On the north side of Glen Creek are some remarkable veins known as McDonald's lodes, upon which a good deal of prospecting has been done, and some rich patches of ore are said to have been obtained. Here a hornblende felsite dyke, about 12 feet wide, strikes E. 20° N., through fine-grained hornblende granite with black mica. The dyke is traversed by numerous (in one place I counted fifteen) veins, from mere threads up to 3 inches thick, of black tourmaline, the larger of them with crystalline quartz in the centre; the tin ore occurs irregularly both in the tourmaline veins and quartz. This is near the junction of the granite and altered sandstones and slates. Further back from the creek, near the head of a gully, some tin has been obtained where the surfacing rests upon coarsely crystalline rock composed almost entirely of hornblende.

At Hall's claim, upon the Grampian Range, the talus on the south flank of the range is worked for stream tin. The tin ore is angular and some pieces of it are found adhering to slate, showing that it has been derived from veins traversing the slate. Near this a vein has been prospected to a depth of 50 feet in altered slates, and in the vein-stuff occur mispickel, iron pyrites, copper pyrites, black oxide of copper, zinc-blende, fluor-spar, galena, and white mica. An assay of a sample of this ore gave:—Metallic zinc, 20 per cent.; fine silver at the rate of 61 ozs. 13 dwts. per ton; no gold; no tin. This mineral yielded copper (about 5 per cent.), also a small quantity of lead.

On the summit of the range, above the surfacing, are Hall's lodes, which Mr. David has examined and will describe together with Gordon's, Campbell's, and other lodes when he has completed the survey of them, upon which he is now engaged.

At the head of Vegetable Creek, upon the Great Britain Tin-mining Company's ground, where the formation consists of altered sedimentary rocks with dykes of porphyry, there are innumerable small veins of tin ore, and it is doubtless to the disintegration of these that the shallow alluvial deposits along the creek, near the township of Emmaville, were so rich in stream tin.

Tin-bearing lodes of a somewhat different character to those of the Vegetable Creek District, occur at Ding Dong, between Deepwater on the main Glen Innes and Tenterfield Road and the Great Dividing Range, and also on the eastern side of the same range at Pheasant Creek, one of the tributaries to the Rocky River.

In portion 56, parish of Parkes, on the Dundee River, between Deepwater and Ding Dong, is the so-called "silver-lode," which consists of a small vein of quartz and felspar, strike E. 5° N., traversing coarsely crystalline granite and containing a vein from 2 to 6 inches thick of mispickel and iron pyrites. A sample of this gave on assay neither silver nor gold.

At Ding Dong, near the junction of the slate formation and granite, the latter, which is coarse-grained granite, contains irregular-shaped masses of greisen rock composed of quartz and mica in varying proportions. These masses appear to have been formed by segregation, and the tin ore occurs disseminated through them chiefly in bunches. I also saw small tin veins in the altered slates. In portion No. 141 a shaft has been sunk to a depth of 30 feet, following down a greisen lode, which is from 2 to 3 feet wide. A joint runs through the centre of it dipping S. 30° E. at 57°, and at right angles to this are other joints across the lode, some of them being open, with empty spaces 4 inches wide in places. The tin ore is in patches and scattered crystals in a shoot 10 feet by 2 feet, following nearly the line of joint. It would seem as if the tin ore had crystallized from a solution or vapour which penetrated the rock from the joint-fissure. Five of these masses of greisen containing tin, some with quartz-veins, have been prospected, and there are, no doubt, others not yet opened. Wolfram is sometimes associated with the tin. A gully drains from the hill in which these lodes occur, and at the foot of the hill it opens into an alluvial flat, in which there are probably payable deposits of stream tin. Some small tin lodes have also been found in the range near Back Creek, about 3 miles further to the east.

The tin lodes at Pheasant Creek, which are being opened by the Pheasant Creek and the King Tin-mining Companies, are similar in their mode of occurrence to those at Ding Dong, consisting chiefly of detached blows of tin-bearing greisen in granite and near the junction of the granite with metamorphic sedimentary formations. Mr. David has examined these lodes, and his detailed description of them will accompany his maps.

Mr. David and I next inspected the tin-mining country in the Inverell district. The principal alluvial workings occur in the shallow deposits about Cope's Creek and Middle Creek, and in the deep leads or Tertiary deposits which traverse the country between Cope's Creek and Middle Creek, at Red Hill, Stannifer, and Elsmore.

Here, as in the Vegetable Creek district, the shallow deposits are rapidly becoming worked out, chiefly by Chinese miners, who often work on tribute the ground held by Europeans.

The principal Tertiary leads are Jones's, Hammond's, Stannifer, Walmsley's, Brickwood, M'Millan's, Jealousy, Elsmore, from which large quantities of ore have been and still are being raised. Nearly all the leads have a westerly trend and are covered by basalt. This basalt has been traced winding amongst the granite and slate hills, past Inverell and Auburn Vale. Near Inverell the basalt from the Cope's Creek country is connected with another flow of basalt which has come down the Mackintyre Valley. The Elsmore lead is a tributary to this latter; and there is no doubt that the main channel, which has not yet been

been prospected, will be highly stanniferous in the vicinity of Newstead and Elsmore, seeing that the valley has been deeply eroded through the tin-bearing granites of those localities.

Several trial shafts have been put down in the basalt formation in search of the leads from Walmsley's, &c., but they have not as yet met with success, owing to the heavy body of water encountered. The diamond rock-drill could with advantage be employed in proving the position of the deep ground under the basalt.

The granites are in places known to be tin-bearing from above Tingha to Auburn Vale, and there is therefore every probability of the unproved portions of the leads containing rich tin drifts in patches, just as those portions of the leads do which are now being worked. As might be expected these leads have been richer in proximity to the lodes whence the tin ore has been derived.

The lodes, of which fifteen have been prospected, are chiefly narrow quartz and felspar veins and patches of micaceous greisen rock containing tin ore irregularly distributed through them.

At Elsmore the ore is met with in quartz-veins and also in patches of greisen, somewhat resembling those of Ding Dong and Pheasant Creek. At Long Gully and in several other places it occurs in veins of quartz and felspar; and at Stanuifer Bischoff, which is one of the most promising lodes in this district, it is disseminated in separate grains or crystals, associated with fluor-spar, through porphyritic granite.

The description of these lodes and of the deep leads will be given in a special report of this tin-field to accompany a map which is now being prepared, showing the position of the various tin-bearing formations.

In conjunction with Mr. Sice, Inspector of Mines, I examined the reef in the Great Victoria Amalgamated Gold-mining Company's Mine at Adelong, for the purpose of reporting upon the claim of that Company for the Government reward for having been the first to prove the existence of payable gold below a depth of 1,000 feet from the cap of the reef. The result of our examination, which was favourable to the claim of the Company, you have already received.

When the Company received the reward in 1877 for having proved the existence of payable quartz at a depth below 800 feet from the cap of the reef, the stone for the trial crushing was obtained from the north shaft.

The quartz crushed for the recent trial came from the south shaft, at a depth of about 1,030 feet which level is equal to 1,067 feet below that of the surface at the north shaft, as the latter is 37 feet above that of the south shaft, owing to the slope of the hill. The reef at the deepest level attained viz., 1,056 feet, presents the same features that it does at the higher levels. As I have before stated, it occurs in a dark greenish schist which varies in width from about 2 to 10 feet, and is bounded on both sides by well defined walls of hard quartzose granite containing black mica. The quartz-reef is sometimes over 12 inches thick, at others it makes into several veins accompanied by numerous thin thread-like veins of gold-bearing quartz interlaminated with the schist, so that in places nearly the whole width of the schist or channel of the reef is taken out for crushing. Such is the general character of the vein-stuff from the surface down to the lowest level. Both the schist and the quartz are highly impregnated with pyrites. Occasionally "horses" of granite make into the schist. The reef is nearly vertical, sometimes underlaying slightly to the east, at others to the west, but the general underlay is easterly; the strike of the reef is north 10 degrees west.

Mr. E. F. Pittman, Geological Surveyor, has inspected certain lands in connection with mining reserves, &c., in the Muttama, Mount McDonald, Carcoar, Cowra, and Mount Victoria, as well as Broughton Island and the Yalwal Gold-field. His reports upon the two latter are herewith appended. (*Vide* Appendices C and D.)

With the exception of an interval of three weeks in August and September, Mr. Pittman has, since 19th March, performed the duties of Chief Mining Surveyor.

A geological map of part of the Forest Gold-field by Mr. Hy. Y. L. Brown has recently been issued by the Department. The colour-printing of this map was carried out in the Lithographic Branch of the Surveyor-General's Department and it has been admirably executed.

The map is accompanied by diagrams of vertical sections, and notes explanatory of the geological features which show that there is a large extent of basaltic country not yet prospected, in which auriferous leads are likely to be found.

Mr. Brown's report upon this gold-field has already been published in the Annual Report of the Department for 1882.

I am happy to state that the collections of the mining and geological museum have considerably increased during the year, but for want of space for their arrangement the specimens have to be labelled as they are received and packed away. The report of Mr. J. E. Carne, the Curator (Appendix E), shows that 6,659 geological specimens were received and registered, making the total to the end of the year, 9,371. Amongst these is a large suite of minerals, rocks and fossils collected by Mr. David, myself, and the collector for the Survey, C. Cullen, illustrative of the tin-bearing formations of New England. From Mr. Slee and other officers of the department and private contributors many specimens have been received. These are mentioned in the accompanying list of donations (Appendix F.)

Two large collections, illustrating the mineral resources and geology of New South Wales, were prepared under my direction in this museum by Mr. J. E. Carne, and forwarded together with mineral and geological maps to the Amsterdam and Calcutta Exhibitions.

I have to express my obligations to Mr. Warden Martin, P.M., Mr. Henry, Mining Registrar, Mr. Alfred Cadell, C.E., of Emmaville, Messrs. McLean Bros., and Mr. S. W. Moore, J.P., of Tingha; also to many of the mining managers and miners for their assistance and information which they most generously placed at the disposal of Mr. David and myself, and which greatly facilitated our examination of the tin-fields.

I have, &c.,

C. S. WILKINSON,

Geological Surveyor in Charge.

## APPENDIX A.

## Report on Auriferous Antimony Lodes at Hill Grove and Bismuth Lodes near Glen Innes.

Sir,

According to your instructions I inspected the mining reserve at Hill Grove in the Armidale District. My report upon the land necessary to be reserved you have already received.

Within this reserve, and at a distance of about 16 miles east from Armidale, occur several antimony reefs, which have been more or less worked during the last three years. The discovery of antimony ore here is said to have been made about sixteen years ago.

The country generally consists of rocky hills of no considerable height; but Baker's Creek, which flows through it in a southerly direction, suddenly descends into a large precipitous ravine, called "The Falls," which is about 1,600 feet in depth. This abrupt valley, which, like that of the Gara Falls, opens into another of greater magnitude, is a splendid instance of the effects of the denuding agencies which have eroded the slopes of the Great Dividing Range.

The formations of the locality are granite and metamorphosed sedimentary rocks, probably of Devonian age, judging from their lithological character; but as yet I have not been able to discover any fossils by which their age could be determined.

The antimony reefs crop out in places not only on the hills but also at various levels on both sides of the deep valley. The principal ones which have been worked are Moore's, Brereton's, and the Eleanora reefs. The latter reef occurs on the highest part of the eastern side of the Falls valley, and has been traced in a north-westerly direction for a distance of nearly half a mile and into the valley.

It traverses altered slates and dips E. 40° N. at an angle of 80°. The reef consists of dark blue siliceous slate crossed by a network of quartz-veins which gives it a brecciated appearance. A granitic dyke accompanies the reef and generally divides it into two. Both the dyke and the reefs vary in thickness; thus, in the Eleanora Company's claim, the hanging-wall reef is from 6 to 18 inches thick, the dyke from 1 to 5 feet, and the foot-wall reef from 1 to 4 feet.

Oxide and sulphide of antimony (stibnite) occur in irregular bunches, and also finely disseminated through the reefs, but they are absent in places. Gold is sometimes plainly visible in the quartz.

The following assays of samples from the Eleanora mine, were made by Mr. C. Watt, Government Analyst:—

Sample from hanging-wall reef—	
Fine gold at the rate of 8 dwts. per ton.	
Silver—a trace.	
Sample from foot-wall reef—	
Fine gold at the rate of 1 oz. 4½ dwts. per ton.	
Silver                   "           16 dwts.   "	
Sample of stibnite—	
Sulphide of antimony, 79·4°. Equal to metallic antimony, 57·0°.	
Fine gold at the rate of 2 ozs. 12 dwts. per ton.	
Silver                   "           19½       "	
Sample of the dyke stone—	
Metallic antimony, 0·5°.	
Gold—a trace (under 2 dwts. per ton).	
Silver—none.	

In the adjoining Garibaldi claim the hanging-wall vein increases to 4 feet 6 inches in thickness, and contains many small bunches of stibnite; the foot-wall vein is 1 foot thick in the same section, the dyke between them 15 inches, and in the centre of the latter is a vein of nearly pure stibnite 1 inch thick. A sample from this vein gave on assay—

Sulphide of antimony, 93·7°. Equal to metallic antimony, 67·26°.
Gold—a trace.
Silver—none.

A sample taken from the hanging-wall reef consisting chiefly of stibnite, gave on assay the following result:—

Sulphide of antimony, 55·6°. Equal to metallic antimony, 39·9°.
Gold—a trace (under 2 dwts. per ton.)
Silver—a trace,

which would seem to indicate that the gold in the reefs is not always associated with the stibnite. The vein stuff has a brecciated appearance like that in the Eleanora mine. Near the northern end of the claim I saw in the slate formation several narrow quartz-veins about ¼ of an inch thick containing coarse specks of gold.

I was informed that the Eleanora Company forwarded to Sydney 36 tons 14 dwts. of vein stuff, which realized £488 2s. 4d., or at the rate of over £13 per ton.

The reef has only been proved to a depth of about 63 feet; but I am of opinion that it will continue to a considerable depth. The other antimony reefs, one of which occurs almost at the bottom of the valley at a level of about 1,500 feet below the Eleanora mine, are also stated to be auriferous, but they have only been worked for antimony.

It is questionable whether the reefs will pay to work for antimony alone, on account of the cost of transit of the ore or metal to the shipping ports of Newcastle or Grafton, but there is little doubt that they deserve special attention on account of their auriferous character.

Messrs. Newbery, Morely, and Cleveland, of Melbourne, have recently patented a process by which the antimony and gold can be separated and saved, and it is believed that it would be suitable for the treatment of the auriferous antimonial ores of these reefs. By this process the sulphide of antimony is converted into oxide, which is collected in flues specially constructed for the purpose; the gold remains with the gangue in the furnace, and can be extracted by crushing and amalgamation.

In anticipation of the future development of the reefs of this locality I have recommended the reservation of the unalienated land on a creek where there are good machinery sites on account of water.

On this creek are situated the Hillgrove Antimony Smelting Works, belonging to Messrs. Guigni, Friedmann, and Kessler, of Armidale. An exhibit of star and crude antimony from these works has been sent to the Amsterdam Exhibition.

The

The country between Hillgrove and Armidale consists of slate and granite formations, which are covered in places with tertiary drifts and basalt. On the main road, about 11 miles east from Armidale, several ferruginous quartz-reefs occur near the junction of the slate and granite. I have recommended that the Hillgrove Gold-field, open to conditional purchase, be extended so as to include this part of the district.

Mr. T. W. Edgworth David, Geological Surveyor, accompanied me, and while proceeding from Armidale to inspect the tin-mining reserves in New England, I took the opportunity of examining the bismuth lodes which are situated near the Yarrow Creek, at Kingsgate, about 16 miles east from Glen Innes.

The formations here are granite and altered slate, forming rough broken country, with valleys about 500 feet deep. The line of junction of the two formations is well defined, and the bismuth lodes occur in the granite in proximity to this line or within about 400 yards from it.

The mode of occurrence of these so-called "lodes" is very remarkable; they are *pipe-veins* or oval masses of quartz of variable thickness, descending in a more or less vertical direction in the granite, as though well-like caverns of very irregular diameter had been formed in the granite and filled with quartz and metallic minerals. Thus in one lode in the Kingsgate Company's property two masses of quartz (which the Manager, Mr. W. Yates, informed me were 30 feet apart at the surface), on being followed down, united and formed one large pipe-vein about 27 feet in diameter and of irregular shape, from portions of it protruding here and there into the granite. Nests or bunches of bismuth ore (native bismuth, sulphide, carbonate, and oxide of bismuth) were obtained about these protruding portions as well as through the mass of quartz; and in order to take out the vein-stone a large excavation about 60 feet by 40 feet has been made. The vein has only been sunk upon to a depth of 50 feet. The quartz is of a coarsely crystalline nature, and contains, in patches, a considerable quantity of molybdenite. The metallic bismuth and sulphide occur in the solid quartz, but the carbonate and oxide lie chiefly in the joint fissures in the quartz. Sometimes masses of native bismuth are found between crystals of quartz in the vein, and when removed the impress of the quartz crystals is well shown. Some splendid specimens, from 4 to 6 lbs. weight, from this mine were presented by the Company to the Mining and Geological Museum; some of them have been forwarded to the Amsterdam Exhibition. The largest mass of native bismuth found here weighed nearly 30 lbs.

Other similar veins, but smaller, have been proved, though only for a few feet in depth; one contains much arsenical pyrites and hexagonal plates of molybdenite. An average sample of these sulphides gave an assay—

Metallic bismuth, 2.6 per cent.  
 Fine gold, at the rate of 8 dwts. per ton.  
 Silver, at the rate of 3 ozs. 5 dwts. per ton.

On portion 25, about half-a-mile north-west from here, another large pipe-vein is being opened; near the surface it consists of a very ferruginous mass of quartz, about 13 feet by 9 feet, containing bismuth, arsenical pyrites, wolfram, and molybdenite. The screened vein-stuff is said to yield about 50 lbs. of bismuth ore per ton, which will probably be equal to about 1 per cent. of ore for the whole vein-stuff.

A sample of the ore, consisting of mixed particles of native bismuth, carbonate, sulphide, and oxide, yielded on assay—

Metallic bismuth, 69.3 per cent.  
 Fine gold, at the rate of 4 ozs. 1½ dwt. per ton.  
 Fine silver, at the rate of 57 ozs. 3 dwts. per ton.

The result of assay of the ironstone from this vein was 0.6 per cent. of bismuth and no gold; and the arsenical pyrites gave only a trace of gold and bismuth, with silver at the rate of 12 ozs. 5 dwts. per ton. The gold, therefore, appears to be almost entirely contained in the bismuth ore, probably in the metallic portion of it.

Several veins of a similar nature have been opened on the Glen Innes Company's property, which adjoins that of the Kingsgate Company. The Company is now sinking upon a vein which is said to have been 1 foot wide at the surface, but when I saw it at a depth of 40 feet, the lowest level then reached, it was 4 feet wide. This vein is in granite, and close to the boundary of the slate formation. The vein-stuff is thickly studded with large brilliant steel-grey plates of molybdenite, some of them being more than 3 inches in diameter. Nodules of native bismuth, larger than walnuts, with carbonate, sulphide, and oxide of bismuth, occur through the vein, and in greater quantity in places where the molybdenite becomes abundant.

Another vein situated about 100 yards from this contains besides bismuth ore and molybdenite, some arsenical pyrites, which latter yielded on assay 9.2 per cent. of metallic bismuth; fine silver at the rate of 92 ozs. 14 dwts. per ton, and no gold.

About 3 miles east from the Yarrow Creek Head Station, and about the same distance in a south-easterly direction from Kingsgate, is the Comstock Bismuth Company's mine. No work was being done here at the time of our visit; but we saw three pipe-veins of hard white crystalline quartz which had been opened for only a few feet from the surface. The shafts were partly filled with water, so that the exact size of the veins could not be measured, but the largest of them appeared to be about 6 feet by 15 feet near the surface. A sample of bismuth ore collected from the heaps gave on assay—

Metallic bismuth, 35.6 per cent.  
 Fine gold, at the rate of 2 ozs. 9 dwts. per ton.  
 Fine silver, at the rate of 9 ,, 16 ,, ,, ,,

Thus, again, we see that the bismuth ore contains gold. These veins are also in granite, and distant about 200 yards from the slate formation.

It is a somewhat remarkable feature that all the bismuth veins (eighteen) as yet found occur in the granite within a short distance from the slate; and it is probable that on further examination of the country along the line of junction of the two formations other veins will be discovered. The bismuth lode in the Silent Grove mine occurs under the same conditions, viz., in granite close to its junction with altered slates, and it is of similar character to those above described.

I may here mention that about 12 miles north from Glen Innes, and about 1 mile east from the Tenterfield road, several bismuth and tin-bearing quartz-veins have been discovered. These occur in

canvas buckets by steam power night and day at the rate of 7,000 gallons an hour for over seven weeks; this has permanently reduced the water-level at the east shaft, over 30 chains distant, by 6 feet 3 inches. This Company are about to fix a powerful steam pump in the east shaft so that the water may be exhausted from both shafts simultaneously, and as the area to be drained must be narrowing with the depth it may reasonably be expected that they will be able to bottom their shafts within a few months.

Below Barry's portion, Reid and others are sinking in the basalt, but have not yet bottomed their shafts. West of H. Gordon's cultivation paddock, the basalt runs through a narrow gut, between low hills of granite and quartz porphyry. A tin lode, and several leaders of tinstone occur here in the rocks bounding the lead, which must have shed stream tin into its channel. From this point the basalt runs north to Kangaroo Flat, in a belt about  $1\frac{1}{2}$  mile broad and 6 miles long. This wide extent of deep lead country has hitherto been very little prospected. The existence of shallow leads has been proved on the western side of the made country at Mount Doubtful in 148 Arvid, and again on the eastern side at Hogan's shallow lead, in portions 86, 87, 88, &c., Arvid. In portion 187, parish of Arvid, the Wesley brothers are sinking, nearly in the centre of the basalt country. Their shaft is now over 220 feet deep, and still in hard basalt. At Kangaroo Flat, Hall Brothers have for several years past been working the stream tin gravels under the hard lava. The bottom of the lead here is about 700 feet below the level of Vegetable Creek. In several places here the basalt has been partially cut away by the present creeks, so as to expose a good outcrop of tin gravel along the steep slopes of the clay-slate, quartz-porphry, and granite hills.

At the Avoca Mine,  $\frac{1}{2}$  mile north of Kangaroo Flat, there is an outcrop from under the hard basalt of coarse well waterworn shingle gravel and sand, with fine stream tin, but not sufficiently concentrated to be payable. A similar outcrop of sand, gravel, and shingle occurs at the Fishing Grounds,  $2\frac{1}{2}$  miles further west. Here the basalt terminates abruptly at the edge of the deep ravine, cut through the granite by the Beardy River; the stream tin gravels crop out at the base of the basalt, strewing the steep granite slopes below them with showers of shingle and sand, so as to present the appearance of an old sea-beach. A similar coarse gravel occurs in the lowest of three alluvial terraces, at the Surprise Tin-mines. It is doubtful whether this coarse well waterworn shingle is of marine or of fluvial origin. The fossil leaves and ferns so abundant in the Rose Valley Lead at Vegetable Creek seem entirely absent from these strata; nor have any fossils, as far as I am aware, been found in them. The Surprise Tin-mines lie about a mile to the south-west from the Fishing Grounds. Good stream tin has been worked in the middle and upper gravel terraces. Outcrops of stream tin gravels are met with at Hall's Sugarloaf, Paddy's, Sugarloaf, and at several other points along the north-western end of the lead. As then payable stream tin has been proved to occur both at the lower and upper ends of the deep leads, and some of the rocks bounding the leads in the intervening country, are tin-bearing, it seems more than probable that extensive deposits of payable tin stream gravel will be found in the unproved country, between Barry's and Kangaroo Flat. As already stated, over 2 miles of very promising deep lead country have still to be worked between Fox's and Barry's; there need therefore be no apprehension lest the tin-fields of this district be worked out for many years to come.

I have, &c.,

T. W. EDGEWORTH DAVID,

Geological Surveyor.

The Government Geologist in Charge.

#### APPENDIX C.

### Report on Broughton Island.

Sir,

Department of Mines, Sydney, March 22, 1883.

I have the honor to inform you that, in accordance with your verbal instructions, I proceeded to Newcastle on the 6th instant, and joining Mr. District-Surveyor Allworth on board the Government steamer "Ajax," accompanied him in his expedition to Broughton Island, of which I made a geological examination.

Broughton Island is about  $1\frac{1}{2}$  mile in length from east to west, and about three-quarters of a mile in breadth from north to south. The surface is more or less undulating, but rises abruptly to the eastward to a height of 260 feet, opposite the small island known as Outer Broughton. The island is entirely destitute of trees, the only vegetation being grasses and wild flowers which grow in great luxuriance on that side of the island where they are sheltered from the prevailing winds. The geological formation is carboniferous sandstones and shales, overlaid by coarse conglomerates. The strata have been very much disturbed and contorted in places by the intrusion of volcanic dykes, which have had the effect of converting the sandstones and shales in their immediate vicinity into extremely hard cherty rock. These volcanic dykes have traversed the stratified rocks in a direction at right angles to their strike, and in several instances the intrusive rock has been decomposed, and subsequently removed by denudation, leaving precipitous canon-like ravines of about 6 feet in width, 50 feet in depth, and 100 yards in length. I was unable to descend into these ravines owing to the perpendicular nature of the walls and ends, the entrance towards the sea being closed by the tide.

The soil of the island is for the most part sandy, except in the neighbourhood of these intrusive dykes, the decomposition of which has given rise to a rich black soil. There is no permanent surface deposit of water on the island, but I am of opinion that if a shaft were sunk in the centre of the land through the deposit of alluvium and conglomerate, water would be obtained on the impervious rock underlying the latter, as in several places along the cliffs where the rocks are exposed in section I observed a drip of fresh water issuing from between the conglomerate and the underlying sandstones.

The coast of the island is mostly rocky and precipitous, so much so that it would be a difficult matter to land from a boat anywhere except on the patches of sandy beach, several of which are to be found round the island. The safest landing-place in rough weather would be Esmeralda Bay, at the head of which one of these sandy beaches occurs.

Owing probably to the contorted and metamorphosed nature of the rocks, I was unable to discover any traces of fossil organic remains. Evidence of the disturbing influences which have been at work amongst the rocks forming the island will be seen from the various dips of the strata, which I have marked in several localities on the accompanying tracing, for which I am indebted to the courtesy of Mr. D. S. Allworth.

I have, &c.,

EDWARD F. PITTMAN, Assoc. R.S.M.,

Geological Surveyor.

The Government Geologist in Charge.

APPENDIX

## APPENDIX D.

Sir,

Department of Mines, Sydney, March 28, 1883.

I beg to inform you that in accordance with your instructions I have inspected the Yalwal Gold-field, and have now the honor to report thereon as follows:—

The so-called Yalwal Reefs occur in a belt of highly indurated Silurian slates and sandstones having a north and south strike, the beds being more or less vertical. The mountains on either side of the valley of Danjera Creek, where the reefs occur, are capped with high cliffs of carboniferous sandstone, so that the gold-bearing rocks visible at the surface are confined to a narrow strip, little more than a mile in width, and following pretty regularly the course of Danjera Creek. Intrusive dykes of syenitic granite are of frequent occurrence through the belt of slate, while in proximity to the reefs is a greenstone or diorite dyke, with which no doubt the occurrence of the gold is intimately connected.

Strictly speaking the term "reef" can scarcely be applied to the formations from which the gold in this locality is obtained. They have more the appearance of beds of quartzite, the result of excessive metamorphic action upon highly siliceous slates and sandstones. In character the stone reminds me very much of the gold-bearing stone from Mount McDonald, and which I had hitherto regarded as peculiar to that locality. The reefs (?) have no distinct walls, and have occasionally been worked for a width of 60 feet, everything within that width being sent to the battery. The gold now being obtained is excessively fine, and occurs for the most part in pockets and joints where a rusty deposit of oxide of iron exists, due to the decomposition of pyrites. This points to the inference that the iron pyrites (of which the stone contains a moderate proportion) should be rich in gold, but as far as I could ascertain no efforts have hitherto been made to save the pyrites from the blankets of the crushing machines, and consequently no assays have been made.

At the present time the only claims at work on the field are (1) the Pinnacle, (2) Eclipse (better known as No. 2), (3) the Pioneer, (4) the Homeward-bound, (5) the Poor Man's.

The Pinnacle claim was first opened in the year 1873, when some exceedingly rich broken stone was found on the surface, yielding as much as 23½ ozs. of gold per ton by hand crushing. Several thousand tons of stone have since been taken out of this mine in open cuttings or quarries. Some of it was very rich, more especially that near the surface; much of it on the other hand yielded only 4 dwts. of gold per ton. Attached to this claim is a battery (almost new) of fifteen head of stamps driven by a portable engine. The engine and machinery are in first-class order, but as is the case with all the batteries on this field no special appliances have been provided for saving the gold, and this is more to be regretted on account of its extreme fineness, which doubtless causes a considerable loss in crushing. Messrs. Denny and Palmer have lately purchased this battery, together with the claim, and are now engaged cutting a tramway round a precipitous part of the mountain to enable them to remove a paddock of some 200 tons of stone which have been extracted and now await crushing.

In the Eclipse claim, adjoining the Pinnacle, a considerable amount of work has also been done. A tunnel has been driven and communication opened with the Pinnacle workings. In this claim the stone has been taken out and crushed with varying results for a width of 60 feet. This mine has also a battery (ten head of stamps) of its own, and at the time of my visit a parcel of stone was being put through which gave a prospect of about 10 dwts. of gold per ton.

The Pioneer mine has also been working for some years with a record of variable success. In one portion of the mine a lenticular mass of stone of about 200 tons gave an average yield of 2 ozs. per ton. On another of these lenticular masses a shaft 160 feet deep was sunk, and about 2,000 ozs. of gold were extracted from stone averaging 1 oz. 5 dwts. per ton. The stone became poor at the bottom and operations were ceased in that locality. They are now driving at a depth of 45 feet on the chance of striking another shoot of gold.

The Homeward-bound Company are at present working an open quarry at the surface. The gold is visible in small veins of gossan running through the stone irregularly, and probably derived from the decomposition of pyrites. The last crushing from this spot yielded 1 oz. per ton nearly. This mine is also pierced by a long tunnel (nearly 300 feet) which was put in from the side of the mountain to strike the bottom of their shaft. Several slides came in in this tunnel, each slide carrying a large body of stone containing from 4 to 10 dwts. of gold per ton. Several crushings were also made of stone taken from the shaft (where these slides were encountered) and yielded from 9 dwts. to 1 oz. per ton, the richer yield being from near the surface. Another patch of 100 tons was extracted by quarrying at the surface near the shaft and yielded an average of 3 ozs. 13 dwts. per ton.

The Poor Man's Claim is situated on a hill at the northern end of the field. What is known as the main lode here bears north and south, and dips to the west at an angle of 50°. It is 6 feet wide, and showed gold at the surface, but became poor below. A cross lode running in a north-westerly direction, and vertical, has been worked to some extent. It is about 8 feet in width, and up to the present time has averaged 10 dwts. per ton.

A number of other reefs have been opened on different parts of the field, but the prospects are not sufficiently encouraging to warrant further expenditure.

The country is extremely rugged and broken, and prospecting is consequently a matter of difficulty and expense. The gold obtained from this field is of poor quality—the average value of it being about £3 8s. per ounce. At one time there were as many as 200 miners on the field, but there are now only 16. The road from Nowra to the gold-field (20 miles) has been improved by the Government as far as what is known as "The Gap," on the top of the range, 2 miles from the reef, but from the Gap to the township (a descent of 1,000 feet) the track is almost impassable. A small sum of money spent in removing some of the sandstone rocks would be a great boon to the miners. At the present time provisions are worth 25 per cent. more in Yalwal than they are sold at in Nowra, owing to the cost of packing over this road.

From the foregoing remarks it will be seen that past results have not given very much encouragement to the belief that the gold-bearing stone at Yalwal will become much richer at great depths, nor from what I saw of the reefs already opened—the peculiar character of the stone, and the absence of well defined walls—should I feel justified in describing them in very glowing colours. The advantages of the field are that the gold-bearing stone occurs in great width, and that it can be easily extracted, so that with cheap crushing arrangements (and with plenty of support there is no reason why the battery proprietors should

not

not crush at a much cheaper rate than they have hitherto done), a great quantity of stone could be treated, and the margin of profit, if not very large, would at any rate be constant.

I was surprised to find that scarcely any prospecting has been done for alluvial deposits. Danjera Creek, below where the reefs occur, may reasonably be expected to contain gold in payable quantities, yet, though there appear to be no special difficulties to prevent prospecting, no one, as far as I could learn, has ever given it a fair trial.

About 4 miles up the creek from the reefs is a lode (striking in a northerly direction) which was opened with the idea of prospecting it for copper. This lode appears to be about 4 feet wide (and vertical), and did at the surface show stains of blue and green carbonates of copper, besides occasional patches of black oxide. At the depth of a few feet, however, it developed into a lode of zincblende and iron pyrites, both of which occur in rather a massive state.

I also inspected another lode which is being prospected for copper. It is situated in granite country on one of the branches of the Bundundah Creek, or "Right Arm," as it is locally called. The ore consists of hematite, galena, and a little copper, and an analysis by Mr. Watt yielded 20.8 per cent. lead, 3 per cent. copper, and 6 ozs. of silver per ton. The lode is from 18 inches to 2 feet in width.

I have, &c.,

EDWARD F. PITTMAN,  
Assoc. R.S.M., Geological Surveyor.

The Geological Surveyor in charge.

#### APPENDIX E.

### Report of the Curator of the Mining and Geological Museum.

Sir,

I have the honor to furnish the following particulars regarding the Mining and Geological Museum and Library, during the year ending 31st December, 1883.

The number of donations received amount to 363, of these 175 are publications.

6,659 geological specimens were registered, making the total to date 9,371.

The practical sympathy, evoked by the destruction of the Museum in 1882, of which I reported last year, has continued unabated, as evidenced by the many large and valuable collections received during the present year, a detailed list of which is appended.

Among the principal the following were from this Colony:—Collections of copper-ores from Cobar and Nymagee copper-mines, per Mr. George Hardie, manager; collection of copper-ores from the New Mount Hope Company mine, per Mr. J. W. Bryant, manager; collection of tin-ores from the Glen Smelting Company, Tent Hill, New England, per Mr. J. Reid, managing partner; collection of Boorook silver-ores, per Messrs. Hall and Davy; collection of minerals from the Braidwood district, per Mr. W. Clarke; collection of minerals and fossils from the Lunatic district, per Mr. E. Field; collection of minerals and fossils from New England, per Mr. D. Porter; collection of tertiary plants from Kiandra, and tertiary and Permian flora from Warrumbungle mountains, per Mr. W. L. R. Gipps; collection of Carboniferous fossils and sandstone from Ravensfield, per Mr. T. Browne; collection of auriferous ores from the New Reform gold-mine, Lucknow, per Mr. H. W. Newman, manager.

#### *Collections made by Officers of the Department.*

Collections of auriferous antimony and other ores from Hillgrove, near Armidale; collections of minerals from Ding Dong Tin-mines, near Deepwater; collection of minerals from Hogg's Creek, near Dundee; collection of minerals from Railway cuttings, near Glen Innes; large collection of minerals and fossils from Elsmore; large collection of minerals and fossils from Vegetable Creek district; collection of auriferous quartz and associated rocks from Adelong, per the Government Geologist; collection of minerals, rocks, and fossils from the Vegetable Creek district, per Mr. T. W. E. David, Geological surveyor; collection of iron ores from Lithgow, per Charles Cullen, collector; collection of silver ores from Thackaringa, per Mr. W. H. J. Slee, Inspector of Mines.

Queensland, through the Trustees of the Queensland Museum, has contributed casts of the femur, tibia, osmagnum, atlas vertebra, and lower mandibles of the *Diprotodon Australis*; through R. L. Jack, F.G.S., Government Geologist for Northern Queensland, a collection of the fossil fauna of the country passed through by the Northern Railway, 31 miles from Townsville; through Mr. T. H. Hale (Sydney Arcade), large blocks of auriferous and argentiferous zinc blende and pyrites, from the Black Jack Mundie Company, Ravenswood; and argentiferous galena, from the Silver Valley Silver Mining Company, Herberton; through Mr. D. Marks (Sydney), collection of minerals from Herberton; through Mr. Warden Martin (Glen Innes), collection of tin-ores from Wild River, Northern Queensland; through Mr. G. D. Hirst, collection of minerals and Carboniferous fossils from Northern Queensland; through Dr. J. R. M. Robertson, F.R.S., &c., collection of tin ores from Herberton.

From South Australia has been received through Professor Ralph Tate a collection of Miocene fossils; through Mr. J. A. Johnson a collection of minerals and fossils.

From New Zealand, Dr. Julius von Haast, Director of the Canterbury Museum, has forwarded a large suite of rocks, minerals, and fossils. Professor Ulrich, M.E., F.G.S., has also forwarded a collection of minerals from that Colony; a number of specimens of native copper and copper-ores in serpentine from near Nelson have been received from Mr. S. S. Vale, Newcastle.

From Tasmania Mr. G. Thorne and Mr. J. Bisdee have forwarded collections of the fossil flora of the Secondary Coal Measures at Spring Hill, and Carboniferous marine fauna, from the Hutton Park Company's estate, 8 miles north-east of Bothwell.

From New Caledonia collections of nickel, cobalt, and manganese ores, and chromite, have been received through the liberality of Messrs. Ratte, O. Montefiore, and Thomas Martin.

From India the Museum and Library have been enriched by a large and interesting collection of fossils, rocks, and publications forwarded by the Superintendent of the Geological Survey of India, H. B. Medlicott, M.A., F.R.S.

As the collection of fossils include a number of fossils illustrative of the coal-bearing Triassic strata of India, some of the species of which are identical, and others closely allied, with the flora of the upper  
and

and lower coal measures of this Colony, they will prove valuable for reference and comparison, and as an illustration of Dr. Feistmantel's (of the Geological Survey of India) views as to the third appearance of the *Glossopteris*, which is one of the characteristic plants of the abovementioned formations in Australia.

It also includes a number of Cretaceous fossils which will aid in the identification of those obtained from the Cretaceous strata of the north-western portion of New South Wales.

The publications are an important addition to the Library, as they are valuable works of reference, numbering 116 volumes of the *Palæontologia Indica*, the "Records" and the "Memoirs" of the Geological Survey of India, with a Manual of Geology in three parts, with map.

This Department has reciprocated by instructing the Representative Commissioner for New South Wales to the Calcutta International Exhibition, to hand over to Mr. Medlicott, the typical collection of minerals and fossils of New South Wales exhibited by the Honorable the Minister for Mines.

During the year typical collections of minerals and fossils were prepared and forwarded to the Amsterdam and Calcutta International Exhibitions. At the former the collection obtained a diploma of honour, the highest awarded; at the latter the awards have not yet been made.

A small collection and six glass cases were lent to the Committee of the Parramatta Juvenile Industrial Exhibition.

Eleven glass cases ranging from 6 feet by 2 feet to 14 feet 6 inches by 5 feet, were handed over to this Museum by the Trustees of the Australian Museum, making the total number in hand thirty.

After the removal of the Geological Survey Office to Lady Young Terrace, the space afforded by the basement was occupied for the display of a collection of the minerals and fossils of the Colony; but the limited space available does not allow of a fair representation of the wealth of materials at command. The balance of specimens are all carefully packed in cases and stowed in the shed erected in the yard and in the outhouses. From their crowded state, and from want of room for sorting, it has been found impracticable to make up collections for exchange purposes, etc., which would necessitate the overhauling and unpacking of each case; this will be done as soon as more suitable accommodation is provided.

Mr. Duff, Chief Forest Ranger, informs me that he has eighty-one specimens of timbers of the Colony and twenty-six of Lord Howe Island, cut and polished ready for display; and that other specimens are being collected, together with the seeds and foliage of the flora of New South Wales; so that, with these and the mineralogical and geological specimens now in hand, a splendid display could at once be made, illustrating the valuable resources of the country, as well as furnishing an instructive guide to mineral explorers.

I have, &c.,

JOSEPH E. CARNE, Curator.

The Geological Surveyor in Charge.

#### APPENDIX F.

##### DONATIONS to the Mining and Geological Museum for the year ending December 31st, 1883.

Donor.	Donation.	Locality.
Mr. G. Thorne	Fossils from the Secondary Coal Measures	Spring Hill, Tasmania.
Mr. J. J. Robertson	Chlorite schist	Captain's Flat, near Queanbeyan.
Mr. F. Ficus	Variagated sandstone	Alligator River, Port Darwin.
Mr. A. Armstrong	Copper ore	Murrumbidgee Copper Company's Mine.
Mr. J. B. Ryall	Petrified wood	Top of range between Cooranbong and Maitland.
Mr. C. Heine	Bones of Diprotodon and Macropus	Holdfast, 15 miles south of Moree.
Mr. J. W. Bryant	Copper ores	New Mount Hope Copper-mine.
Great Cobar Copper Co., per G. Hardie, manager	Collection of copper ores	Cobar.
Mr. C. Orchard	Auriferous quartz	Tasmanian Gold-mine, Beaconsfield.
Mr. D. Marks	Collection of minerals	Herberton, Queensland.
New South Wales Shale & Oil Company.	Kerosene Shale	Hartley.
Rev. W. Allworth	Devonian fossils	Moriya.
Mr. S. L. Bensusan	Artificial sulphide of tin	Pymont Smelting Works.
Mr. W. H. Buckley	Auriferous ironstone	Conoblas, near Orange.
Mr. J. Berry and party	Carbonate of copper	2 miles from Tomingley Quartz-reefs, near Bogan River.
Mr. J. Bulkeley	Collection of Carboniferous fossils	Capertee.
Mr. O. Montefiore	Block of nickel ore, manganese and gypsum	East Coast, New Caledonia.
Mr. C. S. M'Glue	Rhodonite	Near Bendemeer.
Mr. D. Donogherty	Lode tin ore	Bischoff Tin-mine, near Stannifer.
Mr. J. Bisdee	Collection of Mesozoic fossils	Spring Hill, Tasmania.
Mr. T. Condlan	Auriferous and other specimens	Lion Reef, Lionsville.
Mr. C. Knowblanche	Copper ores	Cheshire Copper Lode, near Cudgegong.
Mr. Paulson	Auriferous and associated rocks	Mountain Maid Reef, Coolongolook.
Glen Smelting Co., Mr. J. Reid (managing partner)	Lode tin ore	From the Torrington, Ottery's, Graney's, Old Gulf, Elliott and party's, Treviella and Co.'s, tin lodes, New England.
Mr. Bassetti	Metallic arsenic and gold, native copper, pyrites, &c.	Lion Reef, Solferino.
Mr. Quin, M.P.	Galena	Umberumberka.
Do	Quartz, granite, and ironstone, slate and gypsum	Mount Browne.
Brickwood Tin-mining Co., per Mr. W. Shenstone, Manager	Stanniferous wash	Brickwood Tin-mine, Tingha.
Mr. G. D. Hirst	Carboniferous fossils, iron and copper ore, calcite, &c.	Northern Queensland.
Mr. W. G. M'Arthur	Coal	Sandakan, N.E. coast of Borneo.

## APPENDIX F—continued.

Donor.	Donation.	Locality.
Mr. Warden King.....	Galena, gypsum, ironstone concretions, Cretaceous fossils.	Mount Browne District.
Mr. J. R. M. Robertson, M.D., C.M., F.G.S.	Collection of tin ores .....	Herberton, Queensland.
Mons. Ratte .....	Nickel ores .....	East Coast, New Caledonia.
Mr. E. L. Murray, M.P. ..	Copper ore and asbestos .....	Carangera, near Orange.
Do .....	Blende, and pyrites .....	Just in Time Reef, Charter's Towers, Queensland.
Mr. S. Woolfson .....	Native bismuth .....	Kingsgate, near Glen Janes.
Do .....	Coal .....	Burrum Coal-field, Queensland.
Do .....	Manganese ore .....	Gladstone, Queensland.
Mr. L. Field .....	Auriferous and associated rocks, arsenic, antimony, &c.	Golden Crown, Perseverance, and Caledonian Reefs, Lunatic.
Do .....	Copper ore, rocks, and fossils .....	Lunatic District.
Mr. Warden Martin .....	Collection of tin ores.....	Wild River, Northern Queensland.
Canterbury Museum, New Zealand, per Dr. J. Van Haast.	Collection of minerals and fossils .....	From New Zealand.
Mr. J. A. Johnson .....	Collection of minerals and fossils .....	From Adelaide
Mr. B. Davy .....	Silver ore.....	Messrs. Hall and Davy's Boorook Silver-mines.
Mr. W. M. Harris .....	Stibnite .....	Hillgrove, near Armidale.
Mr. W. H. Whittel .....	Galena .....	From Thackaringa.
Mr. R. McDonald.....	Stalactites .....	From Elleston Caves, Liverpool Range, near Murrumbidgee.
Do .....	Pyritous quartz .....	Denison Diggings.
Mr. Gill, M.P. ....	Diallage .....	Near Nundie.
Mr. Nicholls .....	Diamond drift gravel .....	Bingera.
Mr. D. Hartley .....	Tin ore .....	Manilla.
Professor Ulrich, M.E., F.G.S.	Collection of minerals .....	New Zealand and Tasmania.
Mining Registrar .....	Auriferous quartz .....	From various reefs at Nana Creek.
Per S. Dixon .....	Bornite .....	Balbhannah, South Australia.
Mr. J. B. Engellan .....	Zinc blende .....	8 miles west of Gundagai.
Mr. Ratte .....	Manganese ore.....	Gomen, New Caledonia.
Do .....	Nickel ore .....	Onzangon Mine, New Caledonia.
Professor Tate .....	Collection of Miocene fossils .....	South Australia
Mr. Hyam Moss .....	Calyx of encrinite .....	Nowra.
Mr. Hall .....	Carbonaceous shale .....	Near Waleha.
Mr. E. Lowe .....	Native copper .....	Giulambone.
Mr. P. Ryan .....	Belemnite from well 300ft. deep .....	Urisino Station, west of Paroo River.
Mr. Woods, L.S. ....	Coal and ironstone .....	Numantia, Blue Mountains.
Mr. Coleman .....	Opalescent sandstone .....	Between Ballma and Lismore.
Do .....	Auriferous quartz .....	Austin Vale, Richmond River.
Mr. J. Salas .....	Collection of rocks and minerals .....	Eleanora Mine, Hillgrove, near Armidale.
Mr. A. W. Moyncaux ..	Calcite from 900 ft. level .....	Adelong.
Mr. C. Knowblanche ..	Iron ore .....	Hume's property, Yass.
Mr. W. B. Christie ..	Copper ore .....	Cooroowong, 12 miles from Delegate.
Do .....	Galena .....	Quedong.
Mr. D. A. Porter .....	Collection of fossils and minerals .....	Tamworth District.
Mr. W. R. Gibbs .....	Flagging .....	Buckingbong Quarry, near Narrandera.
Mr. C. Featherstonhaugh.	Carbonaceous shale with layers of bituminous coal.	Gorianiwa, near Mundooran.
Mr. Buckley (Senior-Constable) .....	Block of sandstone, with impressions of Miocene leaves.	Dalton.
Mr. D. Wilson .....	3 samples of pyrites.....	Victoria Reef, Adelong.
Mr. C. Bliss .....	Collection of rare gold and silver ores .....	Colorado, America.
Mr. J. Wicks .....	Iron ore and manganese .....	Cuundi Station, 50 miles from Tamworth.
Mr. H. Trenchard .....	Collection of fossils and minerals.....	Newcastle District.
Mr. Sandham .....	Specular iron.....	Bibbenluke, near Bombala.
Mr. D. A. Porter .....	Asbestos .....	Near Tamworth.
Mr. W. Clarke .....	Collection of minerals.....	Bradwood District.
Mr. J. W. Bryant .....	Copper ores .....	New Mount Hope.
Mr. Sandham .....	Asbestos .....	Near Gundagai
Do .....	Phosphatic rock.....	Purdie Islands.
Trustees of the Queensland Museum.	Casts of bones of the Diprotodon .....	Queensland.
Mr. Kesterton .....	Common opal .....	do
Mr. D. Munro .....	Large block of auriferous quartz .....	15-acre Gold-mining Company, Nana Creek.
Messrs. Powell & Co., per Mr. H. A. Wiggan.	Auriferous ores .....	Mt. Ephraim, Hanging Rock, Nundie.
Mr. W. L. R. Gipps .....	Collection of Tertiary leaves .....	Kiandra.
Sir E. Strickland .....	Samples of strata bored through by diamond drill.	Dora Creek.
Mr. Mandelson .....	Molybdenite .....	Bolivia, near Glen Innes.
Mr. J. B. Engellan .....	Asbestos and associated rocks .....	Jones' Creek, Gundagai.
Mr. J. D. Leccc .....	Aragonite (cave pearls) .....	Near Uralla.
Mr. Haager .....	Specimens of strata passed through by diamond drill.	Barber's Creek, near Marulan.
Mr. J. G. Lodwidge ..	Collection of minerals .....	Belgium.
Mr. Bassetti .....	Rock crystal .....	Eungar Creek, 8 miles from Lunatic.
Mr. W. England .....	Peroxide of manganese .....	Mih Creek, 15 miles from Armidale.
Mr. W. M. Rothery .....	Copper ore from outcrop of lode .....	Chiefden Estate, near Carcoar.
Mr. Stuart .....	Lode tin ore .....	Tableland, near Emmaville.
Mr. J. H. Graney .....	do .....	Graney's lode, near Emmaville.
Mr. H. Gordon .....	Hornblende felspar.....	Kangaroo Flat, near Emmaville.
Do .....	Pyrites in iron ore .....	Roedy Flat, near Inverell.
Mr. J. Reid .....	Acicular crystals of smelted tin containing iron.	Glen Smelting Works, Teat Hill.
Mr. T. Chandler .....	Lode tin ore .....	Torrington Lode, near Emmaville.
Do .....	Stream tin ore.....	Rotlschild mine, near Emmaville.
Mr. J. Flannery .....	Tin wash (cement) .....	Flannery's mine, near Emmaville.

## APPENDIX F—continued.

Donor.	Donation.	Locality.
Mr. C. Knowblanche .....	Copper ore from 92, 96, and 100 feet levels .....	Cheshire Copper Mine, near Cudgegong.
Mr. G. F. Scott .....	Rich gold specimens from 20-foot levels .....	J. and J. Evans' claim, Sandy Creek, county Buccleugh.
Do .....	do do do .....	Reedy Flat, County Wynyard.
Mr. H. Grono .....	Lepidodendron .....	Cedar Creek, Cox's River.
Do .....	Spirifer disjunctus .....	Kowmung River, near Cox's River.
Dr. R. L. Jenkins .....	Coal in Hawkesbury sandstone .....	Nepean Tunnel, between Pheasant's Nest and Cataract River.
Mr. J. Reid .....	Artificial oxide of tin and smelted tin.....	Glen Smelting Works, Tent Hill.
Mr. W. Cadell .....	Stream tin ore.....	Deepwater Station, New England.
Messrs. Vincent Brothers..	Native bismuth and bismuth ore. ....	Glen Innes.
Mr. T. Cubis.....	Stream tin ore.....	Emanville.
Mr. S. W. Moore.....	Native's stone hatchet .....	Tingha.
Mr. G. Maclean .....	Rock crystal .....	do.
Messrs. Pemberty Bros. ....	Tertiary leaves .....	Elsmore.
Mr. Gaffney.....	Lode tin ore.....	Pleasant Creek Tin Mines.
Messrs. Wood & Gilligan	Stream-tin ore.....	Wood & Galligan's claim, Gilghi, near Inverell.
Mr. W. Tims & Co. ....	do .....	do do do do
Mr. H. B. Medicott, M.A., F.R.S., Superin- tendent of the Geological Survey of India.	Collection of fossils rocks, and publications ..	Geological survey of India, Calcutta.
Mr. Cooper .....	Iron ore .....	Boro, Long Swamp, between Goulburn & Bun- gendore.
Mr. C. S. McGlue.....	Carboniferous fossils .....	Head of Clyde River.
Mr. R. L. Jack, F.R.G.S., F.G.S., Government Geo- logist for Northern Queensland	Collection of fossil corals .....	Northern Railway Line, 31 miles from Towns- ville, Queensland.
Mr. W. Matchett.....	Copper ores .....	3 miles south of Gundagai.
Do .....	do .....	Brungle, Tumut District.
Do .....	Asbestos and serpentinite .....	South Gundagai.
Mr. W. C. Sharland .....	Bones in limestone.....	Binda.
Mr. H. Pyemont .....	Specular iron ore .....	18 miles from Bathurst.
Mr. D. Wilson .....	Large framed photograph of the Reefer Quartz- crushing machine, proprietors, Messrs Wilson & Ritchie.	Adelong.
Mr. J. Howels .....	Pyrites .....	Dunlop Well.
Do .....	Opal .....	Mount Margaret, Wilson River, Queensland.
Mr. F. H. Burslem, junr..	Jet and fireclay .....	Dubbo Coal-mine.
Mr. T. Browne.....	Sandstone and carboniferous fossils .....	Ravensfield Quarry.
Mr. A. W. Page .....	Pyritous stone.....	Brown's Creek, near Blayney.
Mr. Fletcher, M.P. ....	Sandstone and conglomerate .....	Table Top.
Mr. T. Rose .....	Copper ore .....	Wellington.
Mr. T. H. Hale.....	Argentiferous galena from the Silver Valley Silver-mining Company's Mine.	Herberton, Northern Queensland.
Mr. J. Thompson .....	Copper ore .....	Cootalantra, 18 miles from Cooma.
Mr. S. L. Bensusan .....	Bismuth sulphide and bismuth arsenio-sulphide	Kingsgate, near Glen Innes.
Do .....	Bismuth carbonate.....	Silent Grove, New England.
Secretary of the House Committee, Randwick Asylum.	Nine cases of diamond drill cores .....	From a bore at the Asylum Grounds, Randwick.
Mr. C. Knolling .....	Asphaltum .....	Near Montrey, California.
Mr. J. Green.....	Ironstone concretions.....	Near Bingera.
Mr. J. Glover .....	Manganese ore.....	Bendemeer.
Mr. O. Blackett.....	Ruby tin ore, sapphires, garnets, and corundum sand.	Tingha.
Mr. A. Armstrong .....	Carbonaceous shale with impressions of Glosso- ptoris.	Depth 580 ft., Stockton Point.
Mr. J. Wilson .....	Aboriginal stone hatchets.....	Glyndon, near Oberon.
Mr. H. Ford, foreman Go- vernment water augers	Diprotodon molars from depths 31 ft. 6 inches	Government water-bore B, 51 miles west of Bourke.
Mr. T. H. Hale.....	Large block of auriferous and argentiferous lode stuff with zinc blende and pyrites.	Black Jack Mundie Company, Ravenswood, Queensland.
Mr. Green .....	Gray sulphide of copper .....	Bingera.
Mr. Hamilton .....	Coal .....	Mitlagong.
Mr. E. D. Turner.....	Sulphate of alumina .....	2 miles from Captee Camp, Crown Ridge.
Mr. J. Seaver, M.S. ....	Collection of minerals .....	Gundagai District.
Mr. C. Haager .....	Samples of strata passed through by diamond drill from 450 to 480 ft.	Barber's Creek, near Marulan.
Mr. A. Croxon .....	Cretaceous fossils from wells in Mount King, east.	North-west portion of Colony.
Mr. Blair, L.-S. (per Sur- veyor-General).	Gold .....	Nundle.
Mr. W. Clarke .....	Fossils .....	Sugarloaf Mountain, Braidwood district.
Do .....	Coal .....	Pigeon-house Mountain, Southern Coast.
Do .....	Iron and carbonate of lead .....	Nerriga.
Mr. W. Williams (per Inspector of Mines.)	Two large blocks of auriferous quartz, showing free gold.	Currajong mine, Adelong.
Mr. Walker .....	Agates .....	Queensland.
Mr. A. Armstrong .....	Coal .....	Baltimore, near Dubbo.
Mr. E. H. Becke .....	Antimony ore and associated rocks .....	Carangula Antimony Company's mine, Carangula.
Mr. C. S. McGlue.....	Greisen, with tourmaline, tourmaline rock, and rhodonite.	Giant's Den, 14 miles north-west of Bendemeer.
Mr. A. Armstrong .....	Diamond-drill core, showing developmental frond of Glossopterus.	Stockton Point, depth, 815 feet.
Mr. E. C. Dunn .....	Cobalt ore .....	Bungonia.
Mr. Ruzicka .....	Two rich specimens of auriferous leader .....	Lady of the Mountain mine, Nundle.
Mr. C. S. McGlue .....	Quartz and rhodonite .....	Giant's Den, near Bendemeer.
Mr. W. Coupland .....	Copper ore .....	Dungowan lodes, Peel River.

## APPENDIX F—continued.

Donor.	Donation.	Locality.
Mr. J. Bisdee (per Mr. G. Thorne).	Carboniferous fossils, Hutton Park Company's Estate.	8 miles north-east of Bothwell, Tasmania.
Mr. Macdonald.....	Coal.....	Ulladulla.
Mr. P. Davis.....	Copper-ore.....	Eugowra.
Do.....	Rock specimens.....	Bogan Gate.
Mr. Warden King.....	Cretaceous fossil ( <i>Pachyrhiza grande</i> ), from 80 feet level in well.	8 miles east of Milparinka.

## SUPERINTENDENT OF DRILLS' REPORT.

The Superintendent of Drills to the Under Secretary for Mines, reporting on the working of the Diamond Drills, during the year 1883.

Sir, Department of Mines, Diamond Drill Branch, Sydney, April 4, 1884.

I have the honor to forward herewith my report on the working of the Diamond Drills, under the control of the Department during the year 1883, together with the following Appendices, viz. :—

*Appendix A.*—Return showing the number of feet bored by each drill, the locality, and the depth of each bore ; also the purpose for which these bores were put down.

*Appendix B.*—Return showing the per-centage of core obtained to the number of feet bored.

*Appendix C.*—Return showing the per-centage of coal core obtained to the number of feet bored in coal.

*Appendix D.*—Return showing the depth per hour bored by each drill during the year.

*Appendix E to U.*—Returns giving cost and particulars of each bore put down, together with sections of strata passed through.

*Appendix V.*—Forms of weekly reports of the engineer in charge of the drill.

*Appendix W.*—Diagram showing method adopted in shutting off salt water and in passing through drifts and swelling clays met with in boring.

*Appendix X.*—Plan showing relative sizes of artesian tubing.

*Appendix Y.*—Plan of indicator by which the angle or dip of core may be ascertained.

In submitting this my first annual report, I have endeavoured to supply the information contained in the Appendices herewith in the clearest manner in order that the public may have the utmost insight into the working of the drills, and I am sure that should this be the case the confidence which is at present enjoyed, on account of their successful working under this Department, will be greatly increased.

In directing your special attention to the information contained in the Appendices to this Report, which have been prepared most carefully and in such a manner that comparison may be made readily with similar work executed in these Colonies and elsewhere, I desire to state that my duties of supervision have been aided very much in producing such very satisfactory results by the assistance which I have received from the Department generally.

The working plant, as purchased from the Australian Diamond Rock Drill Company, consisted of six diamond drills, but this number was found unable to satisfy the demands which were made for their services, consequently it was necessary to obtain other drills. One was accordingly purchased, and commenced operations in November last ; the other two were ordered from America and arrived in the early part of this year. These latter two machines are constructed on quite a new principle, and are adapted for both surface and underground work. The engines are stationary, compound, and the feed-gear can be altered whilst the work of boring is going on ; the couplings of the rods disconnect by one half-turn of the wrench being applied, and by means of a register connected with the thrust the pressure to which the diamonds are being subjected is indicated on the surface. This is an improvement of the greatest importance in work, and cannot fail to decrease the cost of boring, as by means of this register it is believed that the loss of diamonds will be much reduced. I anticipate that these improvements will enable boring to be carried out in the underground workings of the inland mines at such reduced rates as to cause a keen demand for the use of these machines.

A good supply of drill connections, steel drill rods, artesian tubing, and steel core-barrels have been added to the stock in store. By reason of these additions and the repairs made the plant is now in better working order than it has hitherto been.

Many improvements have been made during the year, including an indicator to determine the dip of strata passed through ; also appliances by which larger diameter holes may be put down ; also the application of boring tools, so that boring may be started from the alluvial surface without necessitating the sinking of a shaft. Appendix Y.

During the past year 6,643 feet have been bored by the diamond drills, at an average cost of 10s. 3d. per foot. This cost includes wages, diamonds, material, wear and tear, carriage, and other working field cost of similar nature, full particulars of which are given in Appendices E to T inclusive.

Other expenditure connected with the several drills, not chargeable to any particular drill, or bore such as wages incurred while a drill was undergoing shop repairs in Sydney, carriage to Sydney for repairs, or expenses incurred between the time of completion of one bore and the commencement of another ; including all this expenditure the cost is at the rate of 12s. 10½d. per foot, or a total of £4,284 18s.

The amount contributed by the public for the use of the drills amounted to £4,523 9s. 4d., the charge fixed for the use of the machines being only such as would defray working cost.

In comparing the statements herewith of the per centage of total core and of coal core obtained, with the returns given of borings with the diamond drill in England, as taken from printed pamphlets by recognized authors on drill work, it will be seen that the work performed by the drills belonging to this Department during the past year compares most favourably with that done in England. Appendix B.  
Appendix C.

I have great pleasure in further stating that the drills during the past year have been the means of developing great mineral wealth. Discoveries of coal have been made in five different bores, artesian water in two, and water rising to within 8 feet of the surface in two.

Of the coal discoveries made those of most importance are near Lake Macquarie and Gosford, county Northumberland, and at Coal Cliff, county Cumberland, proving that at these two latter points payable seams exist nearer Sydney than was formerly known, and notably indicating that the measures continuing their present dip would not be reached under the city of Sydney at a less depth than 2,500 feet.

By a series of bores starting on the outskirts of the mines at Newcastle the drills have proved payable seams to exist near to Gosford, or about midway between Sydney and Newcastle.

These discoveries prove the existence of a large tract of maiden coal country, and the completion of the railway from Sydney to Newcastle now being constructed is alone required to ensure the development of this land now lying partially idle.

At Stanwell Park, some 3 miles north of Coal Cliff Mine, the drill has also revealed important facts as room existed for grave doubts that the coal-seams in close proximity to the Coal Cliff Mine, going north, were "cut out ;" fortunately the drill proved several payable seams to exist. It

It is now proved that the Coal Cliff or Bulli seams extend towards Sydney at the nearest point at which they have been looked for, and further that the borings hitherto made near Sydney were not carried deep enough.

The cores taken for the borings at Gladesville, near Sydney, indicate that the strata passed through there is in the centre, or at the deepest point of what is known as the Sydney Basin.

To the north of Newcastle a bore was put down 954½ feet without reaching coal, denoting an extensive subsidence as having taken place north of the Hunter River, close to Newcastle. The core from this bore also revealed a continuous bed of dark shale over 500 feet thick, exhibiting a dip N.E. by N. of 1,188 feet to the mile. It is I think a matter for regret that this bore was not continued deeper; the shale bed throughout contained the *glossopteris* plant in abundance, and the probability is that had the bore been continued deeper important discoveries useful to the future development of the district would have been made. The discoveries made by the diamond drill do not support the opinions of those who expect to find a given seam of coal at a uniform depth throughout a coal-field. In the Newcastle District the strata and the character of the coal differ in almost every bore put down. This is notably the case on the western slopes into Lake Macquarie. There the conglomerate beds met with are singularly different in character and dip from one another, and denote having originally drifted from a different matrix or class of rocks and from contrary directions. The difference of character of the conglomerate beds are readily told by the diamond in the process of boring. There is a point west of and nearly opposite the entrance from the sea to the lake that contains conglomerate so hard as to almost defy the best Brazilian boarts to penetrate, whereas from a mile to two miles distant from this point bores put down through conglomerate beds have met with no difficulty, even when inferior diamonds have been used.

The discovery of Artesian water made by the diamond drill near Lake Macquarie, at a depth of 174 feet, and which rose to a height of 30 feet above the surface, is still running strong, and filling up all the dried up water-holes in a creek near by. This is likely to be the only water available for domestic use in dry seasons within a radius of several miles around. The discovery is of more importance as this district is generally badly off for water during ordinary dry seasons.

The other Artesian supply was some 15 miles south of Sydney, but the flow was not strong. The remaining instances of finding water were at Gladesville, the quality of which was good, and suitable for domestic uses; the quantity was equal to 1,440 gallons per day.

From January to August, 1883, inclusive, I have travelled 4,431 miles inspecting and directing work connected with the diamond drills and water augers; this occupied fifty-three days, or travelling at the rate of 83½ miles per day. The travelling expenses was at the rate of 4½d. per mile. In the month of August I was engaged a total of 283 hours, equal to forty-seven official days, and travelled during that month alone 1,245 miles.

The engineers in charge of the several drills have striven to obtain favourable results in nearly every instance. A system of promotion is adopted with a view to securing good work, and the placing of the most competent men in charge. Each engineer has to pass a certain training to the work before being placed in charge. He has to set his own bits, is made responsible for the work done, and is invested with power to discharge any assistant he may consider incompetent.

Printed weekly reports are supplied to each engineer to fill up, thus supplying for the use of the office full information of the work done each week without the necessity of writing long reports.

Diamonds are supplied to each engineer in charge on separate form to report sheet, weighed, and each diamond bearing a distinctive mark; duplicate copy of this form is retained in the Drills Office, and thus when any particular diamond is reported as fractured in work in the field, the duplicate in the office is referred to, noted, the cost set off against the work, the fractured or worn diamond returned to the office, and hence a complete system is adopted, which not only enables the wearing capabilities of a particular class of diamonds to be ascertained, but also is the key to control the principal cost of running drills. It will be observed this is an essential matter, as diamonds vary in price from 12s. 6d. to 80s. per carat.

During the past year the scarcity and consequent dearness of diamonds have greatly added to the cost of drill work, the price of carbon per carat having gradually risen from 17s. 6d. in 1879 to 76s. at the end of 1882. Brazilian boarts were almost impossible to obtain, and this state of things threatened to greatly retard if not entirely suspend the working of drills. I have confident hopes, however, that the Colonial diamond will soon enter the lists for drilling purposes.

There are also printed instructions sent to each engineer giving general directions connected with his charge. All drill connections or stores are supplied from the Drill Stores in Sydney with accompanying invoice for signature, signifying that the articles have been received.

As the field reports come into the office weekly they are checked off and placed in order until completion of the bore; then a tabulated statement is prepared containing all the information on one sheet. Sections are prepared and are retained in the office for public information and scientific uses. In most cases the core obtained becomes the property of the Department, and is handed over to the Geological Branch after sections are prepared.

The matter of handing over the core to the Geological Branch, placed in position exactly as it comes from the bore in boxes prepared for the purpose labelled, and each box holding 40 feet, which distinctly must only represent core obtained from each given 40 feet bored will I deem be placed to very valuable public uses in the hands of the talented Chief Geological Surveyor.

All bores put down either by the drills or water augers extending over the Colony are plotted in position on a water map specially prepared for the purpose. By distinctive colours discoveries made of water, either artesian or underground, salt or fresh are each severally set out so as to readily catch the eye on this map of the Colony. The intention is to secure a register of all the water discoveries tapped underground over the Colony, and the borders of the adjoining Colonies.

I see no reason why our inland plains could not be charted out as correctly as our coastal seas, so as to show the trend and area of the underground waters and open the practical means to save valuable life, over a large scope of country where bones now bleach.

The Chief Inspector of Stock has assisted very materially towards this, by supplying to the Drill Branch given particulars of each well over the several districts of the colony, each district inspector being supplied with printed forms, which are filled in with required details, thus procuring valuable information at minimum cost.

Owing

Owing to my recent severe illness this water map is not so advanced as it would have been, but I hope with a renewal of health that I will be able at an early date to obtain sufficient information to have several hundred of wells marked on the map, and thereby have the foundation laid of a scheme that may be the means of saving the lives of man and beast.

There cannot exist a doubt in the mind of any person who has sufficient time at disposal to study this very important matter that water exists underground in the interior in immense quantities, and over large areas. If the rivers of Australia were measured towards their source where the water flows over the primitive rock-beds, and again measured near and below the point overlapped by the alluvial deposits of the interior, making the distance between points of measurement as short as possible, with a view to evade the question of evaporation, it would I think show unmistakable proof where the waters of Australia go, and thereby open the field where to look for and find them.

I believe not only in the existence of large underground supplies, escaping and being held on the horizontal gravel beds of the inland portion of this Colony, but that water exists in the primitive rocks on the tops of which the alluvial formation now lies.

I have measured the flow of water issuing from rivulets and mine adits on some of the highest portions of this Continent, and found the supply such as could not be kept up by the gravitation forces from the local rainfall, the quantity of water being out of all proportion to the catchment area.

I have found at points along the cap of ranges, the slopes of which are within a stone-throw of each other, that it was impossible to sink a shaft in the rocks on the surface beyond 8 to 10 feet deep by means of ordinary labour because of the water coming in so freely.

In numerous instances in the underground workings of mines in Australia springs can be seen issuing from the stratified rocks within a few yards distance of one another, yet entirely differing in quality and trend of the water, revealing very practical lessons on a matter so far little dealt with and perhaps scarcely observed by the scientists of the day.

I am of opinion that there are internal forces other than either capillary or gravitation to account for such flow of water from rocks forming the crust of the earth, and if I am correct in that opinion that there is no reason to suppose that the primitive rocks of the interior, overlaid and covered from the human eye as they are by the alluvial formations, should be less subject to internal forces or supply of water than those rocks of similar character along our main ranges.

While referring to the all-important matter of underground water supply in the interior, it may be well that I should endeavour to correct the erroneous ideas held by the general public with respect to the utility of the diamond drills in searching for water in the dry western portions of the Colony.

In the first place it requires in rock-boring from 800 to 1,200 gallons per day to supply the requirements of the drill; in alluvial formations, consisting in the main of deposits of clay, it would require at least double that quantity. This alone would render the employment of a diamond drill in the interior of the Colony almost an impossibility.

The diamond drill is unsuitable to bore through alluvial deposits in search for water.

To suit the peculiar circumstances of the interior, boring machines somewhat similar in rotary mechanism to the diamond drill, using steel cutters in lieu of diamonds, and with horse motive power in lieu of steam, are the cheapest, and would be the most effective. There is nothing to prevent such machines, supplied with artesian tubing commencing from the surface bores varying in diameter from 6 inches to 2 feet, from penetrating in the interior to depths of 1,000 feet and upwards.

The carriage of a drill into the interior is another matter of very serious consideration. A diamond drill capable of boring a 2-foot diameter hole would weigh at least 30 tons, plus tubing; whilst a boring machine such as above described would only weigh about 10 tons, plus tubing, and consequently, whilst the transport of the latter would be a matter of small moment the former would probably be helplessly bogged *en route*.

It has been practically shown in working with the boring machines under my supervision in various parts of the interior that the matter of boring holes 6 inches to 8 inches diameter is comparatively an easy task, so far as the boring is concerned, but without the proper class of tubing it is impossible to pass through running drifts and swelling clays.

The interior of the Colony contains vast deposits of swelling clays, sufficient in places to burst any slabs or timber put in a shaft, and in such instances iron-tubing used on the telescopic principle is the only means whereby the required depth can with certainty be attained.

The diamond drill as a borer of rock surpasses all known appliances. A suitable field for its operation in the Colony extends all along the line of sea coast, back on and beyond the main range, to where the primitive rocks disappear, overlaid by the alluvial formations in the interior plains; west of this boring machines other than diamond drills have a vast field before them in search of water, the discovery of which would be of more importance to the interests of the whole Colony than perhaps can at present be estimated.

The most encouraging results have been obtained in the far west—one of the discoveries made by machines belonging to the Department, being artesian fresh water flowing strongly over the surface, though tapped underneath several layers of salt water.

There is a large tract of country in the New England District, the central point of which is the Mole table-land, traversed throughout with tin-bearing lodes, many of them rich and remunerative to work. The country which they traverse is hard and adapted for diamond drill work.

There is also convenient to this lode country alluvial deposits of tin, overlaid by basalt rocks covering many miles in extent, commencing on the dividing range, near Deepwater, and extending westward to and beyond Inverell.

Uralla and Hanging Rock in the north, Gulgong and Kiandra in the west and south, are each central points where tracts of gold-bearing country exist, overlaid by basalt, and which, owing to excess of water and hardness of rocks, the individual miners have been unable to prospect.

At each of the points indicated the drill could be put to good use for prospecting.

The new regulations for the use of the drills issued towards the end of the year by the Honorable the Minister for Mines will be found an improvement on the previous.

The prospects of the present year indicate an increased demand for the use of the drills, which will keep the plant now on hand fully employed.

I have, &c.,

WM. B. HENDERSON,  
Superintendent of Drills.

## APPENDIX A.

RETURN showing the number of feet bored during the year 1883 by each Diamond Drill, the localities in which such bores are situated, the purposes for which the bores were put down, and the results obtained.

No. of Drill.	Locality of Bore.	Depth Bored.	For what purpose.	Result obtained.
A	Long Swamp, near Marulan, parish of Marulan, county Argyle.	ft. in. *702 11	Coal.....	Coal measures passed through at this depth; boring therefore discontinued.
	Barber's Creek, near Marulan, parish of Marulan, county Argyle.	670 6	" .....	Coal measures passed through at this depth; boring therefore discontinued.
	Colo Vale, near Mittagong, parish of Mittagong, county Camden.	44 0	" .....	Bore in course of progress.
2	Stanwell Park, near Coal Cliff, parish of Sutherland, county Cumberland.	440 1	" .....	Several seams of coal of an aggregate thickness of 31 ft. 2½ in. were discovered in this bore, the most important being cut at 405 ft., viz., 6 ft. 8 in. thick.
		243 10	" .....	Three seams of coal of an aggregate thickness of 8 ft. 3½ in. were discovered in this bore, viz., 1 ft. 1 in., 4 ft. 4 in., and 2 ft. 10½ in. in thickness.
3	Leconfield Estate, Branxton, parish of Branxton, county Northumberland.	270 1	" .....	Boring discontinued.
	Holt-Sutherland Estate, parish of Sutherland, county Cumberland.	268 7	" .....	Bore in course of progress.
4	Gladesville Asylum, near Sydney, parish of Ryde, county Cumberland.	*1,003 6	" .....	Boring discontinued.
		442 1½	Water...	Water struck in this bore and rose to within 8 feet of the surface.
		197 10½	" .....	Bore discontinued at this depth.
5	H.M. Gaol, Maitland, parish of Maitland, county Northumberland.	365 3	" .....	Water struck in this bore, and rose to within 8 feet of the surface.
		100 0	" .....	Bore in course of progress.
5	L.T. Creek, near Lake Macquarie, parish of Awaba, county Northumberland.	†211 3	Coal .....	Several seams of coal were discovered in this bore, the aggregate thickness being 23 ft. 0½ in.; the thickest seam was 6 ft. 2 in. at a depth of 497 feet.
7	Black Gully, near Emmaville, parish of Strathbogie North, county Gough.	74 5	Tin .....	Boring discontinued.
	Adamstown, near Newcastle, parish of Waratah, county Northumberland.	77 6	Coal .....	Boring discontinued at the applicant's request.
8	Teralba, near Lake Macquarie, parish of Awaba, county Northumberland.	568 0	" .....	Several seams of coal were struck in this bore, the most important being one at 338½ ft. of 5 ft. 3 in. thick; the total thickness of coal passed through was 40 ft. 11 in.
	Coal Point, near Lake Macquarie, parish of Awaba, county Northumberland.	127 0	" .....	Bore in course of progress.
	Dora Creek, Cooranbong, near Lake Macquarie, parish of Cooranbong, county Northumberland.	415 10	" .....	A seam of coal 6 ft. 3½ in. was discovered in this bore at 372 feet.
	Fullerton Cove, Newcastle, parish of Newcastle, county Northumberland.	†408 6	" .....	Boring discontinued after reaching 954½ feet.
	Moschoto Island, Newcastle, parish of Newcastle, county Northumberland.	184 0	" .....	Bore in course of progress.
	Deduct bored in 1882 .....	6,815 2¾ 171 7		
	Total bored in 1883 .....	6,643 7¾		

\* These totals include 171 ft. 7 in. bored before 31st December, 1882.

† This bore was extended from 813½ ft. to 524 ft. 0 in.

‡ This bore was extended from 546 ft. to 954½ feet.

## APPENDIX B.

RETURN showing proportion of core obtained to feet bored in bores completed during the year 1883 in the Coal Measures of New South Wales.

No. of Drill.	Depth bored.	Core obtained.	Per-centage of core obtained.	Size of core. Inches.
A	feet. inches. 702 11	feet. inches. 646 7¾	91.99	2
	670 6	411 3½	61.34	2
2	440 1	345 8½	78.55	1½
	243 10	208 5	85.47	2
3	270 1	161 6	59.71	2
	1,003 6	943 10	94.05	3
4	442 1½	413 0½	93.42	2¾
	197 10½	174 1	87.97	2¾
5	365 3	323 3½	88.51	2¾
	211 3	183 0½	86.64	1½
7	77 6	71 6	92.26	2¾
	568 0	472 6	83.18	2
8	415 10	337 2	81.08	2
	408 6	397 11	97.40	2
Total .....	6,017 2¾	5,089 10½	Average *84.35	

\* NOTE.—The average per-centage in boring in Coal Measures in England, as taken from paper "Notes on Diamond Rock-boring," read by Mr. T. J. Bewick, C.E., to the members of the Institute of Mining and Mechanical Engineers, London, is 80.6, as after.

## BORINGS through Coal-measures at Northampton, England.

Depth bored.		Core obtained.		Per-centage of core.	Size of core.	Depth bored.		Core obtained.		Per-centage of core.	Size of core.
ft.	in.	ft.	in.		in.	ft.	in.	ft.	in.		in.
58	4	52	3	89·5	3½	105	4	92	0	87·3	2½

								6,091	7¾	5,768	*1 1½

\* NOTE.—From a prize paper on "A Deep Boring at Northampton," by Henry John Einson Stud. Inst., C.E., it appears that the average boring there was at the rate of 1 foot 0½ in. per hour, as under.

## Average depth bored per hour in England, in 1882.

Depth Drilled.	No. of hours Drilling.	Average Depth Drilled per hour.
125	104	1 3
148	127	1 2
182	183	1 0
117	100	1 2
63	60	1 0½
215	213	1 0
850	787	1 0½

APPENDIX

APPENDIX E.  
No. 2 DIAMOND DRILL.  
No. 1 Bore.

STATEMENT giving particulars of the operations of No. 2 Diamond Drill at Stanwell Park, north of Coal Cliff.

Date started.	Date finished.	Erecting Machinery.		Sinking shaft.		Driving and drawing pipes.		Repairing, stopping leak, cementing, &c.		Delays, wet weather, getting tools made and repaired for use of night shift.		Raising and lowering rods.		Actual drilling time.		Materials.	Diamonds.	Travelling expenses.	Total No. of days occupied.	Total cost per foot.	No. of feet bored.
		Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Cost per foot.	Cost per foot.	Cost per foot.			
1882. December 21	1883. February 17	5	4d.	9	7½d.	14	11½d.	10	Sd.	20	1s. 4d.	11½	8½d.	27½	1s. 10½d.	5½d.	4d.	6½d.	97	7s. 6½d.	440 feet 1 inch.

Core obtained—78'55.

APPENDIX F.  
No. 2 DIAMOND DRILL.  
No. 2 Bore.

STATEMENT giving particulars of the operations of No. 2 Diamond Drill, Stanwell Park, north of Coal Cliff.

Date started.	Date finished.	Erecting Machinery.		Sinking shaft.		Delays, including 7 days' illness of engineer.		Raising and lowering rods.		Actual drilling time.		Diamonds.	Materials.	Travelling expenses.	Total No. of days occupied.	Total cost per foot.	No. of feet bored.
		Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Cost per foot.	Cost per foot.	Cost per foot.			
1883. February 21	1883. April 14	4	6½d.	3	5½d.	9	1s. 3¾d.	7	11d.	17	2s. 4¾d.	1½d.	4¾d.	½d.	40	6s. 2d.	243 feet 10 inches.

Cores from the above bore have been preserved, arranged, and labelled in suitable core-boxes, and subsequently handed over to the Geological Surveyor for scientific public uses. Core obtained—85'47.

APPENDIX G.  
No. 2 DIAMOND DRILL.  
No. 3 Bore.

STATEMENT giving particulars of the operations of No. 2 Diamond Drill at Stanwell Park, north of Coal Cliff.

Date started.	Date finished.	Erecting Machinery, Repairing, &c.		Sinking shaft.		Driving, drawing, and removing stand pipes.		Delays, wet weather, getting tools made and repaired.		Raising and lowering rods.		Actual drilling time.		Diamonds.	Materials.	Travelling expenses.	Total No. of days occupied.	Total cost per foot.	No. of feet bored.
		Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Cost per foot.	Cost per foot.	Cost per foot.			
1883. April 23 ....	1883. August 20....	14	1s. 9½d.	14	1s. 9½d.	24	3s. 1d.	9	1s. 2d.	16½	2s. 2½d.	25½	3s. 2¾d.	6s. 7½d.	8¾d.	7¼d.	103	21s. 2¾d.	270 feet 1 inch.

Core obtained—59-61.

APPENDIX H.  
No. 5 DIAMOND DRILL.

STATEMENT giving particulars of the operations of No. 5 Diamond Drill at L.T. Creek, near Lake Macquarie.

Date started.	Date finished.	Erecting Machinery.		Overhauling boiler, repairing, fitting, and fixing old pump and fitting up new, &c., &c.		Delays, wet weather, waiting new pumps and tanks for water, and getting tools repaired and made, &c.		Raising and lowering rods.		Actual drilling time.		Materials.	Diamonds.	Travelling expenses.	Total No. of days occupied.	Total cost per foot.	No. of feet bored.
		Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Cost per foot.	Cost per foot.	Cost per foot.			
1883. March 7 ....	1883. June 2 .....	5	7¾d.	14	1s. 9¾d.	16	2s. 0¾d.	15	1s. 11¼d.	26	3s. 4½d.	5	...	1¾d.	76	10s. 4¾d.	211 feet 3 inches.

Cores taken from the above bore have been preserved, labelled, and carefully set aside for handing to the Geological Surveyor for scientific and public uses.  
Core obtained—86-64.

APPENDIX I.  
No. 7 DIAMOND DRILL.

STATEMENT giving particulars of the operations of No. 7 Diamond Drill at Teralba, near Lake Macquarie.

Date started.	Date finished.	Erecting Machinery.		Sinking and slabbing shaft and Tank cleaning, &c., &c.		Repairing and fixing pump, laying, setting, and cutting stand-pipes, dressing tools, setting bits, &c., &c.		Delays getting tools made, waiting for diamonds, wet weather, holidays, &c., &c.		Raising and lowering rods.		Actual drilling time.		Materials.	Diamonds.	Travelling Expenses.	Total No. of days occupied.	Total cost per foot.	No. of feet bored.
		Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Cost per foot.	Cost per foot.	Cost per foot.			
1883. April 26 ...	1883. September 15	6	3½d.	8	5¼d.	30	1s. 7½d.	9	5¾d.	20½	1s. 1d.	45½	2s. 5¾d.	8	3s. 5¼d.	5¾d.	119	11s.	568 feet.

Cores taken from this bore have been preserved, labelled, and carefully stored, for handing to Geological Surveyor for scientific and public uses.  
Core obtained—83-18.

APPENDIX K.  
No. 8 DIAMOND DRILL.

STATEMENT giving particulars of the operations of No. 8 Diamond Drill, Dora Creek, near Cooranbong.

Date started.	Date finished.	Erecting Machinery.		Sinking Shaft.		Repairing, stopping leak, boring, rining, and cutting firewood.		Delays, selecting bore, wet weather, getting tools made, and holidays.		Raising and lowering rods.		Actual drilling time.		Materials.	Diamonds.	Travelling Expenses.	Total No. of days occupied.	Total cost per foot.	No. of feet bored.
		Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Cost per foot.	Cost per foot.	Cost per foot.			
1882. December 4...	1883. May 26 ...	16	1s. 2¼d.	18	1s. 4¼d.	31	2s. 3¾d.	20	1s. 5¾d.	31½	2s. 4½d.	24½	1s. 9¼d.	10½d.	6s. 2¾d.	4¾d.	141	17s. 9¾d.	415 feet 10 inches.

Core taken from this bore has been preserved and handed to Geological Surveyor for scientific and public uses.  
Core obtained—81-08.

APPENDIX L.

No. 8 DIAMOND DRILL.

STATEMENT giving particulars of the operations of No. 8 Diamond Drill at Wyong Creek, situate about 12 miles north of Gosford.

Date started.	Date finished.	Erecting Machinery.		Repairing and rining old bore.		Delayed procuring diamonds and material required for old bore.		Raising and lowering rods and setting bits.		Actual drilling time.		Carriage.	Diamonds.	Materials.	Travelling expenses.	Total No. of days occupied.	Total cost per foot.	No. of feet bored.
		Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.							
1882. September 18...	1882. November 15	6	1s. 9½d.	12	3s. 7½d.	11	3s. 3½d.	6½	1s. 11¾d.	15½	4s. 7½d.	7½d.	4s.	8½d.	1s. 0½d.	51	21s. 7½d.	100 feet.

Core obtained to depth bored—93·58.

APPENDIX M.

No. 7 DIAMOND DRILL.

STATEMENT giving particulars of the operations of No. 7 Diamond Drill at New Lambton Mine, Adamstown, near Newcastle.

Date started.	Date finished.	Erecting Machinery.		Baling shaft and fitting stand pipes.		Cementing bore to stop leak, lining up with tubes through wall giving way, rining bore, &c., &c.		Delays.		Raising and lowering rods.		Actual drilling time.		Materials.	Diamonds.	Travelling expenses.	Total No. of days occupied.	Total cost per foot.	No. of feet bored.
		Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.						
1883. January 19.....	1883. March 10 (less one week.)	9	3s. 3½d.	7	2s. 6¾d.	8	2s. 11d.	3	1s. 1d.	3½	1s. 3½d.	7½	2s. 8½d.	5d.	1s. 3½d.	1s. 6½d.	38	17s. 1½d.	77 feet 6 inches.

Core obtained from depth bored—92·26.

APPENDIX N.  
No. 3 DIAMOND DRILL.  
No. 1 Bore.

STATEMENT giving particulars of the operations of No. 3 Diamond Drill at Gladesville Asylum, near Sydney.

Date started.	Date finished.	Erecting Machinery.		Setting shear legs, fixing and testing pipe in bore, setting bits, recovering core, repairing tools, &c., &c.		Delays waiting Asylum Engineer, and inspection of bore by Superintendent, waiting water nozzle.		Raising and lowering rods.		Actual drilling time.		Materials.	Diamonds.	Travelling expenses.	Total No. of days occupied.	Total cost per foot.	No. of feet bored.
		Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Cost per foot.	Cost per foot.	Cost per foot.			
1883. May 17. ...	1883. September 1. ...	16	1s. 0½d.	21	1s. 4½d.	10	7¾d.	19	1s. 2¾d.	27	1s. 9d.	5d.	9½d.	2½d.	93	7s. 4¾d.	442 feet 1¼ inch.

Core obtained from this bore carefully labelled, boxed, and given in charge of Geological Surveyor for scientific and public uses.  
Core obtained to depth bored—93·42.

APPENDIX O.  
No. 3 DIAMOND DRILL.  
No. 2 Bore.

STATEMENT giving particulars of the operations of No. 3 Diamond Drill at Gladesville Asylum, near Sydney.

Date started.	Date finished.	Moving and erecting Machinery.		Altering and fixing stand-pipes.		Moving and repairing pump, tools, &c., and setting bits.		Delays, waiting for engine coal.		Raising and lowering rods.		Actual drilling time.		Materials.	Diamonds.	Travelling expenses.	Total No. of days occupied.	Total cost per foot.	No. of feet bored.
		Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Cost per foot.	Cost per foot.	Cost per foot.			
1883. September 3 ...	1883. October 13 ...	5	9½d.	2	3¾d.	7	1s. 1¼d.	3	5½d.	4⅙d.	8½d.	12¼	2s.	3d.	4d.	2½d.	34	6s. 1½d.	197 feet 10½ inches.

Core obtained to depth bored—87·97.

APPENDIX P.  
No. 3 DIAMOND DRILL.  
No. 3 Bore.

STATEMENT giving particulars of the operations of No. 3 Diamond Drill at Gladesville Asylum, near Sydney.

Date started.	Date finished.	Sinking shaft and fixing stand pipes.		Repairing leaks in feed-pipe, water nozzle, and pump machinery, and setting diamond bits.		Delays, holidays.		Raising and lowering rods.		Actual drilling time.		Materials.	Diamonds.	Travelling expenses.	Total No. of days occupied.	Total cost per foot.	No. of feet bored.
		Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Cost per foot.	Cost per foot.	Cost per foot.			
1883. October 15...	1883. November 24	3	2 $\frac{3}{4}$ d.	7	6d.	2	1 $\frac{3}{4}$ d.	7 $\frac{1}{2}$	6 $\frac{1}{2}$ d.	16 $\frac{1}{2}$	1s. 2 $\frac{1}{2}$ d.	7d.	1s. 0 $\frac{1}{4}$ d.	.....	36	4s. 2 $\frac{3}{4}$ d.	365 feet 3 inches.

Core obtained to depth bored—88·51.

APPENDIX Q.  
No. A DIAMOND DRILL.

STATEMENT giving particulars of the operations of No. A. Diamond Drill at Long Swamp near and north of Marulan.

Date started.	Date finished.	Erecting Machinery.		Repairing and straightening rods, stopping leaks, boring, rining, and cementing, &c., &c.		Delays, waiting for cement, setting rope, drawing off water, cutting firewood, &c.		Raising and lowering rods.		Actual drilling time.		Diamonds.	Materials.	Travelling expenses.	Total No. of days occupied.	Total cost per foot.	No. of feet bored.
		Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Cost per foot.	Cost per foot.	Cost per foot.

APPENDIX R.

No. A DIAMOND DRILL.

STATEMENT giving particulars of the operations of No. A Diamond Drill at Barber's Creek, south of Marulan.

Date started.	Date finished.	Erecting Machinery.		Repairing, altering, and fitting and fixing machinery, tools, &c.		Delays, wet weather, getting tools made, and waiting for water, &c.		Raising and lowering rods.		Actual drilling time.		Materials.	Diamonds.	Travelling expenses.	Total No. of days occupied.	Total cost per foot.	No. of feet bored.

Core obtained from depth bored—26·37.

APPENDIX T.

No. 8 DIAMOND DRILL.

STATEMENT giving particulars of the operations of No. 8 Diamond Drill at Fullerton Cove, Stockton, near Newcastle.

Date started.	Date finished.	Erecting Machinery.		Cleaning bore-hole, recovering and cleaning rods, repairing pump, hydraulic cylinder, &c., getting up lost core.		Delays, wet weather, waiting on hauling rope, getting tools made, engineer 8 days sick.		Raising and lowering rods.		Actual drilling time.		Materials.	Diamonds.	Travelling expenses.	Total No. of days occupied.	Total cost per foot.	No. of feet bored.
		Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Cost per foot.	Cost per foot.	Cost per foot.			
1883. June 22 .....	1883. October 24 ...	9	8½d.	17	1s. 4½d.	11	10½d.	28½	2s. 3d.	43½	3s. 5½d.	6½d.	8½d.	1d.	109	9s. 11½d.	408 ft. 6 in.

Several specimens of this core preserved shows an angle or inclination of dip equal to 1,188 feet per mile, and containing the glossopteris plant.  
Core obtained from that bored—97'40.

APPENDIX U.

No. 3 DIAMOND DRILL—HOLT-SUTHERLAND ESTATE.

STATEMENT giving particulars of the operations of No. 3 Diamond Drill at the Holt-Sutherland Estate, near Sydney.

Date started.	Date finished.	Selecting gear, proceeding to site, fixing camp, cutting firewood.		Erecting Machinery.		Repairing and fixing friction couplings and suction pipes.		Delays, wet weather, obtaining tools, holidays, and waiting for fuel.		Raising and lowering rods.		Actual drilling time.		Materials.	Diamonds.	Travelling expenses.	Total No. of days occupied.	Total cost per foot.	No. of feet bored.
		Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Days occupied.	Cost per foot.	Cost per foot.	Cost per foot.	Cost per foot.

SYDNEY NEW SOUTH WALES

1883.

(THIRD SESSION.)

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## MINES DEPARTMENT.

(APPOINTMENT OF MR. THOMAS D. MYRING.)

*Ordered by the Legislative Assembly to be printed, 15 November, 1883.*

RETURN in answer to a Question of 15th November, 1883, That there be laid on the Table of this House,—

“Copies of Papers in connection with Mr. Myring’s appointment.”

(*Mr. Coonan.*)

Mr. T. H. Myring to The Under Secretary for Mines.

Sir,

Sydney, 28 August, 1883.

I beg respectfully to apply for an appointment in the Department of Mines in connection with the work of rabbit extermination now being carried on in New South Wales, and in making such application I would draw your attention to the following facts:—

I have been an officer of the Department of Lands, Victoria, for the past nine years, and have been obliged to sever my connection with that department in consequence of family matters requiring my presence in Sydney for the next two or three years.

During the past four years I have occupied the position of Private Secretary to the Secretary for Lands, Mr. Monah, who, I may state, personally supervised the working of the “Rabbit Act” in Victoria, one other officer and myself constituting the only staff he employed in the head office. I have, therefore, necessarily, an intimate knowledge of all means and measures taken by the Victorian Government for the destruction of the pest, which knowledge Mr. Bruce, with whom I have had several conversations, thinks would be of service to your department. I may add, I have references and testimonials from the last three (3) Ministers for Lands, and from the Secretary for Lands, Victoria.

Trusting that you will recommend my application for the favourable consideration of the Honorable the Minister for Mines,

I am, &c.,

THOMAS HEWITT MYRING.

The Chief Inspector.—H.W., 29/8/83.

As the work of this Branch under the Rabbit Act is increasing, more particularly the portion to which I have personally to attend, and as it is likely that this increase will continue as the claims for subsidy come in, I would recommend that Mr. Myring, who has had considerable experience in very similar work in Victoria, be appointed on the temporary staff, to assist in checking these claims, and in supervising the inspectors’ reports.—A.B., 29/8/83.

Mr. Myring may perhaps be employed at 10s. per diem temporarily. Submitted.—H.W., 29/8/83. This gentleman should send in his testimonials for inspection.—J. P. ABBOTT, 30/8/83. Mr. Myring informed personally.—H.W., 31/8/83. Testimonials herewith.—A.B., 4/9/83. The Under Secretary for Mines. Approved.—J. P. ABBOTT, 5/9/83.

1883-4.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## DEPARTMENT OF MINES.

(PERSONS APPOINTED AS RABBIT INSPECTORS AND TO OTHER OFFICES.)

*Ordered by the Legislative Assembly to be printed, 23 April, 1884.*

RETURN in Answer to Part 3 of Question No. 11, Votes No. 10, of Thursday, 25th October, 1883, showing,—

“How many persons the present Government have appointed as Rabbit Inspectors, Forest Rangers, Sheep Inspectors, and Conditional Purchase Inspectors, and to other offices, since they accepted office; and what is the total amount of salaries which will have to be paid per annum to persons appointed to the Civil Service since they took office?”

MINERAL CONDITIONAL PURCHASE AT EAST MAITLAND.

No. 1.

Application by Messrs. G. Griffiths and C. C. Skarratt.

D. [Alienation Act, section 19.]

Application for the conditional purchase, without competition, of unimproved Crown Land.

District of Newcastle.

No. 15 of 1878.

Application by George Griffiths and C. C. Skarratt for the conditional purchase, without competition, of 640 acres unimproved Crown Land, under section No. 19.

Received by me, with a deposit of £320, this 29th day of August, 1878, at 10 o'clock a.m.

ALEXANDER LUMSDAINE,  
Agent for the Sale of Crown Lands at Newcastle.

Sir,

Newcastle, 29 August, 1878.

We are desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 640 acres; and we herewith tender the sum of £320, being a deposit at the rate of 10s. per acre on the area for which we apply.

We are, &c.,  
GEORGE GRIFFITHS,  
15, Bridge-street, Sydney.

C. C. SKARRATT.

To the Agent for the Sale of Crown Lands at Newcastle.

36, Upper William-street, Sydney.

Description.

County of Northumberland, parish of Teralba, portion No. 17, 640 acres: Commencing at the north-eastern corner of portion No. 18; and bounded thence on the west by the eastern boundary of that portion bearing south 80 chains; on the south by a line dividing it from parts of portions Nos. 119 and 120, bearing east 80 chains; on the east by the western boundary of portion No. 61, bearing north 80 chains; and on the north by a line bearing west 80 chains, to the point of commencement.

Minutes on No. 1.

Referred to Mining Branch, for state of mineral lease 75/9 at Newcastle.—T.S., for Surveyor-General, 22 October, 1878. B.C., 24 October, 1878. Mineral lease 95 in the names of Skarratt and Griffiths not cancelled. Rent overdue. Demanded, 18/9/78.—T.C.B., 25/10/78. Chief Draftsman, 25/10/78. Seen, J.N.E. The Chief Commissioner, Department of Lands, B.C., 28 October, 1878.—T.C.B. G.H. Dealt with in Charting Branch.—H.E.N., 15 November, 1878.

No. 2.

Mr. J. Henderson to The Chief Commissioner of Conditional Sales.

Sir,

Newcastle, 9 December, 1881.

I should be obliged by your putting up for auction sale portion No. 17 of the parish of Teralba, county of Northumberland, which has I believe been forfeited, or is about to be, by Messrs. C. C. Skarratt and George Griffiths, who took it up at Newcastle, on the 29th August, 1878, as a mining land purchase.

I am, &c.,  
JOHN HENDERSON.

Minutes on No. 2.

Conditional Sales Branch, for papers if conditional purchase is forfeited.—J.G.B., 14/12/81. Inform conditional purchase is not forfeited.—J.G.B., 31/12/81. Conditional Sales Branch,—Has declaration been received?—R.H.D., 31/12/81. No declaration. Mr. Neate, C.S. Branch,—The three years and three months having elapsed, should not the conditional purchase be declared lapsed, and ought and may not the same be done without further delay?—R.H.D., 13/1/82. Lapsed conditional purchase, now for Inspector.—W.A., 15/6/82. Mr. W. H. McLean, for tracing.—W.H.C., 20/6/82. Tracing for Inspector herewith.—W.H.M'L., 1 August, 1882.

No. 3.

The Under-Secretary for Lands to Mr. J. Henderson.

Sir,

Alienation Branch, Department of Lands, Sydney, 31 December, 1881.

In reply to your letter of the 9th instant, asking that portion No. 17, parish Teralba, may be submitted to auction sale, I have to inform you that the land in question is held under mineral conditional purchase by Messrs. Griffiths and Skarrett.

I have, &c.,  
CHARLES OLIVER,  
Under-Secretary.

No. 4.

No. 4.  
Gazette Notice.

Lapsed conditional purchase.

Department of Lands, Conditional Sales Division, Sydney, 27 April, 1882.

NOTICE is hereby given that the undermentioned conditional purchase of land under the Crown Lands Alienation Act of 1861 has become lapsed, through non-receipt of the necessary declaration and non-payment of balance or instalment of purchase money as prescribed by the Act, and that the land will be offered for sale as early as practicable, by competition at public auction, if not in the meantime conditionally purchased afresh, to which it will be liable on the expiration of thirty days from the present date.

JOHN ROBERTSON.

No. 5.

Application by Messrs. James and Alexander Brown.

D.

[Alienation Act, section 19.]

Application for the conditional purchase, without competition, of unimproved Crown Land.  
District of Newcastle.

No. 2 of 1882.

Application by James and Alexander Brown for the conditional purchase, without competition, of 640 acres unimproved Crown Land, under section 19 of 25 Vict. No. 1.

Received by me, with a deposit of £320, this 1st day of June, 1882, at 10 o'clock.

ALEXR. LUMSDAINE,

Agent for the Sale of Crown Lands at Newcastle.

Sir,

1 June, 1882.

We are desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 640 acres; and we herewith tender the sum of £320, being a deposit at the rate of 10s. per acre on the area for which we apply.

We are, &c.,

JAMES & ALEXR. BROWN,

Newcastle.

To the Agent for the Sale of Crown Lands at Newcastle.

Description.

County of Northumberland, parish of Teralba, 640 acres, being measured portion 17, south of portion 82 of acres, parish of Stockington, being Messrs. Griffith and Skarratt's mineral conditional purchase 78/15 (Newcastle), lapsed by Gazette of 27th April, 1882, and now applied for hereby.

Minutes on No. 5.

The signatures of the applicants appear to be in the same handwriting. Will the Crown Lands Agent be good enough to state whether both applicants attended in person at the time of tendering this application.—J. W., for Chief Commissioner, B.C., 20 June, 1882. The Crown Lands Agent, Newcastle.

The signature of the applicants is in the same handwriting; that of James Brown, the surviving partner of the firm of James and Alexander Brown, of Newcastle (Alexander Brown being deceased). The applicant did not attend in person. His application was tendered, as such applications may be, through his agent, Mr. Henry Law, who verbally certified to me that the signature was James Brown's, and that he (Mr. Law) had seen him (James Brown) sign the application.—A.L., Crown Lands Agent, Newcastle. Crown Lands Office, 21/6/82.

Submitted that this application be declared void, as applicant did not attend in person at time of tendering application, *vide* Land Agent's memo. attached.—J. W., 23/6/82. The Chief Commissioner. Void. Agent should not have received the application.—A.O.M., 23/6/82.

No. 6.

## No. 10.

Henry J. Withers &amp; Co. to The Chief Commissioner of Conditional Sales.

Sir,

9, Macquarie Place, 24 June, 1882.

On behalf of Mrs. Mary Lane, we do ourselves the honor to forward you herewith an application tendered by her, in accordance with the 13th section of the Crown Lands Alienation Act of 1861, and the 7th section of the Lands Acts Amendment Act of 1875, to the Crown Lands Agent at Newcastle, on the

Enclosures.

15th

Application for 15th June instant, for 640 acres, portion 17, parish of Teralba, and refused by him because the same land had been applied for by Messrs. J. & A. Brown.  
 We respectfully submit that the application made by J. & A. Brown was void *ab initio*; by section 10 of the 1875 Act, no person can act as agent or trustee for another.  
 Declaration by Mary P. Lane on the above. We request that you will void Brown's application as being illegal, and instruct the local Land Agent to receive our client's.  
 The Chief Commissioner, &c., &c. We have, &c.,  
 HENRY J. WITHERS & CO.

*Minutes on No. 10.*

These papers are incomplete. Where is the note of the telegram referred to in Land Agent's memo.?  
 Was the previous conditional purchase notified as lapsed, and when?—A.O.M., 7/7/82.  
 C.P. 78/15, Griffith and Skarrett, was lapsed 27th April, 1882. Application, &c., with 81-12,929.  
 When was reserve 83, parish of Teralba, proclaimed?—W.B., 2/8/82. Mr. George Lewis. Reserve 83 notified 5 July, 1880.—G.L., 2 August, 1882.

[Enclosure A to No. 10.]

C. [Alienation Act, section 10.]  
 Application for the conditional purchase, without competition, of unimproved Crown Land.  
 District of Newcastle. No. of 1882.  
 Application by Mary Priscilla Lane, widow of late Henry Lane, of Treasury, for the conditional purchase, without competition, of 640 acres unimproved Crown Land.  
 This application received by me, with the offer of a deposit of £160, this 15th day of June, 1882, at 10 o'clock, but refused, the land applied for having been previously selected.

ALEX. LUMSDAINE,  
 Agent for the Sale of Crown Lands at Newcastle.

Sir,  
 I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 640 acres; and I herewith tender the sum of £160, being a deposit at the rate of 5s. per acre on the area for which I apply.  
 I am, &c.,  
 MARY P. LANE,  
 Newcastle.

To the Agent for the Sale of Crown Lands at Newcastle.

Description.

County of Northumberland and parish of Teralba, 640 acres; being portion 17 of 640 acres formerly held by Skarrett and Griffiths as a mineral conditional purchase, now lapsed.

[Enclosure B to No. 10.]

Statutory Declaration.

I, MARY Priscilla Lane (widow of the late Henry Lane), do hereby solemnly and sincerely declare as follow: that on the fifteenth day of June I was at the Lands Office, Newcastle, and I tendered to and requested the Land Agent to receive an application, under the 13th clause of the Crown Lands Alienation Act of 1861, for 640 acres of land known as measured portion 17, parish of Teralba, county of Northumberland; that the Land Agent informed me that Mr. James Brown had selected the land, and that in consequence he could not receive my application. I told him I wished to select the same land, and requested him to take the application; he refused to accept it. And I make this solemn declaration conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled, "An Act for the more effectual abolition of Oaths and Affirmations taken and made in various Departments of the Government of New South Wales and to substitute Declarations in lieu thereof and for the suppression of voluntary and extra-judicial Oaths and Affidavits."  
 MARY P. LANE.

Declared at Sydney, this twenty-second }  
 day of June, 1882, before me,— }

Date of Selection—1st June, 1882.  
Area—640 acres.  
Deposit—£320.

## No. 14.

The Crown Lands Agent, Newcastle, to The Chief Commissioner of Conditional Sales.

Sir,

Crown Lands Office, Newcastle, 29 July, 1882.

Referring to your communication of the 27th ultimo (to hand 29th ultimo), re application noted in the margin, being void, "as it was tendered by an agent," I now do myself the honor, with special reference to the postscript in the above communication, that I "should not have received this application," to enclose herewith the copy of a memorandum handed to me here, along with sundry similar applications, in 1876.

I may add that the agent who handed in the memo. alluded to was at that date the same gentleman (Mr. Law) who, on the present occasion, represented the Messrs. Brown.

I have, &c.,

ALEXR. LUMSDAINE,  
C.L.A.

*Minutes on No. 14.*

As the application of Messrs. J. & A. Brown was received by the Land Agent under the authority of an instruction issued by the late Under-Secretary, I am not prepared to recommend that the voidance of the conditional purchase should be insisted upon, although it has been held and has been for some time the practice of the Department that mineral conditional purchases are within the scope of the 7th section of the Act of 1875 in the circumstances, and on the clear understanding that in the event of any difficulty or loss arising out of the irregularity the purchaser must be at the risk of it. The voidance of the conditional purchase, 82-2, may perhaps be revoked, and the subsequent application refused.\*—A.O.M., 5/8/82. Approved.—JOHN R.

\* The subsequent application by Mrs. Lane was refused receipt by the Land Agent on being tendered, on the ground that the land had previously been conditionally purchased by Messrs. Brown.

C.P. No. 82-2,  
1st June, 1882,  
James & Alexr. Brown, of Newcastle, 640 acres, in county of Northumberland and parish Ter-alba, portion 17 (within reserve 83), being the lapsed mineral conditional purchase of Griffiths & Skarratt. (See Government Gazette, No. 82, 1,691.)

[Enclosure to No. 14.]

Memorandum.

In case of doubt on the part of the Land Agent, Newcastle, as to legality of accepting applications for mining conditional purchases from an agent, instead of from the applicant in person, he is hereby informed that it has been held that mining conditional purchases may be made by agents for the actual purchasers. He will therefore accept any such applications which may be tendered to him by agents.

W. W. STEPHEN.

Department of Lands, 22 May, 1876.

## No. 15.

Mr. J. Fletcher, M.P., to The Secretary for Lands.

Dear Sir John,

Newcastle, 7 August, 1882.

When last in Sydney I mentioned to you a dispute about a piece of ground applied for by Mr. James Brown, senior, partner in the firm of J. & A. Brown, Newcastle. The case is this: On the 1st of June Mr. Brown applied for 640 acres as a mineral conditional purchase; the agent at Newcastle, acting under

under instructions received, accepted the deposit of £320. The application was not made in person. Mr. Henry Law, manager of the firm, carried the application from the office thereof to the land office after it had been duly signed by Mr. James Brown himself.

Since then Mr. Brown has received a form for a refund of the money so paid, in consequence, as I understand, of Mr. Brown not having lodged the application personally. Upon inquiry, I find that Mr. Lumsdaine, the Land Agent at Newcastle, accepted the application made by Mr. H. Law, on Mr. James Brown's behalf, in consequence of instructions received from the late Under-Secretary, Mr. W. W. Stephen.

I need scarcely point out to you that Mr. Brown's application is a *bona fide* one, and made for the purpose of immediate development. A contract has already been accepted by Mr. Brown for the sinking of a shaft upon the property.

I understand that an application has been made subsequently by another party for the same land, they basing their claim upon the fact that the application was not made by Mr. Brown in person. This second application was however refused by the Land Agent, because the same land had already been applied for by Mr. Brown.

On the receipt, however, of a notification from Mr. Moriarty that the application of Mr. James Brown was informal, Mr. Alexander Brown applied in person for the same land, and the agent accepted the deposit. Therefore, if Mr. James Brown's application is held to be invalid, for reasons stated, and Mr. Alexander Brown's deposit being the only money now in possession of the Government for the land, I submit that, if the application of Mr. James Brown be invalid, the personal application of Mr. Alexander Brown is the only one that can be considered by the Lands Department.

The purchase in this instance is a *bona fide* one, and operations will be commenced in a few days to develop the property, whereas I am confident that the parties who have applied for the land since Mr. Brown's application have done so merely as a speculation; indeed I may further add that the workings of the Minmi Colliery are now in close proximity with the land in question, and will be directly connected with the said land within six months.

Under the circumstances which I have thus referred to, I trust you will give this matter your favourable consideration, and I feel confident that, when all the details are considered, you will decide that if Mr. James Brown's application was informal (because he did not lodge the application himself in the hands of the Land Agent), then that the application of Mr. Alexander Brown (whose money was accepted for the same land, such money being the only deposit made) must necessarily be entertained.

I am, &c.,

JAMES FLETCHER, M.L.A.

#### No. 16.

Henry J. Withers & Co. to The Chief Commissioner of Conditional Sales.

Sir,

9, Macquarie Place, 24 August, 1882.

640 acres mineral conditional purchase, J. & A. Brown, by their agent. Newcastle, 1 June, 1882.

Lewis M'Kenzie Hay, 22nd April, 1880, 40 acres mineral conditional purchase declared void, made by an agent.

Referring to the interview Mr. Withers had with you this morning, in which you informed him that the application for 640 acres made by some agent on behalf of the Messrs. Brown had been recommended by you for acceptance, notwithstanding Clause 7 of the Alienation Act of 1875, and the practice of your Department, we do enter this protest, on Mrs. Lane's behalf, against such recommendation being carried out. Your Department is aware that such applications are illegal, and are always refused; see one case noted in margin, and Attorney-General's opinion with conditional purchase 77, 45-603.

Our client in this matter has been treated without consideration or justice; the law has been overridden, and a new one made for Messrs. Brown.

You informed Mr. Withers that the action of the Land Agent in accepting the application had involved the Government, and if Brown did not get the land he would have an action against the Government. When Mr. Withers requested a reconsideration of the case, he was informed that he had better bring an action against Mr. Brown.

You are aware that the application was declared void first, but upon representations by Mr. Brown and Mr. Fletcher that action has been reversed.

We respectfully ask that justice may be done and our client's application accepted.

We have, &c.,

HENRY J. WITHERS & CO.

#### No. 17.

The Chief Commissioner of Conditional Sales to Messrs. J. and A. Brown.

Gentlemen, Department of Lands, Conditional Sales Division, Sydney, 30 August, 1882.

M.C.P. 82-2, 1 June, 1882, 640 acres.

With reference to my letter of the 27th June last, informing you of the cancellation of the mineral conditional purchase noted in the margin (and forwarding refund voucher for deposit money), I have now to inform you that, although it has been held and has been for some time the practice that mineral conditional purchases are within the scope of the 7th section of the Act of 1875, yet, in this instance, as the Land Agent received your application under the authority of an instruction issued by the late Under-Secretary, Sir John Robertson has decided that the voidance of the conditional purchase should not be insisted upon.

In the circumstances, and on the clear understanding that, in the event of any difficulty or loss arising out of the irregularity, you must be at the risk of it, the voidance of the conditional purchase will be revoked and the subsequent applications refused.

You will be good enough to return the refund voucher at your earliest convenience, so that the transaction may be completed.

I have, &c.,

WM. BLACKMAN,  
(For the Chief Commissioner).

No. 18.

## No. 18.

The Chief Commissioner of Conditional Sales to The Land Agent, Newcastle.

Sir, Department of Lands, Conditional Sales Division, Sydney, 30 August, 1882.

With reference to your letter of the 29th July last, respecting the application of Messrs. J. & A. Brown, particulars of which are noted in the margin, I am to inform you that, as the application was received by you under the authority of an instruction issued by the late Under-Secretary, the Minister has approved that the voidance of the purchase be not insisted on, although it has been held and has been for some time the practice of the Department that mineral conditional purchases are within the scope of the 7th section of the Act of 1875. In the circumstances, and on the clear understanding that, in the event of any difficulty or loss arising out of the irregularity, the purchaser must be at the risk of it, the voidance of the conditional purchase will be revoked and the subsequent application refused.

This is not to be regarded by you as a precedent for receiving any such applications from an agent in future.

I have, &c.,

WM. BLACKMAN,

(For the Chief Commissioner).

Griffiths.

## No. 20.

Questions and Answers, *re* Mineral Conditional Purchase made by J. and A. Brown.

31 August, 1882.

Questions:—

(6.) Mineral Conditional Purchase made by J. and A. Brown:—Mr. McElhone asked the Secretary for Lands,—

- (1.) Did Messrs. J. and A. Brown, by their Agent, lodge an application with the Land Agent at Newcastle for a mineral conditional purchase of 640 acres, portion 17, in the parish of Taralba?
- (2.) Was the said application declared void?
- (3.) Has the voidance been revoked?
- (4.) Does he allow an application made by an agent for a mineral conditional purchase?
- (5.) Did Mrs. Mary Lane tender an application to the Land Agent at Newcastle for the same land, and did the Land Agent refuse to accept the application?
- (6.) Have Land Agents any power or authority to reject applications for conditional purchases?
- (7.) Has the Minister given any decision as to who is entitled to the land hereinbefore mentioned?

Answers:—

Sir John Robertson answered,—

- (1.) Yes.
- (2.) Mr. Moriarty, the Chief Commissioner, considered voidance the proper course, and so informed Messrs. Brown.
- (3.) Subsequently Mr. Moriarty found, from the Crown Lands Agent at Newcastle, that the late Under-Secretary for Lands had officially instructed him that any such applications which were tendered to him by agents should be accepted, and that the application in question was so accepted; Mr. Moriarty, therefore, advised that the voidance he had contemplated should not be insisted upon, which I approved.
- (4.) Practically answered by reply to No. 3.
- (5.) Yes, apparently the same land.
- (6.) No; but it is usual for Land Agents, when an application appears objectionable, to say so, and if insisted upon to refer to the Lands Department.
- (7.) No; but in another case of selection by an agent, and even also selected in a wrong district, the Attorney-General lately advised that it would be best to leave the respective parties to their remedies, and thus this case remains.

## No. 21.

Memorandum by Chief Commissioner of Conditional Sales.

With reference to the recent case of Messrs. J. and A. Brown, in which the Land Agent at Newcastle has received a mineral conditional purchase through an agent, he should be informed that although, in the circumstance of that case, it has not been considered necessary to disavow his action or the instruction quoted by him, he must, in all future cases, be guided by the Regulations, which are free from ambiguity on this point. See section 37 of Regulations of 29 May. A.O.M., 6/9/82.

Minute on No. 21.

Mr. F. Urgent.—W.B., 6/9.

## No. 22.

## The Chief Commissioner of Conditional Sales to The Land Agent, Newcastle.

Sir, Department of Lands, Conditional Sales Division, Sydney, 6 September, 1882.

With reference to the recent case of Messrs. J. and A. Brown, in which you have received a mineral conditional purchase through an agent, I am to inform you that although, in the circumstances of that case, it has not been considered necessary to disavow your action or the instructions quoted by you, you must in all future cases be guided by the Regulations, which are free from ambiguity on this point.— See sections 37 and 1, Regulations of 29 May, 1880.

I have, &c.,

A. O. MORIARTY,  
Chief Commissioner.

*Sections referred to.*

Section 37.

APPLICATIONS for conditional purchase for the purposes of mining (other than gold-mining) of unimproved lands, or of lands held by the applicant under any lease from the Crown for mining purposes, shall be subject to all the conditions set forth in the foregoing sections—1 to 10, 14, 15, 17, 19, and 20 of these Regulations, inclusively, but the deposit to accompany the application shall be 10s. per acre, the full price of the land being £2 per acre; and instead of the conditions of residence and improvement applicable to ordinary conditional purchases, will be conditional on an average expenditure of £2 per acre in mining operations (other than gold-mining) being incurred upon the land within three years. The term allowed for improvements may be extended by the Minister to five years, on his being satisfied that at the end of three years from the date of the purchase not less than twenty-four shillings per acre has been expended in mining operations, other than for gold, and provided that the balance of purchase money, or interest thereon, shall have been duly paid.

Section 1—mentioned in section 37.

Applications for conditional purchase of unimproved land shall be in the form marked C hereto appended, and shall be tendered in person by the applicant, to the Land Agent of the district, between the hours of 10 a.m. and 4 p.m., on any Thursday not being a general holiday. Not more than one application will be received on the same day from the same applicant.

*Form alluded to in Section 1.*

C. [Alienation Act, Sections 13, 14, and 19.]

APPLICATION for the conditional purchase, without competition, of unimproved Crown Land.

District of \_\_\_\_\_ No. \_\_\_\_\_ of 18 \_\_\_\_\_

Application by \_\_\_\_\_ for the conditional purchase, without competition, of \_\_\_\_\_ acres

roads, unimproved Crown Land.

Received by me, with a deposit of £ \_\_\_\_\_ this \_\_\_\_\_ day of \_\_\_\_\_ 18 \_\_\_\_\_

at \_\_\_\_\_ o'clock.

Agent for the Sale of Crown Lands  
at \_\_\_\_\_

Sir, I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing \_\_\_\_\_ acres \_\_\_\_\_ roads; and I herewith tender the sum of £ \_\_\_\_\_ being a deposit at the rate of \_\_\_\_\_ per acre on the area for which I apply.

I am, sir,  
Your obedient servant,

To the Agent for the \_\_\_\_\_ (Signature)  
Sale of Crown Lands \_\_\_\_\_  
at \_\_\_\_\_ (Address and nearest Post Town)

County of \_\_\_\_\_ Description:—  
parish of \_\_\_\_\_, acres.

## No. 23.

## Minute by Secretary for Lands.

REFERRING to the answers given by me to Mr. McElhone, in the Assembly, on 31st August ultimo, I have had a conversation with the Attorney-General on the subject of his opinion on a case therein alluded to.

The Attorney-General did not appear to remember that in that case, *Elder & Lewis v. Frazer and Company*, the mineral conditional purchase had been taken by an agent, which it was; but I observe that this point was not submitted to the Attorney-General.

It will be well now, however, to put the following papers together:—

1. A copy of the letter of Mr. Moriarty to Messrs. J. and A. Brown, with regard to the voidance of their application, which letter, I am informed by Mr. Moriarty, was considered by him merely as a departmental notice from himself.
2. The minute of the Chief Commissioner on the subject of Brown's claim, approved by me, and his letter to Messrs. J. and A. Brown in consequence thereof.
3. The applications respectively of Brown and of Lane.
4. A Parliamentary slip, showing the answers to Mr. McElhone's questions before alluded to.
5. A copy of Mr. Attorney-General Forster's opinion, dated 20th December, 1877, and
6. A copy of Mr. Reid's question for the 12th instant.

I will then write a memo. asking the Attorney-General to give me his opinion as to the proper course to be taken in regard to the claims of Brown & Co. and of Lane respectively. (Papers herewith.)

I shall be glad if my honorable colleague the Attorney-General will take this matter into consideration and advise me.

The question of whether or not it is imperative that a mineral conditional purchase should be taken up in person by the applicant is becoming of the greatest possible importance.

JOHN ROBERTSON,  
11/9/82.

*Minutes on No. 23.*

Secretary to the Attorney-General.—A.O.M., B.C., 12 September, 1882. Submitted.—W.W.S., 12 September. See now copy of Attorney-General's memo. herewith.—W.W.S., 19 September, 1882. Chief Commissioner Conditional Sales, B.C.

[Enclosure

## [Enclosure A to No. 23.]

## Opinion of the Attorney-General.

Subject: *Re J. and A. Brown's mineral conditional purchase.*

Crown Law Offices, Sydney, 19 September, 1882.

IN the case of *Brown v. Patterson and others*, tried on the 15th instant, before Mr. Justice Faucett, and reported in the *Sydney Morning Herald* of the 16th instant, it was held that an application for a mineral conditional purchase was valid, although not made by the applicant in person. Leave was reserved to the defendants to move the full Court on this and other points, so that we shall before long have an authoritative decision as to the construction to be put upon the seventh section of the Lands Acts Amendment Act.

In the meantime further action in the Messrs. Brown's case should be withheld.

ROBERT WISDOM, A.-G.

*Minute on above.*

Approved.—JOHN R.

## [Enclosure B to No. 23.]

## Memo. by Secretary for Lands.

ON 9 March, 1876, the Surveyor-General submitted the following to Mr. Garrett:—Whether, in view of the seventh clause of the Act 1875, mineral conditional purchases are valid, as having been made by agents, instead of having been tendered personally by the applicant.

On 3rd May, 1876, Mr. Garrett answered:—The applications may be received, question raised by the surveyor having been considered and decided.

The next thing is the opinion of the Attorney-General, Farnell, Fitzpatrick's Government.

JOHN R.

## [Enclosure C to No. 23.]

## Opinion of the Attorney-General.

I THINK it is not imperative, under section seven of the Lands Acts Amendment Act, or under any other section, that applications by lessees for the conditional purchase of land held by them under mineral lease should be made in person.

The seventh section of this Act is in *pari materia* with the sixth; the application therein required to be in person is such as is required by the thirteenth section of the Lands Alienation Act of 1861, in case of lands open for conditional sale by selection, and the provision requiring personal application is framed in the same spirit as the residence condition, and with a similar object.

December 20, 1877.

W. J. FOSTER, A.-G.

## Questions asked by Mr. Reid, M.P., with Answers by Secretary for Lands.

TUESDAY, 12 SEPTEMBER, 1882.

## Questions:—

## 4. MR. REID asked THE SECRETARY FOR LANDS,—

(1.) Referring to answers given by the Minister, on the 31st ultimo, to questions asked by the Honorable Member for the Upper Hunter, in reference to a certain conditional purchase of Crown Lands at Newcastle,—Has the Minister any objection to lay upon the Table of this House a copy of the letter from the Department of Lands, in which the Crown Lands Agent at Newcastle was officially instructed to accept applications of intending free selectors of mineral conditional purchases when made by an agent and not by the selector in person?

(2.) Have any other Crown Lands Agents in the Colony received similar instructions; and if so, whom?

(3.) If not, will he say why this instruction was only given to the Crown Lands Agent in Newcastle?

(4.) Has the Minister any objection to lay upon the Table a copy of the Ministerial authority; or, if there was none such, name the Regulation or provision of the Land Laws under which the official instructions referred to were issued by the Department of Lands?

## Answers:—

Sir JOHN ROBERTSON answered,—

(1.) There is no objection, and I now lay upon the Table a copy of the memorandum alluded to.

(2.) There does not appear to have been any general instructions of similar purport.

(3.) It is probable that this memorandum was issued on request of the Agent who, as it happens, was the same as in the present instance.

(4.) The intimation is obviously based on the view that the 7th clause of the Amending Act of 1875 was not intended to embrace conditional purchases for mining purposes, as to which doubts have existed, and I have now submitted the point for legal advice.

*Minute on No. 24.*

I should like Mr. Moriarty to see into this matter, and I will confer with him upon it on Monday.

JOHN R.

## No. 25.

## Mrs. Mary P. Lane to The Land Agent, Newcastle.

Form of Application for conversion of Conditional Purchase into Mining Purchase.

I.—[Alienation Act—1861.]

Sir,

Sydney (present address.)

I am desirous of converting the undermentioned conditional purchase, under clause 13 of the Crown Lands Alienation Act of 1861, into a conditional purchase for purposes of mining other than gold-<sup>25 Vic. No. 1.</sup> mining, under clause 19 of same Act; and I hereby tender a further deposit at the rate of 5s. per acre thereupon.

Name

Name of original selector, Mary Priscilla Lane ; date of original selection, 15th June, 1882\* ; county of Northumberland, parish of Teralba, 640 acres, situated at Teralba, being portion No. 17, bounded on the east by Cork's selection of 320 acres, on the west by portion 18.

14th September, 1882.  
The Land Agent for the district of Newcastle.

MARY PRISCILLA LANE.

Applicant, who tenders the application in person, insists upon my accepting this application, as also the money for same (£160). Accepted under protest.

ALEXANDER LUMSDAINE,  
Crown Lands Agent,

\* Applicant, within given date, tendored (in person) application from herself, and as a widow, for the land specified, but application was refused by me here, as the portion had been already selected on the 1st June, 1882, by J. and A. Brown.

#### Questions asked by Mr. Reid, M.P., with Answers by Secretary for Lands.

TUESDAY, 19 SEPTEMBER, 1882.

##### Questions :—

4. Mr. Reid asked the Secretary for Lands,—

(1.) Referring to answers given by the Minister, on the 31st ultimo, to questions asked by the Honorable Member for the Upper Hunter, in reference to a certain conditional purchase of Crown Lands at Newcastle,—Has the Minister any objection to lay upon the Table of this House a copy of the letter from the Department of Lands, in which the Crown Lands Agent at Newcastle was officially instructed to accept applications of intending free selectors of mineral conditional purchases when made by an agent and not by the selector in person ?

(2.) Have any other Crown Lands Agents in the Colony received similar instructions ; and if so, whom ?

(3.) If not, will he say why this instruction was only given to the Crown Lands Agent in Newcastle ?

(4.) Has the Minister any objection to lay upon the Table a copy of the Ministerial authority ; or, if there was none such, name the Regulation or provision of the Land Laws under which the official instructions referred to were issued by the Department of Lands ?

##### Answers :—

Sir John Robertson answered,—

I requested my honorable colleague the Attorney-General to advise me upon the legal point involved in this question, as to which some uncertainty has prevailed, and I have to-day received his advising, which is to the effect that, in a recent case tried before Mr. Justice Faucett, it has been held that an application for a mineral conditional purchase was valid although not made by the applicant in person ; but as leave was reserved to move the full Court on this and other points, it is probable that an authoritative decision will be given as to the construction of the law. The Attorney-General consequently advises that in the meantime further action in the case of Messrs. Brown should be withheld.

#### Questions asked by Mr. Reid, M.P., with Answers by Secretary for Lands.

TUESDAY, 19 SEPTEMBER, 1882.

##### Questions :—

I. Applications for Mineral Conditional Purchases :—Mr. Reid asked the Secretary for Lands,—

(1.) Referring to answers given by the Minister, on the 31st ultimo, to questions asked by the Honorable Member for the Upper Hunter, in reference to a certain conditional purchase of Crown Lands at Newcastle,—Has the Minister any objection to lay upon the Table of this House a copy of the letter from the Department of Lands, in which the Crown Lands Agent at Newcastle was officially instructed to accept applications of intending free selectors of mineral conditional purchases when made by an agent and not by the selector in person ?

(2.) Have any other Crown Lands Agents in the Colony received similar instructions ; and if so, whom ?

(3.) If not, will he say why this instruction was only given to the Crown Lands Agent in Newcastle ?

(4.) Has the Minister any objection to lay upon the Table a copy of the Ministerial authority ; or, if there was none such, name the Regulation or provision of the Land Laws under which the official instructions referred to were issued by the Department of Lands ?

##### Answers :—

Sir John Robertson answered,—

I shall have no objection to lay the papers referred to upon the Table ; indeed, I intend to do so ; but, as I informed my honorable friend some time ago, the question is now before the Law Courts, and I think it better to withhold the papers until the matter is decided.

## No. 28.

Mr. W. W. Stephen to The Secretary for Lands.

My dear Sir John,

19 September, 1882.

As I dealt with and have a distinct recollection of the case referred to in Mr. Reid's questions for to-day *re* mining conditional purchases, will you allow me to state, with regard to question No. 3, what really was the reason of the instruction therein alluded to being only given to the Land Agent at Newcastle, as it is not likely that any person now in the Department of Lands is cognizant of the facts, which are as follows :—

A gentleman called on me one day (I forget who he was), and stated that the Land Agent at Newcastle had refused, or stated that he would refuse, applications for mining conditional purchases, if tendered by an agent, but that he would of course so accept them if instructed from head-quarters that application in person was unnecessary. As the gentleman wanted particularly to have some application lodged (the principal being absent), I sent the memo. or instruction referred to in Mr. Reid's questions.

I did so because in my own mind I felt certain, having been present when the clauses of the Act of 1875 were being discussed (*i.e.*, during its preparation), that clauses 6 and 7 related solely to ordinary conditional purchases under the 13th or residence clause, and that in making the provision for compulsory personal application, mining conditional purchases were never mentioned or thought of. Having no doubt, therefore, that the 7th section was meant to be taken in conjunction with the 6th, I felt no hesitation in instructing the Land Agent as I did ; and in the correctness of this action I have been upheld by Mr. Attorney-General Foster (whose opinion, however, I have for the first time now seen with the papers sent by you to Mr. Wisdom), and also by the judgment given last week by a Judge of the Supreme Court, although no doubt the point has been reserved for the full Court.

It will thus be seen that this instruction was given specially to the Land Agent at Newcastle, because by him alone was special objection made to receiving application for mineral conditional purchases from an agent ; and no occasion arose for sending similar instructions to the other Crown Lands Agents, as to which Mr. Reid asks in his question No. 2.

Hoping you will excuse my troubling you with this, as it is a matter in which I naturally feel some interest,—

I remain, &c.,  
W. W. STEPHEN.

## No. 29.

Questions asked by Mr. Jacob, M.P., for Mr. Reid, M.P., with Answers by the Secretary for Lands.

24 OCTOBER, 1882.

Questions :—

- (6.) Conditional Purchases made by Agents :—*Mr. Jacob*, for Mr. Reid, asked the Secretary for Lands,—
- (1.) Has there been a uniform practice in the Department of Crown Lands as to the recognition of conditional purchases (whether mineral or otherwise) when taken up by means of agents ?
  - (2.) If not, what were the differences in the practice, and the respective periods of the same ?
  - (3.) If the practice has been uniform, what has it been,—to pass the selections, or to declare them void ?
  - (4.) What course in this matter will be pursued by the Department of Lands for the future ?

Answers :—

Sir John Robertson answered,—

- (1, 2, and 3.) The practice cannot be said to have been entirely uniform, because it varied with changes in the law at different periods. Up to 1875 it was customary to recognize all conditional purchases, whether made by agents or not. Since that year no original conditional purchase, except for mineral purposes, has been recognized unless made by the applicant in person ; but, under legal advice, applications for additional conditional purchases and for conditional purchases for mining have from time to time been received from agents. With regard to the latter, since March, 1881 (in consequence of an opinion expressed by the late Minister for Lands), the practice has been to require that the purchases should be applied for in person.
- (4.) Should the new Land Bill become law, there will be no more new mineral conditional sales, but mineral lands will only be obtainable on lease. Additional conditional purchases may be made by an agent, but not so the original conditional purchase in virtue of which the additional are sought.

## No. 30.

Return showing memorandum issued by Mr. W. W. Stephen to the Crown Lands Agent, Newcastle, in 1876.

1882, Legislative Assembly, New South Wales.

Conditional Purchases—Application for, by Agents.

Ordered by the Legislative Assembly to be printed, 26 October, 1882.

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, made on the 27th September, 1882, That there be laid upon the Table of this House,—“A copy of the letter addressed “to the Crown Lands Agent, Newcastle, by the Department of Lands, instructing him to accept “applications for conditional purchases not tendered in person ; also, copy of Ministerial or other “authority for the issue of the instruction referred to.”

(*Mr. Reid.*)

MEMO.

## MEMO.

Department of Lands, 22 May, 1876.

IN case of doubt on the part of the Land Agent, Newcastle, as to legality of accepting applications for mining conditional purchases from an agent, instead of from the applicant in person, he is hereby informed that it has been held that mining conditional purchases may be made by agents for the actual purchaser. He will therefore accept any such applications which may be tendered to him by agents.

W. W. STEPHEN.

## No. 31.

## Questions asked by Mr. Jacob, M.P., for Mr. Reid, M.P., with Answers by the Secretary for Lands.

TUESDAY, 7 NOVEMBER, 1882.

## Questions:—

(3.) Application for Mineral Conditional Purchases:—*Mr. Jacob*, for *Mr. Reid*, asked the Secretary for Lands,—

(1.) Referring to answers given by the Honorable the Minister to questions asked by me on the 24th ultimo, if the practice of the Department of Lands, in reference to applications for mineral conditional purchases, was, before March, 1881, to accept them although tendered by agents,—

Will he say why, and upon whose recommendation, was the following mineral conditional purchase declared void: Mineral conditional purchase, forty acres, taken up at Hay, on the 22nd April, 1880, in the name of Lewis M'Kenzie, by his agent Mr. Turnbull?

(2.) If the practice since March, 1881, has been, as stated by the Minister, to require that mineral conditional purchases should be applied for in person,—Will he say why, and upon whose recommendation, was the avoidance of a mineral conditional purchase made a few months ago at Newcastle for Messrs. J. & A. Brown, by their agent, reversed?

## Answers:—

Sir John Robertson answered,—

(1.) The conditional purchase of Lewis M'Kenzie was declared void by the late Minister for Lands, Mr. Hoskins, upon the recommendation of the Chief Commissioner, pursuant to that Minister's decision in a similar case mentioned by me in reply to the Honorable Member's previous question.

(2.) The course taken with respect to the conditional purchase of Messrs. J. & A. Brown, and the reasons for it, were very fully stated by me in my replies to Mr. McElhone's and to Mr. Reid's previous questions, on the 31st August and 19th September last.

## No. 32.

## Messrs. H. J. Withers &amp; Co. to The Chief Commissioner of Conditional Sales.

Sir,

9, Macquarie Place, 13 November, 1882.

Permit us to direct your attention to the judgment given by the full Court, in *Brown v. Patterson*, on Friday last, by which all conditional purchases made through agents are declared void *ab initio*.

This decision is not unexpected; we are aware that it is in accordance with the practice of the Department even so late as last October; the only exception being an application by J. and A. Brown, by their agent at Newcastle, on the 1st June last. This case appears to have had some special merit, your Department having ignored both law and practice in dealing with it; everything has been done to compel our client to relinquish her claim to the land in dispute; in fact we were informed that if she wanted any further satisfaction, she had better go to the Supreme Court. Fortunately others have gone there, and obtained what your Department refused to give our client—justice. We respectfully deny that any official instructions were ever issued to the Land Agent at Newcastle, by the late Under-Secretary for Lands, authorizing him to receive all applications made by agents. We admit that Mr. Stephen gave Mr. J. de V. Lamb a memorandum telling the Land Agent he might receive certain applications made for Mr. Lamb by some Newcastle agent. That memo was sent by Mr. Lamb to his agent, but there is no record in your Department of this memo., excepting the copy sent by the Land Agent before the reversal of avoidance of Brown's application took place.

Our client has been put to great personal inconvenience by the action taken; she has been obliged to reside on the land and maintain her right thereto; although she applied on the 14th September last to convert her 13th section application into a 19th section, nothing has been done towards completing it.

We have, &amp;c.,

HENRY J. WITHERS &amp; CO.

[Enclosure to No. 32.]

SYDNEY MORNING HERALD, 16 September.

*Brown v. Patterson.*

This was a motion for a new trial.

The action was for trespass. The plaintiff claimed under an additional mining conditional purchase made in 1879. The defendants claimed part of the land under miners' rights. Verdict for the plaintiff, damages £25, leave being reserved to enter a verdict for the defendants, on the ground, among others, that the plaintiff's application had not been made in person.

Mr. Owen, Q.C., and Dr. Donovan, by Messrs. Slattery and Heydon, for the plaintiff; Mr. Pilcher and Mr. O'Connor, by Messrs. Shorter, Fitzgerald, and Asher, for the defendants.

The arguments were heard and concluded on Monday last.

The Court to-day delivered judgment.

Sir J. Martin, C.J., said this was an action of trespass to land, the declaration being in the ordinary form. The defendants pleaded the two usual pleas—not guilty and not possessed, and a third plea, that defendants went into possession of the land trespassed upon by the authority of a miner's right and by the authority of an Act of Parliament, and

and treating this as Crown Lands, by which they were entitled to go into possession of the land. At the trial it was proved that the plaintiffs were possessed of this property, and claimed to be entitled to it by virtue of a mineral conditional purchase, the application for which was not made in person; and the contention on behalf of the defendants was that, inasmuch as the mineral conditional purchase was not applied for in person it amounted to nothing, and no property passed to the person making the application, and that the land remained Crown Lands, and the defendants were entitled, under the miners' rights, to go into possession of the land. His Honor Mr. Justice Faucett, who presided at the trial, held, as the most convenient course to pursue under the circumstances, that the application for a mineral conditional purchase need not be made by the applicant in person; but, by consent, leave was reserved to enter the verdict for the defendants. There are other points in the case which we need not go into now. From the view which I take of this main point I need not consider any of the other points taken except one, and that is that, supposing the ruling of His Honor was erroneous, there was a waiver by the Crown of the performance of the condition that the application should be made in person. There was a great deal of argument on this point, and we are told that a decision contrary to the ruling of His Honor at nisi prius would have important consequences; that for several years past—that is to say, from the passing of the Amendment Act of 1875 until a very recent period—a great many applications had been made not in person, and had during that period been recognized as properly made; and that persons had acquired rights and possessed large properties; and we are told that such a decision would unsettle the rights to large and valuable properties in the Colony. It is very much to be regretted that the decision of the Court should have the effect of depriving persons of property which, by the course of action pursued by people administering the land laws, they were led to believe had been applied for in accordance with the law,—it is very much to be regretted if these people will be deprived of land which they had reason to think they were entitled to. We are not aware that there are a large number of persons in such a position. We do not know that the persons charged with the administration of the Land Acts have dispensed with a personal application being made for a mineral conditional purchase. Whether that be so or not, we are here to interpret these Acts of Parliament like any other Acts of Parliament, and we are not concerned with the consequences of any decision we may arrive at in so interpreting the Acts. There is, no doubt, a well-known case with reference to the law as to voluntary conveyances, which was acted upon continually for a long period; and that decision having been afterwards held to be erroneous, it was not overruled, on account of the long period during which it had been accepted as law, and the valuable property which would be affected by overruling it. But this is not a case of that sort. This is not the case where a wrong decision of the Court has been acted on, but we are asked to interpret an Act of Parliament. We have heard an exhaustive argument, and the points in the case have been put in every possible way. It has been suggested that we ought to have a fuller Bench to determine the points involved in this case. That would only be necessary in the case of a difference of opinion, and, as we concur, there is no need for a third Judge to sit in the case. Now, in order rightly to understand this matter, reference must be made to the original Alienation Act of 1861. By the 13th section, power is given to any person, within certain limits and in certain localities, to make the conditional section of a certain area of land, by delivering a written application to a Land Agent at a land office. So wide was this power held to be, that any person in existence, an infant just born, however absurd that may appear, might be an applicant for a conditional purchase under this section, although a subsequent section of the same Act required that before complete title was obtained certain other things should be done,—the person has to go into possession, make improvements, and make a declaration as to residence and improvements; all these things might have been done by an infant just born—an agent might have done them on behalf of an infant just born. This relates to every kind of conditional purchase; and except under the 13th section no conditional purchase can be made. This section speaks of residence and improvements, an occupation for three years, and expenditure of certain money for the land. The Legislature thought that not only should there be right to make conditional purchases for the occupation and improvement of the Crown Land, but that the right of making conditional purchases should be exercised as well for purposes of mining. (His Honor read the 19th section.) That is equivalent to saying that the power to make selections given by the 13th section should be held to include the right to make conditional purchases for mining purposes; and then the section goes on to say that certain conditions in the 13th section shall not be requisite in mining conditional purchases under the 19th section, so that a selection made under the 19th section is made under the 13th. For a long time a conditional purchase might be made by an agent,—there was no necessity for the applicant to present his application in person. The Legislature afterwards, in 1875, passed an Act which made many amendments in the Crown Lands Act, and these amendments chiefly had reference to conditional purchases made under the conditions of residence and improvement, nearly all the clauses relating to purchases of that kind. One of the things which the Legislature did was to get rid of the absurdity of allowing an infant in arms to become the conditional purchaser by means of an agent. It was, I suppose, considered an abuse, and not what the Legislature had intended. By this new enactment the word "person" is declared to be, in all future purchases, a person over the age of sixteen years. The right which before existed of making a purchase by an agent was also taken away. These are the 6th and 7th sections of the Act of 1875. The words used in the 7th section are, "Every application for a conditional purchase must be tendered in person by the applicant to the Land Agent of the district." The Legislature does not say that every application other than an application for a mining conditional purchase must be in person, but it says "every application." It does not follow that, because a number of alterations are made by this Act, having reference to residential conditional purchases, we are to read it as having relation to these selections only, for applications must be made by and in the mode prescribed by the 13th section of the Act of 1861. The words "every application" comprise an application for a mining conditional purchase. The application here was not tendered in person; that being so, I am of opinion that the application, having been made in direct violation of the law, it amounted to nothing. The Legislature required it to be made in person, and the Act, giving power to persons to take up land on payment of certain sums of money, must be complied with in all particulars. Then it is said that, under the 10th section of the Act of 1880, the Government, or some one acting on their behalf, having received the deposit from the applicant, this is a waiver of this condition to make the application in person. I am of opinion that this is not a condition; it is not a condition, precedent or subsequent. That would be my opinion, without considering the words following: "annexed by law to the estate or interest of a conditional purchaser." Clearly it is not a condition annexed to the estate, but it is a condition upon which the estate arises. If the Crown could waive it, it is a condition of that sort, but not otherwise. Under these circumstances, I am of opinion that the verdict was erroneous, and that, as we have the power, by consent of the parties, to enter a verdict for the defendants, the verdict should be entered accordingly.

Mr. Justice Faucett delivered a judgment concurring in the decision arrived at by His Honor the Chief Justice.  
Rule absolute to enter a verdict for the defendants.

W. P.

### No. 33.

#### Mrs. Mary P. Lane to The Secretary for Lands.

Sir,

Teralba, via Minmi, 15 November, 1882.

