aud the moral tone of the school decidedly bad. 3. The lesson documents are arranged with passable skill, but the classification of the younger children is unnecessarily minute. The teaching appears to be metbodical and painstaking, but is only partial in ite effects, from the defective discipline. 4. The average proficiency is a little beyond moderate.

Nelbon's Platns (N.V.) :--Regular inspection, 18th April.
Numbers enrolled :-Boys, 19; girls, 22 ; total, 41.
Numbers present:-Boys, 15 ; girls, 17 ; total, 32 .

1. The school ground is unfenced, and there is no water supply for the use of the children; in other respects the material condition is but moderate. 2. The attendance, for the locality, is reasonably regular, and the order appears to have improved since last inspection. In its other offects the discipline is less satisfactory. 3. The classification of the pupils and arringement of the lesson documents are, on the whole, appropriate; but the teaching lacks rigour and impressivencss, and is only partially effective. 4. The average proficiency is barely moderate.

> Oarvaie (N.V.) :-Regular inspection, 29th November.
> Numbers enrolled :-Boys, 13; girls, 15; total, 28.
> Numbers present:-Boys, 9 ; girls, 7 ; totul, 16.

1. The building is fair for the place, but the necessary additions to the furniture have not yet been made. The organization, under the circumstauces, is tolerable. The room is not tidily kept, and more care is requisite for the preservation of the school material. 2. The children are but moderately regular and punctual; in other respects the discipline is tolerably effective. 3. The instructional arrangements have improved considerably, and are now fair. The methods are in general suitable, but the management of the school neods to be characterized by greater zeal and energy. 4. The attainments range from moderate to tolerable.

Oswald (N.V.) :-Regular inspection, 19th October.
Numbers enrolled :-Boys, 14; girls, 17 ; total, 31.
Numbers present:-Boys, 7; girls, 11 ; total, 18.

1. The building is old and worm-eaten; and although there is an abundance of furniture, it is elumsy and unsuitable. 2. The children are neither regular nor punctual, and the attendance bas been decreasing for some time past. The discipline is but moderately effective; it fails most in securing sustained attention and active meutal cffort on the part of the pupils. Whispering and indiscriminate nnswering are prevalent faults. 3. The Lesson Progrummes are not mado out in sufficient detail to be of direct service. The teaching is marked by fair energy, but is discursive and profitless. 4. The proficiency is lowest in the highest class-the average being small.

> Rougur ( $\overline{\text {. }) ~:-R e g u l a r ~ i n e p e c t i o n, ~} 9$ th December.
> Numbers enrolled :-Boys, 25 ; girls, 13 ; total, 38.
> Numbers present:-Boys, $14 ;$ girls, 12 ; total, 26.

1. The school-house is uncentral, too small and out of repair ; and the teacher's accommodation is miserably insufficient. There is a sufficiency of working materials, and the organization is fair under existing circumstances. 2. The attendance at examinution was lower than usual, on account of harrest operations; ordinarily it is regular and punctual. The children are attentisc, obedient, and well conducted; and the general order is very fair. 3. Singing is not taught, and needlework does not receive due attention. The lesson documents are arranged with tolerable shill, but the classifcation is rather low. The teaching is painstaking, and conducted on suitable methods. 4. The arerage proficiency ranges from tolerable to fair.

Scone (N.V.) :-Regular inspection, 20th June.
Numbers enrolled:-Boys, 40 ; girls, 22; total, 62.
Numbers prosent:-Boys, 18 ; girls, 19 ; total, 37.

1. The school is conducted in the Presbyterian Church, which is small and crowded with furniture; only a moderate organization is possibic. 2. The attendance is tolerably regular, and the degree of punctuality fair. The order has improved slightly since last inspection, but noisy habits are still too common. The pupils are in general neat in appearance. In a few cases the demeanour is unsatisfactory -a sulion resistance of authority being exhibited. 3. The proscribed subjects are taught, and the lesson documents arranged with tolcrable judgment. The nethods in themselves are not unsuitable, but need a more intelligent and vigorous application. 4. The genexal proficiency is not much above indifferent.

Singlimon-(Primary, V.) :-Regular inspection, 7th and 8th December.
Numbers onrolled :-Boys, 38 ; girls, 34 ; total, 72.
Numbers prosent:-Boys, 32 ; girls, 28 ; total, 60.

1. Sinco last inspection various improvements in the material condition of the school have been effected, the most important being the addition of two windows, very neccesary as a means of rentilation. The playground is well appointed, and neatly kept. The general organization is good. 2. The attendance has improved slightly but steadily for some time past, and is reasonably regular and punctual. The order is very fair, but the discipline is not fully effective-some of the older boys betraying a apirit of sullenness and insubordination under reproof. 3. The course of instruction includes all subjects but sing. ing, and is judiciously regulated. The teaching is intelligent and skilful. 4. The average proficiency is fair.

Singleton (Infants, V.) :-Regular inspection, 7th December.
Numbers enrolled:--Boys, 12 ; girls, 21 ; total, 33.
Numbers present:-Boys, 10 ; girls, 17 ; total, 27.

1. The schoolroom is small and uncomfortable, but is tolerably well furnished. The stock of working materials is sufficient and suitable. 2. The children are pretty regular and punctual, and, on tho whole, in fair order. 3. The Yime-table and Lesson Programmes are not specific onough. The methods are tolerably appropriate, but more vivacity in the teacher's manner is desirable. 4. The arerage proficioncy approaches tolcrable.

Stanhore (V.) :-Regular inspection, 21st September.
Numbers enrolled:-Boys, 32 ; girls, 20 ; total, 52.
Numbers present:-Boys, 30 ; girls, 16 ; total, 46.

1. The premises remain unimproved, owing to the apathy of the Local Board, and are in urgent ped of extensive repairs. There is no water supply. The furnituro and school stock are fairly sufficient. The attendance bas steadily increased since the re-opening of the school. The discipline is firm and fective, and the general tone of the school is pleasing. 3. The instruction is earnest and tolerably skilful, but the lesson documents are as yet only of a tentative character. 4. For the time the school has been but the lesson documents are as yet only of a tentative character.
in operation the results are not unsatisfactory. The average proficiency is tolerable.

> Sugarloar (V.) :-Regular inspection, 11th May.
> Numbers enrolled :-Boys, 22 ; girls, 25 ; total, 47.
> Numbers present:-Boys, 11 ; girls, 13 ; total, 24.

1. Since last inspection a floored verandah has been added to the building, improving its appearance and affording shelter to the children from sun and rain. Other minor repairs and additions are in progress. The sehool stock is sufficient, and the organization tolerable. 2. The comparatively low attenprogress. the day of examination was caused by wet weathor. The order and gencral discipline are very fair, but many of the pupils are irregular and unpunctual. This latter circunstance is orwing in some mensure to the nature of the locality in which the school is eituated. 3. The prescribed subjects are taught, and tho documents regulating the instruction are compiled with neatness and fairjudgment. The teaching appears carnest, and the methods of tolerable merit. 4. The average proficiency is moderate.

Vact (N.V.) :-Megular inspection, 21st July.
Numbers enrolled :-Boys, 22 ; girls, 19 ; total, 41.
Numbers present:-Boys, 20; girls, 16 ; total, 36 .

1. The schoolroom is fairly suitable, but is not well-furnished; two more desks and forms, a booknd pross and a supply of hat-pegs ared, and are now fairly satisfactory. The pupils are well-behaved, and a healthy moral tone prevails. 3 . The classification of the younger children is too minute, othorwise the instructional arraugements are tolerably appropriate. The methods are passable in kind, and are applied with reasonable earnestness. 4. The pupils give a ready and sustained attention under cxamination, and make fair mental effort. The average proficiency is tolerable.

Wadinfosa (V.):-Regular inspection, 27th April.
Numbers cnrolled:-Boys, 25 ; girls, 19 ; total, 44.
Numbers present:-Boys, 8 ; girls, 7 ; total, 15 .

1. Both schoolhouse and tencher's residence are much in neod of repnir. There is a good supply of books and upparatus; and the furniture is tolerably suitable, and suflicient for the requirements of the place. 2. The attendance, which was low on the day of examination on account of rain, is in general regular and punctual. The government is mild, but firm and effective, and the demennour of the pupila very eatisfactory. 3. All the prescribed subjectis but singing are taught. The lesson documents are neatly rept and judiciously arranged, and the methods are suitable, and inarked by earnest, intelligent application. 4. The average proficiency is fair.
$W_{\text {ark torth ( }}$ (V.) :-Regular inspection, 30th May.
Numbers enrolled :-Boys, 24; girls, 23 ; total, 47.
Numbers present :-Boys, 20 ; girle, 15 ; total, 35.
2. The school buildings rank among the best in the district. Some roof repairs nad a new bell aro needed. The school is well furnished, and the supply of working materials is ample. 2. The attendance has fallen off of late, from various cuuses, among others the recent destruction of the bridge orer the Cockfighter Creek. The degree of regularity and punctuality observed is about tolerable. The government is firm, and fairly effective. 3. Tho instruction is on the whole well regulated, and the methods skilfu! and applied with fair industry. 4. The pupils are attentive under examination, bat do not slow sufficient animation and intcrest in their work. The average proficiency is from tolerable to fair.

> Womovar (V.) :-Regular inspection, 17tin and 18th Mar.

Numbers enrolled:-Boys, 37 ; girls, 40 ; total, 77.
Numbers present:-Boys, 33 ; girls, 33 ; total, 66 .

1. Some roof repairs are needed, and a verandah would prove $n$ useful addition. The schoolrooms are fairly suitable, and their organization is satisfactory. 2. The regularity is tolerable, punctuality fair. The gorernment is mild, but firm and fairly effective. The order is good on the whole, but there is room forimprovement in the marching. 3. The instructional arrangements are judiciously made, all the preacribed subjects except singing are taught, and the methods cmployed are very fair in kind and in the mode of application. 4. The pupils are well trained to habits of attention and self-rcliance, and their general proficiency approaches fnir.

> Wooddura (N.F.) :-Regular inspection, 15th December.
> Numbers enrolled :--Bors, 19; girls, 20; total, 39.

Numbers present:- -Boys, 9 ; girls 10; total, 19.

1. The out-offices have been destroyed by the white ant. The school-house is in moderately good condition, and has a sufficiency of furniture, though of a rough description. The organization is tolerable. 2. The attendance is only moderately regular and punctual; but most of the children come from very long distances. The marching is irregular ; in other respects, the order, general appcarance and demeanour of the pupils are satisfactory. 3. The teaching necords with the standard, and the methods are tolerably approprinte. The classification is in general correct, and the lesson documents are arranged with moderate skill. 4. The arerage proficiency is tolorable.

## II.-PROVISIONAL SOHOOLS.

Broke:-Regular inspection, 20th December.
Numbers enrolled :-Boye, 13 ; girle, 12 ; total, 25.
Numbers present :-Boys, 9 ; girls, 9 ; total, 18 .

1. Both building and furniture are of a make-ghift kind, but bettor are being propared. The organization is at present bad. 2. The children are moderately regular, but unpunctual. The ordor is indifferent, though the childron arc obedient and respectful. 3. No Time-table or Lesson Programmes have been constructed; and the instruction has been desultory, and of little bencfit. 4. The general proficiency is indifferent.

> Bedga:-Regular ingpection, 29th May.
> Numbers enrolled :-Boys, 15 ; girls, $19 ;$ total, 34.
> Numbers prosent:-Boys, 9 ; girle, $13 ;$ total, 22.

1. The situation is exposed and bleak, and not sery convenient; in other respects the material condition is tolerable. 2. The pupils are still irregular and unpunctual, owing largely to the nature of tho locality in which the school is situnted. Tolerable order is maintained, and the govermment is mild and fairly effective. 3. All ordinary subjects but singing and drawing are taught. The instruction is painstaking, but not very effectire. 4. The average proficiency is indifferent.

Caengwrie:--Regular inspection, 25th July.
Numbers enrolled:-Boys, 17 ; girls, 9 ; total, 26.
Numbers prosent:-Boys, 15 ; girls, 8; total, 23.

1. The bnilding is fair for the place, bit the windows are unglazed; and the floor is of earth, and, in rainy weather, damp and uncomfortable. There is a fair supply of the usual requisites. 2. The pupils are irregular and unpunctual; the order is indifferent, and the appearance of many of the children far from clean and tidy. 3. The lesson documents are arranged with indifferent akill, and the teaching is stiff and mechanical. 4. The general proficiency is small in the first class, and moderate in the second.

## Coowar :-Regular inspoction, 22nd August.

> Numbers enrolled :-Boys, 13 ; girls, 17 ; total, 30.
> Numbers present:-Boys, 11 ; girls, 13 ; total, 24.

1. The school buildings are new, well-built, and sufficient for present requirements. The out-offices and some articles of furniture have yot to be completed. The stock of working materials is insufficient; otherwise the organization is moderate. 2. The attendance is regular, and tolerably punctual. The pupils are tractable and obedient, but habits of order have yet to bo acquired. 3. The lesson documents are intelligently constructed; but the teaching, though painstaking, is unskilful. 4. The average proficicncy is from small to indifferent, but there is reason to expect better results in the future. The school is newly opencd.

Doyib's

Doyle's Creek
Opened too late in the year to receive inspection.

Gresford:-Regular ingpection, 24th July.

$$
\begin{aligned}
& \text { Numbers enrolled :-Boys, } 21 \text {; girls, } 16 \text {; total, } 37 . \\
& \text { Numbers present:-Boys, 14; girls, } 14 \text {; total, } 28 .
\end{aligned}
$$

1. An opening of four or five inches below the wall-plate, caused by the shrinking of the slabs, wants filling up, and the windows are out of repair; in other particulars the material condition is reasonably good, and the organization is tolerable. 2. On the wbole, the attendance is moderately regular and punctual. The children are attentive and well-behaved; and the order, though improrable in matters of detail, is, generally speaking, fair. 3. All the preseribed subjects are tanght. The lesson documents are not arranged in sufficieat detail, and the instruction, though marked by fair industry, is conducted on faulty methods. 4. The general proficiency is small in the first class, but is nearly tolerable in the others.

Kruga :-Regular inspection, 16th June.
Numbers enrolled :-Boys, 25 ; girls, 20 ; total, 45.
Numbers present:-Boys, 13 ; girls, 13 ; total, 26.

1. The old school-bouse has been pulled down, and is being rebuilt on a larger scale. Teaching is carricel on in temporary premises. 2. About onc-half of the pupils attend regularly and punctaally. Tho discipline is weak, and the order indifferent. 3. The instruction is badly arranged, and the teaching unstilful nad barren of result. 4. The average proficiency is very small.

> MoonsN Brook:-Regular inspection, 24th June.
> Numbers enrolled :-Boys, $12 ;$ girls, $6 ;$ total, 18.
> Numbers present:-Boys, $7 ;$ girls, $3 ;$ total, 10.

1. Except that the roof is leaky, the schoolhouse is in tolerably good condition. The interior is neat, clean, and comfortable. There is a good supply of working materials. 2. The attendance has decreased. A very moderate degree of regularity and punctunlity provails. The pupils are quict and attentire, but order is poorly understood. 3. The instructional documents are unsuitable, and the teaching 'very unskilful. Reading and writing are taught with fair success; but in the other subjects the results are barely appreciable. 4. The arerage proficiency is small.

Modnt Wilis:-Regular inspection, 28th September.
Numbers enrolled :-Boys, 15 ; girls, 20 ; total, 35.
Numbers present:-Boys. 7 ; girls, 12 ; total, 19.

1. The building is fairly suitable, but the furnituro is indifferent. No out-offices have yet been provided. 2. The children are irregular and unpunctual ; they are respectful and obedient, but otherwise ignorant of order. 3. The classification and occupation of the pupils is badly regulated, and the teaching is unskilful and profitless. 4. The average proficiency is bad.

## Munmurra :-Regular inspection, 19th August.

Numbers enrolled :-Boys, 9 ; girls, 15; total, 24.
Numbers present:-Boys, 9 ; girls, 13; total, 22.

1. The school is unfloored, but in other respects its condition is fair. The stock of furniture, apparatus, and books is fairly sufficient. 2. The attendance is pretty regular, and about threc-fourths of the pupijls are punctual. The appearance and behaviour of the children are fairly satisfactory; but the order, in natters of detail, admils of considerable improvement. 3. The teaching is painstaking and carnest, and the methods and instructional arrangements tolerably appropriatc. 4. The average proficiency is between tolerable and fair.

> Mrscie Cbeer :-Regular inspection, 17 th June.
> Numbers enrolled :-Boys, 26 ; girls, 24 ; total, 50.
> Numbers present:-Boys, 23 ; girls, 20 ; total, 43.

1. The rerandals needs repair, but the main building is in fair condition, and is commodious and suitable. The stock of furniture and apparatus is good, and otherrise the organization is fair. 2. The pupils are tolerably regular and punctual, and their appearance and general demeanour are fairly satisfactory. The order is tolerable. 3. The coursc of instruction is complete; the lesson documents are arranged with neatness and tolerable skill, and tho methods appear pasably appropriate and effective. 4. The proficiency ranges from moderate to tolerable.

> QcorroboLong:-Regular inspection, 13 th May.
> Numbers chrolled :- Boys, 28 ; girls, 15 ; total, 43.
> Numbers present:-Boys, 26 ; girls, 12 ; total, 38.

1. The schoolroom las been lengthened about eight feet aince lnss inspection. The furniture is rough but, gencrally speaking, suitable. 2. The attendance of pupils is not regular; their appearance and general demeanour are creditable, and the order rates at about tolerable. 3. The classification is too minute, and the construction of Lesson Programmes poorly understood. The methods omployed are not very suitable, but the teaching is carnest and moderately steccesful. 4. The average proficieney ranges from moderato to tolerable.

Rosebrook:-Regular inepection, 25th Septomber.
Numbers enroiled :-Boys, 9 ; girls, 12; total, 21 .
Numbers present:-Boys, 6 ; girls, 10 ; total, 16.

1. The material condition and organization remain unaltered, and may bo estimated at very moderntc. 2. Most of the pupils attend irregularly; they are passively attentive and well behared, but the order of the school is poor. 3. The lesson documents appear to be arranged with care, but contain much that is inappropriate and al variance with the standard. The methods are unsuitable, feebly applied, und of little effect. A. The average proficiency is swall.

# Stockiard Crebr :-Regular inspection, 20th December. 

Numbers enrolled:-Boys, 12 ; girls, 10 ; total, 22.
Numbers present:-Boys, 3 ; girls, 2 ; total, 5 .

1. The school-house and furniture are moderately suitable, and the stock of working materials is adequate. 2. The character of the attendance cannot be ascertained from the school records, as the entries are unreliable. The few children present at examination were dall, shy, and awkward. 3. The Iesson documents are tolerably well arranged, but the results of the teaching arc barely appreciable. 4. The average proficiency is very small.

> Summertrid:-Regular inspection, 26th July.
> Numbers curolled :-Boys, $10 ;$ girls, 8 ; total, 18.
> Numbers present:-Boys, $9 ;$ girle, $8 ;$ total, 17.

1. The sclool-house and furniture are of a vory inferior character, and the organization is very indifferent. 2. There appears to be an entire absence of disciplino. The children leave their places at will, and are much uddicted to whispering and copying. 3. The construction of Lesson Programmes is not understood, and the teaching is individual and productive of most meagre results. 4. The proficiency is bad.

Turee Crees:-Regular inspection, 21st August.
Numbers enroller :-Boys, 12 ; girls, 12 ; total, 24.
Numbers enrollerl:-Boys, 12 ; girls, 12 ; total, 24
Numbers present:-Boys, 11 ; girls, 9 ; total, 20 .

1. No closets hare yet been provided. The school-building is tolerably good, but the flooring boards are not nailed down, and more about noisily when trodden on. There is sufficient furniture of a rough kind. A. black-board is much needed. 2. The attendance is not rery regular or punetual. The children are $a w \mathrm{kward}$ in their movements, and indifferently trained to habits of order and attention. 3. The instruction is tolerably well regulated, and the teaching is methodical and painstaking, but not very effective. 4. In reading, writing, and dictation the results aro tolerable; but the average proficiency is indifferent.

Uarbry :-Regular inspection, 7th September.
Numbers enrolled :-Boys, 13 ; girls, 7; total, 20.
Numbers present:-Boys, 13; girls, 7; total, 20.

1. The out-offices are unsuitable and inconveniently situated. The schoolroom and furniture are ian for the place. The playground has recently been fenced and drained. A black-board is needed; otherwise the supply of requisites is tolerably good. 2. The attendance is tolerably regular ; the degree of punctuality fair. The appcarance and demeanour of the children are satisfactory, but proper order is not enforcod. 3. The Time table is fairly suitable, but the framing of Lesson Programmes is not well understood. The methods are of moderate quality and industriously applied. 4. The average proficiency is about moderate.
$\nabla_{\text {ere }}:-$ Regular inspection, 19th December.
Numbers enrolled:-Boys, 12 ; girls, 11 ; total, 23
Numbers present:-Boys, 7 ; girls, 5 ; total, 12.
2. Both school-house and furniture are of a miserable, makeshift character. The school stock is insufficient, and appears to havo been badly used. 2. The order is bad, and the moral tone of the school low. 3. No Lesson Prognammes have been in use for six months past, and it is doubtful if the Time-table is adhered to. The methods of instruetion, both in themselves and as applied, arc valueless. 4. The results of examination are almost nil. (The Council's aid has since been withdramn.)

Webeer's Cesee :-Regular inspection, 16th December.
Numbers enrolled :-Boys, 21 ; girls, 12; total, 33.
Numbers preserit:-Boys, 15 ; girls, 12 ; total, 27.

1. The schoolroom is good of its kind and fairly furmished; in other respects the organization i only indifferent. 2. The attendance is moderately regular and punctunl. The children are obedient and passively attentive, but shy, awkward, and ignorant of order. 3. The Time-table is not unsuitable, but the Lesson Programmes are not judiciously compiled; and, in some subjects do not accord with the Standard. The teaching is without method, stiff, mcehanical, avd of poor effect. 4. The average pro ficiency is very indifferent

Wingen :--Regulay inspection, 21st Junc.
Numbers enrolled :- T3oys, 23 ; girls, 16 ; total, 39.
Numbers presont:-Boys, 21 ; girls, 13 ; total, 34.

1. The schoolroom and furniture are of a most inferior kind. The school stock is scanty, and has been budly used. The organization is bad. 2. The children are moderately regular, but not so punctual their movements in selool are noiss and disorderly. 3. The instruction is without method, and the only notion of teaching is that of "setting" and "hearing" tasks. d. The average proficiency is small.

## III-HALK-TDIE SCHOOLS

Dairy Abm:-Regular inspection, 20th May.
Numbers enroiled:-Boys, 8 ; girls, 12 ; total, 20.
Numbers present:-Boys, 8 ; girls, 11 ; total, 19.

1. No improvemont in the material condition of this sehool is noticenble. Two desks are urgently required, and the building needs to be made more warm and confortable. No out-offices haro yet boen provided. 2. The attendauec is neither regular nor punetnal; and, from tho nature of the locality, is easily affected by the weather. The order is moderate. 3. The lesson documents are suitably arranged and the methods, in goneral, appropriate and applied with industry. 4. The gencral proficiency is moderate.

Watagon Creek:-Regular inspection, 20th May.
Numbers enrolled :-Boys, 10 ; girls, 10 ; total, 20
Numbers present:-Boys, 9 ; girls, 9 ; totul, 18 .

1. The building is unimproved. The furniture is tolerably sufficient, and, in a rade way, suitable. There is a fair supply of apparatus and books, and the organization is tolerable. 2. For the locality, the attendance is reasonably regulnr and punctial. The general discipline and order are tolerable. 3. Singing and druwing are not taught. The lesson documents are fairly arranged; the methods suitable; and the attainments, for a Half-time School, reasonably good. 4. The uverage proficiency is nearly fair.
J. D. BRADTEY,

Inspector.

## NEWCASTLE DISTRIOT--GENERAL REPORT, 1871.

Removal-Nature and extent of duties.-This district was nssigned to me from the 1st April last, and on tho Cthe of the same monthi I entered on the duties thereof. From tilat dato to the close of tho year I was fully occupied in the usual routine of iuspection, examination of teachers and correspondeuec, the first and last items claiming the largest share of attention and the greatest exponditure of time.

Schools in operation.-On taking charge of the District, I found 87 schools in operation, numbering 90 departments, and clased as follows:-

Changes-Of these, the Provisional School at Copabella was closed at the end of July; that at Wyong Creck, some time in October, that at Enderbark was converted into a Half-time school in conjunction with another at Glenmore; and the Public School at Parading Ground was closed in Norember, by the remoral of the teacher. The number of schools in operation at the end of the year was therefore 85 , containing 88 departments. Applications for the establishment of Provisional Schools were received from Blackwall und Minimbah, and of Half-time Schools from Ward's River und Jolnnson's Creek, and Camden Haven-all recommended for aid.

Extent of inspection.-The schools inspected during the year number 85, containing 88 departments, which figures represent all the schools open at the times of inspection, the only schools not examined, as having been then closed, being Copabella and Wyong Creek, Provisional; Underbank and Glenmore, Half-time. Before my removal I had inspected 5 schools, containing 6 departments, making, for the whole ycar, 90 schools with $\varrho 4$ departmenty examined by me. I made besides, 26 incidental visits, most of them to schools in different portions of this district.

Character of inspection.-The elaracter of the school examinations continues, as hitherto, to be grided by the Council's Standard of Proficiency, and their value to be estimated in precise accordance with the Council's instructions, both which circumstances render them as valuable in their searching power, as accurate and just in their results, as they can very well be made. It may be proper to observe, however, that there are several schools which, though not evincing that degrco of actual proficiency which would entitle them to be considered beyond or up to the requirements of the Standard, are, nevertheless, schools of excellent promise and bigh character. In some of these, irregular attendance and frequent removals, in others, defectire accommodation, thwart the best intentions of the teachers, baffe their most earnest, resolves, and materially reduce the value of their sixill and efforts, which, favourably applied, arc calculated to achieve suceess. It seems to me, if teachers are to depend for present rank promotion, are genernl charanter, in a grent measure, upon results, that on alowauc should be made for very irre, and scholars. Their answering should bo either altogether discontinued, or no child should be presented for examination who could not show a reasonably regular attondnace for at least three monthe preceding the date of inspection. I very much regret that my engagements did not pernit me to visit any sechools for the ordinary inspection, as it is that which affords the best opportunity of detecting errors of management, want of skill or energy in the discipline and instruction. and of offering such suggestions as the case might seem to require. If inspection is intended, as I belicve it should be, to remove abuses and replace them by improvements, more frequent visitation is necessary; but with the number of schools to be inspected, and the amount of correspondence comected therevith, this is a matter of the greatest difficulty, and can at best be buti partially acconplished.

Sites and playgrounds.-Spenking of this district, about three-fourths of the sites are satisfactory as to position, but many aro deficiont as regards suitable out-offices. In most playgrounds the absence of trees is a striking want, and I took occasion to enlist the teachers' interest in the matter of planting some in adrantageous spots. Acucias and willows are casily procured, grow rapidly, and requirc only the labour of planting and ordinary carc, to afford an agreeable shade from the summer sun, and relieve the somewhat sharp and bare outline otherwise presented to the eve. In clearing playgrounds, also, a few large trees should always be left standing, which by the process of pruuing might be rendered very serviceable for shade.

Buildings and organization.-More than half the number of school buildings range from fair to good, among which sevcral nre excellent, both in design and construction. The Public School at Newcastle has been enlarged by a very fine infanti schoolroom, giving to the establishment a degree of eymmetry nud completeness which before it had not possessed. The Infant Department of the Wallsend Public School is very much too swall, and defectively rontilated and organized. Suitable schoolhouses are badlr needed at Raymond Terrace, Clarence Tlown, Woolla Woolla, Tinonec, Bandon Grove, and Pitt Town; but at the lastnamed phecencw premises are in course of erection. At Taree, also, an Infant room is very urgently required, there being only an ill-rentilated and insufficient back room at present arailable for the purpose. The majority of Public and Certified Denominational Schools are effectively furnished, and abundautly supplied with apparatus and books. In the other classes of schools the same requisitos are rather deficient, though upon the whole, in moderate proportion to their wants. In general great care is taken of the school matcrials. With very few exceptions, the school records are kept will punctuality, neatness, and accuracy; and the requisite returns are, in most cases, compiled with care, and punctually despatched.

Discipline-Punctuality.-In seven-eighths of the schools of this district the punctuality of the pupils ranges from fair to good, and is unsatisfactory only in three. This 1 consider a prosperous condition of affairs, and mention with great satisfaction the almost uniform and strict observance of punctuality by the great majority of teachers. They are not only at their work in good time; but long before the hour of commencing, are making proparations for the day's business, and otherwise exercising a rigilant supervision over the conduct and interests of their pupils. Both parents and children soon loarn to appreciate such attention, and to work in willing concert with such teachors, who, I am happy to say, are numorous ini the district.

Regularity, cleanliness, and order:- $\Lambda$ s regards regularity, howover, the same degree of aatisfaction has not been experienced, though, even in this respect, the sehools range for the most part from tolerable to good. The causes which operate in other districts, viz., the porerty, and sometimes aleo the selfishness of parents, are felt in this as well, although perhaps to a less extent. This condition of regularity more than any other affects the usefulness of schools, the progress of scholars, and the suecess or failure of tcachers ; it is likewise the most difficult of fulfilment, coming, as it does, under no direct, palpable power to enforce its obserrance, while opposed by considerations of some moment with the parents. Having in last year's report stated my views on compulsion as a means of securing regular attendance, I see no need to repeat them here. Cleanliness is highly satisfactory in one-third of the schools, fairly so in three-cighths, tolerable in one-fifth, and moderate to indifferent in the remainder. There are ssveral schools in which perfect order exists; but compared with the whole number, the degree erinced is not satisfactory. On this point I am of opinion that a disorderly school arises mainly from the fact that the teacher is a person of disorderly habits; and I have often witnessed ample confirmation of the same. I feel gratified to belicve that most teachers of this district are fully convinced that order is a conditio sine qua non of successful teaching, and accordingly lend their efforts to secure it. In the more important sehools of Neweastle and its immediate vicinity, and of the Manning River District, it is well established, and bears ample cridence of it beneficial influence in th3 correct habits and agreenble demeanour of a large proportion of the pupils attending them. I must, observe, however, that habits of whispering and copying are still to be noticed in a considerable number of sehools, tending only-and that very forcibly-to reduce the value of the results realized, and to grievously injure the charactors of the children indulging them.

Government.-In general, the gorernment is very intelligent and judicious, and not marked by the extensive use of corporal chastisement.

Instruction, classification, occupation, and methods.-For the most part, the classification is correct, the occupation appropriate, intelligently arranged, and conducted with a fair amount of skilful method.

The instructional documents are, generally speaking, well understood, carefully prepared, and constantly observed. Notwithstanding this cvidence of satisfactory attention, some defects oceur, which require a passing notice, but upon which, as being obvious to teachers of ordinary intelligence nnd experiouce, and having the remedy in their own hands, it is needless to expatinte. These are,--the tendency to orer-subdivision of classes, the unprecise arrangement of the subjects, and the want of adequate reference to the standard. The inspections having been, except some few ineidental visits, of the kind known as "regular," or " general," I had but little opportunity of witnessing the methods pursued, and from the cursory insight obtained by a brief trial-lesson, I should hesitate to offer any definite comments upon their merits. I may remark, however, that those portions of the examinations which were placed in the hands of the teachers were in many instances skilfully conducted; and, as estimated from such data, the methods may be said to rary from fair to good in about half the number of scliools-being tolorablo in less than one-fourth, and moderate to indifferent in the remainder.

Proficiency.-Appended hercto is a table, prepared in accordance with the Council's instructions, showing the estimated proficiency of the pupils examined in the different subjects.

The numbers enrolled in the screral classes of schools are giren, according to their ages, in the following table:-

| Numbers Enrolled at Inspection inー | $\begin{gathered} 7 \text { years } \\ \text { and under. } \end{gathered}$ |  | 8 years. |  | 9 years. |  | 10 years. |  | 11 years. |  | $\begin{aligned} & 12 \text { years } \\ & \text { and over. } \end{aligned}$ |  | Totals, |  |

Knowledge of reading.-In reading, the results crinced are fair. The faults observed in former years, and in other districts, have been noticed bero also. Of these, the most prominent aro indistinct and rapid articulation, imperfect modulation of voice, and a very general want of expression. In many schools this subject does not receive that attention and care which its importance demands, nor do the majority of teachers justly valuc it as an educating power. Hence the evident carelessness in, or slight preparation for giving their pupils those exercises which nre necessary for thoroughly mastering it an an art. Very often the reading lesson is no more than a dull repetition, by the pupils, of the words of the book, during a often the reading lesson is no more than a dull repectition, by the pupils, of the words of the book, during a
stated interval, without any examination of their meaning or amalysis of the subject matter; while, to make it really effective, the teacher should so guide, by his questions, the attention of his scholars in both directions, that, understanding and assinilating the author's ideas, they may form an intelligent and a correct notion of the sense of the passage, and thus acquire a natural and pleasing delivery. When the teacher is himself a good reader, the pupils, or a majority of them become so too; but if he ling only a confused idea of what good reading is, or if he labours, as some do, under the delusion that loud and fast
rending is neccssarily good, then, indeed, the case is almost hopeless. There is one thing in connection with this subject of which I desirc to express my ontire and emphatic disapproval, viz., the practice of putting books into the hands of clildren for the purpose of "preparing lessons." Whaterer adrantage may be clainod for it in dealing with adult pupils in the higher stages of adrancenent, it is on no ground justifinble where the children of an ordinary first class only aro conccrned. With these, such a mode of cmployment is at best a waste of time, while in general its tendency is positively injurious.

Writing. - In writing, the proficiency evinced is very satisfactory, there being upwards of 77 por cent. of the pupils examined, from fuir to good. The subject is well taught in the majority of schools, and the care bestowed on the copy-books is very creditable both to teachers and scholars. Sometimes children are loft a long time without books, to their grent loss, and with no real necessity. It is truc that in many localitics there are great difficulties in supplying the want; but if every teacher took care to keep a stock on hand, for sule, these would be obviated, or very elightly felt. The "Vere Foster" copy-books aro beginning to be used. 'They comprise a series of well graduated copies, from the simple clements of the letters to the most difficult combinations.

Arithmetic.-Arithmetic is taught to nearly 79 per cent. of the pupils in attendance; but for the most part the progress is emall, and confined to the simple rules. The proficiency is upon the whole from tolerable to fair, which is a reasonably good average result. In severnl schools the subject is intelligentiy, skilfully, and thorongly imparted ; but they are comparatively few. In most, howerer, preat attention is bestowed upon the instruction, and modern zucthods aro employed. The principal defect appears to be in orer-teacling, and relieving the pupils as much as possible from the lahour of learning. 'Xhis is a serions error, against which teachers camot be too guarded. In mental arithmetic the results are indifferent.

Grammar.-In grammar the pupils receive instruction to a antisfactory extent, and display on the avernce a tolerable knowledge. In most Public and Denorainational Schools the subject is tanght with earnestness, attention, and reasonnble success; but in the greater number of the other schools, the qualifications of the teachers, and consequently tho attainments of the pupils, are of rery small account. In the matters of analysis and composition of sentences there is much room for improvenent, especially in the latter, in which I witnessed numerons failures during the year.

Geography.-With the exception of one or two Half-time Schools, geography is taught, and for the most part to the extent prescribed in the standard. I caunot speak of the methods, but judging from the results, would cstimate them at abont tolerable. Instruction in the subject is skilful and efficient in a considerable number of schools; but in many, on the other hand, it is very weak and ineffectual. The average proficiency is nearly tolerable.

Object Lessons.-Except in three smail schools, lessons on common objects form part of the usual daily routine, there being no fewer than 89 per cent, of the pupils present learning them. This fact shows that attention is paid to the requirements of the standard in this regard-a very important ono as closely affecting mental derclopment and culture; but I cannot say that any real success has been achiered up to the present. The frult noticed in former rejports, viz., thatt the instriction imparted assumes too cxelusively the form of lectures-cramming the children with information, but giving no scope or exercise to their own powers of observation and compurison-is still far too prevalent. In a feew of tho best schoole a fair proportion of pupils manifest a satisfactory knowledge of the more ubeful and important subjects, but as a whole the proficiency is only moderate.

Scripture Lessons.-Tho Scripture Extracts sanctioned by the Council are read to the requisite extent in Public, Provisional, and Half time Schools; they are also used in the Newcastle Presbyterian School, which is, however, mis-nnmed, there being very many more pupits of other denominations in attendance than of that from which the school derives its title. The general results witnessod runge from anoderate to tolcrable.

Other suljects.-Drawing and vocal music are taught in tho majority of Public and Denominational Schools, but only in comparatively few is the instruction effective. Euelid is studied in eight schools, and Algebra in one or two, with, on the whole, fair success.

Instruction in needlemork is pretty general, and imparted with tolerable care. In the larger schools I saw many excellent samples of plain sewing; but in the smallor ones suflicient intercst is not naznifested in this useful branch of female education, and children often please themselves as to whether they bring work or not.

Teachers--Examinations of teachers were held at Newcastle, Turee, Dungog, and Gosford, to which, as coming under the Regulations, Art. 37, and the Council's specinl instructions for the year, 19 teachers were summoned, of whom 14 attended. Two of the absentees were exempted by age; one was unable to attend from illness, in proof of which a medical certificate whs enclosed; one considered hersclf exempt, and has since left the district; and one did not receive my notification (through postal irregularity) in sufficient time to enable her to be present. Two others underwent special cxamination. Of the 16 examined, only five were deomed worthy of promotion; and of 13 pupil teachers examined, five were promoted, and one was adnuitted to the Training School. Four teachers received promotion, in terms of Art. 39 of the Regulations. The teachers-including assistants-in the Council's servico at the close of the year, were classed as follows :-

| Class I. | Class II. |  | Class JII. |  |  | Not classed. | Total. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Section A. | Section B. | Section A. | Section B | Scction C. |  |  |
| 0 | 7 | 14 | 26 | 20 | 8 | 18 | 93 |

The Pupil-teachers hold the following grades :-

| Class I. | Class II. | Class III. | Class IV. | Total. |
| :---: | :---: | :---: | :---: | :---: |
| 0 | 4 | 6 | 9 | 19 |

It gives me much plcasure to testify to tho evidences of ability, experience, and devotion to duty, which the greater number of the teachors of this district have manifested during the past jear. I may mention especially those in and around Newcastle and on the Manning River, as for the most part doing their work thoroughly, anxious to succeed, and unsparing in their efforts to promote the efficiency and extend the influence of their respective schools. I am inclined to go so far as to eay that my first impression of almost all is very fuvourable, and that if they continue to exhibit the same spirit throughout, our inter-- course will be upon the whole agrecable, the interests committed to their keeping will be carefully guarded, and a healthy impotus will be given to the progress of education in the district.

Local supervision.-In many instances the Boards exercise a Fery intelligent and an activo supervision, encourage the teachers by their presence at examinations, and give them every assistance in matters of difficulty. On the Munning River in particular this interest is very perceptible, and speaks well both for Boards and teachers. In this district, as a whole, I observe that a greater number of School Boards evince a lively concern in the welfare of their schools than in the other districts with which I have been acquilinted.

Conclusion.-In conclusion, I have only to remark that the educational wants of the district are pretty effectively provided for, the number of schools is on the increase, and a fair interost in their establishment ard support is manifested by the people generally. Several of the older and more important institutions, comprising the majority of the Newcastle Schools, those at Hanbury, Lambton, Wallisend, some on the Williams, and saroral on the Manning, have attained a respectable degree of efficiency, and merited alike the approval of the Council and the confidence of the inhabitants.

Newcastle, 9th February, 1872.
WM. DWYER,
Inspector.

Deinmed Statemint showing the condition of the Public, Provisional, and Half-time Schoole inapectod, as regards-

1. Their material condition.
2. Their mornl character.
3. The subjects and methods of instruction.
4. The proficiency of the pupils.

## PUBLIC SOHOOLS.

## Bandon Grove:--Visited, 7th November.

$$
\text { Present at examination :-Boys, } 14 \text {; girls, } 17 \text {; total, } 31 .
$$

1. The premizes are old, and much in need of additions and repairs; but the school is effectively organized. 2. The pupils are exccedingly ahy and timid; but their general behaviour ia good, and their order tolerable. 3. Except singing, the occupation comprehends the prescribed subjects, is arranged with tolerable judgment, and conducted with reasonablo method. The instruction is fairly intelligent and earnest, but not applied with adequate deliberation. 4. The averago proficiency ranges from moderate to tolerable.

> BaRRinaton :-Visited, 22nd August.
> Present at examination:-Boys, 12 ; girls, 9 ; total, 21.

1. The room is omall, but affords moderate accommodation for the place, and is fairly supplied with furniture, apparatue, aud books. 2. The pupils are shy and difident, indolent in their habits, and subject to no very healthy discipline; but their attention and the order of their movements are tolerable. 3. Except singing and neediletrork, the subjects accord with the standard. The lesson documents betray a want of care, neatness, and precision in their construction. The instruction is badly suited to the capacities of thie children, and is in ganeral rather wandering. 4. The arerage proficiency ranges from indifferent to tolerable.

## Bute Gfm Fidt:-Visited, 27th November.

$\dot{P}_{\text {resent at examination :-Boys, } 16 \text {; girls, } 30 \text {; total, } 46 . ~ . ~ . ~}^{\text {and }}$

1. The premises are sufficient, fairly suitable, and in decent condition as a whole. The organization of the school is fairly eflective. 2. The order and mornl aspect of the school are fair. 3 . The subjects are appropriate, carefully and neatly arranged, imparted with energy, intelligence, and effect. 4. The average proficiency ranges from moderate to fair.

> BUlLadelah :-Visited, 3rd October.

Prescnt at examination:-Boys, 24 ; girls, 19 ; total, 43.

1. The condition of the premises and the accommodation afforded are only very moderate. The furniture is old, and poorly sufficient; but otherwise the organization is tolerable. 2. The discipline is fairly judicious, and of reasonable promise, but jut now the pupils are noisy in their habits, and addicted to whispering. The moral aspect of the school is tolerable. 3. The prescribed subjects are taught, and arranged in the requisite guides, which are pretty well constructed. The requirements of the standard arie not kept sufficiently in view, otherwise the instruction is skilful and intelligent. 4. The average proficiency ranges from indifferent to moderate.

## Boolaybayte :-Visited, 2nd October.

Present at examination :-Boys, 18 ; girls, 8 ; total, 26.

1. The achool is in tolerable condition as to repair, and fairly sufficient, but untidily kept and very poorly furnighed. 2. There is neither discipline nor order in the school; the habits of the pupils are rude and rulgar; the tone of the school is very low in consequence. 3. With the exception of singing, the subjects accord with the standard; but their arrangement is extremely defective. The instruction is very weak, mechanical, and inefficient. 4. The average proficiency is indifferent.

Booral :- Visited, 5th October.
Present at examination :-Boys, 16 ; girls, 9 ; total, 25.

1. The premises are pleasantly situated, in good condition, suitable, sufficient, and well provided with the requisite appliances. 2. The discipline, order, and moral aspect of the school are good. 3. Frcept singing, the preseribed subjects are taught, and arranged with very fair judgment. The instruction is earnest, intelligent, and effective. 4. The general proficiency ranges from moderate to fair.

Clarrnos Town :-Vibited, IOtl November.
Present at examination :-Boys, 30; girls, 30; total, 60.

1. The building is old, in bad condition, and poorly ventilated, but the school is very effectively organized. 2. The discipline is judicious, the order good, and the moral tone of the school very satisfactory. 3. The instruction is appropriate ; the lesson guides are carefully and skilfully constructed; and the teaching is intelligent, judicious, and inpressivc. 4. The general proficiency ranges from fair to very fair.

## Coorambong :- Visited, 28th November.

Present at examination :-Boys, 21 ; girls, 16; total, 37.

1. The school is held in the R. C. Chapel, which is a good building, sufficient and suitable. The Gorganization is tolerable. 2. The pupils are unsteady and poorly attentive, addicted to whispering, under feeble discipline, and in very poor order. 3. Singing and drawing are not taught, but the other subjects sccord with the standard. The instructional guides are carelessly prepared. The methods-judged chiefly by the results-are weak and superficial. 4. The proficiency varies, on the average, from moderate to tolerable.

## Cundietomn :- Visited, 30th August.

Present at examination :-Boys, 20 ; girls, 16 ; total, 36.

1. The premises are in good condition, adequate to the wants of the place, and well cared for, but mithout a supply of water. The teacher's house needs $n$ verandal. The school is very effectively organized. 2. The pupils arc attentive, self-reliant, and orderly; the moral aspect of the echool is good. 3. Singing and drawing are omitted from the occupation, which is otherwise appropriate and judicious. The instruction is skilful and carmest, intelligent and effective. 4. The average proficiency is, in the first class, very fair to good; in the second, tolerable to fair ; in the thirrd, fair to very fair.

Croki :-Visited, 7th September.
Present at examination :-Boys, 34; girls, 25 ; total, 59.

1. The buildings are suitable, sufficiont, in very good condition, and adequately provided with furniture and applisnces. 2. The moral aspect of the school is very pleasing. 3. All the prescribed subjects are taught to tho extent required by the classification, and the losson guides are skilfully and carefully prepared. The pupils are earnestly, zealously, and effectively instructed. 4. The proficioncy is fair in the first elass, very fair to good in the second, very fair in the third.

> Dingo Creer :-Visited, 15th September.
> Present at examination :-Boys, 14; girls, 11; total, 25.

1. The school building is tolerable as to condition and accommodation, and the organization is ressonably effectivc. 2. The pupils are attentive and well-bchaved during instruction, but at intervals indulge objectionable habits. Their movements are made in tolerable order. 3. The subjects accord with the standard, and are arranged with tolcrable judgment; the methods are, upon the whole, moderate. 4. The general proficiency varies from fair in the first class, to tolcrable in the second and third.

Dumarese Island :--Visited, 4th September.
Present at examination :--Boys, 18; girls, 24; total, 42.

1. The schoolroom is small for the requirements of the place, but very suitable and well organized. 2. Irregular attendance is the only cause of complaint under this head; the mornl tone of the school is good. 3. Except drawing and vocal music, the occupation is in accordance with the standard; the losson documents are appropriate and well observed; the methods are modern, und are judiciously and effectively applied. 4. The proficiency is nearly good in the first class, very fair to good in the eccond, fair in tho hird.

## Dungog :- Visited, 3rd November

Present at examination:-Boys, 23 ; girls, 21 ; total, 44.

1. The site is admirable, tho building sufficient, in excellent condition and very effectively organized. 2. The discipline wants energy, animation, and firmness; but the moral aspect of the school is, upon the whole, fair. 3. The subjects are appropriate, and skilfully arranged; the instruction is intelligent and earncet, but needs penctrative power. 4. The average proficiency ranges from tolerable to fair.

## Eagleton:-Visited, 8th August.

Present at examination:-Boys, 17; girls, 14; total, 31.

1. The walls, which are built of weatherboards, need painting on the outside; otherwise the premises are in good condition, suitable, sufficient, and well preserved; the organization of the school is good. 2. The moral tone of the school is very good. 3. The occupation is suitable, and properly arranged; the instruction, judicious and effectual. 4. The average proficiency is fair to good in the first class; fair in the second and third.

Ghinni Gminni:-Visited, 5th Soptember.
Present at examination :-Boys, 35 ; girls, 31 ; total, 66.

1. The school is suitable, commodious, well found in furniture and appliances, and in excellent condition. 2. The moral aspect of the school is good. 3. The instruction is appropriate and well arranged; the methods evince satisfactory intelligence and skill on the part of the teacher, and are on the whole fairly effective. 4. The average proficiency is somewhat over fair.

Glimimiliam :--Visited, 26th October.
Present at examination :-Boys, 10 ; girls, 7 ; total, 17.

1. The teacher's residence is partially exposed to the wenther, but the schoolroom is in good repair and well organized; six pupils were absent on account of the day being wet. 2. The moral aspect of the echool is good. 3. The instruction is in couformity with the standard, suitably regulated, and imparted with fair intclligence and skill. 4. The pupils betray a want of spirit in answering, but their attainments aro nearly fair in the first. class; tolerable to fair in the second; nearly moderate in tho third.

Gosford:-Visited, 23ru November.
Present at examination :-Boys, 12 ; girls, 20 ; total, 32.

1. The school is conducted in the R.C. Chapel, which is small, but tolerably suitable and well organized. 2. The moral aspect of the school is tolerable. 3. Dmawing and singing are not taught; otherwiso the subjects accord with the standurd. The 'Time-table is not constructed with eatisfactory clearness and simplicity, but the other guides aro prepared with fair skill; the methods witnessed evince fair intelligence, but want penetration. 4. The average proficioncy is fair to very fair in tho first clasa ; nearly fair in the second, but only moderate in the third.

## FExHAM :-Tisited, 14th Juis.

## Present at oxamination :-Boye, 15; girle, 16; total, 31

1. The premises are in good condition, but need minor repairs ; the accommodation is abundant and reasonably suitable, and the organization of the school is fairly effectire. 2. Some of the pupils are unpunctual, and a fow untidy and poorly clad; the movements of the younger ones are rather noisy and thoir attention slight. As a whole, the discipline is appropriate and calculated to be effective. Th teacher has been only seven or eight months in charge. 3. The instruction is, in some subjecte, rather advanced for the periods of enrolment, and in reading insufficient; but the occupation, as at wholo, is neatly and suitably arranged, and the methods are painstaking, fairly judicious, and effective. 4. In the first class the average proficiency is fair in the upper division, but small in the lower ; in the second moderate; in the third, nearly fair.

## Hanbury :-Visited, 16th to 20th June.

Present at examination :-Boys, 92 ; girls, 74 ; total, 166.

1. The condition of the premises, the accommodation and equipment of the school, and the supply of all materials, are excellent. 2. The discipline is higlly appropriate, and the order of the pupils excellent, though a rathor large proportion of them do not attend regularly. 3. The occupation accords with the standard, is judiciously arranged, and systematically conducted, and the instruction is impressive stilful, and effectual. 4. To a large extent the answering is very satisfactory, and the axerage proficiency is as follows:-First class, very fair; second, very fair to good; third, nearly fair; fourth, very fair (nearly).

Lambron (Primary):-Visited, 16th to 18th May.
Present at examination :-Boys, 102; girls, 56 ; total, 158.

1. The situation is low, but the buildings are in very good condition, and, except a lavatory, amply sufficient. The organization of the school is excellent. 2. The discipline is very appropriate, and the moral aspect of the school good. 3. The subjects are euitable and judiciously arranged; the instruction is imparted with a degree of skill varying from good to fair. 4. The aferago proficiency ranges from moderato to fair. The head teacher had not been long in charge.

> Lanbtox (Infant) :- Visited, 18th and 19th May.

Present at examination:-Boys, 66 ; girls, 59 ; total, 125.

1. The accommodation is suitable and sufficient, the condition of the building and the organization are very satisfactory, but the site requires draining. 2. The pupils move in good order, but their habits are unsteady, and the discipline betrays too much bustle in its application. 3. The occupation accords with the standard, and is regulated with reasonable skill and care. Tho instruction is fairly appropriate and judicious. 4. The proficiency of the elder pupils, who number nearly one-third, is verr good; that of all, nearly fair.

## Manghove Creen:-Visited, 13th December

$$
\text { Present at examination :-Boys, } 15 \text {; girls, } 9 \text {; total, } 24 \text {. }
$$

1. The school is held in the R.C. Chapel, which is in fair condition, reasonibly sufficient, and tolerabiy well organized. The playground accommodation is defective, and the teacher's residence very misernble. 2. Difficulties arising from the nuture of the country prevent satisfuctory attendance. The pupils are pleasing in their conduct and manners, and orderly in their movenacnts. The moral tone of the school is satisfactory. 3. The occupation is suitable and systematic ; the instruction carcful, zealous, and reasonably cffective. 4. The average proficiency ranges from tolerable to fair.

## Marlee: - Visited, 14th September.

Present at examination:-Boys 11; girls, 12 ; total, 23.

1. The premises are in exeellent condition, and the schoolroom is suitable and well provided with proper applianccs. 2. The woral tono of tho school is fair. 3. Drawing and singing are not taught; otherwise the occupation prescribed is followed, and the lesson-guides are prepared with tolerable judgment The methods are intelligent, earnest, and of good promise. 4. The averuge proficiency varies from mode rate to fair.

Mingr:-Visited, 12 lh July.
Present at examination:-Boys, 27 ; girls, 22 ; total, 49.

1. The building is in good repair, fairly adequate to the wants of the place, and provided with sufficient furviture and appliances. 2. Some of the pupils are unsteady and addicted to disagreeable habits; but the attention and gencral order of the majority are fair. 3. Excepting needlework the prescribed subjects are taught, but their arrangenent is not judicious. The methods are reasonably intelligent, energetic, and effectiual. 4. The proficiency ranges from moderate to tolorable, but the teacher had been only a few weeks in charge.

Mitcheli's Island :--Wisited, Sth September.
Present ut cramination :-Bors, 25 ; girls, 36 ; total, 61

1. The building is in all respects good, and the sehoolroom is fully found in furniture and other requisites. 2. The moral tone of the school is fair. 3. The occupation is appropriate, but its arrangement admits of improvement. The methods are very earnest, fnirly intelligent, and reasonably effectual 4. The average proficiency raries from tolerable to fair.

Monmprat :-Visited, 18 th August.
Present at examination :-Jioys, 8 ; girls, 5 ; total, 13.

1. There are no out-offices; otherwise the premises are fairly suitable; and the school is tolerably well supplied with furniture and other appliances. 2. The pupils are passubly clean, modorately attentive and well hebared, but $a \pi k$ ward in mamer and demeanour, and ignorant of order. 3. Most of the pro scribed subjects arc taught, but without satisfactory reference to the standard. The instruction is tolerably carnest and constant, but rery mechanical. 4. The proficiency ranges from moderate to tolerable.

Monquifo Iseand :-Visited, 2nd May,
Precont at examination:-Boys, 15; girle, 13 ; total, 28,

1. The premises are suitable, sufficient, and in very good order; and the school is well organized. 2. The pupils are clean, attentive, and, except a habit of whispering, in fair order. The small attendance is due to the prevalence of unfavourable weathor. 3. The prescribed course of instruction is followed, with the exception of singing; but the arrangement of the subjects is not satisfactory. The instraction is earnest and constant, but wanting force and fulness. 4. The arerage proficiency is, for the most part, indifferent, and the mental culture smnll. The best scholars were snid to be absent.

Newcastia (Primary) :- Visited, 23rd to 26ilh May. Present at examination :-Boys, 96 ; girls, 44 ; total, 140.

1. The accommodation-inadequate at the time of inspection-hns been considerably enlarged, and is now amply sufficient. A verandah to the west side of the building is much required. The organization is highly effectivc. 2. The discipline is efficient, the order very good, and the moral tone of the school high. 3. The subjects are approprinte, carefully and skilfully arranged. The methods vary, but as a whole, are intelligent, well applied, and effective. 4. The average proficiency of the first class is fair; of the second, fair; of the third, somewhat over moderate; and of the fourth, fnir. The pupils evince a satisfactory degree of mental culture.

Newcistle (Infant) :- Fisited, 20th and 30th May.
Present at examination:-Boys, 42 ; girls, 33 ; total, 75 .

1. This dopartment is held in the class room (but since removed to the new Infant School), which is in every respect unsuitable, but well supplied with furniture and appliances. 2. As far as the teacher can be held responsible under the circumstances, the discipline is satiafnctory, and the moral aspect of tho school fair. 3. The instruction is appropriate, well arranged, and imparted with fair judgment. 4. To a partial extent the proficiency reaches excellent and good, but on the average is under tolerable. The results are considerably affected by the dificulties of the room.

Oxiry Island:-Visited, 6th September.
Present at examination :-Boys, 16 ; girls, 13 ; total, 29.

1. The premises are in fair order, very suitable, and well kept; and the school is pretty effectively organized. 2. Tho pupils are very shy and itwkard in memer, but attentive, well conducted, and in fair order. 3. Singing and drawing excapted, the subjects accord with the standard, and are arrangod in the requisite guides, which are prepared with fair skill. The methods are carnest, tolerably intelligent, and fairly judicious. 4. The average proficiency waries from indifferent to moderate, and the mental culture is very small, but the teacher has been only a slort time in charge.

Parading Ground :-Visited, 4th August.
Present at examination:-Boys, 9 ; girls, 10 ; total, 19.

1. The premises are old, badly cared for, and falling into disrepair, but still in tolerable condition. The organization of the school is tolerable. 2. The pupils are awhward and indolent in habit, and rather grimy in appearance, but tolerably attentive and in moderate order. 3. The occupation is not well suited to the capacities of the pupils, and the standard is not observed. The instruction is mechanical, but passably intelligent. 4. The aremge proficiency ranges from moderate to indifferent.

Pit Town:-Visited, 31st May to 2nd June.
Present at examination :-Boys, 85 ; girls, 71 ; thtal, 156.

1. The schoolroom is old, in very bad repair, inadequate to the wants of the place, but sufficiently provided with furniture, apparatus, aud books. The first class pupils are taught in the Mechanica' Institute. 2. The moral aspect of the sehool is good. 3. The subjects are approprinte, and judiciously arranged. The instruction is fairly skilful, vigorously applicd, and, under the circumstances, reasonably effectusi. 4. Tho arerage proficiency ranges from moderate to fair.

## Plattabokg:-Visted, 18 th and 19 th Julg.

Present at examination :-Boys, 69 ; girls, 45 ; total, 114.

1. The playground is not enclosed, and there is no water on the premises. The building is fairly sufficiont, suitable, and in good condition. The organization of the school is reasonably effective. 2. The pupils are addicted to noisy and unsteady habits, and their general demeanour is rather forward. Tho noral tone of the sehool is unsatisfactory. 3. The prescribed subjects are tainght, and arranged with care and judgment. The teaching is intelligent, active, well sustained, and calculated to be effectual. 4. The proficiency and mental culture are for the most part indiferent, but the teacher had been only a few weets in charge.

## Raymond Terrace:-Visited, Sth and 9th June.

Present at examination:-Boys, 19 ; girls, 9 ; total, 25.

1. The promises are badly situated, and unproridel with the requisito out-offices. The organization of the gchool is tolerable. 2. As a whole, the moral aspect of the school is good. 3. Singing is not taught; olherwise the standard is obserred in the occupation, and the lesson guides are fairly suitable. The teaching is reasonably intelligent and skifful, but weak in searching porer. 4. The results are unsatisfactory.

Rempans :-Visited, 18th September.
Present at examination :-Boys, 11 ; girls, 10 ; total, 21.

1. The site is unsuitable. The schoolroom is old, but in tolerable repair, suticient, and fairly organized. The teacher's residence is in good condition. 2. The habits of the pupils are disagreeable, and their mannors awkward; their appearance is untidy, and their general demeanour unprepossessing. 3. The occupation is, to some extent. unsuited to the cupacities of the pupils, and some of the more important subjects are not sufficiently attended to. The methods, as witnossed, need rigour, animation, and simplicitr. 4 The average proficiency ranges from moderate to tolerable.

## Sun폈:--Visited, 24th October.

Present at examination:-Boys, 16 ; girle, 12 ; total, 28.

1. The premises are old, in poor repair, and the schoolroom is very insufficient and badly organized. 2. The pupils are passably clean, but poorly clad, moderately attentive, but unsteady in their habites and very deficient as regards order. 3. The occupation is very superficial, and without careful or intelligent arrangement. The instruction is fecble, and of small cffcct. 4. The proficiency and mental culture are unsatisfactory.

## Stoceron :-Visited, 25th April.

Present at examination:-Boys, 22; girls, 20 ; tothl, 42.

1. The ground is not enclosed, there are no out-offices, and tho schoolroom is emall for the numbers, and very badly ventilated. The supply of furniture, apparatus, and books is fair. 2. Tho discipline is weak, and the order unsatisfactory. 3. Singing and needlework are not tanght; otherwise the occupation accords with the standard, but its arrangement is injudicious. The instraction is rather suggestive and superficial. 4. The average proficiency is indifferent.

Tarer:-Visited, 31st August.
Present at examination :--Boys, 52 ; girls, 44; total, 96.

1. The situation is very good, and the condition of the premises satisfactory; but the school necommodation is very inadequate, and a shed is much needed in the playground. The organization is fairly effective. 2. The discipline is appropriate and intelligent, and, allowing for the insufficient room, the order and moral tone are very fair. 3. Except drawing, the prescribed subjects are taught, and skilfully arranged. The instruction is earvest, judicious, and effective. 4. The average proficiency and menta culture are somewhat over fair.

Telfgamerts:-Visited, 17th August.
Present at cxamination :-Boys, 34; girls, 24; total, 58.

1. The premises are in good condition, suflicient, and fairly suitable; the school is fairly organized. 2. The moral aspect of the school is fair. 3. Singing and drawing are not taught, and object lessons only partially, but the other subjects accord with the standard. The instruction is not gatisfactorily vigorous and systematic, but careful and persercring. 4. The average proficiency is about moderate.

Teralba:-Visited, 13th July.
Present at cxamination :-Boys, 5 ; girls, 17 ; total, 22.

1. The school is held in the Congregational Chapel, which is a good building, but poorly furnished. The stock of apparatus and books is fair. A rested school is in course of erection. 2. The pupils sre unpunctual, rude and shy in manner; untidy, but paesably clean. They move in tolerable order. 3. Except singing, the course of instruction accords with the standard, bat their arrangement betrays some neglect. As a whole, the instruction is of tolerable value. 4. The average proficiency is moderate, but the mental culture very indifferout.

## Thalaba :-Visited, lst November.

Present at examination:-Bors, 18 ; girls, 13 ; total, 31.

1. The promises are tolerable for the place, and the school is moderatel $\bar{y}$ well supplied with furniture and other requisites. 2. The discipline is exceedingly las, and the pupils are in consequence very disorderly. Tho moral aspect of the school is low. 3. Singing excepted, the subjecte prescribed aro taught, but their arrangement is very unsatisfactory. The instruction is wenk, and of poor effect. 4. The average proficiency is below moderate.

Tinonee:- Visited, 28th August.
Present at exanmination:-Boys, 34; girls, 18 ; total, 52.

1. The site is good, but the schoolroom is old, wholly inadequate, and in bad condition. A supply of water and improvements to the teacher's residone are very urgently required. The school is fairly organized. 2. The morai tone of the school is good. 3. All the subjecta prescribed aro taught, except singing, and judiciously arranged. The instruction is earnest, stilful, and effective. 4. The average proficiency and mental culturo are fair.

## Tomago :--Visited, 9th August.

Present at examination:-Boys, 11 : girls, 9 ; total, 20.

1. The premises are suitable, sufficient, and in good repair, and the school is properly organized. 2. The pupils generally are attentive and well behaved, but timid and somewhat fidgety. The moral aspect of the school is fair. 3. The occupation is appropriate and arranged with tolerable judgment, but in come points the standard is not observed. The teaching is earnest, careful, intelligent, and of good promise. 4. The average proficiency of the first class is indifferent; that of the other classes nearly moderato.

## Wollomba River, Lower:- Visited, 28th September.

Present at examination:-Boys, 5 ; girls, 7 ; totnl, 12.

1. The building is fair for the place, and the organization moderate. 2. The moral aspect of the achool is moderate. 3. The subjects are suitable, but clumsily arranged. The teaching, which is almost individual, is very dull and monotonous. 4. The general proficiency is very indifferent.

## sYDNEY DISIRICT.

Inspectors' Gencral Report upon the Condition of Public and Dortified Denominational Schools, for the yenr 1871.
The educstional wants of this district are more than sufficiently provided for. In several localities the number of schools might be reduced, with no worse result than a certain and substantial improvement in the quality of the education imparted. One good large Public School would in such places do tho work, and do it much better and more economically than the two or three sectarian schools at present in existence, and the public would in erery way be gainers by the change. Under existing circumatances, a number of comparatively small schools receive support that provide only for the education of ehildren up to the are of ten years, and the education of those nbore that age has cither to be partially suspended, or the children have to be removed to large Public Schools long distancos from their homes. The disadrantages arising from this statc of things are beginuing to force themselres on public attention, and indications are not wanting to show thut the timo is not distant when active measures will be taken to have these disadvantages remored.

For some ycars to come, therefore, it is not likely that the number of schools in this district, as at prosent constituted, will reccira any material increasc. New schools may be estnblished, but these will in all probability grow out of and occupy the places of a number of small schools now in existence.

During the year covered by this report, the number of schools in operntion was sixty-one (61), namoly, sixtecn (16) Public, and forty-five (45) Denominational. The Public Schools cmbrace thirty-one (31) departments, and the Denominational sixty-eight (68) departments. There has therefore been an increaso of three departments, caused by the re-opening of Sussex-strect Public School, and the division of Paddington (Mixed), and of St. Philip's C. E. (Mixed), each into two separato departments-boys and girls.

The wholc of those departments underwent regular inepection during the year, besides being incidentally visited as often as circumstances would permit. The time spent in the examination of each department varied from one to eight days. The character of the inspection was the same as that described in former reports; one standard was applicd to every school, nud although due allowance was made in faveur of echools suffering from exceptional and univoidable causes, this was not permitted to alfect the meaning or raluo of the final estimates arrived at. Examinations were almost entirely of a viva voce character. The questioning was individual, searching, and exhaustive. It was not directed merely to elicit the nmount of technical information which the papils had received, but, what is more importment, to ascertain how far they land beentrained to think. The examinatory test thereforo was of a twofold character : in the first place, each class in a school was required to satisfy the prescribed standards in respect to technical knowledgo, and in the second, every such class was required to show, by the nature of their answering, that the tcuching had been instrumental in effecting a certain amount of mental development. And this latter consideration was viewed as of paramount importance. For, however valuable knowledge may be in itself, the power arising from a properly cultivated intellect is far moro valuable. A very large proportion of teachers, including many who have received no special training for the work, are capable of cramming children with a certain amount of facts, but only the experienced akilful instructor can succeed in teaching them to think.

The inspections were held without notice; we had the advantage, therefore, of observing each school in ite every-day aspect. This circumstance was not without effect upon the character of the examinations passed by the various schools. Comparcd with those of last year, these examinations were as a whole less satisfactory. The declension was principally, however, in matters of a superficial nature, to which teachers might with a little previous preparation have imparted a more than usually bright aspect. There has been no retrogression in the work of edueation properly so called, but the labours of our teachers, as disclosed by the inspection of their schools, will compare favourably with those of previous years.

Material condition.-The conditions that determine an eligible school site in a largo crowded city Annax a. like Sydney are few in number. So far as the present selection of sites is concerned, it is doubtful if they can be said to operate. Any situntion that is central, and away from a noisy thoroughfare or low neighbourhood, mas be regarded relatively as a good one. The number of echool sites that fulfil these conditions form a large proportion, as eleven sites ouly are indifferent, and not more than tweuty-four below fair.

The school buildings, with twenly exceptions, rank from fair to good. The worst class were not originally built for school purposes, are either ill-constructed, too small, or held in or under churches. In almost every instance where a school is taught in a church, its interests are very imperfectly recoguzed. Tho schooiroom becomes crowded with church or Sunday-school furniture, and proper organization is thereby rendered innossible. The holding of schools in such buildings is no doubt contrary to the spirit and intention of the Public Schools Act, and we are strongly of opinion that the time has arrived when, after reasonable notice, the Certificates should be withdrawn from them. Some improvements have been offected in the matter of school-buildings during the year. Among these may be mentioned the opening of the new Schoolrooms nt Paddington, and the erection of an Infants' Schoolroom in connection with St. Philip's C.E. Considerable lukewarmness has been manifested by several Local Boards in furnishing playgrounds with proper outbuildings; and it is a noteworthy circumstance that in sehools where lavatories are most required, the groatest cifliculty is experieneed in getting the School Boards to supply them. The wants of the School, no matter how pressing, are in such cases subordinated to the claims of the Church. The most trifling expense is gradgel the School, even where the health of hundreds of children is concerned. In truth, it is not too much to say that in some quarters havatories are riewed as luxuries, and money so expended as little else than sheer extravagance. The same may be remarked of play-sheds, still unprovided in several schools; and yet no one will deny that in a climate like ours some protection is requircd from heat and min-that the health and personal comfort of children need to be stadicd in this respect. The playgrounds themselves are in general much too emall. Seven echools are without them, and thirteen other are rery little better circumstanced. Some inprovement has been made in the internal farniture of schools. Old cumbrous desks are gradually giving way to others more suitable to the requiremonts of modern teaching. In seven echools the furniture is still indifferent, whilst in twenty-two others it does not in quality and suitability exceed tolerable. All the schools are sufficiently found in books and apparatus, these being supplied yearly at the Council's expense. Fair care appears to be exercised by teachers in the keeping of the school records. In some instances, howerer, the Admission Register has been found to be incomplete in cortain particulars.

Moral character:-School attendance during the ycar has been marked by moro than ordinary irregularity. The subjoined tabular statemont will render this apparent:-
$\begin{aligned} & \text { Average attendance for the quarter ending March ........................... } \\ & \text { Averuge attendance for the quarter ending June........................ } \\ & 64.5\end{aligned}$
Average attendance for the quarter ending June..
Average attendavee for the quarter ending September
64. 6
Avcrage attendanco for the quarter ending December
69

To account for this irregular attendance is not ensy. It cnnnot be due to climatic canses, as the scasons have not been unfavourable to school attendance. Possibly the decline in the rate of wages, together with the limited demand for labour that has for some time existed in the metropolis, may have had momething to do with the matter. Certain it is that a larger number of ehildren than usual have been removed from school to work, while the numerous applications received for free education would seem to point to the cxistence of a good deal of poverty. Were these the only causes that operated to produce irregularity of attendance there would remain some ground for hope; but the fact cannot be concealed, that ignorance on the part of no inconsiderable portion of the community has not been without its influence in bringing about so unsatisfactory a result. A more widely educated public may in time tend to lessen the eril, but it is doubtful if more than a partial remedy will thus be provided. The only complete cure would appear to lie in a compulsory system of education. The leading educationists at Homo hare, after much experience and thought, come to this conclusion, and public opinion in England is beginning to point in the same direction. The following remarks of the Rev. G. Steele, Inspector of Schools under the Privy Corncil, published in his Report for 1870, are well wortly of consideration. "Mr. Fostcr, in one of his speeches last Scssion, said, "Attention being now strongly directed to the subject of education, it was his opinion that, next year, public feeling would be stimulated in favour of compudsory attendanco to an extent it never had beforc.' This anticipation has been already remarkably realized. Public opinion is cridently moving rapidly in the direction of gencral compulsion, althongh no School Board has yet had time to solve the dificult question how the compulsory powers may be best enforcod. That tho queetion will be solyed, and before very long, there seems no reason to doubt; and it will be extremely interesting to watch the proceedings of Boards in different places and circumstances. I have taken some pains to ascertain the fecling of some centres of population within this district (Lancashire), in order to illustrate the growth of opinion. The testimony which I subjoin is the more semarkable because it comes from Church of England managers, who are mainly cautious and conservative."

The number of pupils on the rolls of Tublic Schools at the time of inspection was 7377, and out of these, 5,974 , or 809 per cent, were present at examination. The number on the rolle of Denominational Schools was 9,570 , of which 7,100 , or 712 per cent, came uader exnmination. The corresponding percentages for 1870 were 35.8 and 78.9 respectively. The falling off in both instances is probably owing to the fact that during the present year no notice of intended inspections was given to schools. The average number on the rolls of Public Schools was 461; the average number on the rolls of Denominational Schools was 212.

The means taken to enforce a punctual attendance have been probably more vigorous and more systematic than any efforts made with the same object in former years; and it is satisfactory to find that in a majority of schools the pupils attend with commendable punctuality. That there are still scveral schools in which ample room for improvement exists in this feature of selool discipline will cause no surprise, when it is known that teachers are to be found who riew cren more important parts of school management as matters of little moment. The same persons lave but an imperfoct conception of the value of order iu gencral ; und their work is, therefore, one continued muddle. The one thingothey appear to do well is to create confusion, and they seem only to exist fully in an atmosphere of noise aud disorder. It rarely happens, however, that where $a$ habit of punctunlity is fostered, other features of school discipline do not receive due attention.

Better provision is required for securing to schoolrooms, playgrounds, and outbuildings, a proper degree of cleanliness. The same may be remarked of the maps, tablets, and other documents suspended on the walls of the schooiroom. These, in several instances, were found covered with dust. With regard to the means of enforcing cleanliness among the pupils, the want of lavatories in some schools has been already adverted to. In others, where lavatories have been provided, the examination of pupils for cleanliness is performed in a careless, superficial mamner. On the whole, it may be eaid that cleanliness is reasonably well attonded to by our teachers. No part of sehool discipline, however, has higher claims on the attention of a teacher than order, as without order it were vain to expect real effectire teaching. The teacher may never be so well informed, never so energetic, never so carnest, if ho does not recognizo the importance of order his best efforts must end in failure. As a busis for all sound teaching, it is necessary that a healthy moral tone perrade the school-that the pupils manifest habits of self-reliance, close attention, and implicit obedicnce. So impressed are we with the transcendant importance of this branch of school management, that we have given it the highest attention when examining and reporting on schools.

The introduction of military drill into our schools during the yenr cannot fail to raise the charecter of the order. Already the schools visited by the Drill Instructors begin to show a more cven and a more healthy discipline; and, as arrangements are in progress to extend the course of drill to as many schools as possible, substantial benefits may be expecter to result from the measure. Whilst providing so useful a physical training to the male pupils of our schools, the claims of the girls to like adrantages have not been overlooked. Full faciities have been afforded by tho Council whereby most of the female pupils attending our leading schools have been enabled to place themselves under a suitable courso of drill. The,
change
change produced in the appearance of many of the givls by the discipline has been of a gratifying character. Stooping has decreased, the girls are acquiring an improved carriage, the oxercises they are put through are conducive to heaith, and in these and other wnys thay are deriving lifelong benefits.

The one thing, however, that underlies and gives a tone to the whole discipline of a school is the govcranent. Whatever is defective in the order, whatever is amiss in other parts of echool discipline, is more or less traccable to the character of the government in force. This in almost all cases may nt present bo described ns mild. In only one instance were any symptoms of harshness discosered. Tho mumber, on the contrary, in which a want of firmness was apparent has been many. A disposition to pander to the whims and prejudices of parents, to deal with breaches of discipline in a timid, irresolute spirit, to sacrifice duty to expediency, is the common failing met with. For the government to be thoroughly offective, the tencher nust join firmness to mildness.

Instruction. The principles that regulate good classification are fairly understood. The clief of Annex D. these is, that the attaiments and cupacities of the pupils of each class shall be as uniform as possible. On tho inteligent and judicious application of this principle will depend much of the success of collective teaching. Instances have occurred-but they are comparatively few-in which a tendency to an umnecessary muitiplicity of classes has been manifested. Such a result is most commonly brought about from the teacher's desire to devote special atention to the noore backward papils, and thereby to render his instruction moro widely efficetive. That the neans udopted may enable him to achicve the first object is probable, but that it will tend to renlize the second is doubtful. The fact is, such minute classificution runs in the direction of individual teaching, which, in the case of a tolerably large sehool, can only mean the eacrifice of the good of the many to the interests of the few. Another phase of defectivo classification sometimos presents itsolf in an unduc preponderance of ehildren in the lower classes. Promotions aro not made at regulur intervals, lest the average proficiency of the classes be lowered and the school reccive a less favournble report than otherwise from the Inspector. Not less objectionable or wrong is the plan adopted in some cases of maintaining a uniform low classification with a riew to evade the application, of the highor standards at examination, and thereby gain credit for results apparently good but absolutely poor. To put the matler more pointerly, it is, to say the least, an evidence of defectire skill in a teacher whose school containing an averuge of ' 120 pupils, or upwards, and sustained by an infants' depariment, has no higher class than $a$ thirl.