I have been residing on my selection at Teralba for some months, hoping that you would inform me that my right to it was upheld by your Department. I applied some time back to convert it into a mineral conditional purchase, but I have never had any communication in reference to it. Now that the Supreme Court have given judgment and decided that no land can be taken up by agents, I feel sure that you will act in fairness to me, and not allow others to take land to which I am advised they have no title.

You know I believe the justness of my claim, and now that it has been legally decided by the Court, I think that when I appeal to you that I shall not do so in vain.

Yours, &c.,

MARY LANE.

Minute on No. 33.

Chief Commissioner.—C.O., 21/11/82.

No. 34.

## No. 34.

## Mr. F. W. Rutter to The Chief Commissioner of Conditional Sales.

Sir,

The Exchange, Sydney.

I have the honor, on behalf of my client, to protest against any action (other than voidance) being taken upon the adverse claim made by Mrs. Lane with respect to my client's mineral conditional purchase of 640 acres, which forms the subject of the correspondence noted in the margin, in view of the decision of the Secretary for Lands in the case, in favour of my client, who is in possession of the land, and determined to hold it at all hazards, as he lately told me.

Yours, &amp;c.,

FREDK. WILLM. RUTTER.

## No. 35.

## Messrs. H. J. Withers &amp; Co. to The Secretary for Lands.

Sir,

9 Macquarie Place, 8 February, 1883.

On behalf of Mrs. Mary Lane, we do ourselves the honor to bring under your notice a case which has been in the Conditional Sales Branch of your Department for upwards of seven months, without any final action being taken. We protested against Messrs. Brown's selection, and it was declared void; but one of those gentlemen and Mr. Fletcher attended at your Department, the voidance was there reversed, and we were informed that Messrs. Brown's right to the land must not be further questioned. We have since been unable to get replies to letters (see the papers), or obtain any information from the Chief Commissioner, excepting that no further action would be taken.

We regret to inform you that a most unusual course has been pursued in this case. Letters are registered but never connected, and it is impossible to know what papers are in the case. By the records they appear to have been in one office room for upwards of five months. Why such has been allowed we are at a loss to understand, especially as the practice was and is to declare all selections by agents void. Further, the Full Court have decided that such selections are void *ab initio*.

In other cases we think it is usual, when such a decision has been given, to submit the case to the Minister; but notwithstanding that the decision was given two months prior to Sir John Robertson leaving the Department, no attempt was made to get a decision.

We know that Sir John left the Department under the impression that he had decided the case in our client's favour, but it now appears the opportunity was never given.

We respectfully submit that the action taken on this case has been so extraordinary that it requires special inquiry.

On behalf of our client, we do ourselves the honor to request that you will cause all papers, minutes, &c., to be submitted to you; and we feel certain that, upon perusal of the papers, you will not allow such injustice to continue as our client has been subjected to.

We have, &amp;c.,

HENRY J. WITHERS &amp; CO.

*Minutes on No. 35.*

Is there any good reason why this case should be delayed.—J.S.F., 2 March, 1883. The Chief Commissioner.—C.O., 16/2/83. Place with papers, for submission to Chief Commissioner.—W.B., 19/2/83. Further action in this matter has been deferred, by advice of the late Attorney-General, pending decision of the legal point involved. The parties have been fully advised of decision, and I certainly am not disposed to keep up a correspondence as to the merits from their respective points of view.—A.O.M., 27/2/83. We had better wait until Mr. Dalley returns the papers in regard to the appeal.—J.S.F., 28/2/83. If the Bill now before Parliament passes into law, the selection of Messrs. Brown will be a valid one.—A.O.M., 5/4/83. The selection by A. & J. Brown having been taken by an agent is invalid, and therefore void. The application of Mrs. Lane will therefore stand good.—J.S.F., 7/4/83.

Mr. Geo. Lewis.—It would appear that portion 17, parish of Teralba, county of Northumberland, was open to conditional purchase at date of Mrs. Lane's conditional purchase application on 15th June, 1882, as it seems apparently never thrown into Reserve 83, notified 5th July, 1880. Is this the case?—J. H. CHISHOLM, 7 May, 1883.

Portion 17, parish of Teralba, has not been thrown into Reserve 83. The Reserve Branch does not appear to have been apprised of the lapsing of mineral conditional purchase 78-15, until 27th September, 1882, subsequent to conditional purchase application by Mary P. Lane.—C.J.S., 16/5/83.

## No. 36.

## The Chief Commissioner of Conditional Sales to Messrs. H. J. Withers &amp; Co.

Gentlemen,

Department of Lands, Conditional Sales Division, 11 April, 1883.

Replying to your letter of the 8th February, on behalf of Mrs. Mary P. Lane, relative to the conflicting selections noted in the margin, I have now the honor to inform you that the Minister, to whom the case has been specially submitted, has given a decision confirmatory of the action of voidance taken with respect to the selection of Messrs. Brown, and that Mrs. Lane's application will be allowed to stand on its merits.

I have &amp;c.,

A. O. MORIARTY,

Chief Commissioner.

## No. 37.

## The Chief Commissioner of Conditional Sales to Messrs. J. and A. Brown.

Gentlemen, Department of Lands, Conditional Sales Division, Sydney, 11 April, 1883.

Adverting to my letter of the 30th August last, conveying to you the decision of the late Secretary for Lands respecting the conflicting selections noted in the margin, I have now to apprise you that on a re-submission of the case, at the instance of the agents of Mrs. Lane, the Minister for Lands has decided that the voidance of your mineral selection must be upheld, the application having been tendered by an agent; and that Mrs. Lane's application for the conditional purchase of the land shall stand on its merits.

I have, &amp;c.,

A. O. MORIARTY,

Chief Commissioner.

Newcastle,

and A. Brown,  
void.C.P. 82-3, 13 sec-  
tion, M. P. Lane

## No. 38.

## The Chief Commissioner of Conditional Sales to The Crown Lands Agent, Newcastle.

Sir, Department of Lands, Conditional Sales Division, Sydney, 13 April, 1883.

As, under the decision of the Secretary for Lands upholding the voidance of Messrs. J. and A. Brown's mineral selection noted in the margin, the later application by Mrs. M. P. Lane for the land as a conditional purchase is to stand on its merits, I send you herewith, for acceptance and entry in your official register, on payment of the necessary deposit money, the application made by Mrs. Lane, which you will be good enough to return to this office on completion of such action.

I have, &amp;c.,

A. O. MORIARTY,

Chief Commissioner.

Newcastle,  
C.P. 82-2, 1 June,  
1882, 640 acres,  
J. and A. Brown.  
Enclosure.  
C.P. application,  
82-2a, M. P. Lane.  
To be returned.

## No. 39.

## Notification by Mrs. M. P. Lane.

H.

[Alienation Act, sections 13, 14, 19, 21, and 22.]

Notification of alienation of conditional purchase under the Crown Lands Alienation Act of 1861.  
Notification of alienation of conditional purchase by Mary Priscilla Lane (widow), in the district of Newcastle.  
I HEREBY notify to you, as the Agent for the Sale of Crown Lands for the district of Newcastle, that I have, in consideration of the sum of 10s., this day alienated to Mary Priscilla Lane and David Wilson, both of Sydney, the 640 acres of land, situated in the county of Northumberland, parish of Teralba, portion 17, which was selected at Newcastle by myself as a conditional purchase, under the 13th section of the Crown Lands Alienation Act of 1861, on the 15th day of June, 1882, since converted into a mineral conditional purchase under the 19th clause of the Crown Lands Alienation Act. Date of the conditional purchase application, 14th September, 1882.

MARY PRISCILLA LANE,

of Sydney.

Dated at Sydney, this 4th May, 1883.

JAMES DEVLIN, J.P.

To the Agent for the Sale of Crown Lands at Newcastle.

I have duly registered the above notification of alienation in the records of this office. Fee of 12s. 6d. paid, including 7s. 6d. for registration fee, and 5s. stamp duty, and a further fee of 15s. for stamp duties, on 11/6/83.

ALEXR. LUMSDAINE,

Agent for the Sale of Crown Lands.

District of Newcastle, Land Office, }  
Newcastle, 7th May, 1883. }

## No. 40.

## Messrs. J. &amp; A. Brown to The Chief Commissioner of Conditional Sales.

Sir, Sydney, 8 May, 1883, 24, Bridge-street.

Will you kindly let us have a duplicate form, to enable us to obtain refund of £320 paid by Mr. James Brown as deposit for the conditional purchase of 640 acres of land at Newcastle; the previous form issued having been lost, as per enclosed declaration.

We are, &amp;c.,

J. &amp; A. BROWN,

(Per H. G. CURNOW.)

27 June, 1882,  
C.P., 82/2,  
Newcastle.*Minutes on No. 40.*

After action send papers to Charting Branch. 16/5/83. Mr. Bailie,—Inquire if money is available.—W.B., 16/5. Deposit available at Treasury.—J.B., 17th May, 1883. For duplicate.—W.B., 17/5. A.O.M., 17/5. Duplicate issued, 23rd May, 1883. C.S. Branch,—Before sending this case to Charting Branch, action should be taken respecting payment of deposit by Mrs. Lane, on conditional purchase application, registration of the same, and coming through the Land Agent as usual; also with regard to application to convert the conditional purchase into a mineral conditional purchase. It is presumed that the voidance of all conditional purchases clashing with Mrs. Lane's has been noted on application.—D. H. CHISHOLM (for the Surveyor-General), 16 June, 1883.

£320 deposit reported by Treasury, 7 May, 1883. Now as to change of section of Lane's conditional purchase 82-2A. Case submitted.—W.B., 26/7. The Chief Commissioner. Approved.—J.S.F., 27/7/83.

## [Enclosure to No. 40.]

Declaration by James Brown.

I, JAMES BROWN, of Minmi, representing J. and A. Brown, do solemnly and sincerely declare that I cannot now find the refund voucher sent me for my deposit on the mineral conditional purchase lodged at Newcastle on 1st June, 1882, per Mr. Law, which was established by Sir John Robertson, and since again disallowed. I have not hypothecated it—it is simply mislaid. And I make this solemn declaration, conscientiously believing the same to be true, and in virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled, "An Act for the more effectual abolition of Oaths and Affirmations taken and made in various Departments of the Government of New South Wales and to substitute Declarations in lieu thereof and for the suppression of voluntary and extra-judicial Oaths and Affidavits."

Made and signed before me, this sixteenth }  
day of April, 1883,—

C. F. STOKES, J.P.

JAMES BROWN,  
Representing James and Alexander Brown.

## No. 41.

The Chief Commissioner of Conditional Sales to Mr. H. Curnow.

Sir, Department of Lands, Conditional Sales Division, Sydney, 17 May, 1883.

I have to enclose a duplicate form which, on being filled up in accordance with the instructions thereon, and forwarded to the Treasury, Sydney, will enable applicant at once to obtain the refund of the deposit.

I have, &amp;c.,

A. O. MORIARTY,  
Chief Commissioner,  
(Per J.B.)

Mineral Lease Regulations.—Schedule 2.—Application for mineral leases.

To the Honorable the Secretary for Mines, Sydney.

Sir,

Glen Innes, 27 July, 1881.

We hereby make application for a mineral lease of that piece or parcel of land situated county Clive, parish of Moogem, containing 20 acres, of which we took possession on the 27th day of July, at the hour of 10 o'clock in the forenoon, for the purpose of mining thereon and therein for tin, by erecting posts and cutting L trenches at each angle thereof. The previous survey is accepted, being measured block No. 9.

Notice of our intention to make this application has been given in accordance with the Regulations in that behalf, and no person occupies a right to the land aforesaid. We also hand herewith £5, being the first year's rent in advance of the said land, paid on the 17th day of May last.

We hereby acknowledge that this application is made upon the distinct understanding and condition that if we shall abandon or fail to proceed with it, or if it is refused, the Secretary for Mines for the time being may deduct from the sum of £5 deposited as aforesaid any cost to which in his opinion the Crown may have been put in or about or in respect of this application; and this application shall thereupon become and be void, and the possession aforesaid shall cease and determine. And if the lease shall be granted, we shall and will commence mining operations upon or in connection with the demised land within one month from and after the granting thereof, and shall and will employ upon such land not less than four men during the first six months of the term thereby created, and not less than four men during the remainder of such term; and shall and will, at any time when called upon in terms of the Regulations relating to Mineral Leases to do so, execute and take delivery of such lease, or failing therein for a period of fourteen days after being so called upon, we shall and will forfeit the said sum of £5 and all right, title, or interest in and to the said land and the possession thereof, and the said lease shall be forthwith cancelled.

We have, &amp;c.,

MATTHEW M'IVOR &amp; PARTY,

Glen Innes.

This application was received by me this 5th day of August, 1881, at the hour of 3 o'clock in the afternoon, and is numbered 27 of 1881.—PERCY C. WELLS, Warden's Clerk.

## No. 2.

## Mr. Warden Martin's Report.

Application No. 27, at Glen Innes, for a mineral lease.

By whom application was received—Warden's Clerk. At what place—Glen Innes. Date and hour when received—5th August, 1881. Receipt for first year's rent, No. 16, date—17th May, 1881. To whom receipt was issued—M. M'ivor. Previous survey accepted. Is the time proposed for commencing work reasonable?—Yes. Is the number of men proposed to be employed reasonable?—Yes.

G. MARTIN,

Warden.

## No. 3.

## Office description.

Application No. 81/27, at Glen Innes. Applicant's locality—New England, Rocky or Pheasant Creek.

Description.

20 acres, county of Clive, parish of Moogem, portion 9: Commencing at the north-east corner of portion No. 8, on the south bank of the Rocky or Pheasant Creek; and bounded thence on the west by the east boundary of that portion bearing south 16 chains and 33 links; thence on the south by part of the north boundary of portion No. 6 bearing east 16 chains and 44 links to the Rocky or Pheasant Creek before mentioned; and thence on the east and north-east by that creek downwards to the point of commencement.

Examined.—W.S.C.

## No. 4.

## Messrs. Cass, Kirby &amp; Co. to The Secretary for Mines.

Sir,

Sydney, 18 April, 1882.

We have the honor to request that you will favour us with information as to whether Matthew M'ivor's lease has been issued yet for his 20 acres, Pheasant Creek.

Also, will you kindly favour us with date of application, and oblige,—

Yours, &amp;c.,

CASS, KIRBY, &amp; CO.

Urgent. Inform.—H.W., 19/4/12.

I have, &amp;c.,

GERARD E. HERRING,

(For the Under Secretary).

## No. 6.

Memorandum recommending minute for Executive Council.

Department of Mines—New England Mining District.

See No. 1.

APPLICATION No. 81-27, Glen Innes, for a mineral lease submitted herewith, for the consideration of the Honorable the Minister for Mines.

The plan and description have been checked. No objections appear to have been made. The number of men proposed to be employed appears reasonable. The time for commencing work appears to be reasonable. Application No. 81-27, Glen Innes, New England Mining District, approved of.

Minute for the Executive Council, 1/5/82.—A.R.

## No. 7.

Minute for Executive Council.

Department of Mines, Sydney, 1 May, 1882.

THE applications for mineral leases of Crown Lands specified in the annexed Schedule are submitted for the approval of His Excellency the Governor and the Executive Council, in terms of the Mining Act of 1874.

ARTHUR RENWICK.

Schedule alluded to.

No.	Name.	Locality.	Area.	Period.
Glen Innes. 81-27 *	M. M'Ivor .....	NEW ENGLAND MINING DISTRICT.] Parish of Moogem, county of Clive ...	acres 20 *	years 20 *

The Executive Council advise that the several applications for mineral leases herein specified be approved.—E. W. MCKENSY, Acting Clerk of the Council.

Minute 2/5/82. Approved.—A.L., 2/5/82. Confirmed, 9/5/82.

## No. 8.

Mineral lease.

No. 1,415, dated 9 May, 1882. Her Majesty the Queen to Matthew M'Ivor.

THIS indenture, made the ninth day of May, in the year of our Lord one thousand eight hundred and eighty-two, between Her Most Gracious Majesty Queen Victoria of the one part and Matthew M'Ivor, of Glen Innes, in the Colony of New South Wales (hereinafter called the lessee), of the other part, witnesseth that, in consideration of the sum of £5 paid by the said lessee, on the fifth day of August, 1881, and of the rents hereinafter reserved, and of the covenants and provisoes hereinafter contained, Her Majesty doth by these presents grant and demise unto the lessee, his executors, administrators, and transferees, all that piece or parcel of land containing by admeasurement twenty-five acres, and more particularly described and delineated in the Schedule hereto or in the plan hereunto annexed and numbered 9, except the surface of that portion thereof bounded by lines coloured red, containing \_\_\_\_\_ acres more or less, and all those mines, veins, seams, or deposits of [the mineral or metal proposed to be worked] in, on, and under the said land (hereinafter called the said mine), together with all and singular the shafts, levels, drifts, works, ways, fixtures, erections, liberties, easements, advantages, and appurtenances which are now or at any time during the term hereby granted may be held, occupied, or enjoyed therewith, for the purposes of mining upon and under the said land for tin; and also with full power for the said lessee, his executors, administrators, and transferees, and his and their agents and workmen (including contractors, tributors, and so forth), to dig, sink, drive, make, and use excavations, pits, shafts, levels, tunnels, watercourses, and other works necessary for winning and raising the tin in, on, or under the said land, and to take and appropriate the same during the term hereby granted, and to make and construct on the said land races, drains, dams, reservoirs, roads, and tramways, and also to erect on the said land all buildings, engines, furnaces, pumps, machinery, and appliances necessary for the purpose of winning and obtaining the tin in, on, or under the said land, and for effectually carrying on the works of the said mine; and also to erect on the said land such offices, cottages, and dwelling-houses, for the use of the agents, workmen, and persons employed in the said mine and works as the said lessee, his executors, administrators, and transferees shall think proper: To hold the said land, mine, and premises, with the appurtenances (subject nevertheless to the reservation or exception of that portion of the surface of the said land shown on the plan aforesaid bounded by lines coloured red, and to such rights and interests as may be lawfully subsisting therein at the date of these presents), unto the said lessee, his executors, administrators, and transferees, from the date hereof, for the term of nineteen years two hundred and thirty-six days next ensuing, for the purpose of mining therein or thereon for working or winning the said tin, and for no other purpose; yielding and paying therefor, unto Her Majesty, Her Heirs and Successors, yearly and every year during the said term, the yearly rent of £5 in advance, the first year's rent having been paid as aforesaid on the fifth day of August,

August, 1881; the next payment, being the rent of the said land for seven months twenty-three days, at the rate of fivepence per acre per month, from the ninth day of May to the thirty-first day of December, 1883, shall be made to the Colonial Treasurer in Sydney, on or before the thirtieth day of November, 1882; and thereafter on or before the thirtieth day of November in each and every year, the yearly rent aforesaid (being the rent of the land hereby demised for the year commencing the first day of January next after each such payment) shall be paid to the Colonial Treasurer aforesaid, clear of all rates, taxes, and assessments to which the said land, mine, and premises are now or at any time during the said term may be subject or liable: Provided always and it is hereby agreed that if the said yearly rent shall be in arrear for thirty days after the same shall have become payable, whether such rent shall have been legally demanded or not, any officer appointed or authorized thereto by the Secretary for Mines may, by himself or his agent, enter upon the said land, and seize and distrain all minerals, metals, and ores actually got and raised from the said mine, and all machinery, apparatus, tools, waggons, carts, carriages, engines, plant, and all other goods, chattels, and effects whatsoever in, upon, and about the said land and premises; and in every distress thus made may take away, sell, and dispose of, as in cases of distress for rent reserved in common leases, and out of the moneys arising thereby retain so much as shall be sufficient to satisfy the said arrears, and which shall at the time of such sale be unpaid, and all expenses incurred by him or them in or in respect of such seizure, distraint, removal, and sale; and if there be any surplus, such officer shall pay the same to the said lessee, his executors, administrators, or transferees, and the acceptance or receipt of rent by or on behalf of Her Majesty, after breach of any covenant hereinafter contained, shall not be or be deemed a waiver of the right of Her Majesty or of the Secretary for Mines, or other officer on behalf of Her Majesty, to enforce observance of such covenant: And if the said lessee, his executors, administrators, or transferees, shall mine for or win from the said land, mine, and premises any gold or any earth, rock, stone, quartz, clay, sand, gravel, or soil, containing gold or any mineral or metal with which gold is associated or combined, without the express sanction first had and obtained of the Secretary for Mines for the time being, the Governor with the advice of the Executive may declare these presents void, and thereupon all the right, title, and interest of the lessee, his executors, administrators, and transferees under these presents, shall cease and determine both at law and in equity: And the said lessee doth hereby, for himself, his heirs, executors, administrators, and transferees, covenant with Her Majesty, Her Heirs and Successors, in manner following, that is to say:—

1. That the said lessee, his executors, administrators, and transferees, shall and will, during the said term, pay unto Her Majesty, Her Heirs and Successors, the rent hereby reserved, at the times and places hereinbefore appointed for payment thereof, clear of all deductions.

2. And shall and will, after the expiration of one month from the date of delivery hereof, upon and during all lawful working days, except when prevented by inevitable accident or during the execution of repairs, make, construct and work the said land, mine, and premises, in the best and most effectual manner and to the best advantage without interruption, and shall and will diligently explore and search for tin in, on, and under the said land, mine, and premises.

3. And shall and will after the expiration of the said one month, employ in the construction of the works or in mining operations on or under the said land, during the first six months of the said term, and during the usual hours of labour, four able and competent workmen and miners at the least, and during the remainder of the said term and during the usual hours of labour shall and will employ as aforesaid not less than four such workmen and miners, unless prevented by inevitable accident or during the execution of repairs, so that within the first three years of the term hereby created there shall be expended upon the said land, mine, and premises such a sum of money as shall be equal to £5 sterling upon each and every acre hereby demised: Provided that the lessee, or if there be more than one lessee each lessee, who shall work as aforesaid shall count as and be deemed for the purposes of these presents to be a workman or miner employed as aforesaid.

4. And shall and will during the said term effectually drain the said mine, and pump all water likely to cause injury thereto or which would prevent or interfere with the working thereof; and if the said mine shall be affected, or shall be liable to be affected by the same flow or body of water as any other mine or mines contiguous thereto, shall and will, if and whenever requested so to do, contribute with the lessee or lessees or owner or owners of such other mines a reasonable proportion of the machinery and labour necessary to free and keep such mine or mines free from water to a workable extent; or if the said mine shall be kept free from water to a workable extent, either wholly or partially, by means of the machinery and labour of a contiguous mine or mines, or by reason of any works constructed or money expended by the lessee or lessees, owner or owners of such contiguous mine or mines, then shall and will pay to such lessee or lessees, owner or owners as aforesaid, a reasonable proportion of the cost of such machinery, labour, or works, or a reasonable proportion of the money so expended; and the Secretary for Mines for the time being may, if and whenever he shall think fit, depute some efficient person who shall have access to and inspection of all such mines, to determine when the said mine is so freed or kept wholly or partially free from water, and what are the reasonable proportions of such expenses aforesaid, and to whom and when the same are to be paid, such decision to be final and conclusive on all parties.

5. And shall and will make such provision for the disposal of the detritus, dirt, waste, or refuse of the said mine that the same shall not be an inconvenience, nuisance, or obstruction to any roadway, river, creek, or private or Crown lands, or shall not in any manner occasion any public or private damage or inconvenience.

6. And shall and will erect and keep erected during the said term a post painted white at each angle of the said land, and at such points along the boundary lines as shall be necessary, so as plainly and accurately to define the boundary lines and angles of the said land, and each such post shall be fixed firmly in the ground, and shall project above the surface thereof not less than 3 feet.

7. And shall and will, as often as required so to do during the term, make and deliver to the Secretary for Mines for the time being, or any officer appointed or instructed to collect, obtain, or receive the same, all such true and proper plans and sections, returns and statistics of the workings and operations of the said mine, made up to the last day of the preceding month (the truth and accuracy of which shall be verified by the statutory declaration of the lessee for the time being, or the manager or other officer having the charge, control, and direction of the works of the said mine), as the Secretary for Mines shall from time to time direct; and shall and will, whenever required by the Secretary for Mines so to do, deliver to any officer appointed or instructed as aforesaid samples of the minerals, metals and ores, or any of them, found in or upon such mine and land.

8. And shall and will, during the said term, make proper and reasonable compensation to the occupier or occupiers, lessee or lessees from the Crown of any adjoining land, in respect of any damage which may be sustained by him or them by reason of the working of the said mine or the carrying on of the works thereof or connected therewith, such compensation to be determined by the Secretary for Mines, or by some person authorized by him so to do.

9. And shall and will permit any mining surveyor or other person duly authorized in that behalf, with all proper or necessary assistants, at all reasonable times during the said term, quietly to enter into and upon the said land, mine and premises, to survey and examine the state and condition thereof, and for the purposes aforesaid to descend all pits and shafts, and to enter into and use all adits, levels, galleries, drives and excavations, and to use all roads, ways, engines, ropes, machinery, gear, appliances, materials, labour, and other things in or on the said land and mine which shall be by him deemed necessary, without making any compensation for the same, so nevertheless that in so doing no unnecessary interference is caused with the carrying on of the said mining works.

10. And further, shall and will, at all times during the said term, keep and preserve the said mine and premises from all avoidable injury or damage, and also the levels, drifts, shafts, watercourses, roads, ways, works, erections, and fixtures therein and thereon, in good repair and condition, except such of the matters and things last aforesaid as shall from time to time be considered by a mining surveyor or other proper officer authorized by the Secretary for Mines to inspect and report upon such matters and things to be unnecessary for the proper working of the said mine or any contiguous mine, and in such state and condition shall and will, at the end or sooner determination of the said term, deliver peaceable possession thereof, and of all and singular the premises hereby demised, to Her Majesty, Her Heirs and Successors, or to the Warden or other officer authorized to receive possession thereof: Nevertheless, the Secretary for Mines may if he think fit permit the lessee, his executors, administrators, and transferees, within six months after possession shall have been received as aforesaid, to enter upon the said land and to remove therefrom such machinery, plant, and apparatus as shall have been erected and fixed upon such land, and such earth, rock, ore, mineral, or metal as shall have been won from and raised to the surface of such mine.

11. And shall not nor will use or occupy, or permit to be used or occupied, the said land or any part thereof for other than mining purposes, or for pasturage, or as sites for dwellings or garden ground for the persons employed in, on, or about the said mine.

12. And shall not nor will mine in or upon the said mine, land and premises, for any mineral, metal, or ore other than tin, without the express sanction of the Secretary for Mines.

13. And shall not nor will transfer, underlet, or part with possession of the said land, mine, and premises or any part thereof, or mortgage, charge, or encumber the same, without the license first had and obtained of the Secretary for Mines for the time being: Provided always that no such license shall be necessary in cases where by operation of law or otherwise a sale of the said land, mine, and premises, or any part or parts thereof, is made by any person or persons entitled to sell the same for the benefit of the creditors, or a creditor of the lessee or his transferees, or in cases where the lessee or his transferees desire to let the said mine and premises, or any part thereof, to be worked on tribute.

14. And shall not nor will close up or obstruct any adit or adits to or from any contiguous mine or mines, whereby fresh air is admitted or ventilation promoted.

15. And shall not nor will plead acceptance of rent by or on behalf of Her Majesty, as a waiver of the right of Her Majesty or of the Secretary for Mines, or other officer on behalf of Her Majesty, to enforce obedience of the covenants herein contained, or of the right of the Governor with the advice of the Executive Council to declare these presents void for breach of any such covenant: Provided always and it is hereby agreed and declared in manner following:—

16. That it shall be lawful for Her Majesty, Her Heirs, Successors, and assigns, to make and use in, on, or under the said land, any levels, drifts, leads, shafts, watercourses, adits, roads, ways and passages, for freeing and keeping free any other lands or mines from water, or for conveying water to any other lands or mines for mining purposes, or for supplying any other mines with fresh air, or for effectually working any other mines, or for any public purpose whatsoever, causing as little damage, obstruction, or interference as possible to or with the said mine and the works thereof: And if at any time during the term hereby created any part or parts of the land hereby demised, or any part or parts of the surface thereof, shall be required for the purpose of any township, village, railway, road, canal, watercourse, reservoir, or for any other public purpose, it shall be lawful for the Governor for the time being with the advice of the Executive Council, on giving three months' notice of his intention so to do, to cause to be set out the part or parts of the said land or of the surface thereof which shall be so required; and as soon as the same shall be so set out, such part or parts of the said land or of the surface thereof shall cease to be included in the land hereby demised, and the lessee, his executors, administrators, or transferees, shall not be entitled to any abatement of rent or any compensation whatever in respect thereof.

17. And if the lessee, his executors, administrators, or transferees, shall prove to the satisfaction of the Secretary for Mines for the time being that the said mine is unworkable from any cause whatsoever, or that the lessee, his executors, administrators, or transferees, is or are unable by reason of sickness or other sufficient cause to work in such land or mine, or that the supply of water is insufficient to allow the working of the said land, mine, and premises to be profitably carried on, the said Secretary for Mines may grant permission to suspend work therein or thereon for any period not exceeding six months, without the lessee, his executors, administrators, or transferees incurring in respect thereto any forfeiture or penalty for breach of any covenant herein contained.

18. And lastly, that if the lessee, his executors, administrators, or transferees shall at any time during the said term fail to use such land *bona fide* for the purpose for which it has been demised, or if and whenever the said rent shall be in arrear for thirty days after the time appointed for payment thereof, whether the same shall have been legally demanded or not, or if and whenever there shall be a breach of or non-compliance with the covenants and provisoes herein contained, by the lessee, his executors, administrators, or transferees, and the lessee, his executors, administrators, or transferees shall not have obtained from the Secretary for Mines for the time being permission to suspend work as aforesaid, in case the breach shall have been for the non-compliance with the covenants for the employment of workmen or miners or for the working of the mine, the Governor with the advice of the Executive Council, who alone and finally shall judge and determine the matter upon the evidence or reports submitted by the Secretary for Mines for the time being, may declare these presents void, and upon publication in the Government Gazette of  
notice

notice of such declaration, all the right, title, and interest of the lessee, his executors, administrators, and transferees under these presents, shall cease and determine both at law and in equity; and the production of a copy of the Government Gazette containing a notice purporting to be signed by the Secretary for Mines, declaring the lease void, shall be conclusive evidence in all Courts whatsoever in the Colony of New South Wales of a breach of or non-compliance with the covenants and provisoes herein contained, sufficient to authorize and sustain such declaration having been lawfully made, and that the interest created hereunder has been lawfully determined; and thereupon it shall be lawful for Her Majesty, Her Heirs and Successors, or Her or their agents or officers, or for any bailiff or other person duly authorized thereto, or for any holder of a mineral license who has the permission of the Secretary for Mines for the time being, without any previous demand whatsoever, to enter forthwith into and upon the said land and premises hereby granted, and the same to repossess and enjoy as fully and effectually to all intents and purposes as if these premises had not been made, and the said lessee, his executors, administrators, and transferees to expel and remove, without any legal process, and as effectually as the Sheriff might do in case judgment in ejectment had been obtained and a writ of *habere facias possessionem* had been issued on such judgment; and in case of such entry and any legal proceeding taken in respect thereof; the defendant or defendants in any such proceeding may plead leave and license in bar thereof; and these presents shall be conclusive evidence of such leave and license by the lessee, his executors, administrators, and transferees, or other the person or persons, plaintiff or plaintiffs in such proceedings, for such entry or other matters complained of in such proceedings.

In witness whereof, His Excellency the Right Honorable Lord Augustus William Frederick Spencer Loftus, Knight Grand Cross of the Most Honorable Order of the Bath, a Member of Her Majesty's Most Honorable Privy Council, Governor and Commander-in-Chief of the Colony of New South Wales and its Dependencies, hath, on behalf of Her Majesty the Queen, caused the Seal of the said Colony to be affixed to this Grant, and also set his hand, at Government House, Sydney, in the said Colony, the day and year first above written, and the lessee has also set his hand and seal, the twenty-fourth day of July, 1882.

AUGUSTUS LOFTUS.

#### Power of Attorney.

#### Mineral Lease Regulations.—Schedule 12.

Know all men by these presents that I, Matthew M'IVOR, miner, of Glen Innes, do hereby make, nominate, constitute, and appoint, and in my place or stead put, Roger Thos. Kirby, of Sydney, to be my true and lawful attorney for me, and in my name, and as my act and deed, to sign, seal, and take delivery of the mineral lease for which I, on the 5th day of August, 1881, made application (No. 27/81, at Glen Innes), under the provisions of the "Mining Act, 1874," and the Regulations made thereunder, and which has been or shall be granted and issued by the Governor; and for me and in my name to enter into all such covenants and agreements as he shall be required to enter into in and by the said lease, and generally

M.L. 1415.

generally for me and in my name to do, execute, and perform all such other acts, deeds, and things as may be necessary or may be required to be done, executed, or performed in and about the application for and execution of such lease; and I do hereby ratify and confirm all and whatsoever the said Roger Thos. Kirby shall lawfully do or cause to be done in or about the premises, by virtue of this power.

In witness whereof, I have hereunto set my hand and seal, this 13th day of May, 1882.

MATTHEW M'IVOR.

#### Transfer of Mineral Lease.

Mineral Lease Regulations.—Schedule 13.

I, MATTHEW M'IVOR, of Glen Innes, in the Colony of New South Wales, being registered as the lessee of all that mineral lot demised by a certain mineral lease granted by Her Majesty the Queen to M. M'Ivor, and dated the 9th day of May, 1882, and numbered in the Register 1,415, in consideration of the sum of £100 paid to me by the transferees, the receipt of which sum I hereby acknowledge, do hereby transfer to the said T. M. Slattery and J. V. Hinton all my right, title, and interest in and to the mineral lot demised as aforesaid. And we do hereby accept transfer of the right, title, and interest of the said Matthew M'Ivor, in and to the demised land aforesaid, subject to the provisions of the "Mining Act, 1874," and the Regulations made thereunder; and we do hereby agree to be bound by all and singular the terms, conditions, covenants, provisoes, restrictions, and reservations contained in the said lease.

In witness whereof we have hereunto subscribed our respective names, this 7th day of July, 1882.

### No. 12.

#### Messrs. Cass, Kirby, & Co. to The Secretary for Mines.

Sir,

Having purchased from Mr. Matthew M'Ivor his mineral lease 1,415, for measured portion No. 9, situate at Pheasant Creek, parish of Moogem, county of Clive, the said lease having been executed yesterday and transferred to-day, we have the honor to request that you will, for the following reasons, grant us six months' suspension of labour from the 11th August next.

We have, &c.,  
CASS, KIRBY & CO.,  
Agents for  
GEO. E. CASS and WALTER LEE.

That any labour expended on the ground until machinery has been erected would be money wasted, and as we anticipate having to send to England for a portion of the machinery we require, we do not think we shall be able to have it on the ground at an earlier date.—C.K. & Co.

Mineral lease 1,415 executed this day.—T.C.B., 24/7/82. In view of Mr. T. F. DeCourcy Browne's letter of 22nd instant, no further action should be taken on this till the question of conditional purchase has been cleared up. If the land has been conditionally purchased, Messrs. Cass, Kirby & Co. should be informed at once. The land has been conditionally purchased, *vide* 82-7697.—H.W., 26/7/82. Inform Mr. Cass, M.P.—A.R., 26/7/82.

See No. 13.

No. 13.

## No. 13.

Mr. T. F. DeCourcy Browne to The Under Secretary for Mines.

Sir,

Sydney, 22 July, 1882.

Having reference to mineral lease No. 1,415, gazetted on the 14th July as being ready for issue to the applicant, M. M'Ivor, I beg to state that the land comprised in that lease was alienated as a mineral conditional purchase on the 13th April, 1882, being a date long antecedent to the notice of approval of Mr. M'Ivor's application in the Gazette. As Mr. M'Ivor has parted with his title in the lease to the conditional purchaser, I have to request that no further steps be taken to issue the lease to the said land, as it will possibly create a most undesirable mixing up of titles, without conferring an atom of benefit upon any person interested.

Owing to the very exceptional speed shown in the issue of this lease—its approval being gazetted on the 13th June, and notification of the lease being ready, gazetted on the 4th July—I have deemed it necessary to notify you of the alienation of the land by mineral conditional purchase, for the reasons above stated.

I have, &amp;c.,

T. F. DECOURCY BROWNE,  
(Agent for G. K. KING).

Ascertain whether it is true, as herein stated, that the land comprised in M.L. No. 1,415 has been conditionally purchased, and if so, when, and by whom? Urgent.—H.W., 26/7/82.

The Chief Draftsman,—It has been applied for by Wm. Lee, M.C.P. 2/101, 40 acres, 13th April, 1882, and by Geo. K. King, 82/152, M.C.P., 60 acres, 25th May, 1882, Glen Innes Land Office.—W.S.C., 26 July, 1882.

The Under Secretary for Mines,—M.L. 1,415—Application approved on the 9th May last. Ascertain at the Lands Department whether portion 9, parish of Moogem, county of Clive, is covered by a valid conditional purchase, and if so by whom made.—H.W., 26/7/82. Urgent.

## No. 14.

The Under Secretary for Mines to Messrs. Cass, Kirby, &amp; Co.

Gentlemen,

Department of Mines, Sydney, 26 July, 1882.

Referring to your letter of the 12th instant, in which you ask permission to suspend labour for six months upon the land demised under mineral lease No. 1,415, being portion 9, in the parish of Moogem, county of Clive, I am directed by the Secretary for Mines to inform you that it appears the land has been conditionally purchased for mining purposes.

I have, &amp;c.,

HARRIE WOOD,  
Under Secretary.

P.S.—Inquiry will be made at the Lands Department whether the purchase is valid.

## No. 15.

The Under Secretary for Mines to The Chief Commissioner, Department of Lands.

Sir,

Department of Mines, Sydney, 26 July, 1882.

I have the honor to request that you will be so good as to have me informed, as early as possible, whether portion No. 9, parish of Moogem, county of Clive, is covered by a valid conditional purchase, and if so, by whom such purchase was made.

I have, &amp;c.,

HARRIE WOOD,  
Under Secretary.

## No. 16.

Mr. T. F. De Courcy Browne to The Under Secretary for Mines.

Sir,

Sydney, 31 July, 1882.

Having reference to mineral lease No. 1,415, proposed to be issued to one M. M'Ivor, and in connection with which a communication has been made to the Department of Lands, as to the land proposed to be leased having been alienated by virtue of an M.C.P., I beg respectfully to point out, by way of further protest against the issue of this lease, that you have not correctly stated the case to the Lands Department by asking "if any valid M.C.P. covered this land on the 9th May, 1882."

The notification of the approval of M'Ivor's application to lease was not gazetted till the 13th June, 1882. Until that date the land was Crown Lands, within the Mining Act 1874, *vide* interpretation clause, and regulation 30,<sup>1</sup> relating to mineral leases. The date of the Gazette<sup>2</sup> notice is the date terminating the pendency of the application. This was settled by the Chief Justice, Justices Hargrave and Faucett, in December, 1875, in a case—*ex parte* Gard—from Gulgong.<sup>3</sup> It is only common sense and equity to thus fix the date, as otherwise how can the public be aware of the decision arrived at? If your idea of the date were accepted a door would be opened to fraud, and a confusion of title would arise destructive of all confidence.

As our Mining Statute of 1874 is a wretched hash of the Victorian Mining Statute of 1865, decisions on the same lines as the Supreme Court decision quoted will be found in "Macfarlane's Digest of Mining Cases," 1881.

<sup>1</sup> Regulation 30 does not touch the case.<sup>2</sup> Regulation 28, date of application.<sup>3</sup> I doubt if that case affects this question.

} H.W.

Under these circumstances, I most emphatically protest against the proposed issue of this No. 1,415 lease, as a violation of the statute law, and an act which must engender bitter litigation, resulting to a certainty in a claim for compensation to the Government, which cannot be ignored.

My client is in possession of the land proposed to be leased, and intends defending that possession legally and by all other lawful means. Hence, with the Department of Mines rests the onus of any legal or physical conflict which may result from its action.

There is a further fatal objection to the issue of this lease: it was not taken possession of in the manner required by regulation 2, relating to mineral leases, and if the applicant wishes he can enforce or fortify his title under section 40 of the Mining Act.

Respectfully requesting a consideration of the substantial objections lodged by me to the issue of this lease,—

I have, &c.,

T. F. DECOURCY BROWNE,

Agent for GEORGE K. KING.

No. 17.

Mr. R. T. Kirby to The Secretary for Mines.

Sir,

Sydney, 31 July, 1882.

Herewith please find M'Ivor's declaration and mineral license, for which please give me receipt.

I would feel greatly obliged if you would inform the Lands Department of the contents of the declaration.

I am, &c.,

R. T. KIRBY.

The receipt of the license and declaration may be acknowledged, and may then be forwarded to the Lands Department in connection with the papers relating to portion No. 9, parish of Butterleaf or Moogem, in the county of Clive, and M.L. 1,415.—H.W., 31/7/82.

Mr. DeCourcy Browne, on behalf of Mr. King, urges that the date of approval of an application to lease is the date on which the approval is gazetted. The practice of the Department (supported, as I think, by the regulations) has been to regard the approval as taking effect from the date on which such approval has been confirmed by the Executive Council. Submitted.—H.W., 3/8/82.

Latter opinion the correct one.—A.R., 3/8/82. The Chief Commissioner of Conditional Sales, B.C., 5/8/82.—G.E.H., p. U.S.

The conditional purchase of Walter Lee, 40 acres, county of Clive, C.P. 82-101, Glen Innes, was declared void on 7th ultimo. The conditional purchase of George K. King, C.P. 82-152, 60 acres, Glen Innes, remains in abeyance.—W.B., for the Chief Commissioner of Conditional Sales.

The Under Secretary for Mines, B.C., 6/9/82.

I, MATTHEW M'IVOR, of Glen Innes, do solemnly and sincerely declare that I am the person mentioned in the mineral license annexed hereto, and No. 110-80, and bearing date the 29th December, 1880. In virtue of the said mineral license I took possession of and applied to lease 20 acres of land, being surveyed block No. 9, and the said lease was granted to me by the Crown. The said land is situate in county of Clive, parish of Butterleaf. And I make this solemn declaration, conscientiously believing the same to be true, and in virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled "An Act for the more effectual abolition of Oaths and Affirmations taken and made in various Departments of the Government of New South Wales and to substitute Declarations in lieu thereof and for the suppression of voluntary and extra-judicial Oaths and Affidavits."

MATTHEW M'IVOR.

Made and signed before me, at Glen Innes, }  
this 27th day of July, 1882,— }

S. W. BURRIDGE, J.P.

New South Wales.

Place of issue—Glen Innes.

Date, 29 December, 1880.

MINERAL license issued to M. M'Ivor, of Glen Elgin, under the provisions of the "Mining Act 1874," to be in force until the 29th day of December, 1881.

W. J. MARTIN,

Mining Registrar.

No. 18.

The Under Secretary for Mines to Mr. R. T. Kirby.

Sir,

Department of Mines, Sydney, 4 August, 1882.

I have the honor to acknowledge receipt from you of a declaration made by Mr. M. M'Ivor, respecting portion No. 9, in the parish of Butterleaf, together with his mineral license, and to inform you that the documents will be forwarded to the Lands Department in connection with papers relating to the said portion of land and mineral lease No. 1,415.

I have, &c.,

HARRIE WOOD,

Under Secretary.

No. 19.

The Under Secretary for Mines to Mr. T. F. DeCourcy Browne.

Sir,

Department of Mines, Sydney, 5 August, 1882.

With reference to your letter of the 31st ultimo, in which you object to the issue of mineral lease No. 1,415, to Mr. M. M'Ivor, on the ground that the approval of his application to lease was not notified in the Gazette until the 13th June last, I am directed by the Secretary for Mines to point out that it has been

been the practice of the Department (supported it is thought by the Regulations) to regard the approval of an application to lease as taking effect from the date on which such approval has been confirmed by the Executive Council, and I am to add that this course appears to be the correct one.

I have, &c.,  
HARRIE WOOD,  
Under Secretary.

No. 20.

Minute of Under Secretary for Mines.

Messrs. Cass, Kirby & Co. demand the lease No. 1,415, of portion 9, parish of Butterleaf or Moogem, and say they will lose over £30,000 if the lease is withheld any longer.

A letter was sent to the Lands Department, asking whether the portion in question is covered by *See No. 15.* a valid conditional purchase. To this letter no reply has been received. A reminder setting out the facts may be sent to the Lands Department, with a request that a reply be given at once if possible.

H.W., 9/8/82.

---

No. 21.

The Under Secretary for Mines to The Chief Commissioner, Department of Lands.

Sir,

Department of Mines, Sydney, 9 August, 1882.

I am directed by the Secretary for Mines to invite your early attention to my letter of the *See No. 15.* 26th ultimo, in which inquiry was made whether portion No. 9, in the parish of Butterleaf or Moogem, was covered by a valid conditional purchase, and if so, by whom such purchase was made. In the absence of any reply to this inquiry, a demand is being made by Messrs. Cass, Kirby & Co. for an immediate issue of the lease of this land for mining purposes, and they represent that they will suffer a great loss if such lease is any longer withheld.

Under these circumstances, I am to ask you to give a reply at once to my inquiry if possible.

I have, &c.,  
HARRIE WOOD,  
Under Secretary.

---

No. 22.

The Chief Commissioner, Department of Lands, to The Under Secretary for Mines.

Sir,

Department of Lands, Conditional Sales Division, Sydney, 9 August, 1882.

In reply to your letter, dated 26th ultimo, requesting to be informed whether portion No. 9, *See No. 15.* parish of Moogem, county of Clive, is covered by any valid conditional purchase, I have the honor to forward you, enclosed herewith, copy of application, by which you will see that the portion in question was conditionally purchased by Mr. George K. King on 25th May, 1882.

I am also directed to request you will be good enough to state at your early convenience whether, at the date of such application, the land was under lease for mining purposes to any person other than the applicant.

I have, &c.,  
A. O. MORIARTY,  
Chief Commissioner.

---

[Enclosure to No. 22.]

C.P. No. 82-152.

Applicant, George Kennedy King; Police District, Glen Innes; date, 25th May, 1882; time 10 a.m.; area, 60 acres; section 19.

Description.

60 acres, county of Clive, parish of Moogem, being measured portions Nos. 5, 6, and 9, each 20 acres, the two former (viz., 5 and 6) being held under mineral lease by the applicant. Boundaries taken as surveyed for M.L.s

In view of the statement herein as to date of conditional purchase, and the fact that the application to lease No. 27-81 had been approved on the 9th May last, the lease No. 1,415 may now be issued and the Lands Department so informed. Submitted.—H.W., 10/8/82. Approved.—A.R., 10/8/82.

---

No. 23.

The Under Secretary for Mines to The Chief Commissioner, Department of Lands.

Sir,

Department of Mines, Sydney, 10 August, 1882.

Referring to your letter of the 9th instant, as to the state of portion No. 9, in the parish of *See No. 22.* Moogem, county of Clive, I am directed to inform you that, in view of the statement contained in your letter that the land was conditionally purchased by Mr. G. K. King on the 25th of May last, and the fact that the application No. 27-81 to lease for mining purposes had been approved on the 9th of that month, the Secretary for Mines has authorized the issue of the lease No. 1,415. *See No. 8.*

I have, &c.,  
HARRIE WOOD,  
Under Secretary.

PLEASE say by telegram whether there is any objection to grant permission to suspend work upon lease No. 1,415.

7 September, 1882.  
HARRIE WOOD,  
Under Secretary.

No. 26.

Telegram from Mr. Warden Martin to The Under Secretary for Mines.

I WOULD recommend that permission to suspend work on mineral lease 1,415 be granted for six months. There is no local objection.

8 September, 1882.  
G. MARTIN,  
Warden.

Permission to suspend work for six months on mineral lease No. 1,415 may be granted, in accordance with the recommendation of the Warden, and Mr. Cass, M.P., may be informed.

Submitted.—H.W., 8/9/82.      Approved.—A.R., 8/9/82.

No. 27.

The Under Secretary for Mines to G. E. Cass, Esq., M.P.

Sir,      Department of Mines, Sydney, 8 September, 1882.

I have the honor to inform you that the Secretary for Mines has, upon the recommendation of the Warden, to whom the matter was referred for report, granted permission to suspend labour for a period of six (6) months from this date upon the land held under mineral lease No. 1,415.

I have, &c.,  
HARRIE WOOD,  
Under Secretary.

No. 28.

W. J. Fergusson, Esq., M.P., to The Under Secretary for Mines.

Sir,      Sydney, 21 September, 1882.

I have to request that you will be good enough not to register any dealings with, and especially the transfer of, a certain lease granted to Matthew McIvor, of Glen Elgin, to any person, of measured portion No. 9 of 20 acres, situate in the county of Clive and parish of Moogem, as an action to eject McIvor has been instituted.

Yours, &c.,  
W. J. FERGUSSON,  
Per A.W.

Should not the writer be informed that if he desires to prevent the sanction of any transfer he should take the proper legal steps?      Submitted.—H.W., 23/9/82.      Yes.—A.R., 25/9/82.

No. 29.

The Under Secretary for Mines to W. J. Fergusson, Esq., M.P.

Sir,      Department of Mines, Sydney, 27 September, 1882.

With reference to your letter of the 21st instant, asking that no dealings with and no transfer of a certain lease granted to Matthew McIvor to any person, of portion No. 9, parish of Moogem, county of Clive, be registered, I am directed by the Secretary for Mines to inform you that if you desire to prevent the sanction of any transfer you should take the proper legal steps.

I have, &c.,  
HARRIE WOOD,  
Under Secretary.

No. 30.

Subpœna.

No. 2163, A.D. 1882. In the Supreme Court of New South Wales.

King v. McIvor.—*Subpœna duces tecum*, for The Under Secretary for Mines. Fergusson, 136, Pitt-street, Sydney.

VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland Queen, Defender of the Faith, &c., &c.

To Harrie Wood, Under Secretary for Mines—

Greeting:

WE command you that, laying all other matters and business aside, and notwithstanding any excuse, you personally be and appear before our Supreme Court of New South Wales, at the Court-house situate at Armidale, in the said Colony, on Thursday, the twelfth day of October now next, at the hour of ten of the clock in the forenoon, and thence from day to day at the same hour of each day until the cause hereinafter

hereinafter mentioned shall be tried, to testify all and singular those things which you know in a certain cause now depending in our said Court, and on that day to be tried, between Thomas King, plaintiff, and Matthew M'Ivor, defendant, in action of ejection on part of the plaintiff. And that you diligently search and inquire for and procure and bring with you and produce at the time and place aforesaid, all deeds, instruments, books, papers, maps, plans, specifications, writings, letters, vouchers, receipts, documents, and memoranda, and all drafts and copies thereof in your possession or power relating to or in anywise concerning, or which can or may afford any evidence or information respecting the matters in question in the said cause, and particularly all books, papers, documents, writings, and other instruments in any way whatever relating to a certain application by the defendant, at Glen Innes, on the 27th day of July, 1881, to mineral lease, block No. 9, situate at Pheasant Creek, in the parish of Moogen, and county of Clive; also Register of Leases, official plan of county of Clive, parish of Moogen; and the copy which shall be served upon you of this writ. And this you shall by no means omit, under the penalty of one hundred pounds.

Witness—The Honorable SIR JAMES MARTIN, Knight, Chief Justice of our said Court, at Sydney, the second day of October, in the forty-sixth year of our Reign, A.D. 1882.

For the Prothonotary,

T. E. MURPHY, (L.S.)

4th Clerk of the said Supreme Court.

HARRIE WOOD,

Under Secretary.

No. 34.

Telegram from Under Secretary for Mines to Mr. T. C. Binny.

12 October, 1882.

KING v. M'Ivor.—You can supply Mr. Kirby with such extracts as would, under similar circumstances, be supplied in the head office.

HARRIE WOOD,

Under Secretary.

No. 35.

Mr. Matthew M'Ivor to The Secretary for Mines.

Sir,

Sydney, 18 October, 1882.

I have the honor to inform you that, on the 9th day of May last, I had granted to me a mining lease for portion No. 9, parish of Moogen, county of Clive; that on the 13th instant, at Armidale, Judge Windeyer gave a verdict to G. K. King, of George-street, Sydney, against me, holding that a mineral conditional purchase dated sixteen days later was good as against my lease.

This is, therefore, to caution you against granting to the said Geo. K. King a title to the said portion of land, as it is my intention to apply to the Supreme Court for a new trial.

King's application was on the 25th May, 1882, for portions 5 and 6, being his own mineral leases and my portion No. 9, of 20 acres each.

I have, &c.,

MATTHEW M'IVOR,

(By his Attorney, R. T. KIRBY), *per* N.B.C.

Nothing can be done in this Department towards granting Mr. King a title to the portion in question. Submitted.—H.W., 20/10/82. Seen.—A.R., 21/10/82.

## Mr. T. F. DeCourcy Browne to The Secretary for Mines.

Sir,

Sydney, 13 November, 1882.

Having reference to a mineral lease, No. 1,415, issued to one M. McIvor, for an area of 20 acres of land, situated in county of Clive, parish of Moogem, which land I claim to have alienated before the lease was issued to M. McIvor, I beg to state that on a writ of ejectment issued by me against the lessee, the Supreme Court, sitting at Armidale, gave judgment in my favour.

One of my pleas was, that the lessee had not complied with the conditions of possession, as required by the regulations, in the matter of posting notices, board, &c. Mr. Justice Windeyer held these omissions to be fatal to the lessee's title, and the full Court, in its judgment in the case of *Martin v. Baker* (two Supreme Court reports), held a similar view.

As I cannot get a complete title from the Lands Department for the whole of the area I applied for as a mineral conditional purchase until the Mines Department has cancelled the lease (No. 1,415), I have now to apply for the cancellation of the lease by your Department, on the grounds that the applicant obtained it by fraud and misrepresentation, as proved by the sworn evidence at the hearing of the case at Armidale.

Some days ago a copy of the Judge's notes, attested by Mr. Fergusson, my solicitor, was forwarded to you for perusal; hence, I presume I need not herewith forward a copy of them, but am prepared to do so if deemed necessary.

I shall be glad of an early decision on this matter, in order to facilitate the completion of my title in the Lands Department.

I have, &amp;c.,

T. F. DECOURCY BROWNE,

(Agent for GEORGE K. KING.)

I do not see that this Department can do anything to cancel the lease No. 1,415 upon the statements herein made. Mr. Kirby, on behalf of Mr. McIvor, states that he intends applying to the Supreme Court for a new trial, and until the result is known no steps should be taken.

Submitted.—H.W., 15/11/82.

Inform. (The papers connected with the trial at Armidale, referred to in this letter, ought to be attached to papers).—A.R., 16/11/82.

## Judge's Notes.

Friday, 13 October, 1882, at Armidale.

Cor.: Windeyer, J., and a Jury of four.

O'Connor, instructed by \_\_\_\_\_, for the plaintiff. Heydon, instructed by \_\_\_\_\_, for the defendant.

## ACTION—EJECTMENT.

By consent of the plaintiff, the name of the plaintiff and the writ are amended.

*Henry Sanders*: I am a land agent at Glen Innes; Mr. Le Jeune was agent at the time of this application, during my absence in Sydney. There is a measured portion No. 9, parish of Moogem, county of Clive.

A. [Put in evidence and marked A, application for conditional purchase, dated 25th May, 1882.]

*Cross-examined*: The description of the land in the writ is the same as that in the document produced, marked for identification.

*Re-examined*: The No. 9 mentioned in the application appears to be the same as in the writ.

*George Kennedy King*: By O'Connor: I am the plaintiff in this action; I signed the application on the 25th May; tendered it (document A) to the land agent at Glen Innes, and tendered and he received the deposit of £30; I afterwards on the same afternoon took possession of the land; Nos. 5 and 6 were already under mineral lease to me, but not No. 9; no one was in occupation of No. 9, and as far as I know it was unoccupied Crown Land; the blocks had been surveyed in 1872 or 1873; No. 9 was marked on the land on a tree at the corner; I held possession till August last, when I was put out of possession by the defendant in the Warden's Court.

*Cross-examined*: The lots had been surveyed for mineral leases; I saw the defendant in March last; I did not then propose to buy him out, nor to amalgamate with him; I had no conversation with the defendant about this land; the defendant was making tea and damper for me and for the party with me; it was on a Thursday, a land office day, that I took up the land.

## THE DEFENCE.

Heydon here tenders a lease of the 9th May.

O'Connor objects that the execution of the lease must be proved, and that the seal of the Colony is not affixed to it.

His Honor rejects the document, it not appearing to him to bear the Great Seal of the Colony.

*Thomas C. Binny*: By Heydon: I am the Registrar of the Department of Mines; the signature of this lease is the signature of the Governor. (Heydon here tenders the document on proof of the Governor's signature.) I believe that this is the Seal of the Colony; this is the mode in which the seal of the Colony was affixed to mineral leases—such was the mode at the time this lease was issued; a change has been made lately; now a wafer with a piece of paper is put on and the stamp put on it; the same seal is used, not one used in the office but one at the Colonial Secretary's Office, where the Seal of the Colony is kept.

*Cross-examined by O'Connor*: Mineral leases are prepared in our office and then sent to the Colonial Secretary's Office; I have no personal knowledge that the seal was affixed to this; I see the word "Dei"; I would not like to swear that this is the Seal of the Colony, but I believe it to be so.

*Re-examined*: I have seen a great many documents with the seal of the Colony affixed to them, and am familiar with the impression which the seal makes—its appearance coincides with the seal; we register leases before the seal, signature, &c., are attached.

(Document here tendered in evidence and admitted by his Honor. Mr. O'Connor still objecting that what is called a seal is in point of fact not a seal.)

Put in evidence said document and numbered 1.

*Cross-examined*

*Cross-examined by O'Connor*: I have charge of the mineral leases, and they go through my hands before they are sent for execution: the date first written is the date of the approval by the Governor and Executive Council; it was sent to the Governor for execution on the 2nd June; it must have been signed by the Governor on or after the 2nd June, 1852; I produce an application by the defendant, and a minute of the Executive Council of the date 9th May, approving of the application.

Said document marked for identification.

On these two documents the lease is prepared and issued, and on them this lease was issued.

*Matthew M'Ivor*: I am the defendant in this action; this is not my signature to the application—James M'Intyre wrote it with my authority for me; the application was lodged for me and by my authority; the land in the application is the land in the lease. (O'Connor objects that the application cannot be made by an agent, and that the ground must be marked out first.) I marked the land before I made the application; my agent made the application wrong for me; I marked it by putting up posts at each angle, and marking the ground by putting up a wall of rocks, as I could not dig trenches; the posts were over 3 feet; I put up the notice on a tree; I put up a form, that in Schedule I, and my name to the form; there was no one in occupation on the 26th July except me; I knew of no one then having a claim to the land; I saw the notice on the nearest post office; I did not see any on the outside of the Warden's Court—I was not there; nor on the Police Court, or at the Mining Registrar's Office. (Mr. Heydon here admits that he cannot prove that the notices were posted as the Act requires.) The posts were up on the 30th July—I put them up on the 30th July, 1881; I had applied for the land before, and it was forfeited; I put up the posts and trenches then; I put up fresh posts and walls on the 31st July; I know Gaffney; I don't know that Hardy at the time had a mineral license area on the block at the time of this application; I will swear that I did not offer to buy him out; I did not put the notice "mineral lease applied for"; the notice of the post office was of the 27th July, and was alone on the tree.

His Honor directs a verdict for the plaintiff.

Verdict for plaintiff.

---

No. 37.

The Under Secretary for Mines to Mr. T. F. DeCourcy Browne.

Sir,

Department of Mines, Sydney, 20 November, 1882.

Referring to your letter of the 13th instant, in which you ask that mineral lease No. 1,415 be cancelled, as you cannot get a complete title to the land in the parish of Moogem, which you have applied to conditionally purchase, until such cancellation has taken place, I am directed to inform you that Mr. Kirby, on behalf of the lessee, states that he intends to apply to the Supreme Court for a new trial, and until the result is known it is thought that no steps should be taken by this Department in the matter.

I have, &c.,

HARRIE WOOD,

Under Secretary.

---

No. 38.

Mr. Matthew M'Ivor to The Under Secretary for Mines.

Sir,

Sydney, 28 December, 1882.

Herewith please receive the sum of £3 5s., being payment of balance of year from 9th May, 1883, to the 31st December, 1883, on mineral lease 1,415, granted to me on the 9th day of May, 1882, and situate in the parish of Moogem, county of Clive, in district of Glen Innes.

I am, &c.,

MATTHEW M'IVOR.

Place amount in suspense, pending settlement of matters in dispute between the lessee and the conditional purchaser of the same parcel of land, and inform.—H.W., 2/1/83. £3 5s. suspended.—T.C.B., 3/1/83.

---

No. 39.

The Under Secretary for Mines to Mr. Matthew M'Ivor.

Sir,

Department of Mines, Sydney, 3 January, 1883.

Referring to your letter of the 28th ultimo, containing a sum of £3 5s. in payment of rent reserved under mineral lease No. 1,415, I have the honor to inform you that the amount has been placed in Suspense Account at the Treasury, pending a settlement of the matters in dispute between the lessee and the conditional purchaser of the same parcel of land.

I have, &c.,

HARRIE WOOD,

Under Secretary.

---

No. 40.

The Chief Commissioner, Department of Lands, to The Under Secretary for Mines.

Sir,

Department of Lands, Conditional Sales Division, Sydney, 6 January, 1883.

With reference to your letter of the 10th August last, stating that the Minister for Mines has authorized the issue of the lease No. 1,415, for portion 9, in the parish of Moogem, county of Clive, I have the honor to forward you a copy of a communication received from Mr. G. K. King, through his agent, Mr. T. F. DeCourcy Browne, and to request that you will be good enough to cause me to be furnished with further information as to the lease in question.

I have, &c.,

A. O. MORIARTY,

Chief Commissioner.

Application for a new trial by M'Ivor will be heard, I believe, next month.—T.C.B., 22/1/83. Inform.—H.W., 23/1/83.

[Enclosure

[Enclosure to No. 40.]

Mr. T. F. DeCourcy Browne to The Chief Commissioner, Department of Lands.

Sydney, 18 October, 1882.

Sir,  
I have the honor to inform you that, at the Supreme Court sittings held at Armidale, on Friday, 13th October, a suit of ejectment was tried before Mr. Justice Windeyer and a special Jury of four, in which the title of Mr. G. K. King to the 20 acres of Crown Lands, part of a mineral conditional purchase of 60 acres made by him at Glen Innes, on the 25th May, 1882, and claimed by M. M'Ivor, as being held by him as a lease No. 1,415, was involved.

The Jury returned a verdict for the plaintiff, G. K. King, and I have now to request that the 20 acres which you have recommended be eliminated from Mr. King's M.C.P. of the above date be included in that purchase, so that he may obtain a freehold title to the full area of 60 acres conditionally purchased for mining purposes on the 25th May last, as above stated.

I have, &amp;c.,

T. F. DECOURCY BROWNE,  
Agent for GEORGE K. KING.

No. 41.

The Under Secretary for Mines to The Chief Commissioner, Department of Lands.

Department of Mines, Sydney, 27 January, 1883.

Sir,  
Referring to your letter of the 6th instant, forwarding copy of a communication received from Mr. De Courcy Browne, as agent for Mr. G. K. King, respecting possession of 20 acres, being portion 9, in the parish of Moogem, county of Clive, I have the honor to inform you that M'Ivor, the lessee of the mineral lease No. 1,415, has moved for a new trial, and it is thought his application will be heard next month.

I have, &amp;c.,

HARRIE WOOD,  
Under Secretary.

No. 42.

The Warden's Clerk, Glen Innes, to The Under Secretary for Mines.

Warden's Office, Glen Innes, 5 March, 1883.

Sir,  
I have the honor to forward herewith the original depositions and order made in the Warden's Court, at Glen Innes, on the 30th day of August, 1882; also, copy of injunction relating to proceedings of said Court in the matter of M'Ivor v. Primmer and another, which documents the attorney for defendants informed me would be required to be produced in Sydney on the 13th instant, where the said case is to be heard before the Supreme Court. Mr. Boyd informed me, however, that my presence would not be required, and that it would answer all purposes if the documents were transmitted by me to the Department of Mines, for production in the Supreme Court by the Department of Mines when required.

I have, &amp;c.,

PAUL LE JEUNE,  
Warden's Clerk.

[Enclosures to No. 42.]

Warden's Court, Glen Innes, 30 August, 1882.

(Before George Martin, Esq., P.M., Warden.)

In the matter of the complaint of Matthew M'Ivor, for recovery of possession of 20 acres of mineral land held under mineral lease at Rocky or Pheasant Creek, county of Clive, parish of Moogem, in the Colony of New South Wales, being portion No. 9.

G. MARTIN,  
Warden.

Not with papers. I HEREBY certify that the following depositions, numbered 1, 2, 3, 4, and 5, are the original depositions as taken by me in the case of M'Ivor against Barker and Primmer, and that the order of the Court, No. 6, is the original order made by Mr. Warden Martin.

Not with papers. Copy of injunction served on defendants is attached.

PAUL LE JEUNE,  
Warden's Clerk.

Warden's Office, Glen Innes, this 5th day of March, 1883.

The evidence of Matthew M'Ivor.

Mr. Carney for plaintiff; Mr. J. A. Boyd for defendants.

And this deponent, being duly sworn, states: My name is Matthew M'Ivor; I am the complainant in this case; I caused two summonses to be issued against Edward Primmer and William Barker, now before the Court; I complained that they committed an act of trespass on some mineral land at Pheasant or Rocky Creek, my property, held by me under lease from the Crown. (*Mineral lease put in.*) The lease at present before the Court is the one referring to my property; I was in possession of the ground long before I obtained the lease of it—I was working on the ground; the lease was delivered to my attorney; about the 15th of August instant I went out to the ground and saw the two defendants there; I saw a shaft there; I saw tin ore near the shaft; I saw a windlass over the shaft, and a rope attached to it; I saw miners' tools also; I also saw some ore that appeared to have been recently removed; I went down the shaft, and I saw the two defendants; I asked defendants who authorized them to go to work; they said "Gaffney"; that was all that was said about the work being done then; one of them said he was not to blame, as he was working for wages; nothing more was then said; after that I took out the summonses on the 26th; I was not there from the 15th to the 25th of August; I went out with the summonses on the 26th; on that day the defendants were sharpening tools; I think it was on No. 9; there is a hut there which I put up myself; defendants were near the hut on that day; the hut stands on the boundary of No. 8 and No. 9; I was not on the ground up to the 9th of May; there was no one in possession when I left the ground; neither of defendants had any authority for being on the grounds from me—I gave no other person authority to go on the ground; I had been on the ground some time previous to the 9th of May, working on it; I have sustained some damage by the trespass of defendants; it has put me to a great deal of trouble and expense through defendants being on the ground; the ore has been taken from the ground; there is a shaft—it is not the shaft I sunk myself.

*Mr. Boyd, for defendants:* I was on the ground working in February last; I was there on the last of July or the beginning of August; one of the defendants was on the ground then; I saw men working there then; I inquired who they were working for; they said "Gaffney," or "King"; defendants told me they were working for Gaffney; they told me they were working as servants before I issued the summonses; I knew that Mr. King applied for a mineral conditional purchase in May last; I was told so—it was rumour only; I also saw it in the books in the Lands Office; I gave a power of attorney to Mr. R. Kirby to sign the lease for me; I cannot remember when I gave it—I cannot tell the date. (*Gazette of 13th June put in.*) I consider that some damage has been done to myself; I have been several times on the ground between my application and lease; I applied either twice or three times for the ground; I have been on the ground since the lease has been issued; one of the witnesses said he was told to put me off the ground.

*By Warden:* I have been on the ground since the 9th of May; I saw the defendants then on the ground, and told them not to destroy anything; I did not claim the ground as my own; they acknowledged, in conversation, some time in July, that

that the ground was mine, and I told them not to destroy anything on the ground—that the ground was in dispute between me and King; they said Gaffney sent them to work there; they said King was the man they were working for, and that Gaffney sent them there.

*By Mr. Carney, for plaintiff:* There has been no correspondence between the Minister for Mines and myself on the subject of the lease; I cannot fix the damage, but I consider there has been an undue interference with my rights as lessee; I do not know when the lease was delivered; I have not been working the land since the 9th May; my attorney told me last week—on Thursday—that I had got the lease; I refer to the lease of block 9.

Sworn before me at Glen Innes, this 30th day of August, 1882,—

MATTHEW M'IVOR.

G. MARTIN, Warden.

The evidence of Rogers Thomas Kirby:—

And this deponent, being duly sworn, states:—My name is Rogers Thomas Kirby; I reside in Sydney; I know Matthew M'Ivor, the complainant in this case; he gave me a power of attorney to execute the lease now before the Court; I duly lodged the power of attorney; the lease was delivered to me on the 10th day of August, from the Department of Mines; I have no doubt that that is the date.

*By Mr. Boyd, for defence:* The lease from the 24th July to the 10th August was impounded in the Department of Mines, pending a dispute, whilst a claim from the Lands Department was being considered; there was no complaint lodged, to my knowledge, by Mr. King, against the issue of the lease prior to the 9th of May.

Sworn before me at Glen Innes, this 30th day of August, 1882,—

R. T. KIRBY.

G. MARTIN, Warden.

The evidence of H. Risbridge Sanders:—

And this deponent, being duly sworn, states:—My name is Henry Risbridge Sanders; I am the Crown Lands Agent at Glen Innes; I produce the book for all conditional purchases; there is an application on the 25th May, at 10, county of Clive, parish of Moogem, being measured portions Nos. 5, 6, and 9, each 20 acres, the two former, viz., 5 and 6, being held under mineral lease by the applicant; boundaries taken as surveyed for mineral leases; I have not received any notification declaring that this application is void; I am notified when applications are declared void, and I record it in my books.

*By Mr. Carney, for plaintiff:* If it had been declared void I would have received notice; it has to go through several Departments before I receive it.

*By Mr. Boyd, for defendants:* If the land had been declared void I would have received notice; I have received no notice.

Sworn before me at Glen Innes, this 30th of August, 1882,—

HENRY R. SANDERS.

G. MARTIN, Warden.

THE depositions of the foregoing witnesses—Matthew M'Ivor, Rogers Thomas Kirby, Henry Risbridge Sanders—were duly taken and signed before me, this 30th day of August, 1882.

G. MARTIN,  
Warden.

## No. 43.

### Subpœna.

In the Supreme Court of New South Wales.

Gaffney v. M'Ivor.—Subpœna *duces tecum* for John A. Boyd, Glen Innes, by Fergusson.

VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland Queen, Defender of the Faith, &c., &c.

To Harrie Wood, Esquire, the Under Secretary for Mines—

Greeting:

WE command you that, laying all other matters and business aside, and notwithstanding any excuse, you personally be and appear before our Supreme Court of New South Wales, at the Court-house, situate in King-street, in the city of Sydney, in the said Colony, on Tuesday, the thirteenth day of March now instant, at the hour of ten of the clock in the forenoon, and thence from day to day, at the same hour of each day until the cause hereinafter mentioned shall be tried, to testify all and singular those things which you know in a certain cause now depending in our said Court, and on that day to be tried between John Gaffney, plaintiff, and Matthew M'Ivor, defendant, in an action of damages on the part of the plaintiff; and that you diligently search and inquire for, and procure and bring with you, and produce at the time and place aforesaid, all deeds, instruments, books, papers, maps, plans, specifications, writings, letters, vouchers, receipts, documents, memoranda, and all drafts and copies thereof in your possession or power, relating to or in anywise concerning, or which can or may afford any evidence or information respecting the matters in question in the said cause, and particularly the depositions taken before the Warden in Warden's Court at Glen Innes, in a certain action wherein the defendant and one Barker were the complainants, and the plaintiff the defendant; and the copy which shall be served upon you of this writ. And this you shall by no means omit, under the penalty of one hundred pounds.

Witness—The Honorable Sir James Martin, Knight, Chief Justice of our said Court, at Sydney, the ninth day of March, in the forty-sixth year of our reign, A.D. 1883.

For the Prothonotary,

T. E. MURPHY, [L.s.]  
4th Clerk of the Supreme Court.

## No. 44.

### Subpœna.

Subpœna No. 2,426, A.D. 1882.—In the Supreme Court of New South Wales.

Gaffney v. M'Ivor.—Subpœna *duces tecum* for M. A. H. Fitzhardinge, solicitor, 86, Pitt-street, Sydney.

VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland Queen, Defender of the Faith, &c., &c.

To Harrie Wood, Under Secretary for Mines—

Greeting:

WE command you that, laying all other matters and business aside, and notwithstanding any excuse, you personally be and appear before our Supreme Court of New South Wales, at the Court-house, situate in King-street, in the city of Sydney, in the said Colony, on Monday, the nineteenth day of March now instant,

instant, at the hour of ten of the clock in the forenoon, and thence from day to day, at the same hour of each day, until the cause hereinafter mentioned shall be tried, to testify all and singular those things which you know in a certain cause now depending in our said Court, and on that day to be tried, between John Gaffney, plaintiff, and Matthew M'Ivor, defendant, in an action of damages on the part of the defendant. And that you diligently search and inquire for, and procure and bring with you, and produce at the time and place aforesaid, all deeds, instruments, books, papers, maps, plans, specifications, writings, letters, vouchers, receipts, documents, and memoranda, and all drafts and copies thereof in your possession or power, relating to or in anywise concerning, or which can or may afford any evidence or information respecting the matters in question in the said cause, and particularly all papers relating to the application for and the granting of a mining lease of portion No. 9 to one Matthew M'Ivor; and the copy which shall be served upon you of this writ. And this you shall by no means omit, under the penalty of one hundred pounds.

Witness—The Honorable Sir James Martin, Knight, Chief Justice of our said Court, at Sydney, the nineteenth day of March, in the forty-sixth year of our reign, A.D. 1883.

For the Prothonotary,  
T. E. MURPHY, [L.S.]  
4th Clerk of the said Supreme Court.

---

No. 45.

Mr. R. T. Kirby to The Secretary for Mines.

Sir, Sydney, 22 March, 1883.  
Herewith I beg to hand you transfer of mineral lease No. 1,415 for registration. A receipt will oblige—  
Yours, &c.,

R. T. KIRBY.

The land comprised in the lease No. 1,415 is said to have been conditionally purchased, and the question as to whether the lease or the conditional purchase has been before the Courts is now, I understand, the subject of an appeal. Under these circumstances I presume the transfer cannot be sanctioned. Submitted.—H.W., 29/3/83. Remind Mr. Fergusson. Approved.—J. P. Abbott, 31/3/83.

---

No. 46.

The Under Secretary for Mines to W. J. Fergusson, Esq., M.P.

Sir, Department of Mines, Sydney, 10 April, 1883.

See No. 29.

I have the honor to invite your attention to my letter of the 27th September last, informing you that, if you desired to prevent the sanction of any transfer with respect to mineral lease 1,415, you should take the proper legal steps; and I have to request that you will favour me with an early reply.

I have, &c.,  
HARRIE WOOD,  
Under Secretary.

---

No. 47.

W. J. Fergusson, Esq., M.P., to The Under Secretary for Mines.

Mineral lease No. 1,415.

Sir, 136, Pitt-street, 11 April, 1883.

See No. 46.

With reference to your letter of yesterday, I beg to state that judgment has been recovered and signed in an action brought against the holder of the above lease, upon which judgment a writ of execution will issue on or before Tuesday next, and I have to request that in the meantime no sanction to my transfer of the lease may be given.

I have, &c.,  
W. J. FERGUSSON,  
(Per A.S.)

Written under misapprehension.—W.J.F. As Mr. Fergusson says, this letter was written under misapprehension, no action upon it is necessary.—H.W., 12/4/83.

---

No. 48.

The Chief Commissioner, Department of Lands, to The Under Secretary for Mines.

Sir, Department of Lands, Conditional Sales Division, Sydney, 10 May, 1883.

See No. 22.

I have the honor to invite your attention to my letter of 9th August, 1882, respecting the mineral conditional purchase No. 82-152, Glen Innes, 25 May, 1882, 40 acres, G. K. King, and to request that you will be pleased to furnish information as to whether G. K. King was the holder of mineral leases Nos. 1,237 and 1,238 at date of selection, 25 May, 1882.

I have, &c.,  
WM. BLACKMAN,  
(For Chief Commissioner).

M.Ls 1,237 and 1,238, Mining Act 1874, J. K. King, lessee.—Transfers lodged 20 May, 1882. Date of approval of transfer to G. K. King, 29 May, 1882.—T.C.B., 16/5/83

Under regulation No. 43, no transfer is to be deemed valid or recognized by the Crown unless made with the sanction of the Secretary for Mines; but when the sanction has been given, I think it makes the transfer valid as from the date on which it was made by the parties. If it were not so, the regulation would probably have been made to read "unless and until." Submitted.—H.W., 15/5/83. Approved.—J. P. Abbott, 18/5/83. Inform.—H.W., 18/5/83.

## No. 49.

## The Under Secretary for Mines to The Chief Commissioner, Department of Lands.

Sir,

Department of Mines, Sydney, 25 May, 1883.

Referring to your letter of the 10th instant, in which inquiry is made whether G. K. King was the holder of mineral leases Nos. 1,237 and 1,238 at the date of his conditional purchase 82/152, of 25th of May, 1882, I have the honor to inform you that Mr. King lodged transfers of the said leases to him on the 20th of May, 1882, and such transfers were approved of on the 29th of the same month.

I am to point out that, under Regulation No. 43 of the Regulations relating to Mineral Leases, no transfer is to be deemed valid or be recognized by the Crown unless made with the sanction of the Secretary for Mines; but when once the sanction has been given, it is thought it makes the transfer valid as from the date on which it was made by the parties to it, and that if it were not so, the regulation would probably have been made to read "unless and until."

I have, &amp;c.,

HARRIE WOOD,  
Under Secretary.

## No. 50.

## Transfer of Mineral Lease, Charles Cowper, Sheriff, to G. K. King.

Mineral Lease Regulations.—Schedule 13.—Transfer of Mineral Lease.

I, CHARLES COWPER, Esquire, Sheriff of the Colony of New South Wales, under and by virtue of a writ of *feri facias*, issued out of the Supreme Court of New South Wales, against Matthew M'Ivor, the said Matthew M'Ivor being registered as the lessee of all that piece or parcel of land in the county of Clive, parish of Moogem, containing 20 acres, demised by a certain mineral lease by Her Majesty the Queen to Matthew M'Ivor, and dated the ninth day of May, 1882, and numbered in the Register 1,415, in consideration of the sum of £5 sterling, paid to me by the transferee, the receipt of which sum I hereby acknowledge, do hereby transfer to George Kennedy King, of Sydney, all the right, title, and interest (if any) of the said Matthew M'Ivor, in and to the piece or parcel of land demised as aforesaid. And I, the said George Kennedy King, do hereby accept transfer of the right, title, and interest (if any) of the said Matthew M'Ivor in and to the demised land aforesaid, subject to the provisions of the "Mining Act, 1874," and the Regulations made thereunder; and I hereby agree to be bound by all and singular the terms, conditions, covenants, provisions, restrictions, and reservations contained in the said lease.

In witness whereof, we have hereunto subscribed our respective names, this 26th day of May, 1883.

Witness to signature.	Transferor.	Transferee.
George Morgan .....	Charles Cowper .....	.....
W. J. Fergusson .....	.....	George K. King.

## No. 51.

## Mr. R. T. Kirby to The Secretary for Lands.

Sir,

Sydney, 31 May, 1883.

I have the honor to submit for your serious consideration the following distressing case:—

After nearly two years' prospecting under great privation and hardship, Matthew M'Ivor, on or about July, 1881, applied for a mineral lease of measured portion No. 9, Pheasant Creek, to mine for tin. In March, 1882, being heavily in debt and completely broken down in health, he was obliged to sell the greater portion of his interest in this exceedingly rich mine and remove to a warmer climate.

I, as his attorney, used every effort in my power to induce the Mines Department to issue the lease, frequently pointing out the danger of delay. On the 9th day of May, 1882, the Governor granted his application. I continued to press for the execution of the lease, but received only excuses and promises. On one occasion I was told that it was sent to the Government Printing Office for gazettal. I went there and inquired, and was informed that it had not been received. I called again next morning, with the same result. I saw Mr. Richards, who instituted an inquiry, and gave instructions that it should be attended to immediately on its arrival at that office. I then proceeded to the Mines Department and complained of having been misinformed, and also of the uncalled for delay; and so the matter went on until the 2nd June, 1882, on which date it was completed. My visits to the printing office were made about the 14th and 15th May.

It then becomes known that on the 25th day of May, 1882—just a few days prior to the completion of said lease—one George Kennedy King made a mineral conditional purchase at the Crown Lands Office, Glen Innes, of 60 acres, including portion No. 9—the land granted to M'Ivor on the 9th of May, sixteen days before.

Protests on both sides were entered, and an investigation between the Lands and Mines Departments on the matter ensued, lasting about a month. The Mines noticed the Lands Department that the Governor had granted a lease, bearing date the 9th day of May, 1882, of measured portion No. 9 aforesaid, and that said lease would issue forthwith if no valid reason existed in the Lands Department. The Lands Department replied in writing that no valid reason did exist, whereupon the lease was handed to me as M'Ivor's attorney.

Now this lease bears date the 9th day of May, 1882—the date of the grant. It recites that it is an indenture, demising to Matthew M'Ivor, on and from that date, all that said portion of land above described as No. 9. It sets forth that it was granted under the hand and seal of the Governor and the great seal of the Colony, on that 9th day of May, and further, M'Ivor is therein charged with rent from that 9th day of May, and one year's rent accepted unconditionally.

King being now in possession, M'Ivor proceeds in the Warden's Court for trespass. The Warden places M'Ivor in possession; King proceeds in the Supreme Court; Judge Windeyer presided, and wanted a witness to the Governor's signature, and finally gave a verdict in favour of King. M'Ivor appeals to the Full Court, which upholds Judge Windeyer's decision; and lastly, M'Ivor applies for leave to go to the Privy Council, and is refused.

You

You will readily understand that thousands of pounds have been spent by M'Ivor and his friends in support of the title granted to him by the Crown, and the law decides that it is no title. They now appeal to the justice and clemency of your Honorable Government for compensation.

By the above, which I am prepared to swear is a fair and truthful statement of the case, it will be seen that the Government issued two titles for the same portion of land, and that after due consideration having issued M'Ivor's title, and that title being of a prior date to that of the counter claim (I have already shown that M'Ivor was a tenant under rent for sixteen days previous to the date of King's claim, and the Crown exercised a landlord's privilege for that time prior to the date of King's selection), and M'Ivor having expended nearly two years' labour in developing this property, suffering the while the greatest hardship and privations, persevering under the most adverse circumstances, and the Legislature having passed an Act during the last Parliament to meet cases such as this, I most respectfully solicit an investigation of this particular case, so that justice may be done to a man (and others through him) who has been absolutely ruined.

Relying upon your strong sense of justice,

I have, &c.,

R. T. KIRBY.

The claim for compensation cannot, I think, be entertained, in view of the evidence taken before His Honor Mr. Justice Windeyer, at Armidale, in the action for ejectment, *King v. M'Ivor*, as the defendant therein admitted that he had not complied with the Regulations, in regard to taking possession of the land and making application for the lease. Moreover, nothing has been done by this Department towards cancelling the lease; and if it be necessary to take steps to that end, it would, I think, be because of the lessee's failure to comply with the requirements of the law in regard to taking possession and making application to lease, and not because of the conditional purchase, which must I think be void, because the land in question is within a gold-field, and therefore not open to conditional purchase under any section of the Land Acts except the 14th section of the Act 25 Victoria No. 1.

Submitted.—H. W., 3/8/83. Inform.—J. P. ABBOTT, 4/8/83.

No. 52.

The Under Secretary for Mines to Mr. G. K. King.

Sir,

Department of Mines, Sydney, 8 June, 1883.

Referring to the transfer from Charles Cowper to yourself of mineral lease No. 1,415, in the name of M. M'Ivor, I have the honor to inform you that the Minister cannot sanction the said transfer.

I have, &c.,

HARRIE WOOD,

Under Secretary.

See No. 50.

No. 53.

The Under Secretary for Mines to Mr. R. T. Kirby.

Sir,

Department of Mines, Sydney, 11 August, 1883.

Referring to your letter of the 31st May last (addressed to the Minister for Lands), in which you solicit investigation of Mr. Matthew M'Ivor's claim to portion No. 9, in the parish of Moogem, and for compensation for alleged losses, I have the honor to inform you that, in view of the decision of the Supreme Court in the case of *King v. M'Ivor*, and the evidence given therein by Mr. M'Ivor that he had not complied with the requirements of the law in regard to taking possession and making application to lease, it is not clear that this Department can take any further steps in the matter.

I may point out that the lease in question has not been cancelled by the Department, and if it were necessary for the Department to take any steps in the matter it would be by reason of Mr. M'Ivor's failure to comply with the law.

I have, &c.,

HARRIE WOOD,

Under Secretary.

See No. 51.

No. 54.

Mr. T. F. DeCourcy Browne to The Secretary for Mines.

Sir,

Sydney, 24 August, 1883.

In connection with the request made to you by letter to cancel mineral lease No. 1,415, granted to Matthew M'Ivor, and in accordance with your desire to have a certified copy of the decision of the Supreme Court on the title set up by Mr. G. K. King to the land comprised in the above lease, I beg herewith to forward to you a certified copy of the record of the Supreme Court in the ejectment case of *King v. M'Ivor*, by which you will see that Mr. King has been adjudged to be the legal owner of the land comprised in the lease No. 1,415.

I therefore renew my request that you will cancel M.L. 1,415, with a view to Mr. King obtaining a title to the land from the Department of Lands.

I have, &c.,

T. F. DECOURCY BROWNE,

Agent for GEO. K. KING.

The writer may be informed that no step will be taken in this Department to cancel the lease until it is quite clear that a valid conditional purchase has been made. The M.C.P. made by Mr. King may not be valid, being within a gold-field. Submitted.—H. W., 30/8/83.

Approved.—J. P. ABBOTT, 4/9/83.

I would specially direct the attention of the Lands Department to this M.C.P., which is within a gold-field, and conditional purchases under the 13th and 19th sections of the Act appear to me to be inoperative within gold-fields.—J. P. ABBOTT, 17/9/83.

The Chief Commissioner of Conditional Sales, B.C., 17/9/83.—H. W.

In the Supreme Court of New South Wales. The fifth day of September, one thousand eight hundred and eighty-two.

Clive to wit.

On the day and year first above mentioned a writ of our Lady the Queen issued forth of this Court in these words, that is to say—

Victoria, by the Grace of God, of the United Kingdom of Great Britain and Ireland Queen, Defender of the Faith, &c. To Matthew M'Ivor, of Pheasant Creek, Glen Elgin, near Glen Innes, and all persons entitled to defend the possession of all that piece or parcel of land containing by admeasurement twenty acres, be the same more or less, situate in the county of Clive, at Pheasant Creek, Glen Elgin, near Glen Innes, and being measured portion number nine, commencing at the north-east corner of portion eight on the south bank of Rocky or Pheasant Creek, and bounded thence on the west by the east boundary of that portion bearing south sixteen chains thirty-three links; thence on the south by part of the north boundary of portion six, bearing east sixteen chains forty-four links to Rocky or Pheasant Creek before mentioned; thence on the east and north-east by that creek downwards, to the point of commencement, to the possession whereof George Kennedy King claims to be entitled, and to eject all other persons therefrom. These are to command you or such of you as deny the alleged title, within sixteen days after service hereof, to appear in person or by attorney, in our Supreme Court at Sydney, to defend the said property, or such part thereof as you may be advised; in default whereof judgment may be signed and you turned out of possession.

Witness—The Honorable Sir James Martin, Knight, the Chief Justice of our said Court, at Sydney, the fifth day of September, in the forty-sixth year of our reign.

For the Prothonotary,  
T. E. MURPHY,  
4th Clerk of the Supreme Court.

This writ was issued by William John Fergusson, of No. 136, Pitt-street, Sydney, attorney for the said plaintiff. And on the nineteenth day of September, one thousand eight hundred and eighty-two, Matthew M'Ivor appeared, by James William Johnson, his attorney, to the said writ, and defended for the whole of the land for the writ mentioned. Afterwards, on the thirteenth day of October, one thousand eight hundred and eighty-two, before the Honorable Mr. Justice Windeyer, come the parties aforesaid, and a Jury being sworn to try the matters in question between the said parties, upon their oath say that the said George Kennedy King, on the fifth day of September, one thousand eight hundred and eighty-two, was, and still is entitled to the possession of the said land as in the writ alleged. Therefore, it is considered that the said George Kennedy King do recover possession of the land in the said writ mentioned, with the appurtenances, together with £ for costs.

Judgment signed the eighth day of May, 1883.

For the Prothonotary,  
T. E. MURPHY, (L.S.)  
4th Clerk of the Supreme Court.

I hereby certify this and the two preceding sheets of paper to be a true copy of the judgment signed on the eighth day of May, A.D. 1883.

Dated this 20th day of August, A.D. 1883.

For the Prothonotary,  
REGINALD MONDAY,  
5th Clerk of the Supreme Court.

### No. 55.

The Under Secretary for Mines to Mr. T. F. DeCourcy Browne.

Sir,

Department of Mines, Sydney, 7 September, 1883.

Referring to your letter of the 24th ultimo, in which you renew your request for the cancellation of mineral lease No. 1,415, I am directed to inform you that no step will be taken in this Department to cancel the lease until it is quite clear that a valid conditional purchase of the land has been made. See No. 54.

I may add that the purchase made by Mr. G. K. King, being within a gold-field, may not be valid.

I have, &c.,

HARRIE WOOD,  
Under Secretary.

EXTRACTS FROM VOTES AND PROCEEDINGS OF THE  
LEGISLATIVE ASSEMBLY.

VOTES No. 75. TUESDAY, 25 MARCH, 1884.

10. CLAIM OF MATTHEW M'IVOR TO A TIN-MINE AT PHEASANT'S CREEK:—*Mr. Melville*, for *Mr. Fletcher*, moved, pursuant to Notice,—
- (1.) That a Select Committee be appointed, with power to send for persons and papers, to inquire into and report upon the claim of Matthew M'IVOR to a Tin-mine at Pheasant's Creek.
- (2.) That such Committee consist of *Mr. Abbott*, *Mr. Henry Clarke*, *Mr. Garvan*, *Mr. Levien*, *Mr. Poole*, *Mr. Sutherland*, "*Mr. Coonan*, *Mr. Loughnan*," *Mr. Copeland*, and *Mr. Fletcher*.
- Mr. W. J. Fergusson* moved, That the Question be amended by the omission of the names of *Mr. Coonan* and *Mr. Loughnan*, with a view to the insertion in their place of the names of *Mr. Melville* and *Mr. Targett*.
- Question,—That the names proposed to be omitted stand part of the Question,—put and negatived.
- Question,—That the names proposed to be inserted in place of the names omitted be so inserted,—put and passed.
- Main Question,—
- (1.) That a Select Committee be appointed, with power to send for persons and papers, to inquire into and report upon the claim of Matthew M'IVOR to a Tin-mine at Pheasant's Creek.
- (2.) That such Committee consist of *Mr. Abbott*, *Mr. Henry Clarke*, *Mr. Garvan*, *Mr. Levien*, *Mr. Poole*, *Mr. Sutherland*, *Mr. Melville*, *Mr. Targett*, *Mr. Copeland*, and *Mr. Fletcher*,—put and passed.

VOTES No. 88. WEDNESDAY, 23 APRIL, 1884.

2. CLAIM OF MATTHEW M'IVOR TO A TIN-MINE AT PHEASANT'S CREEK:—*Mr. Fletcher* presented a Petition from Matthew M'IVOR, representing that a Select Committee has been appointed to inquire into his claim to a Tin-mine at Pheasant's Creek; and praying for permission to appear in person or by agent before the Committee.
- Petition received, and referred to the Select Committee on the subject.

VOTES No. 95. WEDNESDAY, 7 MAY, 1884.

4. CLAIM OF MATTHEW M'IVOR TO A TIN-MINE AT PHEASANT'S CREEK:—*Mr. Cameron*, for *Mr. Fletcher* (*by consent*), moved, without Notice, That the Return to an Order "Claim of Matthew M'IVOR to a Tin-mine at Pheasant's Creek," laid upon the Table of this House on 19th February, 1884, be referred to the Select Committee now sitting on that subject.
- Question put and passed.

VOTES No. 169. THURSDAY, 9 OCTOBER, 1884.

6. CLAIM OF MATTHEW M'IVOR TO A TIN-MINE AT PHEASANT'S CREEK:—*Mr. Fletcher*, as Chairman, brought up the Report from, and laid upon the Table the Minutes of Proceedings of, and Evidence taken before, the Select Committee for whose consideration and report this subject was referred on 25th March, 1884; together with Appendix.
- Ordered to be printed.

## CLAIM OF MATTHEW M'IVOR TO A TIN-MINE AT PHEASANT'S CREEK.

## REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 25th March, 1884,—“with power to send for persons and papers, to inquire into and report upon the claim of Matthew M'Ivor to a Tin-mine at Pheasant's Creek,”—have agreed to the following Report:—

1. Your Committee having examined the witnesses named in the List\* (whose See List, p. 7. evidence will be found appended hereto), find as follows:—

- (1.) That application for a mineral lease of block No. 9, of 20 acres, parish of Moogem, county of Clive, was made by Matthew M'Ivor, on the 27th day of July, 1881, which application was duly received on the 5th day of August, 1881, by the Warden's Clerk, at Glen Innes.
- (2.) That an application for a mineral conditional purchase of the very same land was made on 25th May, 1882, by one G. K. King.
- (3.) That a mineral lease of the said land was duly granted on the 9th day of May, 1882, and afterwards issued to the said Matthew M'Ivor, and a notification thereof appeared in the Government Gazette.
- (4.) That the said Matthew M'Ivor complied with all the regulations respecting said land to entitle him to a lease thereof.
- (5.) That in consequence of unnecessary and unaccountable delay in the Department of Mines, twelve months and five days elapsed between the time the application for lease was made and its being issued.
- (6.) That no less than forty-eight applications for mineral leases made by other applicants, subsequently to Matthew M'Ivor's application, were issued to them before the said lease was issued to the said Matthew M'Ivor.
- (7.) That the said lease was signed by His Excellency the Governor as if executed on the 9th day of May, 1882, whereas actually it was not executed until the 3rd day of June, 1882; and in consequence thereof the said Matthew M'Ivor lost the said land, in an action brought by the said G. K. King against him.
- (8.) That the said Matthew M'Ivor had no knowledge of this illegal practice until the point was taken at the trial in the Supreme Court, and by it he lost, not only his land, but was put to very great expense, &c.
- (9.) That, on the faith of the validity of the lease, other persons purchased large interests from the said Matthew M'Ivor, and that it is most probable that the mine would have been floated into a public Company, with a capital of £45,000.

2. Your Committee, in view of the foregoing facts, are of opinion:—

- (1.) That, as the land applied for was a measured portion, and as, in the application, the said Matthew M'Ivor said “the previous survey is accepted, being measured portion block No. 9,” the lease should have been issued shortly after the application was made.

(2.)

- (2.) That inasmuch as the said land was in a proclaimed Gold-field, it was not legally open to conditional purchase.
- (3.) That upon the evidence of professional and practical men of high standing (in this Colony and Victoria) the said land contains great mineral wealth.
- (4.) That the claim of Matthew M'Ivor is entitled to the most favourable consideration of the Government.

*No. 3 Committee Room,  
Sydney, 8th October, 1884.*

JAMES FLETCHER,  
Chairman.

---

PROCEEDINGS OF THE COMMITTEE.

---

THURSDAY, 24 APRIL, 1884.

MEMBERS PRESENT:—

Mr. Fletcher, | Mr. Henry Clarke.

In the absence of a quorum the meeting called for this day lapsed.

---

THURSDAY, 1 MAY, 1884.

MEMBER PRESENT:—

Mr. Henry Clarke.

In the absence of a quorum the meeting called for this day lapsed.

---

WEDNESDAY, 7 MAY, 1884.

MEMBERS PRESENT:—

Mr. Fletcher, | Mr. Melville,  
Mr. Poole.

Entries from Votes and Proceedings, appointing the Committee, and referring Petition from Matthew M'Ivor to be allowed to appear in person or by Agent before the Committee, read by the Clerk. Printed copies of the Petition of Matthew M'Ivor before the Committee. Resolved,—That Matthew M'Ivor have leave to appear by Counsel or Agent before the Committee. Committee deliberated.

Ordered,—That Harrie Wood, Esq., be summoned to give evidence next meeting.

[Adjourned to To-morrow, at half-past One o'clock.]

---

THURSDAY, 8 MAY, 1884.

MEMBERS PRESENT:—

Mr. Poole, | Mr. Copeland,  
Mr. Melville.

In the absence of the Chairman, Mr. Poole called to the Chair *pro tem*.

Entry from Votes and Proceedings referring Return to Order "Claim of Matthew M'Ivor to a Tin-mine at Pheasant Creek" to the Committee, read by the Clerk.

Printed copies of the Papers before the Committee.

Present:—Mr. R. T. Kirby (*Agent for Matthew M'Ivor*.)

Harrie Wood, Esq., (*Under Secretary for Mines*) called in, sworn, and examined.

Witness *produced* the original Papers in the case.

Witness withdrew.

Charles Gilbert Heydon, Esq., called in, sworn, and examined.

Room cleared.

Committee deliberated.

[Adjourned to To-morrow, at Eleven o'clock.]

---

FRIDAY, 9 MAY, 1884.

MEMBER PRESENT:—

Mr. Sutherland.

In the absence of a quorum the meeting called for this day lapsed.

---

THURSDAY, 15 MAY, 1884.

MEMBERS PRESENT:—

None.

In the absence of a quorum the meeting called for this day lapsed.

---

THURSDAY, 22 MAY, 1884.

MEMBER PRESENT:—

Mr. Henry Clarke.

In the absence of a quorum the meeting called for this day lapsed.

---

TUESDAY,

TUESDAY, 10 JUNE, 1884.

MEMBERS PRESENT:—

Mr. Fletcher in the Chair.

Mr. Henry Clarke, | Mr. Targett.

Present:—Mr. R. T. Kirby (*Agent for Matthew M'Ivor*).

Thomas C. Binney, Esq. (*Registrar of the Department of Mines*), called in, sworn, and examined.  
Witness produced Power of Attorney from Matthew M'Ivor to Mr. R. T. Kirby.

Witness withdrew.

Gresley Lukin, Esq., called in, sworn, and examined.

Mr. Kirby handed in a copy of a report by Mr. Norman Taylor on the Pheasant's Creek Mine,  
which was ordered to be appended. (*See Appendix A 1.*)

Witness produced sketch of the Pheasant's Creek Mine, a copy of which was handed in and ordered  
to be appended. (*See Separate Appendix.*)

Witness withdrew.

Mr. Alfred Percy Burt called in, sworn, and examined.

Witness withdrew.

Mr. Thomas William Edwards called in, sworn, and examined.

Witness withdrew.

Mr. Matthew M'Ivor called in, sworn, and examined.

Mr. Kirby handed in certain documents, which were ordered to be appended. (*See Appendices  
A 2, 3, and 4.*)

Room cleared.

Committee deliberated.

Ordered,—That Harrie Wood, Esq., be summoned to give further evidence next meeting.

[Adjourned to Thursday next, at half-past Two o'clock.]

THURSDAY, 12 JUNE, 1884.

MEMBERS PRESENT:—

Mr. Fletcher in the Chair.

Mr. Henry Clarke, | Mr. Targett.

Present:—Mr. R. T. Kirby (*Agent for Matthew M'Ivor*).

Mr. Matthew M'Ivor called in, and further examined.

Witness withdrew.

Harrie Wood, Esq., called in and further examined.

Witness withdrew.

Mr. William Henry Harrison called in, sworn, and examined.

Witness handed in certain documents, which were ordered to be appended. (*See Appendices B 1,  
2, and 3.*)

Room cleared.

Committee deliberated.

[Adjourned to Wednesday next, at Two o'clock.]

WEDNESDAY, 18 JUNE, 1884.

MEMBERS PRESENT:—

Mr. Fletcher, | Mr. Henry Clarke.

In the absence of a quorum the meeting called for this day lapsed.

TUESDAY, 24 JUNE, 1884.

MEMBERS PRESENT:—

Mr. Sutherland, | Mr. Henry Clarke.

In the absence of a quorum the meeting called for this day lapsed.

THURSDAY, 26 JUNE, 1884.

MEMBER PRESENT:—

Mr. Fletcher.

In the absence of a quorum the meeting called for this day lapsed

WEDNESDAY, 2 JULY, 1884.

MEMBER PRESENT:—

Mr. Sutherland.

In the absence of a quorum the meeting called for this day lapsed.

TUESDAY,

TUESDAY, 8 JULY, 1884.

MEMBERS PRESENT:—

Mr. Fletcher; | Hr. Henry Clarke.

In the absence of a quorum the meeting called for this day lapsed.

WEDNESDAY, 9 JULY, 1884.

MEMBERS PRESENT:—

Mr. Fletcher in the Chair.

Mr. Henry Clarke, | Mr. Targett,  
Mr. Poole.

Present:—Mr. R. T. Kirby (*Agent for Matthew M'Ivor*).

Mr. R. T. Kirby sworn and examined.

Witness *handed in* a copy of a letter written by him to the Minister for Lands in reference to granting a title to the land to others, on the ground that M'Ivor held a lease of it, which was ordered to be appended. (*See Appendix O*)

Mr. Kirby then addressed the Committee and withdrew.

Committee deliberated.

[Adjourned to Wednesday, 23 July, 1884.]

WEDNESDAY, 23 JULY, 1884.

MEMBER PRESENT:—

Mr. Garvan.

In the absence of a quorum the meeting called for this day lapsed.

WEDNESDAY, 27 AUGUST, 1884.

MEMBERS PRESENT:—

None.

In the absence of a quorum the meeting called for this day lapsed.

FRIDAY, 5 SEPTEMBER, 1884.

MEMBERS PRESENT:—

None.

In the absence of a quorum the meeting called for this day lapsed.

WEDNESDAY, 24 JULY, 1884.

MEMBER PRESENT:—

Mr. Garvan.

In the absence of a quorum the meeting called for this day lapsed.

WEDNESDAY, 27 AUGUST, 1884.

MEMBERS PRESENT:—

None.

In the absence of a quorum the meeting called for this day lapsed.

FRIDAY, 5 SEPTEMBER, 1884.

MEMBERS PRESENT:—

None.

In the absence of a quorum the meeting called for this day lapsed.

WEDNESDAY, 18 SEPTEMBER, 1884.

MEMBERS PRESENT:—

None.

In the absence of a quorum the meeting called for this day lapsed.

WEDNESDAY,

WEDNESDAY, 8 OCTOBER, 1884.

MEMBERS PRESENT:—

Mr. Fletcher, in the Chair.

Mr. Sutherland, | Mr. Garvan,  
Mr. Henry Clarke.

Chairman submitted Draft Report.  
Same read and agreed to.  
Chairman to report to the House.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON THE

CLAIM OF MATTHEW M'IVOR TO A TIN-MINE AT  
PHEASANT'S CREEK.

THURSDAY, 8 MAY, 1884.

Present:—

MR. COPELAND, | MR. MELVILLE,  
Mr. POOLE.

WILLIAM THOMAS POOLE, Esq., IN THE CHAIR.

Mr. R. T. Kirby appeared as Agent for Mr. Matthew M'Ivor.

Harrie Wood, Esq., Under Secretary for Mines, called in and examined:—

1. *Chairman.*] In obedience to a summons you bring certain papers with you? Yes.
2. Will you please to state the nature of those papers? I have brought the original papers in the case of the "claim of Matthew M'Ivor to a tin-mine at Pheasant's Creek." (*Papers produced.*)
3. Will you turn to the original of No. 51 of the printed papers—a letter from Mr. R. T. Kirby to the Secretary for Lands, dated 31st May, 1883? I cannot find it among the papers which I got from the Lands Department this morning, but I presume it will be in the Lands Department, and I can get it on application. I will get it and forward it to the Committee at once.

H. Wood,  
Esq.  
8 May, 1884.

Charles Gilbert Heydon, Esq., barrister-at-law, called in and examined:—

4. *Mr. Kirby.*] You were employed as counsel in the case *King v. M'Ivor*? Yes.
5. You were engaged in Mr. M'Ivor's interest? Yes; I appeared for Mr. M'Ivor on the 13th October, 1882, at Armidale.
6. Will you kindly look at No. 8 in these printed papers, and say whether that is the same lease as was before the Court on that occasion? Yes, I have no doubt this is the same lease.
7. Have you read the Judge's notes in the case? I have. I have particularly read that portion of them in which it is said—"Mr. Heydon here admits that he cannot prove that the notices were posted as the Act requires," because my attention has been called to that part of the Judge's notes.
8. If the Minister for Lands interpreted that note to mean an acknowledgment on your part that the law and the regulations were not fulfilled, would that be correct? Quite incorrect. All that I acknowledged was that we could not at that trial, then and there, prove that the notices were posted as the Act requires.
9. Did not some conversation take place as to the reason why you were not prepared with this evidence—did you not inform the Judge of the reason? In the first place, it does not appear on the Judge's notes that this admission of mine, which he has placed on record in his notes, was at the end of my examination of Mr. M'Ivor. The position of the matter is this:—We knew that the lease to Mr. M'Ivor was of earlier date than the conditional purchase of Mr. King, and we considered our case as quite unimpeachable on that ground. The day before the case came on for trial I received a telegram from Mr. Scarvell, of Want, Johnson, & Scarvell, the attorneys who instructed me, urging me to keep out any evidence that the other side might bring forward to show the leases were not actually signed on the same day as they were registered, because they had found out in Sydney that leases were registered before they were actually signed. It became then a very serious consideration for us to see what our position was—
10. *Mr. Copeland.*] Signed by whom? By the Governor. As well as I remember, that was what was said in the telegram. Mr. Scarvell must have meant the date on which the lease was entered as passed by the Executive Council.
- 11.

C. G. Heydon,  
Esq.  
8 May, 1884.

C. G. Heydon, Esq.  
8 May, 1884.

11. *Chairman.*] The Executive minute? Yes, because registration in the Mines Office must be a subsequent matter. That, at any rate, was what we understood him to mean—that the apparent date of the lease, according to the practice in these matters, was not the real date, and he urged me to keep out evidence that might put us in a difficulty in that way.

12. Between the 2nd and 9th May? I do not think he went into the dates, but he made us aware of the difficulty. Our case had been entirely upon the lease, and we were not prepared for that difficulty. However, upon looking into the regulations, it appeared to me that as soon as the application for a lease was granted, the land was protected from selection, and was virtually under lease for mineral purposes. Next day, at the trial, I submitted that view of the law to the Judge, and he concurred with me. Judge Windeyer held at the trial that the land was land under lease for mineral purposes, and was protected from conditional purchase from the date on which the Governor granted the application; but he also held that we must show that we had complied with every condition required by the Act in making our application. That put us to the necessity of proving that M'Ivor, who took the land up, had done everything that the regulations required—that he had posted all the notices, dug all the trenches, put in all the corner posts, and had complied with all those matters that are required when people take up land for mineral purposes. We were not prepared to do that at all. We had come there with our lease, and our case was upon the lease; we were not prepared with these things which the Judge said we must prove. I took M'Ivor as far as he could go, and as soon as I found there was one of the notices as to which he could not give legal evidence, I told the Judge that I had no further proof to offer, and I sat down. That was what was meant by saying that I could "not prove that the notices were posted as the Act requires." Mr. O'Connor, who appeared on the other side, then got up to cross-examine M'Ivor; I objected that our case was at an end, but he was allowed to cross-examine, and M'Ivor's evidence, at page 15, subsequent to this admission of mine in brackets, is all Mr. O'Connor's cross-examination. At the end of that, the Judge, as we had failed to prove posting all the notices, directed a verdict for the plaintiff.

13. You stood upon your lease—not upon what led up to the lease? Just so. My admission merely meant that I could not go on with my case—that I could not at that time prove what the Judge required.

14. *Mr. Kirby.*] Will you be kind enough to read that telegram? *Mr. Heydon read as follows:—*

Telegram to C. G. Heydon, Esq., barrister-at-law, Armidale.

12 October, 1882.

PERSIST in objection to any evidence on the other side or by way of cross-examination that lease signed or sealed on any other day or in any other manner than appears upon its face. We learn leases registered before execution; ours registered June (see endorsement). Object to any evidence of this practice, as it will negative by side-wind execution on 9th May.

WANT, JOHNSON, & SCARVELL,  
60, Pitt-street, Sydney.

15. *Mr. Copeland.*] The lease does not appear to have been executed by the lessee until the 24th of July, 1882? The practical point is this: "As it will negative by side wind execution on 9th May." Up to that time we were standing upon our lease as a lease executed on the 9th May; but by the telegram we were made aware that it might not perhaps have been executed on the 9th May at all, but on a subsequent date. But it was too late; we had not our evidence ready; and all that I meant when I made the admission referred to in the Judge's notes was that I had not a witness there to prove that the notices had been posted. My own note of that part of the case upon my own brief, which I have referred to, is not that I admit that I cannot prove the notices were posted, but that the witness cannot prove posting the notices on the nearest Registrar's Court, &c. It was merely that this witness could not prove this, and, having no other witness there, the verdict went against us. The Supreme Court afterwards held that a lease speaks from the date of actual execution, not from the date when the Governor assented to the application—the date that it is actually signed. They held that if it appears to be signed on the 9th May, but is really signed on 9th June, it speaks from the 9th June and not from the 9th May. Our contention was, that when the Governor and Executive Council assented to the application, the whole thing was complete—that the rest was merely departmental matter.

16. *Mr. Melville.*] You claim the 9th May as the valid date of this lease? Yes; it appeared that the 9th May was the date on which the Governor and Executive Council, considering the application, after all previous steps had been taken, finally assented to the lease; but by the rule of the Department, although it was then assented to, and the conditions complied with, the Governor's signature and the seal of the Colony were not then affixed to the document, and that it takes a varying period, according to the promptness or slowness of the Departments, to have that done. In this case it took several weeks; and in the meantime the land was selected. The Supreme Court held that, as the selection was prior in date to the actual affixing by the Governor of his signature to the lease, the mineral conditional purchase must have a prior right over the lease.

17. *Chairman.*] Do I understand you to say that, between the 2nd and the 9th May, this land was taken up as a mineral conditional purchase—the land covered by Mr. M'Ivor's lease? No. The lease bore date the 9th May, and our contention was that from that date the land was ours under the lease. The conditional purchase was made on the 25th May, 1882. If you look about five lines from the beginning of the Judge's notes you will see that the application for the conditional purchase was put in evidence, and was dated 25th May, 1882. Comparing the date of the lease, 9th May, and the application for conditional purchase, 25th May—looking at the thing merely on that ground—there was no question that the right was on our side; but it came out in evidence that, though the lease bore date 9th May, it was not actually signed by the Governor till June.

18. If I understand you aright, the concluding portion of that lease, declaring that His Excellency caused the seal of the Colony to be affixed and set his hand to this document on "the day and year first above written"—that is, the 9th May, 1882—is not true? That is not true in fact; so that we had a lease given to us by the Government which was not actually signed until after the date of the conditional purchase. That was the contention of our opponents; but our contention was that our lease, being dated the 9th May, and that being the date on which the contract was complete between M'Ivor and the Crown, that is the date from which the lease speaks and the land was protected. Their contention was that, as it was not actually executed till June, it only protects the land from June, and before that time they had selected.

19. *Mr. Melville.*] You depended upon the Governor's signature? Yes. The Executive had done everything, and M'Ivor had done everything on the 9th May to entitle him to the lease, although it was not actually signed till June.

20. *Chairman.*] You think that was a matter over which you had no control? Not the slightest; we could not have hastened it a single moment. We had done everything we had to do, and had paid all the moneys we had to pay, and the rest was in the hands of the Crown. The Crown itself gave the very best evidence that it considered the whole matter concluded on the 9th May, by dating the lease on that day. However, the Supreme Court took a different view.

C. G. Heydon,  
Esq.  
8 May, 1884.

21. You have just informed the Committee that it came out in evidence at the trial, and it was contended by your opponents, that the Governor's signature was not affixed to the lease till some time in June. Now, I ask your attention to this minute on the case—"Registered in the Department of Mines, at Sydney, this 1st day of June, 1882"? Have you the law reports in the Parliamentary Library?—These dates, if they do not appear in the Parliamentary papers, will appear clearly in the report of the case *King v. M'Ivor*, before the Supreme Court, when they decided this point of law. My memory is that the Governor did not sign the lease until June. The evidence of Mr. Binney, according to the Judge's notes, is as follows:—"Cross-examined by O'Connor: I have charge of the mineral leases, and they go through my hands before they are sent for execution; the date first written is the date of approval by the Governor and Executive Council; it was sent to the Governor for execution on the 2nd June; it must have been signed by the Governor on or after the 2nd June, 1882." And I find in my notes, what does not appear in the Judge's notes, a distinct statement that the registration is before the signing and sealing of the lease; and in the Judge's note what comes to the same thing, that the Governor must have signed it on or after the 2nd June, it having been registered on the 1st June.

22. What was there to register? It was an unsigned lease, a lease complete in everything but the signature. The contract to give the lease was complete on the 9th May; and the Crown must treat that as final, because they register before they get the Governor's signature, and they date it the 9th May, which is before the Governor signed it; so that the Department evidently treat the land as being under lease from the 9th May. No doubt it is a great hardship to a man applying for a lease.

23. As a lawyer, I am asking you this question: Is it in accordance with our law that a document can be registered before it is completed? I am not prepared to say it could be done in no case.

24. You stood upon the lease, and considered that covered the whole of the ground? Yes.

25. And you were not prepared to show at the trial that you had complied with all the minutiae of the law? No, we had no notion until the day before the trial that we should be called upon to do so, but then it was too late.

26. *Mr. Kirby.*] You did not take Mr. Binney to Armidale as a witness? No, Mr. Binney was subpoenaed by the other side, I presume, to show the difference between the apparent date of the lease and the real date. He appears as our witness, because, when I tendered the lease, the Judge would not admit it in evidence, because the seal was indistinct; and knowing Mr. Binney was about the Court, I called him to prove that it was the great seal that was attached to the lease, although it was indistinct. It was in that way he appears as our witness.

TUESDAY, 10 JUNE, 1884.

Present.—

MR. HENRY CLARKE,

MR. TARGETT,

JAMES FLETCHER, Esq., IN THE CHAIR.

Mr. R. T. Kirby appeared as Agent for the Petitioner, Matthew M'Ivor.

Thomas C. Binney, Esq., Registrar of the Department of Mines, called in and examined:—

27. *Mr. Kirby.*] Do you produce a power of attorney from Mr. Matthew M'Ivor, authorizing me to act as his agent? I do. (*Produced.*)

28. What is the present system of registering leases—is there an entry in a book—Will you kindly explain what registration is? We have large books called Registers, in which we enter leases in their order. In these books we give all particulars as to when they were applied for, where they were applied for, the area, the surveyor's description, the date of confirmation, the date of commencement of rental, when the lease was executed, and to whom it was delivered.

T. C.  
Binney, Esq.  
10 June, 1884.

29. What is the present system of obtaining the Governor's signature—does the Governor write the signature himself or is it put on with a stamp? I have never been present when it was done.

30. *Chairman.*] You are not in a position to answer that question? I could not answer the question positively.

31. *Mr. Kirby.*] Do you remember giving evidence at Armidale? I do.

32. On that occasion I think you gave evidence to the effect that it was put on with a stamp? No, I spoke of the seal; the seal of the Colony is stamped on the lease. That was the evidence I gave.

33. Is it the practice to obtain the Governor's signature to a lease before it is gazetted or after? The Governor's signature is, as a rule, obtained after approval.

34. Before being gazetted? The lease is confirmed by the Governor and Executive Council after approval. *Chairman.*] Do I understand that the Governor signs leases before they are gazetted, after they are approved of by the Executive Council—are they gazetted before or after? The approval is gazetted.

35. Then the signature must of necessity be attached before they are gazetted? No, the approval is gazetted after passing the Governor and Executive Council; the lease itself is sent on to the Colonial Secretary, and thence to Government House, for signature by the Governor.

36. After the approval? After the approval.

37. *Mr. Kirby.*] The lease to M'Ivor was approved on the 2nd May, 1882, and confirmed on the 9th May? I could not say from memory; I dare say you are right.

38. Is it not so in the printed papers? Yes.

39. Ought not the signature of the Governor to have been attached to that lease between the 2nd May and the 9th May? No.

40. Why not? Because the approval has to be confirmed; we do not deal with it until it is confirmed.

T. C.  
Binney, Esq.  
10 June, 1884.

41. From the date of confirmation on the 9th May, was it possible to have had that lease gazetted prior to the 25th May, the same month—now mark the question—was it possible to gazette that lease between the 9th and the 25th May? Possible to gazette it as approved, do you mean?
42. Yes, between the 9th and 25th May? It was possible.
43. You are acquainted with the 30th regulation, relating to mineral leases under the Mining Act? Yes.
44. *Chairman.*] Is it usual for such a long delay to take place in issuing leases as has taken place in this particular instance? If my memory serves me right this was done very quickly.
45. That is between the 9th and 25th May? Yes, very quickly indeed.
46. On the 2nd May the Mining Department recommended that this lease should be granted? Yes.
47. On the 9th May the Executive Council confirmed it? Yes.
48. And you say that is not an unusual delay, between the 9th and 25th? No.
49. *Mr. Kirby.*] Is it a rule of the Department to deal with leases according to priority of receipt? They would do so if they could, but sometimes one survey comes in before another; it is very hard to take it that way.
50. When the land has already been surveyed, is it the duty of the Department, and is it the law, to deal with applications in accordance with priority of receipt? Yes, I think they would, as a general rule.
51. As a matter of fact, is there any law in the matter? I am not aware that there is any law.
52. Will you allow me to refer you to sub-section 4 of section 56 of the Mining Act? That is with reference to application for a lease. It says the applications shall be dealt with in that way by the Warden or Land Agent; it has nothing to do with the head office.
53. *Mr. Targett.*] As a matter of fact, is it not the rule to survey the land applied for in the order of priority of receipt? Yes, I think it should be.

Gresley Lukin, Esq., called in and examined:—

G. Lukin, Esq.  
10 June, 1884.

54. *Mr. Kirby.*] You are Manager of the Pheasant's Creek Tin-mining Company? Yes, legal Manager.
55. Do you recollect the Company receiving a report from Mr. Norman Taylor, of Melbourne, with reference to the mine? Yes.
56. You have read and examined that report, no doubt? I read it.
57. Is that a true copy of it? I believe it is. (*Handed in by Mr. Kirby. See Appendix A 1.*)
58. Have you a plan or sketch that Mr. Taylor sent in with that report? There is a sketch.
59. Showing the position of the shafts? I really do not know what it shows—it is so long ago. I believe it does show the position of the shafts. (*Sketch produced. Copy to be handed in. See Separate Appendix.*)
60. This is Mr. Norman Taylor's sketch? Yes.
61. You are aware that the title to a portion of the land described in that sketch was disputed by Matthew M'Ivor? Yes.
62. As a matter of fact, it was portion No. 9? No, I do not know that; I cannot swear positively to any of these facts, because I have kept myself outside of any knowledge of how the land was acquired; I only know it as a registered Company.
63. All payments on the Company's behalf are made by you through the books of the Company? Yes.
64. Do you know a Mr. Gaffney who has been connected with this matter? Yes.
65. I suppose you are aware that he obtained a verdict against M'Ivor for false imprisonment, for giving him in charge for removing some ore from the mine? Yes.
66. The whole question of Mr. M'Ivor's ground was then in dispute? I have no knowledge of that; I believe Gaffney was employed both by Mr. King and by the Company at different times.
67. Is it not a matter of fact that Mr. Gaffney received £500 for the part he played against M'Ivor as a professional jumper? I have no knowledge of it whatever; such a transaction never passed through my books.
68. I believe Mr. De Courcy Browne was employed as a mining agent by your Company? He was the agent who was employed by Mr. King; he was not employed by the Company in any way; I have heard that he was employed by Mr. King.
69. Is it not true that he received £300 for the part he took in the matter? I have no knowledge of it; if Mr. Browne had been employed by my Company the books would show the transaction. I would like it to be distinctly understood by the Committee that I have had no part or share in any of these transactions, except as legal Manager of a registered Company.

Mr. Alfred Percy Burt called in and examined:—

Mr. A. P.  
Burt.  
10 June, 1884.

70. *Mr. Kirby.*] You are a mining engineer? Yes.
71. You know portion No. 9 of the Pheasant's Creek Tin-mine? I do.
72. How long is it since you were there? I was there last Wednesday, within less than a week, and I was there two years ago.
73. Have you seen Mr. Norman Taylor's report to the Pheasant's Creek Tin-mining Company? I have seen a printed report.
74. Is that the report (*indicating report handed by Mr. Kirby*)? Yes.
75. You have seen Mr. Norman Taylor's sketch having reference to that report? I saw a plan with markings on it, corresponding with his report.
76. Is that the sketch referred to (*indicating sketch produced by Mr. Lukin*)? I should take that to be a copy of what I saw.
77. From your own knowledge, and having read the report and seen the sketch, and the shafts described as Nos. 6, 7, 8, and 9, on measured portion No. 9? They are.
78. You have no doubt whatever that Mr. Norman Taylor refers to shaft 6? That (*pointing to the sketch*) is the shaft 6 referred to in his report, no doubt about it; it corresponds with his description; but the shaft, when I was there last, was full of water.
79. Did you see any ore about the mouth of the shaft? Yes, very good ore.
80. If Mr. Taylor represented that ore as giving at least 45 per cent. of tin, do you think he was right? Yes, I should think so; it was a very rich description of ore; it would go from 30 to 40 per cent. no doubt.

Mr.

## CLAIM OF MATTHEW M'IVOR TO A TIN-MINE AT PHEASANT'S CREEK.

Mr. Thomas William Edwards called in and examined :—

81. *Mr. Kirby.*] You are a mining manager? Yes.  
 82. Were you mining manager for King's Tin-mining Company? Yes.  
 83. Do you know M'Ivor's shaft, as they call it, on portion No. 9, at Pheasant's Creek? Yes.  
 84. How far were your works from there? Close by.  
 85. Were you frequently there? Yes.  
 86. Was anybody working at the shaft at that time? No.  
 87. Do you remember a lot of ore being removed from the shaft across the creek? Yes.  
 88. Will you kindly tell us whether that was rich ore or poor ore? Very rich. There was from 35 to 40 tons of stone, 40 per cent. ore.  
 89. Nos. 6, 7, 8, and 9 are the shafts on portion No. 9: will you kindly say from which shaft it was the ore was removed? No. 6 shaft, according to this plan.  
 90. You know it was removed from what is known as M'Ivor's shaft? Yes, on to the adjoining lease.  
 91. If Mr. Norman Taylor reported that that was a very rich mine, 45 per cent.—from your experience as a tin-miner would he be about correct? Yes, he would be just about correct.  
 92. *Chairman.*] Do you know the locality well? Yes.  
 93. Can you inform the Committee whether it is within a proclaimed gold-field? It is about 7 or 8 miles from a gold-field—the nearest place where gold has been found.  
 94. Do you know whether it is within the boundaries of a proclaimed gold-field? I cannot say.  
 95. Can you say of your own knowledge whether the land in that locality has been reserved from purchase? No, I cannot.  
 96. Can you inform the Committee whether there has been much land in that locality sold as mineral conditional purchases? No, I do not think there has been much sold there.  
 97. All leaseholders? Nearly all.

Mr. T. W.  
Edwards.  
10 June, 1884.

Mr. Matthew M'Ivor called in and examined :—

98. *Mr. Kirby.*] Did you once own portion No. 9 on Pheasant's Creek as a tin-mine? Yes.  
 99. How did you become possessed of it? I went there on the 1st January, 1881, and took up 4 acres on No. 9 block, under a mineral license, and in July, 1881, I applied for No. 9 block of 20 acres as a mineral lease; the 4 acres was a portion of the same block, No. 9.  
 100. *Chairman.*] You held 4 acres under a mineral license? Yes.  
 101. On what date did you apply for a mineral lease? In the latter end of July.  
 102. When did your mineral license expire? 30th December, 1881.  
 103. *Mr. Kirby.*] You know the form of taking possession? Yes; I pegged out the ground according to the mining regulations, and put up a notice on a tree alongside the corner peg.  
 104. What was the notice? The notice was that I applied for 20 acres on mineral lease on No. 9 block.  
 105. Was it a printed form? Yes; No. 1 schedule.  
 106. Did you build any walls or fences? I could not put up fences, but I put up stone walls, 9 feet long, 18 inches wide, and a foot high, if not more.  
 107. *Chairman.*] Did you build them at right angles in the corners? Yes; in an L shape.  
 108. *Mr. Kirby.*] Did you post notices on the nearest post office and at the Warden's Court? I did not do it myself; it was an agent applied for me at the Warden's Court, and he posted up the notices at the post office and Warden's Court; the nearest post office to me was at the Bald Nob.  
 109. Did you see the notice on the post office? I saw the notice on the nearest post office to me, but I was not at the Warden's Court.  
 110. Had you any intimation that it was done? Yes; the agent, Mr. M'Intyre, sent me a letter to say that he had done so—that he had made the application and posted the notice on the Warden's Court and on the nearest post office; I saw that one myself when I went over.  
 111. Did you give evidence at the trial at Armidale? I did.  
 112. When you gave your evidence there, did you swear that you did not post the notice on the Warden's Court, or did you swear you did not do it yourself—that others did it for you? I swore I did not post the notice myself, but that Mr. M'Intyre posted it for me.  
 113. Did you swear anything about a letter there that you received from Mr. M'Intyre? I cannot say I did.  
 114. Do you remember Mr. O'Connor objecting to your giving evidence of a letter you had received from Mr. M'Intyre? Yes, he objected to my giving evidence as to the posting of the notices.  
 115. He objected to receiving evidence from you as to a letter you received from Mr. M'Intyre, your agent—is that a fact? Yes, I believe it is.  
 116. As a matter of fact, you did everything that was required by the regulations to entitle you to a lease of this ground? As a matter of fact, I did everything I thought would secure the ground to me; I was very particular about it, because all the ground was taken up alongside of it, and if I did anything that was not right it would be taken from me.  
 117. You are acquainted with Mr. M'Intyre's signature? Yes.  
 118. Do you recognize that (*handing a document to witness*) as Mr. M'Intyre's signature? Yes, I believe it is.  
 119. That is an affidavit by Mr. James M'Intyre that he posted the notices referred to? Yes. (*Handed in by Mr. Kirby. See Appendix A 2.*)  
 120. You know Mr. Wells, formerly Warden's Clerk at Glen Innes, in 1881? Yes.  
 121. Do you recognize that as his signature? Yes, this is Mr. Wells' handwriting, I believe.  
 122. That is an affidavit that he assisted Mr. M'Intyre in posting that notice, that everything was done that was necessary, and that he subsequently removed the notices and filed them in the Warden's Court? Yes. (*Handed in by Mr. Kirby. See Appendix A 3.*)  
 123. You are aware that your application was approved of? Yes; I never got any notice that it was not, and I was aware that it was, for there was a lease granted to me.  
 124. Did you give me a power of attorney to act for you in taking up the lease? I did.  
 125. You are aware that the lease was granted? Yes, I saw it.  
 126. What was the date of that lease? 9th May, 1882.

Mr.  
M. M'Ivor.  
10 June, 1884.

- Mr. M. M'Ivor. 127. Were you dispossessed from that land afterwards? I was.  
 128. By a decision of the Supreme Court? Yes, at Armidale, on 13th October, 1882.  
 10 June, 1884. 129. You know Mr. Saunders, land agent, at Glen Innes? Yes.  
 130. At the trial did Mr. Saunders give evidence? Yes.  
 131. Did he swear portion No. 9 was then good on the books? He swore that he got no notice from Sydney that it was not.  
 132. You know that the land was selected on the 25th May, fifteen days later than the date of your lease? Yes.  
 133. Did you apply for a new trial after the verdict was given against you? Yes.  
 134. You have no doubt whatever that at the trial you made no admission that the notices were not posted? No, because I had a letter from Mr. M'Intyre saying he had posted them, and that he sent one to the nearest post office, and I saw that when I went in there.  
 135. As a matter of fact, the expression you used was, "I did not post the notice on the Warden's Court myself"? Yes.  
 136. Are any of Mr. King's partners in the transaction living at Glen Innes? I could not swear that.  
 137. Do you think that if the notice was not posted he could have got evidence to prove it was not? As for that, Mr. King never saw the land until the 24th March, 1882—he never was on the ground before that.  
 138. If the Judge's notes represent that you admitted the notice was not posted, would that be wrong? Yes; I said I did not post it myself—my agent did it—I did not post the notice myself; that was all I said.  
 139. Then the Judge's notes do not represent the evidence as you gave it? I believe they misrepresent what I swore; what I swore was that I did not post the notice myself.  
 140. Did you appeal to the Supreme Court against the decision? Yes.  
 141. A rule nisi was granted? Yes.  
 142. And was rejected on the hearing to be made absolute before the full Court? Yes.  
 143. For what reason was it rejected, do you recollect,—was it because the lease was not signed on the 9th May? I believe it was, because the lease was not signed by the Governor before the mineral conditional purchase was made.  
 144. *Chairman.*] How long were you on the grounds in question? I was there from the 1st January, 1881, until May, 1882.  
 145. *Mr. Targett.*] Were you living on it? Yes, I was working on it.  
 146. *Chairman.*] During that time was Mr. King on the ground at all? Mr. King and four or five other men came there in the month of March, 1882.  
 147. Your first application for a lease was in July, 1881? Yes.  
 148. And the lease was finally dragged through the Mining Department in May, 1882? Yes.  
 149. Prior to your applying for a lease of this land had you been working on it, off and on, previously? I was working all the time on it from January, 1881, to May, 1882; I was working on No. 9 block.  
 150. Did you ever do any work on that particular block before January, 1881? No, I did not; I was camped on it, but I did not do any work; I went there in December, 1880.  
 151. You said, I think, that your mineral license would expire in December, 1881? Yes; I got it on 30th December, 1880.  
 152. Did you, after applying for the lease, renew your mineral license? No, I did not.  
 153. Did you hold a miner's right? No, I did not hold a miner's right at that time—only a mineral license.  
 154. After your mineral license expired did you hold a miner's right? I had no miner's right until the beginning of May, 1882; I took out a miner's right in the first week of May, 1882, at Dalmorton.  
 155. And in virtue of that miner's right you worked on No. 9 block? No, I did not work on No. 9 block then; I had no lease in the month of May, 1882. I had bad lungs; I was working in water a long time, and no one near me, and I had to travel 12 miles for my horses, and carrying pack saddles through the scrub at night; I was bad, and came to Sydney in May, 1882; when I went back, to go to Pheasant Creek, Mr. King had jumped the ground.  
 156. How long were you absent from your claim? From May until July.  
 157. About what date in May? I left about the 9th May—knocked off working there.  
 158. *Mr. Clarke.*] When did you return? About the 27th or 28th July.  
 159. *Chairman.*] What work had you done on the claim? I worked about 4 chains of a gully, for alluvial tin, stream tin, and I sunk several places on the lode; some places about 10 feet wide, and some places a chain wide.\*  
 160. On this particular block? Yes, all on No. 9 block.  
 161. You sunk a number of shafts, you say, prospecting the lode? Prospecting in search of lodes.  
 162. Did you strike a lode in any of those shafts? I did.  
 163. What size were your shafts? I sunk one shaft 14 feet deep, but I had to sink it over 10 feet long and over 8 feet wide, to give me room.  
 164. Did you strike a lode in that shaft? Yes I did; it was on the surface.  
 165. Would that shaft be of any use to any parties who were going to work that lode? Yes.  
 166. What width was the lode where you struck it in that shaft? It was not over 10 inches wide on the surface.  
 167. At the bottom of the shaft? It was not over 7 inches; the body of stone was 10 feet wide.  
 168. Would it be possible for any intending jumper to go down your shaft and examine the lode? Yes.  
 169. Could they see the lode in any of the other shafts you sunk? Yes, they could see indications of lodes in every place I sunk.  
 170. *Mr. Clarke.*] Had you a miner's right at the date of your application for a mineral lease, 27th July, 1881? I had a mineral license—not a miner's right.  
 171. *Chairman.*] When did you take out a miner's right? In the month of May, 1882.  
 172. Then you had a miner's right at the time your claim was jumped? Yes.  
 173. *Mr. Targett.*] On what date was the land jumped? On 25th May, 1882. I have the miner's right.  
 174. *Chairman.*] Have you it with you? I have not got it in my pocket, but I have it in Sydney.  
 175. *Mr. Kirby.*] Is that your handwriting? Yes.  
 176. Is that a copy from the Government Gazette of the particulars therein stated? Yes. (*Handed in by Mr. Kirby. See Appendix A 4.*)

THURSDAY,

\*NOTE (on revision):—I do not mean the chain wide to apply to the lodes—only to the stream working.

THURSDAY, 12 JUNE, 1884.

Present:—  
 MR. H. CLARKE, | MR. TARGETT,

JAMES FLETCHER, ESQ., IN THE CHAIR.

Mr. R. T. Kirby appeared as Agent for Mr. Matthew M'ivor.

Mr. Matthew M'ivor called in and further examined:—

177. *Mr. Kirby.*] You were examined before this Committee the other day? Yes.
178. Had you any notice of objection to your lease from the time of your application until the 25th May, 1882? No, I had none; there was no objection in the Mining Department that I heard of.
179. You had a case in the Warden's Court against some one named King, for trespass? Yes;\* and I had a case also against Barker and Primmer.
180. What was the verdict? I got a verdict, and the Warden sent a policeman out with me to put me in possession of the land.
181. What happened when you arrived on the ground after being placed in possession? I found a number of men there; I found they had shifted 30 or 40 tons of tin ore from the ground I claimed as mine to their own land,—ground which I understood at the time to be Crown Land; I made inquiries as to who shifted it, and a man named Gaffney said that he had shifted it; I gave him in charge to a policeman for shifting it, or for stealing the ore.
182. Was anything done to him? No.
183. Was he not brought before the Bench at the Police Court? He was brought before the Bench and committed for trial, but the Attorney-General, I understood, would not file a bill against him, and he sued me for damages in the Supreme Court, Sydney.
184. Did he get a verdict against you? Yes, he got a verdict against me.
185. For what amount? £500.
186. You had been paying rent for this property from the 9th of May until December? Yes; the Government Gazette says it was on the 9th of May, 1882, that I was put under rent.
187. And placed in possession by the Warden? Yes.
188. And you had to pay £500 for protecting your own property? A verdict for £500 damages was given against me.
189. When you received your lease from the Crown, had you any knowledge that it was not signed on the 9th of May? No, I had no knowledge of it whatever; I considered that it was a lease from that day, and that I should have no more bother about it. At the time I gave Gaffney in charge, I understood there was nothing wrong on account of my having my lease signed by the Governor; I considered that the ground was mine, and that no one could put me out of it.
190. *Chairman.*] I notice in your evidence at the trial at Armidale, you are reported to have used these words, "I marked the land before I made the application; my agent made the application wrong for me." What do you mean by that? I did not say my agent; I said I employed an agent to make the application. I have seen that report, and I believe I did not say so—I am certain I did not say it. I said that I pegged out the land myself, and my agent made application for me. I was asked the question whether I made out the application in person or marked out the boundaries, and my answer was that my agent made the application for me.
191. *Mr. Targett.*] That was not the truth? That was not the truth.
192. Did you say your own agent made the application wrong? I do not think I did.
193. To the best of your knowledge, did your agent make the application wrong? To the best of my knowledge he did not.
194. You were granted the lease according to his application? Yes.
195. With regard to your statement that you gave a man named Gaffney in charge for shifting a quantity of ore,—did you dig that ore? No, I did not dig it; it was dug, I understood, by King's men. It was for trespassing and moving the ore that I gave Gaffney in charge.
196. *Mr. Kirby.*] Have you known Gaffney for any length of time? Yes.
197. Have you ever known him to be in any trouble of this kind before? Yes, I have known him to be pulled up several times for taking tin ore.
198. *Mr. Clarke.*] Did you hold a miner's right at the time you made application for a mineral lease? I had not a miner's right, but a mineral license.
199. I think you said in your former evidence that you had a miner's right afterwards? I said that it was in May that I got the miner's right. On referring to the right, I find it was dated 27th April, 1882. The application for the mineral lease was made in July, 1881.
200. *Mr. Targett.*] Then you took up this land under mineral license? I made application for a mineral lease; I had a mineral license at the time, and was working on the ground.
201. At the time you made application for a mineral lease you had no miner's right at all? No; if the Committee will let me make an explanation; it was stated by the Minister for Mines, Dr. Renwick, that a mineral license was the best protection a man could have on making application for a mineral lease. We miners understand that by having a mineral license we are protected by it.
202. *Chairman.*] When was the land taken possession of by these other people? On the 25th May, 1882, a month after my license was taken out.

Harrie Wood, Esq., Under Secretary for the Mining Department, called in and examined:—

203. *Mr. Kirby.*] Can you give the Committee any evidence as to whether the parish of Moogem, county of Clive, Pheasant's Creek, is within the Timbarra Gold-field, or not? I cannot give any direct evidence, because I have not made any survey of the boundary of that field; but I can state that it is so regarded by the officers of the Department; I produce the proclamation of the Timbarra Gold-field; the professional officers of the Department state that portion No. 9 is in the centre of it, or near the centre of the gold-field; I have a plan showing the position of portion No. 9.

Mr.  
M. M'ivor.  
12 June, 1884.

H. Wood,  
Esq.  
12 June, 1884.

204.

\* NOTE (on revision):—Not against King, but Barker and Primmer.

- H. Wood, Esq.  
12 June, 1884.
204. *Chairman.*] What is the date of the proclamation? The 31st August, 1865.
205. *Mr. Kirby.*] You are aware that Mr. M'Ivor applied to lease portion No. 9, and that a lease was issued for it? Yes.
206. On the 9th May? I cannot swear to the date without having the lease before me; but, speaking from memory, I think that was the date. [*Witness looked at the papers.*] Yes, that was the date on which the lease was granted.\*
207. You recognize the description as that of a portion of land within the Timbarra Gold-field? Yes.
208. *Chairman.*] In making application for a lease, if the land is marked out by the applicant himself, is it admissible for the application to be made by an agent? I never knew of any objection to that.
209. You are not aware that the Act requires an applicant to make the application himself? There is nothing in the Act that I know of requiring any one to make the application in person.
210. Is there anything in the Act that would enable the Government to sell land, 20 acres in a block, within a proclaimed gold-field? At auction they could, I think.
211. Are you aware of any power under the Act that would enable the Government to sell a mineral conditional purchase within a proclaimed gold-field? It is rather an awkward question for me to answer, for this reason: the officers of the Lands Department hold a different opinion to mine, and they are of opinion that I have no right to express an opinion about mineral conditional purchases, seeing that I have not to deal with them.
212. But I should like to have your opinion? My opinion is that a mineral conditional purchase cannot be made within a proclaimed gold-field.
213. Then if it is proved that the 20 acres marked No. 9 is within a gold-field, and has been conditionally purchased, the purchase is illegal, according to your opinion? Yes, I should think the mineral conditional purchase would be void.
214. *Mr. Targett.*] I see by the evidence in this case that Matthew M'Ivor held the land under a mineral license up to the 29th December, 1881—he took out a miner's right on the 27th April, 1882—would his claim to portion No. 9 be invalidated by his not holding anything in the meantime? I should think so; a miner's right would not supply the want of a mineral license for the purpose of holding such a block of land.
215. In the event of his wishing to continue his proprietary rights in this land, would he have to take it up afresh? If he wanted to continue the proprietorship of the mine he held under a mineral license, he would have to take up another mineral license if the term of the first one had expired; if the term of one license had expired he would have to take out another.
216. As a matter of fact, M'Ivor had no mineral license during those four months? No.†
217. He rests his claim upon the fact that he had a miner's right about a month prior to the claim being jumped, and that that right gave him a valid title? A miner's right would not make his claim to the land in question good; he would require to hold a mineral license.
218. It would be necessary for him to renew his mineral license on the 1st January, 1882? Yes,‡ I should like to explain more fully. A mineral license under the regulations gives him the right to occupy, for the purpose of searching for minerals, an area not exceeding 40 acres; but he is required to do certain things—take possession, work, and maintain his boundary marks; so long as he holds his mineral license, and continues to work the land and maintain his boundary marks, his title is considered good; but a miner's right does not entitle him to hold an area of that kind.
219. It only gives him the right to select? Yes, under the Mining Board regulations.
220. Has a man to renew his mineral license every year? Yes.
221. *Mr. Kirby.*] For fear an erroneous impression should be made in regard to holding under a mineral license and holding under a mineral lease, would you explain, Mr. Wood, whether Mr. M'Ivor, having had at the time his mineral license and having taken up possession under that, the fact of the mineral license expiring before the lease was granted would that vitiate his application for a lease in any way? He would, after making application to lease, rest under an application for a lease, and not under his holding a mineral license. The regulations relating to a mineral license provide that the holder may occupy for the purpose of searching for minerals any area not exceeding 40 acres; within thirty days after the discovery of the mineral of which he is in search he is required to convert his holding into a mineral lease—that is to say, he is required to lodge an application for a mineral lease to cover his land; then, after that, until his lease is either granted or refused, his title rests upon his application to lease.
222. *Chairman.*] Suppose I apply for a lease under a mineral license on the 20th May, 1882, my mineral license expiring in October, 1882, and the lease is not granted until March, 1883—and that in the meantime I did not renew my license—I have made my application for the lease, but between May and October I have no license—suppose in the meantime my ground is jumped; would it be a valid objection to my claiming the ground that I had not renewed my license, seeing that the Government did not deal with my application for a lease? Under the regulations relating to mineral leases, the title to the land runs from the time of taking possession until the application for a lease is granted or refused. They are not required to have a license to entitle them to apply for a mineral lease.

Mr. William Henry Harrison called in and examined:—

- Mr. W. H. Harrison.  
12 June, 1884.
223. *Mr. Kirby.*] I believe this document is in your handwriting? Yet; it was written to Mr. Lempriere, of Melbourne. [*Document handed in. See Appendix B 1.*]
224. You know Mr. Lempriere? Yes.
225. Is that his handwriting [*Document handed in. See Appendix B 2?*]? Yes.
226. I think you are aware that I tried to get him to come over from Melbourne to give evidence in this case? Yes.
227. You were living in Melbourne in April, 1883? Yes.

228.

\* NOTE (on revision):—The lease was not issued till the 24th July.