Efforts more or less snccessful have been made in almost every school for the full and profitablo occupation of the pupils. The documents framed with this object consist of a Time-table and a Programme of Lessons. With few excoptions, the Timo-tables are arranged with tolerable judgment, and appear to be fuithfuily acted upon. A large number bear cridenec of care and skill in their compilation. A few fail to provide for a proper alternation of oral and sileut lessoms, and in a few others, a judicious distribution of time to the various subjects is not secured. The ohject of the Programmo is to induco regular and progressive instruction. In this document, the portion of each subject to be tanglat during cach week of the quarter should be clearly outlined. Thee several headings will thus assimilato in form to the notes of a lesson, or, nearer still, to an ordinary index. The defects that commonly characterize Programmes are, a want of explicitness of statement, and a want of judguent in the amount of work set down.

Tho Lesson Register is intended to contain a record of the lessons actually given. If properly kept, it should form $u$ enfo basis whercon to conduct the examination of a school. Seremal of those inspected were in arrears, and thus afforded ground to suspect the reliableness of the information they contained.

The opportunities aflorded us for observing and estimatiug the methods in use have not been so full or so satisfactory as we could have desixed; judging, however, from what we have seen, and from the character of the results produced, wo believe them to bo of fair avernge merit. The teaching for the most part is unarked by lucid explanation, appropriate illustration, and intelligent questioning. At the same time, it is proper to state that in n large number of instances the methods, although fairly suitable in

- themselres, are only very partially effective. This result is partly due to $a$ want of skill in their applicalion, but chicfly to the existence of defective discipline. Unless a teacher is able to command the attontion of the pupils, his best efforts at teaching must be more or less profitless. One of the best informed teachers we have met with, who could discourse philosophically on method, and who evidenced meommon ability in preparing and arranging the matter of his lessons, invariably failed to mako his tcaching effectivo because he lacked the power to sistain for any length of time the attention of lis pupils. He had con sidemble cuergy of character, but little real earnestness or enthusiasm; his government was feeble and racillating, and he exercised no permanent influence over the sympathies or affections of his scholars.

Tho adoption of approred methods in the teaching of elementary reading procceds slowly. Tho annox e. old alphabetic method still holds its grouud in several schools. One reason for this is, that no matter what advanco young children may be making in a knowledge of the sounds of the letters, unless they show an equal nequaintance with their names, the parents express disatisfuction at the seemingly slow progress being made. The result has been that some teachers have not been proof against this hind of popular prejudice. They lave allowed themselves to bo dictated to against their judgment, without making an effort to remove from the minds of parents such groundless objections. Notwithstanding, some improrement is observable in the methods employed, as well as in the results produced. The most marked success has been achieved in those schools, principully infants' schools, in wlich the syllabic method hus been unreservedly sdopted, and where, in the application of this method, a fudicious use has been made of the blackboarcl. The mode of teaching pursued in sueh cases may briefly be deseribed thus:-The teacher commences by inparting a knowledge of the sound of $a$ as in bat, snd the pupits are required in all cases to distinguish that letter by the sound. The sound of $b$ is similarly treated, and so with the sound of the other letters. Easy combinations of sounds are next taught, being built up, so to spenk, on the blackboard. The adwatages of this plan are obvious. One sound is presented to the child's mind at a time. The attention thus becomes concentrated on the character representing that sound, and the memory readily retains it. The process of combining these sounds enables the child to feel his own power, to recognize new sounds himself, and thus to conquer difficultics without the teacher's aid. 'libe interest too evoked by this method is not, its least meritorious fanture.

Whe claracteristic defect of the more advanced reading is a want of distinctness. This proceeds from a rapidity of utternnce, which in too many cases is confounded with flueucy. The only way to teach a good style of reading is to insist on a slow, clear, nud loud enunciation. Correctness of pronunciation of the vowel sounds is rarely sufficiently attended to, aud. intelligent expressive reading is by no means common. On the other hand, fair attention is devoted to the explanation of the more difficult words occurring in the lessons, and the pupils appear in most casce to hare an iutelligent conception of the meaning of the passages rend.

A varicty of causes conspire to render the teaching of the clements of writing unsatisfactory. Foremost among these may be mentioued the want of sufficient desk aceommodation. In a large uumber of schools 110 desks are provided for the rounger children : the states are held against the chest or on the luces, and the pupils thus early contract habits that seriously militate against their future progress. Then ugain it is to be noted, that in several instances, the materiuls supplied to these ehildren to enable them to learn to writo are wholly unsuitable. The slates are frequently unruled, cracked, or broken, and the percils mere atmmps. The supervision, too, exercised hy the teacher is next to worthless. The pupils are left to themselves; crrors, both in the mode of holding the pen and in the manner of forming the letters, are passed umoticed; little assistance is giren, either verbally or otherwise; and the result of ath this is that littie real progress is made. The more advanced writing is taught with rather better success. But eren here there is room for improvement in tho methods employed. 'The mistake commonly mado is to regard writing as a purely mechanical exerciso-as an excrcise which the pupils can perform with the
emallest possible assistance from the teacher. It is not considered that the mechanical nature of the subject, renders it the more necessary that the teacher should endeavour to create in the minds of the pupils an interest to become proficients in it, or that they should be taught to regard the writing lessson as a pleasing exercise rather than as a wearisome, meaningless task. The following mode of conducting the writing lesson is adopted in several schools with the very best results:-A cony is carefully set on tho blackboard, usually on some geographical subject. The pupils are allowed to write three or four lines; the teacher then examines each child's cony, and points out the various defects as he passes round the class. the teacher then cyamines each childs cony, and points out the various defects as he phsses round the class.
He notes the errors most conamonly committed, imitates them on the board, and shows how they are to He notes the errors most commonly committed, imitates them on the board, and shows how they are to
be aroided in future. The pupils are then allowed to write threc or four lines more, after which the books are finally examined and each cliild's writing carefully estimated in coloured pencil by the teacher. $13 y$ this method it usually happeus that three or more different copies are written on the onc page; the pupils are prevented from falling into carcless slovenly habits, and soon learn to value quality rather than quantity.

Very general attention is devoted to the teaching of spelling by means of dictation. This is as it should be. Dictation is not, however, intended to supersede entirely the practice of oral spelling. It is important that the pupils be regularly exercised in the spelling of the more diffeult worls occurring in the reading lessons, and that due encouragement be given to induce them to learn to spell well. With regnrd to the lessons, and that due encouragement be given to induce them to learn to spell well. With regnrd to the
dictation lessons, it is observed that proper precautions are not ulways taken to onsure the detection of the dictation lessons, it is observed that proper precautions are not ulwajs taken to cnsure the detection of the
mispelt words, the pupils in such cases being alowed to revise cach other's work. This is a mistake. misspelt words, the pupils in such cases being allower to revise cach other's work.
The ralue of a dictation lesson will depend in a great measure on the amount of persinal care and attention which the teacher is able to bestow on the examination of each child's work. It is absolutely necessary that he look over every slate, see that all the errors are marked, and that all such orrors aro ultimately corrected. To this and he should write the correct epelling of all the misepelt words on the blackboarl, require the pupils to copy them on their slates, and commit them to memory.

Dietation on paper is becoming more general. In several schools dictation books are naed by the upper classes, and form in most instances tolerably reliable criterin of the ability of the pupils to spell. The mriting in some of these books is of a peinstaking character; in the larger number, however, it is carelcssly done.

An improrement is observable in the mothods of teaching ciementary arithmetic. Fuller and mors lucid explanation of each rule is giren, and a larger number of examples worked on the blackboard. On the other hand, the pupils are adranced from one rule to another too rapidy; are not sufficiently practised in the back rules, and are permitted to fritter away a good denl of timo in profitless work. It not unfrequently lappens that a teacher will set a half-dozen or more questions at once, with instructions to the class to work as many of these us they can. The ordinary result is, that after the time allowed for the lesson has expired, a few of the moro intelligent and more advanced pupils will be found to have worked most of the questions, whilst the bulk of the class will have done corparatively nothing. To these latter the lesson will have proved little else than a more waste of time. The better plan would be to set but ono question at a time, to allow the class a reasonable interval to work it in, then to entl the pupits to the position of attention, and to solre the question with their aid on the bourd. Another question should then be given, and the same course followed. By this method the dull and backward children will receive ample oral explanation; all will be likely to profit from any artifices the tcacher may use in manipulating numbers; the whole time of the class will be usefully occupied, and iheir attention and interest greatly sustained.

In the higher arithmetic the results are not at ail satisfactory. This arises in a great mensure from the rery general misuse made of text-books. Some of these are without doubt excellent treatises, but were never intended to usurp the place of the living teacher. That they do so at present is evident on rarions grounds. A teacher who uscs a text-book is commonly fom to follow the order of the rules observed by the author, to adopt closely the language he employs, and to use only those questions contained in his book. The consequence is, that when questions of a prictical nature, no matter how simple, aro proposed, the pupils are unable to grapple with them; indeed, a mere change in the wording of a question will be frequently found to puzzle them. The form in which the questions are put thus becomes a matter of the utmost importance. Knowing this, we have, whilst taking care that the questions should be sufficient $\xi_{y}$ simple, varied the fornas as much as possible, our object being to ascertain whether the pupils had been intelligently taught and possessed the power to think.

Grammar is admittedly a difficult subject to tench successfully to children. Dealing as it does for the most part with abstract relations, it can be only profitably introduced at a tolerably late stage of the child's mental growth, and requires muel tact and skill in tha handling. It is not judicious to present more than a little at a tine ; ideas should be given before definitions, and ench part of the subject made clear by practical and nppropriate illustrations. It cannot be said that this method is generally pursued. In many schools the pupils, while exhibiting an intimate acqunintance with the definitions, are unable to distinguish an adjective from a verb, and have really no inteligent notions on the subject. Their minds are filled with a number of names to which no corresponding idens are attached. The teaching in such cases is of the most superficial charncter, and fails to cultivate the thinking powers. In the majority of schoola more ratioual methods are adopted, in about eighteen the elements of grammar are taught with marked कbill and effect. With respect to elementary parsing, some improvement is disccrnible in the mode of treatment. Fair uniformity is maintained in the terms employed, and the relations of words are dealt with for the most part from an intellectual stand-point. The practical application of such teaching to language and composition nceds greater extension. Sufficient attention is not deroted to securing correctness of speaking, and the attempts at composition usunly witnessed are poor and crude in character. The importance of this last subject indeed is all but overlooked. We should bo glad to see a more general aid systematic cffort made to teach the pupils of our higher classes to express themselves in simple and intelligent Engligh. and to foster in them an apprecintive regurd for models of good writing. The menns to secure this result lie close at hand, and are capable of ready application. Selections from standard authors might be regularly read to the pupils, the beauties and peculiarities of the more striking expressions pointed out, and the pupils required to reproduce the pastages read from memory. Short essays too might be required from them on the more important subjects treated of in the lessons. Such efforts at composition, if intelligently criticized by the tearher, could not fail to improve the character of tho education giren in our schools. "Verbositr and slorenliness of expression, cloudiness of meaning, and improprietics of diction, would soon give way to a sinple, terse, and vigorous siyle of writing. Intimately connected with composition is amalrsis of seitences. Our cxaminations have diselosed a slight improvement in the teaching of this branch, but the absolute results produced therein are not great. In most of the leading echools we pupils eviaced an intimate nequaintance with thestructure of involved sentences, and discriminated urith considerable niefty belween the various reiationships existing between their component parts. Some advance too has been made in verbal and writion paraphirasing. Owing partlr, howerer, to the low classification that, obtains in the qreater number of schools, and partiy to a want of skill in the teachers, the answering in malysis was of a limited aud partial nature.

The remarks made in last year's report relative to the defective methods of teuching elementary georraphy still apply. Not onlr is the subject in many cases not taught in the order prescribed in tho standard of proficiency, but little effort is made to invest the lessons with any degree of interest. Ithsirations ure seldom giren, and the teaching is usuall enveloped in a cloud of words. The rosult is that rery little is added to the elitdren's knowledge, and the subject is all but ineffectivo as a means of mental culture. Instances ocenr in which a class of pupils will repent from memory all the leading definitions, and betray at the same time an utter ignorance of the real nature of the physical features so definet. Ther will tell you with great fuency what on isthmus is, and yot demonstrate beyond a doubt in
their
their answering that they possess no intelligible idea on the subject. It is much to be feared that the map is not sufficiently appenled to, and that the value of picturcs generally, in conreying rivid and lasting impressions to the minds of the young, is but partially recognized.

In the more adranced geography the enswering is marred by trite generalities and poverty of information. It is seldom that a class cxhibits a thorough nequaintance with the detailed geography of a country; their knowledge does not extend beyond a few of the leading extornal features, and it is not of a character to prove of much permanent value. The cause of this would seem to lio in the fact that a good number of teachers do not prepare their lessons. They are too much disposed to trust to chance information they mary pick up from maps, and their lessons nre as a consequence marked by discureirencss, much useless matter, and an absence of an intelligent purpose. On the other hand, several schools could be instanced in which the pupils evinced so minute and acourate a knowledge of the geography they had been taught ns was absolutely surprising. Physical geography requires to be more generally trught to the higher clusses: it is the basis of all other geography, is peculiarly fitted to derelop and strengthen the reasoning powers, and is a most valuable branch of knowledge. Outline map drawing might also usefully receive greater attention. As an exercise, not only does it tend to fix with accuracy the relative positions of places on the mind, but it assists to give a reality and a form to what otherwise is likely to appear rague and indistinet.

Object lessons continue to command very general attention. There is nothing nerr to record in their mode of treatment. The more striking dofects that mark the teaching of the subject are, a want of invention, and a tendency to give undue prominence to unimportunt detaile. The methods are altogether too mechanical. It is seldom that the true aim of object lessons is thoroughly understood; they are more frequently regaried as a means of conveying mere information, rather than as a means of cultivating the mental faculties. The subjects usually selected for such lessons vary little in most echools, and aro repented quarter after quarter till they cease to possess any great interest for the pupils. Many of these subjects are singularly imppropriate, are chosen chiefly from an fow well known text books, and are subjects are singulary imppropriate, are chosen chiefly from an few wem nown text book, and are presented to the children with au undeviating uniformity. A. few schools might be cited in which object
lessons are taught with considerable intelligence and effeet, where judgment is shown in the choico of subjects, industry in collecting and arranging the best information respecting them, and skill in tho methods by which they are tnught to the pupils. Our examinutions in this subject disclose fuirly satisfiactory results.

Singing is beginning to be viewed with an increased degree of importnace. The schools in which it is not taught from note are becoming less in number, and in these its value as a branch of elcmontary instruction is protty generally recognized. The tonic-sol-fa method is almost univereally adopted, eren in the case of tho more adranced pupils. Whist fully sensible of the merits of this method, we cannot but regard it as a great mistako to permit children to finish their sehool education without first receiving some instruction in vocal music according to the established notation. Tho results disclosed by our examinations in the theory of singing, although an improvement on those of prorious yenrs, are still unsatisfactory. Children are hurried too rapidiy into part-singing, and the result is, that several schools in which tho singing is of a pleasing kind, betray a very poor acquaintance with the theory.

Except in one or two instances, the singing of our infants' schools is very unsatisfactory. Little if any cflort is made to introduce new tunes, und nany of those in use are wholly unsuitable. An Infants' School Manusl of Songs is urgently needed.

In a tolerable number of schoole, the results produced in drawing are satisfactory; in many the subject is not regurded with sufficient importance, and the teaching thereof is desultory and iveffective; in others, drawing is made to give way to other brauches. The fanits observable in the methods of teaching the subject are those adverted to in former reports. It is siill the case that teachers do not attend sufficiently to detnils. ' The pupils are allowed to draw in improper positions, are not always furnished with suitable muterials, and the teacher's supervision is frequently lax and of little value.

Tho Scripture Lessons published by the Commissioners of National Education in Ireland are in use in nil Public Schools. These are used by all classes abore the second. In general, the answering in Scripturo is of $a$ satisfactory kind.

In the tenching of needlework there is great room ior improvement. It is seldom that we witness a fair show of work, or evidence suficient to prove that the subject receives fair attention. There is a tendency to give undue prominence to fancy work, to undervalue the ioportance of plain sewing, and to carry on the instruction in this essential of a girl's ciducation in a desultory and unmethodic manner. In about ono-third of the schools, the results in meedlework rank from fair to good; in the remaining two-thirds they range from indifferent to tolerable.

Teachers.-The teachers of the district are a very respectable body of porsons. All have been trained for their office. With ferr exceptions, they are diligent and attentive in the discharge of their duties. A desire for eelf-improvement is manifest among many of them; nerertheless a falling off is observable in the number offering theuselves for examination. The total number employed in the schools of the district is $16 \overline{5}$. Of these, 62 are appointed to Public Schools, and 103 to Denominational. Tho subjoined table exhibits their classification :-

| Employed in | First Class. |  | Second Clars. |  | Third Class. |  |  | $\begin{aligned} & \text { Not } \\ & \text { classifled. } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Totals | 3 | 8 | 20 | 29 | 51 | 29 | 19 | 13 |

Pupil-teachers. The employment of pupil-teachers is on importnnt feature in connection with the schonl system of the Colony. As nany as 1.40 are at present employed in this district. The number of applicunts for the oflice is far in excess of oxisting requirements. The consequence is, that many of those who successfully pass the preseribed examination, lanve to wait long periods before racancies can be found for them. Every precaution is taken to sec that none are selected for the office but those who erince aptitude for teaching, and whose other qualifications are of the right kind. Those actually employed in the schools are reported as well conducted, studious, and diligent in the perfornance of their duties. The work of ali will benr farourable inspection; that of many would do eredit to trained nnd experienced teachers. A large number have passed through the Traiuing S̄chool, and are filling, with credit, tho positions of Assistants and Teachera in various parts of the Colony.

The time is fast approaching when the Training School will be supplied by successful pupil teachers nlone. Eren now all racancies in the ofices of Mistress and of principal female nssistant can be met from this eource. There is really, therefore, litile demand for the services of young females who bare not
pasted through a preliminary training as pupitteachors. The foilowing table is "intended to ouxtibitit tho classification of the pupil.tachers at present employed :-

| Employed in- | First Class. | Second Class. | Third Class. | Fourth Class. |

Local Supervision
The character of the local supervision of schools remains uualtered. In few instances do all the members of a Local Board exhibit an active and an intelligent interest in the welfare of the school with which they are connected. The ordinary state of things is, that one member has practically to do tho work of the entire Board. Thero really seems no cure for this, under existing arrangements.

## Sumary.

The results of the yoar's inspection may be briefly summarized thus:-The material condition of schools continues to improve, the discipline is healthy, and the attainments of the pupils are an advance on those giron in last year's report.
$\left.\begin{array}{l}\text { EDWIN JOHNSON, } \\ \text { JAMES W. ALJPASS, }\end{array}\right\}$ Inspectors.
Inspector's Office, Fort-streot,
25 January, 1872.

## ANNEX F .

Detaried Statement of the Condition of Public Schools in the Sydney Distriet, risited during the year 1871.
The remarks under head i relate to the condition of schools;
2 to their moral churacter;
3 to the subjects and methods of instruction;
4 to the proficiency of the pupils.
s. 9 th and loth May.

Baracarn :-Visited, 9th and 10th May. $\quad$; total, 260
Numbers present at examination :-Boys, 1 万̄5 ; girls, 105 ; total, 260.

1. The school building and out-houses are in very fair repair; the fences, although damaged in places, are in tolcrably serviceable condition; and the furniture is in a good state of preserration. 2. The attendance is on the increase, and is marked by commendable regularity. The pupils are punctual, clean, and in very good order. 3. The instruction includes all the prescribed subjects, and is regulated by the usual documents. The methods are modern, and applicd with diligence and earnestness. 4. The average proficieney is very fair. Whe pupils answer with spirit and intelligence.

Balmaln (Infants) :-Visited, 9th May.
Numbers present:--Boys, 112 ; girls, 80 ; total, 192.

1. The schoolroom is well arranged, and effectively lighted and ventilated, but, for the number of papils in attendance it should be twico its present size. 2. The children are properly classified, and the discipline cffects a healthy tone in all the classes. 3. The course of instruction embraces all the subjects preseribed for infants' schools, and the teaching displays intelligent tact. 4. The results range from moderate to tolerable in the lower division of the school, and in the middle and upper, from fair to good.

> Botany Road :--Visited, Ist June.
> Numbers present:-Boys, 93 ; girls, 53 ; total, 146.

1. The building is in tolerable condition, but it is much too small, and the playground is in all respects very unsuitable. 2. The pupils are properly classified, and the screral details of the organization are correct. The discipline effects a healthy tone in the school. 3. The prescribed subjects are taught with carncstness and intelligent method. 4. The proficiency ranges from fair to very fair.

Bourhe-street : - Fisited, 7 th and 8th Junc.
Numbers present:--Boys, 149 ; girls, 90 ; total, 239.

1. The playgrounds are so small as hardly to deserve the name, and the out-honses lie unpleasnntly close to the schoolroom. With these exceptions, the material condition of the echool is reasonably good. The organization is in the main passable. 2. The attendance is numerous, but somewhat irregularly maintained. The pupils are fairly punctual and tolerably clean. The order is unsatisfactory. 3. Speaking gencrally, the classification is judicious, the instruction is tolerably well regulated, the methods are suitable for the most part, but need to be applied with increased skill and effect. 4. The average proficiency ranges between moderatc and tolerable.

Botrer.

## Bourke-street (Imfints):-Visited, 7th Jume.

 Numbers present:-Boys, 64 ; girls, 52 ; total, 116.1. The room in which this department is taught is much too small for the attendance, but in other respects the material condition of the school is satisfactory. 2. The pupils are correctly classificd, their instruction is judiciously regulated, and the discipline has satisfactory influences. 3. The teaching is lively, methodical, and very fairly effective. 4. The proficiency ranges from fair to very fair.

Campsrmown:-Visited, and June.
Numbers present:-13nys, 79 ; girls, 50 ; total, 129.

1. This sehool is undergoing estensire repairs; when they are completed the materinl defects pointed out nt former inspections will no longer exist. The school is reasonably well organized under the circumstunces. 2. The attendanco has slightly inproved, and is still on the increase. The pupils are fairly regular, but somewhat unpunctual. The order is unsetisfactory. 3. Passable judgment is exhibited in the classification of the pupils and in the arrangement of the lesson documents. The methods are approprinte, and applied with zeal, industry, and a fair degree of skill. 4. Tho avorage proficiency of the clasees approaches fair.

Cleveland-street (Boys):-Visited, 13th, 14th, 15th, 16th, and 17th June.
Numbers present, 463.

1. The schoolroom is cxceedingly limited for the present attendance. 2. The order and discipline continue excellent. 3. The instruction is well arranged und well reguiated. The methods are skilful and cffective. 4. The average proficiency is good.
2. This dopartment, in matcrial matters, is in an efficient state. 2. The organization is correct, the discipline effects excellent order and a healthy mental tone in the several classes. 3. All the prescribed subjects are effectively taught; the needlework is very good, and does credit to the teachers. 4. The proficiency ranges from fair to very fair in the 1st and 2nd classes; and in the 3rd and 4th from good to very good.

$$
\begin{gathered}
\text { Cleveland-strief (Infunts) :- }- \text { isited, 13th, } 14 \text { th, and } 15 \text { th June. } \\
\text { Numbers present:-Boys, 244; girls, } 135 \text {; total, } 379 .
\end{gathered}
$$

1. The schoolroom is lofty, spacious, and well appointed. The crowded state of the room indicates the necessity for a class-room. 2. The pupils are properly classified and effectively disciplined. 3. The usual subjects are taught, the mothods being calculated to encourage thoughtful habits in the pupils. 4. The proficiency ranges from fair to good.

$$
\text { Fort-strebr (Boys) :-Visited, 19th to } 27 \text { th April, and 1.st and 2nd May. }
$$ Numbers present:-Boys, 650.

1. The material condition of this school is very good, and, beyond a larger area for the rocreation of the pupils, little need be desired. 2. A correct and cffective organization obtains. The employment of the pupils evidences marked care. The discipline is thoroughly healthy, the pupils being orderly, obedient, and self-reliant to a very fair degree when under test. 3. The standard of instruction is higher than is exhibited in Primary Schools generally. Much of this is effected by the enlargement of the programme of subjects for the lower classes thus:-Analysis of sentences is commenced in the second class, and Geometry and Latin in the third. Such a plan enables the fourth and fifth classes to meet a high standurd of test. 4. The proficiency of the pupils ranges from very fair to very good.

$$
\text { Fort-straet (Girls) :-Visited, 18th to } 25 \text { th } \Delta_{\text {pril. }}
$$

## Numbers present:-508.

1. The organization of the school continues to be as satisfuctory as the circumstances will permit. 2. The attendance is large, und marked by reasonable regularity; in other respects the discipline is in a healthy state. 3. Appropriate methods are used, and the teaching is carried on with earnctncss and vigour. 4. The proficiency runks from fuir to good; the general tono of the school is healthy, and its condition evidences progressive improvement.

## Fort-5treet (Infants) :-Visited, 26 th to 20 th $A$ pril. <br> Numbers present:-Boys, 248; girls, 177; total, 425.

1. The light of the babies' room is defective, and the accommodation insufficient; the exterior of the buidding is in disrepair, and presents a dilapidated nppearance; the building occupied by the senior infants is in good condition. 2. The nttendance is larger than at any former period; the pupils are cleanly and neatly attired, and fairly punctual and regular; fair order is maintained in the baby and senior infants' departments, and good in the junior infauts' school. 3. All cssential subjects are taught; the methods are suitable, and marked with zeal nud painstaking in their application. 4. The attainments in the departments may be described thus :-Babies, fair ; junior infants, good; senior infants, fair.

Glebs :-Visited, 6th June.
Numbers present:-Boys, 70; girls, 44; total, 114.

1. The school buildings and fences have been placed in a good state of repair since last inspection. The school is well organized. 2. There is a slight falling off' in the attendnnce, of a temporary character. The pupils attend with rensomable regularity: very few are unpunctunl, and every care appears to be devoted to their personal cleanliness. Good order is maintained, and the noral tonc of the school is healthy. 3. A judicious clessification obtrins ; the instructional documents are calculated to ensure the desired ends. The methods are modern, and applied with zeal and energy. 4. The arcrage proficiency is silightly above fair.

## Gliebe (Infants) :-Visited, 6th June

Numbers present:-1Ooys, 41; girls, 26; total, 67.

1. The infants are tanght in the primary schoolroom, from which a portion is divided off by a baize screen. This, from the character of the teaching necessary for infants, is a rery undesirable arrangement; and a separate room should, in justice to both departments of the school, be provided for the infants. 2. The classification is correct, and the routine fairly effective. 3. The children are neat, and fairly orderly. 4. The attainments are fuir.

Jamieson-street :- Fisited, 2nd Junc.

$$
\text { Numbers present:-Boys, } 42 \text {; girls, } 28 \text {; total, } 70 .
$$

1. The sehoolhoase is in fair repair, the ground is properly enclosed, and separate closets have been provided. The furniture and working appliances fairly meet the requirements. 2. The organization is ver defective, and the discipline bad. 3. To an extent the teaching is methodical, but it is nevertheless iniffective. 4. The results are indifferent. The teacher has since been removed.

## Newtown :-Visited, 12th July.

$$
\text { Numbers present:-Boys, } 77 \text {; girls, } 51 \text {; total, } 122 .
$$

1. The playground is of little use, owing to its smallness; with this exception, the materina state of the school is sitisfactory. 2. The attendance is small for the neighbourhood, but there is no noticeable falling off in the numbers. The pupils are tolerably punctual, and with fers exceptious cleat. They are disposed to be talkative and noisy, and in other respects the order is defectire. 3. Fair judgment is evinced in the classification; the instruction is regulated by the usual documents; the methods are for the most part appropriate, and applied with tolerable intelligence and skill. 4. The average proficiency is tolerable.

Newtown (Infants):- Visited, 12th July.
Numbers present:-Bors, 28 ; girls, 28 ; total, 56

1. The room is fairly suitable, and its appointments are satisfactory. 2. The children are properly classified, and the discipline effects very fair order. 3. The instruction, which is of the kind usual in infants' schools, is imparted with fair method. 4. The proficiency ranges from fair to rery fair-

> Paddington (Boys):-Visited, $17 t \mathrm{th}, 18 \mathrm{th}$, 19th July.
> Numbers present :-161.

1. The premises are excellent in character, and the appliances are ample. 2. The organization is intelligent in its intentions, exhibiting a correct classification of the pupils and proper provisions for their instruction. The discipline effects order of a technical character, but it has to cvoke a more satisfactory amount of mental effort in the classes cre it can be termed good. 3. The course of instruction embraces what is prescribed for a school of four classes; the teaching is intelligent and methodical. 4. The proficiency is fair.

> Paddivgron (Girls) :-Visited, 17th, 18th July.

Numbers presont :-126.

1. The material state of the school is good, and its organization satisfactory. 2. The attendance is on the increase, and is marked by fair regularity. The pupils are pumetual and clenn. The order is susceptible of improvement. The pupils are fidgety and talkative, and do not yield a prompt and complete obedience. 3. The course of instruction comprises all the preseribed subjects, and is regulated with fair judgment. The methods are appropriate, but require to be applied with greater animation and vigour. 4. The avcrage proficiency is fair.

> Padpineton (Infants) :-Visited, 19th July. Numbers prosent:--Boys, 73 ; girls, 58 ; total, 131.

1. The echool is hardly large enough to mect existing requirements, but is otherwise airy, welllighted, and suitably constructed. It is well found in educational appliances. 2. The attendance is good under the circumstances. The pupils are clean, chcerful, and in fair order. With few exceptions, they aro reasonably punctual and regular. 3. All the subjects usually included in the Infant School Course are taught. The instruction is judiciously arranged, and bused on appropriate methods. 4. The arerage proficiency is very fair. Reading is taught, with more than ordinary success, and every subject appears to receive due importance.

Pitt-Street:-Visited, 13th July.
Numbers present:-Boys, 28; girls, 18; total, 46.

1. There is no playground ; the desks are old and unsuitable, otherwise the material condition of . the school is satisfactory, 2 . There is a falling off in the attendance, which is not easily accounted for, The pupils are punctual, clean, and orderly; the prerailing spirit of the school is pleasing. 3. The pupils are intelligently classified; the instruction is properly regulated; the methods are modern, and applicd with a fair degree of skill. 4. The arerage proficiency is fair.

## Pitr-staver (Infants):-Fisited, 14th July.

Numbers present:-Bojs, 28; girls, 26 ; total, 54.

1. This department is taught on a gallery, which is curtained off from the room in which the primary clases are taught, but no other arrangement can be made at present. 2. The organization is correct, and the disciplinc induces fair order. 3. The subjepts prescribed for Infants' Schools are taught, but the teaching insufficiently affects the mental tone of the classes for good. 4. The proficiency of the pupils is tolerable.

Putt-sirreer, South :-Visited, 1 st August.
Numbers present:-Boys, 30 ; girls, 13 ; total, 43.

1. The schoolroom is of suitable character, and its appliances are sufficient and good. 2. The pupils arc classified with fair judgnent, and their instruction is judiciously regulated; the discipline is fairly satisfactory, the pupils being reasonably punctual in attendance sud, on the whole, orderly. 3. The course of instruction includes the subjects prescribed for a sehool of three classes; the teaching evidences care and fair method. 4. Tho proficiency ranges from fair to very fair.

> Prry-stridt, South (Infants) $:-$ Visited, 1 st August.
> Numbers present:-Boys, 25 : girls, 25 ; total, 50.

1. The school is fairly suitable, and has a tolcrable supply of furniture, but of a very inferior description ; the character of the apparatus is no better. 2. A modernte attendance is maintained ; the pupilsure tolcrably punctual; in most other respects the discipline is unsatisfactory; the pupils are talkative, noisy, and inatientive; the govermment is feeble and jneffective. 3. The instruction enbraces the usual subjects, but is poorly regulated; the methode are not applied with sufficient carnestness or zeal. 4. The avcrago proficiency is moderate.

> Pyrmont :-Fisited, 2nd August.

Numbers present:-Bors, 93 ; girls, $5 \mathbf{5}$; total, 148

1. The seloolhouse is altogether too small, and is not centrically situated. The playground is very limited in extent, rery uneven, and unfenced. The water-closets are exposed to public vier, and are otherwise objectionably arranged; they require emptying. 2. In the face of many obstacles, a good attendance is kept up. The pupils are punctual, but slightly irregular ; they are in very fair order. The government is firm and effective. 3. Fair judgment is shown in the classification, the instruction is well regulated, the methods are appropriate, and applied with zeal and energy. 4. The average proficiency lies between fair und yery fuir.

Prrmont (Infants):-Visited, 2nd August.
Numbers present:-Bo5s, 50 ; girls, 55 ; total, 105.

1. The room in which these children are taught is much too small, and is also of very sombre aspect, but there is no remedy. for the defects at present. 2. The pupils are properly classified, and the organization agrees with modern Infants' School plans. The general behaviour of the children is pleasing but the mental effort evinced by them is far from being satisfactory. 3. The prescribed subjects are taught; in the upper division of the school the methods are of fuir charactor, in the lower they are but moderate. 4. The proficiency arerages tolerable.
$\qquad$
SUssex-stbeet :-Visited, 24th November.
Numbers present:-Boys, 31; girls, 21 ; total, 52.
2. A standing deffet in connection with this school is the want of a playground; a second watercloset is also a pressing necessity; otherwise the schoolroom is commodious, fairly supplied with appuratus, and with furniture sufficient for existing wants. 2. The attendance is small, but this is no doubt due to causes beyond the control of the teacher. The pupils are cxtromely irregular, but reasonably pmetual and clean. Fair order is maintaincd. 3. Suitable methods are in usc, and the application is marked by zeal and painstaking. 4. The proficiency is barely tolerable. Considering that the pupiln are for the nost part very young, and that tho school has been but a short time in operation, the results may be regarded as satisfactory.

Watsox's Bay :- Tisited, 3rd August.
Numbers present:-Boys, 30 ; girls, 14 ; total, 44.

1. The echool building, which was formerly the pilot station, is fairls suited to its uses, and the site is both pleasant and healthy. The furniture is inferior, inadoquate, nud badly arranged. 2. The orgmization is unskillul, the discipline secures cleanliness and fair order, but it is marred by the promptthe ordinary subjects. 4. The proficie. ary the ordinary subjects. 4. The proficiency ranges from moderate to tolerable.

\end{gathered}
$$

1. Recent improvements have been made in the premises, thed they may be reported as being in a antisfactory state. 2. The classification is correct, and the discipline is jealhy and promising. 3. The subjects prescribed for a school of four classes are taught with intelligent method. 4. In the sevaral classes the results of the examination wore : first and fourth classes, tolerable; second, fair ; third, very
fair. The arerage resulta are fair.

Willian-strbet (Girls) :-Visited, 26th, 27th, 28th July.
Numbers present :-289.

1. Except that a clonk room has not yet been provided, the matorial defects adverted to in last year's report have been remedied. The school is well organized. 2. The attendance is large under the circumstauces, and is marked by reasonable regularity. The pupils are clean, junctual, and in satisfaetory order. The moral tone is good. 3. The instruction is carried on with considerable energy, and exceptas regards the teaching of arithmetic, the methods are approprinte and effective. 4. The average proexceptas regnrds the teaching of arithmetic, the methots are approprite and effechive. 4. The averago pro-
ficiency is very fair. The pupils are very attentive, evince great mental effort and considerable intelligence

## Willian-streiet (Infants):-Visited, 24th, 25th July.

Numbers prescat:-Boys, 207; girls, 147; total, 354.

1. The schoolrooms are not large enongh for existing wants ; desk room is notably insufficient, and additional hat-pegs are necessary. Improvements have been effected in the drainnge of the plapt, and sined last ingepection. 2. The pupils are not suffeciently orderly on the lines, and greater vigilance and tact need to be exercised by the teachers in repressing restlessness and like symptoms of disorder. 3. Appropriate subjects are taught; the instruction is fairly regulated ; the methods are reasonably effective in the gallery lessons, but faulty in the teaching of reading and number. 4. The average ;proficicncy is a litte above fair.

## APPENDIX I

Riceipts and Disnorsbments of the Council of Education, from 1st January to 31st December, 1871.

JOHN M. GIBSON,
Accountant.

## NEW SOUTH WALES.

## REPORT

of the

# COUNCIL OF EDUCATION 

UPON THE CONDITION
of the

CERTIFIED DENOMINATIONAL SCHOOLS

FOR

## 1871.

SIdNEY: thomas richards, Goferfment printer.
$638$

To His Excellency Sir Alfred Stepien, Knight, a Companion of the Most Honorable Order of the Bath, Chief Justice, and Administrator of the Government of the Colony of New South Wales.

May tr pleasi your Excelieency,-
We, the Council of Education, have the honor to submit to your Excellency this our Report upon the Certified Denominational Schools of the Colony, for the year 1871, in conformity with the provisions of the Public Schools Act, section 27.

During the yoar, there were in operation 223 Certified Denominational Schools, being seventeen less Appendix A. than in 1.870 . Besides the Schools mentioned in our last Report, from which Certificates were withdrawn in 1.870, the following changes were effected:-

Kelso, C.E. Converted into a Public School.
Lane Cove, Wes. do. do.
North Richmond, C.E. Closed on opening of Public School.
Kiama, C.E. Do. do.
Windsor, Pres. Do. do.
Marulan, C.E. Closed. Premises not fit for occupation.
Greendale, R.C. Converted into a Provisional School.
Certificates were withdrawn, on account of small attendance, from the Denominational Schools at George's River and Windsor (Wesleyan), and at Dingo Creek (Presbyterian).

The undermentioned applications for Certificates to Denominational Schools were received Appondx c. in 1871 :-

| 1. Adelong-For a Roman Catholic School. |  |
| :--- | :--- |
| 2. Grenfell- | Do. |
| 3. Plattsburg- | Do. |
| 4. Terrara- | Do. |

In the case of Grenfell, a schoolhouse had not been provided, as required by Article 10 of the Regulations; and in the other cases, the conditions prescribed in section 9 of the Public Schools Act had not been met. The Council, in each case, declined to graint a Certificate.

The usual Reports furnished by Inspectors, upon the various Certified Denominational Schools Apponds D. under their charge, are appended hereto, as also an Abstract of the Quarterly Returns of Attendance and Appondix B. School Fees. Information as to the general condition of Certified Dcuominational Schools is included in the remarks on this subject contained in the Report upon Public Schools.

We submit this our Report upon the Certified Denominatioual. Schools, for the year ending 31st December, 1871; and in testimony thereof we have caused our corporate Seal to be affixed hereto, this twenty-eighth day of March, one thousand eight hundred and seventy-two.

## APPENDIX C.

Schedele of Applications for Certificates to Denominational Schools, received during the year 1871.

Insprators' Reports upon Certified Denominational Schools inspected in 1871.
ALBURY DISTRICT.
Drtaimed Statement of the condition of Cortified Denominational Schools in the Albury District, visited during the year 1871 :-
Albury (R.C.):- Visited, 11th and 12th December.
Present at examination:-Boys, 81.

1. The material state of the school is very defective as regards accommodation and furniture. 2. The attendance is irregular, and the general discipline, though somewhat improved, is by no menns satisfactory. 3. The instruction is very fairly regulated, but the teaching is productive of only partial results. The average proficiency ranges from moderate to barely tolerable.

Corows (C.E.) :-Visited, 25th September.
Present at examination:-Boys, 25 ; girla, 10 ; total, 35.

1. A laratory and play-shed aro needed to complete the material equipment, which, in all other respects, is of very good quality. 2. There has been a falling off in the average attendance as compared with that for the previous year, but in other respecta tho discipline is to some extent of a more satisfactory character. 3. The instruction is fairly regulated, and includes all the prescribed subjects. 4. The average proficiency ranges from moderate to tolerable.

Gundagat, Sottil (C.E.) :-Viṣited, 28th August.
Present at examination:-Boys, 7 ; girls, 9 ; totol, 16.

1. At date of visit the echool was held iemporarily in private premises, in which the accommodntion was of a fairly suitable character. 2. The moral aspect of the school is moderately pleasing. 3. In most respects the instruction was badly regulated, and the teaching unprofitable. 4. The average proftciency was moderate. In the absence of her husband, who was suffering from a very severe accident, the teacher's wife had charge of the school fur some time previous, and to this the unsatisfactory coudition in which it was found at time of inspection is in a great measure attributable.

> Jvarong (R.C.):-Visited, 5th Scplember.

$$
\text { Present at examination:-Boys, } 10 \text {; girls, } 16 \text {; total, } 32 .
$$

1. The material state is defective as regards furniture, out-buildings, and accommodation. $A$ better resideuce for the teacher is also urgently needed. 2. The attendanee is fluctuating and unpunctual many of the pupils are untidily attired, and the government is neither rigorous nor effective. 3. The instruction is not judiciously regulated, and the teaching is marked by indifferent skill. 4. The arerage proficiency is indifferent.

> Turot (R.C.):- Visited, 7th August.

$$
\text { Present at examimation :-Boys, } 23 \text {; girls, } 27 \text {; total, } 50 .
$$

1. A lavatory, second whet-closet, and alditional furniture have been provided since last visit, and the school is amply supplied with working materiuls. 2. The attendance is neither regular nor punctual; in its remaining features the discipline is of a moderately effective claracter. 3. The course of instruction is limited and badly regulated; the methode are mechimical, and the results partial. 4. The arerage proficiency is small. At the close of the year the teacher was remored.

Wagga Wagaa (R.C.) :-- Wisited, 21st Norember,
Present at examination:-Boys, 32 ; girls, 8 ; total, 40.
The fencing has been repaired, the school grounds put in order, and a supply of hat-pegs provided, since last risit. A laratory and play-shed have yet to be orected. 2. There bas been a considerable increase in the attendance, and the general discipline has also become more healthy. 3. Execpt that the lesson programmes nced to be more specific, the instruction is passably well regulated, and the teacling is fairly intelligent, but requires to be of a more vigorous and incisive character. 4. The arerage proficiency is tolerable.

The following Certified Denomimational Schools, situated in the soutll-western part of the Bathurst District, were also riaited :-

Bunrown (R.O.) :-Fisited, 4th and 5th May.
Present at examinatiou :- Boys, 36; girls, 25; total, 61.

1. The scluoolroom is a slab building, roofed with bark; the furniture is of inferior quality, and tho supply of morking matcrials is limited. The school grounds need to be more carofully kept, and a lavatory is much required. 2. The attendance, is regular and passably punctual. Most of the pupila are becomingly attired, but the order is susceptible of improvement, and the government is not sudficiently watchful in matters of detail. 3. The course of instruction is complete; the lesson documents are moderately suitable, and the tenching is earnestly conducted, but the methods cmployed are not calculated to produce uniform results. 4. Thine average proficieney is moderate, and in the lighest cless a reasonable proportion of the pupils exinced a considerable degrec of mental culture.

Iabming Fuat (R.C.) :-Visited, 11th May.
Present at cxamination:-Boys, 21 ; girls, 23 ; total, 44.

1. This school is held in the Roman Catholic Church, a rooden building occupying an elevated, but not central, site, and rery uncomfortablo for children in cold weather. A store is much needed, and the supply of furnituro is scanty. 2. The attendance is irregular, and by no memn punctual. Many of the pupils are slovenly in dress, and the government is only modorately effectire. 3. The instruction includes most of the prescribed subjecte, and is imparted with reasonable diligence. 4. The average proficioucy is indifferent.

Young (C.E.) :-Visited, 12th May.
Present at examiuation :-Boys, 68 ; girls, 35; total, 93.

1. A class-room, lavatory, and playshed are requived to complete the materinl equipment, which in all other respects is of good quality. 2. The goverament is mild, but not very effective, the pupils are reasonably punctual, and the attendance has steadily increased throughout the year. 3. Owing to the very injudicious classification of the pupils, the lesson documents are of little practical utility, and the methods of teaching are less profitable than ther would have been under more farourable circumstances. 4. The average proficiency is but moderate, and fully 60 per cent. of the pupils are in the first class. Subsequent to the date of inspection an assistant tencher was appointed.

EDMUND H. FLANNERY,
Inspector's Office,
Inspector of Schools, Albury District.
Albury, 19 Febriary, 1872.

## ARMIDALE DISTRICT.

Sumarary of Reports upon Certificd Denominational Schools inspected in 1.871.
Fredebicton C.E. (N.V.) :-Regular inspection, 24th March, 1871. ' Numbers at tho examination :--Boys, 20 ; girls, 20 ; total, 40.

1. The material condition is improved and satisfactory, the situation pleasant, and the supply of furniture and apparatus fair and orderly arranged. The school records are kept with improved caro and accuracy. 2. The attondance is rather irregular. The pupils are clean and tidy, docile, quiet, and subdued in demeanour, but wanting in rigour and nnimation. The schoolroom is in very fair order, and the government is mild and fairly effective. 8. The usunl subjects are trught; tho classification is faulty, and the occupation is tolerably well regulnted. The teaching is earnest and tolerably intelligent, but lacks energy, painstaking, and animation. The attainments range from moderate to very fair.

Gunnedail C.E. (N.V.) :-Incidental inspection, 16th September, 1871. Regular inspection, 19th September, 1871.
Numbers at the examination:-Boys, 12 ; girle, 18; total, 30 .

1. This school is held in a chureh of improved condition. Tho stock of furniture is passable in quantity, quality, and arrangement; and that of working materials is fairly sufficient. Fence to playground, supply of water, lavatory, and additional out-offices are needed. The school records are imperfectly kept. 2. The attendance is irregular, and much below the prescribed minimum. The moral aspect of the school is unsatisfactory as regards the clean and decent appcarance of the pupils and the schoolroom, and the character of the school arrangoments. The government is feeble, unintelligent, and indifferently effective. The moral tone is low. 3. Tho course ol' instruction is elementary and ill regulated; and the teaching is empirical and but indifferently effective. The attaimments range from failure to tolerable.

## Kempsey C.E. (N.V.) :-Regular inspection, 20th and 23rd March, 1871.

Numbers at the exnmination:-Boys, 21 ; giris, 18 ; total, 39 .

1. This school is held in a church, airy and commodious, and adequately supplied mith furmiture and working materials. Lavatory, out-offices, and supply of water are needed. The school records are fnirly well kept. 2. The attendanee is tolerably regular, but too uppanctaul. The moral aspect of the sehool is but moderately satisfactory as regards order, quietness, cleanliness, and diligence. 3. The usual subjects, excopt singing, are taught with moderate skill and vigour, rud tho occupation is defectively regulated. The attainments of the priils range fiom small to tolenable.

Tamworim C.E. (N.V.) :-Rogular inspection, 291b, 30th, and 31st, August, 1871.
Numbers at the examination :-Boys, 57 ; girls, 42; total, 99.

1. The material organization is improved and very fair, and the supply of material applinnces is on the whole adequate. The school records require to be kept with greater ueatness and care. 2. The netendance is increased and tolerably regular. The pupils in genern are reasonably neat and clean, and improved in demeanour. The school work is done with fair order, quietness, and vigour. 3. The usual subjects are taught, except singing and inclusive of Latin and geometry. The occupation is fairly well regulated and the teaching is marked by fair energy, painstaking, and diligence, and is tolerably intelligent. the attainments range from moderate to fair.

Armpase R.C. (N.V.) :-Regular inspection, 4th and 9th May, 1871. Incidental inspection, 18th August, 1871.
Numbers at the examinatiou:-Bors, 55 ; girls, 26 ; total, 81 .

1. The playground and exterior of the schoolhoure have been improred. The schoobroom is tot narrow and badly rentilated, and is encumbered by a great number of unsightly store-shelves. The defec tive arrangement of the hat-pegs canses confusion. The supply of furniture and school requisites is adequate. The school records are not kept, with the requisite accuracy and regularity. 2. The attendance is fairly regular and punctunl. The pupils are fairly neat and clean, tolerably quiet and orderly in their movements, and fairly self-reliant and obedient. Stricter attention to defails of discipline is needed. The moral tone in general is passable. 3. The ubual subjects are taught, excapt einging, and tho occupation is tolerably woll regulated. The teaching is enrncst, animated, and tolernbly inteligent, but not painstaking enough. The attainments range from moderate to tolerable.

Graftos R.C. (N.V.):-Incidental inspection, 29th May, 1871. Regular inspection, 4th, 11th, and 21st December, 1871.
Numbers at the examination:-Boys, 26 ; girls, 13 ; total, 39.

1. Bell, invatory, weather-shed, and supply of water are needed; otherwise, the material orgnnization is rery fair. The achool records requiro to be kept with greater carc and accuracy. 2. The atteudance is rather irregular. The papils are fairly neat and clean, orderly, and well behaved, and tolerably selfrolinnt, and diligent. Stricter attention to details of discipline is needed. The moral tone is pretty fair. 3. The usual eubjects are taught, except singing nad sewing; the classification is defective, and the occupation is not properly regulated. The teaching is earnest and apparently diligent, animated, and tolerably intelligent. The attainments range from moderate to fair.

Gunnedail R.C. (N.V.) :-Incidental inspection, 1.6th September, 1871. Regular inspection, 18th September, 1871.
Numbers at the cxumination :-Boys, 10; girls, 19 ; total, 29.

1. The site is unsatisfictory. The sehoolhouse is anitable, but defectively furmished. Bell, laratory, supply of water, and better out-oflices are needed. The school records are not kept with the requisite accuracy and regularity. 2. The attendance is low, irregular, and unpunctual, and the sehool has been closed no less than forty days without authority. The government is moderately firm and rigilant. The pupils are reasonably neat and clean, but oniy moderately diligent, orderly, and mindful of commands. The schoolroom is untidy; and the school-work is done with moderate rigour and efficiency. 3. The usual subjects are taught, except, singing; but the occupation is only modorately well regulated, and the teaching is feeble and moderately intelligent. The attainments and mental culture of the papils are moderate.

Kempany, Pres. (N.V.) :-Regular inspection, 21st íarch, 1871.
Numbers at the examination :-Boys, 31 ; girls, 25 ; total, 56.

1. Lavatory, supply of water, suitable ont-offices, and repairs to echoolroom are needed; other wisc, the material organization is very fair. 2. The aittendance has increased and is fairly regular and punctual. The government is healthy and effective, and the moral condition of the school, as regards order, cloanliness, energy, and diligence, is very fair and improved. 3. The usual subjects are taught, ercept sewing ; the occupation is fairly well regulated, and the teaching is zealous and vigorous, fairly skilful and painetaking. The attainments range from moderate to very fair.

Cart's Crabk, Wes. (N.V.) :-Regular inspection, 5 th June, 1871.
Numbers at the examination :-Boys, 21 ; girls, 21 ; total, 12.

1. The schoolroom is too smnll, and bell, lavatory, and additional deeks are needed. The supply of working materinls is ample and woll kept, and the school records are clean and apparently correct. 2. The attendance has increased, but is rery irregular. The governmentis strict and healthy, but wanting in vigour. The moral tone is fair and improved. 3. The usual subjects are taught with carnestness and diligence, but the methods are still too mechanical, and are not applied with the requisite vigour and animation. The attainments range from moderate to fair.

## Ulmarra, Wes. (N.V.)

Incidental inspection, 7th June, 1871
Regular inspection, 13th and 14th December, 1871.
Numbers at the examination :-Boys, 19 ; girls, 15 ; totnil, 34.

- 1. This school is held in a chapel, which gives rise to inconvonience; otherwise, the material organization is very fair. A bell is greatly needed. The school records are not kept with strict accuracy. The results of the incidental inspection were not satisfactory. 2. The attendance appears to be fairly regular. The government is mild and fairly effective. The details of discipline need stricter attention.

## BATHURST DISTRICT.

## Dbrailued Satement of Denominational Schools for 1871.

13athuest C.E. (Infants) :-Regular inspection, 16th October, 1871.
Numbers onrolled :-Bo5s, 39; girls, 34; total, 73.
Numbers present:-Boys, 33 ; girls, 31 ; total, 64.
The fences need repair and the playground requires levelling. The pupils are fairly orderly and tolerably attentire. The instruction is fairly regulated, and the lessons are registered. The teaching is caveful and industrious, but would be improved by greater energy. The disciplino is tolerably effectire; the attainments are from tolerable to fair; and the general spirit of the school is fairly pleasing.

Bammosit C.E. (Primary) :-Regular inspection, 17th and 18th October, 1871.
Numbers enrolled:-Boys, 73; girls, 53 ; total, 126.
Numbers present:-Boys, 66 ; girls, 44 ; total, 110.
The walls of the schoolroom are dingy and need whitewashing; the fences require repair; snd the playground is in mint of gravelling in some places. The pupils are tolerably orderly, attentive, and selfrcliant.
roliant. The classification is not good. The instructional documents are fairly arranged, but the lessons are not registered daily ; the teaching is industrious, but lacks penetrative force. The dieciplino is not sufficiently vigilant and prompt; and the attaiuments are from moderate to tolerable on an areruge.

Bathurst R.C. (lnfants):-Regular inspection, 6th November, 1871.
Numbers enrolled:-Boys, 30 ; girl3, 128 ; total, 158.
Numbers present:-Boys, 22 ; jirls, 103 ; total, 125.
Numbers present:-Boys, 22 ; girls, 103 ; total, 125.
The echoolroom is a good one, and is kept scrupulously clean and tidy. There is no proper phay. ground, and the erection of a shed is desirable. The pupils are clean, orderly, and very fairly self-reliant. The clasififution is fairly approprinte, eonsidering the number of teachers. The lesson documents are fuirly arranged, and the teaching is careful, industrious, and productive of reasouably satisfactory results. The discipline is genial and firm; the arerage proficiency is from fair to very fair; and the general spirit of the school is pleasing.

Bathurst R.C. (Girls) :-Regular inspection, 7th and 8th November, 1871.
Numbers enrolled :-Girls, 134 ; total, 134.
Numbers present:-Girls, 117; total, 117.
As in the infant department, there is no playground. New desks have been provided, but, except in one group on the floor, they are badly arranged, being fastened to the wall. Tho pupils are orderly, and very fairly attentive and self-reliunt. The work is fairly regulated and registered, and the teaching is carnest and industrious, and productive, on the whole, of fair results. The discipline is mild, but effective ; the avorage proficiency is about fair ; and the spirit of the school is pleasing.

Batinurst R.C. (Boys) :-Regular inspection, 2nd and 3rd November, 1871.
Numbers eurolled :-Boys, 157 ; total, 157.
Numbers present:-Boys, 124; total, 124.
There is no playground. New desks of a peculiar construction, which makes them suitable for other than school purposes, have been provided since last inspection. The closet needs some repnir. The pupils are fairly orderly, attentive, and self-ruliant. Drawing is omitted from the list of subjects, but singing is taught by the organist. The instruction is tolorably regulated and registered, but the quarters of enrolment on the programmes are incorrect. The teaching seems fairly careful and industrious, but judging from results, needs greater thoroughness. The discipline is prompt and rigorous, and the average proficiency is barely tolerable.

Bathurst (Pres.) :-Rogular inspection, 19th and 20th October, 1871.
Numbers enrolled:-Boys, 75; girls, 72; total, 147.
Numbers present:-Boys, 67 ; girls, 61 ; total, 128.
The desks need some repairs, and the schoollouse requires renovating. The playground is too small The pupils are fairly orderly, attentive, and self-reliant. The lesson documents are proporly arranged, and the work done is registered. The teaching is energetic, and seems painstaking, but, judging from results it appenrs to be only tolerably impressive. The discipline is effective, and the arerage proficicncy in all the subjects taught is about tolerablo. Isatin and French are added to the usual subjects.

Kisiso (C.E.):-Regular inspection, 23rd March, 1871.
Numbers curolled:-Boys, 34 ; girls, 23 ; total, 57.
Numbers present:-Boys, 23 ; girls, 13 ; total, 36.
The closet is in yeed of repair, but otherwise, the matcrial condition is fairly satisfactory. The pupils are elean, and tolerably orderly and attentive. The lesson documents are tolerably arranged, and the teaching is cuergetic and fairly careful. The discipline is tolerably effective; the instruction is paskably regulated; and the average proficiency is barely tolerable. This is now a Non-vested Public school, having becn converted on application.

Mujage C.E. (Primary) :--Incidental inspection, 17th November, 1871.
Numbers enrolled:-Boys, 62; girle, 56; total 118.
Numbers present:-Boya, 4l; girle, 37 ; total, 78.
The materinh condition is satisfactory. The pupils are clean, orderly, and attentive. The leason documonts are woll constructed, and the work done is carefully registered. The school appears to contimue to bo well conducted. The records are neatly and correctly kept.

Modare C.E. (Infants) :-Incidental inspection, 17th November, 1871.
Numbers onrolled :--Boys, 51; girls, 50 ; total, 101.
Numbers present :--Boys, 25 ; girls, 22 ; total, 47.
There are some desks, but wo gallery; the matcrial condition is tolerable. The pupils are clean, fairly orderly, and tolerably attentive. The instruction is tolerably regulated, and the work is regislored. The school records are correctly kept. On the day of my visit the attendance was smaller than usual.

Mudgar (R.C.) :-Incidental inspectiou, 17th November, 1871.
Numbers enrolled :-Boys, 46 ; girls, 45 ; total, 91.
Numbers present:-Boya, 31 ; girls, 31 ; total, 62.
The naterial coidition of the schoolroom is satisfactory; but there is no teucher's residence, and the closets need repair. The instruction is well regulated and registered, and the tenching appears to be intelligently conducted. The school records are neat and correct.

Orange (R.C.) :-Regular inspection, 14th December, 1871.
Numbers carollod:--Boys, 48; girls, 37 ; total, 85.
Numbers present:-Boys, 27 ; girls, 22 ; total, 49.
The school is now well situatod, and conducted in a suitable building. There is a good playground, which is furnishod with the neeessary out-offices. The pupils are clean, orderly, and fairly attentive and self-relinat. All the subjects prescribod, except singing, are taught. The instruction is fairly regulated, and tho teaching is careful and industrious- The quarters of enrolment, from a misconception on the part of the teacher, are incorrectly stated on the ;programmes. The diseipline is genial and firm, and the avorage proficiency somewhat excceds fair.

## Sopala (C.E.):-Regular inspection, bth May, 1871.

Numbers cnrolled:--Boys', 40 ; girls, 30 ; total, 70.
Numbers present:-Boys, 22 ; girls, 10 ; total, 32.
The playground is small, but, on the whole, the material condition is fair. The pupils are moder ately orderly and attentive. The instruction is moderately regulated, and the teaching is defective in vigour intelligence, and thoroughness. The discipline needs more watchfulness. The average proficiency ranges from moderate to tolerabie. The attendance was smallor than usual on the day of examination.

Sorata (R.C.) :-Regular inspection, 29th September, 1871.
Numbers enrolled :-Boys, 18 ; girls, 32 ; total, 50.
Numbers present:--Boys, 9 ; girls, 16 ; total, 25.
The playground is unfenced, and the out-houses are not well situated. The schoolroom needs repair, and the stock of working materials is scanty. The pupils are irregular, but fairly punctual and orderly. The lesson documents are fairly arranged, and the teaching is careful and intelligent. The discipline is effective, the instruction is fairly regulated, and the average proficiency somewhat excceds tolerable. The present teacher has not been long in charge of the school.

Weldington (R.C.) :-Regular inspection, 28th November, 1871.
Numbers enrolled :-Boys, 28 ; girls, 26 ; total, 54.
Numbers present:-Boys, 10 ; girls, 14; total, 30.
The supply of furniture is not sufficient, more desks being needed. There is no teacher's residence nor is there a proper schoolroom, the school being conducted in one end of the church. The pupils are only tolerably orderly and attentive, and moderately self-reliant. The instruction is only tolerably regulated, and the teaching is industrious, but wanting in intelligence and penetrative forco. T'he average proficiency and the discipline are only moderate.

CAMDEN DISIRICT.

Annex C.
'Detailed statement of the condition of Certificd Denominational Selools inspected in 1871 :-

## 1.-CHURCII OF ENGLAND SCHOOLS.

> Ashfyedd :-Visited, 4th and 11th August.
> Numbers present:-Boys, 47 ; girls, 28 ; total, 75.

1. The school-building is in need of repairs, and a class-room and teacher's residence should be erceted. There is a good supply of working materials. 2. The pupils are regular and punctual; good order is maintained; and in other respects the discipline is fairly satisfactory. 3. The clasgification is fairly judicious; the subjects accord with the coursc prescribed. The instructional documents are fairly satisfactory. The methods are appropriate, and they are applicd with painstaking, and fair skill. 4. The proficiency ranges from fair to very fair.

Campin (Primary):-Fisited, 18th May.
Numbers present:-Boys, 16 ; girls, 20 ; total, 36.

1. The material condition of this school is very fair. There is a good supply of reçuisites, and the general organization is satisfactory. 2. The pupils are regnlar and punctual. The order is good, and the government fairly judicious. The prevailing tone is healthy and pleasing. 3. The instruction is carefully regulatod. The methods are suitable and intelligently applicd. 4. The pupils attainments range from tolerable to very fair.

Cayden (Infunts):-Visited, 15th May.
Numbers present:-Boys, 25 ; girls, 14 ; total, 39.

1. The matcrial condution of the school is tolerable. 2. The discipline is fairly healthy; and the moral tone is pleasing. 3. The instruction is moderately well regulated; the methods are defective but the work is carried on with zeal and painstaking. 4. The proficiency is nearly tolerable.

Canterbury :-Visited, 20 th December.

$$
\text { Numbers present:-Boys, } 18 \text {; girls, } 13 \text {; total, } 31 .
$$

1. Since last inspection the fences have been repaired, the schoolroom has been re-coloured, and the doors painted. The out-offices are only moderately well arranged. A teacher's residence is also much needed. The school is well supplied with requisites. 2. The attendance of the papils is marked by punctuality and tolerable regularity. The general discipline is satisfactory. The moral tone is plensing. 3. The classification is fair. The instruction is complete. The lesson documents are tolerably well arranged. The teaching is earnesti and fairly skilful. 4. The proficiency of the pupils ranges from fair to very fair.

## Cook's Rrver (Infants) :-Yisited, 22nd December.

Numbers present:-Boys, 24; girls, 11; total, 35 .

1. The material condition is fair. 2. The pupils are tolcrably regular and punctual. The order maintained is fair. The moral tone is tolerably satisfactory. 3. The instruction is moderately well regulated. The teacher is energetic and painstaking. 4. Tho proficiency ranges from tolerable to fair.

## Cook's River (Primary) :-Visited, 22nd December. <br> Numbers present:-Boys, 38 ; girls, 15 ; total, 63.

1. The material condition is fairly satisfactory. The school is well supplicd with working materials. 2. The pupils are fairly punctual and regular. The ordor is moderate in the 2 nd class, and very fair in the 3rd. The moral tone is henlthy. 3. The classification is tolerably judicious. The lesson documents are fairly satisfactory. The instruction is carried on with carnestness and rigour. 4. The proficiency is nearly fair in the 2nd class and very fair in the 3rd class.

## Darto:- Visited, 6th Norember.

Numbers present:-Boys, 16 ; girls, 18 ; total, 34.

1. The material condition is very fair. Two additional desks are needed, and the schoolroom should be painted. There is a good supply of requisites. 2. The pupils are tolerably regular and punctual. The order is satisfactory. The government is firm and effective. The moral tone is healthy. 3. The classification is fairly judicious. The prescribed subjects are taught, and the instruction is fasily well regulated. The mothods are tolerably suitable, and they are earnestly applied. 4. The proficiency is nemly fuir.

Enfield :-Visited, 15th and 18th August.
Numbers present:-Boys, 16; girls, 10; total, 26.

1. The fencing has been repaired and a large tank has been provided' since last inspection. New furnituro is still greatly needed. The supply of requisites is sufficient. 2. The pupils are moderately regular and punctual. The discipline is defectire; and the moral tone is but moderately healthy. 3. Tho instruction accords with the course proscribed-except that singing is omitted. The classification is not judicious, and the lesson documents are, practically, of little use. The methods are defective. 4. The proficiency is rather below moderate.

Fox Groend :-Visited, 18th October.
Numbers present:-Boys, 12 ; girls, 20 ; total, 32.

1. The materinl condition and organization are tolcrable. 2. The pupils are fairly regular and puactual. The order is moderate. The government is weak and ineffective. The moral tone of the school is moderately healthy. 3. The instruction accords with the course prescribed. The classification is moderately judicious. The lesson documents are not sufliciently understood by the teacher. The teaching is weak and ineffective. 4. The proficiency is below moderate.

Jamberoo :-Visited, 3rd November.
Numbers present:-Boys, 30 ; girls, 20; total, 50.

1. A new residence (the interior of which was completed at the teacher's expense) has been prorided. The schoolroom should be lined, and both it and the residence shonld be painted. Additional out-offices, and repairs to the fences, arc also needed. The school buildings are well situated, and with a little additional outlay the matcrial condition and orgnnization might be made satisfnctory. There is a good supply of requisites. 2. The pupils enrolled are fairly regular, but only moderately punctual. The attendance has increased since last inspection, and there is still room for further increasc. The order is fair, and the prevailing tone of tho school is pleasing. 3. Tho instruction accords with the preseribed courso, except that drawing is omitted. The classification is fairly appropriate. The lesson documents are fairly well arranged; but they aro wanting in neatness, and somo particulars required in them aro omitted. The methods aro fairly suitable, and they are applied with earnestness and industry. 4. The proficicucy ranges from tolerable to fair.

$$
\begin{gathered}
\text { Livenpoos:-Visited, 30th nnd 31st May. } \\
\text { Numbors present:-Boys, } 35 \text {; girls, } 37 \text {; total, } 72 .
\end{gathered}
$$

1. No improvement has boen made in the condition of the school buildings since last inspection. New premises are greatly needed. 2. The pupils are fairly regalar and puactual. The order is good, and the discipline und moral tone of the school is healthy. 3. The instruction accords with the prescribed course, and it is fairly well regulated. The methods are suitable, and applied with carnctstness and diligence. 4. The proficiency ranges from tolerable to very fair.

Maquarie Riven:-Visited, 24th October.

$$
\text { Numbers present:-Boys, } 14 \text {; girls, } 17 \text {; total, } 31 .
$$

1. The school building is in bad repair ; and the teacher's residence is too smill, and otherwise unsuitable. The supply of working materials is fairly satisfactory. Additional dosks are needed. 2. Tho pupils nre moderately regular and punctual. The order is sutisfactory. The diecipline and general tone of the school are tolerably healthy. 3. The course of instruction accords with that prescribed, except that singing and drawing are omitted. The classification is tolerably appropriate. The instruction is not well regulated. The work is carried on with industry and painstaking, but the methods are defective. 4. The proficioncy ranges from moderate to tolerable.

Narelian:-Visited, 5th June.
Numbers present:-Boys, 1̣̣̆; girls, 31; totul, 46.

1. The interior of the schoolroom needs recolouring; and the teacher's residence should be repairod. The supply of requisites is sufficient. 2. The pupils arc punctual, but only moderately regular. Tho attendance has increased. Fuir order is maintained, and the pupils are clean and nont in appearance. Tho moral tone of the echool is lealthy. 3. The classification is fairly judicious. The instruction accords with the prescribed course, and it is fairly well-regulated. The methods aro applied with indusiry and painstaking. 4. The proficiency ranges from moderate to fair.

Teraba :-Visited, 23rd November.
Numbers present:--Boys, 24 ; girls, 16 ; total, 40.

1. The schoolroom has been repaired and painted, the furniture has been improved, and the schoolground has been fenced. There is no residence provided; otherwiso, the material condition and organization are fairly satisfactory. The school is well supplied with requisites. 2. The pupils aro regular and punctunl, and the attendanec is increasing satisfactorily under the presont teacher. The order is good. The government is firm and julicious. The moral tone of the echool is henlthy. 3. The classification is appropriate. The instruction is completo, and it is carefully arranged. The methods are suitable, and applied with zeal, and painstaking. 4. The proficiency ranges from fair to very fair.
ollongong :-Visited, 14th December.
Numbers present:--Jioys, 32; girls, 25; total, 57.
2. The material. condition is "fairly satisfactory. The promises and school property are well kept by the teacher. The supply of requisites is sufficient. 2. Tho pupils are fairly regular and punctual. The order is good, and the gencral discipline is healthy. The moral tone is pleasing. 3. The classification is judicious. The course of instruction is complete; and tho lesson documents are satisfactory. The methods are suitable, and they are earnestly upplicd. 4. The proficieney ranges from fair to very fair.

## ROMAN CATHOLIC SCHOOLS.

Aplis: :-Visited, 19th December.
Numbers present:-Boys, 12; girls, 12; total, 24.

1. The schoolroom has been cnlarged, and otherwise improvod. The furniture is but moderatcly suitable. There is no residence provided for the teacher. The supply of requisites is sufficient. 2. Th pupils' punctuality nad regularity are indifferent. The gonema discipline of the school is only moderately healdby. Fair order is maintained. 3. The clnssification is defective. The instruction accords with the course prescribed, except that singing is omitted. The lesson documents arc fair. The methods are fairly suitable, but they should be applied with greater industry and painstaking. 4. The general proficiency is only moderate.

> Cabramatya :-Visited, 20th September.
> Numbers present:-Boys, 13; girls, 5 ; total, 18.

1. The schoolground is not fenced; and the building is rough, and but indifferently furmished The supply of requisites is fairly satisfactory. 2. The pupils are neither regular nor punctual. The discipline is moderately healthy ; the government is feeble; and the order and attention in the 1st aud 2nd classes are unsatisfactory. 3. The classification is moderately judicious. Singing and drawing are not taught; otherwise, the prescribed course is followed. The lesson documente, as compiled, are of little taught; otherwise, the prescribed course is followed. The lesson documente, as comp,
ues. The mothods are mechanical and ineffective. 4. The proficiency is only moderate.

Camden:--Visited, 16th May.
Numbers present:-Boys, 19 ; girls, 17 ; total, 36 .

1. The matorial condition of the school has been improved since last inspection. The furniture is only moderately. suitable. The supply of requisites is sufficient. 2. The pupils are but moderately regular. Their punctuality is fair. The discipline and moral tone of the sclool are tolerably bealthy. 3. The classification is tolcrably appropriate. The instruction accords with the prescribed course. It is moderately well regulated. The mothods are mechanical, but they are applied with industry and care. 4. The proficiency ranges from moderate to tolerable.

## Coor's Ruer:--Visited, 31st August.

$$
\text { Numbers present:-Boys, 17; girls, 27; total, } 44 .
$$

1. The furniture is unsuitable, and there is not a teacher's residence provided. The supply of requisites is suficient. 2. The pupils are tolerably regulur and punctual. The government is weak and the order unsatisfactory. The generai tone of the school is tolerably pleasing. 3. The prescribed subjects are taught. The classification is passable. The sehool documents are but moderately well attended to. The methods are tolerably suitable but they are not systematically applied. 4. The proficiency ranges from indifferent to tolerable.

## Dapto:-Visited, 6th Norember, and 15th December.

Numbers present, 6th November:-Boys, 4 ; girls, 6 ; total, 10.
Numbers present, 15th Decomber :-Boys, 18 ; girls, 7 ; total, 25.

1. The teacher's residence needs re-shingling, and a supply of water should be provided. In other respects, the material condition and organization are tolerable. The school is fairly well supplied with working materials. 2. The regularity and punctuality are only moderate. Fair order is maintained. The government is firm and tolerably judicious. The moral tono is fair. 3. The classification is tolerably appropriate. The instruction is but moderately well regulated; and, for some time past, it hns not been carried on with the same earncstness and painstaking it formerly was. The parents and Local Board have not properly supported the teachor in the discharge of his duty, and, hence, he has become disheartoned. 4. The proficiency ranges from tolerable to fair.

Jamberoo:-Visited, 3rd November.
Numbers present:-Boys, 26 ; girls, 23 ; total, 49.

1. The achoolroom and residence hare been repaired, and additional out-offices have been provided. The schoolroom is rather small for the number of pupils nttending, and the farniture is insufficient. The supply of working materiats is fairly satisfactory. 2. The pupils are tolerably regular and punctual. The order is fair, the general discipline henlthy, and the moral toue pleasing. 3. The instruction accords with the prescribed course, except that singing and drawing are onitted, and it is fairly well reguluted. The methods are fairly suitable, but greater vigour and animution are necessary in their application. 4. The proficiency is $\Omega$ little above tolerable.

Liverpool:-Vigited, 29th May.
Numbers present:-Boys, 16; girls, 14; total, 30.

1. A room has been added to the residence, a part of the building has been repainted, and the phayground las beeu feuced since last inspection. The furniture is but moderately suitable. The school is properly supplied with requisites. 2. The pupils are fairly regular and punctual. The cleanliness is fair, and the order and attention are satisfactory. The general tone is heallhy. 3. The clasification is fairly appropriate. The instruction accords with the course prescribed, except that singing is not included The lesson documents are fairly satisfactory. The methods in use aro, generally spenking, suitable and fairly effective. 4. The proficiency ranges from moderate to fair.

Menangle:- Fisited, 14th June.
Numbers prosent:-Boys, 21; girls, 16 ; total, 37.

1. The exterior of the building hiss been painted since last inspection. The furmiture is old and monuitable, and the interior of the sehoolroom needs colouring or painting; at present it has a very dingy sppearance. The supply of requisites is fairly sufficient. 2. The pupils are fairly punctuat, but thei regularity is masatisfictory. The order is indifferent. The government is weak and ineflective. The general tone is but moderately healthy. 3. The classification is tolerable. Singing and drawing are not taught. The lesson documents are very defective, and but little understood. The methods are feebly applied. 4. The proficiency ranges froin indifferent to moderate.

Rocky Pornt :-Visited, 8th September.
Numbers present:-Boys, 16 ; girls, 18 ; total, 34.

1. The material condition of the school premises is tolerably satisfactory. There is no residence for the teacher. The supply of working materials is fair. A clock is needed. 2. The pupils are tolerably regular and punctual in their atteudauce. Fair order is maintained, and the general discipline is healthy. 3. The prescribed course of instruction is given in the school, but the instructional docurnents are defective, and the methods are but moderately suitable. The tencher is earnest and fairly industrious. 4. The proficiency rangee from indifferent to moderato.

> Uuladusia :- - Visited, 21st November.
> Numbers present:-Boys, 27 ; girls, 27 ; total, 54.

1. No improvement has been made in the condition of the school premises since last inspection A supply of water is much needed, and more suitable furniture should be provided. A few additional requisites are needed. 2. The pupils aro moderately regular and punctual. My visit was expected by the Local Board, hence the large attendance at the examination. Fair ordor is maintained, and the general discipline is healthy. 3. The classification is fairly judicions. The instruction accords with the prescribed course, and it is fairly well regulated. The methods are fairly appropriate, and they are applied with industry and painstaking. 4. The general proficiency is tolerable. A higher estimate could have been given had not so large a number of irregular pupils been examined.

Wollongong:-Visited, 14th December.
Numbers present:-Boys, 21 ; girls, 23 ; total, 44.

1. The interior of the building needs painting, and new furniture should be provided. There is no residence for the teacher. The school is well supplied with requisites. 2. The pupils are fairly regular und punctual. The order is tolerable. The pupils are not sufficiently neat and tidy in their appearance. The goneral tone of the school is fairly healthy. 3. The prescribed subjects are taught--singing excepted. The classification is fairly approprinte. The lesson documents are defective. The teaching is carried on with earnestness and painstaking, but it is not sufficiently penctrative. 4. The attainmente in the 3 rd clase are fair, and in the 1st, and 2nd classes tolerable.

## PRESBYTERTAN SOHOOL.

> Shoaluayes :--Visited, 4th December.

Numbers present:-Boys, 21 ; girls, 11 ; total, 32.

1. The material condition of the school premises is very indifferent. A few additional requisites are needed. 2. The pupils are only moderately regular. Their punctuality is tolerable. The order is good. The government is firm and effective. The pupils are neat and clean in appearance. The mora tone is healthy. 3. The prescribed subjects are taught. The classification is fairly appropriate. The instruction is carefully regulated. Tho methods are suitable, and they are applied with intelligence and earnestness. 4. The proficiency ranges from fair to very fair.

## WESLEYAN SCHOOL.

## Rocky Point :--Visited, 1st and 8th September.

1. The material condition and organization are fair. A residence is not prorided for the teachor. The supply of requisiles is sufficient. 2. The pupils are punctual, but only moderately regular in their attendance. The order and general discipline are fair. The moral tone is healthy. 3. Singing is not tanght, otherwise the instruction accords with the preseribed course. The classification is tolerably approprinte. The teaching is carried on with zeal and painstaking, but the methods used are only moderately suitable. The lesson documents are tolerably well arranged. 4. The proficiency varics from moderate to tolemble.
J. HUFFER

Inspector.

## CUMBERLAND DISTRIOT.

Dftailed Statement of the condition of Certifed Denoninational Schools in the Cumberland Dietriet, inspected during the year 1871 :-

## CHURCH OF ENGLAND SCHOOLS.

Bunwoon :--Visited, 14th June.
Present at examination :--Boys, 38 ; girls, 28 ; total, 66.

1. The whole material condition of the selool is reasonably good. 2. There is a want of regularity and punctuality of attendance. The pupils as a whole are clean, orderly, and industrious. 3. The prescribed course of instruction is foilowed; and the methods employed are appropriate, and marked by fair rigour and tact in their application. 4.' The attainments range from tolerable to very fair.

Cabramatia :-Visited, 27 th April.
Present at examination:-Boys, 14 ; girls, 14 ; total, 28.

1. The organization generally is tolerubly satisfactory. 2. The discipline is fairly effective. 3. The subjects of instruction are those prescribed. The lesson documents are, upon the whole, suitable, and the methods employed are appropriate. 4. The proficiency averages fair.

Castie Hill :-Visited, 3rd November.
Prosent at examination:-Boys, 32 ; girls, 20 ; total, 52.

1. The whole condition of the sehool as regurds material appliances is satisfuctory. 2. Greater regularity of attendance is desirable. Upon the whole the discipline is healthy. 3. The jnstruction is carefully regulated, and appropriate methods carefilly applied arc employed. 4. The proficiency is nearly very fuir.

## Due Platss:-Visited, 21st March.

Present at cxamination:-Boys, 27 ; girls, 12 ; total, 39.

1. The school premises and working appliances generally are fairly suitable and sufficiont. 2. The attendance of the pupils, both as regards punctuality and regularity, is not satisfactors. Habits of talking and copying prevail anong the pupils when at lessons. The discipline is weak. 3. The instruction is not well regulated; and the methods in use are superficial. 4. The proficiency ruks from moderate to tolerable.

## Kurrajoye Nortif:-Visited, 13th September.

Present at examination:-Boys, 21; girls, 20; total, 41.

1. The objectionable features in the material condition of the school formerly pointed out still exist. 2. The pupils are tolerably regular and punctual in their attendance, neat and clean in their person and dress, and moderately diligent at their work. The discipline is not marked by minutencss and firmness. 3. The teaching is deficient in penctrativencss. 4. The attuiuments rank from tolorable to fair.

Marsfield :- Visited, 3rd August.
Present at examination:-Boys, 39 ; girls, 27 ; total, 66.

1. The school-ground has been enclosed and other needful improvements have been effected. A residence for the teachor is in course of erection. 2. The discipline is upon the whole healthy. 3. The classification is low, whether as regards age or attainments. A closer adherence to the staudard of proficiency in constructing programmes is very desirable. 4. The proficiency, estimated according to the classification, ranks from fair to very fair.

## Murgos:-Visited, 24th March.

Presont at examination :-Boys, 17 ; girls, 8 ; total, 25.

1. The schoolroom requires repairing and cleaning. It is fairly furnished and supplied with apparatus and books. 2. The pupils are irregular and unpunctual. The discipline generally is feeble. 3. The instruction is indifferently regulated, and the teaching is characterized by a want of animation and vigour. 4. The proficiency on an average is little beyond moderatc. The pupils are not intelligently interested in their work.

> Parramatma:--Visited, 13th July,
> Present at cxamination:--Boys, 34; girls, 29 ; total, 63.

1. The material condition of the school generally is good. 2. The attendance is not so regular and punctual as might be expected. The pupils as a whole are fairly clean and tidy, but at work they want steadiness and self-reliant application. 3. The instruction is tolerably well regulated, and the teaching is performed with diligence and earnestncss. 4. The proficiency is fair.

Pennant Hrlis:--Visited, 14th November.
Present at examinatiou :-Boys, 36 ; girls, 21 ; total, 57.

1. No change of any consequence has taken place in the material condition of the school since last inspection. The whole is reasonably good. 2. The pupils arc fairly regular and punrtual in attendance, and clean and nest in their appearance and dress. 3. The instruction is carefully regulated and diligently imparted. The methods are appropriate, but require to be more vigorously npplicd. 4. The proficiency is a little in excess of fair.

## Pitt Town :-Visited, 29th August.

Present at examination:-Boys, 11; girls, 12; total, 23.

1. The alterations and improvements in the playground, to which the attention of the Local Board has frequently been called, remain uneffected. The school is fairly furnished and supplicd with apparatus and books. 2. The discipline is feeble, and the moral aspect of the school is by no neans pleasing. 3. The classification is low, and the instruction indifferently regulated. The methods employed are markel by little penetrativeness. 4. The proficiency is nearly tolerable.

## Ricimond:-Visited, 5th and 6th June.

Present at examination:-Boys, 44; girls, 33; total, 77.

1. As on former occasions stated, a new and better equipped schoolroom is nuch required. 2. Greater animation and vigour need to be exhibited in the whole management and working of the solool. The pupils are fairly punctual, but irregular in their attendance. There is considerable room for inprovement in cleauliness and tidiness. 3. The classification is tolerably approprinte; the instruction is cenrefully regulated; and the teaching js conducted with care and diligence. 4. The attainments rank from tolerable
to fair. to fair.

Rouse Hill :- Visited, 30th October.
Present at examination :-Boys, 17; girls, 20; total, 37.

1. A new schoolhouse is in course of erection. 2. The pupils are fuirly regular, punctual, and elonn. The internal discipline of the school needs to be exercised with greater vigour. 3. The instruction is regulated more with a regard to the teacher's conrenience than to the regulations. The teaching is superlicial, and wanting in carnestuess. 4. The proficiency is little moro than tolerable.

Ryde :-Visited, 14th August.
Present at examination :-Boys, 29 ; girls, 10 ; total, 48.

1. The material condition of the school is tolcrably good. 2. The pupils are fairly regular and punctual. Upon the whole they are clean, but not very orderly and diligent. 3. Tho instruction accords with the prescribed course. The work of tewhing is carried on anid too much unrest and noisc. 4. The proficiency is nearly fair.

> Ssvex Hills :-Visited, 4th May.
> Present at examination :-Boys, 30 ; girls, 14 ; total, 44.

1. The windows of the schoolroom require mending and painting. Of working materials thero is a fair supply. 2. The pupils are very unpunctual, but fairly regular and clean. They do not show sufficient mental energy and self-reliance at their work. 3. The preseribed coursc of instruction is followed, and the teaching is conducted with energy and fair intelligeuce. The attainments are on an average nearly fair.

Soutm Crbek:-Visited, 164 and 17 th May.
Present at examination:-Boys, 46 ; girls, 46 ; total, 92.
3. The material appliances are upon the whole tolerably sutisfactory. A better schoolroom, better and more suitably furnished, would be an important ucquisition. 2. The attendance gencrally is regular and punctual; aud the appearance of the pupils, as regards cleanliness and order, are pleasing. Mental culture is somowhat deficient. 3. The instruction needs to bo a little more definitely planned, and rendered more telling and penetrative in its application. 4. The proficicncy ranks from tolerable to very fair-average nearly fair.

## Wilberforce: - Vibited, 30th August.

Present at examination :-Boys, 18 ; girls, 31 ; total, 49.

1. Since last inspection the schoolroom has been improved. Its matorini condition is now fair. 2. The discipline is very woak. The pupils are tolerably punctual and clean, but irregular and noisy. With labits of self-control and application to worl they are litile acquainted. 3. Tho instruction is vague as to plan and method. The work to be done needs to be more accurately conceived and more skilfully and vigorously performed. 4. The proficiency is barcly moderate.

Windsor :-Visited, 9th June.
Present nt examination :-Boys, 45 ; girls, 39 ; total, 84.

1. As has been formerly stated, the schoolroom is rather small. As regards furniture and other requisite appliances, it is fairly circumstanced. 2. The discipline is still less firm and effective than it ought to be. Greater strictness needs to be manifested in the maintenanec of a respect for cleanliness and order. 3. The instruction is tolerably well regulated. The methods are fairly appropriate, and earnestly order. 3. The instruction is tolerably well regulated. . The methods applied. 4. The proficiency as a whole is nearly fair.

## ROMAN CATHOLIC SCHOOLS.

## Coycors :-Visited, 13th Junc.

1. It has been indicated in former reports that the building in which the school is held is not well suited for school-work, from the fact that it is desigued for the double objects of school and chapel. A room ought to be built and fitted out far school-work solely. 2. The attendance of pupils is very irregular and unpunctual. Cloanliness is indifferent; order and diligence are bad. The necessity for more effective discipline does not appear to be realized. 3. The instruction is indifferently regulated, and the emethods employed in imparting it are not vigoronsly and skilfully applied. 4. The proficiency is very moderate.

## Greendale :- Visited, 25 th April.

Present at examinntion:-Boys, 15 ; girls, 11 ; total, 26.

1. The material condition of the school is tolerably satisfactory. 2. The attendance is low, very irregular, and unpunctual ; the disciplino of the school generally has declined. 3. The instruction is but indifferently fregulated, and the methods employed want earnestness and vigour in their application. 4. The proficiency is but indifferent.

## Kurrajova :-Visited, 14th September.

Present at exnmination:-Boys, 25; girls, 18 ; total, 43.

1. The schoolroom is in tolerable condition and moderately furnished. 2. The pupils are irregular and unpunctual; and they are wanting in cleunliness, order, and industry. The discipline is imperfect. 3. The instruction is limited to the more ordinary subjects. The classification is irregular, and the methods of teaching arc mechanical and feebly applicd. Self-reliant independent thinking and working are little practised. 4. The proficiency ranks from moderate to tolerable.

## Lane Cove:-Visited, 31st October.

Present at examination :-Boys, 17; girls, 14; total, 31.

1. The organization genernlly is very unsatisfactory. 2. The discipline is very foeble. The pupils are cxceedingly irrcgular and unpunctual, and to habits of cleanliness and thoughtful diligent working they are comparative strangers. 3. The work of teaching is performed in a kind of haphazard fashion, claracterized by little method and less vigour. 4. The proficicncy is moderate.

## Nelson :-Visited, 7th September.

Prosent at examination:-Boys, 15 ; girls, 17 ; total, 32.

1. The material organization is generally tolerable. 2. The pupils are fairly regolar and punctual. The discipline las slightly inproved. Somerhat better order is maintained. 3. The classification is not appropriate. The methods of instruction are still rather mechanical, but applied with considerable spirit and cacrgy. 4. The attainments rank from moderate to tolerable.

Parramatta:-Visited, 1st August.
Present at examination :-Boys, 42; girls, 30; total, 72.

1. The material condition of the school is tolerable. Nothing has yct been done in the way of providing a better supply of more seemly and suitable furniture. 2. The attendance is very irregular and unpunctunl. The moral tone of the school is very indifferent. 3. Too large a proportion of the school is found in the lower classes. The instruction is tolerably well regulated, but the methods want spirit, vigour, and penetrativeness in their application. 4. The proficiency is barely moderate.

## Penricit:-Vjsited, 20th March.

Present at examination:-Boys, 25 ; girls, 29 ; total, 54.

1. The school-building and outhouses are in very bad condition. The same is true of the furniture. 2. The nittendance is fuirly regular and punctual, and the pupils are tolerably clean; but the order that prevails in the school is very indifferent. 3. The programmes and registers of lessons are of little value prom their ragueness. The instruction lacks spirit and rigour. 4. The proficiency is barcly moderate.

Petersham:--Visited, 15th June.
Present at examination:-Boys, 16 ; girls, 13 ; total, 29.

1. The schoolroom is rather small, but tolerably furnished. The closets are still in bad condition. 2. The government is worthless. The pupils are irregular, unpunctual, untidy, and disorderly; the teacher has no control over them. 3. Anything like systematic or profitable teaching is unknown. 4. The proficiency ranks very low-bad to indifferent.

Ricrmond:-Visited, 11th May.
Present at exnmination:-Boys, 16 ; girls, 19 ; total, 35.

1. The material condition of the school is upon the whole fair. 2. The discipline is very fecble. The pupils attcnd irregularly and unpunctually; they are tolerably clean and tidy, but they are wanting in order and industry. 3. No attempt has been made to regulate the instruction, nor indeed to perform any of the wort of the school in an orderly systematic manner. 4. The attainments rank from bad to moderate.

## Ryde:-Visited, 17th August.

Present at examination:-Boys, 26 ; girls, 13 ; total, 39.

1. The school accommodation, as has formerly been noticed, is defective. There is a fair supply of furniture, apparatua, and books. 2. The attendnnce is upon the whole reasonably regular and punctual ; and the pupils are fairly clean, orderly, and attentive. 3. In the constructing of lesson documents greater. conformity to the standard is desirable. The method are appropriate and applied with steadiness and intelligence. 4. The attainments rank from tolerable to very fair:

Fillid Maria :-Visited, isth August.
Present at examination :-Boys, 21; girls, 20; total, 41.

1. The sehool building is good and tolerably furnished. 2. The discipline is very feeble. Noise and disorder characterize all the operations of the school. 3. No proper classification exists. The instruction is unskilfully and ineffectively imparted. 4. The proficioncy ranks from very indifferent to moderate.

Windsor :--Visited, 9th August.
Present at examination :-Boys, 58 ; girls, 50 ; total, 108.

1. Except as regards furniture, the material organization of the school is good. 2. The character of the attendance is fairiy satisfactory ; and the pupils as a whole are clean and tidy. The discipline is healthy. 3. The classification is irregular. The instruction is carefully regulated and diligently and zealously imparted. 4. The proficiency ranks from tolerable to very fair. The thinking and reasoning powers of the pupils in the upper classes ure being carefully exercised and developed.

## PRESBYTTERIAN SCHOOLS.

## Parranatta:-Visited, 14th July.

Present at examination :-Boys, 51 ; girls, 27 ; total, 78.

1. The material condition of this school is essentinlly the same as deseribed in last report-by no meana satisfactory. 2. The pupils are not under duc control, nor are they trained to habits of intelligent, self-reliant, industry. 3. The instruction is tolerably reguluted, but fitful and superficial in its application. 4. The proficiency ranks from tolerable to fair.

Parramatta Junction :- Fisited, 5th May.
Present at examination:--Boys, 10 ; girls, 13 ; total, 23.

1. The material condition of the school is fair. 2. The pupils are tolerably well conducted, clenn and diligent. 3. The instruction is indifferently regulated. The teaching is mechanical but painstaking. 4. The proficiency ranks from tolerable to fair.

## Pobtland Hrad:-Visited, 8th March.

Present at examination:-Boys, 16; girls, 16; total, 32.

1. The schoolroom is the Presbyterian Church, a good stone building ; but the space left for school operations is limited, and the farniture is inferior. 2. The pupils attend very irregularly; they are not used to steady industrious work. 3. Little of system or profitable method is followed in the teaching. 4. The proficiency ranks from moderate to tolerable.

## WESLEYAN SCHOOLS

## Castierfagh:-Visited, 5th Septembor.

Present at examination:-Boys, 23 ; girls, 16; total, 39.

1. The schoolhouse is in tolerably good order, fairly furnished, and provided with apparatus and books. 2. The regularity and punctuality of the school, as regards attendauce and its general order, are but tolerable. The pupils are fairly clean, but evidently little used to steady self-reliant work. 3. The teaching is largely superficial; it fails to instruct and interest. 4. The proficiency reaches to tolerable.

Hornsby :-Visited, 31st October.
Present at examination:-Boys, 15 ; girls, 13 ; total, 28.

1. This school, which was formerly held in the Wesleyan Chapel, has been removed to an old stable that has received a very unsatisfactory fit-out for its reception. 2. The pupils are not regular in attendance, but they are fairly punctual, clean, and diligent. The discipline is upon the whole beneficial. 3. The classification is appropriste, and the instruction, which is carefully regulated, is stendils and zealously imparted. 4. The proficiency is fair.

Parramatta:-Visited, 2nd August.
Present at examination:-Boys, 43 ; girls, 22 ; total, 65.

1. The building is good, but its appearance is marred by several broken windows. There is a fair supply of suitable furniture, apparatus, and books. 2. The attendunce generally is satisfactory. Tho pupils are fairly clean, but noisy and unsteady at work. 3. There is room for improvement in the classification. Upon the whole the instruction is carefully regulated. The methods employed are approprinte ; but in their application there is a want of force and penetrativeness. 4. The proficiency ranks from tolerable very fair.

Windsor:--Visited, 22nd and 23rd August.
Present at cramination :-Boya, 11 ; girls, 11 ; total, 22.

1. The seboolroom is a very fair building, plentifully supplied with suitable furniture, apparatus, and books. 2. Tbe attendance is very small, but tolerably regulur and punctual. The pupils arc clean, orderly, and attentive. 3. The classification is injudicious. The teaching is steady and painstaking. 4. The proficiency is fair.
A. C. L. FORBES, A.M.,

Inspector.

## GOULBURN DISTRICT.

Cfrtified Denominationat Schoois.-Summary of Reports for 1871.
The following remarks aro abridged statements of my detailed reports upon the condition of the Denominational Schools inspected by me during the year 1871. The remarks chiefly relate to the material condition and organization of the sehools, the general discipline and moral training, the subjects and methods of instruction, and the progress of the pupils in learning.

## CHURCI OF ENGLAND SCHOOLS.

Analuen :- Fisited, 31st July.
Numbere of pupils enrolled :-Boys, 15 ; girls, 8 ; total, 23.
Present at examination :-Boys, 10; girls, 7; total, 17.
The old echool building, furniture, apparatus, and books were accidentally consumed by fire on the 4th of June last. The school is now held in a small room convenient to the old site, but there are no closets, furniture, nor playground. The general discipline is uneaisfactory, the instruction is badly regulated, and the pupils make very littlo progress in learning. The Local Board has decided to close the school until a new schoolhouse has been erceted and properly furnished.

> BeGa :-Visited, 16th Junc.
> Numbers of pupils enrolled :-Boys, 27 ; girls, 35 ; total, 62.
> Present at examination :-Boys, $18 ;$ girls, 21 ; total, 39.

This school is held in the English Church. The building is suitable and fairly furnished, but some rapairs to the fencing and an additional closet for the girls are required. The pupils are pasably clean, but they are irregular in attendance, unpunctual, inattentive, and disorderly. The education of the pupile is aadly nerlected, and their attaiments are emall. The Locnl Bourd have decided to close the school with the view of reorganizing the Public School, and establishing a department for girls.

Braidwoon :-Visited, 15th August.
Numbers of pupils enrolled:-Boys, 14 ; girls, 26 ; total, 40.
Present at examination :-Boys, 8 ; girls, 18; total, 26.
The walls of the schoolroom have been colored, and the construction of the deske improved since my last inspection. A supply of hat-pegs is still necded, but otherwie, the materinl condition of the school is good. The pupils are clean, orderly, and attentive, and, so far as I examined, the progress in learning .was fair. The school records were not posted up to date.

## Bombala :-Visited, 23rd May

Numbers of pupils enrolled :-Boys, 14; girls, 26 ; total, 40.
Present at examination:-Boys, 8 ; girls, 18 ; total, 26.
The matcrial condition of this school is reasonably good, the disciplino las been improved in some rospects, but the instruction of the pupils is vory musatistinctory, and the Local Board has decided to close the school with the view of reorganizing the Public School, and establishing a department for the girls.
Morvis :-Visited, 21st July.

Numbers of pupils enrolled :-Boys, 44; girls, 38; total, 82.
Present at examination:-13oys, 39 ; girls, 37 ; total, 76.
This school is held in the English Church. The building is in good ropair, and sufficient in size The grounds are fenced, but suitable closets are much needed. The needlework is well taught, but the writing is careless, and the instruction is not arranged in accordance with the course of study prescribed by the Council.

Begs:-Yisited, 14th June.
Numbers of pupils cnrolled:-3oys, 35 ; girls, 34; total, 69.
Present at examination:-Boys, 26 ; girls, 30 ; total, 56.
This school is held in the Roman Catholic Chapel. The building is in passable repair, and there is a fuir stock of furniture, apparatus, and books. The attainments of the pupils range from tolerable to fair. About 60 per cent. of the number eurolled hare becu regular in attendance, but they are not all sufficientiy punctuul. They wore, bowever, clean, but talkatire and disorderly.

> Coown :-Visited, 28th April.

Numbers of pupils enrolled:-Boys, 30; girls, 31; total, 61
Present at examination:-Boys, 30 ; girls, 23; total, 53.
The material condition of the school is not quite complete, repairs to the schoolroom and additional furniture being required, but the erection of new school buildings will shortly be commenced. The general discipline and attainments of the pupils are tolerably satisfactory.

Braidwood:--Visited, 17th August.
Numbers of pupils enrolled :-Boys, 54 ; girls, 58 ; total, 112.
Present at exumination:--Boys, 35; girls, 39 ; total, 74 .
The schoolroom is a small old building in passable repair. The supply of furniture is insufficient, but there is a fair stock ofother materials. The pupils are clcan, orderly, and punctual, and the discipline generally bas been very much improred sinea the appointment of the present teacher. So far as I cxamined the pupils, the progress in learning is very fair. Tho Local Board promised to supply the desks and forms required at once, and to tale measures for the erection of new school buildings.

> Goulburs (Boys' Department) :- Tisited, 4th October.
> Number of pupiss enrolled :-Boys, 90.
> Present at examination:-Boys, 75.

The schoolroom is sufficient in size and in fair repair, but the floor is not kept clenn. The general discipline is passible, and, so far as I examined, the attainments of the pupils are tolerable. The grounds are fenced, and there are suitable closets and playeheds, but additional desks and forms are needed. The School Board has promised to supply the furniture required.

> Yass :-Visited, 22nd March.

Numbers of pupils enrolled :-Boys, 45; girls, 39; total, 84
Present at cxamination :-Boys, 37 ; girls, 27 ; twtal, 64
The schoolroom has been repaired, and new desks and forms lave beon supplied since my last inspection. The grounds still need fencing, but there is a fair stock of apparatus and books. The general discipline and instruction have been much improved under the present teucher, and, so far as I examined, the attainments of the pupils were fairly satisfactory.

ROMAN CATHOLIC SCHOOLS.

## Abaluex :-Visited, 28th July.

Numbers of pupils cnrolled :-Boys, 58 ; girls, 64; total, 122.
Presant at examination:-Boys, 41; girls, 53 ; total, 94.
This school has been removed from the Roman Catholic Chapel to a large room almost adjoining. The building is in fair repair, and there is a sufficient supply of furniture, apparatus, and books, but the teaching power is insufficient. So far as I examined, the attaiuments of the pupils range from tolerablo to fair, and the discipline is passable.

## Jembacombenk:-Visited, 24th August.

Numbers of pupils enrolled:-Boys, 37; girls, 34; total, 71.
Present at examination:-Boys, 34; girls, 29 ; total, 63.
The schoolroom is too smull and in bad repair, and the furmiture is of an indifferent description, but there is a fair supply of apparatus and books. A residence for the toacher has been recontly built, and the erection of a suitable schoolhouse is under consideration. The cleanliness and order of the pupils are passable, and the instruction hus been improved under the present master.

Mitragong :-Visited, 29th March.
Numbers of pupils enrolled:-Boys, 22 ; girls, 25; total, 47.
Present at examination :-Boys, 20 ; girls, 20 ; total, 40 .
The schoolroom is sufficient in sizo, in good repair, and well supplied with furnituro, apparatus, and books, but the grounds are not fenced. The discipline has been improved since my last inspection, and, so far as I could ascertain, the attainments of the pupils are tolerable.

Morgia (Boys Department) :--Visited, 26th July.
Numbers of pupils enrolled :-Boys, 50.
Present at examination:-Bors, 41 .
The schoolroom is suitable, and with two additional desks will be propery furnished. The supply of apparatus and books is suflicient. The pupils are clean, punctunl, and orderly; and thout two-thirds of the number enrolled are regular in attendance. The attainments are fair, so fur as oxamined.

Monva (Girls Department) :- Visited, 26th July.
Number of papils enrolled:-Girls, 48.
Yresent at examination :-Girls, 40.
With a supply of hat-pegs, the material condition of this school is good. The general discipline and instruction of the pupils are well regulated, and their progress in learning, so far as examined, is farly satisfactory.

Nermigundaf :-Visited, 13th July.
Numbers of pupils enrolled:-Boys, 20 ; girls, 12 ; total, 32.
Prescnt at examination :- Boys, 16 ; girls, 9 ; total, 25.
The schoolroom is sufficient in size, but it is not in good repair. There is a tolerable supply of furniture, apparatus, and books. The playground is not fenced, and the closets arc in a bad condition. The pnals arc tolerably clean and orderly, but they aro very unpunctual. The methods of teaching are wler:bly eflectirc.

Reidsidale :-Visited, 10th August.
Numbers of pupils enrolled :-Boys, 20 ; girls, 31 ; total, 51.
Present at examination :-Boys, 13 ; girls, 15 ; total, 25.
A new fireplace has been built, hat-pege supplied, and the arrangement of the desks improved since last inspection. The building is very old, but in passable repnir. The pupils aro clean and orderly, and fairly punctual, and their proficiency in learning ranges from very fitir to good.

Tabalaa:-Visited, 12th December.
Numbers of pupils enrolled:-Boys, 28 ; girls, 30 ; total, 58.
Present at examination :-Boys, 14; girls, 17 ; total, 3I.
The schoolroom is built of rubble stone, sufficient in size, and fairly furnished, but it is in much need of plastering. The floor is not quite clean, and hat-pegs and a bookpress are much nceded. The pupils are unpunctual and not sufficiently clean and tidy. The school work is not well arranged, and the attainments of the pupils are only moderate.

> Yass (Boys' Department) :-Visited, 22nd March.
> Number of pupils enrolled :-Boys, 67.
> Present at examination :-Boys, 54.

The gromods are fenced, and the closets, which were so badly situated, have been remored. The walls of the schoolroom havo been whitened, and additional hat-pegs have been supplied. So far as I could ascertain, the general disciplino and instruction have been considerably improred since my last inspection.

Yass (Girls' Department) :- Wisited, 22nd March.
Number of pupils enrolled :-Girls, 58.
Present at examination :-Girls, 44.
The sclool has been remored to another building aince my last inepection, but it is rather small, and some additional furniture is required. There is a fair stock of apparatus and books. The pupils arc clean and orderly. So far as I examined, the progress in learning is tolerably satisfactory.

## PRESBYTERTAN SCHOOL.

Yass :-Visited, 24th March.

Numbers of pupils enrolled :-Boys, 25 ; giris, 25 ; total, 50.
Present at cxamination :-Boys, 16 ; girls, 18 ; total, 34.
The grounds are not fenced, but the achool building is tolerably suitable, and the supply of furniture and materinils is sufficient. The general discipline and attainments of the pupils, so far as cxamined, are tolerable.
W. M'INTYRE,

Goulburn, 16th February, 1872.
Inspector.

## MAITLAND DISTRICT.

Sumanry of Reports upon Certified Denominational Schools, for the year 1871.

## I.-CHORCH OF ENGLAND SCHOOLS.

Brishop's Bridas:-Reguler inspection, 29th Scptember.

$$
\text { Numbers curolled :-Boys, } 18 \text {; girls, } 19 \text {; total, } 37 .
$$

$$
\text { Numbers present:-Boys, } 10 \text {; girls, } 15 \text {; total, } 25 .
$$

1. The premises gencrally are in fair condition. The furniture is sufficient in quantity, but unsuitable and badly urranged, the deske being fixtures to the walls of the school. There is a tolerable supply of apparatus and books. 2. The pupils nre tolernbly regular and punctual, and, as a rule, wellbehuved. The order is tolorable. 3. The instructional arrangements are moderately satisfactory, but the methods are noticefeetive, More encrgy needs to be thrown into the work. 4. With fet exceptions, the pupils are diginclined to exert themselves. The average proficiency is indifferent.

Broke:-Regular inspection, 26th May.
Numbers enrolled :-Boys, 23 ; girle, 26 ; total, 49.
Numbers present:--Boys, 13; girls, 10 ; total, 23.

1. The schoolroom is commodious and comfortable, and, with the exception of the window casements, in very fair repuir. The premises need fencing. A book-press would prove a useful addition to the furniturc. On the whole, the organization is tolerable. 2. Fuir punctuality of attendance is observed; but the degree of regularity is only moderate. Wet weather kept many of the children away on the day of examination. The derneanour of the pupils is fair ; but many points of order need closer attention. The government is not sufficiently firn and rigorous. 3. Lesson programmes are not made out in sufficient detail and properly graduated; but, on the whole, the instruction is tolerably well regulated. The methods do not exact enough work from the pupils, who, as a rule, display indifferent mental effort. 4. The average proficiency is moderate.

## Buchanan :-Regular inspection, 8th June.

Nunsbers enrolled:-Boys, 31 ; girls, 23 ; total, 54.
Numbers present:-Boys, 15 ; girls, 9 ; total, 24.

1. Closets have heen crected since the last inspoction of the school, and the material condition is now very passable. The furniture is sullicient and tolerably suitable, and the school stock, ample. 2. The pupils attend punctually, but ouly with moderate regularity. The government is mild, but firm and judicious; and the order, gencral appearance, and demeanour of the children continue rery satisfactory. 3. All the prescribed subjects are taught. The lesson documents are arrauged with great care and neatness, and show fair judgment. The teaching is carnest and painstaking, though but partially effective; too much has been done for the pupils-too little left them to do. 4. The arerage proficiency is tolerable in the first and third classes, and indifferent in the second.

## $\mathrm{C}_{\text {assinds }}$ :-Regular inspection, 18 th August.

Numbers enrolled:-Boys, 22 ; girle, 18; total, 40.
Numbers present:-Boys, 19 ; girls, 15 ; total, 34.

1. The materinl condition remains the same, but the organization has improred; the desks, which were formerly fixed to the walls of the school, have been remodelled and are now arranged in parallel groups. Except as regards first books, the school stock is fairly suficient and in good order. 2. Under the present tencher, the attendance has increased more than 50 per cent., and the children are both regular and punctual. The order is but indifferent; the pupils talk aloud, and the various simultancons movements are awkward and noisy. The discipline, however, is likely to becone more effective. 3. All the prescribed subjects are taught, but the lesson documents are not well arranged, nor is the classification of the pupils-correct. The teaching is energetic but unskilfal. 4. The average proficiency is below indifferent, but there is reason to expect better results in future. The present teacher has only been in -charge two months.

Denman :-Regalar inspection, 14th August.
Numbers enrolled:-Boys, 19 ; girls, 21 ; totnl, 40.
Numbers preseut:-Boys, 14; girls, 21; totn1, 35.

1. Some of the window casements are out of repair, but, in all other respects, the premises are in fair condition. The achool records arc in a very unsatisfactory state. 2. The attendance has improved of late, and is marked by a fair degree of regularity and punctuality. The pupils are as a rule, clean in appearance and well-behaved. The order is tolorable. 3. The lesson programmes are incomplete and not sufficiently explicit; and in some pointe are not framed with duc regard to the provisions of the standard. The methods are not unsuitable, but appear to lack energetic and judicious handling. 4. The general proficiency is moderate.

Hintox:-Regular inspection, 4th October.
Numbers enrolled :--Boys, 22 ; girls, 21 ; total, 43.
Numbers present:-Boys, 18; girls, 21 ; total, 39.

1. The interior of the schoolroom needs renovating; otherwise, the material condition of the premises is fair. The organization is tolcrable. 2. The attendance is tolerably regular and punctunl. The attention of the pupils is unsteady, and whispering and other disorderly prnctices prevail. The government needs to be more rigorous and resolute. 3. The subjects of instruction acrord with the standard, but the lesson programmes are too gencral to be of much use. The mothods of teaching are to this extent unsuitable, that the pupils are not made to help themselves, and their mental training is thas but very moderate. Their progress through the various classes is very slow. 4. The average proficiency ranges from moderate to tolerable.

JrRry's Puains :-Regular inspection, 11th August.
Numbers enrolled:-Boys, 36; girls, 35 ; total, 71.
Numbers present:-Boys, 34 ; girls, 30 ; total, 64.

1. Two more desks and forms are needed, and the ont-offees aro in very bad repair. With these exceptions, the material condition and organization of the school are fair. 2. The attendance is, on the whole, regular and punctunl. The gorernment is mild, but tolerably firm and consistent; and sereral objectionable features in the discipline noted at the last inspection have now disappearcd. 3. The instruction is pretty well regulated, and the methode are moderately good and applied with zeal. The teaching power is insufficient for present demands upon it. 4. The average proficiency is tolcrable.

Lagova:-Regulnr inspection, 19th May.
Numbers cnrolled :-Boys, 24 ; girls, 23 ; trotal, 47.
Numbers present:-Boys, 14 ; girls, 21 ; total, 35.

1. The building is suitable in most respects, but is in need of some repairs and additions. There is sufficient furniture, but the desks are of a bad shape. The organization is fair. 2. About two-thirds of the papils attend regularly; the punctuality is not so good. The general discipline and order are fairly satisfactory, and the moral tone is good. 3. Needlework is not taught, nor is singing ; otherwise, the prescribed course of instruction is followed. The instructional docunents are compiled with fair skill; and the methods employed are appropriate, and applied with vigour, earncstness, und success. 4. The children yield an active, intelligent, uttention under examination; are self-reliant ; and, in point of mental training aud attainments, will compare favourably with those of any similarly organized selool in the district. The average proficiency is from fair to very fair.

Matriand, East:-Regular inspection, 23rd and 24th October.
Numbers cnrolled:-Boys, 75; girls, 61; total, 136.

$$
\text { Numbers present:-Boys, } 64 ; \text { girls, } 51 \text {; tolal, } 115 \text {. }
$$

1. The schoolroom is a good one, commodious and very fairly organized. The fencing is bad in places, but is about to be repaired. A water supply is argently needed. 2. The discipline has improred slightly, though still defective in the points noted at the last inspection. Steady attention, prompt unquestioning obedience, and a willingness to work on the part of the pupils have yet to be secured. 3. All the prescribed subjects are trught, and fair skill is shown in the constraction of the lesson docnments. The methods ure, genernlly spenking, appropriate ; but need to be accompanied by more vigoroua and thorough exnmination. 4. The average proficiency is tolerable.

Mattland, West (St. Mary's):-Regular inapection, 7th and 8th November.

$$
\text { Numbers enrolled:-Bors, } 92 \text {; girls, } 82 \text {; totial, } 174 .
$$

$$
\text { Numbers present:- Boys, } 81 \text {; girls, } 70 \text {; total, } 151 .
$$

1. The building is too small for the present attendnnce, and is inconveniently crowded with superfluous articles of furniture. Its appearance is dingy and uminviting, and various repairs and alterations are needed. The organization, under existing circumstances, is reasonnbly good. 2. The discipline continues effective, and the moral tone is good. 3. The course of instruction is comphete and regulated with fair judgment. The methods are fuir in kind and are apphed with rigour and carnestiness, bit the with needs to be more frequently and thoroughly tosted as it procecds. 4. The pupils are very attentive under exaniution and evince the mental training. The arerage proficiency is nenrly fair in the first cless, aud tolerable in the others.

Mattland, West (St. Paul's) :-Regalar inspection, 13th November.
Numbers cmrolled:-Boys, 55 ; girls, 47; total, 102.
Numbers present:- $\mathrm{Boys}_{0}$, 44; girls, 38; total, 82.

1. The schoolroom is commodious and fairly equipped. The want of another group of deaks, however, is much felt. The inside walls recuire to be whiterushed, and the playshed and fences are out of repair. A weter supply has yet to be provided. On the whole, the organization is catisfactory. 2. The attendance movements $n$ increased and is rensonably regular and punctua. In other respects the discipline is movements need to be conducted with more quetress and previeion. In one are neatly kept. The teaching appears painstaking, but is not thorough. 4. The average proficiency ia moderate.

Morpeti (Primary) :--Regnlar inspection, 10th and 11th October.
Numbers enrolled:- Boys, 17; girls, 15; total, 32.
Numbers present:-Boys, 17 ; girls, 15 ; total, 32.

1. Some defects in the roof of the building noted at the last inspection have been remedied. The promises generally are now in very fair condition and well found in the necessary applinnces. The organization is fair. 2. The pupils attend with fair regularity and punctuality, and are, with few exceptions, ment and elean. All are well-bchaved, orderly, and attentive. 3. The instruction comprises all the preseribed subjects, and is judicionsly regulated. The methods are of arcrage merit, and are applied with rigour and fair effect. 4 Thder exmmination, the attention of the pupils is prompt and well sustained. The average proficiency is nearly fair.

> Monpetr (Infants) :-Regalar inspection, 10th October.
> Numbers enrolled :-Doys, 23 ; girls, 36 ; total, 59.
> Numbers present:-Boys, 21 ; girls, 29 ; total, 60.

1. The school building is in good condition, and, with the addition of a couple of desks and a clock, the equipment would be reasonably complete. The supply of apparatus and books is sufficient, but the latter articles appear to have suffered from rough usage. 2. The pupils are tolerably regular and punctual, and and in aperance. On the whole the discipline and order are fair. 3. The classification is tolerably and clean in appearance. On the whole, the discipline and order are fair. 3. The cassification is tolerably correct, but several of the older pupils should have been promoted to the primary departwent. The
methods are moderately suitable, and applicd with fair industry. 4. The gencral proficiency approaches methods are moderately suitable, and applicd with fair industry. 4. The gencral proficiency approaches tolerable.

## Musclebrooz:--Regular inspection, 11 th September.

Numbers enrolled:-Boys, 72 ; girls, 55 ; total, 127.
Numbers present:-Boys, 54 ; girls, 41 ; total, 95.

1. The interior walls are very dings; the roof appears leaky; and the floor in places is out of repair. The organization is fair, and the supply of books and apparatus sufficient. 2. About thrcefourths of the cliddren attend regularly; and the punctuality is fair. The marching is irregular, and
 some of the simultaneous morements in the seais are wanting in quietncess and precision. The lesson docu-
pupils are neat, clean, and well-bebaved. 3. All the prescribed subjects arc taught, and the lesser menta are compiled with tolerable judgment. The methods are not unsuitable, but need more vigour and animation in their application; and the results of the teaching require more coustant and thorough testing. 4. The average proficiency is moderate.

## Paterson:-Regular inspection, 20th July.

Numbers enrolled:-Boys, 29 ; girls, 22 ; total, 51.
Numbers present:-Boys, 23 ; girls, 18 ; total, 41.

1. Some of the window-panes are brokon, and the walls of the schoolroom need fresh coloring. The fencing, which wus very dilapidated, is being renewed. In other respecta the material condition is reasonably good, nad the organization is passable. 2. The pupils, as a rule, are punctual but irregular in their attendance. The order is tolernble, but nore attention to minutix is requisite. Whispering, guessing, prompting, and copying, are bad habits prevalent in each class. 3. The prescribed subjects are taught. The time-table is fairly suitable, but the lesson programmes suspended are not thoroughly documents, nor do they accord to the required extent with the provisions of the standard. The instruction is earnest but unskilful; and the results much below the standard. 4. The average proficicncy is mall.

## Scone :-Regular inspection, 22nd June.

Numbers enrolled :--Boys, 59 ; girls, 74; total, 133.
Numbers present:-Boys, 37 ; girls, 56 ; total, 93.

1. Since last inspection the premises lave been enclosed widh a substantial tworailed fence. Repairs are needed to the roof and ceiling of the schoolhouso, and the out-buildings are in a very dilapi dated condition. The school is well found in all the ordinary requisites; and the furniture is both sumf cient and suitable. 2. About throe-fourths of the pupils are regular and punctual. With very few exceptions, they are clean, ordecly, and attentive. The general tonc of the school is pleasing. 3. Tho course of instruction is complete; the lesson documents are compiled with tolerable skill; and the teaching is carnest and of fait effect. 4. The average proficiency ranges from tolerable to fair.

> Singletox :-Regular inspection, 6th and 7 th December.
> Numbers enrolled :--Boys, 93 ; girls, 58 ; total, 151.
> Numbers present:-Boys, 86 ; girls, 45 ; total, 131.

1. A water supply is muel needed, but in all otiter casentials the material condition is very good. Thero is an abundant supply of ordinary requisites, and the general organization is good. 2. A fair degree of regularity obtains. The order is pery fair, and the general appearance and demeanour of the children pleasing. 3. The course of instruction is complele and fairly regulated. The teaching is cnergetic and painstaking, but too much is dono for the papils. They are thus deficient in self-reliance and but moderately disposed to work. A fourth class has been formed within the year. 4. The averago profeciency approaches fair. Necdlework and drawing are well taught.

Woodrille:-Regular inspection, 21st April.
Numbers enrolled:-Boys, 27 ; girls, 24; total, 51.
Numbers present:-Boys, 18 ; girls, 20 ; total, 38.

1. The promises are in tolerable condition, but need painting; the fencing is bad. A book-press is wanted; otherwise, the supply of furniture is fairly sufficient. 2. Tolerable regularity and punctuality are sccured; in other points the discipline is less satisfactory. The government needs to be moro firm and equable. 3. The classification is pretty corrcet, but the younger clildren appear to have been somewhat neglected. The lesson documents are not punctually preparch. The teaching is conducted with zeal and reasonable industry; but matters foreign to the school work have been allowed to interfere with its proper performance. 4. The proficiency of the third class is fair; of the first, indifferent. The arerage proficiency is about tolerable.

## II.--ROMCAN CATHOLIC SCHOOLS.

Brandford:-Regular inspection, 29th June.
Numbers enrolled :-Boys, 36 ; girle, 15 ; total, 51.
Numbers present:-Boys, 30 ; girls, 15 ; total, $4 \overline{5}$.

1. The schoolroom is commodious and fairly organized. Another desk and a supply of hat-pegs are needed. 2. Only about half of the pupils are regular and punctual ; the attendnnee of the others is indifferent in both particulars. The appearance and deneanour of the children are eatisfuctory, and the order is fair. 3. The instruction is apitably arranged, and tho classification of the pupils is in general correct. The methods are tolerably approprinte, but too monotonous in their application. 4. The average proficiency is moderate.

> Lociivyar:-Regular inspection, 27th September.
> Numbers enrolled :-Boys, 35 ; girls, 25 ; total, 60.
> Numbers present:-Boys, 23 ; girls, 18 ; total, 41.

1. The schoolroom is a good one, but partly occupied by ehurch furnituro. Some of the desks are old and unsteady, but in general the equipment and organization may be regarded as fair. 2. The children arc, with sorme fow exceptions, punctual in their attendance, but about onc-third of the number are rery irregular. The discipline is tolerable in most respects, but needs to be directed towards producing greaster mental activity on the part of the pupils. At prosent, fow of them are willing to work unless gouded to it. 3. The lesson documents are arranged with tolerable skill. The methods are not unsuitable, but want more animation aud earnestncss in their application. 4. The general proficiency is moderate.

Maitland, East (Boys) :-Regular inspection, 25th Octobor.
Number enrolled :-62.
Number present:-53.

1. The schoolroom is too small, but is otherwise suitable; and the general organization is very fair The windows arc out of repair. 2. The pupils are reasonably regular and punctual. The general discipline is good, and the order and demeanour of the pupils are very creditable. A fow need to be more careful about their personnl appearance. 3. Except singing, all the prescribed subjects are tnught. The lesson documents are arranged with fair judgment, and the teaching is intelligent and carnest. The first class is disproportionately largo. 4. The average proficiency approaches fair.

> Maithand, EAST (Girls and Infants):-Regular inspection, 26 th October.
> Numbers eurolled :-Boys, 11 ; girls, 51 ; total, 62.
> Numbers present: :- Boys, 11 ; girls, 42 ; total, 53.

1. The materinl condition and organization ure, on the whole, good. 2. The pupils are fairly regular and punchaal, their generul demennour pleasing, and their movements quiet and orderly. 3. Tho instructional arrangements are tolerably effectire. The toaching is earnest and painstaking, but the methods appear to be too suggestive. 4. The average proficiency is nearly tolerable.

Matiland Wfist (Boys) :-Regular inspection, 14th, 15th, and 22nd Noyember.
Number enrolled :--162.
Number present:-130.

1. Most of the furniture is old and but moderately suitable; but, in other reapects, the material condition and organization are very fair. A lavatory and proper supply of hat-pegs are necessary. 2. The general discipline continues satisfactory, and the moral tone is good. 3. Singing is not taught, but, otherwise, the prescribed course of instruction is followed. In tho fourth class, Latin, algebra, and bookkceping, are extra subjects introduced. The lesson documents are well arranged, and the methods applied with zonl, industry, and intelligence. 4. The average proficioncy is very moderate in the first class, but in the others ranges from fair to very fair.

# Martland, West (Giilb) :-Regular inspection, 20th and 21st November. 

Number enrolled :-1.13.
Number present:-107.

1. The seboolroom is in good condition and supplied with sufficient furniture, apparatus, and books. A larger playground is much necded. In other respects the organization continues satisfactory. 2. Some of the pupils appear to be unpunctual; otherwise, the discipline is salutary, and the demeanour, general appearance, and order of the pupils are highly creditable. 3. All the prescribed subjects are taught; and, except in the case of the younger pupils, the classification is correct. The teaching is conducted with zeal and intelligence. 4. The average proficiency in the fourth cluss is fair ; in the rest, from tolcrable to fair.

Maitiand, Wrst (Infants) :-Regular inspection, 16th and 20th November.
Numbers enrolied :-Boys, $\mathbf{5 1}$; girls, 91 ; total, 142.
Numbers present:-Doys, 51; girls, 91; total, 142.

1. The school oncupies the lower floor of the building in which the girls are taught. It is tolerably commodious, fairly furnishecl, and organized. The playground is much too small. 2. The attendance has increasod greatly of late, and is reasonably regular and punctual. The children are well trained to habits of order and obedience; and, as a whole, are neat and cican in appearance. 3. The instruction is earnest, well regulated, and suited to the capacities of the children. 4. 'lhe average proficiency is fair.

Mobpetir :-Regular inspection, 12th October.
Numbers enrolled:-Boys, 36 ; girls, 38 ; total, 74.
Numbers present:-Boys, 35 ; girls, 35 ; total, 70 .

1. The building is old and dilapidated, and not large enough for present requirements. The furniture is sufficient in quuntity, but only moderately suitable. The supply of apparatus and books is ample. 2. The pupils attend with reasonable punctuality, but more than one-fourth of the number are very irregular. As a whole, they are respectiul and obcdient, readily attontive, and capable of sustained mental effort. Making allowance for the state of the promises, the order is very fair. The moral tone of the school is very satisfactory. 3. All the prescribed subjects but singing are taught. The classification is appropriate ; the lesson documents are arranged with very fair skill ; and the teaching is earnest, and, in most subjects, thorougl. 4. The arerage proficiency exceeds fair.

Musclebrook :-Regular inspection, 15̈th June.
Numbers enrolled:--Boys, 81; girls, 66 ; total, 144.
Numbers present:-Boys, 56 ; girls, 39 ; total, 95.

1. The echool is held in the Roman Catholic Church, which cloes not ifford sufficient accommodation for the present attendance, but is otherwise tolerably suitable. The organization is tolerable. 2. The pupils are punctual in attendaree, but irregular. Allownnce being made for the overcrowded state of the room, the order is very fair. The government, though not aufficiently rigorous, is still fairly effectivc. 3 . The instruction is in accordance with the standard, and combraces all subjects but singing. The lesson documents are arranged with tolerable judgment. The methods are painstaking rather than skilful, and produce passable results. 4. The average proficiency is tolerable.

Pheamix Park:-Regular inspection, 3rd October.
Numbers enrolled :-Boys, 16 ; girls, 14 ; total, 30.
Numbers present:-Boys, 16 ; girls, 14; total, 30 .

1. The premises aro unfenced; their material condition and organization aro moderately aatisfactory. 2. The attendance is not very regular or punctual ; the disciphine is still weak, and its results indifforcut. 3. The instruction is more carefuly arranged than formerly, but the teaching wants force and simplicity. 4. The average proficiency is about moderate, and shows some improvement.

Sincteton :-Rcgular inspection, $44_{h}$ and 5th December.
Numbers enrolled:-Boys, 86 ; girls, 101; total, 190.
Numbers present:-Boys, 74; girls, 81 ; total, 155.

1. The schoolroom is a good onc, and well-appointed. A few more desks nere necessary, and a larger supply of bat-pegs. The organization is very fair. 2. The order is reasonably good, and in other respects the rosults of the discipline are very fair. 3. Improvement is perceptible in the mode of preparing the lesson documents. All subjects but singing are taught, and the instruction is carcful and fairly effective. A 4th class has been formed within the gear. 4. The average proficiency is from tolerable to fair.

## III.--PRESBTTERIAN SCHOOL.

Martland, West :-Regular inspection, 1 st Norember.
Numbers enrolled :-Boys, 36 ; girls, 23 ; total, 59.
Numbers present:-Boys, 28 ; girle, 16 ; total, 44.

1. The condition of the premises is eatisfactory, and the organization very fair. The school is well supplied with nll nocessary worling materials. 2. Fair punctuality of attendance is obtained, but the degree of regularity is less satisfactory. On the whole, the order is fair, but the gorernment secms too easy and indulgent. The demeanour of some of the clder boys is very objectionable. 3. The course of instruction includes all subjects but singing, and is regulated with fair skill. The tenching is painstaking, but not sufficiently vigorous and penctrative. 4. The arerage proficiency is tolerable.

## IV.-WESLEYAN SCHOOL.

Martiand, West:-Regular inspection, 30th and 31st October.
Numbers enrolled:-Boys, 89 ; girls, 57; total, 146.
Numbers present:-Boys, 83 ; girls, 50 ; total, 133.

1. The out-offecs have reccired partial repair; in other particulars, the condition of the promises remains the same us last reported. A. water supply is bndly needed. The furniture is indifferent in quality, and insufficient for present requirements. As far as the teacher is accountable for it, the organization is very fuir. 2. With few exceptions the pupils are regular and punctual. The discipline is effective, the order is very fair, and the moral tone satisfactory. 3. Drawing has not been taught of late to the 4th class; otherwise, the course of instruction is complete and well-regulated. The teaching is energetic and earnest, and the melhods appropriate. 4. The proficioncy of the 4 th class pupils appronches very fair; the averago proficiency is nearly fair.

## NEWCASTLE DISTRIOT

Dbtailed Statement showing the condition of the Certified Denominational Schools inspected as regards1. Their matorial condition. 2. Their moral character. 3. The sabjects and methods of instruction. 4. The proficiency of the pupils.

## OHURCH OF ENGLAND SCHOOLS.

Dungog:-- Visited, 31st October.
Present at examination:-Boys, 24; girls, 11 ; total, 35.

1. The promises are in good condition, fairly adequate to the wants of the place; and the school is pretty woll organized. 2. The discipline is weak and lax, and the order of the pupils unsatisfactory. 3. The occupation is appropriate and regulated with tolerable judgment. The methods are reasonably intelligent, but feebly applicd and of small effect. 4. The average proficiuncy is indifferent.

Erina : - Visited, 22nd November.
Present at examination :-Boys, 13 ; girls, 13 ; total, 26.

1. The building is fairly sufficient, but dimly lighted, badly aired, and poorly equipped. 2. Tho pupils are indolent, indiferently attentive, untidy, noisy, and disorderls. The discipline is very weak. 3. The instruction is fairly appropriate and inuparted with moderate effect, but badly arranged. 4. The gencral proficiency ranges from moderate to tolerable.

Gosford :-Visited, 24th November.
Present at camination :-Boys, 20; girls, 15; total, 35.

1. The sehoolroon is fairly commodious but in bad repair, and not kept with satisfactory cleanliness. The stock of furniture, apparatus, and books is reasomably satisfactory. 2. The discipline is rather fecble and the moral aspect of the school low. 3. Except drawing, the prescribed subjects are taught, and arranged in the usual guides which are passably stilfnl. The instruction is tolerably intelligent, and of reasonable promise. 4. The general proficiency is about moderate.

Hexhays:-Visited, 20th July.
Present at examination :-Boys, 10 ; girls, 13 ; total, 23.

1. The schoolroom is in moderate repair and fairly sufficient, but very unsuitably furnished. The teacher's residence is very dilapidated and uncomfortable. 2. The moral aspect of the school is tolerable. 3. The course of instruction comprises the subjects prescribed, except drawing and singing, and is arranged with tolerable care and skill. The methods are moderately effective. 4. The general proficiency is narly moderate, but the mental culture sma:l,

Mimer's Foimst :-Visited, 11th August.
Present at examination :- Boys, 19 ; girls, 26 ; total, 45.

1. Tho building is in good repair, suflicient and suitable, but very poorly furnished. The supply of apparatus and books is satisfactory. 2. The pupils are excessively shy, but attentive, well behared, and in moderate order. 3. The standard is observed, excent as regards drawing and vocal music; and the occupation is regulated with moderate judgment. The instruction crinces the unskilful use of simultaneous answering, and is otherwise of small valuc. 4. The average proficiency and nental culture are indifferent.

Nbwoastle, Christ Chench :--Visited, 3rd to 5th May.
Present at exanination:-Boys, 96 ; girls, 64 ; total, 160.

1. The room is awkward in shape, and inadequato to the requirements, but fairly lighted and arred and effectively organized. The want of a playground is a serious defect. 2. In general, the attention and order of the pupils may be considered pretty fair ; but the discipline needs a more ssttematic and judicious application. 3. The occupation is appropriate but not arranged with satisfactory distinctness. The instruction is fairly energetic and intelifigent, but wanting in deliberation and orderly procedure The value of the methods varies from noderate to fair. 4. The aterage proficioncy is about tolerable.

Newcastue (St. Johu's) :-Visited, 12th May.
Prescut at examination:-Boys, 26 ; girls, 22 ; total, 48 .

1. The site is low and damp; but the buildings arc in good repair, and fairly suitable. The school is well found in furniture, apparatus, and books. 2. The disciplino is very lax; and the habits of the pupils are rather noisy and disagreeable in consequence. The order is unsatisfactory. 3. Singing is omitted otherwise, the course of instruction accords with the standard. The instructional guides are pretty well prepared, but not always satisfactorily obsurved. The methods are rensomably intelligent, but not effectual 4. The arcrage proficiency is nearly tolerable ; but the mental culture only small.

Ramiond Terrach:- Visited, 27th and 28th July,
Present at cxamination :-Boys, 37 ; girls, 16 ; total, 53.

1. The premises are suitable, and in good condition; and the school is effectively organized. 2. The discipline is feeble; and the pupils are very indolent, addicted to noisy habits, and in poor order. 3. Drawing is not taught, but the other subjects agree with the standard, and are arranged with tolerable care and judgment. The instruction, as witnessed, is fuy too suggestive, and not sufficiently vigorous and decided. 4. The average proficiency is below moderate, and the mental culture indifferent.

Stroud:-Visited, 16th August.
Present at examination:-Boys, 25 ; girls, 22 ; total, 47.

1. The promises are in good condition and very suitable. The desks are very arkwardly arranged otherwise, the organization is effective. 2. The pupils are not drilled, and the discipline is on the whole wal. They are indolent, inattentive, noisy, and ignorant of good order. 3. The subjects are appropriate, and regulated with moderate skill. the instruction is monotonous and mechanical, but carnest and fainly assiduous. 4. The average proficiency is about moderate, but the mestal culture small. Three-fourths of the pupils had been very irregular prior to the examination.

Upper Bexdolba:-Visited, 2nd Norember.
Present at examination:-Boys, 14 ; girls, 17 ; total, 31.

1. The school is condncted in the church, whirh is a good room, but very unsuitably and insufficiently furnished. 2. The moral tone of the school is fair. 3. The occupation is appropriate and arranged with fair judgment. The instruction is energetic, inteligent, and rensonably effective. 4. The averago proficiener is about tolerable.

Wallsend :- Fisited, 25th and 26th July.
Present at examination:-Boys, 37 ; girls, 39 ; total, 76.

1. The school is in good repair, suitable, sufficient, and fairly organized. 2. The moral tone of the school is satisfactory. 3. The subjects are appropriate and well arranged. The methods are fairly impressive, intelligent, and effectual. 4. The average proficiency ranges from tolerable to fair.

## ROMAN CATHOLIC SCHOOLS

Clarencen Town :-Visited, 25th October.
Present at examination:--Boys, 19 ; girls, 19; total, 38

1. The school is conducted in the cburch, which is a fair slab and shingle building, tolerably well furnished and adequately provided with appuratus and books. 2. The discipline is not sufficiently energetic and methodical, but the moral aspect of the school is tolerable. 3. The classification is low and not satisfactorily distinct, but the occupation is suitable, and arranged witle reasonable skill. The instruction is wandering at times, but, as a whole, tolerably effective. 4. The general proficiency ranges from tolerable to fair, but the mental culture is small.

## Kncumarr :-Visited, 21st November

Present at examination:-Boys, 9 ; girls, 17 ; total, 26.

1. The achoolroom is in fair condition, and tolerably well organized. 2. The moral aspect of the school is moderate. 3. The occupation is fairly approprinte and pretty well arranged. The instruction is careful, but rather superficial and inammate. " 4 . The average proficiency is moderate to tolerable, but the mental culture, small.

Miller's Forest:- Visited, 3rd Auguet.
Present at examination :-Boys, 26 ; girls, 25 ; total, 51.

1. The room is small and awkrard in shape, but in good repair for the kind, and provided with a reasonable supply of furniturc, apparatus, and books. 2. The moral aspect of the school is very moderate. 3. The subjects are suitable, and arranged with tolcrable care and judgment. The instruction is mode. rately skilful and effective. 4. The general proficiency is moderate.

## Newoastis:--Visited, 13th to 15th June.

Present at examination :-Boys, 85 ; girls, 73 ; total, 158.

1. The room is commodious, fairly suitable, in good condition, and pretty well organized. 2. The pupils are clean, attentive, and move in good order, though with unnecessarynoise. The discipline evinces too much bustle, but is, otherwise, fairly suitable and eliective. 3. The occupation is appropriato and tolerably well regulatell ; but the instructional documents are not prepared with eatisfactory neatness. The instruction is not imparted with sufficiont calmness and deliberation; but it is rery energetic, fairly intelligent, and effective. 4. The average proficiency ranges from tolerable to fair.

Raymond Tertect:-Visited, 21st July.
Present at exnmination :-Boys, 21; girle, 21; totul, 42.

1. The building is fair for the kind, reasonably sulficient and adequately provided with roquisites. 2. The discipline wants nethod and energy, but the moral aspect of the school is tolerable. 3. The occupation is suitable and arranged with care and tolerable judgment. The instruction is earnest and constant, but not clear and distinct. 4. The arcrage proficiency ranges from moderate to tolerable.

## PRESBFIERIAN SCHOOLS.

## Dingo Carek :-Visited, 13th September.

$$
\text { Present at examination :-Boys, } 10 \text {; girls, } 17 \text {; total, } 27 .
$$

1. The premises are in fair condition for the kind, but the stock of furniture is only moderate. The supply of apparatus and books is fairly satisfactory. 2. The pupils move in tolerable order, but several are forward in manner, indolent, unsteady, and inattentive. 3. Needlework, drawing, and singing are not taught; otherwise, the occupation is correct, but imperfectly arranged. The instruction is envnest, but imparted by mechanical and antiquated methods. 4. The average proficiency ranges from moderate to tolerable.

Nefoastle :-Visited, 9th to 11th May.
Present at examination :- Boys, 108; girls, 77; total, 185.

1. The school is conducted in two adjoining rooms, awk ward in shape, but fairly sufficient and suitably organized. 2. The disciplinc is very appropriate und effeclive, and the moral tone of tho school good. 3. The occupation is corwet and properly arranged. The instruction is earnest, intelligent, fairly ekilful, and effective. 4. The average proficiency ranges from tolerable to fair, and the mental culture is fair.

## SYDNEY DISTRICT.

Detamed Statement of the condition of Certified Denominational Schools in the Sydney District, inspected during the year 1871 :-
The remarks under head 1 relate to material condition of Schools.
2 to their moral character.
3 to the subjects and methods of instruction.
4 to the proliciency of the pupils.
Balmare (C.E.) :-Visitcd, 11th August.
Numbers prescat:-Boys, 56 ; girls, 39 ; total, 95.

1. The state of the school premises and the appointments are good. 2. The several fentures of the organization are satisfactory, and the discipline is healthy. 3. All the subjects preseribed by the Council are taught in a careful and methodical manner. 4. The average proficiency is very fair.

Baiminn R.C. (Boys) ;-Visited, 6th October.

$$
\text { Number present :- } 35 \text {. }
$$

1. The school may be styled one without a schoolroom, as it has to struggle on as best it can in a room that is conjointly occupied by a sehool for females, which is not under tho Council's superrision. The eexes are professedly separatel by a dilapidated wooden partition that does not reach to the ceiling. There is a proper supply of desks and working material, but as therc are no out-ofices available for the boys, neither cleanliness nor deceucy can he ensured. 2. The organization of the scinool is as good as the circumstances pormit. The pupils are irregular and umpunctual in attendance ; they are fairly orderly, but the extrene noise and misrule in the adjoining department are serious hindrances to cffective teaching in the boys' classes. 3. Excepting singing, the preseribed subjeets are taught. 4. The average proficiency is barely moderate.

Camplrdown (R.C.):-Visited, 21st September.

$$
\text { Numbers present :-Boys, } 30 \text {; girls, } 32 \text {; tolal, } 62 .
$$

1. The school premises are tolerably satisfactory in condition, and the applianecs are suitable and reasonably sufficient. 2. The schoolwork is carried on in a satisfactory manner, and the classification of the pupils is correct. The lesson documents are calculated to ensure systematic work. The children are clean, orderly, and well behared. 3. All the prescribed subjects are taught, the mothods are intelligent, but they insufficiently induce effort in the pupils; with this exception the tone of the sehool is satisfactory. 4. The proficiency rangos from tolerable to fuir.

> Cimpyendale (Wes.) :-Visited, 17th August.
> Numbers present :-Boys, 69 ; girls, 61 ; totail, 130.

1. The school premises are spacious, well appointed, and in good condition. 2. The pupils are classified correctly, and the school work is regulated by judiciously derised lesson documents. The discipline is healthy, and the tone of the school pleusing. 3. The ordinary subjeets are taught, and in an carnest and careful manner. 4. The average proficiency is fair.

Cilrist Church (C.E.) :-Visited, 28th, 29th May.
Numbers present:-Boys, 131 ; girls, 72 ; total, 203.

1. The echool premises are good and well appointed. 2. The organization is vary faulty, and the discipline absolutely bad. 'That this importunt sehool is in such a state is to be regretted. 3. The ordinary subjects are taught earnestly, no doubt, but in a rery mechanical manner. 4. The proficiency of the pupils ranges from moderate to tolerable.

## Christ Churcie C.E. (Infants) :-Yisited, 28th Augest. <br> Numbers present:-Boss, 80 ; girls, 55 ; total, 135.

1. The school building is in a good state of repair and is amply found in material appliances, and the echool is tolerably organized. 2. The attendance shows a slight improvement, but the pupila are unpunctual, and screral present a elovenly dirty appearance. Their general conduct is fair ; the government is mild and tolerably effective. 3. The coursc of instruction is regulated with passable judgment. The methods are appropriate, but require to be applied with increased encrgy and skill. 4. The proficiency is moderate.

## Dhblinghubst (C.E.):-Tisited, 9th August.

Numbers present:-Boys, 70 ; girls, 36 ; total, 106.

1. The school building is in a good state of repair, and its materinl appliances are ample. 2. The pupils are clean, fairly punctual, tolerably regular, und becomingly behared. The "marching" is rather noisily performed, but, with this exception, very fair order is maintained. 4. A proper classification obtains. The instruction is regulated with passable judgment. The methods are suitable and upplicd with earnestness and industry. 4. The areage proficiency is fair.

> Dabinguyurst C.E. (Infants):-Visited, 9th August.
> Numbers present:-Boys, 40 ; girls, 28 ; total, 68.

1. The scheolroom and its appointments are satisfactory. 2. The classification of the pupils is correct, but the teacher fails to distribute her attention to each of tho classes cqually ; this is very noticeablo in the lower portion of the school. The pupils are clean and cheerful, but rery inattentive; the discipline being lax, much of this is undoubtedly due to the tencher's fecble state of health. 3. The instruction is of the kind common to infants' sehools. 4. The proficiency ranges from moderate to tolerable.

Doubie Bay (C.E.) :-Visited, 10th August.
Numbers present:-Boys, 37 ; girls, 55 ; total, 92.

1. The matcrial condition of the school is good. 2. A correct organization regulates the work of the school ; the discipline secures fair order in all the classes, but the "montal effort" of the pupils of the first class is not satiefactory. The moral tone of the school is good. 3. All the prescribed subjects are taught in an inteliigent and methodical manner, but in the lowest class, especially, there is a great want of thoroughness in the work. 4. The avcrage proficiency is tolerable.

Double Bay C.E. (Infants) :- Visited, 10th August.
Numbers present:--Boys, 52 ; girls, 10 ; total, 92.

1. The school is iu good material condition and fairly organized. 2. A fair attendance is secured, but it is marked by some degree of irregularity. The pupils are tolerably punctual and elcan. Their general behariour is middling satisfactory. The government needs to be characterized by greater tact and firmness. 3. All the prescribed subjects are taught. The lessou documents are arranged with moderate judgment; the methods are suitable, but require to be applied with increased cnergy and effect. 4. The avernge proficiency ranges from tolerable to fair.

Double Biy (R.C.) :- Visited, 25th August,
Numbers present:-Boys, 35 ; girls, 14; total, 40.

1. Noticeable defects are the rocky and unlerel state of the playground, and the aseless condition of what is termed the lavatory. In other respects the school is materially in a satisfactory state. 2. The organization is defective, more particularly so in the classification of the pupils. The disciplino ensurcs very fair order; but judging by the prevalent prompting and copying that goes on in the classes, the moral tone of the school is low. 3. Wxecpling singing the prescribed subjects are taught; but the results imply that the methods are not penetrative. 4. The proficiency ranges from indifferent to tolerable.

## Ebshine-Staeet (Presbyterian) :- Visited, th September. <br> Numbers present:-Boys, 22 ; girls, 26 ; total, 18.

1. A now gallery has been erected, the inside of the schoolroom painted, and a portion of the playground covered in since last inspection. 2. The attendance has diminished by the willdrawal of pupils to other echools. The order and discipline are of a passable character. 3. The instructional documents are arranged with tolerable judgment. Tho methods aro in tho main appropriate, but are below the nverage in point of merit. They appear to be applied with fair diligence. 4. The proficiency is tolerable.

Grane (C.E.) :-Visited, 7th and 8th September.
Numbers present:-Boys, 61 ; girls, 33 ; total, 99.

1. The scloolhouse is an good structure ; but its furniture is both inadequate and bad. The grounds are cnclosed ; but the school has neither lavatory nor water supply. 2. The organization is very fanlty, and the disciplinc is weak and fails to excite eren a tolerable degree of activity in the classes. 3. The school course includes the preseribed subjects; but the instruction is neither spirited nor searching. 4. The proficiency ranges from indifferent to moderatc.

## Haymarket R.C. (Boys) :-Visited, 11th September. <br> Number present:-Boys, 156.

1. The school is taught in a portion of the Catholic Church, Haymarket, and, as is common in such cascs, the appointments are subordinated to church arrangements. The school space is much too small, and the furniture is inadequato and inferior. 2. The organization is as effective as the circumstances permit; the discipline effects tolerable order, punctuality, nad cleanliness. Respecting this latter matter, there is no proper school means of ensuring cleanliness. 3. The subjects prescribed are teught; but the methods would appear to have been insufficiently scarching, and prompting is prevalent in the classes. 4. The proficiency is tolerable.

## Elizabeti-strekt (Hebrew) :-Visited, 21st August. <br> $$
\text { Numbers present:-Boys, } 86 \text {; girls, } 50 \text {; total, } 136 .
$$

1. The achool is conducted in the Odd Fellows' Hall- $\pi$ commodious schoolroom, airy, and well lighted. It is suitably furnished. The playground is small; but provision is made for all necessary outbuildings. 2. The attendance las improved. The pupils are tolerably regalar and punctual, clean, and in fair order. The govermment is mild and fairly effective. 3. A proper classification obtains; the instruction is regulated by the usual guides; the methods are fairly suitable, and applied with earnestness and industry. 4. The proficiency is fuir.

Kent-strfet, Nobth, R.C. (Boys) :-Visited, 14th and 15th Scptember.

## Number present, 146.

1. The interior of the schoolroom requires cleansing, and a lavatory and a playsbed to be provided. Wxcept that the larger number of the desk aro old and cumbrous, the school is suitably furnished. 2. The attendance is said to be affected by the prevailing sickness. Under favourable circumstances, however, the pupils are irregular, and they are also very unpunctual. A large number are dirty in person and dress. The order is bad in the lower classes, and finir in the higher. 3. In general, the classification is judicious; the instruction is regulated by the usual documents; the methods are tolerably suitable, but need to be applied with increased intelligence and skill. 4. The average proficiency is moderate.

Kent-stineet, North, R.C. (Girls) :-Visited, 14th and 15th September.
Number present:-Girls, 102.

1. Execpting that there is no laratory, the echool building and its appointments are in a satisfactory state. 2. The pupils are properly clasgifiecl, and the provisious for thicir employment aceord with modern plans. The discipline effects very fair order, but; insufficiently influences effort; and self-reliant habits in the pupils. 3. The teaching is carnest and intelligent. 4. The proficiency appronches fair.

Kent-street, Soferm, R.C. (Boys) :-Visited, 16th October.

## Number present, 82.

1. The school is now conducted in a new school-house, a fine commodious brick building. Ample provision is made for light and rentilation. The great drawback, however, is the want of a play-ground. The echool is suppliid with suitable furniture and apparatus. 2. The pupils aro punctual, fairly regular, and well-behaved. The government is marbed by tact and intelligence, very fair order is secured, and the morul tone of the echool is heulthy. 3. The classification is proper under the circumstanens, the instructional documents are calculated to fulfil the ends in view, the methods are modern, and applied with earnestness, intelligence, and epirit. 4. The proficiency is rery fuir. The condition of the school reflects credit on the teacher.

## Kext-street, Sodti, R.C. (Girls and Infants) :- Visited, 16th October

$$
\text { Numbers present:-Boys, } 40 \text {; girls, } 91 \text {; total, } 131 .
$$

1. The character and arrangements of the building are those that subordinate the school to the church, and so much so, that effective organization is not to be expected. There is a great necessity for a lavatory and an additional supply of lat-pegs. 2. The pupils are tolornbly panctual, and, with a fer exceptions, cleanly in person. The order and general tone of the echool are satisfactory. 3. The in struction is tolerably methodical. 4. The proficiency ranges from tolerable to fair.

Newtown (C.E.):-Tisited, 23rd August.
Numbers prosent:-Boys, 15 ; girle, 14 ; totnl, 29.

1. The school is conducted in a portion of the church, and the organization is consequentily of a make-shift and imperfect character. The supply of muterial appliances is sufficiont. 2. With fer ex ceptions, the pupils are clean; they are punctual, but irregular. The order bas improved, and may bo estimnted as rery fair. The government is upparently harsh and unsympathetic. 3. The instruction comprises the usual subjects, and is regtlated with tolerable judgrnent. The methods are unskilful and ineflective. 4. The proficiency is very moderate.

## Nemrown C.E. (Tnfants) :-Visited, 23rd August. <br> Numbers present:-Boys, 27 ; girls, 18 ; total, 45.

1. With the exception that the room is somewhat dark, it is suited to its uses, and the working appliances are equal to the requirements. 2. The organization is satisfactory, and the discipline is tolerably effective. 3. The subjects common to infants' selools are taught; but the instruction is only moderately effective. 4. The proficiency ranges from indifferent to moderate.

Nrwpown (R.C.) :-Visited, 23rd October.

$$

1. The material state of the school is satisfactory to a very fair degree. 2. The pupils are properly classified, and effectively disciplined. 3. The teaching is fairly skilful in method, and is imparted in an intelligent manner. 1. The proficiency of the infants' division of the school ranges from moderate to tolerable, and in the other classes it reaches fair.

## Newrown (Weslcyan) :-Visited, 12th September. <br> Numbers present:-Boys, 76 ; girls, 46 ; total, 122

1. Since last inspection the graduated platform, on which the desks were fixed, has been removed, and the desks have been placed on a uniform level; the alteration, one of a retrogressive character, has been made in the interests of the Sunday School. 2. The order has much improved under the present tcacher; the pupils are clean, subdued in demennour, and well behaved; other features of the discipline are also reasonably satisfactory. 3 . Little exception can be taken to the classification; the lesson documents are compiled with fair judgment; the methods are modern, and applied with tolerabic skill 4. The proficiency is tolerable.

## Paddington (C.E.):-Visited, 22nd September.

Numbers present:-Boys, 36 ; girls, 31 ; total, 67 .

1. The echool-house is a substantial structure, and its internal and extornal appointments aro good. 2. The organization is correct, the discipline cffeets very fair order, but fails to ensure habits of attention and effort in the pupils. 3. The instruction deals with all the subjects that are prescribed for a school of three classes, but the methods are poor in results. 4. The proficiency is barely moderate.

Paddington (R.C.) :-Visited, 25th October.
Numbers prosent:--Boys, 26 ; girls, 51 ; total, 77.

1. The school building is of suitable character, but nothing has been dono to meet the external wants that have been previously reported. 2. The organization is salisfactory both in the classification of the pupils and in the arrangements for their proper employment and instruction; the childron in the first class are very noisy and restless ; otherwise, the order and gencril tone of the school are satisfactory. 3. All the prescribed subjects are professedly taught, but cortainly the singing could, with much comfort to a listener, be omitted. 4. The proficiency of the pupils is tolcrable.

Pabramatta-strfet (C.E.) :-Vieited, 18th and 19th September.
Numbers present:-Boys, 117; girls, 82 ; total, 199.

1. The school buildings are in good condition, and the school is well fonnd in furniture and apparatus. 2. The order and general discipline are very fair. 3. Except that insuficient time is deroted to the teaching of geography, the instruction is properly regulated; the lessou documents are in the main likely to answer the desired ends; the methods are suitable, and applied with zeal and painstaling. 4. The proficiency approaches fair.

Parramatta-street C.E. (Infants):-Visited, 18th and 19th Scptember.
Numbers present:-Boys, 82 ; girls, 70 ; total, 152.

1. In all respects the material condition of the school is satisfactory. 2. The organization is correct, and the discipline induces cleanliness, punctuality, and very fair order. 3. All the ordinary infants' school subjects aro taught with fair method. 4. The proficiency of the pupils is tolerable.

## Parramatta-street R.C. (Boys) :- Visited, Sth November. <br> Number present :-106.

1. The roof of the schoolroom requires to be ceiled, as the dust falls through in largo quantities; a lavatory and a playsied have yet to be provided. 2. The attendance is about stationary. it is marked by reasonable regularity; the pupils, are, however, unpunctual, and several present a slovenly untidy appearance. The order may be estimated fair. A tendency to unsteadiness is at times obscrvable. 3. The usual arrangements are in operation for rendering the iustruction systematic and progressive; suitable methods are in use, and the teaching is marked by earnestness and painstaking. 4. The proficiency approaches fair.

\text { Numbers present:-Boys, } 27 \text {; girls, 14; total, } 41 .
$$

1. The playground has been levellen, and is supply of water prorided, since last inspection. The material state of tibe school may, therefore, now be regarded as tolerably satisfactory. 2. The attendavoc is small for the neighbourhood. A good number of the elder children are sent to schools in Sydney. The pupils are tolcrably regular and punctual, and well behared; drill is not taught, and the discipline suffers in consequence. 3. The lesson docunnents arc compiled with but moderate judgment; excepting that the pupils preponderate in the lower classes, little fault, can be found with the classification. The methods are painstaking rather than skilful, and need to be marked by greater rigour and application. 4. The proficiency ranks from tolerable to fair.