† NOTE (on revision):—I do not know the facts of the case as regards the mineral license. My answer refers to the case put to me.—H.W.

‡ NOTE (on revision):—I did not notice that the date 1st January 1882 was used in the question. The case put to me was that M'Ivor's license expired on the 29th December, 1881. A mineral license runs for twelve months from date of issue (Mining Act, sec. 63) therefore M'Ivor should have renewed his on the 30th December, 1881, unless that date fell on a Sunday.

228. And were interested with Mr. Lempriere in the sale of the Pheasant Creek tin-mine? Yes, I placed it in his hands in order that he might float it into a Company.
229. What did you do in the matter? I had some samples of ore from the mine, which I sent to Mr. Lempriere. He was very much pleased with the samples, and was quite confident he could float the mine into a Company quite soon for £45,000, presuming that we sent some one up to the mine to report on it, and his report proved favourable. We sent up Mr. Norman Taylor, of the Victorian Geological Survey. We subsequently received a telegram from him to the effect that when he got to the mine he was not permitted to go on to the ground, that it was in possession of some other parties. As Mr. Taylor could not report, the matter was closed. The telegram handed in [*see Appendix B 3*] is the telegram we received from Mr. Norman Taylor.
230. The telegram states that other persons were on the ground by virtue of a Supreme Court decision, and that Mr. Taylor was not allowed to go on the ground? Yes.
231. Do you know whether he reported on the mine for the men then in possession of it? I believe he did, but I never saw his report.
232. There were a great many shares applied for, subject to the report of Mr. Norman Taylor? Yes; Mr. Lempriere could have floated the Company with the samples of ore sent to him—they were extraordinarily rich; he had spoken to many of his clients, and was satisfied that he could float the Company in a week or fortnight, presuming that a favourable report was received from Mr. Taylor; there is no question about that; the samples of tin were of an exceptionally rich character.
233. Have you read Mr. Norman Taylor's report on the mine? No.
234. You have no doubt whatever that you could have had a Company floated for £45,000? I think there can be no question about it, because many of Mr. Lempriere's clients had taken up a large number of shares, conditionally upon Mr. Taylor's report being favourable.
235. And it was owing to the fact in the first instance, that Mr. Taylor was not allowed to go on to the ground to report, and that your people were deprived of their title to the ground—that the Company was not floated for £45,000? Yes, I presume that was the reason.

Mr. W. H.  
Harrison.  
12 June, 1884.

WEDNESDAY, 9 JULY, 1884.

Present:—

MR. HENRY CLARKE, | MR. POOLE,  
MR. TARGETT.

JAMES FLETCHER, ESQ., IN THE CHAIR.

Roger Thomas Kirby, Esq., appearing as agent for Matthew M'Ivor, examined:—

236. *Chairman.*] You are attorney for Mr. M'Ivor? Yes.
237. With reference to the land in dispute? Yes, at Pheasant Creek.
238. Do you hold a power of attorney? Yes, the power of attorney was produced here; it was deposited in the Mines Department, and produced by Mr. Wood.
239. Subsequent to Mr. M'Ivor taking up the ground, did he sell his interest to any party? He sold a certain amount of his interest.
240. Was the portion of the interest sold floated into a company? The whole into a syndicate.
241. Was any deposit paid by the members of that syndicate? Yes.
242. Has the deposit been returned? No.
243. Then the syndicate still consider they have a claim to the portion sold to them? Yes. Will you allow me to explain. It was bought subject to the granting of M'Ivor's application for a lease; the lease was granted, and I, on behalf of the syndicate, caused a transfer to be executed, and paid over the purchase money after the lease was gazetted as granted.
244. Can you remember the date when the application was made by M'Ivor for a lease? The land was marked out on the 27th July, 1881, and, to the best of my belief, the application was made on the 5th August, 1881; it was within the ten days allowed by the law. I am not positive as to the date of the application, but it was within the ten days.
245. During the time between the making of the application and its being gazetted, did you call at the Mines Department and make inquiries about it? I attended at the Mines Department almost constantly from the time we bought M'Ivor's interest until we got our lease executed.
246. Do you remember the length of time that elapsed between the application and the lease being granted? The lease was granted on the 2nd May, 1882, by the Executive Council, and confirmed on the 9th May, 1882.
247. And issued when? It was issued on the 10th August as a matter of fact; it was handed to me as M'Ivor's attorney on the 10th August, 1882.
248. What date did the lease bear? It bore date the 9th May, 1882.
249. Then it was antedated? Yes.
250. Then the time that elapsed between the making of the application and the issuing of the lease was over twelve months? Yes, twelve months and five days. I signed the lease on the the 24th July, 1882, as M'Ivor's attorney.
251. You know the land was selected subsequently to the confirmation of the lease to M'Ivor as a mineral conditional purchase by King and party? Yes, on 25th May, 1882.
252. That would be sixteen days later than the date of your lease? Yes.
253. Had your lease been signed when granted by the Executive Council, your lease would have been prior to the application of Mr. King? Yes, sixteen days.
254. Do you know of your own knowledge whether the ground originally held by M'Ivor and jumped by Mr. King has turned out a profitable investment? In my opinion it was the richest tin-mine in the Colony—the richest I ever saw—and the report of Mr. Norman Taylor, of Melbourne, a professional man, says that a portion of the ore sent to Sydney yielded 60 per cent. of tin, and the balance at the shaft would yield at least 45 per cent. I was on the ground and saw the tin, and followed it to where it was removed by Gaffney, and in my opinion it was amazingly rich.
255. You stated just now that from the date of the application to the date of issuing the lease was a little more than twelve months? Yes, twelve months and five days.

R. T. Kirby,  
Esq.  
9 July, 1884.

- R. T. Kirby, Esq.  
9 July, 1884.
256. Are you aware whether any applications for leases made subsequently to that of M'Ivor were issued prior to M'Ivor's? Yes; I examined the Government Gazette of 1882, volumes 1 and 2, and called M'Ivor's attention to several leases. I considered that there were perhaps a hundred published in the Gazette—I would not be positive—applied for after M'Ivor's application was made, and granted, some of them, four or five months earlier. I set M'Ivor to examine these volumes and write and hand in an examined copy in his evidence of a number of them; he handed in either forty-nine or fifty.
257. Forty-nine or fifty cases where the application was subsequent to his, and the granting of the lease prior? Yes, some of them four or five months; and one remarkable case of twenty-seven leases applied for in one day, and granted in one day, within, I think, five months as nearly as possible of the date of application, until they were gazetted.
258. And the leases issued? Yes. Gazetted as granted.
259. A case was tried at Armidale to dispossess M'Ivor of this land, or was it for trespass? There was a case at Armidale, and I was present.
260. What was the case? It was an appeal against the decision of the Warden's Court. King's men were in possession when we got our lease, and M'Ivor proceeded for trespass against two men found in the works, named Barber and Primmer.
261. Was the decision of the Warden's Court in favour of M'Ivor? Yes, and the Warden sent a policeman with M'Ivor and placed him in possession. During the time the trial was going on the tin ore was removed.
262. What trial? In the Warden's Court. A lot of 30 or 40 tons of rich tin ore was removed from the shaft, and was found in the possession of a man named Gaffney; M'Ivor gave him in charge for stealing the ore; as far as I recollect he was committed, and the Attorney-General refused to file a bill.
263. Mr. Poole.] Did you see all this? Yes, I was there, acting as agent. I was present, and gave evidence at the trial in the Warden's Court. King then proceeded in the Supreme Court of Armidale, on the 13th October, 1883, against M'Ivor, I think, on appeal against the Warden's decision. I was present at the trial and took notes in pencil a part of the time, which I have since unfortunately lost.
264. Chairman.] The case went against M'Ivor in the Supreme Court? Yes.
265. At the trial at Armidale one of the principal reasons for dispossessing M'Ivor was, I think, the absence of evidence as to the posting of a notice in the Warden's Court? Yes.
266. Have you since got proof that that notice was posted? Yes, from the man who posted the notice and the Warden's clerk; their affidavits that the notice was posted have been produced here. [See printed papers before the Committee, No. 2, page 3.] One thing that was very important was that the Judge's notes as printed among the papers in the case did not correctly represent M'Ivor's evidence on this point. I was present in Court and took notes of M'Ivor's evidence at the time, and I have no hesitation in swearing that the words M'Ivor used were "I did not post the notice myself; my agent, Mr. James M'Intyre, of Glen Innes, posted it for me." There was a good deal of cross-questioning by the barristers as to the legality of the evidence, but I swear positively that the words used by M'Ivor were as I have stated.\*
267. Mr. Targott.] You say you paid a deposit on the amount agreed upon between the syndicate and M'Ivor? Yes, I paid the whole sum.
268. But you first paid a deposit, and then paid the balance when the lease was granted? Yes; my partner, Mr. Cass, made the purchase, and I subsequently paid the amount due. I paid the balance, and took a transfer.
269. Have you the receipts? The papers are in Slattery & Heydon's office.
270. Has the transfer been ratified by the Department? No, it is held *in statu quo* in the office.
271. Chairman.] You have made complaints against the delays in the Mining Department, from the time of application to the issuing of the lease? Yes.
272. Will you explain what these delays were? I wrote on the 18th April for information as to how M'Ivor's application stood in the Mines Department; I constantly worried the Department to act upon it, complaining of the unreasonably long time the application was detained without action; on the 1st of May, 1882, I complained to Dr. Renwick, the Minister for Mines; he called for the application and papers, wrote something upon them, and ordered them to be presented at the Executive Council meeting the following day. From information I received orally from the Mines Department, I called on the 10th to see if the matter had been completed; I met Mr. Binney; he said, "M'Ivor's lease has been granted," or his application, I am not sure which.
273. Mr. Targott.] What date was that? The 10th May. I asked, "Is the land now out of danger?" he said, "The Department considers it so"; I said, "I am M'Ivor's attorney—I have come to sign the lease"; he said, "To-morrow will be gazetted day, but I do not think we can get it done in that time; however, we will try; call in at the end of the week"; I called on Saturday, the 13th; he informed me the lease was not yet gazetted; I said, "I will call at the Printing Office, and stir them up about it"; I did call at the Printing Office, and was informed that the papers had not been sent there at all; I called again on Monday morning, the 15th, at the Printing Office, and was informed the papers had not yet arrived; I went on to the Mines Department, and saw Mr. Binney; I asked him to explain; he said he had sent them on all right; I said, "No, they have not arrived yet"; he called a clerk, and I saw him look at a book like a ledger, and he turned to me again, and said, "The clerk is now out who has charge of the papers; I will see him when he comes in, and you may rely upon it I will attend to them"; I went back to the Printing Office, and asked Mr. Richards, the Government Printer, to cause a search to be made for the papers; he sent two men to search, and they returned saying the papers had never been sent there; that was on the 15th; the records of the office now prove, and I am also informed by the Superintendent of the Printing Office, not Mr. Richards, that the papers only arrived there on the 1st of June, and they were gazetted on the 2nd of June.
274. On what day did King and party peg out their mineral conditional purchase? They took it up on the 25th May. When I signed the lease on the 24th July Mr. Binney refused to give it to me, alleging that George Kennedy King had selected the land. Some discussion took place, and he said the Department of Mines would communicate with the Lands, which the records of both offices prove they did. I also wrote

to

\* NOTE (on revision):—I might here be permitted to add that the Judge asked M'Ivor if he saw the notice on the Warden's Court, and he (M'Ivor) replied—"No, I was not in Glen Innes to see it; I was on the mine during the time, but I saw the notice on the nearest post office."—R. T. K.

to the Minister for Lands, cautioning him against granting a title to King, on the ground that M'Ivor held a lease of the same land. This is a copy of my letter. (*Handed in. See Appendix C.*) I would call attention to exhibits Nos. 15, 20, 21, 22, and 23 of the printed papers already in evidence. That is the correspondence which took place between the Lands and the Mines Departments. After all that correspondence the Minister for Mines decided that M'Ivor was the owner of the land, and executed and issued to me, as his attorney, M'Ivor's title to the land. R. T. Kirby,  
Esq.  
9 July, 1884.

275. *Mr. Clarke.*] You mean the lease? Yes, No. 8 of the printed papers.

---

## CLAIM OF MATTHEW M'IVOR TO A TIN-MINE AT PHEASANT'S CREEK.

## APPENDIX.

[Handed in by Mr. Kirby, 10 June, 1884.]

A 1.

Pheasant Creek Tin Syndicate.

Report, by Norman Taylor, Esq., late Field Geologist, Geological Survey of Victoria, on the property of the Pheasant Creek Tin Syndicate, New England.

Gentlemen,

Glen Innes, 12 February, 1883.

Acting on instructions received from Messrs. King Brothers, I left Armidale on the 6th instant, and visited your tin property at Pheasant Creek, and now beg to report thereon.

The property is situated in the parish of Moogem, county of Clive, and consists of a total area of 470 acres freehold, held under the mineral conditional purchase clause of the Land Act.

The western portion has a frontage of over a mile to the Pheasant or Rocky Creek, a large ever-running stream with a rapid fall; whilst the eastern portion has a frontage of nearly half a mile to a creek little inferior to the former. Stream tin works have for years past been carried on in both these creeks with, I believe, good results.

A great deal of prospecting has been done on this property, and the different shafts and surface excavations visited are numbered on the accompanying plan. The positions of those in the eastern block are correct; those in the western are only approximately so.

Beginning with the eastern block of 50 acres.

*Shaft No. 1*—is sunk 16 feet in decomposed soft granite, showing a vertical lode 2 feet thick of a highly micaceous rock (greissen of the Germans), with quartz veins, striking E. 25° N. On the east wall is a soft clay vein, giving about 2 ounces of fine tin to the dish. Tin oxide is visible both in the quartz and micaceous matrix, but not largely, and it is said to yield about 18 per cent. of ore.*Shaft No. 2*—is 13 feet deep. It is sunk in decomposed granite, and exposes a lode of mixed quartz and micaceous rock, dipping S. 5° E., at an angle of 65°. Its strike is W. 5° S., and E. 5° N. A very good show of tin occurs in the soft micaceous rock, associated with mispickel (arsenical pyrites), and scorodite (arsenate of iron), sometimes decomposed into oxide. The lode between the walls is about 6 feet thick, though it is much narrowed by a "horse" on the footwall which will no doubt cut out below. The tin-bearing portion is on the hanging wall.*No. 22*—is a surface opening exposing a mass of lode stone about 10 feet wide, underlying to the south, mostly micaceous quartz, with a vein 1 foot thick on the north side containing large-grained tin, the quartz containing finer tin. There appears from the outcrops to be a north and south vein here, and I think it is worth further opening up.*Shaft No. 3*—is an old one. Here there is a mica lode apparently striking N. 10° W. and 3 feet thick, with quartz on its west side. There is a great deal of crystallized quartz in what appears to be a horizontal vein near the surface. The original prospectors, it seems, followed the quartz down for gold, and left the tin. Some loads of tin were sent down from this shaft, and the rejected ore heap shows very good tin.*Shaft No. 4*.—This shows a large lode bearing E. 17° N.; it is 6 feet thick at the top, and thins to 3 feet 6 inches at a depth of 18 feet. The tin occurs well distributed in large crystals, in quartz and micaceous rock, and a ferruginous matrix, mostly on the south wall.*Shaft No. 5*—is 10 feet deep. The micaceous lode first exposed ran nearly north and south, but afterwards turned to east and west. It shows excellent tin.*Shaft No. 18*—is situated on the hill-top, about 100 feet above the creek; it is 10 feet deep. About 4 feet only of the lode is seen, consisting of micaceous rock, with larger than ordinary white and golden mica, smoky quartz, and some long prisms of a decomposed mineral (? schorl), with bunches of mispickel. Its strike is N.E. and S.W., but was at first N. 10° W. It shows good tin.*No. 17*—is an open quarry on an outcrop of stone striking W. 30° N. It is a hard micaceous and quartzose rock, containing a little tin.*No. 21*—is a surface excavation exposing a lode striking W. 40° N., of the usual micaceous character, and containing tin.A surface opening (not numbered) to the north-east of *No. 4* shaft, shows a large lode of the same character, with tin in the quartz as well.*No. 19*—is a surface opening showing a lode bearing apparently N. 10° E. It is micaceous on the east side and shows tin, but has not been much tried.

In the western portion of the property, along the high granite range on the west side of Pheasant Creek, are situated—

*Shaft No. 6*.—This shaft is now being worked; it is 31 feet deep. From the surface wedge-shaped masses of lode stone (nearly pure white mica) cut out below. The lode at present appears to run nearly east and west, with a tortuous course, and is about 4 feet thick, with an appearance of widening to the westward. A little water comes in, but is not of much consequence.

At the present depth a large quantity of mixed sulphides is met with (galena zinc blende and iron pyrites), together with chlorite and quartz on the western (quartz) wall.\*

*Shaft No. 7*—shows a micaceous lode which comes in nearly east and west, and turns to east of south, dipping in strike under the granite, with quartz between them. It is about 8 feet deep. The lode contains fair tin; near this is a trench.*No. 9 Excavation*.—Here there has been just enough done to expose a micaceous lode 2 feet thick, showing tin, and striking W. 25° S. into the granite hill.*No. 10 Excavation*—discloses a mica lode 1 foot 6 inches thick, striking W. 5° S. There is very little tin visible, and that very fine.*No. 11 Excavation*—shows a mica lode with tin. Its width appears to be from 7 to 8 feet, and its strike about E. and W.*No. 13 Excavation*—shows a lode apparently striking N.W. and underlying N.E.*Shaft No. 14*—is on the range-top. It shows a good lode 2 feet thick, striking W. 10° N., and dipping (in strike) under the granite. The tin crystals are of a good size. The "country" is a hard white granite, composed of felspar (red or white), grey quartz, and white or green mica, with a little iron pyrites.*Shaft No. 15*—is also on the range-top. The lode here exposed is more granitic in character; it contains tin crystals and arsenical pyrites, and appears to dip under the granite.*Shaft No. 16*—is on the highest range-top. The shaft is 8 feet deep, and shows a thin clayey micaceous vein from the surface striking about N.E. and S.W., with other horizontal veins. There is an appearance, however, of an east and west hanging wall; this also dips in strike under the granite. Very large and handsome specimens of crystallized tin have been obtained here.*Shaft No. 12*—is at the head of a gully running N.W. from the range. Here there is a vein 11 inches thick of micaceous clay, carrying very fair loose tin; its strike is E. 25° N., or at right angles to a long trench. The depth of the shaft is 13 feet. One chain higher is another similar vein, and there is another higher still. Although the surface is strewn with micaceous lode stuff, much trenching has failed to find it "in place." A considerable amount of stream tinning has been carried on all down this gully, with very good results.

Shaft

\* With regard to *No. 6* Shaft, I omitted to mention that this shaft has proved the richest in tin as yet. A quantity of ore sent down to Sydney gave 60 per cent. of oxide of tin, and the average would probably not be under 45 per cent.—N. TAYLOR.

*Shaft No. 8*—is 17 feet deep, and now full of water. The course of the lode is N. 30° E., and dipping westerly, but it is said to dip easterly below. The lode is said to be from 18 inches to 3 feet thick, and micaceous. About 25 cwt. of the softer stuff has been crushed from here with a dolly; the harder portions, also containing tin, having been rejected.

Tin sluicing operations are now going on in the creek along your northern boundary.

The sinking in the granite generally is soft, especially in the eastern portion of the property.

I was unable to detect any wolfram (tungstate of iron and manganese) or other deleterious metal, in the lodes visited, and all the tin stone I have seen is of very high quality, and of all shades—from grey to yellow, brown, red, and black.

The northern boundary of the property forms the boundary between the granite, to the south, and the felspar porphyry and felsite, to the north; the latter being clothed with a dense sub-tropical vegetation. Lodes cannot, therefore, extend in a northerly direction beyond this boundary; but it seems to me that the felspar porphyry has had an influence on the strike of the lodes, and probably even given rise to their formation, most of which, being nearly east and west, have a general parallelism with the before-mentioned boundary.

Professor Ulrich, of the Dunedin University, an old colleague of mine on the Geological Survey of Victoria, in a paper on the Inverell district, read before the Geological Society of London (sec. 21, Geol. Socy., February, 1873), speaks of these lodes as dykes, and says that the conclusion he came to was "that the granite mass, as a whole, represents one of the so-called 'stocks' or 'stockworks,' similar to those of Saxony and Bohemia, but of incomparably greater size and richness." In its mineralogical characters, this district is the exact counterpart of that which he speaks of.

The appearance of these innumerable lodes is indicative of an extensive tin-field, which only requires experience and capital to be thoroughly developed. Mere prospecting the surface shows nothing more than the probability of larger deposits below.

The employment of capital alone can prove this, and I think that, from what I have seen, I can have no hesitation whatever in stating that your property at Pheasant Creek is in every way qualified to take rank as a first-class mining venture.

I have, &c.,

NORMAN TAYLOR,  
Late Field Geologist,  
Geological Survey of Victoria.

[*Handed in by Mr. Kirby, 10 June, 1884.*]

A 2.

I, JAMES EVAN M'INTYRE, of Glen Innes, publican, do solemnly and sincerely declare that the requisite notices were duly posted by me on the 27th July, 1881, outside the Court-house, Glen Innes, and also outside the Warden's office and post office, for a mineral lease for block No. 9, situated at Glen Elgin, in the Land District of Glen Innes. Application was made for above-mentioned block on the 5th August, 1881, by me, and said application is numbered in the Glen Innes office as 81-27, and number of lease in Sydney is 1,415. And I make this solemn declaration conscientiously believing the same to be true, and in virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled "An Act for the more effectual abolition of Oaths and Affirmations taken and made in various Departments of the Government of New South Wales and to substitute Declarations in lieu thereof and for the suppression of voluntary and extra-judicial Oaths and Affidavits."

JAMES E. M'INTYRE.

Made and signed before me, at Glen Innes, this 27th day of }  
May, 1884,—

S. W. BURRIDGE, J.P.

A 3.

Affidavit of Percy Charles Wells.

In the Legislative Assembly, New South Wales.

In the matter of the claim of Matthew M'Ivor to a tin-mine at Pheasant Creek, in the Colony of New South Wales.

On the twentieth day of March, in the year one thousand eight hundred and eighty-four, Percy Charles Wells, of Sydney, in the Colony of New South Wales, clerk, being duly sworn, maketh oath and saith as follows:—

1. I was Warden's Clerk at Glen Innes in the year one thousand eight hundred and eighty-one.

2. The notice of intention to apply for a mineral lease of portion number 9, situated county Clive, parish of Moogem, containing 20 acres, was posted up outside the office of the Warden's office at Glen Innes, in terms of the Mineral Lease Regulations, by myself, in the presence of one M'Intyre.

3. I well remember removing such notice from the board outside the office, and on the 5th day of August, in the year one thousand eight hundred and eighty-one, filing it with other such notices, in the said office at Glen Innes aforesaid, as was required in terms of such office work.

The applicant, Matthew M'Ivor, on the said fifth day of August, one thousand eight hundred and eighty-one, was represented by one James E. M'Intyre as agent for him, and also posted in my presence the notices required by the Mining Act.

PERCY C. WELLS.

Sworn by the deponent, on the day first above-mentioned, }  
at Sydney, before me,—

J. M. CURTIS, a Commissioner for Affidavits.

B 1.

Mr. W. H. Harrison to Mr. T. C. Lempriere.

Melbourne Patent Smelting Co.,  
Burnley-street, Richmond, 7 April, 1883.

Dear Sir,

Mr. Waters, bearer, I introduce as the reporter and prospector of the Pheasant Creek Tin Company. He will give you more particulars than you have been able to obtain.

He will be glad if you will give him samples of ore which he brought down. All seem in a fair way to adjust the matter, you remaining brokers for the Company.

Yours truly,  
W. H. HARRISON.

B 2.

Mr. T. C. Lempriere to Mr. R. T. Kirby.

33, Flinders-street West, Melbourne, 6 May, 1884.

Dear Sir,

Mrs. Parnell showed me your letter to-day re Pheasant Creek Tin-mine, and asked me to write you.

I lost considerably by the above mine being placed in my hands to float and then withdrawn, but I will go to Sydney, on being guaranteed that I will be paid what I would have got had the mine not been withdrawn (should you obtain a verdict), and also that my travelling expenses and hotel expenses and £5 a day be paid.

I am, &c.,  
THOS. C. LEMPRIERE.

B 3.

Telegram from Mr. Norman Taylor.

Glen Innes, 26 January, 1883.

Just returned from Pheasant Creek. Property belongs to King, by Supreme Court verdict, so cannot report. Could not obtain any information in Mining Department or on the ground.

Mrs. E. B. Parnell, Overton, N. Shore.

[To the Evidence of R. T. Kirby, 9 July, 1884.]

C.

Messrs. Cass, Kirby, & Co., to The Secretary for Lands.

Sir,

128, Castlereagh-street, Sydney, 28 July, 1882.

I have the honor to inform you that some months ago we agreed to purchase from Matthew M'Ivor his mineral lease, situate at Pheasant Creek, parish of Moogem, county of Clive, being measured portion No. 9 of 20 acres.

That on seeing said lease gazetted as granted on the 9th day of May last past, believing the title to be secure, we paid the stipulated sum for said mine.

The Secretary for Mines refuses to give us possession of the lease, although it is in every other way completed, and we are actually under rent since the 9th of May last. King's application to purchase was not made for sixteen days after the lease was granted, and no notice had been given the Mines Department until after the lease had been signed and completed.

We have sold this mine, subject to inspection next week, for many thousands of pounds, and therefore solicit your immediate action.

Trusting that you will take into your most serious consideration the great outrage upon justice here sought to be perpetrated by King, and the enormous loss to us should our land be granted to him,—

We have, &c.,  
CASS, KIRBY, & CO.

I hereby certify this to be a true copy taken by me from the press copy of the original, and has been carefully read with said copy, and examined by me, on this 23rd day of June, 1884,—

R. T. KIRBY,

C.

Mr. R. T. Kirby to The Secretary for Lands.

Sir,

128, Elizabeth-street, Sydney, 26 July, 1882.

I have the honor to inform you that the Under Secretary for Mines has refused to-day to deliver to me (M'Ivor's attorney) mineral lease 1,415, dated the 9th day of May last past, being measured portion No. 9, 20 acres, parish of Moogem, county of Clive, said lease having been duly signed and stamped ready for delivery. The reason assigned for such refusal is that in April last past it was selected by Walter Lee, and also on the 25th day of May last past by G. K. King; the former 40 acres, and the latter 60 acres.

I protest against Mr. King's application, including No. 9, being granted, for the following reasons:—

1. That M'Ivor took possession of No. 9 under mineral license, and in virtue of said license made application for mineral lease of said land; that the said application was granted on the 9th day of May last past, and was gazetted as under rent from that date.
2. That King's application was not made for sixteen days after the lease was granted and rent accepted for one year in advance, part of which time has already expired.
3. That the Secretary for Mines, by obtaining and accepting the signature of the said Matthew M'Ivor as lessee of said property, thereby made him (M'Ivor) responsible from the date of said lease for all the conditions and liabilities pertaining thereto; and no notification of an adverse claim having been given until after the lease was signed, the withholding of said lease is illegal and unjust in the extreme.

Trusting that you will inform Mr. King that his application as including No. 9 cannot be accepted, with as little delay as possible,—

I am, &c.,

R. T. KIRBY,

Attorney for Matthew M'Ivor.

## Complaint of Dennis Bowes.

### SCHEDULE.

NO.	PAGE.
1. Mr. Dennis Bowes to the Under Secretary for Mines, reporting alleged overcharge by the Mining Registrar, Temora, for registration of suspension of labour. (Minutes thereon.) 9 March, 1881 .....	2
2. The Under Secretary for Mines to Mr. Warden De Boos, with reference to above. 15 March, 1881 .....	2

### No. 1.

#### Mr. Dennis Bowes to The Under Secretary for Mines.

Temora, 9 March, 1881.

Sir,  
I beg to report, for the information of the Department of Mines, that on the morning of the 9th March (to-day) I had occasion to register a suspension of labour in No. 11, Deep Lead, granted by the Warden, and was charged 3s. 6d. for same by the Mining Registrar, I believe the proper and correct charge for which is only 2s. 6d.; I told the Mining Registrar so, and he said it was not too much, but that it was the correct charge. I paid 3s. 6d.

DENNIS BOWES,  
Miner's Right No. 90 of 1881.

It appears to me that the Mining Registrar has overcharged complainant. Will the Department communicate with, or shall the Warden proceed against him under clause 128 of the Mining Act 1874. CHAS. DE BOOS, Warden, Temora, 9/3/81. The Under Secretary for Mines.

Application for suspension of work...	1/-
Certificate do do .....	1/-
Registration, Warden's Order .....	1/-
Forms (say three copies) @ 2d. ....	-/6
	3/6

Upon looking over the scale of fees it appears to me that the charge may be strictly in accordance with scale. I do not say it is, but upon the face of it I do not see that the Department would be justified in doing more than asking for an explanation. If Mr. Bowes choose to proceed, he of course can do so. Submitted.—H.W., 12/3/81. Approved.—E.A.B., 15/3/81.

### No. 2.

#### The Under Secretary for Mines to Mr. Warden De Boos, Temora.

Department of Mines, Sydney, 15 March, 1881.

Sir,  
Referring to your memorandum of the 9th instant, upon the complaint made by Mr. Dennis Bowes, that the Mining Registrar overcharged him for registration of suspension of labour on that day, I have the honor, by direction of the Secretary for Mines, to inform you that it is not clear that the charge may not be strictly in accordance with the scale, and therefore, upon the face of it, it is thought that the Department would not be justified in doing more than ask the officer for an explanation; but of course if Mr. Bowes choose to proceed, it is open to him to do so.

I have, &c.,  
HARRIE WOOD,  
Under Secretary.

## Complaint of John M'Rae.

### SCHEDULE.

NO.	PAGE.
1. Mr. John M'Rae to the Secretary for Mines, complaining that the Mining Registrar refused to register him for allotment 14, block 6, town of Temora, &c.; minute thereon. 2 February, 1881 .....	2
2. The Under Secretary for Mines to Mr. John M'Rae, in reply to above. 9 February, 1881 .....	3
3. The Under Secretary for Mines to the Mining Registrar, Temora, asking for an explanation of the matter. 9 February, 1881 .....	3
4. The Mining Registrar, Temora, to the Under Secretary for Mines, in reply to above; minutes thereon. 12 February, 1881 .....	3
5. Minute of Mr. Warden De Boos, Temora, reporting that he had made inquiry into the matter, &c., and forwarding copy of evidence taken; minute thereon. 12 March, 1881 .....	3
6. The Under Secretary for Mines to the Mining Registrar, Temora, with reference to above. 18 March, 1881 .....	4

### No. 1.

#### Mr. John M'Rae to The Secretary for Mines.

Temora, 2 February, 1881.

Sir,  
I humbly beg your advice, and apologize for this liberty in writing you anent an allotment No. 14, block 6, situated in the surveyed township of Temora, which I now hold by virtue of my miners' rights, No. 2,934, dated 4 September, 1880, and 404, dated 1 January, 1881. The above allotment, along with seven

seven others, is claimed by a Mr. Aaron Cohen, of Young, who has not resided on or occupied any of them. Last week I waited on Mr. Margules, Mining Registrar here, requesting him to register the allotment in my name; he refused to do so, and accompanied his refusal with abusive language, and wound up the same by calling me a "robber," and threatened to put me in the lock-up. I daresay you will agree with me in thinking that the abuse, accusation, and threat, said in presence of others, is not relished by me, as I cannot see that I gave any cause for such language. Mr. Oliver, attorney here, called on me, on behalf of Mr. Cohen, and offered me £5 to give up possession, and in the event of not doing so, threatened to pull the very small building down over my head. Query—Can he do so? I mean to settle in Temora and make considerable improvements on the allotment referred to. I now beg to ask you, and trust to be favoured with a reply, if I can retain possession of the allotment, and use the material of the small building now standing thereon in connection with my intended improvements.

I remain, &c.,

JOHN M'RAE.

The writer might perhaps take proceedings before the Warden to be put into possession, if the title of the person claiming the allotment is forfeited. The Mining Registrar may be called upon for an explanation. Submitted.—H.W., 4/2/81. Approved.—E.A.B., 5/2/81.

### No. 2.

The Under Secretary for Mines to Mr. John M'Rae.

Sir,

Department of Mines, Sydney, 9 February, 1881.

In reference to your letter of the 2nd instant, intimating that allotment No. 14, block 6, in the township of Temora, which is held by you under miners' rights, is claimed by Mr. Aaron Cohen, and inquiring what steps you should take in the matter, I have the honor to suggest that you might take proceedings before the Warden to be put into possession of the land, if Mr. Cohen's title thereto is forfeited.

See No. 1.

I have, &c.,

HARRIE WOOD,

Under Secretary.

### No. 3.

The Under Secretary for Mines to The Mining Registrar, Temora.

Sir,

Department of Mines, Sydney, 9 February, 1881.

I have the honor to inform you that a complaint has been made to this office by Mr. John M'Rae that upon application to you to register an allotment of land at Temora (allotment No. 14, block 6), you refused to do so, and used abusive language towards him, and I am directed by the Secretary for Mines to request that you will be good enough to furnish an explanation of the matter.

See No. 1.

I have, &c.,

HARRIE WOOD,

Under Secretary.

### No. 4.

The Mining Registrar, Temora, to The Under Secretary for Mines.

Sir,

Mining Registrar's Office, Temora, 12 February, 1881.

Referring to your letter of the 9th instant, on the subject of a person named M'Rae, and his complaint and my refusal to accept his application for registration of an allotment, I have the honor to state that I cannot recollect the circumstances of that particular case, but it will very likely prove one of the numerous instances coming before me daily, when persons, right or wrong, will insist to acquire a title to valuable spots of land with proper improvements, which land has though been finally registered and otherwise legally secured by the owners of such improvements; and on my affording the information to these disappointed persons I am usually met with a volume of abuse and with assurance that I shall be complained of.

See No. 3.

I have, &c.,

H. MARGULES, M.R.

As the Mining Registrar cannot explain the matter, the Warden may be asked to inquire into the complaint against the Mining Registrar. Submitted.—H.W., 18/2/81. Approved.—E.A.B., 19/2/81. Mr. Warden De Boos.—H.W., B.C., 22/2/81. Mr. M'Rae requested by letter to call upon Warden in this matter.—C.DEB., 26/2/81.

### No. 5.

Minute of Mr. Warden De Boos, Temora.

In accordance with your B.C. of 18 February, 1881, on Mr. Margules' letter of the 12th February, I made inquiry into the subject matter of John M'Rae's complaint, both Mr. Margules and Mr. M'Rae being present. The statements then made are appended. Mr. Margules virtually admits that he made use of some such language as that complained of, but taking into account the explanation he offers, I submit that it may perhaps be sufficient if the Mining Registrar be cautioned against using similar language in future. With regard to the allotment 14 of block 6, I have directed the Mining Registrar to give M'Rae (Schedule 1G, M. B. Regulations) application for an abandoned tenement, under which the question of ownership will come regularly before the Warden's Court, Temora.

The Under Secretary for Mines.

CHAS. DE BOOS,

Warden, 12/3/81.

The

The course suggested by the Warden appears to be the proper one in this particular case, and may be acted upon. Submitted.—H. W., 16/3/81. Approved.—E. A. B., 17/3/81. Mr. Warden De Boos.—H. W., B. C., 18/3/81. Seen.—C. De B., 2/4/81.

Letter from the Under Secretary for Mines, of 9th February, 1881, read.

Henry Margules having heard read Mr. M' Rae's letter of 2nd February, 1881, as also letter from the Under Secretary for Mines, of 9th February, 1881, wished before making any statement to ask M' Rae a few questions.

Mr. John M' Rae:—I never entered into any tenancy with Rogers, agent for Cohen and Russell, of Young, for the occupation of the house on the land in question. I know it belongs to Mr. Aaron Cohen by Mr. Oliver telling me. I know Cohen owns seven or eight allotments, because he claims them. When I came to your office I demanded registration of No. 14, block 6. You repeated No. 14, block 6, two or three times. You then said, "Do you want me to assist you in a robbery." I answered, "No, I want you to register this lot." You said then that I was a "robber," and that you would put me in the "lock-up." I then thanked you and went away. I used no abusive language.—JOHN M' RAE. C. De B., 12/3/81.

Mr. Henry Margules states:—I am Mining Registrar at Temora. During the month of December last some allotments held, one only by Aaron Cohen, and three others held by three other parties, for which Rogers, commission agent, acted as agent, were transferred by Mr. Meagher by their authority to other parties at my office. Mr. Meagher informed me that the tenants on these allotments acknowledged the tenancy, but a week or two afterwards Mr. Russell, solicitor, of Young, came over and informed me that the tenants refused to pay rent, and gave me notice not to transfer or deal with the same allotments until the question of ownership was dealt with by some competent court. I asked him why he did not proceed with the cases at once, and he stated that he had instructed Mr. Oliver, resident solicitor, to do so, but in consequence of the contemplated change of Wardens the matter was held over. When M' Rae came to me early in January this year, in consequence of what Mr. Russell had said to me, I asked him if he was a tenant; he denied it. I then told him that I had positive proof from Rogers and others that he was a tenant, and that having finally registered the allotment I could not deal with it, the matter was out of my hands. He then gave some other version of the state of things, to which I positively replied that my duty was to preserve property, and not to assist in anything like underhand work. He then got a little abusive, and I told him if he did not leave I would give him in charge. I told him he had a remedy if he would ask the Warden to put him in possession—that I was not a judicial officer.

By M' Rae:—I cannot recollect the day you came to me; it was early this year. I may have said, if I did such a thing I should be assisting in a robbery. I may have said, "Do you want me to assist you in a robbery."—H. MARGULES, M. R. C. De B., 12/3/81.

By the Warden:—When M' Rae came to me and demanded registration, even if I had understood him to mean that he required an application to be put in possession of a deserted mining tenement (Schedule 16, M. B. Regulations), I could not have given it to him, as the then Warden, Mr. Sharpe, had said that he would not recognize that schedule (16) in so far as town allotments were concerned.—H. MARGULES, M. R. C. De B., 12/3/81.

John M' Rae states:—After I had seen Mr. Margules I went to Warden Sharpe and told him what had occurred; he told me to write to the Minister for Mines, as he had no control over the thing.—JOHN M' RAE (× his mark). C. De B., 12/3/81.

#### No. 6.

#### The Under Secretary for Mines to The Mining Registrar, Temora.

Sir,

Department of Mines, Sydney, 18 March, 1881.

With reference to the matter of the complaint made by Mr. John M' Rae of your having used abusive language towards him on the occasion of his calling on you shortly before the 2nd ultimo to register an allotment of land at Temora, I am directed by the Secretary for Mines to point out that it appears from the Warden's report that you did on that occasion make use of language unbecoming to a Public Officer, and I am to request that you will refrain from using similar language in future.

I have, &c.,

HARRIE WOOD,

Under Secretary.

### Complaint of Mr. H. Margules.

#### SCHEDULE.

NO.	PAGE.
1. The Mining Registrar, Temora, to the Under Secretary for Mines, respecting summons served upon him from the Warden's Court, Temora (minute thereon). 2 April, 1881	4
2. The Under Secretary for Mines to the Mining Registrar, Temora, in reply to above. 5 April, 1881	5

#### No. 1.

#### The Mining Registrar, Temora, to The Under Secretary for Mines.

Sir,

Temora, 2 April, 1881.

I have the honor to enclose summons served upon me from the Warden's Court at Temora upon a matter strictly and purely within the province of duties imposed upon me by instructions of your Department, as well as the Regulations of the Mining Board of New South Wales.

2. In this matter fourteen clear days are stipulated, and had not elapsed when complainant asked for registration, hence none could be granted; but otherwise such act would involve me in an action at the

the Supreme Court, as the land, having been fully improved and finally registered, was applied for purchase to the Department of Lands, and any such interference of mine without higher authority would certainly constitute an encroachment upon the proper functions of the Crown with the dealings of the land once applied for, and open the road to endless litigation, besides doing away with all security to capital and property.

3. As I have to act according to your instructions, and in the meaning of the Regulations aforesaid, the said summons, on the other hand, seems to assume all powers vested in each of the said bodies, and set aside my duties as already provided, but as to be stipulated by said Court.

4. I most respectfully beg to be instructed how I am to act in this matter, because this being a matter strictly of duty, of which the Department solely has jurisdiction, I conceive, should I attend such summons, I should, in my person, abrogate all your authority over Mining Registrars to the Warden's Court. I do not know whether I am right in my opinion that the Legislature has never intended that the Warden's Court be the arbiter of the duties performed by the officers of the Department of Mines. Next we might hear that the Registrar for Leases, &c., had to appear at Temora before the Warden's Court for neglect of something or other.

5. My time is indeed very valuable, and I have certainly none to lose to attend Court on frivolous matters, and should such or like proceedings be continued I shall never be able to attend office at all, while salaries paid by me to assistants are no less than £4 per week when myself absent from office. Thus you will perceive such procedure is not only vexatious but costly to me.

I have, &c.,

H. MARGULES, M.R.

The Mining Registrar may be informed that this Department cannot interfere with the Warden or Warden's Court in the exercise of powers conferred by the Act. As the Mining Registrar is not paid any salary the Warden will probably award him costs for any time he may lose, provided the cause shown prove satisfactory. Submitted.—H.W., 4/4/81. Approved.—E.A.B., 5/4/81.

## No. 2.

### The Under Secretary for Mines to The Mining Registrar, Temora.

Sir,

Department of Mines, Sydney, 5 April, 1881.

Referring to your letter of the 2nd instant, in which you inquire what action you should take in regard to a summons served on you from the Warden's Court at Temora, on the complaint of Michael Hassett, I am directed to inform you that this Department cannot interfere with the Warden or Warden's Court in the exercise of powers conferred by the Act. See No. 1.

2. With respect to your complaint as to your probable loss of time in attending the Court, &c., I may point out that as you are not paid any salary as Mining Registrar the Warden will perhaps award you costs for any time you may lose, provided the cause shown for non-registration prove satisfactory.

I have, &c.,

HARRIE WOOD,  
Under Secretary.

## Complaint of Michael Wynne.

### SCHEDULE.

No.	PAGE.
1. Mr. Michael Wynne to the Secretary for Mines, complaining that the Mining Registrar, Temora, refuses to register him for allotment 1, section 4, town of Temora. (Minutes thereon.) 5 February, 1881	5
2. Mr. Warden De Boos to the Mining Registrar, Temora, asking him to attend an inquiry into the above. 4 March, 1881	6
3. Mr. Michael Wynne to the Secretary for Mines, withdrawing complaint. (Minute thereon.) 4 April, 1881	6
4. Telegram from the same to the same, to same effect. 5 April, 1881	6
5. Mr. Wm. Oliver to Mr. Warden De Boos, stating that upon reflection Mr. Wynne declined interfering in the matter. 5 April, 1881	6
6. The Under Secretary for Mines to Mr. Warden De Boos, that his action in not proceeding with inquiry is concurred in. 8 April, 1881	6

## No. 1.

### Mr. Michael Wynne to The Secretary for Mines.

Sir,

Temora, 5 February, 1881.

I have the honor to call your attention to what I consider a flagrant breach of the regulations of the Mining Act. Upon the 16th October, 1880, I applied for the mining tenement, Temora, allotment 1, section 4, deeming it abandoned upon two grounds, viz., that it had never been occupied, and, second, that it had not erected upon it improvements to the value of £10, as required by the Act. Both of these reasons or allegations I am in a position to prove—the first by the evidence of several disinterested persons of repute, and the second by the testimony of the person who erected the hut, the only improvement upon the tenement. Upon presenting my application to the Mining Registrar, Mr. H. Margules, he refused to entertain it, although proffering the required fee, &c., on the grounds that the tenement had been finally registered.

Upon 7th November, 1880, finding the tenement still unoccupied, I took possession of it, and since then I have been continuously residing there, no one disputing my possession nor claiming rent. Upon the 10th November, 1880, I again applied for the tenement, and my application was again refused  
by

by the Mining Registrar upon the same grounds as formerly. I still remain in peaceable possession of the tenement, and my object in writing you now is to respectfully ask you to order that such steps be taken as to prevent my ejection, as now threatened.

I may further add that the original real holder was Mr. W. Sharp, who, by means of dummies, pretends to be the proprietor of some thirty or forty allotments in Temora.

I have, &c.,

MICHAEL WYNNE.

Mr. Warden De Boos for inquiry and report.—H.W., B.C., 14/3/81. Michael Wynne having withdrawn from the matter, I do not feel myself called upon to proceed with the inquiry.—C.D.W.B., Temora, 5/4/81. The Under Secretary for Mines. Scen.—H.W., 7/4/81.

#### No. 2.

Mr. Warden De Boos, Temora, to The Mining Registrar, Temora.

Sir,

Warden's Office, Temora, 4 March, 1881.

A letter, signed Michael Wynne, and dated 5 February, 1881, complaining of your conduct in refusing him an application to be put in possession of allotment J, section 4, town of Temora, as an abandoned mining tenement, having been referred to me by the Department of Mines for inquiry and report, I have to request that you will attend at my office at half-past 7 o'clock p.m., to-morrow, Tuesday, 5th March, in order that such inquiry may be held.

The letter above referred to is now in my office, and may be seen by you at any time prior to such inquiry.

I have, &c.,

CHAS. DE BOOS,

Warden.

#### No. 3.

Mr. Michael Wynne to The Secretary for Mines.

Sir,

Temora, 4 April, 1881.

I have made a complaint against the Mining Registrar at Temora. I am sorry that I acted in haste, and on consideration I fully believe I have done him a wrong. In order that my error may be corrected, I desire to ask you to take cognizance of this fact.

Yours obediently,

MICHAEL WYNNE.

In view of this letter, the Warden may be informed that no inquiry is necessary. Submitted.—H.W., 6/4/81. Approved.—E.A.B., 6/4/81.

#### No. 4.

Telegram from Mr. Michael Wynne to Secretary for Mines.

Temora, 5 April, 1881.

REGRET having reported Mining Registrar, Temora. Kindly take no notice of my complaint.

MICHAEL WYNNE.

#### No. 5.

Mr. William Oliver to Mr. Warden De Boos, Temora.

Sir,

*Re* Margules.

Temora, 5 April, 1881.

My client, Mr. Michael Wynne, last night saw me in reference to an appointment fixed for 7 p.m. to-night, as to some alleged irregularity on Mr. Margules' part. He asked me to let you know that upon reflection he would decline interfering in the matter.

Yours, &c.,

WILLIAM OLIVER.

#### No. 6.

The Under Secretary for Mines to Mr. Warden De Boos, Temora.

Sir,

Department of Mines, Sydney, 8 April, 1881.

In reference to your memorandum of the 5th instant respecting the complaint preferred by Mr. Michael Wynne against the Mining Registrar at Temora for refusing to receive his application for a mining tenement alleged to have been abandoned, I have the honor to inform you that, in view of the action of the complainant, the Secretary for Mines is of opinion that no inquiry is necessary, and therefore your action in not proceeding is concurred in.

I have, &c.,

HARRIE WOOD,

Under Secretary.

## Complaint of Thomas G. P. Lee.

### SCHEDULE.

NO.	PAGE.
1. Mr. T. G. P. Lee to the Warden, Temora, complaining that the Mining Registrar would not give him forms for an abandoned tenement. (Minutes thereon.) 14 April, 1881 .....	7
2. The Under Secretary for Mines to the Mining Registrar, Temora, informing him that he is required to give effect to all orders made by the Warden, &c. 4 May, 1881 .....	7

#### No. 1.

#### Mr. Thomas G. P. Lee to The Warden, Temora.

Sir, Temora, 14 April, 1881.  
 Allow me to inform you that I this day, between 10 and 11 o'clock in the forenoon, applied to Mr. Margules, the Mining Registrar, for forms for an abandoned tenement, but he told me he would not give them to me. He told me to get an order from the Warden; I did so, and then he refused to give them to me, so I want to know what a man is to do. By giving this your consideration you will oblige,—

Yours, &c.,  
 THOMAS G. P. LEE.

May I take the liberty of pressing upon you to come to some decision in reference to rights of miners to make application for abandoned mining tenements. I am perpetually annoyed with complaints, and I have stalled them off as far as possible so as not to pester the Department, but the Mining Registrar is so persistently destructive that matters have almost come to a deadlock, and he refuses to do anything without your instructions, stating that he does not recognize me at all.—C.D.E.B., Warden, Temora, 23/4/81. The Under Secretary for Mines.

The course recommended by Mr. Warden De Boos (on 81-3,099) appears to meet the cases in which persons who desire to obtain possession of residence or business sites alleged to be abandoned do not take proceedings before the Warden to have such sites declared abandoned and to have themselves put into possession. The Mining Registrar may be so informed, and that he is required to give effect to all orders made by and to co-operate with the Warden. Submitted.—H.W., 27/4/81. Approved.—E.A.B., 2/5/81.

#### No. 2.

#### The Under Secretary for Mines to The Mining Registrar, Temora.

Sir, Department of Mines, Sydney, 4 May, 1881.  
 With further reference to the question of applications (Schedule 16 of the Mining Board Regulations), I am directed by the Secretary for Mines to inform you that the course recommended by Mr. Warden De Boos appears to meet the cases in which persons who desire to obtain possession of residence or business sites alleged to be abandoned do not take proceedings before the Warden to have such sites declared abandoned and themselves put into possession thereof.

2. I am also directed to say that you are required to give effect to all orders made by the Warden and to co-operate with him.

I have, &c.,  
 HARRIE WOOD,  
 Under Secretary.

P.S.—A copy of the Warden's memorandum on this subject is added in the margin.

"In all cases where a miner shall have applied (Mining Board Regulations, Schedule 16) for an abandoned tenement, and where no objections shall have been filed (Schedule 19) to such application, and where the mining tenement so applied for shall be held by the person alleged to have abandoned the same under a certificate of title, the Mining Registrar, instead of issuing a certificate of conditional registration, will be good enough to refer the applicants to the Warden, informing the Warden at the same time of the number of the certificate of title and the name of the person in whose name the mining tenement stands in the Mining Registrar's Surveyed Mining Tenement Register."

## The Mining Registrar, Temora.

#### The Mining Registrar, Temora, to The Under Secretary for Mines.

Sir, Hopkins v. Hyman.  
 Temora, 8 March, 1881.

Mr. Warden De Boos directs me to state that in reference to the above case he was entirely misinformed, and he fully coincides with my procedure.

The facts are—J. Beazley in July obtained by order the Warden's Court possession of allotment 5, section 6, Temora.

In August Beazley sold half of said allotment to Hyman

Hyman applied for subdivision; thus no final registration could take place.

While the process of subdivision and planning and receiving of plan was under way Beazley sold the remaining half to Hopkins.

Hyman improved his portion to the amount of £220.

Hopkins would not improve, and people were going to take possession; this state of things lasted over two months.

At

At last Hyman applied for the full allotment according to Regulations; no objections were filed with me within the prescribed time, but a day or two after such lapse the agent and brother of Hopkins applied for information as to the chances of the portion of the said allotment.

I then was ready to receive objections and leave the case and its merits to be dealt with by the Warden's Court; but upon my request to produce either a miner's right or business license they could produce neither.

And thus, by section 19 of the Mining Act, 1874, I was totally precluded to consider Hopkins at all in the matter, and Hyman having fully complied with all provisions of the law was duly and finally registered for the whole allotment.

I have, &c.,

H. MARGULES, M.R.

If no complaint has been made to this Department no further action is necessary. The Warden may be asked if any complaint hereon has been referred to him.—H.W., 24/3/81. Mr. Warden De Boos.—H.W., B.C., 26/3/81.

A verbal complaint only was made to me. I mentioned the matter to the Under Secretary when last in town, as I conceived that the Mining Registrar had usurped the functions of the Warden by giving certificate of title to Hyman. On his explaining that the regular course had been pursued in accordance with Mining Board Regulations, I told the Mining Registrar to mention the matter to the Under Secretary and offer him the same explanation he gave me.—CHAS. DE BOOS, Warden, Temora. The Under Secretary for Mines, B.C., 31/3/81.

Regulation 126 certainly provides for possession and registration of an abandoned tenement without a declaration of abandonment by the Warden, but this probably applies only to cases when the abandonment is absolute and no one in fact sets up any title. The best course in any case in which a person seeks to obtain possession of a tenement which he alleges has been abandoned by the owner is to require the person seeking to obtain possession to proceed in the Warden's Court to have it declared that the owner has abandoned or forfeited his title, and that the person taking the proceedings is entitled to be put into possession, and then for the person put into possession to proceed to register in the ordinary way.—H.W., B.C. 1/4/81. Mr. Warden De Boos.

## The Mining Registrar, Temora.

No.	PAGE.
1. The Mining Registrar, Temora, to the Under Secretary for Mines, asking for instructions <i>re</i> allotments improved, finally registered, and applied for to purchase without competition in virtue of improvements; minutes thereon, &c. 5 April, 1881 .....	8
2. The same to the same, further respecting the above. 2 May, 1881 .....	10
3. The Under Secretary for Mines to the Mining Registrar, Temora, in reply to No. 1. 4 May, 1881.....	11

### No. 1.

#### The Mining Registrar, Temora, to The Under Secretary for Mines.

*Re* allotments improved, finally registered, and applied for to purchase without competition in virtue of improvements.

Sir,

Temora, 5 April, 1881.

I most respectfully, though for the first time, pray that I might be instructed how to act in connection with the above subject; and should I proceed, as the Warden here desires to graciously inform me, whether I shall be kept harmless by the Department of all the expenses and costs attending any action against me at law.

I am already threatened daily with legal proceedings, and should I persist in accepting Schedule 16 in respect to such allotments I shall have plenty of law suits on hand.

In explanation, I beg to state that I invariably acted as in cases of Myers and others, refusing to accept new applications for ground as above described; and told such applicants to consult legal advice, or otherwise try issue in some competent Court, as it has been always held, whether rightly or not, that any person once applying to the Crown Lands Offices for the purchase of lands on gold-fields has entered upon contract with the Crown, and cannot be disturbed; and any application received afterwards from any other person by me for such lands would seemingly constitute an interference with the proper functions of the Crown, and might be taken as setting myself up in opposition to the Crown, actually, amongst other things, giving new applicants the right to occupy, improve, and raise new issues, bring losses to some of the applicants, and involve myself in actions at law, thus complicating the action of the Crown.

In deference to Mr. Warden De Boos I allowed, within the last three weeks, Schedule 16 to be used, thus turning the original improver into an objector, who is bound to prove his case within a very limited time (fourteen days). The holders of most of such lands are residents of either Wagga Wagga, Sydney, Young, &c. In most cases they have let their premises to tenants, who either now dispute themselves, or vacate and put others in possession to make the dispute easier. Of course all sorts of tricks and chicaneries have been resorted to by the persons called "jumpers."

Thus it will be seen that to accept Schedule 16, actually by regulations not applicable to such cases, deprives the original improver of all chances to defend himself, while it introduces, on the other hand, quite a new phase in the procedure in this office, that is—

- a. When no objections are raised the new applicant demands registration, which gives him at once the standing of the owner of such land and improvements upon it; and of course should I make registration I shall be liable to an action at law for depriving the improver of just rights, or otherwise interfering with vested rights.
- b.

- b. And even when disputed, and an order be made by the Warden, should I act without security I should be still liable to an action at law, though litigants might choose then between the Warden and Registrar; but I am sure to be the butt, since it seems on my part as to have been playing fast and loose—that is, to give a man a title to-day, and turn round to-morrow and have that title attacked, annulled, and then issue a new title to the very transgressor.

Of course in the procedure I have pursued, previous to the advent of Mr. Warden De Boos here again, and as I think I ought to pursue now, is no gain to me, but actually a heavy loss, judging superficially, having to forego so much of fees consequent to applications and registrations; but then one action at law might sweep away some hundreds of pounds sterling; that indeed I am not prepared to stake for the sake of 2s. or 3s. 6d. fees.

On the other hand, should I still act as the Warden seems to force upon me, the Crown would be prevented to use its prerogative, either to allow the purchase in virtue of improvements, or else to put such lands up to auction, as the law and the custom has been hitherto.

I again repeat my humble prayer for early instructions upon this subject, being of so much importance.

I have, &c.,

H. MARGULES.

Urgent.—Mr. Warden De Boos for report.—H.W., B.C., 8/4/81.

I am very glad that the Mining Registrar has himself brought this matter under the notice of the Mines Department, as it is one about which I had to speak to the Under Secretary in one of my interviews with him, but which, thinking it settled, I have since allowed to drop. Without following the complex statement of the Mining Registrar, the case stands thus:—When I came here to succeed Mr. Warden Sharpe many miners complained to me that there were numerous town allotments held untenanted by persons who resided in Young, Wagga, and elsewhere; and that there were several persons residing in Temora itself who held four, five, six, and even as many as a dozen allotments, all untenanted, and which in the majority of cases had never been tenanted at all. They further complained that they had applied to the Mining Registrar for the application (Schedule 16) to be put in possession of an abandoned mining tenement, but that he had refused them, calling them thieves and robbers for trying to take another man's property. I saw the Mining Registrar, and pointed out to him that he ought not to refuse to give the men the applications asked for. He said that he not only ought but that he would refuse them, and that he would issue no such documents. I told him that he was taking upon himself the duties of a Warden, as his refusal to issue the application was a virtual decision of the question. He still declined, and I then determined to bring the next case that arose under the notice of the Department. A few days afterwards a man named Lawson made a complaint to me, and what took place may be gathered from the statutory declaration made by him (herewith). I was still unwilling to trouble the Department or make a difficulty with the Mining Registrar, so I again appealed to him, pointing out that, even up to the very last minute, the regulations had to be complied with, as when the applications to purchase by virtue of improvements came to me I was called upon to report—1st, If the applicant held a miner's right; 2nd, If he resided; 3rd, If he was in authorized occupation; 4th, If he held any other I.P.; and 5th, If the land were required for mining purposes,—and that on an adverse report on any one of these points he would not be allowed to purchase. He then gave way, and told me he would issue the applications, as he believed I was correct. The statutory declaration was consequently never sent to you. The issue of the application (Schedule 16) having once set in a rush for them commenced, and there is no doubt that a great many of them were made by speculative jumpers; these however will all have to be dealt with by the Warden's Court. At the same time the dummy occupations were most glaring, rows of houses untenanted and of just sufficient value to save the regulations lined the streets, whilst the miners, the real men who should have made a population for the town, were driven to reside outside the town boundary. On some of these applications falling in, no objections having been made within the fourteen days, it came to my knowledge that the parties alleged to have abandoned held certificates of title. I therefore issued a verbal order to the Acting Mining Registrar in all such cases to refer the applicants for conditional registration to me, with a view to making them take out a Warden's Court summons to show cause why their certificate of title should not be cancelled. On the return of the Mining Registrar from his leave of absence I put that order in writing so that there should be no mistake (copy herewith), and especially as it accorded with your B.C. of 1/4/81 on the Mining Registrar's letter *re* Hopkins v. Hyman, and my B.C. thereon of 31/3/81 (all herewith). There are now several summonses on the Warden's Court book for the above object. There the matter stood, as I thought settled, until I received the Mining Registrar's letter to you. With regard to the actions threatened against the Mining Registrar, I am led to believe from statements made to me that such actions are not threatened for performing his duty, but for making statements to individuals in regard to certificates of title which have had the effect of misleading them.—CHAS. DE BOOS, Warden, Temora, B.C., 9/4/81. The Under Secretary for Mines.

The Mining Registrar at Temora may be informed that the course adopted by the Warden appears to give sufficient protection to holders of registered residence and business sites, and attention may be invited to the fact that the proviso to section 19 of the Mining Act appears to apply to claims. Submitted.—H.W., 19/4/81. Approved.—E.A.B., 2/5/81.

Memo.—In all cases where a miner shall have applied (Mining Board Regulations, Schedule 16) for an abandoned mining tenement, and where no objections shall have been filed (Schedule 19) to such application, and where the mining tenement so applied for shall be held by the person alleged to have abandoned the same under a certificate of title, the Mining Registrar, instead of issuing a certificate of conditional registration, will be good enough to refer the applicants to the Warden, informing the Warden at the same time of the number of the certificate of title and the name of person in whose name the mining tenement stands in the Mining Registrar's Surveyed Mining Tenement Register.—CHAS. DE BOOS, Warden, Temora, 4th March, 1881.

The substance of the above order was communicated verbally to the Acting Mining Registrar during Mr. Margules' absence on leave. It is now given in writing for the more correct guidance of the Mining Registrar. The Mining Registrar, Temora.

I, William Henry Lawson, of Temora, do solemnly and sincerely declare that on Tuesday morning last, the 8th instant, I took possession of allotment 5 of section 7 in the town of Temora, the same having

having been abandoned by reason of non-residence by the registered owner for over two months of my own knowledge. I slept in the house on the allotment that night, and the next day went to work. On my return to dinner I found the padlock forced from the door and my things scattered on the ground outside the house. That same day I complained to the Warden, who informed me that I had gone the wrong way to work to obtain possession, and that I had committed a trespass. He directed me to go to the Mining Registrar and take out an application to be put in possession of the allotment as an abandoned mining tenement. That same day I went to the Mining Registrar and demanded an application for an abandoned tenement (Mining Board Regulations, Schedule 16). He declined to give it to me. I returned to the Warden, who gave me the order hereunto appended (marked A). I proceeded to the Mining Registrar's office, but it was closed, though it was not 4 o'clock. I saw him outside and gave him the order. He read it, and said, "I can do nothing with it—I can't give you registration." I came back to the Warden on the 10th to make this declaration, in order to show that I had taken legal steps to apply to a Court of competent jurisdiction, so that my claim to the abandoned tenement might not be prejudiced. And I make this solemn declaration conscientiously believing the same to be true, and in virtue of the provisions of an Act made and passed in the ninth year of the reign of her present Majesty, intituled "An Act for the more effectual abolition of oaths and affirmations taken and made in various Departments of the Government of New South Wales and to substitute declarations in lieu thereof and for the suppression of voluntary and extra-judicial oaths and affidavits."

Made and signed before me, at Temora, }  
 this 10th day of March, 1881,— }  
 CHAS. DE BOOS, J.P.

W. H. LAWSON.

A.

THE Mining Registrar will be good enough to register William Lawson's application to be put in possession of No. 5 section 7 as a deserted mining tenement, otherwise I must take other proceedings.

CHAS. DE BOOS,

Warden's Office, 9 March, 1881.

Warden.

This is the paper writing marked A referred to in the declaration of William Henry Lawson.—  
 CHAS. DE BOOS.

No. 2.

The Mining Registrar, Temora, to The Under Secretary for Mines.

*Re* allotments finally registered, improved, and applied for to purchase without competition.

Sir,

Temora, 2 May, 1881.

Soon after my arrival from leave of absence I had the honor to address you on the above subject, and I respectfully and urgently prayed for information how to act in cases where an order from the Warden's Court is issued to dispose of the original improver's rights; and, secondly, should I so act, will the Department keep me harmless in case of actions at law.

It has been always held, and not contradicted, that the Act and Regulations afford no jurisdiction to the Warden's Court to cancel a final registration. The provisions and the register itself show that the Warden's Court may deal with all tenements as regards final registration before, but not after, the certificate of title is issued. In claims when abandoned after final registration the procedure is clear, but no cancellation takes place; the record must remain intact.

Then again should I do the bidding of the Warden's Court I shall knowingly involve myself in actions at law, and am I justified in so doing? The plea that I acted upon the order of a Warden's Court, I respectfully submit, will scarcely be regarded as sufficient; and the reply might be why not having used my own judgment and before fulfilling the order of a Court, why not demand security when danger lurked in the face. The Sheriff would not act upon a Supreme Court writ should he discover that the moment he were to act he would make himself liable to prosecution; but the Warden tries to force me, and without security, to act. Besides, as I already stated, my acting actually with and under security will interfere greatly with the action of the Crown in the purchase of the land applied for.

I most respectfully beg a reply upon this so very vital question.

I need hardly state that the first principle of good government, that is, security to property, has been sadly endangered here; that the blame does not rest upon my shoulders; I am striving against it with all my might.

There is a case in point which just now passes through all its stages. A Mr. Walsh has an allotment with improvements which he had let to a woman. On Saturday the woman left, and some strange man, Thomas Farrell, obtained the key from her and came to me to make application. Knowing the area he described to be finally registered I refused to receive application. He of course, as directed by me, went to the Warden, who strangely sent him back to me to demand such application. Of course I could not comply. A few minutes after the agent of Mr. Walsh came and detailed the case to me, and stated that he cannot enter his own house as he was going to reside there. I told him too to go to the Warden or Police Magistrate and see what could be done under either title, but nothing was done. On Sunday morning the agent, as well as his carpenter, was pitched off the ground by a mob of the lately-revived professional jumpers. Proceedings of some sort will be taken by the agent to-day. This is indeed a very sad state of things.

Looking at the plan of the town it will be seen that there are whole streets not occupied yet. But people like these jumpers do not care for paying for houses or paying for survey; therefore the ingenuity is overstrained to obtain a hold of improved land.

As to multiplicity of holdings at present by one person, I must state that my books will totally disprove such assertions as unfounded and untrue.

I have, &c.,

H. MARGULES, M.R.

## No. 3.

## The Under Secretary for Mines to The Mining Registrar, Temora.

Sir, Department of Mines, Sydney, 4 May, 1881. See No. 1.  
 Referring to your letter of the 5th ultimo, in which you ask for instructions how you should proceed in cases of applications in form of Schedule 16, for a tenement alleged to have been abandoned by the original holder thereof, I am directed by the Secretary for Mines to inform you that the course adopted by the Warden appears to give sufficient protection to holders of registered residence and business sites.

I am further directed to point out that the proviso to section 19 of the Mining Act appears to apply to claims.

I have, &c.,  
**HARRIE WOOD,**  
 Under Secretary.

### No. 1.

#### Mr. James Farrell to The Secretary for Mines.

Sir, Temora, 2 May, 1881.  
 I am a miner and reside upon this gold-field, and possess the necessary license authority to occupy Crown Lands.

This morning I applied to the Mining Registrar resident here for the necessary form by which application for abandoned mining tenements should be made, and he refused me a form of application, neither would he let me apply for the allotment.

I must desire that you will be good enough to advise me what to do in the matter.

I am, &c.,  
**JAMES FARRELL.**

The writer may be informed that he can proceed in the Warden's Court to have the title of the former owner declared abandoned, if he so desire. Submitted.—H.W., 6/5/81. Approved.—E.A.B., 7/5/81.

## The Mining Registrar, Temora.

### SCHEDULE.

NO.	PAGE.
1. The Mining Registrar, Temora, to the Under Secretary for Mines, asking how he is to act in certain cases, and for indemnity in case of actions at law (minute thereon). 9 May, 1881 .....	11
2. The Under Secretary for Mines to the Mining Registrar, Temora, in reply to above. 17 May, 1881 .....	12

---

### No. 1.

#### The Mining Registrar, Temora, to The Under Secretary for Mines.

Sir, Temora, 9 May, 1881.  
 In reference to letters Nos. 81-3,099 and 81-3,377, both of date 4 May instant, on the subject of tenements held under the 87th Regulation and under the 22nd section of the Mining Act, and applied for to purchase without competition, I have had the honor to verbally recommend, when at Sydney, the course that the Warden, in his memorandum of the 4th April (not March) last, seems to adopt, and as advised by the Department; and furthermore, that, as already explained in my letter of the 2nd instant, applications under Schedule 16 seem superfluous, and waste of time and money to parties interested. The process direct by summons, should the Warden think he had jurisdiction, would prove, and has proved, the most satisfactory and efficacious, and that also, as stated in my letter referred to, I most freely co-operated with the Warden, giving not only information contained in office records but actually the private address of parties to be summoned.

But

But the above partly answers my respectful prayer for instructions on two points, viz. :—

1. How to act when an order has been given in the Warden's Court in such cases adverse to the original improver and an action at law lies : Will the Department keep me harmless as to costs and damages under such circumstances ?
2. Should the Department not like to undertake the risk, may I demand security from the parties interested before giving new registrations to the applicants under Warden's Court orders ?

The questions, as I have already explained at large, are of great importance to me. I therefore most respectfully pray for a reply.

I have, &c.,

H. MARGULES, M.R.

I cannot understand how a Mining Registrar can incur any risk in that he has given effect to the order of a Court. If any person is interested in preventing the Mining Registrar from performing the act ordered by the Court he could apply for an injunction to restrain the Mining Registrar, and would be much more likely to do that than to proceed against the Mining Registrar for having performed the act. The Mining Registrar may be so informed, and that he is required to perform the duties of his office without asking any indemnity. Submitted.—H.W., 13/5/81. Approved.—E.A.B., 13/5/81.

## No. 2.

The Under Secretary for Mines to The Mining Registrar, Temora.

Sir,

Referring to your letter of the 9th instant, in which you make certain inquiries respecting your duty in carrying out the orders of the Warden's Court, I am directed by the Secretary for Mines to inform you that if a person is interested in preventing you from performing the act ordered by the Court he could apply for an injunction to restrain you, and would be much more likely to do that than to proceed against you for having performed the act.

I may point out that you are required to perform the duties of your office without asking any indemnity.

I have, &c.,

## Complaint of H. F. Powell.

### SCHEDULE.

No.	PAGE.
1. Mr. H. F. Powell to the Secretary for Mines, complaining that the Mining Registrar, Temora, refused to give him forms for an abandoned tenement, &c. (minutes thereon). 5 May, 1881.....	12
2. The Mining Registrar, Temora, to the Under Secretary for Mines, with reference to the above, &c. 14 May, 1881	13
3. Mr. Warden De Boos, Temora, to the Under Secretary for Mines, reporting on the above case (minute thereon). 23 May, 1881 .....	13
4. The Under Secretary for Mines to the Mining Registrar, Temora, censuring him for sending replies direct to this office instead of through the Warden. 24 June, 1881 .....	14

## No. 1.

Mr. H. F. Powell to The Secretary for Mines.

Sir,

Temora, 5 May, 1881.

I have the honor to call your attention to the following injustice under which I am now suffering. On Monday last, the 5th May, I, holding a miner's right and business license, applied to Mr. Margules, the local Mining Registrar, to be furnished with the necessary forms of application in order to take up an abandoned tenement, as the so-called proprietor had not resided on the said tenement for a period of over six months, and as it was also unoccupied for a period of about two months, until I resided on it on the 15th day of January, 1881, and on being refused I applied to the Warden and laid my case before him, and he directed me to go again to Mr. Margules and demand the forms on his (the Warden's) authority. This I did, tendering to Mr. Margules a half-sovereign in payment for same. I was again refused. I then returned to the Warden and told him of my non-success, and asked for a summons, in order that Mr. Margules might show cause why he had refused me. The Warden replied, "It is of no use my giving you a note or letter, as Mr. Margules will tear it up or throw it on one side, and insult me as he has you, and which he has done before ; but the best thing you can do is to write and state your case to the Honorable the Secretary for Mines."

Kindly inform me what I am to do under these circumstances, which I can substantiate on oath, and have also a witness to the facts herein recorded. I do not and cannot for a moment believe that Mr. Margules, who is only Mining Registrar, constitutes in *ipse persona* Warden, Court, Judge, &c., &c. Trusting to be favoured with an early reply,—

I have, &c.,

H. F. POWELL.

Mr. Warden De Boos will please call upon the Mining Registrar to answer the complaint and report.—H.W., B.C., 10/5/81. The Mining Registrar will be good enough to furnish me with his explanation in regard to the within complaint.—CHAS. DE BOOS, Warden, B.C., 12/5/81.

## No. 2.

## The Mining Registrar, Temora, to The Under Secretary for Mines.

*Re Powell, allotment finally registered, &c.*

Temora, 14 May, 1881.

Sir,

I have the honor to point out that the main issue in this case, like many others of the same nature, rests upon the action usually pursued, that is, that in accordance with the memorandum of the Warden of the 4th April\*, of which a copy I had already submitted, and of which subsequently a copy<sup>March.</sup> was forwarded to me by the Department, and that, by a verbal understanding between the Warden and myself, Schedule 16 in such cases seemed superfluous; but that as soon as the necessary details are obtained at my office, to which I actually add the address, a summons is issued for the parties originally holding certificates of title "to show cause why such certificate be not cancelled."

Most of the cases lately adjudicated, or to be adjudicated, have been and will be so dealt with, viz. :—Wynne v. Sharp, Gabriel v. Bell, Freeman v. John Watson, Gilmartin v. Mair, John Ryan v. S. Hawkins, &c., &c., &c.

Powell told me when he first came to my office that he was a tenant, and that he wanted to save his landlord. It was pointed out to him that he could do so without disputing the title, as he was in occupation for the owner. He still insisted; I there and then read to him the minute of the Warden, and offered him the necessary information, which he refused to accept, but went to the Warden, returning with some very curious statements. I again pointed out the course laid down for me to pursue, and stated that I could not follow any other, that is, "after details obtained at my office, to ask the Warden's Clerk for summons to show cause." He refused and left.

Powell otherwise could take no more allotments up, since not long ago he applied for one which he sold a few days ago.

It is evident that Powell misrepresented me before the Warden. His representations to me I lent no willing ear to, and I did not believe his assertions.

As to the last portion of the letter, I think it needs no reply, because no sensible man will believe that a gentleman in the position of a Warden will make a "confidante" of an intoxicated bell-man and lay such complaints before such characters. As to the statement itself, it bears a falsehood on the face of it.

The Warden cannot deny that no matter how or when my office was crowded every scrap of paper forwarded to me by the Warden suffered no delay, but always took precedence *before* any other business, and was addressed adequate to the high office addressed to.

I refuse to listen to tittle tattle. I have no time to lose in gossip. My health is such, and the work daily to be performed is of such magnitude, that I feel quite relieved to fulfil my duty without an increase of useless and unprofitable chat and worry.

It is positively asserted, which I sincerely refuse to believe, that the meetings against me, but which turned out such signal failures, were arranged by the Warden; and that the resolutions to be passed were written actually, so it is alleged, by the Warden; but such wild statements are very distressing to me.

I have, &amp;c.,

H. MARGULES, M.R.

Mr. Warden De Boos.—H.W., B.C., 19/5/81.

## No. 3.

## Mr. Warden De Boos, Temora, to The Under Secretary for Mines.

Temora, 23 May, 1881.

Sir,

With regard to the letter of the Mining Registrar of the 14th instant, in reply to the complaint of H. F. Powell, of 5th May<sup>instant</sup>, I have the honor to call your attention to the fact that the Mining Registrar has addressed the Department and not me, as directed by your B.C. of the 10th and by mine of the 12th instant.

This is about the fourth or fifth occasion upon which he has done the same thing.

With regard to the first paragraph of his letter, the Mining Registrar clearly cannot understand English if he cannot better comprehend than he appears to do my order of the 4th March. A copy of that order has been already sent you in connection with other matters. By that order it is clearly stated that where application (Schedule 16) shall have been made, and no objection thereto filed, the Mining Registrar, in the event of certificate of title having been issued to the party abandoning, shall refrain from issuing certificate of conditional registration to applicants until the certificate of title shall be set aside by the Warden's Court.

Under the Mining Board Regulations the application (Schedule 16) is absolutely necessary; but, as the Mining Registrar refuses to issue them, the only way in which I can get over the difficulty is to make applicant declare to me that he has applied to the Mining Registrar for form (Schedule 16), and that he has been refused; then, under Mining Board Regulation 107, title not to be injured by neglect or absence of officer, I have issued the Warden's Court summons.

This is the way in which the cases alluded to in his second paragraph have been dealt with.

The whole of the trouble has arisen from the Mining Registrar's obstinacy in refusing to issue Schedule 16, and next from his wilful or ignorant misinterpretation of my order, whilst his hasty temper and unmeasured language are felt to be insulting to all who come in contact with him.

As to the last paragraph of his letter, he has again gone out of his way to insinuate a charge—a very grave one—against me; and I would now ask you, sir, how long I am to be subjected to these insults before you step in to protect me?

I have, &amp;c.,

CHAS. DE BOOS,

Warden.

The Mining Registrar may be censured for his conduct in insinuating grave charges against the Warden, and for the irregularities in sending to this office direct replies that should be sent through the Warden. Submitted—H.W., 16/6/81. Approved.—E.A.B., 16/6/81.

No. 4.

The Under Secretary for Mines to The Mining Registrar, Temora.

See No. 2.  
See No. 1.

Sir,

Department of Mines, Sydney, 24 June, 1881.

Referring to your letter of the 14th ultimo, upon the matter of the complaint made against you by Mr. H. F. Powell for refusing to furnish him with forms of application for an abandoned tenement, I am directed by the Secretary for Mines to inform you that you are very much to blame for your conduct in insinuating grave charges against the Warden, and for the irregularity of sending to this office direct replies which should be sent through the Warden.

I have, &c.,  
**HARRIE WOOD,**  
Under Secretary.

Complaint of D. Kenny.

SCHEDULE.

NO.	PAGE.
1. Mr. D. Kenny to the Secretary for Mines, applying to be put in possession of allotment 10, section 8, Temora, and forwarding copy of application which he states the Mining Registrar refused to sign; minutes thereon. 4 May, 1881 .....	14
2. The Under Secretary for Mines to Mr. D. Kenny, in reply to above. 31 May, 1881.....	15
3. The Under Secretary for Mines to the Mining Registrar, Temora, with reference to the case. 31 May, 1881.....	15
4. The Mining Registrar, Temora, to the Under Secretary for Mines, in reply to above; minutes thereon. 3 June, 1881	15

No. 1.

Mr. D. Kenny to The Secretary for Mines.

Sir,

Temora, 4 May, 1884.

I have the honor to apply to you to be put in possession of allotment 10 of section 8, De Boos and Victoria Streets, Temora.

The said allotment stands now registered in the name of John Ryan, who is the holder of another allotment in the surveyed township of Lower Temora, and carrying on business as a hotel-keeper on same. Ryan has never resided on the above allotment, and if I get it I intend to improve it and make it my *bona fide* residence.

I also forward you a copy of an application which I presented to the Mining Registrar in the usual way for his signature, but which he refused to sign.

A reply at your earliest convenience will oblige.

Yours, &c.,  
**DANIEL KENNY,**  
Middle Township, Temora.

Mr. Warden De Boos.—H. W., B.C., 11/5/81.

Ryan instituted a suit of trespass against Kenny in the Warden's Court, and as he admitted in his evidence that he had another allotment in the lower town a verdict was given against him, and Kenny was ordered to be conditionally registered and Ryan's certificate of title to be cancelled.—C. DEB., Temora, 16/5/81.

The Mining Registrar, Temora, for explanation.—H. W., B.C., 20/5/81.

As usual, in this case Kenny was directed to have issued summons for Ryan (Schedule 16 being superfluous), and, as the Warden explained, Kenny obtained verdict, and has been conditionally registered for the allotment in question by me.—H. MARGULES, M.R., Temora, 23/5/81.

The Mining Registrar may be informed it is not clear why Kenny should not have been registered as the holder of the residence area after the decision of the Warden's Court. The writer may be informed that the form submitted is not necessary. Submitted.—H. W., 27/5/81. Approved.—E. A. B., 27/5/81.

[Enclosure.]

Mining Board Regulations.—Schedule 16.

(See Regulations 126 and 127.)

*Notice of Application for abandoned Tenement or Share.*

I, THE undersigned, of Temora, do hereby make application to the Mining Registrar of the Baker Division of the Lachlan Mining District to be registered for a share in the abandoned mining tenement numbered allotment 10 of section 8, De Boos and Victoria Streets; the said tenement has been previously held by John Ryan, of Lower Temora, in whose name the tenement now stands on the register in the office of the said Mining Registrar.

Dated at Temora, this 2nd day of May, 1881.

Signature of Applicant.	Miner's Right.	
	No. of	Date of
Daniel Kenny.....	213	1 January, 1881.

*Notice of intention to Register abandoned Tenement or Share.*

Mining Registrar's Office, Temora, 2 May, 1881.

I HEREBY give notice that, in pursuance of the above application, I intend to register Daniel Kenny, of Temora, as the first applicant for the abovenamed tenement, alleged to have been abandoned by John Ryan, of Lower Temora, provided no objection be lodged with me within fourteen clear days from the date of this notice as above.

The allotment has been finally registered.—H.M., 2/5/81.

## No. 2.

The Under Secretary for Mines to Mr. D. Kenny.

Sir,

Department of Mines, Sydney, 31 May, 1881.

In reference to your letter of the 4th instant, enclosing a form (Schedule 16), being notice of application for an abandoned allotment at Temora, I have the honor to inform you that it appears that you have been conditionally registered for the allotment in question, and the form sent by you is not necessary.

I have, &amp;c.,

HARRIE WOOD,

Under Secretary.

## No. 3.

The Under Secretary for Mines to The Mining Registrar, Temora.

Sir,

Department of Mines, Sydney, 31 May, 1881.

With reference to your blank cover communication of the 23rd instant, in explanation of a statement made by Mr. Daniel Kenny that you refused to register for him a certain allotment at Temora, I am directed by the Secretary for Mines to inform you that it is not clear why Mr. Kenny should not have been registered as the holder of the residence area after the decision of the Warden's Court.

I have, &amp;c.,

HARRIE WOOD,

Under Secretary.

## No. 4.

The Mining Registrar, Temora, to The Under Secretary for Mines.

Sir,

Temora, 3 June, 1881.

On the subject of registration of Daniel Kenny, mentioned in your note of the 31st ultimo, No. 81-3,709, only to hand to-day, I have the honor to point out that there exists some mistake, and that the meaning of my blank cover statement was to the effect that Kenny could not be registered when his complaint was lodged, but when his letter reached my office he had obtained an order from the Warden's Court, which was pointed out by the Warden on the said blank cover, and had already been so registered on the 13th ultimo.

I have, &amp;c.,

H. MARGULES, M.R.

As Kenny has now been registered this case may be deemed to be settled. Submitted.—H.W., B.C. 13/6/81. Approved.—E.A.B., 14/6/81.

## Complaint of Messrs. T. E. Summersgill and party.

## SCHEDULE.

No.	PAGE.
1. Messrs. T. E. Summersgill and party to the Secretary for Mines, complaining that the Mining Registrar, Temora, would not take their application for a portion of ground held in excess by Messrs. Read, Webster, and party, Possum Power; minutes thereon. 8 August, 1881 .....	15
2. The Under Secretary for Mines to Messrs. T. E. Summersgill and party, in reply to the above. 16 August, 1881...	16

## No. 1.

Messrs. T. E. Summersgill and party to The Secretary for Mines.

Sir,

Upper Temora, 8 August, 1881.

I and five others applied to the Mining Registrar for a portion of ground held in excess by Messrs. Read, Webster, and party, Possum Power. The Mining Registrar would not take our application. I enclose one of the forms. I spoke to the Warden, and he advised me to write you on the matter.

Yours, &amp;c.,

T. E. SUMMERSGILL AND PARTY.

Forward to Mr. Warden De Boos, and call the attention of the writer to Regulation 103 of the Mining Board Regulations.—G.E.H. (p. U.S.), 11/8/81. Mr. Warden De Boos.—H.W., B.C., 15/8/81. This paper being apparently a record of Department of Mines is returned accordingly.—J.B., 3/9/83.

[Enclosure.]

[Enclosure.]

## Mining Board Regulations.—Schedule 16.

(See Regulations 126 and 127.)

## Notice of Application for abandoned Tenement or Share.

I (or we) the undersigned, of Temora, do hereby make application to the Mining Registrar of the Baker Division of the Lachlan Mining District to be registered for a Mining Tenement numbered , and situated Possum Power, for ground held in excess; the said share (or tenement) has been previously held by Messrs. G. Read, W. Webster, and party, in whose name the said share (or tenement) now stands on the Register in the office of the said Mining Registrar.

Dated at Temora, this 6th day of August, 1881.

Signature of Applicant.	Miner's Right.	
	No. of.	Date of.
James V. Graham .....	2,122	2 April, 1881.

## No. 2.

The Under Secretary for Mines to Messrs. T. E. Summersgill and party.

Gentlemen,

Department of Mines, Sydney, 16 August, 1881.

Referring to your letter of the 8th instant, to the effect that the Mining Registrar at Temora refused to receive your application for a portion of ground held in excess by Messrs. Read, Webster, and party, I have the honor to inform you that you can take possession of the ground held in excess, if such possession be undisputed, without applying to the Mining Registrar; but if it be disputed, you should then apply to the Warden to inquire into it.

I have, &amp;c.,

HARRIE WOOD,

Under Secretary.

## Complaint of J. P. Irwin.

## SCHEDULE.

NO.		PAGE.
1.	Mr. J. P. Irwin to the Secretary for Mines, complaining that the Mining Registrar, Temora, has refused to register him for a dam site. (Minutes thereon.) 28 May, 1881 .....	16
2.	The Under Secretary for Mines to Mr. J. P. Irwin, in reply to above. 29 June, 1881 .....	17
3.	Mr. J. P. Irwin to the Secretary for Mines, asking for farther investigation into the case. (Minute thereon.) 5 July, 1881 .....	17
4.	The Under Secretary for Mines to Mr. J. P. Irwin, acknowledging receipt of above, and informing him that the matter has been referred to Mr. Warden De Boos for report. 13 July, 1881 .....	17
5.	Mr. J. P. Irwin to the Secretary for Mines, further <i>re</i> dam site. (Minutes thereon, and evidence taken before the Warden's Court.) 5 August, 1881 .....	17
6.	Mr. Warden De Boos to the Mining Registrar, Temora, instructing him to forthwith issue certificate of conditional registration to J. P. Irwin for dam site. 15 August, 1881 .....	18
7.	The Mining Registrar, Temora, to the Under Secretary for Mines, asking under which of the Regulations he is to issue the certificate. (Minutes thereon) 17 August, 1881 .....	18

## No. 1.

Mr. J. P. Irwin to The Secretary for Mines.

Sir,

Temora, 28 May, 1881.

Having applied for a site for a dam on this gold-field, distant one quarter of a mile, and above Deutscher's dam and crushing machine, after going through the form required by the Mining Regulations, I am refused registration by Mining Registrar, no objections having been laid.

I trust you will do me the kindness to have the matter investigated.

I have, &amp;c.,

J. P. IRWIN.

The Mining Registrar may be asked to explain the grounds upon which he has refused to register the writer for the dam site applied for. Submitted.—H. W., 13/6/81. Approved.—E.A.B., 14/6/81. The Mining Registrar, Temora.—G.E.H. (*p.* U.S.), B.C., 20/6/81.

The complainant's application discloses that his area encroaches upon the Amelia Company's water-right; and, in accordance with Mining Board Regulation 68, I had to refuse registration. I would have been compelled to refuse otherwise, three objections having been lodged.—H. MARGULES, M.R., Temora, 23/6/81.

The writer may be informed of the grounds of refusal.—H. W., 28/6/81.

17

No. 2.

The Under Secretary for Mines to Mr. J. P. Irwin.

Sir,

Department of Mines, Sydney, 29 June, 1881.

Referring to your letter of the 28th ultimo, to the effect that the Mining Registrar at Temora <sup>See No. 1.</sup> refused to register for you a dam site above Deutscher's dam, I have the honor to inform you that it appears registration was refused as the area applied for encroaches upon the Amelia Company's water-right; moreover, it is stated that objections were lodged to the registration.

I have, &amp;c.,

HARRIE WOOD,

Under Secretary.

No. 3.

Mr. J. P. Irwin to The Secretary for Mines.

Sir,

Temora, 5 July, 1881.

Having just received your communication of the 29th ultimo, I respectfully wish you to see <sup>See No. 2.</sup> that further investigation is made into cause why the Mining Registrar refuses to register the dam site applied for by me, no objections, as I stated before, being laid by Amelia Company or any one else. The Amelia Company's dam is situated very nearly 1 mile away, and higher up the watershed, and therefore mine cannot interfere with their water-right.

I remain, &amp;c.,

JAMES P. IRWIN.

Forward to the Warden for inquiry, and inform.—H.W., 13/7/81. Mr. Warden De Boos.—  
G.E.H. (p. U.S.), B.C., 13/7/81.

No. 4.

The Under Secretary for Mines to Mr. J. P. Irwin.

*Subject*:—Refusal of Mining Registrar to register dam site applied for by you.

Sir,

Department of Mines, Sydney, 13 July, 1881.

I have the honor to acknowledge receipt of your letter of the 5th instant, and to inform you <sup>See No. 3.</sup> that the matter has been referred to Mr. Warden De Boos for report, upon receipt of which a further communication will be made to you.

I have, &amp;c.,

GERARD E. HERRING,

(For the Under Secretary for Mines).

No. 5.

Mr. J. P. Irwin to The Secretary for Mines.

Sir,

Temora, 5 August, 1881.

I am sorry to have to refer to you again concerning that all-important subject (at least to myself), viz., the registration of dam site on this gold-field. Yours of the 13th ultimo states the matter has been referred to Mr. Warden De Boos for report.

Now I have lost three months, which would have been sufficient time to have completed the dam, and the conservation of water being of the utmost importance to the mining population and general progress of the place, I consider I feel justified in pressing the matter to an early settlement, &c

I am, &amp;c.,

J. P. IRWIN.

The evidence (attached) taken in this case appears to show that the site applied for does not encroach upon the Amelia Company's water-right. If there be any encroachment or alleged encroachment, the Warden is the proper person to decide the question, and, unless the Mining Registrar be restrained, there does not appear to be any sufficient grounds for his refusing to register the applicant. The Warden may be asked to instruct the Mining Registrar in accordance with the rights of the parties. Submitted.—H.W., 8/8/81. Approved.—E.A.B., 9/8/81. Mr. Warden De Boos.—G.E.H. (p. U.S.), B.C., 10/8/81.

Extract from evidence taken before the Warden's Court, Temora, on 14 July, 1881.

*James P. Irwin examined*: I applied for a dam area on 19th May; I put up pegs and notices; there were no objections, and I went for registration to Mr. Margules; he said I could not get it as I was encroaching on Deutscher's water-right; he has continued to refuse ever since.

JAMES P. IRWIN.

*Mr. Margules examined*: In my B.C. of 23rd June is the explanation I give now; I consider that a storm or water-shed right will include a dam, because it would interfere with water-shed races of the other owner; I was informed that races were in existence in connection with the machine water-right; storm water-races had been applied for by the water company; I refused him registration, although I had received no objections; three objections were lodged afterwards.

H. MARGULES, M.R.

*James P. Irwin re-examined*: I found on measurement the place I wanted the dam was quite a quarter of a mile from the machine dam.

JAMES P. IRWIN.

No. 6.

## No. 6.

Mr. Warden De Boos to The Mining Registrar, Temora.

Sir,

Temora, 15 August, 1881.

I have been asked by the Under Secretary for Mines to instruct you forthwith to issue a certificate of conditional registration to J. P. Irwin for a dam site, situate one quarter of a mile above Deutscher's dam and crushing machine, there being no sufficient grounds to justify you in refusing to register the applicant.

I have, &amp;c.,

CHAS. DE BOOS,

## No. 7.

The Mining Registrar, Temora, to The Under Secretary for Mines.

Sir,

Temora, 17 August, 1881.

Having received the following letter, under date of the 15th instant, from the Warden, viz. :—  
"I have been requested by the Honorable the Minister for Mines to instruct you forthwith to issue certificate of conditional registration to J. P. Irwin for a dam site, situate one quarter of a mile above Deutscher's dam and crushing machine, there being no sufficient grounds to justify you in refusing to register the applicant," I have the honor to request that I might be informed under which of the Regulations I should issue such certificate (Schedule 21) for that class of tenement.

Tenements under the 7th Division of the Regulations require no survey, but time for objections, and the certificate must be (Regulation 135) in the form of Schedule 6, and not 21.

I have also the honor most respectfully to point out that the issue of such certificate to Irwin will do away with all protection to storn water-rights under the 68th Regulation.

I shall issue certificate to Irwin as soon as I am instructed which kind I have to issue; Regulation 135 points to Schedule 6 only.

I have, &amp;c.,

H. MARGULES, M.R.

As regards protection to existing rights the papers (which are with the Warden) I think show that there is no breach by Irwin of Regulation No. 68. Regulation 74 provides for registration if no objections be lodged within the prescribed time, and I think the papers disclose the fact that no objection to the dam has been lodged. No survey is necessary, and in such cases Regulation 135 provides that a certificate of title (Schedule 6) should be issued. The Mining Registrar may be so informed, but as the papers are with the Warden this information may be sent to the Mining Registrar through him.

Submitted.—H.W., 22/8/81. Approved.—F.B.S., 25/8/81. Mr. Warden De Boos.—G.E.H. (p. U.S.), B.C., 26/8/81.

Presumably this matter has been settled; I have heard nothing about it, and therefore return the papers.—JAMES BAKER, Warden, 3/9/83.

## Complaint of the Mining Registrar, Temora.

NO.	PAGE.
1. The Mining Registrar, Temora, to the Under Secretary for Mines, complaining of decisions of the Warden's Court, &c. (Minutes thereon.) 28 May, 1881 .....	18
2. Minute of Mr. Warden De Boos, with reference to above. (Minute thereon.) 14 June, 1881 .....	19
3. The Under Secretary for Mines to the Mining Registrar, Temora, in reply to No. 1. 22 June, 1881 .....	20
4. The Under Secretary for Mines to Mr. Warden De Boos, in reply to No. 2. 22 June, 1881 .....	20

## No. 1.

The Mining Registrar, Temora, to The Under Secretary for Mines.

Sir,

Temora, 28 May, 1881.

I have the honor to draw your attention, as I am in duty bound to do, to the uncertain state of things here. Temora, the peaceful and prosperous of three months ago, seemed to have disappeared totally, and in its place we have now a Temora the litigious and unreliable.

Town property scarcely commands a price or obtains a buyer. The late decisions at Warden's Court, that the original improver may be dispossessed, though having complied with clause of M.B.R. 87 and section 22 of M.A. of 1874, had found its full effect.

As to mining property, the same cause operates to make it even more insecure. A copy of a decision—of a very anomalous and retrospective nature—will more clearly explain than all that may be said in words.

People try to get rid of these unsafe holdings at great losses, but capitalists fight shy, and my books will show to what minimum number transactions have decreased here of late.

The copy of a verdict that I have the honor to enclose herewith establishes partnership (dividing mateship), at the same time annuls the operations of same during its existence, thus decrees that what was legally done by one partner in obtaining a share, otherwise forfeited, and the transfer of a half of said share, shall be set aside.

Yesterday dams and water-rights came in for their share of unsafe existence. The Court set aside the certificate of title given by me under Schedule 6 and M.B.R. 135, having been applied for under

Schedule

Cases,  
Wynne v. Sharpe,  
Darcy v. Cronker,  
Peterson v. Hills,  
&c.

Cases,  
Hannan v.  
Prendergast, &c.

Slaven v. Coal.

Schedule 22, on the ground that a conditional registration (Schedule 21) has not been issued and the survey fee not paid. I need hardly say that Division VII of M.B.R. provides for no survey, and the 135th clause of said Regulations demands the issue of certificate of Schedule 6, which has actually been fully complied with; nor need I state that such a certificate, when issued, when time for objections has been given and expired, cures all defects that may have been previously existing, that is, as to pegging, &c.

Some time ago prospecting areas were annulled, though no other obstacle existed but old workings; *Smith v. Parker*, no gold-producing tenement within 10 miles of a radius could be found.

I have, &c.,

H. MARGULES, M.R.

N.B.—In Hannan's case action was taken before Mr. Warden Sharpe and dismissed; Prendergast transferred half share to O'Neil, in December last; O'Neil transferred to others, who are now out of Court and possession.—H.M.

Mr. Warden De Boos.—H.W., B.C., 13/6/81.

[Enclosure.]

Patrick Hannan *versus* Robert Prendergast.

THE Warden's Court, consisting of the Warden alone, found that complainant and defendant are dividing mates, and as such entitled to one-sixth of the claim (known as Bourke's quartz claim Upper Tomora), that being joint owners, defendant was not entitled to proceed to declare complainant's share abandoned without giving him notice; and the said Court orders that the conditional registration of defendant as the owner of complainant's abandoned share be cancelled, that Hannan's name be maintained as the owner of the share, and that Hannan transfer to Prendergast half of his said one-sixth share within seven days.

CHAS. DE BOOS,

Warden, 10/3/81.

Certified Court copy.—R. ZOUCH, Warden's Clerk, 15/3/81.

## No. 2.

### Minute of Mr. Warden De Boos to The Under Secretary for Mines.

Sydney, 14 June, 1881.

WITH reference to your B.C. on the appended letter from Mr. Margules, I must protest against being called upon to explain and justify my decisions whenever it may suit the Mining Registrar to differ with me. Out of respect to your B.C., however, I beg to offer a few remarks on the cases named, though I confess to some difficulty in comprehending the letter. See No. 1.

*Wynne v. Sharpe*.—In this case Sharpe had no defence to make, withdrew from the case, and allowed complainant to take the allotment. It was one of several held by Sharpe.

*Darcy v. Croaker*.—If I remember rightly this was one of Mr. Hawkins' allotments, on which he admitted in the box there had been no residence.

*Peterson v. Hills*.—This was one of about a dozen allotments held by the Hills and Able family. There had been no residence by defendant, who resides in Young. Besides this, he was without miner rights or business licenses for three months. Complainant issued a Supreme Court summons against defendants for trespass, but it has not been proceeded with.

*Hannan v. Prendergast*.—Defendant was dividing mates with complainant, and during the latter's absence to raise money to carry on with obtained a declaration of abandonment of complainant's share, though he himself was representing it. Warden Sharpe never decided this case. Hannan subpoenaed a witness residing at Junee, who did not appear, and in his absence Warden Sharpe ordered non-suit. But a very serious charge against Margules is involved in this case. It came out before the Warden's Court that Margules had transferred half of Hannan's share to Oliver, solicitor, and Hannan deposed that such transfer was without his knowledge or consent.

*Slaven v. Cook*.—In this case again the Mining Registrar opens up a matter embodying a serious charge against himself, viz., that of issuing a certificate of title for an unsurveyed mining tenement. Regulation 152 provides that "upon receipt of plan and description" entry shall be made in the Surveyed Mining Tenement Register, and only then shall a certificate of title issue. Cook applied for a site as a sludge dam; everything was done properly until the Mining Registrar issued a certificate of title (Schedule 6) instead of a certificate of conditional registration (Schedule 21). In pursuance of Regulation 74, when the certificate of title was produced in Court, I asked Cook if he had had the ground surveyed. He said he did not know whether he had paid the survey fee or not, and sent round to the Mining Registrar to inquire. Finding that no survey had been made, I held that the certificate of title was invalid, as it could only be issued in terms of Regulation 152. No conditional registration being produced, I went into the whole question and found that the area had been improperly taken possession of.

*Smith v. Parker*.—I don't know of any such case, but am quite certain that I never annulled any prospecting area at any time.

May I express a hope that this will be the last time that I shall be called upon to explain cases I have dealt with, until the person complaining shows that he understands the case, or at all events that he has made diligent efforts to do so.

CHAS. DE BOOS,

Warden.

Mr. Warden De Boos may be informed that the paper was sent to him in order that he might, if he thought fit, reply, but he was under no obligation to do so. The Mining Registrar may be informed that it is no part of his duty to review or comment upon the decisions of the Warden's Court, as a remedy is provided for such parties to suits as are dissatisfied with the decisions. Submitted.—H.W., 16/6/81.

Approved.—E.A.B., 16/6/81.

## No. 3.

The Under Secretary for Mines to The Mining Registrar, Temora.

See No. 1.

Sir,

Department of Mines, Sydney, 22 June, 1881.

Referring to your letter of the 28th ultimo, in which you invite attention to the decisions in the case of *Wynne v. Sharpe*, and other cases heard before the Warden, at Temora, I am directed by the Secretary for Mines to inform you that it is no part of your duty to review or comment upon the decisions of the Warden's Court, as a remedy is provided for such parties as are dissatisfied with the decisions.

I have, &amp;c.,

HARRIE WOOD,

Under Secretary.

## No. 4.

The Under Secretary for Mines to Mr. Warden De Boos.

See No. 2.  
*Wynne v. Sharpe*,  
&c

Sir,

Department of Mines, Sydney, 22 June, 1881.

Referring to your letter of the 14th instant, respecting the paper No. 81-4,460, being a letter from the Mining Registrar, Temora, to this office, as to certain cases in which you have given decisions, as Warden, I am directed by the Secretary for Mines to inform you that the paper was sent to you in order that you might, if you thought fit, reply thereto, but that you were under no obligation to do so.

I have, &amp;c.,

HARRIE WOOD,

Under Secretary.

## Complaint of the Mining Registrar, Temora.

### SCHEDULE.

NO.		PAGE.
1.	The Mining Registrar, Temora, to the Under Secretary for Mines, drawing attention to the utterances of Mr. Warden De Boos against him. (Minutes thereon.) 20 August, 1881 .....	20
2.	The Under Secretary for Mines to Mr. H. Margules, in reply to above. 6 September, 1881 .....	21
3.	Mr. H. Margules to the Under Secretary for Mines, further respecting his complaint. (Minutes thereon.) 8 September, 1881 .....	21

## No. 1.

The Mining Registrar, Temora, to The Under Secretary for Mines.

Sir,

Temora, 20 August, 1881.

I have the honor to draw your attention to the utterances of Mr. Warden De Boos against me:—

On Wednesday, 17 August.—Small Debts Court.

*J. Meagher & Co. v. M'Veigh.*

"If Mr. Margules registered the lien you should summon him for misleading you and make him pay all verdicts."

The manager of the above firm of Meagher & Co. came from Court and repeated the words to me, in the presence of the public, in front of my office.

On Thursday, 18 August.—Warden's Court.

*Appleton v. M'Carty.*

"Well, why don't you summon Mr. Margules; you ought to do so."

I was accused of taking money under false pretence because I did not at once answer to a subpoena. I was subpoenaed only that day to produce all papers connected with the case; besides it has always been a practice, and was courtesy used towards me, to send for me whenever I was wanted, the Court knowing that my time was devoted to the public, but on that day I was not only not sent for but actually charged with fraud, and Mr. De Boos pointedly admitting it and encouraging the accusation.

The two statements are too serious to be passed over, as they deeply affect my honor, character, my very life and existence, my liberty; and I am thus compelled to ask most humbly—nay, insist—that an inquiry be instituted upon the conduct of Mr. Warden De Boos towards me.

Already P. Hannan has summoned me into the next District Court at Cootamundra for £200.

I have suffered for months silently, but I cannot bear any longer, especially when everything dear to a man of honor is ruthlessly attacked.

I have given no provocation, but the first initiation was taken by Mr. Warden De Boos when I was on leave of absence in March last, and when he actually promised to assist the gentleman I left in charge of my office.

I have also the honor to enclose under separate cover the local paper where the above cases are summarized.

I have, &amp;c.,

H. MARGULES, M.R.

As this is a complaint against the Warden the papers may be referred to that officer for report. Submitted.—H. W., 22/8/81. Approved.—F.B.S., 23/8/81. Mr. Warden De Boos.—G.E.H. (p. U.S.) B.C., 23/8/81. With

With regard to the first case, *Meagher v. M'Veigh*, it was an interpleader suit in the Small Debts Court, in which Meagher claimed a house of one Halpin, seized under execution by defendants; Meagher claimed under a bill of sale given by Halpin. Two other magistrates were on the Bench with me, and we held, under the Small Debts Act, that as the bill of sale had not been registered with the Registrar of the Small Debts Court it would not protect the property from execution. Mr. Mangan, manager for Meagher, produced a registration of the lien with the Mining Registrar. The Bench held it was not sufficient. Mangan asserted that the Mining Registrar had assured him that it was as good a protection as if registered with the Registrar-General. I said I could not help what the Mining Registrar had told him, and that the Bench could not hold such a registration as within the meaning of the Act. I further explained the objects of the one registration and the other. Mr. Mangan answered that it was very hard that he should have to suffer from the misrepresentations of the Mining Registrar. I then said, "If you have been damaged by any act of the Mining Registrar you have your remedy against him." These are the exact words I used, and are no more than what any other magistrate would have used under similar circumstances. I don't suppose for a moment that you would hold me responsible for what the newspapers may report, or that you would imagine I could say anything so stupid as that imputed to me in the passage marked. As to the second case, *Appleton v. M'Carty*, heard in the Warden's Court, Appleton complained that he had subpoenaed the Mining Registrar, had paid his fee, 10s. 6d., and that he had not appeared. The difficulty was got over by the attorney on the other side admitting certain copies. At the close of the case the solicitor in claiming costs put in a claim for 10s. 6d. for the Mining Registrar's fee. Appleton objected, as he also had paid a fee to the Mining Registrar. A third party also made a similar statement. I declined to allow a fee where the witness did not attend. Mr. Kearney asked, "What is my client to do for the 10s. 6d. paid the Mining Registrar?" I answered briefly, "Sue him in the Small Debts Court first." These are the circumstances of the cases, and I do not think that in either the Mining Registrar has ground of complaint against me.—CHAS. DE BOOS, Warden, Temora, 25/8/81. The Under Secretary for Mines.

As regards the first matter complained of, this Department has no need to interfere, as it occurred in the Small Debts Court. As regards the other, the explanation appears to be satisfactory. The Mining Registrar must know that when he has been served with a subpoena and paid his fee he is bound to attend the Court. He may be so informed. Submitted.—H.W., 29/8/81. Approved.—F.B.S., 31/8/81. Mr. Warden De Boos.—H.W., B.C., 5/9/81. Seen and returned.—C.DEB., Temora, 19/11/81. The Under Secretary for Mines.

---

## No. 2.

### The Under Secretary for Mines to Mr. H. Margules.

Sir,

Department of Mines, Sydney, 6 September, 1881.

Referring to your letter of the 20th ultimo, respecting your neglect as Mining Registrar at Temora, in the matter of a subpoena in the case of *Appleton v. M'Carty*, in the Warden's Court, on the 18th ultimo, I am directed to inform you that it is thought you must be aware that when you had been served with a subpoena and paid your fee you were bound to attend the Court.

I have, &c.,  
**HARRIE WOOD,**  
 Under Secretary.

---

## No. 3.

### Mr. H. Margules to The Under Secretary for Mines.

Sir,

Sydney, 8 September, 1881.

In reply to your letter of the 6th instant, I have the honor to express surprise that the contents of my letter of the 20th ultimo have been ignored and I charged with neglect for not attending Court. I have thus explained that the custom was to inform me when I was wanted at the particular case before Court, the Mining Registrar having no time to wait for a case, and if there was any neglect the fault laid with the Warden's Court.

But the question raised by me in my above-mentioned letter was not the neglect, but a respectful prayer for inquiry into the demeanour and utterances of Mr. Warden De Boos on the Bench, as Magistrate and Warden, against me. The matter is too serious, having already lost £30 in expenses in Hannan's case. Hannan, of course, has no money or property to come upon.

I have, &c.,  
**H. MARGULES.**

The custom referred to could not relieve a witness on whom a subpoena has been served and the fee paid from attending the Court. If a Mining Registrar is so fully occupied that he is not able to wait in Court till the case in which he is required to give evidence is called on he should employ some reliable person to wait in Court and give him notice when his attendance is required. Mr. Margules appears to have received a fee for attending Court and did not attend; if that be so, he has no right to complain of the remarks made by the Warden. Submitted.—H.W., 13/9/81. Read.—F.B.S., 16/9/81.

Bring forward when Mr. Margules' case is decided.—F.B.S., 20/9/81. No further action need be taken now. Submitted.—H.W., 29/10/81. Approved.—A.R., 29/10/81.

## Complaint of James Boyd.

## SCHEDULE.

NO.	PAGE.
1. Mr. James Boyd to the Secretary for Mines, asking what course he is to adopt, as the Mining Registrar, Temora, refuses to register him for allotment 5, section 7, Temora. (Minutes thereon.) 16 May, 1881 .....	22
2. The same to the same, with further reference to the above. (Minute thereon.) 4 July, 1881.....	22
3. The Under Secretary for Mines to Mr. James Boyd, in reply to No. 1. 6 July, 1881.....	23
4. The same to the same, further reply. 13 July, 1881 .....	23
5. Mr. James Boyd to Mr. D. Buchanan, M.P. (presented by him), asking for the production of correspondence in the case, &c. (Minute thereon.) 22 August, 1881.....	23
6. The Under Secretary for Mines to Mr. D. Buchanan, M.P., in reply to above. 2 September, 1881.....	23
7. Mr. James Boyd to Mr. D. Buchanan, M.P. (and presented by him), stating that up to 27th August Mr. Margules had not been suspended, and forwarding form signed by him as proof thereof. (Minutes thereon.) 3 September, 1881 .....	23

## No. 1.

## Mr. James Boyd to The Secretary for Mines.

Sir,

Temora, 16 May, 1881.

Papers missing; Referring to your letter of the 27th ultimo, informing me that my complaint that Mr. Margules refused to register me as the holder of allotment No. 5 of section 7, in De Boos-street, Temora, should receive immediate attention, I have the honor to request that you will be kind enough to acquaint me as to what course I am to adopt, as I am eager to proceed with the erection of a substantial dwelling thereon, and the delay which is caused by my having to wait for a definite answer in the matter in question is causing me to suffer considerable loss in not being able to take delivery of the materials I have purchased for the work. I may add that I again to-day repeated my request to the Registrar to register me as the holder of the allotment, and he still refuses to do so, and also declines to disclose the name of the person he alleges has taken out a final registration of the allotment, even on payment for such information.

I have, &amp;c.,

JAMES BOYD.

Mr. Warden De Boos, in connection with former papers.—H.W., B.C., 26/5/81. The Mining Registrar, for explanation, and to be returned to me.—C. DE B., Warden, B.C., Temora, 28/5/81.

Boyd never obtained an order of the Warden's Court, at least he never presented to me such document; hence I could not register him. He ought to have obtained the information at my office first, as usual in these cases.—H. MARGULES, M.R., Temora, 30/5/81.

Mr. Warden De Boos.—H.W., B.C., 31/5/81.

The Mining Registrar has failed to answer Boyd's complaints that he declined to disclose the name of the person who took out certificate of title. I must again call attention to the fact that the Mining Registrar has forwarded his reply to the Department, and not to me, as requested.—CHAS. DE BOOS, Warden, B.C., Temora, 2/6/81.

As Mr. Boyd appears to desire to take proceedings against the registered owner of the tenement referred to, the Mining Registrar should allow him to search the register, or should supply the information on payment by Boyd of the prescribed fee. Submitted.—H.W., 13/6/81. Approved.—E.A.B., 14/6/81. The Mining Registrar, Temora.—G.E.H. (p. U.S.), B.C., 20/6/81.

I have never refused information; on the contrary, my hardest and most distressing work is to dispense information. Boyd may inspect the books, and any extracts wanted I shall make, as I usually do, without delay.—H. MARGULES, M.R., Temora, 23/6/81.

The purport of the reply may be conveyed to Mr. Boyd. Submitted.—H.W., 28/6/81. Approved.—E.A.B., 30/6/81.

## No. 2.

## Mr. James Boyd to The Secretary for Mines.

Sir,

Temora, 4 July, 1881.

I have in every respect complied with the conditions of the Mining Act with respect to my occupation of allotment 5 of section 7, in De Boos-street, Temora. I have applied to the Mining Registrar of this gold-field to be registered as the holder of the same in conformity with the Mining Regulations. I was ignominiously treated and insulted by the Mining Registrar in desiring registration of the allotment referred to. I have pointed out and complained of the conduct of the Mining Registrar in consequence thereof to you, and although I have written two letters in reference thereto, dated respectively 26th April and 14th May, I have received no satisfaction or reply from you, save the stereotyped intimation that my complaint should receive immediate attention. I must now therefore respectfully request that you will be good enough to favour me with a reply to the letters I have written.

I have, &amp;c.,

JAMES BOYD.

The letter of the 6th instant was of course not sent when this letter was written. He may be informed that the delay in replying was caused by having to refer to the local officers. If the letter of the 26th April is with the Warden these papers may be forwarded in connection with them.—H.W., 7/7/81.

## No. 3.

23

No. 3.

The Under Secretary for Mines to Mr. James Boyd.

Sir,

Department of Mines, Sydney, 6 July, 1881.

With reference to your letter of the 16th May last, complaining that Mr. Margules still refuses to register you as the holder of allotment No. 5 of section 7, in De Boos-street, Temora, and further, that he refuses to disclose the name of the person he alleges has taken out a final registration of the allotment, I have the honor to inform you that Mr. Margules states "he has never refused information, that you may inspect the books, and any extract you may want he will make without delay."

I have, &amp;c.,

HARRIE WOOD,  
Under Secretary.

No. 4.

The Under Secretary for Mines to Mr. James Boyd.

Sir,

Department of Mines, Sydney, 13 July, 1881.

I have the honor to acknowledge the receipt of your letter of the 4th instant, which appears to have crossed the one from this Department of the 6th instant, in reply to your communications of the 26th April and 16th May last, and to inform you that the cause of your not receiving an earlier answer was that they had to be referred to the local officers.

I have, &amp;c.,

HARRIE WOOD,  
Under Secretary.

No. 5.

Mr. James Boyd to Mr. D. Buchanan, M.P.

Sir,

Temora, 22 August, 1881.

Would you be kind enough to ask the Minister for Mines to produce the correspondence relative to the treatment I have received at the hands of the Mining Registrar here, and to state whether he intends to afford any further satisfaction to me in the matter. I have now been eight months in possession of an allotment here, and for some mysterious reason I cannot obtain the registration of it. The way in which persons here have been treated by the Mining Registrar and the Minister for Mines is very disgraceful, as the papers in connection with the various matters brought under the notice of the Minister would show. I have sent a letter to the *Evening News* by this post for publication, referring to the false statements given on Friday in reply to your question concerning the Mining Registrar, Mr. Margules, who has not been suspended from office, although the necessities of the case demanded that course. He is still in full charge, at the time of my writing, of the office and the position of Mining Registrar of the Temora gold-fields.

I am, &amp;c.,

JAMES BOYD.

Inform that Mr. Margules has been suspended, and that Mr. Kropp is at present acting as Mining Registrar.—F.B.S., 31/8/81. Also inform Mr. Buchanan, M.P.—H.W., 31/8/81.

No. 6.

The Under Secretary for Mines to Mr. D. Buchanan, M.P.

Sir,

Department of Mines, Sydney, 2 September, 1881.

Referring to the letter presented by you on behalf of Mr. James Boyd, in which he complains of Mr. Margules' continuing to act as Mining Registrar at Temora, I am directed to inform you that Mr. Margules has been suspended from his official duties, and that Mr. Kropp is at present acting as Mining Registrar at that place.

I have, &amp;c.,

HARRIE WOOD,  
Under Secretary.

No. 7.

Mr. James Boyd to Mr. D. Buchanan, M.P.

Sir,

Temora, 3 September, 1881.

Referring to the repeated assertions of the Minister for Mines re suspension of Mr. Mining Registrar Margules, I enclose for your information in the matter an application duly signed and issued by Mr. Margules on the 27th ultimo—Saturday last. Will the Minister, in the face of this fact, deny that Mr. Margules was not suspended? I also enclose the *Temora Star* of this date, also showing that it is untrue that Mr. Margules was suspended.

Would you be good enough to ask that the papers anent complaints made by me, and having reference to the registration of an allotment of land, be laid on the Table of the House, as I have hitherto been unable to obtain any redress in the matter.

I am, &amp;c.,

JAMES BOYD.

Will Mr. Warden De Boos be good enough to inquire and report why Mr. Margules continued to act after the date of his suspension.—H.W., B.C., 14/9/81.

On 25th August, 1881, I received your telegram asking me if I could make arrangements, if necessary, to relieve Margules. Replied to you same day, suggesting Kropp's name. At 4 p.m., Saturday, 27th August, I received your letter of 26th, informing me that I might instruct Kropp to act for Margules. I went down at once (about half-past 4) and put Kropp in charge. Up to receipt of your

your letter I had no knowledge of Margules' suspension, and the document appended to Boyd's letter must have been signed in the morning of the day in the afternoon of which I put Kropp in charge.—CHAS. DE BOOS, Warden, Temora, 17/9/81. The Under Secretary for Mines.

The purport of the Warden's explanation may be sent to Mr. Boyd. Submitted.—H.W., 28/9/81. Information already furnished will be sufficient.—F.B.S., 3/10/81.

[Enclosure.]

Mining Board Regulations.—Schedule 22. (See Regulation 74.)

Application for Dam or Reservoir.

I, THE undersigned, hereby give notice that it is my intention to construct a dam at about 400 yards west of Duncan and party's puddling machine, near Junee Road, containing a superficial area of about 2 acres; and I intend to apply to the Mining Registrar of the Baker Division of the Lachlan Mining District, seven clear days from this date, to register me as the owner of such dam.

Dated this 27th day of August, 1881, at 12 noon.

Name of Applicant.	Miner's Right.	
	No.	Date.
R. A. Ecclestone .....	1,964	12 March, 1881.

Received into this office this 27th day of August, 1881, at the hour of 11'45 o'clock in the forenoon.

H. MARGULES,  
Mining Registrar for the Baker Division.

## Complaint of the Mining Registrar, Temora.

### SCHEDULE.

NO.	PAGE.
1. The Mining Registrar, Temora, to the Under Secretary for Mines, objecting to the decision of the Court of Requests, Temora, in <i>Davis v. Meagher</i> . (Minutes thereon.) 17 August, 1881 .....	24
2. The Police Magistrate, Temora, to the Under Secretary for Justice, reporting on the above letter. (Minutes thereon.) 29 August, 1881.....	25
3. The Under Secretary for Mines to Mr. H. Margules, in reply to No. 1. 12 September, 1881 .....	25
4. Mr. H. Margules to the Under Secretary for Mines, with further reference to his objection. (Minutes thereon.) 12 September, 1881.....	25
5. The Under Secretary for Mines to Mr. H. Margules, in reply to above. 5 October, 1881 .....	26

### No. 1.

#### The Mining Registrar, Temora, to The Under Secretary for Mines.

Sir, Temora, 17 August, 1881.

To-day at the Court of Requests, presided over by Messrs. C. De Boos and A. Mack, Js.P., a case came on and was decided wherein Davis had summoned Mr. John Meagher, storekeeper, of Bathurst and Temora, for laying claim upon a certain tenement (land and buildings) held by lien duly registered with the Mining Registrar of the Division under Regulation 112, based upon sections 15 and 22 of the Act of 1874, to assign, encumber, and transfer, &c. Mr. De Boos' ruling was to the effect that the document, not being registered with the Prothonotary at Sydney, but with me, was not worth the paper it was written upon, and cannot be received in Court at all; and I, when receiving the document, was misleading the person presenting it and should be summoned for the adverse verdicts incurred, and gave verdict against Meagher and his claim, with costs, and ordered the sale of property forthwith.

Of course, if the decision came from an ordinary Bench, I could have afforded to take no notice, but coming from a Bench where the Warden acted as the leading Magistrate the verdict assumes a different complexion, and I could not ignore it.

I have thousands of pounds of property thus standing in the Lien Register, Schedule 23, and the decision must certainly affect these securities, as well as my position, being made responsible for what appeared safe and unquestionably reliable. No Court ever disputed the mode of procedure, nor the soundness of the law relating to it, the Act of 1874 being the most recent Act bearing upon the subject upon gold-fields.

I must therefore most respectfully request to be instructed how to act in the future.

In the meantime I have, without comment of any kind, explained to the public under which law I have acted hitherto, in order to caution monetary establishments (Banks) and others, and to allow them time to ascertain legal advice upon the subject.

It will fall very hard, should the Mining Laws be defective in this instance, upon the struggling man, who requires simply a few pounds in advance or some store goods to the amount from £2 to £10, and have to pay in expenses £5 5s. instead, as hitherto, 2s. 6d. In fact such law would stop all credit, and this field be ruined without remedy.

I have, &c.,

H. MARGULES, M.R.

Mr.

Mr. Warden De Boos may be asked to report upon this matter, unless it is thought that the matter should be referred to the Department of Justice. Submitted.—H.W., 19/8/81. Perhaps the Minister for Justice will be good enough to refer this letter to the Police Magistrate for report.—F.B.S., 20/8/81. The Under Secretary for Justice.—G.E.H. (p. U.S.), B.C., 22/8/81. The Police Magistrate, Temora, for favour of report.—W. E. PLUNKETT, B.C., 26/8/81.

## No. 2.

## The Police Magistrate, Temora, to The Under Secretary for Justice.

Sir,

Temora, 29 August, 1881.

In reply to your blank cover of the 28th instant on Mr. Margules' letter of the 17th instant, See No. 1. I have the honor to lay before you the facts of the case referred to.

One McVeigh obtained a judgment against Halpin in the Small Debts Court, Temora, and took out execution. Under the usual process, possession was taken of a house of which Halpin was the ostensible holder, and in which he resided. Meagher & Co. claimed the property, and an interpleader summons was heard on the 17th instant. That summons was heard by A. Mack, Esq., J.P., and myself, sitting in Small Debts jurisdiction. Mr. Mangan, manager for Meagher & Co., produced an agreement by way of mortgage from Halpin securing a certain sum on the land and house held by Halpin, and also a certificate of registration under the hand of the Mining Registrar in terms of such agreement. The Bench decided, under section 32 of 10 Victoria No. 10 (Small Debts Act), that this agreement could not bar the rights of the execution creditor: 1st. Because it had not been produced to the bailiff; and 2nd. Because it had not been registered by the Registrar of the nearest Court of Petty Sessions (Temora). They also held that the registration with the Mining Registrar did not cover the "house," whatever may have been its legal effect as regards the "land." Section 15 of 37 Victoria No. 13 (Mining Act) is the only clause that touches the question, and it states, "And the owner of any such portion of land may assign and encumber the same"—subject to such provisions as to registration as may be provided by the Regulations. The only regulation dealing with liens is Mining Board Regulation 112, which declares "All liens upon *mining tenements* shall be registered with the Mining Registrar." The interpretation clause of the Mining Board Regulations defines a "mining tenement" to be "any holding of whatever kind lawfully held and enjoyed under these Regulations." There is no such holding as a "house" provided for by the Regulations. Thus the *land* in the mining tenement, and the building erected thereon, stands in the same category as would a windlass, a whip, a puddling machine, or a hut erected on a claim, all of which can be removed when the claim is abandoned. That this was the intent and meaning of the Act appears evident from the wording of section 22 of the Mining Act of 1874, which states that a business license shall entitle the holder "to put up any building or erection, and at any time to remove the same," showing that even though the person might forfeit his claim to the land (the mining tenement) he might yet remove the building, as it formed no portion of it.

I have, &amp;c.,

CHAS. DE BOOS,

Police Magistrate.

The Under Secretary for Mines, B.C., 2/9/81.—W.A.P. Submitted.—H.W., 8/9/81. It appears to me that the opinion of the Police Magistrate is the correct one.—F.B.S., 8/9/81. Mr. Margules may be informed that the case referred to in his letter having been heard in the Small Debts Court, a report by the Police Magistrate has been obtained through the Department of Justice, and it is thought the opinion of the Police Magistrate is the correct one.—H.W., 9/9/81.

## No 3.

## The Under Secretary for Mines to Mr. H. Margules.

Sir,

Department of Mines, Sydney, 12 September, 1881.

In reference to your letter of the 17th ultimo, respecting the ruling of the Police Magistrate at Temora in the case *Davis v. Meagher*, I have the honor to inform you that such case having been heard in the Small Debts Court, a report by the Police Magistrate has been obtained through the Justice Department, and it is thought the opinion of Mr. De Boos is the correct one. See No. 1.

I have, &amp;c.,

HARRIE WOOD,

Under Secretary.

## No. 4.

## Mr. H. Margules to The Under Secretary for Mines.

Sir,

Sydney, 12 September, 1881.

In reference to your letter of this day on the subject of decision in Small Debts Court at Temora, on matter of "liens," I have the honor to repeat the statement of my letter dated 17th ultimo— that thousands of pounds sterling are depending on the proper interpretation of the clause, besides the future course must entirely depend upon the proper meaning. Legal gentlemen of the highest standing accept the decision of the Small Debts Court as thoroughly and totally opposed to the 15th section of the Mining Act of 1874, while other decisions of the Warden at Temora have been completely overruled at the last Appeal and District Court at Cootamundra. See No. 3. See No. 1.

I therefore most respectfully request a copy of the report of the Warden and Police Magistrate at Temora.

I have, &amp;c.,

H. MARGULES.

The report was made to the Department of Justice, and the writer must obtain the sanction of that Department before a copy of the report can be furnished. It will also be necessary for him to state for what purpose he requires the copy. Submitted.—H.W., 29/9/81. Inform.—F.B.S., 3/10/81.

## No. 5.

## The Under Secretary for Mines to Mr. H. Margules.

Sir,

Department of Mines, Sydney, 5 October, 1881.

See No. 4.

Referring to your letter of the 12th ultimo, in which you ask to be furnished with a copy of the report of the Police Magistrate at Temora upon your statement respecting his decision in the case *Davis v. Meagher*, I am directed by the Secretary for Mines to inform you that the report was made to the Department of Justice, and you must therefore obtain the sanction of that Department before a copy of the document can be furnished, and also state for what purpose you require a copy.

I have, &amp;c.,

HARRIE WOOD,  
Under Secretary.

## Complaint of Antonio Gabriel.

## SCHEDULE.

No.	PAGE.
1. Mr. Antonio Gabriel to the Under Secretary for Mines, stating that he has a complaint against the Mining Registrar, and asking if the Warden can hear it with the other complaints; minutes thereon. 18 July, 1881 .....	26
2. Mr. Warden De Boos to the Under Secretary for Mines, with reference to the above; minute thereon. 30 July, 1881 .....	26
3. Mr. Antonio Gabriel to Mr. D. Buchanan (and presented by him), complaining that the Mining Registrar transferred his allotment to W. Sharp without his consent, &c.; minute thereon. 26 August, 1881 .....	26
4. The Under Secretary for Mines to Mr. Antonio Gabriel, in reply to above. 23 September, 1881 .....	27
5. Memo. of Mr. Acting Mining Registrar Kropp with reference to the transfer of the allotment; minutes thereon. 28 September, 1881.....	27

## No. 1.

## Mr. Antonio Gabriel to The Under Secretary for Mines.

Sir,

Temora, 18 July, 1881.

I have a complaint against the Mining Registrar, Mr. Margules. Will you kindly let the Warden hear it with the others that he is hearing at the present time?

I was away from here when the other complaints were sent down to you or else I should have sent mine; if you will kindly let the Warden hear I will feel obliged.

Yours, &amp;c.,

ANTONIO GABRIEL.

May be referred to the Warden for inquiry, if the inquiry has not already closed. Submitted.—H.W., 21/7/81. Approved.—E.A.B., 22/7/81. Mr. Warden De Boos.—G.E.H. (p. U.S.), B.C., 22/7/81. Received after inquiry closed and report drawn up.—C. DE B., Temora, B.C., 25/7/81. The Under Secretary for Mines. Inform that the inquiry had closed before his complaint reached the Warden.—H.W., 26/7/81.

## No. 2.

## Mr. Warden De Boos to The Under Secretary for Mines.

MEMO.—The complaint of Antonio Gabriel against Mining Registrar referred to me, but returned on 25th instant, as inquiry closed. Gabriel has been tormenting me about not holding inquiry. He makes a serious charge against the Mining Registrar of transferring a valuable allotment which stood in Gabriel's name to William Sharp, without Gabriel's knowledge or consent. He says he can prove that the Mining Registrar transferred several allotments in the same way to Sharp. I thought it right to let you know this, as Gabriel is very pertinacious.

Temora, B.C., 30/7/81.

C. DE B.

If any further inquiry be necessary this complaint may be included. Submitted.—H.W., 18/8/81. Approved.—F.B.S., 20/8/81.

## No. 3.

## Mr. Antonio Gabriel to Mr. D. Buchanan, M.P.

Sir,

Temora, 26 August, 1881.

In last August I paid Mining Registrar Margules £1 8s. 6d. for registering and surveying an allotment, No. 2, section 20. Within twenty days afterwards he gave William Sharp a certificate of title of the said allotment without my consent, Sharp afterwards transferring the allotment to a dummy named Dobbyn, the Mining Registrar acting as agent for Dobbyn, which was proved. W. Sharp has now applied to purchase the said allotment.

The Warden has written to the Under Secretary for Mines, but has got no information respecting it, and the Under Secretary for Mines is taking the settling of all the allotments on Temora out of the Warden's hands, so as to allow the people in Young who have had several allotments on Temora under dummyism.

Would you kindly bring before the House notice "That before the sale of any allotments on Temora takes place a list be forwarded to the Warden to report thereon, to stop all dummyism."

There has been nothing but dummyism ever since Mining Registrar Margules has held the office of Mining Registrar at Temora. By so doing you will oblige,—

Yours, &amp;c.,

ANTONIO GABRIEL.

P.S.—I am not a good scholar, but I have done my best.

The

The writer may be informed that his complaint was received after the other complaints against Mr. Margules had been inquired into, and that it is thought it would not be proper to investigate this complaint while Mr. Margules is under suspension. Mr. Warden De Boos may be asked to inquire into and report upon the allegations respecting the transfer to Mr. Sharp and the application by Mr. Sharp to purchase, in order that, if proper so to do, the Lands Department may be asked not to deal with Mr. Sharp's application to purchase until the question of title has been settled. Submitted.—H.W., 14/9/81. Approved.—F.B.S., 22/9/81. Mr. Warden De Boos.—H.W., B.C., 24/9/81.

## No. 4.

## The Under Secretary for Mines to Mr. Antonio Gabriel.

Sir,

Department of Mines, Sydney, 23 September, 1881.

Referring to your letter of the 26th ultimo (presented to this office by Mr. D. Buchanan, <sup>See No. 3.</sup> M.P.), in which you make certain charges against Mr. Henry Margules, I am directed by the Secretary for Mines to inform you that your complaint was received after the other complaints against Mr. Margules had been inquired into, and it is thought it would not be proper to investigate this complaint while Mr. Margules is under suspension.

I have, &amp;c.,

HARRIE WOOD,  
Under Secretary.

## No. 5.

## Memo. of Mr. Acting Mining Registrar Kropp.

Allotment 20, section 2, town of Temora.

Temora, 28 September, 1881.

THIS allotment was applied for and conditionally registered on the 5th June, 1880, in the name of Antonio Gabriel, the application (Schedule 3) being signed *Antonio Gabriel, per W. Sharp*.

No transfer of the allotment was registered in this office between that date and the 3rd July, 1880.

The site was applied for again on the 3rd July, 1880, by Wm. Sharp, who was conditionally registered on the same day.

The allotment was entered in the Register of Mining Tenements and certificate of title (No. 3) issued to W. Sharp on the 6th August, 1880.

Transferred from W. Sharp to J. H. Dobbin on the 14th March, 1881.

Transferred again on the 13th July, 1881, from J. H. Dobbin to James Sharp, in whose name it now stands registered.

W. O. KROPP,  
Acting M.R.

The memo. of the Acting Mining Registrar shows that nothing of the kind complained of by Gabriel has ever taken place. Gabriel took up the allotment in the first instance by W. Sharp, that is, W. Sharp took up the allotment in Gabriel's name. On the 3rd July, that is, twenty-eight days after W. Sharp applied for it—not as an abandoned mining tenement, but as an original application—the Mining Registrar improperly giving him registration without previously cancelling the registration of Gabriel. The subsequent dealing with the allotment is shown in the memo. of the Acting Mining Registrar. No transfer from Gabriel to Sharp appears on the books; in fact Sharp's conditional registration speak for itself, and Gabriel is altogether mistaken in this, as in other allegations made in his letter. The only mistake made by the Mining Registrar was the issue of conditional registration and subsequent certificate of title to Sharp without previously having the conditional registration of Gabriel set aside in the mode prescribed by the Regulations.—CHAS DE BOOS, Warden, Temora, B.C., 10/10/81. The Under Secretary for Mines.

Is it true that Gabriel paid for survey and final registration as alleged? If so, was he finally registered? If not, why?—H.W., B.C., 29/10/81. Mr. Warden De Boos.

## Complaint of Patrick Hannan.

## SCHEDULE.

## No. 1.

## Statutory Declaration of Mr. P. Hannan.

I, PATRICK HANNAN, of Temora, do solemnly and sincerely declare that on the hearing of the case Bourke and another *versus* Hannan and others, on Friday last, the third of June, I was astonished to find that one-fourth of my share in Bourke's claim had been transferred to William Oliver, solicitor. As I had never executed any transfer I went, accompanied by a witness, John M'Colland, and asked the Mining Registrar how he had come to transfer the portion of claim in question. Mr. Margules said he had transferred it on a document, and commenced to bounce, so I left. As I never executed any transfer, and never intended to do so, I consider that I have been cheated of my share by the action of the Mining Registrar, and as I cannot afford to incur legal expenses, I have to appeal to the Government for redress against the Mining Registrar. And I make this solemn declaration conscientiously believing the same to be true, and in virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled "An Act for the more effectual abolition of oaths and affirmations taken and made in the various departments of the Government of New South Wales, and to substitute declarations in lieu thereof, and for the suppression of voluntary and extra-judicial oaths and affidavits."

Witness—R. ZOUCH.

Made and signed before me, at Temora, }  
this 6th day of June, 1881,— }  
CHAS. DE BOOS, J.P.

his  
PATRICK x HANNAN.  
mark

The Under Secretary for Mines.—C. DE B., Temora, 6/6/81.

The Mining Registrar may be called upon to state whether he made the transfer referred to, and if so, under what circumstances it was made, by whom the transfer was signed, and if signed by an agent under written authority, to forward the authority for inspection. Submitted, 15/6/81.—H.W. Approved, 16/6/81.—E.A.B. The Mining Registrar, Temora, B.C., 20/6/81.—G.E.H. (p. U.S.)

I have the honor to point out that I did not make transfer, but received, in accordance with M.B.R. 138. Hannan admitted in my presence that he had parted with a quarter of his allotted sixth share in Bourke's quartz claim, known as Bourke's late lease, to Mr. Oliver. Hannan perhaps had better try issue in a competent court.—H. MARGULES, M.R., Temora, 23/6/81.

## No. 2.

## The Mining Registrar, Temora, to The Under Secretary for Mines.

Sir,

Temora, 23 June, 1881.

I have the honor to enclose copy of authority to transfer from Pat. Hannan to William Oliver, in compliance with the margin note, dated 15/6/81, No. 4,695, 8th June, 1881. The original is gummed to the transfer-butt, Schedule 10, forming, when filled up, record books for daily inspections; cannot be easily spared; hence I submit a copy.

In calling to-day I again questioned Mr. Oliver, who is an attorney of the Supreme Court here, and always acted as Hannan's attorney, upon the document; but he reiterated his assurance that the document is genuine, and afterwards handed me in two declarations, which I also enclose.

I have the honor to add that Mr. W. Oliver being an old and practised attorney I could not for a minute question his right to the transfer which he himself effected on the 14th of April last, also a 96th share to I. Deitz. Mr. Oliver also, while I was absent on leave, transferred, on the strength of the said document, the half of his quarter share to Dr. Halket.

I have, &c.,

H. MARGULES.

In view of the declarations herein the matter should be referred to the Warden for inquiry. Submitted.—H.W., 28/6/81. Approved.—E.A.B., 30/6/81. Warden De Boos.—G.E.H. (p. U.S.), B.C., 30/6/81.

[Enclosures.]

I HAVE this day sold and transferred to Mr. Wm. Oliver one one-twenty-fourth share of my one full sixth share in Bourke's quartz claim at Upper Temora, known as Bourke's lease formerly, as now, as Bourke's reef.

Stamped Is.

Witness—WILLIAM FORBES, Clerk to Wm. Oliver, Solicitor, Temora.

Temora, 28 February, 1881.

his  
PAT. x HANNAN.  
mark

Received 14/3/81.—H. MARGULES, M.R.

New South Wales, }  
Temora, to wit. }

I, WILLIAM FORBES, of Temora, in the Colony of New South Wales, writing clerk, do solemnly and sincerely declare as follows:—I was present in the office of William Oliver, of Temora aforesaid, solicitor, on the 28th day of February last, and did see Patrick Hannan set his mark to a document by way of transfer of a share of portion of his interest in Bourke's quartz reef, Temora, to Mr. William Oliver aforesaid. I attested the signature or mark of the said Patrick Hannan to the said transfer. Not only did the said Patrick Hannan proffer the said transfer to the said William Oliver, but, to my own personal knowledge, he has in my hearing stated to Mr. John Joseph Kelly, of this town, what he had done. And I make this solemn declaration conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled, "An Act for the more effectual abolition of oaths and affirmations taken and made in various Departments of the Government of New South Wales to substitute declarations in lieu thereof and for the suppression of voluntary and extra-judicial oaths and affidavits."

Taken and made before me, this 23rd day of June, 1881,—

WILLIAM HAWKINS, J.P.

WILLIAM FORBES.

I, WILLIAM OLIVER, of Temora, in the Colony of New South Wales, solicitor, do solemnly and sincerely declare that I well recollect one Patrick Hannan proffering to me and affixing his mark to a transfer of a quarter of his one-half share in the Bourke's quartz reef, at Temora, on or about, I believe, the 28th day of February last, for work then and to be done by me as an attorney. I further declare that the said Patrick Hannan has, as I am informed and believe, stated to Messrs. Morris, Kelly, Bourke, and many others what he had done; and further, that before the Warden's Court I informed his Worship the Warden in open Court what he had done, and he said Patrick Hannan never for a moment questioned the *bonâ fides* of the said transfer. And I make this solemn declaration conscientiously believing the same to be true, and in virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled, "An Act for the more effectual abolition of oaths and affirmations taken and made in various Departments of the Government of New South Wales and to substitute declarations in lieu thereof and for the suppression of voluntary and extra-judicial oaths and affidavits."

Made and signed before me, this 23rd day of June, 1881,—

SAM. HAWKINS, J.P.

WILLIAM OLIVER.

No. 3.

Mr. S. Kearney to The Secretary for Mines.

Sir,

Temora, 27 July, 1881.

A Mr. Patrick Hannan here has instructed me to commence an action against the Mining Registrar, Henry Margules, for the wrongful acts done by him as such Mining Registrar in connection with a transfer of certain interests of my client in the quartz claim commonly known as Bourke's Reef at Upper Temora, and I understand that certain statements were taken in respect of this matter before the Warden here which if within my reach would enable me to readily make out my case. I should therefore take it as a very great favour if you could let me have a copy of same, or have it sent to the Warden here, in which case I could obtain a copy therefrom.

I have, &c.,  
S. KEARNEY.

The request cannot be complied with.—H.W. Submitted.—5/8/81. Approved.—E.A.B., 5/8/81.

No. 4.

Mr. S. Kearney to The Secretary for Mines.

Sir,

Temora, 5 August, 1881.

I have the honor to acknowledge the receipt of your communication, dated the 29th ultimo, and am grateful for the prompt attention to the matter referred to in my letter to you of the 27th ultimo. I shall take it as a great favour if you can let me have the required information by Wednesday next.

Acknowledg-  
ment only.  
See No. 3.

I have, &c.,  
S. KEARNEY.

No. 5.

The Under Secretary for Mines to Mr. S. Kearney.

Sir,

Department of Mines, Sydney, 8 August, 1881.

Referring to your letter of the 27th ultimo, in which you ask for a copy of certain statements said to have been taken before the Warden in respect of the action of the Mining Registrar, Temora, in connection with a transfer of an interest in a quartz claim at Upper Temora, I have the honor, by direction of the Secretary for Mines, to inform you that he is unable to comply with your request.

I have, &c.,  
HARRIE WOOD,  
Under Secretary.

No. 6.

The Mining Registrar, Temora, to The Under Secretary for Mines.

Sir,

Temora, 20 August, 1881.

P. Hannan (*re* transfer to W. Oliver) has summoned me to the next District Court to be holden on the 27th instant at Cootamundra.

There is no time to be lost, and there is no local legal adviser I could employ; hence I most humbly pray that the papers in connection with his complaint on the same subject, addressed to the Department and reported upon, may be forwarded to me to assist me to carry out the defence.

P.S.—The amount demanded is £200.

I have, &c.,  
H. MARGULES, M.R.

Inform that the papers are with the Executive Council.—H.W., 24/8/81.

No. 7.

The Under Secretary for Mines to The Mining Registrar, Temora.

Sir,

Department of Mines, Sydney, 24 August, 1881.

Referring to your letter of the 20th instant, in which you ask that the papers in the matter of the transfer to W. Oliver, about which you have received a summons from P. Hannan, may be forwarded to you, I have the honor to inform you that the papers are with the Executive Council.

I have, &c.,  
HARRIE WOOD,  
Under Secretary.

## No. 8.

Mr. S. Kearney to The Secretary for Mines.

Hannan *v.* Margules.

Sir,

Temora, 24 August, 1881.

I should take it as a great favour if you could entertain my application for a copy of the evidence taken in the matter of inquiry *re* Mining Registrar, before the Warden here some time ago. As it is most material to support my client's case, I cannot see that he can safely go to trial without it. The trial takes place on Monday next at Cootamundra, and if you cannot let me have a copy of the evidence required, would you be so good as to give me the name of some person in your Department whom I could subpoena "to produce."

I have, &amp;c.,

S. KEARNEY.

The papers referred to are before the Executive Council in connection with Mr. Margules' suspension.—H.T., 26/8/81. Inform by telegram.—H.W., 26/8/81.

## No. 9.

Telegram from Under Secretary for Mines to Mr. S. Kearney.

Hannan *v.* Margules.

Department of Mines, Sydney, 26 August, 1881.

THE papers asked for by you are before the Executive Council in connection with Mr. Margules' suspension.

1883-4.

EXTRACTS FROM THE VOTES AND PROCEEDINGS OF THE  
LEGISLATIVE ASSEMBLY.

VOTES NO. 37. THURSDAY, 20 DECEMBER, 1883.

10. PATRICK HANNAN'S MINING CLAIM AT TEMORA :—Mr. Spring moved, pursuant to Notice,—  
(1.) That a Select Committee be appointed, with power to send for persons and papers, to take into consideration the alleged illegal transfer of the claim of Patrick Hannan, at Temora, by the Mining Registrar, Mr. Margules.  
(2.) That such Committee consist of Mr. Abbott, Mr. Chapman, Mr. Fremlin, Mr. Gill, Mr. Holtermann, Mr. Teece, Mr. Dangar, Mr. De Salis, Mr. Sydney Smith, and the Mover.  
Question put and passed.

VOTES NO. 65. TUESDAY, 4 MARCH, 1884.

11. PATRICK HANNAN'S MINING CLAIM AT TEMORA :—Mr. Spring (*by consent*) moved, without Notice, That all the papers ordered by the House on the 5th December, 1881, to be printed, relating to the dismissal of Mr. Margules, Mining Registrar at Temora, be referred to the Select Committee appointed by this House to inquire into the alleged illegal transfer of the mining claim of Patrick Hannan, at Temora.  
Question put and passed.