> Rmprens (C.E.) :-Visited, Bth and 9th September.
> Numbers present:-Boys, 111 ; girls, 96 ; total, 207.

1. The material condition of the school is satisfactory. 2. The pupils are tolerably regular and punctual, and, with few exceptions, clenn. The order is wanting is steadiness; brenches of school discipline are frequent; the gorernment is feeble and deficient in firumess. 3. The classification is excoptionably low for the number of pupils in attendance, the highest class being a third. Numerous individual
 instances of frulty elassification occur. The instruction is regulted with por jor
taught during six hours of each week. One obvious eflect of this objectionable arrangement is, that the taught during six hours of each week. One obvious effect of this obstille progress in other branches. Tise methodst in the more mechanical branches, the teaching is productive of poor results. 4. The proficiency is barely moderate. The third, or highest class, is conspicuous for its low attainments.

## Redpern C.E. (Infants):-Visited, 5th September.

Numbers present:-Boys, 87 ; girls, 88 ; total, 175.

1. The schoolroom is in good condition and the applinnces are sufficient and well arranged. 2. A correct classification and suitable lesson guides ensure systematic school-work. The pupils are clean and fairly orderly, but they do not appear to have been traiued to understand that copying and prompting are grave taults. 3. The ordinary suljects are taught; the teaching whilst systomitic is not very educative, nor does it evidence thoroughness even in the more mechanical branches. 4. The proficiency ranges from moderate to tolerable.

St. Axdrew's (C.E.):-Visited, 30th and 31st August.
Numbere present:--Boys, 87 ; girls, 69 ; total, 156.

1. The school is in good repair, and is well found in suitable furniture and apparatus. 2, A respectable attendance is maintained; thie pupils are clean, and, with few exceptions, regular and punctual. The government is mild and fairly effective. The order may be described as very fair. 3. All the essential branches are taught. The instruction is regulated with fair judgment; the incthods are_modern and are applicd with earnestness and zeal. 4. The proficiency exceeds fair.

## St. Asminw's C.E. (Tufants):-Visitol, 30th Auguet. <br> $$
\text { Numbers present:-Boys, } 82 \text {; girls, } 52 \text {; total, } 134 .
$$

1. The portion of the building allotted to the infants is spocious and well rentilated, but it is ineffeetively separated from the mixed department by a wooden partition that does not reach the roof The most noticeable want is a supply of desks. 2. The several features of the organization are correct the discipline is effective and the tone of the school good. 3. The instruction is of modern type, and deals with the prescribed subjects in an intelligent manner. 4. The proficiency is fair.

## St. Andraw's (Presbyterian) :--Visited, 8th May. <br> Numbers present:-Boys, 72 ; girls, 43 ; total, 115.

1. The material condition of this selool is very unsatisfactory. A most serious obstacle to the efficient working of the school avises from the questionable use to which tho upper portion of the schoolhouse is applied. This is let to two families, which comprise a number of young children. The loud crying of one or other of thesc children, the constant tramp of their feet orer head, the barking of dogs belonging to the premises, and similar distructing noiges, combine to render the manintenauce of order a matter of extreme difficulty. 2. In point of numbers the sechool is nbout stationary. The attendance is irregular, and in the ease of the rounger pupils, unpunctual. The appearance of many of the children as regards neatness and clcanliness is unsatisfactory. The order has sensibly deteriorated since last inspection. 3. The methods are of passable merit, but owing to bad discipline, mainly, fail to produce adequate results. 4. The arerage proferiency is barely moderate. It is dillicult to gain the attention of the pupils, and well-nigh impossible to keep it. The answeriug is, as a consequeuce, random, thoughtless, and uninand weil.

St. Jamis's (C.E.) :-Visited, 3rd and 4th May.
Numbers present:-Boys, 90; girls, 44; total, 140.

1. The school-buidings are in fair repair, and aford ample accommodation for the number of pupils in attendance. The material defecta noted in a former report no longer cxist, and the condition of the school-premises may be regarded as satisfactory. 2. A falling ofl is noticeable in the attendance, attributable in part to unfavourablo weather. The pupils are tolerably regular, punctual, and clean. The government has improved in vigour and effect, and the general discipline and tone of the school hare much changed for the better. 3. Tho documents that regulate the instruction are compiled with care and judgment; the methods are appropriate, and are upplied, for the most part, with reasonable zeal and industry. 4. The average proficiency is fair. In all important featurcs of school-managoment the condition of the school has improved.

> St. James's C.E. (Tufants) : Tisited, 3rd May.

Numbers present:--Boys, 66 ; girls, 48 ; total, 114.

1. The condition of the school-premiscs and the applinnces are satisfactory. 2. The roatine is iudicious, and the discipline is fairly effective. 3. The course embraces all the subjects that are prescribed for infauts' schools. The methods are appropriate. 4. The attainments range from tolerable to fair.

$$

\end{gathered}
$$

1. The masterial condition of the school is satisfactory, and the furniture is sufficient and good; the shape of tho room, however, precludes a satisfactory arrangement of the desks. 2. The organization is correct, and the discipline, on the whole, effectiro. 3. All the prescribed subjects are taught in an intelligent manner. 4. The average proficiency is fair.

## St. Leonahds C.E. (Girls) :-Visited, 15th November.

## Number present :-30.

1. The material condition of this school is little altered from that described in last year's report. The schoolroom is crowded with Church and Sunday School furniture; proper organization is, therefore, out of the question. 2. The attendance has slightly improved, but is still below the required average. The order and discipline continue tolcrably satisfactory. 3. The pupils are classified with moderate judgment; the lesson-documents are poorly arranged ; the teaching is tolerably painstaking, but the methods are mechanical. 4. The proficiency is barely tolerable; the pupils are deficient in mental culture.

St. Ligonards (R.C.) :-Visited, 27th October.
Numbers present:-Boys, 59 ; girls, 35 ; total, 91 .

1. The school-premises are in fair condition, but neither playshed nor lavatory have yet been provided. The fumiture and working appliances fully meet the requiremonts. 2. The organization is correct, and the discipline is fairly effictive. 3. The lesson-documents provide for the treatment of all the prescribed subjects, but singing-judging by the results-might with advantage be omitted. 4. The instruction is carnest, methodical, and intelligent, and its results are fully fair.

## St. Leonarids (Prebbyterian) :—Visited, 22 nd August. <br> Numbers present:-Boys, 62 ; girls, 51 ; total, 113.

1. The schoolroom is a substantial stone structure, occupying a good position. The school is fairly furnished and tolerably well orgonized. A lavatory and a supply of water aro pressing requirements. 2. The attondance is Jair. The pupils are ciean, and tolerably punctual and regular. Execpt that some of the elder children are formard, passable order is maintained. The government is wanting in firmness, and fails to produce a healthy discipline. 3. The usual course of instruction is observed, the chassification is susceptible of iuprorement, and the methods are unskilful. 4. The proficiency is but very moderate.

## St. Marf's R.C. (Boys) :-Visited, 16th May.

## Number present:-148.

1. The schoolroom is lofty and epacious; it would be in a satisfactory condition did not the windows and also portions of the ceiling much need repair. The furniture is old, cumbrous, and insufficient ; desks of a modern character are much needed. The playground and out-offices are good. 2. The school is properly organized. 3. The subjects prescribed for a school of five classes are taught. Generally, it may be stated that the teaching is methodical and fairly effective. 4. The proficiency in the classes first to fourth is fair ; in the fifth from very fair to good.

St. Mary's R.C. (Girls) :-Visited, 17th, 19th, and 22nd May.
Number present: -121.

1. A male-shift lavatory occupies one end of the schoolroom. The schoolhouse is in good repair, cleanly kept, and reasonably well furnished. School requisites have not yet been obtaincd for the year, and thore is a consequent want of books, slatce, and other working materials. 2. A tolerable regular nttendauco is secured; several of the pupils are unpunctual. The order is susceptiblo of improvement. The government is not sufficiently strict, and is wanting in firmness. 3. Fair judgment is shown in the compilation of the lesson-documents ; the methods are tolerably appropriate, but require to be applied with vigour and effect. 4. The average proficiency is very moderate. The naswering is limitod to a fow pupils in each class, is only obtained by great labour on the part of the examiner, and is neither thoughtful nor necurate. The teaching fails to develop the pupils' intelligence.

## St. Mary's R.G. (Infants) :-Visited, 16th May.

$$
\text { Numbors present:-Boys, 62; girls, } 49 \text {; total, } 111 .
$$

1. A portion of the room is used as a lavatory; the objectionable nature of the arrangement has been pointed out to the teacher and to the Local Board. There is an insufficiency of books and other working materials. 2. The attendance, at prcsent unfavourably influonced by the weather, is ordinarily marked by a want of regularity. The pupils are otherwise unpunctual; a few are neithor clean nor tidy in person. Little improvement is visible in the order ; the children are restless and talkative, and school operations are attended with considerable noise. The general discipline of the school is therefore very unsatisfactory. 3. All the required subjects are taught. Tho instructional documents are poorly conatructed. The mothods are mechanical and well-nigh worthess. 4. The results are indifferent.

St. Primirs's C.E. (Boys) :-Visited, 25th and 26th October.
Number present: $\mathbf{- 8 0}$.

1. Materially considered, the school presents fow features to which crception can be taken. The school-building and out-offces are of a superior kind, and there is no lack of the necessary educational appliances. 2. Viewed in relation to the material and other advantages the school possesses, the attendance must be regarded as small. There has, however, been no falling off. The pupils attend with fair regularity, and appar to be reasonably punctual. Cleanliness is a fairly satisfactory foature. In other respects the discipline presents little that can be justly commended. Several instances of disobedience occurred during the examination, and prompting and copsing prevailed to some extent in the two upper classes. 3. For a school sustained by an infants' department the classification is low; judged by results, tho methods aro unskilful. Tho toaching wants thoroughness, and fails to develop the thinking powers of the pupils. 4. The proficiency is moderate.

St. Philips's C.E. (Girls) :-Visited, 16th August.
Number present :-80.

1. The schoolroom is suitable and fairly furnished. 2. The pupils are clean and reasonably regular and punctual. Fair order is maintained. The government is firm and tolerably effective. 3. Except as regards the first class, some twelve pupils of which are only fit for the infants' school, the classification is satisfactory. The instruction is regulated by the usual guides; the methods are modern but require to be applied with grenter vigour and effect. 4. The average proficiency is tolerable.

## St. Phimirs's C.E. (Infants) :-Visited, 15th August. <br> Numbers present :-Boys, 89 ; girls, 95 ; total, 184.

1. The school is now conducted in a new schoolroom, a fine commodious building, well lighted and airy. Except in desks, the supply of furniture is sufficient. The sehool is well appointed in other respects. 2. The pupils are clean, tolerably punctual and regular, and in very fair order. 3. The usual infants' achool course is followed; the instruction is arranged with tolerable judgment; the pupils are fairly classified; the methods are modern but require to be appliod with greater skill and effect. 4. Average proficiency tolerable.

> Surry Hiws (C.E.) :-Visited, 19th October.

Numbers present:-Boys, 67 ; girls, 40 ; total, 107.

1. The materinl state of the school-buildings and of the working appliances is good. 2. The classification of the pupils and the arrangements for their proper employment aro satisfactory. The discipline effects very fair order, but more stringent measures are necessary to rouss the pupils of the lowest class from indolent and negligent habits. 3. The teaching is methodical, and displays a considcrable amount of carnestnces. 4. The proficiency is fair.

## Surry Hillis C.E. (Infants) :-Visited, 19th October. <br> Numbers present:-Boys, 75 ; girls, 42 ; total, 117.

1. The material condition and organization of this school are fairly satisfactory. 2. The pupils attend with tolerable regularity, are reasonably panctual, generally clean, and in very fair order. 3. Fair judgment is shewn in the classification; the lesson documents are passably arranged ; the methods are suitable and applied with diligonee and $\mathfrak{a}$ tolerable degreo of skill. 4, The proficiency approaches fair.

Suriy Hais R.C. (Bosb) :-Visited, 3rd and 6th November.

## Number present:-155.

1. The schoolroom occupies the basement of the church. It is only tolerably suited to its uses having insufficient light, whilst the immense piers that support the ffloor of the church seriously impede a proper supervision of the clildren. The school has neither playshed, laratory, nor urinal. These wants have been repeatedly pointed out to the Local Board but with no resuit. 2. The orgunization is very fuir and in the circumstrances of the case the discipline must be rated fair. 3. The teaching evidences method and a fair amount of cncrgy, but judging by the results of the examination it would appear to be insufficiently searching. 4. The average proficiency ranges from moderate to tolerable.
2. What has been said in reference to the material defects of the boys' school applies to the girls'. There is neithor laratory nor play-shed, and the presence of several massive stone pillars in the schoolroom render good orgnization impossible. Except that the admission register is incomplete in certain particulars the school records are properly kept. 2. The attendance is slightly better than usual. The particulars the school records are properly kept. 2. The atlendance is slightly betcer tased. The order pupils are tolerably regular and punctual, and, with few exceptions, clean and tidily dressed. The order approaches fair; a tendency to talk and noise is manifest at times. . . The conrse of instruction is com-
plete; the methods possess some meritorious features. Passable diligence and skill are evinced in their application. 4. The proficiency is tolerable.

Surry Hinis (Wesleyan) :-Visited, 11th May.
Numbers present:-Boys, 62 ; girls, 23 ; total, 85.

1. The school-house is a structure of considerable architecturn character, but its interior is gloomy. The furniture is suflicient, but haring to be removed so frequently for denominational purposes it is not in good condition. A proper playground is much needed. 2. The organization is correct, but the discinline is weak ; at times the pupils are very boisterous. 3. The lesson docunents are judiciously devised, cipho is weak; at times the puphis are very instruction is methodical and careful. 4. The average proficiency is very fair.

> Surry Hilus Wosleyan--(Infants) :-Visited, 11th May.
> Numbers prescut:-Boys, 47; girle, $22 ;$ total, 69.

1. Except that the accommodation is too limited, the school is fairly organized. 2, A tolerably numerous attendance is maintained. The pupils attend somewhat irregularly, are rather unpunctual, and not very clean. The order, though still defective, has improved. 3. All cssential branches are taught. The instruction is fairly regulnr. The methods are appropriate, but require to be applied with grenter vigour. The teaching wants life. 4. The average proficiency ranges betwecn tolerable and fair.

Trinity (C.E.) :- Visited, 24th October. -
Numbers present:-Boys, 65 ; girls, 43 ; total, 108.

1. Execpting that there is no cluss-room, the sehool is matcrinlly in good condition, and the working npplianecs fully meet the requirements. 2. The children are properly classified, and due provision is made for their systematic instruction. The discipline is unsatisfactory, and, excepting the third class, the children incessantily manifest petty acts of disobedience and restlessness. 3. The subjects prescribed by the Council are taught in an carnest and mecthodical manner. 4. The proficiency averages fair, nearly.

## Trinity C.E. (Infante) :- Fisited, 24th October. <br> Numbers present:-Boys, 73; girls, 62 ; total, 125.

1. A class-room for the "babies" is the most noticcable want in connection with this school. In most other respects the material state of the school is fairly satisfactory. 2. The pupils are tolerably regular, but unpunctual. With few exceptions they are clean aud in fuir order. The government is roild and tolerably effcctive. 3. The classification is suitable; the instruction is regulated with fair judgment; the methods are fairly appropriate, but require to be applied with grenter vigour and skill. 4. The proficiency is moderate.

## Vrotoria-st. R.C. (Girls) :-Visited, 16th November. <br> Number present:-32.

1. The material condition of the school is fairly satisfactory. 2. A marked falling off in the attendance is observable, caused, I am informed, by tho establishment of a private school in connection with the Institution. The attendance was exceptionably low on the day of examination, owing to wet weather. The order and discipline are of the usual satiefactory kind. 3. The classification is appropriate, the instruction is well regulated, the methods are suitable, and are earnestly applied. 4. The proficiency lies botween fair and very fair.

Viotoria.st. R.C. (Infants):-Visited, 20th November.
Numbers present:-Boys, 44; girls, 44 ; total, 88.

1. The building is in good condition, and, excepting the defective construction of the gallory, the haracter of the appointments is satisfactory. 2. The school is judiciously organized, and the discipline is healthy and effective. 3. The instruction embraces the prescribed subjects ; these are imparted with intelligent method. 4. The average proficiency is very fair.

Waterloo (C.E.) :-Vibited, 22nd November.
Numbers present:-Boys, 71; girls, 40; total, 111.

1. A lavatory and a playshed are urgent necessities; with these exceptions the material state of the school is fairly satisfactory. 2. The organization is satisfactory, but the discipline is weak. 3. The teaching is methodical, but only tolerably effective. 4. The results are tolerable.

## Waterloo C.E. (Infunts) :-Visited, 22nd November.

Numbers present:-Boys, 49; girls, 50; total, 99.

1. Deeks and a playshed are the principal material requirements. In most other respects the school is fairly equipped with needful appliances. 2. A fair attendance is kept up. The pupils are tolerably recular and punctual, but wanting in cleanliness. Their behaviour is good, and the ordor is very fair. 3. All the prescribed sabjects arc taught, and the methods of instruction are applied with earnestrress and a fair degrec of skill. 4. The proficiency ranks between tolerable and fair.

Waibrioo (R.C.) :-Wisited, 24thl November.
Numbers present:-Boys, 59 ; girls, 45; tolal, 104.

1. Tho school is taught in a portion of the Ronan Catholic Church; this, although not a good arrangement, is perhaps the best that can at present be made. The furniture and school applinnces meet the requircments, but the school has neither lavatory nor water-closets. 2. The organization is satisfactory and the discipline is fair. 3. The teaching cxhibits care and very fair method. Execpting in the infants' division, the pupils show marked inprovement upon what they exhibited in 1870. 4. The average proficiency manges from tolerable to farr.

Waverias (C.E.) :-Visited, 23 rd November.
Numbers present: - Boys, 34 ; girls, 45 ; total, 79.

1. The schoolhouse is in good condition and it is properly appointed, but the school has meither playshed, lavatory, nor a supply of water. 2. The pupils are properly classificd, and tho prorisions for heir instruction are calculated to be effective. The discipline is good and the tone of the school satis factory. 3. The teaching exhibits careful and earuest methode. 4. The proficiency is fair.

Waythiex (R.C.) :-Wisited, 17th November.
Numbers present:-Boys, 54; girls, 32 ; total, 86.

1. The school buildings are in tolerable condition, and, exceptiag that there is no lavatory, the appointhents are, on the whole, fairly satisfactory. 2. The organization is fairly correct, und the tone of the school pleasing in the same degree. 3. The proscribed subjects are taught with intelligent care. 4. The proficiency ranges from tolerable to fair.

> Warerlery (Presbyterian) :-Visited, 2nd November.
> Numbers present:- Boys, 35 ; girls, 43 ; total 78.

1. The same objectionable features exist in connection wilh the material condition of the school as were pointed out in lasty year's report. The playground is still unenclosed, and a urinal and a playshed have yet to be provided. 2. A slight increasc marks the attendance. The pupils are tolerably regular and clean, but somewhat unpunctual: Their belatiour is unexceptionable, and they are in very fair order 3. There is a tendency to an excessive multiplication of clasees ; the lesson documents are fairiy compiled ; the methods are painstaking and applicd with fair intelligence. 4. The proficiency ranks between tolerable and fair. Singing is taught with unusual success.

## Woonloomooroo (Pres.) :-Visited, 1st November. <br> Numbers present:-Boys, 86 ; girls, 57 ; total, 143.

1. Since last inspection the old schoolroom has been taken down and a new one erected on the same site. The latter is a brick building, commodious, airy, and lighted in part from the roof. Underneath is a class-room, but this is practically useless for teaching purposes, owing to the want of a ceiling, or of some other arrangement, to deaden the sound from the room abovo. The playground is a mere back-yard, and is approached from the schoolroom. There are no lavatories. The furniture is old and unsightly, but is sufficient in quautity, and meets cxisting requirements to a tolerable extent. 2. The attendance has is sumcient. Thuautity, and meets existing requirements $\begin{aligned} & \text { a } \\ & \text { fallen off. This is atributed to the school being taught, whilst the rebuilding of the schoolhouse was }\end{aligned}$ going on, in unsuitable premises. The attendance was still further reduced on the day of examination by the attractions of a Sunday-school picnic. The discipline of the school is lox, and the moral tone unhealthy 3. The classification is low, but is otherwise unobjectionable. The teaching is all but incflective; few pupils attempt to answer-the majority are indolent, and evince little intelligence. 4. The proficiency is indifferent.

York-stheet (Wes.) :-Visited, 13 th November.
Numbers present:--Boys, 34; girls, 50 ; total, 84.

1. Tho schoolroom, which is in the basement of the church, is low-pitched and dark, and the situation of the property precludes the possibility of a playground. The furniture is sufficient, but not altogether adapted to the room. The working appliances mect the requircments. 2. The organization is, on the whole, salisfactory, but the disciphine is loose and ineffective. 3. The courso comprises the prescribed subjects; the teaching is methodical, but not penetrative. 4. The proficiency is but tolerable.

## SCHOOL BUILDINGS.

(PETITION RELATIVE TO MULGOA-REV. JAMES ROSS.)

Ordered by the Legislative Assembly to be printed, 12 June, 1872.

To the Honorable the Legislative Assembly of New South Wales.
The humble Petition of the Clergy and Lay Representatives of the Church of England in Mulgoa, Penrith, Emu Plains, and St. Mary's, assembled at a meeting of the Rural Deanery of Mulgoa,-

## Showeth :-

1. That your Petitioners are deeply interested in the education of the children of the poorer classes in the Colony, and especially in the districts with which they are immediately connected.
2. That various schools have long been established and maintained in connection with the Church of Fingland, and have received certificates from the Council of Education as "Certified Church of Eugland Schools."
3. That the number of children educated in such schools bears a very considerable proportion to the whole number under education, nearly one-half of the children now receiving education at the public expense being taught in the Denominational Schools.
4. That the school-houses which have been erected have been built generally by private contributions, and without expense to Government.
5. That the school properties are held in trust for school purposes, and cannot be diverted from them except by permission of your Honorable House.
6. That many of the buildings require repairs, that the comfort, positions and influence of the teachers are lessencd, the health and tone of the children injured, and the benefits of the instruction given at the public cost are deteriorated thereby.
7. That while your Petitioners are anxious to do all in their power to remedy these defects, the Council of Education is precluded by the 23rd 'Clause of the Public Schools Act from rendering any assistance towards such repairs, the schools being Denominational.
8. That the Council of Education has threatened to close one of the schools, viz., that at Liverpool, otherwise in a highly satisfactory condition, bccause of the want of such repairs, to the carrying out of which the Council can give no assistance.
9. That the want of such assistance as the Council is able to give to the Public School is felt by your Petitioners to be a great obstacle in their endeavour to carry out their work, and a great discouragement of their efforts.
10. That your Petitioners therefore pray that the operation of the aforesaid 23 rd Clause of the Public Schools Act, by which they are prevented from obtaining the assistance and encouragement to which they are entitled, in the honest endeavour to carry out the work in which they are engaged in providing for the education of the children of the Colony, is a hardship from which they are desirous of being freed, and they therefore address your Honorable House to grant them the relief which may seem fitting

And your Petitioners will ever pray, \&c., \&c.
Signed in behalf of the Members of the Chapter of the Rural Deanery of Mulgoa, and at their request.

Rural Dean.

1. Rer. H. M. Finnegan to Secretary to the Council of Education, lated 17th February, 1872.
2. Secretary to the Council of Education to Rev. H. M. Finnegan, duted 1st March, 1872 (No. 72/2520),
3. Rev. H. M. Finnegan to Secretary to the Council of Education, dated 4th March, 1872.
4. Secretary to the Council of Education to Rer. If. M. Finnegan, rlated 22 nd March, 1872 (No. 72/3262).
5. Rev. H. M. Finnegan to Secretary to the Council of Education, dated 30th March, 1872.
6. Rev. I. M. Finnegan to Secretary to the Council of Education, daterl 17th April, 1872.
[Enclosures.]
(1.)

The Rev.H. M. Finnegan to The Secretary to the Conncil of Education.
Young, 17 February, 1872.
Sir,
As I shall have opportunities of establishing Schools in accordance with the 9 th section of the Public Schools Act, I beg most respectfully to ask the Council of Education what meaning they do now put to that part of article 10 , section 2, of the Regulations, which states:-"Applicants for a certificate to a Denominational School must provide a schoolhouse sufficient in all respects for the purpose"?

I have, \&c.
J. M. FINNEGAN, C.C.
(2.)

The Secretary to the Council of Education to The Rev. H. M. Finnegan.
(72/2520.)
Rev. Sir,
I have the honor, by direction of the Council of Education, to acquaint you that the Council has had under consideration your letter of the 17 th February ultimo, in which you ask what meaning the Council now attaches to that part of article 10, section 2, of the Regulations, which states:-"Applicants for a certificate to a Denominational School must provide a schoolhouse sufficient in all respects for the purpose."
2. In reply, I am instructed to state that the Council does not now attach to the words in question any meaning different from that which they have invariably borne hitherto, viz., that the building in which it is proposed to conduct a Denominational School, when certified, must be crected for, or devoted to, school purposes exclusively, and must, further, be in all respects suitable for such purposes.

I hare, \&e.,
TV. WJLKINS,
Secretary.
(3.)

The Rev. H. M. Finnegan to The Secretary to the Council of Education.
Young, 4: March, 1872.
Sir,
I have the honor to acknowledge your letter, dated the 1st instand, in explanation of article 10 , section 2, of the Regulations, stating that the Council of Education have invariably, in reference to buildings required for Certified Denominational Schools, taught that they " must be erected for or devoted to school purposes exclusively."

As this explanation appears to be in contradiction with article 13, section 2, of the Regulations, which states that Public School buildings can occasionally be "converted into places of public worship when they shall have been built and kept in repair without aid from public fonds," I beg most respectfully to ask the Council (if they have not forgotten to take the said regulation into consideration) why a building used for Certified Denominational School purposes is not entitled to the pririlege contained in the 13 th regulation or article?

I have, \&c.
H. M. FINNEGAN.

The Secretary to the Council of Education to The Rev. H. M. Finnegan.

Rev. Sir,
I have the honor, by direction of the Council of Education, to acknowledge the receipt of your letter, dated 4th March instant, in which you inquire "why a building used for Certified Denominational School purposes is not entitled to the privilege contained in the 13 th regulation or article."
2. In reply, I am instructed to remind you that the only power that the Council possesses over Certified Donominational School-buildings is to see that the proper educational appliances are provided, and that during the ordinary school hours the course of secular instruction is duly carried out by the teachers in charge.
3. With rogard to the first paragraph of your letter, I am to point out that my communication of the 1 st instant has reference to proposed new Denominational Schools prior to certification, and not-as would be inferred from the way in which you have stated the matter-to existing Certified Denominational Schools. These, with two exceptions, being in existence on 1st Tanuary, 1867, were entitled to certificates under section 29 of the Public Schools Act, whatever the defects iu their material arrangements, and whatever the character of the buildings in which they were condncted.
4. It seems to the Council that you have orerlooked some other essential points. Reference to previous correspondence on this subjecti leads to the belief that your inquiry relates to the case of a Church proposed to be used for Certified Denominational School purposes. The regulation (article 13) to which you appeal, provides for the case in which a schoolroom is converted into a Church.

I have, sce,
W. WITKINS,

Secretary.
(5.)

The Rev. H. M. Finnegan to The Secretary to the Council of Education.
Foung, 30 March, 1872.
Sir, I have the honor to acknowledge the receipt of your letter, dated the 22 nd instant, which. states:-

Ist. That tho only power which the Council possesses over Certified Denominational Schoolbuildings is to see that proper educational appliances are provided, and that during the ordinary school hours the course of secular instruction is duly carried out by the teachers in charge.

2ndly. That "your communication of the 1st instant," which states "that the building in which it is proposed to conduct a Denominational School, when certified, must be erected for or devoted to school purposes, exclusively has reference to proposed new Denominational Schools prior to certification, and not to existing Denominational Schools. These, with two exceptions, being in existence on the Ist fanuary, 1867 , were entitled to certificates * * * * whatever the character of the buildings in which they were conducted."

3rdly. That "the regulation (article 13) to which I appeal provides for the case in which a schoolroom is converted into a Church."

In reply, I am to observe that the first statement furnishes us with a very strong proof of the action of the Council being unfair when refusing a certificate to the R.C. Denominational School at Grenfell, the case you allude to, on account of being conducted in a building previously called a Church, inasmuch as "that the only power which the Council possesses over Certified Denominational School-buildings is to sce that the proper educational appliances are provided, and that during the ordinary school hours the course of secular instruction is duly carricd out by the teachers in charge." To apply the words, we may ask, "are the proper educational appliances provided, and is the course of secular instruction duly carried out by the teachers in charge of the Grenfell R.C. School ?"

The impartial and influential gentlemen, who inspected the building on the 21 st of September last, assist me in giving an affirmative answer, by stating that the applicants "provided a schoolhouse sufficient in all respects for the purposes required for a Public School."

Mr. Tarbrother, tho architect, whose opinion these gentlemen approved of, answers also in our favour the query, when he states: "I have inspected the building used as a Public School, and kuown as the Roman Catholic Chapel, and pronounce the same in every respect to be a fit and proper place for a schoolroom."

The Inspector at the time of his visit must have seen that all the educational appliances were provided, and that during the ordinary school hours the course of secular instruction was duly carried out.

The Council too could be informed by him that the building was not used oftener than once a fortnight, and then on Sundays, for public worship, and that it had more reason to be called a schoolhouse than a Church. The Local Board, however, spared no pains to inform the Council that the whole building, which the Council acknowledged to be "excellent" was occupied for school purposes with suitable furmiture, and that competent teachers during the ordinary hours of secular instruction attended upon a large number of childreu who were supplied with books, maps, and other necessary school apparatus.

Ilaving such proofs of the Local Board affording crery means of instruction, any unbiassed mind must be forced to say that the Council whould not refuse a cortificate to the said school through the untenable reason of being conducted in a building previously called a Church, and over which, as a buitding, the Council distinctly professes to have no control, even if the school was certitied in the building.

Tn refrrence to the second statement, passing over the fact that your "communication of the lst instant, has" no "reference to proposed new Denominational Schools prior to certification" but to those "when certified," I am to remark, that it cannot be admitted that buildings required for new Denominational Schools "prior to certification" or "when certified," and referred to in article 1.0 , " must be erected for or devoted to school purposes exclusirely," but that of whaterer character the buildings may be they
are to be crected exclusively by denominations establishing Denominational schools, without any :idf from public funds, and are moreover to be suitable for school purposes. Article 1.0, iherefore, containing the words: "Applicants for a certificate to a Denominatioual School must provide a schoolhouse sufficient in all respects for the purpose" is placed among the Regulations to point out that promoters of Denominational Sehools cannot arail themselres of the privilege granted to Public Schools, subject to the provisions of section 23 of the Public Schools Act. Any other meaning would bring the words in question, and found in article 10, in direct collision with the general administration of the Public Schools Act, inasmuch, as a vast mumber of schools, both Public and Deuominational, are conducted, with the Council's sanction, in Churches throughout the Colony.

This fact, which presents itself as a difficulty to the Council, canot be overcome by the reply that such administration is applicable ouly to "existing Certified Denominational Schools. These, with two exceptions, being in existence on the 1st January, 1867, were entitled to certificates * *** whaterer the character of the buildings in which they were conducted." It is true (with the exception of two Denominational Schools, which had a claim or right to be certificd, being in operation as Denominational Schools previons to the full operation of the Public Schools Act on the 1st January, 1567) new Denominational Schools were not certified in Churches, or io any other buildings whatever, since the lst Tanuary, 1867; but such a calamity camot be said to befal the estallishment of Public Schools, because a very great number of new Public Schools hare becn certified since that date, and many of them also in Churches. Por instance, new Public Schools hare been certified in Churches at Tarago, Kiora, Dalton, Kangaloon East, Tiranna, \&c., \&c., \&c., a fart whicl distinetly proves that buildings for new Denominational Schools are not required to be "erected for or deroted to school purposes exclusively, because the administration of Public and Denominational Schools are identical, and the rules of the establishment, especially of non-rested Public Schools, are equally applicable to Certified Denominational Schools." The Council's words are : "The general administration of Certified Denominational Sehools locing in all respects identical with that of Public Schools, it is not mecessary to enlarge upon this subject. The Council may be permitted to remark, however, that every effort has been made to apply the regulations with equal care and consideration to all classes of schools. This fact, it is believed, is now recognized by a very large majority of Tocal Boards and teachers. Auy suspicion or hesitation that existed at first has now disappeared, and, with rery fers exceptions, the Local Boards cordially co-operate with the Council to secure an effective administration of the Public Schools A.ct. (Tide Council's Report for 1.567 upon Certified Denominational Schools, page 5, paragraph 4.)

The 7ist regulation points out also that Denominational Schools are sulject to the rules applicable to Public Schools.

The third statement, that "the regulation (article 13) to which I appeal provides for the case in which a schoolroom is conrerted into a Church," I must say, wilh all due respeet, is an anomalism ; because it is yery odd to say, -" That a schoolroom can be converted into a Church, but a Church cannot become a schoolroom," especially when the sense and nature of the regulation, coupled with the fact of a vast number of schools, new and old, being conducted in Churches, demands the parallelism, viz. : "That a Church can be converted into a schoolroom."

Thus the above explanation, which the Council respectfully desiguates " an essential point," over. looked by me. is nothing more than an crasion of the true sense of the 1.3 th regulation or article.

I have, dec.,
h. M. Finnegan.

## (6.)

The Rer. H. M. Tinneran to The Secretary to the Council of Education.
Young, 17 April, 1.872.
Sir,
I have omitted to stite in my communication of the 30th ultimo, to you, that the Council of Education granted in the year 1868 a certificate to the Hebrew Denominational School, Sydney, which was then conducted in a building known as the "Oddfellows" Hall:" Sussex-street. It is now conducted in the new "Oddfellows' Hall," Elizabeth-street.

This is another proof that the Regulations of the Public Schools Act do not require a building for a now Denominational School to "be crected for or deroted to school purposes exclusively."

From personal knowledge, I am able to inform the Council that new Public Schools were estab. lished since the 1st Jannary, 1.867, at Tirranna, and Tarago, near Goulburn, in buildinga known as "Churches of England."

The former was cerfifich in Junc, 1867, and the latter on the 1st of Tuly, 1869.
I have, \&c.
H. M. FINNEGAN.

## Legislative Assembly.

## NEW SOUTH WALES.

# ROMAN CATHOLIC DENOMINATIONAL SCHOOL, ÁDELONG. (PETITION-RESIDENTS OF ADELONG AND TUMUT DISTRICT.) 

Ordered by the Legislative Assembly to be printed, 12 June, 1872.

To the Honorable the Members of the Legislative Assembly of New South Wales, in Parliament assembled.
The Petition of the underaigned inhabitants of Adelong and Tumut,-

## Humbly Showeth:-

That an application had been made to the Council of Education for a certificate to a Roman Catholic Denominational School at Adelong, in 1869, and that it had been refused, owing to an unfavourable report of Mr. Coburn, then Inspector of the district.

Your Petitioners would call your attention to the fact that they could see no reason for such report or refusal, inasmuch as article 9 of the Public Schools Act was fully complied with, requiring at least 120 pupils between the Public School and the Catholic Denominational School.
2. Furthermore, article 10, section 2, of the Act was fulfilled, requiring a school-house sufficient in all respects for the purpose, and suitably furnished; competent teachers were also in charge of the school, one of whom passed an examination some years ago at Goulburn for a Public School before an Inspector.
3. Subsequently, a second application was made on the 18th October, 1871, and a reply forwarded on the Ist of March, 1872, to the effect that the applicants had not prorided a school-house sufficient in all respects for the purpose, as required by article 10 , section 2, of the Regulations, and that the Council had decided that the certificate applied for could not be granted; now a large number of citizens of every class and creed wish to inform your Honorable House that they are quite surprised at the last-named decision arrived at by the Council, especially as article 10 , section 2 , of the Regulations has been entircly satisfied,--the school bcing in a more flourishing condition by reason of its number, of some additional furniture procured and apparatus provided, than on the occasion of the first application. We may also state that the school-house is commodious and well ventilated.
4. For the reasons herein embodied your Petitioners trust that you will use your influence with the Council to have the certificate applied for duly granted, and the Public Schools Act justly administered, in order that the existing grievance and geveral discontent which now prevail would be forthwith removed and public confidence secured by an impartial administration of the Act.

Your Petitioners therefore humbly pray that your Honorable House will take the premises into consideration, and grant them such relief as will meet the justice of their case ; and your Petitioners, as in duty bound, will ever pray.

## EDUCATION.

No. 1.
The Rev. H. M. Finnegan to The Secremary to the Council of Education.
Grenfell, 26 April, 1871.
Str,
I am directed by the Catholic School Committee, Grenfell, to request you to send us a form of application for certificate to a Denominational School.
I. have, \&c.,
H. M. FINNEGAN, C.C.

## No. 2.

The Secretary to the Codncia of Education to The Rev. H. M. Finnegan.
Council of Education Office, Sydney, 29 April, 1871.
Rev. Sir,
Referring to your letter, dated the 26th instant, with respect to the establishment of a certified Roman Catholic Denominational School at Grenfell, I have the honor, by direction of the Council of Education, to forward herewith the papers necessary to enable you to make application in due form.

These documents when filled up under their respective headings should be returned to this office, when the Council will be in a position to decide as to the expediency of granting aid to the proposed school.

I have, de.,
W. WILKINS,

Secretary.

## No. 3.

Application for a Cebrificate to a Roman Catholic Schoon at Grenfell.
Grenfell, 22 May, 1871.
Gentlemen,
We do ourselves the honor to request that the school under our management, at Grenfell, within two miles by the shortest highway of the Public School at Grenfell, may be certified as a Roman Catholic Denominational School, under the provisions of section 9 of the Public Schools.Act.

The proposed Denominational School is now in operation with an average daily attendance of 754 children, making, together with those attending at the Grenfell Public School, 82.8 boys- 65.2 girls; total, 148.

A school house, sufficient in all respects for the purpose, and suitably furmished, has been provided, and we beg to nominate Mr. P. Glacken as teacher.

We have, \&ic.,
H. M. IINNEGAN, O.C.,

Chairman of Local Committee.

No. 4.
The Secretarx to the Councla of Education to The Inspector of Schools, Bathurgt District.
Council of Education Office, Sydney, 13 June, 1871.
(To be returned with the reply written on it when necessary.)
Grenfejul.-Application for a certificate to a R. C. Denominational School. 22 May, 1871. For your inquiry and report.
W. WILKINS.

No. 5.
The Rev. H. M. Finnegan to The Secretary to the Councle of Education.
Grenfell, 5 June, 1871.
Str,
I have the honor, by the direction of the R. C. School Committee, Grenfell, to acquaint the Council of Education that our school, for which a formal application for certificate was made on tho 22nd ultimo, has now for the week ending Şaturday, the 3rd instant, an average daily attendance of boys, 66.6 ; girls, $51 \cdot 4$. Total, 118.

I have, \&c.,
H. M. FINNEGAN, C.C.

No. 6.
The Rev. H. M. Finnegan to The Secretary to the Councti of Edecation.
Grenfell, 26 June, 1871.
Sir,
The Committee of the R. C. School, Grenfell, beg most respectfully to remind the Council of their formal application for a certificate to a R. C. Denominational School at Grenfell, and dated the 22nd of May last.

The school is increasing daily in attendance.

I have, \&e.
H. M. Finnegan, c.c.

## No. 7.

The Shcretary to the Council of Education to The Rev. H. M. Finnegay.
Council of Education Office, Sydney, 1 July, 1871.

## Rev. Sib,

I have the honor, by direction of the Council of Education, to acknowledge the receipt of your letter of the 26 th June, inviting the Council's attention to the application for a certificate, submitted by the Committee of a school in connection with the Roman Catholic Denomination at Gyenfell.
2. In reply, I am instructed to acquaint you, that the application alluded to has been referred to the Inspector of the Bathurst District for inquiry and report.

It is believed that officer is now on his way to Grenfell.
I have, \&c.
W. WILKINS, Secretary.

## No. 8.

The Inspector of Schools, Bathurst District, to The Secretary to the Councll of Enucation. (B.C., No. 71/1107.)

Memorandum to the Secretary, Council of Education, Sydney.
Granyell.-Application for certificate to Roman Catholic School at-Rev. H. M. Finnegan's letter, dated 12th instant, regarding my visiting Grenfell; to report,-enclosed.
From the Rev. Mr. Finnegan's letter it would appear that he has received intimation from the Council that I am "about" to visit Grenfell to report upon the above application. I would beg therefore to inquire whether it is the Council's wish that I should visit Grenfell immediately?

At present, my inspections and reports of schools, from unavoidable causes, are in arrear, and various matters connected with the Fish River schools, already in existence, as well as applications for new ones-Oberon and Brisbane Valley-require immediate attention.
'To visit Grenfell at present therefore would simply cause delay in attending to equally or more pressing mattors, and a deviation from the programme for the year, sanctioned by the Cotincil.

Bathurst, 18th July, 1871.
J. M'CREDIE,

Inspector, Bathurst District.
[Enclostre.]
The Rer. H. M. Finnegan to the Inspector of Schools, Bathurst District.
Dear Sir,
Gronfell, 12 Juiy, 1871.
Having reccived intimation through the Council of Education that you were about to examine and report on the Roman Catholic school at Grenfell, as to the expediency of its being certified, I think it right to inform you that the school will be closed on Thursday and Friday, the 20th and 21st instant, in consequence of the Bishop's arrival here.

If you cannot conreniently visitit before that time I trust you will do so as soon after us possible.
Yours very truly,
H. M. FinNeg.an, C.C.

No. 9.
The Secretary to the Councin of Edecation to The I
Grexfeli-Application for certificate to Roman Catholic School at. Your B.C., No. 71/1107.
When conferring with you personally on the above subject it was understood that you would risit Grenfell in a short time. All subsequent action has been taken on that assumption.

19 July, 1871.
W. WILKINS, Secretary.

No. 10.
E. A. Baker, Esq., M.L.A., to The Segretary to the Council of Education.

Grenfell, 2 A.ugust, 1871.
Str,
I am requested by some of my constituents residing at this town to bring under the notice of the Council of Education the circumstance of the great delay which has taken place in getting the Catholic school at Grenfell certified or approved, so that it may be made a Public School.

An application was made to the Council on 17 th April last to have the school certified or approved of, and attention was promised to the matter.

On June 5th, and again on June 28th, the Chairman of the Local Board wrote, reminding the Council of the application made on 17 th April.

On July 1st the Council informed the Iocal Board that the application had been referred to the Inspector, who was then ou his road to Grenfell.

Up to the present time the Inspector has not been to Grenfell; and, as the schoolmaster cannot obtain a salary, or the school be considered a Public one till the Council of Education certify it as such, the delay is causing much inconvenience to that portion of the public who are Roman Catholics, and who send their children to the school.

I aminformed that the number of scholars in daily attendance at the school in question is about one hundred and twenty.

I think it but right to mention that the Catholic Bishop of Goulburn, who was here the other day, as well as a great portion of the laity of his Church, think they are not fairly used by the affairs relating to their school not being sooner attended to.

May I request you to lay this letter before the Council as early as possible, and ask them to be good enough to cause some steps to be taken to have the application of the Catholic body at this place enter.
tained with as little further delay as can be avoided.

$$
\mathrm{I} \mathrm{am}, \& \mathrm{c} .
$$

E. A. BAKER.

## No. 11

!.t. M'Conneli, Esq., J.P., to The Sectetary to the Council of Education.
SIR,
Grenfell, 8 August, 1871.
I have the honor, by direction of the Local Board of the Grenfell R. C. School, to invite your attention to their formal application for a certificate to the above school, dated!22nd May last, and to the letters adverting thereto of the 5 th and 28 th June last.

I wish respectfully to bring under your notice that since the date of the application above referred to the following pupils have been admitted into the school :-

| Alfred Harley. | Anuie Miller. | Wm. Drought. |
| :---: | :---: | :---: |
| James Keys. | Elizabeth Johnstone. | Michl. Mr Coy. |
| William Keys. | George Berriman. | Nicholas Gannon. |
| Arthur Berriman. | Jessic Berriman. | Wm. Hy. Paice. |
| Clutha Berrimiu. | John Parry. | George Paice. |
| William Hall. | Robt. Hayes. | Annie Miller. |
| Henry Puxley. | $W$ inifred $\mathrm{O}^{\prime}$ Connor. | Donald Palmer. |
| Tredk. Puxley. | Mary O'Connor. | Maria Stewart. |

The number of pupils in actual attondance for the quarter ending 24 th June was 152. For the present quarter, 145. Average age, $8 \% 9$.

Annexed hereto is a returg of the average daily attendance of pupils for eleven weels, beginning the 27 th of May last, and ending with the 4th instant.

From this I trust the Council will perceive the necessity and justice of haring this school certified immediately.
J. MCONNELL, J.P.

Minute of Courcil of Education.
Extract from the Minutes of the Proceedings of the Comeil of Education, on 10th August; 1871:Grenfele R.C.:-Mr. E. A. Baker's letter, dated 2nd instant, respecting the delay in dealing with the application for a certificate.
Tie Secretary was instructed to explain the cause of the delay.

## No. 13.

Thr Secretany to ter Council of Educayton to E. A. Baker, Esq., M.L.A.
Council of Education Office, Sydney, 12 August, 1871.
Sir,
I have the honor, by direction of the Council of Education, to acknowledge the receipt of your letter, dated 2nd instant, in reference to the delay which las taken place in deciding upon the application for a certificate to a Roman Catholic School at Greufell, stated to have been made on the 17 th of April last.
2. In reply, I an instructed to explain that the delay has been unavoidable, in consequence of the illness of the District Inspector, and of the pressure of other business requiring his attention. It is expected, however, that Mr. M'Credie has now arrived at Grenfell, and that his report will be received at an early date. The Council's decision will theu be notificd as early as practicable.
3. I may observe that the application, which is dated the 22nd of May, did not reach this office until the 25 th of that month.

> I have, \&c.,
> W. WILKINS,
> Secretary.

No. 14.
The Hon. Secretary, Public School Board, Grenfenl, to Tie Secretary to the Council of Education.

Police Office, Grenfell, 18 Angust, 1871.

## Sir,

Referring to the application by the Roman Catholics of this town to the Council of Education for a certificate for their school, I am directed by the Local Board to inform the Council that, in their opivion (after having carefully considered the matter) such application should not be entertained by the Council of Education. They would cousider an application from either the Church of England or Presbyterian community equally objectionable; in fact, a Denominational school is not required in Grenfell. A commodious Public School building, recently crected, is now nearly finished, and will be opened on the 15th of next month, quite sufficient to accommodate the children of all denominations, with $a$ class-room for religious teaching.

The Board are clearly of opinion that when such is opened, with a new and cffcient teacher, the present attendance at the R.C. School will have dwindled down to one-third of the present number. On these grounds they strongly urge the Council not to grant the certificato requested.

> I hare, \&c., PARKER,
> W. F. PARK.
> Hon. Secretary.

## No. 15.

The Inspecton of Schools, Bathurst Distuict, to The Secretart to the Colncil of Education. Grenfell R.C.-Inspector's Report upon application for Certificatc to.

1. Opon visiting the Roman Catholic School at Grenfell, on the 9 th instant, I found on the roll 81 boys, 64 girls ; total, 145 ; and present, 49 boys, 43 girls; total, 92 . According to the class-roll the average attendance since the application was sent in has becn over 100 . About 40 of those on the roll 198-B
are, I believe, Protestants. The annex shows 175 guaranteed to attend, of whom 15 had left Grenfell, and 26 were not on the roll at the time of my visit. So far as numbers are concerned, therefore, the conditions of the Act are fully met.
2. The applicants hare not provided proper school-premises, as the school is conducted in the Roman Catholic Church. This does not appear to me in accordance with regulation 10. The description of the building and of the furniture provided is correct. The supply of books is sufficient, and more desks have been ordcred by the Committee. The apparatus is not sufficient.
3. I know of nothing against the teacher. He is classified C. III, section C.
4. I am of opinion that it is inexpedient to grant aid to a Denominational School at Grenfell, for the following reasons:-
(1.) Because the applicants hare not provided a schoolhouse expressly for the purpose.
(2.) Because provision is now being made for the education of the children of all denominations at Grenfell, by the erection of a new and suitable Public schoolroom, which will be completed in a month.
(3.) Because, for the sake of economy, and in order to secure the services of a highly qualified teacher, and thus improve the quality of the instruction, it is desimble that there should be only one school at Grenfell.

Foung, 12 August, 1871.

## J. M‘CREDIE,

Inspector, Bathurst District.

## [Enclosure in No. 15.] <br> Codncti of Endcation.

Information to be supplied by Inspectors when reporting upon applications for Certificates to Denominational Schools. Proposed Denominational School at Grenfell.

1. Who are the persons signing the application as promoters of the school? State their occupations?
2. H. M. Finnegan, R. O. Clergyman.
3. James Keenan, police sergeant. (R.C.)
4. William Keating, mincr. (R.C.)
5. Joseph Clampett, draper. (R.C.)
6. Laurence Corbett, miner. (R.C.)
7. Hugh Rohen, miner. (R.C.)
8. Phillip H. Rutledge, bookkeeper. (R.C.)
9. Matthiss Teston, publican. (R.C.)
10. John O'Brine, storekecper. (R.C.)
11. John M'Conell, miner. (R.C.)
12. Patrick Rooney, soda-water manufacturer. (R.C.)
13. William Gill, miner. (R.C.)
14. Joseph M'Connell, merchant, (R.C.) (Since added.)
15. Is the information supplied by the applicants correct as regards the distance of other schools $P$ Yes.
16. Is the information supplied respecting the number of children attending the proposed school and the nearest Public School correct? Yes.
17. State the number of children expected to attend the school, distinguishing males and females? $\mathrm{I}_{\mathrm{n}}$ annex there are guaranteed to attend 94 boys, 81 girls, $=175$. Of these 26 were not enrolled when I visited, and 15 had gone to Grenfell
18. What do you consider will be the average attendance of pupils? About 70 .
19. Is the district likely to be permanently inhabited? Yes.
20. Describe the school buildings as regarcls,-(1) materials ; (2) dimensions; (3) accommodation afforded ; (4) state of repair; (5) ownership?
(1.) Strong wooden frame; walls and roof corrugated iron; floored; no chimney. (2) $60 \mathrm{ft} \times 22 \mathrm{ft}$. (3.) One room. No teacher's residence. Playground one acre, fenced and cleared. (4.) Good. (5.) Vosted in the R.C.Church.
21. Has sufficient school furniture been provided? If not, will the local Committee engage to provide it? Fourteen deske, 7 feet long, and forms to match; four more, 7 ft .6 in ., with forms, are ordered.
22. State what information you have obtained relative to the teacher's claracter and qualifications i I have learned nothing againat the teacher's character. According to his statement he lad charge of the Taralga R.C. School. He holds a certificate under the Council, I believe, of C. III, sect. C.
23. Are the local Committee acquainted with the Oouncil's Regulations, and willing to observe them? Yes.
24. In addition to the matters bcfore mentioned, state any other circumstances within your lnowledge, connected with the application, which you may consider material for the information of the Council, copecially noting nny points which do not appear to be in accordance with the Regulations? No proper schoolhousc has been built by the applicants, as the school is conducted in the Roman Catholic Chureh. It does not appear thercfore to me that the couditions of regulntion 10 have been fully met, which states that "applicants for a certificate to a Denominational School must provide a schoolhouse sufficiont in all respects for the purpose." This they bave not done, unless the using of the Church is to be looked upon as providing a schoolhouse. It may be said that many of the certified Denominational Schools are now conducted in Churches, but this does not meet the question, inasmuch as the Council was bound by the Act to accept and cortify all schools in operation under the Denominational School Board, without respect to the building in which they might be held at that time.

I am of opinion that the strict interpretation of the above regulation is, that the applicants must provide a building expressly for school purposes, which, in this case, they bave not done. The building is a Church, not a school.

The Committee apoke of placing a screen across the building so as to conceal the altar and the paraphernalia connected therewith

Mindte of Council of Education.
Extract from the Minutes of the Proceedings of the Council of Education on 26th August, 1871:Grenfell :-Application for a certificate to a Roman Catholic Denominational School, dated 22nd May last. Deferred for further consideration.

## No. 17.

Mindete of Council of Edccation
Extract from the Minutes of the Proceedings of the Council of Education on 7th September, 1871 :-
Grenfell-Application, dated 22ad May last, for a certificate to a Roman Catholic Denominational
School at; also, Inspector's memorandum, dated 12th ultimo, stating that he is of opinion that it
would be inexpedient to grant aid to a Denominational School at Grenfell for certain specified reasons. As the Inspector's report discloses the fact that the applicants have not provided a schoolhouse sufficient in all respects for the purpose, as required by article 10 of the Regulations, the Council decided that the certificate applied for could not be granted.

## No. 18.

The Secretary to the Council of Education to Tefe Rev. H. M. Finyegan.
Council of Education Office,
Sydney, 8 September, 1871.
Rev. Srr,
I bave the honor, by direction of the Council of Education, to acquaint you, that the Council has had under consideration the formal application, dated 22nd May last, for a certificate to a Roman Catholic Denominational School at Grenfell, together with the Inspector's report thercon.
2. In reply, I am instructed to state that, as the Inspector's report discloses the fact that the applicants have not provided a schoolhouse sufficient in all respects for the purpose, as required by article 10 , section 2, of the Regulations, the Council has decided that the certificate applied for cannot be granted.

I have, \&c.
W. WILKINS,

Secretary.
No. 19.

## The Rey. H. M. Finnegan to The Secretart to the Council of Edccation.

Roman Catholic School,
Grenfell, 22 September, 1871.
Sir,
The Roman Catholic School Committee at Grenfell beg most respectfully to acknowledge the receipt of a letter, dated the 8th of September instant, from the Council of Education, refusing a certificate to their school because "the Inspector's report discloses the fact that the applicants have not provided a schoolhouse sufficient in all respects for the purpose, as required by article 10 , section 2 , of the Regulations."

On considering the article and section cited, together with the Inspector's incorrect report on the building, the Committee at once resolved to invite the most intelligent and influential geutlemen of the town and district of Grenfell to inspect and prononnce opinion upon the suitableness of the building for school purposes.

In consequence, seven of these gentlemen met in conference upon the merits of the building in the schoolhouse, and when the letter of the Sth instant, containing the Council's refusal of a certificate to the school was read, they carefully and deliberately gave their opinion that the building named in the formal application of the 22 nd of last May, and reported upon by the Inspector on the 12 th of August last, is sufficient for school purposes, eren suitable for arrangements required in a" Public School."

For the Council's consideration, and with sanction of the gentlemen theinselves, we forward their combined opinion, which is expressed in the accompanying document, and addressed to the Council of Education with the signature of each attached.

We would especially draw attention to the opinion of Messrs. Vaughan and Pyne, the former of whom is a practical engineer. The opinion and description of a competent builder is given also of the building, and will be found appended to the aborenamed document.

Knowing the great weight tho judgment of these unprejudiced gentlemen will have on the Council's mind, we will now only pray most humbly the Council to grant a certificate to our school, which has not only a suitable building, sufficient for school purposes, but supplied also with a competent teacher, a very great number of pupils, and with the most suitable furniture, books, maps, and other apparatus.

On behalf of the Committee,
I hare, \&c.
H. II. FINNEGAN, Catholic Clergyman.

## [Enclosures.]

Mcesrs. Baker, Watt, M'Connoll, Boland, and Hail, to The Secretary to tho Oouncil of Education.
Roman Catholic School,
Grenfell, 21 September, 1871.
Sir,
We, the undersigned, after due inspection and inquiry on tho part of ourselyes, together with the testimony of a competont builder, have no hesitation in attosting that, in our opinion, the applicants who have sent in a formal application to the Council of Education, dated the 22nd May last, for a certificate to a Roman Catholic Denominatioual School at Grenfell, have provided a schoolhouse sufficient for the purposes required for a " Public School."

We beg to append buider's opinion, and description of the building.

> E. H. BAKER, BI.P.
> W. R. WATT, J.P. J. M'CONNELL, J.P. P. BOLAND, J.P. RaLPII HaLL.
WI are of opinion the abovementioned building is suficiont in size, well rentilated, and that there are no sanitary objections existing.
R. M. VAUGHAN, J.P.
D. PYNE, J.P.

Mr. F. E. Farbrothor to the Rer. H. M. Finnegan.
Grenfell, 21 Scptember, 1871.
I, the undersigned, have this day inspected the building used as a Public School, and known as the Catholic Chapel, pronounce the same to be in every respect a fit and proper place for a schoolroom.

The building is 22 feet wide, 48 feet long, and 14 fect walls; it has five lnige windows on each side, 2 feet 6 inchos by 6 feet 6 inches, the upper half of which are swivel-hung, the same being placed opposite each other so that a current of air may pass ncrose the building; it has also four dormer ventilators in the roof, with two rentilators in each gable, with doors at each end ; the flooring is at least 2 feet from the ground, and is well ventilated in other reapects.

I am, \&c.,
FREDERIOK E. FARBROTHER,
Builder, \&c., de., Grenfell.

The Sechetary to the Councli of Edtcation to The Ref. H. M. Finfrgan.
Council of Education Office,
Sydney, 9 October, 1871.
Rev. Sir,
I hare the honor, by direction of the Council of Education, to acknowledge the receipt of your letter, dated 3rd instant, in which you enclose for the Council's information copy of a letter addressed to you by Mr. F. Dalton on the subject of the suitability of the Grenfell certified Denominational Roman Catholic School buildings.

I hare \&c.
R. E. WEBSTER, pro Secretary.

No. 25.
The Rev. H. M. Fintegan to The Sfcretary to the Council of Education.
Grenfell, 12 October, 1871.
Sir,
I have ibe honor to acknowledge the receipt of your letter of the 2nd instant, stating that $I$ had mistaken the nature of the objection of the Council of Education when refusing aid to the Romau Catholic, Denominational School at Greufell.

In reply, I must state that the refusal was so indefinite that I was completely at a loss to discorer wherein the insufficiency lay. I certainly could not for a moment believe that the objection was, that the building was "not a schoolbouse at all, but a Church," because in looking over the Public Schools Act I. found that no such objection conld exist; but on the contrary, when referring to article 13 section 2 of the Regulations, I find that even Public School buildings can be converted into places of public worship when they shall have been built, and kept in repair without aid from public fuwds:

Our buildings, having been erected and kept in repair without aid from public funds, may, for a much stronger reason, according to the above regulation, be lawfully used for the double purpose of school and Church.

I must state also, even if the above regulation did not exist, that I am surprised the Council says it is not a schoolhouse at all, since the Inspector, at the time of his risit, found therein a large number of children with a supply of books, desks, maps, and other apparatus.

It had then very little appearance of a Church, in fact " not a Church at all, but a schoolbouse."
The objection then being wrongly founded, as is seen from the article and sectiou cited, the Council will, I am sure, have no objjection in granting a certificate to our school.

I have, \&c.,
H. M. FINNEGAN, C.C.

No. 26.
Minete of the Council of Edecation.
Extract from the Minutes of the Procecdings of the Council of Education on 19th October, 1871. Grenfeili R.C.:-Revd. H. M. Finnegan's letter, dated 12th instant, respecting the Council's objection to grant a certificate to the school on account of the School building.
Tre Secretary was instructed to jnform the Rev. H. M. Finnegan that, in the opinion of the Council, his representations fail to meet the objection entertained by the Council to the granting of the certificate applied for.

No. 27.
Tife Secretary to mier Council of Evtcation to The Rev. H. M. Finmegani. Council of Education Oflice, Sydney, 23 October, 1871.
Ret. Sir,
I have the honor, by direction of the Council of Education, to acknowledge the receipt of your letter, dated 12th instant, respecting the Council's objection to the building in which the Roman Catholic Denominational School at Grenfell is conducted.
2. In reply, I am instructed to state that, in the opinion of the Council, your representations fail to meet the objection entertained by the Council to the granting of the certificate applied for.

I have, de.,
W. WILKINS, Secretary.

No. 28.
The Ref. H. M. Finnegan to The Secretary to tife Council of Education. Grenfell, 24 October, 1871.
Str,
I beg most respectfully to acknowledge the Council's letter of the 9th instant, part of which is worded thus:-"I have the honor, by direction of the Council of Education, to acknowledge the receipt of your letter, dated 3rd instant, in which you enclose, for the Council's information, copy of a letter addressed to you by Mr. F. Dalton on the subject of the suitability of the Grenfell *certified Denominational School buildings.

The Conncil's favor, notifying date of the school being certified, will be thankfully received.
T. have, \&e.,
II. M. Finnegan, c.c.
"The word "certified" was inadrertently used in the Council's letter of 9th October.

No. 29.
The Rev. H. M. Finyegan to The Secretary to the Council of Education.
Grenfell R.C. School,
23 October, 1871.
Sir,
I have the honor to acknowledge the receipt of your letter, dated the 23 rd instant, stating that the representations made in my letter of the 12 th instant have failed to overcome the objection on which the Council grounded the refiusal of a certificate to our school.

In reply, I wish to state that the school committoe are anxious to be informed why the representations have failed to meet the Council's objection?

The objection entertained by the Council, as appears in your letter of the 2nd instant, is, that the room in which our school is conducted is sometimes used as a Church.

Now, we beg again most respectfully to submit that the Public Schools Act contains no such objection, but, on the contrary, article 13, section 2, of the Regulations states that rooms used for school purposes can be converted into places of public worship, when such buildings are built and kept in repair without aid from public funds.

Our room being built and kept in repair without aid from public funds must therefore meet with the favour of this regulation.

Furthermore, we are desirous of bringing under the Council's notice, that buildings used for the double purpose of school and church are designated by the Council's Inspector as "schoolhouses," as also "suitable for (Public) school purposes"-buildings some of which in every respect are far inferior to ours in point of accommodation.

These statements (of the Inspector) can be seen in the two last reports of the Council of Education
While again renewing the application of the 22nd of May last, for a certificate to the school, the committee, for the satisfaction and information of the Catholic community here, request to have forwarded them, if possible, a specific reply to their representations.
I. have, \&c.,
H. M. FINNEGAN,

Chairman of R.C. School Committee, Grenfell.

# Tue Rev. H. M. Finnegay to The Secretary to thit Council of Edecation. <br> Roman Catholic School, <br> Grenfell, 8 November, 1871. 

Sin,
I have the honor, by direction of the school committee, to point out to the Council of Education that no notification of our application, dated the 22ud of May last, for a certificate to a Roman Catholic Denominational School at Grenfell has appeared in the Goverinment Gazette, as required by clause 24 of the Public Schools Act, and under the heading of "New Schools," which distinctly states that "Notices of all proposals for the establishment of Public Schools, and of all applications for aid in the maintenance of certificd Denominationa? Schools, shall be published four times in the Government Gazette, previous to the final decision thereon of the Council of Education."

I am, therefore, to ask why the favour of this law was not extended to our Catholic school?
The Catholic community here do not fail to see that its favour has been invariably extended by the Council of Education to other schools not even one-fourth as important as our Catholic school at Grenfell.

I have, \&c.,
H. M. FINNEGAN, C.C.

Rev. Sir,
I have the honor, by direction of the Council of Education, to acquaint you that the Council has had under consideration your letter, dated 8th instant, inquiring why notice of the application for a certificate to a Roman Catholic Denominational School at Grenfell was not published in the Government Gazette.
2. In reply, I am instructed to point out to you that, inasmuch as the Roman Catholic school at Grenfell is not a certified Denominational School it does not come under the provisions of section 24 of the Public Schools Act, which requires that "Notices of all applications for aid in the maintenance of certified Denominational Schools shall be published four times in the Government Gazette."

I have, \&e.,
W. WILKINS,

Secretary.
No. 37.
The Rev. H. M. Finyegan to The Secretary to the Cotnch of Edvcation.
Sir, Grenfell, 24 November, 1871.
I have the honor to acknowledge your letter, dated 20th instant, stating that our application for a certificate to a Roman Catholic Deoominational School at Grenfell was not notified in the Government Gazette because the school was not certified.

In reply, I am to state that this explanation is very unsatisfactory, inasmuch as clause 24 of the Public Schools Act is distinctly placed under the heading "New Schools," and therefore cannot have reference to schools already certified.

Again, if a school is already certified, the making of on application for aid in maintenance of it would be absurd, because the fact of it being certificd supposes this maintenance or support; but according to your explanation applicants would be placed in a position of asking that which was previously granted.

I am further to point out, that the school commitiee are of opinion that clause 24 would be rendered meaningless if your explanation was accepted.

I have, \&c.
H. M. FINNEGAN, C.C.

Extract from the Minutes of the Proceedings of the Council of Education, on 30th November, 1871 :Grempell R.C.-Rev. H. M. Finnegan's letter, dated 24th instant, stating his views as to the interpretation of the 24th section of the Public Schools Act,-read.

## No. 39 .

The Rev. If. Mi. Frnnegan to The Sẹchetari to the Councle of Euucation.
Roman Catholic School, Grenfell,
30 November, 1871.
Sir,
On referring again to your letter, dated the 20th instant, we more especially notice that the Council of Education arc anxious to point out that the word "certified" is attached to "Denominational Schools," found in clause 24 of the "Public Schools Act," and through this fact our application for a certificate to our school was not notified in the Government Gazette.

It is a source of regret, as well as of astonishment, finding such a body as that of the Comncil of Education to grasp at a single word in a sentence, notwithstanding that the meaning of said sentence or clause be destroyed, in order to defend itself in the omission of extending the favour of the "Public Schools Act" to our school, as is ordered in clause 24. In our reply, dated the 24th instant, we observed that said clause was distinctly placed under the heading "New Schools," and therefore could have no reference to schools already certified, and that applicants would be placed in the very awkward position, if the explanation could be accepted, of petitioning for that (viz., the maintenance of school) which was previously granted.

We then also stated that the clause, by such explanation, would become meaningless; but we are now desirous to point out that the Council's Regulations and correspondence prove also the statement.

In article 1, section 2, of the Regulations, under the heading " Establishment of Schools," it is said the Council of Education will cstablish, maintain, or assist four classes of schools, viz., Public Schools, Provisional Schools; Half-time Schools, and certified Denominational Schools.

Here it is seen that the word "certified" is attached to "Denominational Schools," to distinguish them as a class from the other three classes of schools, and can be certified, as is scen from the above Tegulation (although termod certified), like the other three, if the conditions of the "Public Schools Act" are complied with.

The Council's letter of the 29 th of April last, and signed "W. Wilkins," is a proof in point. In furnishing us with forms of application the Council's letter says,-"Rev. Sir,-Referring to your letter, dated the 26 th instant, with respect to the establishment of a certified R.C. Denominational School at Grenfell, I have the honor, by divection of the Council of Education, to forward herewith the papers necessary to enable you to make the application in due form."

The Council cannot say that our school at this period was certified because the words "Certified Denominational School" were contained in this the Council's letter.

Article 10, section 2, of the Regulations is designated "Certified Denomimational Schools," and it deals only with applications for certificates to Denominational Schools.

On this article, although headed "Certified Denominational Schools," the Council will remember that they based their refusal of a certificate to our school.

Hence it does not follow that because the word "certified" is prefixed to Denominational School, that the school is certified; and thus this word, seized upon by the Council to show why they omitted to extend the favour of clause 24 to our application, will, from the meaning attached to it by the Council's letter of the 20th instant, give the said clause a perverted sense, because Denominational Schools mentioned in it are "New Schools," and should be treated as the Public Schools mentioned in the same section.

We are forced now to say, -lenving out of consideration the positive unfairness of yet obstinately refusing a salary to our school, having 3 teachers, and nearly 200 pupils, -that the Council should be aware that it has acted twice illegally in the Grenfell R.C. School case: lst. By not extending the favor of clause 24 to our application. 2udly. By refusing a salary to our school, because the building in which it is conducted is sometimes used as a Church-a decision expressly condemned by article 13 of the Regulations, as well as by the statements of the Council's Inspectors.

We are further to state that all correspondence between the Local Board and the Council of Education will be published, so that the public may see the unfair treatment which the Catholic body at Grenfell have received from the hands of the Council-a treatment which should be very different if the Council would only consider that the Catholics are entitled to that share of tho public funds apportioned to them by the law of the country for the establishment and support of their schools.

On behalf of the Local Board,
I have, \&c.,
H. M. FINAEGAN, C.C.

## EDUCATION.

## No. 1.

Tife Rev. P. Slattery to The Secrefary to the Council of Endcation.
SIR,
Sydncy, 15 January, 1872.
I have the very unpleasant duty of bringing a most serious complaint against Mr. Bousficld, the teacher of the Eden Public School.

If you will be so good as to peruse the enclosed statements, you will, I am sure, admit that the conduct of Mr . Bousfield, tending to unsettle the faith of the Catholic children frequenting his school, is in flagrant opposition to all the expressed and implied rules by which the Council of Education desire their teachers to regulate the instructions given in Public Schools.

I can scarcely expect that any but Catholics will adequately appreciate what we feel to be the sad mischief of such inroads on the integrity of our children's faith.

You will understand at once that my object is to request that the Council of Education would direct an investigation into the matter, and take thereon such efficient steps as they shall see to be necessary.

I have only to add, that an investigation was commenced before the Local Board, but that owing to the unreasonable conduct of one of the members $I$ was compolled to withdraw and make this present appeal to the Council.

I have, \&c.<br>P. SLATTERY.

## [Enclosure No. 1.]

Thomas Silk's statement:-I am a Roman Catholic; I am 15 years old, and attend the Eden Public School; I. heard the tenchar say when he was teaching one (third) class that the Pope was not infallible; he was teaching us geography at the time; he asked one of the boys what was the capital of Italy; he said, "Romo"; the teacher then asked us did we know what. was taking place there at the time ; the boys said they did not know, when the teacher said that there was a Council of Bishops assembled at Rome; one of the boys (Alfred Luff) nsked him what the Bishops were doing there ; the teacher said they met about the infsllibility of the Popo, and that some of the Bishops did not believe it; he asked us did we know what infallibility meant; he then explained it to us, and said, "Hands up those who believe any person could be infallible after my explanation of infallibility"; some held up their hands, and the teacher then said, "No, the Pope is not infallible"; on anothor occssion he said the Pope was despotic, but said nothing then about the Pope's government; after reading a Scripture lesson, he told us that nobody ought to confess his sins to any person but to God-he said this in the hearing of the third class; this remark was displeasing to me; the teacher asked me did I believe in paying any person for praying for the dead; ho asked me this question while we were reading a Scripture lesson; he also said then there was no use in praying for the dead-that it would do them no good; he said, on another occasion, we should not pray to any person but to God, and told us that when we became old enough we should look into books and find out which religion was right, and that we ought not to believe in any religion until we proved that it was true; he made this remark on two or three diffierent occasions; some of the boys used afterwards to laugh at the romarks made by the teacher, and I sometimes thought that they were laughing at my religion; I never told my mother, about these remarks till yesterday.
I certify that the above is a true copy of Thomas Silk's statement,
made to me on the 14th December, $1871,-$
P. Slattery.

## [Enclosure No. 2.]

David Colleton's statemont:-I am a Roman Catholic, anid go to the Eden Public School; I am 12 years old; I have often heard the teacher make remarks about my religion; I heard him say the Pope was deepotic; he made this remark while giving us a geography lesson; on that occasion he said nothing about the Pope's government, but he did so on other occasions; he said at another time that the Pope was not infallible; this was during elass-hour, when giving a lesson in geography; he told the boys who thought the Pope was infallible to put up their hands; the teacher asid on another occasion, while we were reading a Scripture lesson, that we should not confess our sins to any person but to God; I did not like to hear the teacher mako this remark, because I thought he meant it for the Catholic boys; he said it was not right to pray to Saints, but only to God, and that Catholics prayed to the Virgin Mary ; on one occasion I heard the teacher aak Thomas Silk, during class, if he believed in praying for the dead, and said he himself did not believe it, nor did lee beliere in paying a person to pray for the dead, for when persons died their doom was fixed; he told us one day, during the Scripture lesson, that when we grew up men we should find out the right religiou; some of the teacher's remarks caused a few of the Protestant boys to laugh; I remember that when he said Catholice prayed to the Virgin Mary some of them laughed; the teacher's remarke about my religion annoyed me.

I certify that the above is a true copy of Darid Colleton's statement,
made before me on the 14th December, 1871,-
P. Slattery.

DAVID COLLETON.

## [Enclosure No. 3.]

Augustus Sill's statement:-I am a Roman Catholic, and go to the Eden Public School; I am 13 years old; I have heard the teacher make remarks about my religion; I heard him aay that the Pope was despotic; this was while giving us a gcography losson ; he did not say anything then about the Pope's government, but I have heard him say at other times that the Pope's governmunt was despotie; one day when giving, I think a geography leason, he asked my brother Thomas if ho knew what was going on in Rome at the time; he told us the Bishops were holding a Council there about the infallibility of the Pope, and said that some of them would not believe it ; he then explained infallibility to us and said, "Hands up those who think any person could be infallible after my explanation of infallibility"; he told us one day, while reading a Seripture lesson,
that we should not confess our sins to any person but to God; I believo he was alluding to my religion at the time; ho said on another occasion that we should not to pray to any person but to God; I heard him ask my brother Thomas did we sing hymns to the Virgin Mary; he said something about the Blessed Virgin, but I do not now remember what he said; on another occasion he asked our class (third) did wo think it was any good to pray for tho dead; he said, "When persons die their doom is fixed"; he also asked us did we think it was any good to pay a mau to pray for them; he told us one day that when we grew up we should iuquire and see what religion was right, for we should not believe any religion until we found out it was true; tho teacher's remarks about my religion ueed to annoy me; I did not tell my mother anything about the teacher's remarke, because the teacher said somebody was carrying tales home, and 1 was afraid to tell these thinge lest he should say before the school that I was a tell-tale.

I certify that the above is a true copy of Angustus Sillis statement,
made before me on 14th December, 1871,-
P. Shatibry.

## [Enclosure No. 4.]

James Silk's statement:-I am a Roman Catholic, and go to school at the Eden Public School; I am 12 years old; I am in the third class; I have heard the tencher say that the Pope was despotic; he also said that the Pope was not infallible; this was said while giving us a geography lesson; he said, "Hands up those who believe the Pope was infallible"; the teacher tode us that wo should not confess our sins to any person but to God; I think all the class heurd him say this; the great number of the class was not Catholic; he said we should not pray to any person but to God; he asked my brother Thomas did he think it was any uso to pray for the doad; he said that when persons dic their doom is fixed; he asked the class did they think it was nny good to pay people to pray for the dead; he asked me one evening did your peoplo (meaning Catholios) pray to the Virgin Mary; this was when I was kept in after the rest of the school; he told us that when we grew up we were to find out what religion was right, and not to believo any religiou until we found out that it was truc ; sometime ago the teacher used to make remarks very often about our religion; some of the Protestant boys used to laugh at the teacher's remarks about the Pope and our religion.

## No. 4.

Trlegram from The Secretary to the Council of Education to G. P. Keon, Esq., P.M., Public School Board, Eden.

16 January, 1872.
Teacierer has been suspended for breach of article 68 of the Regulations.
W. WILKINS.

No. 5.
The Secretary to the Councin of Education to J. C. Maynard, Esq., Inspector of Scifools, Braydwood District. in contravention of the Public Schools Act and Rerulations, Mr. K. Bousfield, teacher of the Public School at Eden, has conducted himself towards the Roman Catholic children attending the school in a manner calculated to unsettle their faith.
2. I am further to state that the Council desires that you will at once proceed to Eden for the purpose of making full inquiry into this matter, and reporting, without delay, in accordance with the power vested in you by article 81 of the Regulations.
3. I am at the same time to intimate that, in the exercise of your discretion, it will be competent for you to request the attendance of the Public School Board at the proposed investigation; but that, should any of the members fail to respond to the summons, you will not be justified in deferring the matter on that account. The evidence of any witnesses who may be brought forward on either side should be received.
4. A copy of the Public Schools Act and Regulations is forwarded herewith.

I have, \&c.,
W. WILIKINS, Secretary.

No. 6.
Telegram from Mr. R. Bofrfield, Teacher, Pubitc School, Eden, to Tife Sechetary to the Coundil of Eudcation.

Eden, 17 January, 1872.
Prease inform when and by whom investigation will be made.

No. 7.
Memoraidum from Tie Secretary to the Councif of Education to Mr. R. Bousfield, Teacier, Public School, Eden.

Council of Education Office,
Sydney, 19 January, 1872.
"Your telegram of the 17th instant, as to proposed investigation."
A duly accredited officer of the Council has been instructed to inquire into the complaints preferred against you by the Rer. P. Slattery. The investigation will be held next week if possible.
R. E. WEBSTER, for the Secretary.

No. 8.
Memorandum from Inspector, Bratdwood Disprict, to Tife Secretary to the Council of Enucation.
"Eden Public School.-Your letter (No. 72/805), dated 17th January instant, respecting charges against Mr. Bousfield."
I bea to report that on the 25th and 26th January instant I investigated the charges made by the Rev. P. Slattery against Mr. Bousfield. Besides Mr. Slattery and Mr. Bousfiold, three or four members of the Local Board were present during the whole of the proceedings. I examined cight boys, and I append to this report their cridence, and also a statement made by Mr. Bousfield.

I arrive at the following conclusions from the evidence:-
(1.) Mr. Bousficld explained to his class the purpose for which the Council of Bishops was sitting at Rome ; he explained the word infallibility; and he then asked those who thought a man could be infallible to put up their hands. He appears to me to hare produced the impression upon the minds of the childron that he himself did not believe in any man's infallibility; but whether he did this, as sone witnesses state, by an explicit avowal, or whether he conveyed the impression by his method of explaining the word and asking the question, I was not able to determine.
(2.) Mr. Bousfield spoke in some way to his class respecting prayers for the dead; and I believe he asked the children if they thought it would benefit the dead to pay a man to pray for them. Some of the witnesses state that Mr. Bousfield answered his own question by denying the utility of such prayers. My own opinion is that be did not deny it in words; but that he so treated the subject as to lcave the impression on the minds of the children that he did not believe that praying for the dead was of any value.
(3.) The four Catholic witnesses state that they heard Mr. Bousfield say it was wrong to confess sins to anyone but to God ; three of the same boys state that they heard him say it was wrong to pray to anyone but to God; and the fourth boy remembers hearing Mr. Bousfield say something about prayer to God, but forgets what it was. There was nothing to show that the boys who made these statements were not speaking the truth; but as the other witnesses denied hearing any remarks of the kind, and as the four boys repeated the charges glibly and in alnost the same words, and yet were unable to recall the circumstavces under which the expressions were used, I am not satisfied in my own mind whether the remarks were made by Mr. Bousfield or not.
(4.) I regard Mr. Bousfield's cxplanation of what he said respecting the despotism of the Pope, and respecting "change of religion," as a fair statement of what he probably did say.

## Remark.

The charges here referred to extend back over a period of eighteen months. During that time there has been so much discussion on these matters that some of the boys were unable to distinguish between what they gleaned from their companions and what they heard direct from Mr. Bousficld. Tho witness Colleton for instance gave eridence respecting infallibility, and yet it is certain that Mr. Bousfield made his remarks on that subject at least six months before Colleton came to the school. In forming my own opinion on this case I bave altogether discarded Colleton's evidence.
J. C. MAYNARD,

26th January, 1872.
Inspector, Braidwood District.

## [Enclosures.]

## Eden Peblio Schoor.

J.-Etidence of Augustus Silk, taken 25th January, 1872, by J. C. Maynard:-

My name is Angustus Silk; I am 13 yoars old; have been to the Public School for six years; Mr. Bousfield gave a osson on Burone a long time ago, and toll us which were the despotic governments and which were not; amougst the despotic rember that he named the Pope's aovernment and the Russian government; during a lesson on roots, Mr. Bousfield told Is what infallible meant; I forget what he tolit us it meant, but, after explaining, he nsked those to put up their hands who thought anyone could be infallible; I do not remember that he said anything more on the matter; this was a long time ago; I remember that Mr. Bousfield once eaid that it was wrong for any people to confess their ains to anyone but God; I cannot remember when this was said; he said something about praying to God, but I cannot remember what ; he once askod the class whother it was right to pay a man to pray for the dead; I do not remember that any other remark was made.

AUGUSTUS SILK.
We witness that the above is a correct summary of Augustus Silk's cvidence,-
C. Kebby.
S. Solomon.

Cross-examined by Rev. P. Slattery:-I did not tell yon that Mr. Bousfeld said the Pope was not infallible; he said the Pone was despotic ; he said nothing then about the Pope's government, but on one other occasion he said it was despotic when he said it was wrong for anyoue to confess to any person but God, 1 thought he wes alluding to our religion; I heard him say a person should not pray to anyone but to God; he said, when peoplo grew up they ought to find out which eligion wis truc, and follow the one they thourht wns truc. I went twice to your house to tell rou these things; once you ent for me, and onco, after coming to ask us questions, you told us to go down to your house; I never told anyone before I told you; $I$ belicved that what I told you on the $14 t \mathrm{th}$ Decomber and signed, was the truth, and you warned me two or three times not to say anything but the truth.

AUGUSTUS SILK

## We witness the above is correct,-

C. Kemby.
S. Solonor.

Cross-examined by Mr. Bousfield:-Father Slattery asked me, before I went to his house, if you had been saying anything about our religion; I do not remember if I had spoken to Father Slattery before this; I said nothing to Father Slattery between going to his house the first time and going the second time; I did not wish to complain of Mr. Bousfield; I had somothing to complain of ; I complained, on the first occasion, to Father Slattery, but, on the second occasion, Father Slattery asked me questions without any complaint from me; I cannot remember what I complained of to Father Slattery, but I thought it was so important that he ought to know' ; when I heard you say the Pope was despotic I thought you meant ho Popo and not his government. I do not know why I thought so; when you said we should not confess to anyone but God I thought you alluded to the Catholies, because I thought that no one else did confess sins to anyone but God.

## We witness the abore is correct,-

C. Kebby.
S. Sonomon

Cross-examined by Mr. Kebly, Hon. Secretary, Local Board:-I understand by despotic that he is the master of the country, -that he could sond them away to mines without bringing them before a Court.

AUGUSTUS SILK.
Recalled by Mr. Bousficld:-I have read the passage in 4th Book, page 99, "Itnly is divided into a number of States, all despotic"; I should think from that that the Pope's governmont was despotic.

AUGUSTUS SILK.

C. Khber.

At the conclusion of the eridence given by David Colleton, Mr. Bousficld handed in the following shatement :"David Colleton entered school 5th June, 1871; the Council in Rome was dissolred 27th October, 1870.1
J. C. MAYNARD.

Memo. by Mr. Mnyunrd :-Mr. Mr'Intyre risited the school 8th June, 18il.-J.C.M.

## III-Evidence of Thomas Silk, taken by J. C. Maynard, 25th January, 1872 :-

Mr name is Thomas Silk; I am 1s years old; am a Catholic; I heard Mr. Bousficld say the Pope was not infalliblo; during a geography losson he said that a Council of Bishops was sitting at Rome-that some persons thought the Pope infallible and some thought not; he asked those of the clase to put up hands who thought a man could be iufallible; he then said, "The Pope is not infallible"; during al lesson in geography he anid the Popo was despotic; he said, during a Scripturo lesson, that wo ought not to pray to anyone but to God; I did not hear him saying anything about praying to the Saints, or to the Virgin Mary; he said we ought not to confess our sins to anyone but to God; I did not hear him make any other remark then he asked me did I believe in paying anyone for proying for the dead. I said "No", he did not any that it warr righ wrong; I once Leard him say, "The beautiful Roman Catholic Church," in what I considered a tone of dorisiou.

The last time I went to Father Slattery was on the 14th December, when ho took down my evidence; I had mentioned to my mother that Mr. Bousfield was saying things against our religion, but I did not tell her tho particulars; Father Slattery first spoke to me about these thinge a long whilo ago; when Mr. Bousfield asked me about praying for the dead there were in the class M. Solomon, Grorge Moorley, A. Silk, J. Silk, I. Leslic, J. Leslic, J. Powell, D. Colleton, S. Solomon; it was about twelve months ago when I first spoke to Father Slattery.

Witness, $\frac{-}{s}$
S. Somomon.

THOMAS SILK.
C. Kebby.

Cross-examined by Rev. P. Slattery:-Mr. Bousfield explained infallibility, and suid it meant that a man could not commit any error in saying anything ; he said some Bishops belicred it and others did not; after explaining infallibility ho said, "Hands up, \&e."; I thought his renart about confession was intended to apply to my rcligion; teacher said we should not beliere in any religion till we found out it was true; the teacher said it would do the dead no good to pray for them; when I. told you of this you warned-me against telling anything but the truth; it was about sir months ago when I first spoke to you about some of these matters; I krow it was since Mr. M'Intyre came; I think when I ead it was twelre monthe ago I was making a mistake.

Witness, - S. SoLomon.

## S. Solomon. C. Kibby.

Cross-examined by Mr. Bousfield:-Alfred Juff asked what the Bishops were doing in Couneil at the time your explained about infallibility; you udvised us to read newspapers and to tuke notice of remarkable things happening in any country; you have talked to us about ihe famine in Persia, not about the fire at Chicago, about setting the Ocean on fire, and many other things, especially when the English mail arrived; you spoke of infallibility when the Council was sitting; I do not know how long ago this was; I had not been told by Father Slattery, or any Roman Catholic, that the Pope was infallible; I think the Pope was not infullible before the Council was held; I should not have been annoged to hear any person say the Pope was not infallible before the Council sat and decided; I. was not annoyed with you; I have heard you say the Pope's government was despotic; you said the Popo was despotic ; I think despotic means that a man can do as he likes with his own people; you spoke of the Russian and Turkish govermments being despotic; this was upon other occasions; you said the King of Turkey was a despot; also, that the Emperor of Russia was a despot; you spoke of the Pope without nny disrespect, and only mentioned his despotism as $n$ fact, just as you spoke of Rassia aud Turkey; when you spoke of "The beautiful Roman Catholic Church"' you were not speaking of a building; the Solomon's (Jews) came to the class when the New Testament was being read; I did not hear you object to their reading those lessons; they used to read the Old or New Testament lessons with the other boys sometines ; I do not know that they read the New Testanent; you did not ssy children should be without a religion; I have heard you say children should obey their parests; I do not remember hearing you say that we should also obey our ministers, or that we should follow the religion of our parents, or that thero wore people alwars trying to lead us astray ; you said we were to read and study before wo changed our retigion; I have read the passage, page 4I, Supt. IV Book.

## VIII.-Eviderce of James Leslie, taken by J. C. Maynard, 26th January, 1872 :-

My name is Jamos Loslio ; I am 10 years old ; my religion is Presbyterian ; I was in the 3rd class when Mr. Bousfield spoke about infallibility; a boy askod Mr. Bousfield what the Council was sitting about; the teacher explained infallibility for us; I forget what he said it meant; I do not ramember anything more about it; I remember Mr. Bousficld told us the Pope was despotic ; I do not remember he said the Emperor of Russia or the Sultan was despotic; I did not hear him say anything about confossing sins, or about praying to Saints, or the Virgin Mary ; I heard him say we ought not to pay money to snyone to pray for the dead; he once said we ought to obey our parente and teachers while were are young, and that when we grew up we should choose our own religion; I have never heard boys outside talk about things Mr . Bousfield said.

Witnoss,-G. P. Keon.
R. Botsfretd.

Cross-cxamined by Mfr. Bousfield:-You told those, who thought it right to pay a man moncy to pray for the dead, to put up their hands; I meant this when I said, "I heard you say we ought not to pay money to anyone to pray for the dead"; I did not hear you say whether it was right or wrong.

Witness,-G. P. Kron.
JAMES LESLIE.
R. Bodefteld.

## Mr. R. Bousfield's statement.

I never said the Pope was not infallible. About the month of September, 1870, I gave a geography lesson-it was a recapituIation of Europe. I asked a boy to point out Rome; ho did so. I had, previous to this, asked or requested the elder boye to read newspapers, and anid it would onable them to converse with people ubout chief events of the day. At this geography lesson, after Rome had been pointed out, I asked them if they knew what was taking place there at that time; they said "No." one of the boys-George Luff*-asked me what it was; I said that a great Council of Bishops were assembled there for the purpose of pronouncing the Pope to be cither infallible or not; I said it seemed a hard ease to decide, for some of the Bishops wore against it. One boy asked me what infalibility meant; I gave them my definition of the word, riz., "being incapable of committing error," and then asked them "to hold up thoir hands, if they thought a man could be infailible"; no hands were held up. I then said, "Weil, we will see how the Bishops decide it." I now solemnly arer that I did not say the Pope was not infallible ; I never told them how it was decided by tho Bishops, nor have I ever mentioned the word "infallibility" since. I hare said that the Pope's government was despotic ; I have also said that the Rubsian and Turkish governments are despotic. I have, at difforent periods, told them what kind of governmentsall the countries of Europo have. I think, as a teacher, I am justified in doing so. I can surely state orally at geography lesson that which they have read in their IV (fourth) Books. At page 99 of IV Book, published by W. Collins, Sons, \& Co., during year 1865, the following words occur in lesson on Italy :-"Italy is divided into a number of States, with different governments, but all of them despotic." The Council's authorized text-book on gcography, riz., "Hughes's Manual of Geography," new edition, published during year 1866, also states, at page 280, the same fact, in different words. I stated that the Pope's government was a despotism mercly as a geographical fact; I never said we should not pray to Saints; I ncrer said we should not pray to Virgin Mary; I nerer said we should confess to no one but God. I cannot remember asking the pupils of third (3rd) class "whether it was of any use paying anyone to pray for dead people"; I am quite positive I never said it was right to do so, and I am as equally sure that I never said it was wrong. to do so ; I am positive I nerer made remarks about such a subject being right or wrong. I do not remember вaying that "we should pray to no one but God"; I may hare used such an expression, but it mast have been used in contradistinction to praying to such things as the sun, firc, or river Nile, or river Gauges. We read abont people worshipping parious idols in our school books, and during such lesson I may have aaid, "we should only worehip God," but most cerlainly without any roference to Roman Catholic religion. I have said something about changing one's religion-it oceurred during a Scripture lesson in New Thestament. Thero is something said in that lesson about people being led astray by false teachers; I do not now remember the lesson; I told the children that when joung they must obey their parents, and follow their religion-that they must go to their Churches regularly, and attend to their religious duties, and listen to the instructions of their ministers until they wero men; then if, after reading and studying good books, they thought their religion was not a truc one, they would, of course, choose another one; I thought this was very good advice. I made no comparison of existing religions; I did not say which was best ; I did not say which was tho worst ; I was speaking to both Protestants and Roman Catholics. I do not remember saying, "the beautiful Roman Catholic Church"; the two boys who heard me say it do not know what I wns speaking about. If I had been deseribing a large city I might probably, in giving them a verbal picture of some of its buildings, have said, and "the beautiful Roman Catholic Church, etc., etc." After consideration I am sure I never used the expression.

ROBERT BOUSFIELD

No. 9.
Mr. R. Botsfietd, Teacher, Public School, Eden, to The Counctl of Edecation.
Eden Public School, 30 January, 1872.

## Gentlemen,

As an investigation has been made by Inspector J. C. Maynard, Esq., into certain charges preferred against me by Rev. Father Slattery, I trust you will allow me to offer a few remarks in self-defence.

The first charge (1.st), states that I said, "The Pope was not infallible." Haring at all times believed that it is a good plan in giving geography lessons to tell the pupils of something that has taken or is taking place at the locality or localities then under consideration, I have often adrised the elder boys of my 3rd and 4th classes to read the newspapers for the purpose of learning in that manner anything they could about disastrous fires, floods, famine, wars, or other remarkable events occurring in any part of the world. It was then through this advice that the word "infallibility" occurred in one of our geography lessons,--about (17) serenteen months ago-for thinking that they might have seen something about the Council of Bishops sitting in Rome, I asked them (after haring, during geography lesson, requested them to point out Rome) if they knew what was occurring there at that time; they said, "No." One boy, George Luff, aged 1.5 years, now living in Melbourne, asked me what was taking place there. I said a Council of Bishops was sitting for the purpose of deciding as to whether the Pope was infallible or not. I said it seemed a difficult matter to decide, for some of the Bishops were against it. One boy asked me what infallibility meant; I gave my definition, viz., "being incapable of committing error." I believe I then asked them to hold up their hands if they thought a man (see II. Silk's evidencc) could be infallible. No hands were held up; and I now solemnly assure you that I did not say, "That the Pope was not infallible," and also that infallibility has not been mentioned since. The whole conversation did not last five (5) minutes. It may be said that the word should not be mentioned in school, but allow me, gentlemen, to point out that the word occurs in the first lesson in N. T. No. 2. It also occurs in the Latin roots, and a fourth class is supposed to learn them. In explaining the word in the N. T. lesson, how easily may a teacher commit the error of asking cam "proof" be infallible-"Is man infallible," \&c., \&c., \&e. From the eridence taken before Mr. Maynard, I find that only four boys remember anytbing I said abont the word "infallibility." Thos. Silk and Jas. Silk say that I said, "The Pope was not infallible." Augustus Silk-"Did not hear me say that the Pope ras not infallible.". James Leslie-- "Only heard me say something about 'infallibility,' but nothing about the Pope not being intallible." Mark Solomon, Samuel Solomon, and George Moorley, know nothing about it. "Colleton's" evidence is not worth taking into considcration, for it is proved conclusively by the evidence of the other boys that the conversation took place during the time the Council were sitting in Rome. That Conncil was dissolved on the 27 th October, 1870. Colleton was then living in Bega, and did not attend Eden Public School until 5th day of June, 1871. How could he hear this conversation alout "infenlibility"? Besides, in his deposition, taken before Father Slattery, he says that I spoke about infallibility during a gcography lesson-before the Inspector he did not know what lesson it was; and then again, he says that it ras during a Scripture lesson; again, he says it occurred before Mr. M'Intyre's visit. Now, Colleton cutered school on $\overline{\text { oth }}$ day of June, and Mr. M'Intyre inspected the schooi on the Sth of June, 1871, and I find, by consulting my lessou-register, that only one Scripture lesson was given that week, and that on the Monday morning, and yet this "Colleton," who can remember
no other dates, can conveniently remember this particular one. Is his evidence worthy of belief? I think not. In fact he is convicted by evidence of other boys of telling a gross lie, and therefore his evidence in my opinion is worthless.

The second charge states that I said, "The Pope was despotic." It is evident from the evidence of the boys themselves that it was the Pope's Government which was said to be despotic. Iat once acknowledge that I did say so; I hare already in my statement, handed in to Mr. Inspector Maynard, given my reasons for so doing. It is plainly stated in lesson on Italy, book 4, page 99 , that all the States of Italy are despotic ; of course that statement may now be qualified or corrected, by teachers who are conversant with recent political changes in Italy, and it is more forcibly stated in the Council's text-book on geography, viz., Hughes's Manual of Geography, new edition, 1866, that the government of Papal States was a despotism. Teachers are allowed to state that Russia, Turkey, and other countries are governed by despotic governments; why should the same not be said of Papal States, if true? Are we to say nothing about the government of Papal States, or are we to say that they possess a free or liberal government? Are we not to apeak of the government of a particular country, because the temporal ruler of that country is also the head of a particular Church? Surely teachers may speals of the industry, commerce, and Government of that country, without the slightest reference to the Roman Catholic religion; certainly I have laboured under the impression that I could.

The third (3rd) charge states that I said, "We should not pray to Saints, or to Virgin Mary." I find from evidence before me that "Colleton" is the only one who charges me with this; all the other boys deny it. They say that they never heard those words used ; they attended school regularly, but "Colleton," out of 143 school days only attended 98 days, and was away 45 days. Which of them had the better opportunity of hearing such a statement?-the regular attenders or the irregular attendant? This charge is an abominable lie, and I feel quite sure that you, gentlemen, will regard it as such. I do not hesitate in saying that the boy "Colleton" is an audacious liar. He is proved to be so, not only in making this charge but also in his evidence as to what was said about infallibility ; and therefore, gentlemen, I consider that his evidence, given at this investigation, is unvorthy of belief, and should not be taken into consideration.

The fourth (4th) charge states that I said, "We should confess to God only." From the evidence I find that three (3) boys-" Colleton" being, in my opimion, unworthy of belief-depose to these words having been uttered by me. In this case note this fact: These three boys are Roman Catholics, and they are three brothers. Is not this a suspicious circumstance, especially so as no other boys nor girls heard the expression? Is it possible, think you, to teach a class of fifteen or twenty pupils, so that only three (3) shall hear what is said, and those three (3) to be three brothers, and three (3) Roman Catholics? I am sure it is not; and how is it that John Powell, a Roman Catholic, who has been in this class two and a half ( $2 \frac{1}{3}$ ) years, knows nothing of this? I risited the residence of this boy, and he denied before his parents having heard me use any such expression. I desired him to attend the investigation; his parents refused to let him attend. Why? Because Father Slattery had not ordered him to attend. But I said, " Let him come on my behalf." "Why, Mr. Bousfield, we couldn't do that, for that would look like going against the priest." These are Mrs. Powell's words, and no amount of reasoning would induce them to let him attend the investigation. They were sorry, and hoped I would come out of it all right, but they couldn't let Johnny come, for what would the priest say? How is it that Hannah Scott knows nothing of this? She is a Roman Catholic, and has attended this school for many years. She says she never heard of such expressions until they were noised abroad by Father Slattery. She was of no use to him. How is it that Henry Scott, a Roman Catholic, 10 years of age, in 3rd class, and who has been in school since I took charge, knows nothing about this? Simply because such words were never used. How is it that none but the three (3) Silks-the three brothers-heard this? Again, J. ask, is it probable that only those three (3) brothers should hear the expression, "We should confess to God only," and the rest of the class be in complete ignorance about it? I believe the experience of all teachers will bear me out in saying that it is not at all probable; and I now shall dismiss this charge by stating that it is wholly untrue.

The fifth (5th) charge states that I said, "We should pray to God only." I have no doubt I have said that we should pray to God during our lessons, but it would seem that the main point of this charge is the word only. I presume, gentlemen, that you are aware that the authorized school books, I. N. B., abound with allusions to God. You know, I have no doubt, that such expressions as "praise God," "thank God," "bless God," "obey God," and "pray to God," are to be met with from beginning to end of those books. I also presume that you know it is a teacher's duty not only to teach children to read but also to teach them to understand what they have read,- that is to say, ho must question them on tho meaning of words, of phrases, of sentences, and of the whole lesson. If that is his duty, what can he say to the children when they read lesson ten (10), sec. 4th, 2nd Book, but that they are there directed to call upon God when they are in trouble and need his aid? There is no allusion to anyone else. Again, take first: (1st) Sequel, published by Collins and Son, 1866,-
and at page 42 we find, "We ought to ask God to forgive us."

| $"$ | 147 | $"$ | "He had learnt to thank the good God for His blessings, and to pray for His help." |
| :--- | :--- | :--- | :--- |
| $"$ | 44 | $"$ | "but you ought to seck forgiveness from God." |
| $"$ | 164 | $"$ | "She had been told to pray to God to help her." |

" 172,164 " "She had been told to pray to God to help her."
In N.T. No. 1., less. $5,-$ " for it is written, 'Thou shalt worship the Lord thy God, and Him only shalt thou serve.'"
14,-"When you pray say, 'Our Father, who art, \&c., \&c.' "
In N"T. No. 2,-See Psalm 34, lesson 10 ; also, see lesson 26 , Psalm 107 .
I have not pointed out these passages for the purpose of justifying myself in saying that "we should pray to God only," but to show how easy it would be for a teacher, after cxamining his class upon this subject, to say, "Fes, we should always call upon God to help us," and yet, although innocent of any such intention, it appears that this would be offensive to the Roman Catholics. Again, some of our lessons tell us how many nations have worshipped Gods of various kinds, and how they have been punished for so doing. But if the teacher should, after questioning his class, or during the questioning, say, "You see we should only pray to God," what a fearful mistake he is committing. If he said this-and he may say it in mere contradistinction to praying to idols of various kinds-he would be giving offence to Roman Catholics. A teacher, in explaining those lessons, may make such a remark, and not have the slightest
idea of offending any Roman Catholic. It is plain that there are plenty of passages which teach the children to pray to God, but not one which teaches them the contrary. Wheat then is a teacher to say? I do not admit that I have used the expression with which I am charged; I may, as shown above, have used it, but most certainly I was not thinking of the Roman Catholic religion at the time.

This charge is also brought against me by the three "Silks"-Colleton's evidence being worthless. No one else has remembered the expression ; I am sure that I do not.

The sixth (6th) states something "about changing one's religion." Well now I admit that I did say something about changing one's religion once, and only once. It occurred when reading lesson 1 st, in N. T., No. 2, page 7, where the Apostle Paul speaks about "people being tossed to and fro, and carried about with every wind of doctrine by the artifice of men, \&c." The following words are as nearly as I can remenber the words used by me on that occasion. In explaining the sentence I said, "There are many religions, and these are again divided into sects; and there are always people who go about trying to persuade others that this religion or that religion is the right one, but let me tell you, that while you are young you are to obey your parents (see evidence), attend to your minister and religious teachers of the Gospel; but if, when vou grow up to be men, you think, after reading and studying good books, that your religion is not the right one, you mill, of course, choose another." I thought this was very good advice ; I gave it as such, and I solemnly swear that the above is the substance of what I said. It will be seen that Father Slattery only used such words as suited his own purpose, but it is shown by evidence of Jas. Silk, J. Leslie, and G. Moorley that the above is what I said.

The seventh charge states that I said, "That, or the, beautiful Catholic Church." These words were heard by two boys, and neither of them knew why I used them, nor when I used them. If they could give me the lesson I should perbaps be able to remember why I used the expression. But they cannot do this. It is enough for them to say that I used the words. Was I giving a description of some building ? Was I talking about some of their beautiful Churches? It is a mystery. It is so great a mystery that the remainder of the class-some eighteen children-ncver heard the words. Is this to be believed ? I can only state that it is untrue. Such an accusation in a Court of Law would be laughed at.

The eighth (8th) states that I asked them, "If it was of any use paying people to pray for the dead"? It appears from the evidence that this question was asked when examining them in the lesson, which gives an account of the rich man and Lazarus. I have always been in the habit of asking questions about subject matter of all lessons, and no doubt I asked them questions out of this lesson. I believe it is quite right to do so. It may be that I asked them in the lesson if it was right to pray for the dead. I certainly do not remember it; and I solemnly assure you that I never asked the class one word about praying for the dead. I am positive of this. None of the witnesses would go further than state that $I$ only asked the class "If it was of any use, \&c., \&c." They all concur in saying that I made no remark as to whether it was right or wrong; neither did I; and more, I do not believe that such a question was asked. Why should I ask such a question if I did not intend to make some remark about it? And now, gentlemen, allow me to say that I have stated candidly to you what I said about "infallibility," "despotism," and "changing of religion." I have done this without the least reserve, for I am conscious when these matters were spoken of that $I$ had not the slightest idea of doing wrong to anyone. I have also shown you how the expression of praying to no one but God might be used by a teacher without any intention of wounding the feelings of Roman Catholie pupils.

The accusation charging me with saying "The beautiful Roman Catholic Church" is so frivolous that it need not now be noticed by me.

The accusation charging me with saying that " We should not pray to Saints, nor to Virgin Mary" has not been proved, -only one boy, who, by the evidence of the other boys and by evidence of school records, is shown to be unworthy of belief, having deposed to hearing me say this.

The accusation charging me with saying "That we should confess our sins to no one but God," has not, in my humble opinion, been proved, for only the three "Silks" have given evidence in this case, while a number of other boys and girls-Catholics and Protestants-never heard anything of the kind. I scarcely think it fair to convict me on their evidence alone.

The accusation charging me with asking if it was right to pay persons to pray for the dead is a very doubtful one. The most they will say is that "I asked the class, \&c., \&c.": but they all say I made no remark. I, myself, deny that the question was asked.

Gentlemen, I now beg to say that I beliere the accusations "Confessing to no one but God," and "Of paying persons to pray for the dead," have been concocted by those who accuse me of them. This is tantamount to saying they are telling untruths. I believe the Silks are telling untruths. I know they are capable of doing so. There is no doubt of Colleton's want of veracity; and Father Slattery has been proved guilty, before the Local Board of Education, of telling lies. He stated before the Board that the parents (mentioning by name, Mrs. Silk, Mrs. Scott, and Mrs. Powell) had urged him to bring this case forward. These ladies--all Catholics-deny it. MIrs. Silk was brought before the Local Board, and there, before Father Slattery's face, denied having authorized him to bring the case forward. Mrs. Scott's children never heard these expressions, and therefore she could not authorize him to make the accusations. Mrs. Powell has told me time after time that she did not authorize him. If, then, this Rev. Father Slattery is not ashamed of stating untruths before a Board of gentlemen-many of them his social friends-do you think he will. besitate at other times? If he is capable of telling falschoods himself, do you think he will hesitate in prompting his boys to say what he wishes? I firmly believe not. I believe at those intervicws between himself and those boys, during the last severf or eight months, that more than the mere deposing of facts has taken place. I believe these charges have been in a great measure concocted, and I believe the boys have talked over the affair until they believe the shadow to be the substance.

And, gentlemen, has Father Slattery acted as a gentloman? Was it not his duty, when he heardso he says-months ago, of something occurring in school detrimental to the eternal welfare of his flock, to rescue them from that danger, or prevent them from incurring new dangers?

Was it not his duty to put a stop to such danger at once, by laying the case, when fresh in the memory of all, before the Local Board, or by writing or speaking to me about it?

Was it not his duty, as a Christian Minister of Christ's Church, to have warned me of the dangerous position into which I was falling?

Was it not his duty to, at least, warn the parents of those children? He thought not. He would rather let the charges accumulate and grow old, so that he might crush a Public School teacher, than save his children. He has kept his boys on the watch for mouths in order to catch any loose oxpression which I might use, and then he has tortured and twisted it to suit his own purpose. Is it right that Father Slattery should keep these charges back so long, and then give neither day, nor date, nor lesson, when they took place? I think not, and I trust, gentlemen, you will take all these matters into consideration before arriving at your decision. I trust also that you will take into consideration the fact that I have had charge of this sehool during a period of six (6) years, without one charge having been laid against me until now.

Awaiting your decision,-
I have, de.,
R. BOUSFIELD.

## No. 10.

Mr. George Moorley to The Council of Education.
Eden, January 31, 1872.

## Gentlearen,

I have been requested by the parties signing the enclosed Petition to forward it to the Council. You will observe Mr. A. Leslie has signed for two parties, having children attending the school, Mr. James Leslie and Mr. Allan-Mr. A. Leslie acting as their guardian.

I have, \&c.,
GEORGE MOORLEY.

## [Enclosure.]

The Council of Education, Sydney,--
Eden, January 26, 1872.
We, the undersigned parcnte of elildren attending the Eden Public School, and others, inhabitants of the town, having an intercst in the same school, have heard, with regret, that Mr. Bousfield has been charged by the Rov. Father Slattery with having, at certain periods, used expressions in sclool calculated to annoy the feelings of Roman Catholic clildren attending the Edon Public School, of which Mr. Bousfield is teacher, and having heard also that the evidence on the principal charge is very conflicting and unsatisfactory, beg to state that it would give us great, pleasure to learn that you have re-instaled Mr. Bousfield as teucher of the Public School at Eden. Erom our knowledge of Mr. Bousfield, during the last six yeare, we feel quite confident that whatever expressions of this kind he may have used in sehool were used inadvertently and without the slightest idea of perverting the minds of the children under his charge.

We entertain a high opinion of Mr. Bousfield's qualifications as a teacher; have never known him enter into religious discussions ; and believe that whatever he has said in school on religious subjects has been under the impression that it was a necessary part of his duty in teaching Scripture and other lessons. We therefore most earnestly request that you will accord us the favour of re-instating him as our Public School teacher.

Connert has removed your suspension. School to be re-opened. Council's decision by letter.

No. 13.
The Secretary to the Colncer of Edvchmoy to Mr. R. Boubfield, Teacher, Peblic School, Eden.
Council of Education Office,
Sydney, 24. February, 1872.
Sir, I am directed by the Council of Education to acquaint you, that the Council has had under consideration the minutes of cridence taken at the investigation, held on the 25th and 26th January ultimo, into the charges preferred against you by the Rev. P. Slattery, together with the Inspector's report thereon.
2. The Council is of opinion that the evidence fails to substantiate the charge of intentional tampering with the religious belief of the Roman Catholic pupils under your care.
3. It is clear, however, that you have acted in contravention, or in ignorance, of article 68 of the Regulations, which provides that "Nothing must be said or done by teachers calculated to offend the religious views of any pupil during the period devoted to ordinary instruction," and that your conduct has becn marked by a great want of common sense. You have evidently failed to realize your position as a Public School teacher, and have furnished ground for doubting your fitness for such an office.
4. The Council considers that you deserve a severe reprimand for your indiscreet conduct, and has further instructed me to caution you, that any repetition of the faults you are charged with will be followed by your immediate dismissal.
5. The suspension from office, to which you were subjected, has already been removed, and you have been permitted to resume your duties.

I have, \&c.,
W. WILKINS,

Secretary.

No. 14.
The Secretary to tife Cotncil of Educamton to The Rev. P. Slattert.
Council of Education Office,
Sydney, 26 February, 1872.
Reverend Sir,
With reference to your letter of the 15 th ultimo, I have the honor, by direction of the Council of Education, to acquaint you that the Council has had under consideration the minutes of evidence taken at the investigation, held on the 25th and 26 th of January last, into the charge preferred by you against Mr. Bousfield, teacher of the Public School at Eden.
2. It appears to the Council that the evidence adduced is not sufficient to substantiate the charge of intentionally tampering with the religious belief of the Roman Catholic children attending the school, but that the teacher has acted indiscreetly, and without due regard to his position. Under the circumstances Mr. Bousfield has been reprimanded for his conduct, and cautioned to avoid giving any ground for similar complaint in future.

I have, \&c.,
W. WILKINS,

Secretary.

## No. 15.

Tue Secretart to the Council of Education to G. P. Keof, Esq., P.M., Honorart Secretart, Public Schoors Board, Eden.

Council of Education Office,
Sydney, 26 February, 1872.
Sim,
I have the honor, by direction of the Council of Education, to acquaint you that the Council has had under consideration the minutes of evidence taken at the investigation, held on the 25 th and 28 th of January last, into the charges preferred by the Rev. P. Slattery against the teacher of the Public School at Eden, together with the Inspector's report thereon.
2. The Council is of opimion that the evidence fails to substantiate the charge of intentional tampering by Mr. Bousfield with the religious belief of the Roman Catholic pupils under his care, but that he has acted indiscreetly in the matter, and without due regard to his position. Mr. Bousfield has accordingly been reprimanded for his conduct, and cautioned to avoid giving any ground for similar complaint in future.
I. have, \&c.
W. WILKINS, Secretary.

## No. 16.

## Memorandua to Inspecior, Bratdwood Districic.

"Eden.-Investigation into charges preferred against Teacher by Rev. P. Slattery."
The Council is of opinion that the evidence fails to substantiate the charge of intentional tampering with the religious belief of the Roman Catholic pupils by the teacher, but that he has acted indiscreetly, and without due regard to his position. Mr. Bousfield has accordingly been reprimanded for his conduct, and cantioned to avoid giving any ground for similar complaint in future.

26 Hebruary, 1872.
W. WILKINS,

Secretary.

# ST. ANDREW'S COLLEGE. <br> (PETITION FOR APPOINTMENT OF SELECT COMMITTEE—SUBSCRIBERS AND OTHER PRESBYTERLANS.) 

Ordered by the Legislative Assembly to be printed, 12 June, 1872.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.
The Petition of the undersigned subscribers for the establishment of St. Andrew's College, and of
other Presbyterians,-other Presbyterians,-

## Hunbbly Sheweti:-

1. That in the year 1865 a Union of the four sections, into which the Presbyterian Church of this Colony had previously been long divided, was at length effected and ratified by Act of Parliament, the said four sections being in point of number and extent respectively as follows :-

First.-The Synod of Australia, representing the Church of Scotland;
Second.-The Free Church ;
Third.-The Synod of New'South Wales; and
Fourth.-The United Presbyterians.
2. That, immediately thereafter, a Bill for the establishment of a Presbyterian College, under the Affliated Colleges Act, was submitted to Parliament and enacted in 1867, the said College to be designated St. Andrew's College.
3. That, in accordance with the provisions of the said Act, the sum of ten thousand pounds had boen raised by the Presbyterians of the Colony for the establishment of the said College, in the year
1870 .
4. That as it was provided in the Act for the establishment of St. Andrew's College, that the entire management of the Institution should be rested in a College Council, to consist of twelve members, viz, four Presbyterian ministers and eight laymen, it was a matter of equity and justice to the Presbyterians of the Colony that the four sections of the Presbyterian Church, comprised in the Union of 1865, should have been equally represented in that Council, that is, by one minister and two laymen each.
5. That, disregarding entirely this important circumstance in the history and condition of the Church, the persons charged with the election of College Councillors in November, 1870, merely took the highest numbers on the aggregate rote of the subscribers, both for ministers and laymen, and declared the result of the election accordingly:
6. That the grossest injustice was thus done to a very large portion of the subscribers to the College and the Prosbyterian community generally, for-

First. The section of the Ohurch representing the Synod of Australia and the Church of Scotland in the Union of 1865 , although the oldest and by far the largest of the four, had no clerical representative assigned to it at all, while the Free Church section, a much smaller one, had two representatives in the College Council.
Second. Upwards of threc hundred of the subseribers to the College, who had all voted for a clerical representative of the said Synod of Australia and Church of Scotland in the College Council, were thus virtually disfranchised, their votes being outnumbered by the aggregate Free Church vote, supplemented by that of the United Presbyterians.
Third. The congregation of the Rev. Dr. Steel, Ph. D., of the Frec Church section, and that of the Rev. Adam Thomson, of the United Presbyterian, are represented in the College Council by not ferer than seven of its twelve members, that is, by a decided majority over those represcnting all the other congregations of the Church, about sisty, in nll, put together.
7. That this anomalous state of things has given rise to extreme dissitisfaction among a large proportion of the subscribers to the College, and the Presbyterians of the Colony gencrally, destroying, as it does, the peace and harmony of the Church, which the Union of 1865 was intended to ensure ; postponing indefinitely the carryng out of the Act of Parliament for the inauguration of the College, which ought to have been effected immediately after the election of the College Council in November, 1870; inducing one of the most prominent and influential members of the said Council, the Honorable S. D. Gordon, to resign his oflice in disgust; and constraining another, John Frazer, Esq., who had announced his intention to endow the College with $£ 4,000$, to refuse to give a single sixpence for the purpose under its actual misrule.
8. That this disastrous condition of the Institution has not originated in the natural course of things, under fair and honorable procedure on the part of all concerned, but is simply the result of a virtual conspiracy, on the part of certain unscrupulous persons, to over-reach and circumvent their associates in the undertaking, in violation of the grand principle of Christianity, that of doing to others as we should wish them to do to us, and thereby to get the election of the College Council and the subsequent management of the Institution into their own hands, by packing it with men whose antecedents utterly disqualify them, however unexceptional otherwise, for the management of an academical institution.
9. That in the estimation of your Petitioners the only effectual means for redressing the great grievances, detailed above, is, that the four sections of the Presbyterian Church, comprised in the Uniou of 1.865, should be equally represented, as they ought to have been, and had a right to be, in the College Council, the sections at present in excess of this number to be reduced to their proper proportions, and those deficient to be supplemented from the votes of the subscribers at the election of November, 1870.
10. That your Petitioners humbly submit that it is alike the interest and the duty of your Honorable House, as guardians of the public purse, to insist upon such a measure of equity and justice being carried out before any pablic money is issued for the College, and thereby to prevent the ruin of the Institution, which is otherwise likely to ensue, inasmuch as there is' involved in the case the alienation of ten acres of valuable land, now forming part of the University Reserve, the issue from ton to twenty thousand pounds of public money for the erection of the requisite buildings, and the grant of a salary of five hundred pounds a year for the Principal of the College from the Public Treasury.

Your Petitioners therefore humbly pray that your Honorable House will be pleased to take the premises into your favourable consideration, by granting a Select Committee to invcstigate the case of St. Andrew's College, as above detailed, and to report the result to your Honorable House.

And your Petitioners, as in duty bound, will ever pray, \&e., \&c., \&ce.

# SYDNEY FREE PUBLIC LIBRARY. <br> (REPORT FROM TRUSTEES, FOR YEARS 1870-71.) 

## 

## The Trusiees of the Free Public Litrarx, Sydney, to Thfe Honorable The Colonlal Secretary.

 Sir,I have the honor to forward to you the first Report of the Trustees of the Free Publie Library, of Sydney.

This Institution was formally opened on the 30th September, 1869, by His Excellency the Earl of Belmore. Parliamentary provision for the foundation of the Library had been made eight years previously, the sum of $£ 25,000$ having been voted for this purpose in 1862 . In the same year a site was purchased in Elizabeth and Castlereagh streets, and plans of the proposed building were prepared and submitted to the Government.

The land so purchased was found to be unsuitable for the contemplated structure, and was subse-quently sold. Between 1862 and 1869 no other steps were taken towards carrying out the intentions of the Legislature in the foundation and maintenance of this Institution. In the latter yenr the Australian Library and Literary Institution offered their collection of books to the Government, and some 16,000 volumes were purchased for the sum of $£ 1,500$; at the same time the Australian Library Building, at the corner of Bent and Macquarie streets, was leased by the Government for one year at a rental of $£ 300$, with the option of purchasing it within the year for $£ 3,600$. These negotiations were concluded ou the 24th September, 1869, and six days later, as has been already stated, the Institution Library was opened to the publie.

Provisional regulations had been hastily drawn up in the mean time, and a list of the books which had been prepared by the Librarian of the former Institution was printed and realy for circulation on the day of opening the Library. This was necessarily incomplete ; but time pressed, and there was no opportunity then afforded for the classification of the books, the preparation of an accurate Catalogue, or for the careful revision of the list issued from the Government Printing Office. Immediately after the opening, steps were taken by the Librarian, pending the appointment of Trustees, to re-nrrange the books of the Library in accordance with such a classification as he found would more readily meet the convenience of the public. In the accomplishment of this work it became necessary to remove from the Gallery to the ground floor of the Library some 5,000 volumes, and to prepare new and separate lists, which were promptly printed and placed in the hands of the visitors to the Institution. The Library was not closed during this period, nor was there any diminution of the regular attendance.

On the 10th March, 1870, the appointment of the following Trustces of the Free Public Library was notified in the Government Gazette :-

The Rev. Charles Badham, D.D., Professor of Classics and Logic in the University of Sydney.
The Rev. W. B. Clarke, M.A.
The Honorable W. B. Dalley, M.L.C.
The Rer. J. D. Lang, D.D.
Sir William Macarthur, Knt.
William Macleay, Esq., M.L.A.
W. A. Duncan, Esq.

The Honorable Robert Owen, M.L.C.
N. D. Stenhouse, Esq., M.A.

And on the 21st September following, W. J. Stephens, Esq., M.A., was also gazetted as a Trustee.
The Trustees having unanimously elected Professor Badham as their permanent Chairman, communicated with the Government on the question of their power and authority in the management and guardianship of the Library.

They represented to the Colonial Secretary the necessity of having at once placed at their disposal any funds that might be available for the purchase of books, and the expediency of passing, as soon as possible, an Act of Incorporation and endowment. A special report of a Committec of the Trustecs, suggesting what powers should be vested in them, was drawn up and forwarded to the Colonial Secretary, with the riew of assisting the Parliamentary Draftsman in the preparation of this measure. On the 10th June, 1870, the Trustees, on the invitation of the then Colonial Secretary (the Hon. Charles Corper, C.M.G.), had an interview with him on various matters connected with the Institution which had either formed the subject of correspondence with the Government, or had engaged the attention of the Trustces at their meetings. In consequence of this interview a list of books, immediately necessary for the Institution, was at once prepared and forwarded to the Government for transmission to England by the then outgoing mail, and a complete code of Regulations, for the guidance of visitors and the protection of the property of the Library, was compiled and adopted. These Rules were published in the Government Gazette of the 14th June, 1870, and are now in force. Following the example of other Institutions of a similar kind, the selection from the shelves of the Library of books by adult visitors is unrestricted, but they are not permitted to replace the volumes. This course was adopted with the view of familiarizing the officers of the Library with the class of literature in daily use, and of assisting them to report accurately to the Trustees on the educational uses of the Library; and it was also of great importance in preventing books being misplaced and thus disturbing the order of the Library.

After careful consideration of the position of the Goveriment with regard to the tenure of the building, the Trustees deemed it to be their duty to advise the purchasc of the building for the sum which has been already mentioned. This step would not have been taken by the Trustees had there been any ground for hoping that an extension of the lease of the premises could have been obtained; but as there was no probability of a renewal of their tenancy, and as there was no public building arailable for their purpose, the Trustees reluctantly recommended the complection of the purchase. The Trustees are aware that a design and plans have been prepared by the Colonial Architect for the erection of a suitable building elose to the present Museum ; but they are of opinion that such a site would be wholly unsuitable for the purpose from its remoteness from the centre of the city. At the same time it cannot be doubted that a larger and better appointed building is urgently required; not only because of the increasing number of students availing themselves of the Library, but also for the purpose of affording room for the meeting of the literary and scientific bodies, which appear to be on the increase in Sydney, and whose efforts it is highly desirable to assist.

As it was found that only a small portion of the books selected by the Trustees could be procured in the Colony, and that a considerable reduction in cost price could be effected by the appointment of an Agent in London for the transaction of the business of the Library, the Trustees hare made the nccessary arrangements with the firm of Messrs. Triübner \& Co., of London, by whom all books required for the Library will henceforth be procured. The Trustees have excrciscd great care in the selection of books for the Institution. In a large number of cascs the lists submittied lave obtained the consideration of all the Irustees who may have been in attendance at the regular mectings, but in no case are orders given for the supply of any books unless with the sanction of at least three members of the Board. It may be proper here to explain, for the information of the public, that all accounts for books purchased in the Colony are paid at the Treasury, upon the authority of Professor Badham (the Chairman of the Board), who signs his approval after the rouchers have been certified to by the Librarian. The books purchased in England upon the orders of the Trustees are paid for by the Agent General for the Colony, out of remittances made to him by the Honorable the Colonial Treasurer, and charged against the Library vote by the authority of the IIonorable the Colonial Secretary, on the application of the Irustecs.

The following sums have been roted by the Parliament for the years 1870 and 1871, viz.: -

The whole of the amount for books, binding, printing, \&c., has been appropriated, but all the works ordered are not yet to hand, and some have not yet bcen obtained.

Although the Institution is situated disadvantageously for the general convenience of the public, so far removed as it is from the main thoroughfares of the city, the number of students who have visited the Library sufficiently justifies the wise libcrality of the Legislature at its foundation and maintenance.

From the day of its opening to the close of 1871 , it has been risited by 136,957 rcaders, whose visits are thus classified-

| Three months in 1869 | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | 17,006 |
| :--- | :--- | :--- | :--- | :--- | ---: |
| Twelve months in 1870 | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | 59,786 |
| Twelve months in 1871 | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | 60,165 |
|  |  |  |  |  | 136,957 |

During this period the Institution has been open to the public on 678 days, giving a daily average of 202 readers.

The ascertained number of volumes in the Library, at the time of delivery to the Government, was ... ... ... ... ... ...
From these the Trustees withdrew some works of fiction, which they considered were unsuitable for such an lostitution, together with duplicate copies of works

16,057

Leaving the total number at ... ... ... ... ... ... 13,937 vols.
Tho which they have added ... ... ... ... 3,839 vols.
(Including 993 volumes, donations,-the principal donors being the late Mr. Justice Wise and the Reverend Dr. Lang) and the Specifications 2,501 of Patents from the Government, comprising

Total ... ... ... ... ... ... 20,277 vols.
and there are now in transit about 559 volumes, which will increase the total number of volumes in the Library to 20,836 .

Some of the duplicates withdrawn from the Library were given to the Melbourne Free Library in exchange for a collection of pictures of considerable value as specimens of photo-lithography from that Colony, the work having been taken from pictures now in the Museum of Art at Mclbournc. The exchange was made more with a riew of commencing a system of mutual exchange between the Institutions than of giving or receiving a fair valuc. The remainder of the works taken out were given to the Sydney Infirmary and the Mospitals for the Insane.

The arrangement of the books in the Library, and the per-centage of reading of each division on every one hundred books used, is shown as under, viz.:-

And the number of books in use daily exceeds an average of 300
On the withdrawal of so large a number of works of fiction, there was, as might be expected, a considcrable falling off in the number of visitors, which at one time exceeded 350 daily; but on tho arrival of the monthly and quarterly periodicals, which now come by every mail from England, a reaction took phace, and the daily readers keep to a steady average.

A complete catalogue of all the books in the Library to the 31st December, 1871, is now in the hands of the printer, and so soon as a proper revision has beeu made it will be issued by the Government Printer for sale at a low price.

The Trustees have to express their regret that several volumes (of which a list is appended) have nt various times been stolen from the Institution, and that other volumes hare been taken from the Reading Room, kept for a time, and then restored to the Library. Deeply impressed with the urgent necessity of the detection and punishment of such offenders the Trustecs offered large rewards for the necessary information to enable them to prosecute.

The Trustees desire to expross their deep sense of the great exertions in behalf of the Jibrary, made by Mr. Walker, the Librarian. With the assistance of a very limited staff, when the number of visitors is taken into consideration, and it is remembered that the hours of attendance are from 9 o'clock A.n. to 10 o'clock p.a., the Librarian has by constant supervision and by great labour, in devising and enforcing regulations, fully provided for the convenience of students and maintained order in the Institution.

I have, dc.,
CHARLES BADHAM,
Chairman

## APPENDIX.

LIST of Books stolen from the Free Public Library, Sydney.
1870.

March. Australis and Canads. I vol. 18 mo. Oxford, 1844
" Southey's Life of Nelson. 1 vol. 18mo. 1860, London.
May. Scott's Naval Life. Vol. 1 only. 1834, Lond., post 8 vo. Rogere' Table 'Talk. I vol. post 8vo. London, 1856.
December. Smith's Compendium of Mercantile Law. 1 vol. post 8vo. Lrondon, 1834.
1871.

February. "Tallangetta," by Howitt, the 2nd vol. only. Part of Mr. Justice Wise's donstion.
Books destroyed.
Debrett's Peerage ( 2 copies). Plates cut out. Barnard's Laudscape Painting. Plate and pages 133, 134 cut out.

## NEW SOUTH WALES.

## AUSTRALIAN MUSEUM.

(REPORT FROM TRUSTEES, FOR 18\%1.)

## REPORT OF THE TRUSTEES OF THE AUSTRALIAN MUSEUM, FOR THE YEAR ENDING 31st DECEMBER, 1871.

To IIs Exceinescy the Administrator of the Goternment,
\&e., \&e., \&e.

1. The Trustecs of the Australian Museum have the honor to submit to your Excellency this their Eighteenth Annual Report.
2. The Museum has been open to the public daily (Sundays excepted) during the past year, and has been risited by 179,121 persons.
3. The system of exchanging specimens with the principal foreign Muscums is still maintained by the Trustees, who have received sereral valuable collections during the past year; a list of which is appended. (Appendix. No. 2.)
4. Numerous donations have been received during the year, a list of which is appended. (Appendix No. 3.)
5. In Appendix No. 4 will be found a list of the various objects sent in exchange, together with the names of the recipients.
6. Screral valuable works, purchased out of the Endowment Fund, have been added to the Museum Library, a list of which is appended. (Appendix No. 5.)
7. Tro Taxidermists have been occupied during the year in preparing and mounting the following specimens-

> 63 mammals,
> 193 birds,
> 20 fishes,
and in articulating the following osteological subjects:-
Man,
Bear,
Pig,
Seal,
Horse,
Giraffe,
Slotb,
2 Porpoises,
Whale,
Wombat,
Koala, or Native Bear,
Wallaby,
Kangaroo, and
A Crocodile.

The gigantic cast of the skeleton of the Megatherium, received from the Trustees of the British Musoum, has also been carefully mounted, and is now exhibited in the centre hall of the new wing. Numerous series of teeth, skulls, and portions of skeletons have been prepared for exhibition, with a view to illustrate the Homologies of the Vertebrata, in the manner best adapted to meet the requirements of students in Comparative Anatomy.

It is obviously very desirable that a special descriptive Catalogue should be provided to accompany the collection, but this is at present quite beyond the means at the disposal of the Trustees.
8. The Trustecs are in possession of a scries of valuable plates-cighteen (18) in number-which have been prepared at the cost of the Board, to illustrate the Fossil and Recent Fauna of New South Wales. These could be brought out at a very moderate expense for the use of the public, and for the purpose of exchange with other Muscums and Scientific Socicties. They are also well adapted to accompany the valuable treatise of the late distinguished Professor Thomson upon the Bone Caves of Wellington, N.S.W., which is now out of print, and much required. The Trustecs would, therefore, venture to suggest that the cxecution of these desirable works be entrusted by the Executive to the Government Printer, to be undertaken and carricd on, from time to time, as the exigencies of the Service may allow.
9. In their last three Reports, the Trustees had occasion to observe that the number of visitors had much increased, that the collection was daily growing larger and more valuable, and that additional funds were required to keep it in the same state, and maintain order among the numerous visitors. Since then overy arailable cabinet bas been filled, and many specimens are consequently exposed alternately to dust and the moisture of the atmosphere, as well as to casual injury.
10. The Trustecs report, with deep regret, the death of Professor Alexander M. Thomson, Dr. Sc., and they take this opportunity to put on record their high sense of the valuable services rendered by him to this institution. Alfred Roberts, Esq., has retired from the Board, and the elections to fill these vacancies will take place at an early date in 1872 .
11. Appendix No. 1 contains au abstract of the receipts and parments of the Trustees on behalf of the Museum, for the year ending December 31st, 1871.
12. Appendix No. 2 contains a list of the specimens received in exchange.
13. Appendix No. 3 contains a list of the various donations during the year, with the names of the donors.
14. Appendix No. 4 contains a list of the specimens sent in exchange to various persons and institutions.
15. Appendix No. 5 centains a list of the books purchased for the Museum Library.
16. The Trustees have the honor to submit this their Report for the ycar 1871; and in testimony thereof, have caused their Corporatic Seal to be hercunto affixed, this tht day of April, 1872.

GERARD KREFTY,
Curator and Secretary.
(L.s.)
E. DEAS THOMSON, Crown Trustec and Chairman.

APPENDIX No. J.

Ccrnent Expenditure of the Trustees of the Australian Museum, during the year 1871.

## A PPENDIX No. 2.

## LIST OF SPECLMENS RECEIVED IN EXCHANGE.

From the Trustees of the British Museum.

Varamus heraldicus.
Monitor niloticus.
Monitor dracena.
Teius nigropunctatus.
Ameivu guttata.
Centropyx calcaratios
Zootoca muralis.
Incerta riridis.
Theira punctata.
Nucras lalandii.
Algirn burbarica.
Acanthodactylus bellii.
Boskianus.

## NEW SOUTH WALES.

# GRANTS FOR PUBLIC WORSHIP PROHIBITION: ACT. <br> (RJTURN OF MONEY EXPENDED UNDER AUTHORITY OF.) 

Ordered by the Legislativo Asscmbly to be printed, 16 July, 1872.

FURTHER and final Return to an Address of the Monorable the Legislative Assembly of New South Wales, dated 14 October, 1870, praying that His Excellency the Governor would be pleased to cause to be laid upon the Table of this House, -
" (1.) A. Return of all sums of moncy paid by the authority of the Govern-
" ment under the 'Grants for Public Worship Prohibition Act of 1862,'
"specifying the amount paid each year to each individual recipient and to
"cach denomination; also, the amount so paid or supplied from the
"revenue or proceeds of the Bishopthorpe Estate to any Clergyman of
" the Church of England, whether in licu of any amount payable under
" the said Act, or in supplement thereof.
" (2.) A Return of all sums of money paid by like authority since the " passing of the said Act, out of the revenue or proceeds of the Church
" and School Estates, specifying as above.
" (3.) Copies of all minutes of the Executive Council or of other documents " authorizing any such payment.
" (4.) Copies of all documents showing, or purporting to show, any contract " or arrangement between the Government of this Colony and the Church
" of England, or any Bishop of Sydney or Australia, or other recognized
" head of the Church of England, relative to the disposal of the revenue
" or proceeds of the Bishopthorpe Estate, or implying any condition for
" public purposes upon the grant of the said Estate."
(Mr. W. Forster.)

# GRANTS FOR PUBLIC WORSHIP PROHIBITION ACT. 

## PROCEEDINGS of the Executive Council on the 19th August, 1856, with respect to the Glebe land and Bishop's salary.

Mintte No. 56/41-Confirmed 25th August, 1856.—Approved, W.D., 29 August, 1850.
His Excellency the Governor-General lays before the Council a letter from the Right Reverend the Lord Bishop of Sydney, on the subject of the income derived, or to be derived, from the Glebe land granted in support of the See.
2. By an Act of Council, passed last Scssion, the 40 acres of land at the Glebe, near Sydncy, granted by the Crown for the maintenance of the Bishop of Australia and his successors, were vested in the Bishop of Sydney and his successors, with potver to grant leases. In the exercise of that power the Bishop of Sydney has parcelled out the land in building lots, and has let portions of it on leases for 99 years. Tho gross annual income from the allotments already leased is stated to be $£ 982$, which, after deducting the expenses, leaves a balance on account of the year 1856-7 of $£ 428$ liss.
3. As this Glebe land is now for the first time made to yield an income, it becomes necessary to determine what diminution, if any, is to be made in the fixed stipend drawn by the Bishop out of the provision by law for purposes of public worship, so as to give practical effect to the intention of Her Majesty's Government when grantiug the land in question. That intention is stated in Mr. Gladstone's despatch to Sir Charles Fitz Roy, dated 30th March, 1846, as follows:-
"The 40 acres of land on the Parramatta Road, to which the Bishop refers, and which is now permanently annesed to the See, are to be valued forthrith with reference to the annual income which they may reasonably bo expected to yield during the remaining term of his incumbency."
"The income of the See is to be fixed at $£ 1,500$ per annum, of which however the valued proceeds of the 40 acres, estimated in the manner I have stated, shall form a part.
" It is not intended that the moncy payment, which under this arrangement will be made annually to the Bishop so as to make up the estimated amount, shall be subject to diminution in consequence of a future increase in the annual produce of the 40 acres of land. At the same time this reservation would not bind the Government as in the nature of an absolute engagement if a period should arrive when there shall have been such an increase in their value as to place the income of the See upon a footing entircly disproportioned to the scale of the Ecclesiastical establishment of the Colony gencrally."
"That money payment will of course be made out of the portion of the fund for public worship, which fallis to the share of the Church of England."
4. The propositious submitted by the Bishop of Sydney are as follows :-
(A.) That for the ncst five years the annual income of Bishopthorpe shall be assumed at $£ 750$, and that the said sum shall be paid over by the Bishop periodically to the Public Worship Fund.
(B.) That the Bishop's stipend of $£ 1,500$ per annum, with the temporary increase, shall continue, as heretofore, to be currenily payable from the above fund.
(C.) That any increase beyond $£ 750$ in the annual income of Bishopthorpe during the said five years shall also constitute part of the Bishop's income.
(D.) That this arrangement shall commence 1st July, 1856, and be subject to revision at the expiration of the said five years.
(E.) The appropriation of the $£ 750$ per annum so accruing from the endowment of the Sce of Syduey and paid into the Public Worship Fund to be the subject of a special communication with reference to soction 5 of the proceedings of the Executivo Council, dated 12th January, 1853 , respecting the administration of that fund.
5. Having fully considered these proposals the Council arrive at the conclusion that bearing in mind the altered circumstances of the Colony since Mr. Gladstone's despatch was written, with regard on the one hand to the reasonable requirements of the Sec, and on the other to the greatly increased raluc of the eudowment, the intention of Her Majesty's Government in making that endowment will be fairly carried out by the following arrangements :-
(1.) The Bishop of Sydney should be guaranteed a stipend of $£ 2,000$ per annum.
(2.) This stipend will in the first instance form a charge on the Church of England's share of the Public Worship Fund, as now distributed.
(3.) But the net income derived from Bishopthorpe should go in diminution of the stipend guaranteed from public funds.
(4.) When and so soon as the income derived from Bishopthorpe shall reach $£ 2,000$ per annum the contribution from the public funds shall wholly cease.
(5.) Any saxing thus effected in the Church of England's share of the Public Worship Fund will be appropriated from time to time as the yearly balances are now appropriated.
(6.) The Council advise finally that the foregoing arrangements take effect from the beginning of next year, leaving untouched any income derived by the Bishop during the currency of the present year.

MICHL. FITZPATRICK,
Executive Council Office,
Clerk of the Council.
Sydney, 25th August, 1856.-No. 56/644.

# THE PETERSHAM CHURCH GRANT BILL. <br> (PETITION AGAINST-CHARLES CAMPBELL, BARRISTER-AT-LAW.) 

Ordered by the Legislative Assembly to be printed, 27 June, 1872.

To the Honorable the Members of the Legislative Assembly of the Colony of New South Wales, in Parliament assembled.
The humble Petition of the undersigned Charles Campbell, Barrister-at-law, one of the Members of the Church of England, residing at Nevtown, near the City of Sydney,-

## Respectrujici showeta:-

That your Petitionor has heard with alarm that a Private Bill has been submitted to your Honorable House to enable the Trustees of certain land and premises in the parish of Petersham, near Newtown, to sell the same, and to provide for the application of the net proceeds of such sale towards the ercetion and completion of a Church, for the use of certain other members of the Church of England, now in course of erection on part of the Camperdown Cemetery.

That your Petitioner begs leave to submit that the allegations contained in the preamble of the said Bill can be disproved, inasmuch as the Promoters of the said Bill were not nominated and appointed under and by virtue of an Act made and passed in the eighth year of the reign of His late Majesty King William the Fourth, entitled, "An Act to regulate the Temporal Affairs of Churches and Chapels, \&c.," but at the suggestion of the Lord Bishop of Sydney, who had been duly nominated and appointed original Trustee ; inasmuch as the said piece of land is not "inconveniently situated for the erection thereon of a Church for the use of the Members of the Church of England who are residents of Newtown aforesaid, and its neighbourhood," that is to say, of all who are residents, including your Petitioner and his noighbours, but only such as are residents in the neighbourhood of the Camperdown Cemetery aforesaid; and inasmuch as the said Members of the Church of England, that is to say, all the said Members, including your Petitioner and his neighbours, have not applied to the said Trustees to sell the said picce of land and to apply the proceeds of the sale thereof as aforesaid.

That the said land was originally promised in 1857 for a new Church in connection with the Church of England ; and that, as the residents of the particular locality for whom the land was to be held in trust were not specified, your Petitioner submits that it was to be held in trust for the Members of the Church of England residing in the immediate vicinity, that is to say, for your Petitioner and his neighbours.

That the proposed alienation of the said land has not been sanctioned by the Synod of the Diocese of Sydney, to whose rules all real or personal estate in trust for or for the use of the Church of England within that Diocese, it is provided by an Act of the Colonial Legislature, passed in October, 1866, shall be held subject.

That the suburb of Newtown is of very great extent, and the number of Mombers of the Church of England residing therein is computed at upwards of three thousand; that the Church now in course of , erection on part of the Camperdown Cemetery, and estimated to be capable of holding only nine hundred persons, is about half a mile distant from the site proposed to be alienated; and that it is for the purpose of completing this Church, most conveniently situated for such of the cestuis que trust as reside in that part of Newtown, at as little cost as possible to them, that the Promoters of the Private Bill referred to propose to take away from your Petitioner and his neighbours, who are at least equally cestuis que trust, the ouly site for a Church in their part of Newtown.

That if the land be sold, it will probably be purchased as a site for a public-house; whereas if it be retained for the purpose for which it was specially granted, your Petitioner and his co-religionists contemplato erecting thereon another Church so soon as the one now in course of erection on part of the Camperdown Cemetery shall have been completed, for the use of themselves and families, some of whom at present have to walk to Christ's Church or St. Paul's, a distance of about a mile and a half.

That as the said land was granted upon trust for the erection thereon of a Church in connection with the Church of England, and for no other purpose whatsoever, it becomes a subject of grave doubt whether, in the eveut of the Members of that Church in the immediate vicinity not requiring it, your Honorable Honse can, now that State Aid has been withdrawn from all religious denominations, sanction the sale of the said land and the application of the proceeds towards the crection of a place of worship for that religious denomination in a different locality.

Wherefore, your Petitioner humbly prays that he may be heard, either in person or by counsel, in opposition to the said Private Bill.

And your Petitioner, as in duty bound, will ever pray, \&c.
CH. CAMPBELL.

# THE PETERSHAM CHURCH GRANT BLLL. 

(fitition against-certain members of the chdrch of magiand pesidina at or neat newtown.)

Ordered by the Legislative Assembly to be printed, 10 July, 1872.

To the Honorable the Members of the Legislative Assembly of the Colony of New South Wales, in Parliament assembled.
The humble Petition of the undersigned Members of the Church of England, residing at Newtown, and in the neighbourhood thereof, near the C̣ity of Sydney,-

## Respectfuley Showeth:--

That your Petitioners have heard, with surprise and regret, that a Bill has been submitted to your Honorable House to enable the Trustees of certain land and premises in the parish of Petersham, near Newtown, to sell the same, and to provide for the application of the net proceeds of such sale towards the crection and completion of a Church, for the uso of certain other Members of the Church of Fingland, now in course of ercection on part of the Camperdown Cemetery.

That your Petitioners humbly but earnestly submit that the allegations contained in the prenmble of the said Bill can be disproved, inasmuch as the said piece of land is not inconveniently situated for the erection thereon of a Church for the use of the Members of the Church of England, who are residents of Newtown aforesaid and its neighbourhood, that is to say, of all who are residents, including your Petitioners, but only such as are residents in the neighbourhood of the Camperdown Cemetery aforesaid; and inasmuch as "the said Members of the Church of England," that is to say, all the said Members; including your Petitioners, have not applied to the said Trustees to sell the said piece of land, and to apply, the proceeds of the sale thereof as aforesaid.

That the said land was originally promised in the year one thousand eight hundred and fifty-seren for a new Church in connection with the Church of England, the Bishop of Sydney to be sole Trustee, and that, as it was not specified for the residents of what particular locality the land was to be held in trust (" the parish of Petersham, in the county of Cumberland," being a vory wide description), your Petitioners submit that it was to be held in trust for the Members of the Church of England residing in the
immediate vicinity.

That the suburb of Newtown is of very great extent, and the number of Members of the Chiurch of England residing therein is computed at upwards of three thousand; that the Church, now in course of erection ou part of the Camperdown Cemetery, will only be capable of holding nine hundred persons; that it is about a half a mile distant from the site proposed to be alienated; and that it is for the purpose of completing this Church, most conveniently situated for themselves, at as little cost as possible to themselves, that the Members of the Church of England residing in that part of Newtown propose to take away from your Petitioners, and sell the only site for a Church existing in your Petitioners' part of
Newtown. Th
That the owners of certain trust property will be subjected to considerable pecuninry loss if the only site for a Church in the immediate vicinity of the said trust property be alienated in the manner proposed by the promoters of the Private Bill now before your Honorable House.

That two or three of the narrow strects near the Newtown Toll-bar, and close to the site proposed to be alienated, which are inhabited by the class for whose religious improvement such grants as the one in question have been issued under the provisions of the two Acts cited in the preamble of the said Private Bill, together with the newly erected Asylum for the Blind and the Dumb, only a few yards from the site, and the houses extending therefrom along the Newtown Road to its junction with the Parranatta Koad, would now supply a moderate congregation, which will be swelled to a very large one by the inhabitants of the houses which will, in a very few years, be erected on the fields at the back of the Asylum, constituting the Trust property above referred to.

That as the land proposed to be alienated was granted upon trust for the erection thereon of a Church, and for no other purpose whatsoever, it ought not to bo sold, now that State aid has been withdrawn from all religions denominations, in order that the proceeds of such sale may be applied towards the erection of a Church belonging to any one religious denomination in a different locality.
said Private Bill.
And your Petitioners, as in duty bound, will ever pray, \&c.

# THE PETERSHAM CHURCH GRAN'T BLLL. <br>  

$$
\text { Ordered by the Legislative Assembly to be printed, } 12 \text { July, } 1872 .
$$

## To the Honorable the Members of the Legislative Assembly of the Colony of New South Wales, in

 Parliament assembled.The humble Petition of William Mathew Hutchinson Gibbons, of Parramattia, Esquire, Richard Mutchinson Roberts, of Bowral, Esquire, Thomas Broughton, of Paddington, near the City of Sydney, Esquire, and Thomas MacCulloch, of Syducy, Esquire, the Committec of the Estate of Mackenzie Bowman, a persou of unsound mind,-

## Respectrulis Showeth:-

That, by a Deed bearing date the twenty-fourth day of February, one thousand cight hundred and seventy-one, Heer Majesty Queen Victoria granted unto Christopher Rolleston, Thomas Chapman Briellat, Stephen Campbell Brown, and Willian Crane, as Trustees, all those two roods and fifteen perches of land situated near Newtown, in the said graut, more particularly described, upon trust, for the ercetion thereon of a Church of the United Church of Eogland aud Ireland, as by law established, and ou no other trust and for no other purpose whatsoever.
2. That your Petitioners are the owners of a large and valuabie extent of laud adjoining or adjacent to the land described in the said grant, and are taking steps for the sale or leasing in building allotments of their said land.
3. That immediately after such sale or leasing being carried into effect, there will be a large population occupying a large area of ground, who will, if the Biil hereinafter mentioned be passed, hare no place of worship in their immediate ricinity.
4. That a Bill has been submitted to your Honorable House, to enable the said Trustees to sell the said land, and apply the proceeds of such sale towards the erection and completion of a Church on land part of the Camperdown Cemetery, not being the land described in the said grant, nor any portion thereof.
5. That your Petitioners have and claim vested rights and interests under the said graut, and submit that they cannot be deprived of them.

Whereforc, your Petitioners lumbly pray that they mily be heard by Counsel in opposition to the said Bill.

And your Petitioners will ever pray, dec.

# THE PETERSHAM CHURCH GRANT BILL. <br> (FETITION IN FAVOUR OF-MEMBERS OF CHURCT OF ENGIAND, NEWTOWN.) 

Ordered by the Legislative Assembly to be printed, 12 July, 1872.

To the Honorable the legislative Assembly of New South Wales, in Parliament assembled.
The humble Petition of the undersigned Members of the Church of England at Newtown,Respectyulif Showetif:-

1. That in the year one thonsand cight hundred and forty-sis, a portion of land, situated in the parish of Petersham, was reserved by the Crown, on the application of the Churchwardens of St. Stephen's, Newtown, for the erection of a Church thereon.
2. That the site so reserved bas been found to be inconveniently situated for the purposes aforesaid, the population having receded therefrom, and extended in a contrary direction, leaving the land at the
extreme end of the parish. extreme end of the parish.
3. That the present Church does not afford sufticient accommodation, and the arrangements are moreover exceedingly inconvenient. During the week a day school is held in portion of the buildiug, and on Sunday morning and afternoon the whole is ocelpied by the Sunday scholars and teachers, necessitating the rearrangement of many pews for Divine Service, thereby adding to the work of the Sexton, whose
salary has had to be increased in consequence.
4. That at present the primary school is held in the Cluurch, and the infant school about two bundred yards therefrom, in another building; that this is a disadvantage to the school, inasnuch as some parents will not send their children where the younger are separated from the elder.
5. That by the erection of a new Church this grievance will be orercome, as the present Church will make an excellent school for the primary as well as the infant classes.
6. That the Church now in course of erection in the Cemetery will be amply sufficient for the accommodation of the members of the Church of England at Newtown, and such site is the most eligible that could be chosen, and the mosi centrally situated in the parish.
7. That the sale of the land so reserved in one thousand cight hundred and forty-six will form a valuable asset to assist in the erection of the new Church, wherein one-half of the sitings will bo free : and upon the undertaking, by the parishioners, of the building of such new Church, it was expressly agreed and understood that the land so reserved in one thonsand eight hundred and forty-six should be sold, and the proceeds apphed towards such erection.
8. Under these circumstances, your Petitioners venture to pray that the Bill now before the House will meet with your approval.

And your Petitioners, as in duty bound, will ever pray.

Printed copies of the Bill referred, and original Petition to introduce the same, before the Committee.
Parties called in.
Petition of Chas. Campbell then read by the Clerk.
Present for the Promoters:-
S. C. Brown, Esq.
C. Rolleston, Esq.

Present for the Petitioner:-
C. Campbell, Esq. (The Petitioner.)

Christopher Rolleston, Esq., examined.
Witness produced original Deed of Grant referred to in preamble, also originals of letter from Colonial Secrotary, dated 2nd September; 1846, and of Minutes of Proceedings at two public meetings held in Newtown,-and handed in copies of the same. (Fide Appendix A 1 to A4.)

Witness withdrew.
William Crane, Esq., called in and examined.
Witness withdrew.
Mr. Campbell applied for an adjournment in order to produce evidence in opposition to the Bill.
[Adjourned to Friday next, at $10: 30$ o'clock.]

FRIDAY, 12 JULY, 1872.

## Members Peresent:-

Mr. Allen in the Chair.
Mr. Hill,
Mr. Creed,
Mr. Neale.
Mr. Lackey
Entry in Votes and Proceedings referring the following Petitions to this Committee, viz.:-
(1.) A Petition from certain Members of the Church of England residing at Newtown and in the neighbourhood thereof, praying to be heard by Counsel in opposition to this Bill,
(2.) A Petition from certain Members of the Church of England at Newtown in favour of the passing of this Bill,
(3.) A. Petition from William Matthew Hutchinson Gibbons, Richard Hutchinson Roberts, Thomas Broughton, and Thomas McCulloch, Esquires, the Committee of the Estate of Mackenzie Bowman, a person of unsound mind,-praying to be heard by Counsel in opposition to this Bill,-read by Clerk.

Parties called in.
Petitions then read by the Clerk.
Present for the Promoters:-
S. C. Brown, Esq.

Present for the Petitioners:-
C. Campbell, Esq.
W. H. Wilkinson, Esq. (as Counsel on behalf of the Committee of the Estate of Mackenzie Bowman.)

- The Honorable John Campbell, M.L.C., called in and examined.

Witness withdrew.
Thomas McCulloch, Esq., called in and examined.
Witness withdrew.
John I. Kettle, Esq., called in and examined.
Witness withdrew.
[Adjourned to Tuesday next, at 1030 o'clock.]

## TUESDAY, 16 JULY, 1872.

## Members Present:-

Mr. Allen in the Chair.
Mr. Hill,
1 Mr. Creed.
Entry in Votes and Proceedings, referring a Petition from certain Members of the Church of England at Nowtown, in favour of the passing of this Bill, to the Committee, read by the Clerk.

Parties called in.
Petition then read by the Clerk.
Present for the Promoters:-
S. C. Brown, Esq.

Present for the Petationers:-
C. Campbell, Esq.,
W. H. Wilkinson, Esq. (Counsel.)

Mr. Mr. Albery called in and examined.
Witness withdrew.
Mr. Chas. Sampsou called in and examined.
Witness withdrew.
The Hon. Chas. Campbell, M.L.C., examined.
Mr. Brown handed in plan of Newtown. (Vide Separate Appendix.)
Mr. Wilkinson addressed the Committee in opposition to the preamble.
Mr. Brown then addressed the Committee in reply.
[Adjowrned to Friday next, at $10 \cdot 30$ o'clock.]