VOTES NO. 73. THURSDAY, 20 MARCH, 1884.

2. \* \* \* \* \*  
Mr. Abbott laid upon the Table,—Return to an Order made on 5th March, 1884,—“Morning Star Extended Quartz Claim.”  
*Ordered*,—that the document be referred to the Select Committee now inquiring into “Patrick Hannan's Mining Claim at Temora.”

VOTES NO. 124. WEDNESDAY, 2 JULY, 1884.

6. PATRICK HANNAN'S MINING CLAIM AT TEMORA :—Mr. Spring, as Chairman, brought up the Report from, and laid upon the Table the Minutes of Proceedings of, and Evidence taken before, the Select Committee for whose consideration and report this subject was referred on 20th December, 1883.  
Ordered to be printed.

## PATRICK HANNAN'S MINING CLAIM AT TEMORA.

---

**REPORT.**

---

THE SELECT COMMITTEE of the Legislative Assembly appointed on the 20th December, 1883,—“with power to send for persons and papers, to take into consideration the alleged illegal transfer of the claim of Patrick Hannan, at Temora, by the Mining Registrar, Mr. Margules,” and to whom were referred, on 4th March, 1884, “the papers relating to the dismissal of Mr. Margules, Mining Registrar at Temora,” and to whom was also referred, on 20th March, 1884, “the Return to Order ‘Morning Star Extended Quartz Claim,’”—have agreed to the following Report:—

1. Your Committee having examined the witnesses named in the List,\* \* See List, page and carefully considered the papers referred, find,—
  - (1) That Patrick Hannan was the holder of a twelfth share of six men's claim situated at Temora, and known as “Bourke's Lease.”
  - (2) That on the twelfth day of April, 1881, Henry Margules, Mining Registrar at Temora, registered, in the name of William Oliver, a transfer of half of the said twelfth share of the said Patrick Hannan, without his consent or authority.
  - (3) That in consequence of this illegal transfer, the said Patrick Hannan was deprived of his interest in the said claim, at that time and for some time after of considerable value, as shown by the evidence of Mr. Warden De Boos.
  - (4) That the said Patrick Hannan was deprived of his mining share in the said lease altogether by the illegal action of the Mining Registrar.

2. That, in view of the above facts, your Committee recommend the case of the said Patrick Hannan to the favourable consideration of the Government.

GERALD SPRING,  
Chairman.

No. 3 Committee Room,  
Sydney, 25th June, 1884.

---

PROCEEDINGS OF THE COMMITTEE.

TUESDAY, 4 MARCH, 1884.

MEMBERS PRESENT:—

Mr. Spring, | Mr. Chapman,  
Mr. Teece.

Mr. Spring called to the Chair.

Entry from Votes and Proceedings, appointing the Committee, read by the Clerk.  
Committee deliberated.

Ordered,—That Mr. Henry Margules be summoned to give evidence next meeting.  
[Adjourned to Wednesday, 12 March, at half-past Two o'clock.]

WEDNESDAY, 12 MARCH, 1884.

MEMBERS PRESENT:—

Mr. Chapman, | Mr. Holtermann.

In the absence of a quorum, the meeting called for this day lapsed.

THURSDAY, 13 MARCH, 1884.

MEMBERS PRESENT:—

Mr. Spring in the Chair.  
Mr. Chapman, | Mr. Holtermann,  
Mr. Fremlin.

Entry from Votes and Proceedings, referring Papers relating to the dismissal of Mr. Margules, late Mining Registrar at Temora, read by the Clerk.

Printed copies before the Committee.

Mr. William Otto Kropp called in, sworn, and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That Mr. Henry Margules and Mr. Patrick Hannan be summoned to give evidence next meeting.

[Adjourned to Wednesday next, at half-past Two o'clock.]

WEDNESDAY, 19 MARCH, 1884.

MEMBERS PRESENT:—

Mr. Spring, | Mr. Holtermann.

In the absence of a quorum, the meeting called for this day lapsed.

WEDNESDAY, 2 APRIL, 1884.

MEMBERS PRESENT:—

Mr. Spring in the Chair.  
Mr. Holtermann, | Mr. De Salis,  
Mr. Dangar, | Mr. Chapman.

Entry from Votes and Proceedings, referring Return to Order in reference to "Morning Star Extended Quartz Claim, read by the Clerk."

Papers before the Committee.

Chairman handed in extracts from Book of the Mining Registrar at Temora, attested by Mr. James Donovan, Acting Mining Registrar, in reference to the transfer of a portion of a share in Bourke's lease from Patrick Hannan to William Oliver, which were ordered to be appended. (See Appendices A 1, 2, 3, 4, and 5.)

Mr. Patrick Hannan called in, sworn, and examined.

Witness withdrew.

Mr. Henry Margules called in, sworn, and examined.

Witness withdrew.

Committee deliberated.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

WEDNESDAY,

WEDNESDAY, 7 MAY, 1884.

MEMBER PRESENT:—

Mr. Holtermann.

In the absence of a quorum, the meeting called for this day lapsed.

TUESDAY, 17 JUNE, 1884.

MEMBERS PRESENT:—

Mr. Spring in the Chair.

Mr. Teece, | Mr. Holtermann,  
| Mr. De Salis.

Charles De Boos, Esq. (*Late Mining Warden at Temora*), called in, sworn, and examined.

Witness withdrew.

Committee deliberated.

[Adjourned to Wednesday next, at *Eleven* o'clock.]

WEDNESDAY, 25 JUNE, 1884.

MEMBERS PRESENT:—

Mr. Spring, | Mr. Teece,  
| Mr. De Salis.

Clerk submitted a letter from Mr. Margules, in reference to corrections in his evidence and printing of certain correspondence.

Chairman submitted Draft Report.

Same read and agreed to.

Chairman to report to the House.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON

PATRICK HANNAN'S MINING CLAIM AT TEMORA.

THURSDAY, 13 MARCH, 1884.

Present:—

MR. SPRING, MR. CHAPMAN,	MR. FREMLIN, MR. HOLTERMANN.
-----------------------------	---------------------------------

GERALD SPRING, Esq., IN THE CHAIR.

Mr. William Otto Kropp called in and examined:—

1. *Chairman.*] You are Mining Registrar at Temora? Not now; I was at one time.
2. Were you in the Mining Registrar's office previous to the transfer of a portion of a mining claim from Patrick Hannan to William Oliver? Yes, I was acting Mining Registrar about that time, in the absence of Mr. Margules. Mr.  
W. O. Kropp.  
13 Mar., 1884.
3. Did you see the transfer registered in the books? Yes.
4. Was the transfer accompanied by any paper? Yes, by an authority by Patrick Hannan to Mr. Oliver, authorizing him to transfer the share; in fact it partook of the nature of a bill of sale, and at the same time it was an authority authorizing Mr. Oliver to make the transfer on his behalf to Mr. Oliver himself.
5. Is there any form prescribed in the regulations on which such transfers are carried out? Yes, Schedule 10 in the Mining Regulations.
6. Was this transfer on that form? It was.
7. It contained also a bill of sale, you say? The transfer itself was made in the usual form in the transfer book, and this bill of sale or authority was attached to it.
8. *Mr. Holtermann.*] It was what we call an agent's form? Yes.
9. *Chairman.*] By whom was that authority signed? There was Patrick Hannan's mark, certified to by William Forbes, Mr. Oliver's clerk.
10. Is there any regulation which makes it necessary for the person transferring to be present himself, or was that authority legally complete—should it not have been done before a Magistrate? No, that is not required; the authority has to be given under the hand of the person transferring.
11. Did you know anything about the transaction yourself except from your books? No.
12. Had you any knowledge of it afterwards in any way whatever? I heard it spoken about several times. Hannan always objected to it; in fact, he told me he never gave this authority—he told me that before the transfer was made.
13. *Mr. Holtermann.*] How did it happen that he knew that such a transfer was coming forward? During the time I was acting as Mining Registrar Mr. Oliver had attended at the office and wanted to make this transfer, but it could not be made just then because there was an injunction upon the claim. Hannan was aware of that.
14. *Chairman.*] Was Hannan with him then? No.
15. Oliver came on a former occasion and wanted to make this transfer? As far as I remember, the injunction happened on the same day that Mr. Oliver first came to make the transfer. After some days the injunction was disposed of, and then Mr. Oliver came again and wanted this transfer made. Before then Hannan had attended at the office and asked me not to allow any transfer to be made because, he said,

Mr.  
W. O. Kropp.  
13 Mar., 1884.

said, he never gave any authority to anybody. I told him he need not be alarmed, for I would not allow any transfer to be registered. When Mr. Oliver came to ask to have the transfer registered I told him I expected Mr. Margules back in a few days, and as I was comparatively new to the office he had better let it stand over until Mr. Margules returned. When Mr. Margules returned he seemed greatly annoyed that the transfer had not been completed.

16. Was there any reason for his annoyance? He said I had been neglectful, and that I ought to have completed it. I told him what Hannan had stated, and that Mr. Oliver had only attended alone—never with Hannan; but still he said the transfer should have been made.

17. *Mr. Holtermann.*] Did you leave the office then? I did some few days after, and after that the transfer was made.

18. *Chairman.*] Did you become Mining Registrar afterwards? Yes.

19. When Mr. Margules was dismissed? Yes. The transfer was made a few days after I left the office.

20. *Mr. Holtermann.*] You heard of it afterwards? Yes.

21. *Mr. Chapman.*] Are you aware when it was first intimated to Hannan that a transfer had been made with the authority alleged to have been signed by him with his mark witnessed by Mr. Oliver's clerk? No.

22. When you first spoke to him on the matter, did he then say that it was against his will that it was made? Yes; in fact he has often spoken to me about it to the same effect.

23. I mean the first time; did he then say it was not his mark to this document? Yes.

24. *Mr. Fremlin.*] How was this claim taken possession of by Mr. Oliver? I do not know.

25. Did he take immediate possession of the claim after the transfer was made? I could not tell.

26. Did Hannan to your knowledge ever maintain his right to that claim by being on the ground? I do not know; he always maintained the illegality of the transfer, but whether he went on the ground I could not say.

27. *Chairman.*] Did you notice any fresh transfer of Hannan's share or any portion of his share to anybody else—for instance, to Dr. Halket? Yes.

28. Was it the same proportion that was supposed to have been transferred by Hannan to Oliver? I do not think it was; as far as I remember Oliver transferred a part of it to Dr. Halket, and another part to Joseph Yeates.

29. How soon after the transfer was made to him from Hannan do the books show the re-transfer by Oliver to these two gentlemen? I could not tell; it will be in the books.

30. Do you remember whether it was a very long time or a short time? I am under the impression that it was a short time, but I really could not fix any date.

31. Are you aware whether Mr. Oliver soon left the district afterwards, or whether he remained there for any time? I think he must have left in 1881, the same year.

32. *Mr. Dangar.*] You state that Hannan objected to the transfer before it was made: had he any knowledge that such a transfer was about to be applied for? He seemed to know that Mr. Oliver would want the transfer made; he cautioned me not to allow it.

33. Did he repeat his objection to the transfer after it was made? Yes, he did, whenever it was spoken about afterwards.

34. *Mr. Fremlin.*] There was some money value attached to the transfer? Yes.

35. Was this transfer made for love or money, so far as you know? I cannot tell whether there was any sum filled in; of course the records of the office will show that.

36. *Mr. Dangar.*] What did Hannan say when he made his protest against the transfer? He said he had never given any authority to anybody; in fact he did not want to have the transfer made to anybody.

37. Had he any knowledge in whose favour the transfer was sought to be made? He knew Mr. Oliver wanted to have the transfer made.

38. *Mr. Fremlin.*] When the injunction was on the claim, was there any doubt expressed whether Hannan would ever get this claim back? Yes; it was a dispute between him and a man called Prendergast.

39. There was a liability on Hannan's part to lose it? Yes.

40. Do you think it at all likely that, knowing there was such a risk, he might have transferred his share to Mr. Oliver? He might have given the authority or he might not; that is the mystery.

41. *Chairman.*] These shares that were transferred to Yeates and Dr. Halket afterwards became the property of a Company at Temora? Yes, the South Australian Company.

42. And the ground is now in their possession, and being worked by them? Yes.

43. You know that Hannan always persisted in claiming this ground? He did.

44. Do you know whether he took any legal proceedings? He brought an action in the District Court at Cootamundra, against Mr. Margules, for allowing this transfer to be made.

45. *Mr. Fremlin.*] Why did you leave your position as Acting Mining Registrar the first time? I was only appointed Acting Mining Registrar during the absence of Mr. Margules, and when he came back I gave up charge of the office to him. He seemed very much annoyed about this and some other matters. Some cases had been decided in the Warden's Court in favour of persons who had jumped allotments, and, as in duty bound, I carried out the order of the Warden's Court and registered the jumpers' claims. Mr. Margules refused to carry out the order of the Warden's Court, and said it was quite illegal, and I ought not to have registered the claims under the order of the Court. There might have been other reasons why Mr. Margules did not care to retain me in the office any longer; he was at liberty to keep me or dispense with me, as he pleased.

46. *Chairman.*] Of your own knowledge have you any acquaintance with Mr. Oliver's character—do you know of any disreputable transactions he has been guilty of in Temora? I could not say. He might not have borne the best character because he was addicted to drink, but I do not know of anything that would be called dishonorable.

47. You told Mr. Margules about Hannan's objection? Yes.

48. Did Mr. Margules make any reply when you told him? He insisted that, notwithstanding his objection, the transfer should be made to Mr. Oliver.

WEDNESDAY, 2 APRIL, 1884.

Present:—

MR. CHAPMAN,		MR. DE SALIS,
MR. DANGAR,		MR. HOLTERMANN.

GERALD SPRING, ESQ., IN THE CHAIR.

Mr. Patrick Hannan called in and examined on oath:—

49. *Chairman.*] You are a miner, residing at Temora? Yes.
50. And a leaseholder in a claim known as Bourke's claim? Yes.
51. What portion of that claim had you? I had a quarter share. My name is registered, but I owned a sixth of the claim.
52. You were in possession of the claim up to a certain time? Yes, I did a lot of work there.
53. Did you know a man named William Oliver there? Yes, he was a lawyer.
54. Did you ever sign a paper transferring to William Oliver a one twenty-fourth share of your full sixth share in Bourke's quartz claim at Temora? Never in my life.
55. By your mark or otherwise? Never.
56. You do not read or write? I do not; I never signed any paper transferring my right to the claim, nor did I ever authorize any one else to sign for me.
57. Did you know Mr. Kropp, who was acting Mining Registrar for some time at Temora? I knew him in the office as Assistant Deputy Registrar.
58. You knew him there as Acting Mining Registrar during Mr. Margules' absence? Yes.
59. Did you ever have any conversation with him about this share—did you give him any information about it? Yes, I went to the office and told him not to transfer any of my interest to any person or persons.
60. For what reasons? Because Mr. Oliver got Mr. Margules—
61. Never mind that—did you hear him? I did.
62. What did you hear? That Mr. Oliver wanted to claim a portion of my share through a lawsuit at the Temora Court-house.
63. You, however, went to Mr. Kropp and cautioned him not to transfer it? I did. I may also be permitted to state in the case he had in the Court got £6 8s., or something like it, to the best of my knowledge.
64. But you cautioned Mr. Kropp against transferring it—you are quite sure of that? I did.
65. And you did not sign any paper authorizing him or any one else to transfer any part of your interest in the claim? I did not.
66. Did you afterwards hear that your interest had been transferred, and by whom was it transferred, did you hear? I heard that Mr. Margules had transferred it. I could not satisfy myself at all; and I got some one to go and look at the books, and he found that the transfer had been made.
67. A transfer had been made of a portion of your interest to this William Oliver, the attorney? Yes.
68. Had you any conversation with Mr. Margules when you found that the transfer had been registered? Yes, I told him he should never have done such a thing. Mr. Oliver cleared out with the papers.
69. Did you institute an action in any Court against Mr. Margules in reference to this matter? I did.
70. In what Court? In the District Court at Cootamundra, before Judge Forbes.
71. What was the result? The case was nonsuited because I had not the witnesses there I should have had.
72. Who was acting as your lawyer? Mr. Kearney.
73. Was he in the Court? Yes.
74. You had no other action about it afterwards? No. Judge Forbes held the documents in his hand, and told me to mind the papers, as I should get my interest. He held up the paper and said it was a clear forgery.
75. Mr. Oliver did not appear at the Court? No.
76. Nor yet his clerk? No; Mr. Margules had his clerk there.
77. William Forbes was there, at any rate? Yes.
78. But the transferee was not there? No, he was not.
79. Who is in possession of the claim at the present time? The South Australian Company.
80. That is Bourke's claim? Yes.
81. Are they working it? They have been working it for the last eighteen months, if not longer.
82. Getting gold out of it? Yes, for some time. The first 9 cwt. of stuff we got out of it was taken to Clunes, in Victoria, to be crushed, and it went 5 ounces 3 dwts.
83. At any rate they are in occupation and working the claim at the present time? Yes.
84. That is all the evidence you can give yourself? That is all; but Mr. Leggatt, Peter M'Call, and Thomas Leggatt are the men. I could do nothing after what Mr. Margules did.
85. You have been sick since, and in more than one hospital? Yes; I was put into Young Gaol and had to remain there for a month until my trial came on, and when I was tried I was honorably acquitted. I was told to take proceedings against the party who prosecuted, but I had no means. I came to Murrumburrah, and some of my old neighbours gave me enough money to bring me down to the hospital at Yass, and I was there twenty-one days.
86. *Mr. Holtermann.*] You have stated that your interest in the claim was one-sixth? Yes; but you will find that it is the fourth share taken up.
87. But you actually held one-sixth of the claim? I did.
88. In the document in which the transfer is referred to, and which is signed by Mr. Kropp, Acting Mining Registrar, Mr. Oliver is represented as being the registered holder of a quarter of a sixth share; but the paper which is supposed to have been signed by you with a cross, and witnessed by William Forbes, clerk to Mr. Oliver, speaks of your having transferred one-twenty-fourth share of your full one-sixth share. The matter seems to be a little complicated. Can you give the Committee any information which will enable them to understand it better? I know no more about any transfer, or any papers that Mr. Margules or Mr. Forbes may have brought up, or Mr. Oliver, than this table; and I could find out nothing at all. I went before Judge Forbes, and he declared it was a clear forgery.

Mr.  
P. Hannan  
2 April, 1884.

- Mr. P. Hannan.  
2 April, 1884.
89. At the time you are represented to have made a transfer of your interest in the claim, was the claim payable? It was payable every day we crushed. We got 5 ozs. 3 dwts. in it —
90. If you will kindly allow me—what was the size of the vein? 18 inches wide.
91. You took it all? Oh yes. It opened out to 3 feet.
92. What did it crush? At that time, 5 ounces.
93. That was only a little bit of stuff in the whole weighing? Yes; we came to follow the reef afterwards; when we came to open it out it turned out far better, but there was part of the vein which would be very rich.
94. And you crushed 9 cwt. of stone? Yes.
95. How far did you carry it? All the way to Melbourne, and up to the Clunes.
96. Was there no crushing plant about Temora? None at all.
97. This was at the beginning of the Temora mining? Yes.
98. *Chairman.*] Who first brought crushing plant to Temora? Mr. Donagher.
99. That did not crush anything for you? No.
100. *Mr. Hollermann.*] The first crushing from your reef, how much stuff was there? 9 cwt.
101. The first crushing afterwards from the place, how much did that turn out per ton? I cannot say; I was then out of the claim and not allowed in.
102. Did you not hear how much it went? There were different reports, and I could not rightly ascertain what it went. Working men can make a thing pay, but if you have seven or eight bosses to take it, it is different.
103. We want to know something as to how the quartz actually turned out? I cannot say—there were different reports.
104. Give us some of the reports? Some said 1 ounce 5 dwts., others said 5 dwts.
105. *Mr. Chapman.*] That was the last amount you heard that it crushed? I never heard that it went less than 12 to 14 dwts. since I got out of it. They have to carry it such a long distance.
106. *Chairman.*] You say that you paid Oliver for some work done by him for you? Yes.
107. How much did you pay him? £6 odd, to the best of my knowledge.
108. He stopped it out of some money? The money was paid in by Mr. Zouch, and Mr. Oliver stuck to £6 odd of it—he stuck to the lot.
109. It was paid in for you? Yes, it was awarded to me.
110. Mr. Oliver had nothing to do with this as your lawyer? No; what he got this £6 odd for was simply this: I had a dividing mate, and this dividing mate was a baker by trade, and could not get a job anywhere; he looked about in several places, and could not get one; at last he said to me, "As you know every one about here you had better look out for work, and let me work in the claim"; "All right," I said, and I went and got work at Callaghan's; a letter comes out to me that Mr. Margules had transferred my interest to him, and that he should have a share also, because he had a miner's right in his pocket; when I came back it was at Christmas-time; he would not let me see the books; when Christmas was over I took proceedings and won the share back in Court and got these costs, and Mr. Oliver took the money that had been paid into Court. Mr. Zouch got it for me, and Oliver stuck to it.
111. The papers before the Committee do not say that the whole of your claim had been transferred to Mr. Oliver: suppose the paper purporting to have been signed by you with a cross was an honest transfer, it does not show that the whole of your claim had been transferred to Oliver—what became of the rest of the claim? I cannot give any more account than that I was done out of it from that day to this; the company had then bought it over.
112. They bought your other mates out—Bourke, and King, and Meyer? Yes, and gave them their money.
113. Did you hear what price they got for it? I did, but was unable to take note of it.
114. How much did you hear it was? I do not recollect the exact amount.
115. *Mr. Chapman.*] Did it go into hundreds? Oh yes, the scrip went up to £3 14s.; Bourke was insolvent and he had to sell out his scrip, and he got £3 19s. for it.
116. *Chairman.*] You did not make any transfer to any one else? No.
117. Not to Joseph Deedes? No.
118. *Mr. De Salis.*] Not to any one? Not to any man living.
119. *Mr. Chapman.*] Did you put your cross to the paper a copy of which is in the Chairman's hand? I did not.
120. Did you see the clerk doing it? I did not; I was not there, and knew nothing at all about it.
121. *Mr. Hollermann.*] Did you have any conversation with Mr. Oliver to the effect that you would give him a portion of your interest in the claim for any work he had done or might do for you? No; there were two witnesses, and the Judge allowed them their wages, but Oliver would not give them their wages. One of the men came up to the hut and abused me; I told him that Oliver had his money; he was drunk, and I told him that when he was sober he ought to give the men their wages.
122. But you had no conversation with Oliver to the effect that you would give him a portion of your interest in the claim, for any labour he had done or was doing for you? Never.

Mr. Henry Margules called in and examined on oath:—

- Mr. H. Margules.  
2 April, 1884.
123. *Chairman.*] Were you Mining Registrar at Temora at one time? Yes.
124. For some considerable time? About two years or over.
125. After you came into possession of the office were you ever away on leave or otherwise, and during your absence was any person acting for you? Yes, Mr. Kropp acted for me during my temporary absence.
126. Do you remember having any conversation with Mr. Kropp, when you returned to the office, relative to a supposed transfer, from a minor named Patrick Hannan, of a certain portion of the interest he had in a reef? I remember before I went away Mr. Oliver brought over an order of the Court—
127. That is not the question? The other question I do not understand.
128. Did you, when you returned after your leave of absence, have any conversation with Mr. Kropp in reference to this transfer—in other words, did Mr. Kropp tell you that Hannan had been with him, and had cautioned him against transferring any portion of his interest in the claim to William Oliver? No.
129. Then if Mr. Kropp has sworn so? He has sworn falsely. 130.

130. And you swear also, then, that you did not blame him; did he not tell you that Oliver had come to him to have a portion of his share registered? No.

131. You had no conversation with him whatever about it? Yes, he showed me a transfer that he had made from Oliver to Dr. Halket.

132. When was that—during your first absence? My first absence; when I came back I found that a transfer had been made from Oliver to Dr. Halket.

133. Mr. Kropp was asked, when being examined before this Committee, whether he was in the Mining Registrar's office acting as Mining Registrar previous to the transfer of a portion of a mining claim from Patrick Hannan to William Oliver, and he answered that he was—is that true? Yes.

134. Then he was asked if he saw the transfer registered in the books, and he said yes? Yes.

135. Then he was asked if he knew anything about the transaction, the transfer from Hannan to Oliver, except from his books, and he answered no? No.

136. If that was the case he must have sworn falsely, for if he had taken it himself he must have known it? He did not do the transfer—he did not execute the transfer; he was not in the office at the time.

137. Which transfer? When the transfer was entered in the book he was not in the office; he received the documents for the transfer, but he was not in the office when it was entered.

138. He did not enter them? He did not enter them because Oliver did not pay him the fees; he said that Oliver never called.

139. Then you did have some conversation with him relative to this? Before I went away Oliver brought me the documents; I would not accept them; I said, "You cannot have any transfer when Hannan has no claim"; he said the claim had been given to him that day by the Court.

140. *Mr. Holtermann.*] That was previous to your going away on leave? Yes.

141. You knew that Patrick Hannan had no share? Not a share whatever.

142. When did you leave? On the 15th of March.

143. *Chairman.*] That was your first absence? Yes.

144. *Mr. Holtermann.*] Then Mr. Kropp took your place? In the evening before I left Mr. Kropp was in the office, and Oliver brought me the documents; I said, "I cannot take cognizance of them until you bring me an order of the Court." He went away and brought me an order of the Court; he brought Hannan in, and Hannan consented. I said, "It is too late now—come in the morning"; in the morning I handed over the documents for Kropp to do it; Kropp told me in the morning that Oliver did not give him the fees; the Mining Registrar is responsible to the revenue for the fees, and of course he could not accept the transfer from Hannan to Oliver until the fees were paid; Oliver in the meantime, whilst I was away, went and transferred one-half of his interest to Dr. Halket.

145. You mean to say that before Mr. Kropp registered a transfer from Hannan to Oliver, a transfer of a portion of the same claim was made from Oliver to Dr. Halket? Yes.

146. It seems to be an extraordinary proceeding? There is no transfer at all in these matters; a Mining Registrar makes no transfer—he accepts a transfer; it is the person who owns the thing that makes the transfer.

147. Did you keep books? Yes.

148. Was the transfer registered in a book? The transfer is entered there.

149. Have you any transfer from Hannan to Oliver registered in your books? Yes, entered.

150. After you returned? Yes; but Oliver had already transferred one-half of his interest to Dr. Halket.

151. Through Mr. Kropp? Yes. Mr. Kropp only received the transfer. There is a great difference between making a transfer and receiving a transfer.

152. *Chairman.*] That is only a verbal distinction, and is of no consequence so far as this inquiry is concerned; what we are asking you is this,—did Mr. Kropp tell you that Hannan had cautioned him not to transfer? No.

153. Then if Mr. Kropp swore that he did, he has sworn falsely? Most distinctly.

154. Did you leave the Service soon after that? Some months after.

155. How did you leave it? I left it because the Warden and myself did not agree; there were all sorts of disputes trumped up against me.

156. Were you dismissed on certain charges? On certain charges?

157. Yes? Were the charges sustained?

158. I ask you a simple question—were you dismissed on certain charges? No.

159. Was one of the charges for having illegally transferred a share without proper authority? I do not know.

160. Will you swear that one of the causes of your dismissal was not to that effect? I never heard the charges.

161. You got them, but never read them? Never read the charges.

162. Did you never get a letter from the Clerk of the Executive Council informing you that in consequence of certain charges you were dismissed from the Public Service, and was one of those charges for the illegal transfer of a share—look at the letter of the Clerk of the Executive Council, No. 103 in the printed papers? Yes, it says something about transferring a share without authority.

163. Was that Patrick Hannan's share? I do not know.

164. Did you illegally transfer any other share? It is impossible for me to say.

165. Were you ever charged with having illegally transferred any other share? Yes, Mr. O'Malley charged me.

166. Charged you with having done what? Having done something.

167. You do not remember what? For having transferred—he claimed a certain property, and I accepted transfer.

168. That was an allotment? An allotment.

169. That was not a mining share? A claim—it is all the same under the regulations.

170. That is the only mining share you are charged with having transferred illegally? I really do not know.

171. Will you swear you do not remember? I do not remember—it is impossible for me to remember; that case was brought into a Court of justice and nonsuited, because he charged the wrong party. It was first

Mr.  
H. Margules.  
2 April, 1884.

- Mr. H. Margules.  
2 April, 1884.
- first referred to me, and I replied, as will be seen by the printed papers—"I have the honor to point out that I did not make transfer, but received same, in accordance with Mining Board Regulation, 138. Hannan admitted in my presence that he had parted with quarter of his allotted sixth share in Bourke's quartz claim, known as Bourke's late lease, to Mr. Oliver. Hannan perhaps had better try issue in a competent Court." Of course he ought to have gone to a competent Court.
172. Do you remember how Hannan signed that transfer? It was signed by a cross.
173. You understand that to mean that a man who signs with a cross cannot write? Yes.
174. Still, notwithstanding you saw the cross, and that Hannan was about the place, you did not take the trouble to ascertain whether the transfer was genuine? Do not I state here distinctly [*witness referred to the printed papers*], and have I not stated in Court, that Hannan was in my office and told me it was all right—that the document was all right.
175. *Mr. Chapman.*] You seem to me not to be able to remember what you were dismissed from the Government Service for? Oh yes, because there is my answer to it. [*Witness pointed to the printed papers.*]
176. What is your answer? Here is a whole lot of answers.
177. But the Chairman asked you if you were dismissed for transferring Hannan's share without Hannan's consent, and you did not seem to recollect? I do not know whether it was Hannan's. You will find it is wholly impossible for me to recollect all the charges,\* because there was no distinct charge laid before me.
178. Read letter No. 102 in the printed correspondence—you must have had that sent to you? No; oh no, I never received it.
179. *Chairman.*] You never had these papers in your possession? No, never had them in my possession, except the papers which I have answered.
180. *Mr. Dangar.*] You were present at the inquiry held by Warden De Boos at Temora? Yes, I was present at the Warden's inquiry.
181. You received a letter from the Clerk of the Executive Council, dated the 18th August, 1881? Yes, very likely; where I asked for an extension of time.
182. Where it says you were suspended in consequence of irregularities in the performance of the duties of your office? Yes, those irregularities were never told to me.
183. You reply to that letter on the 24th August? Yes.
184. In your reply you tell the Clerk of the Executive Council that you do not know what the charges preferred against you are? Yes, that is true.
185. If you were present at the investigation made by Warden De Boos, you must have known what the charges were? I answered them all.
186. But you say you did not know what they were? There were so many of them.
187. *Mr. Chapman.*] You have not yet answered my question—Are you aware of the reason why you were called upon to leave the Public Service? There was nothing in distinct charges, only certain matters—
188. What are those certain matters? They are enumerated in the printed papers.
189. We want them in your sworn evidence? John Ryan, Denis O'Malley, J. P. Irwin, John M'Rae, complained about my not receiving applications for some matters.†
190. *Mr. Dangar.*] Was one of the charges brought against you for transferring Hannan's claim without his consent? Yes, that was one of the charges.
191. Was that one of the charges heard by Mr. Warden De Boos? Yes.
192. *Chairman.*] Do you mean to tell the Committee that prior to your dismissal you never got the letter numbered 103 in the printed papers, from the Clerk of the Executive Council? Yes, that I received.
193. Then you knew the charges that were mentioned there? Yes.
194. I ask you if you transferred any other genuine mining claim besides Hannan's—were you charged with having illegally transferred any other mining share besides Hannan's? I do not call that an illegal transfer.
195. I am not here to argue—were you charged with illegally transferring any other claim besides Hannan's? There were some charges by Denis O'Malley.
196. But that was not a genuine mining claim—I am asking you whether you were charged with illegally transferring any other genuine claim in a quartz reef or alluvial area, besides Hannan's? I was never directly charged; there was never a document produced by the Under Secretary or anybody else in the Department charging me with illegally or unlawfully receiving any transfer.
197. Well then, leaving this one of Hannan's out of the question, there is no other claim whatever in regard to which you are charged with the same proceeding? Something of the same sort, but it never appeared in the printed papers; I gave usually the same reply—
198. Then you were charged with having illegally transferred others? I was never charged—only told.
199. Were you told by authority? No.‡
200. Who acquainted you with it? The Department of Mines, and in this case by summons to the District Court; that was the first intimation I had.
201. At whose instance? At Hannan's instance.
202. I am not referring to Hannan—I asked you if you had been charged with transferring illegally any other *bona fide* mining claim? I had a letter from the Department referring to me certain complaints.
203. Can you find that letter among the printed papers? No.
204. You had a letter from the Department charging you with having made illegal transfers besides that of Hannan's—never mind the expression—with having received illegal transfers? No; only asking me to report upon it.
205. You were asked to account for your having transferred illegally some claim other than Hannan's? I was asked to report upon a claim just the same as Hannan's—just a similar case.
206. Do you mean to tell us that, in regard to the two cases for which you were blamed or called to account by the Government, you remember Hannan's case but have forgotten the other? Yes.
207. *Mr. Chapman.*] Then you admit that there was a charge lodged against you with reference to Hannan's claim? Yes.

\* NOTE (on revision) :—Should be complaints.

† NOTE (on revision) :—I believe I also stated I could not single out anything as a distinct charge, but simply replied (*vide printed papers*) to a bundle of papers handed to my solicitor, the late Honorable S. C. Brown, M.L.C.

‡ NOTE (on revision) :—The complaints were referred to me for a reply or statement or information.

208. You stated to the Committee a little while ago that you never received a letter intimating to you that a charge had been made against you? No charge—only to report.
209. You admit having received from the Clerk of the Executive Council the letter which is numbered 103 in the printed papers? Yes.
210. Read the 2nd sub-section—do you know what share that refers to? Really it might refer to Hannan's or it might refer to another one. It is really of no consequence supposing it was—
211. To me it seems of great consequence? Here is a thing sworn in evidence before a Jury—
212. Do you say that you did transfer a share without authority from the owner? Oh, I cannot say that. The authority was before me in Hannan's case. If the Department blames me for it I cannot help it.
213. *Mr. Holtermann.*] First of all, Mr. Margules, were you the Registrar under which this claim was taken up? Yes.
214. Then you could refer to your book and ascertain whether this Patrick Hannan had one-sixth interest in the claim? No, he never had a sixth interest at all—it was given him by the Court.
215. *Mr. Chapman.*] What had he? He had nothing at all.
216. *Mr. Holtermann.*] Look at Schedule 21. (*See Appendix A 5, handed in by the Chairman.*) I asked you if you were the Mining Registrar at Temora when this claim was registered in the first instance, and you said "Yes"; then I asked you if you had not in your recollection that Hannan had one-sixth of the claim? Yes, looking at the paper, I find that it was originally registered in November.
217. Now, as owner of a one-sixth interest in that claim, did he make any transfer—a Mining Registrar usually makes himself acquainted with the interest a man possesses before he proceeds to make a transfer of that interest? Yes.
218. Now in the paper purporting to have been signed by Hannan with a cross, which you swear he did sign with his cross, and which is witnessed by William Forbes, clerk to Mr. Oliver, it says that the interest transferred is one twenty-fourth share of his full one-sixth share; are you aware of that? That is not a true copy.
219. You have already stated that previous to leaving on the 15th March, on leave of absence, this transfer was handed to you that very night? Yes.
220. You stated that you had not time that night to do it, but that you might do it on the following day, and left it for Mr. Kropp to do? Yes.
221. Then Mr. Kropp, in consequence of some information received from Patrick Hannan, refused to make the transfer, and had not made it when you returned? No; but one thing I remember—Hannan never cautioned me. If he cautioned Mr. Kropp I know nothing about it.
222. At any rate, this share was not transferred previous to your returning? No.
223. Then I understand you to say that, whilst you were away and previous to your returning, Mr. Kropp transferred a certain interest from William Oliver to Dr. Halket? Yes.
224. Now Mr. Kropp must have known that no interest could be transferred from Mr. Oliver until he was satisfied that such interest had been in that man's name—Mr. Kropp refused to transfer Mr. Oliver's share; at the same time you state that, previous to your returning, or on your returning, you found that a certain interest had been transferred from Oliver to Dr. Halket—that interest is stated by the paper [*Appendix A 4*] to be one-half a quarter of a sixth share—can you explain that to the Committee? Half of a quarter of a sixth share, that is what he transferred. Hannan had a quarter share, and he transferred one-eighth of the sixth share.
225. Are you aware that any consideration money passed—why you transferred from Patrick Hannan to William Oliver? Mr. Oliver, the solicitor, I think it was who paid the fees.
226. There was no consideration money? I do not know if there was any consideration money, only that Mr. Oliver and Patrick Hannan came to my office on the 14th, in the evening, and told me it was all right—I could transfer. That is all I know about it; that is what I acted on.
227. Hannan did not mention what interest he was to get for the transfer? Yes, he said one-half share. The Court gave him a full share, to transfer one-half back again to his mate and a quarter to William Oliver.
228. We have no knowledge of the half you speak of? If you had the case you would see that Hannan was never entitled to a share—he was always a pretender.
229. *Chairman.*] He won the case in the Court? Yes, in a sort of way. If you had the decision here you would see how he won it.
230. *Mr. Holtermann.*] Previously you stated to us that he was originally the owner of one-sixth, by your own papers? Most decidedly he was.
231. And yet you say he never had any interest? That claim was a lease: that lease was, on the report of the Warden, disallowed. They had to collect miners' rights quickly, in order that they could ensure a claim of the ground, and, instead of producing Prendergast's mining right, they took Hannan's miner's right; but they never acknowledged him.
232. *Chairman.*] You say that whilst you were away from your office on leave of absence, Mr. Kropp transferred a share from William Oliver to Dr. Halkett? Yes, a portion of a share.
233. And before you accepted the transfer from Hannan to Oliver? Yes.
234. But here is a certified copy of a document annexed to transfer in the books of the Mining Registrar at Temora, dated 28th February, 1881, which reads as follows:—"I have this day sold and transferred to Mr. William Oliver one-twenty-fourth share of my full one-sixth share in Bourke's quartz-claim at Upper Temora, known as Bourke's lease," &c. It is signed with a cross by Patrick Hannan, and is witnessed by William Forbes, clerk to Mr. Oliver—you must have received that document on the 28th of February? Yes, I received it on the 28th of February.\*
235. This is a copy from the book? There is no book containing such a document.
236. Do you deny the truth of this copy? I do not deny any truth at all.
237. How do you account for this memorandum on the document—"Received, 14/3/84.—H. MARGULES, M.R."? That is what I say. †

\* NOTE (on revision):—This answer is wrong. I never stated that I received that document on the 28th February, but "on the 14th March"; and stated it was not a "transfer," but simply a document to assist Oliver in his demand.

† NOTE (on revision):—Mr. Holtermann, pointing out the nature of the document questioned upon, received the answer—"That is what I say"; but it does appear so here. Mr. H. explained that I simply received and marked such fact on said document elicited that reply.

Mr.  
H. Margules,  
2 April, 1884

- Mr. H. Margules, 2 April, 1884. 238. It is a very strange thing—I have here a transfer of a mining tenement [*See Appendix A 4, handed in by the Chairman*] from William Oliver to Dr. Halket, which is dated 18th March, 1881, at Temora, and yet you receive the transfer from Hannan to Oliver on 14/3/84? I received the document and asked Kropp to do it when Oliver paid the fees. I did not receive the transfer; I made no transfer—only just received the transfer.
239. It was you, at any rate, and not Mr. Kropp, who received this transfer from Hannan to Oliver? At a later date.
240. Answer me the question? Yes, I received it. \*
241. You told us that Mr. Kropp registered the transfer from Mr. Oliver to Dr. Halket after that? Not before receiving the document. †
242. You did not register Oliver's transfer to Dr. Halket until the 12th of April †? I believe it was. I remember Oliver came in with one transfer to Mr. Deitz.
243. Mr. Holtermann.] To keep this clear would you need to alter the interests? I never altered any interests—I am sorry—it is puzzling—if the Committee would just read the instructions which the Mining Registrars receive, they will find that we cannot do anything. We can only call attention; we cannot resist any claim to perform our duty, but simply call attention to any omission or irregularity; we cannot refuse to receive any application because of a mere informality or irregularity.
244. Would you need to keep this clear by altering it from one-twenty-fourth? I did not receive it.
245. Suppose I came to you and wanted you to transfer a certain interest, you would ask for some authority, how I came by it? Yes.
246. Mr. Chapman.] What was the value of Hannan's interest? It was sold in May, for expenses, for £8—the quarter share was sold for that.
247. By public auction? By public auction.
248. Mr. Holtermann.] Was proper notice of the sale given to the public? Yes, it was advertised in the public papers.

TUESDAY, 17 JUNE, 1884.

Present:—

MR. DE SALIS,

MR. HOLTERMANN,

MR. TEECE.

GERALD SPRING, ESQ., IN THE CHAIR.

Charles De Boos, Esq., called in and examined:—

- C. De Boos, Esq. 17 June, 1884. 249. Chairman.] Are you a Gold-fields Warden? I am; at present stationed at Copeland.
250. You were Warden at Temora in 1881? Yes, in 1881 and 1882.
251. You know Mr. Henry Margules, who was acting there as Mining Registrar? Yes.
252. Have you any remembrance of a miner named Patrick Hannan? Yes, I know him well.
253. Do you remember that man owning a share in what was called Burke's lease formerly, but now known as Burke's reef? Yes, I gave him the share by an order of the Warden's Court. There was some dispute about it originally, and an order of the Warden's Court gave him the share.
254. Did it come to your knowledge, while residing at Temora, that a transfer had been made by Mr. Margules of any portion of that share—had you official cognizance of it? Yes, Hannan made a complaint to me, and I told him to put his complaint in writing; he did so, and I submitted it to the Mining Department. There were numerous charges against Mr. Margules, and I was requested to hold an inquiry into this amongst other charges. I held that inquiry; examined Mr. Margules, and allowed him to give whatever evidence he thought proper on the subject. His evidence will be found in my report. He admitted that he had done wrong in giving this transfer, and that he had been led away by the person, Mr. Oliver, to whom it was transferred, being an attorney, as he thought an attorney ought to know the law better than he did. That was the excuse he made—the only excuse. I believe that will be found in his own words, and signed by him. The document was signed by him afterwards.
255. What was absolutely necessary to make it a formal and proper transfer? It was necessary that the party transferring should himself have been there, or that he should have appointed some one as his agent to transfer for him specially. There must be a special authority.
256. That was not done in this case of Hannan's? No. There was a kind of document drawn up by Mr. Oliver, but it was very informal, and did not describe really what was intended to be transferred. Mr. Oliver showed this document to Mr. Margules, and on that Mr. Margules transferred. If you have the Mining Board Regulations before you, you will find they are very distinct that only the owner himself or his duly constituted agent can transfer. It was evident that this unfortunate man, Hannan, had been swindled. I saw that myself, but I could do nothing in the matter because, after Margules had transferred the share to Oliver, Oliver had cut it up into a lot of small shares and sold to innocent holders, who had paid hard cash for them, and I could not very well take their shares from them. The only thing I could do was to bring the matter under the notice of the Government. As Warden, I did not think it my duty to take a share from a man who had paid hard cash for it. In one instance Oliver sold a very small portion of his interest for £50.
257. He sold some to Dr. Halket? Yes, Dr. Halket bought a share; I think he gave him £30 or £40.
258. Before you left Temora had some Company bought out the shareholders in Burke's reef? Yes.
259. Do you know the name of the Company? It was an Adelaide Company—the South Australian Gold-mining Company.
260. They worked that claim up to the time you left? Yes. I cautioned the Manager that there was a hitch in the title, as to the transfer to Oliver, and that if Hannan went to law with them he would beat them.

261.

\* NOTE (on revision):—This is completely wrong somewhere.

† NOTE (on revision):—Not document, I never said such a word, but the "transfer."

‡ NOTE (on revision):—I never received any transfer from Oliver to Dr. Halket, besides that transfer took place on the 18th March.

261. Do you know of your own personal knowledge where this claim of Hannan's was situated? It was at Upper Temora, on the left side of the road going out towards Cootamundra. C. De Boos, Esq.
262. To the best of your knowledge that claim has since been worked by the Company? Yes; I do not know how they have got on with it since, but I know they considered it highly valuable—the shares ran up to an enormous price at one time. 17 June, 1884.
263. Then if Hannan had retained his share in that claim, it would have been of some considerable value to him? Yes, it would have been worth from £1,000 to £1,200. The Company in purchasing gave to the shareholders a certain amount of ready money, and a certain amount of paid-up shares; that in Hannan's case would certainly have amounted to £1,000 or £1,200, because the paid-up shares at one time sold, to my knowledge, for £2 10s.
264. *Mr. Holtermann.*] Do you know how many shares there were in the Company? No, I do not recollect now. Roughly speaking, I should say that Hannan would have got something like £1,000 or £1,200 for his interest.
265. Have you any knowledge of any payment having passed between Mr. Oliver and Hannan in reference to this share? No, I do not think there was any payment at all; but Oliver appeared for Hannan in the Warden's Court, in a case between Hannan and Prendergast. Hannan and Prendergast disputed about the share. The share was taken out in Prendergast's name, and Hannan claimed to be a working partner or dividing mate. That was brought before the Warden's Court, and I awarded Hannan the half of Prendergast's sixth. I believe it was for his services in the case that Hannan promised to give Oliver something out of this share, if he got it. No doubt Oliver took up the case on speculation; he was to get something out of it, but what it was I cannot say.
266. Was this claim originally taken up by Hannan—was he one of the original holders? I believe he was interested in it, but he went away to do something else, and left Prendergast behind to represent him. He was one of the original shareholders—at least he would have been had he stopped behind when the ground was taken up; but he went away on some other speculation, leaving Prendergast to look after this, and so Prendergast's name was put down for it. Hannan and Prendergast were what are called dividing mates.
267. By your ruling you gave Hannan a half-share with Prendergast? Yes.
268. The system of dividing mates is very common? Yes; I have known men to be dividing mates, one in New Zealand and the other here. I know Hannan was one of the original partners.
269. *Chairman.*] Were you at the trial between Hannan and Margules at Cootamundra? No.
270. Provided that no transfer has been made by Hannan since to anybody, do you consider him, under the circumstances, the legal owner of that share? No doubt about it; he is legally the owner. If he had means to go to the Supreme Court he could get this share back even now.

---

## APPENDIX.

[Handed in by the Chairman, 2 April, 1884.]

### A 1.

I HAVE this day sold and transferred to Mr. William Oliver one twenty-fourth share of my full one-sixth share in Bourke's quartz claim, at Upper Temora, known as Bourke's Lease formerly, but now as Bourke's Reef. Temora, 28 February, 1881.

Witness—WILLIAM FORBES, Clerk to William Oliver, Solicitor, Temora.

his  
PAT. × HANNAN.  
mark

Received, 14/3/84.—H. MARGULES, M.R.

I CERTIFY the above is a true copy of a document annexed to transfer in books of Mining Registrar, Temora, a copy of which is hereto annexed.

Temora, 17 March, 1884.

JAMES DAVOREN,  
Acting Mining Registrar.

### A 2.

Memorandum.—William Oliver, Solicitor, to Mr. Kropp.

15 March, 1881.

I SEND you the decision of the Warden in the case of Patrick Hannan *versus* Robert Prendergast. You will please transfer my share now left yesterday.

I CERTIFY the above is a true copy of a memorandum annexed to transfer from Patrick Hannan to William Oliver, a copy of which is annexed.

17 March, 1884.

JAMES DAVOREN,  
Acting Mining Registrar.

### A 3.

Mining Board Regulations.—Schedule 10.

Transfer of any Mining Tenement, part thereof, or share therein.

I, PATRICK HANNAN, of Temora, being the registered holder of a half-sixth share in a quartz claim known and registered as Bourke's Claim, late Bourke's Lease, in consideration of the sum of £10, do hereby transfer to William Oliver, of Temora, all my right, title, and interest in and to a quarter of said sixth share, subject to all and singular the terms and conditions under which the said quarter share has been held by me; and I, William Oliver, of Temora, do hereby accept the said quarter share, subject to the terms and conditions aforesaid.

Dated at Temora, this 12th day of April, 1881.

	Miner's Right.	
	No.	Date.

## LEGISLATIVE ASSEMBLY.

## NEW SOUTH WALES.

## PATRICK HANNAN'S MINING CLAIM AT TEMORA.

(PETITION OF H. MARGULES AGAINST ADOPTION OF REPORT FROM SELECT COMMITTEE.)

*Received by the Legislative Assembly, 26 August, 1884.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled, Sydney.

The humble Petition of the undersigned, H. Margules, late Mining Registrar at Temora, against the adoption of the Report of the Select Committee, appointed on the 20th March, 1884, to take into consideration the claim of Patrick Hannan on account of an alleged illegal transfer made by the said undersigned.

Your Petitioner humbly sheweth:—

That the said Report of your said Honorable Committee appears against facts,—that is, that the said Patrick Hannan was ever deprived of his share, or a portion of his share, by the Petitioner, or by any act of the Petitioner, but some portion was legally transferred to Oliver, as the Court of Law at Cootamundra, in August, 1881, clearly decided; that the other portion was sold, by the Bailiff of the Warden's Court at Temora, upon a writ of the said Court, presided over then by Warden De Boos, after due notice for a considerable time had been published in the two local newspapers, at public auction, for the small sum of £3, in August, 1881, there being no other bidders but Mr. James Bourke, who was in said Court the plaintiff in the suit against Hannan and others, and who had to take the said portion of share or nothing; thus also showing that the said share was of very trifling value, and that the said Patrick Hannan indeed suffered no injustice whatsoever except that persons daily experience by not fulfilling engagements in which they entered and have broken faith.

Your Petitioner humbly submits that the inquiry of your said Honorable Committee seems incomplete, when the Petitioner was not present when witnesses were examined against him and his action, and papers, documents, and notes not supplied, and witnesses not sent for as recommended by him repeatedly by divers letters.

Your Petitioner humbly points out that the said Report now before your Honorable House has been adopted only by three Members of said Honorable Committee, two of whom never heard Petitioner's evidence when given, while his letters, addressed to the Clerk of your Honorable House and to B. O. Holtermann, Esq., M.P., one of your Honorable Committee, on the subject of inquiry, if before them were not complied with, hence these honorable gentlemen did not possess sufficient data to guide them in their deliberations or lead them to a correct conclusion to base a report upon, inasmuch the notes of His Honor the Judge who presided at the Court at Cootamundra, when the action of the said Hannan against himself touching the said claim was decided, nor the evidence nor decisions of the Wardens, Messrs. Sharpe and De Boos, in the case of Hannan *v.* Prendergast, heard in 1881, at the Warden's Court of Temora, decisions of Warden's Court in favour of James Bourke against said Patrick Hannan and others in 1881, writ of execution under such decision, advertisements and sale under such writ, transfers, &c., &c., in connection with said claim, were not obtained, hence were not before your Honorable Committee, though in his said letters the Petitioner had humbly asked your Honorable Committee to obtain all such papers; nor did your Honorable Committee examine Dr. Halkett, Messrs. Oliver, Forbes, James Bourke, Edward Trewin, &c., &c., &c., who would have given clear and distinct evidence on all points, that is, as to the legal transfer from Hannan to Oliver, from the Warden's Bailiff to James Bourke, and as to the trifling value of such claim, an evidence not as it appeared before your Honorable Committee, in the shape of hearsay or assumption, but striking and reliable, leading to quite an opposite report arrived at by your Honorable Committee, though the examination of said witnesses were humbly prayed by the Petitioner in his said letters, for which purpose he duly supplied the respective addresses.

That your Petitioner was not invited to attend the examination of the few witnesses before your Honorable Committee, though the inquiry seemed directed against him or his act; that by such omission your Petitioner feels that he has been, perhaps not intentionally, not treated quite justly, since he was blamed for an act that he had to fulfil in due course of his office duties, that is, that said transfer from

Hannan to Oliver. That your Petitioner acted rightly and legally, and simply fulfilled his duty as Mining Registrar in this case, as well as in other cases, and was fully exemplified in this very case when the said Patrick Hannan tried the issue before His Honor Judge Forbes, at Cootamundra, in August, 1881, against your Petitioner, for £200, and when the verdict was given in Petitioner's favour without even being called upon to make defence. That your Honorable Committee had full power to obtain the required notes from His Honor the said Judge, and would have convinced its Honorable Members that the said transfer was legally accepted by the Petitioner as a Ministerial Officer only: that the document Oliver presented was a stronger one than Schedule 18 of the Mining Board Regulations, and that the 139th Regulation of said Board does not bind the authorized agent to the particular form, otherwise the words "or to the effect" would never have been used in such clause.

That your Petitioner not being present at the examination of said few witnesses, and thus precluded from cross-examining them, must have proved the basis for thoroughly misleading your Honorable Committee in their deliberations and result; that is, that your Petitioner acted wrong in the matter of the said Patrick Hannan, or that there was more than a trifling value in Hannan's claim, or that Hannan was deprived of it by any other means but the ordinary process attending daily arrangements and defaults; and that your Honorable House was properly called in for interference when, on the face of evidence thoroughly sifted, the case would have proved one unmistakably of unmitigated false pretence, and quite unworthy of the consideration of your Honorable House. Only four persons were examined altogether. The witnesses Kropp and De Boos had to save themselves from some equivocal actions in this matter, which laid them open to censure, while Hannan had naturally an eye to obtain the stake. Your Petitioner alone then was pitted against this bunch. Kropp in his evidence showed a thorough lack of memory, for instance he could not remember why Petitioner blamed him in this matter, and stated that the transfer from Oliver to Dr. Halkett was made after the transfer from Hannan to Oliver. This appears strange, since this very witness made the former transfer, and in the absence of the Petitioner. But the facts are these: that Petitioner returning to take charge of his office found Kropp had received a transfer from Oliver to Dr. Halkett, while Oliver did not appear on the books at all. Of course Petitioner feeling annoyed, told Kropp that he (Kropp) had no warrant whatsoever to do what he had done. The dates of these transfers speak for themselves, that is, Oliver to Dr. Halkett, received by Kropp on 18th March, 1881, and from Hannan to Oliver, received by your Petitioner on the 12th April, 1881. The witness De Boos being aware of his wrongful act in depriving Robert Prendergast of his interest and allotting it to Hannan, attempts very adroitly to cloak his decision, by which then Hannan's share was sold by the Bailiff, and of course talked very severely of Oliver, who obtained a portion of said share or claim of Hannan to cover expenses of the lawsuit Oliver won for Hannan. This witness well knew that Hannan never had right to such claim or share. The same witness assumes also, without reference to said Bailiff's sale or any other sale, with a very defective memory indeed, that some shares, Hannan's it is pointed out by him, were worth then, that is from March, 1881, to September, 1881, at the rate of £1,200 each, while documentary evidence, even before the Honorable Committee (transfer Oliver to Halkett) showed that the said share was worth next to nothing, and sold in August, 1881, at auction, for £3, and in March, 1881, Dr. Halkett paid nothing at all. This is the time that Hannan is supposed to have been injured; but who injured him, if not that witness? And what did the injury amount to? The amount, £3. That very witness states that Dr. Halkett gave Oliver £40 for some portion of such share, but Dr. Halkett is ready to take oath that he (Dr. Halkett) received the said portion of share as a gift only, and that he would not have taken it had Oliver asked him a penny even for it, and he found wages were rather costly matters. He was very glad to get rid of it for a very small trifle, in September, 1881. The witness De Boos, also, though on oath, asserts that Oliver obtained some hundreds of pounds for said portion of share. Had the Petitioner or Dr. Halkett, Messrs. E. Frewin, Bourke, Deitz, &c., &c., been called in on this point, it would have been shown that Oliver did not obtain or tried to obtain a single fraction for any portion which he (Oliver) received and transferred from Hannan. Had the Petitioner known that this witness would have been called, he would have included in his request for papers and documents, the production of papers, &c., asked for by the late Honorable W. Foster in the year 1882, as will be found in the Votes and Proceedings of your Honorable House, and questions and answers given on the same subject, brought about by the same Honorable Member in the same year, bearing upon numerous reprimands, several dismissals or suspensions, and ultimate exile from Temora to Copeland. It is therefore to be regretted that your Honorable Committee, having access to those papers and evidence, should have based their entire report on the evidence quite uncorroborated of such not a very clean-handed witness. The witness Patrick Hannan naively and innocently remembers nothing but the transfer to Oliver, and actually wakes up with a statement that His Honor objected to or unfavourably commented on the authority of Oliver to transfer; but the Judge's notes will show that His Honor regarded it as a very strong document indeed. There is not space here to point to all the defects of the evidence of the witnesses mentioned above, nor the absurdity of their assertions; but had your Petitioner been present, no evidence as above referred to or otherwise questionable would have passed unchallenged, especially when documentary proof was within the power of your Honorable Committee—in fact, proof to the contrary within easy reach.

That your Petitioner was not permitted by the Chairman of your Honorable Committee to make any statement or explanation, but, on the outset, when called upon to give evidence and admitted before your Honorable Committee, your Petitioner was simply confined to reply to questions. By this procedure it will be seen that his time was frittered away by quite irrelevant matter to the question at issue, and thus effectually silenced his protest, and prevented him from disclosing the real imposture of the case in plain language, except what he was allowed to state by questions put to him.

That your Petitioner feels greatly aggrieved since the Report of your Honorable Committee has been given a wide publicity, and since by such publicity the public is led to infer, especially by the wording of said Report, that the Petitioner had deprived the said Patrick Hannan of the said share for your Petitioner's ends and purposes; while the facts show that the Petitioner did not deprive Hannan of any share or portion of share, nor that your Petitioner had any gain or purpose to serve, and that such Report therefore is calculated to do and effect any amount of damage and injury to your Petitioner, and without cause traduce his character.

That

That your Petitioner most humbly prays that the said Report of your Honorable Committee be suspended for the present or altogether set aside, by reasons above adduced showing clearly that the said Patrick Hannan was not deprived of any share, that the share or portion of share the said Patrick Hannan was supposed to possess had no actual value, and that the interference of your Honorable House was based on erroneous grounds, by partly defective and partly insufficient testimony and lack of necessary papers, notes, and documents.

And your Petitioner, as in duty bound, will ever pray.

H. MARGULES.

**MR. LAMONT YOUNG AND PARTY.****REPORT.**

THE SELECT COMMITTEE of the Legislative Assembly appointed on the 12th October, 1883,—“*with power to send for persons and papers, to inquire into and report upon the mysterious disappearance of Mr. Lamont Young and his party at Bermagui,*” and to whom were referred on the same date “*the Minutes of Proceedings of, and Evidence taken before, the Select Committee of Session 1883,*”—beg to report to your Honorable House:—

1. That your Committee have examined all the witnesses known to them who were likely to give material evidence touching this case, and regret to say that the inquiry has not led to any disclosure calculated to elucidate the mystery of the disappearance of Mr. Young and his party.

2. That the evidence does not support the popular impression that the men were either drowned or kidnapped.

3. That the men missing were Mr. Lamont Young and his assistant, Louis Schneider, and three fishermen, who came to the Bermagui diggings in the boat which was found on the rocks at Corunna Point. This boat was moored, on Saturday night, the 9th October, 1880, not far from Mr. Young's camp, at the mouth of the Bermagui River.

4. That it has been established beyond doubt that Mr. Young was in company with Senior-constable Berry, of the New South Wales Police, and other residents in the township of Montreal, on Saturday, the 9th October, and made a promise before he left that he would return early the next morning to go out on a fishing excursion. He was seen going in the direction of his camp alone very late on the same evening, and has never been seen by any of the witnesses since then.

5. That next morning, about 10 o'clock, a boat was seen emerging from the mouth of the Bermagui River, near Mr. Young's camp, going in the direction of Corunna Point, and it is supposed that the party were on board. This same boat was found about six hours afterwards 12 miles from Bermagui, on the rocks at Corunna Point.

6. That the evidence shows clearly that the boat had not capsized during the voyage, as there were some rations, as well as several articles of Mr. Young's, with a pair of spectacles lying unsecured on the thwarts, on board when she was found. It is also evident that some person or persons landed from the boat, as there were several large stones which, according to the evidence, were taken from the landing-place and put on board with the intention of sinking her, so as to get rid of all traces of the party. If such were the intention it was defeated, as she was driven by the force of the sea high and dry on to the adjacent rocks, where she was found.

7. That from the foregoing epitome of the evidence your Committee incline to the belief that the party were murdered, and their bodies thrown overboard some distance from the shore in order to evade detection; but by whom the act was perpetrated or what became of the perpetrator or perpetrators there is no evidence to justify your Committee in determining.

GEORGE DAY,  
Chairman.

No. 3 Committee Room,  
Sydney, 20th May, 1884.

## PROCEEDINGS OF THE COMMITTEE.

Session 1883.

TUESDAY, 10 APRIL, 1883.

MEMBERS PRESENT:—

Mr. Burns,		Mr. Garvan,
Mr. Moses,		Mr. Henry Clarke.

Mr. Burns called to the Chair *pro tem*.

Entry from Votes and Proceedings, appointing the Committee, read by the Clerk.

Resolved,—That Mr. Day be Chairman of the Committee.

Committee deliberated.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

WEDNESDAY, 11 APRIL, 1883.

MEMBERS PRESENT:—

Mr. Day in the Chair.

Mr. Moses,		Mr. Copeland,
Mr. Burns,		Mr. Henry Clarke.

Mr. Alexander Gray called in, sworn, and examined.

Witness withdrew.

Mr. Robert Hannan called in, sworn, and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That Mr. Robert Hannan be summoned to give evidence next meeting.

[Adjourned to To-morrow, at Two o'clock.]

THURSDAY, 12 APRIL, 1883.

MEMBERS PRESENT:—

		Mr. Moses.

Mr. Robert Hannan called in and further examined.

Witness withdrew.

Edmund Walcott Fosbery, Esq. (*Inspector-General of Police*), called in, sworn, and examined.

Witness withdrew.

Committee deliberated.

Ordered,—That Henry M'Crummin Keightley, Esq., P.M., and Senior Constable Martin be summoned, under the Parliamentary Evidence Act, to give evidence next meeting, and that John Foster, Esq., J.P., Senior Constable Berry, and Mr. Peter Engstrom be summoned under the same Act to give evidence on Wednesday next.

[Adjourned to Tuesday next, at Two o'clock.]

TUESDAY, 17 APRIL, 1883.

MEMBERS PRESENT:—

Mr. Day,		Mr. Burns.
----------	--	------------

In the absence of a quorum, the meeting for this day lapsed.

WEDNESDAY, 18 APRIL, 1883.

MEMBERS PRESENT:—

Mr. Burns,		Mr. Henry Clarke,
Mr. Day,		Mr. Garvan,
Mr. Melville,		Mr. Moses.

In the absence of the Chairman, Mr. Burns called to the Chair *pro tem*.Henry M'Crummin Keightley, Esq., P.M. (*Moruya*), called in, sworn, and examined.

During the examination of this witness the Chairman entered the room.

Witness withdrew.

Mr. Moses Owen called in, sworn, and examined.

Witness withdrew.

Committee deliberated.

[Adjourned to To-morrow, at Eleven o'clock.]

THURSDAY,

*THURSDAY, 19 APRIL, 1883.*

MEMBERS PRESENT :—

Mr. Day in the Chair.

Mr. Henry Clarke, | Mr. Moses.

The Clerk laid before the Committee a letter from Mr. Robert Hannan, a former witness, in reference to evidence to be given before the Committee.

Senior-constable John A. Berry called in, sworn, and examined.

Witness withdrew.

Mr. Peter Engstrom called in, sworn, and examined.

Witness withdrew.

John Foster, Esq., J.P., called in, sworn, and examined.

Witness withdrew.

Senior-constable William Martin called in, sworn, and examined.

Witness withdrew.

Committee deliberated.

[Adjourned to Tuesday next, at half-past *Two* o'clock.]

*TUESDAY, 24 APRIL, 1883.*

MEMBERS PRESENT :—

Mr. Henry Clarke, | Mr. Moses.

In the absence of a quorum, the meeting called for this day lapsed.

*THURSDAY, 26 APRIL, 1883.*

MEMBERS PRESENT :—

Mr. Day in the Chair.

Mr. Moses, | Mr. Copeland,  
Mr. Henry Clarke.

The Clerk submitted the following claims for witnesses expenses :—H. M<sup>c</sup>. Keightley, P.M., £9 John A. Berry, £10 5s. 6d. ; John Foster, J.P., £15 9s. ; Peter Engstrom, £9 19s. 6d.

Claims considered and passed.

Committee deliberated.

*Ordered*,—That T. C. Binney, Esq., be summoned to give evidence next meeting.

[Adjourned to To-morrow, at *Three* o'clock.]

*FRIDAY, 27 APRIL, 1883.*

MEMBERS PRESENT :—

Mr. Day in the Chair.

Mr. Moses, | Mr. Henry Clarke.

Thomas C. Binney, Esq., called in, sworn, and examined.

Witness withdrew.

Committee deliberated.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

**Session 1883-4.**

*FRIDAY, 25 JANUARY, 1884.*

MEMBERS PRESENT :—

Mr. Day, | Mr. Barbour,  
Mr. Levin, | Mr. Henry Clarke,  
Mr. Melville.

Mr. Day called to the Chair.

Entry from Votes and Proceedings appointing the Committee and referring Papers to the Committee, read by the Clerk.

Minutes of Proceedings and Evidence of Select Committee, and Return to Order of Session 1883, relative to disappearance of Mr. Lamont Young and Party, before the Committee.

Committee deliberated.

*Ordered*,—That Mr. R. W. Newell and Mr. Francis Guy be summoned to give evidence next meeting.

[Adjourned to Wednesday next, at half-past *Two* o'clock.]

*WEDNESDAY,*

*WEDNESDAY, 30 JANUARY, 1884.*

MEMBERS PRESENT:—

Mr. Day in the Chair.

Mr. Burns,

Mr. Henry Clarke,

Mr. Levin,

Mr. Barbour.

Mr. Francis Guy called in, sworn, and examined.

Witness withdrew.

Committee deliberated.

[Adjourned to Wednesday, 13 February, 1884, at *Two o'clock*.]*WEDNESDAY, 13 FEBRUARY, 1884.*

MEMBERS PRESENT:—

Mr. Day in the Chair.

Mr. Barbour,

Mr. Levien.

Mr. Robert W. Newell called in, sworn, and examined.

Witness withdrew.

Mrs. Philadelphia Tomsett called in, sworn, and examined.

Witness withdrew.

Committee deliberated.

[Adjourned to To-morrow, at *Two o'clock*.]*THURSDAY, 14 FEBRUARY, 1884.*

MEMBERS PRESENT:—

Mr. Day in the Chair.

Mr. Henry Clarke,

Mr. Barbour,

Mr. Levin,

Mr. Melville.

Mrs. Philadelphia Tomsett called in and further examined.

Witness withdrew.

Mr. Charles Leonard Jagers called in, sworn, and examined.

Witness withdrew.

Mrs. Agnes Jagers called in, sworn, and examined.

Witness withdrew.

John Thomas Hobbes, Esq., called in, sworn, and examined.

Witness withdrew.

Mr. Charles L. Jagers called in and further examined.

Witness withdrew.

Re-assembling of the Committee to be arranged by the Chairman.

[Adjourned.]

*FRIDAY, 9 MAY, 1884.*

MEMBER PRESENT:—

Mr. Day.

In the absence of a quorum, the meeting called for this day lapsed.

*WEDNESDAY, 14 MAY, 1884.*

MEMBERS PRESENT:—

Mr. Day in the Chair.

Mr. Henry Clarke,

Mr. Moses.

Committee deliberated.

[Adjourned to Tuesday next, at *Three o'clock*.]*TUESDAY, 20 MAY, 1884.*

MEMBERS PRESENT:—

Mr. Day in the Chair.

Mr. Burns,

Mr. Henry Clarke.

Clerk submitted claims for expenses as follows:—Robert W. Nowell, 15s.; Philadelphia Tomsett, £6 10s.; Charles L. Jagers, £8 5s.; Agnes Jagers, £6 10s.

Claims considered and passed.

Motion made (*Mr. Burns*) and Question,—That the Proceedings and Evidence taken before the Select Committee of Session 1883 be adopted as the Proceedings and Evidence of this Committee,—put and passed.

Chairman submitted Draft Report.

Same read and agreed to.

Chairman to report to the House.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON

MR. LAMONT YOUNG AND PARTY.

SESSION 1883.

WEDNESDAY, 11 APRIL, 1883.

Present:—

MR. BURNS,		MR. HENRY CLARKE,
MR. COPELAND,		MR. DAY,
	MR. MOSES.	

GEORGE DAY, Esq., IN THE CHAIR.

Mr. Alexander Gray called in and examined:—

1. *Chairman.*] I suppose you understand the case which this Committee is called together to consider? Mr. A. Gray.  
Yes.
2. Do you know anything about the case? I certainly do, inasmuch as I was selected by the Govern- 11 April, 1883.  
ment to go out and search for the bodies of Mr. Lamont Young and his party, and get all the evidence possible in the matter.
3. Did the Government send you to inquire into their disappearance? Yes.
4. Where did they send you to? To Bermagui, and to proceed to Corunna, where the boat was discovered.
5. What instructions had you from the Government? My instructions were to search for the bodies on the beaches, in the caves, and in every place where I thought there was a shadow of a chance of getting them if they were there.
6. Was it supposed that they had been murdered? That was the supposition.
7. You went to Bermagui? Yes. I remained there two months, and searched every place where there was the slightest shadow of a chance they could be put if they were murdered. I carried out my instructions as far as Corunna was concerned, and I came straight to the conclusion that the bodies were not there at all.
8. At Corunna? At Corunna.
9. Did you make any search at Bermagui? I did.
10. What was the result of that search? Nothing—no discovery. I searched every place at Bermagui, to carry out the instructions.
11. Did you make any inquiries there from the residents of that locality? I did, of every one, and had to pay for it out of my own pocket unfortunately.
12. What tidings did you glean? I got information from a Mrs. Tomsett, saying that on Saturday night, the night of the day that Mr. Young was last seen—
13. Did you put some questions to Mrs. Tomsett? No, this slipped out without any questions.
14. What took place between you and Mrs. Tomsett? She said that on the Saturday night about 8 o'clock, the night of the day that Mr. Young was last seen, she walked up on the hill clear of her house, which I knew very well, where she could see nearly everything, and she saw a great flash down at Bermagui Point, the locality of Mr. Young's camp, and she heard the mournful groans of the men and heard the report.
15. Report of what? Like an explosion—saw the flash and heard the melancholy moans of the men.
16. Was she far away from their camp? Fully as far as from here to the Circular Quay.

Mr. A. Gray. 17. About half-a-mile? Scarcely half-a-mile. She took no notice —

11 April, 1883. 18. You are giving exactly what she said? Exactly what she said, which I did not report until I put her to the question about it afterwards, and she seemed sorry she had ever said it. They are a queer lot down there.

19. Did she say anything more then? The Sunday next following that Saturday there were two men came to her house at 3 o'clock in the morning and knocked her up. One of them had a very nicely made-up swag upon his back, and they asked where the punt was to get across the river. One of them was very impertinent; the other did not speak at all, but kept away rather in the scrub. She told them if they did not be off she would get a gun to them. They went in the direction of the puntman's hut. I got his own words for it. He asked who was there. "George Adams," said one—this impertinent fellow. He got up and said, "George Adams is not there." This was the old puntman. He was ill at the time himself, and he got a man to ferry them over. They offered £1 to be put across immediately, and they had a bottle of grog.

20. What is the width of the river? About 300 yards at that particular place. They offered £1 to be put over. This one man who did not speak to Mrs. Tomsett sat in the bow of the boat and never spoke while he was in the boat. When they arrived at the other side they jumped out of the boat and tendered half-a-crown as payment. That Sunday morning about 7 o'clock they called at Charley Jagger's hut and had breakfast there. They asked if they could get breakfast, and Mrs. Jagers said yes. This is Mrs. Jagers' own information and her husband's.

21. Mr. Burns.] All that you are saying now is the information you got from the different parties? Yes. During the time they were at breakfast this one party only spoke once. They could hardly catch what he said, but it was to the effect that the Ninety-mile Beach would be a very good diggings—it was a good formation for gold.

22. That was the man who, throughout, had been silent? Yes.

23. Chairman.] When you went to Jagers' house, I suppose you went on a mission of inquiry? Yes, to get as much information as possible.

24. When you went there, what did you say, and what did they say to you? I went to this house—I heard a great deal about this Jagers; there were several persons in the district who had a suspicion of him, that he knew something of the disappearance of these men. He is a man that will not work, and does not bear a very good character in the district. I asked if he knew anything of Mr. Lamont Young and his party. No, he knew nothing, and his wife knew nothing —

25. How far was their house from the camp of Mr. Young? About 3 miles. He appeared to have the greatest sympathy for these men: he would do anything, he said, to find it out; but he continually had his eye on me, seeing that we were armed. I thought it was better to leave him rest just at that time, and left the place. I came back in a few days again, when he was out—no one there but his wife. I produced the portrait of Mr. Schneider; I said, "Will this answer the description of one of these men that came here on the Sunday morning?" "Oh, yes," she said, "that is one of them, she could not mistake him, for he had scars right across his head."

26. Mr. Copeland.] What was Mr. Schneider's position? He was one of Mr. Young's party, as an assistant geologist, I think. The portrait was a pencil sketch, and done very accurately; it was a very good likeness. Any one who ever saw Schneider would know him again. She said, "Yes, I know him by that scar on his eye." The husband, when he saw it, also said the same.

27. Mr. Burns.] Did he come in while you were there? No, this was another day, subsequently. After this I did not lose sight of either of them. I went there a few days subsequently, and he appeared to me as if he would like to retract what he did say; and the wife, every time I spoke of the business, changed the subject immediately, and I brought her back to it.

28. Chairman.] What business? The Bermagui mystery. "Were you at home that night, Mrs. Jagers, when these people disappeared?"

29. Did you say that to her? Yes. "Is that a Melbourne steamer going up, Mr. Gray?" And I brought her back to the subject again—let her go for a while, and then touched her on the same subject again. "What would be the price of this sewing-machine in Sydney?" And this sort of thing occurred every day subsequently. I could get nothing from her; she changed the subject immediately.

30. Who was with you? Moses Owen.

31. When you asked these questions of Mrs. Jagers was Mr. Jagers there? Yes, on two occasions.

32. You did not address yourself to him? Yes, to him and his wife; and they both recognized the portrait of Schneider.

33. Mrs. Jagers prevaricated? Yes; that was subsequently. As soon as I got this man recognized by his likeness I was satisfied I was right, and I communicated immediately with the Government. The answer I got to my letter was to go back. I wrote and said I had traced him up with his likeness to Jagers' house, and my opinion was he went up the coast into South Gippsland. By keeping the coast he would evade the police.

34. Schneider was supposed to have disappeared with the rest of the party? Yes. The clothes and effects of all the other men were discovered, all but his.

35. Do you know anything about his being in the land of the living at the present time? No.

36. Mr. Copeland.] The fact of his clothes and effects not having been discovered led you to have suspicion that this Schneider was concerned in the disappearance of the rest of the party? Yes; and from the character he bore in Sydney.

37. Chairman.] Go on in your own way? I wrote the next day and put the case before the Government, that I had traced Schneider by his likeness up to this man's house, and asked to be advised. I intended to go after him. The answer I got was to go back and search the sand at Bermagui. I came straight to the conclusion that they wanted to get him out of the country.

38. Mr. Copeland.] Who? Somebody. It looked to me so, as I was not allowed to go after him.

39. Chairman.] Who are "they"? The Government. It was the Government I communicated with.

40. Your impression was that they did not care to pursue Schneider, and did not care about him getting away? Certainly. I had searched every place I could possibly search at that time. I was very much disheartened at this, and wrote to the Government and said we could not do any more, and they recalled us.

41. What reply did you get from the Government? The reply was that our services would be dispensed with, and we had better come back.

Mr. A. Gray.  
11 April, 1888.

42. Did you come back then? Yes.
43. What did the Government do when you came back? We had nothing to do but give up the effects we had, and we were paid off.
44. *Mr. Copeland.*] At this first house you went to, Mrs. Tomsett's, you state she told you she saw a flash of light and heard the moans of some men? Yes; melancholy moans, she said.
45. And this camp was half-a-mile distant? Yes.
46. She heard the moans of men half-a-mile away? Yes.
47. Do you think that likely? Yes, from where she was she could hear it quite easily at that hour of the night. She saw the flash and heard the report and the moans of the men. It would not be half-a-mile away, and she was on a rise.
48. *Chairman.*] They might have been nearer than the camp? Yes, they were nearer than the camp where the boat was.
49. *Mr. Copeland.*] Moses Owen, who was he? A coal-miner, at Wallsend, that the Government recommended to go out with me.
50. You say you were armed—that Mrs Jagers noticed you were armed? Yes.
51. What were you armed with? Revolvers.
52. What was the reason for that? It was a thought of the Government that it would be better we should be armed, not knowing the country or the class of people we might have to deal with. It was according to instructions that I got the arms; I did not think there was any necessity for them.
53. Was there any other reason that made you suspicious of Schneider than the fact of his clothes not having been found on the beach? From hearing in Sydney that he had done the German Society out of £31, his boarding master out of £8, and borrowing Mr. Wilkinson's theodolite the day before he left and pawning it for £10, I came to the conclusion that he never intended to come back.
54. Any other reasons? These were the reasons.
55. There were none of this man's effects found at all, you say? No. I might as well state that Mr. Young was rather a peculiar man in his customs and habits, as I knew from having travelled with him for about seven months. Some days he was very jolly, and other days he would not open his mouth. You hardly ever knew when you really had him; but he was a good-hearted fellow.
56. Were the things that were discovered all identified as belonging to the other members of the party? Yes.
57. Other than Schneider? Yes.
58. And nothing was found belonging to him? Nothing.
59. You say now that the Government appeared to want Schneider to get away? I looked upon it in that way.
60. Because the Government were not prepared to allow you to follow this man into Gippsland, where you thought he had gone, you came to the conclusion that the Government desired he should escape? Yes.
61. Were there any other reasons? No, I had no other reason to suppose anything of the kind, but that particular reason that they would not allow me to go after him.
62. How far did you examine along the beach? Very near 12 miles from where the boat was found right back to Bermagui Point, and away to the south of Bermagui. The supposition that they were buried in the sand on the beaches would be impracticable; there was not sand enough on the beaches to bury these bodies; besides, it would be all washed off. The two beaches that were so convenient to the boat, they could not bury them there. I searched all the caves, the ravines, the old holes, dragged outside the caves, and all about where the boat was.
63. *Chairman.*] Did you report to the Government that you thought Schneider had something to do with the disappearance of Mr. Young and his party? There was a strong suspicion in the department before I went away.
64. What did you convey to the Government? The only thing I conveyed was that I traced him up with his likeness, and he was one of the party, and I wanted to get at him.
65. Did you lead the Government to believe that this man was still alive? Yes, that was my impression.
66. Did you give the Government any notion where he had gone to? To South Gippsland.
67. Did you ask permission of the Government to pursue him? I did.
68. What answer did you get? Go back and search the sand.
69. Did you believe, from the inquiries you made down there, that Schneider had made his escape into Gippsland? Yes, from the evidence I got from Jagers, on the strength of the likeness, that led me to believe immediately that he made his escape into South Gippsland.
70. Jagers did not know Schneider? He knew him by the likeness that he was one of the men that had breakfast at his house on the Sunday morning.
71. There could be no mistake about this likeness? Any man who ever saw him would know the likeness again.
72. And Jagers had no doubt about it? No. About Jagers himself, for the two months at Bermagui Point, every day in our search Jagers dogged us everywhere we went. I could not understand it, neither could the man that was with me. He told me that his (Jagers') dogs came home one morning about 7 o'clock, and they smelt that strong of human flesh that he was obliged to turn them away from the house—that they had been eating dead bodies all night.
73. Did Jagers tell you this? Yes, I asked if he knew what direction the dogs came from that morning, and he said he could not tell the direction, but he took the dogs out with him to ascertain if they would go to the same place again; he came down the track towards the camp, and the dogs came to a certain place and they stopped there.
74. *Mr. Burns.*] Did he show you that spot? Yes.
75. *Chairman.*] Did you search there? Yes, all about it. Of course I had my own notions.
76. *Mr. Burns.*] Do you think he was misleading you all the while? Yes.
77. You suspected, from the whole circumstances, that he had some knowledge of the disappearance of this party? Yes. I tried to draw him out the best way I could; then I commenced to intimidate him. I could get nothing else from him. I went several times to his place, and they fought shy of me every time. I told him there was one way for him to save himself; he had a wife and children, and the best he could do would be to make a clean breast of it, and by so doing the Government would act leniently  
by

**Mr. A. Gray.** by him. That was what I said without any responsibility. He was very silent, and dwelt upon it before he spoke, and always kept his eye upon me. He said he knew nothing about it. We could not do anything else with him, and it was just about this time I was recalled. When I was paid off, not feeling satisfied with the way the Government treated me in not allowing me to go after this man, I proceeded to Melbourne myself. I interviewed the President of the German Society there, and gave Schneider's description to him; also the President of the German Society at Ballarat and Sandhurst. I also saw the Superintendent of Detectives in Melbourne, and stated the whole case to him. I told him I thought the man would be in South Gippsland. The Superintendent of Detectives said they would do all in their power to get him. He said, "We thought when you were sent out you would bring it to the surface if any one could, and I think you got foul play there." I must also say I spent about £60 of my own money on it, and I was very ill able to afford it indeed, considering we had only 10s. a day when sent down to country like that, where provisions were so dear, and had to be packed for about 14 miles; 10s. a day was a mere nothing.

11 April, 1883.

78. **Chairman.]** From your inquiries there, did you hear anything from parties you came in contact with, with regard to a strange boat said to have been seen in the neighbourhood? All they knew there was from telegrams in the papers about the disappearance of these people.

79. Did no one know anything about the boat? There were so many flying statements.

80. You heard nothing about that? No.

81. Did you ever hear that Mr. Young's boat was found not far from Bermagui, on the rocks? Yes.

82. Who owned that boat? It belonged to Casey, one of the party who is missing. The boat is there still.

83. How far was that boat found from the camp? About 13 miles along the coast, northerly.

84. 13 miles from Mr. Young's camp? Yes.

85. Was anything found about where that boat was found? Yes. It was not I that found it; it was the Water Police that were there before me. They found various articles—half a loaf of bread, a tin of honey, and other things, in a bit of scrub. I fired that scrub and cleared it off.

86. **Mr. Copeland.]** Was that the boat used by the party? Yes. Some people asserted that they saw a strange boat going up that Sunday, but I take it for granted it was impossible, for reasons I have put before you.

87. Did you come to the conclusion that Mr. Young was last seen that Saturday evening? Yes.

88. Up to what time? Up to 2 o'clock; that was at Montreal, about 2 miles from his camp; he dined there with the policeman in charge, named Berry.

89. Have you any information as to when he left Berry's place? Berry had to go on duty and left Mr. Young immediately after dinner, perhaps between 2 and 3 o'clock, and did not see him afterwards.

90. He was never seen afterwards? Never.

91. Did anybody else see Mr. Young after that? I never could find any person who could say so.

92. Did any one down there see any other of the party? No, not that I could learn.

93. Were any others of the party at Berry's with Mr. Young? I am not very certain, but I think Schneider was with him; I think I have heard Berry say Schneider was with him.

94. How far was Mr. Young's camp from any residence? From Mrs. Tomsett's about half-a-mile.

95. Were Mr. Young and party camped together? He had only hired the boat; there were signs of two camps.

96. Who has got Mr. Young's tent? It was never seen after the boat left, it was supposed to have been taken in the boat.

97. And all the cooking utensils, rations, and scientific instruments were all gone? All gone.

98. Were they never found? No, none of those things were ever found.

99. What was found? The only things that were found were their clothes and some geological books.

100. Spare clothes? Yes.

101. Not the clothes they had been wearing? No.

102. Clothes belonging to members of the party? Yes.

103. How were they found? They were found in the boat in a bag.

104. The boat was wrecked, was she not? No; there was a hole in her bottom, and that hole was made by a pick, I think; it had that appearance, and I could see even the pick marks. The boat was so fixed in the rocks that she could not float; she was wedged in—put there; I tried, at high-water, all ways to get her afloat there and I could not.

105. **Mr. Burns.]** What was found at the place where the boat was? A portion of a loaf of bread, a portion of a tin of herrings, a stud or two, and some butts of cigars.

106. They were found ashore? Yes, just off from the sand.

107. **Mr. Copeland.]** What sort of a stud? I did not see them; those that were there at the time will be better able to give that evidence than me.

108. **Chairman.]** How long after the disappearance of Mr. Young and his party was it before you saw this boat? It must have been over three months. I made application immediately after Mr. Wilkinson told me about it at the Exhibition at Melbourne.

109. How long was it after the disappearance of Mr. Young and his party that you were sent down there to make inquiries? About two months and a-half or three months after his disappearance.

110. Was no one sent there before that? Yes, Mr. Binney and some of the Water Police; they were at Corunna.

111. Did they make any report? I really do not know what they did; I know they did not do much.

112. Did they go there immediately after the disappearance of Mr. Young? Yes, with no result at all.

113. Did they find the boat? Yes, the boat was there; they took her up on the sand. I have no notion of what they did, any more than that they had a bit of a camp alongside the boat.

114. **Mr. Copeland.]** Your remarks seem to imply that you have strong suspicion of this man Jagers? Yes, from the fact of him dogging us all the time, and the remarks he had been making.

115. **Mr. Moses.]** What do you mean by dogging you? Following me everywhere instead of minding his own business.

116. Did you not say he tried to evade you? He tried to evade my questions.

117. **Mr. Copeland.]** Do you think there was any collusion between this man Jagers and Schneider? Yes, that was my suspicion.

118. What inducement could Mr. and Mrs. Jagers have for acknowledging they had seen Schneider, when he was supposed to have been drowned? That was what I got out through taking the woman on the hop. Jagers said the other man who crossed the river was a man named Tom. Mr. A. Gray.  
11 April, 1883.
119. The puntman knew Jagers? He was ill—it was another man who put them across.
120. How came you to form the opinion that Jagers was connected with Schneider? From the fact of his following us everywhere, and from the fact of getting the information about the likeness, and his general character, which showed me he knew something about it, if he was not one of the murderers, if they were murdered.
121. Might he not, like yourself, have been desirous of elucidating the mystery? No, I could not see what object he had in that.
122. *Mr. Moses.*] You had a suspicion that the two men who called on Mrs. Tomsett on the Sunday morning were the men who committed the murder? Yes.
123. How do you connect Jagers with it? It is hard to say how the matter might be; there might be three in it or four in it.
124. *Mr. Copeland.*] Was Jagers known down there? Yes, he was living there as a selector; he has a selection.
125. Schneider, I mean—not Jagers? No, he was one of Mr. Young's party.
126. Have you any reason to think Schneider was acquainted with Jagers? He must have made his acquaintance while he was there. Mr. Young had been there two or three days previous to his disappearance.
127. Was Schneider there with him? He was with Mr. Young all the time; he went wherever Mr. Young went.
128. Did you hear of anything to connect Schneider with Jagers—could you give any sound reason to believe that these men had been in any compact? Nothing but Jagers' actions in following me and in trying to get out of the evidence he and his wife had previously given about the likeness; he appeared to be in great trouble about it, and the people would have it there that if he was once arrested the whole thing would come out. I recommended his arrest.
129. To whom? The Government.
130. I suppose they refused to comply? Yes.
131. *Chairman.*] With regard to the disappearance of this party, from all you heard, and from all conveyed to you from other persons, do you believe this party was drowned or murdered and made away with? My belief is that they were not drowned—that they were murdered foully.
132. You believe they were murdered? Yes, and I believe Jagers was one of the murderers, and also Schneider. If Jagers was not one of them absolutely, he knew something about it.
133. Was there any reason for murdering these men? That I could not understand. The only reason I can assign for it is simply this, that it was spite on Schneider's part, for this reason, that Mr. Young was a very strange gentleman, and he must have taken a very strong dislike against him; he did not know him well enough, and from the fact of Schneider being cut all over the head and face, and the tales he told when questioned about these marks, he must have been in foul play before; he said he got these scars in the Austrian-German war, and he could only have been an infant at the time.
134. *Mr. Copeland.*] Could you get no further trace of the two men after they left the puntman's place? No; I got a letter to say I was to go back.
135. Did you endeavour to find out from any one where they went to? He might have gone up the coast then for 50 miles and would not see a soul.
136. Where this boat was found, was it north of Bermagui? Yes, 13 miles.
137. Then to get to Gippsland they had to pass Bermagui? Yes, they crossed the river on the Sunday morning at 3 o'clock.

Mr. Robert Hannan called in and examined:—

138. *Chairman.*] What are you? I have been Inspector of Nuisances and Rate Collector for the Borough of Newtown for the last six years.
139. You have been engaged in endeavouring to unravel what is called the Bermagui mystery,—the disappearance of Mr. Lamont Young and his party? Yes, I went to Bermagui for that purpose last year.
140. How did you come to go to Bermagui? Some letters which I wrote in connection with the matter attracted the attention of General Young, Mr. Lamont Young's father, in the old country, and I was commissioned by the late Mr. William Forster, who acted as a medium of communication between General Young and myself, to go down there and make inquiries. I did not go at the expense of the Government.
141. You were sent on a private mission? Yes, I was specially engaged by General Young. I would accept nothing except the expenses incurred in connection with the matter, and I was furnished with the sum of £20 to start with, out of which I paid what barely covered the expenses of my trip, and returned the balance—some £4 or so. I arrived at Bermagui on the 10th (I think) of last August, and immediately took up my residence at a little township called Montreal, at an hotel kept by a man named Peter Engstrom. I might state that I was the only passenger put ashore that morning at Bermagui, and being a total stranger to the locality I lost my way; ultimately I arrived at the place of a man named Jagers, about 6 miles, or 4 miles perhaps, from Montreal. I arrived there by accident, and entered into conversation with this man. He asked me where I came from, and I told him I had just come off the steamer and had lost my way, and if he would be kind enough to send one of his boys with me to put me on the right track I would remunerate him. To this he at first demurred, but subsequently he accompanied me himself, together with his boy, who carried my swag or luggage to the Bermagui crossing-place. During the whole of the way he was talking of nothing but the murder in connection with Mr. Lamont Young.
142. *Mr. Copeland.*] Did you introduce the conversation? Yes, I did. I told him why I had come down, but before I did so he said he did not wish his boy to go with everybody. "You must remember," he said, "a murder was committed here some time ago, a very serious murder, and I must be exceedingly careful who I entrust with my boy—I must know who he is or something about him." I told him he had no reason to be afraid to trust his boy with me, inasmuch as my appearance would not lead him to suppose I was likely to be a murderer. This was in his dwelling. He then showed me some human hair and some clothes that he had picked up at the encampment where it was alleged Mr. Young put up. The hair he picked out of the boat —

Mr.  
R. Hannan.  
11 April, 1883.

Mr.  
R. Hannan.  
11 April, 1883.

143. What boat? The boat that had belonged to the fishermen, Towers, Casey, and Lloyd.  
 144. That was a long way from the camp? Yes.  
 145. How many miles? As the crow flies it would be about 10 miles from the camp. The hair, he said, was in the boat where it was wrecked.  
 146. Did you see the hair? I did. It was light-coloured hair.  
 147. Was it long hair? I could not say; I did not attach much importance to the few hairs he had.  
 148. It was human hair? Yes.  
 149. A man's hair? Yes, I think it was. He offered me something to eat at first, but I made an excuse to the effect that I had just had breakfast on board the steamer. The fact of the matter is that having heard about this gentlemen previously I did not wish to have anything to eat or drink in his place. He then offered me a cup of coffee, and as I could not well get out of that I drank the coffee. However, I gave him to understand that I had come down there to make investigations in reference to this matter of the disappearance of Mr. Lamont Young and party, and I asked him if he knew anything concerning the matter, if he would tell me I would be thankful to him. So he then accompanied me on the way, and he was talking the whole of the way, about 4 miles, with regard to this matter. The gist of the conversation was that the police had "crabbed" the matter in the first instance—"crabbed" means spoiled—that was his vulgar way of expressing it; I said how was that? "Well," he said, "one of them told me I was the murderer, and as a matter of course I would tell them nothing further regarding it, but as you appear to be a man that knows something, when I get a little better acquainted with you I may perhaps say something more in reference to the matter." He came with me as far as the Bermagui River, and he showed me at a distance the place where Mr. Lamont Young and party had been encamped, and also the boatmen's camp, and requested me to accompany him to show me the exact spot. I told him I would be excused then, but on another occasion I would do so. His boy then ferried me across the Bermagui River in a little boat that was there belonging to the saw-mill, I think. I parted with him there for the time, but his boy accompanied me as far as Montreal and carried my swag, for which I gave him a few shillings. I put up at Peter Engstrom's hotel. I made all the inquiries I possibly could do with reference to the time at which Mr. Lamont Young arrived, and what was known regarding him for a couple of days that he was seen there. It would appear that he landed on a Friday, the 8th or 10th October, and encamped at this point at the side of the river on which he landed. The boatmen encamped two or three hundred yards from where he did. It would appear that on the Saturday he came to Montreal and stayed for two or three hours at the house of a police constable named Berry, and there he made arrangements specially to call at his place on the following morning to go fishing. He borrowed a needle and thread from the constable's wife, for the purpose of mending something, and he then returned home to the camp. It would be then about 3 o'clock in the afternoon. He was met on the way by a man named Hetherington, I think, close to the river; and, as far as I could ascertain, that was the last known authentic information respecting Mr. Lamont Young.

THURSDAY, 12 APRIL, 1883.

Present:—

MR. HENRY CLARKE, | MR. GARVAN,  
MR. MOSES.

GEORGE DAY, ESQ., IN THE CHAIR.

Mr. Robert Hannan called in and further examined:—

Mr.  
R. Hannan.  
12 April, 1883.

150. *Chairman.*] Will you proceed with your evidence? The place where Mr. Lamont Young was met by Hetherington would be about 3 miles from the police station which he had just left. It appeared afterwards that Mr. Lamont Young's pocket-book, containing the needle and thread borrowed from Mrs. Berry, was found with other things on the occasion of the boat being found after his disappearance, which goes to show that he had at least reached his camp that evening in safety. The pocket-book containing the needle and thread was found in the bag among other miscellaneous articles thrown in higgledy-piggledy fashion. Engstrom took me to Corunna Point, a distance, I suppose, of about 15 miles, to go round by the zigzag road, and he pointed me out a boat that was alleged to have been the property of the boatmen hired by Mr. Young. It was then about 200 yards, high and dry, on the beach, from the spot in which it was first found. I examined the boat and found two or three holes in the bottom. It appeared to be about 20 feet in length, capable of carrying 25 or 30 cwt.—a good strong boat. Engstrom also pointed out to me the spot in which the boat was found wedged in between two ledges of rock, and further, the alleged spot in which some stones had been taken up and thrown into the boat, as he said, for the purpose of wrecking her.

151. *Mr. Garvan.*] Were the stones found in the boat? I believe there were several large stones in her; I did not see them myself, but Peter Engstrom did.

152. *Chairman.*] Who first found the boat? I forget the name of the man who found the boat, but Engstrom was one of the men who in company with two or three others visited the scene where the boat was wrecked.

153. The boat, when you saw it, was 200 yards from where it was first found? Yes. In the first instance, when found, it was wedged tightly between the rocks, but when I saw it it was high and dry on the beach. He also pointed me out the spot where the parties had luncheon; that was about 50 or 100 yards from the spot where the boat was wrecked. There were found, as I am informed, some cigars, a meerschaum pipe, some damper, a bottle of honey, some bread and butter, and so forth, evidently the remains of a meal which had only recently been partaken of.

154. These were found on the beach when the boat was first found? Yes. They had evidently landed in safety, and after landing had partaken of a meal, and these were the remnants of the meal that were found not more than fifty or a hundred yards from the scene of the wreck. I believe also a hat was found. It would also appear that on the discovery of the wreck several footprints had been observed on the sandy beach, apparently leading to and from the boat to the spot where the remnants of the meal were found.

155. *Mr. Garvan.*] From where the boat was jammed between the rocks? Yes, to where the remnants of the meal were found.

Mr. R.  
Hannan.  
12 April, 1883.

156. Might they not have been the footprints of somebody who discovered the wreck before the person who gave evidence of his having found it? I believe, from what I am informed, that there were several footprints, which goes to show they were not the footprints of one individual, but of several.

157. Were they going towards the boat, or both ways? Both ways. It is a pity that these footprints should not have been preserved; had they been, they must in all probability have led to the detection of the offenders, if a murder was committed. A number of blacks were encamped in the immediate neighbourhood. I have also been informed that, on the Sunday evening in question, two men were observed, by a man whose name I am not able to give you, about 4 or 5 miles from the scene of the wreck, hidden in a swampy place amongst some bushes, and whistling in a very low sort of way.

158. In a low tone? Yes. The whistling was heard by a man whose name I am not able to give you, but I am informed the statement is quite correct. He whistled also in a similar tone, and suddenly two men made their appearance; they jumped up quickly from where they had been hiding or crouched, and this man got frightened and went into his hut and closed the door.

159. You say you are unable to give this man's name; is it that you do not know? His name was given to me, but I failed to make a note of it at the time. However, it is immaterial.

160. *Chairman.*] He went into his hut and shut the door through fear? Yes. From inquiries made by me it appeared that the boat contained a quantity of miscellaneous articles, such as a bag of potatoes, the blankets and so forth that belonged to the boatmen, and a quantity of luggage belonging to Mr. Lamont Young. I asked Engstrom, who had visited the wreck on the occasion in question, if the boat had upset, which might have caused these men to drown; he said, "Certainly not; the boat was in an upright position."

161. *Mr. Garvan.*] Had the boat the plug in or out when discovered? That I could not say; it was months after when I got there. I said to Engstrom, "You are a skilled seaman; do you think it is possible that a party of men having landed there could have been drowned in endeavouring to re-embark?" he said, "From the position in which I have seen the boat I should say certainly not—there is not the slightest probability of it in the world." From inquiries I also made, I have ascertained that three of these men were good swimmers, that is Mr. Lamont Young, Lloyd, and, I think, Schneider, and four out of the five were seamen. Three of the boatmen were skilful seamen; one, Lloyd, had been first mate of a vessel, and thoroughly understood the management of a boat; Schneider, from inquiries made by me, was at one time in the German Navy, and therefore it is natural to infer that he also was a thorough good seaman; therefore I should say that it would be almost next to impossible for these men to drown at the spot indicated. Had such been the case, it is my candid opinion that the whole of them could not have drowned, or if so their bodies must have been subsequently discovered drifted ashore, or some vestiges of their clothes. From inquiries I made it would appear that nothing of the sort really did take place. It would appear that, on the Sunday morning, between 6 and 7 o'clock, four or five men in a boat were seen emerging from the mouth of the Bermagui River, apparently making in the direction of Corunna Point. This boat was identical with the boat found wrecked at that spot. The boat, it appears, was known, and, more than that, it was the only boat that left that place on the day in question.

162. *Chairman.*] How many men were in her? Four or five.

163. From where the boat was seen, was it far to the encampment of Mr. Young? About 10 miles in a straight line. From where they were encamped to Corunna Point it forms a sort of arch, and the boat was seen making direct for this very spot. There was a gold-diggers' rush at the time, and the diggers were encamped all along the beach from a place called Montreal, several miles each way, so that the boat was seen by a great many persons—by the police and other persons, and the diggers on the beach.

164. When was the boat found after that? At 4 o'clock on that very afternoon, wrecked in the way I have described.

165. And no men at all to be found? No; about 10 o'clock in the day the boat was seen to be abreast of the diggings called Montreal, and appeared to be not under proper control, that is, it did not appear to be under skilful management. The day was not a rough day, and I should say that, with the original occupants in it, there ought not to have been any difficulty in the management of the boat, as they were good seamen. That is a very important point. I endeavoured to ascertain whether there was a sail in the boat on that occasion, but could not ascertain for a certainty. It would appear that, when discovered, no sail was found in the boat, nor was there a large coil of rope about 70 yards in length and a small anchor attached—that was also missing. That is a circumstance that is rather peculiar. A rug known to have belonged to Mr. Young was also said to be missing.

166. *Mr. Garvan.*] When the boat was passing Montreal, was it known who the occupants of it were? No, no one could tell whether the original occupants or whether strangers were in her. That is exactly where the mystery is. Where the boat landed I made every possible inquiry, with a view to discover if anything in the shape of a struggle took place at the spot, but nothing of the sort appears to have occurred or any signs of it to have been observed. Had such occurred, signs of it must have been seen, which goes to show plainly that if murder was committed it certainly was not there. I also made inquiry if immediate steps were taken to find out if a struggle had taken place at the place where these men had camped—the boatmen and Mr. Lamont Young—

167. *Chairman.*] Where they camped at first? Yes, in the first instance, but my inquiries resulted that suspicion of foul play did not then suggest itself to people's mind, and consequently no immediate steps were then taken in the matter. Therefore valuable time was lost or allowed to elapse after the alleged commission of this offence. I should say, taking the whole of the surrounding circumstances into consideration, I should not hesitate to give my opinion that the offence was committed at the spot where they were encamped, and that they were murdered when quietly sleeping. I believe the boatmen slept in the boat, and Mr. Lamont Young and Schneider at their camp.

168. Three in the boat and two in the camp? Yes. In consequence of the suspicion attaching to Schneider, one of the party, and assistant to Mr. Lamont Young, I made inquiry, as it was said he was one of two men who crossed the Bermagui River on the night of the alleged murder, and that he arrived early on the following morning at the house of a man named Jagers. The boatman who put them across was a man named old Joe, who is since dead. This information, I was told, emanated from this man Jagers, but on my questioning him how he was able to identify Schneider, he told me it was in consequence of a description given him by the police, and a sort of a rough sketch of the man shown to him. I asked

him

Mr.  
R. Hannan.  
12 April, 1883.

him if his photograph had been shown to him, and he said no. Therefore there was reason to assume he was mistaken, and that it was not Schneider; and from subsequent inquiries instituted by me, I have been credibly informed these two men have been satisfactorily accounted for, which goes to show that Schneider was not one of the two men, and that Schneider perished with the rest. In consequence of a rumour being afloat in reference to Schneider, that he had managed to get away to Melbourne, and there sold or pledged some of the instruments, I made inquiries in reference to the matter, and Dr. Renwick, then Minister for Mines, informed me that he had heard nothing of the kind, and had such been the case he must have known of it. Therefore, as far as Schneider is concerned it was mere idle gossip or fabrication. I spoke to numerous persons, diggers and others, at Bermagui, those who had been skilled seamen, as to their opinion as to the probability of the drowning of these men, and they all unhesitatingly gave it as their opinion that no drowning took place. It was a matter not impossible, but highly improbable, that such could have occurred. There were only two persons amongst the whole of those with whom I have conversed who gave it as their opinion that drowning took place; they were Mr. Keightley, the Police Magistrate, and a butcher at Montreal whose name I forget. Mr. Keightley alleged as his reason for believing so that if these men landed safely, in endeavouring to re-embark they were compelled to wade up to the chin in water, and that the under-current took them off their legs and drifted them out to sea. But I scarcely think that reason is plausible. I remained for ten days at Bermagui or Montreal, and previous to my coming away, on the morning I left there I had a conversation with the man Jagers. He happened to be going in the direction of the wreck, which I was informed he was in the habit of visiting once or twice a week. I intended to have called at his place previous to my starting for Sydney, but fortunately on this occasion I met him accidentally; he was on horseback, and I said, "Jagers, I want to speak to you." He got off the horse, and we had a conversation for about three-quarters of an hour with reference to the alleged murder. I said to him, "I am going away now; I will not have another opportunity of seeing you, and whatever you have to say with regard to this matter I would strongly advise you to tell me all you know about it." "Well," he said, "I would have told more than I did were it not for the police, and also the fear of myself, wife, and family being murdered in our beds at night: certain parties came to me and told me that if I did not make myself less busy in this affair there would be something the matter with me, and I very wisely took the hint, and have said or done nothing more; if old Joe had been alive, the old boatman, he could have told you as much as I know, and perhaps more." I said to him, "What was the reason that old Joe did not make known to the police what he knew regarding this matter before his death?" and he told me old Joe was frightened the same as himself. He said, "The small inducement held out is not sufficient for me to say or do anything more in this matter." I said to him that I thought he acted wisely and well and discreetly in not doing anything that would have a tendency to endanger himself, wife, and family, but that I had reason to anticipate or believe that in the course of a short time a large reward would be offered for the discovery of the alleged murder, and strongly advised him to be first in the field, as it was possible that others might take the advantage and give information before him. He said nothing to that, but simply replied, "I will think the matter over." I shook hands with him, and told him I hoped in a very short time I would again see him, and I trusted he would give me such information, when the proper time arrived, as would put me on the track of the murderers. He said, "Anything I can do for you, I will." I then left him. I also had several conversations with a constable named Berry down there, who has been there since the commencement of the gold-fields, and he unhesitatingly gave his opinion that these men had been murdered, but that his superiors did not think so, and he could take no action without their permission or knowledge. I believe he knows all the minute details in connection with this matter, much more so than I do.

169. *Mr. Garvan.*] Did you ever ascertain from Jagers who were the persons who warned him? I did not ask him that question; it would have been indiscreet for me to do so; of course he would not divulge the names under these circumstances.

170. You did not ask him? No, I thought it would be indiscreet and unwise. It would appear evident that if murder were committed, which appears to me under the circumstance more than probable, that there were at least four or five men implicated in it, from the fact that that number were observed in the boat.

171. *Mr. Moses.*] Did you get any information in your conversation with Constable Berry? He told me he had no doubt in the world that Mr. Lamont Young intended to have kept his appointment with him on the following day. Mr. Young left an instrument in Berry's possession, which was necessary for his work, I believe the only instrument he was known to have had with him, and that he would not have left the instrument there if he had the slightest intention of sailing on the following morning. Besides, there was nothing to be gained by his going to this point; the thing was totally unreasonable, for, if the boatmen intended to have gone home, to have landed him on this spot, away from habitations, would be an absurd sort of thing to do; and then again, this pocket-book, with the needle and thread found in it, and the whole of the things were found in the bag in such a fashion as though they had been thrown in in any sort of way, entirely different to the well-known habits of regularity of Mr. Lamont Young. This is strong evidence that the persons who committed the murder were very likely of opinion that these men had money, and consequently they murdered them, and no doubt soon found out their mistake, and they put then into this bag all the articles, and took it over, and no doubt had a thorough search at this point where the wreck was found.

172. *Chairman.*] Did you examine the place where the party were camped up the Bermagui River? I did, but from the time that had elapsed before I visited it there was very little to be seen.

173. Did you get any information with regard to the camp—was it removed that day? There was no sign of it to be seen on the Sunday morning, except some old shirts that were found lying about.

174. Useless things? Yes.

175. I understood you to say Mr. Young had an appointment with Constable Berry? Yes, he intended to come to Berry's place on the following day, and left one of his instruments there, evidently showing his full intention to keep his appointment. Besides, he had expressed no intention of going to Corunna Point, but made a special appointment with Constable Berry on the following day to go fishing. The instrument was indispensable to him in his investigations.

176. Are you aware who found the boat first? I did hear the man's name, but I forget it. He found everything just as it was seen subsequently by the police—he did not disturb anything.

177. Was it far from high-water-mark to where the boat was wedged in the rocks? Perhaps 20 or 30 yards. I might also state that, judging from appearances, at the place where the boat was found, it was almost impossible for it to get into such a position without being put there; it could not have drifted there

there without being dashed to pieces against the rocks; it was a ledge of rocks that ran right out; which goes to show that a party had landed there in safety and left the boat there for a purpose. The mere fact of putting stones in the boat goes to show the intention of wrecking it; they were quite unnecessary in the shape of ballast, inasmuch as the articles found in the boat were quite sufficient for ballast already.

Mr.  
R. Hannan  
12 April, 1883

178. As I understand from you, most of Mr. Young's party were practical seamen? Yes, three of them were practical boatmen, who came up from Bateman's Bay on the previous Wednesday; they arrived on Wednesday, and Mr. Lamont Young on the Friday.

179. Is it likely these men would attempt to land the boat at such a place? Certainly not, although they could have done so; but they would not have done so under ordinary circumstances.

180. Were there better landing places? Yes, immediately round this ledge of rocks there was a nice little bay, which any seaman could have seen in a moment—a nice little bay in which they could have landed in perfect safety.

181. *Mr. Moses.*] You say there were some holes in the boat—did you notice how many? I think three.

182. How were they made? By the rocks.

183. From the inside or outside? The outside; bumping on the rocks.

184. Were they bumped inwards? Yes.

185. Were they large holes? About the size of one's head. The holes were enlarged at the time I saw them—larger than when first found, so I was told. I might also mention that there was a slight indentation, apparently a bullet-mark, in one of the seats of the boat; but I do not attach any importance to that, because if these men were murdered they were evidently not shot. From my inquiries there was no shot heard that night.

186. How long after the supposed murder did you visit this place? It was last August; Mr. Young disappeared on the 10th October, 1880. I did not visit the place till August, 1882.

187. *Mr. Clarke.*] Where was Mr. Lamont Young's camp on the Saturday night—north or south of the Bermagui River? It would be on the south side; the saw-mill is on the north side, where Montreal is.

188. He was on the same side as Jagers' house? Yes.

189. Do you think, from the fact of the boat being seen leaving Bermagui Heads on the Sunday morning, that the murder was committed previous to that, in the bay or somewhere that side of the river? Most decidedly, on the previous night.

190. And not where the boat was found? Not where the boat was found? Many are of opinion that the murder was committed where the boat was found, but that is not at all plausible or feasible. If such were the case a struggle must have taken place, and these men must have seen or had the opportunity of facing their murderers. And another thing, I am at a loss to conceive how any person could be there ready, not knowing whether they were going to land there, prepared to meet them and there commit the deed. There is nothing whatever plausible that would lead one to believe that the murder was committed there at all. The thing appears to my mind wholly absurd and preposterous.

191. Did you hear of a bullet having been taken out of the boat and handed to any one? There were bullets found in the boat, but these bullets were attached to fishing lines known to belong to the boat, the property of the fishermen.

192. Have you heard that John Forster, who was the first to find the boat, took a bullet out of the boat and handed it to Constable Berry? Yes, I did, but that bullet was similar to those attached to the lines. In my opinion the murder was not committed by bullet, but in the camp, and the bodies quietly taken out and sunk.

193. In that case they have not searched the right place for the bodies? No.

194. *Mr. Moses.*] Had you any conversation with a Mrs. Tomsett? Yes; a report had been made that some firing was heard on the Saturday night, but from the inquiries instituted by myself, and a conversation I had personally with Mrs. Tomsett, there was no foundation for that rumour. No shots were heard by her on the night in question.

195. *Chairman.*] She could not give any evidence? Her evidence would be of no consequence—in no way important.

Edmund Walcott Fosbery, Esquire, Inspector-General of Police, called in and examined:—

196. *Chairman.*] Do you remember the disappearance of Mr. Lamont Young and his party at Bermagui? I do, in October, 1880.

E. W.  
Fosbery, Esq.  
12 April, 1883.

197. Were you directed by the Government to make inquiries into the disappearance of that party? I made inquiries on my own motion; it was my duty.

198. Who did you send down there? I was away in the country at the time. The first officer sent down there from Sydney was Senior-constable Martin, of the Water Police, who had been a master mariner, and was selected as being thoroughly acquainted with the coast and all marine matters.

199. Did you send him by himself? There were police on the spot; he went to assist in the inquiry.

200. How long after? Immediately.

201. How many days? I could not say without referring to papers; it was done immediately.

202. How long was he down there? He was away in the country for a considerable time and made an exhaustive report.

203. Did he make a report to you? Yes.

204. What was the nature of the report? I think it better I should state that the whole of the papers connected with the disappearance of Mr. Lamont Young and party have been printed and prepared for Parliament, and it appears to me that if they were before the Committee it would be a very considerable advantage to them. From them you will see what has been done, and how it has been done.

205. From the report you received you did not consider it necessary to take any further steps? Yes, I have been taking steps up to the present time. The matter has never been abandoned.

206. From the report you had some suspicion that there was something wrong? Yes, something was wrong, whatever happened.

207. I am speaking of murder? I do not say I had a suspicion of murder, but my opinion, based upon facts laid before me, has been that there are insufficient grounds, in any aspect, to suppose that these men were the victims of foul play. It is possible that they were, but there is nothing to justify the suspicion.

E. W.  
Fosbery, Esq.  
12 April, 1883.

208. What was the man's name you sent down? Senior-constable Martin. There was an extremely intelligent constable on the spot named Berry. But more important than either of these was the Police Magistrate, Mr. Keightley, who is well acquainted with the coast, and has written a very elaborate report upon this matter. He interested himself in it from the very first hour, and was personally acquainted with the men. He has taken more interest in the case than any one.

209. From anything you have done you have not been able to find anything satisfactory or conclusive, either one way or the other? After all, it is largely matter of conjecture or theory, because there is so very little ground or facts to draw inevitable conclusions from. There are suspicious circumstances—circumstances very hard to be accounted for: for instance, the remains of the breakfast, the shovel found in the water, the boat being found so little disturbed; the spectacles presumed to belong to Schneider were found undisturbed on the thwarts of the boat; all these matters were thought out most anxiously by the best men we have, and they left us still in a state of considerable doubt. As some author has observed—"Out of the thousand things that might have happened, only one did." I think if you read the papers and reports, as prepared for Parliament, they will give you a very fair idea of the reasons that have led me to form the conclusions I have,—that they are based on not insufficient grounds.

210. Do I understand you to say that Schneider's spectacles were found on the thwarts of the boat? Yes.  
211. By whom? The police found them there. There are a great number of false reports about in connection with this matter, and I have long been anxious that these papers should be before the public. Articles have appeared in the papers stating that the police were taking no interest in the matter, and nothing was being done, whereas in reality there was no relaxation of effort.

212. No more could be done? Except to keep a watchful observation for anything that might turn up.

213. You may perhaps know of some persons that could throw light on this subject if examined on oath—can you give us any information as to any one? I think Mr. Jagers, whose name has been frequently referred to, ought to be summoned. It has been hinted, and more than hinted, that he knows something.

214. Have you any suspicion that Jagers was implicated in the murder? Not the least. On the theory of murder, you look first to the motive, and you then look to the means by which it was committed. Now there was an entire absence of motive, or at least not enough to induce such a frightful crime as the murder of four or five men; and there is also to be taken into account the extreme difficulty of murdering so many men, the gang required to do it, the entire absence of any blood, or any signs of disturbance to show that there had been such a frightful outrage, as there would have been a tremendous struggle. On the other hand, Mr. Keightley, who has used this same boat, and knows every phase and turn of the tides on that coast, states most definitely that this boat was found in a somewhat peculiar position, on a day when there was a high spring tide at the time the boat arrived, on a coast very subject, as you are aware, to rollers, and between the boat to the shore there was a strong current.

215. The boat was found six hours after they were seen passing Bermagui? At the time the boat arrived at the place where it was found, judging from the time they left the Bermagui River, at 5 o'clock in the morning, and there must have been 5ft. 6in. of water between that rocky point and the shore with a powerful current, so powerful that I believe an aboriginal was washed away and drowned, and the body never found. There was 5ft. 6in. of water, which to a person who cannot swim is as bad as 50ft., and some of the people in the boat could not swim. Well, that current sets out to sea, and would carry anything away; it would carry the bodies away, if the kelp, which is very plentiful there, or the sharks, still more plentiful, did not stop them. Dynamite was used to try and raise the bodies to the surface if they were there. I was in Melbourne at the time, and immediately telegraphed to the police to have a rod prepared, and at any trouble to probe all over the beach to see whether the bodies were buried there, because the first idea would naturally be that if they were murdered they were buried in the sand and the high tide obliterated the marks. That examination was made; and after I came back, for fear it had not been done thoroughly, it was done again in a much more careful manner. Black trackers were out from the moment the boat was found, besides several residents who could be trusted, the Police Magistrate, and the police, and with all this it was almost impossible that some trace of the struggle would not have been found if there had been murder.

216. *Mr. Garvan.*] Your theory is that the boat's crew landed, that the boat got on this reef, and in their efforts to get her off they were washed away? Yes; nothing is so wonderful as the unexpected things that do happen. We know that boats have been taken on shore in this way by these rollers. I have been in boats on the coast myself, and observed their effect. Boats have been taken away on these rollers, lifted right up, and deposited down on the rocks. The sea is very treacherous. An officer of a man-of-war here, I think the "Charybdis," the Honorable Mr. Mcade, had the ship's launch on the coast north of Manly; he had able seamen with him; they were going along on a calm night, and the boat was lifted up by one of those rollers, carried in on to the coast, stove in and swamped, and the sailors were all drowned; the officer alone got on shore with the greatest difficulty.

217. How long ago was that? I cannot say exactly; it was within our time.

218. *Chairman.*] You are quite sure that all pains have been taken and all necessary and careful inquiry has been made to find out this mystery? As far as I can say, I believe no effort was spared. Other people besides the police went down. A man named Gray went down, and an ex-detective named Hannan went down, and the late Mr. Forster agreed with me that neither of them threw the slightest light on the subject.

219. You are thoroughly satisfied that if the father of Mr. Young makes a statement that nothing has been done to ferret out this mystery, he is wrong? Yes. No effort has been spared. I think the misfortune has turned his head; he has been to a clairvoyant, he has seen Mr. Forster, the present Agent-General, written to the Colonial Secretary, to the Governor of the Colony, and appealed, I believe, to the Queen; you cannot persuade him that all has been done that can be done. It is one of those unfortunate mysteries that it may not be possible ever to unravel.

220. Were any proposals made to the Government to offer a reward? General Young was very anxious that we should offer a very large reward. The Government did offer a reward of £200. He wanted a very much larger sum to be offered. I am afraid of these very large rewards where there is no proof of any crime having been committed. It is almost inviting people to come forward with a cock-and-bull story, bolstered up with perjury. If there were anything to tell, in my experience it is as likely to be told for £200 as for any other sum. A very large reward is a temptation, and too dangerous.

221. *Mr. Garvan.*] It may lead to conspiracy? Yes.

222. *Chairman.*] You think there is no well-founded reason for supposing any murder was committed there? There is not the smallest foundation for any such conclusion except that the men are missing. The bare fact that these men are mysteriously missing is the only ground for suspecting foul play. The most suspicious circumstances connected with the whole affair reside in these facts:—They employed as an assistant to Mr. Young a foreigner named Schneider, a man who asserted that he had got £50 in the Savings Bank, when it was afterwards proved he had no such money; who had borrowed money improperly on this representation from Mr. Lamont Young; who had pawned Government instruments before leaving Sydney, and who it is believed had purchased a revolver before he went out on this expedition; who was in the habit of boasting that he had been in the Franco-German war, and had killed men, and thought nothing of taking life, and who was proved in effect to have been an imposter and a rogue. If there is any ground of suspicion at all, the suspicion is against this man, to my mind because he had got this motive; he had committed larceny of Government instruments, for which he might have been sent to gaol; he was penniless, and these men had a little money, which would have enabled him to get away.
223. *Mr. Garvan.*] Had he been long here? No, not very long.
224. Were any inquiries made to see whether he had been criminal in his conduct previously? There was no reason to suppose that he had. He was the son of a highly respectable Government official in Germany.
225. *Chairman.*] He was assistant to Mr. Young? Yes.
226. And the others were boatmen? Yes, hired boatmen.
227. These men thoroughly understood the management of a boat? Yes. So did Schneider; he had been a scafaring man.

E. W.  
Fosbery, Esq.  
12 April, 1883.

WEDNESDAY, 18 APRIL, 1883.

Present:—

MR. BURNS,  
MR. HENRY CLARKE,  
MR. DAY,

MR. GARVAN,  
MR. MELVILLE,  
MR. MOSES.

J. F. BURNS, Esq., IN THE CHAIR, *pro tem.*

Henry M'Crummin Keightley, Esq., called in and examined:—

228. *Chairman.* You are Police Magistrate at Moruya? Yes.
229. How long have you been living in that district as Police Magistrate? About four years.
230. Will you be good enough to give us what information you possess with respect to the subject referred to this Committee? On the 9th October, I think, on a Saturday, 1880, I met Mr. Young, who brought some letters of introduction to me, about 3 o'clock in the day, on the gold-fields, at a place called Montreal. He told me his tent was at Bermagui Heads, and I made arrangements with him to come up on the Monday morning and camp near where I was located. We passed about an hour and a-half in conversation, and he left me at about 4 o'clock to go to his own camp, which he alluded to as at or near Bermagui Heads, and said there was some person in charge. On Monday morning early I received information from the police of the supposed wreck of a boat which had been found at Corunna Point. I happened to be ready in the saddle intending to go somewhere else, and I immediately went to the spot, which was about 6 miles from where I was, and saw the boat. Senior-constable Berry was with me, and some other persons. Berry had heard that it was supposed to be Mr. Young's boat; therefore I had a previous knowledge that it must be his boat and effects that had been found. In order that there might be no mistake I directed Berry to make a note of everything that was found at the time.
231. Have you any personal knowledge of the steps that were taken to discover the fate of Mr. Young and his companions? Yes. I had a memorandum taken of everything found in the boat. At this time the boat had not been handled by the public. I saw signs where a person had been sick in the forward part of the boat, lines lying about as if people had been fishing, and a book with Mr. Young's name in it—open, as if he had been reading. I examined two 3-bushel bags found in the boat, in which were different articles mixed up together—clothing, scientific books belonging to Mr. Young, private documents, and other things, and what astonished me, sailor's boots and trousers rammed in with them, which at once impressed my mind that these things had been handled since the party had left the boat. I knew all the parties in the boat; the boatmen well, having employed them often in the same boat. I examined the boat; I saw nothing which indicated that anything of an unusual nature had taken place on board, inasmuch as there were no marks of blood or any signs of a struggle; there were no signs of actual violence. I did hear that a bullet had been pulled out of the boat by some person and produced; I saw the bullet and the place where it was said to have come from, and I concluded that any man of experience would assume that that bullet never could have been fired from a firearm, and the position in which it was found in a crack in the paint was such as to show that it had been placed there by some person who was endeavouring to make it into a sinker for a fishing line. Other bullets were found which appeared to have been used for the same purpose. I therefore attached no importance to the finding of these bullets. I have made every search by every possible means to discover the bodies, by blasting in the water, dragging, burning the scrub, and probing the sand with rods, but found nothing. I have heard a great many outside opinions that have had no weight with me; I merely give my evidence as to what I saw and thought must naturally occur to people under such circumstances. There is one particular feature that would be lost sight of by an ordinary witness, and that is that at the time the boat might reasonably have been supposed to arrive there there was what is called a "king" tide—a very very high tide, and at that point at such a time the water is too shallow for a swimmer and too deep for a walker. At the point where the boat was fixed on the rocks there is a strong current, and all floating matter that gets into the water runs with the sharp current about north-east until it gets a certain distance out, and then falls into the current outside and goes along the coast at a distance from the shore. I tested this in many ways, and the opinion I arrived at was that the boat had struck accidentally on some projecting point of these rocks, and being frail, had her bows broken in, and under ordinary circumstances the people in her would have got out to attempt to get to land, which was only about 35 yards away; but practically, although it would seem easy to do so, it was impossible in the then state of the tide, because although the

Esq.  
18 April, 1883.

the depth was only about 4 ft. 6 in., there was about 2 ft. of long sag weed, which would entangle a man's feet, and leave even a splendid swimmer without a chance to swim. I myself offered £10 to any person who would try to swim out to these rocks in a similar tide, but none would test it, even though assistance would have been at hand in case of mishap. With regard to the debris of a meal that were discovered, there was very evident trace that it must have been some loafers or prowlers who, when the tide had gone down, had taken out all the gear in the boat after the accident, if it was an accident, for the purpose, I presume, of pillage, but the things they found being of a useless nature to them they were shoved back into the bags anyhow. There were about 2,000 men at the time on the diggings, and although I have heard some rumours of the kind, I have not officially been informed nor have I any private knowledge that there were any dangerous characters about. There was never anything in the case that impressed my mind with the idea of violence having occurred, and I fail to see the motive for it. I assume there must have been a motive. I have traced out that there was no sail in the boat, only the fly of a tent.

232. How far were the diggings from where the boat was found? Nine miles.

233. You are of opinion, from the appearance of the clothing and other articles found in the bag, that some change had been made in the way in which it was packed, between the time of the disappearance of the party and the boat being found by the police? Yes, that there had been a mixing up of Mr. Young's and the boatmen's things by some one who had been overhauling them.

234. Did you know all the men that were with Mr. Young? Perfectly well. The owner of the boat, Tom Towers, I had employed often, as well as the other fishermen.

235. Did it ever come to your knowledge that there was a report that one of these men had been seen at some place in the district after the disappearance of the party? No. The fishermen were very respectable men, resident at Bateman's Bay. I forgot to state that I ascertained that there were two in the boat who could swim and two who could not.

236. Were there not five altogether? I have no evidence to show there were five.

237. Have you ever heard of one of the parties in the boat having been seen afterwards? No, I do not think there has been a rumour of that.

238. Have you any knowledge of a man named Schneider? I have.

239. Had he any connection with Mr. Young's party? I do not think he had the slightest, beyond being camp-keeper for Mr. Young.

240. Was he in the locality when the party disappeared? Before the boat was found he was in charge of Mr. Young's camp.

241. Do you know whether he has been seen in the district since then? I have heard that some person similar to him was seen. One fact I must draw your attention to is that none of Schneider's things were in the boat when found, which is singular, if Schneider had been in the boat on the day of the party's disappearance, as has been assumed by some. Why should Schneider's things have been entirely absent if he were with the rest? If there were anything to connect Schneider with an act of violence, directly or indirectly, it would have been utterly impossible for him to dispose of these things or carry them away from where the wreck was found. My opinion is that Schneider was not in the boat that day at all, but that when he heard that he was supposed to have been drowned with the others he took the opportunity to clear off, having been connected with some matters in Sydney which he could not satisfactorily explain, and that he made away with the rest of Mr. Young's effects.

242. You have been residing in the district ever since the disappearance of the party? I have.

243. And your attention has been turned a good deal to the facts of the case? Yes, I have taken every means to discover them.

244. Can you give the Committee any information to lead them to a conclusion? In the first place, if there had been violence, which is the opinion of some inexperienced people—there must be a popular cry—if there had been violence, how could it have been possible for four men to have been murdered in the boat by one man, or two or three men? If there were any strangers in the boat they must have been there with the consent of the owner of the boat, and I know the man too well to believe he would take any strangers with him. It has been said that a number of the settlers there had arranged such a thing; but that could hardly have been the case, for Mr. Young only came there one day and disappeared the next. The diggings had not been long in existence, and the district itself was clear of crime even beyond the average. There is everything to show that such a crime, if crime there was, could not have been premeditated.

245. You are not aware of any settlers in the immediate locality who bore a bad character? I know one settler that has a bad name, but there is nothing tangible against him.

246. You know of no persons likely to assist in any conspiracy to rob Mr. Young and his party? I do not see any grounds for it. I may state that on the Sunday morning, about a quarter to 11, my buggy was taking some persons to church, and my son called my attention to a green boat which was then sailing under light canvas at a distance of about a mile from the house, going north. The time when that boat would arrive where the wreck was found would correspond with the high tide I have spoken of.

247. *Mr. Clarke.*] Where was Mr. Young's camp situated—on the north or south side of the Bermagui River? On the north side, I think.

248. You do not know from your own personal knowledge what side it was on? I believe it was on the north side.

249. Was the boat they were using, of which Towers was in charge, anchored in the Bermagui River? I believe she was lying alongside some ketch there.

250. What would be the distance from there to Corunna point? About 11 miles.

251. You seem to be under the impression there was no foul play at all? I cannot see anything to induce the idea; I have ascertained exactly what money they had on them.

252. Can you account for the boat, which you say was not a good boat, coming ashore through the reef on her keel without sustaining any great damage? I cannot account for that, but I can give you my opinion, grounded on what I saw and heard. I hailed a passing steamer immediately after the accident, on the next day's tide, and near the same time, and they sent a whale-boat, a stronger boat than the one we are speaking of, and while she was approaching I called the attention of the police to the current and to the fact that they had to back water instead of pulling. Therefore, I assume that if, as the indications showed, the men in Mr. Young's boat were fishing or reading, or otherwise occupied so as to have their attention abstracted from the boat's movements, she might have accidentally got into such a position  
while

H. M'C.  
Keightley,  
Esq.

18 April, 1882.

while drifting as to have been drawn into this place and struck upon the rocks, which may have been under water, and being stove in became filled. The holes in her were of great size, and she would fill at once. The people in her would then probably get out and endeavour to make for the shore, but they would be carried away by the current and lost.

253. Does not the fact remain that the boat was upright on the rocks? The boat had swung with her head to the current; when she grounded she came round, and got fast on the top of a cluster of rocks.

254. Was she full of water when found? Nearly, but not over the thwarts, because the papers and books were quite dry, and the fishing lines but little disturbed. If she had ever been submerged the marks where the man had been sick would have been washed out.

255. *Mr. Melville.*] You seem to be of opinion that these persons were drowned in endeavouring to escape from the supposed wreck of the boat? Yes.

256. And that in consequence of the peculiar current at this place the bodies were carried away to sea? Yes. There can be no question about one thing, that if they were carried but a very few yards from where the boat was found they could never have got in. A black gin was drowned at the same place—slipped in off the rock, and could not be saved.

257. Does it not strike you as rather singular that four persons should make the attempt at once to leave the boat, fixed as she was on the rocks, and therefore not likely to sink immediately from under them? No, I think any person would naturally try to land under the circumstances when only 35 yards from the shore.

258. *Mr. Garvan.*] What was the greatest depth of water between where the boat struck and the shore? The water at the time would be neither swimming nor wading depth—from 4 feet 6 inches to 5 feet; but the current would be such, as we saw afterwards, that they could not possibly keep their feet, and the long weeds would prevent their swimming.

259. *Mr. Melville.*] There were some remains of a meal found on shore; how far off was that from the boat? Not the length of this room from where they would have landed.

260. The miscellaneous articles found in a bag were in the boat? Yes; they seemed to have been put back hastily by some one who had been overhauling them.

261. The boat was then out in this place on the rocks? Yes.

262. Could a person at another time—at an ordinary tide—wade out to the boat? Yes; I went myself.

263. Your attention was called to a boat painted green about 11 o'clock on Sunday morning? Yes.

264. I understood you to say there was no sail in that boat, only a jib? There was not what could properly be called a sail; there was a fly of a tent made by a woman, of some cotton stuff; and there was no doubt the fly we found was that made at Bateman's Bay by Lloyd's wife.

265. Was it usual for the owner of the boat, Towers, to have a sail in his boat? That would depend upon circumstances. I know he did carry a sail, and I know who made it; they had a piece of calico called a sail, but it was really the fly of a tent; they used it for a sail.

266. Did Mr. Young mention to you that he had any intention of going fishing that day? He alluded to his intention to go to Corunna Point; he asked me where he could get a boat; I said don't bother about a boat, I will get you up there. He distinctly told me he wanted to investigate the geological formation of the coast from Corunna Point southwards.

267. He left you with that impression? Yes.

268. How do you account in your own mind for his going so immediately after he left you? I have thought that over; from what I have heard of his habits, he was a very quiet man, and I think he went out fishing to get away from the crowd where he was camped; I dare say there were hundreds of tents round him, and all the wildness that goes on at new diggings where there were all classes of persons.

269. Was it not rather a long distance to go fishing? Not to go fishing; I think he went out to poke about the bays and get away from the crowd; I should assume that he meant to camp at Corunna Point that night.

270. If I rightly understand you, you are under the impression that Schneider was left behind in charge of the camp at Bermagui? Yes. There is nothing to show that Schneider was with the boat. Everything belonging to him was missing, and all the rest of the property, everything belonging to Mr. Young, was there. There could not have been such a peculiar separation of one lot of property from the other without premeditation. I do not believe Schneider was in the boat at all; I believe he is alive now.

271. Following out that impression, you believe he made away with the camp and all the property left there? Yes, as he had made away with other things before. He dared not come back to Sydney, as I afterwards found; and that agrees with what I then thought.

272. Did you observe how many persons were in the boat you saw going by your house on Sunday morning? No, I did not take particular notice of her. She was jogging along slowly with just enough wind to say she was sailing.

273. Assuming that there were four persons in the boat besides Schneider, and that they were poisoned by him, would it have been possible for him to have dropped the bodies into the sea, and, not knowing the currents or the coast, have allowed the boat to drift ashore so that he could land at Corunna Point and get away? Taking all the surrounding circumstances into consideration, I do not think that he or any other person committing the crime would have left traces of it behind him. If the murder was committed by poison at sea why should he have left Mr. Lamont Young's books there. A man attempting to commit a murder, or several murders, would, I should suppose, remove the traces of the deed, but there are the books and papers. If that occurred, why did he not throw overboard all the things that were found in the boat, so as to destroy all traces of the crime. There is evidence that Schneider was not one of the party, as there were only four in the boat. That appears from the evidence of several parties who have never said there were five.

274. Has any evidence come under your notice of the report of a gun having been heard on the Saturday night? I have heard that. I have heard some things so ridiculous that I could not allude to them in evidence. To have fired any weapon off at that place would have been to draw the attention of not less than a thousand men in less than five seconds.

275. *Mr. Day.*] Were there a thousand men within a short distance of Mr. Young's camp? Yes, within cooeys of his camp.

276. *Mr. Melville.*] Notwithstanding your strong opinion that no murder was committed, do you think it would be advisable for the Government to offer a large reward and a free pardon to an accomplice? I think it would be advisable for the Government to take any steps they think proper.

H. M'C.  
Keightley,  
Esq.  
18 April, 1883.

277. Do you think a substantial reward should be offered and a free pardon to an accomplice? I could hardly answer that question. It would be like holding out to the public a conviction that there had been murder, when there is really nothing, beyond their actual loss, to invite the idea, and, having been seized of the case more than any other person, I do not think there has been reasonable grounds for the supposition, therefore I could not propose to offer a reward. If I thought there had been violence I should say yes to your question. But I think it has been simply a fearful accident.
278. How on that supposition would you explain that four men should be drowned. Is it not probable that at least one of the four should have escaped? I could not suppose that any four men of ordinary sense in a boat full up to its thwarts with water, and within 35 yards of the shore, would hesitate about attempting to land, when they had the Pacific Ocean on one side and the shore so near them on the other. The boat was filled up to the thwarts. There is one piece of circumstantial evidence, which is, that one of these persons had drawn off one boot and had not time to take off the other; one boot was found on the thwart of the boat, and that boot was dry, which showed that it had been placed on the thwart.
279. Could any person in a boat at this spot have seen the bottom? No, I do not think so, because, as I have told you, the bottom was covered with weeds. Where the boat was found there was a mass of long saggy weed, so that any person jumping out could not see the bottom.
280. *Mr. Moses.*] Did you know the whole of these three boatmen well? Yes. Two were boatmen, one was a landsman, an old man of sixty-five.
281. Were they married men? Two of them were, the two boatmen.
282. Were they two experienced men? Yes, one, Lloyd, had been second officer in the Illawarra Company's service.
283. Did they know this particular locality? They had not the slightest knowledge of it; I know that; I know they were never there at all.
284. At what time was the boat discovered on Sunday? About 4 o'clock in the afternoon.
285. At what time did you go there? It was reported to me next morning, Monday morning, about 7 o'clock, and I went off to the spot in a few minutes.
286. Your attention was called to a passing boat on Sunday morning? Yes.
287. How long would it take the boat to sail from Bermagui to Corunna Point? About two hours ordinarily. One thing has not been alluded to. When the wrecked boat was first seen by me the mast and so-called sail or fly of a tent and two paddles were lashed to the thwarts of the boat. The oars were not in use.
288. What was the time of high tide that morning? To the best of my knowledge about half-past 1 or 2.
289. Did you hear of any traces of footprints on the sand? I would not attach the slightest importance to that, because there had been half-a-dozen people there before we got there.
290. *Mr. Day.*] Was there any appearance of struggling or anything of that kind at the place where Mr. Young was camped at Bermagui? Nothing transpired as to the camp.
291. Did no one search the place where he had his tent at Bermagui, after the disappearance of the party, to see whether there had been any struggle, or blood, or anything to indicate what might have happened there? I do not know; if it was done the police have done it. You must understand that there were two or three hundred people there, and there were tents all over the place.
292. *Mr. Garvan.*] You think it scarcely possible for any great struggle to have taken place without its being heard by those in the other tents? It could not. The four were not camped together.
293. *Mr. Day.*] Were these tents put up along the banks of the Bermagui River? Yes; there was what is called a "rush" there, to the new diggings.
294. Did you make inquiries among these men as to the disappearance of Mr. Lamont Young's party? Of course inquiries were made.
295. Did none of them know anything about it—about their striking their tent and going away in the boat? No, I do not know of anything ever being brought forward about that. If the tent had been moved somebody might have casually noticed it.
296. Nothing came to your knowledge? No; I never could trace when the tent of Mr. Lamont Young was struck.
297. It was moved away? Yes.
298. And although there were people all around his camp they never noticed his tent being struck? No.
299. There would have been nothing in it if the party had not disappeared? There is nothing, in such circumstances as then existed there, in the fact of a man moving his tent.
300. *Mr. Garvan.*] You saw a boat passing about 11 o'clock on Sunday—were you satisfied it was the same boat? I am not, anything further than the circumstantial evidence; there were about four people in it; when I say four I do not want to tie myself to that number; the boat did not look crowded.
301. You think it was the same boat? I fancy so.
302. And you think those in it were Mr. Lamont Young and party? I cannot say that, I can only assume that they were. I should say, from the way they were going, they were drifting perhaps two knots an hour.
303. *Mr. Clarke.*] Were Towers and party permanently engaged by Mr. Lamont Young? No.
304. Or were they merely engaged for the day for a fishing excursion? Towers and party came on a trading expedition from Bateman's Bay, with a few bags of potatoes and other matters that they wished to dispose of; Mr. Young was inquiring for a boat to take him out for the day, and, I presume, dropped across these men.
305. Do you think they stopped at Mr. Lamont Young's camp that night—the night previous to his disappearance? No; Mr. Lamont Young's tent was just a small slip of a tent, holding two and no more. With reference to Schneider, there is one thing which shows that he could have not been in the boat. If he had done all that has been suggested, it is hardly within the range of possibility that he could have got away by passing through two or three thousand people; he must have been seen by some one; he must have crossed Walloga Lake, which could only have been effected in a single boat, but there is no proof that he passed there.
306. If Mr. Young's camp had been on the south side of Bermagui River he could have got away much easier. We have evidence that his camp was on the south side? I think your information is wrong. There is some sort of left-handed evidence that some woman put across some follows early in the morning, and it must have been from north to south, for if south they were coming the wrong road.

307. *Mr. Melville.*] I presume the fact of so many persons being there would be a reason why Schneider would get away unobserved? Yes; they were landing from different parts of the Colony continually. If a tent was struck another would be in its place in five minutes.

308. Do you think a reward should be offered for the discovery of Schneider? Yes, I agree with you there. I believe that Schneider heard on the Monday morning that he was put down as a dead man, being supposed to have perished with the rest, and, as a man would do, situated as he was, under ordinary circumstances, he cleared off to avoid the consequences to himself of certain matters that were against him. Besides Mr. Young had instruments of some value, which have never shown up since his disappearance; none of his effects have shown up; and it is only reasonable to suppose that when Schneider had an opportunity to escape, and that justice would overtake him if he stopped, he would go.

309. *Mr. Day.*] Have you any evidence or knowledge at all of any person stating that a man exactly like Schneider made his appearance at a house down there on the Monday after Mr. Young's disappearance? Yes.

310. Have you any evidence as to a photograph being produced and the party at whose house this man had breakfasted saying it was like Schneider? That was told to me.

311. You know he had a scar across his cheek? Yes.

312. That would appear in the photograph? Yes. A photograph was sent to me by the authorities, and I heard that some woman said it was like the man who passed her house, but it was nothing of weight, nothing good enough to put down as evidence, or I should have had it.

313. Did you make any inquiries about it? I did, and they only confirmed what I thought, that Schneider disappeared for the reason I have given.

314. Did you examine the woman yourself? I did not. There has been no official examination. All that I could do was to collect all the information I possibly could and send it to the authorities. There is not a strong cord in the whole of it.

315. To the best of your belief Schneider has made his escape? Yes.\*

Mr. Moses Owen called in and examined:—

316. *Chairman.*] Were you employed by the Government in connection with some inquiries made with regard to the disappearance of Mr. Lamont Young and his party? Yes.

317. Can you tell us what you did in the matter? I was employed by the Government to go down and search the beach and the coast to see if we could find any remains of the party.

318. Who accompanied you? Mr. Alexander Gray. We arrived there on the 15th February, 1881. We made a thorough search of the beach and sand all along the coast, from the Bermagui River to where the boat was found at Corunna Point. We could find no trace whatever of the missing bodies. That was what we were particularly sent for; but while there we were getting all the information we could from people about the place.

319. What was the impression made on your mind by the information you obtained? The impression I got was that there had been a murder; that there was no question that a foul murder had been committed; and that some persons acquainted with the place had something to do with it.

320. What led you to believe there had been a murder? From the information we got as to how the boat was found, and the state of the clothing and other things that were in the boat and in the water close to where the boat was found. It appeared that persons had come out of the boat, and had something to eat on the grass close by.

321. Could you suggest any motive for the murder? We could not.

322. You think that some persons came out of the boat—that there was evidence of the fact of their coming out? Yes, some persons had evidently landed there, and the party from the boat had something to eat upon the beach. My impression is that the parties were murdered 12 miles from the spot where the boat was found—that they were murdered on the Bermagui River, and that the boat was afterwards taken to Corunna Point and smashed, to lead people away from the spot—off the scent in fact.

323. You think the parties who brought the boat there had something to eat on shore? Yes.

324. Is it not possible that some person coming up, and seeing the boat there, might have gone on board and taken something to eat, without being connected with any murder? I do not think that was likely.

325. What else did you observe to lead you to believe that a murder had been committed? There was a bullet mark on the boat, and all the valuables were gone; the sail, some rope, and other things were gone.

326. What led you to suspect that some people in the district were concerned in the murder? From the place in which the boat was landed. I was given to understand that on the evening before they were camped on the Bermagui River, 12 miles away from this place.

327. Who told you they were camped there? That was the general impression in the neighbourhood.

328. Who told you? The people about the Bermagui River, Mrs. Tomsett and others.

329. Did they profess to know of their own knowledge? Yes.

330. On which side of the river were they camped? On the south side.

331. What inquiries did you make with respect to any complicity in the supposed murder by people in the district? We made all the inquiries we could in a conversational manner, getting general information.