FRIDAS, 19 JULY, 1872.
[In the absence of a Quorum the meeting called for this day lapsed.]

## THURSDAY, 25 JULY, 1872.

Mexibers Present:-
Mr. Allen in the Chair.
Mr. Hill,
1 Mr. Neale.
Committee deliberated.
Preamble read and considered.
Question,-"That this preamble stand part of the Bill," put and passed.
Bill read and agreed to.
Chairman to report the Bill to the House without amendment.

TAKEN BEFORP

THE SELECT COMMITTEE
ox

## THE PETERSHAM CHURCH GRANT BILL.

C. Rolleston, in the newspapers, and by notice given in the Church at morning and evening service on the three pre-

Esq. ceding Sundays from the pulpit in the ordinary and orthodox manner.
$\overbrace{\text { 14 }}$. What was the date of that meeting? 11th December, 1871.
9 Juls, 1872. 15. Do you produce the minutes of that mecting? I do. (The witness handel in a copy of the same. Tide Appendix A 4.)
16. Is it absolutely necessary, in order to the completion of the new Church, that the Trustees should be in posscssion of these funds? I think so. I do not see any possibility of completing this Church without we obtain the procecds of this land to enable us to do so, for the parish is a poor one, and the utmost efforts have been made to raise funds. We cannot expect to get any more from the people, and we have looked to this land as part of the ways and means to put up this Church.
17. Was it not stated at the time thie erection of this Church was determined upon, that the sale of the land was regarded as part of the means from which the Church should be erected? Certainly it was.
18. DIF. Campbell.] Will you be pleased to tell me for what purpose this land was granted. Of course the Act will specify for what purpose the land was granted originally? "Dpon trust for the erection thereon of a Church of the United Church of England and Ireland as by law established in conformity with the provisions of the said Act."
19. Does it say a word with regard to its being granted for the purpose of erecting a Church for the Members of the Church of Eugland in the parish of Newtown? It is not usual.
20. Then it is a coujecture? No, I know it perfectly.
21. Were you there at the time the letter you have inentioned was written? No, I was not in the parish when the original promise was made.
22. Chairman.] It was granted in 1871 ? Yes; but it was promised in 1846.
23. The letter is addressed to the Churchwardens of St. Stephen's? Yes.
24. Mr. Campbell.] I believe you have stated in your Petition that it is granted under 7 William IV, No. 3, and 8 William IV, No. 5 . I find by section 7 of 7 William IV, No. 3, that not less than three nor moro than five Trustees shall be nominated by the persons contributing towards the building of a Minister's dwelling;-you are awware that a parsonage is erected? Yes, but not on this land.
25. On a portion of the land? No.
26. You have got a separate grant then? Yes; the grant of the parsonage land was issued many years before this.
27. Were not both parcels of land promised at the same time? I am not sure-I do not know.
28. If it was granted under this Act of course it must have been? I cannot say.
29. When this Minister's dwelling was erected the parties who contributed towards the building were the parties by whom the present Trustecs were nominated? I cannot tell you at all. Tbat took place long before I was connccted with the parish.
30. Are you aware of any link by which the present Trustees are connected with those originally nominated? No, I know nothing about it whatever.
31. Are you aware that the Bishop of Australia was nominated sole Trustee by the parties who contributed towards the erection of that parsonage? I believe it was usual in those days to nominate His Lordship, but I do not know anything about it.
32. The first Act has reference to all denominations--the second to the Members of the Church of England ; but both Acts provide that the persons who are to be nominated Trustees shall be nominated by persons who contribute money towards the erection of the building. These persons appear to have nominated the Bishop of Australia;-by whom were the present parties elected? By Members of the Church of England of the parish.
33. Are you not aware that there was a letter from the Bishop's Secretary, dated 11th August, 1870? I do not remember it, but the present I'rustees were elected long before that.
34. This deed of grant which you produce I think you will find was issued in consequence of a letter from the Bishop's. Secretary to the Secretiry for Lands, dated 11.th August, 1870? That was in consequence of the original letter, informing the Government that certain Trustees had been named, having been lost in the Lands Department. The Bishop recommended that we should have a second nomination.
35. As the 16th clause 8 William IV, No. 5 , provides that the Bishop of Australia shall be nominated as sole 'l.rustee, are you aware of any clause under that Act under which you say this grant was made, which provides that the Bishop may resign, and three or five Trustees may be clected in his place? No, I do not. 36. I ask you beenuse you state in your Petition that all this is done under this Act. I think you stated that there was a meeting at which these Trustees were elected? Yes.
37. And it was an ordinary meeting of Members of the Church? Yes; conrened in the ordinary way.
38. If I understand you rightly, there was no explanation given at that mecting as to their representing the parties who had originally nominated the Trustees? No.
39. There was no reason given why, instead of the Bishop being the sole Trustee, other five should be appointed? I think it was stated that it was more desirable that it should be in the hands of persons connected with the parish.
40. Desirable in order that it might be sold? I do not know about that; it was thought better it should be in the hands of Trustecs, and I think the Bishop expressed a wish that it should be so. I have not the letter, but that is my impression.
41. I think you have stated that there was a meeting held of the parties concerned-of the parishionersfor the purpose of asking the 'Trustees to procure authority for the sale of this land? Yes, there was.
42. It was stated, J think, by the gentleman conducting the case of the promoters of this Biil, that the meeting was one of the largest mectings of Members of the Church of Englaud that has ever been held at Newtomn? I think it was.
43. Did that meeting consist of persons in posscssion of sittiugs in the Church? To a great extent;-not entirely.
44. Did it not to a great exteut consist of women: Certainly; and rery good Churchmen they are too. If we had not ladies in our Churches I do not know how we should manage without them.
45. I am speaking of persons contemplated by the Act, and I think you will admit that the greater portion were females? I would not say the greater portion.
46. The majority? I would not say the majority.
47. Did you count them? No, but a great many were there, certainly,
48. Was no objection taken to the voting being by the women? I do not remember.
49. The Minister who, of course, was the Chairman, ruling that women should be admitted to vote? It C. Rolleston, might have been so.
50. I dare say you do remember that such an objection was raised? I am not sure aboutit; now you have mentioned it, I think you said something about it at the meoting, but I am not certain.

3 July, 1872.
51. You do not remember that there was a little party-feeling mixed up in the matter; for instance, that those who were favourable to Orangeism should vote in one direction-? I do not.
52. Or that some came to support the Minister because he was supposed to be an Orangeman? No.
53. I think you said the site you propose to alienate would be inconvenient for the great bulk of the parties now occupying the parish;-when you say so do you mean that part of the parish cxtending to where I am residing? Yes, the entire parish.
j4. You are aware the site is not four minutes walk from my house? The site of the present Cemetery is not more than fifty yards farther.
55. Is it more than four minutes walk from my house? I cannot say; I never walked it.
56. Jou have very frequently passed that way? Yes,
57. lou are a very. good walker, and would not think it wonderful if I walked from the Toll-bar to my own house in four minutes? I should think it a good sharp walk up that hill to do in four minutes.
58. Do you think, when you say the Toll-bar would be an inconvenient site for the whole parish, that it would not be a convenient one for the people in that narrow street called Campbell-street? I. would not say that it would be inconvenient for the people in Campbell-street, but I say it would not be convenient for the parish of Newtown.
59. The question is, what constitutes the parish ; would it not be an inconvenience for me and my neighbours to have to walk a distance of half-i-mile? I think there is not much difference between the two sites as to the walk.
60. Do you mean to say that I can walk in the same time to the Cemetery as to the Toll-bar? I do not think there is much difference.
61. I am sure, if you turn over in your mind the position', you will admit that the Cemetery is a far greater distance from my house? It may be a little further, but very little.
62. I think you will admit that although for the majority of the parishioners of Newtown the site in the Cemetery would be more convenient, yet for the minority those residing between the Toll-bar and the schoolhouse, used at present as a Church, the site at the lioll-bar would be quite as convenient as that at the Cemetery? Equally.
63. Have you any idea of the number of those who are called Members of the Church of England in the parish of Newtown? lit has been estimated at about $3,000 \mathrm{men}$, women, and children. I am not surc that the estimate has been very accurately made.
64. Of course this Church which you propose to build in the Cemetery would not accommodate more than one-third of the number? S50; that is about the proportion of nembers who attend Chureh out of a population of 3,000 .
65. Then assuming that two-thirds of the people are not to be practically heathen, do you not think 400 peoplo could be asscmbled at a Church if built upon the site proposed to be alienated? I do not thimk you could get forty to attend.
G6. On what ground ;-that they do not go to Church? That they do not go to the Church at the same time. It is assumed that about one-third of a population consisting of Members of the Church of England attend worship at the same time; some go to the Chrrch in the morning, some in the afternoon, and some in the evering, and therefore a Church that will hold 850 or 900 persons is ample for a population of 3,000 . 67. Is not that assuming that two-thirds of the Members of the Church of England have no religion at all? No, for some go in the morning, some in the evening, and some in the afternoon.
68. Afternoon;--is there an afternoon service? Sometimes.
69. Not generally. Supposing 850 to go in the morning and 400 in the evening, still there would be room for another Church-as this would give under 1,300 out of the 3,000 ? I can only repeat that the accommodation is sufficiont according to the ordinary estimate.
70. Your knowledge as Churchwarden would enable you to say whether the majority of those who do not go to Church are of the educated or of the uneducated class? I should not like to say.
71. This land was not purchased by Members of the Church of England, but was granted by the Crown ? Yes.
72. And it was granted under the Act which provides for the encouragement of religion; and we know that it was for the purpose of inculcating religion among the poorer classes. Is it not the fact that the persons who do not come to Church are of the very class for whose benefit that land was granted by the Crown? I do not think it was granted to any class in particular. In the new Church it is determined that one-half of the seats shall be free and unappropriated, in order to accommodate this large majority of the poorer classes.
73. Mr. Brown.] Witl reforence to ladies ;-are thero not a number of ladies in the parish of Newtown who are scatholders? A very large number.
74. Who pay pew-rents? Yes.
75. When you speak of the site proposed to be sold being inconvenicut, you speak of the great bulk of the parishioners, not of a few who live close to it? Of the great; bulk of the parishioners. You rould not put a Church ati the edge but, in the eentre of a parish, so that the people all round could come to it. Beyond the site we propose to sell thero cannot be a population, as the land js occupied by the Vietoria Park, the University paddock, and the Colleges, so that it is impossible a population can grow up around it.
76. Mr. Hill.] Then the site where you have commenced to build a Chureh offers greater facilities tha that which you propose to alienate? Yes.
77. $M r$. Canpbell.] My friend states that there is no chance of any population springing up in this locality ;I would ask him, when he speaks of Victoria Park, whether he meludes the fields that lie at the back of the Asylum for the Dumb and Blind? No.
78. You are aware of the reason why these fields are not builtion ai present? Because they are in the hands of a family who cannot or will not sell them.
79. They are a trust estate; -when they are sold and houses are erected on inem, will they not be nearer to tho site you propose to alienate than to the Church in course of erection? Fes.
80. You spoke just now so as to lead the Committee to suppose there will be no. population there;-there will be a dense population there in a fow years? I do not know that at all. On one side of the road it is uttierly impossible there can be a population.
81.
C. Rollestou, 81. Mir. Crecd.] Is there any Church of England at present at Newtown? Yes; a temporary building, Esq. which is used as a schoolhouse during the week, and as a Church on Sunday.
82. That, I suppose, will be closed as a Church when the other is finished? Yes, and become a certified

3 July, 1872. Denominational School.
83. The parishioners believe it is quite impossible to raise the funds for the Cburch without the sale of this land? Yes, for years to come the Church will be at a standstill.
84. Mr. Brown.] Was it not looked upon as part of the means by which this Church should be built ? Tes.
S5. Mr. Camplell.] Was that understood by the Committee? Fes.
S6. And not objected to? And not objected to by any one.
87. Have not subscribers since, who were members of the Committee, protested against it? I think you and your brother have.
88. Are you aware that other members have objected, if not protested? I am not aware.
89. Are you quite sure-one way or other? Mr. Robison objected, I belicve.
90. Did Mr. Simpson not object? Not till lately. He went with us thoroughly until lately.
91. When you say went along with you, did not I and other members of the Committee go along with them as to the building? Yes, and they went along with us as to the sale of the land.
92. Mr. Creed.] Does this land, of which Mr. Campbell speaks as likely to be built upon, lie in the parish of Newtom? I believe a portion of it is in Newtown, and a portion in St. Barnabas's parish.
93. Was this land given for the advancement of religion in the parish of Newtown? Yes.
94. And you think this object would bo more fully carried out by the sale than by the retention of this land? Tes.
95. Mr. Jackey.] Are there any defined bounds to the parish of Newtown? Yes, but I cannot exactly tell you what they are. When the Rev. Mr. Taylor, the present incumbent, was appointed, the boundaries were altered, and a portion of the parish on the Sydney side, near Shepherd's Paddock, was given over to the Rev. Mr. Smith as part of the parish of St. Barnabas. That arraugement was made by the Bishop, with the consent of the incumbent.
96. Chairman.] That portion is nearer to St. Barmabas's Church than Newtown? Yes.
97. Mr. Tackey.] Does the șite granted for the parsonage adjoin the land you propose to sell? There is just a street betwren.
98. Mr. Creed.] What is the distance from the parsonage to the Cemetery? A good half mile.
99. This will remain the parsonage? It is proposed to build a parsonage in the Ccmetery eventually.
100. You hold the parsonage at present? We have no other; but if we were to build a parsonage at the Cemetery we could apply to the Legislature to onable us to sell it to furnish funds for the new parsonage in the Cemetery, next to the Church.
101. How long has that parsonage been built? About twenty years I fancy.
102. It was built at a time when it was thought it would be in the ceutro of Newtown? Yes.
103. MIr. Hill.] Was the parsonage built by subscribers? I cannot say.
104. MIF. Campbell.] May 1 ask you if, until lately, there have not been two clergymen officiating in this parish? Yes, Mr. Taylor was the curate.
105. Was Mr. Kemp, the clergyman under the Act, drawing £200 a year? I believe so. I do not know under what Act.
106. Did he not reside in this parsonage? Yes.
107. May I ask who resides in it at present? Mr. Kemp's family.
108. Then there are two clergymen at one time for this cxtensive parish? Yes.
109. One of them has been removed; -in what way and on what account? I cannot tell you.
110. DIr. Brown.] Is not the building now used for the Church of England some distance from the building that has been used as the parsonage? Yes, a quarter of a mile, at least, I should say.

## William Crane, Esq., examined:-

W. Crame, 111. Mr. Brown.] You are one of the Members of the Church of England at Newtown? I am.

Esq. 112. And hare been resident at Newtown a number of years? About seventeen.
$\xrightarrow[\sim]{\sim}$ 11.3. Do you know the site near the Toll-bar, referred to in the Bill before this Committee? I do.
9 July, 1872. 114. Is that as conveniently situated as a site for a Church for the great bulk of the Members of the Church of England at Newtown as the site at the Cemetery? In my opinion it is not.
115. You have been an attendant at the Church of England there for about seventeen years? Yes.
116. And know the parish well? Yes.
117. Do you believe that the Church now in course of erection at the Cemetery will afford reasonable and ample accommodation for the Members of the Church of England at Newtown? I think so.
118. Were you present at a meeting of the parishioners at which it was determined to build a new Church at the Cemetcry? I was.
119. Was anything said at that meeting about the sale of the land at present in question, as one of the assets to be employed in building the new Church? It was mentioned.
120. Were you present at a neeting of the parishioners at which the Trustees were requested to apply for in Act of Parliament to enable them to sell this land? I was.
121. Had you ever seen so large a meeting of Members of the Church of England at Newtown before? I had not.
122. AIr. Campbell.] When you say that the Church in course of erection would answer all the purposes required for the population belonging to the Cburch of England at Newtown, at what do you estimate that population? I think nearly 4,000 -between 3,000 and 4,000 , including children.
123. How many would the Church now in course of erection bold? $\$ 00$.
124. Do you think a Church that would hold 800 would be sufficient for a population of 4,000 ? I think so, because that number includes children.
125. Then yon think that one-fifth of the number of nominal Churchmen is the proportion that go to Church? I think a Churel that would hold 800 would be sufficient for the population.
126. That is assuming that a great mary do mot go to Church? Fes.
127. Do you think the site of the Church now in course of erection the most conrenient for all the Members of the Church of England in Newtown, or for the majority ouly? For the majority I do not think a more convenient site could have been chosen.
128. Supposing the majority of the Members of the Church of England did go to the Church erected on 9 July, 1872.
the site proposed, would there not be enough remaining to fill a Church capable of holding 400 , if it were erected on the site proposed to be alienated? Supposing the whole of the Members of the Church of England went to Church.
129. Supposing the majority went to Church? If they all went to Church no doubt it would be so, but as a rule $I$ do not think more than 800 would go, if so many.
130. Do not a number of the parishioners now attend the Rev. Mr. Smith's Church, which is contiguous to the parish? Yes.
131. Is not that Church now so filled that people are obliged to be there twenty minutes before the service commences, in order to obtain seats? Yes.
132. Those who go afterwards cannot obtain admission? So I am informed.
133. There is a great demand for Church accommodation in that locality? Yes.
134. AFr. Brown.] You have spoken of there being 3,000 Members of the Church of England in Newtown, including children;-are there not special services in the Sunday School for the children? Yes, every Sunday morning.
135. IIfr. Campbell.] By the clergyman? By the toachers.
136. Dfr. Broun.] From your experience of the Church of England population at Newtown, you think a Church capable of holding 850 is a reasonable accommodation? Quite sufficient.
137. Mr. Campbell.] Do you assume that there is no hope that more than one-third of the Members of the Church of England would attend Church, and that the rest would be practically heathen? I am afraid they would not attend Church.
138. AIr. Hill.] Does not the fact of M.r. Smith's Church being crowded arise from his being considered a popular preacher? My opinion is that that is the sole reason.
139. DLr. Lackey.] Supposing the vacant portions of the parish of Newtomn were built upon, would the present site, or the one proposed to be sold, be the more central for the population? Under any circumstances the present site is, in my opinion, the most desirable;-it is the most central that could be chosen for Kingston, Newtown, and Camperdown.
140. AIr. Campbell.] Do you mean that answer to apply to those paidocks extending from my house to the back of the Asylum for the Dumb and Blind;-do you say that a Church in the Cemetcry would, in relation to them, be a more central position than on the site proposed to be alionated? I am taking for granted that the University paddock will not be built upon.
141. I am not speaking of that, but of the paddocks at the back of Hutchinson's and Chisholm's? I am not clear that they are in Newtown parish.
142. Are they not within five minutes walk of the site proposed to be alicnated? My remarks are confined to Newtown parish.
143. I suppose nobody knows what the parish of Newtown does include? It has been regulated by the Bishop.
144. Which is the eastern boundary? The northern boundary is by the Toll-bar-I do not know where the castern boundary is.
145. MIr. Creed.] What is it estimated the whole of the piece of land proposed to be sold will realize? The Trustees hope to rcalize $£ 1,000$ by the sale.
146. Chairman.] It is vacant land? Yes.
147. Difr. Hill.] Not even fenced? It has been fenced, but the fence has been removed.

## FRIDAY, 12 JULY, 1872.

> | > { Mresint :- } |  |
| :---: | :---: |
| > Mr. HILL, | Mr. LaCKEY, |
| > GEORGE WIGRAM ALLEN, EsQ., IN THE Chair. > |  |

S. C. Brown, Esq., appeared as one of the Promoters of the Bill. W. Wilkinson, Esq., appeared as Counsel on behalf of the Petitioners against whe Bill.

C. Campbell, Esq., appeared as a Potitioner against. the Bill.

> The Honorable John Campbell, Esq., examined:--
148. Mfr. Canplell.] You were one of the original subscribers to the building of the parsonage? Yes.

TheHon.John
149. That was about 1847 ? Yes, I see my name is down.
150. For whose benefit did you consider it was to be built? For the benefit of the incumbent of that parish-Newtown; $0^{\circ}$ Connell Town I believe it was called in those divys.
$1 \overbrace{2 \text { July, } 1872 .}$
151. Fou mean for the persons around it? Yes.
152. You were the surviving Trustee of the Camperdown Cemetery? Yes.
153. To whom did you convey it? The Bishop of Sydney.
154. You are one of the Church Building Committee for the Church now in course of erection there? Yes.
155. Why did the Committee commence so large and expensive a Church? I thought the relatives of the people who were buried there would come down handsomely with the money to complete the building.
1.56. You then, as one of the Committee, did not count on selling the land now proposed to be alienated? No, certainly not.
157. Do you think the Church now in course of erection cannot be finished without sclling this land? If people will go round and solicit sulberiptions as they ought.
*
Campbell, Esq. that land? No; for on the Hutchinson Estate I believe there will be a large population who will require
12 July, 1872. a Church in that neighbourhood as well as the otber portion of the inhabitants in Newtown.
159. So far as you know yourself, is there not some diversity of opimion on this subject? Yes; some are for selling this land, and some are not. I an not for selling this land, for I think it will be wanted hereafter. You will not get the full value of the land now if you attempt to sell it. I form that opinion from my experience with reference to the sale of land at Christ Church; that realized $£ 4,000$, I think, which was spent in the erection of a parsonage, and $I$ an told that it would now bring in $£ 600$ a year. 160. Mr. Brown.] You do not live in Newtown? No.
161. Nor do you, I süppose know anything of the circumstances of the bulk of the people there? No, except from walking among the lanes, which are very narrow-I think they are a very poor class.
162. Were you present at the meeting initiating the movement for the building of this Church? No, I do not know that I was.

Thomas M'Culloch, Esq., examined:--
T. MCulloch, 163. Mr. Campbell.] You are a resident in Newtown? I am.

Esq. 164. You know the piece of land proposed to be alienated? I do.
12 July, 1872 165. How many minutes walk is it from your residence? Abont threc.
12 July, 1872. 166. It is not then inconveniently situated as the site of a Church for your use? Certainly not.
167. Have you applied to the promoters of the Bill now before the House to sell the land and apply the proceeds to the completion of the Church now in course of erection in the Camperdown Cemetery? No. 168. Are you opposed to such a step? I. am.
169. Why? Because if the Trustees sold this I should have to do as I am doing now, walk nearly a mile and a half to Church.
170. Were you at a meeting of parishioners called to consider the propriety of selling this land? I was. 171. At present how far hare you and your family to walk to Church? Nearly a mile and a half to St. Paul's.
172. To what proportion of the residents at Newtown would the site proposed to be alienated be less convenient than the site in Camperdown Cemetery? At present I should say one-third, but if the Trustces of the Hutchinson. Estate succeed in doing what they wish to do, there would be as large, if not a larger, portion to whom the site proposed to be alienated would be more convenient than the other.
173. You thinfl that at the present time the site proposed to be sold would be more convenient than that in the Cemetery? I do.
174. How then do you account for the seemingly large majority in favour of the Camperdown Cemetery site? I account for it in this way, that there are a large number of poor people who gct their living there, who are in a manner coerced by circumstances, and that they have agreed to the sale of this land in order to finish the Cburch in the Cemetery, and that if they acted upon their own opinion, without being coerced at all, they would desire to have the Church on the land proposed to be sold.
175. In your opinion would not a Church and clergyman to each locality be the best for the promotion of morality and religious observances among the people generally? I think much the better.
176. IIf. Wilkinson.] You say you were present at the meeting which has been adverted to? I was.
177. Do you know what notice was given to the public before that meeting took place? I am not aware. I was asked to attend the meeting by a gentleman the night before; but I believe $I$ have heard it was given out some time after the service in St. Stephen's Church on the prepious Sunday.
178. What was the alleged purpose for which that meeting was called? For the purpose, I understood, of hearing the opinions of the people as to whether this proposed site of a Church should be sold and the proceeds applied to the building of the Church in the Cemetery.
179. Do you know whether any notice of this meeting was given in the newspapers? I think there was.
180. You do not know, but you beliere the notice given was given in the Church? In St. Stephen's.
181. Is that in the immediate neighbourhood of the Cemetery? It is a building now used both as school. house and Church.
182. That Church is in the inmediate neighbourhood of the Cemetery? It is not far away.

183: You are the receiver in Hutchinson's Estate? Yes.
184. Will you be kind enough to tell us of what estent of ground that estate consists in that neighbourhood? 38 acres immediately adjoining the site of the proposed alienation.
185. AIr. Brown.] Near the present 3lind and Dumb Asylum? Immediately behind that.
186. Mr. Wilkinson.] Has any of the estate been alienated, or is it leased? It has not been sold; it is now under a yearly occupation.
187. What number of tenants are there now upon it? Four.
188. Is it intended to increase the number of tenants on the estate, or to alienate the estate? A Bill is in preparation to ask the Assembly to give the Trustees power absolutely to sell or to lease for nincty-nine ycars that portion of the estate which the Trustees at present have the power to lease for only twentyono years.
189. How much of the estate is it proposed to ask the Legislature to grant power to lease or sell ? 38 acres.
190. What will be the result of that Bill if it be passed? The place will no doubt be densely populated. That has been the case with parts of the estate immediately adjoining.
191. Can you give us an instance with respect to other parts of the estate? Other parts of the estate, which have been sold instead of being leased for twenty-one years, have had an inmense number of small tenements erected upon it to the amount of perhaps 200 or 300 .
192. Is not that neighbourhood particularly suitable for, or sought after by persons who live in small houses? Yes.
193. Is not that part of the estate which has been alienated occupied by small tenements? Yes.
194. Is not that inmediate neighbourhood known as Shepherd's Darling Nursery Estate? That is a little on this side of it.
195. You know Darlington? Yes ; that immediately adjoins it.
196. Can you give the Committee any idea of the increase of population that has taken place in Darling. T. Mculloch, ton since that land has been alienated? I cannot give an approximate number, but it has very largely increased.
197. Can you give the Committee any idea as to the actual number now living at Darlington? I cannot; 12 July, 1872. it is a separate Municipality, and the population may amount to 1,500 .
198. Darlington itself consists of small tenements, and is what is gencrally called a thickly populated district? Yes.
199. You think then that if the Hutchinson's Estate were alienated, a similar result would follow? I do. 200. That district, as I understand you to say, is particularly sought out by what are called the poorer classes, as a place where they can live, being near Sydney-where they can obtain work? Yes; in fact I think the only thing preventing Sydney from joining Newtown is the space of these paddocks, and when the Trustees are enabled to deal with the property, Sydney and Newtown will be one.
201. Is there any provision for the service of the Church of England in that neighbourhood at present? Ithink with the service held at St. Paul's College there is no provision for any Church of England service between St. Stephen's and St. Barnabas's.
202. Mr. Campbell.] You mean St. Paul's Chapel? Fes; that is in a manner private.
203. Dfr. Wilkinson.] I understand you to say you are opposed to this Bill? I am, personally.
204. Can you inform the Committee if you know of any other people, interested like yourself, who are opposed to this Bill? I an personally aware that a great number are opposed to it.
205. How many do you think? More than a hundred.
206. That you know of yourself? Tes.
207. As a matter of fact do you know there is a great diversity of opinion with regard to the propriety of alienating this land in the manner proposed? Yes.
20S. Can you inform the Committee whether you know that the opposition to this measure has increased or lessened since the meeting to which allusion has been made? I am of opinion that it has very much increased.
209. Can you give any information as to the number of Members of the Church of England in that neighbourhood generally? I think about 3,000 or 4,000 .
210. DIr. Brown.] How long have you been resident in Newtown? A little over two years.
211. Have you cver been to St. Stephen's Church? No.
212. Are you a soat-holder there? No.
213. You go with your family to St. Paul's College? No; to St. Paul's Church, at Redfern.
214. So that whether the Church is built in the Cemetery, or whether no new Church in built at all, makes no differenco to you and your family? Certainly not.
215. Did you ever attend a meeting of the Menbers of the Church of England at Newtown before you attended this meeting you speak of $p$ I never did.
216. Were you requested to attend this mecting? Yes.
217. By whom? I am not certain.
21.8. Try and recollect? Some gentleman who asked me.
219. Can you not recollect who it was asked you to go? No, I cannot.
220. You went and voted against the sale of the site? Fes.
221. Did I understand you that you opposed this Bill as receiver in Hutchinson's Estate? Yes, by instruction.
222. Do you oppose it upon the ground that the sale would affect the value of your land? Fes.
223. You think the erection of a Church would affect the value of the land? Yes:
224. Does not a great portion of these 38 acres abut upon Redfern and Waterloo? It does not.
225. No portion of it? To a great extent it divides it; it is quite separated by the Railway line.
226. Is there not a great portion of this 38 acres abutting upon Redforn and Waterloo? Certainly not; it immediately adjoins this land.
227. It is separated by the Railway ; but for the Railway would not a part of it abut upon Redforn and Waterloo? Redfern is separated by Botany Road from this estate.
228. Aud Waterloo is separated by Botany Road from this estate? No, Waterloo adjoins Mr. Chisholm's.
229. Do you know whether or not this land is in the parish of St. Stephen's, Newtown? I could rot aay.
230. You would not like to state that any part of this 38 acres is in the parish of St. Stephen's, Newtown? No.
281. You live in Wilson-street, next to Mr. Campbell's? I do.
232. MIr. Campbell.] With regard to this 38 acres, you state that supposing persons were to live upon that land the nearest site for a Church would be that which it is proposed to alienate? Yes.
233. Supposing a Church to be built upon this land which it is now proposed to alienate, you and your family would probably attend that Church-it would be much nearer to you than Redfern Church? Far nearer.
234. Mr. Brown.] Is not the present Church nearer to you than St. Paul's, Redfern? It is a little.
235. MIr. Campbell.] But the temporary Church is so crowded that you cau hardly get a seat? There is no possibility of getting a seat. In inclement weather some of the female portion of my family attempt to get accommodation at St. Stephen's, but they sometimes fail, and are under obligation to some of the seat-holders for a seat.
236. Mr. Brown.] Is it not always the case where persons go to Churches where they do not rent seats that they are under obligation to the seat-holders for their seats? I am not aware.
237. BIIr. Campbell.] If you were to apply for a seat would you not have to wait for months before you could get onc? No doubt of it.
238. Mr. Willinson.] If these 38 acres were alienated would not this sito which it is proposed to alienate be the nearest site for a Parish Church to the people who would live on that land? No doubt it would -far the nearest. The site is only divided by a fence from the 38 acres.
239. Mir. Brown.] Is not the Newtown Road between it? Yes.
240. Is there not as much difference between the 38 acres and the site proposed to be sold as there is between the 38 acres and Redfern; -is there nota rond between each? Certainly not.
24l. Is there not a road between each "' Yes; but on the other side there is Botany Road and the Railway, and half a dozen spaces between.
T. M'Culloch, 242. MF. Wilkinson.] How far is the site proposed to be alienated from the nenrest point of the 38 acres?

Esq. The very outside would be a chain-60 feet. Just the width of the road.
243. Will you tell me whether there is any other Chureh in that neighbourbood anything like so close to 12 Juls, 1872. the land as that? Certainly not.
244. How far from that 3 si acres is the nenrest? The neavest Church is St. Barnabas's-at least 500 or 600 yards.
245. How far is St. Barnabas s-Church from the land proposed to be alienated? Nearly lialf a mile.
246. MIr. Mill.] What guides you in your opinion that the poor people of Newtown are coerced into the expression of a desire to have this site aliemated, when, if they were left to their own judgment, they would be in favour of retaining it? Several have said so.
247. That they have been coerced? They say we must not fall out with So-and-so.
248. $\operatorname{Hz}$ : Brown.] Who are the So-and-so. Do they mean that they must not fall out with the owners of the $3 S$ acres of land, or with whom? Some of the large people of Newtown.
21.9. MIr. Wilkinson.] Are there not several narrow streets near the Toll-bar, close to this site, containing many houses, and thickly populated? I am aware there are.
250. Will the Church that is now being built be as convenient for these people as a Church on the site which it is proposed to alienate? Certaimly not; the land proposed to be alienated is just across the road from several of these streets.
251. Can you give the Conmittee any information respecting any other land besides this 38 acres in this neighbourhood which is likely to be alicnated in a short time? I believe the Chisholm Estate will be brought into the market when Mrs. Chisholm departs from this world.
252. Mrr. Brown.] Is not that nearer Waterloo than your 38 acres? It is between Waterloo and it.
253. MLF. Hill.] Do you participate in the management of the Hutchinson Estate? The estate is managed by Trustees. I act under their direction.
254. Mr. Neale.] Are the Trustees of the estate Petitioners? They are.

John Tcke Kettle, Dsq., examined :-
J. I.
256. And a Justice of the Peace? Yes.
257. You know the site proposed to be alienated by the Bill before the Committee? Yes.
258. How many minutes walk is that from your residence? Threc minutes.
259. It is not inconveniently situated as the site for a Church for your use? No, I consider it as one of the best sites for a Church for Newtown to be found in any of the suburbs. There could not be a finer in the Colony.
260. Have you applied to the promoters of the Bill now before the Committee to sell the land and to apply the proceeds of such sale to the completion of the Church at the Camperdown Cemetery? Certainly not. 261. Are you opposed to that course? Most decidedly.
262. Why? Because it is the only eligible situation for a Church. It is the particular situation that is suitable for a Chureh; it is at the intersection of several roads, and opposite a public institution, and I should consider it as a sacrilege of the most sacred character to alter the intention for which it was granted. I look upon the parties on the opposite side to have a monomania of a most dangerous character ; they cannot know what they are doing.
263. How far is the Asylum for the Blind and Dumb from this site which it is proposed to alienate? About two minutes walk.
264. And a Church situated there would be most convenient for such of the blind children as would attend the services? It would be the only place, unless you had a Church adjoining it.
265. Were you at the mecting of the parisbioners held at Newtown for the purpose of considering this matter? I was.
266. Was it a numerous meeting? There was room cnough for all the parties, and some to spare.
207. To what proportion of the residents at Newtown would the site now proposed to be alienated be more convenient than the site at the Camperdown Cemetery? As far as the people in the immediate neighbourhood of the Cemetery are concerned, that is the situation for them; but I should say, looking at the whole population, this site would be the most contral, because I look upon the Hutchinson Estate and Shepherd's, as far as the Railway, as belonging to Newtown; and no doubt in a very short time there will be great alterations made with reference to that large estate, and there will be a numerous population on it. Besides, Government has recently proclaimed a road opposite the Blind Asylum, to the Missenden Road, and this Church will be at the very corner of these intersecting roads; and from my experience in England I can say that there the most prominent situations are secured for Churches.
268. How do you account for the sceming large majority in favour of the site at the Camperdown Cemetery if it is not the best site? I look upon it that the question just put to me is best answered in this particular way: I must be candid; any number of signatures can be got by any influential partics from those who look upon it as to their interests to do anything they are asked.
269. Mi. Hill.] Either for or against? Dither for or against;-from their humbler position, and looking at their own interest, the major portion of these people being little shop-keepers or working people depending upon others. Newtown is not orerstocked with people who have a large amount of anything, and there are some people who will move Heaven and Earth to get what they want, and run into every little hovel for the purpose.
270. Would not a Church and congregation at each of these localities be the best calculated to promoto morality and religious observances among the people of Newtown? I should think so ; but I should think there would not be many persons who would wish to go to such a foul place as a Cemetery for a Church. A good congregation could be got at the site proposed to be sold if thero were a Clergyman there possessing ordinary ability.
971. The suburb of Newtown now is of very great catent? Yes, and it will be very large.
272. It is now? Fes.
273. What do you suppose the number of Members of the Church of England at Newtown may be calculated at? I never asked, for I do not mix much with their sort of class.
274. Mr. Wilhinson.] You say that this vacant land, which it is proposed to aliente, is at the intersection of some roads? Several of the most important-Newtown Road, and the new road proclaimed by the
275. Is it likely that the population of that road will be increased? It is going on as fast as it can go; 12 July, 1872 .
but I do not know what they are going to do with the housce
but I do not know what they are going to do with the houses.
276. Can you tell us the increase of the population-say within the last five or ten years $?$ I can remember
when there was only myself there, and now there are thousands. I think I bought the land in 1841.
277. You know the Hutchinson Estate-about 38 neres? Yes, I do well.
278. Do you think if that land were alienated or leased for a long period there would be a large population there? I. do not think anything about it, but I am quite sure it would be taken up at once if it were let or sold at a moderate or fair rate.
279. Judging from the ratio at which population has been increasing lately, $I$ ask you if that estate is alienated whether a large population will probably settle upon it? I am sure of it, and there can bo no better proof than the state of the land all around it.
280. Is there any other vacant land besides the Hutchinson Estate? Yes, a little of Chisholm's-a, slip on this side of the railway; when you go on the other side of the railway. I do not deal with that on this side of the railway; I look upon the land as belonging to Newtown proper.
281. Is it the case that that vacant land is inconveniontly situated for the erection of a Church for the use of Members of the Church of Eugland at Newtown? It is the only cligible situation in any of the
suburbs; there is nothing like it in the Con suburbs; there is nothing like it in the Colony. If you were to part with it it would be the greatest sacrilege that could be done.
282. I want to draw your attention to two things-first, whether it is inconvenient to the Members of the Chureh of England who are resident there now? Decidedly.
283. I ask you now whether you think it will be inconvenient for the Members of the Church of England who are likely to become inhabitants of that land if it were alienated? It would be most injurious; it would mosit seriously affect those who have sold land with the representation that a Church would bo there, as I have done.
284. If this Hutchinson's Estate and these portions of Chisholm's Estate were alienated, would there, in your opinion, soon be enough Members of the Church of England in the neighbourhood to provide for one clergyman? I am satisficd that without that we have got sufficient.
285. For a separate clergyman now? Yes.
286. You think there are Members of the Church of England there now sufficient to afford work for one clergyman? I do-ample.
287. Will the Church that is being built be convenient for Members of the Church of England resident on the Hutchinson Estate? No; quite out of the way; they might as well travel to the other end of the town, and go to St. James's.
288. MIr. Brown.] Are you a seat-holder in St. Stephen's Church? I am not.
289. How long is it since you have been to Church there? Perhaps ten years.
290. Do you know that the people of Newtown pay their own clergyman? I have heard so.
291. Have you during the last ten years contributed towards that object? No; my living in Sydney
most of the time.
292. How long have you been resident there? Thirty odd years. I think I ought to explain why I have not been to Church, because I could give a reason why." 293. You say that the piece of land proposed to be alienated is the most eligible site in all Newtown for
there? I will not. I am not one of those kind of people that meddle with other people's affairs. I find
I have enough to do to mind my own business. I have taken no part in these matters until I found that this most iniquitous thing I ever heard of was going to be done.
294. How long prior to this meeting had you attended any meeting of the Members of the Church of England at Newtown? I do not know.
295. By whom were you asked to attead? I was asked by a gentleman.
296. Do you decline to give the name of that gentleman? In a conversation I had with Mr. Charles Campbell -
297. You were one of the six who voted against the sale of this land? I do not know how many there were, but I know I voted most strenuously.
298. Can you say whether there were more than five, besides yourself? I know there were a lot of children, young ladies, and youths there, who I thought had better have been at home.
299. Your grounds, I believe, extend to Newtown Road? Yes, they do.
300. And you live at Wilson-street? Yes.
301. When you speak of three minutes walk, do you mean fromi your grounds? From my grounds-my shrubbery.
302. That is some distance at the back of your house ? Yes; but I could walk it in five minutes from the front.
303. Is there much difference between the walk from your houso in Wilson-street to this sito proposed to be alienated, and to the Cemetery? I think I could walk to the former, taking it leisurely, in five minutes, and it would take me twenty minutes to walk to the Cemetery. [Mr. Brown called the witness' attention to a plan produced.] From my house I could go in five minutes to the Toll-gate, and I could not walk to the other in a quarter of an hour.
304. AIr. Wilkinson.] Do you know whether it is proposed to build a Church on this land, which it is proposed to alienate? I have heard it spoken of, and shall be happy to contribute to it if a Church is built there.
305. JIFr. Brown.] When did you hear that? I have heard it for some time.
306. No steps have been taken to build a Church there? I have not seen anything.
307. IIr. Campbell.] Was it not the question whether a Church should be built on the site now proposed to be alienated, or upon the Cemetery;-was not that the question? I do not know-I did not mix much with it ; but I do not think any one would want to build a Church in such a foul place as a Cemetery, unless he was a person broke loose from Tarban.
J. I. 308. Dfr. Brown.] I suppose if you had heard that Mr. Campbell had been in favour of building the

Kettle, Esq. Church there; you would not say he had broken loose from Tarban? I should be afraid if he had done so
$\rightarrow$ that he must have been a little touclied.
12 July, 1872. 309. DIr. Wilkinson.] I want to know whether you have heard that it has been proposed to build a Church upon this vacant piece of land since it was proposed that it should be sold? I have heard so.
310. Mr. Creed.] What renders this site so specially eligible for a Church? From its being at the intersection of a number of roads, and almost in the centre of Newtown proper.
311. Not in the centre of the population? Of the population of Kingston Estate.
312. This piece of land was given for Newtown?
313. Is it in the centre of the present population of Newtown? There is all that land near Shepherd's Paddock, and all these parties must be provided for.
314. Is it in the centre of the present population of Nowtown? No.
315. Is it at one end? Yes.
316. The majority of the people would find it farther to go there, if a Church were built there, than to the present Church? If all the people were to go to the present Church it would not be big enough.
317. Fou say it is proposed to build another Chureh upon this piece of land? Yes.
318. Has that proposal taken any practical form? No.
319. Is it likely to do so? I should say so.
320. What makes you think so? It is required.
321. There has been a great deal of difficulty to raise the funds required for the Church now in course of erection;-has there not? Yes.
322. Do you not think it would be still more difficult to build another? Not at all.
323. Is it not a matter of common sense that if you hare great difficulty in raising the funds to build one Church you will have still greater to build a sccond? If people build an expensive Church, beyond their means, in a place not suitable for a Church.
324. You acknowledge there would be considerable difficulty in building a second Church? I am quite of opinion that there would be no difficulty.
325. You say this site is at one end of Newtown, and not in the centre of the population? If you want to include the whole population there will be a large number of people all round.
326. I think we have to confine ourselves to Newtown; the present Church is in the centre of Newtown, is it not, and the other is not? Yes, but it is in the burial-ground, which is a great objection to many people, because people do not desire to look at small-pox and other diseases, and to come into the midst of malaria.
327. There are a great many people living around it; are they specially unhealthy? They complain most bitterly. Mr.— the Mayor of Newtown, who owns a good deal of property there, told me thatit was perfect ruin to him, as the people complained of the deleterious vapours and malaria rising from the place. 328. Mr. Brown.] You hare made a great many broad statements with respect to this site; now I ask you, on your honor as a gentleman, whether you can name a single person who has refused to contribute towards the building of this Church on the ground of its being near the Cemetery? I have not mixed much with the people who have spoken about it; I have only given my opinion.
329. Mr. Campbell.] I think the principal objection is, that parties consider the Church now in course of erection in the Cemetery is of too expensive a character for the people? I have never gone into that question.
330. Mr. Oreed.] Is it not a generally received opinion that if you cannot do one thing it is not likely you will be able to do two? I believe the great majority of the people are against the site.
331. You say that one of your objections to the sale of this site is, that having sold property, with the understanding that a Church would be built there, you think the value of the property will be depreciated if this site is sold? I do not mean that exactly.
332. Have you never sold property to any one but to a Member of the Church of England? I have not asked them whether they belonged to the Church of England or not.
333. When you have said there was going to be a Church of Englaud there do you think that has been an inducement to a Roman Catholic to buy? I have simply told them there was to be a Church there.
334. You say you have not taken an interest in Church matters for some time? No.
335. You intend to take an interest in them from this time I suppose? Fery likely I shall.
336. You will take it if the Church is built on this land? Yes.
337. But you will not if it is not. There are few people who live at that end of the town who object? Yes, but persons have complained bitterly of the burial-ground. Mr. - was ruined by its being a burial-ground.
338. AIr. Brown.] Was not that complaint made before the burial-ground was closed? They are still buried there.
339. Chairman.] You have said you thought there was a probability of a Church being built on the site proposed to be sold? Yes.
340. Are you aware how long it is since the land was promised by the Government? It must be a great many years.
341. Have any steps bcen taken towards building a Church upon this land? I am not aware. If I were to state my own belief I should say that the greater part of the inhabitants of Newtown were Dissenters and Methodists.
342. Is it on that ground you think it desirable or likely that a new Church will be built? No; I think the Church is sufficient at that end for the congregation of the Church of England.
343. For what reason do you suppose it is likely a movement will be made to build a Church upon this site? From its requirements.
344. Have there not been the same requirements for the last twelve or thirteen years? There have been many complaints about the way the Church has been conducted there.
345. And yet no steps have been taken? It wanted some one to move in the matter.
346. Perhaps you intend to take some steps yourself? I will not pledge myself. I do not carc much about meddling in public affairs, as I am living very quietly. I. do not mind contributing funds.
347. Mr. Creed.] Is there likely to be any considerable body of persons join in this? Yes, a great many. 348. Who are they? I mix with very few people.
319. Fou have heard vague reports-mere whispers? I am satisfied from conversations I have had that there are persons who would join in it, and that a Church will be built.
350. That may bo fifty years hence? It may be a thousand years; these things are not done in a day.
351. Chairman.] This land is now vacant? Yes.
352. Producing no income? Nothing at all.
353. Would it not be better for the parish of Newtown to sell this land and apply the proceeds to the erection of the present Church, and hereafter, if a Church should be needed in this locality, to purchase a suitable site? If they parted with this they would never have another opportmity of purchasing so cligible a site.
354. Not when the Hutchinson Estate is sold? That is out of the wry.
355. Is it not on account of the future population of the Hutchinson and Chisholm Estates that the strongest argument for keeping this site rests? That is not my argument. I say there are plenty of people without that for a congregation.
356. Msr. Crecd.] Other witnesses have given different evidence? I am giving my opinion.
857. Chaiman.] Are you aware whether this site is within the parish of Nevitown at all ? I do not know the boundaries of the parish; although I own the largest quantity of the purchased land I do not bother about other people's land.
308. You do not know the boundaries of the parish in which you live? No, I do not.
359. DEF. Brown.] Do you not know that since Saint Barnabas's Church has been built all the portion from the Toll-bar has been given to that parish? I never heard it.
360. DIr. Wilkinson.] Have you not yourself offered to contribute to a Church to be built on the vacant land ? I have.
361. Is there, any equally eligible spot? Nothing like it.
362. MIr. Creed.] Hercis apetition, presented to the Asscmbly by Sir James Martin, bearing 101 signatures;did you get up this petition? No.
363. Your signature being the first, it would be naturally supposed that you were the leading matter; who was the author? The party who brought it to me was Mr. Thomas M'Culloch.
364. You do not know the people who signed? No.
365. Still, having been so many yoars a resident in Newtown, I presume you know the names of a grent many, and I should like to discover whether those who signed were residents. M. H. Gibbon;-does he live in the neighbourhood of Newtown? I know only one Gibbon, and he lives at the other end of the town. 366. Do you know Mr. Hogg? No.
367. Do you know whether Roman Catholics signed that petition? When Mr. M'Culloch came to me he did not ask me what my religion was.
368. What Church have you been in the habit of attending? I am a Protestant.
369. How much further have you to go to the Church at the Cemetery than to the Church you have becn in the habit of attending? Sinco I left my Church at St. James's I have not been very often.
370. You are not then in tho habit of going to Church? When it suits me.
371. It would not suit you to go to the Church at the Cemetery? No.
372. You cannot say whether any Roman Catholics have signed this petition? I have never seen it since it was. brought to me to sign.

## TUESDAY, 16 JULY, 1872.

护rescnt:-
Mr. CREED, $\quad$ Mr. HILL.
G. W. ALLEN, Esq., in the Chair.
S. C. Brown, Esq., appeared as one of the Promoters of the Bill.
W. Wilkinson, Esq., appeared as Counsel on behalf of the Petitionors against the Bill.

## Mr. Mark Albery examined :-

373. Din. Wilkinson.] You are one of the members of the building committee? Yes.

Mr.M. Albery.
374. You are a commumicant in the Church of England? Yes.
375. Have you lived in this neighbourhood for many years? I have been in the Colony sixtecn years 16 July, 1872 . and I have lived about twelve out of the sixteen in that neighbourbood.
376. Were you at a meeting that was called in order to consider the question of whether this site should be sold? Yes.
377. You dissented;-did you not? I was one of the number who held up their hands against it.
378. And you signed the petition against it? Ycs.
379. You know the site it is proposed to scll? Yes.
380. How far do you think it is from St. Jarnabas's? About ten or twelve minutes walk.
381. How far from Petersham Church? Half-an-hour.
382. How far from Redfern? I could scarcely tell; twelve minutes or a quarter-of-an-hour, perhaps.
383. How far from the Cemetery? I suppose something more than eight or ten minutes walk.
384. Is St. Barnabas's Church full? I have understood so-I have never attended the Church.
385. It is understood you cannot get seats there? I understand it is impossible to get seats frequently.
386. Could you give any kind of opinion of the number of people living in the neighbourhood of this site
which it is proposed to sell? The number must be great within five minutes walls-there must be some
1,500 people. The houses arc small and thickly packed.
387. What class are they;-well-to-do people, or of the poorer class? Principally poor. There are a large number of houses between the Missenden Road and the Toll-bar.
388. That is this particular portion? Yes.
389. Is this about the poorest neighbourhood in Newtown? I. should say it was. . All the Camperdown side consists principally of poor small houses.

Mr. M. Albery. 390. Do you think a Church is wanted there? I think there is room for a Church if there were funds to build it; for St. Barnabas's is full, St. Paul's is full (seats are not to be obtained), and St. Stephen's is full; 16 July, 1872. therefore, I should say a Church must be wanted.
391. Do you think a Church will be wanted when the Church in the Cemetery is built? Yes, I bhink so, as that will not be so much larger than the present temporary one. I think tho Church is wanted now. 392. On account of the poor people there? Yes.
393. If it is wanted now of course it will be wanted much more in a few years? Certainly ; buildings arc increasing fast there.
394. Until recently were there not two clergymen in the district;-were not Mr. Kemp and Mr. Taylor both there? Yes.
395 . Was there not full occupation for those two clergymen? No doubt. With a large population therc must be plenty of work for two ministers to do the visiting.
396. Now there is only one clergyman there? Yes.
397. While Mr. Taylor was ill Mr. Baker officiated there? Yes.
398. Is there a great difference of opinion with regard to the propriety of selling this site? Yes, I believe so.
399. Have you heard many people express an opinion? Yes, in riding in the 'bus I have heard the matter talked about, and I should say as many have been on one side as on the other.
400. Have you heard people in the neighbourhood speak of it? Yes, I have.
401. Opposed to it? Yes.
402. Oppossed their opinion that a Church would be wanted there? Yes.
403. Is this a good site for a Church? A very good site; indeed one of the best that could be got; it is a nice elevated spot and very central.
nice elevated spot and very central. doubtful whether you would get another site as good. There is one spot as good; that is on Mr. Kettle's ground, which is near.
4round, Is property in that neighbourhood increasing in value? I should think it probable it was, and had been for the last two or three years; but I do not know much about the value of property.
406. Has the population increased there in the last fer years? Very much, particularly on the Sydney side, at Darlington.
407. Do you knows whether there is not now some land, which has been lately laid out, purchased by Mr. Walker? Yes, it has been cut up in small allotments, near Mr. Kettle's.
408. How much land? I should say three or four acres.
409. What kind of allotments are they? Small.
410. Have these allotments been purchased lately? Yes, I thiok so; a great many have been pegged out and fenced in.
411. Are houses going up? Yes.
412. Small? They appear to be small.
413. Are these allotments close to this site? Yes, I suppose about midway,-perhaps rather nearer to this site than to the Cemetery.
414. Afr. Brown.] Is there a difference of a minute's walk? I do not think there is.
414. Afr. Broonn. Is there a difference of a minutes walk I do not think there is.
415 . Ar. Wilkinson.] Still will not a large population be settled here in a shore time? The population must increase, as houses are going up rapidly.
416. Mr. Brown.] Do you not know that the arrangement with Mr. Taylor and Mr. Kemp as clergymen to the district was a mere temporary arrangement? Yes.
417. Whilst arrangements were pending for the remoral of Mr. Kemp? Yes.
418. Do not the parishioners pay the salary of their clergyman? Yes.
419. Do you not know that it is a matter of difficulty to pay the salary out of the Church funds? Yes ; but I think if another Church werc built the funds would be raised; people cannot get seats at present. 420. Do you believe the persons around the site proposed to be sold are in a position to pay a clergyman ;you have described them as the poorest part of the people of Newtown? I could not say, but I belicve if a Church were once built the clergyman would be supported. There may be difficulty in raising the funds in the first instance.
421. Do you not know that there has been a little Church built at Camperdown Yes, I subscribed to it. 422. Do you not know that the parishioners are not able to pay the salary for a clergyman? Yes, which is a long way off.
423. Are there not a considerable number of parishioners at Camperdown? Yes.
424. Do you not know that the people are not able to pay the salary for a clergyman of that Church? Yes; still I do not think that is an argument against building a Church at another place.
425. Mrr. Willinson. I did not ask you whether if the Hutchinson Estate be alionated a large population may be expected in that neighbourhood? I do not know the Hutchinson Estate by that name.
426. The 20 or 30 acres running from the Deaf and Blind Asylum by the Newtown Road to Mr. Sly's school? No doubt if it were to come into the market the population would be very large indeed.
427. Mr. Hill.] I suppose even if the land were cut up for sale it would take some years to bring a population there? There is a large population now.
428. I mean on the vacant land? We know how quickly these places spring up ; for instance, the portion of the Glebe called the Forest Lodge Fstate, in the last few years a population has sprung up there. 429. Mfr. Wilkinson.] Has not the population of Darlington sprung up within the last three years? No, but it has increased very much.
430. Mr. Creed.] You speak of a very large population bcing about this site;-does not that population lie between the sitc proposed to be sold and the site where the present Church is being built? No; the large population I speak of lies between the Missenden Road and Newtown Toll-bar.
431 . But the great bulk of the population lies about the site of the Church now being built? Yes.
432. There is nothing farther from the Cemetery Church than the site proposed to be sold? Yes, there is on the Darlington side.
433. How much nearer is the Darlington population to the site proposed to be sold than the Church that is being built? It is on the Sydnoy side.
434. Chairman.] The population about Darlington is close to St. Barnabas's Church, and much nearer to it than to this site? About mid-way.
435.
435. Mr. Brown. $]$ Do you not know that it is in the St. Barnabas's parish ? I do not know what parish it Mr. M. Albery. is in.
436. Mr. Orced.] You say there will be a large population here if the Hutchinson Estate is sold ? I could 16 July, $18 \mathrm{~s}_{2}$. not say that it would be so, but we know how population springs up.
437. It is probable it would be so ; and you think it would be a disadvantage to the people to sell this site because it would affect the sale of land there? It seems to be a desirable spot to have a Church, as it is in a central position.
438. One reason for retaining the site is, that the Hutchinson Estate will be settled? I do not know much of the Hutchinson Estate; but I know there ia a large space of ground there.
439. Do you not think if it is desirable for the estate that a site should be reserved for a Chureh, that it would be an alvantage to have reserves for Church purposes on the Hutchinson Estate itself, which would supply the place if this were to be sold? I think this is more desirable, as it is more clevated and nearor to the road-side.

## Mr. Charles Sampson examined:-

410. Mr. Wilkinson.] You are a Member of the Church of England? I am.
411. And have been a communicant for a number of years? Yes.
412. How many years have you lived in the neighbourhood of Newtown? About eighteen years.
413. Your house is close to this site? Tes.
414. That is the site proposed by the Bill before the Committee to be sold? Yes.
415. Is property increasing in value in that neighbourhood? I think at present it is increasing.
416. Has it increased within the last three or four years? Certainly within the last three or four years.
417. Do you think the alionation of this land will injure the value of your property? Certainly; as far regards my own opinion I think it will injure the value of my property.
418. Do yon think it will injure the value of property in the immediate neighbourhood of the land proposed to be nlienated? That is matter of opinion, but I think it would injure the value of my property if public-houses or bowling-alleys were established there.
419. And if a Church were built there it would increase its value? Yes.
420. I. ask you whether the selling of this land is likely to injure the value of property in the neighbourhood? Certainly.
421. Do you know Darlington? Fes.
422. Has the population there increased much of late years? Very considerably
423. What is the population we will aay within five minutes walk of this site? North, south, east, and west certainly 2,000 .
424. Has there been a large increase of population there of late years? Within the last eighteen months there has been a considerable increase.
425. Of course if the Hutchinson Estate is alienated the population will become very large indeed? It will, no doubt.
450 . There are some allotments which have been sold lately by Mr. Walker ;-do you know how much land there is there? I should think about two or three acres.
426. Ts there likely to bo a population there? I fancy so, as the land is cut up into very small allotments. 458. Are there any signs of houses springing up? Yes, there are houses springing up there every day. 459. What is the population surrounding this site between your place and Missenden Road? Am I to go on the other side of the Newtown Road, or to keep on my own side?
427. On your own side? I should think the population on that piece of land would be about five or six hundred.
4.61. They are poor people? They are very poor indeed; it is the poorest part of Newtown.
428. There are many poor people at Darlington? They are the poorest of the poor.*
429. Do you think even though this Church may be built in the Cemetery that another Church is now wanted on this site that is proposed to be sold? I think myself that there is ample population for a Church at the present time on the ground.
430. MIr. Crecd.] Is there ample money? I will not take upon myself to answer that question. I think the people would subscribe to it; but still we have pledged ourselres not to interfere until this new Chureh is completed.
431. Mr. Fill.] Is that the Cluurch in the Cemetcry? Yes.
432. My. Wilkinson.] Do you think there is now work for two clergymen? I go from the population, and I think there is. I believe the population, although given by a gentleman who ought to know-Mr. Crane-as 4,000 , to be about 3,000 .
433. There were for some time two clergymen-Mr. Kemp and Mr. Taylor? Yes, and likewise during another period Mr. Kemp and Mr. Britten.
4.68. Was there full occupation for those two clergymen? That is a matter of opinion; I fancy there was. 469. The Deaf and Dumb Asylum is close to this site? Within a stone's throw:
434. And the new hospital? The new hospital will be at the junction of the Missenden Road.
435. Do you know whether there is any room at St. Barnabas's Church? There is no room; it is crowded overy Sunday; hundreds have to go away.
436. I think you have told the Committce that if the Hutchinson Estate is alienated the population will be very large? It will increase very much.
437. I believe you went round with this petition in opposition to the Bill? I did.
438. There were one or two Roman Catholics who signed that petition? There were two.
439. How was it you obtained those signatures? Mr. Henderson obtained them; I was not with him at the time.
440. You do net know why they signed? Merely because they were freeholders, and had property in tho district:
441. Did you obtain any signatares from Wesleyans? I did, but with the distinct understanding that they could use that Church to worship in as well as their omn.
442. 
[^15]Mr. 0.
Sampson.
$\rightarrow$
$16 \overbrace{\text { July, }} 187$
478. How many signatures of Wesloyans do you think you obtained? There might have been ten or twelve.
479. The rest of the signatures are those of Members of the Church of Tngland? I believe they were. 480. Dfr. Brown.] No Presbyterians? I look upon Presbyterians and Wesleyans as all Dissenters.
481. Mr. Wilkinson.] Have you examined the signatures attached to this petition in support of the Bill? I have.
482. Can you tell from your knowledge whether all the signatures are those of Members of the Church of England? There is only one name respecting which I was under the impression it was that of a Dissenter. I could not take upon myself to say whether they were all Members of the Church of England or not.
483. You are a Member of the building committec? I was, and I believe I am now, for my resignation has not been accepted $\mathbf{I}$ believe
484. When it was first proposed to build a Church in the Cemetery, do you remember from what sources it was believed the funds would be obtained? By the sale of this land.*
485. Do you not remember Mr. Metcalfe stating something at the meeting? Yes, I. do. Mr. Metcalfe held out promises to the effect that we should be able to obtain from the relatives of the persons who were buried in the Cemetery, $£ 3,000$. That was the inducement to commence building the Church in the Cemetery.
486. Was it in the first instance proposed to alienate this site? Of course it was spoken of, but there were dissentients ; -I was one myself.
487. Is not the parsonage close to this site? Yes.
488. Has this matter been brought before the Synod? No; and as a Member of the Church of England I say it ought to be.
489. You stated at the commencement of your evidence that you thought the alienation of this site would iujure the value of the land in the neighbourhood ? Yes.
490. You, yourself, have land in the neighbourlood? I have.
491. When you bought that land did you know that it was proposed to build a Church on this site? Yes, I knew that the land was granted for a Church.
492. Was that one of the inducements operating upon your mind when you purchased this site? I thought it would improve my property.
493. DIr. Brown.] How long have you been a resident in Newtown? I. think about eighteen years.
494. During that period has anything been done towards building a Cburch on that site? No.
495. Your own property abuts upon that piece of land? Yes.
496. You kecp a school? Yes.
497. Your premises are not very large, are they; what is the extent of your premises? Fight rooms.
498. What frontage have you? 60 feet; it runs to an angle ; on one side it is 110 , and on the other 130 , feet.
499. As a matter of fact, has not this piece of land been used as a play-ground by your boys ever since you have been there? It has not.
500. Your boys now use it? From 1856 to 1866 my boys were never on that land; it was close fenced.
501. Have they not since 1860? Yes, since ; since the Road Trusts widened the road the fence has been blown down.
502. You built your house in such a way that your windows look on to this ground ? They do
503. Have you not the names of one or two gentlemen of the Jewish persuasion to this petition? I did not get them.
504. Are there not one or two? I believe there is one.
505. As a matter of fact was it not stated, at the meeting at which the parishioners agreed to build a Church in the Cemetery, that they expected $£ 1,000$ from the sale of this land towards the building? I did not hear it.
506. Do you mean to tell the Committee that it was not stated at a public meeting, either at the meeting at which it was determined to build a Church, or at the other, that it was expected to get $£ 1,000$ towards it from the sale of this land? Do you refer to the meeting at which the Dean was present?
507. Either at the meeting at which the Dean presided, or at that at which Mr. Taylor presided? I was not present at the meeting at which the Dean presided.
508. At the other meeting was it not stated? Not that I remember ; I heard it mentioned in the new Church committee.
509. Mr. Willinson.] Was the Jew who sigued this petition a freeholder? I believe he was not
510. You have been asked whether any efforts have been made to build a Church upon the site now proposed to be alienated;-has it ever, been talked of? I have seeu a printed document to the effect that the late Mr. Robey in 1852 promised £500, and the late Mr. Felix Wilson promised auother £500 if $£ 1,000$ could be raised by the public, to build a new Church upon that site; but the matter was given up. 511. You took the petition round you say? I did.
512. How many names did you get to it? I believe there were 110.
513. Have you any reason to give the Committee why you could not obtain more? I went with it only round the Missenden Road, coming from the Newtown Road. . Most of the signatures were those of freeholders.
514. What I asked you was whether, when you asked people to sign it, they gave any reason for not signing it? We only had one refusal, with the exception of a lady, who afterwards wrote to have her name erased -although the petition was before her, and she had it fully explained to her.
515. You did erase her name? The petition had gone in, but I sent the letter forward as soon as I received it.

The Hon.
The Honorable Charles Campbell, M.L.C., examined :-
0.Campbell, 516. Afr. Wilkinson.] Were you originally a member of the building committee of the Church? Yes.
m.L.C. 517. Were you at the first meeting where it was proposed to build a Church in the Cemetery? I am not quite sure that I was at the first meeting, because there had been a great deal of division in Newtown16 July, 1872. some persons on one side and some on the other ;-so much bitter feeling that there was a sort of compro-
mise. It was some time before people could be got to work together to build the Church in the same place, so that I canot be sure whether it was the first meeting.
518. Was it stated at that meeting from what source funds for building a Church on that site might be expected? The principal ground on which that sito was amreed to was the assurance given by Mr. Metcalfe, that from $£ 3,000$ to $£ 1,000$ might be obtained from the relatives and friends of those who had been buried there; and no doubt it would have been preposterous that in a poor place like Newtown a Church which would cost some $£ 8,000$, with a handsome spire and architectural ornamentation, should be commenced unless it had been contemplated that a sum of from $£ 3,000$ to $£ 4,000$ would be contributed by the relatives of the dead buried there.
519. By the building of the Church in the Cemetery the relatives of the dead would be relieved from keeping the ground in order $?$ speculation.
520. Mr. Metcalfe is one of the Trustees I suppose? I am not sure. He was one of the proprietors. I am afraid Mr. John Campbell is the only surviving Trustee.
521. When it was first proposed to build this Church was there any talk in the building committee of alienating this site to obtain funds? There might have been. I have heard it stated since that there was. For instance, it is stated that the clergyman in his speech alluded to it, but I was not aware that any authoritative statement was made, or I should have resisted it.
522. You were at the meeting that was called to consider this question? Yes.
523. What did the meeting consist of generally? I was there. I do not know whether Mr. Brown was there. There were a few gentlemen, members of the Church, but principally ladies and lads. I do not speak in contempt of that meeting in particular ; almost all Church meetings are of that sort.
524. You know this site proposed to be alienated? Very well.
525. Is there a large population in that immediate neighbourhood? Yes, a much larger population than near the other site.
526. A poorer class? Yes, a poorer class.
527. Darlington is in this neighbourhood? ${ }^{\circ}$ Yes. I should not consider the inhabitants of Darlingtion as a poorer class. They are many of them of the middle class-shopkeepers and others-respectablo people. 528. Is there a large population at Darlington? I believe so, but that is not the population to which I refer when I say there is a larger population at Newtown and poorer people near the site proposed to be alienated than near the site in the Cemetery.
529. Do you know whether St. Barnabas's Church affords sufficient Church accommodation? No accommodation; it is so full that when my servants attend they have to be there a quarter of an hour or twenty minutes beforo the service commences in order to obtain seats.
530. There is not sufficient accommodation for the residents in this neighbourhood? There is not the slightest room for them.
531. Do you think there is sufficient population to fill a moderate sized Church? If I were a clergyman appointed to that locality I should expect a congregation of 300 within a fortnight after $I$ had opened the Church.
532. Do you think there is more than sufficient parochial work for one clergyman in Newtown? Far more. One clergyman, if he were a very strong man, could not perform the duty.
533. Have you had any opportunity of forming an opinion as to the number of people in that neighbourhood who are opposed to this Bill ? So far as I can judge from their statements there are a good many opposed to it. When I say their statements I mean their statements to mo in private.
534. There are only 110 who signed the petition;-how do you account for that? I account for it from their statements to me by their dread of incurring the ill will of Mr. Rolleston, Mr. Brown, or Mr. Crane. I may mention that the other evening on my return to Newtown I was addressed by a small shopkeeper, who said he hoped the Bill would not pass for alienating the land. I said, "You are the very class of man to go with me before the Committee; a man like you, a small shopkeeper, would have more influence than
I." His answer was, "A man must look twice before he leaps; what would become of my small shop and family if I were to offend one of the gentlemen who are determined upon passing the Bill?"
535. MIr. Hill.] Who is the present incumbent of the Church in the Cemetery? Mr. Taylor.
536. How far do you live from the Church in the Cemetery? Half a mile to the Church in the Cemetery. To the temporary Church it is only a few minutes walk.
537. Do you attend the Church? I did until this unfortunate squabble.
538. You will excuse my asking the question, but are you on terms of intimacy with the present incumbent? I am on terms of visiting.
539. Mrr. Brown.] Have you not as a matter of fact differed from the incumbent upon some matters relating to his preaching, and left the Church in consequence? No, decidedly not.
540. Or doctrine, or conduct? No ; I have left the Church solely in order, as I said, that I may the more freely oppose this design. I was a member of the School Board, and was in the habit of attending once a weal for the purpose of giving instruction in the school. I left the Church and resigned my seat at the Board, not on account of objecting to Mr. Taylor's doctrine, but that I might be free to oppose this project. On the contrary, I have a great respect for Mr. Taylor as a hard working clergyman, who has done a great deal among the poor. He is now suffering from ill-health.
541. Will you answer this question;--have you not written to Mr. Taylor telling him that you would not receive the Communion from him-yes or no? I left on the ground of wishing to be free to oppose this Bill.
542. And so because a clergyman wished to sell a piece of ground, in order to enable him to build a Church for the accommodation of his parishioners, you would not receive the Communion from him? Yes; I would not attiond his ministry, as I thought it my duty to stand up for Christ's poor.
543. DIF. Hill.] Have you been opposed to the alicnation of this land from the beginning? Yes, from the time it was mooted. The first time I heard of it was, on the occasion of the Dean laying the foundation-stone of the Church. In the speech he made on that occasion he said amongst the assets there would be the proceeds of the sale of a picce of laud rnear the Toll-bar. Mr. John Campbell was present, and he said, "There will be two opinions; the ground will never be sold." Mr. Brown said, "You will not have a leg to staud on." That was really the first I heard of this project.

Tho Hon.
C. Campbell, M.L.C.

16 July, 1872.

# THE PETERSHAK CHURCH GRANT BILL. 

## APPENDIX.

[To Evidence given by Christophe; Rolleston, Esq., 9 July, 1872.]

The Colonial Secretary to Messrs. Robey, Willford, \& Davis, Churchwardens of St. Stophens, Camperdowi, \&e.
Colonial Secretary's Office, Syducy, 2 Ṡeptember, 1846.
Gentlemen,
In acknowledging the receipt of your application of the 27 th ultimo, I am directed by the Governor to inform you that under the circumstances His Excellency has been pleased to sanction the portion of land alluded to by you as containing about two roods and twenty perches, and situated contiguous to the sites authorized for an Episcopalian Minister's dwelling and school-house, at the corner of Grose Farm, being "reserved" for the crection of a Church when required, subject to the general arrangement of the ground now under preparation.

I have, de.,
E. DEAS THOMSON.

I certify that this is a true copy of a letter deposited in the Sydney Diocesan Registry,-Wa. Nobton, Secretary. 8 July, 1872.

A 2.
(No. 71/10.)
New South Wales.
[Land Grant:].
Register Bool, Vol. CXVII, Folio 15. No. 1.
United Church of England and Ircland.
Victorit, by the Grace of God, of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, and so forth :
To all to whom these presents shall come, greeting :-
Wheress tha Governor of our Colony of New South Walen, by and with the advice of the Exccutive Council thercof, hathe in pursuance of the provisions in that behalf contained in the "Crown Lands Alienation Act of 1861," rescrved and cledicated the lands hercinafter deseribed, as the site for a Church in connection with the United Church of Eugland and Treland in New South Wales: Now know ye, that we, for ourselves, our hicirs and successors, do hereby grant unto Christopher Rolleston, Thomas Chaplin Breillat, Stephen Campbell Brown, and William Crane, being respectively Trustees nominated and appointed under and by virtue of an Act of the Gorernor and Legislative Council of our said Colony, made and passed in the cighth year of the reign of His late Majesty King William the Fourth, intituled, "An Act to regulate the temporal affairs of Churehes and Chapels of the United Church of England and Ireland in New South Wales," and to their heirs and assigns, subject to tho
 trusts, conditions, reservations and pro-
visocs hereinafter contained: All that pieco visocs hereinafter contained: All that piceo
or parcel of land in our said Colony, containing by admeasurement two roods and fifteen perches, bo the same more or less, situated in the county of Cumberland and parish of Petersham, near Newtown: Commencing on the north-western side of the Newtown Road, ni a point where the southern side of Bligh-street mects it; and bounded thence on the north by Blighstreet, bearing westerly three chains and cighty-six links; on tho south west by a line, bearing south-easterly three chains mineteen links and one-half of a link to the Newtown Road; and on the soutlicast by that rond, bearing north-easterly four chains twenty-nino links and one-half of a link to the point of commencement, as per plan in the margin hereof, with all the rights and appurienances whatsoover thereto belonging: Ho hold unto the said Christopher Rolleston, Thomas Chaplin Breillat, Stephen Campbell Brorn, and William Crano, their heirs and assigns, for ever, upon tiust, for the erection thereon of a Church of the United Church of England and Ircland as by law established in conformity with the provisions of the said Act, and of a certain other Act of the Governor and Legislalive Council of our said Colony, made and passed in the seventh year of the reign of His said late Majesty King William the Fourth, intituled, " An Act to promote the building of Churches and Chapels and to provide for the maintenance of Ministers of Religion in Neto South Wales," so far as the same may apply to the truste of this our grant, and for no other purpose whatsoever: On
condition that the said grantecs, their heirs and assigns, do and shall in every reqpect, and at all times hereaffer, conform to the Goverument Regulatious for the time being, and to the laws and regulations now or hereufter to be in force for the better regulating the alignment of streets in our said Colony, so far as the same may be ayplicable : Provided nevertheless, and we do hereby reserve unto us, our hoirs and successors, all mines of gold, of silper', and of couls : And provided always, that if the trusta, conditions, rescrvations, and provisos herein coutuined, or any part thercof, be not duly obserred and performed by the said grantees, their heirs and assigns, then the said land shall be forleited and revert unto us, our heirs and successors, and these presents, and every matter and thing hercin contained, shall cease and determine, and become absolutely void to all intente and purposes; and it shall be lawful for us, our heirs and successors, by our Governor for the time being of our said Colony, or some person by them or him authorized in that behalf, to re-enter upon the snid land, or any part thereof, and the said grantees, their heirs and assigns, and all oceupiers thereof, therefrom wholly to remove.

In testimony whereof, we have caused this our grant to be sealed with the seal of our said Colony.
Witness our right trusty and well-belored Oousin and Conncillor, Soyerset Ricinarn, Enyl of Belmore, our Governor and Commander-in-Chicf of our Colony of New South Wales, at Government House, Sydney, in New Soutll Waleg aforesaid, this twenty-fourth day of February, in the thirty-fourth year of our reign, and in the year of our Lord one thousand eight bundred and serenty-one.

BETMORE.

## A 3.

Monday, 7th Noverober, 1870.
At a Public Meeting, held in the echoolroom, convened by advertisement,* and by public notice given on three Sundays preceding during Divine Service, to consider a proposal made by the Bishop of Sydney with reference to the Church of Eingland Cemetery, at which mecting about forty of the parishioners were present, -

The Rev. Robert Taylor, the incumbent, in the chair
Mr. Rolleston, on behalf of the Churchwardens, having explained the circumstances connected with the proposed gift, it was moved by Mr. Sterphes Brown and seconded by Mr. H. R. Smiph, as follows, viz. :-
"That this meeting authorizes the Churchwardens, on behalf of the parish, to accept the offer of the Cburch of England Cemetery, made to them by the Lord Bishop of Syduey, and further, to tale all necessary measures for the obtaining an Act of Parliament authorizing such transfer."-Carried unanimously.

It was then moved by Mr. Wm. Wilson, and seconded by the Honorable Cinaries Camprefle, Esq. :-
in. "That the following gentlemen be requested to act as Trustees for the Cemetery in the event of the Act being obtained, Cauried unanimously. M.r. W. Crane, Mr. W. G. Sedgewick, Churchwardens, and Mr. S. C. Brown and Mr. T. O. Breillat." Cayried unanimonsly.

ROBERT TAYLOR,
Chairman.
(Copy of letter referred to.)
The Jord Bishop of Sydney to C. Rolleston, Fisq.

## Sydney Dioccsan Registry,

3 November, 1870.
My dear Sir,
The Trustees of the Ncwtown Cemetery having conveyed the Iand to me, I am prepared to place it at the disposal of the parishioners of Newtown for the purpose of erecting a Ohurch thereupon, and, if desirable, a parsonage as well.

It will be necessary for the parighioners to undertake to fulfil the trusts contained in the deed, which I send with this note, that you may see what is required.

I remain, \&c.
F. SYDNEY.

## A 4.

Monday, 11 December, 1871 .
Minutes of a meeting ledel in the schoohoom in pursume of a notice given in the Church at Morning and Evening Service on the three preceding Sundays to consider the expediency of applying to Parliament for authority to sell the Church site at the Toll-bar and to appropriate the proceeds tomards the erection of the Church in the Cemetery. Present: One hundred and thirty ndult; ; the Reverond Robert Taylor in the cheir.