332. That was during the time you were with Mr. Gray? Yes.

333. Did you make known to each other the information you got? Yes.

334. Had you the same impression as Mr. Gray with respect to the disappearance of Mr. Young and party? No, I think not at first.

335. Did you come to the same conclusion? I cannot exactly say that Mr. Gray came to the same conclusions as I did; I was under the impression that he had different ones.

336.

ADDED (*on revision*):—I am aware there have been sundry persons acting as detectives, who have endeavoured to unravel this affair without any tangible result. I am aware also there is a too great tendency to give a colouring of a tragic nature to a disaster that may have originated under ordinary circumstances, or been the result of accident. Mr. Young and party may have perished from violence, but there is not a fraction of evidence that indicates violence has ever occurred. There is no case during the last twenty-five years that has so closely engaged my attention, or has had so little material on which to arrive at a definite conclusion.

H. M'C.  
Keightley,  
Esq.  
18 April, 1883.

- Mr. M. Owen. 336. Did Mr. Gray express an opinion that they were murdered? There seemed to be no question in his mind but that they were murdered, three or four of them at all events. He was always under the impression that Schneider was not murdered.
- 18 April, 1883. 337. What was your own impression? My own impression is that he was murdered.
338. Could you tell us who you think committed or had a motive to commit the murder—did you and Mr. Gray concur in opinion as to the parties in the district who had a guilty knowledge of the disappearance of Mr. Young and party? Yes, we agreed there; we thought one party in particular seemed to know something about it.
339. What led you to think so? When we first arrived on the Bermagui River we were told that Mr. Young and his party were camped close together. The persons to whose hut we went for our breakfast when we first arrived knew a good deal about the case—a lawyer named Tomsett and his wife. Mrs. Tomsett informed us that a day or two after the disappearance of the party three persons came across there at night or early in the morning, and in a very suspicious manner wanted to know where the puntman lived, as they wanted to cross the river; they had great suspicion, they said, on one of these persons in particular, and from the information they gave in reference to him Gray was under the impression that one of them was Schneider. It appears that Gray had known Schneider before, and from the information and particulars given he thought Schneider was one of these persons. To discover as far as possible where these persons went, we followed up the coast southwards for about 3 miles to the place of a settler named Jagers. We went to Jagers' place on the first or second morning after arriving to get information in reference to these three persons who crossed the river, and from the description Jagers gave of one of the party Gray was fully under the impression that one was Schneider.
340. The description you got corresponded with the description of Schneider? Yes. We were not satisfied altogether, or at least wanted more information, if possible, in reference to this, but before going there any more we shifted away to Corunna Point where the boat was found, and were there a month or six weeks before we came back to Bermagui River. After arriving back on Bermagui River we camped there and commenced our search about the river. We went on Good Friday morning to Jagers' place to have another talk about these parties that crossed the river, and particularly to see Mrs. Jagers, because she had taken particular notice of this person whom Gray supposed to be Schneider, and we were wanting to get more information from her. When we got there Jagers was going out; he went away on the business he intended going on, and when we were coming back, after interviewing Mrs. Jagers, we met Jagers returning. It appeared to me that he was coming back very hurriedly in order to see us; he seemed excited, sat down and commenced talking about the affair. In conversation there were two questions he asked which I thought rather strange; one was, what sort of a man was Mr. Young, was he a good runner? and the next question was, could we give any description of his watch? Gray, who had been with Mr. Young before, said he was a good runner, and Jagers seemed to think so to; and in reference to the watch, Gray, as far as my recollection goes, could not give him any information. I put the question to him myself that I thought these were strange questions to ask, and then he gave his reasons for asking them; in reference to the watch he said perhaps he might find out something about it—that he might get on the lay of the watch—and this led me to think that Jagers must know something about it. His reason for asking whether Mr. Young was a good runner, he said, was connected with an idea that he expressed as to how the murder might have occurred; he said it might have been committed at Corunna Point by some persons working there in a claim—that two or three might have been working in a claim, and knowing this party had landed there in the boat, might have pretended to run to them suddenly for help, saying that some persons working in the claim were injured or fast in a drive, and that they had run to them for assistance, and then when some of the party had run away from the boat they might have killed those that came first and have gone back and murdered the others.
341. This was Jagers' idea of how the murder might have been committed? Yes. He had very different opinions at times how it occurred.
342. What did Jagers do or say to lead you to suppose he had some knowledge of the crime? He used to tell us different ways that it could have occurred.
343. You used to get into conversation with him, and in the course of conversation he made some suggestions as to how the murder might have been committed? Yes.
344. What led you to believe he had some personal knowledge of it? More particularly in reference to the watch; he seemed to know something about the watch. We said we would write to the department and get a description of the watch, and we wrote but got no answer.
345. How long were you engaged in this business altogether? About three months.
346. Where have you been living since? At Wallsend; I am still living there.
347. Mr. Clarke.] You are under the impression that Mr. Lamont Young and party were murdered? Yes.
348. Where? I think they were murdered on the Bermagui River.
349. Did you search in the neighbourhood of their camps? Yes.
350. In what way? We had some long probing irons, and we dug the sand up in places, and searched about the bush; where the bush was very thick we set fire to it.
351. Assuming they were murdered there, can you give any idea what became of the bodies? My impression is that they were murdered at the camp on the Bermagui River, wrapped up carefully in the sail of the boat, and taken out of the river and thrown into the sea.
352. If that was so there must have been several persons engaged in the removal of the bodies—that could not be done by one man? One man could not very easily do it.
353. Are you aware, or did you hear, of a boat starting on the Sunday morning from the river and going north? I did hear there were several boats out that Sunday.
354. Mr. Melville.] You have been at Corunna Point? Yes.
355. And you have been to the rocks where the boat was found? Yes.
356. Did you notice at any time when you were there what was known as a "king" tide? No, not a very high tide.
357. Did you take notice what sort of a bottom it was where the boat was found? Yes.
358. Do you think it possible for persons in the boat on these rocks to have seen the bottom—supposing the boat had drifted in there on a "king" tide, could the persons in her have seen the bottom? I think they could. Just outside of where the boat was found there was a great deal of seaweed.
359. Between where the boat was found and the place on the main land where the food was consumed, what sort of a bottom was it? A little sand and broken rock.

360. Are you a swimmer? Yes, a little.
361. Could you swim from where the boat was on to the sand? During low tide it was dry.
362. At high tide? In calm weather I could; the depth may be from 4 to 5 feet in calm weather at high tide.
363. From your experience gained in searching and looking about this place, do you think it possible for four persons to have jumped out of this boat and been drowned at that point before they could get ashore? No, I think not.
364. It is not a feasible idea? No, I think not; and, besides, if they had done so, the probability is they would have been washed ashore from there.
365. Did you see any of the persons that were in any of the boats that were out on that Sunday? No.
366. Were the blacks out that morning? Yes.
367. Did the blacks whom you saw lead you to believe that they knew Mr. Lamont Young and party? Yes, they had seen them before.
368. Did they see any party that they identified with Mr. Lamont Young's party out on that Sunday morning? No; one blackfellow in particular said he had paid particular attention to all the boats that were out, and he did not see that boat out that day at all.
369. Did you hear anything about any boat painted green? I do not remember that I did. It is a good while now since I was there, and I have not even had an opportunity of looking at my notes.
370. Did you furnish the Government with any report on your return? Yes.
371. Supposing the murder had been committed at the Bermagui River, how far out would the boat have to be taken to render it sufficiently safe to drop the bodies to meet the southerly current? About a mile from the river mouth.
372. Do you think it at all probable that a party of four persons in a boat would be all so engaged fishing or reading as to allow their boat to be taken with the current on to these rocks? Certainly not.
373. From what you saw at Corunna Point, are you of opinion that that boat was brought there at high tide or low tide? At high tide, I believe.
374. From all the circumstances which came under your observation while you were at Bermagui, what is the opinion you formed as to the fate of this party? As I have already stated, I believe they were murdered on the Bermagui River, either by poison or some other mode, towed out to sea a mile or so from the river mouth, and dropped into the current that flows to the south.
375. Did you hear anything about what became of Mr. Lamont Young's camp after he disappeared? No; there was not a vestige of it left.
376. *Mr. Day.*] I think you said you believed they were murdered at their camp on the Bermagui River—are you aware that at the time of their disappearance hundreds of people were camped quite close to them? Not on the same side of the river, but on the opposite side of the river.
377. Were there no camps on the same side, the south side? From what I understood at the time there were not many. The gold-fields were on the north side.
378. And Mr. Young was camped by himself on the south side? Yes. There may have been a few camps there besides his. I was given to understand that on the Saturday there was a little vessel moored there close to the camp.
379. You and Gray went to Jagers' house together? Yes.
380. Did Gray produce a photograph of Schneider? He did afterwards.
381. Did Mrs. Jagers say that was like one of the men that stopped there and had breakfast after having come across the river early in the morning? Mrs. Jagers was very backward in giving her opinion about it. In the first instance, when Gray gave a description of Schneider, Jagers thought the description tallied with this person, but when Gray showed him the likeness, which was only a pencil sketch, he then seemed to have very great doubts about it, and thought it was rather too smart-looking for the man supposed to be Schneider, but he said there was a similarity about it.
382. Could you trace these three persons who went to Jagers' any further? No, we could not trace them any further.
383. Jagers could give you no information who they were or where they went to? He informed us they went down the coast towards Bega.
384. Could they get along the coast to Bega? Yes, it is only 40 miles.
385. *Mr. Melville.*] The Department simply instructed you to search for the bodies? Yes, those were our instructions.

Mr. M. Owen.

18 April, 1883.

---

THURSDAY, 19 APRIL, 1883.

Present:—

MR. HENRY CLARKE,

MR. MOSES.

GEORGE DAY, Esq., IN THE CHAIR.

Senior-constable John A. Berry called in and examined:—

386. *Chairman.*] You are a senior-constable of police at Bermagui? At Eurobodalla at present.
387. You have been for some time in the locality of Bermagui? Yes, nearly six years.
388. Were you in charge there when Mr. Lamont Young and party disappeared? No, I was not in charge. Sub-Inspector Keegan was in charge; I was living there under him.
389. You were in the Police Force there at the time? I was.
390. You knew Mr. Lamont Young? Yes, I knew him personally.
391. When did he go down to Bermagui? In the early part of October, 1880.
392. How far was his camp from your station? About  $3\frac{1}{2}$  or 4 miles.
393. Was he camped on the southern side of the Bermagui River? Yes, on a point on the southern side.
394. Was it a large tent he had? I never saw his tent—I never was at his camp; I only knew from himself where he was camped.
395. Did you see him on the Saturday previous to his disappearance? I did, up to about 4 o'clock in the afternoon.

Senior-constable  
J. A. Berry.

19 April, 1883.

Senior-  
constable  
J. A. Berry,  
19 April, 1888.

396. Where did you see him? I had dinner with him on that Saturday, at a restaurant kept by a Mrs. Quinn.
397. When he left you, was it with the intention of going to his tent? When he left me at 4 o'clock he started for Bermagui Point.
398. Did he give you any notion that he was going to shift from there? None whatever.
399. Did he promise to meet you the next day? He did—he promised to go fishing with me on the following day.
400. Will you tell the Committee what took place from the time of your having lunch together? After lunch he wanted to see Mr. Keightley, the Warden. I asked Sergeant Stapleton to take Mr. Lamont Young to Mr. Keightley and introduce him. He did so, and they had some more lunch together; afterwards Mr. Lamont Young came into our tent in the police camp. We were at the time getting our lines and fishing tackle ready for the following day, and during the conversation he promised to go fishing with me on the Sunday.
401. What did he say? He said, "If I do not go to dinner at Mr. Hobbs's I will go fishing with you to-morrow." He then left the camp and went strolling through the diggings.
402. After 4 o'clock? No, this was before 4 o'clock. About 4 o'clock I met him again in the street. I said, "Are you off to your camp?" He said, "Yes." I said, "Don't forget to-morrow"; and he replied, "Oh, no, I will remember." And that was the last I saw of Mr. Lamont Young.
403. Will you explain all the circumstances of the case as they came within your knowledge afterwards? I did not hear anything of Mr. Lamont Young till about 6 o'clock on the Monday morning, when a young man, whose name is Albert Reid, came to the police tent and called out, "Constable Berry, I want you." I went outside and said, "What is the matter?" He replied, "A boat has been found on Muttonfish Point at Corunna."
404. Meaning Mr. Young's boat? He did not know then whose it was. I said, "I will go up through the day, and have a look at it; I suppose it is a ship's boat." He said, "No, it is no ship's boat." I said, "What do you think about it?" He replied, "I have a book, which was in the stern sheets of the boat, with the name of Lamont Young in it—a book on geology." I then reported it to the sergeant immediately. He ordered me to saddle my horse and go across to Mr. Keightley, who was at Mr. Hobbs's, and report the matter to him. I did so; and Mr. Hobbs, Mr. Keightley, and myself proceeded to the scene. We arrived there at half-past 10 o'clock. I at once went into the boat and took all the articles out of it; they were in bags—three 3-bushel bags; I examined the contents of these bags, and found from the appearance of the articles in them that they had certainly been overhauled previous to my seeing them—Mr. Young's letters and papers being all distributed through the bags in amongst the sailors' clothing and boots. The last letter that came out of the bag was one from his mother. I took an inventory of the articles, and forwarded it, with a report of the occurrence, to the Inspector-General of Police. I went home that night to the camp, and on the following morning was not able to return, being taken sick. It was nine days from that to the time I returned again to duty. I went home on the Tuesday very ill with a kind of fever, then prevalent there—any amount of them were sick. When I returned to duty I was informed that a fire and debris of a meal had been found on the shore close to where the boat was wrecked; some studs were also found and a pipe. I searched about the beach for a distance of (I suppose) 10 miles up and down for about three months afterwards, inland and on the beach, assisted by another constable. Mr. Binney, of the Mining Department, was there for about two months, and he was searching also. The matter has never been out of the hands of the police from that day to this. There were two men named Gray and Owen sent down, I believe, by the Mining Department to make a search; and afterwards a person of the name of Hannan was sent down—by whom I do not know.
405. When you went down with Mr. Keightley and Mr. Hobbs to where the boat was found, you say you went into the boat? Yes.
406. Was it dry land between the shore and the boat? It was not dry, but I could go into the boat dry by stepping from one rock to the other—I did not wet myself at all. I have seen it perfectly dry at low tide.
407. What is the greatest height of tide you ever saw there? I saw once a very high tide when an easterly gale was blowing.
408. How many feet was it between where the boat was found and the shore? About 20 or 25 yards from the shore to where the boat was jammed in the rock; it was a shingly beach.
409. What is the greatest depth of water there at any time within your knowledge, between the boat and the shore? At high tide I could walk out, if I could stand the surge, about up to my neck in water.
410. You say you got three 3-bushel bags of clothing and other things; was there anything of value? Yes, some of Mr. Lamont Young's things, which I recognized as his myself.
411. What was there besides clothing? Papers—geological papers.
412. Any valuables? Nothing specially valuable; no jewellery or money—nothing of that kind. I believe there were three shirt studs found on shore by another constable, but I never saw them.
413. There was nothing valuable except the clothing? No.
414. There were no instruments? No, except a little compass.
415. Mr. Young had valuable surveying instruments, had he not? The only valuable instrument that I know that he had was one he left at the prospectors' camp at Montreal.
416. From what you saw when you went to the boat, were you under the impression that the boat had been capsized? No, I do not believe it ever capsized. When I went into the boat, their fishing-lines, a piece of mat, a knife, and a pair of spectacles were on the seat. Before getting into the boat I examined them.
417. You are under the impression that if there was any one in the boat the day before they must have got out of her without the boat capsizing? They might have jumped out of her if she struck a rock outside the headland where the boat was found.
418. Was that a portion of the shore where an experienced seaman would take a boat? Yes, anybody could go in there unless it was blowing a north-east gale.
419. Was it blowing a north-east gale on that Sunday? No.
420. Was it a windy day? Only middling, not a hard wind; I was out in it, and we had no difficulty in landing through the surf; we put the boat out through the surf and came back through the surf.
421. Who found the studs? Constable Barter.
422. On the shore opposite where the boat was found? Yes; very nearly opposite where the boat was found is a long beach.

423. Were these studs known to belong to Mr. Young? No, nobody knows whose studs they were.
424. Did you hear it currently reported that a boat of this description was seen emerging from the Bermagui River and going to sea? Yes.
425. From the mouth of the Bermagui River to where the diggers were camped, how far is it? By sea about 3 miles in a direct line.
426. Was it 3 miles from where Mr. Young's camp was to the diggings? Yes; it would be 4 the way he would have to go to where the main body were; but the nearest diggers' camp would be about a mile; there were camps right down to Bermagui.
427. *Mr. Moses.*] Were there any tents about Mr. Lamont Young's camp? Not that I know of; I did not see Mr. Lamont Young's camp.
428. *Chairman.*] Did you hear that a large number of persons had seen a boat pass in the morning? No, only two that I heard of; only two have ever told me they saw it, but I have heard that another man did see it.
429. As you were on the ground from the time that Mr. Young went there, what is your opinion with regard to his disappearance—do you think he was drowned, or do you think he was murdered? It is hard to say. Nothing has been discovered by the police to show that he was drowned, and nothing to show that he was murdered, in any shape or form; but my own belief is that Mr. Lamont Young never saw Corunna Point—I do not believe any of them saw Corunna Point. Nothing was ever discovered to prove either murder or drowning, by any of the police; and several of them had the matter in hand, and did all they could to find it out.
430. Did you hear of three persons having breakfast at Jagers' place on Monday morning? Yes.
431. Did you trace them afterwards? The Bega police overhauled them, and they accounted for themselves satisfactorily. One of them was known to the police.
432. Were they proved to be the same men? Yes, they acknowledged having crossed the river and had breakfast at Jagers'.
433. *Mr. Clarke.*] Taking all the circumstances into consideration, can you form any opinion whether Mr. Young and his party were murdered or drowned? I cannot.
434. Can you tell the Committee where Towers and Lloyd and the man with them were camped? I have heard they were camped on the same side of the river as Mr. Lamont Young. There were two ketches in the harbour at the time, the "Magic" and the "Maid of the Mill." The crew of the "Magic" were overhauled by the Sydney police, I know, because I telegraphed to the Inspector-General about it.
435. Do you know for a fact that Towers and party were camped on the south side of the river? Yes, they were camped on the south side, but whether they camped with Mr. Young or not I could not tell.
436. Were they permanently engaged by Mr. Young? Nobody ever knew that he knew them or knew anything at all about them.
437. Was it known for a fact that this was their boat that was found on Corunna Point? Yes, I believe it belonged to Towers.
438. Did you see the boat, similar in appearance to the one found on Corunna Point, on the Sunday morning? No.
439. I think you said you were fishing? Yes. I did not see any boat of that description passing me; I saw another boat out at sea.
440. Were Towers and Lloyd capable of handling a boat? Yes, they were old sailors. Lloyd had been chief mate of the "Frances Guy" at Bateman's Bay.
441. He had been at one time in the Illawarra Company's service? Yes. Towers was an old fisherman.
442. Have you ever heard what became of anything belonging to Mr. Young that was left in his tent—what became of his effects? No; the tent was never found.
443. How long had Mr. Young been at Bermagui? He arrived there on the Friday evening, and on the Sunday he was missing.
444. *Chairman.*] Does the Committee understand that Mr. Young had only been there on the Friday and Saturday? Yes. Of course we do not know whether he was there on Sunday.
445. *Mr. Clarke.*] After having fixed his tent on the southern side of the river, is it likely he would shift it on the Saturday night? No. He was seen going through Bermagui at 6 o'clock on the Saturday evening, making through a paddock towards his tent. He never told us anything about Corunna; he said he was going to make observations of the gold-field and report to the Department.
446. He had no time to make any observations? No; he did nothing on Saturday.
447. After you found he was gone, did you search his camp? It was searched, but not by me.
448. How long after? I do not know; I was not there for ten days after; the second day I went home sick.
449. Are you aware whether Mr. Young had any money or not? I am not aware; I do not think he carried much money; he used to carry a cheque-book.
450. Are you aware whether Schneider or any others of the party had any money? I am not aware; I have heard that Lloyd had £30.
451. About his person? Yes.
452. *Mr. Moses.*] You say the water at the place where the boat was found sometimes attained a height of 5 feet 6 inches: did it often come to that height? That was about an average tide there.
453. Who were the first persons that discovered the boat? A man of the name of Johnson discovered the boat, and reported it to a man named Albert Read, who told me.
454. May not the articles you found on the thwarts of the boat have been placed there by the persons who first discovered the boat? They might. There were five stones in the boat, and a bag of potatoes also. If the boat had been capsized, these would not have remained in her.
455. Was there much water in the boat? There was no water in her at all; she was high and dry on the top of a rock, and the water washing underneath the keel; she was jammed up on a pinnacle of a sugar-loaf rock. We had to wait for the tide to take her off. If the boat had been capsized, nothing would have stopped in her.
456. You said Mr. Young had made an appointment with you to go fishing on Sunday? Yes.
457. Finding Mr. Young did not keep his appointment, did you go to look him up at his tent? No, I did not; my reason was that he said he might go to dinner with Mr. Hobbs.
458. The studs and pipe found on the shore you did not see? I saw the pipe, but not the studs.
459. Do you know whose pipe it was? No. I found his cigar-case and cigar-holder in his bag; I knew his cigar-holder.

Senior-  
constable  
J. A. Berry.  
19 April, 1883.

Senior-  
constable  
J. A. Berry.  
19 April, 1883.

460. When Mr. Young was missing, who made inquiry as to his tent—where his tent was? That I do not know, unless Sub-Inspector Keegan did. I was away for nine days, and during those nine days I do not know what transpired; I was simply then put on duty again to make further search.
461. Do you know whether Mr. Young had a mate with him? Yes, he had a Mr. Schneider with him; he had dinner with us too.
462. Schneider was to have been one of the party on Sunday? No; as soon as Schneider had his dinner he went away to Bermagui. Mr. Lamont Young would have stopped there only for Schneider; when asked to stop he said, "No, I have a mate down there; he is alone"; he said, "I will go," and away he went.
463. Did you discover in these 3-bushel bags any articles belonging to Schneider? Nothing that I could recognize. I did not know Schneider previously, but I had seen Mr. Young eighteen months before; he had stopped with me.
464. There were no marks on any of the clothes to identify them as Schneider's? No.
465. Did you notice any particular mark on Schneider? No, only that he wore spectacles.
466. On his face, I mean? No, I never noticed the scars he is said to have had on him; I have heard of them since.
467. Did you hear of his photo. being produced, and Mrs. Jagers identifying it? I heard of his photo. being produced; I gave it to the man who produced it; but Mrs. Jagers never identified it.
468. *Mr. Clarke.*] Have you ever heard of Schneider since? No. I have heard that he pawned certain articles previous to leaving Sydney.
469. Is it the general impression that Schneider was in the boat with Mr. Lamont Young and the other three men? I think so; some believe he was, some believe he was not; some think he was the murderer; how they come to that conclusion I do not know.
470. Did you know the position where Mr. Young's tent was fixed? Yes.
471. At that time? No.
472. Were there many other tents in that particular locality? I do not think there were; I do not think there were more than two tents on that point. They were camped at a place called Barter's Hole, where the vessels lie at anchor.
473. *Chairman.*] What distance from the mouth of the river? No great distance.
474. Do you know whether there was an anchor attached to this boat? The wife of Towers or Lloyd said there was a piece of pig-iron about 56 pounds weight.
475. *Mr. Clarke.*] No kedge. No.
476. *Chairman.*] Was that in the boat when found? No; 75 feet of line were missing also.
477. Were there any paddles? The mast and paddles were lashed to the seat.
478. No oars, No oars—only two paddles.
479. No sails? No.
480. I suppose the boat was usually sailed? Yes; she sailed down—there is no doubt about that. Their wives saw them start from Bateman's Bay, and they had a sail then.
481. From all that has come to your knowledge, are you under the impression that Mr. Young and his party were in the boat when they left the mouth of the river? No, I am not under that impression.
482. You think Mr. Young and these fishermen did not go in that boat on the Sunday? No, I do not think they did—not alive; if they went alive the boat would not have been found in the position she was in.
483. Did any one search close to where Mr. Young was camped, after his disappearance? Yes, all round.
484. Who did? I did.
485. I mean the next day or the day after? I do not know who did immediately after; I know nothing of what was done during the nine days I was sick.
486. I thought you might have heard? No, I do not think they went out in the boat that morning, but I cannot say they were murdered; by saying they did not go in the boat I do not say they were murdered.
487. Was there anything to induce these boatmen to clear out? Not that I am aware of. You might put it the other way,—what induced the murder, if there was a murder. It is quite impossible to say whether they were murdered or drowned. I have found out nothing to prove to me that there was a murder.
488. Assuming that they did go in the boat, and the boat was thrown upon the rocks at Corunna Point, and that they jumped overboard under the impression that she was sinking, would there be any probability of their reaching the shore in safety? Yes, any man that could swim could get ashore there, or if he did not get ashore his body or portions of it would come ashore; it might be broken up.
489. Was there any seaweed about? Yes, that was dragged well.
490. Would that have the effect of stopping the body from coming ashore? It might for a time, but when decomposition set in it would come ashore.
491. Are there any sharks there? They are not so numerous on that coast as in other parts. I would not be a bit afraid to go out in a boat to-morrow and jump out of the boat and swim ashore. I have swum round that very place myself.
492. *Mr. Moses.*] Is there a strong current there? There is a surge; the waves keep surging against the rocks, and would hurt you if you did not look out.
493. Did you find any other articles except those you have mentioned? Yes, I found a sheath-knife.
494. Near the boat? Yes, in the sand, and I found an axe and the hoop and staves of a cask.
495. Were any other articles discovered in the water? I think there was a tin-dish in the boat, and a shovel was found in the water close to where the axe was found.
496. Were there any marks on these articles, the axe or the knife or the shovel? No.
497. No marks that would identify them as the property of the boatmen or Mr. Young? No.

Mr. Peter Engstrom called in and examined:—

- Mr. P. Engstrom.* 498. *Chairman.*] You live at Bermagui? At Montreal at present.
499. That is not far from Bermagui? About 3 miles.
500. Were you living at Bermagui when Mr. Young was camped on the river? Yes.
- 19 April, 1883. 501. Where was Mr. Young's camp? I believe Mr. Young was camped on the south side.

502. Did you know Mr. Young personally? Yes, previously on the Gulf, at Nerrigundah.
503. Did you see him after he went to Bermagui? I saw him on the Saturday evening coming from Montreal.
504. Will you kindly give the Committee any information you can, in your own way, about this case? I saw a boat go out on the Sunday morning at half-past 6, which I believe to be the boat Mr. Young was supposed to have gone in, going north, towards Montreal, along the coast. There were more than two men in it, I am certain—I could see more than two.
505. How far were you from it? A little over a quarter of a mile. Two steamers were landing passengers the same Sunday morning.
506. *Mr. Clarke.*] In the Horse-shoe? Yes, some were landing in the river, some in Horse-shoe Bay.
507. *Chairman.*] Were you close enough to say whether the boat was painted green? It was a light-coloured boat.
508. You had no occasion to take any particular notice of it? No; there were so many people about in boats that I did not take particular notice.
509. When did you first hear that Mr. Young had disappeared? I think on the Monday night—Monday or Tuesday night—I could not say. Mr. Keegan wanted to know whether I would go out with him to identify whether it was the same boat I saw on the river.
510. How far was it from Mr. Young's camp to where you lived? I should say about half a mile. It was pointed out to me where he had been camped; I did not see his camp; Gray pointed the place out to me.
511. What was the kind of weather when you saw the boat going out? The wind was westerly, with a nice calm sea—no wind at all to speak of.
512. The sea was calm? Very calm all that day. In the morning there was a boat went off the beach from the diggings; some of the people went out fishing.
513. Can you give the Committee any other particulars? When I went to where the boat was—I went out on the following Sunday—Mr. Keegan asked me to go and identify the boat.
514. Did you identify it? Yes; to the best of my belief it was the boat that sailed out of the Bermagui on the Sunday previous.
515. Did you hear whether there were other boats out? Yes, I saw a little cutter go out about an hour and a half afterwards.
516. No boat of this size? No, I did not see any.
517. Did the boat you saw seem to be going towards Corunna Point? Yes, along the coast.
518. Had she a sail up? Yes, a small sail.
519. You are certain you saw two men in the boat? Yes, I am certain there were more than two in the boat; how many more I could not say.
520. I suppose it was after daylight? Yes, a good bit after daylight.
521. *Mr. Clarke.*] You have stated that the boat you saw on Sunday morning was under canvas? Yes.
522. Are you certain? Yes, she had a small sail up.
523. Did you form any opinion whether she was well handled? No, I did not take much notice; I just saw the boat and turned back again.
524. Was the tide high on that particular day? I could not tell you.
525. What is the usual rise of tides there at spring tide? I could not tell you—I have no knowledge of it.
526. Under all the circumstances of the case, what is your opinion as to whether Mr. Lamont Young and party met with foul play? That is my firm belief, that they did meet with foul play, that they could never have been drowned out of the boat on that day. They were skilful boatmen.
527. Where could you imagine it could be? I do not know where it could be.
528. Did you know Towers and Lloyd? No.
529. Do you know where they were camped? No. I saw the men in their boat in the river.
530. *Mr. Moses.*] What time was it on Saturday when you saw Mr. Young? About an hour before dark, going towards Bermagui.
531. Was any one with him? No; there were people walking up and down the road, but none were near him when I met him.
532. When was that—an hour before dark, about 6 o'clock, I think you said? No, not so late; he could reach Bermagui easy before dark.
533. Was that the only time you saw him? Yes.
534. *Chairman.*] How long would it take him to get to where his camp is supposed to have been? He had no more than about 2 miles to walk from where I met him; I met him near the long lagoon, about 3 miles from Montreal.
535. I mean from the jetty to the place where his camp was supposed to be? About three-quarters of a mile; he would have to walk round a swamp.
536. Where was his tent? The place pointed out to me afterwards was near Barter's Hole.
537. Were you under the impression that Mr. Young's party were in the boat that you saw? I cannot say who were in the boat; it was too far away for me to identify them.
538. Do you think Mr. Young and his party were drowned? No, I do not think they were. It was a calm day, they were skilful boatmen, and they could land on any part of the coast that day.

John Forster, Esq., J.P., called in and examined:—

539. *Chairman.*] You live at Bermagui? No, about 10 miles from Bermagui, at Wogonga.
540. Were you living there when Mr. Lamont Young went to Bermagui? Yes.
541. How far is that from where he was camped? I suppose it is 12 miles.
542. When did you first hear of Mr. Young's disappearance? Early on the Monday morning, after the boat was found.
543. Where were you then? At home at Wogonga.
544. Did you go down to the beach? Yes, I went down immediately.
545. Will you kindly give us any information you possess about this case, just in your own way? I went down to the point and went over to where the boat was; it was on the rocks, high and dry, in an upright

Mr. P.  
Engstrom.

19 April, 1883.

J. Forster,  
Esq., J.P.

19 April, 1883.

J. Forster,  
Esq., J.P.  
19 April, 1883.

upright position ; it had two or three bags in it, which seemed to have things in them, and also three or four stones were in the boat, rather large stones too ; there were two small oars or paddles and the mast lashed to the thwarts of the boat. The police came and took the things out of the boat. I was present when the police took the things out of the bags ; they appeared to have been taken out before and overhauled. Things were there that they recognized as belonging to Mr. Young, and also clothes belonging to the men that were with him ; they appeared to be mixed up together in any fashion. The police did not say anything at the time that there was anything suspicious about it.

546. From what you saw at the boat, were you under the impression that the boat had been capsized ? No, certainly not ; I do not see how it could have been without these things having been thrown out ; in fact it was impossible.

547. If the boat had been capsized, would it have been possible for it to have been in the position in which you found it—upright ? I think not. If she had turned bottom upwards in the sea I do not think she would right again ; certainly these loose stones would not be in her ; and there were two loose pillows lying on the seat.

548. Did you hear of a report that a boat had been seen on Sunday morning leaving the mouth of the Bermagui River ? Yes, I heard she had been seen.

549. Supposed to be this identical boat ? Yes. There were a great many stories afloat about it afterwards. Some said they saw the boat, and others contradicted it ; but that was the general impression—that the boat was seen leaving Bermagui.

550. Did you know Mr. Young ? No.

551. Do you know whether he had any money ? No.

552. Do you know whether any of the party had any ? It was supposed they had a little money. The men that were with Mr. Young were poor men, who would not be likely to have money to carry with them.

553. Are you under the impression that these men were drowned ? No, I am not.

554. You do not believe they were drowned ? I do not. That is my impression now, as it was from the very first, after seeing the boat and the position and circumstances connected with it.

555. Will you give us a notion what you think became of the party ? I am under the impression that they must have met with foul play, and that it could not have happened at the place where the boat was found. If the boat left on Sunday morning she could not have got into the position in which she was found, because at low tide the rocks are bare ; it was only at very high tide the boat could have got there. It was spring tides at the time. Johnson found the boat at 4 o'clock, and it was high-water at 2 o'clock. I fancy, from that, that it was almost impossible for the boat to leave on Sunday morning and get there in time. There were no tracks of any men about ; it was hardly possible for them to get there and complete what they did and get away again. Traces of food were found on the beach. Evidently the parties who were in that boat had been ashore. These provisions were not found as they would leave them after eating them, but thrown away in the bushes ; a large damper was found in the bushes, a tin of butter in one place, and a jar of honey in another ; there was some bread lying about, and stumps of cigars that had been smoked. There was no food in the boat at all. It is my impression that this food was taken out of the boat. As regards the stones, there was a little bay where a shovel was found in about 3 feet of water ; that was where the boat would naturally land, about 150 yards from the spot where the boat was found on the rocks. I searched about within that distance, and there was not a stone to correspond with the stones in the boat lying about there, but in the bay where the shovel and axe were found there were a lot of similar stones. You could see the difference ; the stones were smooth in the bay, but out on the reef they were rough and jagged. It seemed to me that these stones were picked up there and thrown into the boat, evidently with the intention of sinking her. There were two large holes in the boat which might have been knocked in with the axe found in the water. Any person would naturally suppose the boat would drift out into deep water and sink, and perhaps not be seen again for twelve months. She must have been waterlogged, so that it would take a considerable time for her to drift to where she was found ; it could not be done in an hour.

556. Was that place where you saw the boat a likely place for any one who understood seafaring to land ? Not where the boat was found, but in the little bay I have spoken of.

557. At that particular spot you do not think any seafaring man would bring a boat to land ? No.

558. Do you think it possible that in passing by to go into this little bay a wave might throw her up on to the rock ? Not that day ; the sea was very smooth. We were out at this little bay the same morning ; there was a steamer passing, and some of us went out and looked at the water ; it was very clear, about 8 feet of water, and perfectly smooth ; there was no danger whatever to a boat.

559. If by some chance the boat were thrown upon that rock, with men in it, do you think it possible for these men to escape to the shore ? Yes, they could do it ; even at high-water they would not have to swim, because the larger rocks are never covered by the tide.

560. Was there any strong stream between where the boat was found and the shore ? The waves break across, but there is no stream.

561. On this morning there were no breakers ? No, it was calm—there was no swell on.

562. You do not think it likely four men in that boat could have got out and been drowned ? No, I think it was impossible ; they could step out of the boat and walk ashore.

563. Were the holes in the bottom of the boat made from outside or inside ? That I could not say. We had an argument over it, a lot of us, Mr. Keightley and others ; some said they were made from outside, and others said they were made from the inside.

564. Were they large holes ? Yes ; there was a hole near the bows of the boat and very near the keel, I suppose 2 feet across. They could easily have been made by knocking against the rocks.

565. If the boat bumped on the rock it would send the planking inwards ? Of course.

566. Was there any of it sticking up inwards ? We looked for that, but we did not seem to be able to find out from that.

567. Did it appear as if these holes had been made with an axe ? I could not tell. There was an axe found in the water, and a small water-tub which had gone to pieces.

568. What is the general impression of the people at Bermagui and the neighbourhood—were they under the impression that there was foul play ? Yes, I think that was the general impression among the public there.

569. And among the public it is still a mystery ? Yes, quite.

570. Nothing has ever occurred to give the slightest clue ? No, nothing that I know of.

571. Are you aware whether the place where Mr. Young was camped was searched? No, I am not.
572. You do not know what became of his tent? No.
573. Did you hear anything about an anchor? Yes, I heard some talk that there was supposed to be an anchor in the boat.
574. The anchor was not found in the boat? No.
575. Has it been found since? Not to my knowledge.
576. *Mr. Clarke.*] Did you find any bullets in the boat? Yes, I found a bullet embedded in one of the knees.
577. Embedded? Partly so.
578. Was it as if it had been fired from a pistol? Yes, it was like spent bullet. It did not go in straight,—more sideways. There was something rather peculiar about it; it appeared to be grazed, as if it had passed through some substance before hitting the boat.
579. What part of the boat was it in? The first thwart in the bow of the boat.
580. Were any loose bullets found in the boat? I heard afterwards that there were; I picked up a bullet on the grass which corresponded with the bullet in the boat; it would fit the same revolver. The bullet that was in the boat had been fired, no doubt of it.
581. Were the loose stones you say were in the boat put in for ballast? No, it would be perfectly absurd to think that for a moment considering the size this boat was and that there were five men in, besides a bag of potatoes weighing perhaps a hundred pounds.
582. Did I understand you to say the stones were like those lying on the beach, or like those from the end of the reef? Like those from the beach where the shovel was found; I took particular notice of that.
583. I think you have stated that there were remains of food near the beach. Might they not have been left there by some of the diggers who were wandering about searching for gold? I think not; it was not likely diggers would go away and leave their food behind them. There was a whole damper thrown away in the bush.
584. There are not many blacks in the neighbourhood now? Very few.
585. Do you know them all? Yes, they are very quiet. There was no time for any one to do anything to the party at Corunna Point.
586. If they were murdered it must have been previous to their coming there? Yes.
587. *Mr. Moses.*] What time did you go down to the boat? On Monday morning, about 9 o'clock, I think.
588. At what time was the boat first discovered, and by whom? About 4 o'clock on Sunday afternoon, by a man named Johnson.
589. Have you had conversations with him about this matter? Yes, repeatedly.
590. Did he say he had moved any of the articles in the boat? No, he did not say. He reported the matter to a man named Read.
591. *Chairman.*] Do you think Johnson could give any material evidence in the case? No, I do not think so.
592. Whatever he knows you would be likely to know? Yes, I know him well; he is in my employ.

J. Forster,  
Esq., J.P.  
19 April, 1883.

Senior-constable William Martin called in and examined:—

593. *Chairman.*] You are a senior-constable in the Water Police? Yes.
594. Stationed in Sydney? Yes.
595. Were you instructed to proceed to Bermagui to inquire into the disappearance of Mr. Lamont Young? I was.
596. How many days after the disappearance of the party did you arrive at Bermagui? Fifteen days.
597. Will you give the Committee any information you obtained with reference to the matter? When I arrived there the first thing I did was to examine the boat, which I did minutely. I found several holes in her —
598. Where did you find the boat? The boat had been hauled up off the rocks from where she had been found on to the beach. She was 22 ft. in length, 5 ft. 4 in. beam, and 23 in. in depth. She was planked with pine flooring, and the upper was cedar; fore and aft thwarts of hardwood, midship thwart of pine, rather fine lines, and too sharp for a fishing boat, for which purpose she seemed to have been built, having a roller aft for using nets.
599. She was a fisherman's boat? She appeared to be so.
600. Was she a good seaworthy boat? Yes, of her size she was.
601. What was her carrying capacity? Her carrying capacity was rather bad, because she had very fine lines; but she would be a good sea-boat of her size.
602. I suppose she would carry a ton? Yes.
603. A fair boat in any ordinary sea? Yes, unless too heavily laden; with four or five men she would do well enough. With regard to the damage done to the boat, there was a hole in her starboard bow, and the plank torn away from both keel and stem, or cut-water, 2 ft. 4 in. by 14 in., a hole amidships 2 ft. by 3 ft., a hole in her starboard quarter 1 ft. 10 in. by 4 in., two planks stoved in on her starboard quarter, and a hole amidships, opposite the centre-board, 1 ft. 10 in. by 6 in.; her bottom was completely crushed in on the port side. She had pine bottom-boards unpainted, and a centre-board. The mark of a revolver bullet was in a knee of the after thwart on the starboard side, entering about a quarter of an inch into the wood in a slanting position, and grazed the thwart at the side from forward. The dent made in her knee appeared as if the bullet had come in contact with some other substance previous to its entering the knee. As regards anything else found in the boat, it is only hearsay; but I made a particular search around the locality for miles for several days to see if I could find any who had been in the boat. I particularly searched the caves; I had to wait for several days before I could get in there, in consequence of the heavy swell running on the rocks, but eventually I got in and searched them, but found nothing. Regarding the stones found in the boat, I examined them particularly; there were four or five of these stones. About 150 yards from where the boat was found a place was pointed out to me where there were four or five marks as if stones had been removed from them, and one large stone had been turned over and left there. I searched the coast for several miles to see if I could see similar stones, and more particularly

Senior-constable  
W. Martin.  
19 April, 1883.

Senior-  
constable  
W. Martin.  
19 April, 1883.

particularly at Bermagui from where the boat had left, to see if I could see any stones there similar to those found in the boat; but in all that distance I could find no stones whatever corresponding in colour with those that had been found in the boat. There was a quantity of ballast which had been discharged from vessels at the foot of Bermagui River, close to where the boat had been kept when the boatmen were there. Large quantities of stone ballast were there which had been discharged from coasters; I examined them for the purpose of seeing whether those which had been found in the boat had been taken from there, but they were different in colour altogether; and I came to the conclusion that the stones found in the boat had been picked up from the spot pointed out to me.

604. Did you search any further? I made further inquiries of several people who, I had been told, had seen the boat, but I could find no one who actually saw the boat leaving on the Sunday morning. I saw the master of a small vessel called the "Maid of the Mill," which was lying there on the Sunday morning; he told me he saw the boat there on the Saturday night, but early on Sunday morning he could not see it; she was away from there, and the men's tent had been taken down. Another thing I may mention. It would be high-water about 1 o'clock on Sunday morning—that is, at 1 a.m. They were low tides then—what are called neap tides.

605. Would it be possible for Mr. Young to get from his camp in that boat, or any other boat, to the place where the boat was found, between 5 o'clock on Saturday evening and 2 o'clock on Sunday morning? Quite possible, from Bermagui.

606. How long would it take him to go from where his camp was to where the boat was found? I do not know where Mr. Young was camped; I mean where the men who were in the boat had been camping?

607. Would it be possible for Mr. Young to get from his camping-place at the mouth of the Bermagui River, between 5 o'clock on Saturday evening and 2 o'clock on Sunday morning, to Corunna Point? Yes, quite possible; they could pull the distance in three or four hours, about 9 miles, in fine weather. At 1 o'clock a.m. on Sunday morning it was high tide; on the 9th of that month—that was the day previous—it was high-water at Fort Denison at 11:30 a.m., and 11:57 p.m.; the tide at Corunna Point is about two hours later than it is in Sydney; therefore it would be just about 1 o'clock on Sunday morning when the boat could get on the rocks where she was found, and she could not get there again until between 2 and 3 o'clock on the Sunday afternoon. I find there were low tides then—new moon on the 4th and full moon on the 18th, and between these dates low neap tides. I waited at the locality where the boat was found till spring tide; and I could manage to get ashore even at spring tide from where the boat was found.

608. Without swimming? Swimming and walking. At high-water you could see some of the rocks above water between the boat and the shore.

609. From all your searching you are not able to find the slightest traces in any way of this party? No, not the slightest.

610. Did you search between the sand and the water close to low-water? Yes; I got a stick and I tried all I possibly could to see whether there was any body buried in the sand; I searched it over and over again, especially about where these stones were taken from; there was a patch of sand bare at high-water-mark, and I went over it again and again.

611. Did you make any inquiries or receive any information that enlightened you in any way? Not the slightest. I made all the inquiries it was possible for a man to do during the time I was there.

612. Did you find out whether Mr. Young's camping-place was searched on the Monday or Tuesday after he disappeared? No; that was in the hands of the police before I got there.

613. You did not hear whether that spot was searched to see whether any struggle took place there or not? No, I did not; the police had searched all round before I arrived.

614. Did the police make a search at the camp? I am not aware. I did not hear that Mr. Young had camped there.

615. What is your impression with regard to the disappearance of these men? My opinion is, regarding the things found in the boat belonging to Mr. Young, that if he had landed there alive he would not have left all those things in the boat.

616. Do you think these parties were drowned? They may have been.

617. What is your own impression? They may have been drowned, but the boat was navigated to where she was found by somebody.

618. You think the boat landed where the stones were found at first? Yes, and was afterwards navigated into the spot where she was found; I have no doubt she was navigated into where she was found, or she would never have got in there.

619. Is it your impression that there was any foul play where the stones were taken from? My impression is that there has been foul play somehow; under all the surrounding circumstances it appears so. I am under the impression that the boat was navigated to where she was found by some one, and that the injury she received she received there. When I made my first report I had not examined the boat so minutely as I did afterwards, and I said she might have received the injury where she was lying; but I came to the conclusion afterwards that she had been wilfully destroyed, and that the holes had been broken from the inside, as if something had been thrown at them from the inside; splinters from the boards came off inside.

620. You are under the impression that if the boat was thrown up on to the rocks where she was found the men would be able to get from there to the shore without being drowned? They would; but she was never washed up there by a swell, because she was lying on the rocks fore and aft; when a boat comes drifting along she comes broadside on, particularly in such a place as that. These stones that were found in her would have kept the boat down, so that she would not have moved from there, the stones keeping her down and the water washing in and out; no swell coming in there would have carried the boat away, from her having so many holes in her.

621. Did you learn from your inquiries whether any of these parties had any money? Yes, I went to Bateman's Bay for the purpose of ascertaining that; Lloyd's wife told me her husband had £19 when leaving Bateman's Bay; Towers' wife told me her husband had 19s.; and the old man, Casey, had no money. As to what Mr. Young had I do not know.

FRIDAY,

FRIDAY, 27 APRIL, 1883.

Present:—

Mr. HENRY CLARKE, | Mr. MOSES.

GEORGE DAY, Esq., IN THE CHAIR.

Thomas Crawford Binney, Esq., called in and examined:—

622. *Chairman.*] You are an officer of the Mines Department? Yes, Registrar.

623. You remember the disappearance of Mr. Lamont Young and party? Yes.

624. Were you sent to Bermagui to make inquiries? Yes.

625. How long after their disappearance? I left Sydney on the following Thursday night; they were missed on the Sunday.

626. You reached Bermagui, then, about six days after? I reached Tilba Tilba on the following Sunday, and I was on the spot where the boat was found on the Monday.

627. Will you give the Committee some information with regard to what you did, what you saw, and what you had reason to believe—just your experience of the whole affair? I was instructed by the Minister for Mines, the Hon. E. A. Baker, to search for Mr. Young and his companions, and to make inquiries as to what had become of them, and to spare no trouble or expense. I left Sydney on the Thursday night after their disappearance, and travelled without stopping till I got to Moruya on the following night about 11 o'clock. When there I heard that the Warden, Mr. Keightley, was in town, and would be starting immediately for the scene of the accident. I accordingly waited, and saw the Warden in the morning—Saturday morning—made all arrangements, got boatmen, and started that afternoon. The Warden and I reached Eurobodalla that night. On the following day we arrived at Tilba Tilba, the nearest place at which I could stop conveniently to the scene. When we arrived at Tilba Tilba, a free selection belonging to Mr. Hobbs, we saw Sub-Inspector Keegan, who produced some revolver bullets, which were handed to me and others. I think there were five of them, if I recollect right; the lubricating grease was still on some of them, so that they had evidently never been fired.

628. Where did Mr. Keegan say he got the bullets? In the boat. Mr. Keightley said he could easily understand that, because he had been in the habit of fishing in this boat, and they had used the revolver bullets as sinkers. On the following morning Mr. Keightley, Sub-Inspector Keegan, some police, and a large party of volunteers who picked us up at different points, went to the scene, some 5½ miles from Tilba Tilba. On arrival there I saw the boat. She was a green boat, with a red stripe, about 23 feet long I suppose—I did not measure her. She had a large hole near the centre-board, on the starboard side I think—a very large hole; there was a similar hole further astern, and a hole in the bow. I was shown part of the things which had been found in the boat, and those articles were subsequently brought to the house in which I was staying, and were particularly examined by me. I looked in Mr. Young's pocket-book—

629. Did you know it was Mr. Young's pocket-book? Yes, I had seen it frequently before in his possession. We were intimate friends, and the night before he went away we had a long conversation. This pocket-book contained blank cheques of the Bank of New Zealand, part of a letter from his mother, whose handwriting I knew well, some memoranda from his wife, one or two flies for fishing, and some other little matters not of great importance. His cigar-case was found in the boat, and an amber mouth-piece, similar to one I had seen him in the habit of using. After seeing the boat and looking at the different things about there, I went out on the rocks where the boat had been found. The boat was found due north and south, with her nose against a big rock, which rock at high-water would be the only rock visible until you got out to a large boulder at the end of the point. I then got on this place and went along the rocks, beneath which there was a great depth of water. It struck me it might be possible that the bodies of these men might be under these shelving rocks. I consulted with the Warden, and we thought it would be a good plan to get some dynamite for the purpose of proving, if we could, whether there was anything under these rocks or not. I sent to Montague Island for the dynamite, and instructed the boat's crew to search along the coast while I was away. After that I proceeded to make search inland, as it was supposed it was just possible they had wandered away. I continued making search and inquiries, riding and boating, especially in boats, as the weather permitted. The weather was nearly always wet, in fact I may say there was scarcely a day that I was dry all the time I was there; I was either wet through with the sea or wet through with the rain. I visited the caves to the northward, and with some difficulty managed to inspect them. There was nothing there, nor had there been, as far as I could judge. There were also some smaller caves, more, crevices than caves, which I also searched. After that I went to Montreal and made inquiries there, and I ascertained beyond doubt the fact of Mr. Young having been there, and of his having lunched, or dined, at an eating-house; he lunched there with the police, or some of them, and he was accompanied by a stranger, whose description appeared to me to tally with that of Mr. Schneider. After lunching on that Saturday Mr. Young was with the Warden, and went with him to the prospector's tent, where they had more to eat, and where he left his belt and instruments. These instruments I afterwards got, and was shown exactly how he left them; in fact, I believe they were in the same place. I also went to Bermagui, and saw a boy who told me, as he had told others, that he saw a boat leave the river on the Sunday morning early, and there were four people in that boat; he said there might have been more, but he could not say or would not say for certain. Further, the Hobbs family, or some of them, at the free-selection at which I was stopping, stated that on the Sunday morning, just before starting for church, about half-past 10 o'clock, I think, they from their verandah saw a boat with people in it going past, and they thought she was very badly managed. I was at the Bermagui River, and was shown the spot at which Mr. Young was supposed to have camped; it was on this side of the river—the northern side—but I could see nothing to show that anybody had camped there. The tent had been taken away, and any marks might have been washed away.

630. He could not have remained at that camp more than two nights at the outside? No; only one night, I should think.

631. Did you make any inquiries as to whether any one had searched the spot where he camped immediately after he disappeared? No; I understood that the police had done that before I got there.

632. The police had searched there? I understood so.

T. C. Binney.  
Esq.

27 April, 1883.

- T. C. Binney,  
Esq.  
27 April, 1883.
633. From the inquiries you made, and what you saw, do you believe four men went in that boat—do you believe Mr. Young was in it? Yes.
634. Were you led to believe the others were in it? Yes.
635. Who? I think the owner of the boat, Towers, was there; an old man named Casey, Lloyd, Mr. Schneider, and Mr. Young.
636. You were led to believe there were five in the boat when it left Bermagui River? Yes.
637. *Mr. Moses.*] Have you any means of knowing whether it was Towers' boat that was found? It was identified by people there who knew it. Mr. Keightley knew the boat; he said he had been fishing in it, and when the question of the revolver bullets was brought up, he said he knew they were accustomed to use them for sinkers.
638. *Chairman.*] What do you think became of the men in the boat—do you think they landed near Corunna Point? I think they did.
639. You think they landed at these rocks where the boat was found? I think they landed somewhere close by—I could not say exactly where.
640. What do you think became of them then? I think they were drowned; I think they were drowned just below where the boat was found.
641. Do you think they were drowned without the boat capsizing? Yes, the boat never capsized.
642. How do you account for their being drowned and the boat not being upset? By their getting out of it.
643. Getting out to do what—why do you believe they got out of it? They might have landed for lunch, and seeing the boat getting away, might have rushed down to her and been drowned in endeavouring to secure her. At the time they lunched there I should suppose it was 1 o'clock in the day; when there was a spring tide, and these rocks would all be covered excepting one. I fancy they got to this little bay near Corunna Point, where the boat was found, about 1 o'clock; it was then spring tide, the highest tide of the month, on that Sunday, and all the rocks about where the boat was found would be covered, with the exception of one large one, against which I understood the boat's bow rested when she was found. The parties would appear to have landed and gone to lunch, for the evidence of a meal having been partaken of were found—bread-crumbs, damper, salmon, butter, and other things.
644. What do you think followed on that? I think the accident happened after lunch.
645. What do you think it was? That something went wrong with the boat, and one or two of the party got into deep water, and Mr. Young, who was a first-class swimmer, and Mr. Schneider also, went in to assist the others; and the whole party was drowned.
646. I suppose you heard there were a number of stones in the boat? Yes, I saw and lifted them.
647. These stones were taken from that beach, were they not? Not just at that spot—I do not think so.
648. I mean from the bay? I could not see any stones like them. I think I mentioned the stones and the weight of them in my report.
649. I suppose you received information down there that Mr. Young went down to his camp on Saturday evening? The last that was seen of Mr. Young, according to the evidence I could get, was that he was seen at sundown going to his camp, towards Bermagui.
650. Previous to his going to his camp he had made a promise to go out fishing on the Sunday? No, he had made an engagement with Mr. Keightley to see him on Monday. He had been with the police and asked them about going fishing; he asked if they were going fishing.
651. Did you hear what kind of character Mr. Schneider bore? I knew Mr. Schneider very slightly indeed.
652. Have you any notion there was any foul play with regard to this party? No, none.
653. You have no doubt in your mind as to that? At the time I was down there I had no doubt, and should not have had any if I had not heard the rumours which I have heard since.
654. From all you are able to make of it, you think they were drowned in the way you have described? Yes. Somebody had been sick in the boat, and the signs of that would have been washed away if the boat had been capsized.
655. What you heard down there was simply surmise—opinion? Yes; most of the people down there think they were murdered.
656. But there was nothing to lead you to think so? No.
657. *Mr. Clarke.*] Have you heard whether the water was rough on the day they disappeared? It was a lovely day; there was a swell on, but not much.
658. Do you think it probable, from what you have heard or seen, that they would land on these rocks instead of landing on the sandy beach to the north? There is a beautiful sandy beach a little to the north, which is, I am informed, the best place to land at that you can find between there and Moruya.
659. Do you not think it strange they should land on the rocks if they had a nice place like that to land at? I was informed that on the Friday previous to this accident Towers, the owner of the boat, had inquired and had been informed that this shelly beach, which he had noticed on his way down, was the safest place to camp at on his way back.
660. On the supposition that they were drowned there, how do you account for no trace of them being found? Part of their clothing has been found, and one of Mr. Young's boots.
661. That was in the boat? Yes.
662. Do you suppose they were drowned in going back to the boat after lunch? Yes, I think they were.
663. Is the water deep? The water in that hole is 25 feet deep at least in some parts, and there is a long sea-weed which goes to and fro with the tide.
664. Can you give us any opinion as to the reason why no remains of the bodies have been found? That is very strange; they ought to have been found.
665. Would that sea-weed or sedge be the means of entangling them? It would.
666. Still, if they got entangled there, would it not be likely some portions would come ashore? One would think so.
667. Unless devoured by sharks? There are any quantity of sharks there.
668. Was any search made along the beach? Yes, by probing the sand with an iron bar.
669. Did you search any other part—was any search made in the Bermagui River, near where they were camped? No.

670. *Chairman.*] Did you hear anything of an axe and shovel being found in that bay? Yes, they were found in not very deep water; I saw the place where they were found. T. C. Binney,  
Esq.
671. Is there any accounting for how the axe and shovel came into the water? No, unless they were thrown in. All the things in the boat have, in my opinion, been tampered with. 27 April, 1883.
672. Was there any current on that day? Yes, a very strong current.
673. In that bay where the sandy beach is? No; the sandy beach is to the north.
674. Would the current be outside the bay? The current sweeps into the bay, and then there is a very strong current that runs out, so that there is a constant swirl there. At the point of these rocks I should say the depth is from 25 to 30 feet.
675. Is it a rocky bottom? I never could touch the bottom.
676. You do not know whether it is sandy or rocky? No.
677. *Mr. Moses.*] Did you recognize any of the things you examined as being Mr. Young's? Yes.
678. Was any trace found of the tent he used in camping? There was a tent found at the place where the boat was found; I could not say it was a whole tent, but it looked like a whole tent to me; it was nearly new.
679. Was it Mr. Young's tent? I could not say. When I saw it, it was lying on the bank.
680. When you examined the boat, how did you think the holes in her were made? The hole amidships I think was made from outside; the hole in the bow was suspicious; I could not tell whether it was made from outside or inside.
681. What do you suppose the stones were put in the boat for? They could only have been put there for one purpose, to steady her, to keep her there while they were on shore; they could not have been put there for any other purpose than to keep the boat steady; she was a crank boat; they would not be required as ballast when the men were in her.

---

### SESSION 1883-4.

WEDNESDAY, 30 JANUARY, 1884.

Present:—

MR. DAY,		MR. BURNS,
MR. LEVIN,		MR. CLARKE,
MR. BARBOUR.		

GEORGE DAY, Esq., IN THE CHAIR.

Mr. Francis Guy called in and examined:—

682. *Chairman.*] You are aware that this Committee has been appointed to inquire into what is called the Bermagui mystery? Yes. Mr. F. Guy.
683. Do you know anything at all about the disappearance of these men, or anything in connection with it? I was there at the time they disappeared, but I know nothing whatever of the circumstances of my own knowledge. One of the men had been in my employ for about fifteen years. I lived about 60 miles on this side of Bermagui, and I went down to see the rush. All I know is with regard to the men who were in the boat. I knew the man Towers from a lad, and he had been working for me off and on for fifteen years. Lloyd, another of the party, had left a schooner belonging to me to go with the others to the diggings, and Casey was a very old man, about 70 years of age. They all left my place to go to Bermagui, to the rush. I reached there on Saturday morning, and saw them at a distance, but I did not speak to them—these three men, I mean. Somebody else told me they were going to start back home in the morning to Bateman's Bay. 30 Jan., 1884.
684. Were these boatmen there for the purpose of hire? They just went down to the rush, and they used Towers' boat to go instead of going overland. Seeing no prospect of doing anything at the diggings they were going to return home. I understood that they were giving Mr. Lamont Young and somebody else a lift as far as Corunna from Bermagui. To save Mr. Lamont Young going overland they were taking him and his companion in the boat as far as Corunna Point, having to pass there on their way to Bateman's Bay.
685. That is the supposition? That is what I understood from what I was told. A son of Casey, one of the men that was lost, mentioned it to me.
686. Do you know whether Mr. Lamont Young had any business at Corunna Point? Yes, I understood he had; there were diggings at Corunna which had been working for a long time.
687. Did you see Mr. Lamont Young's tent? No.
688. You do not know where he was camped? No.
689. Did you think it likely he would shift from Bermagui, when he had only been there one day, to Corunna Point? Yes; he would see all he wanted at Bermagui in one day, because where the diggings were was a flat which you could walk over in a quarter of an hour; all the diggings were concentrated on this flat, near Walloga Lake.
690. Were you there when the boat was found? I did not go down to the place, but I got a man to go down to see if he could get the boat away.
691. Do you know if any person went to see the place where Mr. Young was camped, to see whether his tent was struck or not? No, I do not know anything about that. His tent has never been found, I believe.
692. What is your own opinion about the disappearance of these men? My opinion is, that one of the parties in the boat destroyed the others and afterwards made his escape.
693. Had the men in the boat anything to do with Mr. Young before they met at Bermagui? No, they had no previous knowledge of one another.

- Mr. F. Guy. 694. *Mr. Burns.*] What would be the motive of any one of the party for destroying the others? There might be many motives. I know for a fact that Lloyd had three £5 notes with him. My idea of the thing is, that one of the parties in the boat either poisoned or shot the others, and threw them overboard, weighted in some way to prevent them floating again, and having a knowledge of how the Parramatta River murderers were found out, may have opened the bodies. A long line and heavy iron bar that Towers used for a kellick line was missing from the boat, and they may have been tied together with that and sunk at sea. Then, assuming that he had destroyed these men and put them overboard, he would come ashore and try to sink the boat. The boat was damaged from the inside outwards, not damaged from the outside, and the stones were thrown into the boat apparently with the object of sinking her after she was pushed off from the shore.
695. *Chairman.*] Have you ever heard of any one disappearing from that place? No.
696. There is no trace of any one clearing out to another part of the country? No. If one of the parties in the boat did it he could walk to the diggings in about half an hour, and be as safe there in the crowd as if he were in Sydney.
697. What was the general impression down there among the inhabitants when the boat was found and they began to inquire into the thing? The inhabitants of the place were a shifting population—all diggers.
698. I suppose it was generally spoken of on the Monday morning? I left on the Sunday afternoon, and did not hear of it till the Tuesday or Wednesday following.
699. Do you know if any of the other men had any money? I do not.
700. Had Mr. Young? I was speaking to Mr. Binney about it, and he said he thought he had very little.
701. Had Schneider any money? I think that is doubtful.
702. These boatmen were married men? Yes.
703. Are their wives and families there, at Bateman's Bay, now? Yes; Towers' widow is married again.
704. Your belief is that these men were murdered and thrown overboard? Yes, by one of the party in the boat. I have a very strong opinion about it.
705. *Mr. Levin.*] Was the boat identified as the same boat the party took? Yes; the boat belonged to Towers. The idea of their being drowned is absurd, because the boat was never capsized.
706. *Chairman.*] Do you think there was any truth in the supposition that they tied the boat up to the bank and went to have something to eat, that while they were doing so the boat broke away, that some of them rushed into the water to bring it back, that one got entangled in the weeds, and the others rushed in to save him, and all got drowned? It is an impossibility. Towers could swim for an hour or two hours if necessary—I know it; he could swim, in fact, as long as he liked.
707. Is there no chance at all of their having taken the boat to any of the caves, and that the boat broke away and left them in the caves? There are no caves there of any account where such a thing could have happened.
708. It has been mooted that these men were kidnapped and taken away? I do not think that is possible. Montague Island lies just off the place, and any strange vessel coming there would be seen by thousands from the mainland.
709. *Mr. Clarke.*] A steamer passed the same day? Yes, the regular weekly steamer. The diggings are immediately on the sea-shore—so near that they were baling the sea-water out from the claims.
710. *Chairman.*] Then from all you know of the circumstances, you are under the impression that these men met with foul play and were murdered and thrown overboard? Yes, by one of the parties in the boat.
711. And that that party brought the boat to the place where it was found and threw the stones into her to sink her? Yes; he attempted to sink her, but failed. It was full moon on the Sunday night, and next morning there was a very high tide; and it is evident to me that he made the fracture in the boat by putting the stones in her, and pushed her off thinking to sink her, but the tide carried her back on to the rock where she was found.
712. Have you any recollection of the state of the weather on the Sunday? The weather was beautifully fine—full moon, with a moderate north-east wind.
713. Was the sea boisterous? No; it was evidently not rough, because the boat was not even wet.
714. *Mr. Clarke.*] Did you see the boat? No; I did not go to the place where the boat was. I left on the Sunday to come home.
715. By land? Yes; in my buggy.
716. *Chairman.*] I think you said a man named Casey might give us some information? Yes; I think it was old Casey's son who told me that they (the boat-party) were going to give Mr. Lamont Young a lift as far as Corunna.
717. Do you think the police did all they ought to have done in the matter? I do not think they were very active. There was an advertisement put in the *Moruya* paper by Mr. Keightley, the Police Magistrate, offering £5 reward for the body of Mr. Lamont Young, and the others in proportion, whatever that meant.
718. Was not £150 reward offered by the Government? The first public intimation of a reward was offered by the Police Magistrate as stated.
719. If the Government had offered a reward of £1,000 or £5,000, do you think it would have had any effect at the time? No, I do not think so. I believe the party who committed the murder landed in the boat and travelled with the crowd as they were leaving the diggings.
720. Do you think the Government did everything they ought to have done? I never heard of the Government doing more than a very little, but I do not know that they could have done any more. I firmly believe the party who committed the deed made his escape, and that is the whole story. If ever one of the boat party is found alive that will disclose the secret of it.
721. You are under the impression that the Government could not have done anything to solve this mystery at the time? I do not think so.
722. You think they were not to blame for not having taken further steps? I am not able to judge. I do not know what means they have taken to discover it. My idea was that they should telegraph to all the other Colonies to watch for the passing through of one of the boat-party.
723. They did do that? If they did, I suppose that was all they could do. It was impossible so large a number of men could have been murdered on the beach. The only way so many could have been got rid of was by poison, or by shooting them in the boat. I have always thought the vomit found on the boat's thwart ought to have been better examined.

724. It would have been an easy thing for one of these parties to have poisoned the others in spirits, or any food or drink? Yes, easy; it would only resemble sea-sickness, and create no suspicion. Mr. F. Guy.  
30 Jan., 1884.
725. Can you think of any motive for such a diabolical act? It might have been for money. There was one party in the boat, I believe, who had great need of money.
726. You never heard of any of these men having a considerable amount of money? No. Lloyd was the only one that had money that I know of; he was paid off from the schooner, at his own request, so that he could go to the rush, and he took £15 with him I know. The other two belonging to the boat had nothing. I do not know what Mr. Lamont Young had; but I heard that one of the boat-party had pawned some instruments in Sydney; that, of course, you know more about than I do.\*

WEDNESDAY, 13 FEBRUARY, 1884.

Present:—

MR. BARBOUR, | MR. LEVIN.

GEORGE DAY, ESQ., IN THE CHAIR.

Mr. Robert William Newell sworn and examined:—

727. *Chairman.*] I suppose you know the object for which this Committee has been appointed? Yes, I do. Mr. R. W.  
Newell  
13 Feb., 1884.
728. To inquire into the mysterious disappearance of Mr. Lamont Young and party, at Bermagui? Yes.
729. Do you know any of the parties connected with that loss? None whatever.
730. Did you know Mr. Young? No.
731. Did you know Mr. Schneider? No.
732. Did you never see him? I never saw any of the parties.
733. Do you know whether any of the parties pledged any of the articles in Sydney? No, I only say by what I have been told; I know personally nothing whatever about it, except what I have heard in conversation.
734. And that may not be true? It may not.
735. Then you cannot give any information to the Committee in any way? Not personally, only what I have heard; I cannot give you one single word of my own knowledge about the parties whatever.
736. *Mr. Levin.*] Did you hear of them having pledged anything? Will you allow me to explain. I have a sister who some two years ago kept a large boarding establishment in Macleay-street, and I believe from what she said that one or two of the parties had been boarding with her, Schneider and one of the others; and in a conversation that I had with her, my wife being present, she made use of these remarks, that she had heard of Schneider being seen crossing a ferry some day or two days after the disappearance of the party.
737. *Chairman.*] Some one told her? Some one told her that he was seen crossing a ferry some distance from where the disappearance took place, and he was afterwards recognized in Melbourne, and that some of the articles belonging to the Geological Surveyor had been taken out of her house and pledged at some pawnbroker's place in Sydney—articles belonging to Mr. Young. The remarks were disconnected, but as far as I recollect that was the principal part of the conversation. It is so long ago that I can scarcely recollect the conversation altogether.
738. *Mr. Levin.*] Is your sister living in Sydney? She is.
739. *Chairman.*] Did she tell you which of the party it was that pledged those things? She did not say.
740. *Mr. Levin.*] Do you know who was the party that told her? I do not. This was a conversation in my own house.
741. Do you think she can tell the Committee who the party was that told her? It is very likely.
742. *Chairman.*] Then you did not know the parties who were lost down at Bermagui, and you cannot give the Committee any more information? I have told you all I know about it.
743. *Mr. Levin.*] You do not know by whom he was seen in Melbourne? I do not, but I believe it was some one in the same Department as himself.
744. *Chairman.*] In the Mines? Yes, in the Mines, and recognized him in Melbourne some weeks afterwards.
745. Does your sister know the name of the person who recognized him? I cannot say.
746. What is your sister's address now? Wynyard-square, next door to Dr. Wright. Her name is Mrs. Hinton.
747. Do you think she can give any information to the Committee? That is where I got my information from, in a conversation. She came to visit us, and I heard the conversation from her.
748. *Mr. Barbour.*] Then some of them were living with Mrs. Hinton at the time? Yes, Schneider, and I believe there were two of the party. She would be able to give you all the particulars.

Mrs. Philadelphia Tomsett sworn and examined:—

749. *Chairman.*] Do you live at Bermagui? Yes.
750. Did you live there when Mr. Young and his party disappeared? I believe so; I have been there for ten years. Mrs.  
P. Tomsett.  
13 Feb., 1884.
751. Did you ever see Mr. Young? No, I never saw him.
752. *Mr. M. Schneider.*] Not that I know of.
753. How far was your place from Mr. Young's camp? I do not know where they camped, only I was told they were camped over the river—I do not know anything more. 754.

\* ADDED (on revision):—Since giving my evidence I remember talking to one of the claim-holders at Corunna Point, on Saturday, at the rush, who told me Mr. Young was going to see their workings. He (the miner) had come to Bermagui to the rush the day before (Friday) from Corunna diggings, and was going back on Sunday. He was showing me a sample of the gold his party was getting at Corunna. I had some little acquaintance with him, but cannot think of his name just now.

- Mrs. P. Tomsett. 754. Do you remember the night when they were lost? I do not remember the night; I was told of it on the Monday morning.
- 13 Feb., 1884. 755. Was there anything told to you on that night? Nothing at all.
756. Do you remember going outside your house on that night? I heard an alarm.
757. About what time was that? I cannot tell you. It was getting towards dark, and I heard a gun and saw a flash of fire like, and then some alarm like a screech.
758. In which direction was that? It seemed in the direction of the river, but I could not say whether it was there or not because there were so many camping about the place.
759. Did you hear any voice? It was one alarm—I heard no more.
760. Mr. Levin.] But it was in that direction? It was in the direction where they were supposed to be lost—towards the mouth of the river.
761. Chairman.] Was your husband at home that night? I could not tell you whether he was or not; he was not at home when I went down in the evening.
762. Did you tell him about what you heard? Not at the minute—I told him some time afterwards.
763. Do you know the object of this Committee? I know nothing at all about it.
764. You live about half a mile from Mr. Young's camp? I do not know at all; we are just under Mr. Morehead's house.
765. How far from the river? About 50 or 60 yards; I could not exactly tell you; about 100 yards from the wharf.
766. Did you see the boat? I saw boats, but I could not tell you whether it was theirs. I was never on the lake.
767. Mr. Levin.] Did you not go to see when you heard of it? No.
768. Chairman.] Did any one call at your place on the Sunday night they disappeared? I do not mind it.
769. Did you tell any one that some one called at your place on the Sunday night they disappeared? I forget.
770. Were there two men? Yes. It was a good bit afterwards; I should say it was about ten or twelve days after the loss.
771. Not on the Sunday following? No, it was on a Friday night.
772. If any one has sworn that two men called at your place on Sunday, the day when Mr. Young disappeared, it would not be true? No, that is wrong, it was not on a Sunday at all; it was on Friday night, between 12 and 1 o'clock.
773. How long was it afterwards? About ten or twelve days after the loss.
774. Did you notice those two men? No, I never saw them.
775. What did they want? They gave three taps at the window. I said—"Who is there?" They wanted to know where the ferryman was; I said—"Under the hill, where you see a large smoke." They asked again, and I told them again the same thing. They hummed and hawed, and they said, "Get up and get a nobbler." I said—"If you are not out of this I will take the gun and blow your brains out." I said—"I will set the dog on you," and they then went away.
776. Did the ferryman tell you that he put any one over the river on the Sunday night or Monday morning? No.
777. Did you hear of any man, or two men, making their way across that ferry on the Sunday night? No, I never heard of it.
778. And in reality, no one called at your place on that Sunday night? No.
779. You never told any one that there was? No.
780. Did you tell Mr. Scott? No, I do not think it.
781. Do you know Mr. Scott? No.

THURSDAY, 14 FEBRUARY, 1884.

Present:—

MR. BARBOUR,		MR. LEVIN,
MR. CLARKE,		MR. MELVILLE.

GEORGE DAY, Esq., IN THE CHAIR.

Mrs. Tomsett called in and further examined on oath:—

- Mrs. Tomsett. 782. Chairman.] You live not far from the ferry crossing the Bermagui River? Yes.
- 14 Feb., 1884. 783. How far is the ferry from your house? I cannot tell exactly.
784. Is it not in sight? Oh yes, it is in sight.
785. But you do not know how far it is? It might be a hundred yards or more.
786. Did you know the ferryman who was there? The old gentleman is dead.
787. Did you know him? Yes, Mr. George Osman.
788. Did the ferryman tell you on one occasion that two persons gave him a pound to put them over the ferry one Saturday night? No, they offered him a pound when they went to him, but they only gave him 5s.
789. And he put them over? Not by himself, but with the help of another man named Smith.
790. Did the two men whom he put across call at your place? Yes.
791. Had one of them a scar on his face, or a cut? No, I never saw them.
792. Did any one belonging to you see them? No.
793. How do you know they called? Those who rapped at the window?
794. Those who paid the ferryman to put them across the river? Yes, the ferryman put them over.
795. You did not see them? No; we were all in bed.
796. Then how do you know they called? They called me up.
797. Was it dark? It was in the night.
798. Sunday night? No, Friday night.
799. Then, if Mr. Scott swears that it was on Sunday night, it is untrue? These people called at my place and went to the ferryman's on Friday night.
800. That was before Mr. Young disappeared? I do not know when he disappeared.

Mrs. Tomsett,  
14 Feb., 1884.

801. Do you not recollect the time? No.
802. Was there not great excitement in the neighbourhood about the disappearance of Mr. Young? On the Monday following.
803. Was it before that Monday or after that Monday that these men came to your place and called you up? Not on Monday—it was the following Friday.
804. That would be a week after? A week like after the mystery had occurred.
805. Then these men did not come into your place? Not to my knowledge—I never saw them.
806. Did your husband know Mr. Young, or see him? No.
807. Did he ever see Mr. Schneider? No.
808. How far is your place from the Bermagui River, where it joins the sea? I do not know.
809. Have you not said that on a certain occasion you heard the groans of some one? It was some mournful noise; I do not know whether it was groans.
810. Have you not said you saw a flash? Yes, just like a lot of leaves on fire; it went up and went away directly.
811. Was it a shot? It was a shot of some sort, but what it was I could not tell you.
812. Were you within any reasonable distance of the place where you saw the flash—could you hear what took place? No.
813. You heard a noise? I heard that noise, but whether it took place on those people I could not tell.
814. Where you saw the flash? I cannot tell the instance. I was going down from Morehead's Mill, and as I was going down I saw a flash and heard a noise. There are trees all about Morehead's place, and I could not see straight. But it was where these people had gone.
815. We have heard that you stated it took place about 8 o'clock on Saturday night: did it take place at that time—was it on the Saturday night before these people were missed? I told a party that I did not know whether it was on a Saturday night or not.
816. Was it on a Saturday night? Yes, but I do not know what day of the month it was.
817. Have you any idea at all as to what became of these men? Not the slightest; I know no more about them than any one of you.
818. There must have been a great deal of excitement about it in the neighbourhood at the time? There was on Monday great excitement. The ferryman came and told me about it first. He asked me if I had heard the talk about the mystery. I said—"What mystery?" He said—"Why, a lot of men lost in a boat." It was on a Monday morning he told me that.
819. You yourself did not know the man Schneider? No, nor none of them. I do not know that I ever saw any of them; there was so many, it was impossible to see them all.
820. *Mr. Clarke.*] What is the general impression about Bermagui as to the fate of these men? I cannot tell you.
821. The people about there seemed to wonder what became of them? There was great inquiry about them.
822. But what is the general impression? I never heard.
823. *Chairman.*] You have heard people talking? I have heard people say they were lost—that is all I heard.
824. Is it the general impression that there was foul play—that they were murdered, in fact? I have heard people say so, but I do not know whether it is right.
825. Do you know a man named Campbell down there? A white man?
826. No, a black man, a half-caste? Yes, he gets oysters at the river.
827. Was he ever in your house about the time this mystery occurred? No; he came to rent my husband's boat to get oysters, but he never was in the house; that is since we moved, about twelve months since.
828. Did your husband have any conversation with him? No, except about the boat.
829. Did you see him before that? No.
830. Do you know whether your husband saw him before? No, I cannot say, but I do not think he did.
831. Is your husband still alive? Yes, he is working for Mr. Morehead.
832. Did you never hear your husband say what he thought had become of these men? He said it was a very strange thing it could not be found out; that was all he said.

Charles Leonard Jagers called in and examined on oath:—

833. *Chairman.*] You live at Bermagui? Yes, about 3 miles south of Bermagui.
834. Were you living there at the time Mr. Young and his party disappeared? Yes; I was working at the Montreal diggings; I took up a claim on the diggings when they broke out.
835. You were on the opposite side of the river to Young's camp? No, I think he was camped on the same side as I am living on.
836. But the diggings were on the opposite side? Yes.
837. Did you ever see Mr. Young? Not that I am aware of.
838. Did you ever see Mr. Schneider? Not that I am aware of.
839. Do you know where they were camped at Bermagui? Yes, I believe I do.
840. Did you ever see the tent they were camped in? No, I did not—not to notice it.
841. You remember the time of their disappearance from Bermagui? Yes.
842. That was in October, 1880—you were living there at that time? Yes.
843. Did you, on the Sunday, see the boat that was cast up on the rocks—the boat they were supposed to have been in? No, I did not see it for some seven or eight months after.
844. How far is your house from the ferry? Between 2 and 3 miles.
845. You remember that these people were missed on Sunday? I heard they had been out in a boat on Saturday night, and that on Sunday the boat was found.
846. Did any one call at your place on the Sunday? Not that Sunday.
847. On the Sunday night? It may be as well for me to explain—there were two men came to my place after that.
848. How long after? About a fortnight after. They came to my place and said they crossed the Bermagui River at 3 o'clock in the morning.

C. L. Jagers,  
14 Feb., 1884.

- C. L. Jagers. 849. But did not some one call on Sunday? No, not strangers.
850. Did not two men breakfast at your place on Monday morning? No.
- 14 Feb., 1884. 851. Go on in your own way? These two men who crossed the river in the middle of the night at Bermagui, they called at my place on the Monday morning and asked me if I could oblige them with some breakfast, as they had crossed Bermagui at 3 o'clock in the morning, and were going to Nelson. They said that after they came across the river they lay down at Morehead's fence and overslept themselves, and it was too far to go to Nelson without anything to eat.
852. Did you give them some breakfast? My wife gave them some.
853. Which way did they go? Towards Bega.
854. Along the coast? Yes; they paid my wife 1s. each for breakfast.
855. Did you notice anything strange in their manner? One of the men was strange; he never spoke, but only mumbled something to the other. I heard one address the other as Charley. I know one of the men, and had often seen him. After that I heard that the police thought these two men had gone in the steamer "Tasman," to Hobart. I thought it my duty to tell the police I knew one of the men, and that they were then in Bega. I told Mr. Keightley of it.
856. Do you know whether the police followed these two men or not? I do not think they did.
857. Did a person named Gray show you a likeness supposed to be a likeness of one of the two men who breakfasted at your place? No; he showed me a pencilled profile.
858. Was it like one of the men who had breakfast at your place? It was something like him, but I could not say it was exactly like him. I was milking a cow when they came and asked for breakfast. I told them I would see if my wife could give them breakfast. One of them was a stranger, and I did not like his appearance.
859. They said they were going to the Ninety-mile Beach? The one I did not like the look of made some remark to the other, whom I knew, and whose name was Barrett. I said "What do you say?" or words to that effect, and Barrett then remarked—"There ought to be plenty of gold at the Ninety-mile Beach."
860. Did you notice whether one of these men had a scar on his face? One of them seemed to have a scratch; it might have been an old mark, but I could not say whether it was recently made or not. There was a little black on the eye, and it looked to me as if he had been fighting.
861. It did not appear to be an old mark? I did not take sufficient notice of it to be able to say, but some of it looked to be fresh; it looked to me as if he had had his eye bunged up.
862. Had you any doubt about one of the parties—did you tell Mr. Gray you had any doubt about one of the parties, the party shown by the pencil sketch he showed you? I do not remember using those words; I said the chin resembled him.
863. I suppose they appeared to be ordinary swagmen? Ordinary diggers.
864. They were on foot? Yes, on foot, carrying their swags.
865. Had you any conversation with them about Mr. Young and party, who had disappeared the day before? No, it was a fortnight after they disappeared.
866. I understood you to say it was on the following Monday? No, it was a fortnight after. No one came to my place until a fortnight after.
867. The two men who had breakfast at your place are the two men who crossed the river? Crossed the ferry in the middle of the night.
868. Was there any cause for their crossing in the middle of the night? Barrett told me there was a rush at Nelson, and he wanted to get there soon.
869. Did you know the ferryman? I know old George. I have a man called Jack who put the two men over; I did not know him.
870. Did old George ever say to you he thought Young and his party had been murdered? Yes, we have often spoken together about them.
871. Did he ever give you any reasons for thinking they were murdered? No.
872. Did he ever say to you that he thought these two men who crossed by the punt in the middle of the night were the murderers? No.
873. Or anything like it? No, I do not recollect him saying anything like it. I recollect him saying it looked queer, or something to that effect, the two men crossing in the middle of the night.
874. Did the police follow up those two men? Not that I am aware of.
875. Have you any knowledge of the police following any man or men who crossed the ferry about that time? No.
876. If the police said they did follow two men and found out who they were it would be untrue? I could not say—they may have followed them up for what I know.
877. How long was it after the Sunday that Young disappeared that you saw the place where the boat was found? About seven months after I suppose it was; it was after Mr. Gray had been searching for him—after I went to look about his camp.
878. I suppose you know a good deal about Bermagui and Corunna Point? I know all about Bermagui but not Corunna; I never was up where the boat was found but once in my life; I have been to Read's place, and was working at Dawson's place some two months.
879. Did you ever hear of any one or more members of Young's party having money? I have heard from the police that they had money.
880. That is the boatman? Yes.
881. Did you ever hear that Mr. Young had money with him about the time of his disappearance? No; Mr. Gray told me that Lloyd had £19 with him, but that he thought Mr. Young had very little, if any.
882. Lloyd was one of the diggers? One of the boatmen, I believe.
883. But he was a digger? I do not know.
884. This man did not belong to Bermagui? No.
885. They came to the diggings? Yes.
886. Did you ever see the boat since? Yes.
887. But you did not see it for a long time after Mr. Young was missed? Not until some months after, when Mr. Gray came down; he had been down, I think, six weeks when I saw the boat.
888. I suppose it is not a place where any one could go astray in the bush? I do not think so; there are plenty of settlers around.
889. *Mr. Levin.*] Was there not some excitement amongst the people as soon as they heard the people were lost? Yes.

890. But not sufficient to induce you to go down and see the boat? I was on my digger's claim; if I had left my ground I should have lost it. C. L. Jagers.  
14 Feb., 1884.
891. Can you give the Committee a description of the one of the two men who breakfasted at your house who would not talk—who was not communicative? Yes; he was a stoutish man, a strongly built man; I suppose about 5 feet 11 inches in height; he was a strong-looking fellow; he had fair hair and a thin moustache.
892. Mr. Gray showed you a likeness? Yes.
893. Was that anything like the man who called at your house? Yes, it was something like him—I fancied the chin was something like him.
894. Did you not tell Mr. Gray it was like him? I told him I thought the chin was like him.
895. *Chairman.*] Do you remember Mr. Gray asking you if you thought Young's party were murdered? Yes.
896. Will you give us the conversation that took place between yourself and Mr. Gray, as near as you can recollect it—did you say anything about dogs? Yes, I did.
897. Will you give the Committee, as shortly as you can, an account of what passed between you? I cannot recollect all that passed; I recollect remarking that if they had been killed about there my dogs might have eaten them, as they had a terrible stink on them two or three times when I came home. I said,—“The dogs stink that bad that if the men were murdered and are anywhere about here I would think my dogs had eaten them.”
898. *Mr. Levin.*] Was any search made for these men as soon as their disappearance was made known? I never saw any search party down my way.
899. *Chairman.*] Did not Gray make a search? That was seven months after the men were lost; there was no search made shortly after they were missed.
900. Did not Mr. Hannan search? I do not know him to have searched.
901. *Mr. Barbour.*] When the residents of the district heard of such a serious affair having occurred, did they not muster up in a party and go in search of the missing men? Not that I am aware of.
902. *Mr. Levin.*] Coming back to the likeness—when Mr. Gray showed you that pencil sketch did you not at once recognize it as the likeness of Schneider? No, not of the man that had been at my place. I said the chin looked a good deal like him, but I would not like to say it was that man.
903. Then Mr. Gray must have been mistaken regarding the opinion you expressed? If he said I recognized it he is mistaken.
904. *Mr. Melville.*] I believe you have told the Committee you did not know Mr. Young at all? Not at all.
905. Did you know Schneider? No.
906. When did you first hear the men were missing? I think on the Monday morning after their disappearance. Albert Reed told me they had picked up a geological book.
907. What time of the day was that? About 11 o'clock. By finding the geological book it was thought that some one named Roberts was lost. The book was found on the beach.
908. How did you come to connect the geological book with Roberts? I always understood he was a geologist.
909. Did you visit the place where the boat was found? Seven or eight months after the occurrence—just about six weeks after Mr. Gray came down.
910. You heard that the men were supposed to have disappeared, and you never went, until seven or eight months afterwards, to the spot where the boat was found? No.
911. You are sure of what you are saying? Yes.
912. Did any one come to your house, or did anything unusual occur, on the Sunday after these people were lost? No.
913. If any member of your family stated that something unusual did occur would they be telling the truth? Not in connection with the loss of the party.
914. But suppose some member of your family were to say that somebody called at your place on that morning? There was a neighbour of mine called.
915. At what time? About 8 o'clock.
916. Was there any one at your place before 8 o'clock? No.
917. Did any one breakfast with you besides your own family? Yes, Tom Kent and his son.
918. At what time? About 8 or 9 o'clock.
919. About 11 o'clock you heard these people were lost? That was on the Monday. No one called at my place on the Monday morning.
920. What were you doing on the Sunday? I do not remember anything further than that I milked the cows.
921. Can you tell the Committee what you were doing on the Saturday night? I came home from the diggings about dusk.
922. Did you go out afterwards? No.
923. Stopped at home all the evening? Yes.
924. I suppose that any member of your family would know that you were at home all the evening? Yes.
925. Did you go from home on the Sunday? No.
926. Were any persons about there, any of the diggers and so forth—hearing the news, did any one go to where the boat was found on Sunday or Monday morning? Not from my place. I live 3 miles south of Bermagui, and that is 3 miles from Montreal. It is over 6 miles from my place to Montreal.
927. And how far is that from where the boat was found? Another 6 miles.
928. How far do you live from the ferry? About 3 miles.
929. How long would it take a person to walk from your place to the ferry? Not an hour.
930. What time did these persons come who had been put across the ferry? About 8 or 9 o'clock.
931. Then if it took them an hour it would be midnight when they crossed the ferry? Yes.
932. There would be no necessity to wake the ferryman up to take them across? No.
933. If evidence has been given that they crossed in the middle of the night, what became of them in the meantime, before they got to your place? They told me they lay down to have a sleep, and overslept themselves. They were going to Nelson, where they said there was a rush.
934. How long was that after the men were lost? About a fortnight.

- C. L. Jagers. 935. Did anything occur to enable you to fix the time at a fortnight—how can you fix it at a fortnight? My wife did not mention anything about it to the police; she did not like the look of one of the men; she said "He might come back and murder me," and she asked me not to say anything about it.
- 14 Feb., 1884. 936. Where were you working then? I was on the Montreal diggings.
937. What reason had your wife for asking you not to give information to the police? She did not like the look of one of the men.
938. You were living on good terms with your neighbours? Yes.
939. Can you give any reason why your wife wished you not to give information to the police? It is a very lonely place where we are living, and she was afraid if the man heard of it he might come back and do us injury.
940. How far is Mrs. Tomsett's from your place?  $3\frac{1}{2}$  miles, on the opposite side of the river.
941. Did you at any time ask any person if the number of Lamont Young's watch was known? Yes.
942. Will you tell the Committee why you put that question? I was working with some men on the diggings. I knew they were men who had not got much money, and I knew that one of them had a silver watch, and I thought it possible it might have been the silver watch belonging to Young. I afterwards found that it belonged to Thomas Wrixson.
943. Who had the silver watch? The party who was working with me.
944. Who told you he had a silver watch? Mr. Gray told me.
945. Before you saw Mr. Gray at all, or before Mr. Gray had told you anything about this—you tell the Committee now that you had some suspicions about a silver watch that was in the possession of some person? I had no suspicions; I knew that he had the watch.
946. Why did you connect the watch which that party had in his possession with Lamont Young? Because I thought if he had a silver watch, and the number was on it, it might be found.
947. Was there anything to lead you to believe it would be found? No.
948. Why did you come to the conclusion that this watch you had seen could be connected with Lamont Young? I don't know, but I thought it possible there might be some connection.
949. *Mr. Levin.*] Why did you connect this watch with the watch that Lamont Young was supposed to have lost? I asked Mr. Gray if Mr. Young had anything about him at the time of his disappearance that night he recognized—if he had any jewellery. Mr. Gray said that Young had nothing but a common silver watch. I asked him if he knew the number of the watch. He said, no, he did not know the number. I thought if his people knew the number of his watch, if it was anywhere it might be found. At this time Mr. Gray had persuaded me to try and find out what I could about the disappearance of the men—to try and get the reward. I wanted to know if he could give me the number of the watch. The man who was working with me was a great fellow for drinking, and I thought it just possible the watch he had might have belonged to Mr. Young. I have found out since that it was only a borrowed watch.
950. *Mr. Melville.*] Let us come back to the Monday morning: I am anxious to know if you are positive you saw no one on the Monday who was supposed to have crossed in the punt? Not at my house—I went away early in the morning.
951. Did you not tell Mr. Gray you had seen some one? No.
952. Or Moses Owen? No.
953. Or Hannan? No.
954. Did you say anything to Hannan about your not saying all you knew? Yes.
955. Why did you say that? Because I had no confidence in him.
956. Did you not think it was a funny thing to say to a man? I thought if I told Hannan all I suspected, I could not prove everything, and I thought it might come out.
957. Will you tell the Committee what you suspected, and whom you suspected, when you stated that to Hannan? I suspected that Campbell, the half-caste, had had a hand in the affair. I can tell you my reasons for thinking so. On the Saturday that Lamont Young was on the diggings, before I went home I went into the town and got some provisions to take home. There was a great crowd. I could not tell you what time it was, but I was home about dusk after leaving there. When leaving the crowd Campbell came up to me. He said—"Good day, Charlie; you are just the man I am looking for," or something to that effect. He said—"I was over at your place yesterday."
958. That would be Friday? Yes. He said—"Come here, I want you a minute." I followed him round the crowd to where two men were sitting down. One of them got up; he was a fair, stout-built young man. Campbell turned to me and said—"This is the man I have been talking to you about. The young man looked me in the eyes, and said—"No, it won't do," and they both walked away.
959. Did you know either of the men? Not the men that Campbell took me to.
960. Have you seen those men since? No.
961. You say this was on a Saturday night when you went home—had you not asked Campbell what he meant? No.
962. When you went up to those two men, you say one looked you straight in the face, and then said to Campbell, "It will not do"? Yes.
963. Did you not ask him why he said that? No.
964. Did not Campbell tell you something when he said you were just the man he had been looking for? No.
965. Whom did he see when he went to your place on the Friday? My wife.
966. Will you tell the Committee how, from that circumstance, you connect Campbell with the missing men, or connect the two men he took you to with the missing men—you say you did not ask why he took you, and were perfectly satisfied at being rejected without asking why you were rejected—you made no inquiry and they told you nothing about their plans—will you kindly tell the Committee when was the first time you heard of these missing men—you said, I think, it was about 11 o'clock on Monday? Yes.
967. How was it you did not connect the circumstances then with the missing men? I had no suspicion of Campbell at that time.
968. Did it not strike you as singular? Not for eight or nine months after. I had been partly agreeing with Campbell to go to look for a reef reported to exist in the Shoalhaven Mountains. We were to make a party to go.
969. You say you did not know the object of these men? I only thought that.
970. It took you eight months to think that? I did not think that at the time—that is the reason I did not connect it with the murder.

971. You say you and Campbell had been arranging to look for a reef? Some months before.
972. And some eight months after the men are lost you connect the circumstance of Campbell calling you on Saturday afternoon and taking you to see two men, with the men going to look for the reef—how many times between that and the expiration of the eight months did you see Campbell? I cannot remember.
973. Did you see him on the Monday or Tuesday? I did not see him for some months after the Saturday that Young disappeared.
974. Where is he now? Somewhere about Wogonga.
975. When you saw him afterwards, did any conversation take place about those two men? No.
976. Are you in the habit of being taken to people in that way without making inquiry as to why you are taken? It was so short I took no notice of it.
977. But you tell the Committee that the circumstances aroused a suspicion in your mind, but it took eight months for that suspicion to be aroused? I had been searching for the party in the meanwhile.
978. You have not communicated this to the police? No, but I have to Mr. Rolfe.
979. But not to the police? No.
980. Who would be the proper persons to communicate this to? The police. I can tell you my reason for not communicating it to the police. When Gray left I took up the search for the bodies.
981. But Gray did not appear on the scene until seven or eight months after the men were lost? No, I did not look for them until after he left.
982. And these circumstances came out afterwards—What I want you to state is your reason for not giving this information to the police? My reasons are these: I found two pannikins at what was supposed to be Lamont Young's camp. When I found them I thought one of them contained some sediment where the liquid had dried away. I took it to Mr. Berry and asked him to have it analyzed, as perhaps it might be poison. He looked into the pannikin, and rubbed it and then emptied it on the floor. He then took me across the way to the Police Office, and said to me—"Now Jagers, I have been told that you know all about this affair, that you were one of the party; now the best thing you can do is to tell me all about it; show me where the bodies are, and I will make it as light as I possibly can for you."
983. He having said that, and you having a suspicion about Campbell, why did not you speak to Berry of that suspicion? I had no suspicion at the time.
984. Was there anything singular about the pannikins? They were planted in a large tussock of grass.
985. Did you imagine that Young's party had been poisoned? When I looked at the pannikins I saw one of them had a small mark at the bottom, as though a few spoonfuls of tea had dried away. I saw something glitter at the bottom; it might have been sugar.
986. I want you tell the Committee why you came to suspect that Young's party had been poisoned? I had no other reason.
987. What thought or idea had you up to that time about the people who had disappeared? I thought they had been murdered.
988. Will you swear they have not been murdered? No.
989. Did you say anything to Moses Owen about the increasing of the reward? Yes.
990. What did you say? I cannot recollect what I said.
991. Did you state that if the reward was increased you might be able to give evidence? No; I said if the reward was increased I would start to look for the bodies.
992. Where would you have looked for the bodies? I would have looked about everywhere.
993. Were you not aware that everywhere had been searched already? I thought they might have missed them.
994. Of course you have heard the current rumour that these persons are supposed to have been drowned off Corunna Point? I have heard from Mr. Keightley that he thought they had been drowned or murdered.
995. Have you had any experience in boating about there? Yes, about Bernagni, but not so far up as Corunna.
996. You know something of the coast? Yes.
997. Suppose a boat was brought out of the river and the wind was blowing southward, would it be sufficient to take a boat from a point off the heads to where Lamont Young's boat was found, in a direct line? No.
998. Have you the slightest idea as to how the wind was blowing on the Sunday morning? No.
999. Was there much wind? I cannot say; I did not notice the weather much, and cannot say whether it was windy or not.
1000. Was it fine weather? It was rough weather; I remember some gusty weather and some fine weather about that time; I really forget what the weather was like.
1001. Did you say to Hearn at any time that if you gave information you and your family might be murdered? What I said was, that if I were to tell my suspicions I could prove nothing so as to have any one taken up, and I might have my family murdered.
1002. Who do you suspect would murder your family? I thought if I put suspicion on Campbell he might do so.
1003. What makes you think he is so blood-thirsty? I do not know that he is more blood-thirsty than other half-castes.
1004. Have you been in the bush with him? I have drawn oysters with him.
1005. Has he shown any disposition to lead you to believe that he is the violent man you would lead the Committee to infer that he is? I fancy he would.
1006. Why? Because it is the way of them, generally speaking.
1007. What have you seen in Campbell to lead you to suspect him of possessing such a disposition—he has had meals at your house? Yes, when he has been coming backwards and forwards oystering.
1008. What reason can you give for suspecting that he would commit murder? I cannot give any other reason. It would be hard for him to know that I put a suspicion upon him.
1009. Had he any money on him? I do not know.
1010. You say you did not see him for six or seven months? No.
1011. He disappeared? No, he did not disappear; he lives at Wogonga.
1012. The police took the pannikins? Yes.
1013. Did you ever ask anybody if they knew or if they thought that Lamont Young was a good runner? Yes.

C. L. Jagers.

14 Feb., 1884.

- C. L. Jagers. 1014. What was your reason for asking that? We were speaking about running, to a man named Kent. We saw Mr. Young vault into his saddle, and I just put the question. It was merely a conversation.
- 14 Feb., 1884. 1015. Does it not strike you as singular that you should ask a perfect stranger whether Mr. Young was a good runner, through simply seeing him vault into the saddle? No; I was simply making inquiry as to what sort of man Mr. Young was.
1016. At that time, in your mind, Mr. Lamont Young had not met with foul play? I had not taken the trouble to look into it or think about it.
1017. Not having taken the trouble to look or think, why did you ask if he was a good runner? Only just merely in conversation. I said many a thing to Mr. Gray, and if it has been turned and twisted—
1018. We are asking you fairly and honestly—here is a circumstance? I cannot give you any other answer.
1019. Did you not say that if he was good runner he might have got away after the others were struck? I don't think so.
1020. Did you ever ask Campbell anything about this at all? Yes, we have talked about it.
1021. Did Campbell ever tell you what he wanted with you on that Saturday afternoon? No, I never asked him; I had reasons for not asking him.
1022. What reasons? I did not want him to know I had any suspicions of him.
1023. *Mr. Levin.*] That would not throw any suspicion upon him, to ask him what he called at your place for—what he wanted you for? No.
1024. *Mr. Melville.*] You say you never asked Campbell the object of his calling at your house on Friday: by-the-bye, did he tell you that he called on Friday? No.
1025. You saw him months afterwards, and you never asked him from then till now what those two men wanted with you? No.
1026. You say you have not mentioned it because it might have aroused suspicion? Yes.
1027. In what way would it have aroused suspicion—how could you think this man should imagine you were making any inquiries, if the man was innocent, and if you knew nothing about what he had done or been mixed up in? Because I thought he had a hand in it, and that if he got to know inquiries were being made about him, it might arouse suspicion in his mind.
1028. Can you explain to this Committee how he could connect the mere fact of your saying—“Well, Campbell, what did you want with me that Saturday afternoon?” or, “Why did you call at my home?”—how could he connect that with the loss of these men? I cannot explain it—I am an ignorant man.
1029. But I want, if possible, a reason why: you did not suspect Campbell for months afterwards—were you not in his company between the time the men were lost and your coming to the conclusion that he might have had a hand in it? I cannot say.
1030. It is possible you were in his company between the Saturday afternoon and the time when you began to think how these men disappeared, and there was no conversation between you and him about the matter? No, we had a conversation about it—we had talked about it.
1031. Were you in his company at all before you talked about it? No.
1032. Fix in your mind Saturday afternoon, and then try to bring to your mind as near as you can the first time you met Campbell, where was it? I cannot tell you.
1033. Where was it the second time? I cannot say.
1034. Where was it the third time? He came down to look for oysters.\*
1035. What would be the probable time that elapsed before he came to your home? Seven, eight, or it may be nine months.
1036. Will you swear to seven months? I cannot swear to any date.
1037. Will you swear to eight months? I cannot swear to any date.
1038. Will you swear it was not a week? It was over a week; I reckon it was about seven or eight months.
1039. Why did you tell the Committee it was about four months? I did not tell the Committee it was four months.
1040. Will you swear to seven months—will you fix the time that elapsed from the Saturday you spoke of to the time you saw Campbell again? It was over six months—I can swear that.
1041. You will swear it was over six months? Yes.
1042. Just now you said it was nine months? I said it was eight or nine; I will swear it was over six.
1043. How do you fix it at six months—why have you come to the conclusion to fix it at six months? Because I reckoned in my mind it was seven or eight months afterwards, therefore I am confident it must have been six months at any rate.
1044. What did he come about then? He was going down to the lake to look for oysters.
1045. And he called upon you—what was the object of his visit? He called to beg a billy of water to make some tea.
1046. Anything else? I think he bought a pound of butter from my wife.
1047. Why do you recollect so distinctly that he bought a pound of butter and borrowed a billy of water when you cannot fix the date? Because I have been thinking over it for some time.
1048. Who did he get the butter from? I think from my wife.
1049. Who did he get the water from? I think from one of my children—one of my boys.
1050. Were you at home? Yes.
1051. What were you doing? I forget what I was working at.
1052. Did he not come to speak to you? Yes, he came to the house.
1053. Did he not come to you? We were just at dinner, or had just had dinner.
1054. Did he have any dinner with you? No.
1055. Was there any conversation between you? I asked him where he was going; he said he was going down to the Murra for oysters. He asked me what I would charge to bring them up, and when I could go, and so on—we arranged that.
1056. Do you keep any books? No.
1057. Any records of anything? No.
1058. He asked you if you would go down for some oysters, and you arranged to do so—what was he to give you? Two shillings a bag. 1059.

\* ADDED (on revision) :—This was I believe the first time I saw him after he spoke to me at the diggings, and must have been six or eight months from that time.

1059. How long after that did you go for the oysters—after the Saturday? I cannot remember.\*
1060. Was it about two or three days? I think it was about a week.
1061. Where did you take the oysters? To Bermagui.
1062. Was he there when you took them? Yes.
1063. How is it you did not recollect about the oysters when we wanted you to fix the time—did you see him when you went down for the oysters? Yes.
1064. Did any conversation take place then? Yes.
1065. What did you say? He wanted me to take about twenty bags; I thought seventeen would be enough.
1066. Besides the talk about the oysters, was anything said about these people being lost? No.
1067. Not a word? No.
1068. You did not then suspect him? No.
1069. You did not say anything to him about calling at your house on the Friday—the conversation was principally about the oysters? Yes.
1070. Did you not ask him whether he wanted you to bring the oysters when he called upon you on the Friday? I was not drawing oysters then.
1071. The Committee are to understand that six clear months elapsed from the Saturday and the next time you saw Campbell? Yes.
1072. Then during the next week or fortnight you saw him twice? Yes.
1073. How many loads of oysters did you draw for him? One.
1074. Did he pay you then? Yes. I brought ten bags for him, and ten for another half-caste.
1075. He paid you when you drew the oysters? When he gave the order he paid me.
1076. Now we have got the six months—how long was it after that before you again met Campbell? I cannot remember; I should say it was nearly twelve months before I saw him again.
1077. You do not mean twelve months from the Saturday? No; I think it was twelve months after I drew the oysters for him before I saw him again.
1078. Was he about Bermagui again? No, I did not see him.
1079. Not being about the neighbourhood, not living in the neighbourhood, you say you were frightened to communicate your suspicions to the police, for fear of the man? Yes.
1080. Now, do you suspect anybody else? I do not know the names of any of the others who were in Campbell's party.
1081. But Jack, Bill, Tom, let us have the names? I have suspicion on Mr. Berry.
1082. Who is Mr. Berry? A constable.
1083. When did that suspicion come to your mind? When he rubbed that out of the pannikin and threw it away.
1084. Had you any other reason to suspect Berry? I know he is a man likely to get into a row with a man.
1085. And for that reason you have come to the conclusion you have—you have a sort of suspicion about him? Yes.
1086. Any other reason why you suspect Berry? Well, about a week before, he was going to shoot a man.
1087. Who was he going to shoot? A man named Fergusson.
1088. Were you there? No; the man told me so.
1089. Did you tell anybody anything about what occurred? Some months after, when Mr. Gray came down.
1090. Was there any one else you suspected; you speak of Campbell and his party; you are a man of the world, a man of good common sense; was there any one else you suspected? Only Mr. Berry.
1091. As you suspected Campbell and his party, and for some slight reason you suspected Berry, will you tell us in what way they would be likely to dispose of these persons—how could the murder be accomplished? I cannot form any idea.
1092. You suspect they made away with these people—in what way do you suppose they would do it? There are marks of an axe in the boat, and a bullet in the stem; and it appears to me as if they had a fight in the boat and then they were brutally murdered.
1093. That is your impression—that there was a fight in the boat and then they were brutally murdered? Yes.
1094. How is it that no traces have been found: you were not present, but can you give us your idea of how you think they did it? I have heard that the sail is missing, and some blankets, and some rope. I think it likely that the murderers wound the bodies in the blankets and then buried them in the sea.
1095. Would they not wash in shore? I do not know.
1096. Do you know anything of the tides there? They wash pretty strong, but the current generally goes to the south.
1097. Where would they have had to drop the bodies off the land so that the southerly current would have carried them away and left no traces? I suppose if they took them out 3 or 4 miles the bodies would not wash ashore.
1098. Is it possible to take a boat out there without being seen? I hardly think so.
1099. There is a reward at present offered for the discovery of these persons? Yes.
1100. What amount do you think would have been sufficient to have induced you to have made the statements to the police that you have given to the Committee? No amount of money would have induced me to make a statement to the police.
1101. Did you say anything like this to anybody down there: "Two or three persons came to you who lived in the district, and gave you to understand that if you did not keep your mouth shut that you would very soon find out that there would be something the matter"? Those words are twisted.
1102. Did you say anything of that kind? I did not say anything of that kind.
1103. Did anybody come to you and say anything of that kind? Not of that kind.
1104. But of any kind? Not came to me—I went. My mother told me to leave it off, not to bother with it, that I would get into trouble, for Berry had accused me of being the murderer. Mr. Hetherington told me it was best to leave such things alone, and not to bother to go for the reward.
1105. What led Mr. Hetherington to say that to you? I do not know.

1106.

\* NOTE (on revision):—About a week after he was at my house to engage me I went to the Murra for the oysters. If the Saturday referred to is the day on which I saw him on the diggings, it was seven or eight months afterwards.

- C. L. Jaggars. 1106. What conversation had he with you? I told him about Berry accusing me of being the murderer.  
 14 Feb., 1884. 1107. He said—"You had better leave it alone"? He said it when I got some hair out of the boat. I wanted to send it to Sydney to see if it was human hair, and he advised me to leave the matter alone.  
 1108. You have had a conversation with several persons? Yes.  
 1109. Are you sure you did not use the words to one or other of those persons? Yes.  
 1110. Have you had a copy of the evidence taken before this Committee? Yes.  
 1111. When did you get it? About a fortnight ago.  
 1112. Who gave it to you? Mr. Rolfe showed it to me.  
 1113. *Chairman.*] Who is Mr. Rolfe? I understood that he was a detective or something of the sort sent by this Committee, and I told him all my suspicions and all I knew about it.  
 1114. How long ago is that? About a fortnight ago.  
 1115. *Mr. Melville.*] You read the evidence then? Yes.  
 1116. Do you know who made the statement? Mr. Hannan; he twisted my words as to what old George the white man said to me.

Mrs. Agnes Jaggars called in and examined on oath:—

- Mrs. A. Jaggars. 1117. *Chairman.*] Where do you live? At Bermagui. The place we live at is called Barrowgate; it is near Bermagui.  
 14 Feb., 1884. 1118. How long have you lived there? Eight years last April.  
 1119. You were living at the same place when Mr. Young and his party disappeared? Yes, we were living at the same place.  
 1120. Did you ever see Mr. Young? Not that I am aware of. I may have seen him in the crowd amongst others.  
 1121. You live about 3 miles from the ferry? About 3 miles.  
 1122. You remember the time when Mr. Young and his party disappeared? Yes.  
 1123. Did any persons come to your house on the Sunday night or the following Monday morning? No one came on Sunday night.  
 1124. Did any one come on the Sunday morning? I do not know. Two men called, but I cannot say whether it was on the Monday or Tuesday.  
 1125. Was it on the following Monday? I cannot say.  
 1126. Did you tell Mr. Gray it was on the day following the disappearance of Mr. Young? No, I did not remember when it was; it may have been a week, or a few days or a fortnight.  
 1127. After Mr. Young's disappearance? After Mr. Young's disappearance.  
 1128. But it was not the next day? I do not think it could have been the next day, because it was Sunday.  
 1129. He was lost on Saturday night, and not seen afterwards? I feel sure it was a week after that the men called.  
 1130. Did you notice the men? I noticed that one was fair and the other dark, but I did not take much notice.  
 1131. Had one of them a scar on his face? One had a little bit of a scar on one side; I cannot say whether it was freshly done or not.  
 1132. What height was the man? I did not take notice, I was in and out of the room with my work; they were both sitting down.  
 1133. Did the police make any inquiries of you about the two men? Yes.  
 1134. Did the police follow them? I do not know.  
 1135. Did they say whether they would follow them? I do not know. I asked them why they did not fetch the men for me to recognize.  
 1136. I suppose you recollect the particular time we are referring to? Yes.  
 1137. Where was your husband working at that time? At the Montreal diggings.  
 1138. How often had he need to come home then? Only once a week—he came home every Saturday.  
 1139. Did he come home that Saturday? He came home every Saturday.  
 1140. On the following day, Sunday, was he at home? He was at home all day on Sunday.  
 1141. You are quite sure? Quite sure.  
 1142. Do you know a man named Shoemaker? Yes.  
 1143. Do you remember where he was that day? He lives 3 miles away from us, at Morehead's place, close to Bermagui.  
 1144. Did he come to your place on the Sunday or the Saturday? I do not think he came to our place for more than a week after that; it might have been a month after.  
 1145. He does not often go to your place? No, I do not think he has been to our place for a year. He is living at Murra.  
 1146. Do you remember being shown a pencil likeness by Mr. Gray when he was at your place? Yes.  
 1147. Was that likeness like either of the men who breakfasted at your place? I told him I could not recognize it—I could not recognize any profile.  
 1148. Then no person came to your place on that Saturday or that Sunday? No, not that I am aware of.  
 1149. Did you know the ferry-man who used to ferry people across the river at that time? George the white man—I forget his name; he was known as George the white man.  
 1150. Did not these two men you speak of cross the ferry in the middle of the night? I do not know; they told my husband they crossed at 3 o'clock in the morning.  
 1151. I suppose they appeared like ordinary working men? They appeared to be diggers—they had shovels with them.  
 1152. Did the punt-man ever say anything to you that he thought they were the murderers of Mr. Young? I was not acquainted with the puntman; I live 3 miles away, and have a large family.  
 1153. *Mr. Melville.*] You remember the Saturday previous to the Sunday on which these persons are supposed to have been lost? I remember Saturday, but I do not remember anything further.  
 1154. Did any person call at your place during that Saturday, and ask to see Jaggars on a matter of business? Not that I am aware of.  
 1155. You knew Campbell, the half-caste? Yes, I have seen him two or three times—the name is familiar.  
 1156.

1156. Did he call at your place that Saturday? I do not know whether it was that Saturday; he called at my place, but I could not say whether it was Saturday, or what day it was.
1157. He might have called on Saturday? It might have been Friday, or on the Saturday; I could not say.
1158. When your husband returned home on the Saturday night, did he say anything about having seen Campbell? Not on Saturday.
1159. Did he mention anything about it on Sunday? He mentioned something about seeing Campbell, but I do not know whether it was Sunday or what day it was.
1160. Will you tell the Committee what he said—did he speak of any circumstances having occurred? I do not remember anything.
1161. Did he say whether Campbell asked him to do something? He asked me if my husband was at home; he said he wanted to see him.
1162. Campbell called on Friday and asked if your husband was at home? I do not know whether it was Friday or not.
1163. Have you any idea of the business he wanted to see your husband about? No.
1164. Did your husband ever tell you what it was? There was something about oysters.
1165. Did your husband say anything to you concerning two other men who were with Campbell? Yes, there were two other men with Campbell when he called; there was a whole lot of them.
1166. How many would you say? There may have been four or five, or perhaps more. There were more than three—more than four, I think.
1167. Did you know any of the others by name or by sight? No, they were all strangers to me.
1168. Then your husband was at home on the Saturday night? Yes.
1169. Home all day on Sunday? Yes.
1170. And went away to his work as usual on Monday morning? Yes, went to work at Montreal.
1171. What time did he go away on Monday morning? A short time before 8 o'clock.
1172. Those two persons said to have crossed the punt—did they breakfast with you on the Monday morning? They had breakfast, but I cannot say that it was Monday morning.
1173. Could you fix the time and say whether it was on Monday morning when these people had breakfast with you? My husband must have been home from the diggings; he had done his work, and was not going back to the diggings. He was working at home when they called, and had just done milking.
1174. Up to Saturday night, when Campbell called, your husband had virtually finished his work at the diggings? I feel sure he had left the diggings at the time, or else he would not have been at home milking. He had just done milking when the two men came in to breakfast.
1175. But it was on Monday morning that you kindly gave these two men a meal? I cannot remember whether it was Monday morning or not.
1176. Did any conversation take place between your husband and these two men? Yes.
1177. Did you hear any of it? I heard the dark man; I think he was talking, as I heard him address the other as Charlie, and that is my husband's name. He said—"Well, Charlie, our shovels have got us our breakfast." One man was named Tom Barrett, and it was he who addressed the other as Charlie.
1178. Then it was Barrett who spoke? The other man never spoke at all.
1179. Did it not strike you as singular that men should come to your place and have breakfast and never upon their lips? It was surprising to me.
1180. When Barrett said, "Our shovels, Charlie, have got us our breakfast," the other man did not make any reply? No.
1181. We are now speaking of the Sunday when Mr. Young is supposed to have been lost; what time elapsed from then until the next time that Campbell called at your house? I cannot say.
1182. Was it three months? It might have been three months, more or less.
1183. Might it have been four months? I do not recollect—I cannot say.
1184. The next time he came he came about some oysters? Yes, my husband drew some oysters for him.
1185. Did he get anything at your house at that time? He never got anything at my place except that he asked me to sell him a loaf.
1186. Did you sell him a loaf? Yes, and some milk; there was a good many of the party, and he asked me to get them some tea.
1187. Are you speaking of the Friday or the Saturday, or the next time that Campbell came back? I cannot remember what time it was he came back, when he came to ask my husband to draw some oysters.
1188. When he came on Thursday or Friday, what did he want your husband for? He said he would see him on the diggings; I do not know what he wanted him for.
1189. When he called about the oysters were any other persons with him? I did not see him.
1190. You arranged to sell him some articles of necessity; did he stay any length of time? No.
1191. Are you in any way afraid or timid of this man Campbell—are you afraid he will do you violence? I live in a lonely place.
1192. Have you had any particular cause to fear him? No, but I have a nervousness.
1193. Had you any particular cause to fear he would come to injure you? I knew nothing against the man to be afraid of him; of course his being a half-caste, I am rather timid of him.
1194. What I want to get at is this: living in the district, had you any cause to fear him more than any other person? No.
1195. Did your husband ever have a conversation with you about the number of a silver watch? No.
1196. Has your husband any watch? No.
1197. Has he had a silver watch of any kind? Not since I have been married to him.
1198. After Mr. Young's party were lost, how long was it before you heard of the loss? My husband read it in the newspaper.
1199. A newspaper published in the district? No, I think it was the *Evening News*, that came from Sydney.
1200. Do you know whether any persons said to your husband he had better hold his tongue about this matter—has he ever told you that persons have threatened him that if he gave information or expressed any suspicion, that your family would be likely to be ill-treated? I do not remember.
1201. He never spoke about it to you? I do not remember.
1202. One would think that if your husband had said anything of the kind it would be impressed on your memory.

Mrs. A.  
Jagers.  
14 Feb., 1884.

Mrs. A.  
Jaggers.  
14 Feb., 1884.

memory. Suppose he came home to-day and said, "Well, I have my suspicions, but I had better hold my tongue; if I do not, something serious may occur to my family," that would impress itself on your memory? I do not remember.

1203. You have had a conversation with persons about these people being missed? Mr. George and Mr. Fox, I believe, who called on me; I have no neighbours.

1204. Have you any suspicion whatever that Campbell is mixed up with the disappearance of these people? It would not be right for me to suspect.

1205. But have you any reason to suspect him? I cannot say that I know him; I have seen him two or three times.

1206. Has your husband said that he had any suspicion of Campbell? Yes, he had a suspicion of him.

1207. Do you know Constable Berry? Yes.

1208. Do you think he is likely to be mixed up with the disappearance of Mr. Young—the people who had breakfast at your place? My husband said it was right for him to mention it to Mr. Berry, so that the police might know the two men called. I asked him not to mention it before he went to the diggings, not until after he came home, because I was alone.

1209. *Mr. Levin.*] How long was it after Campbell called at your place the first time that your husband left the diggings? He was at the diggings when Campbell called.

1210. How long did he stop at the diggings after Campbell called? Not long after he told about these two men staying. He did not stay long at the diggings then, because he was clean worked out.

1211. Was it a day, or two days, or was it a week? I cannot remember.

1212. You have no idea? No.

1213. Your husband told you he met Campbell at the diggings? Yes.

1214. Did he finish his work at the diggings? He may have finished his work, but it was not long after he told Mr. Berry about the two men having breakfasted at our place—when they were looking for the steamer—he said it was 3 o'clock in the morning when two men called at our place.

1215. You know when Campbell called at your place with five or six men—how long after that did your husband work at the diggings? He may have worked until Saturday or until the next week, I cannot tell; it was not long he worked there, because I said to him, "You might have left it this long," as I was uneasy.

1216. *Mr. Barbour.*] What were you afraid of? I did not like the appearance of the man who was with Barrett when he breakfasted at our place. I said to my husband—"You might just as well leave it as tell it this week, about these two men."

1217. It was just a suspicion you had? I did not like the appearance of the man with Barrett very much; when he came in he stared at me—he did not talk. I said to my husband—"I would much rather you would leave it until you have done your work."

1218. *Mr. Levin.*] The circumstance of the disappearance of Young's party was known at the time these men called at your place? Yes.

1219. How long had it been known? I do not know.

1220. Several days? It might have been several days.

1221. *Mr. Melville.*] With regard to the two persons who called at your place, and to whom you gave breakfast, had they the appearance of diggers? Yes, they both had the appearance of being diggers. The man who did not talk did not have so much the appearance of the digger as the other man.

1222. *Mr. Levin.*] Your husband knows Thomas Barrett? Yes. The other man he did not know; the man had a scar on the left side of the face, but whether it was a fresh scar or an old one I cannot tell.

1223. *Mr. Melville.*] Was Barrett one of the men who called with Campbell on the Friday? No, they were all strangers who were with Campbell.

1224. You have not told anybody at any time that it was on the Monday morning that these people came to you? If it was Monday morning and anybody came, I may have said that two men called on the Monday morning, but I don't remember; it may have been on the Monday morning; it was as likely to have been Monday as any other day; it was between 9 and 10 o'clock.

1225. The man who did not speak was clean-shaved on the chin? Yes.

1226. Was it a coloured coat he had on? I cannot remember; I rather think he had a light dress on.

1227. Did they say where they were going? They said they were going to Nelson, where there was a rush. My husband was astonished at them going there.

1228. That was not very far away? It may have been perhaps 15 miles.

1229. Were they on the direct road to it in passing your place? Yes.

1230. They had to cross the punt from Montreal to get to it? Yes.

1231. *Mr. Barbour.*] In point of fact, was there a rush at that place? No; that made my husband surprised. He said—"Now the Montreal diggings are over, it would perhaps be a good thing for me to go to Nelson."

1232. But people were looking for gold there? Yes.

1233. It was talked about? Oh yes, but there was no fresh rush.

1234. *Mr. Melville.*] You have seen nothing more of the two men since the morning they had breakfast with you? No; my husband saw Barrett at Bega; and there was another man at Bega, whom Barrett called Charley.

1235. You can give the Committee no idea of the mode or way in which Young's party disappeared? It would be very hard for me to form an opinion; we lived some miles away.

1236. *Chairman.*] Did you hear people talking about it? Yes, I have heard people express surprise that the two men who had breakfast at our place had not been brought to me to recognize. Tom Barrett is well known in Bega now, but this other man has not been seen since.

1237. Was any suspicion attached to those two men? Not that I know of.

1238. It was some time after Young's disappearance that they came to your place? Yes, it was after—it may have been a week after.

1239. There was nothing unusual in their coming? No; any person might have called, although I do not give breakfast to any one who may call.

1240. What is the general impression in the district where you live as to what became of Mr. Young and the rest of his party? Some people think they were drowned; some say they were kidnapped; there are different ways thought of.

1241. *Mr. Melville.*] But there is no trace of the lost man Salway? No.

1242.

1242. *Chairman.*] But Salway was a little silly, was he not? No; his daughter is in Sydney.  
 1243. *Mr. Melville.*] When did Mr. Rolfe call on you? About a week ago.  
 1244. Did he give you a copy of the evidence that had been taken before this Committee? No.  
 1245. Did you ever see a copy of the evidence taken before this Committee? There was a printed paper—  
 Mr. Rolfe had a printed paper with him.  
 1246. And he gave it to your husband? I do not know whether he gave it to him—he lent it to him.  
 My husband read some of it, and I heard him read it.  
 1247. *Mr. Levin.*] Are you living on the same side of the river that Mr. Young's party were lost on?  
 Yes. I only knew that on the day we were coming away on the steamer.  
 1248. *Mr. Melville.*] Mr. Rolfe came up with you in the steamer? Yes.  
 1249. What did he represent himself to you as, at your home? As a friend of Mr. Lamont Young.  
 1250. Did you know him? I never saw him before.  
 1251. Did he set himself forth as a detective? No.

Mrs. A.  
Jagers.

14 Feb., 1884.

John Thomas Hobbes, Esq., called in and examined on oath:—

1252. *Chairman.*] Do you reside at Bermagui? My family are residing there. I have land at Wallaga Lake. I am engaged at the Department of Lands in Sydney.  
 1253. But you are living at Bermagui? Yes, that is my residence.  
 1254. You were living there at the time that Mr. Young disappeared? I was.  
 1255. I suppose you recollect about the time? I think I remember every occurrence.  
 1256. Do you remember where Mr. Young was camped on the Bermagui River? I did not see the camp. The only time I saw Mr. Young was on the Saturday previous to his disappearance; I was then at Montreal with Mr. Keightley.  
 1257. That was the day he disappeared? The day before.  
 1258. You never saw him after that Saturday? No.  
 1259. *Mr. Barbour.*] You were with him on Saturday? Yes.  
 1260. Was that at Bermagui? No, at Montreal.  
 1261. About what time of the day? About 12 o'clock. I did not know Mr. Young; I was with Mr. Keightley. A gentleman came up to speak to Mr. Keightley, and I walked away; when I met Mr. Keightley again I asked who the gentleman was, and he told me it was Mr. Lamont Young. I said I would go back to see him to take him home with me; I went back, but could not see him.  
 1262. *Chairman.*] Can you give us any information with regard to the evidence given by Constable Berry. [*Part of Constable Berry's evidence was read to witness.*] Whether Mr. Young was going to have dinner with you on the following day—or any information you can give to the Committee we shall be glad to have? The evidence exactly corresponds with what I heard occurred at the time. I may say I am a Magistrate of the Colony, and the police told me a great many things which perhaps they would not have told to others. I heard of it, but I had not made any engagement with Mr. Young, because, as I mentioned to the Committee, I had not seen him to know him. But Mr. Keightley very likely said to Mr. Young that I should be glad to have him over at my place. The fact that he intended to go fishing, I believe that is perfectly true, because I remember Sergeant Stapleton telling me distinctly what had occurred. The next thing I knew was on the Sunday morning. Mr. Keightley and I were sitting in my sitting-room at home; my wife, who was in the garden, drew our attention to a boat that was sailing on the sea.  
 1263. Your house is within sight of the ocean? Yes.  
 1264. What time in the morning was this? About half-past 11 o'clock.  
 1265. Was the boat close enough for you to recognize it? We recognized the boat, but could not recognize the people in it.  
 1266. Did you recognize the boat as belonging to Mr. Young? Yes, we noticed the colour. The sail had a peculiar form. Being pretty stiff at the time, the boat was heeled over to the land. We could not see the number of people in it; we could only see that there were three, four, or five persons.  
 1267. Which way was the boat sailing? Northwards, towards Corunna Point.  
 1268. Living there at the time, did you take any part in the search for the party when it was found they were lost? Yes; on the Monday morning whilst we were at breakfast —  
 1269. When did you first hear they were lost? On the Monday morning, whilst at breakfast.  
 1270. Early? A little after 8 o'clock. Berry came over to inform Mr. Keightley, who was staying with me, that the boat had been found, and that it was supposed that Mr. Lamont Young had been lost in it. We got horses at once, and rode over there with Constables Berry and Day.  
 1271. That is over to Corunna Point? Yes.  
 1272. And there was the identical boat you saw passing by from your place the day before? Yes; the mast was unstepped; the sail was brought ashore, and it proved to have been evidently made to suit for a tent as well as a boat sail. That is the conclusion we arrived at, and it was corroborated by a son of one of the men who was lost; it was the son of the owner of the boat.  
 1273. On the morning you went to see the boat, there were certain things found in it that belonged to Lamont Young? Yes, there were some books.  
 1274. Any instruments? Yes, one or two small instruments, and I think a belt. There was a compass and a level, or an instrument for taking angles, and one or two other things.  
 1275. From what you saw then, what impression did you form—did you think the boat had been capsized and the party had been drowned? No, my impression was quite the contrary; after we had the things out and had looked at them, Mr. Keightley said to Berry—"Berry, what do you think of this?" Berry said—"Oh, some accident; what do you think, Day?" Day was the other constable. Day said—"Oh, I think the same; they have got upset in some way."  
 1276. What was your impression? I said to Mr. Keightley—"I am surprised that Mr. Berry and Day can imagine anything of the kind; I am quite certain that foul play has occurred." I was surprised at the police coming to the conclusion that an accident had happened, and that the bodies would turn up.  
 1277. I suppose your impression was, that if the boat had capsized, the things you saw could not have been in it? It is quite certain that if the boat had capsized sufficient to have turned the men out, the things we saw would not have remained on the seats.

J. T.  
Hobbes, Esq.

14 Feb., 1884.

J. T. Hobbes, Esq., 1278. What did you really think was the cause of their death or disappearance? I could come to no other conclusion at the time than that foul play had occurred, but in what way I could not conceive.

1279. Had you any opinion of your own—any inward opinion? Not at first, nor have I now, notwithstanding that I know all that has taken place. I know there has been some accusation or suspicion against some people down there. But I could hardly think myself—one of the witnesses you had here, I think, knew more about it than anybody else, but I would not give his information. I saw him before I came up to Sydney about two years ago—I saw him at Montreal then. I said to him—“Jagers, I have heard you know a good deal of this—you have said a great deal of what occurred; I wonder you don't give out, and clear away the stigma that is attached to the district; and besides, to obtain the reward that is offered.” After a long time he said, “Well, I do know—I know a great deal; I came down to Berry one day purposely to tell him what I did know; but the moment I began to speak, Berry turned round and accused me of being one of those concerned in it; then I stopped, and would say no more.” I said to him—“You need not tell Berry; if you are anxious to tell, go to Bega; go and tell Sergeant Church; or if you like to tell me I will do all I can for you in obtaining the reward, if your information proves to be worth the reward.” He said that he had been to Sergeant Church and told him, and that Sergeant Church told him he was not obliged to tell Berry—that he might tell any of the other police. I said—“Why don't you?” He said—“I don't know.” He would not tell me why. I did hear, at the time I was down there, that some suspicion was attached to a half-caste man, named Campbell. Campbell seemed to me a very hard-working man; I have known him for several years; he has a large family; I cannot think he would do anything of the kind; in fact there is no one there I could connect with it. I must say that just about the time it occurred—I rather think it was on the Thursday previous to this Saturday I am speaking of—the Saturday when I first saw Mr. Lamont Young—I was there at Montreal; I saw a great discussion going on amongst the diggers; they were running about and talking. I said to one of them, “Is anything up—is anything wrong?” He said—“Yes; some of the New Zealand men have just seen Sullivan go by.” Sullivan was connected with some atrocious murders in New Zealand. The man said—“The boys are just rolling up to lynch him; and if they can get him they will put a stop to him.” He then went away from me. I still saw excitement going on. I found out afterwards that it was really Sullivan who was there; but he was missed, and they could not find him—he got away. That is the only thing I can connect at all with Lamont Young's disappearance.

1280. Did Sullivan come to the place by steamer or by ship? They did not know how he came.

1281. They knew he was there? Yes.

1282. But then would it not be almost impossible for Sullivan to bring Mr. Young and his party and the boatmen together? It would indeed. I cannot understand it, unless he had some one else with him. My theory at the time—of course I could only form it from what I heard—but my theory at the time was that the crew had landed. A little to the north of Corunna Lake were the first beach diggings, and men were employed there at the time the Montreal diggings broke out. My impression is that Mr. Young intended on the Saturday, as he had stated to the police, that he would like to go fishing on the Sunday; they had gone fishing, as was evident from the lines in the boat; some of them had been sick, as there were marks of sickness on the boat. The men who belonged to the boat, it was well known, intended to go home to Bateman's Bay. They have probably said, “We are going to Bateman's Bay,” and Lamont Young has said, “Is there no place at which you can put me ashore near Corunna?” They most likely have known this place, about the only place where they could land between Bermagui and Wogonga, and they have landed him there. Most likely he intended to walk back again to my place, which would be about 5 miles; he would have been able to see the country a little. That was my impression as to his intentions. They have probably landed, and I think that they then sat down to have tea, the five of them. There were some remains of tea, and some bread found afterwards, and butter and jam thrown about the place. It is not at all unlikely that other people were there—for instance, Sullivan, if he was there, might have been having tea himself, and he might have said to them, “Oh, come and have a cup of tea with me.” They may have accepted his invitation, and he may have drugged the tea; if so, there would be an end to them all almost at once. That is only my theory. Then after these men have been destroyed, those who destroyed them have smashed in the boat with the intention of sinking it. The boat has been broken at the bows, and the bows being on the sand they have pushed it as far as possible, and going out stern first the boat would have a tendency not to take in water at the broken bows, it would run out. The boat has gone further than they intended, and some heavy wave has come in and canted the boat round on to the rocks. Once there it was immovable.

1283. What object do you think a man could have in murdering five men in cold blood? They might imagine that the party had money. The owner of the boat showed £15 one day.

1284. Supposing Sullivan was there, how would he know the man had £15? He might have been present at the time the man showed his money. If he thought one man had money, he might probably think the others had.

1285. Would it not be extraordinary and strange that Sullivan would be at that particular point where these men are supposed to have landed? Being driven away, seeing the excitement that was going on he may have left. The people who were there were very certain that it was Sullivan, and it is very certain that he was not seen after the excitement occurred.

1286. Are you quite sure he was there? I only go by what I was told; it was not one man who told me—it was three or four; they told me they could swear it was Sullivan.

1287. *Mr. Barbour.*] Had he been associated with any of the diggings or stores up there, or was he only a casual visitor? As far as I know, only a casual visitor; the storekeepers would not know; all the storekeepers down there were people who had been living in the district for years.

1288. *Chairman.*] I suppose you know that Mr. Keightley's private opinion respecting the disappearance of these people differs from yours? From what I have told you I should imagine it would. We have had many a talk together about it, and I know his opinion was adverse to mine; still I think he latterly came round to the opinion I held myself, that foul play occurred; but at first he did not think so.

1289. When you went down to the beach on Monday morning were there not some large stones in the bottom of the boat? Yes.

1290. Did you find the place from which they were taken? They were evidently stones that had been taken from the shore, because they were exactly the same sort of stones—a sort of trap.

1291. There are no other stones like that for a long way? No.

1292. Are there any caves near the place? Yes, but they are of very little account. It was a very hard trap, not a limestone, and the caves were just simply the wearing away of the rock by the sea. J. T. Hobbes, Esq.
1293. Just a wash in the rock? Yes; there are two of them, and I do not think one of them is connected with the shore—I am almost certain there is water between them and the shore; oh yes, I know there is, because you cannot get into the caves without taking a boat. 14 Feb., 1884.
1294. In the position in which you saw the boat, would it be possible for any person, at any time to get over dry land to the boat—could he get to it without swimming? Oh yes, you could get to the boat at high tide.
1295. Walk through the water at high tide? Yes.
1296. There would not be any danger of a man being drowned? Unless he happened to fall between the rocks. They are flat rocks—that is to say flat, but broken up into waves as it were.
1297. Then when you first went down to the boat and saw everything, your impression was that the parties who were in the boat landed on the mainland? That was my opinion—that they had landed there. Among other things that tended to support that, a pick and shovel were found. The shovel was thrown out as far as it could be. I called the attention of some one to the shovel lying in the water, thrown out of the boat.
1298. I suppose you have not the most remote idea that these people had been kidnapped or taken away? I had no idea of the kind; I was rather surprised to receive a letter from Major-General Young telling me what his opinion was.
1299. It was his opinion that they had been kidnapped? Yes; I cannot think they have been. I think I may mention that about twelve months ago I was somewhere in Sydney—I cannot exactly remember where—but I was speaking to a gentleman on this matter. He said—"It is rather a curious thing; I was going down on Sunday in one of the Illawarra Company's boats—I was going down to Bermagui. Whilst we were stopping off Montague Island, putting down some passengers, I was looking down the shore, and thought I saw a vessel ashore. I drew the captain's attention to the fact of a schooner being ashore; the captain got his glass and looked very attentively, and saw it was not ashore." The place where the boat was found is exactly opposite the end of Montague Island where the steamers stop. I asked him what time it was he saw what he described, and he said it was about 2 o'clock on the Sunday. That was the very day of Lamont Young's disappearance.
1300. I suppose from all you have been able to gather, and being on the spot at the time, you are just about as wise as you were when you saw the boat on the Monday morning? Just about as wise.
1301. Has your opinion been altered by the reports you have heard? No. I paid a great deal of attention to the matter myself; my sons went down, and I set them to work, because I was not only anxious about the matter for the sake of justice, but I was anxious for the credit of the district.
1302. Your opinion is that they landed at Corunna Point, and were murdered there by some persons unknown? That is my opinion.
1303. And that then the bodies were thrown into the sea? The bodies have been disposed of in such a manner that I cannot tell. The coast is so infested with sharks that I fancy if they had been thrown in the sea, the sharks in tearing them up would have torn some pieces of clothing which might have come ashore.
1304. Unless they were stripped? They might have been. I was riding from there one day—there in a deep sandy gully—and it occurred to me whether or not those who murdered them, if they were murdered, might not have carried the bodies and put them into the sand. It would not have been difficult. There is a pretty high bank.
1305. Would not that have been a very hazardous undertaking, for any one to murder six men there, and put them where you say, a place where they would have been likely to have been discovered? They might be discovered in time. It is away from the road some distance, and it is a place where people very rarely indeed go to. The only occasions I have known people to go to this place are holidays. It is a favourite picnicing ground. It is a great place for fine specimens of sea-weed, and it is the only place where girls used to go to get it—they are the only people who ever went near the place. There is a pretty thick scrub to pass through to get to it, and it is away from the road.
1306. Do you know a family down there by the name of Jagers? I know them all very well.
1307. Do you know whether there was any suspicion on him, that he had anything to do with it? I never heard there was any particular suspicion attaching to him, but every one knows it is constantly spoken of by all around that he knows about it. I have never heard any one go so far as to say they suspected him of being individually concerned in it. From what he himself has said to people, they have naturally come to the conclusion that he knows a great deal more than perhaps any one else down there.
1308. *Chairman.*] Are you aware that the Government and officials belonging to the Civil Service did everything in their power to unravel the mystery at the time it happened? Yes; I did all I could myself.
1309. I am speaking of Keightley and the police under his command? Keightley had himself to go to Moruya; he was only on a visit to me when the affair happened. He was backwards and forwards two or three times, whenever he came he showed the greatest possible interest.
1310. But did the police who were there—Senior-Constable Berry and his colleagues—did they do everything you think they ought to have done to unravel the mystery? They did all they could do in the light in which they looked upon it—that it was an accident.
1311. Do you know whether any search was made at the place where Mr. Lamont Young was camped, to see if any struggle had taken place? That is just the difference between the police opinion and mine. I maintain that if they had come to the same conclusion that I did at the first, that foul play had occurred, they would have taken means in the first place of preventing any one from going near the place, and would at once have brought down some trackers.
1312. But they did nothing of that kind—did they go to see if the tent had been struck? They did go down, I think; but I cannot help saying that I do not think they made all the inquiries they should have made. I dare say you are aware—I think I have seen it mentioned, or heard it mentioned—that there was a second vessel, the "Magic," I think it was, in Bermagui River on the Saturday night and Sunday morning. The police were not made aware of that vessel being in there until three or four weeks after the affair occurred; and then I spoke to the sub-inspector who came down, and asked if he had made any inquiries as to the vessel that came in. He said—"What vessel?" I said—"Do you mean to say that the police are not acquainted with the fact of a vessel being in the river on the Saturday night?" He said, "No, we are not."

J. T. Hobbes, Esq. not." I said—"You had better inquire about it at once." We went down to Bermagui, and Mr. Morehead told me about the "Magic." I think under the circumstances every inquiry should have been made by the police at the time.

14 Feb., 1884.

1313. Then the "Magic," and the boat belonging to Lloyd, Towers, and others—were these two boats anywhere near each other on the river on Saturday night? I am not aware of what occurred on the river.

1314. Where was the "Magic"? It was where they took in loading.

1315. Where was the other boat? It was there with the men.

1316. Near Mr. Young's camp? From what I understand of the position of the camp, the boat must have been near it.

1317. Do you know any one who was on the "Magic"? No; it was the first time the "Magic" had come into the river; it was the first time she had been in the river, and she never came again.

1318. You do not know who the owners were? I do not; I only know that she was eventually wrecked at the islands. I was told that after leaving there she came to Sydney and went away again directly; but I do not know whether she did not go direct to the islands—I am not certain about that; but the police were not made acquainted with the fact of this vessel being in the river.

1319. *Mr. Barbour.*] Do you think it possible that any parties guilty of foul play could have made their escape by that vessel? Oh yes, they could have done it very well. I saw the boat at 11 o'clock, and this schooner was seen off this place just about 2 o'clock in the afternoon.

1320. And it is possible they may have hailed her and got on board of her at that place? They may have done that.

1321. Was the weather such as to allow them to board a vessel under such circumstances? It was not so bad; just a good strong, steady south-easterly wind was blowing; in the afternoon it dropped.

1322. *Chairman.*] That vessel was wrecked? Yes, somewhere in the islands.

1323. *Mr. Barbour.*] Do you know whether she carried any passengers on the day she left the Bermagui River? Not from Bermagui.

1324. And if any one went by her from the scene of the accident they would go on board from the sea-shore? Yes, they could have done that—they could all have gone on board the vessel and turned their boat adrift. If they had boarded just outside the bay, their boat would naturally have drifted into the bay.

1325. Since the occurrence, have you been able to learn or hear anything to lead up to your arriving at any satisfactory conclusion as to what became of Mr. Young and the others? No, I have learnt nothing at all to lead to any satisfactory conclusion. I do not think I need take up your time by repeating what I have heard.

1326. It might lead up to something else? Now you have mentioned about the "Magic," I may mention that the last letter I got from Major-General Young was dated last February, from London. I received it in April. I took it over to Mr. Wilkinson, the Government Geologist, who I knew had taken great interest in the matter of Mr. Lamont Young's disappearance. I said—"Here is a letter from Major-General Young; I wish you would read it, and pay particular attention to the last paragraph." This paragraph went on to say that Major-General Young did not believe in spiritualism, but that he had been induced by his friends to go to two different mediums in London. He went, and each told him almost exactly the same thing—that was, that his son was alive on an uninhabited island on the coast of Australia; and in accounting for his death it was said that they had landed, that the crew of a vessel had landed also and had attacked them, and had killed them all but Lamont Young; he had been wounded very severely, but was not dead; that when it was all over they did not like to kill him; they took him on board their vessel and landed him on an island. Both of the mediums mentioned the same thing, except that one said it was an uninhabited island to the north of Australia, and the other said it was to the south of Australia; but both said it was on the coast of Australia. I mention this simply because Major-General Young mentioned it in his letter.

1327. *Chairman.*] According to British notions of fair play there must be something to induce a man or a number of men to murder others—they do not murder one another for nothing;—we have failed to find out the inducement there was for any one to murder these men? The only inducement I can imagine is, that one of the men was seen to have £15 upon him, and they might naturally conclude that each of the other men had an amount of money, more or less. They would naturally come to the conclusion that Lamont Young, being a Government officer, coming down where there were no Banks, would probably have a large amount of money upon him. He was coming to stay for some time; he had his camp, and his assistant, Schneider.

1328. *Mr. Barbour.*] Living in the district, did you hear of any circumstances or incidents that would lead you to the conclusion that the parties who committed the deed were residents of the district? Certainly not, that they were residents. I think I know the character of every one within a circle of 20 miles most intimately. One thing occurred that I may mention:—On Saturday night a man named Latimer was staying at Reed's house; he was sitting up late, reading; that would mean 10 o'clock, or half-past 10; he got up to light his pipe and went outside. After he had been in the paddock some little time he heard a low whistle. He stopped; he heard a low whistle again; he imitated it. To his surprise up jumped a man in front of him from among the tussocks. He was rather frightened at the occurrence and stepped aside, when he saw another man. He then went back again to the house. That really did occur that night. Later on it was told to me as having occurred; but I could not get any corroborative proof; and two men arrived at the Bermagui River and called up the ferryman.

1329. *Mr. Barbour.*] We have evidence of that? Then I need not repeat it.

1330. That was some seven or eight days after the disappearance of Lamont Young? Eight days afterwards; but I heard it was on the same night. I am rather inclined to think I got it from Jagers himself.