1. The meeting was opened with prayer.
2. The Chairman explained the object of the meeting, and read the notice convening it.
3. 'lhe minutes of the meeting held on 23 rid January last, respecting the new Church, were read.
4. The Chairman then detailed at length the financial uftirs of the new Chureh, and clearly flowell, by reference to The Sydney JIorning Herald's report of his speech, when moving one of the resolutions passed at the Jannary meeting, that the sale of the Church site was mentioned as one of the contemplated means of raising funds in aid of the erection of the new building.
5. The Chairman also read the appended letter from the Honorable CliarIcs Campbell, Esq.
6. Moved by Mr. Rolleston; seconded by Mr. T. C. Breillat :-"That in order to assist in the completion of the new Church in the Cemetery it is cxpedient to apply to Parliament for an Act to authorize the sale of the piece of land near the Toll-bar, granted as a site for a Churoh for St. Stephen's Parish, and the Trustees are requcsted to take the neecssary steps accordingly,"

Speeches having been delivered by Mr. Kettle, J.P., the Hon. C. Campbell, and Mr. H. Robinson in opposition to the motion, and by Mr. Crane and the Reverend Thomas Smith in farour thereof,- the motion was put from the chair, and, upon a show of hands, declared to be carried, there being only six dissentients.

The meeting was then closed with the Benediction.
ROBERT TAYLOR.

[^16]The Pines, Newtown
27 November, 1871
Reverend Sir,
In consequenco of the notice given yesterday in your Churel that it is the intention of your Trustees to apply for permission to introduce a Bill into the Colonial Legislature to authorize them to sell the site of a Church near the Toll-gate, and apply all moneys arising fron the sale thereof towards the erection of a Church, now in process of building in the Canperdown Cemetcry, I beg to inform you that if you and your Trustees persist in carrying out your avowed design I sball feel it my duty not only to withdraw from your building committee, in order that I may the more freely oppose the design, but also with the aid of my friends at once to agitate for a separation of this portion of a parish, which is evidently too large for your physical strength, and collect funds to enable us to erect a Church on the site which you purpose alienating.

I have, \&c.,
CH. CAMPBELL.
Reverend Robert Taylor.

## THE SELECT COMMITTEE

## ST. GEORGE'S PRESBYTERIAN CHURCH BILL.

## THURSDAY, 4 TULY, 1872. <br> 

Mr. THOS. BROWN, $\mid$ Mr. JACOB, Mr. GRAHAME,

Mr. J. STEWART.

# JOHN STEWART, Esq., in the Chair. 

Mr. Stephen appeared as Solicitor for the Bill.
Mr. Duncan St. Clare Maclardy called in and examined :-

1. Mrr. Stephen.] You are one of the Petitioners in this matter? Yes.
2. And one of the Trustees of certain land in Harrington-street? Yes.

Mr. D. St. C.
3. Do you produce a Deed of Grant of that land to certain Trustees who are named in the preamble of the

Bill before the Committee? Yes. (Original Deed of Grant produced, and attested copy handed in. See $\overbrace{\text { atuly }}^{1872}$ Appendix.)
4. That is the grant of the land which is the subject matter of this Bill? Yes.
5. The trusts are for the erection of a Presbyterian Church undor the superintendence of the "Synod of Australia"? Yes.
6. Is there such a body as the "Synod of Australia"? No.
7. The heading of that grant, you will notice, is to the effect that it is upon trust for the erection of a Presbyterian Church in connection with the "Synod of Eastern Australia"? Yes.
S. That body is still in existence? Yes.
9. And it was for that body this land was applied for? Yes.
10. Is there a Church in Sydney known as St. George's Presbyterian Church? Yes.
11. With what body is that Church in connection? The Synod of Eastern Australia.
12. That Church has been erected on a site in Castlereagh-street? Yes.
13. Who are the Trustees of that site? They are the same persons as those mentioned in this deed.
14. Are you aware whether the land in Harrington-street is conveniently situated for a Church? No, it is not conveniently situated,-not at all.
1.5. Is itineligible for the purposes of the trust? Yes, very ineligible for a Church.
16. What is the value of this piece of land in Harrington-street? It has been valued professionatly by Messrs. Richardson and Wrench, at from $£ 400$ to $£ 500$.
17. There is a debt still in existence upon St. George's Church? Yes, it is mortgaged to Mrs. Burdekin, for $£ 5,000$ and interest.
18. Has any resolution been arrived at by the governing body of your Church for the sale of this land in Harrington-atreet? Yes.
19. And this Bill is applied for with the consent of that body? Yes.

Mr. D. St. C. 20. Some of the Trustees in whom the site of St. George's Church was vested have died? Mr. Manson Maclardy. and the Rev. William M'Intyre are dead, and others have been appointed in their places.
4 July, 1872. 21. The Petitioners for this Bill are representatives of the Trustiees of St. Gcorge's Church, as well as of 4 July, 1872. the Trustees of the land in Harrington-street? Yes.
22. Chairman.] Did the Trustees of St. George's Presbyterian Church obtain any aid from the Government, either by granting the site or contributing towards the Church? No, they hare received no aid from the Government at all.
23. The Trustees bought the site from private persois? Yes.
24. Is there no probability of a Presbyterian Church being wanted in Harrington-street? No, I think not; the land is not at all suitable for a Church.

Mr. Robert Carolan called in and examined :-
Mr. 25. Mr $r$. Stephen. $]$ You are a clerk in Mr. Billyard's office? Yes.
R. Carolan. 26. Do you produce a conveyance of certain land in Castlereagh-street, from Gregory Board to William $\overparen{J \text { July, } 1872}$ Manson and others, dated 30th July, 1859? I do. (Produced.)
4 July, 1872. 27. Do you also produce a mortgage deed, dated 1st August, 1859, from William Manson and others, to John Bayley Darvall, to secure $£ 6,500$ and interest? Yes. (Produced.)
28. Do you also produce an assignment of that mortgage, dated 25th July, 1864, by John Bayley Darvall to Mary Anne Burdekin? Yes. (Produced.)
29. The names associated with Mr. Manson as Trustees are William Manson, William Buyers, John Macdougall, John Cameron, John Macdonald, James Cameron, John Moon, John Liddell Sheriff, Robert Campbell, Peter Stewart, and Alexander Learmonth? Yes.
30. That mortgage is still in existence for $£ 5,000$ ?
31. The land comprised in the deed is the site of St. George's Church? Yes.

Mr. William Buyers called in and examined :-
Mr. 32. Mr. Stephen.] You are one of the Trustees of the land in Harrington-street, and also of St. George's W. Buyers. Church? Yes.
33. What is the value of the land in Harrington-street? I believe Mr. Richardson's valuation was £500. 4July, 1872. I asked him the other day, and he said it still remained at about that amount.
34. Do you notice that the heading of this deed is to the effect that it is for a Presbyterian Church in conncction with the "Synod of Eastern Australia"? Yes, that is the name of our Church.
35. The heading is correct, but in the body of the deed it is stated that the land is in trust for the erection of a Presbyterian Church under the superintendence of the "Synod of Australia"-is there any sucle body? No, not now.
36. When did that body cease to exist? At the general union between the Synod of Eastern Australia, which was known as the Free Church Synod, the Synod of Australia which was in connection with the Established Cburch of Scotland, and the United Presbyterian Church. These were the three parties that formed the union; but there was a minority of the Synod of Eastern Australia which remained out, and now forms St. George's Presbyterian Church.
37. How many years ago did that union take place? More than five ycars ago.
38. Is it the wish of the body of the Presbyterian Church undor the Synod of Eastern Australia that this laud should be sold, and the proceeds appropriated to reducing the debt on St. George's Church? Yes.
39. Has your body received any assistance from the Government in any way towards the building or support of St. George's Church? None, except this grant.
40. Is this land in Harrington-street inconveniently situated and ineligible for the purposes of the trust? Decidedly so.
41. And it has been resolved by your body to make this application? Yes.
42. Mr. Jacob.] Your body belongs to the Synod of Eastern Australia? Yes.
43. Mr. Stephen.] You are a Trustee under the Synod? Yes.

# MATRIMONIAL CAUSES BILL. 

(PETITION AGATNST-ROMAN CATHOLIC ARCHBISHOP AND CLERGY OF ARCHDIOCESE.)

Ordored by the Legislative Assembly to be printed, 3 July, 1872.

## To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled. <br> The Petition of the undersigned Roman Catholic Archbishop and Clergy of the Archdioccse,- <br> Humbiy Showetif:-

1. That when a Matrimonial Causes Bill, substantially the same as that which is now under the same title before your Honorable House, was last year proposed to the Legislature, your Pctitioners invoked, in an accepted Petition, your protection against it as being a measure fraught with consequences most disastrous to the highest welfare of this country.
2. That the said Petition did truly express the actual belief and wish of all Catholics, whereas it has been by certain promoters of the said Bill asserted, with the design of discrediting the Petition, that it was merely the dictate of the Clergy.
3. That your Petitioners, whilst they ask leave to protest against such an attempt to affix odium and coutempt on the conscientious efforts of Catholics against the said Bill, are most willing to acknowledge and they desire with the utmost deference to affirm, that Catholics would undoubtedly in such subject matter, even if the relirious quastion were new, and not as this is, long ago decided, prefer the judgment of the Clergy amongst them to that of gentlemen who hare not necessarily any special qualifications either that most thoughtfin beyd prud the dignity of their position in the Tegislature. Your Petitioners believe the judgrment of their prudent men of every religious denomination would similarly prefer, coteris paribus, 4. Your Petit professionai Clergy on this point, to that of their simply political representatires. once more to state the reasons which move all Catholics justice of your Honorable House, ask permission once more to state the reasons which move all Catholics to deprecate so earnestly and unanimously the said
Matrinonial Causes Bill, namely :-
4. That the sanctity of the -

Faith-a neccssary condition of civilization family is one of the most distinctive results of the Christian inviolable permanency of the bond of marriace.
6. That the tendency of a human law severing under any circumstances the tie of marriage is always downwards in point of civilization and morals; that the rate of such tendency may vary, but that it will incvitably end in multiplying, to a frightful extent, temporary licensed concubinages in place of the noble live-long umions to which Christianity has given dignity and interests more than temporal, by insisting on their indissolubility.
7. That marriagre umions, contracted under the sure knowledge that they can be dissolved by nothing but death, do, by uatural consequence, check the rise and course of disagreements and licentious caprice, whereas the knowledge that a future door to the gratification of implacability and criminal indulgence may possibly be opened, does as naturally set loose from restraint at first and to the last the basest and saddest ture.
relief, without fatally slosing the a mensa et thoro under proper limitations gire all allowable and desirable would often minally closing the avenue to repentance and amendment; that legally, absolute divorces the last impulse to crime.
9. That cases of in but society may not be sacrificed hardship in unhappy matrimonial causes may exist cannot be denied, vicuals; there is no law, human or Divine, which may not in its
10. That Australings are hound to yet the law is held necessary and sacred. considered whether in this matter of divorce the but not servilo imitation of English law. That it is to be encouragement. It seems not improbable that the law of one thousand cight hundred gind father than an brought about principally by a sense of the uneven justice that wealth of the wealthy man enabled him by means of a private Act of Parliament to purchase a relief or a gratification that was denied to the poor man, for the sole cause of his poverty.

768
11. That the experience of the Divorce laws in England already, and for a longer time in America and Prussia, is a condemnation of those laws, and a vindication of the Divine wisdom of the Christian law of marriage.
12. That in the troubles of France a law was passed permitting divorce for many or any causes, and that the multiplication of divorces, with its attendant-profligacy and heartlessness, compelled a repeal of the law on the return of public order and conscience.
13. That one of the earliest and most solemn of the sacred manifestations of the spirit of Christianity was our Lord's vindication of the indissolubility of the marriage bond; moreover, that the tenor of the Gospels and of the other books of the Now Testament substantiates the belief that this indissolubility was primitively and Divinely ordained, and again asserted and invested with additional significance and sanction at the commencement of the Christian Dispensation.

Your Petitioners implore your Honorable H.ouse to take these premises into favourable consideration; and thereupon they pray that the said Matrimonial Causes Bill may not receive your assent and sanction.

And they will ever pray, ©c.
[Here follow 31 Signatures.]

# MATRIMONIAL CAUSES BLLL. <br> (PETYTION AGAINST--THE RJGHT REVERBND BLSHOD OF SYDNET AND METROPOLITAN OF AUSTRALIA.) 

$$
\text { Ordered by the Legislative Assembly to be printed, } 10 \text { July, 1872, A.M. }
$$

To the Honorable the Legislative Assembly of New South Wales.
The humble Petition of the Right Reverend Frederic Barker, D.D., Bishop of the Diocese of Sydney, and Metropolitan Bishop of Australia,-

## Showete:-

That your Petitioner desires respectfully to address your Honorable House on the subject of the Bill now before your Honorable House, which bas for its object to amend the law relating to Divorce and Matrinonial Causes in New South Wales.

That the Bill, in the opinion of your Petitioner, deals with the subject of Marriage and Divorce in a manner unsanctioned by the principles and practice of the Church of England, and will, if passed into Jaw, materinlly and injuriously affect the social relations of members of that Church, as well as those of the community in general.

Your Petitioner therefore humbly prays that your Honorable House will not pass the aforesaid Bill.

And your Petitioner will ever pray, \&c.
F. STDNET.

## Legislatife Assembly.

NEW SOUTH WALES.

# MATRIMONIAL CAUSES BILL. 

(PETITION in fayour of-richard sadieir, r.n.)

Ordered by the Legislative Assembly to be printed, 23 July, 1872.

To the Honorable the Lerislative Assembly, New South Wales.
The humble Petition of Richard Sadleir, R.N., I.P.,-
Hitmily Showetit:-
That the present law of this Colony is at variance with the law of England and other portions of the British dominions-still binds parties as man and wife, although the matrimonial compact so solemnly entered into has been violated, and the vow and covenant entered into broken.

That divorce has been for many years legalized by the House of Iords, in which Bishops of the Church of England bold their seats, and by Popos under vaiious circumstances, so that the objection on religious grounds camot well be valid; wherefore your Petitioner prays your Honorable House may give to the virtuous and injured parties power of divorce for the crime and sin of adultery proven.

That the state of holy matrimony; which is honovable in all when the bed is undefiled, may not be vitiated under the sanction of luman laws by a sin abhorrent to God and wounding to the best affections of our nature, inflicting injury on innocent oftspring.

The law, as it at present stands in this Colony, shields the profligate, while it perpetuates injury to the virtuous; renders in many instances marriage a curse instead of a blessing; leads to promiscuous sexual intercourse, demoralising domestic sunctity, multiplying illegitimacy, and other evils, -the law not admitting of release.

Wherefore your' Petitioner humbly prays your Honorable House will be pleased to give relief, so evidently required, to the virtuous sufferers and innocent offspring, by granting a law of divorce.

And your Petitioner will, as in duty bound, ever pray.
RICHARD SADLEIR.

## Legislative Assembly.

NEW SOUTH WALES.

# NECROPOLIS, HASLEM'S CREEK. 

Ordercd by the Legislative Assembly to be printed, 16 July, 1872.

RETURN (in part) to an Order made by the Honorable the Legislative Assembly of New South Wales, dated 23 August, 1870, That there be laid upon the Table of this House,-
"(1.) A Return of all expenditure of any part of the Consolidated Revenue
" on or for the purpose of the Necropolis at Haslem's Creek, specifying
" particulars as follows :-
"1. Purchase of land;
" 2. Clearing and improving land;
" 3. Fencing;
" 4. Clearing roads, lanes, paths, or the like;
"5. Mortuary or Receiving-house at Redfern;
" 6. Mortuary or Receiving-house, Lodge, and other Buildings, at " Haslem's Creek;
"7. Salaries;
"8. Labourers' wages and other current expenses.
" (2.) A Return of all expenditure of any part of the Consolidated Revenue, " or of revenue dcrived from fees or charges under the 'Necropolis Act " ' of 1867,' appropriated by or for the use of each religious denomination, " and, so far as applicable, specifying particulars as aforesaid.
"(3.) A Return of revenue derived from fees or charges under the "'Necropolis Act of 1867,' specifying the amount collected by each
"religious denomination, and, so far as practicable, specifying the fees or " charges under particular heads."
(Mr. W. Forster.)

## NECROPOLIS, HASLEM'S CREEK.

A RETURN (in part) to an Order made by the Honorable the Legislative Assembly of New South Wales, dated 23 rd August, 1870, on the motion of Mr. W. Forster, showing the expenditure out of the Consolidated Revenue Fund on or for the purposes of the Necropolis at Haslem's Creek.

The Treasury, New South Wales,
FRANCIS KIRKPATRICK,
Accountant.

## NEW SOUTH WALES.

# CEMETERIES REGULATION BILL.  

$$
\text { Ordered by the Legislative Assembly to be printed, } 3 \text { July, } 1872 .
$$

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.
The humble Petition of the undersigned Roman Catholic Archbishop,Humbly Showeth:-

1. That your Pctitioner has read with regret and alarm the Bill to regulate Cemeteries which is now before your Honorable House.
2. That the said Bill would, if passed, be a measure at once unnecessary and oppressive.
3. That for Roman Catholics, their Cemetery is as part of their Church, and is necessarily referred to principles and rules entirely beside the professed scope of secular legislation in this Country.
4. That the said Bill, therefore, in placing the Roman Catholic portion of any Cemetery actually or possibly under control and regulation of non-Catholics is oppressive to a large community who, like others, have an acknowledged right to complete liberty of conscientious action within their own body.
5. That whilst all must cheerfully admit a necessity for the action of Government in everything that relates to such sanatory conditions as may affect the whole population, or to the appropriate application of land which it has itself dedicated for Cemeteries, or to its police regulations and guardianship, there does not appear to be any necessity whatever for going beyond these points by Act of Parliament.
6. That a Bill which bears, as it appears to your Petitioner, these two characters, namely,- - first, that of opprossively interfering with the independent action of communities or of individuals in those religious requirements or even preferences which affect only their own private affairs; and secondly, that of multiplying unnecessary enactments and restraints,--such a Bill would, in all men's thoughts, more resemble an expression of despotic will than the measure we are accustomed to expect from the temperate and free spirit of British legislation acting for the common good and contentment.
7. That your Petitioner, for himself and the whole Roman Catholic community, respectfully entreats your Honorable House not to allow the said Cemeteries Regulation Bill to pass into law.

And he will ever pray, \&c.
Dated this second day of July, in the yoar of our Lord one thousand eight hundred and seventy.two.

> + J. B. POLDING, Sydneien.

# VITAL STATISTICS. 

The Registrar Geverat to The Honorable the Colonial Skcrmtiary,

TRANGMITIING ABSTIRACTS OF

## MARRIAGES, BIRTHS, AND DEATHS,

FOR THE YEAR 1871.

Sir,
In accordance with the usual practice, I have the honor to forward Abstracts of Marriages, Births, and Deaths, which have been recorded in the Registers of this Department during the year 1871. The results obtained from these Returns will bear favourable comparison with those of the preceding year, as I shall now endeavour to show.

The addition to the Registers in the number of names was 34,456 , being an increase of 554 on the Progreen of previous year, and bringing the total number of names recorded in this Office up to 464,256 .

The names in the returns for the year are distinguished as follows:-
No. of persons married, 7,906;
No. of births registered, 20,143;
No. of deaths " 6,407.
Marriages show an increase on the previous year of 105 , and births of 495 , while the deaths have decreased by 151 .

The enumeration of the people, on the 2nd of April, 1871, made our population to consist of 275,551 Population. males, and 228,430 females ; in all, a total of 503,981 . The estimated number of the population on the 31st December of the same year was 519,163 , viz., 284,150 males and 235,013 females, which is an increase of 15,182 during the last three quarters of the year, or 3.01 per cent.

The number of arrivals by sea was 14,516 , and of departures, in like manner, 9,676 , both showing Immigration a decrease on the provious year.

Taking the estimated population of the Colony on the 30 th June, 1871, as a basis, the ratio per Marriage, brith cent. of marriages was 0.77 ; of births, 3.95 ; and of deaths, 125 .

As compared with the year 1870, there is a slight decrease in proportion to population, at the rate of 0.01 on Marriages, 0.03 on Births, and 0.07 on Deaths.

The Table hereunder, marked $A$, gives the number of Marringes, Births, and Deaths which have been recorded in the year, distinguishing those which occurred in Sydney, Suburbs, and Country Districts:-
(A.)

Table ahowing the Number of Marriages, Brirths, and Deatris registered in the Colony of New South Wales, during each Quanter of the Year 1871.

| $3^{18 t}$ December | 891 | 2,499 | 2,455 | 4,954 | 1,045 | 725 | 1,770 |
| Totas | 3,953 | 10,326 | 9,817 | 20,143 | 3,882 | 2,525 | 6,407 |

The number of Marriages celebrated in the year was 3,953 , as against 3,848 in the year 1870, being an increase of 105 , and 299 in excess of the average of the five years preceding. The localities in which these Marriages were celebrated is as follows :-

According to these figures, it appears that Marriages in the Country Districts increased $2 \cdot 23$ per cent. on the previous year, while there was a decrease of 1.34 per cent. and 0.89 per cent. in Sydney and Suburbs reapectively.

Proportional
Proportiona
perceatage.
Ratlo of
Rastlo of
Marriages.

The proportion which the before-named divisions bear to population is found to be as follows:The City 1.53 per cent., Suburbs 0.39 per cent., and the Country 0.67 per cent.

The rate per 1,000 for the whole Colony is a shade lower than the previous year. The following are the rates for each year:-

| 1866. | 186. | 1865. | 1869. | 1870. | 1871. |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 8.25 | 7.80 | 8.18 | 7.98 | 7.79 | 7.76 |

The number of Marriages celebrated by each Church or Denomination, including those performed by District Registrars, as compared with the year 1870, is as follows :-

| Tota | 3,326 | 314 | 3,480 | 3.578 | 3,462 | 3,426 | 3:736 | 3,799 | 3,848 | 3,953 |

The next Table distinguishes the number of persons who, after celebration of marriage, signed their names or affixed their marks to their Marringe Certificates:-

|  | No. of Marriages | Full Signatures. | Marks. | : Marks par cent. |
| :---: | :---: | :---: | :---: | :---: |
| Church of England | 1,232 | 2,054 | 410 | 16.64 |
| Romon Catholic... | 885 | 1,353 | 417 | 23.56 |
| Presbyterian | 648 | 1,14 ${ }^{8}$ | 148 | $1{ }^{142}$ |
| Wesleyan | 364 | 665 | 63 | 8.65 |
| Primitive Methodist. | 99 | 187 | 11 | $5 \cdot 56$ |
| Congregationalist . | 60 | 103 | 17 | 1417 |
| Baptist .. | 30 | 54 | 6 | $10 \%$ |
| Unitarian | 4 | 8 | ........ | ........ |
| Hebrew | 10 | 20 | .... | ....... |
| Free Church of England | 395 | 628 | 162 | $20^{\prime} 51$ |
| German Evangelical...... | 4 | 8 | ......... | ........ |
| Christiau , ........... | 3 | 6 | ......... | ........ |
| Registrara' Offices. | 219 | $33^{1}$ | 107 | $24^{\prime} 43$ |
| Totas | 3,953 | 6,565 | 1,341 | 16.96 |

By dividing the Colony into City, Suburbs, and Country, we have the following results:-

The number of marriages celebrated in each Quarter, in Sydney, Suburbs, and Country districts, respectively, during the last ton years, is shown in the following Table, marked C, which also gives the ratio per 1,000 on estimated population :-
(C.)

Table showing the number of Marriagrs registered in the Colony of New South Wales, during cach Quarter of the Years 1862 to 187 r .

## BIRTHS.

The births registered during the year 1871 numbered 20,143 , as against 19,648 in the preceding year, being an increase of 495 .

Proportion of nerce.

The number registered in each of the three divisions of the Colony in proportion to total births registered is as follows:-

| Sydney | Males. <br> 1.535 | Fenales. <br> 1,445 | Tota3. $2,980$ | $\underset{\text { per }}{\text { Males. }}$ 7.62 | Females. <br> Per cent $7 \cdot 17$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Suburbs | 1,342 | 1,259 | 2,601 | 6.66 | 6.25 |
| Country | 7,44,9 | 7,113 | 14,562 | 36.98 | $35 \cdot 32$ |
|  | 10,326 | 9,817 | 20,143 | 51.26 | $48 \cdot 74$ |

The male births registered exceeded those of female birtis by 509.

Comparing the number of births with those of the previous year (1870), we have the following
results :-

| Sydney | $\begin{array}{r} 18770 . \\ \mathbf{2 , 9 0 9} \end{array}$ | 187. $2,980$ | Increase. <br> $2 \cdot 44$ |
| :---: | :---: | :---: | :---: |
| Suburbs | 2,546 | 2,601 | $2 \cdot 16$ |
| Country | 14,193 | 14,562 | 2.60 |
|  | 19,648 | 20,148 | 2.52 |

Tlaking the estimated population at the middle of the last six years, the ratio of births per 1,000 is comparinon as follows:-

| 1866. | 1867. | 1868. | 1869. | 1870. | 1871. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 40.38 | 41.73 | $40 \cdot 50$ | $40 \cdot 46$ | $39 \cdot 80$ | $39 \cdot 57$ |

Therefore, the number of births registered in 1871 was below the mean of the five preceding years, by 1.00 per 1000 .

The Table which now follows, marked $\mathbf{D}$, gives a decennial return of births registered during each quarter.
(D.)

Table showing the number of Births registered in the Colony of New South Wales, during each Quarter of the Years 1862 to 1871.

|  | Estimated Population at the middle of ench Year. | 31 March. | 30 Junc. | 30 Sept. | 31 Dec. | TotaL | Ratio per 1,000 Hving. |

The illegitimate births for the year number 782, composed of 394 males and 388 females, or 3.88 per cent. of registered births. The increase in these births over the previous year is 27 , but in proportion to population there is a slight decrease.

The next table (F) gives the number of Triplets and Twins which have been registered for the last ten years:-
(F.)

Table showing the number of Terplets and Twins born in the Colony of Now South Wales, from the ist Jonuary, i86z, te the 3 rist December, 187 r .

* Two still-born in each year, not registered.
$\dagger$ Six still-born, not registered.

## DEATHS.

The deaths registercd during the year numbered 6,407 , viz., 3,882 males and 2,525 females, being tality. a decrease of 151 on the previous year, or 2.30 per cent. The rate per cent. on estimated population is $1 \cdot 25$, as against 1.33 in the year 1870 .

The total deaths of the year, with the rate per cent. in cach of the three divisions of the Colony, are as follows:-

Comparing the deaths of the year with those of the previous rear, the following will be the comparisan with result:-

In proportion to population, the matio of deaths to every 1,000 persons for the last six years is as natlo of dath.
follows:-

| 1866. | 185. | $18 i 6$. | 1800 | 1870. | 1871. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1.53 | 19.66 | 15.83 | 1406 | 1328 | 12.58 |

The death-rato per 1,000 for the year is 340 lower than the average of the fire preceding years.
The rate per 1,000 in the City, Suburbs, and Country, is,-

| In Sydney | 19.90 |
| :---: | :---: |
| Suburbs | 1605 |
| Country | 10.52 |

IMus the denth-mate in the City is higher than the Suburbs and Country by 3.85 and 9.35 respectively, while the Country Districts show their rate to be 5.03 lower than the Suburbs.

The next Table (G) is a Quarterly Return of the number of Deaths registered in the City, Suburbs, and Country, for the last ten years.
(G.)

Tabre showing the number of Dfatis registered in the Colony of New South Wales, during each Quarter of the Years isG2 to $18 \% \mathrm{r}$.

$135-\mathrm{B}$

Infantile
snortality.

Percentage of dentha in City Wards, and Suburbs.

The Table next following, marked H , is a decennial Return of the deaths of children under five years of age, showing the proportion per cent. which these deaths bear to the total number of deaths, as compared with which the Infantile mortality is slightly lower than that of the previous year.

The mean results obtaincd from this Table are the following:-

|  |  |  | $\begin{aligned} & \text { Mran Deatbs Mrean } \\ & \text { under } 5 \text { years, } \\ & \text { I } 862 \text { to } 18 \mathrm{jII} \text {. } \\ & \text { total Deathes. } \end{aligned}$ |  |  | Proportion per cent. |

The next Tables (I and J) give the percentage of deaths in each ward of the City, and in each of the Suburban Districts, from the year 1864 to 1871 inclusive ; also, deaths under five years to births, total deaths to births, and total deaths to population :-
(I.)

(J.)

The mortality under and orer 5 years of age in each ward of the Ciivy for the year 1871, with pro- mortality in portion per cent. to population, is here given :-

* The Infirmary is in this Ward.
* Exclusiry of the Ielands in Port Tackson.

The population of Sydney and Suburbs, as detcrinined by the Census of 1871, with total number of births, also deaths under 5 years, and total number of deaths, for the year 1871 , will be seen on reference to these figures:-

| Sydney ... | $\ldots$ | $\ldots$ | ... | $\ldots$ | Populatiou. $76,159$ | $\begin{aligned} & \text { 3iirllıg. } \\ & 2,980 \end{aligned}$ | Deatis under 5. $74: 3$ | Total Deaths. $1,583$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Redferı | ... | $\ldots$ | ... | $\ldots$ | 12,621 | 710 | 166 | 250 |
| Paddington | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | 11,411 | 400 | 83 | 152 |
| Concord | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | 3,520 | 143 | 18 | 41 |
| St. George | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | 8,438 | 320 | 39 | 98 |
| St. Leonards | $\cdots$ | $\cdots$ | $\cdots$ | $\cdots$ | 5,1.26 | 185 | 30 | 66 |

The classification of diseases which have terminated fatally is contained in the following table ( K ), which gives the average percentage which each class and order of disease bore to the aggregate mean mortality of the last nine years :-
(К.)

Class I.-Zyyrotic Diseases.
Order f.-Briammatic Digeases-Scarlatina, Mensles, Diph thicria, Dysentery, Fevers, \&c. .................
2.--Enthetic Discases-Sypliils, Gonorrlican, \&c....

- Dietio Diseases-Privation, Scurvy, Delirium

Tremens, \&c.
4.-Parasitic Diseascs-'Ihrusl, Worms, \&c. .

Class II.-Constimutional..
Order r.-Diathetic Diseases-Gout, Dropsy, Cancer, \&e.
2.-Tubercular Diseases-Scrofula, Phthisis,Hydro-
cephalus, \&e.

## Crasy III-Docal

Order 1.-Nersous-Apoplexy, Paralysis, Insauity, Con rulsions, Cephalitis, Brain Disease, \&c. .....
2.-Circulation-Pericarditis, Aneurism, Heart

Disease, \&c. ..........................................
Respiratory-Bronchitis, Pneumonia, Asthma,
Pleurisy, \&e. .......................................
Dipestive-Gastritis, Enteritis, Peritonitis,
4.-Digestive-Gastritis, Enteritis, Peritonitis,

Hernia, de. ...
5.-Urinary-Nophritis, Iseluria, Diabetes, \&c. .
6.-Gencration-Orarian Dropsy, Uterus Diseuse,
\&c.
7.-Toints-Arthritis, Ostitie, Periostitis, \&c.
8.-Integumentary-Phlegmion, Uleer, Skin Discase
de...

Chass MV.-Mevelopmextac.
Order 1.-Children—Cyauosis, Spina Bifida, Teetling, de.
2.-Adults-Paramewia, Childbirth, \&c
3.-Old People—Old Age, \&c.
4.-Nutrition-Atroplyy, Debility

Class V.-Violevce.
Order m.-Accident or Negligence-Fractures, Contusions
Burns, Drowning. Suffocation, Wounds, \&c...
2.-Wounds in Battic-Gunshot Wounds, Sword Bayouet, or other Wounds
3.-Homicide-Murder and Manslaughto
4.-Suicide-Poison, Drowning, Hanging, \&e.
5.-Exucation-Hanging

| Novomber. | 134 | 666 | 29920 | $2 \cdot 82$ | 10 | 47 |
| December ................................... | 169 | 695 | 29.573 | 2.27 | 10 | 41 |
| Meun of Twolvo Months..... | 133 | 627 | 30.004 | 400 | I | 4.6 |

The month of December appears to take the first place in the records of mortality, the averago number of deatlis being 169 , and the nean temperature 695 . September shows the number of deaths to be 1.07 , with a mean temperature of $58 \cdot 8$, and is the month in which there are the least number of deaths.

In concluding this Report, T. have to call attention to the question of inspection, which, I think, is required in order to ensure accurate returns. There are now between 90 and 100 Registrars in the Colony, on whom devolves the duty of making correct entries in the Registers and furnishing me with quarterly returns. I would suggest that the Iuspector of Public Accounts might probably be able to render some service in the way of iuspection, when he is occupied in a similar capacity on behalf of tho Treasury.

I hare the honor to be,
Sir,
Your obedient Servant,
E. G. WARD,

Registrar General.

## INDEX TO TABLES.

## APPENDIX.

A.

Thbie showing the Number of Marrlages, Birtis, and Deathe, registered in the Colony of New South Wales, during the Year ended 31st December, 1871.

## B.

Tabie showing the Marriages, Births, and Deaths, registered in each District of the Colony of New South Wales, during the Year ended 31st December, 1871.

## Legislative Assembly.

## NEW SOUTH WALES.

## VACCINATION.

(REPORT FOR 1871.)

Ordered by the Legislative Assembly to be printed, 11 June, 1872.

## The Medical Adviser no the Government to The Coloniay Secretary.

Medical Adviser's Office,
29 April, 1872.
Sir,
I have the honor to forward a Return of the cases of Vaccination in the Colony of New South Wales during the year 1871.

The numbers reported as successful are six thousand four hundred and eighty-two (6,482), of which number, two thonsand one hundred and eighty-three ( $2,1 \mathrm{~S} 3$ ) were vaccinated in Sydney and its Suburbs, and four thousand two hundred and ninety-nine $(4,299)$ were raccinated in the Country Districts.

Of these, one thousand eight hundred and scventeen $(1,817)$ were under one year of age, three thousand two hundred and twenty-nine $(3,229)$ were under five years, and one thousand four hundred and nine $(1,409)$ were between five and ten years.

There were three hundred and twenty-one (321) others vaccinated, but these cases were not successful.
The numbers vaccinated during 1871 have been less than for several years. When small-por was in Melbourne, the alarm produced by the proximity of the disease caused a great increase in the number of cases of vaccination, but that alarm swelled the lists of cases only for the time, and on the subsidence of small-pox near us the apathy of the poople was as great as ever.

The information of the great ravages by the epidemic of small-pox that had recently taken place in England produced no effect here in inducing people to have their children vaccinated, although the proofs were clear that vaccination and revaccination were effectual means for preserving almost entirely a people from small-pox.

It is not alone the facts which have been disclosed in the Reports from the several Medical Advisers to the Government of this Colony, but all information with regard to the spread of small-pox goes to show that vaccination can only be effectually carried out by a compulsory law, and the earlier this step is taken, so as to procure the vaccination and revaccination of the population of this Colony, the better.

The Report of the Select Committee on the Vaccination Acts of 1867 , presented to the House of Commons in May, 1S71, contains the following statements:-
"After careful consideration of this evidence, and of medical and other evidence, your Committee agrec with the general opinion, -
"That the cow-pox affords, if not an absolute yet a wers great protection against an altack of small-pox, and an almost absolute protection against death from that disease.
"That if thic operation be performed with due regard to the health of the person vaccinated, and with proper precautions in obtaining and using lymph, there need be no apprehension that vaccination will injure health or communicato discase.
"That smull-pox, unchenked by raccination, is one of the most terrible and destructive of discascs, as regards the danger of infection, the proportion of deaths among those attacked, and the permanent injury to the survivors, and therefore-
"That it is the duty of the State to endeavour to secure the careful raceination of the whole population."
It is by revacciuation the protective power of vaccination is secured to a community; it covers, the imperfection of some infantile vaccinations, -and the best infantile vaccination in process of time loses more or less of its offect. Revaccination, once properly and successfully performed, does not appear cver to require repetition, and this has been fully proved by the effect in the cases of nurses in small-pox hospitals, therefore the Compulsory Vaccination Act for this Colony should contain provision for revaccination.

The adoption of such a measure will of necessity cause considerable expenditure, particularly at first; and, from the scatitered nature of the population and the heat of the climate, special arrangements will require to be made to limit the vaccination to certain months of the year, in particular localities, and to make arrangements for special officers visiting districts that the Government Medical Officers and Public Vaccinators could not be expected to go to for that duty.

The fee that these officers at present receive is a proper payment where there is a moderately dense population, and the distance within a few miles, but the journeys which these officers have often to travel is not properly paid for by the allowance made ; and when a Compulsory Act is passed, provision for the vaccination of children in distant places beyond the districts of public officers will have to be arranged for.

J．S．P．BEDFORD，
Medical Adviser．

## 1872.

## NEW SOUTH WALES.

## IMMIGRATION.

(REPORT FROM AGENT, FOR 1871.)

## 

## Tife Agent for Immigration to The Principal Underl Secreifary.

## Government Immigration Office,

 5 March, 1872.Sir,
I have the honor to submit; for the information of the Honorable the Colonial Secretary, my Report on Immigration for the past year.
2. In my communication of the 18th February, 1870, which is appended to the Report from the Select Committec on Immigration, printed on 13th April, 1870, I had the honor to suggest that an unexpended balance from former Immigration votes, of about $£ 11,000$, might be advantageously employed towards the introduction of single women as domestic servants. Communications were subsequently transmitted to Her Majesty's Emigration Commissioners in London, with instructions to grant free passages to this Colony, in ships chartered by them, to single female domestic servants of good character, between the ages of 20 and $25^{\circ}$; and as it has always been found advisable, for purposes of supervision and the better control of young women during the voyage, that a few married couples with their children should be allowed to come in the same ships, these were provided for at a reduced rate of passage money paid by themselves.
3. In accordance with their instructions, Fer Majesty's Emigration Commissioners have therefore formarded emigrants selected by themselves, in the following ships, viz.:-

The "Sobraon" arrived 28th December, 1870.
"Hawkesbury" arrived 5th March, 1871.
"Scythia" arrived 20th June, 1871.
"Dumbar Castle" arrived 28th September, 1871.
"Strathdon" arrived 19th December, 1871.
4. The immigrants by these ships were natives of-

| England and Wales | ... | $\ldots$ | ... | 298 |
| :---: | :---: | :---: | :---: | :---: |
| Ireland ... ... | $\ldots$ | $\ldots$ | $\ldots$ | 81 |
| Scotland |  | $\ldots$ | $\ldots$ | 10 |
| Foreign Parts |  | ... | ... | 11 |
| Born on the voyage | $\ldots$ | $\ldots$ | ... | 3 |
| Total | $\ldots$ | $\ldots$ | $\ldots$ | 403 |
| Males |  | $\ldots$ | $\ldots$ | 32 |
| Females |  | ... | $\ldots$ | 339 |
| Children under 12... | ... | $\ldots$ | ... | 32 |
|  |  |  |  | 403 |

6. Four of the ships arrived without any death casualty; on the fifth there were three deaths; there were also three births during the voyage.
7. The cost for passages of these 403 immigrants has amounted to the sum of...£5,328 $\quad 3 \quad 9$ Less-
Part payments on account of cost of passage of the married couples and their

| families | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | 482 | 0 | 0 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | ---: | :--- | :--- |
|  |  | Cost of passages | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots$ | $\ldots .24,846$ | 3 | 9 |  |  |  |

Chargeable to the introduction of 290 single female immigrants.
8. The 299 single women were received at the Immigration Depôt, and within a few days after their arrival they were engaged as domestic servants, at an avcrage rate of wages of £19 178. Gd. per annum.

1374
9. Although this immigration has been of a very limited character, the class of individuals introduced has been of great advantage; indeed, a much larger number of single women than have already arrived would readily obtain situations as domestic servants; and the few married couples who accompanied them obtained, as I am informed, immediate employment.
10. Having noted in my previous Reports on Immigration during former years, the arrivals from, and the departures to, the United Kingdom, I have been furnished by the Collector of Customs with this same information for 1871, by which it appears that during the past year the total number of arrivals from the United Kingdom, irrespective of the assisted immigrants, has been 721 individuals, and the departures to the United Kingdom have been 633 individuals.

I have, de.
GEORGE F. WISE,
Agent for lmmigration.

## REPORT of the Government Astronomer to the Board of Visitors at the Government Observatory, Sydney. Read at the Annual Visitation, 19th June, 1872.

I. hare the honor to submit to the Board of Visitors my Report on the state and progress of the Sydney Observatory during the year 1871.

The Report which I am now enabled to make is fir more satisfactory than the previous one, both in regard to the amount of work done, and in the improved position of the Observatory in the estimation of similar Institutions in other parts of the World. It is also very satisfactory to remark the largely increased interest in the Obscrvatory and the science of Astronomy manifested by the public; and the increasing number of those who, having instruments of their own, are doing or are ancious to begin some useful work, instead of mere star-gazing.

During the year regular work has been carried on with the transit. The equatorial has as usual been principally devoted to double star measures, but has also been cmployed to make measures and a drawing of the stars aud nebula about $\eta$ Argus, also an extended seerics of measures of Mars in opposition. It has also becn fitted with a photographic apparatus, with which some good photos of the moon were obtained. This apparatus was required for the Eclipse Expedition, but can now be used for recording sunobtained. This apparatu
spots or other purposes.

The meteorological work has been considerably extended, and I now receive regular reports from 42 stations, including 7 from private observers. At the end of 1870 we had only 22 stations at work. During the year, 9 of these stations have been visited, the intruments examined, and in some cases replaced. A now plan has also been adopted with the results, which have all been reduced and published monthly, which has involved a great increase of work, but is justified by the result.

Two, or perhaps three stations are yct wanted betweeu Forbes and Weutworth to complete the western chain of stations, but I hare not been able to find obscrvers there.

A large evaporator added to the meteorological instruments in April has yielded some interesting and valuable results, which are detailed in the Meteorological Report.

Two thermometers have also been added; one to determine the effect of covering the minimun with a roof, the other to determine the heat which may be obtained from the sum under given conditions. This shows $190^{\circ}$ in summer as a common result, and $202^{\circ}$ was on one day recorded.
*See list appended.
Almost

#### Abstract

Almost immediately after the last meeting of the Board the final arrangements for the Eclipse Erpedition were made. The liberality and readiness with which everything was done by the Government of New South Wales which could in any way further the Expedition enabled me to take an active part in it, and take with me a party of trained observers, and everything necessary to give a complete account of the eclipse as presented to the eye and the sensitive plate.

A careful determination of the actinic focus of the large tclescope had shown me that it was very sharp indeed ( (rō of an inch is enongh to put it out of focus), and I had arranged to take photos with it and the camera, to see which gave the best result. Although the Expedition was astronomically fruitless, we yet obtained much scientific information, a part of which was an bourly series of observations on the warm ocean current (from Sydney to Cape Sidmouth and back) which is thought to influence our climate.

Mannetic observations were carried on at Sydney, and results obtained for Orange; Bathurst, and the Blue Mountains. While at Orange I carcfully determined the latitude and longitude of a brick pillar in the yard of the Telegraph Office, and marked a meridian line for the convenience of surveyors and others. At Bathurst arrangements were complete to do the same, but continued cloudy weather prerented it.

In April a valuable addition to the objects of interest in the Observatory was made. Through the kindness and assistance of Mr. J. Robertson, of Deniliquin, I obtained a meteoric stone at Barratta, which weighs 145 lbs.

## Buildings.

These have not been altered since my last Report, and the repairs then wanted are still more needed now. The whole of the external wood-work, and the outsido of the dome, require painting. The Astronomer's room requires some repairs, owing to a settlement of the walls.

## Grousds.

These are the sume as at my last Report, but every year makes it more evident that a piece must be enclosed on the hill for electrical and rain observations: and I would recoumend that this should be done in accordance with the plan made some years since, and that treess should be planted so as not to interfere with the view.

## Instruments.

The transit continues in good order, and has been in constant usc. One very troublesome, because intermittent, fault has been traced to the clamping arrangement, and removed. Quarrying and blasting are still carried on close to the Observatory, in spite of the most praiseworthy efforts to prevent it on the part of the police, and until it ceases some observations cannot be taken with the transit.

The equatorial is in good working order, but some repairs are needed, and have been deferred ponding arrangements for the transit of Venus.

In August the sidercal clock was put into Mr. Allerding's hands to examine; a slight inequality of the teeth of the escape wheel was found and removed, and a considerable error in the position of the pendulum bracket, which was $\frac{1}{3}$ of an inch too low and $\frac{1}{8}$ of an inch on one side. These defects were corrected, and the clock thereby much improved.

The time-ball clock has worked satisfactorily, and is now fitted with the necessary springs to govern the new Post-office clocks.

Second mean time clock in good order.
Third mean time clock still in Surveyor General's Department.
Old sidereal clock in good order.
Dent, Poole, Hornby, Dallas, and Newcastle chronometers, in good order.
Small alt. azimuth and theodolite in good order.
Sydney time-ball machinery has worked very satisfactorily, and has been arranged to give a back signal, which is recorded on the chronograph with the drop signal, so that the smallest variation can be seen.

The Newcastle time-ball bas not worked so well as could be wished; interruptious often occur on the Telegraph lines, and some difficulty has been found owing to the temporary nature of the ball which iin used, pending the erection of a good one.

## Old Instruments.

These are in the same condition as at last Report.

## Meteorological.

These are the same as at last Report. All the self-recording ones have worked satisfactorily. Tro thermometers before mentioned have been added, and the large evaporator, which is 4 feet in diameter and 2 feet 6 inches deep. It is sunk in the ground 2 feet 4 inches. In it is a small foat with a graduated stem, passing through two guides, and read to $\mathrm{N}_{\text {son }}$ th of an inch, by means of a microscope placed horizontally on a firm support.

## Work done

The work actually done during the year is as follows:-

| With the transit,- |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Transits | .. | .. |  |  | 1,769 |
| Moon culminations | $\ldots$ | $\ldots$ | ... | . | 26 |
| Observations of collimation |  | ... |  |  | 278 |
| Observations of levels |  |  |  | ... | 21.1 |
| Observations of azimuth |  |  |  |  | 120 |

The whole of the transits and culminations are reduced and corrected for instrumental errors ; all the correction obseryations are reduced.

## With the equatorial-

| Measures of double stars (distance) |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Measures of double stars (angle) | $\ldots$ | $\ldots$ | $\ldots$ | 657 |
| Micrometrical measures of stars |  |  |  | 657 |
| Around $\pi$ Argus ... $\ldots$ | $\ldots$ | $\ldots$ | 140 |  |
| Micrometrical measures of Mars and stars | $\ldots$ | $\ldots$ | 316 |  |

A number of photographs of the moon, direct and enlarged; also, enlarged photos of the sun, and the spectrum of neb. about $\eta$ Argus.

Part of these results are reduced, but it has been found quite impossible to get through the reduction of all the astronomical and meteorological work, and the latter has been first completed, since it is of the most immediate importance.

Regular meteorological work, and results from forty-two meteorological stations reduced and printed monthly, together with a general abstract of the whole, now in the printer's hands.

A series of important experiments on evaporation, the results of which appear in the meteorological abstract.

The regular 10 'clock time-signals at Sydney and Newcastle.
Some assistance given to amateurs, in instruction, and comparison of instruments, both meteorological and astronomical:

## Perbonal Establishment.

This consiste of-Astronomer, Computer, Meteorological Assistant, Messenger and Carpenter, whosi duties are,-

The Astronomer is responsible to the Government for all the property of the Observatory; the observations and calculations, planning new instruments, the daily discipline, and all publications, are under his superintendence. All correspondence, the accounts, all the observations with the equatorial, and nearly all their reductions, the moon culmination observations, the magnetic observations at Sydney and other stations, and all matters of science which the Government may require of him.

The Computer has charge of the observations with the transit instrument, and their reduction, all the clocks aud chronometers, the time-ball and time-signals, the examination of all and reduction of part of the meteorological obscrvations, and other necessary computations.

The Meteorological Assistant has charge of all the meteorological observations, and the reduction of the Sydney and Country ones as far as possible.

The carpenter is also office-keeper and messenger.

## The Library.

The Library has been enriched by many valuable gifts from various parts of the World, many for the first time entered on our book-list, which is very satisfactory, as it indicates the increasing recognition of the Observatory. Purchases have been made as far as funds allowed. [See list attached.]
1872.

During 1872 it is proposed to carry on the regular transit observations, including moon-culminating stars ; the measurement of distance and angle of position of as many double stars as possible, and some spectroscope work.

To deternine the latitudes and longitudes of as many towns as possible, in connection with the magnetic surver.

The regular meteorological work at Sydney and Country Stations, with their daily and monthly publication.

The regular time-sigmals.
Any assistance which can be given to amateurs, astronomical and meteorological, in the shape of instruction, and comparison of instruments.

I have only to repeat the conclusion of my last Report, viz. :-'That the present small staff of the Obserratory is quite unequal to the task of fully reducing all tho resulta now obtained of practical and scientific importance ; and if the Observatory is to make good its position, additional assistance is absolutely necessary.

## Transit of Vence, 1874.

In the year 1874 a transit of Venus across the Sun's disc will take place. For this phenomenon, which is of the greatest importance to Astronomy, most of the Observatories of Europe and America are now in active preparation.

The British Government have determined to establish several temporary Observatories for this special purpose ; and, having communicated with the Astronomer Royal on this subject, I find it is expected, from the known good spirit of the Government of New South Wales, that they will provide for the observation of the transit here.

In order to retain the character which the Colony has obtained for aiding acientific work, it is my duty to make the following proposals, viz.: -That, for the purpose of observing the transit of Venus in 1874, a new telcscope, with object glass of 11 inches, should at once be ordered from Europe, and, when it arrives, mounted on the stand now in use, and a cheaper monting obtained for this instrument, which at the time of transit should be mounted at or near Cape Howe or Eden, which are geographically situated in the best part of Australia for observing the transit ; and, that one of the smaller telescopes now in the Observatory be mounted on the Blue Mountains, at a place near the T.clegrapb line, and chosen for its clear atmosphere.

In order to carry out these proposale, it will be iecessary to spend $£ 600$ to cover the cost of instruments, some of which could be sold as soon as the traiisit is over.

I may here state, as an additional reason for this, that, independent of the transit of Venus, the time has come when the Observatory slould have a more powerful telescope. The one now in use, when it was bought, eleven years since, was the finest in Australia; but now several amateurs have telescopes of cqual or greater power, and a neighbouring Colony has erected a telescope which cost as many thonsands as ours did hundreds of pounds. Moreover, those whose interest in Astronomy I have cultivated, in accordance with instructions at the last meeting of the Board, naturally expect that the Observatory telescope should be the most powerful of all, and come to me to help in difficulties which even now are in some cases beyond this telescope.

Owing to the time (many months) which will be required to make the telescope, and for correspondence, the orders should be sent to Europe at once, so that telescope and stand may be here by the end of 1.873 or beginning of 1874 .

## No. 1.

Lreumenant Gowdiand to The Attorntey General.
" Governor Blackall,"
Sydney, 28 March, 1872.

Sir,
I have the honor to inform you of the arrival of the steamer "Gorernor Blackall" in Sydney Harbour, having on board thirty-four survivors of the crew and passengers of the brig "Maria," wrecked on the Bramble Reef on the 26th of February.

In accordanco with the instructions which I received from you, to prosecute the search after the shipwrecked members of the New Guinea Prospecting Pxpedition, who were supposed to be cast on shore, or drifting on rafts along the coast and islands in the ricinity of Cardwell, I left Sydney in this vessel shortly before daybreak on Sunday morning, the 10th instant, having on board thirtecn relatives and friends of the cast-away crew (these gentlemen proffered their services on this occasion as volunteers), as weli as a crew of the Water Police, together with a supply of arms and ammunition; and, considering the short notice at which the ship was despatched, I thought myself fortunate to secure the services of so many efficient associates, in an undertaking which would assuredly tax their powers of endurance.

After taking in 240 tons of coal at Newcastle we proceeded north with all possible spced, and arriving at Cardwell on the 16th instant, found H.M.S. "Basilisk" at anchor, under the command of Captain Moresby, who gave me every assistance in his power, and communicated to me all necessary information in reference to the object of our search.

From him we gained the important intelligence that he had rescued eight of the crew of the larger of the two rafts off loint Cooper (see plan of coast aunexed), and had also discovered three dead bodies on the shore further south, supposed to be those of men who had landed from the second raft. The reception on board the "Governor Blackall" of these poor fellows was a scene that none of the spectators will be likely to forget. They were all in a more or less destitute state, and most of them suffering from ulcerated sores on the body, and low fevers, the result of three days' and nights' partial submersion on the raft without food or water, of bad or no food at all whilst with the blacks, and of some seven or eight days' weary journeyings along burning beaches and sharp, jagged rocks, in search of sustenance and snccour. They had providentially fallen in with a tribe of natives shortly after their raft touched the shore, who treated them with great kindness, and allowed them to share in such food as was procurable: a strange contrast to the fiendish cruelty of the tribes to the south of "Shoal Rivulct," who at the same time, and at only a few miles distance, were barbarously murdering their companions.

Haring received on board Sub-lientenant Jones from the "Basilisk" to aid in the scarch, as well as a detachment of Native Police under the command of Mr. Johnstone, for whose services I had made
application to Mr. Sheridan, the Police Magistrate at Cardwell, we started shortly after noon of Sunday, 17th instant, to commence the examination of the coast and seaboard lying between Point Cooper and Cardwell. "Northward of Point Cooper the coast had been very carcfully searched by boat parties from H.M.S. "Basilisk," but to the southward the coast had only been cursorily examined. I resolved, therefore, to confine our scrutiny, in the first instance, to the line of coast extending about 1.0 miles north and south of the spot where the sccond raft (i.e., the smaller of the two) had drifted on shorc.

Accordingly, having anchored the ship off Shoal Haven, distant about 15 miles south of Point Cooper, I despatched three armed boats in the afternoon, manned by sililors, voluntecrs, and native police, with instructions to search certain given sections of the country and adjacent coast on the following day.

For four days a similar system of investigation was followed, the ship shifting her anchorage from time to time as circumstances required.

Each boat's crew detached an armed landing party, who walked along the beaches and over the rocks, and whenever fensible made excursions in various directions through the dense serub and jungle which fringed the shore of the mainland.

A strong party of volunteers, reinforced by the native trackers forced their way inland along the banks of the river which falls into the sea at the spot marked Shoal Haven on the plan, tbrough an all but impassable country, and in their passage intersected the foot-marks of blacks in numerous directions.

Every native camp between Cardwell and Point Cooper-a distance of about 50 miles-was visited and minutely searched for any traces of white men that might permit us to hope that some of our missing countrymen might eren still be alive, though languishing in captivity.

A second party, with two boats, and accompanied by Mr. Johnstone and the Native Police, were sent to examine the banks of a large river still further to the northward, marked on the plan as Shoal Rivulet. They were absent about two days; but with the execption of a felt hat, found in a native encampment about 4 miles north up the river, no traces of the existence of living white men in this neighbourbood were discovered.

The const north and south of Point Cooper was the next selected for examination, and the appearance on the night of the 18th instant of a large fire on the declivity of that promontory (which was thought by Mr. Johnstone to be a signal fire made by white men) inspired us all with a fervent hope that success might at length reward our labours.

Having shifted the ship to a berth castward of the point, I proceeded about midnight, inmediatcly after anchoring with armed crews of volunteers and Native Police, to examine the position of the fire. After a most rigorous search our expectations were again doomed to disappointment, as the firc proved to be merely a conffagration of grass and underwood, originating no doubt in the fire of a native camp discovered in the immediate neigbbourhood.

The results of our examinatiou of the country between Point Cooper and Double Point were thus, so far as concerned the recovery of the survivors of the shipwrecked crew, dispiriting in the last degree, and our utter failure in this locality filled us all with sad misgivings for the success of our further search in the direction of Cardwell.

But although wo were not destined to rescue any lives, we bave succeeded in discovering six dead bodies between Shoal Rivulet and Tam O'Shanter Point, almost all of which have been with nearly absolute certainty identified by their shipmates as the remains of tho unfortunate occupants of the smaller raft.

The places where these bodies were discovered are laid down in the annexed plan, No. 1; and the descriptions of the skeletons, their clothes and other distinguishable marks, wheresoever such descriptions were possible, are set forth in the annexure No. 2.

This raft was found strinded on the beach about a quarter of a mile to the south of Shoal Rivulet, and though somewhat smaller than that which came on shore a fer miles to the northward, was better constructed; and though very frail, was probably a better support to the poor fellows, who in their extremity were obliged to trust to it, than the larger raft.

Their bleaching skeletons lie clustering around, but chiefly to the soutbward of the raft; and, with but a single exception, the skulls of all bear horrible testimony of the nature of that death which awaited them on the land they must bave been so anxious to reach.

All but one have been most barbarously murdered by the blacks. Sometimes the skull has been shattered by a huge stone, sometimes the jaw bones and face have been smashed in with waddies or clubs, and in oue instance the body had been divided into fragments-the leg being found in one place, the head and shoulders in another, and portion of the trunk in a third.

Of all who came on shore or left the wreck in this second raft, but two now remained unaccounted for, and these could not in all human possibility have escaped the fate of their murdered companions, if indeed they had not been previously drowned off the raft. Nevertheless, I felt it my duty to continue the search in the direction of Cardwell.

A strong party was therefore detached on Thursday, the 21 st instant, in tro boats, to examine the coast southward of the Barnard Islands, and whilst the ship was taking in water at Dunk Island the whole of the coast, as far as Tam O Shanter Point, was scoured by both land and boat parties, but with no other result than the discovery of three more skeletons of murdered men in the neighbourhood of Louisa River. Descriptions of these remains will be found in annexure $\mathbb{N}$ o. 2.

Both boats returned to the slip at Dunk Island on the 22nd instant, and the watering baving been completed, after consulting with Mr. Johnstone and the volunteers on board, I arrived, with no little reluctance, at the painful conclusion that the further prosecution of our scarch would be merely waste of time, as no hopes could now be entertained of the existence of a single survivor from the wreck.

Under these circumstances, I decided to return at onee to Cardwell.
On arrival there, we embarked the remainder of the shipwrecked party (twenty-six in number), and started for Sydney on the afternoon of the same day (Saturday, 23rd instant).

The doctor of the New Guinea Prospecting Expedition, whom I had taken on board the "Governor Blackall" on our first arrival at Cardwell, here left the ship; consequently it fell to my duty during the roturn passage to attend to the sick, so far as my medical knowledge, which is but scanty, permitted me.

I am happy to be able to state that no casualties or accidents of any lind have occurred during the trip, and that the sick and wounded are in a fair way of recovery.

The "Governor Blackall" arived in Sydney on the 28th March.

1. annex by way of appendices-

No. 1. Ylan of the coast of Queensland, from Tam O'Shanter Point to Point Cooper, showing the positions of the rafts drifted on shore, and the spots where the murdered bodies of some of her crew were found by the "Governor Blackall."
No. 2. Description of remains found during search of coast.
No. 3. Report of Mr. Johnstone, Sub-inspector of Native Police.
No. 4. Jist of crew of "Maria" on learing Sydney, showing the numbers rescued, murdered, and drowned.
No. $\overline{5}$. List of articles of clothing found with remains of bodies and in native camps.
Before concluding my report, I may perhaps be permitted to invite attention to a few observations, which, though only collateral to the object of my mission, are yet closely connected with this most melancholy shipwreck and loss of life.

In the first placo then, I would desire to allude to the fact, as I have alroady done on a former occasion, that in this, as in the instance alluded to, the cause of disaster is clearly traccable to the culpable ignorance of navigation evinced by the master of the lost vessel. He took his ship to sea, as it appears by the testimony of the survivors, almost destitute of charts or proper appliances for navigation. Blown away by a gale of wind when almost within sight of Now Guinea, his vessel is allowed to drift-for I cannot say that she is piloted--among the most dangerous reefs of the Coral Sea. Her position before striking the Bramble Reef appears to have been altogether unknown to her Captain, or indeed to any of his officers, although in fact both Palm and Hinchinbrook Islands were plainly visible from the wreck. And this is not all: for after his ship has struck, he takes the best boat, and with a crew only of six, when twenty-five might have been safely carried in her, he deserts, leaving the rest of the passengers and crew to perish or not as Providence might ordain.

It is with great pain that I feel myself constrained to record this opinion of one who has, alas ! expiated his crrors by a violent death at the hands of the sarages of Tam O'Shanter Point.

The next circumstance connected with the wreck, which I cannot pass over without noticing, is, that the boats and their crevs abandoned the rafts to their fate, instead of, as is invariably the rule in such cases, kecping in their company, and towing them when practicable.

The necessity of boats remaining by rafts on occasions like this cannot be urged too emphatically.
It is not too much to say that all hands might have been saved from the wreck of the "Maria," had this well recognized course been adopted.

It must always be a subject of the deepest regret that the search of the "Tinonee" was not extended north of Double Point, for it is now ascertained that at least five of the shipwrecked crew were alive, and wandering along the beach, within a few miles of Double Point, at the very time when that steamer was on the const engaged in the search.

Lastly, I desire to acknowledge the obligations I. feel under to those gentlemen who accompanied me on this expedition as volunteers. Their willing subordination to discipline, and cheerful readiness to undertake any duty or undergo any fatigue, ashore or afloat, by day or by night, are deserving of the highest praise. The assistance rendered to the searching parties by Mr. Johnstone and his detachment of Native Police was, from his accurate knowledge of the habits of the natives, and his professional skill, of inestimable value to the Expedition; and in Lieutenant Jones, of H.M.S. "Basilisk," whose services had been lent for the purposes of our search by Captain Moresby, I found a most efficient and trustworthy coadjutor. In my absence that gentleman fulfilled very responsible duties whilst in charge of manned and armed boats of police and volunteers, and carried out my instructions with discretion and ability.

The crew of the Water Police boat, and the hastily shipped complement of hands required for working the ship and manning the boats, have also conducted themselves entirely to my satisfaction.

I have, dec.,
JNO. T. GOWLLAND.

## [Annexure No. 2.]

A Description of the bodies found by the "Governor Blackall," supposed to have come on elore on the second raft.
Corpse A was that of a young man about middle height, hair medium brown, two double tectle were wanting on the right side of the lower jaw, and one on the left side. One incisor on the left upper jaw decayed; the body was a perfect skeleton, although probably not dead a fortnight. Tho poor fellow had cridently landed from the raft much exhausted, and crawled a little way along the beach looking for food. His remains were found about a quarter of a mile north of the raft, lying out of reach of the sca, with a sailor's monkey jacket doubled up under his bead for a pillow, und from sleep he seems to have passed calmly into death. A black and yellow striped shirt, tweed trousers, and a paiy of coarse cotton socks, were taken off the skeleton for identification by friends. Most of the surviving shipmates are of opinion that this is the remains of Hooker or Ifardy.

Corpse 13.-That of a tall man, but the body was beyond identification, being divided into three separate parts, and washing about in the scawced. The head or skull and one arm adhoring togethor. legs separated at the lower vertebre of the spine forming another portion, and the trunk by itself.

Corpse.C.-A tall man with brown beard; nothing but the bones left. From the fact that the bones of the arms were missing, it was surmised that part of him had been eaten. Head smashed in by blows of a stone or club.

Corpse D.-A man of middle height, with good tecthl, skull small and well formed, whiskers red ; the body was perfectly naked, except a small piece of weed trouscr tied round the foot by a piece of shoe-leather to protect it from the slarp jugged rocks, along which lee was travelling south; the whole of the right side of tho head was smashed in by a large stone which was found lying close to the body. It would seem from the posture of the body that he had been suddenly alarmed by the blacks, and whilc endeavouring to get into the bush for sheltor, had receired his death blow whilst clambering up a little rocky gorge, as the appearance and position of the limbs are those of a person in the act of climbing. The corpse was well kept, and could not have lain there more than five or six days. It is undoubtedly that of poor Parnell.

Corpse E.-A tall man, with a long brown beard. Body perfectly muked, the whole of the front part of the face completely broken in beyond identification. Supposed by the beard to be Rowe or Thompson. A jair of nearly new colonial. made blucher boots were found near the body.

Corpse F was Williams, discovered by H.M.S. "Basilisk": murdered by blows from a wooden sword; the whole of the
位 back of his head having been dashed to pieces.

Corpses $G$ and $H$.-Found on the beach on the south side of a stream 25 miles from Cardwell. The poor fellows seem to have reached so far in safoty, and were barbarously murdered just after swimming ono of the numerous small rivers running through the beach into the sea; in both cases the front of the faco was dashed in, is if from the blow of a stone or club. These bodies are supposed to be those of Polin and 0 'Mally, and had apparently been killed only about eight or nine days.

Corpse I.-Found further south than the two last; was murdered in the same brutal manner. The body could not be recognized.

In addition to these, the burnt bones of what are supposed to have been the Captain and his two mon were found in a large native camp near Tam O'Shanter Yoint.

A quantity of wearing apparel, seized in the blacks' camp, and taken from of the bodies of the corpses found, are under charge of Sergeant Little of the Water Police, and may be scen by friends wishing to identify the bodies.

All the corpses, from a to Fi, were found between Shoal Rivulet and Shoal River, ati intervals of distance of from half to one mile apart, lying on the sandy beaches or rugged rocks fringing the coast line; and it would appear they were making their wny south separatcly, when they were overtaken or surprised by the blacks; so that there secms to have been a want of unamimity of purpose and action amongst those poor fellows as to their proceedings.

The remaining bodies-G, $H$, and $I$-werc found ten and twelve miles further south, or about twenty-five miles from Cardwell, having only escaped the fate of their companions from the tribe north of Double Point, to fall under the murderous blows of the same savages who killed and burnt the Captain and his men near Tam O'Shanter Point.
> [Annexure No. 3.]
> Sub-Inspector Johnstonc to Captain Gowlland.

Ship "Governor Blackall,"
22 March, 1872.
Sir,
I have the honor to report, for the information of Captuin Gowlland, that aecording to instructions, I , with the assistance of the detachment of Native Police under my command, have carefully scarched the country extending from Cardwell northwards to Cooper's Point, and am thoroughly convinced that there are no traces of any white mon living either on the coast or inland; and, from facts of having found the bodies of the missing men except two, all brutally murdered by the blacks, there does not exist the slightest doubt that the two men now missing are either drowned off the raft or murdered by blacks. I have also to state that I have severely punished the guilty parties, having found the property of the murdered men in their possession.

I have also to state that any further instructions you may wish me to carry out, I place mysolf and detachment entirely under your orders.

I have, de.,
ROBERT JOHNSTONE,
Sub-inspector of Police.

## [Anneaure No. 4.]

List of Crew of Maris on leaving Sydney, showing the numbers rescued, murdered, nad drowned :-
Pnssengers to Sydney by "Governor Blackall": Somichsen, Chalon, Wright, Good, Forster, Coyle, Bardon, Schwelfing, Konig, Fox, King, Robinson, Siddle, ILaydon, Phillips, Ingham, Crommelin, Dicksman, Powell, Misdell, Smith, Nilson, Sullivan, Finnie, Lane, Pegus, Le Fin, Hocrnft, Barclay, Grey, Broadbent, Arps, Maag, and Wallen.

Drowned on wrect :-Andrew, Repran, Crout, Crook, Shewell, Bolton, Zimmerman, Coburn, Arkley, Stewart, Wceham, and Coot.

Killed by blacks:-Davis, Stratham, Paracll, Polin, O'Malley, Hardy, Williams, Dalgleish, Thompson, Heakman, Hooker, Rowe, Solonion, und Angel.

Drowned off rafts and otherwise:-Morris, Sanderson, Tanner, Hazlebrook, Trenchard, Grant, Taylor, Anderson, Roden.

Teft at Cardwell :- Hess, Goble, Ramsay, Tate.
Left Cardwell for Sydney :-Hargrave and Hyman.

## [Annexure No. 5.]

List of articles found near and upon bodies lying murdered on the shore between Point Coopor and Tam O'Shanter Point, and also in blacks' camps :-
One pair of stout blucher boots, with large-headed nails on soles, and iron hecls, not much worn; one leather sheath for belt-knife; two portions (small) of dark small-stripe tweed trowsers, one portion-evidently a part of waistband-found near one body lying on the shore a little to the north of the Shoal Faven River.

Corpse Ji.-Ono pair blucher boots, pegged and strong, littlo worn and apparently colonial male-a leather boot-tie still remaining in one; one portion of waist of trowsers, light materisl; and light drab gpotty-looking colour; brass buttons, stamped "Exton, Sydney"; one portion of lieavy doeskin troweers, dark dull red or chocolate nolour, double stripe pattern-the frag.
ment is from the left side front; one piece of dark waterproof cloth, black and white in very fine spots; one arm (torn open) of crimean shirt, light colour, all-wool material, largo open square or cross pattern. All these brought on board at Dunl Island.

Corpse A.-Fragments of a crimenn shirt, thin mixed materin, large open black cross pattern, with smaller crosses of much lighter colour running between; three or four parl buttons of usual size; calico lining in porlions; one torn pair of trowsers, dark heavy tweed, with much darler stripes down sides of legs, calico poekets and lining, common brass buttons with bar through middle, three small leuther straps through which to pass belt-cridently worn by tall man-said to have belonged to Hardy.

Corpse B.-One black cloth sac coat, much torn, silesia stuff for pockets, alpaca and corrse canvas both used for lining, small cloth button-apparently worn by fair-sized man.

Corpse A.-One very dark, very heary cloth (like kind of finmel) rerersible coat, elged with common black binding, on one-face common black bone buttons, on the other large cloth buttons. Three pockets on each face, one on one side and two on the other, and in the ordinary position. All these brought on bonrd by Captain Gowlland, as result of his first day's scarch.

One tall Califorminn felt hat, edged with common binding, no band or lining, blood-stnined, and supposed to belong to Rowe; brought from blacks' camp, two or three miles up Shoal Rirulet. One rather small canvas sheath for belt-knife, found on amall beach between the rivers.

One picee $1 \frac{t}{2}$-inch Europe nary-rope; whon found, two fathoms long, now cut down-to onc fathom; found at blacks ${ }^{2}$ camp, four miles up Shoal Rivulet.

One belt-pouch of Russia-leather, nicoly made, with red morocco lining, two compartments, ornamented romnd, copper button, apparently silver-gilt, small piece of fig-twist tobacco inside; one miner's right, Province of Aucklnud, issued to name of John Crooks ; found at native camp a little to north of Tam O'Shanter Point.

## [Annexure No. 6.]

List of articles found at blacks' camp, near Tam O'Shanter's Point, where Captain and party were attacked by blacks-received from the Police at Cardwell :-
One leg of hoavy dark tweed trowsers, two flaps of waistcoat to match, one large light-coloured neckerchief, one tall greenish drab Oalifornian felt hat with binding round edge, no lining or band-all claimed by Wilson.

One tall dark brown Californian felt hat, with broad binding and band, and leather lining for head; one large piece of rart chocolate coloured oilskin cont; one crimean shirt, light blue, with broad black stripe on outside only, left breast corered aud right breast spotted witlı blood-staius; one stall cap box; one piece German tinder-said by Wilson and Sullivan to be property of Davis.

One portion of very dark with dark stripe pattern trowsers, heavy stuff; one double-blnded buckhorn handled knife, one side gone, lashed together by blacks-suid by Wilson and Sullivan to have been Captain's property.

Three pieces of bluc woollon coat, formerly Naral Brigade jumper; one recolver case--claimed by Sullivan.
Two calico cap-covers ; one side of brass watch cese-said by Wilson and Sulliran to have been the property of Solomon.
One lid of tin billy-said to lave been the property of Siddel.
One pair of light blankets-claimed for Oscar Wailen.
One common colton red pocket handkerchicf, with white ring pattern and white varicgated border; one gen stock, fowling piece-property of Siddcl, but given in clarge to Solomon.

T'wo five-chambered revolvers--one said to have been proporty of Davis, the other elaimed by Wilson.
One large leather belt pouch, common make, two compartments-claimed by Wilson and Sullivam.
One portion of leather revolver case, burnt.

No. 2.
The Attornet Generat to Lieutenant Gowiland.
Attorney General's Office,
Sydney, 2 April, 1872.
Sir,
In acknowledging the receipt of your report of the proceedings of the Expedition, ordered on the 9 th ultimo by this Government to start under your command in search of the survivors of the New Guinea Prospecting Expedition, I have much pleasure in conveying to you the thanks of my colleagues and myself for the prompt and efficient manner in which the duty undertaken by you was carried out. I have at the same time to request that you will convey to the volunteers who at so short a notice accompanied you, and by their observance of discipline contributed towards the success of the expedition, as well as to the other persous engaged in it, our sense of the importance of their services. Tho rapidity with which the "Governor Blackall" was manned, victualled, and coaled, and the short period occupied in the voyage to and from the locality of the wreck, and in the complete search which you appear to have made, are in overy way satisfactory.

I have, \&c.,
JAMES MARTIN.
No. 3.
Liedtenant Gowliand, to The Attorney Generad.
Sydney, 9 April, 1872.
Sin,
With reference to the statement in my report of the 29th ultimo, conseyed in the following words-" that northward of Cape Cooper the coast line had been very carefully searched by boat parties of H.M.S. 'Basilisk,' but to the southward the coast had only been cursorily examined, ${ }^{\text {', -I }}$ beg to be permitted, at the request of Captain Moresby, to correct what he assures me to be a misconception on my part of the character and extent of the search instituted by his boat parties. Having since learnt from that gentleman that the coast south of Cape Cooper had also becn very carcfully and minutely examined by his searching parties, prior to the arrival of the "Governor Blackall," I cm only express my great regret at the unintentional error.
$I$ have, \&c.,
TNO. T. GOWJLAND.

## Legislative Assembly.

## NEW SOUTH WALES.

# DAMS ON LINE OF ROAD TO RIVERINA. 

IPETITION FOR CONSTRUCTION OF-STOCKOWNERS, DROVERS, AND OTIITR IEESIDENTS OF MURRUMBIDGER AND LAGHLAN DISTRICTS.)

Ordered by the Legislative Assembly to be printed, 2 July, 1872.

To the Honorable the Legislative Assembly of New South Wales.
The humble Petition of the undersigned Stockowners, Drovers, and other Residents of the Murrumbidgee and Lachlan Districts,-
Showetil:-
That a large and increasing traffic in stock exists between the Northern Districts of New South Wales and Queensland and the District known as Riverina and Victoria, the fullest development of which it is of the utmost importance to the pastoral interests of the Colony in every way to encourage.

That the main thoroughfare for such traffic is the line of road from the Bland to Wagga and Junee and Wallace Town ; not less than an average of 20,000 head of cattle and 300,000 sheep passing annually by that route, either for delivery as store stock to Riverina and Victoria, or for sale in the southern markets.

That for a distance of at least forty-five miles on the said road before reaching Junee, there is in ordinary seasous no permanent public water supply; while in seasons of drought, the extent of absolutely waterless country to be passed through is not less than from sixty to seventy miles.

That in consequence great suffering and loss are eutailed upon travelling stock, which, through want of water, are compelled not only to travel enormous distances daily, but even then, in many instances, either to trespass upon private property or to perish from thirst.

That a similar evil exists on the road from Cootamundra to Junee, which besides being the main line of an extensive stock traffic, is much used by teamsters and carricrs from Syduey and Goulburn, and, were a better water supply available, would uudoubtedly supersede the longer and more difficult route viá Gundagai, to the manifest advantage of the trade of Syduey with Riveriun.

That the owners of property, whether squatters or selectors, on both these lines of road, are heavily taxed, and much harassed and annoyed, by the constant inroads upon their private dans by travelling stock, famished for want of water and unable to proceed without it. These demands can hardly be resisted, and where they have been, they have sometimes been enforced with violence, thus leading to litigation, and in some cases to actual collision.

That the erection of four dams-one at Coman's Station, Combaning, where there are springs that would atrays ensure a good supply-one near Hurley's Station, Houlaghan's Creek-one at Junee, where thesc two roads meet-aud one at Wallace Town-ali distant from each other about twelve or fifteen miles, would in a great measure afford the relief desired; that the cost would be trifling (not exceeding for the four dams $£ 1,000$ ), and the benefit to the great and growing stock trade, not of this district only but of the country generally, incalculable.