1331. Mrs. Tomsett said it was several days after? She would know, because she lives just opposite the ferry.

Charles Leonard Jagers recalled and examined:—

C. L. Jagers. 1332. *Chairman.*] Do you remember the Monday morning after the disappearance of Mr. Young? Yes; I have kept it in my mind pretty well by thinking over it.

14 Feb., 1884.

1333. Was that the day the two men you spoke of came to your place? No.

1334. How long was it afterwards that they came? I think it was that Monday fortnight afterwards.

1335. *Mr. Levin.*] You are quite certain about that? Quite certain about it.
1336. *Chairman.*] The two men could not be connected with the affair in any way? I hardly think so. But it seems strange that I never have been shown these two men to recognize them. I knew one of them well. I have seen a man in Bega lately who is said to bear the name of the man who was with Barrett when he called at my place, but he is not at all like the man who was at my place.
1337. It has been sworn that you went down to Constable Berry to give him some valuable information with regard to this case, and that Berry accused you of being concerned, and that you then refused to give information: is that correct? No.
1338. Did you go to Mr. Berry? I only went to give him the two pannikins which I found.
1339. Did you and he fall out when you went down with the pannikins? Not fall out, but I felt shocked at being accused of being a murderer.
1340. Did he accuse you? Yes; he said—"Now, Jagers, I have been told you were one of the party; the best thing for you to do is to tell me where I can get the bodies, and I will make it as light as I can for you."
1341. Whether he said that or not, you had no information to give him? I had no information beyond finding the pannikins.
1342. *Mr. Levin.*] That was the only information you had to give him? That was the only information I had. I went into Bega to complain to Mr. Church of being accused, and he told me that Mr. Berry could do as he liked in a thing of that sort. I told Mr. Church—"From this out I have no connection with Mr. Berry whatever. Whatever I find I shall not report it to Mr. Berry; if I do find anything I shall report it to you." He told me if there was any help he could give me he should be happy to give it. From that time on I have not told Berry what I have been looking for or anything.
1343. *Mr. Barbour.*] When did you first hear of the boat being found on the shore? About 11 o'clock on the Monday morning; I heard young Latimer telling Reed.
1344. When did you go back to Montreal? On Monday morning.
1345. *Mr. Levin.*] Then you heard of it at Montreal? Yes.
1346. Do you know anything of a vessel being in the Bermagui River on the Saturday or the Sunday? Yes, I saw the "Magic" there.
1347. How did you know her? I noticed her in the river.
1348. Was she suitable to go to sea? Oh yes; she was, I think, a topsail schooner.
1349. Do you know who owned her? No.
1350. Do you know what brought her there? No.
1351. Did she take goods or cargo? I think she brought some diggers.
1352. She brought passengers? Yes.
1353. She went away on the Sunday? I do not know when she went away; I did not see her there on the Monday morning when I went along.
1354. Do you know what country she belonged to? Yes, she came from Tomaka.
1355. She belonged to this Colony then? Yes.
1356. Did you hear that she was wrecked? No.
1357. *Mr. Barbour.*] Did you hear of or see any of her crew after that? No.
1358. *Chairman.*] Can you give us any information with regard to any person who is likely to tell us anything that would solve this mystery? No; I have done my best to find it out, but so far I have not done much; but I fancy that Campbell does know something about it, on account of him coming to me in that manner; at the time I had no suspicion.
1359. He is a married man? Yes, he has a wife and family; he is a half-caste; I never knew him to do anything bad.
1360. *Mr. Barbour.*] Campbell lives at Wogonga? Yes; I have cross-questioned Campbell since, but never asked him why he wanted me. I asked him if he had been out at the island on Sunday, and he said yes, he was; he went there that same day; that was Montague Island.
1361. *Chairman.*] Did Campbell tell you he was there on Sunday? Yes.
1362. Did he tell you about the time he was there? Yes.
1363. Did he say who were with him? I think he said there were five of them went out on Sunday in a whaleboat.
1364. *Mr. Levin.*] Would that boat be seen from the shore, from the house where Mr. Hobbes was living? No, I think not.
1365. *Chairman.*] You say there were three or four with him? I think he said there were six out with him. I have been silently gathering what information I could ever since Berry accused me of it, and I have not been able to get anything substantial.
1366. Is there any one else you think could give information? I cannot think of any one who could.
1367. Do you know the Reeds? Yes, I have known them for a long time.
1368. Do you think they could give any information? I think not.
1369. *Mr. Barbour.*] Where do they live? Two or three miles from where the boat is, towards Montreal. There are three brothers of them, and two of them are married.
1370. Did you hear of a man who was staying at Reed's, who went out about 10 o'clock that night and heard a whistle? I heard all about that. That was one of the Latimers; he was staying at Albert Reed's; he stayed down at one brother's place, and went up to the other brother's place to sleep. As he crossed the level ground close to Corunna Lake he heard a whistle and saw a man get up, and then he saw another get up. He ran away frightened.
1371. Nothing came of it? Nothing came of it. I have given Rolfe a full account of all I have gleaned. I have gathered other things since that—three pairs of trousers and a coat on the rocks. I had a deal of trouble to get him to come and look at them; he asked me why I did not take them to him; I took them to Mr. Church; he looked at them and told me they belonged to a surveyor.

C. L. Jagers.

1883-4.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

---

**ALEXANDER GRAY.**

(PETITION OF.)

---

*Received by the Legislative Assembly, 22 July, 1884.*

---

To the Honorable the Speaker and Gentlemen of the Legislative Assembly of New South Wales,—

The Petition of Alexander Gray,—

HUMBLY SHOWETH :—

That in the month of October, 1880, the mysterious disappearance of Mr. Lamont Young and others took place at Bermagui in this Colony.

That your Petitioner in the month of February was instructed by the Department of Mines to proceed to the scene of the melancholy occurrence and use every exertion to unravel the mystery.

That your Petitioner faithfully carried out his instructions, and by his exertions and investigations was so far successful as to leave no doubt on his mind as to how the unfortunate gentleman and his companions were disposed of.

For full particulars your Petitioner would respectfully refer to his evidence given before the Select Committee of your Honorable House on the subject.

Your Petitioner having sacrificed his time and money in the performance of this duty, would most respectfully and humbly pray your Honorable House to take the matter into consideration, and afford him such relief as may to your Honorable House seem fit and expedient.

And your Petitioner, as in duty bound, will ever pray.

ALEXANDER GRAY.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

**PATRICK BROWN AND DUNCAN M'RAE.**

(PETITION OF—RELATIVE TO MINERAL CONDITIONAL PURCHASE.)

*Received by the Legislative Assembly, 26 June, 1884.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of Patrick Brown and Duncan M'Rae,—

SHOWETH :—

1st. That Patrick Brown and Duncan M'Rae were, respectively, the owners and mortgagees of a block of land, containing forty acres, in the parish of Dunleary, county of Bathurst, which land was worked as a copper-mine, and, in consequence of the insufficiency of the area and for the purpose of better pursuing the business of copper-mining, applied, on the twenty-fifth day of July, one thousand eight hundred and seventy-nine, in due form, according to the Act 25 Victoria number one, at the Crown Lands Office, Carcoar, to conditionally purchase, under section 19 of the said Act, mining conditional purchase portion 43-79/105, mining conditional purchase portion 45-79/104, mining conditional purchase portion 46-79/106, each 40 acres, also mining conditional purchases 79/107 and 79/108, each 40 acres; the first three blocks hereinbefore referred to adjoining the mine block of freehold land, and the latter two adjoining number forty-five.

2nd. That, shortly after application was made as above, notification was received from the Lands Department that, as blocks numbers 107 and 108 had been under promise of lease since one thousand eight hundred and seventy-two and had not been forfeited, they could not be alienated until due notification and cancellation had been made; and subsequently, after due notification by the Department, the leases declared forfeited on the eighteenth day of November, one thousand eight hundred and seventy-nine, and the ground was thereupon thrown open for selection.

3rd. That, accordingly, on the twentieth day of November, one thousand eight hundred and seventy-nine, application was again made, under sections 19 and 21, for a mining conditional purchase 79/135, 80 acres, being same as mining conditional purchase 79/107 and mining conditional purchase 79/108, applied for on the twenty-fourth day of July, one thousand eight hundred and seventy-nine, and refused, and known as Jordan and Ashe's abandoned copper lease. This last application was made in person by Mr. William Badcock Warner, land agent, of Carcoar, for Brown and party, on a Land Office day, under advice of the Crown Lands agent, Mr. E. J. C. North, who, two or three days previous, said it was not necessary for Brown or any of the party to come up from Sydney to lodge the application, as he knew Brown had made the first application in person, and that under his instructions from the Government he could receive it from an agent in person.

4th. That the following is a copy of the printed instructions to Crown Land agents, and under which Mr. North acted, namely, number twenty-four :—"The application, if under the twenty-first section, may be made by an agent in person, but only in those cases where the land agent is satisfied by an accompanying statutory declaration or from his own knowledge that the selector is of the age of sixteen years or upwards; under the twenty-second section the applicant must attend in person. In both cases the full particulars as to name, age, spinster, widow, &c., &c., required in the cases of original purchases, must be given, as also the description according to the Surveyor-General's minute."

5th. That the application was duly received by the said land agent and payment made of £42 5s., being 2s. per acre on 80 acres and subdivision fees; and three years after, namely, on the twentieth day of November, one thousand eight hundred and eighty-two, a further sum of 2s. per acre was paid as an instalment off the original purchase.

6th.

6th. That, from the date of the application, on the twentieth day of November, one thousand eight hundred and seventy-nine, until the thirty-first day of December, one thousand eight hundred and eighty-one, your Petitioners were in undisturbed possession of the said land, by the sanction and authority of the Crown, in accordance with the instructions to land agents respecting mineral selections, and had with others, who joined them in developing the mine, expended large sums of money; but owing to the great expense necessary in carrying on mining operations they had to seek further capital by consolidating the blocks of land, and forming a larger company with increased capital.

7th. That accordingly negotiations were entered into for that purpose, and were almost completed, when certain gold diggers settled down on the additional mining conditional purchases and were mining for gold, claiming a right to do so under a mining block claim, and refused to go off or cease to work, and otherwise prejudiced the title of your Petitioners to the land, so that they could neither raise capital to proceed with mining operations or dispose of their interest to capitalists, who were willing and ready to do so provided the trespassers were ejected and a clear title given, that is to say, that lawful title to the land which your Petitioners fully believed that they, and which the Government believed they had, under the regulations issued by the Minister for Lands.

8th. That the said gold-miners had notice given them at the time of their first settling on the land that they were trespassing; a formal notice was also served on them subsequently; and in the month of September, one thousand eight hundred and eighty-one, an action for trespass and damages, in the Supreme Court, was commenced; on the thirty-first day of December, one thousand eight hundred and eighty-one, the trespassers and a party of gold-miners lodged an objection with the Minister for Lands, calling on him to void the selection; and after a great deal of trouble and much expense to your Petitioners, a Court of Appraisement was held at Carcoar, by direction of the Minister for Lands. The objections made were set aside, and the ground was fully confirmed to your Petitioners, the original holders, by the Minister, but even then the trespassers refused to refrain from trespassing until an injunction was obtained from the Supreme Court of New South Wales, which your Petitioners duly obtained, pending the decision in the action for trespass.

9th. That after much delay, during which time the mine and works were at a complete standstill, the case was tried at the Supreme Court, on the fourteenth and fifteenth days of September, one thousand eight hundred and eighty-two, and a verdict was obtained for the plaintiffs, your Petitioners, but leave was reserved to the defendants, the trespassers, to appeal to the Full Court on the point of law as to whether the application for the additional conditional mineral selection could legally be made by an agent.

10th. That this point of law was argued, before the Chief Justice and Mr. Justice Faucett, in November, one thousand eight hundred and eighty-two, when their Honors decided that the instructions issued to land agents could not authorize agents to apply for additional mineral selections, and accordingly, in pursuance of the leave reserved, a verdict was entered for the defendants.

11th. That your Petitioners thereupon gave notice for leave to appeal to the Privy Council against the decision of their Honors, which leave was duly granted.

12th. That your Petitioners, on the advice of eminent counsel, applied in Equity to the Primary Judge, Sir William Montagu Manning, after the judgment of the Full Court, who decided in your Petitioners' favour and granted an injunction restraining the defendants from further trespassing; but an application was thereafter immediately made to the Court in Banco, when Sir William Montagu Manning's order was set aside, with costs, as against your Petitioners.

13th. That your Petitioners not having means to prosecute the appeal to the Privy Council, applied to the Government for assistance therein, which application was refused, and consequently the said appeal had to be abandoned by your Petitioners.

14th. That the Government and the public had for twenty years been acting under the Minister's interpretation of the Act, that mineral conditional purchases could be made by an agent. This interpretation has never been previously questioned, and the Government, as hereinbefore stated, had actually issued instructions to their Crown Lands agents all over the Colony to that effect, which instructions had been acted upon for that long period without question.

15th. That the ground has since been entered upon and worked by those whom your Petitioners looked upon as trespassers and others, and your Petitioners have lost everything, although they and the Crown Lands agent strictly followed the Governmental instructions.

16th. That your Petitioners, and others interested with them from the commencement, acted in an open and *bona fide* manner, interfered with no existing rights, made every legal and departmental inquiry possible to ensure proper compliance with the Act and regulations, and, in addition, expended in *bona fide* mining on the said land upwards of £13,000, as will appear by the books of account belonging to your Petitioners.

17th. That your Petitioners, in addition, have expended more than £2,000 in defending the title, hereinbefore referred to, granted by the Crown, which, in every other similar case to your Petitioners', is an indefeasible title now, in consequence of the Declaratory Act passed by Parliament after the point of law had been decided against your Petitioners.

18th. That your Petitioners, besides having been deprived of all the advantages of past expenditure and prospective profits, and having been subject to vexatious trouble and ruinous loss during the past three years, have lost two *bona fide* opportunities of realizing the result of their labour and expenditure by the decision of the Supreme Court on the said point of law, that is to say, first, an offer made by capitalists to purchase for from £15,000 to £20,000; and, second, by the mortgagee, your Petitioner, Duncan M' Rae, being unable to give possession after having sold his interest, as mortgagee and shareholder, for £5,250, subject to the ejection of the said trespassers, and which, fully relying on the indefeasibility of his title, he fully expected to effect.

19th. That your Petitioners have used all necessary diligence, taken all lawful means to prove that the title given by the Crown was good, and have complied in every respect with the Act and regulations issued by the Government; but their means are exhausted, and they are left in considerable debt in

consequence of the decision of the Supreme Court, which decision caused the Government at once to introduce a Bill, which was immediately passed into law, rendering all conditional purchases valid made by an agent prior thereto, in accordance with the Governmental instructions and regulations, save and except your Petitioners' conditional purchase, which is the only one in the Colony which was declared illegal by the Court, and could not of course be included in the validation as all others were by the Bill in question.

Your Petitioners therefore most humbly and respectfully pray that your Honorable House may be pleased to refer the whole matter of your Petitioners' case, as hereinbefore mentioned, to a Select Committee, with power, if necessary, to send for persons and papers, to inquire into and report upon your Petitioners' case.

And your Petitioners, as in duty bound, will ever pray.

Sydney, November, 1883.

PATRICK BROWN.  
DUNCAN M'RAE.

[3d.]

1883-4.

—  
**LEGISLATIVE ASSEMBLY.**  
**NEW SOUTH WALES.**

—  
**DISCOVERY OF GOLD.**

(PETITION—MESSRS. WILLIAM TOM, JOHN H. A. LISTER, AND JAMES TOM.)

—  
*Received by the Legislative Assembly, 2 September, 1884.*  
 —

To the Honorable the Legislative Assembly of the Colony of New South Wales.

The humble Petition of William Tom the younger, of Rob Roy, Guyong, in the Colony of New South Wales, farmer,—John Hardman Australia Lister, of Guyong aforesaid, farmer,—and James Tom, of Melbourne, in the Colony of Victoria, settler,—

**SHOWETH:—**

That early in the month of February, 1851, Mr. Edmund Hammond Hargreaves arrived at what is now known by the name of the "Guyong Inn," situate about 24 miles from Bathurst, on the Wellington Road. He arrived at the inn and informed Mrs. Lister (the mother of your Petitioner John Hardman Australia Lister), and your Petitioner John Hardman Australia Lister, that he was on his way to Wellington in search of gold, whereupon your Petitioner John Hardman Australia Lister showed him some stones, which your Petitioner John Hardman Australia Lister supposed to indicate the presence of auriferous matter, and which your Petitioner John Hardman Australia Lister had brought from the Turon and Macquarie Mountains and River, and which had been picked up by him in his peregrinations in search of gold in those localities. After some conversation with your Petitioner John Hardman Australia Lister, Mr. Hargreaves gave up the idea of going to Wellington; and it was agreed between him and your Petitioner John Hardman Australia Lister that they should become partners or colleagues in searching for gold; and, accordingly, on the 12th February, 1851, your Petitioner John Hardman Australia Lister and Mr. Hargreaves commenced their search, and your Petitioner John Hardman Australia Lister took Mr. Hargreaves to a locality which now bears the name of Ophir, on the Lewis Ponds Creek, where Mr. Hargreaves washed several panfuls of earth, from which he obtained four or five minute specks of gold, thus verifying an opinion long before entertained that this was a gold country. Having proceeded thus far, the next object which your Petitioner John Hardman Australia Lister and Mr. Hargreaves had in view was, the discovering a payable or working gold-field. After this your Petitioner John Hardman Australia Lister and Mr. Hargreaves determined to further prosecute their inquiries for a payable gold field, and to proceed down the Macquarie River and thoroughly examine the creeks in the neighbourhood of Ophir; and not being acquainted with the bush or the country they were about to explore, they agreed with your Petitioner James Tom, who knew the whole of the country well, that he should join them in their search, with the full understanding that each person was to share alike in any benefits to be derived from their joint exertions, to which he consented; and after explaining to him the method of washing gold, your Petitioners John Hardman Australia Lister and James Tom started with the said Mr. Hargreaves on their journey, and after being engaged some days on their search, returned without having made the discovery of a working gold-field. This journey being over, Mr. Hargreaves prospected no more in the Lewis Ponds and Ophir neighbourhood, but probably thinking a gold-field might be found about Wellington, he made a journey thither, and after a lengthened exploration of that district he returned to Guyong without having met with any success. On his return to Guyong, Mr. Hargreaves informed your Petitioners he was obliged to return home, and your Petitioner James Tom having to go to Adelaide on business, it was arranged that your Petitioner William Tom should take his place and continue, in company with your Petitioner John Hardman Australia Lister, the inquiries in search of gold, your Petitioners having determined, if possible, to ascertain if Australian soil would pay for working. When Mr. Hargreaves was about to start from Guyong, he told your Petitioners that as soon as he arrived home he would make a tour to Moreton Bay, and give the whole of that part of the Colony a thorough search, and that if he did not succeed in finding gold in payable quantities he would go to California immediately on his return; but if he did succeed in finding gold he would let your Petitioners know as quickly as possible after the discovery. Your Petitioners made a similar promise to Mr. Hargreaves, as to informing him of the success of their search. Upon this understanding your Petitioners and Mr. Hargreaves parted.

1070—

That

That this agreement having been made between your Petitioners and Mr. Hargreaves, your Petitioners John Hardman Australia Lister and William Tom, started from Guyong on the morning of the 7th of April, 1851; and from the circumstance of a piece of gold having been picked up some time previously at a place now known by the name of the Fitz Roy Bar, your Petitioner William Tom suggested to your Petitioner John Hardman Australia Lister the importance of making a good search on that Bar; and the suggestion being approved of, your Petitioners William Tom and John Hardman Australia Lister repaired thither, and upon arriving at the place, your Petitioners turned out their horses, and after partaking of some refreshments which they had with them, commenced searching for gold; and after looking for about ten minutes, your Petitioner William Tom succeeded in finding a piece of gold worth about £2 7s. This circumstance encouraged your Petitioners to prosecute their search further, and induced them to go into the mountains around the next morning for the cradle, which had been made by your Petitioner William Tom on a previous occasion, for the purpose of prospecting, and hid by him. About 2 o'clock the same day your Petitioners commenced working at the Bar, and by sundown had accumulated about 30s. worth of gold-dust. The next day your Petitioners collected about 300 grains weight of gold, and the day after about £2 worth. In prosecuting their labours your Petitioners carried the soil they dug up to the cradle in two 3-bushel bags.

That your Petitioners had now succeeded in ascertaining that the ground would pay for working. They determined upon proceeding down the creek to see if they could find any pieces or lumps of gold, in case any were exposed to view from the washing away of the soil by the water. Accordingly they saddled their horses and proceeded to where a tributary creek emptied itself into the main creek, and your Petitioner John Hardman Australia Lister picked up a piece of gold immediately at the junction of the two creeks, which weighed eight sovereigns. John Hardman Australia Lister first saw this piece of gold while sitting on horseback; it was held above the ground, a portion of it being wrapped round the root of a tree. Your Petitioners' provisions being by this time exhausted, they were obliged to return home to Guyong the following day.

That your Petitioners communicated the result of their search to Mr. Hargreaves at the earliest opportunity they had, according to the agreement made between them, before alluded to; and considering themselves indebted to him for a knowledge of how to procure gold by the use of the tin dish, your Petitioners placed in his hands all the gold they had procured as before stated, in order that he might, on behalf of your Petitioners and himself, disclose the discovery made by your Petitioners to the Government, as his discretion and sense of honor might dictate. The money arising from the sale of gold procured by your Petitioners was received by Mr. Hargreaves, and by him divided equally between your Petitioners and himself. Your Petitioners respectfully submit to your Honorable House that this fact shows conclusively the existence of an agreement between your Petitioners and Mr. Hargreaves, and the understanding that any profit arising from the gold actually discovered was to be shared between Mr. Hargreaves and your Petitioners as partners in the business.

That from what has been already stated, your Petitioners submit that it must be conceded that they are entitled to claim for themselves the sole merit of being the first and only discoverers of a payable gold-field in Australia; and while they admit that Mr. Hargreaves, as a partner with your Petitioners, was entitled to participate in the profits of the gold actually found in the course of their search, by virtue of the agreement between them before referred to, they confidently submit to your Honorable House that they themselves were primarily entitled, as such real and *bona fide* discoverers of such gold-field, to a reward from the Government in respect of such discovery, because they actually discovered such gold-field in Mr. Hargreaves' absence from the spot where the discovery was first made.

That in the year 1853 the then Government of the Colony made a grant to your Petitioners, upon the foregoing facts being brought to their knowledge, of £1,000, of which your Petitioners each received a third part; and this is the only sum ever received by your Petitioners from the Government by way of reward for their discovery.

That your Petitioners entrusted the prosecution of the claim upon the then Government of the Colony to a reward for their exertions to Mr. Hargreaves; and they have every reason to believe, from facts which subsequently came to their knowledge, that he did not fairly represent your Petitioners' share in the discovery, but that he gave an unfair prominence or importance to his own exertions to the prejudice of your Petitioners.

That, as a fair reason in support of your Petitioners' claim to some further reward for the discovery of the first payable gold-field in Australia, they beg to state, for the information of your Honorable House, that during the time Mr. Hargreaves and themselves were engaged in their searches for gold your Petitioners themselves paid Mr. Hargreaves' expenses consequent upon such search, and they did so in virtue of the agreement between themselves and Mr. Hargreaves before referred to. These expenses your Petitioners have never been repaid.

That your Petitioners have been informed a grant was made to Mr. Hargreaves, in or about the year 1853, of a large sum of money as a reward for his being the first or sole discoverer of a payable gold-field, and that such sum was duly paid to him.

That your Petitioners have delayed bringing their claim before your Honorable House, owing to circumstances over which they had no control; and they submit that now the extent of the gold-fields of Australia are fully known, they have a fair right to present their claims to your Honorable House for a suitable reward, as the first discoverers of the same, and producing gold in notable quantity, as being the persons by whose means the public attention was directed to the subject.

Your Petitioners therefore humbly pray that your Honorable House will be pleased to appoint a Committee to consider the prayer of this their Petition, and to report to your Honorable House whether or not your Petitioners are entitled to be considered as the real and *bona fide* discoverers of the first payable gold-field in Australia; and, if necessary, your Petitioners may be at liberty to give evidence before such Committee in support of their claims, and may be heard by counsel in support of their claim, either at the Bar of your Honorable House or before such Committee.

And your Petitioners, as in duty bound, will ever pray, &c.

WILLIAM TOM, JUNR.  
J. H. A. LISTER.  
JAMES TOM.

1883.

(THIRD SESSION.)

—  
 LEGISLATIVE ASSEMBLY.  
 NEW SOUTH WALES.

—  
**ARALUEN GOLD-FIELD.**  
 (PETITION OF JOHN WALLACE, J.P., AND OTHERS.)

—  
*Received by the Legislative Assembly, 7 December, 1883.*  
 —

To the Honorable the Members of the Legislative Assembly of New South Wales, in Parliament assembled  
 The humble Petition of the undersigned,—

SHOWETH :—

1. That the Araluen Valley was for many years a payable gold-field and maintained a large population, but in consequence of such part of the land as belonged to the Crown having been worked out and the residue being in private hands, the population considerably decreased, and many of your Petitioners who purchased land and made homes for themselves in Araluen will be obliged to abandon them, unless some opening is made for the mining industry in or near the said valley.

2. That several of your Petitioners have been paying licenses to mine upon private land in the said valley, and would willingly continue to do so, but in the first place the amount charged is too high, and in the next place the tenure of the gold claims is very unsatisfactory, the licenses extending only from month to month, and there being no agreement on the part of the owner to renew at the request of the licensee, consequently no licensee feels justified in erecting the works necessary for the full and proper development of his claim.

3. A portion of land situate in the said valley, containing about 1,280 acres, known as M'Gregor and Company's, is under offer for sale. This land is highly auriferous and several of your Petitioners have been paying licenses to mine on the same; and if this land was thrown open for mining purposes it would induce a number of persons to settle in the Araluen Valley, and would find employment for a large population for several years.

4. Your Petitioners submit that the gold-mining industry in this Colony is in the nature of a public benefit, as those who follow that occupation compose a large section of the community, and unlike the squatter and agriculturist are not possessed of capital, but develop the mineral resources of the Colony by their manual labour only, and yet they contribute very largely to the revenue.

5. Many of your Petitioners would be willing to pay a reasonable rent or license for their claims on the above land, and they are informed many others would do the same provided they had such a tenure as would enable them to work out the same without fear of disturbance.

Your Petitioners, therefore, humbly pray that you will be pleased to take such steps as may be necessary to re-vest the said land in the Crown, and dedicate the same for gold-mining purposes upon such terms as you may think fit.

And your Petitioners, as in duty bound, will ever pray, &c.

[Here follow 362 signatures.]

1883-4.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

COAL-FIELDS.

(REPORT OF EXAMINER ON MINING UNDER ROADS.)

Ordered by the Legislative Assembly to be printed, 18 June, 1884.

The Examiner of Coal-fields to The Under Secretary for Mines.

Sir,

Coal-fields' Office, Newcastle, June 12, 1884.

With reference to your blank cover of the 6th instant, forwarding for my report,—

- (1.) Letter from Mr. N. Melville, M.L.A., dated June 3, 1884, bringing under the notice of the Honorable the Secretary for Mines a paragraph in the *Evening News* relative to undermining of the main Government road at Tighe's Hill, and the stoppage of all traffic, &c., and stating his opinion "that the Examiner of Coal-fields should be at once called upon for an explanation of his conduct," &c., &c.—
- (2.) Report of Mr. Melville's speech in Legislative Assembly, extracted from *Sydney Morning Herald* of 5th instant, wherein he states "that either the Examiner of Coal-fields had been acting in concert with the persons taking the coal from under the roads, or had been neglecting his duties," &c.—

I have the honor to submit the following statement for the information of Mr. Secretary Abbott:—

2. On the 19th February, 1878, an application was made by Mr. E. A. White for permission to mine for coal under certain public roads at Tighe's Hill, and having been referred to me on July 12, 1879, I reported that it would not be advisable to work out all the coal from under the Government roads, as "from the shallow depth the coal is known to exist underneath where it is proposed to work damage to the surface would be likely to happen," and that I had been into the mine and over the road adjacent to the Ferndale Company's present workings and saw no objection to granting the applicant permission to drive two headings in the Borehole seam of coal, lying about 50 feet below the surface of the Great Northern Road, as shown on the accompanying tracing. One heading, lettered A.A., to be 8 feet wide and 7 feet 6 inches high, and the other lettered B.B., 6 feet wide and 7 feet 6 inches high, with narrow cut through every 35 yards, and a 6 yard pillar between the two headings, so as to enable the Ferndale Coal Company to obtain underground access to (from the present working shaft, plant, and rolling stock) and work the coal from under the 10 acres of land colored pink, leased to the Company by A. A. P. Tighe, Esq. The headings and cross cuts to be driven under the Examiner of Coal-fields' supervision, not to exceed the width or height mentioned, and, if thought necessary by him at any time whilst the headings, &c., are being driven, or after they are completed, the applicant agrees to prop or otherwise secure them to the satisfaction of the Examiner." Of the fate of this application I received no information until July 21, 1881, as will be perceived from subsequent correspondence.

On May 20, 1881, the Waratah Municipal Council Clerk apprised me of the fact that parties working coal at Peppertown were undermining the public street, and asking my advice and interference in the matter. In informing the Council, in reply on 23rd May, 1881, of my intention to examine the workings referred to, I mentioned that in the previous week an application of Mr. Andrew Sneddon's to mine for coal under Ingall-street and Great Northern Road, Peppertown, had been returned by me to the Minister with the following minute:—"I would suggest that this application should not be granted, as it would most probably cause serious damage to the roads by working the coal from under them."

On June 10, 1881, I received a further communication from the Council Clerk, thanking me on behalf of the Council for the action I had already taken in the matter, and the promptness I had shown in thus attending to the requests of the Council. Previous to receipt of this I had called upon the various colliery owners to have plans of their workings made up to date, a request which was complied with.

On June 24, 1881, I wrote two letters to the Under Secretary, and in one of them enclosed a tracing showing where the Ferndale Company had wrought coal from under the Main Northern Road from Newcastle to Maitland, as well as a portion under Ingall-street, and stated that on July 12, 1879, I reported upon an application made by Mr. E. A. White for permission to undermine the public roads, but had received no notification of any permission having been granted; and that on May 20, 1881, I had received a letter from the Waratah Council saying it was reported on good authority that several parties at Peppertown were working coal from under the public streets, &c.; that upon my making an examination of the different mines, and serving the workers of them with notices to have surveys made up to June, I found that coal had been worked from under Ingall-street by Messrs. Hopkins and others (see tracing lettered A), Messrs. Walker and Wilde (see tracing lettered B), and under the Great Northern Road and Ingall-street by Ferndale Company (see tracing lettered C); and further saying that since the surveys had been completed the parties had stopped working coal under the roads, and I should be glad to be informed.

[765 copies—Approximate Cost of Printing (labour and material), £3 4s. 8d.]

informed if they had any right to get it, or any permission had been given. On same date (June 24) the Clerk of Waratah Council informed me "the Council had reason to fear that, notwithstanding the action taken by them, and the very prompt inspection by myself as the Government appointed officer, it was still believed that the workings were endangering property and the public safety of the inhabitants, intimating that any suggestion as to further steps to be taken by the Council will be esteemed a favour." Upon receipt of this (July 1, 1881) I wrote to the Under Secretary, asking to be informed whether the coal under the roads—colored yellow on an enclosed tracing—belonged to the Government, and, if so, whether any permission had been given to work coal from under them, and if any authority had been granted, under what road or roads.

On July 7th following I received a letter from the Under Secretary with reference to my letter of 24th June (*ante*), enclosing tracing showing where the Ferndale Company had wrought coal under the Main Northern Road, as well as a small portion of Ingall-street, asking whether the works carried on by the Company had been performed strictly in terms of the permission, and what quantity of coal had been taken out, the reply to which, on July 8th, was as follows:—"As stated in my letter of 24th ultimo, I have had no notification of any permission having been granted by the Minister to work the coal under any roads." On July 21st, 1881, the Under Secretary, in referring to my B.C. of the 8th instant, forwarded "A copy of an authority to mine, prepared in favour of Mr. E. A. White, but not yet issued," adding, "you will be good enough to report whether the works have been conducted in accordance with the conditions therein contained." To this I replied, on July 22nd, 1881, "the coal has not been wrought in accordance with the conditions contained in the authority prepared in favour of Mr. E. A. White, as will be seen by a comparison of the plan annexed to the authority and the tracing showing the coal worked from under the road, forwarded with my letter of the 21st ultimo." On the following day (July 23) the Under Secretary referred to my letter of the 24th ultimo, inquiring whether Messrs. Hopkins and others, and Messrs. Walker and Wilde had any right to get coal under Ingall-street, and informed me that no permission such as I alluded to had been granted to either of those parties, and that as regards working coal from under Great Northern Road and Ingall-street by the Ferndale Company, an authority in favour of Mr. E. A. White had been prepared but not yet issued.

On July 26th, 1881, in writing to the Under Secretary. I asked whether the Minister desired me "to take any further action with regard to the coal worked from under the public roads by Messrs. Hopkins and others, Messrs. Walker and Wilde, and the Ferndale Company,"—the reply to which was as follows:—"The roads are in the control of the Municipal Council, and it is not clear that the Examiner can take any action beyond warning the persons who were mining under the roads from continuing to do so. If the Examiner can suggest any action that appears to him expedient he may do so." Upon which I remarked that if the coal under the roads belonged to the Municipal Council I did not see that I could take any further action in the matter.

On August 3rd, 1881, the Under Secretary, referring to my B.C. report of July 22nd, 1881, requested me to say whether in view of the fact that the authority to mine had not been issued to Mr. E. A. White and the Ferndale Company had, without first obtaining such authority, constructed mine works under the road, and such works were not in accordance with the terms proposed in such authority, I was of opinion the permission should be cancelled. To which I replied, "I was of opinion that the permission should be cancelled."

In a telegram dated August 17th, 1881, to the Under Secretary, with reference to my letter of July 1st, 1881, I requested to be informed whether the coal under the municipal roads belonged to the Crown or the municipality; and also reported to the following effect:—"There has been another large and dangerous pitfall at Peppertown, which Mayor telegraphed me to see yesterday, and I go there to-day. From years of 15th, received to-day, asking if Mr. White's application to undermine the roads should be granted, I presume the coal belongs to the Crown. The Mayor is undecided as to what action he should take." The Under Secretary replied on the same date by wire that "the roads were under the control of the Council, but it was thought the coal was not the property of the Council."

On August 18th, 1881, the Waratah Council Clerk wired me: "Mounter-street, Peppertown, fallen in; can you come immediately? Mayor waiting your reply," in compliance with which I met the Mayor at Mounter-street.

On August 19th, 1881, in view of my B.C. report of August 5th, 1881, and the fact that the Ferndale Company appeared to have undermined the road, contrary to the conditions on which it was proposed to grant permission, I was informed that the Minister had decided that the permission should not issue to Mr. E. A. White who had been informed to that effect.

On August 20th, 1881, referring to my letter of June 24, previous and subsequent correspondence, I reported that upon making an examination of Walker and Wilde's, Messrs. Hopkins and others, and the Ferndale Company's Colliery workings on 18th and 19th August, 1881, I found they had wrought more coal from under Ingall-street since I had warned them against taking coal from the roads. And on August 24th, 1881, I communicated to the Under Secretary the fact of my having received a telegram from the Waratah Council that Mounter-street had fallen in, and of my meeting the Mayor there, and the result of my examination of the workings.

On February 9th, 1882, I reported that on going into Walker and Wilde's pit I found that the Ferndale Company and Mr. Bevan were still excavating coal under the Great Northern Road at Peppertown, to which the Under Secretary replied that the Municipal authorities had been informed of my statement, and the Colliery owners, that such had been done. On the same date I requested the owners of the Collieries before mentioned to cause to be marked on their Colliery plans before the 16th instant the workings in the coal up to the time of the inspection made by me on the 8th instant.

On March 1st, 1882, a letter from Mr. Bevan to the Under-Secretary was forwarded to me. In this letter Mr. Bevan stated that he only had been four months working his colliery, and had taken very little coal from under the roads in comparison with what others had done in the same neighbourhood, &c., &c. Upon this I reported that "the action to be taken in this and similar cases which have been recently referred to me will depend upon the decision on the question submitted in my letter of 26th July last with respect to the coal worked from under the Main Northern Road and part of Ingall-street by Messrs. Walker and Wilde and the Ferndale Company."

On March 15th, 1882, two letters from the Superintendent of the Australian Agricultural Company to the Minister, dated respectively February 6th, 1882, and March 10th, 1882, were referred to me under  
B.C.

B.C. to be noted, in the first of which Mr. Grogson asked whether the right to work the coal under any part of the road had been conceded to the owners on the opposite side to that of the A. A. Company's property, or whether the Crown permitted the land-holders on each side of the road to work the half-breadth adjoining their respective properties. In reply he was informed that "applications for permission to mine under the roads had been made, but no such permission was at present in force." In his second letter Mr. Grogson stated that Mr. Bevan was working coal under the road, and as representative of the owners of land on the opposite side of the road, he objected to the working on the ground that the same could not be effected without injury to the adjoining property as well as to the public, and would be objectionable to the Company under the most careful supervision.

On March 20th, 1882, in reporting upon applications made by Messrs. Bevan and Copeland I observed that for the reasons stated in my B.C. report of July 12, 1879, on an application of Mr. E. A. White for permission to mine under the Great Northern Road, and my report of May 18, 1881, on Mr. Sneddon's application, I could not recommend a compliance with either Mr. Bevan's or Mr. Copeland's applications, dated respectively the 18th ultimo.

On March 4th, 1882, an extract from a letter of Road-Superintendent Williamson's, reporting the undermining of the road at Tigo's Hill, was forwarded me with directions that I should find out by what authority the persons mining under the roads were taking away the coal, in answer to which I forwarded copies of letters I wrote to the Colliery owners in compliance with instructions to which only one reply was received from Mr. Bevan, who said that he had given notice to the four men working under the roads and did not intend to be meddling with the road any more except he got a grant of them.

On March 23rd, 1882, I reported that upon visiting Ferndale mine, and finding that Mr. Sneddon was excavating coal from under Great Northern Road at Peppertown, I warned the persons at work, and told them to tell Mr. Sneddon, who was not present.

On April 21st, 1882, I received a telegram from the Mines Department, instructing me to warn the Peppertown Colliery proprietors, and to return all papers at once, so that the advice of the Crown Law Officers might be obtained. In pursuance of those instructions I wrote on the same date to the Ferndale Company, Mr. Bevan and Messrs. Sneddon, directing them to cease at once all coal-mining operations under the roads in the Waratah Municipality at Peppertown, and also Messrs. Walker and Wilde, requesting them to cease similar operations under Ingall-street.

On May 3rd, 1882, I informed the Under Secretary, by wire, that on visiting Sneddon's Colliery, Peppertown, I found three men excavating coal in three different places under the Great Northern Road, and in a letter of same date gave full details.

On June 5th, 1882, in compliance with instructions, I forwarded to the Mines Department a precis of evidence procurable against the Peppertown Colliery proprietors who were undermining the public roads.

On December 2nd, 1882, the Under Secretary forwarded me information filed in Equity against Ferndale Company, Messrs. Sneddon and Thomas Bevan, for mining for coal under public roads, and on 6th December I reported that the information had been served on the parties concerned.

On January 18th, 1883, the Under Secretary inquired whether the parties against whom informations have been laid had desisted from mining under the roads, and whether any damage had been done to the road by either of said parties, and if damage had been so done, asking me to furnish an estimate of cost of repairs.

On January 30th, 1883, I reported that having examined the roads undermined and some of the underground excavations, I found that Ingall-street was in a very dangerous state through pit-falls on the road and on each side of it, which might at any time extend right across; that Mounter-street had dangerous pit-falls on and along a portion of its southern boundary, and very deep and dangerous pit-falls, over 25 feet in depth, existed up to and alongside of a portion of the northern boundary of the Great Northern Road, and suggested that the Superintendent of Roads was the best person to prepare an estimate of cost of repairs, &c.

On February 3rd, 1883, referring to my letter of the 30th ultimo, I reported that the Ferndale Colliery, Mr. Thomas Bevan, and Mr. Sneddon had desisted from mining under the public roads.

On July 17th, 1883, a letter from the Municipal Council at Waratah, addressed to the Minister, was referred to me, drawing attention to the mining operations being carried on in close proximity to the Great Northern Road, and requesting the prompt attention of the Government to the matter. Upon this the Roads Department was asked to send an officer to join me in an examination of the workings, and I was directed to forward a report of the result of such examination. The report of this examination was forwarded by me to the Under Secretary on August 28th, 1883, in which it was stated that the surface of the Great Northern Road, in the Municipality of Waratah and Wickham, had not up to that time been injured by the coal taken away underneath it.

On October 31st, 1883, I forwarded a report to the Under Secretary, notifying that I had visited the Spennymore Colliery on 29th instant, and found the Company had put through into two of the Ferndale Company's old bords, and although I did not anticipate any immediate danger of the road falling in, still, as it was the intention of the lessees of the Spennymore Mine to work out all the pillars of coal left by them on the A. A. Company's property, adjoining the Maitland road, I recommended that the Works Department be at once informed, because when the pillars referred to were wrought out there was every probability of the road falling in.

On January 26th, 1884, I received a letter from Mr. Powell, the Ferndale Company's Colliery manager, stating that Messrs. Walker and Wilde were then, and had been for a considerable time, undermining the Maitland Road, and stating that when the Ferndale Colliery Company were mining in that direction they took great care that the roof was well timbered, and sufficient top coal left so as to make it sound and safe, &c.

On February 8th, 1884, I wrote to the Spennymore Colliery Company to the following effect:—"It having been reported that mining operations are carried on by you, or by persons subject to your control and direction, under the road leading from Maitland to Newcastle, and commonly called the Maitland Road, to the risk and danger of the said road, I hereby give you notice that unless such mining operations be discontinued forthwith, proceedings will be taken to enforce the rights of the Government in reference to the said road and the coal thereunder. This notice is without prejudice to any claim which the Government may now have against you in respect of the coal already obtained from under the said road."

On February 16th, 1884, I wrote the following letter to Mr. Powell, the Ferndale Colliery manager:—  
 “On February 9th, 1884, I requested you on or before the 16th idem to cause to be marked on your plan of the Ferndale Colliery the workings in the coal up to the time of an inspection I made from Walker and Wilde’s pit on February 8th, 1882, and I was much surprised to find yesterday five 8-yard wide bords 7ft. 2in. in height, driven by the Ferndale Company under the Maitland and Newcastle Road, which bords you informed me were driven a long time previous to February, 1882, and have not yet been shown on plan of the workings. I have now to request that you will lose no time in surveying and marking them on the Colliery plan, as well as other workings in the coal at the Ferndale Colliery.”

On March 4th, 1884, I received copies of an information filed in Equity, Attorney-General v. Walker and Wilde, and in pursuance of instructions served them on the parties for whom they were intended.

Having received a report from Mr. Inspector Dixon, of his inspection of the Spennymore Colliery, and the danger likely to arise to the road, owing to their intention of taking out the pillars, I visited the mine on March 26th, 1884, and on the 29th idem wrote the following letter to the lessees of the Spennymore Colliery:—“Referring to my inspection of the Spennymore Colliery workings on the 26th instant, and your colliery manager informing me that he intended, in about a week from that time, to work out the pillars of coal at the Spennymore Colliery, on the A. A. Co.’s property, on the south-west side of the Maitland and Government road, in the Municipality of Waratah, I hereby give you notice that taking away those pillars of coal will in all probability cause a subsidence of and serious damage to the surface of the said road, on which there is a large and important traffic which it would seriously impede, or put a stop to altogether. 2. I trust that what your Colliery manager informed me, about taking out the pillars alongside the Maitland and Newcastle Road, is incorrect, and that you will do nothing which will cause damage to the surface of the said road, or interfere with the traffic thereon.”

On the same date I forwarded to the Under Secretary copies of the letter addressed to the lessees and notified the action taken.

On May 21st, 1884, I addressed the Under Secretary as follows:—“I have the honor to forward you, for the information of the Hon. the Secretary for Mines, the enclosed report from Mr. Inspector Dixon, with respect to pitfalls which have recently taken place on the A. A. Coy.’s or southern side of the Great Northern Road at Peppertown, in the Municipality of Waratah. 2. I went to see them to-day and find that the surface has fallen in in two places up to the boundary of the Great Northern Road. As yet there is no appearance of any immediate pitfall being likely to occur on the Great Northern Road, but it might happen at any time, or be sometime before it takes place.”

On June 3rd, 1884, I sent the following telegram for the information of the Minister:—“On arriving at Peppertown yesterday, I found that another pitfall had taken place on the A. A. Coy.’s southern side of the Great Northern Road at Peppertown, caused by Spennymore Co. taking away the coal adjacent to the road (*vide* my letters of March 29th and May 21st last). Portions of the footpath have at present only fallen in, and Mr. Stilwell is fencing off half the road, and not the whole of it, as reported in newspapers. I am going this morning with Mr. Inspector Dixon down Spennymore Pit, if possible to see state of pillars under and adjacent to northern side of road, along which Mr. Stilwell proposes to continue the traffic, and widen road, and then make holes in the old workings. Will send in a report to-night.”

On June 6th, 1884, I forwarded to the Under Secretary, for the information of the Minister, tracings of pitfalls and workings, and a report thereon, as follows:—“I have the honor to forward, for the information of the Hon. the Secretary for Mines, a tracing (No. 1) showing the recent pitfalls adjacent to and on the south-western side of the Great Northern Road at Peppertown, also the width of road fenced off, and that left open for traffic over it, from and to Newcastle, by Mr. Stilwell. 2. On the 4th instant Mr. Stilwell accompanied me and Mr. Inspector Dixon into the only workings which I apprehended might, if not secured, let down the north-eastern side of the Great Northern Road, at and near Ingall-street, and acting upon my advice he consented to have some bords timbered, so as to prevent the possibility of any immediate falling in of that portion of the road (*vide* No. 1 tracing) which is left open for traffic, and thus give him some time to decide what it is best to do with the road where it has been undermined. 3. Mr. Stilwell let the timbering of the bords (8 and 4 yards wide) referred to, by contract on 4th instant, on my consenting to Mr. Inspector Dixon superintending it, and seeing that the work is well and properly carried out. 4. I also enclose a tracing (No. 2), showing the coal taken by the Ferndale Co., Mr. Bevan, Messrs. A. & A. Sneddon, and Messrs. John Williams and William Thornton (Spennymore Colliery), from under the Great Northern Road at Peppertown, in the Municipality of Waratah, and of the coal now being worked, and that wrought out by Messrs. Williams and Thornton, referred to in my letter to you, dated March 29th and May 21st last (*copies herewith*). 5. The cause of the recent pit-falls (coloured blue) was the taking away by Messrs. John Williams and William Thornton of the whole of the coal from under that portion of the Australian Agricultural Company’s land, and under the footpath of the Great Northern Road, lettered B on No. 2 tracing. 6. As the Spennymore Manager informs me that Messrs. Williams and Thornton intend to immediately take out the pillars lettered A on No. 2 tracing, which will be sure to cause more pit-falls to the south-east of the present ones, I shall be obliged by your informing me, before leaving here for west and south, what action the Minister desires me take in respect of the portion of the road injured by Messrs. John Williams and William Thornton, and with regard to their intention to extract all the coal up to the north-eastern boundary of the Australian Agricultural Company’s property, &c.”

Having now furnished a full report, in accordance with the Minister’s instructions, as to what I did in the past, when I did it, and how I called the attention of the Department to the possible danger likely to arise from the undermining of the Great Northern Public Road, it only now remains for me to deal with the second subject of reference, viz., the statement reported in the *Sydney Morning Herald* to have been made by Mr. N. Melville in the Legislative Assembly to the effect that “either the Examiner of Coal-fields had been acting in concert with the persons taking the coal from under the roads or had been neglecting his duties.”

In reply to this I will only refer to the foregoing report, and say that there is not the shadow of foundation for the insinuations thus levelled at me.

I have, &c.,  
 JOHN MACKENZIE,  
 Examiner of Coal-fields.

1883-4.

## LEGISLATIVE ASSEMBLY.

## NEW SOUTH WALES.

## MINERAL LEASES.

(IN WHICH THOMAS GARRETT, ESQ., M.P., HAS AN INTEREST.)

*Ordered by the Legislative Assembly to be printed, 7 February, 1884.**[Laid upon the Table of the Honorable the Legislative Assembly of New South Wales by the Honorable the Minister for Mines.]*

RETURN in answer to a Question asked by John McElhone, Esq., M.P., on the 7th February, 1884, respecting Mineral Leases held by Mr. T. Garrett, M.P., and Mr. W. F. McKenzie.

## Questions.

- (1.) In reference to 2,500 and 1,600 acres of mineral lands held by T. Garrett, M.L.A., and Mr. W. F. McKenzie, near Mount Victoria, and referred to on page 133 of Annual Report, 1880, Department of Mines:—Are the above blocks of land in a reserve; if so, when were they taken up, and what is the annual rent per acre of above land? Under what clause or regulation of the Mining Act was the land taken up?
- (2.) When was the last rent paid by Messrs. Garrett and McKenzie and what amount of rent is now due?
- (3.) What is the total area of land held for mining by Mr. T. Garrett?
- (4.) What is the area under which he is entitled to mine in each district of this Colony?
- (5.) The rent to be paid per acre in each district and amounts now due, if any, by Messrs. Garrett and McKenzie?

## Answers.

- (1.) Yes, applied for 18th September, 1878, and 17th February, 1879. Authority granted under section 28 of the Mining Act, 17 November, 1879, subject to a royalty of 6d. per ton, but no rent.
- (2.) No rent reserved.
- (3.) The total area in which Mr. T. Garrett appears to be interested either by himself or with others is 68,890 acres.
- (4.)

County Northumberland...	110 acres,	Garrett, Pockley and others;	no rent reserved.
" ...	140 "	T. Garrett	"
" ...	800 "	"	"
" ...	50 "	"	"
" ...	60 "	"	2s. per acre; paid quarterly.
" ...	640 "	"	"
" (27 section)	2,848 "	T. Garrett, C. F. Stokes, and others;	no rent.
	4,648 acres.		
County Cook ...	2,500 acres,	T. Garrett;	no rent reserved.
County St. Vincent ...	10,400 "	T. Garrett; G. M. Larnach;	no rent reserved.
" ...	32,240 "	"	"
	42,640 acres.		
County Cumberland ...	1,102 acres,	T. Garrett, J. Coghlan, and another;	no rent reserved.
" ...	11,743 "	"	others; 2s. per acre; paid quarterly.
" ...	3,524 "	"	"
" ...	2,733 "	"	"
	19,102 acres.		
- (5.) None due by Messrs. Garrett and McKenzie alone, but 2s. per acre per annum is reserved on 700 acres in the County of Northumberland, and on 18,000 acres in the County of Cumberland, in which Mr. Garrett appears to be interested.

1883-4.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

GOLD-MINING LEASES.  
(REGULATIONS.)

*Ordered by the Legislative Assembly to be printed, 25 September, 1884.*

Department of Mines,  
Sydney, 19th September, 1884.

HIS Excellency the Governor, with the advice of the Executive Council, has been pleased to make the following Regulations relating to Gold-mining Leases, in pursuance of the powers conferred by the Mining Act Further Amendment Act of 1884.

[84-9,751]

JOSEPH P. ABBOTT.

REGULATIONS RELATING TO MINING LEASES  
UNDER THE MINING ACT FURTHER AMEND-  
MENT ACT OF 1884.

WHEREAS by the Mining Act Further Amendment Act of 1884, the Governor is empowered to make Regulations for certain purposes, to be dealt with as Regulations made by the Governor under the principal Act: Now, therefore, His Excellency the Governor, by and with the advice of the Executive Council, doth make the Regulations following, that is to say:—

1. The holder or holders of any Permit or Authority granted under the principal Act, and still in force, may make application in the form in the Schedule A hereto for the conversion of such Permit or Authority into a lease.

2. Upon receipt in the Department of Mines of such application, together with a sum of money equal to one year's rent of the land, and (if required) the fee for survey of the land, the Governor may, subject to the rents or royalties, or both, and to the covenants and conditions hereinafter prescribed, and to such special covenants and conditions as shall in certain cases appear to the Governor necessary, grant a lease of the land for the term applied for, or subject to such modifications as shall appear proper.

3. To obtain a lease of land referred to in section 2 of the said Act, not included in any Permit or Authority, the mode of taking possession, giving notice, and lodging application shall, where practicable, be the same as prescribed in the Regulations made under the principal Act, relating respectively to Gold-mining and Mineral Leases; and such Regulations shall, except as otherwise expressly provided in these Regulations, apply to all other matters relating to applications and objections thereto and to leases,—but the restrictions in such Regulations as to the form and dimensions of the land and the position of the boundary lines in regard to any vein, reef, or lode, shall not apply. Where, by reason of the land being under water, or from any other sufficient cause, possession cannot be taken, the applicant shall attach to his application a plan or sketch of the land applied for, and shall in the notices and application give such description as will lead to the ready identification thereof.

4. The Regulations made under the principal Act relating to Gold-mining shall, except as regards the form of application, the area and the dimensions of the land, and the position of the boundaries in relation to any vein, reef, or lode, or as otherwise provided in these Regulations apply to any Special Lease for Gold-mining purposes. Every application for a Special Lease shall be in the form in the Schedule B hereto, and the extent

of land demised by any such lease shall be in proportion to the number of men to be employed, and the capital to be expended in the purchase and erection of machinery, or the construction of costly works for the purpose of working the land, not exceeding 2 acres for every man employed, and 1 acre additional for every £200 to be expended in machinery, dams, or races, provided that the area demised by any one lease shall not exceed 100 acres.

5. Upon approval by the Governor of any application for a special lease, notice shall be published in the Gazette promising a lease of the land applied for or so much thereof as may be available upon condition that within a period to be named in such notice, such a sum of money as may be approved by the Governor, shall be expended in the purchase and erection of machinery or in the construction of works said in the application to be necessary, and upon compliance within such period or such extension thereof as may upon cause shown, be approved by the Secretary for Mines, a Special lease of the land aforesaid shall forthwith issue to the applicant, but upon the applicant failing to comply with the conditions aforesaid, the Governor may revoke the promise of lease and refuse the application, or may reduce the area of the land applied for to the dimensions prescribed for an ordinary lease.

6. Every lease granted under the Mining Act Further Amendment Act of 1884, shall be subject to the rents, royalties, and conditions following:—

7. Leases for mining for minerals, other than gold, including the right to occupy the surface or some portion thereof, two shillings per acre per annum; without the right to occupy any portion of the surface, one shilling and sixpence per acre per annum; for land wholly under water, one shilling per acre per annum. Leases for gold-mining, two shillings and sixpence per acre per annum. In respect of every ton of coal the sum of sixpence; in respect of minerals, other than coal or gold, five pounds per centum of the value of the minerals; and in respect of gold, one pound per centum of the value of the gold raised from the land demised, shall be paid as royalty; provided that if the royalty payable in respect of the coal, or mineral other than gold, raised during any one year exceeds the rent paid for such year, the amount paid as rent may be deducted from the sum payable as royalty, but if the royalty as aforesaid, in any one year amounts to less than the rent paid for such year, the lessee shall not for such year be required to pay royalty.

8. Upon or in connection with the land demised by any such lease, work shall be commenced within such period and be carried on by such a number of men in such manner within such limits and subject to such supervision as the Governor may in each case direct: Provided that the Secretary for Mines may at any time and for any period authorize the suspension wholly or in part of work upon or in connection with any such lease.

9. The term of any such lease shall be that named in the application, or such shorter term as shall be approved by the Governor, not being less than one year, and such term shall commence upon and be computed from the date on which the Governor shall approve of the granting of the lease.

10. The rents reserved under any such lease shall be paid in advance to the Colonial Treasurer, on or before the first day of each year of the term.

11. The royalties reserved under any such lease shall, subject to the deduction of rent as aforesaid, be paid to the Colonial Treasurer at the expiration of each year, or within one month thereafter, and with each such payment a statement shall be furnished under the hand of the lessees, or some one of them, or of the Manager of the mine, setting out the quantity and value of mineral raised from the land demised, and the accuracy of every such statement shall be verified by the statutory declaration of the person making it. The lessees or lessee shall keep a proper book in which shall be entered the quantity of gold or other mineral raised each day from the demised land, and the value of such mineral shall also be entered from time to time as soon as known, and such book shall at all times be open to the inspection of any officer of the Department of Mines.

12. If any lessee shall fail to execute his lease when called upon to do so, or shall fail to pay the rent or royalty reserved under his lease within the prescribed time, or shall fail to keep a proper record of the quantity and value of the gold or other mineral raised, or shall refuse to allow such record to be inspected by any officer of the Department of Mines, or shall fail to observe and perform the other conditions or covenants of his lease, or in the case of a special lease shall fail to expend in the purchase and erection of machinery, or the construction of dams, races, or other costly works, the amount of money proposed in the application to be so expended, he shall forfeit his right to such lease, and the Governor may thereupon, or at any time thereafter, cancel such lease, and upon publication in the Gazette of such cancellation the lease shall be absolutely void.

#### SCHEDULE A.

To the Honorable the Secretary for Mines,  
being the holder of a \_\_\_\_\_ granted  
under Section \_\_\_\_\_ of the Mining Act, 1874, to mine for

all that piece or parcel of land being \_\_\_\_\_, and containing \_\_\_\_\_ acres, more or less, do hereby apply for a lease of the said land for a period of \_\_\_\_\_ years, with the right to occupy \_\_\_\_\_ acres of the surface thereof in such position as may be approved of, and \_\_\_\_\_ undertake if such lease be granted to execute the same when called upon to do so, and within \_\_\_\_\_ days after the granting of such lease to commence work thereon (or upon adjoining land proposed to be worked in connection therewith, and to extend the underground works into such land with the utmost possible speed) and thereafter to employ in mining upon [or under] such land \_\_\_\_\_ men, and to observe and perform all the covenants and conditions contained in such lease; and \_\_\_\_\_ herewith tender the sum of \_\_\_\_\_, being the first year's rent of such land, and the fee for survey of the land, and \_\_\_\_\_ agree to forfeit such rent if \_\_\_\_\_ fail to accept and execute such lease when called upon to do so.

Dated at \_\_\_\_\_ this \_\_\_\_\_ day of \_\_\_\_\_

Received in the Department of Mines, Sydney, this \_\_\_\_\_ day of \_\_\_\_\_, 188 \_\_\_\_\_, at \_\_\_\_\_ o'clock in the \_\_\_\_\_ noon.

Registrar.

#### SCHEDULE B.

To the Honorable the Secretary for Mines,  
hereby make application for a Special Lease for \_\_\_\_\_ years of all that piece of land, being \_\_\_\_\_ containing \_\_\_\_\_ acres for the purpose of Gold-mining. The deposit proposed to be worked consists of \_\_\_\_\_, and by reason of \_\_\_\_\_, requires for its proper development the erection or construction of the following machinery or works:—  
the estimated cost of which is £ \_\_\_\_\_, and \_\_\_\_\_ propose to employ upon or in connection with such land \_\_\_\_\_ men; and \_\_\_\_\_ herewith tender the sum of \_\_\_\_\_, being the first year's rent of such land and the fee for survey of the land, and \_\_\_\_\_ agree upon notification of approval of this application to expend the sum of £ \_\_\_\_\_ in the purchase and erection of the machinery, or the construction of the works aforesaid, within \_\_\_\_\_ of notice of such approval, and to accept and execute the lease when ready, or failing therein to forfeit the rent deposited herewith.

Dated at \_\_\_\_\_, this day of \_\_\_\_\_, 188 \_\_\_\_\_.  
Received this \_\_\_\_\_ day of \_\_\_\_\_, 188 \_\_\_\_\_, at the \_\_\_\_\_ hour of \_\_\_\_\_ in the \_\_\_\_\_ noon.

No. of Application \_\_\_\_\_

Mining Registrar.

**MINING ACT OF 1874.**

(NEW REGULATION IN LIEU OF NO. 14, OF 13 JULY, 1874.)

---

 Presented to Parliament, pursuant to Act 37 Vic. No. 13, sec. 114.
 

---

NEW SOUTH WALES, } to wit. }  (L.S.) AUGUSTUS LOFTUS, <i>Governor.</i>	Proclamation by His Excellency The Right Honorable Lord Augustus WILLIAM FREDERICK SPENCER LOFTUS, Knight Grand Cross of the Most Honorable Order of the Bath, a Member of Her Majesty's Most Honorable Privy Council, Governor and Commander-in-Chief of the Colony of New South Wales and its Dependencies.
---	---

WHEREAS under the provisions of the "Mining Act 1874," it is enacted that the Governor may make and proclaim Regulations for carrying the Division Number III of the said Act from time to time into full effect: Now, therefore, His Excellency the Governor, by and with the advice of the Executive Council, in exercise of the powers conferred by the said recited Act, doth make and proclaim the following Regulation, in lieu of Regulation No. 14 of the Regulations relating to Mineral Leases made and proclaimed on the 13th day of July, 1874:—

Mineral lots shall be measured in the form of a square, except in any case in which the Minister shall authorize a departure from that form.

Given under my Hand and Seal, at Government House, Sydney, this nineteenth day of March, in the year of our Lord one thousand eight hundred and eighty-four, and in the forty-seventh year of Her Majesty's Reign.

By His Excellency's Command,  
 JOSEPH P. ABBOTT.

GOD SAVE THE QUEEN!

# REPORT

ON THE

SILVER-BEARING LODES OF THE BARRIER  
RANGES

IN THE

ALBERT DISTRICT, NEW SOUTH WALES.

BY

C. S. WILKINSON, F.G.S., F.L.S.,  
GEOLOGICAL SURVEYOR IN CHARGE.

---

ORDERED BY THE LEGISLATIVE ASSEMBLY TO BE PRINTED,  
2 October, 1884.

---

SYDNEY: THOMAS RICHARDS, GOVERNMENT PRINTER.

—  
1884,

REPORT ON THE SILVER-BEARING LODES OF THE BARRIER RANGES IN THE  
ALBERT DISTRICT, N.S.W.

---

The Geological Surveyor in Charge to The Under Secretary for Mines.

Sir,

Department of Mines, Sydney, August, 1884.

In accordance with your instructions I have examined the silver-mining country in the Albert District, and have the honor to submit the following report:—

Silverton, which is the commercial head-quarters of the silver-mining portion of this district, is situated  $13\frac{1}{2}$  miles from the boundary line of New South Wales and South Australia, or about 590 miles in a straight line W.N.W. from Sydney and 257 N.E. from Adelaide. It occupies a convenient position upon the main road from Adelaide to Wilcannia, and is near the western margin of a large tract of broken hilly country generally known as the "Barrier Ranges," which, almost surrounded by open salt-bush plains, extends for 150 miles in a N.N.E. direction, varying in width up to 110 miles; there are also several salt-bush plains here and there between some of the ranges. Silverton is about 600 feet above sea level.

Nearly the whole of this country consists of metalliferous formations, but it is chiefly on the south-western portion that the silver and lead lodes have yet been discovered. (*Vide* accompanying Map.)

The geological formations consist of metamorphosed clay-slates and talcose mica-schists, with intrusive masses and dykes of granite and diorite which traverse the sedimentary rocks generally in a north-easterly direction, but sometimes in all directions, forming almost a network of dykes. In places the schists pass into gneiss, which imperceptibly changes into porphyritic granite.

The silver-bearing lodes occur chiefly in the mica-schists in the vicinity of the granite dykes; it would seem as though the contraction of the rocks upon cooling, after the intrusion of the igneous rocks, resulted in the formation of irregular fissures which became filled with the metallic sulphides and other minerals composing the lodes.

By the enormous denudation which these formations have undergone, valleys have been eroded, leaving intervening rough rocky ranges from 100 to 500 feet high, and exposing lodes at all levels. Thus we are enabled to see portions of lodes from above which hundreds of feet of rock have been removed; and as at the different levels they exhibit similar characteristics as regards irregular thickness and length, this mode of occurrence will doubtless be found to continue as they are followed below the present surface of the ground.

The lode-stuff consists chiefly of porous brown oxide of iron, or "gossan," and occasionally quartz, containing carbonates of lead and copper, galena, and chlorides of silver; the latter are of a light or dark green colour, and occur in veins and thin scales, or in grains irregularly disseminated through the ore. The miners readily recognize them by their waxy appearance when cut with a knife. These oxides, carbonates, and chlorides occur in the upper portions of the lodes, and have resulted from the decomposition of the sulphides of iron, lead, silver, and copper of which the lodes will be found composed below the "water level," or the level to which oxidation by atmospheric influence from the surface has reached. In one mine the water level has been met with at a depth of 133 feet, in another at 72 feet.

The deepest shaft in the district is on the Umberumberka Silver-mining Company's lode, about 2 miles west of Silverton. Its depth is 131 feet, and at this level a drive has been put in along the course of the lode for 120 feet from the main shaft in one direction, and for 60 feet in the other. The lode occurs in mica-schists, and dips S.  $25^{\circ}$  E. at an angle of  $75^{\circ}$ . It varies in width from 4 to 10 feet, and consists of crumpled mica-schist traversed by veins and lenticular bunches of brown iron ore or gossan, carbonate of lead, galena, and baryta. The hanging wall is well defined, and coated with a black glossy clay; curved slickenside joints coated in a similar manner run through the lode in places. The ore, which is said to yield from 70 to 120 ozs. of silver to the ton, is chiefly finely crystallized galena distributed in irregular masses through the lode. At the 131 feet level one of the patches of ore, mixed with baryta, was 12 feet long and 4 feet wide, and in this was a solid mass of galena 2 feet thick; near it iron pyrites is appearing, just as might be expected, for the Manager, Mr. Evans, informed me that he had struck water in a bore put down only 2 feet below the floor of the drive. Over 400 tons of ore have been raised from this mine.

At Lake's Camp, about 9 miles from Silverton, several lodes have been opened, of which the principal are the Apollyon and the Bobby Burns. The former has been followed on its underlay to a depth of 94 feet in one shaft and 80 feet in another, the sinking of which is continuing. It varies in thickness from 18  
inches

inches to 5 feet, and dips E.  $5^{\circ}$  to  $20^{\circ}$  S. at  $52^{\circ}$  to  $60^{\circ}$ , with a good hanging wall, and occurs in mica-schists associated with dykes of coarsely crystalline granite. (See figures 1 and 2). The lode-stuff consists of veins of brown iron ore, quartz veins, and ferruginous mica-schist, with patches of carbonate of lead and chlorides of silver. The silver ore is irregularly distributed through the lode, and is chiefly contained in the carbonate of lead (which was originally galena) and in the joints and cavities of the ironstone. 2 tons of such ore are said to have realized in London about £670, and 53 tons more have also been sent to Freiberg; the poorer lode stuff is kept in reserve at the mine for treatment at a future time. The lode though varying in thickness will, I think, continue in depth; in length it has not yet been proved, but though it evidently pinches out entirely in places on the surface, yet I believe that the different outcrops of similar lode-stuff seen in the neighbouring claims for a distance of nearly  $1\frac{1}{2}$  mile along its line of strike are widened portions of the same lode fissure, and that some of these may possibly be found connected at greater depths. I am informed that the Barrier Range Silver-mining Company are about to sink a shaft 300 feet deep, to cut the Apollyon lode on its underlay. At this depth the lode will probably consist of veins of unoxidized sulphides of iron, lead, silver, and copper.

One mile S.S.E. from the Apollyon is the Bobby Burns lode, which has been prospected to a depth of about 40 feet, where it almost thins out, but with lenticular veins of ferruginous quartz in the schist under the hanging wall, while at the surface it is about 3 feet thick; but, as it is characterized, like the Umberumberka and Apollyon lodes, with a well-defined hanging wall, the lode will doubtless make again, and continue, though varying in thickness, to a considerable depth. It dips E. at an angle of  $60^{\circ}$  and consists of lenticular masses of gossan and galena up to 9 inches thick, in crumpled mica schist with veins of ferruginous quartz. (See figure 3). The bounding rock is talcose mica-schist with quartz reefs and granite dykes, and about 5 chains to the east is a large mass of granite extending in a northerly and southerly direction, so that the lodes run almost parallel with it. Immediately to the north, in portions 1, 3, 10, 17, 25, similar promising gossan lodes up to 4 feet thick, with argentiferous galena, carbonate of lead, and carbonate of copper, have been opened; some of them appear to be continuations of the Bobby Burns and Apollyon lodes.

About  $1\frac{1}{2}$  mile south east from Lakes Camp are the Hen and Chickens lodes and Meeches Blow. The former consist of two lodes 2 ft. 6 in. apart separated by granite. The upper one is from 2 inches to 2 feet thick of gossan and quartz, stained with green and blue carbonate of copper, and containing chloride of silver and patches of grey carbonate of lead, galena, and specular iron. It has been followed in for a distance of 100 feet on the underlay, which dips S.S.E. at an angle of only  $23^{\circ}$ . It has a well-defined hanging wall, upon which is a similar gossan vein up to 2 feet thick, sending off ironstone and quartz veins for 6 feet upwards into the altered micaceous sandstone. The lower lode consists also of argentiferous gossan of variable thickness up to 12 inches and a network of ironstone veins. 6 feet to the south both lodes join and thin out, but in places for more than 50 yards along the line of strike it makes again on the surface. The general rock formations are granite with chlorite, and dark mica-schist.

Meeches Blow is a remarkable occurrence of ore on the summit of a small hill of mica-schists and altered sandstones traversed by granite dykes and quartz reefs. It strikes N.E. and crops out for a distance of 90 feet, varying in thickness from 2 to 8 feet. The lode-stuff is composed of porous gossan and coarsely crystalline specular iron stained with carbonate of copper and irregular masses, up to 2 feet, thick, of concretionary earthy carbonate of lead, passing into patches of undecomposed galena 1 foot thick. The lode appears to have been a large fissure originally filled with sulphides of iron, lead, silver, and copper. About 6 chains from it W. 30 N., there is a smaller outcrop of similar lode-stuff.

In anticipation of the settlement of a population, consequent upon the development of the lodes, a new township called Wilson has been recently surveyed near Lake's Camp; and also another called Purnamoota (formerly known as the Soakage) about 8 miles further to the north-east. Half a mile east from Purnamoota is the Pluck Up lode, which consists of brown iron ore gossan, from 3 to 15 inches thick, containing small veins of pure chloride of silver. It dips S.  $40^{\circ}$  E. at  $38^{\circ}$ , traversing mica-schist, and has been traced at the surface for a length of about 80 feet. Three shafts have been sunk upon it, the deepest one being about 60 feet. I was informed that 4 tons of ore had been sent to Germany, and there were about 3 tons at grass. Until the lode-stuff has been treated in bulk, its value cannot be determined, as the chloride of silver is not evenly disseminated through it.

Two miles S.S.E. from Purnamoota is the Lubra silver-mine. The main shaft was 18 feet deep on two veins or lodes, from 1 to 6 inches thick and 5 feet apart, with occasionally smaller veins between them. The veins consist of ironstone containing patches of chloride of silver and grey ore, or carbonate of lead. They dip with the talcose mica-schists S.  $55^{\circ}$  E. at  $45^{\circ}$ . 50 feet to the S.E. is another vein, from 1 to 4 inches thick, of argentiferous ironstone with calcite; it has an undulating dip to the N.W., at one part curving up and then flat. Within 4 chains further S.E., three other similar gossan veins up to 4 inches thick, containing galena and quartz, had been opened for only a few feet on the surface, and also  
about

about 100 feet north from the shaft, another ferruginous galena vein 4 inches thick. Thus we have here within about 6 chains at least six small silver-bearing lodes of variable thickness and extent; some of them will probably connect one with the other. One parcel of half a ton of ore is said to have yielded 6,000 ozs., and another of 1 ton between 300 and 400 ozs. of silver. 26 cwt. had been sent to England, and there was about  $1\frac{1}{2}$  ton of ore at grass.

In the adjoining claim of Messrs. Crisp Bros., 20 chains N.  $30^{\circ}$  E. from the Lubra, is a ferruginous galena vein, of variable thickness up to 9 inches, in mica-schist; and 7 chains from this E.S.E. is another silver-bearing vein from 2 to 8 inches thick, dipping E. at  $26^{\circ}$ . It had been prospected to a depth of 7 feet; and Mr. Crisp informed me that for 10 feet along the outcrop 3 cwt. of "slugs" had been obtained, an assay of which had given at the rate of 4,800 ozs. of silver per ton. These so-called slugs usually consist of lumps of carbonate of lead containing nests and veins of chloride of silver. They are evidently formed by the chemical decomposition of lenticular masses of argentiferous sulphide of lead induced by the action of the carbonic acid and chloride salts in solution in the water permeating the rocks.

The surface of this country is highly charged with saline matter, so much so that in dry weather the salt covers the ground in places as a white efflorescence about a quarter of an inch thick. I have seen some of the slugs with a portion of the original galena in the centre still undecomposed.

One mile S.W. from the Lubra is the One-tree Hill Mine, owned by Messrs. Nickel, Anderson and Fisher. A lode from 2 inches to 2 feet thick of ferruginous quartz has been followed on its underlay S.  $35^{\circ}$  E. at  $30^{\circ}$  to a depth of about 20 feet, and a few yards from this a similar lode, 18 inches thick, with ferruginous veins running into the sandstone for 21 inches above it, has been opened; this may join with the other. It contains chloride of silver, &c., and also chalcedonic quartz with a little iron pyrites. Messrs. Chappel and Allen, of Silverton, inform me that they have just received from England returns of 8 cwt. of the first-class ore sent from this mine, which realized at auction at the rate of £936 per ton, and of 6 tons of the inferior ore which brought £24 per ton.

About 1 mile S.S.E. from the Lubra a fine piece of ironstone, in size 4 feet 6 inches by 2 feet, and containing veins and patches of chloride of silver from  $\frac{1}{4}$  to  $1\frac{1}{2}$  inch thick, was found outcropping on the surface; it is known as Morris's Blow. The owner had pitched his tent over it, and I was permitted to examine it; but as it was not then allowed to be unearthed from the position in which it was discovered, the thickness of it was not ascertained. I understand that the claim was afterwards sold for £8,000. This rich piece of ore probably formed part of a short lode. Four other detached thin lenticular veins of ironstone were seen at the surface within a distance of 5 chains, following nearly the strike of the mica-schists, N.  $35^{\circ}$  E. In the vicinity the schists are traversed by numerous dyke masses of pegmatite granite and quartz reefs.

About half a mile east from the Pluck-up is Forster's Orient claim, in which four silver-bearing veins had been opened. One varies up to 3 inches thick of galena and ironstone, in small lenticular masses; strike E.  $20^{\circ}$  S. in mica-schists, with a dyke of diorite on the S.W. side. It had been traced for 25 feet in length to a depth of 5 feet. Another ironstone vein near this was 6 inches thick, and 5 chains to N.E. are two other veins, one 6 inches and the other 12 inches thick, consisting of ironstone and galena. On the outcrop of these, slugs of carbonate of lead and ironstone containing chloride of silver had been found.

One mile further east is Nolan's Kangaroo claim, containing a vein of ironstone and galena 9 inches thick, dipping S.  $20^{\circ}$  W. at  $40^{\circ}$  in mica-schists, which strike N.  $25^{\circ}$  E. At the surface some rich silver-bearing pieces of carbonate of lead were obtained. Small dykes of pegmatite traverse the schists. 1 mile E.  $20^{\circ}$  S. from the Kangaroo lode is the Model Republic mine. Here a lode of ironstone or gossan, from 9 to 12 inches thick, dips E.  $10^{\circ}$  S. at  $30^{\circ}$  under ferruginous quartzite and micaceous quartz; and 6 feet above it is another ironstone vein, varying up to 4 inches thick, from the surface of which I saw a fine slug of carbonate of lead and horn silver weighing about 16 lbs., and the lode has been worked for a length of about 60 feet and to a depth of 12 feet; the ironstone contains chloride of silver.

Nearly one mile N.E. from here are M'Isaac's lodes, which consist of several lenticular veins of gossan and galena up to 2 feet thick, traversing in a north-easterly direction altered siliceous sandstone for a distance of 4 chains. These have not been opened, but about 30 yards further along the strike some shallow trenches have been cut in the calcareous mica-schists, from which rich silver-bearing slugs are said to have been obtained. In another place a cutting has been made 3 feet deep, showing thin lenticular veins of galena in the mica-schists. Cavities in the ironstone are lined with well-formed crystals of specular iron, which are locally known as "sharks teeth." Such crystals are of frequent occurrence in many of the lodes. In the same locality, and also towards Mount Robe, and between Purnamoota and Wilson, other similar small ironstone and galena lodes, some containing a little copper ore, have been discovered. This is country well worth prospecting.

Five miles S.E. from M'Isaacs, or 2 miles N.W. from the Mount Gipps Station, is Brade & Nickel's mine, the intervening country being chiefly occupied by a belt of coarsely crystalline granite (pegmatite) about 3 miles wide and extending for 7 miles in a northerly direction. Near this mass of granite the schists, which are intersected in all directions by dykes of granite, are much altered, passing from clay-slates into mica-schists and gneiss. At Brade & Nickel's mine, the surface soil, from 12 to 18 inches deep, covering the mica-schists has been found to contain slugs or pieces of all sizes, up to about 200 lbs. or more in weight, of ferruginous carbonate of lead containing horn silver. An assay of one piece of this mixed ore gave at the rate of 3,240 ozs.  $10\frac{1}{2}$  dwts. of silver per ton and 32.1 per cent. of lead. About 4 tons of such ore had been obtained by "surfacing" over a space 65 feet by 35 feet. These lumps of ore are no doubt decomposed lenticular pieces of argentiferous galena, which were originally contained in the portion of the schist rock which has been disintegrated; therefore similar patches of galena are likely to be found in sinking into the underlying schists. Almost surrounding the ground that has been worked, the mica-schists, which strike N.N.E., are traversed in all directions by dykes of granite and diorite. About half a mile east from here a small promising vein (Messrs. Nickel & Wilson's) crops out for about 120 feet N.N.E. along the surface. It has not been opened, but appears to be 6 inches thick, and consists of quartz and gossan, with a little chloride of silver and carbonate of copper.

In the adjoining claim of Horne's some rich pieces of ore containing chlorobromide of silver had been unearched in a small patch of surfacing. In several other claims in this locality silver ore in small quantity has been found.

About 5 miles in a north-easterly direction from Wilson is the Pilgrim mine (J. Purcell and party's), where a lode of ironstone and schist mixed, from 6 inches to 2 feet thick, dip S.E., has been opened to a depth of 4 feet, and rich patches of chloride of silver ore have been obtained: a shaft is being put down to cut the lode on the underlay. Five chains to the N.E. is an ironstone and quartz lode, with bunches of galena up to 4 inches thick, which has been opened to a depth of 5 feet; dip S.E. at  $30^\circ$ . Two chains further N.E. is another ironstone vein 12 inches thick, and 30 yards west from this is a bunchy ferruginous quartz and slate vein from 9 to 24 inches wide, dipping S.  $10^\circ$  E. at  $45^\circ$ . All these veins are apparently separate lenticular portions of the same lode, but may be connected by joints. The mica-schists in which they occur are also traversed by large lenticular reefs, or "blows," of white quartz and dykes of pegmatite granite running in various directions, but chiefly along the line of strike of the schists, viz., N.E. and S.W.

Messrs. Hawson and Collins' Christmas mine lies nearly  $\frac{1}{2}$  of a mile E.S.E. from the Pilgrim. One lode is from 2 to 8 inches thick, and has been worked for a length of 25 feet and 5 feet deep. It dips N.W., and consists of ironstone and patches of carbonate of lead, with rich veins of and cavities filled with chloride of silver. Two chains to the N.E., along its strike, it consists of galena from  $\frac{1}{2}$  to 4 inches thick, and then forms into gossan, passing through schist and into a large mass of quartz. About 6 chains to the E.N.E. another ferruginous vein up to 6 inches thick, also striking N.E., has been opened for only 2 feet deep and 6 feet in length; rich pieces of carbonate of lead with chloride of silver were obtained from it. Messrs. Hawson & Collins allowed me to secure one fine specimen, showing chloride of silver plainly, for the Mining and Geological Museum. An assay of this specimen yielded at the rate of 11,073 $\frac{1}{2}$  ozs. of silver per ton, and a trace of gold. Another small vein had also been found; but very little prospecting has been done to ascertain the extent of these veins. The country is intersected by numerous granite dykes and quartz reefs.

In the vicinity of Stephen's Creek, near Piesse Nob, a conspicuous rocky hill on the south side of the Wilcannia Road, 23 miles east from Silvertown, several small silver-bearing veins have been opened. The Eaglehawk Lode, 2 miles north of Piesse Nob, is a breccia gossan vein from 3 to 9 inches thick, dipping E. at  $75^\circ$ , having a hanging wall of satiny schist and a foot wall of quartz porphyry: it had been sunk upon to a depth of 10 feet, and an average sample of the lode-stuff gave on assay at the rate of 439 ozs. 7 dwts. of silver to the ton. Mr. Dunstan, the Manager, told me that small pieces of horn silver had been found on the outcrop. Twelve yards from this is a similar vein, from 1 to 9 inches thick; they are short veins, and are only visible for a few feet at the surface. The cleavage of the schist is nearly vertical, striking N. and S., but the lines of stratification dip westerly at from  $20^\circ$  to  $40^\circ$ . About 1 mile further north is the Minerva Lode (O'Farrell & Co's.). A shaft 10 feet deep has been put down, and in it the lode, about 8 inches thick, is seen dipping S.E. at  $65^\circ$  in talcose schist. The lode stuff consists of quartz and iron ore, with carbonate of lead in patches, and thin layers of horn silver in the joint fissures. On one side of the lode there is a rubbly shale 2 feet thick, with thin veins of ironstone and marl through it; but the silver ore seems to be confined to the iron ore associated with lead. The lode has only been traced along the surface for about 20 feet. Another small outcrop of gossan is seen 100 yards to the N.W.

O'Farrell's Lode is on the south side of Stephen's Creek, about  $2\frac{1}{2}$  miles easterly from Piesse Nob. It consists of quartz and brown iron ore, containing green carbonate of copper. The owner  
informed

informed me that two assays of the ore gave at the rate of 10 ozs., and 640 ozs. respectively of silver to the ton. It dips E.  $10^{\circ}$  N. at  $40^{\circ}$  through calcareous talcose schists, and has been prospected to a depth of 22 feet.

Three miles in a southerly direction from this is Dunstan's lode. A shaft 8 feet deep has been sunk upon it, showing from 12 to 24 inches of hard porous black ironstone, with cavities containing chalcedony. It pinches out 20 yards along the strike to the N.E.; but within 30 yards to the S.W. it changes into ferruginous finely crystalline vesicular quartz; and 5 chains further it makes again into ironstone gossan 3 feet thick, containing carbonate of copper, and is seen on the surface for about 30 yards. An assay of the hard black ironstone gave no silver, and the copper-stained gossan yielded only at [the rate of  $19\frac{1}{2}$  dwts. per ton. However, the lode has a promising appearance, and should be prospected to a greater depth. Several other small outcrops of gossan and quartz reefs occur in the vicinity. About  $2\frac{1}{2}$  miles to the north, Mr. Dunstan has opened a gossan vein, up to 6 inches thick, containing carbonates of lead and copper; an assay of an average sample is said to have yielded at the rate of 351 ozs. of silver per ton; it occurs in talcose mica-schist, and dips S.  $20^{\circ}$  W at  $40^{\circ}$ . East of this is another lode of Mr. Dunstan's, consisting of quartz and gossan 12 to 18 inches thick, with carbonate of copper, said to have given on assay 73 ozs. of silver per ton, and  $28\frac{1}{2}$  per cent. of copper. In the same locality are several other lodes. One is an ironstone breccia lode 18 inches wide, and an assay of a sample of it gave no silver. Another lode (Hawson and Collins') is 6 to 15 inches wide, dipping E.  $5^{\circ}$  S. at  $70^{\circ}$  in hard chlorite rock, and has been opened to a depth of 8 feet. It consists of soft ferruginous brown rubble containing a little chloride of silver. An average sample of the lode-stuff gave on assay at the rate of 28 ozs.  $19\frac{1}{2}$  dwts. of silver to the ton, with a trace of gold. The schist rocks in this district are highly metamorphosed, and traversed by large quartz reefs and dykes of granite and diorite.

About 1 mile S.W. from Piesse Nob is Hetherington's lode, which crops out in places at the surface for about 200 yards along its strike, E.  $30^{\circ}$  N. It is from 3 to 12 inches wide, and consists of quartz and ironstone, with silicate and carbonate of copper and chlorite; it probably contains silver. Two miles further in the same direction, in portion 15, Messrs. G. F. Smith and Brown are working a galena lode. It dips W.  $20^{\circ}$  N. at  $55^{\circ}$  in garnetiferous mica-schist, and consists of granular quartz with galena in masses 3 inches thick through it. It had been opened for about 10 feet along the surface, and to a depth of 10 feet. An average sample of the quartz and galena mixed gave at the rate of 26 ozs.  $2\frac{1}{2}$  dwts. of silver per ton and 40-20 per cent. of lead; but the galena, if concentrated, would of course give higher results. The lode has been opened again in the adjoining portion 14 (White and Foley's), where it is from 12 to 18 inches thick, with patches of galena 12 inches thick, and followed on the surface for about 90 feet. The schists are stained with green carbonate of copper, and on the S.E. side of the lode are traversed by large quartz reefs;  $7\frac{1}{2}$  tons of galena are said to have been sent away from the mine. Beyond this, in a south-westerly direction, several similar lenticular lodes up to 2 feet wide have been traced in A. Kennedy's mineral conditional purchase, and also in the next portion of D. Mackintyre's. They consist of gossan, with galena and carbonates of lead and copper. Further on in the same direction Mr. Mackintyre is opening a lode in portion 16, and also in portion 3. In the former the lode, which dips N.W. at  $75^{\circ}$  with the schist rocks, is from 1 to 5 feet thick, composed of porous gossan and quartz with galena and carbonate of lead; the galena occurs in bunchy veins from 2 to 6 inches thick. The shaft is 35 feet deep. In portion 3 the lode somewhat resembles the last, and is from 3 to 4 feet wide; it has been opened to a depth of 8 feet. Mr. Mackintyre gave me a fine specimen for the Museum, showing the characteristic mode of occurrence of the veins of galena in quartz.

In portion 7, at the Round Hill, Messrs. Hawson and Collins have a similar lode. It crops out in the side of a steep hill, and where it has been opened it is from 4 to 6 feet wide; but about 25 yards from this, on either side, the outcrop is only 1 foot wide. It dips W.  $35^{\circ}$  N. at  $50^{\circ}$ , and consists of ferruginous quartzose rock, with patches of galena and carbonates of lead and copper. An average sample, taken across the whole width of the lode, gave an assay at the rate of only 4 ozs.  $9\frac{1}{2}$  dwts. of silver per ton and 5.75 per cent. of lead, which shows that the quartz and gossan matrix is poor in silver; but it is probable that the patches of lead ore disseminated through it will contain silver in payable quantity.

To the west of this, in portion 18 (Messrs. Hawson and Collins,) is a large lode of quartz and greisen from 10 to 20 feet wide, cropping out above the surface for a length of about 200 feet, and coated in patches with green carbonate of copper; it has not been opened. From the surface indications it evidently does not contain copper ore in sufficient quantity to be workable for copper, but it should be prospected for silver. It occurs in altered schists and strikes N.E. and S.W. About 100 yards from it to the S.E. there are large quartz reefs and a dyke of diorite.

About 3 miles to the south-west is the Broken Hill, so called from the rugged outline of its rocky summit. This hill is the highest point on a narrow ridge which runs N.E. and S.W. for several miles

miles and forms a conspicuous feature in the district, rising for about 150 feet above the general level of the undulating plain country on each side. The crest of the ridge is formed by the outcropping of a huge lode. The lode varies in width from 10 to 120 feet, and in places rises above the surface in large craggy black masses. It changes in character every few feet, and consists of ferruginous quartzite, quartz, greisen, felspar, porous brown iron ore or gossan, and oxide of manganese (*pyrolusite*), with patches and veins of crystallized carbonate of lead (*cerusite*); the occasional black colour of the mass is due to the manganese oxide. Two shafts, one 52 feet deep and the other 50 feet and about 30 chains apart, have been sunk into the lode, as well as two smaller shafts between these. I did not see any galena in the stuff raised, but I was informed that a little had been obtained; and as the *cerusite* has evidently crystallized from a solution of lead derived from the decomposition of galena, I believe that masses and veins of galena will be found disseminated through the lode, as in the case of the smaller lodes near the Round Hill on the north-east and the Pinnacles on the south-west, which are probably the continuation of this one. A sample of porous gossan from near the surface gave on assay at the rate of 3 ozs. 5 dwts. of silver per ton, with a trace of lead, and two samples, one taken from a vein 18 inches thick of large crystals of *cerusite* and another of a finely crystalline mass of *cerusite* from the north shaft on a different part of the lode, gave on assay respectively 1 oz. 12½ dwts. of silver and 73.23 per cent. of lead, and 1 oz. 12½ dwts. of silver and 74.87 per cent. of lead. These results cannot be taken as indicative of the argentiferous nature of the lode, for the galena from which the *cerusite* has been derived may have been rich in silver, and yet the silver may not have entered into the solution from which the crystals of *cerusite* were formed. Therefore, the richer silver ore will probably be found in association with the undecomposed sulphides of lead, silver, and in the oxidised portions of the lode which originally contained the sulphides. Mr. George M'Culloch, of Mount Gipps, showed me the results of assays of twenty-six various samples of the ore taken from different parts of the lode, which gave at the rate of from 4 to 45 ozs. of silver to the ton, and 10 to 70 per cent. of lead, or an average of 14 ozs. 17 dwts. of silver to the ton and 46 per cent. of lead. Further prospecting will, I am of opinion, prove this to be a valuable argentiferous lead lode. It appears to dip with the strata, about N. 40° W. at 50°, and on the N.W. side sends off several branches; about 10 chains from it there is a large dyke of diorite. It is remarkable that no gold has yet been found in the vicinity of these intrusions of diorite.

The Pinnacles lodes are situated about 15 miles S.E. from Silverton. There are two main lodes, one of them, the Minnie Moore, has a general strike to the north-west for about 10 chains. In one shaft, 7 feet deep, the lode is seen to be from 3 feet 6 inches to 4 feet wide, dipping W. 30° S. at 70° in talcose mica-schist and consisting of ferruginous crystalline quartzite with galena interspersed here and there through it and patches of yellow gossan. An average sample taken from the whole width of the lode gave on assay at the rate of 78 ozs. 8 dwts. of silver per ton and 32.40 per cent. of lead; and of the yellow gossan, 22 ozs. 1 dwt. of silver per ton and 3.0 per cent. of lead, with traces (under 2 dwts.) of gold. The hanging wall is ferruginous chlorite rock. The lode winds about, and in one place suddenly widens to 30 feet; in two places it divides for a few yards and unites again, in others it sends off branches which thin out entirely. Within 4 chains of it on the N.E. side, two other smaller lodes crop out. About 5 chains to the south-west is a mass of ironstone 12 feet wide in the middle, then thinning out within a length of 50 feet. This forms the end of the Charlotte Greenway lode, which runs to the S.W. for about 10 chains, with a widening course like the lode just mentioned, and varying in width from 2 feet to 36 feet. It also consists of ferruginous quartzite containing patches of galena. From the S.E. side there is a branch lode, 25 feet long and 4 feet wide, with galena; and 50 feet off, on the N.W. side, is a separate and nearly parallel lode about 6 chains long, and varying in thickness up to 20 feet, with galena irregularly distributed through it. A sample of the ore which I took from near the surface, and consisting chiefly of galena, yielded on assay at the rate of 53 ozs., 1½ dwt. of silver per ton, and 41.12 per cent. of lead, with traces of gold. Messrs. Moore and Russell informed me that twelve assays which had been made for them of samples from these lodes gave at the rate of from 16 ozs. 6 dwts. 16 grs. to 583 ozs. 2 dwts., averaging 137 ozs. of silver per ton; and another assay gave 1,504 ozs. 6 dwts. of silver per ton. It will be seen that these lodes are of large size, and I consider that they will be permanent. They have only been prospected to a depth of about 7 feet. I did not notice any chloride of silver, but it is probably present in the oxidized portion of the lode. The chief silver-bearing ore is the galena, which occurs in patches and grains here and there, and much of it can only be separated from the hard lode-stuff by crushing and concentration. With careful working I think that considerable quantities of payable ore could be raised.

About 1 mile N.N.E. from these lodes is the middle hill of the three Pinnacles, which are remarkable conical hills rising about 250 feet above the level of the adjacent country. It consists of a mass of laminated ferruginous hard quartzite, of a metalliferous appearance, but I did not see any ore other than of iron in it. At the base of the hill are soft calcareous talcose mica-schists, which strike about N. 35° W., and are traversed by dykes of garnetiferous pegmatite granite and diorite, quartz reefs, and small lodes of quartzite resembling the rock in the Pinnacles lodes. Most of this country has been pegged out and is being prospected.

From

From here to Silverton and thence to Thackaringa, the same schistose rocks with garnetiferous granite, diorite, and quartz reefs, continue, forming gently undulating country, and in places rough rocky hills, some of which are from 200 to 250 feet high.

At Thackaringa, within a radius of 4 miles, upwards of thirty silver-bearing lodes have been discovered; of these I examined twenty-two. As they are nearly all of the same nature, viz., lenticular lodes of gossan, with carbonate of lead and galena, I need only describe a few, showing their characteristic features.

On the Gipsy Girl Company's property, the No. 1 lode, which has been opened to a depth of 20 feet, following the underlay from the surface, and also in a shaft 40 feet deep, varies from 6 inches to 3 feet thick, and consists of carbonate of lead and galena, accompanied by quartz and ironstone stained with carbonate of copper. It dips N. 20° W. at 30°, traversing mica-schist, and is in one place divided by a horse of granite. It appears on the surface for about 7 chains, then a small ferruginous quartz and galena vein comes in, dipping E. 10° S. at 35°. The Manager, Mr. J. H. Ellis, informed me that the ore yields about 50 ozs. of silver per ton, and 72 per cent. of lead.

No. 2 lode consists of from 4 to 14 inches of galena, with 2 feet of iron ore and quartz beneath it. It dips N. to N. 20° E. at 13° in altered sandstone and schist, intersected by numerous quartz veins, and containing carbonate of copper. An assay of a sample of the iron ore underlying the galena gave at the rate of 4 ozs. 18 dwts. of silver per ton, 14.87 per cent. of copper and a trace of gold. The shaft is 12 feet deep. Six chains to the west the same lode dips N. 20° E. at 47° showing galena in quartz. In places the galena is very finely crystallized, and in others it occurs in large cubical crystals up to 1 inch or more in diameter. An assay of a sample of the former gave at the rate of 53 ozs. 1½ dwts. of silver per ton and 81.20 per cent. of lead; and the coarsely crystalline galena 59 ozs. 12 dwts. of silver and 83.90 per cent. of lead.

The lode in the adjoining Goat Hill Mine (Messrs. Ellis & Owen's) is of variable thickness up to 5 feet, and consists of gossan with galena and carbonate of lead irregularly veined through it; it also contains carbonate of copper and iron pyrites. The water level has been struck at a depth of 72 feet on the underlay, which is E. 20° N. at 60°. Five chains southerly is another shaft, 38 feet deep; the lode is of the same character, and from 1 foot to 2 feet 6 inches wide, in mica-schist, but with a granite dyke on the upper, or hanging wall side. About 6 chains to the east is another similar lenticular gossan and galena lode, from 6 to 18 inches thick, dipping E. 10° S. at 70° in mica-schist.

At the Hercules Mine (Campbell's) the lode is from 12 to 18 inches thick, consisting of ironstone, carbonate of lead, and galena. It has well-defined walls dipping easterly at about 55°, and the rock in which it occurs differs from the general country rock of this district, being a hard hornblendic mica-schist, containing veins of calcite and quartz with garnets. A shaft has been sunk upon it 80 feet deep. The ore is said to yield from 40 to 80 ozs. of silver to the ton and from 50 to 70 per cent. of lead. Another lode which is being prospected on the same property is 10 inches thick, with lenticular patches of galena 3 inches thick; it dips E. 15° N. at 30° in mica-schist and hard altered sandstone. A short distance to the south-west, in portion 11, a lode 4 feet thick of ironstone and quartz, containing galena 1 foot thick, has been opened to a depth of 6 feet in mica-schist. It is seen again about 100 yards to the N.W. The same lode also shows 2 feet thick, maintaining the same dip, E. 30° N. at 20°, near the N.E. corner of portion 10; and 5 chains further, N. 10° E., is another outcrop 3 feet 6 inches thick of galena, quartz, and ironstone, stained with green carbonate of copper; it dips E. at an angle of about 30°. North of this is the Nevada lode, which dips E. at 45° in one place, where it is 1 foot 10 inches thick, and then its outcrop turns round to the N.W. It also consists of galena, quartz, and gossan, with carbonate of copper.

In the Pioneer Company's ground a lode 2 feet thick, with bunches of galena, carbonate of lead, and ironstone stained with green carbonate of copper, has been opened for a length of 20 yards, and 6 feet deep; and from it the Manager, Mr. T. Rosewall, informed me that he had taken about 100 tons of ore; it dips E. 20° S. at 17°. Seven other lodes, from 3 inches up to 6 feet wide, have been worked in the same property. In one of them a vein of galena from 2 to 9 inches thick is continuous as far as it has been sunk upon for 8 feet; otherwise the galena occurs generally in lenticular masses, as may be well seen in another lode which has been opened to a depth of about 8 feet in the N.E. corner of portion 6. Within a distance of 10 feet the lode varies from 12 inches to 6 feet thick. It dips E. 35° N. at 33° in mica-schist, and consists chiefly of compact and porous brown iron ore with cavities lined with crystals of specular iron, quartz in veins and patches, and lenticular masses of galena; it also contains a little carbonate of copper. I have made a sketch (see figure 4) of this lode, as it illustrates the general character of most of the lodes in the district, viz., not only the variable thickness of the lodes, but the patchy manner in which the argentiferous lead ore and quartz occur in them. The outcrop of this lode can be seen for about 4 chains. The greatest depth to which the lodes have been worked is only 30 feet. About 700 tons of ore are reported to have been raised during the past twelve months from the Pioneer lodes.

The Exhibition lode in portion 32 is 1 foot 10 inches thick, with small bunches of carbonate of lead, galena, and quartz in mica-schist, stained with green carbonate of copper; it dips N.W. at  $40^\circ$ , and has only been sunk into 4 feet. I append a sketch of the section of the lode, as it shows well the usual mode of occurrence of the lenticular masses of ore (see figure 5).

The Bonanza lode in portion 35 varies from 1 foot 8 inches to 3 feet in thickness, and is composed of spongy gossan with carbonate of lead and galena, the latter in solid pieces 6 inches thick; it dips N.E. at  $20^\circ$ . Three small shafts have been sunk, and from them the lode has been worked on its underlay; about 120 tons of ore have been raised. The country is mica-schist, with dykes of granite and diorite.

Near this is the Comstock lode, which dips S.E. at  $50^\circ$ , with quartz on the hanging-wall and galena up to 3 feet thick in bunches in gossan. It traverses mica-schist, the vertical cleavage of which strikes E.  $10^\circ$  N. Two shafts, each about 20 feet deep, have been sunk 25 feet apart; 56 tons of ore are said to have been sent away.

I understand that galena was discovered at Thackaringa about eight years ago, but it is only within the last two years, and chiefly during the last year, that much attention has been given to the lodes. The search for other lodes consequent upon the development of these, led to the discovery of the silver lodes in the Silverton district. I am indebted to Mr. J. H. Ellis for particulars as to the approximate quantity of ore that has been raised from the various mines at Thackaringa, and which amounts to about 2,036 tons. I believe that the lodes already discovered here are at once capable of an annual output of at least 20,000 tons of argentiferous galena, but at present there are only about fifty miners at work in this part of the district.

About 60 miles north of Silverton and 9 miles from Corona Station several iron and manganese lodes have been lately discovered. From one of them I collected an average sample of ore which yielded at the rate of only 1 oz.  $12\frac{1}{2}$  dwts. of silver per ton. The country here consists of clay-slates and altered sandstones, dipping E.  $10^\circ$ , N. at  $45^\circ$ , and traversed in a meridional direction by large and small lenticular quartz veins containing brown iron ore and manganese oxide. About 3 miles further north there is a large mass of quartzite cropping out above the surface for 100 feet in width and 3 chains in length; on the east side of it is a belt of yellow limestone which in places passes into a network of quartz veins. I did not see here any mica-schist or dykes of granite which, as before stated, are always present in the vicinity of the silver and lead lodes in the Silverton district; but within a few miles to the east the granite and altered mica-schists appear, and it is probable that in this locality silver-bearing and other metalliferous lodes, inclusive of gold, will be found. A sample of an ironstone vein cropping out alongside the road 5 miles south from Corona yielded an assay at the rate of 3 ozs. 5 dwts. of silver per ton and a trace of gold. Half a mile to the east of the Mount Brown Road and 9 miles north of Corona a copper lode has been prospected to a depth of about 40 feet; it is from 1 to 2 feet wide, vertical, in mica-schist, and strikes N.  $35^\circ$  E; it contains green carbonate and red oxide of copper, but not in sufficient quantity to be workable for copper. An average sample of the ore gave an assay at the rate of 4 ozs.  $12\frac{1}{2}$  dwts. of silver and 3 dwts. of gold per ton, and 24.55 per cent. of copper. Between this and Corona Station several large ironstone and manganese lodes crop out, some of which may be the caps of copper lodes. About 1 mile west from Corona there is an immense outcrop of brown iron ore 4 chains long, and about 2 chains across in the widest part; it rises about 30 feet above the surface. An assay of this ore gave at the rate of 1 oz.  $12\frac{1}{2}$  dwts. of silver per ton and a trace of gold. On the east side of it is a belt about 20 chains wide of yellow limestone, and in places along the margin of this, in a southerly direction, smaller lodes of ironstone crop out.

Between Corona and the head station of Poolamacca (Mr. K. Brodribb's), there are numerous quartz reefs, some of them containing brown iron ore, and near the station are two short reefs of quartz showing gossan, galena, and copper ore, but an assay of this gave only at the rate of 8 ozs. 3 dwts. of silver to the ton and a trace of gold. The country here consists of mica-schists, clay-slates, flagstones, limestones, and conglomerates, traversed by quartz reefs and dykes of diorite and granite containing garnets, black tourmaline and chlorite. With the exception of the limestones, the formations are similar to those of the silver-bearing country near Silverton. About 14 miles S.S.E. from Poolamacca, on the road to Mount Gipps, a massive dyke of ferruginous quartzite crops out above the surface, striking S.  $10^\circ$  E., at intervals for several miles. This should be examined for silver and gold-bearing gossan deposits.

Sixteen miles N.E. from Poolamacca, and near the Euriorie Gap, the schist rocks are traversed by large masses and dykes of pegmatite granite. In one of these dykes, from 1 to 5 feet wide, Messrs. R. Hodgson and J. March have found tin ore. The ore occurs in detached crystals through the granite, which consists for the most part of white pearly mica with quartz and a little orthoclase felspar. The prospecting shaft is 7 feet deep. The lode or dyke dips E.  $35^\circ$  N. at  $75^\circ$ , and can be traced for about 10 chains, but only showing tin ore in a few places. About 60 chains N.  $10^\circ$  E. from here a similar

micaceous

micaceous tin-bearing lode has been opened by Messrs. T. Murray and W. Brooks. It strikes about N. 30° W. with a winding course for 15 chains, and varies in thickness from 1 to 6 feet; the tin ore appears to be only in patches in it. Within 6 chains west are two smaller lodes of the same character. One of them has been sunk upon to a depth of 10 feet. It dips E. 35° N. at 85°, and is 3 feet 3 inches thick; the tin ore in black crystals occurs chiefly near the hanging wall. In the schist and 18 inches from the foot wall there is a vein 4 inches thick of ferruginous *graphite*.

This locality deserves further prospecting, for I have no doubt that other deposits of tin occur in some of the numerous granite dykes. At present I do not think that sufficient ore could be raised to warrant the erection of a crushing plant. The country is favourable also for the occurrence of silver and other metalliferous lodes.

I have examined eighty-one lodes, and there a few others, the Day Dawn, Ophir, Black Prince, &c., that I did not see; but those above described include all the principal ones, and from them it will be seen—

1. That the geological formations which contain the argentiferous lodes of the Barrier Range Silver-field are mica-schists, clay-slates and sandstones, traversed by numerous quartz reefs and intrusive masses and dykes of coarsely crystalline granite (pegmatite), and diorite. Nearly all the lodes occur in the mica-schists, and they have been found over a tract of country 70 miles long and 30 miles wide, which has been only partly prospected, so that many more lodes will probably be discovered. But the metalliferous formations are known to occupy a much larger area, and extend to Kooringbury on the north, and on the east as far as the Eight-mile Tank on the road to Silverton, about 38 miles from Wilcannia, as shown on the accompanying map, in the preparation of which I am indebted to Mr. Maurice Barlow, the District Surveyor, for many important particulars.
2. That the lodes, with the exception of those of the Broken Hill and Pinnacles, which are chiefly composed of ferruginous quartzite, all consist either of brown iron ore (gossan) containing argentiferous carbonate of lead and galena in bunches, and sometimes chloride and chlorobromide of silver, and carbonate of copper; or rarely of argentiferous carbonate of lead and galena alone; quartz is sometimes though not always present, and in one instance baryta occurs. It is evident that the oxides, carbonates and chlorides have resulted from the decomposition of the sulphides, and perhaps arsenides of iron, lead, silver, and copper, &c., which will be met with in their original condition below the water level. Sulphide of lead (galena), and in two instances iron pyrites, are even found above the water level. I did not notice any distinct sulphide of silver, iodide of silver, or antimonial ores in the lodes; however, I have collected certain samples of ore for analysis, but they have not yet reached Sydney. Mr. J. Cosmo Newbery, C.M.G., Superintendent of the Technological Museum, Melbourne, reports having found "chloride, bromide, and iodide of silver, with brown iron ore, carbonate and sulphide of lead, oxide and sulphide of antimony, and traces of bismuth" in the ore from the Christmas mine. It is stated that 12 cwt. of this ore treated at the Victorian Pyrites Smelting Company's works yielded 2,575 ozs. of silver. In one mine the water level has been reached at a depth of 133 feet, in another at 72 feet, but no lode has been mined below the water level.
3. That the lodes, without exception, are very inconstant in thickness, both in longitudinal and vertical extent, and many of them thin out entirely within a few yards. A surface plan of the numerous lodes would resemble the shrinkage cracks upon the surface of a dried piece of cross-grained wood; in fact, as before mentioned, the lode-fissures were shrinkage cracks formed by the contraction of the rock mass after the intrusion of the igneous rocks.

Some of the lodes appear to have been formed along an original joint in the strata, which is indicated by a well-defined wall in the lodes; and these will, I believe, continue to great depths, though varying in thickness in places. There is therefore a probability that silver and lead mining in this district will be a permanent industry.

The question of water supply for the district is of paramount importance. Naturally there is no permanent surface water; but there are sandy alluvial flats in some of the larger valleys in which underground streams are likely to be found capable of affording a supply of fairly good water. Where the water circulates, as it must do in places, through the alluvial deposits, it will probably be of drinkable quality, though always a little brackish; but where it is stationary it will be too salt for use, so that it may be necessary to put down several shafts or bores across the alluvial flat before the lines of fresh water be struck. The principal localities where such water may be obtained, and where it will be most required, is at Silverton in the wide flat at the N.E. side of the town, the flats near Wilson and Purnamoota, Stephens Creek near the Mount Gipps Hotel on the main road to Wilcannia, the creek near the Pinnacles,

Pinnacles,

Pinnacles, and in another creek on the N.E. side of Round Hill. The supply, however, from the drifts near Wilson and Purnamoota may not be permanent, as the drainage areas of the valleys are not large. The Thackaringa mines are situated amongst rocky hills and short gullies. At the Thackaringa sheep station a well has been sunk 236 feet deep, where a gully opens out on to the great plains, but only a small supply of good water was obtained. Therefore a permanent supply for these mines must be secured by making a large and deep tank to conserve the rain-water, or by sinking a well from 300 to 400 feet deep on the plains, 5 miles west from the mines. Large tanks should also be made at Silverton and in the other localities above named, for they would be more convenient than wells, and the water in them will be of a fresher quality. Though the average rainfall of the district, according to the returns of Mr. Russell, Government Astronomer, is only 9·4 inches, yet it is sufficient to fill the largest tank. In the channel of one of the creeks I observed flood-marks 12 feet above the level of its sandy bed, and where the channel is about 150 yards wide. Mr. Barlow, the District Surveyor, told me that the rain which fell in June, for a short time flooded the low-lying part of the town at Silverton. Elsewhere I also saw evidence of the large quantity of water that must at times flow rapidly off the surface. I believe that artesian water would be obtained by boring into the cretaceous formation underlying the great salt-bush plain between the Barrier Range and the South Australian border, and within 30 miles N.N.W. from Silverton. Mr. Brodribb, of Poolamacca, is sinking a well in this locality; it is now down 280 feet, and some fair stock water has been met with, but at a greater depth a strong supply of good water will doubtless be struck.

Timber for mining purposes is very scarce in the district, and will soon have to be imported. The nearest place whence it can be procured is the country bordering the Darling River.

The next important question affecting the development of the lodes is the means of transit of the ore to smelting works. A crushing plant is now being erected at Silverton by Mr. Thompson, and it will be a great boon to miners in enabling them to have large parcels of ore accurately sampled for assay and valuation. But the ore generally contains a large proportion of lead, and therefore it will require to be smelted, and this cannot be conveniently done on the field, owing to the scarcity of suitable fuel. At present it is carried a distance of from 298 to 330 miles, at a cost of £5 per ton, to Adelaide, for shipment to England or Europe; whereas if a line of railway were constructed from Silverton to Menindie, a distance of only 76 miles, it is obvious that the ore would eventually be sent there for treatment, seeing that there is abundance of timber of the best description for fuel near the Darling in the Menindie district; and with ore, fuel, and water available, there is no doubt that smelting works would soon be established. Timber for the mines could also be supplied from here at a much less cost than from Adelaide. The reduced lead and silver, &c., could then either be sent to Sydney, or *via* the Darling to South Australia or Victoria. But which ever way the production of the metals be transmitted to market, it is evident that the construction of a light line of railway from Silverton to Menindie would not only be one of the chief means of promoting the development of this mining field, by lessening the cost of treatment of the ore and affording facilities for quick returns by the smelting being carried out so near to the mines; but also the improvements which would consequently be made in the locality would materially increase its value, and the new industry which would arise would be retained in the district, to the great advantage of the Colony. Should coal or coke at any time be required, it could probably be supplied from Dubbo, for I am of opinion that workable seams of coal will be found near Dubbo, and when the proposed line of railway is constructed to Wilcannia, coal could be conveyed there by rail and thence shipped down the Darling to Menindie.

The geological features of the country, outside of this mining district, that I travelled over from Hay *via* Wilcannia to Silverton, I will describe in another report.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

**MORNING STAR EXTENDED QUARTZ CLAIM.**  
(PAPERS, REPORTS, &c.)

*Ordered by the Legislative Assembly to be printed, 30 July, 1884.*

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated 5th March, 1884, That there be laid upon the Table of this House,—

“Copies of all papers, reports, applications, letters, declaration, and documents in connection with the application to lease by Heffernan and Marshall a certain area of land known as the ‘Morning Star Extended Quartz Claim,’ a portion of the Morning Star Gold-mining Company’s property.”

(Mr. Vaughn.)

SCHEDULE.

NO.	PAGE.
1. Notice of intention to apply for a gold-mining lease of 5 acres of land at Sebastopol, near Temora, by Messrs. Heffernan and Marshall .....	2
2. Application, No. 83-21, for gold-mining lease of 5 acres of land at Sebastopol, near Temora, by Messrs. Heffernan and Marshall, and Warden's Clerk's report thereon. 17 October, 1883 .....	2
3. Notice of application, and deposit of first year's rent in advance, by Messrs. Heffernan and Marshall. 17 October, 1883 .....	3
4. Notice to make survey of application No. 83-21, at Sebastopol .....	3
5. Messrs. Davidson and party to the Under Secretary for Mines, objecting to the application to lease of Messrs. Heffernan and Marshall, and enclosing copies of objections lodged with the Warden, Temora, with minutes. 2 November, 1883 .....	3
6. Mr. Warden Baker to the Under Secretary for Mines, reporting on gold-mining lease application No. 83-21, at Temora, by Messrs. Heffernan and Marshall, and enclosing copy of inquiry into same, held at Court-house, Temora, on the 6th November, 1883, with minutes. 12 November, 1883 .....	3
7. Mr. Thomas Davidson to the Secretary for Mines, objecting to the granting of a lease to Messrs. Heffernan and Marshall, &c. 13 November, 1883 .....	6
8. Messrs. N. G. Latimer and J. H. Davidson to the Secretary for Mines to the same effect, with minutes. 14 November, 1883 .....	6
9. Mr. T. C. Symons to the Secretary for Mines, enclosing three statutory declarations objecting to the proposed lease, and asking for an interview to explain matters, with minutes. 26 November, 1883 .....	6
10. Messrs. Heffernan and Marshall to the Secretary for Mines, asking that the application to lease may be taken into favourable consideration at earliest convenience. 7 December, 1883 .....	8
11. Mr. Thomas Symons to the Secretary for Mines, further respecting objections to issue of lease to Messrs. Heffernan and Marshall, &c., with minutes. 19 December, 1883 .....	8
12. Memo. of the Mining Registrar, Temora, as to transfer of Morning Star Extended Quartz Claim, Sebastopol, to Mr. P. Heffernan, with minutes. 14 January, 1884 .....	9
13. Mr. H. Margules to the Secretary for Mines, asking what has been done in the matter of the lease. 16 January, 1884 .....	9
14. The Under Secretary for Mines to Mr. T. C. Symons, in reply to No. 11. 23 January, 1884 .....	9
15. Mr. H. Margules to the Secretary for Mines, further respecting objections to the issue of lease to Messrs. Heffernan and Marshall, and asking for an interview with respect thereto, with minutes. 28 January, 1884 .....	9
16. The same to the same, asking what a certificate of transfer of the Mining Registrar at Temora purports to be, with minutes. 29 January, 1884 .....	10
17. The Under Secretary for Mines to Mr. H. Margules, in reply to No. 15. 7 February, 1884 .....	10
18. The same to the same, in reply to No. 16. 7 February, 1884 .....	10
19. Mr. H. Margules to the Secretary for Mines, asking for a reconsideration of the matter and for an interview, with minute. 8 February, 1884 .....	10
20. Mr. H. Margules to the Under Secretary for Mines—transfer of the land to Mr. P. Heffernan appears quite illegal, &c., with minutes. 8 February, 1884 .....	11
21. The Under Secretary for Mines to Mr. H. Margules, acknowledging receipt of No. 19. 13 February, 1884 .....	11
22. Mr. Mining Surveyor Jonathan Seaver to the Chief Mining Surveyor, transmitting plan of portion of land containing 5 acres 1 rood 4 perches, numbered G.L. 205, parish of Sebastopol, applied for as a gold lease by Messrs. Heffernan and Marshall, with minutes. 15 February, 1884 .....	11
23. Mr. H. Margules to the Secretary for Mines, asking for reply to his letter of 8th instant, No. 19, with minute. 18 February, 1884 .....	11
24. The Under Secretary for Mines to Mr. H. Margules, in reply to above. 25 February, 1884 .....	12
25. The Under Secretary for Mines to Messrs. Heffernan and Marshall, informing them that the area measured is 1 rood 4 perches in excess of that applied for, and asking them to forward one pound (£1), being first year's rent on the additional area. 27 February, 1884 .....	12

## MORNING STAR EXTENDED QUARTZ CLAIM.

### No. 1.

#### Notice of intention to apply for a Gold-mining Lease.

Gold-mining Lease Regulations.—Schedule 1.

NOTICE is hereby given, that the undermentioned persons intend applying for a gold-mining lease of 5 acres of land, situated at Sebastopol, near Temora, and adjoining Heffernan and party's 4-acre lease.

Possession of the said land was taken by erecting posts and cutting trenches at each angle thereof, on the 12th day of October, 1883, at the hour of ten minutes past 12 o'clock in the forenoon, and the datum post is distant about 150 yards in an easterly direction from the north-east corner of John Lee's conditional purchase, portion 13.

Application for the said lease will be lodged with the Warden at Temora, on the 16th day of October, 1883.

Dated at Temora, this 12th day of

PATRICK HEFFERNAN, of Sebastopol.  
WILLIAM MARSHALL, of Melbourne.

### No. 2.

#### Application for Gold-mining Lease by Messrs. Heffernan and Marshall.

Gold-mining Lease Regulations.—Schedule 2.

Application for Gold-mining Leases.

To the Honorable the Secretary for Mines, Sydney,—

Sir,

Temora, 17 October, 1883.

We hereby make application for a gold-mining lease of that piece or parcel of land situated at Sebastopol, near Temora, adjoining Heffernan and party's 4-acre lease, containing 5 acres, of which we took possession on the 12th day of October, 1883, at the hour of ten minutes past 12 o'clock in the forenoon, for the purpose of mining thereon and therein for gold, for a period of 15 years, by erecting posts and cutting trenches at each angle thereof. The datum post is distant about 150 yards in an easterly direction from the north-east corner of John Lee's conditional purchase, portion 13.

Notice of our intention to make this application has been given in accordance with the regulations in that behalf. We hand herewith the sum of £5, being the first year's rent in advance of the said land, and the sum of £2 to cover the cost of survey; and we hereby request that survey may forthwith be made of the said piece or parcel of land.

We hereby acknowledge that this application is made upon the distinct understanding and condition that if we shall abandon or fail to proceed with it, or if it is refused, the Secretary of Mines for the time being may deduct from the sum of £5 deposited as aforesaid any cost to which in his opinion the Crown may have been put in or about or in respect of this application, and this application shall thereupon become and be void, and the possession aforesaid shall cease and determine. And if the lease shall be granted we shall and will commence mining operations upon or in connection with the demised land within fourteen days from and after the granting thereof, and shall and will employ upon such land not less than three men during the first twelve months of the term thereby created, and not less than six men during the remainder of such term. And shall and will at any time when called upon in terms of the regulations relating to gold-mining leases, to do so, execute, and take delivery of such lease, or failing therein for a period of fourteen days, after being so called upon we shall and will forfeit the said sum of £5, and all right, title, or interest in and to the said land and the possession thereof, and the said lease shall be forthwith cancelled.

We have, &c.,

WILLIAM MARSHALL, of Melbourne,  
Miner's Right, 22 January, 1883, No. 144.  
PATRICK HEFFERNAN, of Sebastopol,  
Miner's Right, 1 January, 1883, No. 522.

Witness,—

W. P. DE BOOS,  
Solicitor, Temora.

This application was received by me, this 17th day of October, 1883, at the hour of 11 o'clock in the forenoon, and is numbered 21,—

R. ZOUCHE,  
Warden's Clerk.

#### Application No. 21, at Temora, for a Gold-mining Lease.

1. By whom application was received—Reginald Zouch, Warden's Clerk, Temora. 2. At what place—Temora. 3. Date and hour when received—17th October, 1883, 11 o'clock a.m. 4. Receipt for first year's rent, No. 21; date, 17th October, 1883. 5. To whom receipt was issued—William P. de Boos, solicitor for applicants. 6. Date when notice to survey was sent to surveyor—Attached to these papers. 7. Date when report and plan were received from the surveyor. 8. Names of objectors, and dates on which they lodged their objections—J. H. Davidson and N. G. Lattimer, October 29, 1883. Deposit receipt attached.—J.B. On 5th November, I received by post an objection by Thomas Davidson, son of the J. H. Davidson, an objector, and one of the Old Morning Star party; that objection is attached hereto for what it is worth.—J.B. 9. Date of inquiry—6th November, 1883. Proceedings report attached.—J.B. 10. Are the applicants holders of miners's rights? Yes. 11. Is the land applied for exempted from leasing under the 34th section of the Mining Act 1874? No. 12. Is the time proposed for commencing work reasonable? Yes. 13. Is the number of men proposed to be employed reasonable? Yes.

R. ZOUCHE,  
Warden's Clerk.

No. 3.

## Application by Messrs. Heffernan and Marshall.

Gold-mining Lease Regulations.—Schedule 6.

Sir,

Temora, 17 October, 1883.

We have the honor to inform you that we have this day deposited with the Warden's Clerk at Temora, the sum of £5, being the first year's rent in advance of 5 acres of land at Sebastopol, near Temora, adjoining Heffernan and party's 4-acre lease, for the purpose of gold-mining, and the sum of £2, being the fees for survey of the said land. The number of our application is twenty-one (21).

We have, &amp;c.,

WILLIAM MARSHALL.

PATRICK HEFFERNAN.

(By W. P. DE BOOS, their Attorney).

The Under Secretary for Mines.

No. 4.

## Notice to make survey.

Sir,

Warden's Office, Temora,

An application for a gold-mining lease, particulars as per margin, having been lodged in this office, I request you will be good enough to survey, in accordance with the regulations relating to gold-mining leases, the area so applied for, and to furnish me at your earliest convenience with a plan and report.

Your attention is particularly directed to the regulations for mineral leases, numbered respectively 2, 3, 12, 13, and 14 [or to the regulations relating to Gold-mining leases, numbered respectively 1, 2, 3, 4, 5, 14, and 15].

I have, &amp;c.,

R. ZOUCH,

Warden's Clerk, Temora.

No. 21,  
Sebastopol,  
adjoining Heffer-  
nan & party's  
4-acre lease,  
area, 5 acres.  
Wm Marshall,  
Melbourne, and  
Patrick Heffer-  
nan, Sebastopol.

No. 5.

## Messrs. Davidson and party to The Under Secretary for Mines.

Sir,

Sydney, 2 November, 1883.

Having by chance come upon a paragraph in the *Temora Star* newspaper, that Messrs. Heffernan and Marshall have applied for a gold-mining lease for the area known as the "Morning Star Extended Quartz Claim," at Sebastopol, in the district of Temora, we beg to draw your attention that such application ought not to be entertained, as we, being original owners of the said claim, admit of no such claim to Messrs. Heffernan and Marshall, who can show no title, or trace any forfeiture to us.

Copies of objections lodged with the Warden herewith enclosed.

We have, &amp;c.,

DAVIDSON &amp; PARTY.

See No. 6.

*Minutes on No. 5.*

Mr. Warden Baker, who will please ascertain whether the application made by Messrs. Heffernan and Marshall refers to the land known as the "Morning Star Claim," and if so, by whom the claim is now held.—H. W., B.C., 6/11/83. It will be seen by the papers transmitted herewith—relating to the application referred to, that said application is for the ground known as the "Morning Star Extended Claim," and that it is now held by and registered in the name of P. Heffernan.—JAMES BAKER, Warden, 12/10/83. The Under Secretary for Mines.

No. 6.

## Mr. Warden Baker to The Under Secretary for Mines.

Sir,

Warden's Office, Temora, 12 November, 1883.

Referring to gold-mining lease application, No. 21 of 83, at Temora, by Patrick Heffernan and Wm. Marshall, I do myself the honor to forward herewith the application referred to, together with all the papers in the case, including a letter (with its enclosure) dated 2nd November, 1883, to the Department, enclosing an objection against the granting of the lease, the said letter, &c., being numbered in the Department records 10,982, 5th November, 1883, and referred to me for report, and to report as follows:—

The application appears to have been made in due form and in accordance with the regulations.

The objectors have done nothing, and decline to do anything, to support their objections. This being so, I submit such objections do not deserve consideration. The objections, however, are, as they appear to me, worthless in themselves. Nos. 1 and 3 may be considered together. It is not the *Morning Star Claim*, but the financial position of the *Morning Star Company*, that is now a matter of investigation in the Insolvent Court. This matter the letter from Mr. De Boos, attached to the papers, fully explains. The *Morning Star Company* is insolvent, it owes a considerable amount of money, but it has no assets. Some time in May and June last several judgments were obtained in the Warden's Court, and all the property of the Company was sold under those judgments, Mr. P. Heffernan being the purchaser of the claim. The proceedings were perfectly regular, as far as I am able to discover; no objection was taken to them by the objectors or anyone else. The sale was by public auction, after several days' advertisement in the local papers, and open to all the world to purchase. Everything in the matter of the sale and the proceedings leading thereto appears to have been open, fair, and without the slightest taint of wrong-doing or collusion, nor is there anything of the kind even alleged. It does not appear, therefore, what the winding-up of the Company has to do with the application under consideration. If it be not wound up it is simply a Company without assets, its property having been sold; and being a no-liability Company, none of its shareholders are liable. The mere fact that the Company has such an existence, it is thought, cannot affect a perfectly legal sale of property previously held by it.

As

As to the second objection, there is nothing to show that any suit in Equity has been instituted, and I am fully convinced that no such suit is pending. It is quite possible that the objectors may be contemplating such a suit, but at present I think I am justified in saying no such suit exists. At any rate the applicants' solicitor has received no notice of it. I may here point out that the claim was purchased by Mr. Heffernan on the 6th June last, more than six months ago. Since that time the applicants have been pushing on the work with great vigour and at a heavy outlay; and if the objectors have any legal or equitable claim on the property, surely ere this they should have taken proceedings in the matter. I am unable, however, to discover that they have any such rights, either legal or equitable.

With great respect I submit and recommend that the application be favourably entertained and the lease granted, and that the applicants be allowed for their costs £3 3s. out of the £5 lodged by the objectors, and the balance returned to the objectors.

I should, I think, mention that Messrs. Heffernan and Marshall are both pushing and enterprising gentlemen, that they are expending large sums of money and a considerable amount of energy in opening out the mining industry of this district in an honorable and legitimate manner; and it would be a matter for regret, both on account of the gentlemen themselves, and for the injury it would do the district, if they were to be interfered with by reason of the frivolous and unsupported objections hereinbefore referred to.

I have, &c.,

JAMES BAKER,

Warden.

*Minutes on No. 6.*

The transfer appears to have been made by the Bailiff in virtue of an execution in a cause in which the plaintiff was Michael Culhane. The sale-note is in a cause in which the plaintiff was Thomas Kennedy. Will the Warden please explain?—H.W., B.C., 19/11/83.

For explanation please see Bailiff's explanation attached hereto. I may say that the Bailiff is a careful, painstaking, and an efficient officer.—J.B., B.C., 27/11/83.

Mr. Bailiff Davoren to The Warden.

Sir,

I beg to explain the cause of the discrepancy between the receipt for purchase money and transfer of Morning Star Claim, Sebastopol. The claim was sold on the 6th of June, when I immediately gave receipt for purchase money, and paid proceeds of sale into Court to the credit of several judgments then outstanding against the Company, so far as same would extend.

Mr. Heffernan, the purchaser, did not apply for a transfer until the 11th July (more than a month after time of sale), and by a mistake I used the name Michael Culhane in the transfer, he being the largest creditor of the Company, instead of Kennedy, who was the first judgment creditor.

I have, &c.,

JAMES DAVOREN.

The above is the Bailiff's explanation.—J.B.

Inquiry concerning Gold-mining Lease Application, No. 21 of 83, at Temora, before James Baker, Warden, at Court-house, Temora, on Tuesday, the 6th day of November, 1883.

Present: Patrick Heffernan, on behalf of himself and his co-applicant, Mr. William Marshall.—Applicants.

The applicants were also represented by Mr. W. P. de Boos, solicitor.

J. H. Davidson, N. G. Latimer.—Objectors.

Thomas Davidson also present, but his objection (attached hereto) was not received at Warden's office until about 4 p.m., on the 5th November, 1883. Moreover, the applicants had not been served with a copy of his objection.

Objectors hand in "receipt of objectors' deposit," dated 29 October, 1883 (attached).

Thomas Davidson, being duly sworn, saith as follows:—I claim an interest in the ground, and received no notice of the applicant's intention to apply for a gold-mining lease; also the ground was applied for improperly.

At this stage of the proceedings the objectors stated that they had been advised to give no evidence, and declined to do so, saying that they considered the objections lodged by them were sufficient in themselves.

Objectors are informed by me that the objections would not be likely to influence the Hon. the Minister for Mines, unless they are proven upon reasonable evidence, and urged the objectors to proceed, but they would not do so. Finding persuasion useless, I read the two first paragraphs on this page to them, asked them if they were correct, and they, the objectors, replied "Yes."

I then announced that I should forward the papers to the Department of Mines, and report that objectors declined to give any evidence. I did not call upon the applicants to give evidence, as the objectors had given them nothing to answer. Since then, however, the applicants' solicitor has sent me a letter by way of answer to the objections lodged. The sale-note of the Bailiff, showing that Mr. P. Heffernan purchased the claim in question, a certified copy of transfer to Mr. Heffernan of the said claim, as registered in the books of the Mining Registrar, and a statutory declaration declaring that the statements contained in the letter before-mentioned are true in every particular.

Temora, 12 November, 1883.

JAMES BAKER,

Warden.

Gold-mining Leases.

No. 4009.

Receipt of Objectors' Deposit.

In the matter of the application of the undermentioned persons for a lease under "The Mining Act 1874," and of objections thereto lodged by J. H. Davidson, N. G. Latimer, and party.

Received from the abovenamed persons (objectors) the sum of £5, pursuant to the provisions of the said Act,—

R. ZOUCH,

Warden's Clerk, Temora.

Dated 29 October, 1883.

Names and addresses of applicants—

William Marshall.

Patrick Heffernan.

Objection.

BESIDES the objections lodged already against the application of Heffernan and Marshall, for ground not properly specified, but which appears to be our ground, at Sebastopol, known as the "Morning Star," we further supplement them by the facts that we are the original owners of said area, have never admitted any claim of the said Heffernan and Marshall to such area, who can show no title or trace any forfeiture to us; and further, we received no notice of their intention, as prescribed by law.

THOMAS DAVIDSON,

2 November, 1883.

P.S.—Copy of this notice has been sent to the Honorable the Minister for Mines, Sydney.—T.D.

Received by post, 5 November, 1883.—J.B. The Warden's Clerk will be good enough to attach this paper to the lease application and papers referred to.—J.B., 5/11/83.

Form

## Form of objection to Gold-mining Lease.

We, the undersigned, shareholders in the Morning Star Gold-mining Company, Sebastopol (No Liability), do hereby object to the application of W. Marshall and P. Heffernan for their 5-acre lease, comprising the Morning Star Company's ground at Sebastopol, for the following reasons, viz. :—

1. The said claim being now a matter of investigation in the Insolvent Court at Sydney.
2. Pending an Equity suit in the Supreme Court of New South Wales.
3. Tho said Company never having been legally wound up.

J. H. DAVIDSON,  
N. G. LATIMER, & PARTY.

In the Warden's Court at Temora.

Thomas Kennedy, plaintiff. The Morning Star Gold-mining Company (No Liability), defendants.  
RECEIVED from P. Heffernan, Esq., the sum of £30, being the purchase money of the Morning Star Gold-mining Company's claim, Sebastopol, together with blacksmith's shop, store room, whim, anvil, vice, sold under an execution in this cause.  
Dated this 6th day of June, 1883.

JAMES DAVOREN,  
Bailiff of said Court.

## Mining Board Regulations,—Schedule 10.

(See Regulation 138.)

Transfer of any mining tenement, part thereof, or share therein.

I, JAMES DAVOREN, Bailiff of the Warden's Court at Temora, by virtue of an execution issued out of the said Court, in a cause wherein Michael Culhane was complainant and the Morning Star Gold-mining Company was defendant, and by virtue of a sale by public auction under said execution of the claim known and registered as the Morning Star Extended Quartz Claim, in consideration of the sum of £30, do hereby transfer to Patrick Heffernan, of Clear Hills, all my right, title, and interest in and to said claim, subject to all and singular the terms and conditions under which the said claim has been held by me. And I, Patrick Heffernan, of Clear Hills, do hereby accept the said transfer, subject to the terms and conditions aforesaid.

Dated at Temora, this 11th day of July, 1883.

	Miner's Right.	
	No.	Date.
Transferrer—James Davoren, Bailiff of Warden's Court, Temora.		
Transferee—P. Heffernan .....	522	1 Jan., 1883

The within transfer was registered by me, this 11th day of July, 1883, at the hour of 3 o'clock in the afternoon,—

R. ZOUCH,  
(Per JAMES DAVOREN),  
Deputy Mining Registrar.

Mr. W. P. de Boos to The Secretary for Mines.

Sir,

Temora, 8 November, 1883.

Re the application of William Marshall and Patrick Heffernan, for lease of 5 acres at Sebastopol.

I have the honor of drawing your attention to the following facts in connection with the above application, and objections entered herein.

On the 6th day of June last, Patrick Heffernan, one of the applicants herein, purchased from the Bailiff of the Warden's Court, Temora, the claim now applied for lease. (The original receipt for the purchase money is hereunto annexed), and obtained a transfer of the said claim in the books of the Mining Registrar.

On the 13th August, 1883, the shareholders of the Morning Star Gold-Mining Company, Sebastopol (No Liability), having no claims to work resolved to wind-up the said Company, and a petition to the Insolvent Court to wind-up was sent by the alleged manager.

Some of the shareholders objected to the winding-up of the Company on the ground that the petitioner in the matter was not the legal manager, and was not entitled to present the petition, as some other person was the legal manager.

The persons objecting in the Insolvent Court to the wind-up of the Company being the objectors to the lease.

As the dispute is between the objectors and the Company, I do not think that your decision will be prejudicial against the applicant, who bought by auction or bailiff's sale, got the transfer, and now seek to convert the same into lease.

Furthermore, that the objections entered to the lease, even if they had been sustained, should not affect the applicants for the above reasons.

There is no equity suit pending herein, as referred to in objection No. 2, otherwise, I, as solicitor for the Company, would be aware of it, neither has any notice of any suit whatever been given.

Objection No. 1 refers to the matter being under investigation in the Insolvent Court, the only investigation being the application to dissolve the Company as aforesaid.

I have the honor to request you to grant the lease herein, especially as the applicants are *bona fide* miners, and since purchasing the said claim have expended thereon over £400, and are at present erecting first-class machinery upon the same.

I also request that you will be pleased to give an early decision in this matter, as the applicants are going to great expense as above-mentioned.

I have, &c.,  
W. P. DE BOOS,  
Solicitor for the Applicants.

This is the letter, marked A, referred to in the annexed declaration of William Peter de Boos, taken at Temora, this 12th day of November, 1883, before me,—

JAMES BAKER,  
A Justice of the Peace.

I, WILLIAM PETER DE BOOS, of Temora, in the Colony of New South Wales, solicitor, do solemnly and sincerely declare as follows :—

The statements in the annexed letter and exhibit marked A are true in every particular to the best of my knowledge and belief. And I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled, "An Act to repeal an Act of the present Session of Parliament, intituled 'An Act for the more effectual abolition of Oaths and Affirmations taken and made in the various Departments of the Government of New South Wales, and to substitute Declarations in lieu thereof, and for the suppression of voluntary and extra-judicial Oaths and Affidavits.'"

W. P. DE BOOS.

Declared at Temora, this 12th day of }  
November, 1883, before me,— }  
JAMES BAKER,  
A Justice of the Peace.

## No. 7.

Mr. T. Davidson to The Secretary for Mines.

Sir,

Temora, 13 November, 1883.

With reference to Messrs. Marshall and Heffernan's application for a gold-mining lease at Sebastopol, in the district of Temora, I beg to draw your attention to the inaccurate and irregular and unlawful manner they, the applicants, made their application. The ground that they have applied for is the original Morning Star Extended Quartz Claim, and that claim constitutes part of the Morning Star Gold-mining Company (No Liability), and registered as such in Sydney, and I am a director to the above-named Company. Mr. Heffernan is one of the parties who applied to George Hibbert Deffell, Esq., Chief Commissioner in Insolvency Estates at Sydney, to have the above Company dissolved. He applied on the 4th day of October last, when the case was postponed until the 1st November instant, when the case came on for hearing, and the Chief Commissioner declined to dissolve the aforesaid Company, and gave me costs against the petitioner. I was objecting to the dissolution of the aforesaid Company. Therefore the applicants had a perfect knowledge when they made the application for the lease that I was claiming an interest in the area that they had applied for, they neglected to give me notice, as they were compelled to give me notice according to the 5th regulation of the Leasing Act; and they also should have endeavoured to get my consent in writing according to the above regulation, which they, the applicants, never did. It so appears, when the Chief Commissioner refused to grant the dissolution, that they applied for a gold-mining lease in an irregular manner.

If you should require any more information it could be obtained from his Honor the Chief Commissioner.

I hope you will not grant the lease to the applicants, as it would be a great injustice to me and many others, and would cause endless litigation.

I presume that no one can interfere with a No Liability Company without an order from the Chief Commissioner at Sydney, and a mere execution under the Mining Act is irregular and illegal.

I have, &amp;c.,

THOS. DAVIDSON.

## No. 8.

Messrs. N. G. Latimer and J. H. Davidson to The Secretary for Mines.

Sir,

Temora, 14 November, 1883.

We wish to draw your attention to a lease of 5 acres, applied for at Sebastopol by Messrs. Marshall and Heffernan.

The application and objection were heard here by the Warden on the 6th instant, and we, the objectors, refused to give any evidence in the matter, holding that, in the first place, our objections were in themselves sufficient, and in the second, we were under the impression that Messrs. Marshall and Heffernan, being the applicants, should have gone into the box first and proved their application, instead of which we had to go into the box, and this we think placed us in a false position.

We may mention that we have both been in the Morning Star ground, Sebastopol, and have seen this application there.

With reference to our objections we beg to refer you with regard to the first one to his Honor George Hibbert Deffell, Esq., Chief Commissioner in Insolvent Estates, and with regard to the last we may say that the Company was never legally wound up, and was proved so in the Insolvent Court, Sydney. We beg to say that the Company we refer to is the Morning Star Gold-mining Company (No Liability), Sebastopol.

We may also mention that we consider this property as belonging to us as shareholders in the Company, and that in the event of your granting this lease we should feel bound, in justice to ourselves, to make you a party to an equity suit.

Hoping that you will take due consideration of these facts.

We have, &amp;c.,

NEVILLE GEO. LATIMER.

J. H. DAVIDSON.

*Minutes on No. 8.*

Mr. Warden Baker, whose attention is invited to the minute upon 83-11,250 herewith.—G.E.H. (*pro U.S.*), B.C., 22/11/83. The said minute is answered on the said 83-11,250.—J.B., B.C., 27/11/83.

## No. 9.

Mr. T. C. Symons to The Secretary for Mines.

Sir,

Sydney, 26 November, 1883.

I have the honor to enclose three solemn declarations from the original shareholders of the extended quartz claim known as the "Morning Star," at Sebastopol, near Temora, applied for by Messrs. Heffernan and Marshall, and reported upon by the Warden at Temora.

What the report of the Warden is I do not know, nor would it affect the case of whatever nature it is, since the steps taken by Messrs. Heffernan and Marshall, as the said declarations of myself and Messrs. Barnett and Davidson clearly prove, appears illegal and quite unjustifiable.

The original shareholders, as per declarations, have given no consent to convert the claim as above-described into a lease, nor have permitted any one to act for them in any capacity to effect such purpose, they have never forfeited the said claim, nor abandoned their title to it.

On the other hand, Messrs. Heffernan and Marshall have not the slightest title to the said claim, and knowing it they clandestinely made application to lease, without giving us notice, nor properly describing the ground, which act we, by sheer chance, detected, and now try to prevent being granted to them.

They

They tried first, having formed the so-called Morning Star Gold-mining Company, to bring the title before the Court of Insolvency, but were there ignominiously defeated; they attempt now, by a side wind, to obtain a lease in their name without the owners' consent, as the enclosed declarations sufficiently testify.

As to the matter of the Company, I beg to add that such will in due course be made a cause for the Court of Equity, thus the claim could not by any means be dealt with by the shareholders of such Company, but revert of course to the original shareholders.

In order to more clearly explain matters I would most respectfully request an interview, if you would be gracious enough to appoint a time when I may call upon you.

In the meantime I most respectfully beg of you to read our papers now submitted, by which you will feel justified to dismiss the injudicious application of said Heffernan and Marshall for said claim at Sebastopol.

I have, &c.,

THOMAS CAMPBELL SYMONS.

*Minutes on No. 9.*

The explanation furnished by Mr. Warden Baker, S3-11,250, is most conclusive, not only that the application by Heffernan and Marshall to lease is regular, but that the objectors have no standing, provided it can be shown—and so far as I can see it does not appear on the face of the papers—that the "Morning Star Extended Quartz-mining Claim" was at and prior to the date of the sale under execution the property of the "Morning Star Gold-mining Company (No Liability)." If that were proved, then refusal of the application to lease could not benefit the objectors, as the applicants would still be the holders of the claim.—H.W., 1/12/83. Sec No. 6.

Will the Minister please say whether he will see the writer, and if so, whether before or after reference to the Warden as to the title of the Company to the claim.—H.W., 1/12/83.

I will see him after.—J. P. ABBOTT, 3/12/83.

Mr. Warden Baker.—G.E.H. (*pro U.S.*), B.C., 17/12/83.

[Enclosures.]

Statutory Declaration.

I, THOMAS C. SYMONS, late of Temora, and now of Sydney, in the Colony of New South Wales, do solemnly and sincerely declare as follows:—

That the area, being the Morning Star Quartz Claim, at Sebastopol, near Temora, was illegally applied for to lease by Messrs. Heffernan and Marshall, on the grounds:—

- 1st. That I, being one of the original shareholders, and still claim to be such shareholder, have received no notice, as provided under Regulation 5, relating to gold-mining leases.
- 2nd. That the said area was not properly described nor defined, as provided under Regulation 6, relating to gold-mining leases.
- 3rd. That Messrs. Heffernan and Marshall, the said applicants, have no legal right to said ground, which, being the property of a Company at present, its shareholders never could authorize such proceedings without my consent, but they possess no legal authorization whatsoever from original shareholders or otherwise.
- 4th. That the Company's affairs have been before the Insolvency Court and dismissed by my action, but it may come on again at this Court, but is sure to be made a suit in the Court of Equity in Sydney. Hence no dealings with said area by the Department of Mines at Sydney on the part of applicants is justifiable, and hence we regard the inquiry by the Warden at Temora without avail, and I rely simply upon the action of Department of Mines.

And I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her Majesty, intituled "An Act for the more effectual abolition of Oaths and Affirmations taken and made in various Departments of the Government of New South Wales, and to substitute Declarations in lieu thereof, and for the suppression of voluntary and extra-judicial Oaths and Affidavits."

Declared at Sydney, this 26th day of }  
November, 1883, before me,— }

THOMAS C. SYMONS.

R. B. ARMSTRONG, J.P.

Statutory Declaration.

I, J. J. BARNETT, of Temora, do solemnly and sincerely declare that the area, being the Morning Star Extended Quartz Claim, at Sebastopol, near Temora, was illegally applied for to lease by Messrs. Heffernan and Marshall, on the grounds:—

- 1st. That I, being one of the original shareholders, and still claim to be such, have received no notice, as provided under Regulation 5, relating to gold-mining leases.
- 2nd. That the said area was not properly described nor defined, as provided under Regulation 6, relating to gold-mining leases.
- 3rd. That Messrs. Heffernan and Marshall, the said applicants, have no legal right to the said claim, which, being the property of a company at present, its shareholders could never authorize such proceedings without my consent, they holding no authority whatsoever from original shareholders or otherwise.
- 4th. That the Company's affairs have been before the Insolvency Court and dismissed by my action, but it may come on again at this Court, but is sure to be made a suit in the Court of Equity in Sydney. Hence no dealings with said area by the Department of Mines at Sydney on the part of applicants is justifiable, and hence we regard the inquiry by the Warden at Temora without avail, and I rely simply upon the action of Department of Mines.

That I, being registered agent at the time for original shareholder, David Davis, of Sydney, have received no notice, as provided by Regulation 5, relating to gold-mining leases, from Heffernan and Marshall, applicants for the Morning Star Extended Quartz Claim at Sebastopol.

And I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her Majesty, intituled "An Act for the more effectual abolition of Oaths and Affirmations taken and made in various Departments of the Government of New South Wales and to substitute Declarations in lieu thereof, and for the suppression of voluntary and extra-judicial Oaths and Affidavits."

Made and signed before me, at Temora, this }  
24th day of November, 1883,— }

J. J. BARNETT.

23rd day of November, 1883,— }  
R. ZOTCH, J.P.

THOS. DAVIDSON,

## No. 10.

Messrs. Heffernan and Marshall to The Secretary for Mines.

Sir,

Sebastopol, 7 December, 1883.

We have the honor to request that you will take our application for gold-mining lease of 5 acres, No. 205, parish Sebastopol, county Clarendon, into your favourable consideration at your earliest convenience.

During the last six months we have expended a considerable sum of money in prospecting the ground, the sinking on the average costing £7 per foot. We now find that, to thoroughly test it, it will be necessary to erect costly machinery; but until such time as our application to lease has been dealt with we do not feel justified in incurring the expense of machinery to develop the mine.

Trusting that our application will meet with your approval,

We have, &c.,

HEFFERNAN & MARSHALL.

## No. 11.

Mr. T. Symons to The Secretary for Mines.

Sir,

Sydney, 19 December, 1883.

Thanking you for the courtesy of having received us, that is, W. H. Targett, Esq., M.P. (who introduced us), and Messrs. Margules and Thomas Symons, on the matter of application for gold-mining lease at Sebastopol, near Temora, for the area or mine known as the "Morning Star," by Messrs. P. Heffernan and W. Marshall, I have the honor to point out that it appears very singular, though I did not mention it when in your office, that the declarations having been forwarded to you so many weeks ago, and my requests first accompanying such declarations and repeated about a fortnight ago to the effect to grant me an interview, have never been taken notice of, except forwarding such declarations yesterday to the Warden at Temora.

These letters were never acknowledged, my request of interview never noticed; surely you are not capable of a discourtesy, and how does this happen?

Then again the Warden has sent in his report, which of course he cannot improve nor qualify, the declarations are relating facts touching the action of the Minister and not the Warden, hence sending the declarations to the Warden appears very singular, the more so, since it took such extreme length of time so to do, and only happened just eighteen or twenty-four hours before we waited upon you to-day.

Without assuming anything too provoking, I cannot conceive the cause of sending such declarations to the Warden; what is he to do? can he upset facts? The declarations deal with facts only, which could be easy for any one for supplying himself in Sydney, because affidavits of every particular exist now at the Court in Insolvency at Sydney, which the Warden at Temora could never obtain.

Without being ill-natured it strikes one that the proceedings in this case of the Department are rather very singular, that is, to let so many weeks pass and not to take any action whatsoever, but just twenty-four hours before we appear, to send the papers out of our road; on what pretence? to get information of matters that the Department already possessed, and the Warden at Temora could not by any means afford, except supplied by ourselves, which we could far easier do here than at Temora; and lastly, not to arrange an interview with you, and thus shorten and simplify matters.

I hope, as the matter is of great urgency, it will be pushed, and not unnecessarily delayed by side issues.

I have, &c.,

THOS. SYMONS.

## Minutes on No. 11.

There was some delay in this case, I presume the Under Secretary could explain satisfactorily the reason. This letter signed Thomas Symons, and written by Mr. Margules, is an extremely impertinent one and hardly merits attention.—G.E.H. (*pro* U.S.), 21/12/83.

The receipt of this letter need not be acknowledged.—J. P. ABBOTT, 21/12/83.

## No. 12.

## Memorandum of The Mining Registrar.

THIS is to certify that I have searched the books of the office of the Mining Registrar, and I find that on the 11th day of July, 1883, at the time of the transferring of the Morning Star Extended Quartz Claim at Sebastopol, by the Bailiff of the Warden's Court, to Patrick Heffernan, the said claim then stood in the name of the Morning Star Gold-mining Company, Sebastopol (No Liability), without any incumbrance thereupon.

Dated at Temora, this 14th day of January, A.D. 1884.

C. G. GIBSON,  
Mining Registrar, Temora.

*Minutes on No. 12.*

The above certificate will give a full and satisfactory proof that, at the date of sale by the Bailiff, the property belonged to and was registered in the name of the Morning Star Gold-mining Company, Sebastopol (No Liability). The Under Secretary for Mines.—J.B., 16/1/84.

This certificate makes it clear that the claim has been properly transferred to Mr. Heffernan, one of the applicants to lease, and therefore the objection to the granting of the application is not tenable. Will the Minister now see the objectors, or will he decide the case upon the evidence herewith?—H.W., 19/1/84.

Approved.—I do not want to see them.—J. P. ABBOTT, 19/1/84.

## No. 13.

## Mr. H. Margules to The Secretary for Mines.

Sir,

Sydney, 16 January, 1884.

As one of the shareholders interested in the Morning Star Company, Sebastopol, the area of which was applied for by Messrs. Heffernan and Marshall to lease, and objected to by Messrs. Symons, Davidson, and Barnett, and being one of the gentlemen waiting upon you on the 18th ultimo to support such objections, I have the honor to point out to you that up to date we have received no indication of what has been done in the matter, since the papers, alleged to have been sent to the Warden at Temora, must have been returned to the Department long ere this.

Thus I most respectfully request that an early reply may be vouchsafed either to Mr. Thomas Campbell Symons, 115, Palmer-street, Woolloomooloo, or to my address.

I have, &c.,  
H. MARGULES.

## No. 14.

## The Under Secretary for Mines to Mr. T. C. Symons.

Sir,

Department of Mines, Sydney, 23 January, 1884.

Referring to your letter of the 19th ultimo, respecting the objections raised to the granting of Messrs. Marshall and Heffernan's application for a lease of 5 acres of land at Sebastopol, I am directed to inform you that it is clear, in the opinion of the Secretary for Mines, from the certificate of the Mining Registrar at Temora, that the claim of the Morning Star Gold-mining Company, Sebastopol, has been properly transferred to Mr. Heffernan, one of the applicants to lease, and that therefore the objection is not tenable. See No. 11.

I have, &c.,  
HARRIE WOOD,  
Under Secretary.

## No. 15.

## Mr. H. Margules to The Secretary for Mines.

Sir,

Sydney, 28 January, 1884.

In reference to your letter of the 23rd instant, addressed to Mr. Thomas C. Symons, on the subject of application by Messrs. Heffernan and Marshall to lease certain land at Sebastopol, I have the honor still to point out to you that an interview was asked for in order to explain away false impressions and erroneous and foggy reports which might have reached you and require explanations, and that that interview was never yet granted; but that had it been brought about I beg to be pardoned for stating that you would not have fallen into error to inform us by the above letter "that it is clear that the claim, &c., has been properly transferred to Mr. Heffernan, &c., and that therefore the objection is not tenable." See No. 14.

Not only is the objection, or rather are the objections, tenable, but the transfer totally illegal, and if legal, Heffernan could only buy for the Company he was a promoter and director of; but I, on behalf of all objectors, deny the legality of the transfer you allude to.

The case is involved in law, and I am sure you will never be a party to involve your Department into or in any way prejudice the suit.

I hope you will be kind enough to appoint a time for interview, to fully lay the case before you, and I am quite sure that you will instantly dismiss the said application to lease.

I have, &c.,  
H. MARGULES.

*Minutes on No. 15.*

Submitted as to whether an interview should be granted. If the objectors have legal rights they should enforce them.—H.W., 30/1/84.

The writer may be informed that I have given my decision, and that I shall not re-open the case; that if the parties have legal rights they must assert and prove them in the usual way, and if they should succeed, any decision of mine upon the points so contested could have no prejudicial effect.—J. P. ABBOTT, 2/2/84.

## No. 16.

Mr. H. Margules to The Secretary for Mines.

Sir,

Sydney, 29 January, 1884.

See No. 15.  
See No. 14.

In addition to mine of yesterday, in reply to your letter of the 23rd instant, addressed to Mr. Thomas C. Symons, on the subject of land at Sebastopol applied for to lease by Messrs. Heffernan and Marshall, and objection raised against application not being tenable by reason of the certificate of the Mining Registrar at Temora relating to the transfer of some one to Mr. Heffernan, I have the honor to state that the certificate alluded to totally escaped my due attention (and though I have pointed out that all transfers of whatever nature having taken place are illegal, hence of no consideration, and objections—not as your letter states, "objection"—raised are substantial and not only tenable, but complete and fatal against any entertaining of such application), I shall now have the honor most respectfully to request that I might be kindly informed what such a document as a "certificate of transfer of the Mining Registrar at Temora" purports to be, because to me such is certainly a mystery, which neither the Mining Act of 1874 nor regulations under it provides for, and now to my mind constitutes a *matrix incognita*.

I have, &c.,  
H. MARGULES.*Minutes on No. 16.*

See No. 14.

The letter 84/643 does not refer to a certificate of transfer, but to a document in which the Mining Registrar certifies certain facts relating to a transfer. If Mr. Margules desires to set aside a transfer he should take the proper legal course. Submitted.—H. W., 31/1/84. Approved.—J. P. ABBOTT, 2/2/84.

## No. 17.

The Under Secretary for Mines to Mr. H. Margules.

Sir,

Department of Mines, Sydney, 7 February, 1884.

See No. 15.

Referring to your letter of the 28th ultimo, respecting your desire for an interview with the Minister on the subject of Messrs. Heffernan and Marshall's application to lease certain land at Sebastopol, I am directed by Mr. Abbott to inform you, that having given his decision on the case, he must decline to re-open it; I am also directed to state that if the parties have legal rights they should assert and prove them in the usual way, and that if they succeed, any decision by the Minister on the points so contested could have no prejudicial effect.

I have, &c.,  
HARRIE WOOD,  
Under Secretary.

## No. 18.

The Under Secretary for Mines to Mr. H. Margules.

Sir,

Department of Mines, 7 February, 1884.

See No. 16.  
See No. 14.  
In re application  
of Marshall and  
Heffernan to  
lease certain land  
at Sebastopol, &c.

Referring to your letter of the 29th ultimo (in reply to mine of the 23rd, addressed to Mr. T. C. Symons), in which you asked what is the purport of the document which you describe as a "Certificate of transfer of the Mining Registrar at Temora;" I have the honor to point out that my letter does not refer to a certificate of transfer, but to a document in which the Mining Registrar certifies to certain facts relating to a transfer.

If it is your desire to set aside any transfer, the law provides a means of so doing.

I have, &c.,  
HARRIE WOOD,  
Under Secretary.

## No. 19.

Mr. H. Margules to The Secretary for Mines.

Sir,

11, Bridge-street, 8 February, 1884.

See No. 17.

In reply to your letter of yesterday, 84-939, on the subject of application to lease by Messrs. Heffernan and Marshall, at Sebastopol, and our desire of an interview, and before such was granted for required explanations, your determination to allow such application, I have honor to remind you of your promise to advise us first after papers were returned by the Warden from Temora, in order to allow us sufficient opportunity to obtain some insight of the grounds such applications is based upon, and to take such steps necessary to substantiate our objections if we could, because we, that is, C. W. Targett, Esq., M.P., Mr. Thos. C. Symons, and I, when waiting upon you on the 18th December last, had no means of doing anything, the papers having been transmitted on the previous day to the Warden at Temora, and having been denied such opportunity it would appear unfortunately as if we stand condemned without a hearing, and by the tenor of your letter above referred to, we stand condemned without an appeal, as you refuse to hear anything in the matter, or technically, to re-open the case.

Impartially, and without prejudice, I most respectfully must urge that all our objections raised against the granting the said application are valid and complete, and cannot be gainsaid.

See No. 14.

Your letter of the 23rd ultimo, stating "that it is clear, &c., from a certificate of the Mining Registrar, at Temora, that the claim of Morning Star Gold-mining Company, Sebastopol, has been properly transferred to Mr. Heffernan, one of the applicants for lease, and that therefore the objection is not tenable"; certainly, I most respectfully submit will require re-consideration, as such a document above relied is not existent in law, neither the Act of 1874 nor the regulations under it warrant the issue of such documents, nor could your Department take notice of it. The transfer proves in itself illegal, only the Court in Insolvency could afford such transfer, hence how could a certificate from a Mining Registrar influence your Department. The Court in Insolvency refused to ratify the said transfer in November last.

As

## 11

As to the statement contained in your letter of yesterday (84/939), "That if the parties have legal rights they should assert and prove them in the usual way, and that if they succeed any decision by the Minister on the points so contested could have no prejudicial effect." I have the honor most respectfully to point out that judicial tribunals all over the world must, to a certain extent, recognize decisions of Departments immediately connected in matters of adjudication on subjects of dispute or contest, such Departments being more likely to be seized with all details and deep critical points, not so open to Courts of Justice or in Equity, hence your decision must produce perhaps without express desire some such prejudicial effect, besides I most respectfully submit, your action actually overthrows the decision of the Chief Commissioner in Insolvency, delivered in November last.

Hoping very respectfully and deeply that you will re-consider the matter, and grant an interview.  
I have, &c.,

H. MARGULES.

*Minute on No. 19.*

Acknowledge the receipt of this only.—J. P. ABBOTT, 9/2/84.

## No. 20.

Mr. H. Margules to The Under Secretary for Mines.

Sir,

Sydney, 8 February, 1884.

In reference to your letter of the 7th instant, on the subject mentioned "as certificate of transfer of the Mining Registrar at Temora, and that, &c, it meant, a document in which the Mining Registrar certifies to certain facts relating to a transfer," I am urged most respectfully to submit, as the matter appears very important, such document being made the basis of litigation just now, even in the case of Heffernan and Marshall, wherein the very question now arose that no Mining Registrar, in accordance with the Mining Act of 1874 or Regulations under it, certifies to facts relating to transfers, but being simply a Ministerial officer, he may receive such transfer, note-the receipt, and charge a fee. The cause for such procedure is quite obvious, that is, to afford the public some sort of control what transactions have taken place in a certain mining district, and thus perhaps prevent frauds, &c.

But transfers would be as legal without the Mining Registrar's signature as with it, is quite clear by the style of the printed form itself, and bearing in mind the fact, I most respectfully beg to point out that such document, not coming in this case (Heffernan and Marshall's) from the proper source, the transfer appears quite illegal.

I have, &c.,

H. MARGULES.

*Minutes on No. 20.*

No action appears to be necessary upon this further communication. Submitted.—H. W., 11/2/84. Approved.—J. P. ABBOTT, 15/2/84.

## No. 21.

The Under Secretary for Mines to Mr. H. Margules.

Sir,

Department of Mines, Sydney, 13 February, 1884.

I have the honor, by direction of the Secretary for Mines, to acknowledge receipt of your letter of the 8th instant, further relating to the matter of Messrs. Marshall and Heffernan's application to lease certain land at Sebastopol.

I have, &c.

HARRIE WOOD,

Under Secretary.

## No. 22.

Mr. Mining Licensed Surveyor Seaver to The Chief Mining Surveyor.

Sir,

Capertree, 15 February, 1884.

I have the honor to transmit herewith the plan of one portion of land containing 5 acres 1 rood 4 perches, numbered G.L. 205, in the parish of Sebastopol, in the county of Clarendon, applied for as a Gold Lease by Heffernan and party, Temora, under the — section of the Mining Act, measured by me on the 24th November, 1883, in accordance with instructions dated

The formation is gneiss and mica schists, and the reef has a strike of about north-west and an underlay of about 59° from the perpendicular, increasing in size in the underlay shaft as it goes down, which shaft is about 200 feet deep measured on the underlay. A good deal of work has been done on the claim, and the owners are at present sinking a vertical shaft for the purpose of cutting the reef. The measurements and bearings are as shown on plan.

I have, &c.,

JONATHAN SEAVER,

Mining Licensed Surveyor.

*Minutes on No. 22.*

As the area measured is 1 rood 4 perches in excess of that applied for, the applicants should be asked to pay the first year's rent for that area. Submitted.—J.R.N., 23/2/84. Yes.—H.W., 23/2/84.

## No. 23.

Mr. H. Margules to The Secretary for Mines.

Sir,

Sydney, 18 February, 1884.

In reference to your letter of the 13th instant, I most respectfully beg to point out that mine of the 8th instant relating to an interview, and desired further interview and further explanations on the subject of application to lease certain lands at Sebastopol by Messrs. Heffernan and Marshall, besides a kind acknowledgment, has not been replied or the request contained granted.

I have, &c.,

H. MARGULES.

*Minute on No. 23.*

Inform that it is not clear that an interview can serve any good purpose.—H. W., 22/2/84.

## No. 24.

No. 24.

The Under Secretary for Mines to Mr. H. Margules.

Sir,

Department of Mines, Sydney, 25 February, 1884.

See No. 23.  
See No. 19.

With reference to your letter of the 18th instant requesting a reply to your communication of the 8th instant, as to an interview on the subject of application to lease certain lands at Sebastopol by Messrs. Heffernan and Marshall, I have the honor to inform you that it is not clear that an interview can serve any good purpose.

I have, &amp;c.,

HARRIE WOOD,  
Under Secretary.

No. 25.

The Under Secretary for Mines to Messrs. Heffernan and Marshall.

Gentlemen,

Department of Mines, Sydney, 27 February, 1884.

• See No. 2.

Referring to your application, No. 83-21, for a gold-mining lease of 5 acres of land at Sebastopol, in the county of Clarendon, I have the honor to inform you that the area measured is 1 rood 4 perches in excess of that applied for, and I am therefore to request that you will be good enough to forward £1, being the amount required for the first year's rent on the additional area.

I have, &amp;c.,

HARRIE WOOD,  
Under Secretary.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## PURCHASE BY THE GOVERNMENT OF A TIFFIN BORER.

(CORRESPONDENCE, PAPERS, &amp;c.)

*Ordered by the Legislative Assembly to be printed, 16 November, 1883.*

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 23rd October, 1883, That there be laid upon the Table of this House,—

- “ (1.) Copies of all correspondence, minutes, &c., between the Minister for Mines and any residents of Gunnedah or other persons in reference to the purchase of the Tiffin auger or borer lately purchased by the Government; also the like as regards any correspondence, minutes, &c., in reference to the purchase thereof between the said parties and any Government official.
- “ (2.) The names of the parties who had an interest in and sold the Tiffin borer to the Government, and the price paid for the same.
- “ (3.) The daily cost of working the Tiffin borer, and the total amount expended by the Government for the working of the same since its purchase and the daily rate of wages paid to each person, cost of horse-feed, &c.; also showing the number of holes bored, and the names and place of residence of the parties on whose properties holes were bored, and the amounts paid for same, and the names of the parties who have paid for boring holes for water, &c.

*(Mr. McElhone.)*

## SCHEDULE.

NO.	PAGE.
1. Mr. R. P. Brock to the Inspector of Drills, offering a Tiffin boring and drilling machine for sale at £300. 23 January, 1883.....	2
2. The Superintendent of Drills to Under Secretary for Mines, recommending the sum of £276 15s. for the auger, with enclosure. 30 January, 1883 .....	2
3. The Under Secretary for Mines to Mr. R. P. Brock, in reply to No. 1, offering £276 15s. for the machine and its appliances. 1 February, 1883 .....	2
4. The Superintendent of Drills to the Under Secretary for Mines, respecting working the machine. 5 February, 1883 .....	2
5. The Under Secretary for Mines to Mr. R. P. Brock, telegram asking whether he will accept offer. 8 February, 1883 .....	3
6. Mr. R. P. Brock to the Under Secretary for Mines, accepting offer. 8 February, 1883 .....	3
7. Mr. R. P. Brock to the Under Secretary for Mines, replying to letter of the 1st February, and accepting £276 15s. 8 February, 1883 .....	3
8. The Under Secretary for Mines to Mr. R. P. Brock, telegram the delivery of borer will be taken. 9 February, 1883 .....	3
9. Mr. H. Carmichael to the Superintendent of Drills, part of machine damaged. 13 February, 1883 .....	3
10. Mr. H. Carmichael to the Superintendent of Drills, submitting a list of tools with boring machine. 13 February, 1883 .....	3
11. Mr. H. Carmichael to the Superintendent of Drills, stating having taken delivery of auger, &c. 19 February, 1883 .....	3
12. Mr. R. P. Brock to Honorable the Minister for Mines, respecting payment for the boring machine. 7 March, 1883 .....	3
13. Mr. R. P. Brock to the Superintendent of Drills, respecting payment for the boring machine. 7 March, 1883 .....	4
14. The Superintendent of Drills to Mr. R. P. Brock, that his pay-voucher was sent to the Treasury. 8 March, 1883...	4
15. Mr. R. P. Brock to the Superintendent of Drills, respecting payment for boring machine, &c. 20 March, 1883 .....	4
16. The Under-Secretary for Mines to Mr. R. P. Brock, stating that £303 5s. was placed to his credit at the Commercial Bank. 4 April, 1883 .....	4

## PURCHASE BY THE GOVERNMENT OF A TIFFIN BORER.

## No. 1.

Mr. R. P. Brock to The Inspector of Drills.

Sir,

Gunnedah, 23 January, 1883.

I have a Tiffin boring and drilling machine combined here for sale. The machine is almost new, and is complete with 350 feet of rods and couplings for that length, with augers, drills, and primers; also there are duplicate wheels and blacksmith's forge, ropes, all complete and ready for work, or to send to any part of the country. The whole I place under offer to you for the sum of £300. I need not mention to a gentleman of your experience this is a long way under its value.

Trusting soon to hear from you,

I am, &amp;c.,

R. P. BROCK.

## No. 2.

The Superintendent of Drills to The Under Secretary for Mines.

Sir,

Diamond Drill Branch, Department of Mines, Sydney, 30 January, 1883.

See enclosure.

I have the honor to report having inspected this Tiffin borer and driller combined, and found it in good state of repair, almost new, with duplicate connections and blacksmith's tools in addition to the usual outfit.

In view of an auger of this class being required for immediate use in the Districts west of Newcastle, I would recommend an offer to purchase be made (agreeable to the conditions of outfit named by Mr. Brock) at the sum of £276 15s., this being the amount of valuation arrived at by me as per list herewith annexed.

I have, &amp;c.,

WILLIAM B. HENDERSON,  
Superintendent of Drills.

[Enclosure.]

	£	s.	d.
Tiffin well-borer and rock-driller combined, equal to 350 feet, at pamphlet outfit prices .....	232	10	0

		285	0
Less, 5 % for usage .....		14	5
		270	15
Add carriage to Newcastle .....		6	0
		£276	15
		0	0

WILLIAM B. HENDERSON,  
Superintendent of Drills.  
30 January, 1883.

Submitted.—H. W., 31/1/83. An offer may be made at price named, £276 15s.—J. P. ABBOTT, 31/1/83.

## No. 3.

The Under Secretary for Mines to Mr. R. P. Brock.

Sir,

Department of Mines, Sydney, 1 February, 1883.

Referring to your letter of the 23rd ultimo, in which you place under offer a Tiffin borer and driller combined, together with its outfit, I have the honor to inform you that the Secretary for Mines has authorised your being offered £276 15s. for the machine and its appliances.

I have, &amp;c.,

HARRIE WOOD,  
Under Secretary.

## No. 4.

Memo. from Superintendent of Drills to Under Secretary for Mines.

Should Mr. Brock agree to accept the price offered for auger, &c., it is arranged that Carmichael, the man who has come from Melbourne, is to start on at once for Gunnedah to work it. He has all necessary instructions as to work from me.

He will require rail passes for himself and son from Newcastle to Gunnedah, steamer fares from Sydney to Newcastle.

I have instructed Carmichael to call on you for orders during my absence.

If the offer is refused Carmichael will have to wait my return from Newcastle to see him fitted out with the auger now being prepared at Messrs. Martin & Co.'s.

WILLIAM B. HENDERSON,  
Superintendent of Drills,  
February 5, 1883.

No. 5.

3

No. 5.

Telegram from Under Secretary for Mines to Mr. R. P. Brock.

Department of Mines, Sydney, 8 February, 1883.

Do you intend to accept offer for water auger? Please reply at once.

No. 6.

Telegram from Mr. R. P. Brock to Under Secretary for Mines.

Gunnedah, 8 February, 1883.

Yes, I accept your offer; letter gone to-day.

No. 7.

Mr. R. P. Brock to The Under Secretary for Mines.

Gunnedah, 8 February, 1883.

Sir,

Referring to your letter dated 1st instant, No. 83-259, I beg to inform you that I will accept the offer made by the Department (£276 15s.) for the Tiffin borer and its appliances that I have placed under offer to the Department.

I have, &amp;c.,

R. P. BROCK.

Mr. Brock had better be wired to that a man leaves to-night to take over delivery agreeable to conditions of sale.—W.B.H., 9 February, 1883. Approved.—H.W., 9/2/83.

No. 8.

Telegram from Under Secretary for Mines to Mr. R. P. Brock.

Department of Mines, Sydney, 9 February, 1883.

A MAN will leave Sydney to take delivery of the Tiffin borer upon terms agreed upon.

No. 9.

Mr. H. Carmichael to The Superintendent of Drills.

Gunnedah, 13 February, 1883.

Dear Sir,

I beg to inform you part of flange is broken of trick wheel, but will not interfere with working of machine; also, the frame of machine is a little damaged, but I can repair it.

H. CARMICHAEL.

The breakages referred to are not worth mentioning, and are merely the result of lying idle so long. This was taken in account in my valuation.—W.B.H., 15 February, 1883.

No. 10.

Mr. H. Carmichael to The Superintendent of Drills.

Gunnedah, 13 February, 1883.

Sir,

I beg to submit a list of tools with the machine:—

22	16 feet boring rods and couplings.	1	8-inch twist auger.	<i>Duplicate parts.</i>
1	jar bar.	1	6 " " "	1 crown wheel.
1	12-inch cylinder auger.	1	ram's horn.	1 bearing wheel.
1	8 " " "	2	5-inch drills.	1 pinion wheel for horse works.
1	8 " shell auger.	1	rock reamer.	1 pinion wheel for bearing wheel.
1	6 " cylinder auger.		300 feet drill rope.	
1	6 " shell auger.			

H. CARMICHAEL.

This inventory bearing out that a complete delivery is given, Mr. Brock had better be notified accordingly.—W.B.H., 15 February, 1883.

No. 11.

Mr. H. Carmichael to The Superintendent of Drills.

Gunnedah, 19 February, 1883.

I HEREBY testify to having received from Mr. Brock, of Gunnedah, a Tiffin's auger and all gearing, as mentioned in my letter of the 13th instant to the Superintendent of Drills.

HUGH CARMICHAEL.

This completes the delivery of this auger. It is to be known as No. 6, for the office use.—W.B.H., 21/2/83.

No. 12.

Mr. R. P. Brock to The Minister for Mines.

Gunnedah, 7 March, 1883.

Sir,

I have to call the attention of the department to the fact that the boring machine purchased from me has not yet been paid for. I have signed all the vouchers some time ago. As the department got the machine at their own price I hope you will cause the same to be paid at the earliest convenience.

I have, &amp;c.,

R. P. BROCK.

MEMO.—

MEMO.—No delay has arisen in the Drill Branch. Mr. Brock's voucher was received on the 21st February, and was forwarded to the Department of Mines for payment on the same day.—W.B.H., 13 March, 1883.

£303 5s. was paid to the credit of Mr. Brock, at Commercial Bank, 30th March.—E.F., 4/4/83.

## No. 13.

Mr. R. P. Brock to The Superintendent of Drills.

Sir,

Gunnedah, 7 March, 1883.

I have not heard from your department in reference to paying for boring machinery. I hope you will stir them up, as I want the money, and would feel obliged if you would try them. I have written to the Honorable the Minister for Mines on the subject. The auger here is doing well. If the man had pipes to keep the drift back, I believe he would have had good permanent water some time ago; as it is I think he has done well. Trusting you will see to purport of this note.

I have, &amp;c.,

R. P. BROCK.

## No. 14.

The Superintendent of Drills to Mr. R. P. Brock.

Dear sir,

Department of Mines, Diamond Drill Branch, Sydney, 8 March, 1883.

Yours of yesterday is to hand, and in reply I beg to inform you that your pay voucher for price of water auger was forwarded by the Mines Department to the Treasury this morning for payment, and you may expect the amount to be paid you next week.

I may inform you that I have taken all possible steps to have payment made, and that the purchase of horse is likewise receiving my attention.

I am glad to hear you say that the tubing is required to carry on the work, as all the auger work over the Colony will be delayed until the tubing arrives, ordered from Glasgow.

I am expecting tubing soon; until such arrives we must do the best we can.

I am glad to find you are giving assistance to Carmichael in the work. I would be glad if you would drop me a few lines as to his wants, &c. Please let me know anything to advance the work.

I am writing to Mr. Carmichael to-day about the wheel; I find I must get a new one cast; the one sent was mislaid.

Yours, &amp;c.,

W. B. HENDERSON.

## No. 15.

Mr. R. P. Brock to The Superintendent of Drills.

Sir,

Gunnedah, 20 March, 1883.

I have not yet received the money advanced to the Department for the purchase of a horse for the boring auger at Gunnedah. I think it time it was paid, considering I did not get one penny out of the transaction; the man who sold it would not let him have the horse until he got paid for him so I paid for the horse with the understanding that I would get my money at once, but I have not heard from the Department yet, trusting soon to hear from you. The auger has not yet been paid for. I wish you would hunt up those people who should have sent it some time ago. By so doing you will oblige

Yours, &amp;c.,

R. P. BROCK.

## No. 16.

The Under Secretary for Mines to Mr. R. P. Brock.

Sir,

Department of Mines, Sydney, 4 April, 1883.

Referring to your letter of the 7th ultimo as to the delay in paying your claim for the boring machine purchased from you, I have the honor to inform you that the sum of £303 5s. was placed to your credit at the Commercial Bank on the 30th ultimo.

I have, &amp;c.,

HARRIE WOOD,

Under Secretary.

	£	s.	d.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

---

**MINING UNDER LAKE MACQUARIE.**

(PERMISSIONS GRANTED, &amp;c.)

---

*Ordered by the Legislative Assembly to be printed, 5 December, 1883.*

---

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated the 24th October, 1883, That there be laid upon the Table of this House,—

“ A Return showing the names of all persons to whom permission has  
 “ been granted, under section 28 of the Mining Act of 1874, to mine for  
 “ coal and other minerals under the waters of Lake Macquarie and the  
 “ tributaries thereof, and under any commons or reserves within 5 miles  
 “ of the shores thereof; the area in respect of which such permissions  
 “ have been granted; the dates when granted; the terms and conditions  
 “ and restrictions (if any) under which the same have been granted.”

(*Mr. Gould.*)

---

## MINING UNDER LAKE MACQUARIE.

A RETURN showing the names of all persons to whom permission has been granted, under section 28 of the Mining Act of 1874, to mine for coal and other minerals under the waters of Lake Macquarie and the tributaries thereof, and under any commons or reserves within 5 miles of the shores thereof.

Names.	Area.	Dates when granted.	Terms and conditions and restrictions under which the same have been granted.
(1.) Garrett, Thomas.	800 acres (about).	1878. 8 March	<p>Upon condition that the said Thomas Garrett shall not mine under this authority in any place other than that hereinbefore described, and on the further terms and conditions, and subject to the restrictions following, that is to say :—</p> <p><i>First.</i>—That the said Thomas Garrett during his occupancy under this authority shall be the holder of not less than two mineral licenses in force, and shall, on the first day of January, April, July, and October, respectively, in each year, pay to the Colonial Treasurer, by way of royalty, a sum equal to sixpence for every ton of coal raised from under the said reserve during the three months next preceding the day in which such payment shall be made.</p> <p><i>Second.</i>—That all mine works within the portion of the reserve hereby permitted to be mined under shall be constructed and shall be carried on to the satisfaction of the Secretary for Mines.</p> <p><i>Third.</i>—That all plans and sections of the mine, and all books and vouchers which relate to the quantity of coal raised, and all the mine works, shall be open at all times to the inspection of such officer as the Secretary for Mines shall authorize to inspect the same.</p> <p><i>Fourth.</i>—That no excavation shall be made or carried under any building or erection, or within 30 feet thereof, or of any site upon which any building is about to be erected; and that the said Thomas Garrett shall in no way interfere with the surface of such reserve without the express sanction, in writing, of the Secretary for Mines aforesaid, who may, and if necessary shall, before giving such sanction, require the said Thomas Garrett to deposit in the hands of the Colonial Treasurer a sum of money sufficient to cover the cost of repairing any damage that may be done to any such building or erection by reason of such excavation.</p> <p><i>Fifth.</i>—The Secretary for Mines may at any time, by an order in writing or by a notice in the Government Gazette, prohibit the construction of mine works under such portion of the reserve as shall or may be required for any public purpose until such Secretary shall be satisfied that such works may be carried on without interfering with such purpose.</p> <p>And if the said Thomas Garrett shall fail to observe, perform, and keep all and every the terms and conditions upon which this order or permission is granted as aforesaid, or shall mine in any way contrary to the restrictions hereinbefore stated, then, and in any such case, the permission and authority hereby given shall immediately cease and determine.</p>
(2.) Copeland, Henry	2,130 acres	1880. 17 Jan. ...	Same conditions as above, excepting that one mineral license shall be held, and omitting the fourth clause.
(3.) Barbour, Robert.	3,760 acres	21 Feb. ...	Ditto ditto ditto
(4.) Copeland, Henry	210 acres	17 Jan. ...	Same conditions as No. 1, excepting that one mineral license shall be held.
(5.) Amos Alexander and Robert Amos.	970 acres	17 Jan. ...	Same conditions as No. 1, omitting the fourth clause.
(6.) Kingscote, W. A.	25 acres (about).	1883. 7 June...	<p>Upon condition that the said W. A. Kingscote shall not mine under this authority in any place other than that hereinbefore described, and on the terms and conditions set out on the back hereof, so far as they are applicable to this authority, and on the further special terms and conditions, and subject to the restrictions following, that is to say :—</p> <p><i>First.</i>—That the said W. A. Kingscote during his occupancy under this authority shall be the holder of one mineral license in force, and shall, on the first day of January, April, July, and October, respectively, in each year, pay to the Colonial Treasurer, by way of royalty, a sum equal to sixpence for every ton of coal raised from under the said reserve during the three months next preceding the day on which such payment should be made as aforesaid; but he shall, on each of the days above-named, pay to the Colonial Treasurer the sum of twelve shillings and sixpence (12s. 6d.) sterling, until or unless the royalty, at the rate aforesaid, exceeds such sum.</p> <p><i>Second.</i>—That all plans and sections of the mine, and all books and vouchers which relate to the quantity of coal raised, and all the mine works, shall be open at all times to the inspection of such officer as the Secretary for Mines shall authorize to inspect the same.</p> <p><i>Third.</i>—That no excavation shall be made or carried under any building or erection, or within 30 feet thereof, or of any site upon which any building is about to be erected, and that the said W. A. Kingscote shall in no way interfere with the surface of such reserve without the express sanction in writing of the Secretary for Mines aforesaid, who may, and if necessary shall, before giving such sanction, require the said W. A. Kingscote to deposit in the hands of the Colonial Treasurer a sum of money sufficient to cover the cost of repairing any damage that may be done to any such building or erection by reason of such excavation.</p> <p><i>Fourth.</i>—The Secretary for Mines may at any time, by an order in writing, or by a notice in the Government Gazette, prohibit the construction of mine-works under such portion of the reserve as shall or may be required for any public purpose until such Secretary shall be satisfied that such works may be carried on without interfering with such purpose.</p> <p><i>Fifth.</i>—That all mine-works within the reserve hereby permitted to be mined under shall be commenced on or before the seventh day of December, 1883, by such a number of miners, workmen, or others, as shall, in the opinion of the Secretary for Mines, be required, and shall thereafter be carried on and constructed in such a manner, and by such a number of miners, workmen, or other persons as shall be satisfactory to the Secretary for Mines.</p>

RETURN showing permissions, &c.—*continued.*

Names.	Area.	Dates when granted.	Terms and conditions and restrictions under which the same have been granted.
(7.) Kingscote, W. A.	60 acres (about).	1883.  7 June...	<p><i>Sixth.</i>—Such works shall at all times be open to inspection by any person appointed in that behalf, and if it shall appear to the Secretary for Mines that the work has not been commenced, or is not being carried on as aforesaid, or that any excavation or mine-work is being or has been so made or constructed as to endanger or injure any adjoining property, or to interfere with the use or enjoyment of the said reserve aforesaid, or any building or erection thereon, or if for any other reason it shall appear to the Secretary for Mines expedient so to do, he may cancel this authority, and thereupon the right to mine upon or under the said reserve shall cease and determine absolutely.</p> <p><i>Seventh.</i>—And if the said W. A. Kingscote shall continue to mine upon or under the said reserve after notice of cancellation of this authority shall have been served upon him or published in the Government Gazette, he shall be liable to be prosecuted for unlawfully mining upon reserved land, in terms of the Mining Act, 1874, section 123.</p> <p>And if the said reserve shall at any time during the existence of this authority be cancelled, or if the said W. A. Kingscote shall fail to observe, perform, and keep all and every the terms and conditions upon which this order or permission is granted as aforesaid, or shall mine in any way contrary to the restrictions hereinbefore stated, then and in any such case the permission and authority hereby given shall immediately cease and determine.</p> <p>Conditions same as No. 6, except in first clause, in which read one pound fourteen shillings and sixpence (£1 14s. 6d.) for twelve shillings and sixpence (12s. 6d.)</p>

Sydney : Thomas Richards, Government Printer.—1883.

1883-4.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

**MINING AND LANDS ACTS.**  
(CLAIMS FOR LAND BY MESSRS. BROWN, SMITH, GREEN, AND GAROT.)

*Ordered by the Legislative Assembly to be printed, 23 January, 1884.*

RETURN (*in part*) to an Order made by the Honorable the Legislative Assembly of New South Wales, dated the 6th December, 1883, That there be laid upon the Table of this House,—

“Copies of all papers referring to claims for land in the County of Yancowinna, by Messrs. Brown, Smith, Green, and Garot, under the Mining and Lands Acts.”

(*Mr. Lyne.*)

No.	SCHEDULE.	PAGE.
1.	The Warden, Wilcannia, to the Under Secretary for Mines, forwarding application for mineral lease from Samuel Smith, for land applied for by J. Stokie and E. Pegler on 19 June last, with minutes thereon. 11 August, 1882	2
2.	Mr. Samuel Smith to the Under Secretary for Mines, stating that Mr. R. Green claims the land, with enclosures. Minutes thereon. 24 August, 1882	2
3.	Messrs. H. H. Brown & Co. to the Under Secretary for Mines, stating that Samuel Smith's lease application is embraced within W. L. B. Brown's mineral conditional purchase No. 81-60. 31 August, 1882	3
4.	The Warden, Wilcannia, to the Under Secretary for Mines, returning papers in connection with S. Smith's mineral lease, together with printed application, &c. 6 September, 1882	3
5.	Messrs. H. H. Brown & Co. to the Under Secretary for Mines, asking, on behalf of Messrs. Garot, Green, and Ottaway, for steps to be taken to cause S. Smith to discontinue work on portion $\frac{1}{2}$ ; minute thereon. 13 September, 1882	4
6.	The Under Secretary for Mines to Mr. Warden Steel, Wilcannia, stating that matter has been referred to Mr. Warden King, Milparinka, for enquiry and report, &c. 27 September, 1882	4
7.	The Warden, Wilcannia, to the Under Secretary for Mines, in reply to above. 4 October, 1882	4
8.	Telegram from the Under Secretary for Mines to Mr. Warden King, Milparinka, Wilcannia, stating that it would perhaps be better to hold the enquiry at Thackaringa. 10 October, 1882	4
9.	Mr. S. Smith to the Under Secretary for Mines, stating that Messrs. Green, Stokie, and others are disputing his right to portion No. $\frac{1}{2}$ , with enclosure; minutes thereon. 23 October, 1882	5
10.	The Warden, Thackaringa, to the Under Secretary for Mines, reporting on and forwarding evidence taken in the disputed portion No. $\frac{1}{2}$ . 3 November, 1882	5
11.	The Under Secretary for Mines to Mr. Warden Steel, Wilcannia, as to whether Wilcannia should not be made the office at which Thackaringa business should be transacted. 17 November, 1882	6
12.	The Under Secretary for Mines to the Chief Commissioner, Department of Lands, asking if portion No. $\frac{1}{2}$ has been at any time conditionally purchased for mining purposes by W. L. B. Brown. 22 November, 1882	6
13.	The same to the same, calling attention to above letter, &c. 2 February, 1883	6
14.	Minute of the Secretary for Lands; minute thereon. 26 April, 1883	7
15.	Minute for Executive Council, recommending refusal of application No. 82-2 Wilcannia, S. Smith, 40 acres, with schedule; minute thereon. 30 April, 1883	7
16.	Messrs. H. H. Brown and Co., Agents for A. L. Garot, asking for copies of papers. 17 May, 1883	7
17.	Government Gazette notice of refusal of application No. 82-2, Wilcannia 29 May, 1883	7
18.	The Under Secretary for Mines to Mr. S. Smith, informing him that his application has been refused. 29 May, 1883	7
19.	The Under Secretary for Mines to the Warden, Wilcannia, informing him that application No. 82-2, Wilcannia, has been refused. 29 May, 1883	7
20.	Telegram from the Warden, Wilcannia, to the Under Secretary for Mines, asking if S. Smith's application for portion No. $\frac{1}{2}$ has been refused. 4 June, 1883	8
21.	Telegram from the Under Secretary for Mines to the Warden, Wilcannia, stating application refused. 5 June, 1883	8
22.	Telegram from the Warden, Wilcannia, to the Under Secretary for Mines, inquiring whether application No. 82-2, Wilcannia, is same as for portion No. $\frac{1}{2}$ , Thackaringa. 8 June, 1883	8
23.	Telegram from the Under Secretary for Mines to the Warden, Wilcannia, in reply to above—"Yes." 9 June, 1883	8
24.	Mr. Thomas Marshall to the Secretary for Mines, asking for refusal of lease to S. Smith to be revoked pending action in Supreme Court; minutes thereon. 5 July, 1883	8
25.	Minute for Executive Council, recommending refusal of S. Smith's application No. 82-2 be revoked; schedule; minutes thereon. 16 July, 1883	8
26.	Telegram from Mr. M. J. Darcy to the Under Secretary for Mines, asking for description of land applied for under mineral lease application No. 82-2, Wilcannia. 24 July, 1883	9
27.	Telegram from the Under Secretary for Mines to Mr. M. J. Darcy, giving description asked for. 31 July, 1883	9
28.	Government Gazette notice, revoking refusal of lease application 82-2. 3 August, 1883	9
29.	The Chief Commissioner, Department of Lands, to the Under Secretary for Mines, in reply to No. 13; minutes thereon. 9 August, 1883	9
30.	Telegram from the Under Secretary for Mines to the Warden, Wilcannia, asking for date of receipt of mineral lease application 82-2—S. Smith. 20 August, 1883	9
31.	The Warden, Wilcannia, to the Under Secretary for Mines, in reply to above; minute thereon. 21 August, 1883	9
32.	Mr. Warden Steel to the Under Secretary for Mines, stating that date of S. Smith's application and deposit should be 8 August, 1882; minutes thereon. 27 August, 1883	10

## MINING AND LANDS ACTS.

No. 1.

The Warden, Wilcannia, to The Under Secretary for Mines.

Sir,

Wilcannia, 11 August, 1882.

I have the honor herewith to forward for your consideration an application for a mineral lease from one Samuel Smith for the land applied for by John Stokie and Edward Pegler on the 19th June last.

I have received an objector's deposit of £10 from Smith; also sum of £5 as first year's rent.

I may add that before Stokie's and Pegler's application was received I caused the usual notice of application to be duly posted, as required by the Act in Schedule 7.

I have, &c.,

W. A. STEEL,

Warden.

Send some printed forms of application to the Warden, and request that he ask the applicant to fill up and sign one. The Warden should in any case attach certificate of receipt. If the application is for a surveyed portion no notice to survey need issue. The notice of objection to application No. 82-1 appears to have been lodged too late; but as the objector appears to claim prior possession of the land in virtue of a mineral license, it would be well for the Warden to hold an inquiry, take evidence, and report upon the matter.—H.W., 15/8/82.

Mr. Warden Steel (with forms), B.C., 18/8/82.—G.E.H., p. U.S.

Mr. S. Smith to The Warden, Wilcannia.

Sir,

Silver Mines, Thackaringa, 2 August, 1882.

I object to J. Stokie's application for a mineral lease of block 7 over 6, to the east and adjoining R. Green's mineral conditional purchase near Thackaringa, on the grounds that I had possession first by mineral license, and I am now converting it into leasehold; and that he has not complied with regulations of the Mining Act of 1874, Division 3, pertaining to mineral leases.

I forward objection deposit by telegraph money order.

Yours, &c.,

SAMUEL SMITH.

Mr. S. Smith to The Secretary for Mines.

Sir,

Thackaringa, 23 July, 1882.

I hereby make application for a mineral lease of that piece or parcel of land situated to the east and adjoining R. Green's mineral conditional purchase, about 6 miles east from Thackaringa, and marked locally 7 over 6, containing 40 acres, of which I took possession on the 28th day of July, at the hour of 2 in the afternoon, for the purpose of mining thereon for silver lead ore, by erecting a post 3 feet high and digging a trench 6 feet long at each angle thereof. The datum point is the north-eastern angle of R. Green's mineral conditional purchase marked 6-7 over 6. Notice of my intention to make this application has been given in accordance with the regulations in that behalf. I hand herewith the sum of ten pounds (£10), being the first year's rent in advance of the said land. I hereby acknowledge that this application is made upon the distinct understanding and condition that if I shall abandon or fail to proceed with it, or, if it is refused, the Secretary for Mines for the time being may deduct from the sum of £10 deposited as aforesaid any cost to which in his opinion the Crown may have been put in or about or in respect of this application; and this application shall thereupon become and be void, and the possession aforesaid shall cease and determine.

And if the lease shall be granted, I shall and will commence mining operations upon or in connection with the demised land within seven days from and after the granting thereof, and shall and will employ not less than one man during the first year of the term thereby created, and not less than one man during the remainder of such term, and shall and will at any time when called upon, in terms of the regulations relating to mineral leases to do so, execute and take delivery of such lease, or failing therein for a period of fourteen days after being so called upon, I shall and will forfeit the sum of £10, all right or interest in and to the said land, and the possession thereof, and the said lease shall be forthwith cancelled.

I have, &c.,

SAMUEL SMITH.

No. 2.

Mr. S. Smith to The Under Secretary for Mines.

Sir,

Thackaringa, 24 August, 1882.

On the 28th December last I took out a miner's mineral license to search for minerals not gold, and two other licenses the next day for David Brooks and J. A. Sandland, and came to Thackaringa on the 21st January; left a man on the ground, but he had to leave it till the rain came, or he could get water from the well at the station, as the nearest water was 18 miles off. On the 3rd February I sent up tools to be ready as soon as they could work or get water. Man began prospecting on 12th April. On 27th May I sent £10 to Mr. Jason Irving, of Sydney, to take out the lease for me; and he wrote me he had purchased the land and put his own name in it, so that we were partners in the 40 acres. He says he had bought it. He had made many promises that he would come and see for himself and pay my expenses, but disappointed me every time. He promised to send lease, but has not as yet. As soon as I had sent the money I began working to raise ore, and had four men at work; that was after we had marked out the ground. It is an old survey, all the trenches or marks were filled up and blinded; we dug them out, put the pegs at the corners, and went to work in earnest. I have built a place to live in, and have lived in it since I put it up, and keep flour and other stores in it for the men. Mr. J. Stokie came to see us several times; had some tea and food with us. He is Mr. Green's agent. He never told us we were doing wrong in raising the ore. This was at the end of July. After that Mr. Green came and said the land was his, and he would prosecute me, &c. I never had the least idea the land was his. No one ever came to mark out the ground, or he would have found us there, but left us alone till we had a lot of ore raised. Then Mr. Stokie came with three teams to take the ore from us, but the men would not load him. I had gone to Wilcannia to see what Mr. Green had done. I saw Mr. Steel; he said Mr. Green had taken the land. If Mr. Stokie or Mr. Green had come at first, as soon as we took the land, I should not have been at much loss, but now I have been

been at so much expense it would ruin me. I took out a license and came to Sydney, so that I might begin in the right way, as I should be very sorry to defraud any man. Mr. Green has two blocks of 40 acres each adjoining this one I am on, neither of which he has worked since October last. I have also applied for another piece of land close to this; you have the application. Mr. Green said that was his. Mr. Stokie said he had applied for it, and caused me to enter an objection; but when I got to Wilcannia I found his statement was false, as he had not applied for it; but since that Mr. Stokie sent me a note saying it belonged to him and others. According to Mr. Stokie's own statement he never had a mineral license. As I understand the law no man can enter on Crown Lands without first taking out a mineral license, without defrauding the revenue and forfeiting his lease. I have sold out my little property in South Australia, and come to reside here, and I am a stranger or a new chum here. I now respectfully ask you for protection in a fair and honorable way, as it is rumoured about here that these men mean to hunt me out of the Colony, and harass me in every possible way.

I have, &c.,

SAML. SMITH.

P.S.—Enclosed I send you Mr. Steel's receipts, as I do not understand them. Thackaringa is 200 miles from Wilcannia. I had no knowledge or means of knowing anything about Mr. Green's application, so was not able to object to it.—S.S.

Will Mr. Warden Steel be good enough to report upon the matter of complaint, whether the land held by Mr. Smith under mineral license has been conditionally purchased; if so, date of possession under mineral license and date conditionally purchased; whether the applications to lease are for the same land, the date of each such application, whether the land in question has been measured.—H.W., B.C., 5/9/82.

Mineral Lease Regulations—Schedule 4.

Receipt for rent.

No. 2 of 1882.

RECEIVED this 8th day of August, 1882, the sum of £5, being the first year's rent in advance of 40 acres of land at or near Thackaringa, applied for by the undermentioned applicant under the Mineral Lease Regulations, for the purpose of mining for silver and lead. Application No. 2 of 1882.

Name and address of applicant,—

SAMUEL SMITH, Thackaringa.

W. A. STEEL,

Mining Registrar, Wilcannia.

Mineral Leases.

No. 82/1.

Receipt of Objector's Deposit.

In the matter of the application, No. 82/1, of the undermentioned person for a mineral lease under the "Mining Act, 1874," and of objections thereto, lodged by Samuel Smith.

Received from the objector the sum of £10, pursuant to the provisions of the said Act.

Dated at Wilcannia this 8th day of August, 1882.

Name and address of applicants,—

JOHN STOKIE and EDWARD NEGLER, Umburumberka.

W. A. STEEL,

Mining Registrar, Wilcannia.

No. 3.

Messrs. H. H. Brown & Co. to The Under Secretary for Mines.

Sir,

21 Exchange Buildings, Pitt-street, 31 August, 1882.

We have the honor to inform you that Mr. W. L. B. Brown mineral conditionally purchased 120 acres at Wilcannia, being portions 6 over 6, 7 over 6, and 8 over 6, of 40 acres each, as mineral conditional purchase 81-60. We are therefore to request that you will be pleased to inform Mr. Samuel Smith that his lease application 82/2, Menindie, is embraced within our client's mineral conditional purchase, and that in usual course this lease application will be refused.

We have, &c.,

H. H. BROWN & CO.,

Agents for W. L. B. BROWN.

No. 4.

The Warden, Wilcannia, to The Under Secretary for Mines.

Sir,

Wilcannia, 6 September, 1882.

I have the honor to return herewith the papers in connection with Samuel Smith's mineral lease, together with printed application as requested. I forwarded to you No. 6 schedule, duly signed by applicant on the 16th ultimo.

Thackaringa being as near Milparinka as Wilcannia, in view of the multifarious duties I am performing I would respectfully request that should an inquiry be necessary in this matter it be referred to the Warden at Milparinka.

I have, &c.,

W. A. STEEL,

Warden.

MINERAL LEASE REGULATIONS (SCHEDULE 2).

Application for Mineral Leases.

Sir,

I hereby make application for a mineral lease of that piece or parcel of land situated to the east and adjoining Thackaringa, 28 July, 1882. 6 over 6 block, marked locally 7 over 6, containing 40 acres, of which I took possession on the 28th day of July, at the hour of 2 o'clock in the afternoon, for the purpose of mining thereon and therein for silver and lead ore, by erecting posts 3 feet long and trenches 6 feet long at each angle thereof. The datum point is distant 6½ miles in an easterly direction from Thackaringa.

Notice of my intention to make this application has been given in accordance with the regulations in that behalf. I hand herewith £10, being the first year's rent in advance of the said land. It is already surveyed.

I hereby acknowledge that this application is made upon the distinct understanding and condition that if I shall abandon or fail to proceed with it, or if it is refused, the Secretary for Mines for the time being may deduct from the sum of

Mineral lease  
No. 1,811,  
forfeited 18th  
October, 1877.

of

of £10, deposited as aforesaid, any cost to which in his opinion the Crown may have been put in or about or in respect of this application; and this application shall thereupon become and be void, and the possession aforesaid shall cease and determine. And if the lease shall be granted I shall and will commence mining operations upon or in connection with the demised land within seven days from and after the granting thereof, and shall and will employ upon such land not less than one man during the first six months of the term thereby created, and not less than one man during the remainder of such term. And shall and will at any time when called upon in terms of the regulations relating to mineral leases, to do so, execute, and take delivery of such lease, or failing therein for a period of fourteen days, after being so called upon, I shall and will forfeit the said sum of £10, and all right, title, or interest in and to the said land and the possession thereof, and the said lease shall be forthwith cancelled.

I have, &c.,  
SAMUEL SMITH,  
Thackaringa,  
(Per Geo. Rayner, his Attorney).

The Secretary for Mines.

This application was received by me this 5th day of July, 1882, at the hour of 10 o'clock in the forenoon, and is numbered 82-2.—W. A. STEEL, Mining Registrar.

#### MINERAL LEASE REGULATIONS (SCHEDULE 6).

##### Notice of Application and Deposit.

Sir, I have the honor to inform you that I have this day deposited with the Mining Registrar at Wilcannia the sum of £10, being the first year's rent in advance of 40 acres of land near Thackaringa, for the purpose of mining for silver and lead. Previous survey accepted of the said land. The number of my application is No. 2 of 1882.

I have, &c.,  
SAMUEL SMITH,  
Thackaringa.

The Under Secretary for Mines.

#### No. 5.

##### Messrs. H. H. Brown & Co. to The Under Secretary for Mines.

Sir, 21 Exchange Buildings, Pitt-street, 12 September, 1882.  
We have been instructed by our clients, Messrs. Garot, Green, and Ottoway, the holders of portions 6 over 6, 7 over 6, and 8 over 6, shown on the enclosed tracing, to point out that one Samuel Smith applied at Menindie for a mineral lease No. 82-2, portion 7 over 6, and has worked portion 8 over 6, and taken therefrom some 10 tons of ore, valued at £35 per ton; now it is clear that at the time Smith applied this portion 7 over 6 was under mineral conditional purchase by Cozens and Manton, and not open to lease, which therefore should be refused.

We have to request that you will be pleased to take such steps as may be necessary to cause Smith to discontinue work, and so prevent further injustice to our clients.

We have, &c.,  
H. H. BROWN & CO.,  
Agents for Garot, Green, and Ottoway.

This matter might be referred to the Warden at Milparinka for inquiry and report, and Mr. Warden Steel might be asked to transfer the papers *re* S. Smith's complaint to Mr. Warden King.

Submitted.—H.W., 21/9/82. Approved.—A.R., 22/9/82. Mr. Warden King, B.C., 28/9/82.—H.W.

#### No. 6.

##### The Under Secretary for Mines to The Warden, Wilcannia.

Sir, Department of Mines, Sydney, 27 September, 1882.  
With reference to mineral lease application No. 82-2, Wilcannia, by Samuel Smith, I have the honor to inform you that the matter has been referred to Mr. Warden King at Milparinka for inquiry and report.

2. Will you be so good as to forward to that officer all the papers you may hold in the matter of S. Smith's complaint.

I have, &c.,  
HARRIE WOOD,  
Under Secretary.

#### No. 7.

##### The Warden, Wilcannia, to The Under Secretary for Mines.

Sir, Wilcannia, 4 October, 1882.  
I have the honor to acknowledge receipt of your letter of the 27th ultimo, informing me that the matter of the mineral lease application No. 82-2 had been referred to Mr. Warden King, at Milparinka, for report.

I beg to state that I have this day forwarded all papers in my possession to Mr. King, having reference to the above case.

I have, &c.,  
W. A. STEEL,  
Warden.

Seen.—H.W., 10/10/82.

#### No. 8.

##### Telegram from Under Secretary for Mines to Mr. Warden King.

Sydney, 10 October, 1882.

It would, perhaps, be better to hold the inquiry at Thackaringa.

## No. 9.

## Mr. S. Smith to The Under Secretary for Mines.

Sir,

James Town, 23 October, 1882.

I take the liberty to inform you that Messrs. Green, Stokie, and a lot of others are disputing my right to section 7 over 6 at Thackaringa, and not only mine but one Mr. C. C. Kingston has taken up or applied for. Mr. Kingston's section is on the east side adjoining 7 over 6, and also another man's (Joseph Much) application about 1½ mile south of 7 over 6, and another of J. Holman's on the south side adjoining 7 over 6. These people are claiming all the country, and are running us to all the expense and trouble they can possibly give. We have a blacksmith's forge erected on the ground and were working the mine in a proper manner, but these annoyances greatly hinder us. We intend to cart our water from Umberumberka, 18 miles, because we are refused water at Thackaringa when the dry weather is set in. Green & Co. have never done any work of any kind on these claims we are taking out. They will neither work it nor let us if they can help it, and I most respectfully ask you for your protection in this. I enclose Mr. Steel's letter; you will see that he is sending us to Milparinka to obtain our licenses, that is 200 miles beyond Wilcannia. The cost for mail from Thackaringa to Wilcannia is £3 10s.; from Wilcannia to Milparinka £4, so there and return is £15,—besides other expenses and great loss of time. Mr. Holman went to Adelaide to arrange with Mr. Kingston to work the mine for him, but was taken ill, which has caused delay in not filling up and sending in the application forms. I am now going up to Wilcannia, to be there ready on the 3rd November at the Court, when Green & Co. are going to try and expel us from the claims, but we rely upon your protection.

I am, &amp;c.,

SAMUEL SMITH.

From this letter it would appear that persons going from Thackaringa to Milparinka must travel *via* Wilcannia. Mr. Warden Steel may be asked if that is true. If so it would be advisable to make the Wilcannia office the one in which business at Thackaringa should be transacted. Submitted.—H.W., 3/11/82. Approved.—A.R., 7/11/82.

[Enclosure.]

The Warden, Wilcannia, to Mr. J. H. Holman.

Sir,

Wilcannia, 19 September, 1882.

I am in receipt of your remittance of £30 per telegraph, as well as your letters to hand to-day, enclosing written applications for mineral leases.

I beg to inform you that the applications must be on the printed forms herewith, and will not be received at the Mines Department as sent by you.

I further beg to state that in future all applications must be made to the Principal Warden for the Albert Gold Fields, at Milparinka, Mr. King, P.M.

I forward forms which must be duly filled in, signed, and returned to me before I can receive your application.

I have, &amp;c.,

W. A. STEEL.

## No. 10.

## The Warden, Thackaringa, to The Under Secretary for Mines.

Sir,

Thackaringa, 3 November, 1882.

In compliance with the instructions conveyed to me by your telegram of 10th ultimo, to hold an inquiry into a dispute between Messrs. Green, Garot, and Ottoway and Samuel Smith, I have now the honor to inform you that after a tedious journey of 230 miles I arrived here this morning at 11 a.m. and immediately proceeded to investigate the cause of dispute, and after taking evidence, enclosed herewith, I proceeded to the site of the mines, which are situated 7 miles in an easterly direction from this place at about the southern extremity of the Barrier Ranges. I found that a considerable quantity of silver ore which had been raised by Smith had been taken away by Garot and sent to Adelaide for shipment to England as ballast at 2s. 6d. per ton, cost of carriage from the mine to Adelaide being £5 per ton. I therefore considered it advisable to stop all further work at the mines pending the consideration of the dispute. The reef as opened shows a direction nearly due east and west and dips to the north at an angle of about 60 degrees. Several leaders running north and south seem to cut the main reef and are all very rich in ore. I have secured some specimens of the ore which I will forward by the first opportunity. All the ore that has been raised has been taken from the surface to a depth of not more than 3 feet, so that as yet the working has been very primitive, but there is everything to indicate that this will be a very rich claim.

No work of any importance is being done on the other claims and the other disputants withdrew their charges.

I start for Milparinka to-morrow (Saturday) morning, and hope to reach my journey's end by the following Saturday.

I have, &amp;c.,

C. M'A. KING,

Warden.

Take action and ascertain whether the statement respecting the M.C.P. of portion 7 over 6 by W. Brown is true; and, if so, what date it was made and was cancelled respectively.—H.W., 16/11/82.

From the minute by the Minister for Lands it appears that on the date on which the applicant to lease took possession the land was the subject of a conditional purchase and consequently was not available. Application No. 82-2 may therefore be refused. Submitted.—H.W., 27/4/83. Approved.—J. P. ABBOTT, 27/4/83.

[Enclosures.]

Thackaringa, 3 November, 1882.

BEFORE me, Charles Macarthur King, Esquire, Warden of the Albert Gold-fields,—An inquiry into a dispute between Messrs. Garot, Green, and Ottoway and Samuel Smith, relative to an encroachment by the said Samuel Smith upon the mineral lease portion 7-6 in the possession of A. L. Garot.

A. L. Garot, being duly sworn, states: I am a watchmaker, and reside in Wilcannia; I do not hold a miner's license, as the land in question has been taken up under a mineral conditional purchase; my daughter, Adele Louisa Garot, took up under mineral conditional purchase portion No. 81-60 (7 over 6 on map) on the 7th September, 1882; I took possession of the land for my daughter on the 7th October, and am residing on the land and working it ever since; on Monday, the 9th October, I found C. M. Hotherington and others working on the land; I served the accompanying notice on

on Hetherington ; they still went on working and said they were working for Samuel Smith ; after serving the above notice one load of about 4 tons of ore was removed by the orders of Hetherington and the others ; no ore has since been removed to my knowledge ; the day after I took possession of the ground Hetherington removed my notice board ; I put it up again, and on the following day he (Hetherington) pulled it down again ; they continued working there for about a week and then left off and have not worked there since ; I have been carrying on the work on the claim undisturbed ever since ; the block I selected in my daughter's name is 7 over 6, and not 6 over 7, as described in the copy of application.

Sworn before me, this 3rd day of November, 1882,—

C. M'A. KING, Warden.

A. L. GAROT.

*Samuel Smith*, being duly sworn, states : I am a limeburner, and reside at Thackaringa ; I hold a miner's license No. 64, dated, 28th December, 1881 ; in force until 27th December, 1882, issued from Sydney by W. Newcombe ; by virtue of this miner's license on the 28th July I took possession of 7 over 6 block, having previously written to the Under Secretary for Mines inquiring whether this block was open for selection ; his reply was that a lease of the blocks Nos. 181 and 182 had been cancelled on the 19th October, 1877 ; on the 28th July I wrote and forwarded an application for this 7 over 6 block and have received no reply from the Mining Department, but I have been working the claim ever since until interfered with by Mr. Garot ; Mr. Garot has sent away about 12 tons of the ore that I raised ; I had raised 87 tons 17 cwt. ; I have had no work done at the mine since Mr. Garot took possession, but my men, C. Hetherington and others, have been on the ground every day since.

*Cross-examined by Garot* : I paid my men for raising 87 tons 17 cwt., the same being weighed by my agent, C. Hetherington.

Sworn before me, this 3rd day of November, 1882,—

C. M'A. KING, Warden.

SAMUEL SMITH.

In addition to the above evidence it appears that this block (7 over 6) was originally taken up by W. Brown and transferred to Cozens and Manton, and this transfer was approved of by letter from the Mining Department dated 13 March, 1882 ; on the 4th September, 1882, the land was abandoned by Cozens and Manton and taken possession of by A. L. Garot on the 7th September instant as a mineral conditional purchase, but his application has not been replied to by the Mining Department ; it will also be noticed that Garot has not provided himself with a mineral license.

From the evidence of S. Smith, which could not be controverted by Garot, it appears that he provided himself with a miner's license, and having ascertained from the Mining Department that the land in question had been under lease but the lease had been cancelled on the 19th October, 1877, put in an application to lease the land dated 28 July, 1882, but as yet has received no answer from the Mining Department, but was in actual occupation of the land five weeks before Garot's application was sent in. I am therefore of opinion that as Smith's application preceded that of Garot, Smith has a better claim to the land than Garot. Each party has been warned to suspend work at the claim pending the consideration of the case by the Mining Department.

In the case of Green v. Smith it was settled by Smith foregoing any claim he might have to the land Green claimed and the same with regard to Ottoway's claim.

John Stokie was present during the above inquiry, but made no objection.

C. M'A. KING,  
Warden.

#### No. 11.

The Under Secretary for Mines to The Warden, Wilcannia.

Sir,

Department of Mines, Sydney, 17 November, 1882.

It appears from the following extract from a letter from Mr. Samuel Smith, of James Town, that persons going from Thackaringa to Milparinka must travel via Wilcannia, and I am to ask you to be so good as to say whether this is the fact, as, if so, it is deemed advisable to make the Wilcannia office the one in which business at Thackaringa should be transacted.

I have, &c.,  
HARRIE WOOD,  
Under Secretary.

"I enclose Mr. Steel's letter ; you will see that he is sending us to Milparinka to obtain our licenses, that is 200 miles beyond Wilcannia."

#### No. 12.

The Under Secretary for Mines to The Chief Commissioner.

Sir,

Department of Mines, Sydney, 22 November, 1882.

I have the honor to request that you will be so good as to have the following information furnished to this office at your earliest convenience, viz : Whether portion No. 5 in the county of Yancowinnia, and containing 40 acres of land, has been at any time conditionally purchased for mining purposes by W. L. B. Brown, and, if so, on what date the purchase was made ? Also whether the purchase has been cancelled, and the date of cancellation, if any ?

I have, &c.,  
HARRIE WOOD,  
Under Secretary.

#### No. 13.

The Under Secretary for Mines to The Chief Commissioner.

Sir,

Department of Mines, Sydney, 2 February, 1883.

I have the honor to invite your attention to my letter of the 22nd November last, asking if the land portion 5 in the county of Yancowinnia, containing 40 acres, has been at any time conditionally purchased for mining purposes by W. L. B. Brown ; and, if so, the date of purchase, whether the purchase has been cancelled, and the date of cancellation, if any ; and I would ask you to be good enough to favour me with an early reply.

I have, &c.,  
HARRIE WOOD,  
Under Secretary.

## No. 14.

## Minute of Secretary for Lands.

Mr. Moriarty,

The Mines inform me that they are awaiting our decision *in re* Smith and Garot's case. If that be the case the papers had better not be sent to Mines, but when the papers are found we should deal with the matter on its merits as shown by papers. J.S.F., 26/4/83.

The papers were sent to the Mining Department immediately on the Minister's note being written.—A.O.M., 26/4/83. The Under Secretary for Mines, B.C., 27/4/83.—A.O.M.

## No. 24.

## Mr. T. Marshall to The Secretary for Mines.

Sir,

Sydney, 5 July, 1883.

I have the honor to acknowledge the receipt of a communication from the Under Secretary for Mines, of the 29th May last, addressed to Mr. Samuel Smith, of Thackaringa (and which only reached me yesterday), by which he is informed that his application for a mineral lease, made on 8th July, 1882, has been refused on the ground that the land applied for was not available for selection at date of taking possession by him.

In reply, I have to ask that you be pleased to direct that such cancellation of Mr. S. Smith's be revoked until the hearing of a suit now pending in the Supreme Court here, in which the said S. Smith is the defendant, and in which the question of his right to the land, so applied for by him under lease, is involved.

I may mention, it will, in the opinion of counsel, be shown that the land was available for selection within the meaning of the Act of 1880, when Smith occupied same under a mineral license, and applied for a lease, as required by the Regulations. He has occupied the land ever since, and expended nearly £1,000 in mining operations and improvements on the land, and I respectfully submit, that as so long a time has elapsed (twelve months) since Smith made his application, and that it has only just now been discovered that the land was not open for selection, although it was virgin soil and had never been occupied, that you should allow the application of Smith to remain in abeyance until the hearing of the suit referred to, as otherwise Mr. Smith will be seriously prejudiced in such suit, &c.

I have, &c.,

THOMAS MARSHALL.

The delay in dealing with this case is due to the fact that we had to ascertain from the Lands Department that the conditional purchase was regarded by that Department as a valid one. On receipt of the information, Mr. Smith's application to lease was at once refused. If it had been known that the matter was before the Supreme Court it is possible the action upon the application would have been deferred till the decision of the Court had been given. Under the circumstances it might perhaps be proper to revoke the refusal pending the decision of the Court. Submitted.—H.W., 9/7/83.

I think, under all the circumstances, that the refusal of the lease ought to be revoked, and Mr. Smith placed in the position in which he was when he applied for the lease, and I do now revoke and set aside such refusal.—J. P. ABBOTT, 10/7/83.

## No. 25.

## Minute for Executive Council.

Recommending the refusal of certain application for mineral lease be revoked.

Department of Mines, Sydney, 16 July, 1883.

It is recommended to His Excellency the Governor and the Executive Council that the refusal of the application for the mineral lease of Crown Lands specified in the annexed Schedule be revoked.

J. P. ABBOTT.

## No. 29.

The Chief Commissioner to The Under Secretary for Mines.

Sir, Department of Lands, Conditional Sales Division, Sydney, 9 August, 1883.

Adverting to the inquiry contained in your letter of 2nd February last, I have the honor to inform you that the portion  $\frac{1}{2}$  in the county of Yancowinnia was conditionally purchased in conjunction with portions  $\frac{1}{2}$  and  $\frac{1}{2}$  by W. L. B. Brown at Wilcannia, on the 22nd December, 1881, and that the purchase was declared void at the request of the alienees, A. P. Manton and R. Cozens, on ground of the portion  $\frac{1}{2}$  alone being available on 21st September, 1882, under decision dated 4th idem.

I have, &c.,

WM. BLACKMAN,

(For Chief Commissioner.)

Wilcannia C.P., 81-60, 120 acres, portions  $\frac{1}{2}$ ,  $\frac{1}{2}$ , and  $\frac{1}{2}$ , 40 acres each.—W. L. B. BROWN.

Await further information respecting action said to be pending in the Supreme Court.—H.W., 13/8/83.

## No. 30.

Telegram from Under Secretary for Mines to Warden Gower, Wilcannia.

Sydney, 20 August, 1883.

PLEASE ascertain from Register date of receipt of mineral lease application, 82-2, S. Smith, near Thackaringa. Deposits said to have been lodged 4th August, 1882.

## No. 31.

Mr. Warden Gower to The Under Secretary for Mines.

Wilcannia, 21 August, 1883.

IN register of mineral lease applications, Samuel Smith, application 82-2, Wilcannia, 40 acres Thackaringa, is noted as received on 15th August, 1882, at 12 noon; but receipt for rent and cash-book dated 8th August, 1882.

G. H. GOWER.

Will Mr. Warden Steel be good enough to compare the date of receipt of the application as endorsed on it by him, the date of deposit as given in the form Schedule 6, which appears to have been filled up by Mr. Warden Steel, with the dates given herein by Mr. Warden Gower. It may be necessary to refuse the application on the ground that it was not lodged within ten days after date of taking possession, and it is therefore important that the correct date of the application and deposit be ascertained.—H. W., B.C., 21/8/83.

---

No. 32.

Mr. Warden Steel to The Under Secretary for Mines.

Sir,

Hill End, 27 August, 1883.

Referring to your memo of the 21st instant, requesting me to compare the date of my endorsement on Samuel Smith's mineral lease application, and date of deposit in Schedule 6 (herewith), with the dates given by Mr. Warden Gower,—

In reply, I beg to state that it is clear to me that the date of my endorsement on the application is a clerical error, and should be the 8th of August, instead of July as written, and that the deposit was received on the same day—as appears in the receipt book at Wilcannia.

I have, &c.,

W. A. STEEL,

Warden.

On looking through the papers herewith I recollect that the date of receipt (15 August), given by Mr. Gower, is the date on which the printed application was returned to me in lieu of Smith's written application.—W. A. STEEL, Warden.

The Under Secretary for Mines, Sydney,—No further action appears to be necessary at present.—H. W., 25/9/83.

## MINING AND LAND ACTS.

### No. 1.

#### Application by Mr. Richard Green.

C. [Alienation Act, section 19.]

District of Mitchell. No. 32 of 1880.  
Application by Richard Green for the conditional purchase, without competition, of 40 acres, unimproved Crown Land.

Received by me, with a deposit of £20, this 2nd day of September, 1880, at 12 o'clock,—

W. A. STEEL,

Agent for the Sale of Crown Lands at Wilcannia.

Sir,

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 40 acres; and I herewith tender the sum of £20, being a deposit at the rate of 10s. per acre on the area for which I apply.

I am, &c.,

To the Agent for the Sale of Crown Lands at Wilcannia.

RICHARD GREEN.

#### Description.

County of Menindie, parish unnamed, 40 acres of land, for the purpose of mining, situated between two blocks of mineral land leased by John Stokie, on the 3rd and 5th of June, 1876, and bounded by the said John Stokie's most southern block on the north side. This land is situated in an easterly direction about 6 miles from the Thackaringa Hotel, at the Barrier Ranges, near the South Australian Border.

### No. 2.

#### Gazette Notice.

Department of Lands, Conditional Sales Division, Sydney, 24 September, 1880.

Lapsed conditional purchases.

NOTICE is hereby given that the undermentioned conditional and additional conditional purchases of land under the Crown Lands Alienation Act of 1861 have become lapsed through non-receipt of the necessary declarations and non-payment of balance or instalment of purchase money as prescribed by the Act, and that the lands will be offered for sale, as early as practicable, by competition at public auction, if not in the meantime conditionally purchased afresh, to which they will be liable, on the expiration of thirty days from the present date.

JAMES HOSKINS.

#### Application by Mr. C. Ottaway.

C. [Alienation Act, section 19.]

District of Mitchell. No. 40 of 1880.  
Application by Charles Ottaway for the conditional purchase, without competition, of 40 acres unimproved Crown Land.

Received by me, with a deposit of £20, this 28th day of October, 1880, at 12 o'clock,—

W. A. STEEL,

Agent for the Sale of Crown Lands at Wilcannia.

Sir,

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 40 acres; and I herewith tender the sum of £20, being a deposit at the rate of 10s. per acre on the area for which I apply.

I am, &c.,

To the Agent for the Sale of Crown Lands at Wilcannia.

CHARLES OTTAWAY,  
Wilcannia.

#### Description.

County of Menindie, parish unnamed, 40 acres, situated adjoining and south of Richard Green's 40-acre mineral selection No. 32-80, selected September 2nd, 1880. This land is applied for for the purpose of mining for lead and silver.

#### Minutes on No. 3.

By Surveyor-General:—Mr. Surveyor Vickery, to measure if unobjectionable.—W.C., for Surveyor-General, 8/12/80. Transferred to Mr. Licensed Surveyor Bray.—E. G. VICKERY, Surveyor, Wilcannia, 30/1/81. This

This application appears to refer to portion No. 8 over 6, county of Menindie, measured I believe by Mr. Licensed Surveyor Chamberlain, being 40 acres mineral conditional purchase formerly held by Green.—ARTHUR H. BRAY, Licensed Surveyor, 30/6/81.

Will Mr. Bray be good enough to state name of parish, or if none, name of run.—E. G. VICKERY, Surveyor, Wilcannia, 11/7/81. The portion is situated on Victoria Block D Run. There is no parish.—ARTHUR H. BRAY, Licensed Surveyor, 27/9/81.

No. 4.

Application by Mr. T. J. Haydon.

District of Mitchell. [Alienation Act, section 19.]  
No. 7 of 1881.  
Application by Thomas John Haydon for the conditional purchase, without competition, of 40 acres unimproved Crown Land.

Received by me, with a deposit of £20, this 27th day of January, 1881, at 12 o'clock,—

W. A. STEEL,

Agent for the Sale of Crown Lands at Wilcannia.

Sir, 27 January, 1881.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 40 acres; and I herewith tender the sum of £20, being a deposit at the rate of 10s. per acre on the area for which I apply.

I am, &c.,

To the Agent for the Sale of Crown Lands at Wilcannia.

THOMAS JOHN HAYDON.

Description.

County of Menindie, parish unnamed, 40 acres of land, for the purpose of mining, situated between two blocks of mineral land leased by John Stokie on the 3rd or 5th of June, 1876, and bounded by the said John Stokie's most southern block on the north side. This land is situated in an easterly direction, about 6 miles from the Thackaringa Hotel, at the Barrier Ranges, near the South Australian border, this being the identical 40 acres selected by Patrick Green, on the 6th July, 1876, and gazetted cancelled on the 24th September, 1880, No. 17 of 1876.

---

No. 5.

Application by Mr. W. L. B. Brown.

District of Mitchell. [Alienation Act, section 19.]  
No. 60 of 1881.  
Application by Walterus Le Brun Brown for the conditional purchase, without competition, of 120 acres unimproved Crown Land.

Received by me, with a deposit of £60, this 22nd day of December, 1881, at 11 o'clock,—

W. A. STEEL,

Agent for the Sale of Crown Lands at Wilcannia.

Sir, 22 December, 1881.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 120 acres; and I herewith tender the sum of £60, being a deposit at the rate of 10s. per acre on the area for which I apply.

I am, &c.,

To the Agent for the Sale of Crown Lands at Wilcannia.

WALTERUS LE BRUN BROWN,  
Wilcannia.

Description.

County of Yancowinna, parish unnamed, 120 acres, near Thackaringa, Barrier Ranges, being portions Nos. 6 over 6, 7 over 6, and 8 over 6, to be used for mining purposes other than gold-mining, under 19th section of the Lands Act of 1861.

---

No. 6.

Memorandum by Surveyor-General.

Conditional Purchase No. 81-60. 22, December, 1881.

Applicant, Walterus Le Brun Brown, 120 acres, section 19, parish unnamed, county Yancowinna.

Description.

120 acres near Thackaringa, Barrier Ranges, being portions No. 6 over 7, 7 over 6, and 8 over 6, to be used for mining purposes other than gold-mining, under the 19th section of the Land Act of 1861.

17 January, 1882, Surveyor-General's Office.

Mr. Surveyor Vickery will be good enough to furnish immediately date of transmission and No. of his plan, or such information as will lead to the identification of the portions above alluded to. In the event of the land not having been measured by him, he will be good enough to send this at once to the District Surveyor, in order that the information required may be obtained, and thus save the land applied for from being sent in for auction sale.

M. CANTY,

(For Surveyor-General).

---

Minute on No. 6.

This application in all probability refers to portions Nos. 6 over 6, 7 over 6, and 8 over 6, catalogued in the county of Menindee as M. 23-1,814, M. 105, and M. 106, but now in the county of Yancowinna.—E. G. VICKERY, Surveyor, 26 January, 1882.

## No. 7.

## Notification of alienation of conditional purchase.

H. [Alienation Act, section 19.]

Notification of alienation of conditional purchase by Walterus Le Brun Brown, in the district of Mitchell. I HEREBY notify to you, as the Agent for the Sale of Crown Lands for the district of Mitchell, that I have (\*after a residence thereon of at least twelve months), in consideration of the sum of £60, this day alienated to Richard Cozens and Arthur Percy Manton, of Sydney, the 120 acres of land, situated in the county of Yangowinna, parish unnamed, which was selected at Wilcannia by W. Le B. Brown as a conditional purchase under the 19th section of the Crown Lands Alienation Act of 1861, on the 22nd December, 1881, as also the following additional purchases (*to be inserted with particulars thereof if necessary*):—

WALTERUS LE BRUN BROWN,  
Wilcannia.

Dated at Wilcannia, this 18th February, 1882.

Witness,—W. A. STEEL, J.P.

To the Agent for the Sale of Crown Lands at Wilcannia.

I have duly registered the above notification of alienation in the records of this office.  
Fee of 17s. 6d. paid, including 7s. 6d. for registration fee, and 10s. stamp duty.

District of Mitchell, Land Office, Wilcannia, 18 February, 1882.  
W. A. STEEL,  
Agent for the Sale of Crown Lands.

\* If the full term of residence has been completed in the original conditional purchase, or if for mining purposes, these words should be omitted.

Received into the Office of the Registrar-General, at Sydney, this 1st day of May, A.D. 1882, at 10 o'clock in the forenoon, from Frederick Murray, of Sydney, a copy of the above transfer, verified by W. Le B. Brown, of Wilcannia, and numbered 324, book 244.

J. H. BOSCAWEN DUFF,  
Deputy Registrar-General.

## No. 8.

## Memorandum by Surveyor-General.

Mr. Licensed Surveyor Bray states that this application (conditional purchase 83-40) appears to refer to portion No. 8 over 6, county of Menindie, &c.; but as a subsequent conditional purchase 81-60 has defined the portions required, Mr. Licensed Surveyor Tritton will be good enough to ascertain the precise position required for the land applied for under conditional purchase 80-40, stating how far, if at all, it conflicts with conditional purchase 81-60.

Conditional purchase 81-60 must also be correctly located.

M. A. M'LEAN,  
(For Surveyor-General),  
26 May, 1882.

*Minutes on No. 8.*

Mr. Surveyor Tritton, in accordance with above.—M. A. M'LEAN (for the Surveyor-General), 12 June, 1882. Transferred to Mr. Surveyor Barlow.—F. L. TRITTON, Surveyor, Dubbo, 31 August, 1882. Transferred to Mr. Licensed Surveyor Bray, who will be good enough to procure the necessary information above referred to when next in the locality.—M. BARLOW, Surveyor, Cobar, 28 October, 1882. Replied to by No. 83-26 of 8th March, 1883.—ARTHUR H. BRAY, Licensed Surveyor.

## No. 9.

## Application by Mr. R. Green.

C. [Alienation Act, section 19.]

District of Mitchell.

No. 27 of 1882.

Application by Richard Green for the conditional purchase, without competition, of 40 acres unimproved Crown Land.

Received by me, with a deposit of £20, this 3rd day of August, 1882, at 2 o'clock.

W. A. STEEL,  
Agent for the Sale of Crown Lands at Wilcannia.

Sir.

3 August, 1882.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 40 acres; and I herewith tender the sum of £20, being a deposit at the rate of 10s. per acre on the area for which I apply.

I am, &c.,  
RICHARD GREEN,

To the Agent for the Sale of Crown Lands at Wilcannia.

Bourke.

## Description.

County of Menindie, parish unnamed, 40 acres, adjoining T. J. Haydon's mineral conditional purchase, made 27th January, 1881, on the eastern side, and formerly forfeited by John Stokic.

No. 10.

## No. 10.

Mr. R. Cozens to The Under Secretary for Lands.

Sir,

Cavendish-street, Enmore, 11 August, 1882.

My application made the 22nd December, 1881, for conditional purchase of 120 acres, district of Mitchell. On the 18th April, 1882, by notice, the same was registered to me, in conjunction with A. P. Manton, and for which I gave my cheque on the Commercial Bank for the sum of £60 stg.; the same was duly honored. I have now learned that, instead of 120 acres, there are only 40 acres available. This reduced area I decline to accept, and have therefore the honor to request a refund of the said sum of £60, which was wholly my money. By your kindly complying with my request, or instructing me how to procure the said refund, I will be happy to give any bond of indemnity which may be deemed requisite as against other claimants.

Your early attention to the above will oblige,—

Yours, &amp;c.,

RICHARD COZENS.

## No. 11.

Messrs. A. P. Manton and R. Cozens to The Under Secretary for Lands.

Sir,

Cavendish-street, Enmore, 17 August, 1882.

With reference to Mr. Cozens' letter of the 11th instant, having since ascertained that the application for refund on conditional purchase 81-60, transferred to us by Mr. Walterus Le Brun Brown, must be made in our joint names, we now beg to apply for refund of our deposit, as we understand that there are only 40 acres out of 120 acres available.

Please make refund order payable to Mr. Richard Cozens.

We have, &amp;c.,

A. P. MANTON.

RICHARD COZENS.

*Minutes on No. 11.*

By Surveyor-General:—It is submitted that this application (conditional purchase 81-60) be declared void, portion 8 over 6 being previously conditionally purchased under mineral conditional purchase No. 80-40, by Charles Ottaway, and portion 6 over 6 under mineral conditional purchase 81-7, by T. J. Haydon, thus leaving only 40 acres available. No refunds need be made to the holder of conditional purchase 81-60, as to the balance of area, refund of deposit having been applied for by this letter.—CLAS. E. FINCH (for Surveyor-General), 4 September, 1882. By Chief Commissioner:—For refund.—A.O.M., 4/9/82.

## No. 12.

Messrs. A. P. Manton and R. Cozens to Messrs. H. H. Brown &amp; Co.

Dear Sirs,

21, Exchange Buildings, Pitt-street, 1 September, 1882.

With reference to your conversation of this day, we agree to withdraw our mineral conditional purchase No. 81-60, for and in consideration of the sum of £25 being paid to you, to be handed to us so soon as your clients shall have had an opportunity of selecting, and we promise to urge the withdrawal and not to give any information on the subject to any person other than yourselves.

A. P. MANTON,

COZENS &amp; MANTON.

## No. 13.

Mr. A. Armstrong to The Chief Commissioner.

Sir,

Land Agency Office, 26, Bridge-street, Sydney, 5 September, 1882.

As agent for R. Green, I have the honor to request the favour of his case being considered, with a view to his title to the selection particularized in the margin, 82-27, being recognized by the Department, confirmed and ratified under 14th section.

My client asserts that conflicting applicant under mineral lease application was not in possession under mineral license prospecting holding, and has applied to the Department of Mines to admit of his being heard at any inquiry which may be instituted for the purpose of ascertaining the true position Smith holds, and now begs that your Department may withhold decision until the Department of Mines has fully dealt with Smith's claim.

I have also to request that later selections of the same land by Adèle Louise Garot (82-41 Wilcannia) be declared void, as it was not Crown Lands at date of Miss Garot's application, and also that it was improved to bar selection.

I have, &amp;c.,

A. ARMSTRONG,

Agent for R. GREEN.

## No. 14.

Application by Miss A. L. Garot.

C.

[Alienation Act, section 19.]

No. 41 of 1882.

District of Mitchell.

Application by Adèle Louise Garot, spinster, minor, aged 17 years on March 10th, 1882, for the conditional purchase, without competition, of 40 acres unimproved Crown Land.

Received by me, with a deposit of £20, this 7th day of September, 1882, at 10 o'clock,—

W. A. STEEL,

Agent for the Sale of Crown Lands at Wilcannia.

Sir,

C.P. 82-27, R. Green, Wilcannia.

M.L. 82-9,766, T. Smith, Wilcannia.

C.P. 82-41, Adèle Louise Garot, Wilcannia.

Sir,

7 September, 1882.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 40 acres; and I herewith tender the sum of £20, being a deposit at the rate of 10s. per acre on the area for which I apply.

I am, &c.,

ADELE LOUISE GAROT,

Wilcannia.

To the Agent for the Sale of Crown Lands at Wilcannia.

Description.

County of Yancowinna, parish unnamed: Commencing at the north-east corner of T. J. Haydon's mineral conditional purchase of 40 acres, No. 81-7, 6 over 6, selected 27/1/81; thence east, thence south, thence west, thence north, to point of commencement, being portion No. 81-60 (7 over 6 in map), selected 22/12/81, by W. L. B. Brown (transfer of which to Cozens & Manton was approved 13/3/82), and adjoining on the south my mineral conditional purchase of 40 acres, No. 82-30, selected 17th August, 1882, being on Victoria Block A Run.

Minute on No. 14.

I duly warned applicant that this land was not available for selection, having been selected by W. Le B. Brown.—W. A. STEEL, Land Agent, 22/2/82.

No. 15.

Messrs. H. H. Brown & Co. to The Chief Commissioner.

Sir,

21, Exchange Buildings, Pitt-street, 11 September, 1882.

We have the honor to apply (as agents for Mr. Richard Green) for a refund of the deposit on the mineral conditional purchase noted in the margin, on the ground that the land at the date of our client's mineral conditional purchase was the subject of a mineral conditional purchase 81-60 of 120 acres.

Richard Green, M.C.P. 82-27, 40 acres, Wilcannia.

Trusting you will be pleased to forward to us the voucher for refund of the deposit as early as possible,—

We have, &c.,

H. H. BROWN & CO.,

Agents for RICHARD GREEN.

Minutes on No. 15.

By Surveyor-General:—It is submitted that this application, conditional purchase 82-27, be declared void, the land applied for, portion 7 over 6, being held by conditional purchase 81-60 at date of this application, which conditional purchase stood good at date of application, voiding not having taken place till 4th September, 1882, unless a conditional purchase that is voided is considered never to have existed.—ROBT. D. FITZGERALD, for Surveyor-General, 20 October, 1882.

Attention is drawn to conditional purchase 82-41, enclosed. The Chief Commissioner of Conditional Sales.

P.S.—It may be observed that conditional purchase 81-60 was declared void at applicant's request, as the whole area applied for was not available, or in other words, portion 7 over 6 was the only portion available under that conditional purchase.—M. A. McLEAN, for Surveyor-General, 20 October, 1882.

No. 16.

The Chief Commissioner to Messrs. Cozens and Manton.

Department of Lands, Conditional Sales Division, Sydney, 21 September, 1882.

Gentlemen,

I desire to inform you that the application made by Walterus Le Brun Brown, at Wilcannia, on the 22nd December, 1881, and transferred to you on 18th February, 1882, for the conditional purchase of 120 acres of land, is void, the land having been at date of application held under the prior conditional purchase of 80-40 by Charles Ottaway and 81-7 by T. J. Haydon.

Deposit paid, £60.

2. Enclosed is a form which, on being filled up in accordance with the instructions thereon, and forwarded to the Treasury, Sydney, will enable you at once to obtain the refund of your deposit.

I have, &c.,

WM. BLACKMAN,

(For Chief Commissioner).

[Enclosure to No. 16.]

NEW SOUTH WALES.

[Special Payments Form No. 2.]

Conditional Purchase—Revenue refunded.

Department of Lands, Conditional Sales Division, Sydney, 21 September, 1882.

Dr. to Messrs. R. Cozens and A. P. Manton.

		£	s. d.
For the following refund, viz., C.P. No. 81-60.			
Land Office at Wilcannia; date of selection, 22nd day of December, 1881 (transferred on 18th February, 1882); deposit paid on 120 acres.			
Selection void, the land having been held under the prior conditional purchases of 80-40 by Charles Ottaway and 81-7 by T. J. Haydon.			
Deposit to be refunded on 120 acres .....	£	60	0 0

## No. 17.

The Chief Commissioner to The Land Agent, Wilcannia.

Sir, Department of Lands, Conditional Sales Division, Sydney, 21 September, 1882.

Walterus Le  
Brun Brown,  
22nd December,  
1881.

I desire to inform you that the application of Messrs. R. Cozens and A. P. Manton, on the 18th February, 1882, for the conditional purchase of 120 acres of land, is void, the land having been at date of application held under the prior conditional purchases of 80-40 by Charles Ottaway, and 81-7 by T. J. Haydon.

2. A form for refund of deposit has been forwarded for the signature of the alienees, the nature of which you will be so good as to explain to them if required.

I have, &c.,  
WM. BLACKMAN,  
(For Chief Commissioner).

## No. 18.

The Chief Commissioner to The Under Secretary for Finance and Trade.

Conditional purchase—Revenue refunded.

Sir, Department of Lands, Conditional Sales Division, Sydney, 21 September, 1882.

Wilcannia,  
Walterus Le  
Brun Brown  
(transferred to  
R. Cozens and  
A. P. Manton);  
22 December,  
1881, 120 acres,  
£60.

I have to inform you that the conditional purchase noted in the margin, being void, the land having been at date of application held under the prior conditional purchase of 80-40 by Charles Ottaway, and 81-7 by T. J. Haydon, you will be good enough to refund to the alienees the sum of £60, being the deposit money paid thereon.

2. I am to add, that a receipt form for the disposal of the money has been forwarded to the alienees, with instructions to fill up same and transmit it to the Treasury.

I have, &c.,  
WM. BLACKMAN,  
(For Chief Commissioner).

## No. 19.

Messrs H. H. Brown &amp; Co. to The Chief Commissioner.

Sir, 21, Exchange Buildings, Pitt-street, 11 October, 1882.

Mitchell,  
M.C.P.  
82-41, 40 acres,  
A. L. Garot,  
7-9-82, portion  
7 over 4, county  
of Yancowinna.

We have the honor to request that you will be pleased to issue without delay a certificate of boundaries on the mineral conditional purchase noted in the margin, under the provisions of the 14th clause 39 Vic. No. 13.

This land has been selected for the purpose of working large deposits of lead; and in order that there should be no doubt, we urgently request the issue of the certificate.

We have, &c.,  
H. H. BROWN & CO.,  
Agents for A. L. GAROT.

## No. 20.

Memorandum by Surveyor-General.

Surveyor-General's Office, 20 October, 1882.

The Chief Draftsman, Department of Mines,—

I am directed by the Deputy Surveyor-General to inquire whether there is any objection to the enclosed plan Mineral 106 being retained in this office permanently.

If this request cannot be acceded to, a copy will be made for the use of this Department.

M. A. McLEAN.

*Minutes on No. 20.*

The enclosed plan may be retained by the Survey Office and re-catalogued if this Office is informed of the new catalogue No.—J.W.C. Mr. McLean. This is the practice usually adopted.—J.W.C.

## No. 21.

Mr. W. T. Forster to The Under Secretary for Lands.

Sir, Wilcannia, 6 November, 1882.

I am instructed by Mr. Aime Louis Garot to inform you of certain facts relative to a mineral selection taken up by Adèle Louise Garot, near Thackaringa, No. 7 over 6.

At a Court held at Thackaringa on the 3rd November instant, before Mr. Charles M. King, to decide a dispute as to this selection between the said Adèle Louise Garot and one Samuel Smith, Mr. A. L. Garot, father of Adèle Louise Garot, gave evidence. He stated, in reply to a question from Mr. King, that his daughter Adèle Louise Garot was under age, meaning that she was under the age of twenty-one years, whereas her age is over seventeen years. She was born at Castlemaine, Victoria, on the 3rd day of March, 1865.

I have, &c.,  
W. T. FORSTER.

*Minutes on No. 21.*

Inform of reference of application to surveyor.—C.N., 25/11/82.

Conditional Sales Branch,—The selection referred to is, I think, conditional purchase 82-41 (Mitchell).—W.M., 24/7/83.

No. 22.

Mr. T. Marshall to The Secretary for Lands.  
*Re Garot's conditional purchase.*

Sir, 133, Pitt-street, Sydney, 15 November, 1882.

I have the honor, on behalf of Samuel Smith, to bring under your notice a full and correct history of this matter.

On the 28th July, 1882, the said Samuel Smith selected under mineral lease, and being the holder of a mineral license of date 28 December, 1881, and numbered 64, and which will expire on 27th December, 1882, 40 acres of land situate Mitchell district, 6 miles from Thackaringa, and he immediately commenced to work the said land for lead ore. After being a month in possession of the said land, and having never abandoned the same, he was served with a notice on the 24th August, 1882, signed by a person named Stokie, who purported to be an agent for Messrs. Ottaway & Green, and which notice stated that the land was and is the property of Ottaway and Green, and threatening proceedings unless he quitted same. In the meantime, one Adèle Louise Garot (who is under age), on the 7th September last, selected one 40-acre block, under a mineral conditional purchase, which block comprised the land now in dispute. Miss Garot then summoned Smith (my client), the occupier, to the Warden's Court, and the evidence taken there is now at the office of the Minister for Mines. On inquiry at your office, I find that one W. L. B. Brown, on the 22nd December, 1881, conditionally purchased 120 acres in three blocks of 40 acres each, which included the said disputed land, and who transferred to Messrs. Manton and Cozens, on the 18th February, 1882, and which was declared void on the 21st September, 1882, on the ground that two of the blocks had been previously selected by C. Ottaway and T. J. Haydon, on 20th October, 1880, and 27 January, 1881, thus leaving the third block, the one now in dispute, open for selection, and which is measured No. 7 over 6. When Smith took up the land under the mineral license, the land had not been worked or touched, and he effected a great many improvements, in the shape of a dwelling-house, blacksmith's forge, &c., before the date of Garot's selection.

I therefore humbly submit that, in view of the fact of Mr. Smith's having entered upon the said land under his license when it was abandoned, and it having been surveyed prior thereto, and he having expended over £100 upon the land, it was not open to selection by Miss Garot, the before-mentioned improvements, and the sinking of the shaft and his residence thereon coming within the meaning of the Act, and thus barring selection.

I have, &c.,  
 THOMAS MARSHALL,  
*per J.H.*

No. 23.

Messrs. H. H. Brown & Co., to The Chief Commissioner.

Sir, 21, Exchange Buildings, Pitt-street, 16 November, 1882.

We have the honor to hand you herewith a certificate of birth of Adèle Louise Garot, which will show that that lady was seventeen years of age on 10 March, 1882, and over the age required by law to entitle her to make the selection as per margin.

Mitchell M.C.P. 82-41, A. L. Garot, 40 acres, 18 section.

It has been stated that this land was in the legal occupation of a Mr. Smith since the 28th December, 1881. We would here point out that on the 22nd December, 1881, W. L. B. Brown selected this land as a mineral conditional purchase, No. 81-60, and that selection stood, as far as 40 acres portion 7 over 6 was concerned, until 4th September, 1882, on which date the said conditional purchase 81-60 was declared void, on the grounds that the whole area applied for was not available.

Our client having purchased any right to this conditional purchase, as per sale note enclosed, selected on the following Thursday, viz., 7 September, 1882. *Not with papers.*

Thus we submit that Smith has been all along in illegal possession and occupation. We would also point out that he does not hold any lease or promise of lease of the land, but on the contrary has been a trespasser, and has been cautioned repeatedly by the firm of Garot and Green against removing ore from this land, and we would also inform you that this same Mr. Smith worked the adjoining portion 8 over 6 belonging to our client, Mr. Ottaway, until warned not to do so; he then turned his attention to portion 7 over 6, and now objects to our client's title.

In conclusion, we would respectfully point out that, this land not being within any mineral reserve, no miner's or business license would give the holders of same any right or title to the land; and we would further point out that this land has not been improved as stated, but that here and there a boulder containing the richest metal has been blasted, and our client robbed of the valuable ore extracted therefrom.

We have, &c.,  
 H. H. BROWN & CO.

[Enclosure to No. 23.]  
 SCHEDULE A.

1865. Births in the District of The Loddon, in the Colony of Victoria. Registered by John Rogers.

No.	Child.			Parents.			Informant.	Witness.	Registrar.			
	When and where born.	Name, and whether present or not.	Sex.	Father.		Mother.			Signature, description, and residence of informant.	(1) Accoucheur (2) Nurse by whom certified, and (3) signatures of occupiers or other witnesses.	When registered and where.	Signature of Deputy Registrar.
				(1) Name and surname, rank or profession of Father, (2) age, and (3) birth-place.	(1) When and where married, (2) issue living and deceased.	(1) Name and maiden surname, (2) age, and (3) birth-place.						
8254	10 March, 1865, Mostyn-street, Castlemaine.	Louise Adèle, not present.	Female.	(1) Aimé Louis Garot, watch-maker, (2) 48, (3) Do Cortaillon Neufchatel, Suisse.	20th June, 1851, Chanadefond, Bollinger, Schaffhausen, Suisse.	Sophia Garot, formerly Bollinger, Schaffhausen, Suisse.	A. L. Garot, father, Mostyn-street.	Dr. McGrath, Mrs. Martin.	2 May, 1865, Castlemaine.	John Rogers.		

I, Richard Gibbs, Registrar-General of the Colony of Victoria, do hereby certify that the above is a true copy of an entry in a Register of Births kept in this office.

Extracted this eleventh day of November, 1882.

R. GIBBS.

## No. 24.

## The Under Secretary for Mines to The Chief Commissioner.

Sir,

Department of Mines, Sydney, 22 November, 1882.

I have the honor to request that you will be so good as to have the following information furnished to this office at your earliest convenience, viz. : Whether portion No. 7 over 6, in the county of Yancowinna, and containing 40 acres of land, has been at any time conditionally purchased for mining purposes by W. L. B. Brown; and if so, on what date the purchase was made; also, whether the purchase has been cancelled, and the date of cancellation (if any).

I have, &amp;c.,

HARRIE WOOD,  
Under Secretary.

## No. 25.

## Application by Mr. S. Smith.

C.

[Alienation Act, section 19.]

District of Mitchell.

No. 52 of 1882.

Application by Samuel Smith, forty (being of full age), for the conditional purchase, without competition, of 40 acres unimproved Crown land.

Received by me, with a deposit of £20, this 23rd day of November, 1882, at 10 o'clock,—

W. A. STEEL,

Agent for the Sale of Crown Lands at Wilcannia.

Sir,

23 November, 1882.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown land hereunder described, containing 40 acres; and I herewith tender the sum of £20, being a deposit at the rate of 10s. per acre on the area for which I apply.

I am, &amp;c.,

SAMUEL SMITH,

Thackeringa.

To the Agent for the Sale of Crown Lands at Wilcannia.

## Description.

County of Menindie, parish unnamed, 40 acres. Commencing at the north-east corner of T. J. Haydon's mineral conditional purchase of 40 acres; thence east, thence south, thence west, thence north, to point of commencement, as surveyed and marked locally 7 over 6, formerly selected by W. L. B. Brown, transferred to Manton and Cozens. This block of land was surveyed by licensed surveyor, and marked 7 over 6, and adjoins two other surveyed blocks marked 8 over 6 and 6 over 6, and is situated about 6 miles east from the Thackeringa Hotel, Barrier Ranges.

I do not hold any other incomplete purchase.

## No. 26.

## Mr. Warden Steel to The Under Secretary for Mines.

Sir,

Warden's Office, Wilcannia, 27 November, 1882.

In reply to your letter of the 17th instant, requesting me to inform you whether the statement made by Samuel Smith, "that all persons going from Thackeringa to Milparinga must travel *via* Wilcannia," I have the honor to state that it would involve to any person coming by way of Wilcannia an additional distance of 200 miles—that is, you would not come within 100 miles of Wilcannia to go to Thackeringa, as travelled by Mr. Warden King in his recent visit.

Milparinga is nearer Thackeringa than Wilcannia is. I would beg permission to state that much inconvenience and delay to the miners would be avoided if the Acting Clerk of Petty Sessions at Mount Gipps was empowered to issue licenses, &c.; Mount Gipps being some 50 miles only from Thackeringa, and the Police Magistrate of Menindie holds monthly Courts of Petty Sessions there.

I have, &amp;c.,

W. A. STEEL,  
Warden.

*Minutes on No. 26.*

By Under Secretary for Mines:—The Police Magistrate at Menindie may be asked whether he will accept the position of Warden, with the consent of the Department of Justice, to act more especially at Thackeringa, and hold Courts when requisite at Thackeringa and Mount Gipps.—H. W.

Submitted, 12/12/82.

By Secretary for Mines:—Ask.—A.R., 12/12/82.

## No. 27.

## Mr. R. Green to The Chief Commissioner.

Sir,

Manly Beach, Sydney, 28 November, 1882.

I have the honor to state that I have appointed Mr. Andrew Armstrong, 26, Bridge-street, Sydney, to transact all business connected with the mineral conditional purchase particularized in the margin, and to request that no other person be recognized in any business connected therewith without my authority.

I have, &amp;c.,

R. GREEN.

11

No. 28.

Mr. A. Armstrong to The Chief Commissioner.

Sir, Land Agency Office, Bridge-street, 1 December, 1882.

Referring to the selection particulars of which are noted in the margin, I have the honor to state that selector's former agents, Messrs. H. H. Brown & Co., advised the selection to be bad in law, and that refund should be obtained.

My client would prefer holding the selection which forms part of the land embraced in the prior selection of W. Brown (81-60), declared void through land embraced in Brown's application containing improvements. I respectfully request that the case may be considered, with a view to the selection being upheld and ratified under 14th section.

I have, &amp;c.,

A. ARMSTRONG,  
Agent for R. GREEN.

C.P. 82-27,  
40 acres,  
19 section,  
Richard Green  
Wilcannia.

No. 29.

Mr. A. Armstrong to The Chief Commissioner.

Sir, Land Agency Office, 25, Bridge-street, Sydney, 1 December, 1882.

Referring to the selection particulars of which are noted in the margin, I have the honor to protest against the selection—first, on the grounds that it was improved at the date of selection to the value of £100, which improvements were effected by opening mine for silver lead ore; second, that the conditional purchase of Richard Green (82-27), R. Green, of prior date, is a valid selection, and barred the land from being open at date of application 82-41.

I have, &amp;c.,

A. ARMSTRONG,  
Agent for R. GREEN.

C.P. 82-41,  
40 acres,  
19 section,  
Adèle Louise,  
Garot,  
Wilcannia.

No. 30.

The Chief Commissioner to Mr. W. T. Forster.

Sir, Departments of Lands, Conditional Sales Division, Sydney, 4 December, 1882.

In reference to your communication of the 6th ultimo, respecting the mineral conditional purchase of 40 acres made by Adèle Louise Garot, at Wilcannia, on the 7th September last, I am directed to apprise you that the application was sent to Mr. Licensed Surveyor Bray on the 28th October, for his report and survey of the land, should no objection exist, and on receipt thereof you will be further communicated with.

I have, &amp;c.,

WM. BLACKMAN,  
(For Chief Commissioner).

No. 31.

Mr. A. Armstrong to The Under Secretary for Mines.

Sir, Land Agency Office, 26, Bridge-street, Sydney, 5 December, 1882.

For and on account of Richard Green, applicant for conditional purchase under 19th section, for 40 acres, 3rd August, 1882 (conditional purchase 82-27, Wilcannia), I have the honor to protest against the allowance of the lease to S. Smith particularized in the margin, on the grounds that my client's title to the land is in every way a valid one, and to state that he is in a position to prove that at the date of his application the land was not in the possession of Samuel Smith under mineral license holding or otherwise. My client wishes that at any inquiry which may be held locally to inquire into the validity of Smith's position that he may have the opportunity of being heard.

I have, &amp;c.,

A. ARMSTRONG,  
Agent for R. GREEN.

Samuel Smith,  
M.L. 82-9,766,  
Wilcannia,  
conflicting with  
C.P. 82-27,  
Wilcannia,  
R. Green.

*Minutes on No. 31.*

By Under Secretary for Mines:—The writer may be informed that the Warden states in his report that Smith consented to forego any claim he might have to the land claimed by Green, but without specifying any particular parcel of land; therefore it is not known whether reference is made to conditional purchase 82-27, Wilcannia.—H.W., 12/12/82.

Submitted.

By Secretary for Mines:—Inform.—A.R., 12/12/82.

No. 32.

The Under Secretary for Mines to Mr. W. A. Steel,

Sir, Department of Mines, Sydney, 13 December, 1882.

I have the honor, by direction of the Secretary for Mines, to ask whether you would be willing to accept a position as Warden, with the consent of the Department of Justice, to act more especially at Thackaringa, and to hold a Court when requisite at Thackaringa or Mount Gipps.

I have, &amp;c.,

HARRIE WOOD,  
Under Secretary.

No. 33.

The Under Secretary for Mines to Mr. A. Armstrong.

Sir, Department of Mines, Sydney, 13 December, 1882.

Referring to your letter of the 5th instant, in which you object, on behalf of Richard Green, to the granting of a lease of certain land to Samuel Smith, I have the honor to inform you that the Warden

Warden states in his report that Smith consented to forego any claim he might have to the land claimed by Green, but without specifying any particular parcel of land; so it is not known whether reference is made to conditional purchase No. 82-27, Wilcannia.

I have, &c.,  
HARRIE WOOD,  
Under Secretary.

No. 34.

Mr. A. Armstrong to The Chief Commissioner.

Sir, Land Agency Office, 26 Bridge-street, Sydney, 15 December, 1882.

C.P. 82-27, Wilcannia, R. Green, 40 acres, 19th section.

I have the honor to enclose herewith copy of letter received this day from the Department of Mines (see preceding number), which I submit leaves your Department in a position to deal with the selection of R. Green particularized in the margin.

I have therefore the honor to request that the selection in question may now be confirmed and ratified under 14th section.

I have, &c.,  
A. ARMSTRONG,  
Agent for R. GREEN.

*Minutes on No. 34.*

By Chief Commissioner:—For other papers.—A.O.M., 15/12/82.

By Chief Commissioner:—As regards the conflicting claims of the claimant Smith, resting on the possession under a mineral license, and as the value of certain improvements alleged to have been effected by him prior to conditional purchase of the land which he has occupied, the materials do not at present exist apparently for a final decision. It may be necessary to ascertain from the Mining Department (under which some proceedings have already, it appears, been taken), and to decide upon the limits of such authorized possession, and also to ascertain the value and date of the alleged improvements, before the whole of the questions at issue can be dealt with; but so far as they depend upon the respective conditional purchases herein referred to, and in the correspondence of H. H. Brown & Co., a decision may probably be arrived at which will clear the way for ultimate action.

1. The portion in question, seven over six, was embraced with two others not available, on the conditional purchase of W. L. Brown, No. 81-60, dated 22 December, 1881, which was declared void at the instance of the applicant's transferees, on the 21st September, 1882, on the ground that part only of the land was available.

2. An application by R. Green, dated 3rd August, 1882, has been applied to be withdrawn, on the ground that the land was at the date of application the subject of the prior conditional purchase above mentioned, and

3. An application by Adèle Louise Garot, dated 7th September, 1882, which appears to be the one now relied upon by the claimants under conditional purchase.

The question turns upon the point whether the land was Crown land or not during the period between the making of the original conditional purchase and its cancellation; and I am not aware of this point having been settled previously or any precisely similar case. Ordinarily, it is held that a conditional purchase or application that is not available or that is applied for otherwise than in accordance with the law and regulations is a void application, not conferring any right or debaring the right of another applicant conforming to the law. It has also been decided that, in the case of a conditional purchase withdrawn on the ground of non-survey within twelve months, the land is, pending such withdrawal, the property of the purchaser, who might, if he should think fit, retain it or have it surveyed at the cost of the Government by a licensed surveyor. The present case appears to me to be allied to the latter class. It is certain that, had the transferees of the original applicant thought fit, they might in fact have retained the available portion, 7 over 6; the fact of the transfer alone assumes that up to the time of the cancellation the land was transferable property of the holder for the time being, and at the same time, as it had been dealt with by the purchaser, the compliance with the request for cancellation was not an admission of any right of the parties to withdraw on the ground assigned, and was inchoate until the customary notices of voidance had been actually issued.

The voidance of the original conditional purchase took place on the 21st September, 1882. If the foregoing views be correct, therefore, the selections of R. Green, 82-27, and of A. L. Garot, 82-41, are both void, the land having been at date of selection held under the prior conditional purchase of W. L. Brown, 81-60, by A. P. Manton and Richard Cozens.

The parties and the Mining Department should probably be informed.—A.O.M., 30 January, 1883.  
By Secretary for Lands:—Approved.—J.S.F., 31/1/83.

No. 35.

Messrs. H. H. Brown & Co. to The Chief Commissioner.

Sir, 21, Exchange Buildings, Pitt-street, 27 December, 1882.

Wilcannia, A. L. Garot, C.P. 82-41, 40 acres.

With reference to our letter of 16th November last, respecting the age of our client at date of her conditional purchase, and as to certain supposed improvement on our client's selection, we beg to enclose you a telegram we have just received, showing that Smith has not improved the land as stated, nor has the land been improved at all.

Trusting this matter may now be concluded,—

We have, &c.,  
H. H. BROWN & CO.,  
Agents for A. L. GAROT.

[Enclosure to No. 35.]

Telegram from A. L. Garot to H. H. Brown & CO.

Wilcannia, 26 December, 1882.

No improvement on block 7 over 6; neither well, machinery, fence, shafts, or dwelling-house; only ore taken away on surface. Smith and others never lived nearer than one mile.

Conditional purchases 82-27 and 41 ; also papers, are required.—W.M., 15 March, /83.

No. 38.

Mr. A. Armstrong to The Chief Commissioner.

Sir, Land Agency Office, 26, Bridge-street, Sydney, 23 January, 1883.

Referring to the case of Mr. Green, particulars of which are noted in the margin, which land was afterwards applied for by Adèle Garot, conditional purchase, and S. Smith, conditional purchase, I have the honor to hand herewith statutory declaration of John Stokie, which declares that the land was improved after selection by Green, and prior to the selection of Miss Garot, to the value of £100, which I submit is a bar to the legality of both Garot's and Smith's selection, which I request may be submitted for voidance without delay.

C.P. 82-27, Wil-  
cannia, R. Green

I have, &c.,  
A. ARMSTRONG,  
Agent for R. GREEN.

*[Enclosure to No. 38.]*

Statutory Declaration.

I, JOHN STOKIE, of Umberumberka, do hereby solemnly and sincerely declare as follows :—That I am well acquainted with the land selected by Richard Green, at Wilcannia, and known as 7 over 6, and know that mining improvements to the value of £100 (one hundred pounds) had been effected at date of application for same land, by Adèle Garot, which were placed there after the date of R. Green's selection. And I make this solemn declaration conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her Majesty, intituled "An Act for the more effectual abolition of Oaths and Affirmations taken and made in various Departments of New South Wales and to substitute Declarations in lieu thereof and for the suppression of extra-judicial Oaths and Affidavits."

J. STOKIE.

Declared at Mount Gipps, this 12th day of {  
January, 1883, before me,— }  
GEORGE M'CULLOCH, J.P.

Sir, Department of Lands, Conditional Sales Division, Sydney, 31 January, 1883.

Referring to your letter of the 15th November last, on behalf of Mr. Samuel Smith, relative to the selections noted in the margin, portion 7 over 6, of 40 acres, I have the honor to inform you that Mr. Secretary Farnell has decided that, as the land was at the date of these respective selections held under the prior purchase 81-60 of W. L. Brown, by Messrs. A. P. Manton and R. Cozens, since cancelled, viz., on 21st September, 1882, the selections of R. Green and A. L. Garot must also be declared void.

I have, &amp;c.,

A. O. MORIARTY,

Chief Commissioner.

No. 47.

The Chief Commissioner to The Under Secretary for Mines.

Sir, Department of Lands, Conditional Sales Division, Sydney, 31 January, 1883.

With reference to your letter to Mr. A. B. Armstrong, dated 13th December, 1882, and of which he has forwarded a copy to this office, in support of a claim by R. Green to portion 6 over 7 of 40 acres, county of Menindie, parish unnamed, under the mineral selections noted in the margin, I have the honor to apprise you that the Minister for Lands has ordered the selection referred to, as also a subsequent application for the same portion by Miss A. L. Garot (82-41), to be declared void, the land having been at date of selection held under the prior conditional purchase (since cancelled) of W. L. Brown (81-60), by A. P. Manton and R. Cozens.

I have, &amp;c.,

A. O. MORIARTY,

Chief Commissioner.

Minute

*Minute on No. 47.*

By Under Secretary for Mines:—In view of the fact that the application 82-2, by Samuel Smith, to lease 40 acres of land, refers to portion 7 over 6, it does not appear that such application would be affected by the portion 6 over 7 being at date of such application the subject of a conditional purchase, but perhaps some confusion has occurred in regard to the number of the portion. A. L. Garot, in his evidence given at the inquiry held by the Warden, says:—"The block I selected in my daughter's name is 7 over 6, and not 6 over 7, as described in the copy of application." Will the Chief Commissioner kindly say whether portion 7 over 6 was on the 28th July last, or is now, the subject of a valid conditional purchase.—H.W., B.C., 6/2/83. The Chief Commissioner, Lands Department.

## No. 48.

## Mr. S. Smith to The Registrar-General.

Sir,

James Town, South Australia.

I was at your office on the 16th November last, to ascertain when claim 7 over 6, Thackaringa, was cancelled or forfeited, as a Mr. A. L. Garot had come and seized my ore and sent away 59 tons. I had previously taken the same in the Under Secretary for Mines' Office. Garot summoned me to a Court held at Thackaringa. The Warden told him he had no business to take my ore and put an injunction on the mine. I went to your office to inquire into the matter, and found that the claim was not cancelled till the 21st September, 1882. Garot took it on the 7th September, and I took it on the 28th July, 1882. The gentleman in the office said the claim did not belong either to me or Garot, as it was not cancelled till the 21st September, 1882, and said if I went back to Wilcannia and was first in the office and, paid down £20 and took it on conditional purchase that it was undoubtedly mine. I was at Wilcannia in the office first before any one else (23rd November), paid the £20, put in the application, and had the receipt (No. 130,212). As I am at great expense keeping a man on the mine, I should be greatly obliged if you would send me the necessary authority and take the injunction off the mine, so that we can legally commence working.

I am, &amp;c.,

SAML. SMITH.

*Minutes on No. 48.*

The Under Secretary for Mines, B.C., 5/2/83.—E. G. WARD, Registrar-General. By Under Secretary for Mines:—Place with papers when returned.—H.W., 12/2/83.

## No. 49.

## The Under Secretary for Mines to The Chief Commissioner.

Sir,

Department of Mines, Sydney, 2 February, 1883.

Portion 6 over 7,  
in the county of  
Yancoowinna,  
containing 40  
acres.

I have the honor to invite your attention to my letter of the 22nd of November last, asking if the land noted in the margin had been at any time conditionally purchased for mining purposes by W. L. B. Brown, and if so, the date of purchase—whether the purchase has been cancelled—and the date of cancellation, if any; and I would ask you to be good enough to favour me with an early reply.

I have, &amp;c.,

HARRIE WOOD,

Under Secretary.

## No. 50.

## Messrs. Stephen, Laurence, &amp; Jaques to The Secretary for Lands.

Sir,

81, New Pitt-street, Sydney, 5 February, 1883.

Wilcannia,  
M.C.P. 82-41,  
A. L. Garot,  
40 acres,  
19 section.

We are acting on behalf of Miss Garot, in respect of her claim to the mineral conditional purchase noted in the margin. Hitherto Messrs. H. H. Brown & Co. have been looking after her interests, and we have before us your letter to them of the 31st January last, from which it appears that you have decided that her purchase must be declared void, "the land having been, at date of selection, held under the prior conditional purchases of W. L. Brown, 81-60, by A. P. Manton and Richard Cozens."

There must be some grave mistake here. It is within our knowledge that the order of *your predecessor in office, Secretary Sir John Robertson*, declaring the application referred to void, was signed and dated on the 4th September, 1882, and not on the 21st as contended by you.

We do not appear to differ in the least degree as to the law as far as this, viz.: that immediately upon the Minister signing the order for voidance (we will not now go into the question as to whether before or not) the land previously held by Brown became open for selection, but only upon the question of fact as to whether that order was made on the 4th or the 21st of September.

We request you to investigate the papers for yourself, when we are satisfied that you will find, as we have stated, that the order was signed and dated on the 4th September last. It may be that the letter intimating that fact to Messrs. Manton & Cozens was dated the 21st, but surely you will not decide that that has anything to do with the matter.

In conclusion, we respectfully ask, if you find the facts to be as stated by us, that you will intimate to us the reversal of your previous decision, and that the application of our client is good in law.

In returning the refund voucher which was enclosed in your letter to Messrs. H. H. Brown & Co., and expressing the hope that this matter will receive immediate attention,—

We have, &amp;c.,

STEPHEN, LAURENCE, &amp; JAQUES.

*Minutes on No. 50.*

Chief Commissioner.—C.O., 6/2/83.

By Chief Commissioner:—This representation is based on a misapprehension of other facts and circumstances. This action was not taken by the late Minister, but by myself, pursuant to routine.—A.O.M., 6/2/83.

By Secretary for Lands:—In my opinion the voidance of the selection was on the 4th of September; that is the day when the Chief Commissioner decided that the applicant should have a refund of his deposit.—J.S.F., 9/2/83.

No. 51.

## No. 51.

## Draft of Letter by the Chief Commissioner.

(Submitted for approval.)

WITH reference to my letter of the 31st ultimo, I have now the honor to inform you that the Minister has had under his consideration a further representation addressed to him with reference to the cancellation of the conditional purchase of A. L. Garot, and has on reconsideration of the matter expressed an opinion that the voidance of the previous selection of W. L. Brown, dated 22nd December, 1881, took effect on the 4th September, 1882, on which date I had decided that the applicants should have a refund of their deposit, and not on the 21st September, when the usual notices of voidance and refund order were issued.

Under this further decision, the cancellation of the mineral conditional purchase made by Adèle Garot on the 7th September has been recalled.

A. O. MORJARTY.

*Minutes on No. 51.*

By the Chief Commissioner:—Should this course be taken, or should the parties be left to take their own action? If the conditional purchase is reinstated, it will be necessary to inquire further into the improvements and the claims of the holder under mineral license.—A.O.M., 9/2/83.

By the Secretary for Lands:—Approved.—J.S.F., 12/2/83.

By the Secretary for Lands:—The revocation of the cancellation to be deferred until the merits of the case are decided as a whole.—J.S.F., 15/2/83.

By the Secretary for Lands:—Give effect to this decision.—J.S.F., 6/3/83.

Acknowledge receipt of letter of February 27th, refer to decision of Minister communicated to them in letter of the 26th February, and state that upon submission to the Minister he confirmed the decision conveyed to them in the letter referred to, and gave special directions that it should be carried out.—W.B.

## No. 52.

## Mr. A. Armstrong to The Secretary for Lands.

Land Agency Office, 26, Bridge-street, 15 February, 1883.

Referring to your letter, of date January 31st last, respecting the 19th section application particularized in the margin, I have the honor to protest against the decision of the Department, and respectfully to submit for your consideration that the prior application of W. Le B. Brown should be treated as a void application *ab initio*, that no title should be or is created in a person who does not want a title against a person who does want a title.

C.P. 82-27,  
R. Green,  
Wilcannia, 40  
acres, 19 section

The 16th section of the Act of 1875, which appears to be the only clause bearing upon the point as to whether a title to a part of an application is good, the remainder being bad, treats entirely upon land to be subdivided; but it is now submitted that the apparent meaning of the Legislature was to secure a title to the available portion within such an application if applicant desired to create a title, and not to force a title to an applicant who did not require it; and even under that clause the balance of area is allowed only by the Minister approving of the reduced area being allowed.

I further submit, that as all applications made subsequently to my client's were made after the lands were improved sufficiently to bar selection, that my client's application may with propriety be accepted.

I have, &amp;c.,

A. ARMSTRONG,

Agent for R. GREEN.

*Minutes on No. 52.*

By Secretary for Lands:—It is not necessary in this case to delay action in consideration of the point herein raised.—J.S.F., 15/2/83.

By Chief Commissioner:—Inform. See also in this minute of the Minister's dated 15/2/83. Instruct Inspector O'Hara to report on improvements of Smith's. Immediate.—A.O.M., 15/2/83.

## No. 53.

## The Chief Commissioner to Mr. J. S. O'Hara.

Sir,

Department of Lands, Conditional Sales Division, Sydney, 21 February, 1883.

I have to instruct you to be good enough to visit the portion of land referred to in the accompanying description,\* and report to this Department as soon as practicable the value, description, and ownership of any improvements that were upon it on the 7th September, 1882, the date when it was selected by Miss Adèle Louise Garot, under the 19th clause.

Mitchell,

The Chief Commissioner to Messrs. Stephen, Laurence, & Jaques.

Gentlemen, Department of Lands, Conditional Sales Division, Sydney, 26 February, 1883.

I have the honor, by direction of the Minister for Lands, to acknowledge the receipt of your letter of the 3rd instant, and to inform you that he has under his consideration your representations with reference to the cancellation of the conditional purchase of A. Garot, and has, on reconsideration of the matter, formed the opinion that the voidance of the previous selection of W. L. Brown, dated 22nd December, 1881, took effect on the 4th September, 1882, on which date I had decided that the applicants should have a refund of their deposit, and not on the 21st of September, when the usual notices of voidance and refund order were issued. I have to add that the revocation of the cancellation will be deferred until the merits of the case as a whole are decided.

Wilcannia, M.C.P. 82-41, 19 section, 40 acres, Adele Garot

I have, &c., A. O. MORIARTY, Chief Commissioner.

No. 61.

Messrs. Stephen, Laurence, & Jaques to The Secretary for Lands.

Sir, 81, New Pitt-street, Sydney, 27 February, 1883.

We are in receipt of your letter of yesterday's date, and cannot but express our disappointment at its contents, and at the same time respectfully place before you the reasons of our dissatisfaction.

Wilcannia, M.C.P. 82-41, A. L. Garot, 40 acres, 19 section.

Confining ourselves entirely to the points in the matter as they arose and came before you for decision, the first question considered and dealt with by you was whether the land was voided, and on that account open for selection on the 4th or 21st September, 1882.

The Department decided at first that the voidance of Brown's, afterwards Manton and Cozens', conditional purchase, took place on the 21st September, and further decided that inasmuch as A. L. Garot's (our client) application was on the 7th, it was bad, and she was informed of that fact.

Subsequently, after full consideration and investigation of all the circumstances, you decided that the voidance took place on the 4th, the day upon which the departmental note was written in the margin of the application for refund. You further pointed out that it mattered little as to when intimation of that voidance was given, but that the voidance took place when the Department dealt with the question. The effect of your then decision, we respectfully submit, was to reverse your previous one, and had the effect of reinstating our client in exactly the position she was in before the first and reversed decision was given. This effect took place on the date your minute was written, and in due course we, deferentially, urge a notice should have been forwarded to us confined to the only question then under consideration, to the effect that the voidance had been decided to have taken place on the 4th, and that A. L. Garot's mineral conditional purchase on the 7th was so far good.

We understand that the further representation referred to in your letter, now under answer, is contained in a letter to the Department from Mr. Armstrong on behalf of Mr. Richard Green, alleging that A. L. Garot's application is bad on account of improvements at the time on the ground, and which had been effected by one Smith. We do not desire to delay inquiry into this question, as we are instructed that it can have but one result, as all the parties well know there were no improvements at the date referred to; but what we complain of is that, in the face of what is already before the Department upon this point, the intimation to us of the reversal of the prior decision made in error should be withheld. There is with the papers a declaration by a Mr. Stokie, copy of which we forward you, sufficiently satisfactory on this head as to there being no improvements; and we have now to inform that Mr. Oliver and Mr. Thos. Green, who are at present in town, state that they were informed by Mr. Moriarty that he (Mr. Moriarty) was told by Mr. Smith when the question of improvements was discussed that, at the time of A. L. Garot's application, there were no improvements on the ground sufficient to bar selection. These gentlemen also inform us that Mr. Neville, solicitor, was present when Mr. Moriarty informed them of this.

Under these circumstances we cannot but think that, although inquiry is the natural course for the Department to take, it should not delay the action of the Government upon the circumstances already before it, more particularly when it is quite in accord with departmental practice in all similar cases, where the question of improvements barring selection is the only one involved for the selection to be considered good until these improvements are shown to exist.

There can be no necessity for us to point out the inconsistency of causing an inquiry in reference to a conditional purchase which at the time of the inquiry being directed is, as far as the notification to parties is concerned, already treated as void.

In conclusion, therefore, we ask that the intimation of the reversal of the previous cancellation of A. L. Garot's mineral conditional purchase be conveyed to us, on Miss Garot's behalf, at your earliest convenience.

We have, &c., STEPHEN, LAURENCE, & JAQUES.

Minute on No. 61.

By Secretary for Lands:—The parties should be informed that the voidance was reversed, so far as it affects the voidance, on the ground of date. The question of improvements is a matter to be hereafter determined.—J.S.F., 1/3/83.

[Enclosure to No. 61.]

Declaration.

Mount Gipps, 28 December, 1882.

I, JOHN STOKIE, of the Umberumbirka, in the Colony of New South Wales, do hereby solemnly and sincerely declare that during the month of October in this year, I visited the conditional purchase, block 7 over 6, situated near Thackeringa, forfeited by me, and now in dispute between A. L. Garot and Samuel Smith. I found a large quantity of ore taken from the surface. There was no sign of shaft on the ground, no well, no machinery, no fencing or dwelling-house on the place. And I, John Stokie, make this declaration conscientiously believing the same to be true.

Signed before me, this 28th December, 1882,— GEORGE MILLER, J.P.

J. STOKIE.

## No. 62.

Mr. Licensed Surveyor Bray to The Surveyor-General.

Sir,

Survey Camp, near Menindie, 3 March, 1883.

In accordance with instructions No. 16, dated 12th June, 1882, to Mr. Surveyor Tritton, and transferred to me by Mr. Surveyor Barlow, 28th October, 1882, I have the honor to report that I have ascertained that conditional purchase 81-60 covers portions 6 over 6, 7 over 6, and 8 over 6, catalogued in the county of Menindie as M. 23-1,814, M. 105 and M. 106, but really in the county of Yancowinna, on Victoria D. Run.

Conditional purchase 80-40 refers to portion No. 8 over 6, and consequently conflicts with conditional purchase 81-60.

I have, &amp;c.,

ARTHUR H. BRAY,  
Licensed Surveyor.

## No. 63.

Mr. S. Smith to The Registrar-General.

Sir,

James Town, South Australia, 8 March, 1883.

On the 29th January last I wrote asking for lease or power to work the mine at Thackaringa on claim 7 over 6, as I was first in the office, paid £20, and have received no answer. Having paid the money and got the receipt the land is mine, but a Mr. A. L. Garot claimed it after he saw I had raised a lot of ore ready for sending away. He sent away 59 tons of my ore, and lately he has taken 15 tons more, and has put about a report that the Minister had decided it was mine, but that his lawyer went to the Minister and got him to reconsider his decision and he had given it to Garot; but I have heard nothing from you or any one else about it and do not believe it, for by the law in the rules the Minister has no choice, but must give it to the first applicant. I have paid for this claim twice over—once in the Under Secretary's Office and once in your Department. I have twice applied for protection against people that interfere with me by intimidating the men and using threats to me and stealing my property, *all in vain*. This man that is robbing me is a Frenchman or some other foreigner; and if I am defrauded by your Government, being an Englishman, I shall write out all the particulars about my case and send it to the Home Government and ask for protection there, and send to the newspapers what kind of treatment I have received from your Government, and warn the people that emigrate not to go to Sydney, because if I am defrauded it will be by the men in office. 'Tis now four months since the injunction was put on the mine, and I have bought it the second time and kept waiting in suspense. If I was at home in England I should have an answer within a week, and the Ministers there are honorable men. If a depraved lawyer went to one of those Ministers to bribe him he would kick that fellow out of his office. Perhaps you may think I am impertinent, but just put yourself in my place, and I have no doubt but what you would be quite as impertinent as I am. If I lose this mine, it will be a clear proof that the men in office are incapable and unfit to hold office of any kind.

Yours respectfully,

SAML. SMITH.

*Minutes on No. 63.*

By Registrar-General:—The Under Secretary for Mines.—E. G. WARD, Registrar-General, B.C., 14/3/83. Previous letter forwarded under B.C. on 5th February last. By Under Secretary for Mines:—Has not the Lands Department been asked whether any valid conditional purchase exists in respect of portion 7 over 6? If no reply, remind and inform the writer.—H.W., 27/3/83. Inform Mr. Smith that steps have been taken to ascertain from Lands Department if valid conditional purchase exists, then await reply to minute.—G.E.H.

## No. 64.

The Chief Commissioner to Messrs. Stephen, Laurence, &amp; Jaques.

Gentlemen,

Department of Lands, Conditional Sales Branch, Sydney, 12 March, 1883.

I have the honor to acknowledge the receipt of your letter of the 27th ultimo, in further reference to the case noted in the margin, and requesting that the intimation of the reversal of the previous cancellation of Miss A. L. Garot's mineral selection may be conveyed to you on her behalf; and, in reply, I have to apprise you that, on submission of the whole case to the Minister, he has given a decision confirmatory of that already conveyed to you by my letter of the 26th February, and has given special directions that effect should be given thereto.

I have, &amp;c.,

W. BLACKMAN,  
(For Chief Commissioner).

## No. 65.

The Chief Commissioner to The Under Secretary for Mines.

Sir,

Conditional Sales Division, Department of Lands, Sydney, 21 March, 1883.

With reference to my letter of the 31st January last, respecting the case noted in the margin, I now do myself the honor to forward you the accompanying papers having relation to the matter, and to request that you will be good enough to state what claims (if any) of the holder under mineral lease of the portion No. 7 over 6, county of Yancowinna, were in existence on the respective dates of the selections quoted.

I have, &amp;c.,

A. O. MORIARTY,  
Chief Commissioner.

*Minutes*

*Minute on No. 65.*

By Under Secretary for Mines :—On the dates named the land in question, portion 7 over 6, appears to be subject of application to lease made by Samuel Smith, No. 82-2, on the 4th August, possession having been taken on the 28th July. It has been alleged that the portion named was the subject of a mineral conditional purchase by W. Brown at the date of Smith's possession, but the allegation has not been confirmed by the Lands Department.—H.W., B.C., 30/3/83. The Chief Commissioner of Conditional Sales.

## No. 66.

## Mr. Inspector O'Hara to The Chief Commissioner.

Sir,

Gunnedah, 2 April, 1883.

Referring to your letter, dated 21st February, 1883 (83-1,192 Cor.), improvements, respecting the case noted in the margin, I have the honor to inform you that there were no improvements upon the land at date of selection.

I have, &amp;c.,

JOHN S. O'HARA,

Inspector, Conditional Purchases.

Mitchell,  
C.P. 82-41,  
A. L. Garot,  
40 acres,  
portion 7 over 6  
7 Sept., 1882.

*Minutes on No. 66.*

By Chief Commissioner :—By some misadventure almost all the original papers relating to this matter belonging to this office have gone astray between this and the Mining Department. They were all sent thither, were seen there, and have not been seen since apparently. They are stated at the Mining Department to have been returned on the 4th instant, but there is no trace of their having been received. I have made repeated efforts to obtain them, without success. The principal papers wanting were the conditional purchase of W. L. Brown, dated 22/12/81, transferred to Manton and Cozens on the 18/2/82, and withdrawn by these parties on the ground of part only of the area being available, by letter dated 17th August, 1882. On this letter I had noted the words "For refund," under date 4th September, 1882; and the formal voidance took place on the 21st September following. An application, No. 82-41, by Adèle Louise Garot, dated 7th September; by Richard Green, dated 3rd August; several letters from the agents of the parties (including an agreement by Manton and Cozens to withdraw their application, on payment of £20 to Messrs. H. H. Brown & Co. on their account); letters from Stephen, Laurence, & Jaques, on behalf of Garot, and from Mr. Marshall, solicitor, on behalf of Samuel Smith; with original minutes by the Minister for Lands and by myself. The course of action taken in the matter was as follows :—The case as first placed before the Minister in my minute, and approved by him, dealt with the several considerations as to the period at which the land became available for selection after withdrawal of the original conditional purchase, and the claims arising under the respective applications subsequently made. I stated my own conviction that all the later conditional purchase applications were involved, assuming that the original had remained in force until the formal notification of voidance had issued (which was of subsequent date). On this view the applications of Green and Garot were declared void. On a review of the case, at the instance of Messrs. Stephen, Laurence, & Jaques, the Minister, however, decided that the voidance of the withdrawn application took effect immediately on my giving the direction for refund, and not on the direction being embodied in the formal notification (which I had submitted as the actual date) of voidance; and the effect of this decision would have been to reinstate the voided conditional purchase of Adèle Garot, subject to further inquiry as to the rights of the adverse claimant, Smith, under mining lease or license, and as to any improvements on the land effected by him prior to Garot's application. On the first of these points the papers were referred to the Mining Department, as already stated, and are not now forthcoming. On the latter point (that of improvements) the report of the Inspector is attached hereto, and shows that there is no obstacle to the conditional purchase on this ground. The enclosed papers belonging to the Mining Department relate to the claims of Smith as an applicant for lease and holder of a mineral license, and, with the report of the Warden on an inquiry held by him into the case, afford, I think, the means of a final decision being arrived at, notwithstanding the absence of so many important documents. It appears that Samuel Smith applied for a mineral lease under date 28th July, 1882, that is, prior to the voidance of the original conditional purchase, and at a time therefore when, according to the view of the matter on which the case has hitherto proceeded, the land was private land. It has been pointed out that the ultimate withdrawal of the conditional purchase cannot be held to have rendered the purchase void *ab initio*, but only from the date of acceptance of the withdrawal, and it is my impression therefore that Smith's application for lease was invalid, and that the voidance of the conditional purchase could not have rendered it valid. The case as respects the holding under license rests on a different footing; the license entitled the holder to the possession of the land worked by him. Of course that possession was of no avail during the existence of the conditional purchase, but when, by the voluntary withdrawal of the conditional purchase, the land reverted to the position of Crown Land, it is clear to my mind that if it was then held by the claimant under license his holding became a legal possession, such as, under the opinion of the late Attorney-General, would have operated as a bar to conditional purchase. For the facts upon this point reference may be made to the evidence before the Warden and the finding of this officer. (It is obvious that the Warden was not fully seized of the case as respects the conditional purchase, and his general finding need not be considered.) It is shown by the evidence of Aimé L. Garot, father of the conditional purchaser, that he took possession of the land on the 7th October, 1882; that on the following Monday (9th October) he found the agents of Samuel Smith working the land, who pulled down his notice and continued working, and removed 4 tons of ore in defiance of him. Samuel Smith swears that he held a license from the 28th December, 1881, to 27th December, 1882; that on the 28th July he took possession of 7 over 6 block; that he had been working the claim ever since, until interfered with by Mr. Garot, who sent away 12 tons of the ore which he had raised; and that he had raised 87 tons 17 cwt. of ore. The finding of the Warden is to the effect that Smith was in natural occupation of the land five weeks before Garot's application was sent in. I think it is plain that Smith had possession at the time of the voidance of the conditional purchase of Cozens and Manton, and at the time of the conditional purchase of Adèle Garot; at any rate, that this is directly to be gathered from the evidence. In this view, whatever area his possession may have embraced, the latter conditional purchase being of 40 acres only would have been rendered invalid; and I submit that the voidance

voidance of it, as already notified to the parties, should be adhered to. I assume it to have been really intended for portion 7 over 6 (the portion in dispute), though the portion named in the application is 6 over 7.—A.O.M., 25/4/83.

By Secretary for Lands :—The question now is whether Smith was legally in possession of the land between the 4th and 7th September, 1882, under a mineral license, the selection of W. L. Brown having been voided on the 4th September, 1882, and that of Garot made on the 7th September, 1882.—J.S.F., 26/4/83.

By Chief Commissioner :—Under Secretary for Mines.—A.O.M., 26/4/83.

By Under Secretary for Mines :—Smith states in his evidence (*vide* 82/12,098) that he held a mineral license, No. 64, which was in force to 27th December, 1882, and therefore he was no doubt working upon the land between the dates named, being at the time the holder of a mineral license in force ; but I cannot find that Smith asserts that he took possession in virtue of his mineral license between the 4th and 7th September, and unless he did so I do not think he had any title in virtue of his mineral license. The possession taken at the time the land was not Crown land could not have been good when taken, and could not, I submit, become good when the land subsequently became Crown land.—H.W., 28/4/83.

Submitted. By Secretary for Mines :—Approved.—J. P. ABBOTT, 30/4/83.

By Secretary for Lands :—In my opinion Smith has no claim to the portion 7 over 6, and that Garot's mineral conditional purchase is a good and valid one, and that he is therefore entitled to the portion 7 over 6.—J.S.F., 2/5/83.

---

No. 67.

The Under Secretary for Mines to Mr. S. Smith.

Sir,

New South Wales, Department of Mines, Sydney, 5 April, 1883.

Referring to your letter of the 8th ultimo, respecting an application which you state that you made to work certain land (numbered 7 over 6) at Thackaringa, I have the honor to inform you that it has been represented that the said land had been conditionally purchased before you took possession, and the matter has been referred to the Department of Lands in order to ascertain whether this is so, and if it is, whether the purchase is valid now.

I have, &c.,

HARRIE WOOD,

Under Secretary for Mines.

---

No. 68.

Mr. S. Smith to The Under Secretary for Mines.

Sir,

South Australia, James Town, 14 April, 1883.