That the dams should be commenced at once, so as to be completed in time to catch the rains of the coming winter, when a vast quantity of water that would otherwise run to waste may be stored for use in the following summer.

Your Petitioners, therefore, pray that your Honorable House will take such steps as may result in the immediate erection of the four dams proposed.

And your Petitioners, as in duty bound, will ever pray.

## Legislative Assembly.

# CROOKHAVEN CREEK. <br> (PETITION RELATIVE TO CLEARING BED OF-INHABITANTS OF SHOALHAVEN DISTRICT.) 

Ordered by the Legislative Assembly to be printed, 12 July, 1872.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.
The humble Petition of the undermentioned inhabitants of the Shoalhaven District,--

## Showeth:-

That your Petitioners earnestly desire to draw the serious attention of your Honorable House to the dangerous state of the bed of the Crookhaven Creck, and, in the event of another flood, not only to the direct and often irreparable injuries that would be sustained by landholders along the track of the flood and within the range of its overflow, but also to the indirect losses inflicted on the whole district by their impoverishment and ruin.

That not merely the recurrence of these floods, but the apprehension of their coming tends most materially to check the development of the unrivalled agricultural capabilities of the district, and thus cripple progress and enterprise in every direction.

That your Petitioners are of opinion that floods might be almost, if not altogether, prevented by clearing out and deepening the bed of the Crookhaven Creek, which is the natural outliet to the overflow of the Shoalhaven River; but which now, so far from acting as such outlet to hurry off the flood-water, delays and holds it back on account of the way it is choked up with logs and fallen trees, which have become most effectual in forming barricades and sandbars in many parts of the creek,-thus spreading the overflow of the Shoalhaven River over the whole country around; thus also permanently raising its level, and with it the level of every successive flood which has visited us.

That your Petitioners would especially draw the attention of your Honorable House to the accumulation of logs and fallen trees on Mr. Elyard's frontage, and to the absolute necessity there is cither to have them removed, or to compel him to remove them ; and although, notwithstanding the large sums of money expended by Mr. Berry in taking out the obstructions along his frontage, many sunken trees still remain to bo removed, it is as nothing compared with the clearing out which the creck wants from Flyard's
Bridge towards Terrara.

That your Petitioners feel sure it would be comparatively speaking easy and inexpensive, by means of the Dredge stationed here and provided with all necessary tackle (ncver uscd), so far to deepen and widen the channel of the creck that not only would the flood-water be carried off quickly, without lodging on the ground and without flowing over our fences and houses, but small craft would be able now as formerly, when no obstructions existed, to come up the creek, and thus reduce the heary charges we have to meet for the conveyance of our corn and produce to market.

That your Petitioners unhesitatingly affirm that but one reason can be given why the Crookhaven Creek should not be clearce out thoroughly and deepened, and that is, that we are never going to have another flood in the district; for so surely as it comes must it as a matter of course repeat and therefore aggravate the disasters already occasioned.

For these reasons, which are but some of the reasons that conld be given by your Petitioners, they pray that such stcps may be taken as your Honorable House may deem most effective for clearing out and deepening the creek in question, and thus not only preventing in time the disasters to which wo are subject, but augmenting the general prospexity of the district, and cossuring its permanence.

And your Petitioners, as in duty bound, will every pray.

$1392$

# WOLLOMBA RIVER. <br> (PETITION RELATIVE TO NAYIGATION-CERTAIN RESIDENTS OF WOLLOMBA RIVER.) 

Ordered by the Legislative Assembly to be printed, 2 August, 1872.

To the Legislative Assembly of Now South Wales, in Parliament assembled.
The Petition of the Residents of the Wollomba River,-

## Humbiy Showetit:-

That we, the settlers on the abovenamed river (which forms the southern boundary of the Hastings Electorate), suffer much inconvenience owing to the narigation being impeded by shoals, which render it impossible for any description of vessel from coming up the river, with the exception of flatbottomed punts, and these only during the season of spring tides.

That owing to this your Petitioners experience great difficulty in sending their produce to Sydney, and that much good brush land at present lies idle which would be otherwise brought into a state of cultivation.

That on the banks of the upper part of the abovenamed river there is an abundance of useful timber for building purposes, which, were navigation practicable, could be easily remored, and that the reverue which the timber licenses alone would bring in would in a short time almost pay for the outlay necessary to remove the above-mentioned shoals, two of which exist.

Tour Petitioners therefore pray that your Honorable House will tako the foregoing facts into consideration, and grant your Petitioners such rclief in the premises as your Honorable House may deem just.

And your Petitioners, as in duty bound, will ever pray.

1394

# SALE OF COLONIAL WINES REGULATION ACT. (PETITIOY FOR REPEAL OF-RESIDENTS OR AJBERY aND SERROUNDING DISTRICTS.) 

Ordered by the Legislative Assembly to be printed, 29 July, 1872.

To the Honorable the Members of the Legislative Assembly of New South Wales.
The Petition of the undersigned Residents of Albury and the surrounding Districts,-

## Humbit Showeth: -

That under the "Sale of Colonial Wines Regulation Act" any person can obtain a license to sell, by retail, wine, cider, or perry, not to be consumed in the house, shop, or store, or on the premises where sold, by paying annually one pound license fee; but that, before a license can be granted under the "Licensed Publicans' Act," notice has to be given, and police inquiries made as to the character of the person applying for such license.

That this Act is greatly abused, inasmuch as the greater number of persons who take out licenses thereunder sell brandy and other spirits which are deleterious and of bad quality, to the loss and injury of the duly licensed publican, and against public morality.

That, under the "Licensed Publicans' Act," a proper police supervision is maintained over all licensed public-houses, but that the persons taking out wine licenses are so scattered over the country districts that it is a matter of impossibility-even were provision made by the "Sale of Colonial Wines Regulation Act"--to maintain a due police supervision over them.

That the licensed publican pays annually a license-fee of thirty pounds, and is obliged to provide a certain number of rooms for the accommodation of travellers, besides stabling; and your Petitioners are aware that the houses to which wine licenses are granted are, to a very large extent, made use of as accommodation-houses, and that a great increase of drunkenness and crime is the result.

Your Petitioners would therefore pray that your Honorable House would be pleased to cause the said Act (the "Sale of Colonial Wines Regulation Act") to be repealed, or that you would grant such other relief as to your Honorable House may seem meet.

And your Petitioners will ever pray, \&c.

# BOAT-HARBOUR AT RAYMOND TERRACE. 

No. 1.
R. Wisdom, Esq., M.L.A., to The Secretary for Public Works.

Sydney, 22 November, 1865.
I do myself the honor to request that you will cause to be placed on the Supplementary Estimates for next year a sum of money for the construction of a boat-harbour at Raymond Terrace. This is a work urgently required.

Kaymond Terrace, as you are doubtless aware, is situated at the junction of the Williams and Hunter, and is the market town for the settlers residing for miles both above and below the junction of those rivers. Nearly all the settlers living on the banks of the river carry their produce to market in boats, numbers of which are to be daily seen at Raymond Terrace fastened to the wharfs, dc. The steamer traffic on the Hunter is very great,-two, three, four, and sometimes a greater number of steamers passing Raymond Terrace daily. The boats of the settlers being exposed to the wash of these steamers are frequently injured, and it is for the purpose of protecting them against such injuries that a boat-harbour is asked for. I may state that since the inauguration of Responsible Government no money, with the exception of some small sums for the minor roads, has been expended by the Government on public works in the Raymond Terrace District. The people of this district have participated neither in the expenditure on railways or telegraphs, nor hare any public buildings been erected in the town or district. Notwith. standing the large traffic by steamers and sailing-vessels they have not even had a wharf erected at the public expense, the wharfs in use being all private property. Under thesc circumstances they consider they have a claim on the Government for the expenditure asked for, a claim, the justice of which, now that it has been prominently brought under your notice, I trust you will have no difficulty in recognizing.

In conclusion, I may be permitted to suggest that the most suitable site for the required boatharbour would be just above Portus's Mill, where there is a place naturally adapted for the purpose, and which might be speedily made arailable with but a comparatively small expenditure of money. From $£ 200$ to $£ 250$ would be amply sufficient. In my own opinion a less sum than the smaller of these amounts would complete the required work.

I have, \&c.,
ROBERT WISDOM.

## No. 2.

The Sechetary for Public Works to The Eingineer-in-Chief for Harbours and Rryers. Ergineer-in-Chief for Harbours and Rivers.
T. W. SMART, 22 Nor., $186 \overline{5}$.

No. 3.
Report of tife Engineer-in-Citef for Harbours and Rivers.
Herewirf I beg to enclose a plan of part of the bank of the Hunter River at Raymond Terrace, to the eastward of the Punt Jetty, where a small stone barrier, sufficient to afford shelter to boats, might be constructed at a trifling cost and without injury to the river. The probable cost of this work I estimate at about $£ 200$, which may, perbaps, be charged to the vote for making improvements to the navigation of the River Hunter and to the Ports of Neweastle and Morpeth-Loan Act, 19 Vic., No. 40 -creditit
balance over $£ 2,300$.
E. O. Moriarty.

## No. 4.

The Secretary for Public Works to The Engineer-in-Chief for Hallaours and Rivers. Does Mr. Moriarty recommend the construction of the harbour ; and will it be an improvement to the locality? If so, this sum can be placed on the next Estimates.
T. W. SMART, $15 / 1 / 66$.

No. 5.
The Engineer-nn-Chief for Harbours and Rivers, in reply.
I thise the boat-harbour may be formed in the manner $I$ have proposed without injury to the general navigation of the river, its peculiar shape having been designed with that view; but I am quite unable to say (not having much knowledge of the requirements of the township in this respect) whether such io
work is necessary.
E. O. MORIARTY, $22 / 1 / 66$.

No. 6.
The Secretary for Pubuic Woris to Tite Evgineer-in-Chlef for Harbouns and Rivere. Is there any necessity for this work?
J. BYRNES, 25/1/60.

## No. 7.

The Evonteer-n-Cifief for Hardours and Rivers, forwarding Repotit of Mu. Anderson on gite, \&c. Os making inquiry I find a good deal of produce is landed at the Terrace in boats by the farmers and settlers, for shipment to Syduey, and there being no protection at present for these boats they often get damaged by the wash on the bank of the river, caused by heavy gales of wind, which frequently occur, and also from the wash caused by the large steamers in passing.

I am of opinion that a place, protected by a dyke of stone ballast, immediately below the Ferry, will be all that is necessary to be done, and that it will not interfere with the navigation; such as is shown on your sketch is what is wanted, it being the only place I can see for making sufficient accommodation.

WM. ANDERSON, $10 / 3 / 66$.

> No. 8.
> Messrs. Portes and Fraser to The Secretary for Pubicic Works. Raymond Terrace,
> 12 November, 1866.

Sne,
We, the undersigned, beivg the only proprietors of land with river-frontage on the north and south sides of Sir Richard Bourke st. (in this town) and with frontage respectively of (250) two hundred and fifty and (200) two hundred feet to that strect towards. King-street, having been given to nuderstand that the Government would choose the site at the termination of Sir Richard Bourke street for the formation of a boat-harbour, provided they were indemnified from any claim for compensation by the parties in said street affected in said work,-we hereby agree, that provided a roadway of (22) twenty-two feet upon each side of the said boat-harbour is left to us for access from and to our properties, we will forego any claim that we may have, or suppose to have, now, or at any time hereafter, in the event of the said work boing effected at the site indicated.

HENRY D. PORTUS.
STMON FRASER.

> No. 9 : Perition of Messms. Roberts, Barry, Fountain, anid Feawick.

The Honorable Tames Byrnes, Esq., M.P., Minister for Works,Sir,

We the undersigued proprietors of land, with frontage to Sir Richard Bourke street, Raymond Terrace, and residents in said street, extending back to Sturgeon-street, having been given to understand that the Goverument some time since contemplated the granting of a sum of money for the formation of a boat-harbour at Raymond Terrace, and the open space fronting the River Hunter, at the termination of said street, having been named as the most suitable site for the same, but doubts being raised as to the probability of residents in said street objecting to the said work being cffected therein, and demanding compensation therefor,-we hereby agree to forego any claim we may be supposed to possess, for compensation now, or at any time hercafter, in the event of the said work being effected at the site indicated;' and furthermore, would wish to record our opinion, that the said place is the most suitable one to be found at Raymond l'errace, having the advantage of a width of road of $1 \frac{1}{2}$ chain, and bcing the most convenient and easily accessible for scttlers on both the Hunter and Williams Rivers, besides being as sheltered a situation during any weather as it is possible to obtain in the Town, and having the further advantage of being already partially formed by nature.

```
ROBERT JACOB, Agent for Mrs. Roberts.
JOHN BARRX.
HENRY FOUNTAIN. JOHN RIDDELL FENTICK.
```

Henry D. Portus, for frontage 74 feet east of King-street, subject to reservation in document relative to river-frontage.

No. 10.
The Under Secretary for Public Woris to R. Wisdom, Esq., Ml.La. Department of Public Works, Sydney, 14 December, 1866.
Sin,
I am directed to acknowledge the receipt of certain communication presented by you from the inhabitants of Raymond Terrace on the subject noted hereunder, and to inform you that it will receive due attention.

## I have, \&c., <br> GERALD HALLIGAN, <br> For the Under Secretary.

Subject:-Relative to the formation of a boat-harbour at Raymond Terrace.

## No. 11.

The Engineer-nx-Chief for Harbotrs and Riters to The Uxder Secretary for Pubjic Works Sixe selected by Mr. Anderson is now favourably reported on by Mr. Darley; to be adopted.
E. O. MORIARTY, 30 August, 1867.

# [Enclosure.] <br> Mr. Darlcy to the Engineer-in-Chief for Harbours and Rivers. 

Neweastle, 28 August, 1867.
Sir,
In accordance with your minute of the 21st instant, I examined the two sites proposed for a boat-harbour at Raymond T'errace, and beg to report, that in my opinion the position proposed by Mr. Anderson is in every way the moat suitable.

The objections to that proposed by the Petitioners are the following, viz.:-
Firstly. The ground for some distance round is very lon; and subject to be flooded by rery ordinary fioods; also, by the king tides.
Secondly. At low water it dries out completely, learing no room to construct a dyke between low-water-mark and the steamers' channel, as the depth increases suddenly from 1 foot to 17 feet 6 inches ( $1^{\prime} 6^{\prime \prime}$.)
Thirdly. A considerable quantity of excavation should be undertaken to make it of any use. With the above objections it needs no further consideration.
The site proposed by Mr. Anderson is more central; also, there is sufficient water to make it arailable in any stato of the tide ; and the ballast-dybe would not in any way interlere with the river channel.

I have, sc.,
CECIL DARLEY.

## No. 12.

The Onder Sectetary for Public Works to The Engenter-ty-Chitef for Harbotrs and Riverg. The sum of $£ 300$ on the General Estimates for 1868, for " boat-harbour, Raymond Terrace," was negatived by the Assembly last night.

Mr. Moriarty, for information.

## Approved.

न. BYRNES, 29/3/71.

Mr. Darley to Tho Engineer-in-Chief for Harbours and Rivers.
Harbours and Rivers Office, Newcastle, 24 March, 1871.
SIr,
I hare the honor to transmit herewith a plan, estimate, and specification for the proposed boat-harbour at Raymond Terrace. When making out the drawing I was under the impression that the amount roted was $£ 300$, but since, learning that it was only $£ 200$, I have been obliged to cexclade the bank, retaining-wall, and excavation, to obtain 18 feet depth at low-water. The dyke can be made arailable for landing on at all states of the tide by connecting it to the shore with a plank.

My estimate for the entire work is \&199 14s. 3d., being just cut within the amount available.
I have, \&c.,
CECLL DARLEY.

Estrmate.--Cost of boat-harbour, Raymond Terrace.

For the Under Secretary.

No. 26.
A. H. Jacob, Esq., M.L.A., to The Under Secretary for Public Woris.

Raymond Terrace,
27 March, 1872.
Sir,
With reference to the letter from your Department of 25 th instant, furnishing report of the Engincer-in-Chief for Harbours, relative to a boat-harbour here, by which it scems the vote for it was allowed to lapse, in consequence of the work "being considered by many persons to bo unnecessary,"-I have the honor to say that instead of such being the case, the harbour is very much required for the use of numerous settlers on the Rivers Hunter and Williams, and would be of great benefit to them; and I have good reason for believing that the adverse opinion as to the work being neccssary was instigated by two or three residents here, each of whom desired the harbour near his property, who and whose friends, rather than forego individual advantage, preferred that the persons really interested should not have the accommodation.

I presume the best way to arrive at all the communications on the subject will be by obtaining a return thereof in Parliament.

In the meanwhile I beg to urge that steps should be taken to have the sum which has lapsed placed on the Estimates again.

I have, \&c.,
ARCHD. JACOB.
No. 27.

ON THE

## BATHURST GAS BILL.

FRIDAY, 21 JUNE, 1872.
鲃resent:-
Me. allen,
Mr. BaWDen,
Mr. LUCAS.
GEORGE WIGRAM ALLEN, Esq., in the Chatr.
Mr. W. Teale appeared as Solicitor for the Bill.
Mr. John Newlands Wark called in and examined :-

1. Afr. Meale.] You have heard read the report of the cridence given by you before the Committee on this Mr. J. . . Bill last Session-is it correct? Yes, it is in accordance with the cvidence as given by me. stated there in connection with the Company is done away with, in consequence of the Committee striking 21 Junc, 1878. it out; it no longer forms any part of the understanding to form a Company, without another Act. I would also say that everything I have stated in reference to the erection of the works, the anticipated arrival of goods, and all that, has been carried out. Goods that did not arrive we purchased, but the principal part did arrive. The works are now erected, and the town is so far lighted with gas.
2. The Select Committee, on the previous occasion, objected to that portion of the Bill that referred to the transfer of the works to a Company? They did.
3. And the Bill now introduced is drawn in accordance with the recommendation of the Committee? Yes.
4. And contains none of the clauses formerly objected to? None.
5. Chairman.] The Bill now before us is an exact copy of the Bill approved of by the Select Committee last Session? Yes.

THE SELECT COMMITTEE
on the

## PARRAMATTA GAS COMPANY'S BILL.

$T H U R S D A Y, 20 J U N E, 1872$.

|  | Z3resent:- |
| :--- | :--- |
| Mr. FARNELL, | Mr. TEECE, |
| Mr. GRAHAME, | Mr. W.C. BROWNE. |

The Honorable James squire farnell, Esq., in the Chair.

Mr. J. E. Bowden appeared as Solicitor for the Bill.
Rer. Ralph Mansfield called in and examined :-

1. Mrr. Bowden.] You are still Chairman of the Parramatta Gas Company? 1 am.
2. Will you look at the evidence given by you on the 12th December last;-is that a correct statement? Quite correct. I have read it all over
3. The same circumstauces exist now as existed then? They do, except that more capital has been laid out, more improvements hare been made, and the purchase of the land has been completed, I think, since 20 June, 1872 . then, and the legal title to it settled.
4. Have the Company made any progress with their works? Very considerable. We have actually expended in money for pipes, $£ 1,6031.3 \mathrm{~s}$. 4d., and we are under contract besides with P. N. Russell and Co., for main pipes, $£ 2,9159$ s. 10d.; we have contracts for a retaining-wall, $£ 300$-for a tank for the gas-holder, $£ 1,160$-for a retort-house, $£ 685$-for a gas-holder, $£ 300$-and for sixteen iron retorts, at the rate of $£ 1210 \mathrm{~s}$. per ton. The retaining-wall is almost finished.
5. Are the works in progress? Yes, the tank for the gas-holder, and the excavation for the retort-house,
are far advanced. are far advanced.
6. And the Company will be in a position, as soon as this Bill is passed, to lay down the pipes and supply the gas? They will; they are only waiting for the passing of this Act to do it.
7. Do you produce the deed of settlement of the Company? Tes. (Decd produced.)
8. Fou hand in also two printed copies of the deed? Yos. (Handed in.). With refercnce to the mains, perhaps I may venture to observe that authority to excavate for the laying of main pipes through tho streets is the principal object for which we require an Act. But for that, an Act would not in my riew be indispensable though for that purpose it is indispensable; and our operations must stand still until the Bill becomes law.
9. That would be attended with very great public inconvenience? Very great public inconvenience. We have the pipes all ready to lay, and the lines along which they are to be laid, selected and mapped; but we cannot stir with safety till the Legislature gives us power to do it.
10. Chairman.] The town of Parramatta is incorporated? Yes.
11. And there has been no objection on the part of the Municipal Council? Not the least. Sercral of the members of that Council are members of our Board, and I thinls nearly all of them are shareholders.

Rer. R. 12. Has any more of the capital of the Company been paid up since you gare your eridence previously? Mansfield. Fes. At that time we bad only made one call. It was a stipulation that 5 s. per share should be deposited with each applfation. Since then we have made a call of 15 s , to make up a first instalment of $£ 1$; and 20 June, 1872. we have since made a second call of $£ 1$. 30s., therefore, may be considered as having been paid up, and the other 10s, is due on the lst of July next. And more shares have been taken up since. 13. Can you say how many shares are not taken up at present? There are 1,800 shares of $£ 5$ each. The number actually taken up, and on which the deposit has becn paid, and the parties to the application bave signed the deed of settlement, is 1,657 ; the number on which the second call has been paid is 1,577 . Even yesterday 50 more shares were taken up ; so that we may say 1,700 shares have been taken out of 1,500 .
T. E. Bowden, 1esq., Solicitor tor the Bill, examined:-
J.E. Bowden, 14. Chairman. $]$ You gave evidence here on the 12th December, 1871 ? Yes.

Esq. 15. Do you identify the evidence you gave on that occasion? Yes.
16. Is that eridence correct? Perfectly correct

20 June, 1872. 17. Have you anything to add? No.

# MINUTES 0F RVIDENCE 

TAKEN BEFORE

## THE SELECT COMMITTEE

ON THE
AUSTRALIAN MUTUAL FIRE INSURANCE SOCIETY S BILL.

T. K. Bowdens, Esq., appeared as Solicitor for the Promoters of the Bill.

James Hendcrson, Esq., examined:-

1. Mr. Bowden.] What is your office? Mauager of the Australian Mutual Five Insurance Society.
2. That Society has been lately established at Sydney, in the Colony of New South Wales;-bas it not? Yes.

Esq.
27 Junc, 1872.
4. What is the date of that deed? The 24th January, 1872.
5. Have the parties to that deed entered into the covenants referred to, recited in the preamble to this Bill? Yes.
6. Have they corenanted and agreed to be and continue (until dissolved in that behalf therein contained) a Toiut Stock Company under the name, style, and title of the Australian Mutual Fire Insurance Society? Yes.
7. For the purpose of making and effecting insurances on houscs, warchouses, and buildings, and on goods, chattels, and property of all descriptions against loss or damage by or through fire, and genernlly for the propose of carrying on the business called or known as fire insurance, according and subject to the rules, regulations, and provisions contained in that deed of settlement? Yes.
8. Docs that deed of settlemcnt contain provisions for the appropriation of the profits of the Society, after paying interest to the shareholders, at the rate of 8 per cent. upon the paid-up capital, and after such deduction for the formation and replenishment of a reserve fund as by the said indenture is provided, and after providing for other contingencies for the division of profits into two equal shares or moicties, the one to be divided among the insurers of the Society in proportion to the premiums paid by them respectively to the Socicty during the year last preceding the division of profits, and the other to be divided between and among the sharcholders of the Society in proportion to the uncalled capital on thcir shares respectively? Yes.
9. What was to be the capital as originally provided? $£ 50,000$.
10. In how many shares? 50,000 , of $£ 1$ each.
11. Was there provision for increasing the capital, and to what extent? There is power to increase the capital to the extent of $£ 1,000,000$.

153-B
J. Honderson, 12. At the discretion of the shareholders? Yes.

Esq. 13. Eas the capital since that been increased? Yes, to $£ 100,000$, by the creation of 50,000 shares at $£ \mathrm{l}$
$\rightarrow$ each.
27 June, 1872. 14. Are all these shares taken up? Yes.
15. What amount of cash has been paid upon the whole? $£ 6,250$.
16. How much per share has been paid? 1s. 3d. per share.
17. That money is at present invested at interest? Yes.
18. Is it as much as the Company require? Yes, more than sufficient.
19. The shareholders are liable to pay the additional amount up to $£ 1$ a share, by calls in the manner provided by the deed of settlement? Yes.
20. That $£ 100,000$ is then the guarantee the members have for the payment of their policies, in the event of losses? Yes.
21. Has provision been made by the deed of settlement for the payment of dividends, and for the disposal and application of profits, and for the due management of the affairs of the Society? Yes.
22. Is the Society desirous of being incorporated? Yes.
23. Is it expedient that it should be incorporated? Yes.
24. Subject to the provisions of this Bill? Yes.
25. How many members are there at present in the Company? About 900 .
26. And of these 900 how many are shareholders? 242 .
27. How long has the Society been in business? It commenced operations on the list of February last.
28. What number of policies has it issued since then? 976.
29. Covering about what amount? $£ 462,000$.
30. These policies are held by members? Yes, by participating members.
31. Who participate in the profits? Yes.
32. What amount of premiums has been taken in these five months? £1,520 10 s .5 d .
33. What amount of losses has the Society sustained? $£ 100$ has been paid.
34. Are there any claims for losses unsettled? None.
35. Chairman.] I understand this is a Mutual Insurance Society? Yes.
36. Could you grant policies to the general public? Yes.
37. Without the partics effecting insurances becoming members of the Society? Similarly to tho Mutual Provident Society, persons by effecting insurances and receiving policies become ordinary members, and participate in the profits. According to the deed of settlement the profits would be divided into two parts,-one to go to the original members, or sharcholders, in addition to 8 per cent. upon paid-up capital, and the other to ordinary members.
38. Would the sharcholders become responsible to the insurers? Yes, to the extent of $£ 100,000$.
39. Mr. Mhoses.] Does a person, not being a member of the Society, but insuring property, partake of the same bencfit as a member? By effecting an insurance he becomes an ordinary member.
40. Then a person not a member becomes an equal participator in the profits? Yes, excepting that he does not get the 8 per cent, upon the amount of paid-up capital.
41. Another difference is that the original shareholder is liable, whereas the ordinary member is not liable? Yes.
42. Mr. Bowden.] Every one joining the Society knows that he is to be paid only out of the $£ 100,000$ capital, and the accumulated profits of the Society? Yes, the principle is the same as that in the Mutual Provident Society, with this addition,-that in this Society there is a guarantee of $£ 100,000$, while in the other there is none.
43. Mf. Mfoses.] Op to the present time you have drawn only 1s. 3d. a share $?$ Yes. While upon this point I may mention that I was brought up in the Norrich Union Insurance Company, the branch of which Institution in this Colony I managed for some years. The losses in that, society during the four years preceding my leaving it amounted only to $£ 257 \mathrm{13s}$. 6 d ., and I therefore said to the Directors, "It is useless for us to hamper oursclves with capital we shall not require, and for which we shall have to pay interest; Iet us therefore take only a reasonable amount of capital, and if we should want it, we shall know where to go to for it." During the time I hare mentioned we sent home to England, to the head office, $£ 16,700$. I may mention also that during the four months we have been in existence we hare refused upon proposals for $£ 47,850$-property considered not desirable risks ; and I have no hesitation in saying that trice the amount has been refused over the counter.
44. Is there any limit as to the amount of property you insure? We do not.insure above $£ 2,000$ on one risk.
4.5. What is the greatest amount of risk the Company can incur? There is no limit.
46. Chairman.] If I understand you rightly, the property now insured amounts to $£ 462,000$ ? Yes.
17. Supposing these properties were destroyed by fire, how do you propose to meet the amount? If such a contingency were to arise we could go only as far as the $£ 100,000$ would enable us.
-18. You would have only $£ 100,000$ to pay $£ 462,000$ ? Yes.
49. Alr. Bowden.] Every person when he joins knows that he has only $£ 100,000$ to look to and no more? Yes. In fact erery Insurance Company is liable to the same thing. It is a possibility that has never arisen yet.
i0. Do you, as a matter of fact, know what amount was insured by the Norwich Union? Ninety-eight millions some hundreds of thousands.
51. What was their capital ? $£ 550,000$.
52. There is not the least prolability that such a capital would be insufficient? None whatever, considering the principles upon which the busincss is conducted.

6. The Company is in actual operation now? Tes.
7. What are the conditions of the deed of settlement with regard to the increase of capital? I will read the clause relating to it:-" 93 . A special general meeting, duly convened for that purpose, and held in manner herein provided, shall have full power, subject to the provisions herein contained, to increase the capital of the Company to any amount to be detcrmined by such mecting, and may raise such increased capital by creating an additional number of shares of $£ 1$ each, whether preference shares or otherwise ; and if preference shares, may determine how and in what manner and to what extent the same shall be entitled to priority, and may cause the same shares to be allotited and disposed of (subject to the deed of settlement) in such manner and with such restrictions and upon such terms and conditions as shall be determined on at such meeting. And every person entitled to any share created by any increase of capital, and who shall not have previously so done, shall execute the deed of settlement and be subject to all the provisions thereof, and shall have the same benefits, rights, and privileges, and be subject to the same claims, demands, obligations, and responsibilities in respect there of as if he had been an original shareholder."
8. The whole body of shareholders have to be consulted? Yes.

1426

Mr. G. 9 . What are the conditions under which the power to borrow is created? The clause in the deed is as Merriman. follows :-" 60 . It shall be lawful for the Board of Directors, from time to time as they shall see fit by any resolution to that effect, to authorize the Chairman or Manager, or any two of the Directors, to make, $2 \hbar$ June, 1872 . accept, and endorse bills of exchange or promissory notes on behalf of the Company for any purposes connected with the legitimate affairs and concerns of the Company; and it shall also be lawful for the Board of Directors to procure such advances and borrow and otherwise obtain such mmeys for the benefit and purposes of the Company, upon the security by way of mortgage of the capital, lands, and property of the Company, or by debentures thereof or otherwise, aud at such rate of interest for such time and upon such terms and conditions as the Board of Directors may think advisable; and for that; purpose the trustces are hereby authorized and empowered to convey, assign, assure, and dispose of the property of the Company, or any part or parts thereof, in such manmer as the Board of Directors shall direct or appoint. And the Board of Directors shall have full power to pay off and disclarge out of the capital and profits of the Company, or any part thereof, the sum or sums of money so borrowed, or for which the Company shall become liable as aforcsid: Provided always, that in case the Board slall borrow any money or contract any liabilities for and on behalf of the Company, previously to the incorporation by Act of Parliament of the Company as hereinbefore is contemplated, they shall have no power to render any sharcholder personally liable, or his estate responsible, for more than the balance of twenty shillings per share for which he may be liable to complete the payment upon his shares, so as to make the same paid up shares."
10. Cau you tell us the amount of property the Company possess in omnibuses, horscs, de.? No.
11. IIave they paid any dividend yet? I do not thinls so.
12. What is the number of shareholders? I could not tell you the absolute inmber, but forty-three have signed the deed.
13. Mir. Moses.] What is the amount of the shares? Thirty thousand shares of one pound each.
14. Are they fully paid up? Yes.
15. And have all been issued? Yes.
16. Mr. MR. B. Smith.] I suppose that in the preparation of the deed the statute relating to limited liability has been complied with in every respect? Yes.

## LODER'S ESTATE BILL.

## 1871. <br> WEDNESDAY, 13 DECEMBER, 1871.

的resent:-

Mr. A. Cathcart examined:-

1. Chairman.] Do you appear on behalf of Mr. Holdsworth as Solicitor for the Promoters of the Bill before the Committee? I do ; and I must ask the indulgence of the Committee, as I am unable to bring bofore them now the whole of the evidence in support of the preamble of the Bill. The Pronoter of the
Bill is up the country, and it will be imposible for however; prove the first two allegations of the preamble.
2. Do you produce the Probate of the last Will and Testament of the late James Mein Loder? I do. (The witness produced the same.)
3. Will you hand in a copy to the Committee? Tes. (The vitness landed in the same. Fide Appendix A.)
4. Are you aware when Mr. Loder died? I am instructed that he died on the 21st June, 1870. The Probate itself will show that.
5. H.ns the Will been proved in the Supreme Court? It has.
6. On what date? On the 19th August, 1870.
7. By whom? Andrew Loder, of Colly Creek, and Toshua Dowe, the gentlemen who are Promoters of the Bill.
8. Are they the Executors named in the Will? They are.
9. 

WEDNESDAY, 24: JAYUATY; 1Ki2.

Mr. MOSEA.
James Hart, Esq, is the Chatr.

Alexander Gordon, Hisq., re-appeared is Counsel on behalf of the Promoters of the Bill.
G. C. Davis, Fsq., re-appeared as Counsel on behalf of the Petitioner against the Bill.

## Andrew Loder, Esq., examined :-

A.Loder, Esq. 9. MF. Gordon.] You are one of the Executors of the Will of the late fames Mein Loder? I am the $\overbrace{\sim}$ acting Executor.
24 Jan., 1872. 10. James Mein Loder was your brother? He was.
11. You are are acquainted with the estate of your late brother? I am ; I resile on the adjoining station.
12. What does his family now consist of? Six children and his widow.
13. Are those childreu under age? Tes, the eldest is, I. think, about 17.
14. What is the age of the youngest? About a year and a half, or from that to two years.
15. Chairman.] When did the testator die? Last June twelve months.
16. AIr. Gordon.] What has been done with regard to the payment of debts, and so forth? I have paid all the debts as far as I knew them, and I have placed an advertisement in the public papers calling upon the public to furnish me with any accounts that may be owing. As far as $I$ am aware, none are umpaid.
17. The funcral expenses? Everything has been paid, as far as I know.
18. Can you state of what the residuary estate now consists ; whether it consists, anong other things, of the station of North Quirindi? Yes, that is the principal, North Quirindi and the stock run.
19. Do you produce a plan of the estate? I do. (The voitness handed in the same. Vide Separate Appendix.)
20. Will you describe how the plan was prepared? The plan was made by Mr. Christic, Licensed Surveyor, from the field books, and plans obtained at Murrurundi from the District Surveyor, Mr. Wyndham, under whom he served. The blocks of land are accurately described upon it.
21. What are the general boundaries? The general boundaries are according to my direction, and are as near as they can possibly be, except from actual survey.
22. You are, I believe, well acquainted with the locality? I hare resided on this station for about twenty ycars; and on it and the adjoining station, where I now reside, for about thirty-two years.
23. Can you say generally what number of acres the North Quirindi Station consists of? It is only an approximation, and at the best can only be a rough guess, from its being of such a very irregular form.
24. What does it contain, according to the Government plav. I am not aware.
25. The statement in the preamble is that it consists of about 50,000 acres? Somewhere about that I suppose ; but it is of such an irregular form, and so many pieces have been taken out of it by conditional purchasers, that it is difficult to say.
26. There are certain pieces of land that have been purchased? Yes; this plan shows accurately the position of them, and the number of acres in each.
27. How many are there? Six. The first, marked No. 1, contains 640 acres; the second, marked 2, is 40 acres, on which is situated a large dam, and also a hut and yards; the third, marked 3 , is 160 acres, on which there is a well, hut, dam, and sheep-yards. No. 4 contains 160 acres, on which there is $\Omega$ spring of water that is never known to be dry, a hut, and sheep-yard. No. 5 is 160 acres, on which there is the only permanent water in dry sensous on that part of the run, a hut, and sheep-yard. No. 6 is 62 acres; that is a conditional selectiou which my brother bonght previous to his death. There is a small cultivation paddock and a hut on that.
28. Chairman.] What is the total number of acres? It appears to be 1,222 acres.
29. Mr. Gordon.] You are aware that your brother purchased this land from the Crown? With one exception, No. 6 ( 62 aeres), which he purchased from a conditional selector named Douglas. I may mention that there is a little inaccuracy here; it should lave been 162 acres instead of 62 ; the blocks 100 and 62 were side by side, and there is only one block put down here.
30. Chairman.] Did he purchase the 100 acres as well? He did; the 162 acres at the same tine, but they were in two blocks-one 100 acres, and the other 62 .
31. Afy: Gordon.] I think you hare explained what the improvements are on the different blocke, with the exception of No. 1 ? No. 1 consists of 640 acres, on which is the homestead. The homestead consists of a cottage, containing, $T$ think, eleven rooms, and there are the usual out-offices for a homestead-a kitchen with two rooms, a private store with two rooms, and a store-room belonging to the station; a wool-shed, a stockyard, stable, and the rarious men's huts requisite for an establishment of that description; several cultivation paddocks and horse paddocks; in fact, the whole 640 acres is subdivided into horie and cultivation paddocks, ad has all the buildings and yards necessary for the carrying on of it station of that nature.
32. That is No.1. Passing ou to No. 2, that is 40 acres? 40 acres. That has upon it an exceedingly fine dam, in which the sheep were washed this year, aud a wash-pool has been made there which will do in future yenrs to wash the sheep belonging to the establishment. I may say it was the only place I could find this year suitable for the purpose, or the best place.
33. Then No. 3 I think you said is 1.60 acres? Yes, on which is a well of water, adapted for, and which las been used in dry seasons for watering sheep. In addition to that, there is a dan, a hut, and sheepyard. No. 4 is 160 acres, on which there is one of the finest springs in the district, which I have never known to be dry, and it is of such a nature that it will fill the troughs for watering sheep without any
manual labour ; and I may add, in passing, that it is the only permanent water anywhere in that neigh. A. Loder, Esq. bourbood, so much so that, about threc years since, if my brother had prevented conditional selectors from coming to that water, about twelve or fourteen in the immediate neighbourhood would have had to give up 24 Jan., 1872. their selections. No. 5 is 1.60 acres, and there is a never-failing supply of water in the creek. No. 6 is 62 acres and 100 acres side by side, making altoncther 162 acres, only one of thesc blocks. The ouly advantage of that is, that it is on the opposite side of the creck to the homestead, and my brother purchased it that he might liave an outlet to the run. (The witness bere referred to the plon.) In looking at this plan again, T believe I have made a mistake. The 62 acres is a grant from the Crown. There are two blocks of 42 acres and 100 acres, marked Douglas. The 62 acres is an auction purchase by my late brother, and joins the 42 and 100, respectively, purchased from Edwin Douglas.
34. And I mippose from your kuowledge of this station you can speak of these blocks of land as being of great value to the station, as securing access to water and fumishing grazing accommodation? I can. 35. Have you been desirous to sell the leasehold part of the land, as Executors under the Will? We are instructed by our solicitor, and I believe it is the fact, that we could sell the leasehold and stock, but I havo felt convinced, as haring had cousiderable experience in managing and purchasing stock and stations, that no person would give the sum we are entitled to expect on bohalf of the children, unless we were able to sell the frechold with it. There was another course open to us, which woudd be to lease the freehold, but I. considered there were grave objections to that, because it would be in the power of the person who leased them for a term of making selections during the previod of his lease, and then at the termination of it the laud would be of very little value to the children and widow. I am satisfied, as a practical man, that it was objectionable to lease the freehold, and that to get what we ought to expect from the property for the widow and children we should have the power to sell the leaschold with the freehold and stock.
36. I suppose yon were adrised that yon had no power to sell the frcebold? We were. I may state that we applied to the Court for power to do this. Every Land Office day the station has been lessened in value, in consequence of the mumerous selections which have been made upon it; in fact, some thousauds of acres hare been selected since my brother died, and had we been in a position to sell shortly after his death, his children and widow would have benefited most materially. Frery Land Sales day it is so much the worse for the family, as there are fresh selections made.
37. Chairman.] What quantity of stock is there on the land? About 700 head of cattle, 500 head of horses, and 10,000 or 12,000 sheep.
38. Mir. Lackey. Was there as much stock upon the run five years ago as now? No, but there are rather more now than there were at my brother's death; but we cannot continue to increase, as we are getting hemmed in, and there must be some change. We could not have kept so many but for the favourable seasons.
39. MF. Gordon.] It is your opinion that if you attempted to sell the stock and the leaschold alone, you would not get anything like the value? I am convinced we shonld not.
40. Chaiman.] At what do you estimate the value of the rum, with the stock on it, including the purchased land, if it were sold in one lump? T have very little doubt-of course I am only giving my opinion-if the freehold were taken at a valuation, that is at £l an acre, the sheep would bring not less than $8 s$. a head, the cattle not less than $£ 3$, and the borses about $£ 2$. I would rather say more than less.
4.1. Mr. Gordon.] That is if sold with the freehold? If sold with the freehold, and the freehold taken at a reasonable valuation.
42. Mr. Lackry.] In addition to these sums? Yes, $£ 1$ an acre for the frechold.
43. Mr. Gordon.] If sold without the freehold? If sold without the freehold the parties would have to remove the stock-they could not keep them on it.
44. Chairman.] The value of the ruu without the stock would be very small? The run alone would be of very little value, for the only part fit for cultivation is the homestend, the other part of the run is of value ouly for its water advantages. My brother went to considerable expense to secure these for the supply of his stock, as he said that unless he did so, the run would be of very little value.
$4 \%$. Mr. Hoskins.] Having secured all the permanent water, would not that prevent free selectors from settling on the rim? The water secured was only for stock purposes. There is no place for watering stock excopt one.
46. In fact there is no permanent water? Only at the township, that is the only permanent water, and I have seen that dry several times during the last thirty years.
47. Mif. Davis.] Can you inform me whether you have filed any accounts of your administration as Executors? I have filed all the accomuts I have boen advised it was necessary for me to do, at the proper Office.
48. At the Court House? Not; at; the Court House,-at the Office here.
49. The Stamp Office? Tes.
50. Have you filed in the Ecclesiastical Court? I have not.
51. You have not filed any accounts? T. have not-T am getting the account made up now, but they are open for any one's examination.
52. I am not insinuating anything to the contrary-I only want to know as a matter of fact? I have not. 53. What is the amount of your brother's debts and liabilities which you have satisfied? That I camnot tell from memory.
54. Give it me in round numbers. I do not, want within £20, £30, or £50? Do you mean at the time of his death?
55. Yes, which you satisfied? I could not tell.
56. Could you not witbin $\mathfrak{E} 100$ No, I could not.
57. Was it as much as $£ 500$-the amounts you settled? Ses, it was. There were outstanding debts at the time of his dcath which must have been quite up to $£ 500$.
58. Out of what have you paid that $£ 500$-have you paid it out of the profits of the working of the station? The account was overdrawn.
59. ITave you paid those debts out of the protits of the working of the property? I have since, with the assistance of the Bank, but I could not have done so excepting on my own personal responsibility. This has been paid subsequently from the working of the station.
60. Your brother died in June, 1870? Yes.
61. Who got the proceeds of the wool sales for 1870 ? I took an advance from the Australian Joint Stock Bank at Murrurundi, and the proceeds were paid into the Bank.
2. Loder, Eeq. 62. What were the proceeds of the wool sales in 1870? I cannot tell you; I am not aware.
$\overbrace{\text { an. 1872 }}$ 63. It is necessary that the Committee should know these things, in order that they may judge whether
24 Jan., 1872. the working of the station is profitable or not? The fact is, that it is at our personal risk-that is, at the risk of myself and co-Executor-that we are carrying on this station for the benefit of the widow and children; and my co-Trustee, who is somewhat timid, objected to carry it on, and wished me to sell the stock and leaschold, and to rent the frechold.
64. I am not asking you as to your personal risk, or as to what yourself or your co.Trustee wished to do. I an only wanting to know whether the station was worked at a profit or atia loss? At a profit.
65. Can you give me any idea about what the average profit of working the station for each year is? I could not at the present time.
66. Can you tell me what the wool sales for 1.871 realized? I could not tell you the anount, becanse it was only the other day I had the accounts made up.
67. Could you tell me within $£ 100$ or $£ 200$ ? J could not.
68. Was it about $£ 2,300$ ? I know each sheep cut about 4 s . $2 \frac{2}{2} \mathrm{~d}$. wool.
69. Can you tell me the number of sheep shon? I think it was somewhere about 10,000 .
70. Was not the amount over $£ 2,000$. My memory is not very good where accounts arc concerned, unless I put down the figures.
71. Were there not above 111 bales of wool shorn from the sheep in 1870? I do not know; all I know is that the proceeds of the wool went through the Bank.
72. Can you give me any idea of the working expenses of the station? I cannot, without the books. I had the books most carefully made up a few days before I left, but I had no idea thatit should be called upon to produce anytbing of that sort, or I could have done so.
73. You have resided on the station yourself, you say, for twonty years nearly? Yes; at fourteen years of age I was sent from school at Sydney to the station, which was my father's, to superintend it. Subsequently it was divided between my brother and myself, he taking one portion and I the other.
74. For about thirty-two years you have had full experience of the way in which this station has been worked, and of the result? I have resided on it and on the adjoining station thirty-two years, and seen its management.
75. And have known the result of its working? I have seen its management, and my brother has occasionally told me the result.
76. He might have told you whether he was working at a profit or at a loss? For a long time before his death he was not working at a profit.
77. For a long time? For some little time.
78. What do you mean by some little time? About three vears.
79. Since your brother's death, has it been worked at a profit? No doubt it has been working much more at a profit than before.
80. And that notwithstanding the frequency of these free selections? Notwithstanding the frequency of these free selections, but that in a great measure is owing, as far as the free selcctors are concerned, to their not claiming what they might. If they did claim their pre-emptive rights there might be a difficulty in carrying on the station.
81. Can you give me an idea of the working expenses and of the income for 1871? I cannot.
82. Cannot you give in round numbers within $£ 100$ or $£ 200$ ? I can give the information if I am required to do so, but li cannot do so now.
83. Have you any idea at all? I did not think I should be asked questions about the working of the station, or I would have been prepared to give the information.
84. Chairman.] Will you furnish the Committee with information respecting the working of the station for the last five years, or going back as far as possible, showing the receipts and expenditure for each year? I cannot go back beyond the time when I entered upou the management of the property after my brother's death; but my Superintendent, Mr. Gruggen, who took charge of the station shortly after my brother died, and who has kept the accounts, will attend the Committee with the books, and give the fullest information.
85. Mr. Gordon.] Who prepared the description of the schedule? T.t is in my application for the promise of a lease.
S6. Will you look at the description in the schedule? I have read it.
87. Is it, to the best of your knowledge, correct? It is.
88. Chairman.] The boundaries have not been altered since the application for a lease went in? No, except that the north-west line has been run by a surveyor since this application went in.
89. The description in the schedule accurately describes that which appears drawn on the plan? Yes.
90. Mir. Lackey.] You stated that the clip of wool realized 4s. 21 d. ? Yes.
91. Do you remember what it realized last year? I do not.
92. Nor the year before? No.
93. You said there were 700 head of cattle? Yes.
94. Did you sell any fat stock from them? They will all appear on the books-cvery salc will be shomn in the books.
95. Sheep, cattle, and horses? Tes.
96. Were there any other revenues derived from the estate, in the way of dairy or farm produce? No, there was nothing of that kind carried on to any extent.
97. There were no dirgings to supply ? No.
98. Mr. Hoskins.] Would you have any objection to state, as an Executor of the estate, why you wish to have this station sold? Not the slightest. I am satisfied-and I believe I have had as much experience in such matters as almost any one-that it would be for the interest of the wilow and children, otherwise I would be the very last to attempt anything of the sort.
99 . Would you state to the Committee, in round numbers, what you consider the station, stock, and all belonging to it, would realize? I could state no further than that I believe the sheep would fetch not less than 8 s ., the cattle not less than $£ 3$, and the horses not less than $£ 2$, provided the freehold were allowed to be sold with it. It is not the actual value of the freehold, as intrinsically that is not considerable; but its necessity for carrying out the working of the station. All these places were selected by my brother with a view to the working of the station. They cost my brother only some $£ 1,200$ or $£ 1,300$.
100. Mr. Lackey.] Would you estimate the land at the price at which it was bought? At not less than £1 an acre.
101. You estimate it at $£ 1,200$ in the ereut of its being sold? At not less than that.
A. Loder, Efsq.
102. Mr. Hoskins.] Are there extensive improvements effected, in the shape of woolsheds, and many other $\overbrace{\sim}^{\sim}$ improvements-do you allow anything for the value of thom? It is usual in selling stations to give these 24 Jan . 1872. in, the stock selling for a higher price in consequence of these improvements.
103. I believe according to your estimate this property would be worth $£ 9,000$ ? Tes.
104. If it realized $£ 9,000$, and that sum werc invested judiciously for the benefit of the widow and children, what income do you suppose would be realized from it? Firom 8 to 10 per cent. I apprehend. I am not in the habit of lending moncy, but I hear from those who do lend what they get from $S$ to 10 per cent.
105. Do you not consider that by working this station in a proper and efficient manner, it would yield a net profit of more than 8 or 1.0 per cent.? I have made up my mind not to work the station.
106. MIr. Dodds.] Uuder proper management-- that would not bind you to do it-would it not yield more than 10 per cent. ? There is a great deal of risk in stock, and I think it, would be more to the interest of the widow and children to have a certainty than an uncertainty, considering too that this land is being taken up by free selectors. Besides, it is only owing to the late seasons having been good that we have becu able to kecp so many as 10,000 or 12,000 sheep. I can remember when it would not keep more than 6,000. I think this would be a most farourable time to sell, and as the present state of things may not last, it is desirable to take advantage of it.
107. ALF. Moskins.] Do you say all the permanent water has been secured by the purchase of this land? With the exception of the township where there is the creek, the best permanent water has been secured by the purchase of these blocks.
108. Of course selectors could not live upon the land unless they had water? They could sink wells for farming purposes, and make dams.
109. From your knowledge of the value of runs in that district, could you give the Committee an idea of the net profit realizable from a station similar to Quirindi, with the same quantity of stock, and a similar character of country, supposing it to be judicionsly managed? There are so many circumstances surroundiug a question of that sort, that the answer could be only a guess.
ま10. Iou bave had great experience? You have also had experience, and know that the stock and wool market varies very much. A squatter cannot calculate what his income may be, as it is less than nothing onc year, and a wood thing the next.
1.1. Chairman.] I think you said your brother worked at a loss the last thrce years before his death? I think be must: have done; as, instead of finding, as I had expected, a considerable sum in the bank, there was not sufticient forthcoming to pay the expenses of the station, and I had to obtain money from the Bank on my personal responsibility, for that purpose.
112. MIr. Luckey. ] suppose the Bank considered the property il good security for any advances it might make? Yes, but we were not in a position to give security over the property.
113. Yon have spoken of the increase in the number of stock the station would carry now as compared with former years-ls that owing to the season, or to the greater quantity of water secured? 1t is in a great measure owing to the good season; for although many persons are crying out about the present dry woither, the earth was beforo so saturated with the heavy rains we had that we are still deriving benefit from them.
114. MIr. Dodds.] Is the station fully stocked? Yes,
11.5. It could not carry any more? I would not like to put them on it.
116. $\operatorname{MIF}_{r}$. Moses.] I suppose water could be obtained in any part of that country by sinking? Not in any part. In the best grazing part of the country there is difficulty in getting water. My brother tried, and was compellod to desist.
117. Mr. Lacley.] There is no fencing? No quantity of fencing excepting at the homestead.
11.S. Mrr. Dodds.] Is it a good fatitening country? A very good countiry as a whole.
11.9. A good shecp country? Yes, but latterly some of the very best portions have been taken up by a large conditional selector.
120. Tit is near a market? Yes.
1.21. MIr. Jackey.] Do these large selectors make use of their grazing rights? Some do, and some have threatened.
122. For sheep or catile? They have ouly cattle at present-uone lave any quantity of sheep.
123. MIr. Bell.] They could not water them without going on your run? Only one man promisos to be troublesome. They could get water by sinking.
124. Chairman.] What quantity of land is taken up on the run by conditional selectors? Several thousand acres.

WEDNESDAY, 31 JANUARY, 1872.

| JOHN LA | Y, Esq., | N the Chair. |

Mr. Gordon appeared on behalf of the Promoters of the Bill; Mr. Davis appeared on behalf of the Petitioner against the Bill.
Mir. Charles Irice Gruggen examined :-
125. Chairman.] Are you now managing Mr. Loder's station at Quirindis I am.
126. How long have you been managing that? Fighteen months.

Mr. C. P.
127. It is a shcep and cattle station? Yes.

Gruggen. 500 horses.

Mr. C. P. 129. There is a tolcrable extent of purchased land on it, I think? About 1,200 acres.
Gruggen. 130. This was purchased by the late Mr. Ioder? Fes.
31 131. Are the selections considered to have been made judiciously with a view to the securing of water ?
31 Jan., 1872. Many of them are, and some were bought purposely for that.
132. And others to secure improvements? To secure the station-to prevent any one taking that away.
133. You consider that the intrinsic value of the station depends very much mpon the retention of this purchased land? The one is of no use without the other; the leased land is of no usc without the purchased laud; and the purchased land is of no use, or of very little, without the leased.
134. Have you formed any iden of the value of the station and stock? No, but I could tell pretty well in this way; the value of the sheep and cattle, taking the purchased land at a certain value-I should put; down the cattle at $£ 3$ a head, the shecp with the station at from 8 s . to 9 s . a head, the horses at from $£ 2$ to $£ 210 \mathrm{~s}$, and the land at $£ 1$ an acre.
135. Had you any linowledge of the working of the station previous to your being appointed Manager? None at all.
136. Since it has been under your managewent, during the last eighteen months, from your knowledge of stations generally, do you consider it a profitable station? It is profitable as a small station.
137. The working of it is not economized by fencing in and dividing into paddocks? No.
138. Then you require many shepherds? Yes.
139. As Manager you have to kecp an account of the expenditure and rcceipts? Yes.
140. At what do you value the income of the station, in round numbers? Ati the present tinnc, from $£ 1,200$ to $£ 1,500$; but the aserage would, I think, be from $£ 1,000$ to $£ 1,200$. Just now everything is up in price.
141. That is inclusive of all sales? Yes, that is the profit of the station.
142. In that you would include the sale of fat stock and the sale of store sheep? les, leaving the stock at the same number as before.
143. What quantity of fat stock do you sell in the year, on the average? I have sold only for one year. About 1,500 or 1,600 fat sheep were sold last year, a good many were sold in small numbers to our neighbours and to butchers, but about 1,000 were sent to Maitland to market.
144. Are the improvements pretty good on the station? They are not expensive improvements.
145. The $£ 1,200$ is after deducting working expenses? Yes.
146. Do you consider that tho value of the station has suffered materially by selectors lawing taken a large quantity of land? It has suffered a good deal by that, and is suffering almost every day. There were two purchases made last Thursday, one of eighty and another of forty acres.
147. Do they generally make these selcetions for agricultural purposes? Yes, and generally they have a few cows or horses outside.
148. From your knowledge of the circumstances of the case, do you think the interests of the family of the late Mr. Loder would be more consulted by the sale, or by the keeping of the station? What I fear is, that in the course of time there will be nothing left to sell. The selectors are coming on the station so quickly that unless there were some way of stopping the sule of it the rest of the station will be valucless.
149. We have hoard that until the death of Mr. Loder the selectors did not exercise their extreme rights? None of them have taken up their pre-emptive rights,
150. Is it the fact that since the death of Mr. Loder selections have been taken up more quickly than before? No, at one time the selectors seemed to be coming all together-more than a dozen came at one time.
151. Mrr. Hoskins.] What number of stock do you consider this North Quirindi Station will carry in average seasons? Not above 10,000 sheep, and about the present number of cattle.
152. The same number of horses? Yes, about 500 .
153. Can you give us any idea what would be the net profits of that station in average seasons, with that number of stock on it? About $£ 1,000$ a year in average seasous, at average prices. Everything is very high now.
154. Have not the occupants of Quirindi Run been in the habit of growing nearly all the wheat they required for their use, and all the hay and vegetables? I dare say they did, butit is cheaper to buy than to grow our grain.
155. Was not wheat grown on the station when Mr. Loder was alive? I do not know; I believe it was.
156. It has not been this year? No.
157. Hay? Fes, we hare enough hay on the station now to last five or six years, but we camot sell it.
158. Is it not the fact that nearly all the permanent water on that run has been secured under the preemptive right of the late lessec? There is a large dam included in the 40 acres, another on the 160 acres block; another 160 acres was purchased to secure the water in the creek on the main road.
159. That is near the township? Yes, at Kangaroo Creek; then there is another 160 acres at the Springs, where there is permanent water not manufactured ato all.
160. Is not that all the water obtainable about the ground? Yes, I think it is,-there is very little.

There is no standing water in any creeks or galleys. I have now to water some of the sheep out of wells.
161. Theu if selectors were disposed to settle upon the run they would have to construct dans? There is water in the creek at present, for about two or three miles. Our cattle use that now.
162. Has not all the frontage on that creek been sold? No, there is about two or three miles on one side of the creek unsold.
163. Is the frontage to that creek which has not been sold open to selection? Yes.
164. Are there no reserves on it? I think not on one side; on the other there is a reserve of 40 acres.
165. A Government rescrve? Yes.
166. However, there is no water on the rum excepting that on the creek where the land is open to selection? No, there are simply springs where the selectors with a little trouble could water any amount of stock. That has never been used.
167. That has never been purchased by the lessee? No, it has not been required by the station, because the dam would water the same stock.
168. Mr. MIoses.] What did the clip last yenr realize? $£ 2,290$, but there is the carriage to Morpeth by the railway to be deducted ; that would leave about $£ 2,250$ net.
169. What would be the expense of taking that clip of wool off the sheep's back? Shearing, washing and getting it ready for the market would cost about $£ 430$.
170. What did the sheep you sold realize-the 1,600 head? Somo of them were boiled down, and some were sold. I could tell by what was paid into the Bank on account of them. (The witness referred to his $b o o k s$.) $£ 2 S 74 \mathrm{~s}$. 10 d ., -that is for $1 ., 002$ sent to narket, the other 600 were sold about the station in lots of 30 or 40 , and realized $£ 1785 \mathrm{~s} .6 \mathrm{~d}$.
171. Did you sell any cattle off the run last year? Yes, to the amount of £441 10s.
172. Did you sell any horse-stock? Yes, £114 10 s .
173. What is the rental of the run? E75.
174. What are the other expenses for the year-wages to shepherds, \&c.? I can give you the gross amount that has been paid ever since I have been there.
175. Can you give us the entire cost of the management of the station for twelve months, with the exception of the cost of the preparation of the wool for market? I think the expenses would be about $\dot{E} 900$ a year.
176. MIr. Davis.] Was not some tallow sold last year? Yes.
177. Can you tell me the amount it realized? I cannot. There was some tallow and some sheepskins went down together, and the total amount is here together, $£ 7510 \mathrm{~s}$. 2 d ., for tallow, hides, and sheepskins.
178. In ordinary years what do you think would be the ordinary average working expenses of the station? In some years we might wash, in others we might not.
179. Suppose you give me without washing first? From $£ 1,100$ to $£ 1,200$, that would include shearing.
180. What would the cxpense be increased if you washed? About £150 or £200.
181. What would you say would be the gross aserage of the returns in ordinary years: It is impossiblo to say; in some years you might sell $£ 100$ worth of horses and cattle, and in other years not any. The wool in an average year fould be about $£ 2,000$; this year it was $£ 2,270$, but wool is now at a very high price.
182. What are your ordinary sales of surplus stock? Tou might put down about ( 600 or 700 for surplus stock, including cattle and sheep.
stock, including cattle and sheep. tion? None of it is unavailable for selection, for some people will select right up among the mountains where no one can get to them, very nearly on the top of the Jiverpool Range.
184. Mr. Hoskins.] Is there not some very good land there? No man who wanted to make moncy by farming would take up such land-there is very little that is not available at all, but we have not much really good land.
185. Dir. Davis.] To a man who wants to farm or to make money, a good deal of the land would be of no use? Yes.
186. That land is very fair grazing land for sheep? Very fair. I do not call any of it really first class, but it is all good.
1.87. Spots might still be purchased which would exclude selectors! A great deal of the land might be purchased, and exclude selection.
purchased, and exclude selection.
185 . Of course, the more land you purchased the less liable you would be to the invasion of selectors? It: is the only way to secure the run; because now, if a man trespasses upon me, and I make a noise about it, lie goes and selects more.
189. Do you know Mr. Andrew Joder's atation? Yes.
190. It adjoins this, does it not? It does.
191. Is there much selection going on there? He has purchased a great part of it, I belierc.
1.92. That has had the effect of keeping oft free selectors? Of course it has; he has purchased nearly all of his that is any good.
193. Can you give me any idea about what outlay would be necessary to make this run tolerably sale from the invasion of free selection? It is impossible to say; it would require some thousands.
194. About how much do you think-I do not wish to keep you within $£ 100$ or so-a proximate estimato? You can never know where they are likely to settle. 1,000 acres were marked out a little while ago, and I could point out 1,500 acres more which it would do good to buy.
195. Mr. Hoskins.] Can you tell me how many Goverument reserves there are upon the run ? The plan will show it-I cannot say.
196. Government reserves, of course, are exempted from free selection? Xes, but they are very small; there is one of about forty acres, which joins some purchased land at Kaugaroo Creek, and there is another at Quirindi Creek. I think that is nearly all.
197. Mr. Davis.] I think I understood you to say that none of these free selectors avail themselves of their grazing rights? I think only two brothers of the name of Haylock. I take no notice, and tell the shepherds to take no notice, unless their cattle stray on the run.
198. Since you have been there you have not, in consequence of free selection, been compelled to reduce the number of stock on the run? No.
199. Four sales have been of surplus stock? I have more on the ground now than when I. went there. There were 12,283 when I. wont there, and there were 13,470 on the 1st Jauuary.
200. And you have plenty of feed for them? Yes; we are short of water nowfor some of them.
201. DIr. Bell.] Have the cattle decreased or increased? Increased.
202. Mr. Davis.] What was your lambing last year? 2,750 lambs.
203. Mr. Lachey.] About what per cent. would that be? About ninety.
204. Was that a very good lambing? Very fair:
205. Have the free sclectors come there mostly for agricultural purposes? Yes.
206. And so far as your experience goes, you have had no real trouble with them? No. I do not trouble them, and they do not trouble me.
207. Mr. Moscs.] This 90 per cent. xcfers to the breeding part of the stock? Yes, there are about 3,000 ewes.
208. Do you consider the quantity of sheep, cattle, horses, tallow, hides, and sheepskins sent to market last year, an average quantity? There wero more sold than the average number of cattle, but not more sheep-about the average number-but the receipts were greater. If I sold cattle on the station, T. should receive about $£ 5$ a head for them.

Mr. C.P. 209. Would the net amount from wool be the average? No, the price we received last year was very
Gruggen. high,-we had 23d. a pound for wool delivered in Morpeth.
210. You said the net income, after deducting all expenses, would be from $£ 1,000$ to $£ 1,200$-did you form that average from tho last twelve months? No.
2.1. The statement you have given me of the prices at which the sheep, cattle, horses, tallow, wool, and skins were sold, deducting the expenses, leaves a net profit of £1.846? Yes, and at least £200 might be added for the wool this year. The net amounts (referring to his book) from the sale of wool this year were $£ 1,7667 \mathrm{~s} .10 \mathrm{~d}$. and $£ 494 \mathrm{9s}$. I1.d. This is the amount of money paid into the Bank, not deducting the expenses excepting the carriage.
212. Mr. Lackey.] Do yon recollect how many selectors were on the station when you first went there? No.
213. Do you know about how many had taken up selections? No.
214. You think the progress of free selection would be very likely materially to affect the future value of the station? Yes, unless it were stopped by some means.
215 . Is that the case with the surrounding statious in the neighbourhood? Messrs. Macdonald and Moore, of Wallabadah, said they had laid out from $£ 1,500$ to $£ 2,000$ on their station in purchases.
216. That would cost $£ 1$ an acre? Yes.
21.7. That would not be much? Buti there were 4,000 acres of purchased land before.
218. 6;000 acres would not be a very large item on a station of 50,000 acres? No, but these are picked pieces.
219. I have understood that the land cannot be bought up to secure a large scope of country for any adrantage the purcbaser could get from springs? No: any one selecting a large extent of country would lave to make his water in the shape of a dam. There is no real standing natural water on the runs with the exception of springs.
220. The creek itself is not permanent water? No, the creek is dry for miles now.
221. Mr. Howhins.] You say the stock has increased upon the run since you have had charge of it? Yes. 222. What was the amount of stock depasturing upon the run when you took charge of it? 12,283 sheep- there are 13,470 now ; 680 cattle of all sizes when T took delivery, at the first muster-mero are 750 now branded. I have branded 180 since, and sold and killed 112.
223. On what day did you take charge of the run? On the 18th July, 1870, I commenced work.
224. How do you account for the increase in the number of stock from the time you took charge of it? 2,750 of these are small lambs-there is always an increase in September, and the surplus stock is sold of about March. when you have to wean.
225. But still you sell fat stock? At times in the year, but there has been no surplus stock sold this year.
226. Then the number of stock will be diminished when you have made your customary sales of fat stock? Yes.
227. Mr. Dodds.] You cannot say whether the station was worked at a profit or at a loss before you cntered upon the management of it? No.
228. Are you able to judge anything of the management of the station before you took possession? No; since I have had charge, I have kept account of every sheep that las been sold and of every pennyworth that has gone off the station.
229. Shecp do very well on that land? Very fairly, I never saw a whole flock that were fat, but I can always get a few hundreds out of every flock.
230. DIr. Hoskins.] You consider it a good average run? Yes.
231. You consider that if the most eligible land were secured by purchase, the same quantity of stock would continue to be depastured as are on the land at the present time? Yes, if $£ 2,000$ or $£ 3,000$ were laid out it would be a very good station.
232. Mr. Dodds.] Has it permanent water? It has springs, and this dam has permanent water ; other dams could also be made which would secure permanent water.
233. DIr. Davis.] Do your books show whether there is any sum, and if any what sum, to the crediti of the station? Yes.
234. Tell us what it is? $£ 2,061 \cdot 19 \mathrm{~s}$. 8d., that is after every cheque that has been drawn has been paid up to 31st December last.
235. That is the deposit in the Bank? Yes, in the Australian Joint Stock Bank, Murrurundi.
936. Do your books show what payments were made to Mrs. Loder for herself and for the family during the year 1871? I do not know in what way you menn.
237. For household expenses and so on? The rations come out of the store, and are included in the account, so also is schooling. There is a balance of $£ 2,0 \pm 419 \mathrm{~s}$. 8d. to the credit of the estate, after the payment of all expenses for maintenance and otherwise.
238. I belicve the boys are at a boarding school: is that expensc included? That is included here. Here is a cheque, charged Mr. Millard £114 9s. 6 d ., that is for schooling. I cannot say for how long.
239. Chairman.] Is the amount now to the credit of the station the amount that has accrued during the whole time that you lave had the management of the station, or during the year? It is the whole of the estate money.
240. Is there any other property on the estate besides this station? Yes; in this account there are two sums of : 16 paid as interest upon some money lent to Mr. -_. With the exception of that $£ 32$, the whole of the moncy lodged in the Bank is the profit derived from the station.
341. Mir. Moses.] Had you anything to the crodit at starting? No; there was about $£ 400$ to the debit it starting.

## LODER'S ESTATE BILL.

## APPENDIX

[To Evidence given ly A. Catheart, Esq., 1.3 December;, 1871.]

## B.

Atenctal Opmon and Abetce.
In the Supreme Court of New South Wales. In Equity.
In the matter of the Trusts of the Will of James Mein Loder, Iate of Quirindi, in the District of New Fugland, in the Colouy of New South Wales, deceased. Frilay the nincteenth day of May, in the year of our Lord one thousand eight hundred and seventy-one.
Whereas Joshua Dowo and Andrew Loder, the Exccutors of the Will of the above-named James Mein Loder, deceased, did on the seventh day of March last, prefer theirPetition to the Houorable John Fletcher Hargrave, Esquire, tho Primary Judge in Equity of this Honorable Court, setting forth as therein is set forth, and praying that His Honor would be pleased to give to the Petitioners His Honor's opinion and advice respecting the management and administration of the run thercin mentioned in reference to the question of the propricty of the eale of the said run under the circumstances therein mentioned, and in the event of His Honor's opinion and advice being in favour of selling the said run, then that His Honor should be pleased further to give to the Petitioners His Ionor's opinion and advice whether the Petitioners had authority to sell the snid run, and if Mis Hour should be of opinion that the Petitioners had not such ruthority then that His Honor would be plensed to give to the Petitioners Bis Honor's opinion, nilvice, anul direction, whether the Petitioners should take any, nud if any, what steps, by application to this Honorable Court, or to the Legislature or otherwise, to obtain such authority. Whereupon all parties conrerned were ordereci to attend the Primary Judge in Equity on the matter of the said Petition, and Counsel for the Petifioners attending this day accordingly: Whercupon and apon hearing the said Petition and the affidavit of the said Joshua Dowe, aworn herein on the twentieth day of February hast, and the aflidavit of the said Andrew Loder, sworn herein on the aixth day of December Jast, read, and wht was alleged by Mr. Gordon of Counsed for the Petitioners, and upon proof of the service of the said Petition on Saroh Jane Loder the widow of the deceaserl, and on the inlunts Thomas James Loder, Hrank Loder, Andrew Charles Loder, Herbert Loder, Frederick Loder, and Mary Lillian Loder, the persons iuterested under the said Will of the said James Mein Loder deceased, in the screralmatters referred to in thesaid Petition, as appears by the aftidarit of Joseph Palmer Abbott, sworn herein on the thirtieth dny of March last, and also on John Brown, the Gnardian ad alein of the said infanta,
duly appointed by on order of this Honornble Court, bearing date the first day of May instant, as appears by the aflidnvit of Christian Poppenhagen, sworn herein on the sixth day of May instant,-His Honor is of opinion that it would be advisable and for the interest of all partics concerned that a sale should be made of the rum in the said Petition mentioned if the said Joshua Dowe and Andrew Loder, Exccutors of the Will of the said James Mcin Loder, deceased, have powdr uuder the said Will to effect such sale; and His Honor being of opinion that the said Executors have not power under the said Will to effect such eale, advises that an application be made to the Legislature for a Private Act to crable the said Execntors to sell the arid run and do all necessary and proper acts for effecting snch sale, and to provide in such manner as the Legishature may direct for securing to the respective parties bencficially entitled to the said rum and the several parts thereof their sereral and respective due shares and proportions of and in the proceeds of the said sale.

Master in Equity
Passed, 13th June, 1871.-A.T. IH.
Enterel samo day.-T. M. S.

[^0]:    Court, Wollombi, 82

[^1]:    BY His Excellency the Riget Honorable Somerset Rickard, Earl of Belyore, a Member of Her Majesty's ALost Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

[^2]:    In witness whereof, T have hercunto set my sign manual, and have caused the present Letters of Registration to be sealed with the seal of the said Colony of New South Wales, at Government House, Sydney, in New South Wales, this thirty-first day of May, in the year of our Lord one thousand eight huodred and seventy.

[^3]:    * Under a legal opinion, the grant mas made in favour of Mossrs. Bosworth and Baldwin.

[^4]:    We have, \&c.
    E. O. MORIARTY.

    CHARLES WATVI.

[^5]:    Note (on revision) :-When the number of portions applicd for is small, the instructions are issued within two or three days after receipt in my office; on the same day if marked "urgent" from Lands. In applications for large arcas of squatting runs for auction sale, proceeding from the lessee for instance, the applicant is asked for a deposit of 6 d . per acre, and when reccived the district surveyor is asked to examine the land and report on the subdivision, to prevent injury to the public eatate; on receipt of his report, instructions are issued to the licensed surveyor ; several months usually occur in this way, but 1 do not consider it adrisable to remove the restrictions imposed. However, as these mensurements tend to produce revenue, 2 certain preference is given to them, and being also remuncrative to the surveyor there is but little loss of time between the issue of the instructions to the licensed surveyor and the measurement of the Iand.

[^6]:    * Nore (on renision):-Prior to the passing of the Alicnation Act there was no restriction as to the extent to which a squattor might exercise his pre-emptive right, unless excreised to the prejudice of the public estate. After passing the Land Act its restrictions wero observed ns to the proportion of 1 square mile to every 25 that the run contained; a more literal reading of the Act would have restricted the salo of land. It was not until 1860 that the applicutions became so numerous that furtber consideration because necessary, and only 1 square mile for 5 of frontago was allowed, and shortly after the strictest reading of the law was insisted, and only 1 square mile to every definel area of 25 square mileg allowed; and this practice has remained in fores.

[^7]:    Note (on reaision) :-I append herowith a copy of the memorands (See Appendix $A$ 3) that passed upon the subject,
    which had almost gone from my recollection. Indeed, I never attached much inportance to the question, as no public inconrenience ever arose out of it. Mr. Fitzpatrick, in n memo. to Mr. Wilson, advised what he believed to be more within the spirit of the Act than the actual rcuding would imply, and, on succeeding to office, Mr. Robertson, who framed the Act, concurred in that view. I did not press my views further on the subject, knowing that the moment I might be able to show that any injury was likely to result to the public estate steps would be taken to amend it. In the meantime the revenue derivable from the snme was inuch needed at the Treasury.

[^8]:    Nome (on revision) :-I find that since the year 1867 the books in the Lands Department have been kept in an improved form, and from them I gather that from Jnnuary, 1868, to 30 June, 1872, the number of conditional purelinses cancelled on account of interference with reserves amounts to 270 ; out of these I estimate that about four-fifths are allowed to stand by reselection after the portion of the reserve sclected has been revoked-which is done on the surveyor reporting that the case was a bond fide one, and that improvernents had been made, and that no injury to public interests would acerve from the transaction; as a rule, the reserves are in the first instance mate large enough to enable any ordinary selection to be made wilhout prejuclice to the object for which the reserve was made.

    345 - C

[^9]:    Noxe (on revision):-When I say private credit, I mean to a private account in contradistinction to a public account. It was, I believe, a separate and special credit, opened for the purpose.

[^10]:    18

[^11]:    RETURN (in part) to an Order made by the Honorable the Legislative Assembly of New South Wales, dated 10th September, 1867, That there be laid upon the Table of this House,-
    "A Return containing an Annual Debtor and Creditor Statement of the
    " amount of money due to the Government by the Municipal Council of
    "the City of Sydney on account of Sewerage and Water Supply for the
    "City, Port, and Suburbs of Sydney, such statement to particularize,-
    "(1.) The debentures sold, either for carrying on the works or for taking
    "up debentures which had matured; their currency in each case; the rate
    " and amount of interest, commission, and charges severally payable there-
    "" on, and the net cash received; together with the amount of such money
    " expended by the late City Commissioners, and the amount handed over
    " to the present City Council, respectively.
    " (2.) The amount of moncy annually retained by the Government from
    " the Parliamentary vote as or in the nature of endowment of the City of
    "Sydney, together with the amount of money paid by the City Council as
    " interest on or for taking up debentures.
    " (3.) The amount of money annually expended for Sewerage and Water
    "S Supply in the City of Sydney and the various suburban Municipalities
    " or Suburbs respectively.
    " (4.) The annual income of money from Sewers and from Water Supply
    " from the City, Port, and Suburbs of Sydney, respectively, from the date of
    " the appointment of the late City Commissioners to the 1st January last.
    " (5.) The probable annual amount, in detail, of rates which might be
    "recovered from Government and Public buildings, provided they were
    " liable as private buildings to be rated.
    " (6.) The annual amount of moncy paid from the Public Treasury for
    " making new streets and sewers in the City of Sydney during the above-
    " named period.
    " (7.) A copy of the correspondence between the Government and the
    " City Corporation on the above subjects.
    " (8.) The amount transferred, either annually or otherwise, by the Council " of the City of Sydney from the Sewerage and Water Funds, or either " of them, to the City Fund, and by what authority."

[^12]:    * The percentuge of recoverics on the admissions into all the Institutions for the Insnne in Fngland, during the year 1870, was 34.14 , and the average during the last twelve years was 33.95 . The average in this Institution for the last three years war 37.50 .

[^13]:    Schools that exceed the requirements of the standard ............. 1
    Schools that on the whole arc equal to the requirements ........... 12
    Schools that are below the requirements. 19