I have duly received yours of the 5th, in which you state that certain land, numbered 7 over 6, at Thackaringa, was conditionally purchased before I took possession of it. On the 4th of last July, I wrote you, *i.e.*, the Under Secretary of Mines, stating that claim No. 7 over 6 at Thackaringa was offered to me for sale, and asking if this land had been forfeited and should I be right with the Government if I purchased it. Your answer to that was written on the 13th July, stating that the said land had been forfeited, or that the lease was cancelled on the 19th October, 1877 ; on the 28th July I put in my application for claim No. 7 over 6 Thackaringa. My inquiry to you and the answer are both preserved, and can be produced. I took possession on the 28th July, dug out the trenches at the boundary corners, put up and marked the pegs, and put up a notice board that I had applied for this land, and paid £15 into the local Court, Wilcannia. In October a telegram was sent you from Adelaide, or to a solicitor, to inquire at your office if R. Green had any claim or right to this block of land (7 over 6) at Thackaringa, and your answer was you knew nothing of any one else having any claim whatever but Smith. If this land is taken from me it will be one of the most unjust acts any Government ever committed ; but I cannot believe that it will be taken from me ; if it is, I shall apply to the Government to recoup my loss. About the end of September a Mr. A. L. Garot came from Wilcannia, stating he had taken this block (7 over 6, Thackaringa) on a conditional purchase. I was then in Adelaide, making arrangements to send away the ore we had raised, 87 tons. He took a policeman with him in his buggy, and the policeman told the men if Mr. Garot ordered him he should take them in charge, intimidating the men, so they left off work. Mr. Garot immediately commenced sending away my ore, about 59 tons, by a lot of teams returning to Terowic, and summoned me to attend a Court of inquiry to be held at Thackaringa on the 3rd of November last. Court of inquiry held by the Warden, Mr. King, from Mount Brown. I attended the Court and produced receipt, mineral license, &c. The Warden said he could not give a decision, but would send the evidence on to Sydney to be decided. Garot had no mineral license, but said the land (No. 7 over 6) was not cancelled till the 4th September, 1882, and he took it out on the 7th September, 1882. I went on from Thackaringa to Sydney, and had a gentleman with me, on the 16th September, at the Chief Secretary's Office, and the gentleman then told us that the block of land (No. 7 over 6) was not cancelled on the 4th September nor yet on the 7th September ; it was not cancelled till the 21st September, and that it did not belong to me or Garot either, but that it was still open for selection, and that if I went to Wilcannia local office and got first in the office at 10 o'clock in the morning that the said land (No. 7 over 6, Thackaringa) was undoubtedly mine. I was at the office door, Wilcannia, before 10 a.m., on the 23rd November, put in my application, paid down twenty sovereigns and got the receipt for a conditional purchase, and have been in possession ever since, and have three men at work on the claim sinking shafts so as to work the mine in a proper manner, as we could not sink a shaft till we knew which way the lode dipped. At the Court at Thackaringa the Warden said Garot had no right to touch my ore and put an injunction on the mine to stop him from taking it, but Garot has broken the injunction and taken away about 15 tons since. I have written to the Chief Secretary and told him, but there is nothing done ; there seems to be no protection to the people or justice.

I am, &c.,

SAMUEL SMITH.

No. 69,

## No. 69.

## Memorandum by Secretary for Lands.

Wilcannia, mineral conditional purchase 82-41, A. L. Garot, 7th September, 1882.—Papers 83-6,063, Correspondence, marked to Mines on 22nd March, 1883.

WILL my honorable colleague please to have the papers above referred to sent to Lands, as I cannot deal with the case without them.

J.S.F.,  
23/4/83.

*Minutes on No. 69.*

By Secretary for Mines :—These papers were sent to the Lands on the 4th instant.—J. P. ABBOTT, 23/4/83.

By Secretary for Lands :—It is said the papers have been returned from Mines, and that they have not passed through our records. Let a search be made for the papers in this office.—J.S.F., 24/4/83.

The papers stand in my Register as having been sent to Mines on the 22nd ultimo. On personal inquiry at that Department I was informed that they were returned here on the 4th instant, but every search has been made for them without avail, and the only conclusion I can come to is that if they were returned they did not pass through my hands. (Records).—J.W., 25/4/83. The Chief Commissioner.

Since writing the above I have ascertained the papers were returned as stated, but in consequence of not being connected in Register, the original papers still stood to Mines. The papers were sent to Mr. Blackman on 6th ultimo.—J.W., 1/5/83.

Referring to Mr. Moriarty's remarks *re* the missing papers, I desire to state that there is not the shadow of a doubt they were forwarded to the Chief Commissioner of Conditional Sales on the 4th instant. I recollect the case so well from the fact of my having the letter enclosing the papers and Mr. Wood's minute thereon copied, as the few documents in this office did not show how the case was progressing. An inspection of the copy will show that the Under Secretary dealt with the papers on the 30th March, after which they were noted in the minute-book by yourself, and then noted by me in the Register and put under cover; and, to make the evidence more complete, an entry in the despatch-book kept by the messenger shows that on the date first mentioned a letter was delivered at the Chief Commissioner's office.—H.T., 27/4/83. The Chief Clerk.

I have not the slightest doubt that the papers referred to were sent to the Lands Department, and can fully endorse the statement of our Record Clerk.—GERARD E. HERRING, 27/4/83. The Under Secretary for Mines.

By Under Secretary for Mines :—The Chief Commissioner of Conditional Sales.—H.W., B.C., 27/4/83.

Mr. Binney, of the Mines, informed me on more than one occasion that the missing papers in Garot's case were sent back to this office about three weeks ago, but they did not pass through record Mines, as they were simply borrowed for the Under Secretary of Mines. The last time that I saw Mr. Binney was on Saturday last, and he then repeated this statement before Mr. Cumming, of this office.—J.W., 30/4/83.

The papers which were lost (83-6,063 Dep.) were noted to "Mines, 21/3/83." Traighton, of the Mines Department, borrowed 83-3,696 and enclosures (now enclosed) from me, and returned them the same day. This is perhaps the paper which Mr. Binney was thinking of when he so confidently and repeatedly asserted that "Garot's papers were only borrowed from Lands, and returned with 83-6,063 the same day."—V.C.

## No. 70.

## Mr. A. Armstrong to The Secretary for Lands.

Sir, Land Agency Office, 26, Bridge-street, Sydney, 3 May, 1883.

Referring to the land in dispute between Messrs. Smith, Garot, and Green,—understanding a report is recently to hand giving particulars of improvements effected, I respectfully submit that my client, R. Green, is the legal applicant, on the grounds that Manton and Cozens having elected to take no title, that the land was always Crown Lands. I have therefore to request that the case may be referred to the Crown Law Officers for opinion before any final decision be arrived at, in order that the legal position of Mr. Green's application be considered, with a view to the reversal of voidance intimated in your letter of 31st January last.

I have, &c.,

A. ARMSTRONG,  
Agent for R. GREEN.

*Minute on No. 70.*

By Secretary for Lands :—This case has been decided, and as far as Green's case is involved he has no case whatever.—J.S.F., 3/5/83.

(For the Chief Commissioner).

## No. 78.

Petition by Mr. S. Smith.

The Honorable the Minister for Lands for New South Wales.

The memorial of Samuel Smith, of Thackaringa, in New South Wales, lime-burner,—

*Showeth*—That on the 28th day of July, one thousand eight hundred and eighty-two, he was the holder of a mineral license then in force, and by virtue thereof selected under mineral lease a block of land containing 40 acres, and known as block 7 over 6, in the county of Yancowinna.

That he paid the deposit required by law and made improvements on such block of great value; such improvements consisting of a dwelling-house, blacksmith's shop, and mining workings, in seeking for and discovering the mineral ore on such block, and in which he found silver ore in large quantities and laid out upwards of £200 in such improvements.

That he has been in possession of such block continuously from the date aforesaid up to the present time and working same.

That Adèle Louise Garot, by her agent, took possession of the same block, under a mineral conditional purchase, some time in the month of September, 1882.

In the month of November, 1882, an inquiry was held before C. A. M. King, Esq., a Warden of the Colony, relative to the rights of the said Adèle Louise Garot and your memorialist, when such Warden held that your memorialist had a better title than the said Adèle Louise Garot.

That a suit in the Supreme Court of this Colony in its Equitable Jurisdiction is now pending, in which the said Adèle Louise Garot is the plaintiff and your memorialist is the defendant, relative to the respective rights of your said memorialists and the said Adèle Louise Garot to the said block 7 over 6.

That your memorialist is enjoined by an interim injunction order of one of their Honors the Judges of the said Court from trespassing on the said block until the hearing of the said suit.

That such order was obtained without any notice to your memorialist, and on the special statement of the plaintiff, in which the material facts favourable to your memorialist were suppressed, and an application will be made directly your memorialist is served with the plaintiff's statement of claim, to the said Judge to verify his said order by restraining the said plaintiff as well as your memorialist from occupying the said ground in dispute, until the hearing of the suit.

That your memorialist is informed and believes such information to be true, that the said plaintiff will apply for a grant of such block, on the ground that he has laid out the sum of £2 an acre in improvements on same, and thus defeat your memorialist's alleged prior claim.

Your memorialist respectfully submits that it would be unjust to your memorialist to direct the issue of such grant in respect of land at present the subject of litigation in the Supreme Court aforesaid.

Your memorialist therefore respectfully prays that you will not sanction the issue of such grant until the said Court shall have decided upon the respective rights of your memorialist and the said plaintiff in the suit (Adèle Louise Garot).

SAMUEL SMITH.

I certify that the foregoing statement is in accord with the facts of the case.

THOMAS MARSHALL,

Solicitor for the said memorialist,

Pitt-street, Sydney, 15 May, 1883.

*Minutes on No. 78.*

By Chief Commissioner:—Application for the grant has, so far as I am aware, been made.—A.O.M., 21/5/83.

By Secretary for Lands:—Scen.—J.S.F., 22/5/83.

The Mining Department should be informed in terms of Charting Branch minute of 27th ultimo.—C.N., 3/3/83. W. L. Brown made a conditional purchase of 120 acres at Wilcannia, 22nd December, 1881, comprising portions 6 over 6, 7 over 6, and 8 over 6, county Yancowinna; the purchase was declared void, 21st September last, on S2-6,497 Cor. Referred to Charting Branch to ascertain whether portion 6 over 7, containing 40 acres, county Yancowinna, was conditionally purchased by W. L. Brown, *vide* query from Mining Department, S3-3,295.—C.N., 20/7/83. Yes, by conditional purchase S1-60, that is, portion 7 over 6 was; there is no portion 6 over 7.—W.M., 27/7/83.

## No. 79.

The Chief Commissioner to Mr. S. Smith.

Sir,

Department of Lands, Conditional Sales Division, Sydney, 31 May, 1883.

With reference to your Petition of the 15th instant, praying that the issue of a deed of grant for portion 7 over 6, in the county of Yancowinna, may be withheld from Adèle Louise Garot, who at present holds such portion as a mineral conditional purchase, pending the decision of the Supreme Court as to the respective rights of the said selector and yourself to the land in an action now at issue, I have the honor to inform you that no application for a grant has so far as I am aware been made.

I have, &amp;c.,

A. O. MORIARTY,

Chief Commissioner.

## MINERAL CONDITIONAL PURCHASES.

### No. 1.

Application by Messrs. R. Palmer, J. I. Moore, and J. Moore, jun.

[Alienation Act, sections 13 and 19.]  
No. 270 of 1881.

C.

Application for the conditional purchase, without competition, of unimproved Crown Land.  
District of Armidale.

Application by Richard Palmer, James Ingram Moore, and John Moore, junr., over 21 years of age, for the conditional purchase, without competition, of 80 acres unimproved Crown Land.  
Received by me, with a deposit of £40, this 6th day of October, 1881, at 10 o'clock,—

J. BRAY,

Agent for the Sale of Crown Lands at Armidale.

Sir,

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 80 acres; and I herewith tender the sum of £40, being a deposit at the rate of 5s. per acre on the area for which I apply.

To the Agent for the Sale of Crown Lands at Armidale.

We are, &c.,

RICHARD PALMER.  
JAMES INGRAM MOORE.  
JOHN MOORE, JUNR.

### Description.

County of Sandon, parish of Metz, 80 acres, at Vinegar Spur: Commencing at a marked tree about 700 yards in a south-easterly direction from Powsin and Glass, mineral conditional purchase No. 58, running south-east, thence towards river or creek.

### Minutes on No. 1.

Mr. Licensed-Surveyor Martyn to measure if unobjectionable.—H.W. (for Surveyor-General), 28 Oct., 1881. Replied to by my letter to the Surveyor-General, dated 11th March, No. 82-15.—  
JOHN G. MARTYN.

### No. 2.

Application by Mr. Timothy M'Carthy.

Mineral Lease Regulations, Schedule 2.

To the Honorable the Secretary for Mines, Sydney,—

Sir,

Armidale, 12 October, 1881.

I hereby make application for a mineral lease of that piece or parcel of land situated at Gara Falls, county of Sandon, parish of Metz, containing 20 acres, of which I took possession on the third day of October, at the hour of eight o'clock in the forenoon, for the purpose of mining thereon and therein for antimony, by L trench and peg at each angle thereof. The datum point is distant about 600 yards in a southerly direction from Mann Creek about 700 yards in an easterly direction from J. Moore's first lease.

Notice of my intention to make this application has been given in accordance with the regulations in that behalf; and I hand herewith a list of the persons who occupy or claim a right to the land aforesaid, or any part thereof, together with such consents as I have obtained. I also hand herewith the sum of £5 stg., being the first year's rent in advance of the said land, and the sum of £4 stg., to cover the cost of survey.

I hereby acknowledge that this application is made upon the distinct understanding and condition that if I shall abandon or fail to proceed with it, or if it is refused, the Secretary for Mines for the time being may deduct from the sum of £9 stg., deposited as aforesaid, any cost which in his opinion the Crown may have been put in or about or in respect of this application, and this application shall thereupon become and be void, and the possession aforesaid shall cease and determine; and if the lease shall be granted, I shall and will commence mining operations upon or in connection with the demised land within from and after the granting thereof, and shall and will employ upon such land not less than two men during the first year of the term thereby created, and not less than four men during the remainder of such term; and shall and will, at any time when called upon in terms of the regulations relating to mineral leases to do so, execute and take delivery of such lease; or failing therein for a period of fourteen days after being so called upon, I shall and will forfeit the said sum of £9 stg., and all right, title, or interest in and to the said land and the possession thereof, and the said lease shall be forthwith cancelled.

I have, &c.,

TIMOTHY M'CARTHY,  
Gara Falls, Armidale District.

### Minute on No. 2.

This application was received by me this 12th day of October, 1881, at the hour of 12:55 o'clock in the forenoon, and is numbered 81-13.—EDW. G. MARKHAM, Warden's Clerk.

### No. 3.

Mr. T. M'Carthy to The Under Secretary for Mines.

Mineral Lease Regulations, Schedule 6.—Notice of application and deposit.

Sir,

Armidale, 12 October, 1881.

I have the honor to inform you that I have this day deposited with the Warden's Clerk at Armidale the sum of £5, being the first year's rent in advance of 20 acres of land at parish of Metz, Gara Falls, for the purpose of mining for antimony, and the sum of £4, being the fees for survey of the said land. The number of my application is 81-13 M.

I have, &c.,

TIMOTHY M'CARTHY.

No. 4.

## No. 4.

## Mr. T. M'Carthy to The Secretary for Mines.

Sir,

Armidale, 12 October, 1881.

In reference to the 80 acres mineral selection taken up on the 6th October, 1881, by Richard Palmer, James I. Moore, and John Moore, junior, I beg to state that I held a prospecting area of 40 acres from the 6th of September, 1881, to the 3rd of October, 1881.

On the 3rd October I took formal and legal possession of 20 acres of said area by L trench and peg at each angle thereof, with marked tree lines for boundary.

On same date posted notice of intention to apply for a lease, on Post Office and Land Office, as required by the regulations.

On the 12th October paid rent and survey fees on said 20 acres.

Messrs. Palmer and Moore now tell me that the said 20 acres is included in their selection which was taken up on the 6th October, 1881.

I further beg to state that Messrs. Palmer and Moore had every opportunity of knowing that I was in legal occupation of this land, as three men were working on it (the 20 acres) regularly from the 6th September up to the present date. And further, my camp was and is in close proximity to said 20 acres. I also learn that the man who marked out this land for Palmer and Moore had a conversation with me when working on my claim of 20 acres, but he never told me that he was then marking out a selection for Palmer and Moore.

I respectfully request a perusal of this statement.

Your obedient servant,  
TIMOTHY M'CARTHY.

## No. 5.

## Mr. J. W. Mitchell to Mr. W. C. Proctor.

Dear Sir,

Armidale, 20 October, 1881.

The enclosed declaration with annexures will almost without further observation show you that I want an injunction from the Secretary for Mines, under 58 section 37 Victoria No. 13, to restrain Mr. Timothy M'Carthy and his friends from interfering with minerals from Palmer and Moore's mineral conditional purchase, at any rate until after the objections have been inquired into and settled. I dare say you will have no difficulty in gathering from the objections what the points are, but to make them clear I contend that M'Carthy's application of 12th October, made after he had been informed the land was selected by Palmer and others, is valueless on this ground alone,—the notice of intention was made by three persons, but only one applies. This may appear more technical than otherwise, but a perfectly fair objection without reference to anything else. Get the Under Secretary to grant injunction immediately upon receipt, and send me up whatever notices are required to be served. I will see that services are effected without delay. You might as well drop me a wire on Saturday morning as to what you have done. J. M., senior, told me he had also written you. I need therefore say no more, but remain,—

I have, &c.,  
J. W. MITCHELL.

*Minute on No. 5.*

By Under Secretary for Mines:—Ask Warden whether such application has been made, and if so, whether objection and deposit have been duly lodged, also whether an inquiry will be held.—H. W. 24/10/81.

*[Enclosure A to No. 5.]*

## Statutory Declaration.

I, RICHARD PALMER, of Armidale, in the Colony of New South Wales, hotelkeeper, do hereby solemnly and sincerely declare as follows:—

1. That on the 6th day of October instant, in conjunction with James Ingram Moore and John Moore the younger I became a purchaser under mineral conditional purchase of 80 acres of land situated in the county of Sandon, parish of Metz, at Armidale.
2. That on the 12th day of October instant one Timothy M'Carthy applied at the Warden's office, Armidale, for a mineral lease of 20 acres of land situate in the county and parish forming a portion of our said mineral conditional purchase, and was at the time of making such application for lease informed by the Mining Registrar the land had been previously conditionally purchased by myself and co-partners.
3. That on the said 12th day of October instant written notices were served upon the said Timothy M'Carthy (copies whereof are hereunto annexed, marked respectively A and B.)
4. That on the 20th day of October instant notice of objections (a copy whereof is hereunto marked C) to the granting of a mineral lease to the said Timothy M'Carthy were lodged with the Mining Registrar at Armidale on behalf of myself and co-partners.
5. That notwithstanding the before-mentioned written notices the said Timothy M'Carthy with others commenced to work, and persists in working the land embraced in his application of 12th October instant; and unless the said Timothy M'Carthy and others are restrained by injunction from further working, the property of myself and co-partners is liable to be seriously prejudiced.

And I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of her present Majesty, intituled, "An Act for the more effectual abolition of Oaths and Affirmations taken and made in various Departments of the Government of New South Wales and to substitute Declarations in lieu thereof and for the suppression of voluntary and extra-judicial Oaths and Affidavits."

RICHARD PALMER.

Made and signed before me at Armidale, this twentieth day of October, 1881,—

JAMES BRAY, J.P.

*[Enclosure*

## [Enclosure B to No. 5.]

Messrs. R. Palmer &amp; Co. to Messrs. T. M'Carthy &amp; Co.

You are hereby requested not to remove any antimony or other ores off our mineral conditional purchase of 80 acres, taken up on 6th October.

Armidale, 12 October, 1881.

RICHARD PALMER.  
JAMES I. MOORE.  
JOHN MOORE, JUNIOR.

*Minute on above.*

This is the notice marked "A" referred to in the annexed declaration of Richard Palmer, taken before me at Armidale, this 20th day of October, A.D. 1881.—JAMES BRAY, J.P.

## [Enclosure C to No. 5.]

Messrs. R. Palmer &amp; Co. to Messrs. T. M'Carthy &amp; Co.

TAKE notice we are the owners of mineral conditional purchase of 80 acres of land, situate county Sandon, parish of Metz, Gara Falls: Commencing at a marked tree about 700 yards in a south-easterly direction from Powrie and Glass mineral conditional purchase No. 58, running south-east; thence towards the river or creek. We give you this notice, as we are informed that you are about to commence operations thereon.

Armidale, 12 October, 1881.

This is the notice marked "B" referred to in the annexed declaration of Richard Palmer, taken before me at Armidale, this 20th day of October, A.D. 1881.—JAMES BRAY, J.P.

## [Enclosure D to No. 5.]

Mr. J. W. Mitchell to Messrs. T. M'Carthy and the Mining Registrar.

Notice of objections to the issue of a mineral lease.

TAKE notice that Richard Palmer, James Ingram Moore, and John Moore the younger, all of Armidale, object to the granting of a mineral lease to Timothy M'Carthy of 20 acres of land, situated in the county of Sandon, parish of Metz, applied for by the said Timothy M'Carthy at Armidale, on the 12th day of October now instant, on the grounds following, that is to say:—

1. That possession was not taken by the said Timothy M'Carthy in accordance with the Act 37 Victoria No. 13 and the existing regulations thereunder.
2. That notice of intention to apply for such lease was not given by the said Timothy M'Carthy in accordance with the said Act and regulations.
3. That prior to such application for mineral lease by the said Timothy M'Carthy, the said Richard Palmer, James Ingram Moore, and John Moore the younger, had become and were purchasers from the Crown, under mineral conditional purchase, of the land referred to in such application, of which fact the said Timothy M'Carthy had due notice.

Dated at Armidale, the 19th day of October, A.D. 1881.

J. W. MITCHELL,  
Attorney for objectors.

*Minute on above.*

This is the notice marked "C" referred to in the annexed declaration of Richard Palmer, taken before me at Armidale, this 20th day of October, 1881.—JAMES BRAY, J.P.

## No. 6.

Telegram from Mr. J. Mair to Under Secretary for Mines.

Armidale, 26 October, 1881.

Re your letter of 24th instant, Timothy M'Carthy, on 12th instant, applied for mineral lease said to be embraced by mineral conditional purchase of Messrs. Moore and Palmer, taken up on 6th instant. Objection and deposit were duly lodged on 20th instant. Inquiry will be held on 2nd proximo.

J. MAIR,  
Warden.

*Minutes on No. 6.*

Notice of an application by T. M'Carthy for 20 acres at Yara Falls has been received.—E.W.R., 27/10/81.

By the Under Secretary for Mines:—Await action by Warden upon application for injunction and further application from Mr. Proctor.—H.W., 27/10/81.

## No. 7.

Mr. Warden Mair to The Under Secretary for Mines.

Sir,

Warden's Office, Armidale, 4 November, 1881.

Herewith I have the honor to forward to you the depositions taken by me in the matter of the application of Timothy M'Carthy for a mineral lease of 20 acres of land at Gara Falls, for the purpose of mining for antimony.

It will be observed that the objectors, Messrs. Moore and Palmer, do not endeavour to impugn the evidence given by and for the applicant to the effect that he fulfilled the requirements of the law in the manner of his applying for the lease. Their contention is that, before the applicant actually applied for the lease, they had conditionally purchased (for mining purposes) the land in question, and that, therefore, their title is superior to his.

The question raised, therefore, is one of law rather than of fact.

I have, &c.,  
J. MAIR,  
Warden.

*Minutes on No. 7.*

By Under Secretary for Mines:—Although no survey has been made, it appears to be admitted that the land applied for under the within application forms part of the land conditionally purchased by Messrs. Palmer and Moore, on the 6th ultimo. If that conditional purchase is valid the application would,

would, I presume, in view of the opinion of the Attorney-General recently given in regard to the powers to conditionally purchase land while an application to lease the same is pending, have to be refused. In this case, however, it appears in the evidence that the 20 acres, the subject of the application to lease, formed part of a mineral prospecting area claimed by M'Carthy (the applicant to lease) in virtue of his mineral license. According to the Mining Act, section 63, a mineral license confers upon the holder thereof the same rights and privileges in respect or in connection with mining for minerals, other than gold, as are declared by that Act to be conferred on holders of miners' rights in respect of mining for gold; and by the 15th section of the said Act, holders of miners' rights appear to be entitled, except as against Her Majesty, to the possession of and property in the portion of land occupied for mining purposes. If the land held under a mineral license be the property for the time being of the holder of such license, then it would not appear to be capable of being conditionally purchased any more than a claim held under miners' rights. In this case there may be a question whether M'Carthy did not, in applying to lease 20 acres, abandon his mineral prospecting area. As this case may form a precedent, it might perhaps be desirable to obtain the opinion of the Crown Law Officers upon it.—H.W., 7/11/81. Submitted.

By the Secretary for Mines:—State the case for the opinion of the Crown Law Officers and submit?—A.R., 8/11/81.

[Enclosure A to No. 7.]

Application, No. 81/13, at Armidale for a mineral lease.

1. By whom application was received?—The Warden's clerk.
2. At what place?—Armidale.
3. Date and hour when received?—12 October, 1881, at 12:35.
4. Receipt for first year's rent, No. —? Date—12 October, 1881, 81/13.
5. To whom receipt was issued?—Timothy M'Carthy.
6. Date when notice to survey was sent to Surveyor?—18 October, 1881.
7. Date when report and plan were received from the surveyor?—Not yet received.
8. Names of objectors and dates on which they lodged their objections?—Richard Palmer, James Ingram Moore, John Moore, jun.; objection lodged 20th October, 1881.
9. Date of inquiry?—2 November, 1881.
10. Are the applicants holders of miners' rights?—
11. Is the land applied for exempted from leasing under the 34th section of the Mining Act?—This land supposed to be taken by Palmer, Moore, & Co.
12. Is the time proposed for commencing work reasonable?—
13. Is the number of men proposed to be employed reasonable?—

[Enclosure B to No. 7.]

Notice of objections to the issue of a mineral lease.

TAKE notice that Richard Palmer, James Ingram Moore, and John Moore the younger, all of Armidale, object to the granting of a mineral lease to Timothy M'Carthy of 20 acres of land, situated in the county of Sandon, parish of Metz, applied for by the said Timothy M'Carthy, at Armidale, on the 12th day of October now instant, on the grounds following, that is to say—

1. That possession was not taken by the said Timothy M'Carthy in accordance with the Act 37 Victoria No. 13 and the existing regulations thereunder.
2. That notice of intention to apply for such lease was not given by the said Timothy M'Carthy in accordance with the said Act and regulations.
3. That prior to such application for mineral lease by the said Timothy M'Carthy, the said Richard Palmer, James Ingram Moore, and John Moore the younger had become and were purchasers from the Crown under mineral conditional purchase of the land referred to in such application, of which fact the said Timothy M'Carthy had due notice.

Dated at Armidale, the 19th day of October, A.D. 1881.  
To Timothy M'Carthy and to the Mining Registrar.

J. W. MITCHELL,  
Attorney for Objectors.

*Minute on above.*

By Warden's Clerk.—Received with £5.—E.G.M., 20/10/81.

[Enclosure C to No. 7.]

Mineral conditional purchase 81-270, section 19, by Richard Palmer, James Ingram Moore, and John Moore, junr.  
80 acres, 6th October, 1881, at 10 o'clock.

County Sandon, parish of Metz, at Vinegar Spur: Commencing at a marked tree about 700 yards in a south-easterly direction from Pourie & Glass's mineral conditional purchase No. 58, running south-east; thence towards river or creek.

*Minute on above.*

I certify the above to be a true extract from my register of a mineral conditional purchase taken by Palmer and others, by application, on 6th October, 1881.—JAMES BRAY, C.L.A., Armidale, 2nd November, 1881.

[Enclosure D to No. 7.]

Messrs. Timothy M'Carthy, James Donnelly, and Dedrick Harnes, Gara Falls,—

TAKE notice, that we are the owners, by mineral conditional purchase, of 80 acres of land situate county Sandon, parish of Metz, Gara Falls: Commencing at a marked tree about 700 yards in a south-easterly direction from Powrie & Glass's mineral conditional purchase No. 58, running south-east; thence towards the river.

We give you this notice, as we are given to understand that you are about to commence operations thereon.

RICHARD PALMER,  
JAMES MOORE,  
JOHN MOORE, JUNR.

Armidale, 12th February, 1881.

[Enclosure E to No. 7.]

Messrs. Timothy M'Carthy, James Donnelly, and Dedrick Harnes, Gara Falls,—

You are hereby requested not to remove any antimony off our mineral conditional purchase of 80 acres, taken up 6th October, 1881, and marked previously.

RICHARD PALMER,  
JAMES MOORE,  
JOHN MOORE, JUNR.

Armidale, 12th October, 1881.

[Enclosure

## [Enclosure F to No. 7.]

## Depositions.

Warden's Court, Armidale, 2 November, 1881.

Present—The Warden.

THE Court opened to consider an objection lodged by Messrs. Moore and Palmer to the granting of a mineral lease applied for by Timothy M'Carthy on 12th October last.

Mr. Kearney for applicant; Mr. Mitchell for objectors.

See Enclosure C.

See Enclosures D and E.

*Richard Palmer*, on oath, states:—I am an hotelkeeper in Armidale, and one of the objectors to the application of Timothy M'Carthy; in conjunction with James Ingram Moore and John Moore, junr., I, on the 6th of October last, paid £40 to the Crown Lands Agent at Armidale for 80 acres for a mineral conditional purchase; the description of the land produced is the same as I gave when I applied for the 80 acres on the 6th of last October; I know the land; I saw it on 2nd of last October, before I applied for it; I am aware that Timothy M'Carthy applied for 20 acres of land on 12th October last as a mineral lease; the land applied for by M'Carthy does form part of the 80 acres applied for by myself, James I. Moore, and John Moore, junr.; on the 12th of October last I served notices on M'Carthy; the copies produced are the same as I served; I served one notice prior to him applying for the lease; I served him at 11 o'clock, and later in the day issued him with a notice; I served him before 1 o'clock; I had no conversation with him when I served him; no notices had been posted in M'Carthy's own name on the Post Office and Court-house; three men posted notices of intention on the Court-house.

*By Warden*: M'Carthy was one of them; I can't say how long the notices had been posted there; I saw them two days before they applied; the 6th of October last was the first Lands Office day for selection.

*Cross-examined by Mr. Kearney*: The 2nd of October was the first time I saw this land; I went out on the 2nd; I did not see M'Carthy and some men working on the ground; I don't know that M'Carthy and his men had been working on the land for a month; I don't recollect Mitchell telling me that M'Carthy and party had been working the land; I did not mark out the land; I gave orders to my man to mark it out; the marked tree was not marked when I was out on Sunday; I told Mitchell to mark the tree on Monday morning; Mr. James Moore and Mitchell were with me on the 2nd of October last; we only went out to see the land; I did not make inquiries about who were working on it; I paid for the land on the 6th of October last, the first land day.

*Re-examined by Mr. Mitchell*: I did not see a notice of intention on the board before I applied for the 80 acres; I saw the notices two days prior to the day M'Carthy applied for his lease; I gave notice to M'Carthy on the 12th; I did not see him before the 12th of October last; I waited to give M'Carthy notice as I saw he had notices of intention posted on the board; I gave Mitchell notice to take the land up on the 3rd of October; I hold a mineral license and a miner's right.

Sworn at Armidale, this 2nd day of November, 1881, before me,—  
J. MAIR, Warden.

RICHARD PALMER.

*Edward George Markham* on his oath, saith:—I am Warden's Clerk at Armidale, and assist the Land Agent in the Land office here, and have a perfect knowledge of all conditional purchases made at Armidale; I know that the objectors in this case made, on the 6th of October last, an application at the Land Agent's office in Armidale for a mineral conditional purchase of 80 acres at Gara Falls; on the 12th of October last I saw Timothy M'Carthy, the applicant in this case, with reference to his making an application for 20 acres for a mineral lease at Gara Falls; he described what he wanted—the application was written out; I read the description, and told him that I thought it clashed with a mineral conditional purchase of Palmer and Moore's, and if he insisted on me taking his application I would; he put in the application produced, and I received it; he paid me the deposit and survey fee, and I gave him a receipt for this, and marked on the receipt that I had told him that the land he applied for clashed with a mineral conditional purchase previously made by Palmer and Messrs. Moore. The Lands Department is distinct from the Mining Department, although the business is carried on in one office; I don't know anything about the land in dispute; I had been informed by Mr. Palmer that a man named M'Carthy was likely to take up land that he had already applied for by mineral conditional purchase; this was some days after Palmer and Moore took up the mineral conditional purchase; it was in consequence of what Palmer told me that I told M'Carthy that the land he applied to lease was already taken up; M'Carthy brought the application to me; I read it, and immediately told him that the land was already taken up; some time, two or three days before M'Carthy applied, I had seen his name in conjunction with other names attached to a notice of intention to apply for a lease; it was on the board at the Court-house; I remember giving M'Carthy forms of notice of intention to apply; it may have been a week or more before he applied for the lease.

EDWD. G. MARKHAM.

Sworn at the Police Office, Armidale, the 2nd day of November, 1881, before me,—  
J. MAIR, Warden.

*William Mitchell*, on oath, states:—I am a miner living at Gara Falls; I know the land applied for by Messrs. Palmer and Moore at Gara Falls as a mineral conditional purchase; it was applied for on or before the 6th of last October; I know the land before that day; I marked the land on the 3rd of October; I marked a tree as a starting-point; Messrs. Palmer and Moore applied for 80 acres; I marked the tree about 9 o'clock in the morning of the 3rd of October last; I know the land quite well; on the 18th of October last, according to instructions, I went to take possession for the company Messrs. Palmer and Moore; I met M'Carthy—he asked me if I had any notice to serve on him from the company; I said "Yes"; I gave it to him; he looked at it, and said "This is my boundary here; if you cross this it will be at the peril of your life." I said that I did not come to fight for the land—that I was sent by the company; the part he called his boundary was part of the 80 acres applied for by Messrs. Moore & Co.; I am sure M'Carthy has been extracting ore out of the 80 acres applied for by Messrs. Palmer and Moore; I did not carry out the instructions of the company, on account of what M'Carthy said to me.

*By Warden*: I know that ore has been removed from the land that Messrs. Moore and Palmer claim.

*Examined by Mr. Kearney*: I have lived for some time at Gara Falls, and know M'Carthy quite well; I know M'Carthy had been working on the 80 acres before the 30th of October last; he had other men with him there working when I saw him; I did not see M'Carthy on the land on the 3rd of October last; I marked a tree as a datum point on the 3rd of October last; I was all over the 80 acres; I did not see M'Carthy, but I saw his camp—it was not on the 80 acres; there are other men working about this 80 acres, but not on the 80 acres; when M'Carthy said that I was on his boundary, he was on the 80 acres of Messrs. Moore and Palmer; I did not put any men on the 80 acres, and M'Carthy told me it was at the peril of my life; I did not put men on any part of the 80 acres outside of M'Carthy's boundary.

*Re-examined by Mr. Mitchell*: The camp of M'Carthy's was off the 80 acres when I saw it on 30th of October last.

Sworn at Armidale, this 2nd day of November, 1881, before me,—  
J. MAIR, Warden.

WILLIAM MITCHELL.

## For applicant.

*Timothy M'Carthy*, on oath, states:—I am an applicant for a mineral lease at Gara Falls, and a party in the matter now before the Court; I am the holder of a mineral license; by virtue of that mineral license I was in possession of 40 acres as a prospecting area, which I took up on the 6th of last September; I was prospecting for antimony at Gara Falls; I continued in possession of the land with two other men; we discovered some ore about the 3rd of October, and thought we had payable antimony; on the 3rd of October last I put up a notice of intention on 20 acres, part of the 40 acres I held as a prospecting area, and I marked out L trenches and put pegs in it at each corner of the 20 acres, at 8 o'clock; at the time I marked the land out no one was in possession, nor did I see any marks to indicate that any person had applied for the land; at 5 o'clock two men and myself were on the ground, and at 8 o'clock I left for Armidale to get the forms of notice of intention to apply; I posted the notices on the Court-house and Post Office in Armidale, and on the land; at the time I posted the notices I was not aware that any person had any claim to the land, nor could I see any marks to indicate that the land was applied for; two other men were with me when I marked the land out, viz., James Donnelly and Dedrick Harnes; we three took part in marking out; in the intention I posted, I stated an application would be made on the 12th of October last, and I did so on the 12th of October, in my own name, the two other men already referred to declining to be partners in the lease for some reason; from the 6th of last September up to the time the objection was lodged, I have been in *bona fide* possession of the land, and have been working it.

By

*By Warden:* After I applied for the 20 acres, I posted up a notice that I had applied for 20 acres as a mineral lease; I put up a plate, stating "Mineral lease applied for," and signed my name to it; I heard Mr. Mitchell's evidence this morning: the first I heard that the land was taken was when I came in to apply for the lease, on the 12th of last October; the next I heard of it was when Mitchell came down with his men to work; I showed Mitchell what I claimed, and said he could go anywhere outside of my boundary—of what I considered my 20 acres.

*Enomined by Mr. Mitchell:* It was about half an hour or an hour before I lodged the deposit survey fees that I saw Palmer and got the notice of objection from him; the Warden's Clerk did warn me that the lease would clash with Palmer and Moore's mineral conditional purchase, and gave me a receipt to that effect: I did not see Palmer and Moore on the land on the 3rd of October last—I heard of them being at M'Bean's on the 3rd of October last.

Sworn at Armidale, this 2nd day of November, 1881, before me,—

J. MAIR, Warden.

TIMOTHY M'CARTHY.

This deponent, on oath, states:—My name is James Donnelly; I have been at work with Mr. M'Carthy at Gara Falls; I have been working there for about two months up to the present time; I had been working with M'Carthy before the 3rd of October last; on the 3rd of October last M'Carthy and myself pegged the land out, put L trenches at each corner, and put a notice on the ground; we marked the land out in the morning pretty early, and the same day M'Carthy came to Armidale; I have been working with M'Carthy ever since.

Sworn at Armidale, this 2nd day of November, 1881, before me,—

J. MAIR, Warden.

JAMES DONNELLY.

*Dedrick Harms, on oath, states:*—I have been working with Mr. M'Carthy at Gara Falls since 6th of last September; we have been prospecting up to the 3rd of October last; on the 3rd of October, we, about 8 o'clock, marked out 20 acres, put pegs in, and made L trenches and marked the trees; we put a notice up on that day; I was one of the partners in the first application, but then withdrew, as I did not consider the land good enough; since the 6th of last September M'Carthy and I have been working on the ground; I did not see anybody on the ground on the 3rd of October last; our camp is not on the 20 acres, but men are working on the 20 acres; the lease is down the falls, and we are camped on top.

Sworn at Armidale, this 2nd day of November, 1881, before me,—

J. MAIR, Warden.

DEDRICK HARMS.

### No. 8.

#### The Under Secretary for Mines to The Crown Solicitor.

Sir,

Department of Mines, Sydney, 16 November, 1881.

I have the honor to forward herewith a case which the Secretary for Mines desires to have submitted to the Law Officers of the Crown for an opinion, and of the result of which he would like to be informed at your earliest convenience.

Case—In re land held under mineral license.

I have, &c.,

HARRIE WOOD,

Under Secretary.

#### Minutes on No. 8.

By Under Secretary for Mines:—In view of the statement made by the surveyor, that Mr. M'Carthy has abandoned application No. 81-13, the Warden may be requested to ascertain from the applicant whether such is the fact, and if not, to call upon the surveyor to measure the land applied for, in order that the true position of the land may be known.

Before actually granting this application, the Lands Department may be asked to cancel the conditional purchase, in accordance with the opinion of the Attorney-General.—H. W., 2/6/82. Submitted.

By the Minister for Mines:—Approved.—A.R., 5/6/82.

#### [Enclosure to No. 8.]

Department of Mines, Sydney, 16 November, 1881.

THE Secretary for Mines requests that the Law Officers of the Crown will be pleased to advise him on the following matter:—

One Timothy M'Carthy did on the 6th of September last take up and occupy, in virtue of a mineral license, a mineral prospecting area of 40 acres of land at Gara Falls, and on the 3rd ultimo took possession of 20 of the said 40 acres, with a view of making an application to lease them for mining purposes.

Regulations relating to mineral licenses; No. 2, page 120.

Such application to lease has been objected to by Palmer and party, on the ground that the land applied for forms part of a conditional purchase made by them on the 6th ultimo, that is to say, after possession had been taken for the purpose of lodging an application to lease, but before such application had been lodged. According to the Mining Act, section 63, a mineral license confers upon the holder thereof the same privileges in respect of or in connection with mining for minerals other than gold as are declared by that Act to be conferred on holders of miners' rights in respect of mining for gold, and by the 15th section of the said Act the holders of miners' rights appear to be entitled (except as against Her Majesty), during the continuance of such miners' right, to the possession of and property in the portion of land occupied for mining purposes.

The questions upon which the Secretary for Mines seeks to be advised are—(1) whether the land held under a mineral license is open to conditional purchase, and (2) whether the holder of a mineral license, Timothy M'Carthy, by taking possession of a portion of his mineral prospecting area aforesaid, with a view of making an application to lease for mining purposes, abandoned his mineral prospecting area held in virtue of a mineral license, or whether he was in the same position in relation thereto as the holder of a gold-mining claim would be who had applied to convert his claim into a lease—*vide* section 38 of the Mining Act.

ARTHUR RENWICK.

### No. 9.

#### Mr. J. G. Martyn to The Mining Warden, Armidale.

Sir,

Armidale, 3 February, 1882.

I have the honor to return herewith mineral lease application No. 8,113, by Timothy M'Carthy, for 20 acres, in the county of Sandon, parish of Metz, and to report that when I proceeded to measure the land I found that it had been abandoned by the applicant; and also that the land embraced by this application is almost entirely situated within a mineral conditional purchase taken up by Richard Palmer, James Ingram Moore, and John Moore, junr., on 6th October, 1881.

Mineral lease No. 81-13 and tracing herewith.

I enclose a tracing showing the relative positions of the mineral conditional purchase and the mineral lease.

I have, &c.,

JOHN G. MARTYN,

Licensed Surveyor.

*Minutes on No. 9.*

Forwarded for information of the Minister for Mines.—J. MAIR, Warden, Armidale, 3/2/82. The Under Secretary for Mines, Sydney.

By Chief Mining Surveyor:—The refusal of this lease is recommended, being, according to the report of the surveyor, to a great extent for land previously conditionally purchased for mining.—ROBT. D. FITZGERALD, 6 Feb., 1882.

Submitted, 9/2/82.

By Under Secretary for Mines.—In this case the Chief Mining Surveyor, contrary to the practice which has obtained since the formation of the Department, has recommended the refusal of the application. It is submitted that the practice which has hitherto obtained should be continued, namely, that the Survey Branch submit the facts disclosed by survey, and that the Under Secretary make the necessary recommendation upon the whole case. The danger of adopting the practice now proposed to be introduced by the Chief Mining Surveyor is shown by the fact that it is opposed to the Ministerial decision in the case under which an important issue is referred for the opinion of the Attorney-General.—H.W.

Approved, 20/2/82—A.R. The Chief Mining Surveyor, B.C., 21/2/82.—H.W., Under Secretary.

By Chief Mining Surveyor:—I could make no recommendations as long as my letters were detained, and I consider my recommendations of 6th February to have been perfectly correct, although from the method in which the business of the Mining Department has hitherto been conducted, I was in ignorance that a reference had been made by the Crown Law Officers. If proof be required that examination by the professional parts of the office is necessary, it is furnished by this case, in which a reference has been made to the Law Advisers, without any proof that the prospecting area *said* to be granted is identical with the conditional purchase, or in fact has any definite location, and a prospecting area of 40 acres is obviously illegal, both under the 63rd clause of the Act and Regulations. I cannot find any decision of the Minister's to which my recommendation "is opposed," as the decision of 20th February, given on the recommendation of the Under Secretary, is unprecedented, being to the effect that the head of the professional division is not to make a recommendation on the report of *his own* officers. I am compelled to request the reconsideration of such decision by the Minister, and in consequence have to point out what the action of the non-professional division has been in this case. A reference is made to the Crown Law Officers on a question of a mining license, as against a mining conditional purchase, without, as far as the papers show, its having been ascertained that such license had any existence, the statement of Mr. McCarthy that he held a license being apparently deemed sufficient. If there has been one, there is nothing to show whether it had or had not expired; whether it was granted under any description, if described; whether it was surveyed and registered as required by the Regulations; and, if surveyed, whether it in any way clashes with the conditional purchases. There is nothing to show how a license (contrary to the 5th and 6th regulations) can be granted for 40 acres, and there is no attempt made to prevent the granting of a deed by the Lands Department to the conditional purchaser while an issue is pending; and if there be any survey, there is no arrangement by which the Departments are to be made aware of its having been made, notwithstanding the effect it may have upon their actions (the practice being I believe for the plan to be handed to the Registrar or to the prospector). I refrain from characterizing the method in which this case has been placed for decision or opinion before the Crown Law Officers, but would suggest that the question submitted to them should rather have been whether the mass of regulations "relating to mineral licenses" are not illegal, as conferring "rights and privileges" totally distinct from those conferred by a "miner's right," although the 63rd clause of the Act distinctly states that they shall be "the same," except as regards the mineral sought for. It therefore appears to me that Mr. McCarthy has no rights whatever under any license he *may* hold, and that the regulations evolved from the 63rd clause are illegal, as being *ultra vires*.—ROBT. D. FITZGERALD, 27 February, 1882. The Under Secretary for Mines.

[Enclosure to No. 9.]

Notice to make survey.

Sir,

Warden's Office, Armidale, 18 October, 1881.

An application for a mineral lease, particulars as per margin, having been lodged in this office, I request you will be good enough to survey, in accordance with the regulations relating to mineral leases, the area so applied for, and to furnish me at your earliest convenience with a plan and report.

Your attention is particularly directed to sections for mineral leases, numbered respectively 2, 3, 12, 13, 14, or to regulations relating to gold-mining leases numbered respectively 1, 2, 3, 4, 5, 14, and 15.

I have, &c.,

EDWD. G. MARKHAM,  
Warden's Clerk.

J. G. Martyn, Esq., Mining Surveyor, Armidale.

Copy of description of the land, as given in the application:—County Sandon, parish of Metz, about 700 yards in a southerly direction from Mara Creek; about 700 yards in an easterly direction from J. Moore's first lease.

No. 10.

The Crown Solicitor to The Under Secretary for Mines.

Sir,

Crown Solicitor's Office, Sydney, 22 February, 1882.

I have the honor to return herewith your letter of date the 16th of November last, and papers therewith, *in re* land held under mineral licenses, and to state that I have submitted same to Mr. Attorney-General, a copy of whose advising thereon will be found attached thereto.

I have, &c.,

JOHN WILLIAMS,  
Crown Solicitor.

*Minutes on No. 10.*

By Under Secretary for Mines:—Submitted.—H.W., 28/2/82.

By the Minister for Mines:—Forward to Department of Lands.—A.R., 28/2/82.

No. of application, 81-13. Gara Falls, parish Metz, 20 acres. Timothy McCarthy, of Gara Falls.

[En route to No. 10.]

## Opinion of the Attorney-General.

The Crown Law Offices, 21 February, 1882.

Subject:—Whether land held under a mineral license is open to conditional purchase.

1. By section 15 of the Mining Act, 37 Vic. No. 13, it is enacted that every holder of a miner's right, and any number of persons collectively being each the holder of a miner's right, shall, subject to the provisions of the Act and regulations thereunder, be entitled (*inter alia*) to enter upon, mine for gold and occupy for gold-mining purposes, or for residence during the continuance of such miner's right, any Crown Lands, and in the prescribed manner, quantities, dimensions, and according to the prescribed boundaries and according to the regulations in force from time to time. Sub-section of the section referred to further entitles the holder of a miner's right to the possession of and property in during the continuance of such miner's right such portion or portions of Crown Lands as aforesaid, &c. By section 63 the holder of a mineral license has conferred on him the same rights and privileges, in respect or in connection with mining for minerals other than gold, as are declared by the Act to be conferred on holders of "miners' rights in respect of mining for gold." I am clearly of opinion, therefore, that land held under a mineral license is during the currency of such license protected from conditional purchase.

2. By regulation 11 of the "Regulations for Mineral Licenses, Mining Act 1874," division 3, it is expressly provided that an application for a lease is not to affect a holding under a mineral license.

ROBERT WISDOM,  
A.G.

## No. 11.

## The Chief Mining Surveyor to The Under Secretary for Mines.

Sir,

Surveyor-General's Office, 3 March, 1882.

With reference to my communication respecting McCarthy's mineral license (papers 82-1,562) I find that regulations of later date than those at the time in my possession have been issued without my being made acquainted with the fact, and that such regulations do not appear to require a survey or to restrict the area to less than 40 acres. I therefore beg leave to withdraw the portion of my previous minutes referring to those points.

Your obedient servant,

ROBT. D. FITZGERALD,  
Under Secretary for Mines.

## Minutes on No. 11.

By the Under Secretary for Mines:—The reference by the Chief Mining Surveyor to the mode of dealing with correspondence in this Department has already been answered (I trust satisfactorily to the Minister), in my memorandum dated 15th February last. There was nothing to prevent the Chief Mining Surveyor obtaining the papers in this case had he desired to see them. I venture to submit, notwithstanding the opinion of the Chief Mining Surveyor, that this case does not prove that examination thereof by the Branch under his supervision was necessary before making reference to the Crown Law Officers,—the evidence given on oath before the Warden that the land the subject of the application to lease had been previously held under mineral license, and the Warden's report thereon, being quite sufficient until the question had been advised upon. I am at a loss to understand how the Chief Mining Surveyor proposes to prove that a prospecting area of 40 acres is obviously illegal both under the 63rd clause of the Act and the regulations,—*vide* regulation 2 relating to mineral licenses. If the Chief Mining Surveyor had read the papers, he would have seen the ministerial decision to which his recommendations are opposed. If any proof were needed that my recommendation of the 17th ultimo should be adopted, it is supplied by the Chief Mining Surveyor's remarks upon mineral licenses, and the regulations relating thereto. I do not purpose to notice the insinuation respecting the action of the non-professional division, beyond repeating that my action was based upon evidence on oath. I regret exceedingly that the tone adopted by the Chief Mining Surveyor renders it necessary for me to comment upon his remarks, but it is patent he is labouring under some serious misconception respecting mineral licenses, or he would not speak of such a license in the following terms:—"whether it was granted under any description, if described; whether it was surveyed and registered as required by the regulations." Any one pretending to a knowledge of our mining laws must know that a mineral license is a document similar to a miner's right, which entitles the holder to take land subject to the regulations, and that such documents are not "granted under a description"; he would also know that the regulations do not require either the license or the land held thereunder to be surveyed or registered; he would also know that the 5th and 6th regulations have nothing to do with the granting of a license—such licenses are issued under regulation 1, and the area is prescribed by regulation No. 2. In view of the foregoing remarks, any comment upon the legal opinion volunteered by the Chief Mining Surveyor concerning the regulations will I presume be unnecessary. Until the question concerning the effect of a holding under mineral licenses had been decided by the Attorney-General, it would I think have been premature to attempt to prevent the issue of a grant to the conditional purchaser, but now that the opinion of the Attorney-General has been obtained the necessary steps may I presume be taken in the matter.—H.W., 2/3/82.

By Under Secretary for Mines:—The present regulations relating to mineral licenses were made in February, 1877.—H.W., 3/3/82.

By Under Secretary for Mines:—Submitted, in connection with minute on papers referred to.—H.W., 3/3/82.

By the Minister for Mines:—I regret to state that it appears to me that the Chief Mining Surveyor has not only erred in regard to the matter referred to in the present memorandum (3 March, 1882), but that any of the points raised in his memorandum of 27 February, 1882, are offered to the provisions of the Mining Act and regulations at the time this latter memorandum was written. I believe we had not received the reason of Mr. Attorney-General Wisdom, but that also now is contradictory of the Chief Mining Surveyor's opinions on the subject there referred to. For the proper conduct by the Minister of this Department, it is essential that my minute and decision of 20th March, 1882, be strictly carried out.—A.R., 4/3/82.

By the Under Secretary for Mines:—The Chief Mining Surveyor.—H.W., B.C., 6/3/82.

By Chief Mining Surveyor:—Observed. I may be permitted to state that the Attorney-General cannot have given an opinion contradictory to mine, as the *point* raised by me, namely, that the regulations under which the license, if there be any, has issued were *ultra vires*, has never been referred to the Attorney-General. It is unnecessary for me to reply to the remarks of the Under Secretary, while other and much more important issues between us remain undecided. Of the preparation and issue of the new regulations I was never informed.—ROBT. D. FITZGERALD, 8 March, 1882. The Under Secretary for Mines.

By

By the Under Secretary for Mines :—Submitted.—H.W., 8/3/82.  
 By the Minister for Mines :—Will the Chief Mining Surveyor have the goodness to state the various issues referred to in his memo., 8th March, 1882, which require decision.—A.R., 13/3/82.  
 By the Under Secretary for Mines :—The Chief Mining Surveyor.—H.W., 13/3/82.  
 By Chief Mining Surveyor :—The issues referred to have been stated in my replies of 17th January and 9th February, to the proposal of the Under Secretary that my services should be dispensed with and another Chief Mining Surveyor appointed, which issues are stated in memo. of the Secretary for Mines of 16th February, 1882, to be under consideration.—ROBT. D. FITZGERALD, 14 March, 1882.  
 By the Under Secretary for Mines :—Submitted.—H.W., 14/3/82.

## No. 12.

## The Under Secretary for Mines to The Under Secretary for Lands.

Sir, Department of Mines, Sydney, 9 March, 1882.  
 I have the honor, by direction of the Secretary for Mines, to forward herewith a copy of opinion given by the Attorney-General on the question submitted by this department whether land held under mineral license is open to conditional purchase.  
 I have, &c.,  
 HARRIE WOOD,  
 Under Secretary.

*Minutes on No. 12.*

By Mr. Blackman :—Submitted. No action appears to be necessary. Papers finally for Charting Branch to note, 13/3/82. Submitted to Chief Commissioner.—W.B., 14/3/82.  
 By the Chief Commissioner :—For information of Surveyor-General in the first instance.—A.O.M., 12/4/82.

The attention of the Minister is called to the within observations of the Deputy Surveyor-General as to the effect of the regulations as to mining licenses, which largely encroach upon the province of land administration, and admit of being availed of to cover any serious abuses and obstructions to the operation of the laws relating thereto.

Within proper limits, the granting of licenses for the protection of persons searching for minerals other than gold and their operations as the holders of miners' rights are protected from being interfered with by pastoral lessees or conditional purchasers would be in harmony with the land laws, and the difficulties arise from rights being conferred or professed to be conferred by the mining regulations which are foreign to those given to the holders of miners' rights, inconsistent with the laws referred to as well as in themselves, and I am very confident never contemplated by the Legislature. It so happens that the provision relating to licenses was inserted in the Mining Act at my own suggestion.—A.O.M., 22/4/82.

By Deputy Surveyor-General :—Attention is directed to the fact that this opinion has been sent without any attention being specially drawn to the case on which it was given, and which, involving an issue between a conditional purchaser and the holder of a prospecting license, would require that the interests of the conditional purchaser should be attended to as well as that of the holder of the license, and would require that steps be taken to prevent an issue of deed to the conditional purchaser if he has no right to the land, owing to previous license. As, however, in my capacity of Chief Mining Surveyor, I was aware of the necessity, I have had the conditional purchase papers noted, to prevent the completion of sale till the question of the right of any prospecting license against the mineral conditional purchase is decided; and I would now recommend the consideration of the whole question of how alienation of Crown Lands by conditional purchase or otherwise is affected by such prospecting rights, and whether they legally exist. Of course the opinion of the Crown Law Officer is based upon the supposition that the prospecting license has been issued according to law; but, in my opinion, for the following reasons, the regulations under which such area is said to be held under mineral license are illegal, as being *ultra vires* :—

- 1st. There is no thing to show who has the right of issuing the licenses, and they certainly have not been issued, as required, by the Governor, as neither he nor the Minister for Mines know anything about them.
- 2nd. The issue of the license is made absolute by the word "shall," in the 1st clause, contrary to the words of the 63rd clause of the Act, which are simply that it "shall be lawful for the Governor to cause to be issued," &c.
- 3rd. There is no privilege given in the 63rd clause other than those given to a holder of a miner's right, and no distinction between the holder of the "right" and the "license," except that the one is to look for gold and the other for other minerals. Whence, then, comes the power (not possessed by the holder of a miner's right) of taking possession of 40 acres, 80 acres, and 640 acres, without the knowledge of the Minister for Lands or the Minister for Mines, and to the defeat of conditional sale and sale by auction?
- 4th. Whence comes the right of having the form of the land thus taken possession of other than that prescribed under a miner's right, or the conditions of taking possession and marking other than those attached to a miner's right?
- 5th. If (as I believe) a miner can only hold one "miner's right," how can he hold several mineral licenses, as permitted under these regulations?
- 6th. How can the grounds of forfeiture which involve rights and privileges be distinct from those in the case of a miner's right, seeing that the law makes the rights and privileges the "same"?
- 7th. The 63rd clause is evidently intended simply to give a prospector a right to be on Crown Land without being considered a trespasser, but not to confer such extensive powers and rights, &c., &c., as are given to him under the regulations; and to evolve such rights from that clause as are given under the two codes of regulations (which contradict each other) is simply to legislate by regulation rather than by Act of Parliament.—ROBT. D. FITZGERALD, for Surveyor-General, 20 May, 1882.

By Secretary for Lands :—Approved. And, in my opinion, the sooner the Mining Regulations relating to this matter are repealed the better.—J.S.F., 23/1/83.

[Enclosure

## [Enclosure A to No. 12.]

## Opinion of the Attorney-General.

The Crown Law Offices, Sydney, 21 February, 1882.

Subject: Whether land held under a mineral license is open to conditional purchase.

1. By section 15 of the Mining Act (37 Vict. No. 13) it is enacted that every holder of a miner's right and any number of persons collectively, being each the holder of a miner's right, shall, subject to the provisions of the Act and regulations thereunder, "be entitled (*inter alia*) to enter upon, mine for gold, and occupy for gold-mining purposes or for residence during the continuance of such miner's right, any Crown Lands, and in the prescribed manner, quantities, dimensions, and according to the prescribed boundaries, and according to the regulations in force from time to time." Sub-section of the section referred to further entitles the holder of a miner's right to the possession of and property in during the continuance of such miner's right such portion or portions of Crown Lands as aforesaid, &c. By section 63 the holder of a mineral license has conferred on him the same rights and privileges in respect or in connection with mining for minerals other than gold as are declared by the Act to be conferred on holders of "miners' rights in respect of mining for gold." I am clearly of opinion, therefore, that land held under a mineral license is, during the currency of such license, protected from conditional purchase.

2. By regulation 11 of the "Regulations for Mineral Leases, Mining Act, 1874," division 3, it is expressly provided that an application for a lease is not to affect a holding under a mineral license.

ROBERT WISDOM, A.-G.

## [Enclosure B to No. 12.]

## Issue of Licenses.

1. Mineral licenses in the form in the Schedule hereto may be obtained from the Warden of any mining district, or such other officer as may be authorized by the Minister for Mines to issue the same.

The fee for each license (which will be personal to the holder, and not transferable) shall be 20s.

Not more than one license shall be held by the same person at the same time.

## Privileges conferred by Mineral Licenses.

2. Mineral licenses shall, during their currency, entitle the holders thereof to take possession of, occupy, and hold for the purposes of searching for and working minerals other than gold, portions of Crown Lands, subject to the several conditions and limitations (so far as the same shall be applicable) prescribed by any regulations in force for the time being with respect to searching and mining for gold by the holders of miners' rights.

## Repeal of previous Regulations.

3. The regulations relating to mineral licenses made and proclaimed on the 13th day of February, 1877, are hereby repealed.

## No. 13.

## Mr. J. G. Martyn to The Surveyor-General.

Sir,

Armidale, 11 March, 1882.

I have the honor to transmit herewith the plan of one portion of land containing 80 acres, numbered 111, in the parish of Metz, county of Sandon, applied for by R. Palmer, Jas. I. Moore, and Jno. Moore, junior, under the 19th section of the Crown Lands Alienation Act of 1861, and surveyed in accordance with instructions dated the 28th October, No. 81/56; improvements nil.

This portion consists of a number of barren precipitous spurs. The southern boundary and part of the western boundary are quite impracticable, the south-west corner being situated in a deep gulf, the sides of which are almost perpendicular walls of rock and inaccessible.

For explanation as to measurement having been made within 60 chains of Baker's Creek, *vide* my letter dated 11th March, No. 82/20.

I have, &amp;c.

JOHN G. MARTYN,

Licensed Surveyor.

## Minutes on No. 13.

By District-Surveyor Chard:—Forwarded 17th March, 1882; two tracings received, one of which forwarded to the Land Agent.—J. S. CHARD, D.S.

By Chief Mining Surveyor:—There is a claim under a license against this land, and a deed should not issue till some communication on the subject is received from the Department of Mines.—R.D.F., 24/3/82.

## No. 14.

No. 82/20.

## Mr. J. G. Martyn to The Surveyor-General.

Sir,

Armidale, 11 March, 1882.

With respect to the forms of measurement in the survey of portions Nos. 109, 110, and 111, in the parish of Metz, county of Sandon, viz., not being measured with frontage to Baker's Creek, I have the honor to report that, although portions 109 and 110 are situated within 60 chains of the creek and portion 110 is bounded by it, still the possession of this creek as a boundary cannot be considered an advantage, as it is quite inaccessible to stock, on account of the exceedingly precipitous nature of the falls.

Until

Until antimony was discovered in this neighbourhood, the falls were looked upon as being utterly useless country, and consequently the edge of the table-land has been made the boundary of the agricultural and pastoral lands. Although many of these measurements are situated within the 60 chains limit, the falls are quite devoid of pasturage and are only available for mining purposes; and, should the regulations regarding frontage portions be enforced, it would seriously interfere with what is fast becoming an important industry of the district.

I would have submitted the leases for your consideration before survey, but owing to possibly conflicting leases it was very necessary that they should be measured with as little delay as possible; and as I trusted that an explanation would be sufficient, I therefore measured these lands as applied for, and I would respectfully request that my surveys be accepted.

I have, &c.,  
JOHN G. MARTYN.

*Minute on No. 14.*

A deviation from the usual practice of survey has been allowed under special conditions somewhat similar. See C.S. 81/33,184, with Mr. (L.S.) Martyn's letter.

Mr. Martyn asked my advice on this part before survey. Taking into consideration the object of frontages, viz., to prevent a monopoly of the water, I advised measurement as applied for and effected, for the following reasons:—

The edge of the falls has been adopted as the boundary between the available and unavailable lands for grazing and agriculture. The sudden and precipitous falls into what may be considered a gulf or chasm, nearly 2,000 feet deep, prevents any possibility of obtaining water from the creek and benefit derived therefrom.

In a similar manner, were minerals found on Sydney cliffs, a portion would be unreasonably measured fronting the ocean and extending over the cliffs and back 60 chains. This gulf, though not so perpendicular, is seven times the depth, and walking access is only obtainable down it in parts, and then by climbing down in a zigzag manner.

The regulations provide, in the case of land taken up for occupation by grazing, that precipitous cliffs may form a boundary irrespective of the depth from the creek, thus dividing available from unavailable land. In this case the unavailable land has been found to contain minerals, and, in view of the above, and carrying out the spirit of the other regulations, I suggested measurement in the most suitable form according to the special circumstances. (See paragraph 68 of Surveyors' Instructions.) These have been carried out by Mr. Martyn, and I would recommend acceptance of his surveys.—J. S. CHARD, District Surveyor, 17 March, B.C., 82/55.

No. 15.

The Warden, Armidale, to The Under Secretary for Mines.

Sir,

Warden's Office, Armidale, 10 July, 1882.

Referring to your letter of the 9th June last (numbered as in margin), I have the honor to inform you that on two occasions notices were sent to Timothy M'Carthy, calling upon him to state if he has abandoned the land applied for by him, numbered 81/13, mineral lease, Armidale, but up to the present date no answer has been received.

I am informed that the applicant has abandoned this land, he having left this district some months ago.

I have, &c.,

EDWD. G. MARKHAM,  
Warden's Clerk,  
Pro Warden.

*Minutes on No. 15.*

Submitted.—13/7/82.

By Under Secretary for Mines:—From this report, taken in conjunction with that of the surveyor, it appears probable that this application has been abandoned, but there is no conclusive evidence of abandonment. It is not the practice of the Department to refuse an application without such evidence, though it is probably within the power of the Governor so to refuse. In view of the conflict with an M.C.P., it might perhaps be advisable to refuse this application to lease.—H.W., 13/7/82.

Submitted.

By the Minister for Mines:—I think this is the best course under all the circumstances of the case.—A.R., 14/7/82.

No. 16.

## Application by Mr. J. R. Chaffey.

C.

[Alienation Act, section 19.]  
No. 235 of 1882.

District of Queanbeyan.

Application by John Robert Chaffey for the conditional purchase, without competition, of 300 acres unimproved Crown Land.

Received by me, with a deposit of £150, this 17th day of August, 1882, at 2.5 o'clock,—

O. WILLANS,  
Agent for the Sale of Crown Lands at Queanbeyan.

Sir,

17 August, 1882.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 300 acres; and I herewith tender the sum of £150, being a deposit at the rate of 10s. per acre on the area for which I apply.

I have, &amp;c.,

JOHN ROBERT CHAFFEY,

To the Agent for the Sale of Crown Lands at Queanbeyan. . . . . 193, Macquarie-street, Sydney.

## Description.

County of Murray, parish of Bullongong, 300 acres, under mineral conditional purchase, 10s. per acre, and as herein described, south of, and 18 chains from, the south-west and south-east boundary of 80 acres recently applied for under a mining lease, by Messrs. Kingsland, Irvine, and party, and running from that point due south.

The land now applied for is a part of the same, and is applied for under a mining lease, by Messrs. M'Grath, M'Neill, Edwards, Hughes, and party.

*Minute on No. 17.*

I certify that J. R. Chaffey is of the prescribed age.—O. WILLANS, Crown Lands Agent.

## No. 18.

## Mr. J. R. Chaffey to The Under Secretary for Lands.

Sir,

193, Macquarie-street, Sydney, 1 September, 1882.

I have the honor to request that you will be good enough at your earliest convenience to cause all action on my mineral conditional purchase application, No. 117,977, at Queanbeyan, on the 17th day of August, 1882, to be expedited. My reason for making this request is that I am about returning to Tasmania, and before doing so am anxious to know how far other applications or claims (if any) on the ground will be likely to interfere with my application.

I have, &amp;c.,

JOHN R. CHAFFEY.

*Minute on No. 18.*

Please see my memorandum on.—J.W., 5/9/82.

## No. 19.

## Petition by certain Inhabitants of Captain's Flat, Molonglo River.

Captain's Flat, Molonglo River, 8 September, 1882.

The Honorable the Minister for Mines, Sydney,—

The humble Petition of the miners, residents, leaseholders, and others interested in this locality, humbly sheweth:—

That recently the only available land for residences, commons, roads, &amp;c., adjoining the reefs in this locality have been applied for as mineral conditional purchases, which will have the effect of crippling all mining enterprise and subject your Petitioners to very great loss and inconvenience.

It will give the holders a monopoly of all the land available for machine areas, building sites, &amp;c., and give them the power to obstruct the carriage of quartz from the various reefs to the batteries.

Many of your Petitioners are prepared to prove (on affidavit if necessary) that the land so applied for is auriferous, and they believe that these applications have been made for purely obstructive and speculative purposes only.

Trusting you will be pleased at your earliest convenience to cause these applications to be refused, and your Petitioners will, as in duty bound, ever pray.

JOHN M'GRATH.  
EDWARD HOLEHAN.  
HUGH M'NEIL.

[Here follow 35 signatures.]

*Minute on No. 19.*

By Under Secretary for Mines:—The Under Secretary for Lands.—H.W., B.C., 20/9/82.

No. 20.

## No. 20.

Mr. W. B. Christie to Mr. Fletcher, M.P., and party.

Gentlemen,

Wentworth Court, Sydney, 9 September, 1882.

In accordance with instructions from Mr. Fletcher, I have visited and inspected the copper reef at Molonglo River, in the county of Murray, parish of Bullongong, land district of Queanbeyan, and have the honor to submit to you the following thereon:—

The property consists of three applications for mineral leases of 80 acres each, as per accompanying plan, made by Hugh McNeill and party, on 5th June last, and numbered 1, 2, and 3.

The position of the reef is shown on plan from a rough survey which I made on the ground, also the approximate position of the workings. The workings consist of a cross-cut at "A," with shaft about 20 feet deep, showing a well-defined reef of about 40 feet in width; a second cross-cut at "B," showing the reef about 35 feet wide; and a trial shaft, sunk by Irwin and party (who had endeavoured to jump the ground), about 15 feet deep. This shaft is off the true line of reef.

Cross-cut A.

This cross-cut extends from the eastern wall of the reef about 40 feet, and a shaft sunk, as per marginal sketch, to a depth of 20 feet. The ore here is chiefly green carbonate, intermixed with clay and earthy matter. The specimens marked "A 1" were taken from the bottom of the shaft, and picked out, under my own supervision, from what I considered to be the average of the lode at this part. As the walls are approached the red oxide shows out considerably—specimen "A 2" is a sample; and those two specimens may be taken as a fair average of what the lode is throughout at this point.

Cross-cut B.

About 3 or 4 chains south from A a second cross-cut has been made, opening the reef, which is about 35 feet wide here, to a depth of from 2 to 5 feet. The character of the stone here appears to be better than in the first cut—see two specimens, B 1, which were taken from about the centre of the face of the cut; B 2 (red oxide) is from near the western wall of the reef.

"C."

At "C," on the bank of a gully which runs through the property, the reef is plainly visible on the surface to a width of from 20 to 30 feet; specimens of gossan, C 1 to C 2 were knocked off the exposed capping.

"E."

Specimen B 1-2 will show the character of the stone from the reef at this point.

"D, F, G."

The reef is most distinctly traceable from D to G—that is, completely through blocks 1 and 2 and partly through the third block; but in the latter the character changes from slaty to a coarse porphyritic rock along the line of reef, in which the traces of the lode become lost. There is, however, a length of at least 60 chains of lode visible, which, from its great width and the facilities for working it, contains, I believe, a mine of wealth unequalled by any of the copper lodes as yet opened in the Colony.

The slate beds adjacent to the lode are much shattered, generally on the surface, but in the gully, at H, the action of water has exposed them considerably below the surface, and here they exhibit signs of violent contortion, being folded and doubled over as though the forcing up of the reef through the slate beds had exerted an enormous lateral pressure and driven them back upon each other in the (say) way that the leaves of a book will fold themselves if pressed from front to back.

The pressure necessary to produce this contortion would itself have made the reef become dense and compact, while the "amount" of contortion appears to show that the reef that has been forced up must be of considerable width and depth.

For these reasons I believe that, as the reef is sunk upon, it will become more dense than it is at present, and consequently that the ore will be richer in its percentage of metal.

Near to and northerly from the cross-cut at A the ground falls rapidly to the gully, which is some 30 feet lower than where the shaft is, and in opening up the work I think it would be well to commence at the gully where the reef crosses it, and make a clean open cutting the full width of the reef. As the reef is within 5 degrees of being vertical, it would be more easily and effectively worked in this way than in any other.

Section from A to gully at reef.

About a quarter of a mile south-easterly from the land there is an unlimited supply of mountain limestone of excellent quality (specimen L), which, as it is not yet alienated from the Crown, could be secured by mineral conditional purchase.

Mr. Brooks, whom I accompanied on the occasion, will be in a position to furnish you with details which I may have omitted, particularly with regard to the tenure under which the land is held, and he will convey to you personally suggestions which we mutually agreed upon when on the ground, on the subject of carriage, &c., which cannot be fully explained without a map of the county, which I have been unable to obtain owing to the very limited time at my disposal, having been travelling continuously since last Tuesday; and only having returned this morning from a long and fatiguing coach journey of ten hours before reaching the train at Goulburn, I feel that I am physically unable to furnish you with either so long or so full a report as I could wish; and I trust that, as you must have what information I am able to supply you with to-night, you will consider the shortness of the time at my disposal as an excuse for whatever slight deficiencies the foregoing may exhibit.

I am, &amp;c.,

WM. BEDE CHRISTIE,

Licensed Surveyor, Member Royal Society, Member Institute Surveyors.

## No. 24.

Mr. J. M'Grath and party to The Under Secretary for Lands.

Sir,

Captain's Flat, 18 September, 1882.

I have the honor to forward you herewith a copy of a letter we have addressed to the Under Secretary for Mines, on the subject of our mineral leases at Captain's Flat, Molonglo River, being jumped by a ring of speculators from Sydney, who have applied for our land under 19th section of the Crown Lands Act. We beg that you will bring the matter under the notice of the Minister for Lands, and record our protest against the undermentioned applications for mineral conditional purchases being received:—

John Robert Chaffey, of Sydney, for 300 acres, taken at Queanbeyan on the 17th August last, under 19th section Crown Lands Act.

Conditional purchase No. 259, taken at Queanbeyan 14th September, by Frederick Mansfield Mills, for 130 acres, under 19th section Land Act.

By William Laing, of Newcastle, 140 acres, under 19th section Land Act, No. 260.

Also, by William Bede Christie, of Wentworth Court, Sydney, 130 acres, under 19th section Land Act, No. 261.

We most emphatically enter our protest against all or any of these applications being received until our claims to the leases have been duly dealt with on their merits.

I am, &amp;c.,

JOHN M'GRATH,

(For self and party),

Molonglo Reefs, *via* Foxlow Post Office.*Minutes on No. 24.*

By Under Secretary for Lands:—Urgent. This letter to be handed specially to the Chief Commissioner.—C.O., 20/9/82.

Mr. Wiseman.—W.B., 21/9/82.

*[Enclosure to No. 24.]*

Mr. J. M'Grath and party to The Under Secretary for Mines.

Sir,

Captain's Flat, September, 1882.

We, the undersigned miners, residing at Captain's Flat, Molonglo River, beg to draw your attention to the following circumstances in connection with the mineral leases which we have applied for here, and request that you will take the matter into your favourable consideration and grant us such protection as your Department can afford.

The circumstances are as follows:—In the latter part of May last we, following our usual occupation as miners, were fortunate enough to discover traces of copper here. We immediately gave notice to the Warden's Clerk at Queanbeyan of our intention to apply for mineral leases, and on 5th June we made application for three blocks of 80 acres each, and paid down therefor £75, being the required amount to cover cost of survey fees and first year's rent. We immediately entered upon the ground and commenced working it, and since then have expended in labour and cash the sum of £103 7s. 6d. in developing the mine. By so doing we have discovered that copper is to be obtained in payable quantities on our land.

On the 17th August, more than two months after our applications were lodged, a man named John Robert Chaffey, of Sydney, applied for our land as a mineral conditional purchase, falsely representing to the Land Agent at Queanbeyan that he had the sanction and consent of our party for so doing, and stating that his object was to make our tenure of the land more secure. This man Chaffey, we say, had nothing in common with us; in fact, we never knew or heard of him before, and never authorized him to take the land up under the 19th section of the Land Act in our interest; and, as a matter of fact, finding we had a good claim, and one likely to pay well, he made this attempt to obtain our land under the Land Act, which we, as legitimate miners, had applied for in due form as a mineral lease.

Again, on the 14th instant a party of three mining speculators arrived at Queanbeyan from Sydney, and 400 acres of this land, in which our leases are embraced, were selected under 19th section Land Act, in the names of Frederick Mansfield Mills, Wentworth Court, Sydney, 130 acres; William Laing, of Newcastle, 140 acres; and William Bede Christie, Wentworth Court, Sydney, 130 acres.

Of course, if those applications are to override our leases we will be ruined men, and the fruits of our energies and enterprise will pass into the hands of individuals who only knew of the existence of this copper lode after we had opened it up and worked it.

The injustice of such a proceeding we hope you will see at once, and take such action as will protect the mining community here, and ourselves in particular, from the inroads of this ring of speculators.

We would respectfully point out that we are poor men, and if we lose this land we lose our all. The parties who have applied for our land as mineral conditional purchases are wealthy men, to whom money is little or no object.

We trust you will have this matter thoroughly investigated and see that justice is done us. As miners and poor men we can only place ourselves under your protection, and hope that we will not be deprived of our just rights by the action of those individuals whose only object is to hold the land for speculative purposes.

We have, &amp;c.,

JOHN M'GRATH.  
EDWARD HOLIHAN.  
THOMAS DALY.  
WILLIAM EDWARDS.

JOHN MORRIS.  
HENRY WILSON.  
HUGH M'NEILL.

## No. 25.

Mr. A. Ryrie, M.P., to The Secretary for Lands.

Sir,

Union Club, Sydney, 21 September, 1882.

I called to-day to hand to you, in company with the miners, the attached memorial asking you to take into your favourable consideration their case of extreme hardship. I hope you will be able to see your way towards cancelling these mineral conditional purchases, and avert from absolute ruin these hard-working, industrious, poor, but honest diggers.

I have, &amp;c.,

ALEXANDER RYRIE.

*Minutes on No. 25.*

By Under Secretary for Lands:—Chief Commissioner.—C.O., 21/9/82.

By Chief Commissioner of Conditional Sales:—It is suggested that a report be obtained from the surveyor, with as little delay as possible, upon the statements of the parties as to the disputing the land by others than the conditional purchasers, and as to the eligibility of the applications to conditionally purchase.

Should

Should the land be auriferous, the applications may, after the proclamation of the gold-field (and understood to be under consideration) be dealt with under the second section of the Mining Act.

The applicants for conditional purchase had better be advised of the purport of the within representation as to the occupation of the land by other parties, and expenditure by them; and further, that in the event of the land being auriferous, it may, apart from any other objections, be dealt with accordingly by cancellation of the conditional purchases or otherwise, as may be found advisable.—A.O.M., 27/7/82.

By Secretary for Lands:—Approved.—JOHN R.

[Enclosure to No. 25.]

Sir,

Sydney, 21 September, 1882.

We have the honor to bring under your notice a letter written by us to the Under Secretary for Mines, on the 18th instant, as follows:—

“Sir,

“Captain’s Flat, Molonglo River, September 18th, 1882.

“We the undersigned miners residing at Captain’s Flat, Molonglo River, beg to draw your attention to the following circumstances in connection with the mineral leases which we have applied for here, and request you will take the matter into your favourable consideration and grant us such protection as your Department can afford.

“The circumstances are as follows:—

“In the latter part of May last, we, following our usual occupation as miners, were fortunate enough to discover traces of copper here. We immediately gave notice to the Warden’s Clerk at Queanbeyan of our intention to apply for mineral leases, and on 5th June we made application for three blocks of 80 acres each, and paid down therefor £75, being the required amount to cover cost of survey fees and first year’s rent. We immediately entered upon the ground and commenced working it, and since then we have expended in labour and cash the sum of £103 7s. 6d. in developing the mine. By so doing, we have discovered that copper is to be obtained in payable quantities on our land.

“On the 17th August, more than two months after our applications were lodged, a man named John Robert Chaffey, of Sydney, applied for our land as a mineral conditional purchase, falsely representing to the Land Agent at Queanbeyan that he had the sanction and consent of our party for so doing, and stating that his object was to make our tenure more secure. This man, Chaffey, we say, had nothing in common with us, in fact we never knew or heard of him before, and never authorized him to take the land up under 19th section of the Land Act, in our interest; and as a matter of fact, finding we had a good claim and one likely to pay well, he made this attempt to obtain our land under the Land Act, which we, as legitimate miners, had applied for in due form as mineral leases.

“Again, on the 14th instant a party of three mining speculators arrived at Queanbeyan from Sydney, and 400 acres of land, in which our leases are embraced, were selected under 19th section Land Act, in the names of Frederick Mansfield Mills, Wentworth Court, Sydney, 130 acres, William Laing, of Newcastle, 140 acres, William Bede Christie, Wentworth Court, Sydney, 130 acres.

“Of course if those applications are to override our leases we will be ruined men, and the fruits of our energies and enterprise will pass into the hands of individuals who only knew of the existence of this copper lode after we had opened it up and worked it. The injustice of such a proceeding we hope you will see at once, and take such action as will protect the mining community here, and ourselves in particular, from the inroads of this ring of speculators.

“We would respectfully point out that we are poor men, and if we lose this land we lose our all. The parties who have applied for our land as mineral conditional purchases are wealthy men, to whom money is little or no object.

“We trust you will have this matter thoroughly investigated and see that justice is done us. As miners and poor men, we can only place ourselves under your protection, and hope that we will not be deprived of our just rights by the action of those individuals whose only object is to hold the land for speculative purposes.

“We have, &c.,

(Signatures of McNeill and party).”

The circumstances detailed in the above letter disclose an attempt on the part of the persons therein named to obtain, under colour of the law, lands to which we respectfully submit they cannot be entitled.

We may here state that we have ascertained that steps are being taken to have the district (embracing a large area) in which the lands in question are situated, proclaimed a gold-field, and that such proclamation is daily expected to issue.

At the present moment there are pending upwards of twenty applications for mineral and gold-mining leases within that area.

There are also several prospecting and other gold-mining areas taken up under the Gold Fields Regulations.

The whole of the land thus applied for and taken up respectively is embraced in the mineral selections of Messrs. Chaffey, Mills, Laing, and Christie.

Apart from the extreme hardship which would be entailed upon us in common with the many other miners similarly situated, were these mineral selections allowed to prevail, we beg respectfully to point out what appear to us conclusive reasons why such selections should be cancelled as unauthorized and unjustifiable.

By the 39th section of the Gold Fields Act of 1874 (as affecting gold leases), and by sub-section 2 of section 56 (as affecting mineral leases), the applicants are expressly empowered to take possession of and occupy the lands applied for, pending their applications.

By section 40, any interference with ground applied for as a gold lease is declared a trespass.

On 13th July, 1874, Regulations with regard to both classes of lease were duly proclaimed; and in strict accordance with the Act and those Regulations, we and others made our applications and paid our money; no objections were made, and therefore practically the issue of leases was merely a question of time.

By the 27th of the Mineral Lease Regulations it is provided that “pending any application for a lease, it shall not be lawful for any person other than the applicant or applicants, or some person or persons legally entitled thereto, to enter upon, take possession of or occupy, or to make out as a mineral prospecting or mineral area, or to include within the boundaries of any mineral prospecting or mineral area the land applied for or any part thereof. And no such entry, &c., shall confer any right or title to the said land. And any person who shall so enter upon, &c., shall be deemed to have trespassed or encroached thereon,” &c.

A similar provision is contained in the Gold-mining Lease Regulations (28), and it is thereby also provided that the applicant may mine upon the land pending the application.

The persons “legally entitled” who are exempted from the above quoted Regulation are, we think, clearly those only who are mentioned in Mineral Lease Regulation 3 and Gold Lease Regulation 5, viz., “Persons in occupation of the land applied to lease or any part of it, or who have or claim a right to or interest in the land or any part of it at the time when such application to lease is made.” And this view is fortified by the language of section 40 of the Act itself.

In the present case the mineral selectors did, in direct violation of the Act and Regulations, “include within the boundaries of a mineral area” the lands applied for by us, and also those applied for by the various other persons referred to,—some as mineral, some as gold-mining leases.

Relying on that Act and on those Regulations, we respectfully contend that, under such circumstances, “no right or title” to the land was conferred upon the selectors, and that they are in fact trespassers within the meaning both of the Regulations quoted and of section 40 of the Act.

If this contention be correct, it follows necessarily that the land was not open to selection under any section of the Lands Acts, because a selection cannot be lawful which involves a trespass.

We have ventured respectfully to direct your attention to the various clauses of the Acts and Regulations which appear to us to bear upon our case, in the firm belief that you will give to them their fair construction and protect us in the vindication of our rights under them, the matter being one of vital importance to us, and also to all persons applying for leases and expending their money and labour on the land, in the honest belief that so long as they comply with the law they cannot be dispossessed by speculators or adventurers.

We have, &c.,

HUGH McNEILL AND PARTY.

Minute on above.

Presented by Mr. A. Rynie, M.P.

## No. 26.

## Gazette Notice.

Supplement to the New South Wales Government Gazette.—Published by authority.

WEDNESDAY, 27 SEPTEMBER, 1882.

NEW SOUTH WALES, } Proclamation by His Excellency The Right Honorable Lord AUGUSTUS WILLIAM  
to wit. } FREDERICK SPENCER LOFTUS, Knight Grand Cross of the Most Honorable Order  
(L.S.) } of the Bath, a Member of Her Majesty's Most Honorable Privy Council, Governor  
AUGUSTUS LOFTUS, and Commander-in-Chief of the Colony of New South Wales and its Depen-  
Governor. } dencies.

IN pursuance of the provisions of the "Mining Act of 1874," I, Lord AUGUSTUS WILLIAM FREDERICK SPENCER LOFTUS, Governor of the Colony of New South Wales aforesaid, with the advice of the Executive Council, do hereby proclaim that the following shall be deemed a gold-field, within the meaning and for the purposes of the said Act, that is to say:—

County of Murray, parishes of Bullongong, Ballallaba, Jinjera, Thurrallilly, and Yanununbeyan, area about 100,000 acres. The gold-fields on Crown Lands within the following boundaries: Commencing on the right bank of Queanbeyan River, at the south-east corner of H. C. Antill's 825 acres, parish of Yarrow; and bounded thence by the east boundary of that portion and its prolongation bearing north to the south boundary of portion No. 101, parish of Yanununbeyan; thence by part of that boundary bearing west, by the west boundary of the same portion bearing north, and by part of its north boundary bearing east to a point south from the south-west corner of H. C. Antill's southernmost portion of 640 acres; thence by a line to that corner, the western boundary of that land and of H. C. Antill's 640 acres, J. Hosking's 640 acres, another of H. C. Antill's 640 acres, Owen Bowen's 640 acres, and the prolongation of the last-named boundary bearing northerly to a point west from the north-west corner of portion No. 71; thence by a line to that corner, the north boundary of that portion and of Wm. White's 500 acres bearing east to the left bank of Molonglo River; thence by that bank upwards to the junction of that river with Yandyguinula Creek; thence by the left bank of that creek upwards, to a point south from the south-west corner of portion No. 39, parish of Thurrallilly; thence by a line to that corner, the west boundary of that portion and of portion No. 42, and the prolongation of those boundaries bearing north to the south boundary of portion No. 203, parish of Molonglo; thence by part of that boundary bearing east, by the east boundary of the same portion and its prolongation bearing north to northern side of a road, the southern side of which forms the northern boundaries of the last-mentioned portion; thence by that road bearing north-westerly and south-westerly to the south-east corner of portion No. 174, parish of Molonglo; thence by the east boundary of that portion and its prolongation bearing north to the summit of the South Black Range; thence by that range easterly to the boundary between the land districts of Braidwood and Queanbeyan; thence by that boundary bearing southerly to the boundary between the counties of Beresford and Murray; thence by that boundary north-westerly and westerly by Sherlock Creek, and by the Queanbeyan River aforesaid downwards, to the point of commencement.

To be called "The Molonglo Gold-field."

Given under my Hand and Seal, at Government House, Sydney, the twenty-seventh day of September, in the year of our Lord one thousand eight hundred and eighty-two, and in the forty-sixth year of Her Majesty's Reign.

By His Excellency's Command,  
JOHN ROBERTSON.

GOD SAVE THE QUEEN!

A. O. MORIARTY,  
Chief Commissioner.

No. 31.

The Chief Commissioner to Mr. A. Ryrie, M.P.

Sir, Department of Lands, Conditional Sales Division, Sydney, 28 September, 1882.

With reference to the petition presented by you to Sir John Robertson, from certain miners at Captain's Flat, protesting against the mineral conditional purchases of Messrs. Chaffey, Christie, Mills, and Laing, upon grounds stated in the memorial, I have to inform you that the matter has been referred to the local surveyor for report, and that in the meantime the substance of the representations received from the miners has been communicated to the applicants under conditional purchase, who have been warned that on the facts being ascertained the applications will be dealt with on their merits.

M.C.P. 82-280,  
82-235, 261, 259,  
Queanbeyan.

I have further to refer you to the proclamation of a gold-field in the Gazette of yesterday's date, and to inform you that the applicants for the mineral purchases have been given notice that in the event of the land being auriferous the purchases may, apart from any other objections, be dealt with accordingly by cancellation or otherwise as may be found advisable.

I have, &c.,

A. O. MORIARTY,  
Chief Commissioner.

No. 32.

Mr. W. B. Christie to The Chief Commissioner.

Sir, No. 1, Wentworth Court, Sydney, 30 September, 1882.

On behalf of Messrs. F. M. Mills, of Wentworth Court, Wm. Laing, of Newcastle, and myself, in reference to your letters to us of 28th instant, with regard to our mineral conditional purchases of 130 acres, 140 acres, and 130 acres, numbers 82-259, 260, 261 respectively, applied for at Queanbeyan on the 14th September instant, I have the honor to bring the following facts under your notice.

On the 5th June last Hugh McNeill and party, who I understand are the petitioners against our mineral conditional purchases, applied for mineral leases numbers 1, 2, 3, at Captain's Flat, Queanbeyan District, of 80 acres each.

On the 17th August John Robert Chaffey applied for a mineral conditional purchase of 300 acres, No. 82-235, described as embracing part of the same ground.

Having ascertained that there was an error in Mr. Chaffey's description, which would be fatal if accurate descriptions were tendered, we applied for our mineral conditional purchases, and in addition to the usual descriptions, appended to each a tracing showing clearly the land applied for, so that there could be no question as to the identification of our lands.

1st.

1st. The question of Chaffey's title to his mineral conditional purchase depends on the establishment of two grounds: Firstly, was the land he applied for Crown Land within the meaning of the Crown Lands Alienation Act interpretation clause, and of the interpretation clause of the Mining Act? Secondly, was his description one by which the land he referred to could be identified?

With regard to the first of these grounds, I submit that the land was Crown Land within the meaning of the Alienation Act, inasmuch as that it had not "been dedicated to any public purpose, and that it had not been granted, or contracted to be granted, in fee simple."

It was Crown Land within the meaning of the Mining Act, because it was not under lease "for purposes other than pastoral purposes."

I refer to the opinion of the Attorney-General that the mere fact of an application for a mineral lease having been made does not bind the Government in any way, and till such lease is granted the land is open to sale conditionally or otherwise.

In the case *Moore v. Priory* (?) at Armidale, which was one in which the defendant had mineral conditionally purchased certain land which the plaintiff had applied for as a mineral lease some twelve months previously, Messrs. Darley, Salomons, Pilcher, and Want, each gave an opinion in favour of the mineral conditional purchase.

I refer further to the recent Pheasant Creek case in New England, in which an application for a mineral conditional purchase ousted the applicants for a mineral lease after they had done a large amount of work in opening up the land; and I understand that one of the applicants (Gafney) was given into custody and imprisoned for tin-stealing, because he took away the tin he had raised from the land after the mineral conditional purchase was made.

I refer next to the practice of the Mining Department established within the last few months, namely, when the officers are dealing with the plans of land applied for as mineral lease, they submit a tracing of the plan to the Lands Department, and ascertain whether the land has been applied for as a conditional purchase at a prior or subsequent date. If it is found that the land has been so applied for then the mineral lease is refused, thus showing that the principle laid down by the Attorney-General is recognized in the ordinary practice of the Department.

These references I submit establish the fact that the land was "Crown Land" on the date of Mr. Chaffey's application, and that his application therefore ousts the applicants to lease the land, viz., the present petitioners against us.

Seeing that Mr. Chaffey has by his mineral conditional purchase thus ousted the applicants to lease, if there is any question at issue in this matter it lies between him and them, and not between them and us; but I maintain that there cannot be any question at issue between Mr. Chaffey and the applicants to lease, because the land in dispute is "Crown Land."

With regard now to the second point—Was Mr. Chaffey's description one by which the land he referred to could be identified?

His description is as follows:—"300 acres in the county of Murray, parish of Bullangong, south of and 18 chains from the south-west and south-east boundary of 80 acres, recently applied for by Messrs. Kingsland and Irving and party, and running south from that point. This land applied for is a part of the same as is applied for under a mining lease by Messrs. M'Grath, M'Neil, Edwards, Hughes, and party."

We contend that the land herein described cannot be identified with sufficient certainty to oust or upset an accurate description with which it may clash, because, first, there is no south-west and south-east boundary of the 80 acres referred to; second, there is no record by which the land applied for to lease by Messrs. Kingsland and Irving can be identified; third, notwithstanding the fact that within distances ranging from 1 to about 8 chains from the eastern boundary of the land applied for to lease by M'Grath, M'Neil, and party, there are no less than twenty fixed and determinate points, being the corners of previously measured gold leases. Mr. Chaffey has not referred to any of them as a datum for identification of the land he applied for.

Although Mr. Chaffey's description may possibly be sufficient to entitle him to claim under the 14th clause of the Lands Amendment Act of 1875, so long as the matter lay entirely between himself and the Crown, still I submit that its uncertainty and vagueness must yield before the accurate and definite descriptions tendered by us; and in making our applications, the matter of dispute lies between Mr. Chaffey and ourselves in testing his claim to the land previously applied for as a mineral lease by Messrs. M'Grath, M'Neil, and party, with whom we have nothing whatever to do, they having lost their right of lease when Chaffey made his application for a mineral conditional purchase.

I believe that the foregoing will be sufficient reply to the petition and protest against our purchases sent in by the miners at Captain's Flat; but with regard to the previous occupation and improvements alleged to have been effected by them, I would respectfully point out that the "occupation" is merely the marking of the land as required by the 2nd regulation relating to mineral leases, and gives no title whatever. The improvements consist of two trenches, 35 feet long by 2 feet wide, and of an average depth of from 2 to 4 feet. In one of these trenches a shaft has been sunk to a depth of about 20 feet. These are all the improvements which the original applicants claim; and from a long experience in mining work generally, I estimate it at about three weeks work for two men, or worth from £18 to £20. There is another prospecting hole on the ground about 10 feet deep, sunk by Irving and party, who abandoned it, I understood from the men themselves, before they applied for the land. This is valueless.

The men, however, not being the holders of any lease or promise of lease, cannot claim in virtue of these improvements, even if they were of sufficient value to entitle them to do so, under the 2nd clause of the Lands Amendment Act of 1875; and even if they could, it is now too late for them to do so, as the proclamation of a gold-field embracing the locality, made on the 27th instant, alone will prevent the land being granted in virtue of any such application.

With regard to the now alleged auriferous character of this land, I would point out to you that these men have been working for gold on Molonglo River, in the vicinity of the land, for nearly two years, and they have applied for it as copper land. From the experience of these men the auriferous deposits of the neighbourhood are confined to the chocolate soil, whereas the land for which we apply is on the slate formation. This, however, is mere allegation on both sides and requires proof.

Referring to the 2nd paragraph of your letter respecting the proclamation of the gold-field, in which you inform us of the liability of our purchases to be cancelled on that account, I beg most respectfully to point out that the 11th clause of the Mining Act provides only for the conversion of conditional purchases

under

under the 13th clause into conditional purchases under the 14th clause of the Alienation Act, and that such conversion "shall not be applicable to conditional purchases that may have been made for more than three calendar months prior to the proclamation."

Our conditional purchases were made however under the 19th clause, and are therefore not referred to in the Mining Act.

The 14th clause of the Alienation Act deals only with the lands conditionally purchased within proclaimed gold-fields; but our purchases were not made within a proclaimed gold-field, and I submit that the subsequent proclamation cannot be held to be retrospective so as to prejudice our claim to the land.

In conclusion, I regret that we have not been furnished with a copy of the petition of the miners, and the allegations which you informed Mr. Mills and me they had made to the effect that we had taken some kind of advantage of them and prevented their selling the land at a good price. It would be much better for all parties if such statements were not made; but if they are, that they should be explained at once. The facts are simply these:—I was employed by a number of gentlemen who proposed to purchase this claim, to inspect the lode and report on the title of the vendors. I reported favourably on the cupriferous character of the land, but on inquiry found that the Lands Department would in all probability allow Mr. Chaffey to amend his description, and this would at once deprive the applicants for the lease to any title to it.

I further learned from private information that a party in connection with Mr. Chaffey were about to apply for further mineral conditional purchases, so as to embrace all the land applied for to lease by them. In consequence of this, Mr. Laing, Mr. Mills, and myself, neither of whom (at least I can speak with certainty regarding Mr. Mills and myself) were in any way connected with the syndicate who had employed me in the first instance, at once applied for our mineral conditional purchases 259, 260, 261, and thereby contested the validity of Mr. Chaffey's description, besides securing the balance of the land to ourselves, which would have been taken up by others on the following Thursday, if we had not done so.

We therefore have simply taken advantage of the law which allows a mineral conditional purchase to override an application to lease. The law is undoubtedly a hard one, but others would have taken advantage of it and secured the land under mineral conditional purchase if we had not, and the original applicants would have been ousted by them.

With every desire to deal fairly by these miners, Mr. Mills and I had an interview with them and Mr. Ryrie, M.L.A. for Braidwood, who is acting for them. We offered to abandon all claim to the land if Mr. Ryrie succeeded in bringing about an alteration in the law, so that if we gave up our present claim no one else could come in over our heads and take the land from them under a mineral conditional purchase again.

The men, however, have elected to test the question on its merits as the law stands, and we are quite willing to take them at their word, feeling every confidence in the legality of our right to the land, and in the soundness of the legal opinions expressed by the Attorney-General and the other eminent members of the Bar who have declared in favour of a "mineral conditional purchase" as against an "application for a mineral lease."

I have, &c.,

W. BEDE CHRISTIE.

Minutes on No. 32.

Urgent.—W.B., 3/10/82.

By Chief Commissioner of Conditional Sales:—Charting Branch, with reference to the other papers in this case.—A.O.M., 3/10/82.

By Surveyor-General:—Mr. District-Surveyor Twynam, in connection with previous papers.—H. HARE, for Surveyor-General, 4/10/82. Mr. Surveyor Vickery.—E.T., 11/10/82. Report and sketch with my letter of 17th October, No. 83-36.—E. G. VICKERY, 17/10/82.

No. 33.

Telegram from Mr. T. H. Smith to The District Surveyor, Goulburn.

Cooma, 4 October, 1882.

THE instructions for the measurement of three mineral leases referred to have not been received by me. Probably they were sent direct to Mr. M'Cord.

THOMAS H. SMITH,  
Acting District Surveyor, Cooma.

No. 34.

Mr. W. C. Proctor to The Chief Commissioner.

Sir,

138, Pitt-street, Sydney, 6 October, 1882.

I have the honor to request that you will be good enough to furnish me, at your earliest convenience, with a certified copy of the application of Mr. John Robert Chaffey for a mineral conditional purchase of 300 acres at Queanbeyan on the 17th August, 1882: mineral conditional purchase 82-235.

I have, &c.,

W. C. PROCTOR,  
(Per J. MACDONALD).

Minutes on No. 34.

The previous letters in this case were sent to District-Surveyor Twynam for report, 3 October, 1882.—J.R.M., 7/10/82. By Chief Commissioner of Conditional Sales:—Send copy as requested, then await Mr. Twynam's report.—A.O.M., 8/10/82. Copy from extract supplied to Mr. Proctor, the original application being out of the office.—T.W.W., 11/10/82. Referred to Charting Branch.—C.N., 23/10/82.

## No. 35.

The Crown Lands Agent, Queanbeyan, to The District Surveyor, Goulburn.

My dear Sir,

Being engaged all day in Court I could not send away to-day by post, as I had intended, copies of the mineral leases you named, taken from my lease register; they must now go by to-morrow's post.

I have, &c.,

O. WILLANS,

Crown Lands Agent.

## No. 36.

Telegram from Crown Lands Agent, Queanbeyan, to District Surveyor, Goulburn.

Queanbeyan, 10 October, 1882.

COPIES posted; could not get them ready yesterday, being in Court all day.

O. WILLANS,

Queanbeyan.

## No. 37.

Memorandum from District Surveyor, Goulburn, to Mr. Surveyor Vickery.

There is an important matter demanding immediate attention at Captain's Flat: it is to make inspection and supply a sketch showing the positions of the mining leases and the mineral conditional purchases which have been the subject of debate in the House of Parliament, and to report upon work done and improvements (if any) which have been effected. After much correspondence I have obtained copies of the applications for mineral leases, and they are now in course of transit to me by post; they will be despatched to you to-morrow with the other papers.

Inasmuch as the matter is now the subject of public comment and frequent reference to the Minister, I would request you to be so good as to bestow immediate attention thereto.

The parish map now in your hands shows the adjacent surveys, from which you can determine the starting points and relative positions of the mining leases and mineral selections now in question; and then please to prepare a sketch to such a scale as will represent them all plainly, and also all improvements, and report full particulars with all possible despatch.

I have written several times to you, and have sent papers addressed to you at Foxlow, some of them important. Please to obtain them as soon as possible.

E. TWYNAM,

District Surveyor.

10 October, /82.

## No. 38.

## Mineral Lease Application.

Copper.—Mineral lease, Captain's Flat, Foxlow.

1882.	Applicants.	Area.	Description.
No. 1. June 5, 11.30 o'clock forenoon.	Hugh M'Neill. Thomas Daly. Edward Walsh. Thomas Cook. John Morris. Henry Wilson. John M'Grath. Edwd. Holihan. Peter Hughes. William Edwards.	80 acres.	Copper mineral lease, situated half-mile west of Molonglo River; the datum point is distant 10 chains in a north-westerly direction from Daly and party's 5-acre gold lease at Captain's Flat, Foxlow.
No. 2. June 5, 12.30 afternoon.	Hugh M'Neill and others, at mineral lease No 1.	80 acres.	Situated half a mile west of Molonglo River; datum point distant 10 chains in a north-westerly direction from M'Neill and party's 3-acre gold lease, and north of and adjoining No. 1 mineral lease of this day.
No. 3. June 5 .....	Hugh M'Neill and others, same as mineral lease 1 and 2.	80 acres.	Half a mile west of the Molonglo River; datum point is distant 10 chains in a north-westerly direction from M'Neill and party's prospecting claim, Captain's Flat, Foxlow, and adjoining No. 2 mineral lease on its north boundary.

O. WILLANS,

Warden's Clerk.

## No. 39.

Mr. J. M'Grath and party to Mr. A. Ryrie, M.P.

Sir,

Braidwood, 15 October, 1882.

I see, in remarks made by Minister for Mines on our case (on your moving adjournment of the House, 3rd October, on it), that he takes it for granted we were not the holders of any mineral licenses at all. Enclosed I send you certified copy of mineral licenses held by our party. By looking at dates of them you will see that they were all, with the exception of J. Morris's, taken out previous to our land being applied for as mineral conditional purchases by Mills, Laing, or Christie, whose applications were made on 14th September.

If

If in your judgment you think the placing of this certificate before the Minister for Mines will strengthen our case, we beg you will do it as soon as it is convenient for you.

Thanking you for the great interest you have taken and the assistance you have been to our party in this matter,—

I have, &c.,  
JOHN M'GRATH,  
(For self and party).

*Minutes on No. 39.*

Urgent.—W.B.

By Chief Commissioner of Conditional Sales:—Bring up with 82-7,633 on return.—A.O.M., 19/10/82.

[*Enclosure to No. 39.*]

I HEREBY certify that the undermentioned persons had mineral licenses issued to them from this office on the several dates written opposite to their respective names:—

No.	Name.	Date of license.

Court-house, Braidwood, 14 October, 1882.

W. F. ROBERTSON,  
Mining Registrar.

No. 40.

Mr. Surveyor Vickery to The Surveyor-General.

Sir,

Camp, Shoalhaven River, 19 October, 1882.

In compliance with your instructions of 3rd October, No. 82-525, and 4th October, No. 82-540, to Mr. District-Surveyor Twynam, and transferred to me on 11th October, 1882, I proceeded to Captain's Flat, to inquire into the facts of several mineral conditional purchases, viz., mineral conditional purchase 82-235 of 300 acres, by J. R. Chaffey, mineral conditional purchase 82-259 of 130 acres, by F. M. Mills, mineral conditional purchase 82-260 of 140 acres, by William Laing, and mineral conditional purchase 82-261 of 130 acres, by W. B. Christie, situated in the parish of Bullongong, county of Murray, and within the Molonglo Gold-field, and I now have the honor to transmit to you herewith a sketch showing the relative positions of these mineral conditional purchases with regard to certain mineral leases previously applied for by Hugh M'Neill and party, and now measured by Mr. Licensed Surveyor M'Cord, and to report as follows:—

The facts of the case are simply these: On the 11th June, 1882, Hugh M'Neill and party applied for three mineral leases of 80 acres each for working copper. They duly occupied, marked, and described the land they applied for, in accordance with the mining regulations, and effected improvements to the value of £42. These improvements consist of three shafts sunk on and a trench cut across the lode. These shafts are upon mineral lease No. 33 as shown on sketch, and comprise an entire excavation of 42 cubic yards. As much of this is rock, I estimate the cost at £1 per yard. In opposition to this valuation, the applicants inform me that, their time being considered, it has cost them double that sum, but I believe a similar work could be contracted for at my estimate.

They have also sunk two small shafts of the respective depths of 8½ and 10 feet within the boundaries of mineral lease No. 24, and are upon a quartz reef sunk in the search for gold. I do not consider them an improvement to the copper lease, as they are not on the discovered lode.

There are no other improvements upon these leases, and no improvements whatever upon mineral lease Nos. 25 and 26.

Subsequently to the sinking of the shafts mentioned above, J. R. Chaffey sought to secure much of the land M'Neill and party had applied for by purchase, and on the 17th August, 1882, applied for 300 acres under the 19th clause of the Crown Lands Alienation Act of 1861. When upon the ground I could do nothing with the description tendered by Chaffey, there being so many conflicting statements as to the position of the lease from which he described his starting-point. Even could the locality of the lease be established, the description would then be very dubious. Upon return to my main camp on the Shoalhaven River after visiting Captain's Flat, I received a letter from J. R. Chaffey, enclosing a sketch from which it appears that the land now described by him is that shown in the broken pencil lines on my sketch. He has not occupied or made any improvements.

Messrs. Irving and Kingsland, the applicants of the lease from which J. R. Chaffey describes his purchases, are not upon the ground, and appear to be ut only indifferent to their lease.

Again, three persons F. M. Mills, Wm. Laing, and W. B. Christie, becoming aware of the vagueness of Chaffey's description, sought to secure the land originally applied for to lease by M'Neill and party by purchase also, and on the 14th September, 1882, each tendered an application under the 19th clause of the Crown Lands Alienation Act of 1861, for the respective area of 130 acres, 140 acres, and 130 acres. Their descriptions are indisputable. They have not occupied or made any improvements.

Messrs. Hugh M'Neill and party are industrious, well-deserving miners; they have spent upwards of two years in the immediate vicinity in search for gold and copper. When they at last discovered the

copper they at once complied with all the conditions of the Mining Act to secure it, and were quite unaware of the counteracting power of the Land Act.

Setting aside all the technicalities of the law, it would appear to me that the ends of common-place justice can only be obtained by putting M'Neill and party in possession of the leases for which they applied; and I would most strongly and respectfully recommend that, if it can be done, all applications to purchase in the locality whatsoever be refused. The close proximity of the land comprising the gold leases shown on sketch is sufficient to secure the likelihood of the land now sought to be purchased being auriferous. The rock formations are precisely the same.

Mineral leases Nos. 23 to 26 are shown as measured by Mr. Licensed-Surveyor M'Cord; the datum point upon which they all hinge is a few links from the south-east corner of No. 23 as shown on sketch.

I have, &c.,  
E. G. VICKERY,  
Surveyor.

Minutes on No. 40.

All papers herewith submitted.—E. TWYNAM, District Surveyor, 21/10/82.

By the Chief Commissioner of Conditional Sales:—Charting Branch,—I am informed that the tracings of the mineral lease applications by Mr. Licensed-Surveyor M'Cord have been received. May I request that the matter may be submitted for decision as early as convenient.—A.O.M., 23/10/82.

Will the Mining Department please state whether the undermentioned mineral lease applications have been approved.—H. HARE, per E.H.B., 2/11/82. 82-1, 2, and 3, Queanbeyan. Not yet approved.—J.R.N., 2/11/82.

No. 41.

Mr. W. B. Christie to The Chief Commissioner.

Sir,

No. 1 Wentworth Court, Sydney, 4 November, 1882.

Referring to mineral conditional purchases made at Queanbeyan, on the 14th September, 1882, by Messrs. Mills, Laing, and myself, Nos. 82/259, 260, and 261 respectively, and to the report of Mr. Surveyor Vickery thereon, papers No. 82/S,003, Conditional Sales, I have the honor to bring under your notice the following facts:—

Mr. Vickery reports that our descriptions are indisputable as to the land we apply for, while Mr. Chaffey's description is "vague," and even in the light of a tracing which that gentleman forwarded to Mr. Vickery it is "uncertain" and "dubious" what land he intended to apply for.

Dismissing, therefore, Mr. Chaffey's application altogether as being beyond further consideration, I now beg to bring most prominently under your notice that the Mining Department has apprised the Surveyor-General that the applications to lease by McNeill and party "have not been approved."

Consequently, if any reliance is to be placed on the legal opinions of the Attorney-General, Messrs. Pilcher, Stephens, Darley, Salomons, and Want, we are entitled to the land; and we beg most respectfully that your early decision in the matter will place us in possession, as we are suffering serious loss in the delay in opening up and developing the mine.

Respecting Mr. Vickery's valuation of the work done at £42, I submit that the value of the work done at the date of our selections was only £20, and I will undertake to have the same amount of work done on the ground at the valuation I have put on it; but whatever may be the value of those workings is altogether beside the question at issue, as it has already been decided by the Supreme Court in, I think, Patterson's case, that shafts and such works were not "improvements," within the meaning of the Act, to bar selection.

Coming now to the concluding paragraph of Mr. Vickery's report, in which he describes the applicants to lease, Messrs. M'Neill and party, as "industrious, well-deserving miners, who have spent upwards of two years in the immediate vicinity in search of gold and copper," and states that in "common justice" the land should be given to them,—I cannot help expressing my opinion that in thus importing feeling, with a view to working up sympathy on their behalf, into his official and professional report, Mr. Vickery has gone altogether beyond his duties, and that *ex-parte* statements of this nature, gleaned as they are from the men themselves, where we had no opportunity of refuting them, have no right to be made a matter of official correspondence, to the benefit or injury of any parties to a dispute, which must only be settled by the legal construction of the Acts which brought it about.

As, however, Mr. Vickery has so far unconsciously lent himself to furnishing you with a reflex of those men's opinions of themselves and their troubles, I beg to submit some facts to you, which otherwise I would not have brought before you. Those men placed their applications for lease under offer to some gentlemen for £3,300, and although repeatedly told that their title was a bad one, they refused to improve it by making mineral conditional purchases of the land. This offer was dated 29th August, 1882, and in consequence the gentlemen paid a deposit of £50, to be forfeited if they did not close the bargain by the 12th September, and they did forfeit this £50.

I have at the present time in my possession a sale note, dated 16th August, by which one of the parties signing the above-mentioned offer, and who participated in the £50, had sold his whole share in this very land thirteen days before he placed it under offer to the second set of victims who were about to fall into the trap laid for them.

I further have information, which I believe will establish the fact most conclusively, that repeated offers had been made to those men to advance them money to make their title good by mineral conditional purchase, which they refused, and that some of them had stated that as soon as they sold their worthless title and got the price (£3,300) it was their intention to secure the land over the purchasers' heads by mineral conditional purchase.

It is quite true that some, at least, of those "well-deserving" miners did spend about two years in the vicinity searching for gold, but it is equally true that they were in the employment of Mr. Holtermann, and not devoting their own independent time to prospecting or searching for gold, as Mr. Vickery's report would lead you to suppose; in fact they were there as ordinary workmen, and when I was on the ground in September last they were erecting gold-crushing machinery on Mr. Holtermann's claim.

I regret that the *ex-parte* statements made by Mr. Vickery, with the evident intention of influencing your decision on behalf of the "well-deserving miners," has rendered it necessary for me to defend myself and partners from the implied imputation that we are not "well-deserving," by entering into this explanation of the conduct of the men throughout.

All that we ask is for your early decision on the legal construction of the facts as set forth in my letter to you of the 30th September last.

I have, &c.,

WILLIAM BEDE CHRISTIE,  
Licensed Surveyor.

*Minute on No. 41.*

By the Surveyor-General:—I cannot on this letter make any alteration in my report of 10 November, 1882.—ROBERT D. FITZGERALD, for Surveyor-General, 20/11/82.

No. 42.

Mr. J. R. Chaffey to The Secretary for Lands.

Sir,

Wangan, Walker-street, Lavender Bay, 9 November, 1882.

I have the honor to request your permission to lay before you my position in reference to a section of 300 acres of Crown Land purchased by me, under the mineral conditional purchase regulations, on the 17th August, 1882, and situated at Captain's Flat, parish Bullongong, in the county of Murray.

Objections to my purchase of the land in question having been raised by Messrs. M'Neil, M'Grath, Edwards, and party, on the grounds that the land purchased by me was held by them under an application for a mineral lease, and these objections having been entertained by the Government, the surveyor, Mr. Vickery, was instructed to inspect and report on the land.

I have been favoured with a perusal of this gentleman's report, and regret to find that it is so absolutely opposed to facts and so inconsistent with reason, and breathing throughout feelings of such strong sympathy towards the claims of M'Neil and party, and containing assertions so prejudicial to my interest, that I feel compelled to bring the matter before you, and to which I respectfully request the favour of your attention.

Mr. Vickery in his report says:—"I found the description of the land in Chaffey's application dubious, and, although accompanied with a tracing of the land, still uncertain."

I protest against these remarks, because they are opposed to the truth; and if you will kindly refer to my application, you will find that the position of the land purchased by me is clearly and distinctly set forth and was as follows:—South of and 18 chains from the south-west and south-east boundary of a section of 80 acres applied for under a mineral lease, by Messrs. Irving and Kingsland, and running from that point south, and including a portion of three 80-acre sections applied for under mineral lease by Messrs. M'Neil, M'Grath, Edwards, and party.

I was careful to mention the names of M'Neil and party, because it was the land applied for under lease by them that I purchased, and I was also cautious to use the word "portion," because my application would not cover the whole of their three selections.

Since the date of my purchase M'Neil and party's sections have been surveyed by Mr. Surveyor M'Cord and the position somewhat changed.

In his report Mr. Vickery also states that the position of the land applied for by M'Neil and party was clearly and properly defined. This being the case, and considering the important fact that Mr. Vickery had in his possession a copy of my application to purchase, which clearly set forth "that the land purchased by me was the same as that applied for by M'Neil and party, and which fact M'Neil and party themselves acknowledged and confirmed by their own action in opposing my purchase, may I ask how did it arise that Mr. Vickery should have experienced so much difficulty in recognizing the position of my property?

If M'Neil and party's description be correct, and their ground having been surveyed at the time of Vickery's visit, surely the statements contained in his report to the effect that he was unable to recognize the land purchased by me must be considered extremely unsatisfactory.

I also beg to acquaint you that I have been informed by the Deputy Surveyor-General that it is his intention to recommend to you the claims of Messrs. Mills, Christie and party, on the grounds that the description of the land applied for by them is more clearly set forth, notwithstanding the fact that the date of their application to purchase was considerably after I had purchased the property.

In reply to the above, allow me to inform you that the tracing of the land handed by me to Mr. Vickery (and to which he has referred in his report) was taken by myself from the same chart belonging to Christie and party as that sent by them to Mr. Vickery.

In conclusion, I would respectfully solicit your approval of my purchase, which I submit is in strict compliance with the spirit of the Land Act as it existed at the time of my purchase, my position being made absolute by the opinion of the most eminent barristers in Sydney.

I herewith enclose you a copy of the tracing pointing out the position of the land purchased by me and forwarded by me to Mr. Vickery, and which he has referred to in his report.

I have, &c.,

JOHN ROBERT CHAFFEY.

*Minutes on No. 42.*

By Chief Commissioner of Conditional Sales:—Register, and submit at once to Charting Branch, with reference to the other papers in the case.—A.O.M., 11/11/82.

By Surveyor-General:—I cannot make any alteration in my report of the 18th November, although I believe Mr. Chaffey intended to select the land as he states.—ROBERT D. FITZGERALD (for Surveyor-General), 16/11/82.

## No. 43.

Mr. A. Ryrie, M.P., to The Chief Commissioner.

Sir,

Micalago, 10 November, 1882.

I called upon the Minister for Mines, who informed me that the Warden's report as to improvements, &c., relating to the Captain's Flat mining case would be sent you that day. I gave Sir John Robertson the Warden's letter to myself. I saw the Acting District-Surveyor at Queanbeyan, and he informed me that his decided opinion was that the mineral conditional purchases of Christie and party would cross the gold-mining leases he had already measured, which would be fatal to their claim. No descriptions or instructions have been sent to the surveyor for his report of Christie and party's application.

I do hope that as early action as possible will be taken in the matter.

Sir John Robertson has pledged his word, and the whole mining population in the district are anxiously looking forward to see these men placed in possession of their hard-earned and just demands.

I have, &amp;c.,

ALEX. RYRIE.

## No. 44.

Memo. by Surveyor-General.

Mineral conditional purchase 82-235, Queanbeyan, 17th August, J. R. Chaffey, 300 acres.

Mineral conditional purchase 82-259, Queanbeyan, 14th September, F. M. Mills, 130 acres.

Mineral conditional purchase 82-260, Queanbeyan, 14th September, William Laing, 140 acres.

Mineral conditional purchase 82-261, Queanbeyan, 14th September, W. B. Christie, 130 acres.

On the 5th June, 1882, Hugh M'Neill and party made applications, numbers 1, 2, and 3, at Queanbeyan, for three (3) 80-acre mineral leases for working copper, embracing the land shown by firm blue lines upon Mr. Surveyor Vickery's sketch enclosed. Upon reference to the Mining Department, it has been ascertained that the leases have not been granted; but it appears that the applicants occupied the land under the provisions of the Mining Act, and commenced mining operations by the sinking of three (3) shafts, and the cutting of a trench upon the land embraced by their application number 1, valued at £42, *vide* Mr. Surveyor Vickery's report.

Subsequently, on the 17th August, 1882, J. R. Chaffey applied, under mineral conditional purchase 82-235, for 300 acres, to embrace part of the same land as was applied for under a mining lease by Messrs. M'Grath and others (H. M'Neill and party, of which M'Grath is one.) It is described from Messrs. Kingsland and Irving's mineral lease, the position of which cannot, as reported, be determined; but it might be considered to occupy the position assigned to it by Mr. Chaffey, *vide* his sketch with Mr. Surveyor Vickery's report. So located, Chaffey's description may possibly embrace the land shown by pencil broken lines upon Mr. Vickery's sketch, and would include the whole of M'Neill and party's application to lease No. 2, about 30 acres of their No. 3, and about 45 acres of their No. 1; but, in the absence of any circumstances which would throw light on the intentions of Mr. Chaffey, I did not think it possible to apply the 14th clause—should that clause be intended to apply to mineral conditional purchases—to the rectification of his application, which should I think be declared void for uncertainty.

Again, on the 14th September, F. M. Mills, William Laing, and W. B. Christie applied, under mineral conditional purchases 82-259, 260, and 261, for 130 acres, 140 acres, and 130 acres respectively, definitely described to embrace the lands shown by black broken lines. These mineral conditional purchases must, I think, be considered good, subject to any claims that the applicants for the mineral leases may have against them, and also to the consideration, as regards Laing's, of the value of the improvements stated to have been placed upon the land applied for by M'Neill and party prior to the date of the mineral conditional purchase application. It may be pointed out that W. B. Christie's mineral conditional purchase embraces the greater part of the land applied for to mineral lease by J. Roach (the remainder being within Laing's mineral conditional purchase). This mineral lease also appears not to have been formally granted.

ROBT. D. FITZGERALD,

(For Surveyor-General), 10/11/82.

*Minutes on No. 44.*

By Chief Commissioner of Conditional Sales:—It is submitted that, as it appears from the surveyor's report that the conditional purchase of William Laing was at date of selection improved to the value of £42, it was to the extent of a corresponding area invalid, and should be so measured as to exclude that area. It is open to the applicant to claim an appraisal, should he be dissatisfied with the surveyor's valuation, and the same option rests with the miners.

The conditional purchase of J. R. Chaffey should be declared void, as recommended, on the ground of uncertainty, and the conditional purchases of Mills and Christie forwarded for measurement.

As however the land has been proclaimed as a gold-field, the applicants should be referred to the proclamation, and advised that the conditional purchases could be liable under the 11th section of the Mining Act to be declared subject to the conditions of the 14th section of the Crown Lands Alienation Act, and cancelled if found to be auriferous.—A.O.M., 14/11/82.

By the Chief Commissioner of Conditional Sales:—Since the above was written the Warden's report has been received, in which the work is valued at £110 on the mineral conditional purchase 260, and £25 on 259. It is not quite clear that the two instructions (this and the surveyor) are of precisely the same operations, and there is considerable discrepancy in the amounts. I should be inclined to rely upon the surveyor's valuation, the Warden's being apparently based on that of interested parties, and given without having before him the statements of the conditional purchaser; but if the Minister should think the Warden's estimate more reliable, it is to be observed that the land being unmeasured, the improvements must be considered without regard to the limits either of the lease or the conditional purchase applications; and, so considered, could debar from selection 135 acres, partly in mineral conditional purchase 260 and partly in 259, measured in accordance with the law.

It

It is represented in the correspondence of Mr. Christie that the works are not of such a character as should be held, under a recent judgment of the Supreme Court, to be improvements within the meaning of the Alienation Act. I am not prepared to admit that the case applies, and I submit that the distinction is not one which it is necessary to consider in dealing with the present matter.—A. O. M.

By Secretary for Lands:—I would prefer, so far as this Department is concerned, standing on the higher estimate of value of improvements, leaving it to the parties concerned on the one hand or on the other to demand an appraisalment.—JOHN R.

## No. 45.

Mr. A. Ryrie, M.P., to The Secretary for Lands.

Sir,

Sydney, 14 November, 1882.

As all the information now necessary is in the hands of the Department, with regard to the Captain's Flat mining case, I respectfully beg that you will come to a decision upon the matter.

The miners are idle and have to remain so; and I would further remind you of your assurance that they would not suffer, having complied as far as lay in their power with the Mining Act.

I have, &amp;c.,

ALEX. RYRIE.

*Minute on No. 45.*

By the Secretary for Lands:—I should like this case to be submitted to me.—JOHN R.

## No. 46.

The Chief Commissioner to Mr. W. B. Christie.

Sir,

Department of Lands, Conditional Sales Division, Sydney, 16 November, 1882.

With reference to the mineral conditional purchase made by you, as noted in the margin, I have to call your attention to the Government Gazette of the 27th September, 1882, proclaiming the land in which the purchase in question is situated within the Molonglo Gold-field, and to advise you that the purchase will be liable, under the 11th section of the Mining Act, to be declared subject to the conditions of the 14th section of the Crown Lands Alienation Act, 1861, and cancelled if found to be auriferous.

I have, &amp;c.,

A. O. MORIARTY,

Chief Commissioner.

## No. 47.

Mr. W. B. Christie to The Chief Commissioner.

Sir,

Sydney, 16 November, 1882.

Referring to our mineral conditional purchase at Captain's Flat, and Mr. Warden Aldcorn's report thereon, I have the honor to state that at date of our selection there were no improvements on the land beyond £20 worth of shafts, &c., on the southern one. There are about 42 yards of stuff shifted; it is soft argillaceous work, requiring only pick and shovel work. I can have such stuff shifted for 2s. 6d. per yard, but have in my report been willing to allow £20 for what is done. But apart from their value, I would mention that the Supreme Court has already decided that shafts, &c., are not improvements to bar conditional purchase.

I have, &amp;c.,

W. B. CHRISTIE,

Licensed Surveyor.

## No. 48.

Mr. A. Ryrie, M.P., to The Secretary for Lands.

Sir,

Royal Hotel, Sydney, 17 November, 1882.

I called twice to-day to ascertain if you had arrived at any decision upon the Captain's Flat mining case, and as I leave to-day upon important business I wish to ask if you will give the matter your earliest consideration.

I would respectfully point out to you the great difference in the valuation of the improvements by Surveyor Vickery and Warden Aldcorn—the former £42 and the latter £137—and to ask that you will bear that in mind when coming to a decision.

I have, &amp;c.,

ALEX. RYRIE.

## No. 49.

The Chief Commissioner to Mr. J. R. Chaffey.

Mineral conditional purchase No. 82-235.

Sir,

Department of Lands, Conditional Sales Division, Sydney, 20 November, 1882.

I desire to inform you that the application made by you at Queanbeyan, on the 17th August, 1882, for the conditional purchase of 300 acres of land, is void, on account of uncertainty of description. Deposit paid £150.

2. Enclosed is a form which, on being filled up in accordance with the instructions thereon, and forwarded to the Treasury, Sydney, will enable you at once to obtain the refund of your deposit.

I have, &amp;c.,

A. O. MORIARTY,

Chief Commissioner.

For the following refund, viz., C. P. No. S2-235. Land Office at Queanbeyan; date of selection, 17th day of August, 1882; deposit paid on 300 acres Selection void, on account of uncertainty of description.	
Deposit to be refunded on 300 acres .....	£ 150 0 0

## No. 50.

The Chief Commissioner to The Land Agent, Queanbeyan.

Sir, Department of Lands, Conditional Sales Division, Sydney, 20 November, 1882.

I desire to inform you that the application of John Robert Chaffey, on the 17th August, 1882, for the conditional purchase of 300 acres of land, is void on account of uncertainty of description.

2. A form for refund of deposit has been forwarded for the signature of the applicant, the nature of which you will be so good as to explain to him if required.

I have, &amp;c.,

A. O. MORIARTY,

Chief Commissioner.

## No. 51.

The Chief Commissioner to The Under Secretary for Finance and Trade.

Conditional purchase.—Revenue refunded.

Sir, Department of Lands, Conditional Sales Division, Sydney, 20 November, 1882.

I have to inform you that the conditional purchase noted in the margin being void, on account of uncertainty of description, you will be good enough to refund to the selector the sum of £150, being the deposit money paid thereon.

2. I am to add, that a receipt form for the disposal of the money has been forwarded to the applicant, with instructions to fill up same and transmit it to the Treasury.

I have, &amp;c.,

A. O. MORIARTY,

Chief Commissioner.

## No. 52.

The Chief Commissioner to Mr. A. Ryrie, M.P.

Sir, Department of Lands, Conditional Sales Division, Sydney, 20 November, 1882.

With reference to your letter of the 10th instant relative to the improvements on the mineral conditional purchases noted in the margin, I have the honor to inform you that the respective applicants have this day been informed that, under a report of Mr. Warden Aldcorn, it would appear that improvements existed at the date of the respective selections to the value of £135, and that a corresponding area (of 135 acres) was debarred from selection, and would be so excluded from the selections when measured. It was, however, open to them to claim an appraisalment.

They were also referred to the Government Gazette of 27th September, 1882, proclaiming the land in which the purchases in question were situated as being within the Molonglo Gold-field, and that such purchases would be liable, under the 11th section of the Mining Act, to be declared subject to the conditions of the 14th section of the Crown Lands Alienation Act, and cancelled if found to be auriferous.

I have, &amp;c.,

A. O. MORIARTY,

Chief Commissioner.

## No. 53.

The Chief Commissioner to Messrs. M'Grath and party.

Gentlemen, Department of Lands, Conditional Sales Division, Sydney, 20 November, 1882.

With reference to your several representations as to the land applied for by you under mineral lease having been conditionally purchased by Messrs. Chaffey, Mills, Laing, and Christie, I have now to inform you that the Minister, having had before him a report from the Warden to the effect that improvements to the value of £150 in all had been effected by your party prior to the land being conditionally purchased, has decided that a corresponding area, viz., 135 acres, shall be excluded from the measurement of the conditional purchases, of which the applicants have been duly advised.

It is, however, necessary to add that the conditional purchasers are entitled, should they desire, to have the value of the improvements in question referred to sworn appraisalment under the law, and that the same option is open to yourselves should you be dissatisfied with the valuation hereinbefore mentioned.

I have, &amp;c.,

A. O. MORIARTY,

Chief Commissioner.

No. 54.

## No. 54.

## The Chief Commissioner to Mr. M. F. Mills.

Sir, Department of Lands, Conditional Sales Division, Sydney, 21 November, 1882.

With reference to previous correspondence relating to the conditional purchases noted in the margin, made by yourself and others, I have to inform you that, under a recent report from Mr. Warden Aldcorn, it would appear that improvements effected by certain miners prior to the date of the respective selections, and to the value of £135, existed partly on the land selected by you and partly on adjoining land. As the land was unmeasured, a corresponding area (of 135 acres) was debarred from selection, and will be excluded from the selections when measured.

I have further to refer you to the Government Gazette of the 27th September last, in which an area embracing the land in question is proclaimed a gold-field, and to advise you that the purchasers will be liable, under the 11th section of the Mining Act, to be declared subject to the conditions of the 14th section of the Crown Lands Alienation Act, and cancelled if found to be auriferous.

I have, &c.,

A. O. MORIARTY,

Chief Commissioner.

## The Chief Commissioner to The Under Secretary for Mines.

Sir, Department of Lands, Conditional Sales Division, Sydney, 21 November, 1882.

I do myself the honor to forward herewith papers numbered as per margin, received from your Department, in connection with the disputed case of H. McNeil and party, miners, and the mineral conditional purchases of Messrs. Chaffey, Mills, Laing, and Christie, and to inform you that the first-named has been declared void for uncertainty of description; and that the Minister having had before him the report from the Warden to the effect that improvements to the value of £135 in all had been effected by the miners prior to the land being conditionally purchased, has decided that a corresponding area, namely, 135 acres, shall be excluded from the measurement of the conditional purchases, of which both applicants and miners have been duly advised.

It is however open to the parties to appeal to appraisalment of the value of the improvements effected, should they desire it.

I have, &c.,

A. O. MORIARTY,

Chief Commissioner.

## No. 57.

## The Under Secretary for Mines to The Chief Commissioner.

Sir, Department of Mines, Sydney, 28 December, 1882.

With reference to your letter of the 21st ultimo, to the effect that the mineral conditional purchase of Mr. Robert Chaffey, at Captain's Flat, within the Molonglo Gold-field, has been declared void, and that it has been decided to exclude from the measurement of the purchases of Messrs. Mills, Laing, and Christie, in the same locality, an area of 135 acres corresponding to the value of improvements made by the miners H. McNeill and party, I have the honor to ask you to be so good as to have shown, for the information of this Department, upon the tracing annexed, the position of the land the conditional purchase of which has been allowed under the decision alluded to in your said letter.

I have, &c.,

HARRIE WOOD,

Under-Secretary.

*Minute on No. 57.*

Other paper with Mines, Charting Branch.—W.B., 2 Jan., 1883.

## No. 58.

## Memo. by Surveyor-General.

Mineral conditional purchases 82-259, 260, and 261, Queanbeyan, 14th September, 1882, by F. M. Mills, William Laing, and W. B. Christie.

1. In view of Ministerial decision on Conditional Sales 82-8,003 Survey (cover), it is submitted that, owing to the position of the improvements effected upon Messrs. H. McNeil and party's mineral leases Nos. 23 and 24, and which protect, in accordance with that decision, an area of 135 acres, as shown by blue

blue tinting upon the accompanying tracing, F. M. Mills be allowed the option of retaining an area of about 90 acres, as shown by pink tinting, available of that applied for by him under mineral conditional purchase 82-259, with refund on 40 acres, or of receiving refund of deposit on the whole area applied for. The area available under William Laing's application, mineral conditional purchase No. 82-260, is about 50 acres, as shown by purple tinting. He may be allowed this available area, with the option recommended in Mill's case. The form of survey recommended in these cases involves a slight modification from the boundaries described, by extending the holdings to adjoin the gold-lease portions on the Molonglo River and to have frontage to that river; but this is necessary in order to accord with the regulations and to form suitable design for measurement.

2. W. B. Christie's mineral conditional purchase No. 82-261 is not affected by the improvements mentioned above, but as the form in which the land is applied for is unsuitable for measurement and contrary to the regulations, it is recommended that the survey be slightly modified as shown by brown tinting upon tracing.

3. If the above recommendations be approved these papers should be returned to Charting Branch, in order that the information sought by the Mines Department in their letter, Conditional Sales 83-2, enclosed, may be supplied.

4. It is pointed out that the forms of measurement suggested are subject to necessary roadways.

ROBERT D. FITZGERALD,  
(For Surveyor-General),  
20 January, 1883.

NEW SOUTH WALES.

Conditional purchase—Revenue refunded.

Department of Lands, Conditional Sales Division, Sydney, 2 February, 1883.

Dr. to William Laing.

	Amount to be refunded.
For the following refund, viz., C.P. No. 82-260. Land Office at Queanbeyan; date of selection, 14th day of September, 1882; deposit paid on 140 acres. Selection void to the extent of 90 acres, owing to the position of the improvements effected by Messrs. M'Neill and party on mineral lease applications Nos. 23 and 24.	
Deposit to be refunded on 90 acres.....£	45 0 0

No. 64.

The Chief Commissioner to The Land Agent, Queanbeyan.

Sir, Department of Lands, Conditional Sales Division, Sydney, 2 February, 1883.

With reference to William Laing's conditional purchase of the 14th September, 1882, I desire to inform you that the area thereof having been found on measurement to be only 50 acres, instead of 140 acres, as stated in his application, he has been informed that he is entitled to a refund of £45, the amount of deposit upon 90 extra acres, paid in excess, for which the necessary refund form has been forwarded.

I have, &c.,  
A. O. MORIARTY,  
Chief Commissioner.

## No. 65.

## The Chief Commissioner to The Under Secretary for Finance and Trade.

Sir, Department of Lands, Conditional Sales Division, Sydney, 2 February, 1883.

Queanbeyan,  
William Laing,  
14th September,  
1882.

I am directed to inform you that the area of the conditional purchase noted in the margin, having been reduced from 140 acres to 50 acres, you will be good enough to refund the amount of deposit viz., £45, on the area paid for in excess.

2. I am to add, that a receipt form for the disposal of the money has been forwarded to the applicant, with instructions to fill up same and transmit it to the Treasury.

I have, &c.,

A. O. MORIARTY,  
Chief Commissioner.

## No. 66.

## The Chief Commissioner to Mr. W. B. Christie.

Sir, Department of Lands, Conditional Sales Division, Sydney, 2 February, 1883.

Queanbeyan.  
C.P. 82-201, 130  
acres, 14th Sept.,  
1882.  
Enclosure—  
tracing.

With reference to your mineral conditional purchase noted in the margin, I am directed to inform you that, from a recent report of the Survey Department, it appears that the form in which the land is applied for is unsuitable for measurement and contrary to the regulations, and the Minister has decided that the survey be slightly modified, as shown by brown tinting on accompanying tracing.

I have, &c.,

A. O. MORIARTY,  
Chief Commissioner.

## No. 67.

## Mr. W. B. Christie to The Secretary for Lands.

Sir, 98, Victoria-street, 2 February, 1883.

Referring to the letters from the Chief Commissioner under this day's date, as noted in the margin, I have the honor, on behalf of Messrs. T. M. Mills, William Laing, and myself,—

C.S. 83-939.

Queanbeyan,  
C.P. 82-259,  
82-260, 82-261.

1st. To accept the amendment in the form of survey, as shown in the tracing accompanying the letter to myself of conditional purchase No. 82-261.

2nd. Referring to the decision of the late Minister for Lands, I have to request that you will be good enough to reconsider this case, as, I submit, the decision is contrary to law, in the matter of cancelling out of conditional purchases 82-259-260, an area of 135 acres, for improvements effected by Messrs. M'Neil and party.

(a) According to the report made on my own inspection, and contained in my letter of 30th September last, I valued 42 yards of excavation at £20, whereas Mr. Vickery valued the same quantity at £1 per yard—£42. £1 per yard is excessive; and although I put it, in order to give M'Neil and party every advantage, at 10s. per yard, I can have the same work done at any time for from 3s. to 5s. per yard.

(b) Mr. Vickery's valuation was made some months after my own was; and although he valued the improvements at £42, in a report in which he evidently leaned towards the men, who were on the ground and could make their version appear good in his eyes, the Mines Department shortly after sent Mr. Warden Aldcorn to report, and valued the same improvements at the absurdly high price of £135; and although both Mr. Fitzgerald, Deputy Surveyor-General, and Mr. Moriarty, Chief Commissioner, advised, on perusal of the evidence, that only 42 acres be barred from selection, according to Mr. Vickery's valuation, the late Minister decided contrary to their recommendations, and has barred 135 acres.

3rd. Mr. M'Neil and party had no title on which they can claim in virtue of the 8th clause Alienation Act of 1861, they only having made application for mineral lease; and as there are certainly not more than £20 worth of improvements on the ground, no bar should have been made over any of the ground; and I therefore respectfully request that you will be pleased to have the case reconsidered, with the view to coming to a legal and equitable decision on the matter.

I have, &c.,

W. B. CHRISTIE.

P.S.—Pending your decision I decline to accept refund.

## No. 68.

## Mr. W. B. Christie to The Secretary for Lands.

Sir, 98, Victoria-street, Sydney, 13 February, 1883.

Queanbeyan,  
C.P.s 82-259, 260,  
261, 14th Sept.  
1882.

Referring to the mineral conditional purchases noted in the margin, I have the honor to request that you will be pleased to cause an appraisalment of the value of the improvements thereon to be made.

In asking for an appraisalment, I may state that on the 7th September I measured them, and found them to contain 42 yards of pick and shovel work excavation.

Some two months subsequently Mr. Licensed-Surveyor Vickery was instructed by the Surveyor-General to report on the value of the improvements, and he found them to consist only of the 42 yards of excavation above mentioned, which he valued at the absurd price of £1 per cubic yard, and thus barred 42 acres out of conditional purchase 82-260.

Subsequently Mr. Warden Aldcorn was directed to report on those improvements, and he placed upon them the extraordinary price of £135; but I understand he did not specify either their nature or measurement.

On

On this latter valuation the late Minister (Sir John Robertson) decided to bar 135 acres, partly out of conditional purchase 82-259 and partly out of conditional purchase 82-260, and this entirely ruins the property of Messrs. Mills, Laing, and myself, comprised in the three mineral conditional purchases above quoted.

In asking for the appraisement, I beg to point out the wide difference between the valuation set upon this work by the two officers sent to report on it, and to submit that even the lowest valuation of £1 per cubic yard is very much higher than the value of such work.

I therefore have to ask that you will be pleased to appoint an arbitrator who is independent of and unconnected with the Public Service.

I have, &c.,  
W. B. CHRISTIE.

---

No. 69.

Messrs. Mills, Laing, & Christie to The Under Secretary for Lands.

Sir,

98, Victoria-street, Sydney, 22 February, 1883.

I have the honor to enclose herewith the sum of £6 Gs., being amount of appraisement fee in appraisement of mining improvements on the mineral conditional purchases Nos. 259, 260, 261, of 1882, made at Queanbeyan, and the value of which has been disputed between Mr. Hugh M'Neil and others, and Messrs. F. M. Mills, W. Laing, and myself.

C.P. 82-259,  
82-260, 82-261

I have, &c.,  
(On behalf of F. M. MILLS, W. LAING, and myself),  
W. BEDE CHRISTIE,

Licensed Surveyor.

---

Minutes on No. 69.

By Under Secretary for Finance and Trade:—The sum of £6 Gs. was credited this day to within-mentioned account.—J.T. (for Under Secretary), B.C., 23/2/83. Treasury.

Conditional Sales Branch.—J.M.G. (*per* E.B.), 1/3/83. Mr. Brown.—Please quote papers.—V.C. Papers herewith.—V.C. Miscellaneous Branch, as to appraisement.—W.B., 20/3/83. Suggested that the Surveyor-General be asked to name a surveyor who is in a position to act as appraiser and supply a tracing.—F.H.W., 20/3/83.

By Under Secretary for Lands:—The Surveyor-General.—C.O., 20/3/83.

By Surveyor-General:—I observe a difficulty in dealing with this case, the valuation appealed against having been made by a senior surveyor of the district; therefore I can only send a district surveyor to appraise, and this course would be rather inconvenient at present. I might, however, suggest that the question being one of earthwork, or rather excavation, a report should be obtained from the local Road Superintendent upon the valuation put upon the works by the surveyor. Officers of this Department seldom have any actual practice in earthwork, consequently it is not unreasonable to expect that they may be mistaken; and in this view I would prefer the report of an officer whose vocation is in that line.—P. F. ADAMS, 3 April, 1883. Under Secretary for Lands.

No. 70.

Messrs. Bennet & Wray to The Under Secretary for Lands.

Sir,

Central Exchange, Sydney, 27 February, 1883.

Would you kindly supply us with a tracing of the 135 acres of land which is to be excised from the mineral conditional purchase of Messrs. Chaffey, Mills, Laing, and Christie, which I mentioned about to you this morning; for particulars see papers as per marginal numbers.

I have, &c.,  
BENNET & WRAY,  
Acting for H. M'NEILL & others,  
Miners, Molonglo.

---

Minutes on No. 70.

Charting Branch.—W.B., 27/2/83. Tracing as requested herewith (enclosed).—H. HARE, *per* E.H.B., 5/3/83. Conditional Sales Branch.

---

No. 71.

The Chief Commissioner to Mr. H. M'Neill and others.

Gentlemen, Department of Lands, Conditional Sales Division, Sydney, 14 March, 1883.

With reference to Messrs. Bennet and Wray's letter of the 27th ultimo, requesting on your behalf that you may be supplied with a tracing showing the proposed measurements in satisfaction of the mineral selections noted in the margin, I have the honor to send you the accompanying tracing of the form of measurements conditionally approved by the Minister for the selections named, but which measurements are subject to the result of appraisement should the selectors demand the latter, and to all necessary roadways being reserved.

Queanbeyan,  
M.C.P.  
82-259, 82-260.  
Tracing.

I have, &c.,  
A. O. MORIARTY,  
Chief Commissioner.

No. 72.

Memo. by Under Secretary for Lands.

Captain's Flat.

MINERAL conditional purchase and mineral lease application in conflict. An appeal to appraisement in reference to improvements upon this land has been made. Where are the papers?—C.O., 20/3/83.

Minutes

*Minutes on No. 72.*

Herewith.—F.H.W., 20/3/83.

By Under Secretary for Lands:—Have instructions for the appraisal issued?—C.O., 28/3/83. Papers 83/3,218 Miscellaneous sent to Surveyor-General on 20th, for name of surveyor to hold appraisal.—F.H.W., 28/3/83.

By Under Secretary for Lands:—I should be glad if this matter could be expedited.—C.O., 29/3/83. The Surveyor-General.

The above case was sent to you on the 22nd March, 1883, and should be dealt with and sent to Lands with as little delay as possible. By direction of Surveyor-General.—W. McLEAN, 22/9/83.

Mr. M. A. McLean,—Return to me with memorandum as to how the matter stands.—W. McL., 29/3/83. Papers have not reached me yet.—M. A. McLEAN, *per* J.F., 29/3/83. Wm. McLean. Now herewith.—W. McL., 3/4/83.

## No. 73.

## Memorandum.

An appeal having been made to appraisal, for which the fee has been paid, it seems doubtful whether a mere valuation by a surveyor or road superintendent will suffice, as suggested in Survey minute.—J. McG., 9/4/83.

*Minutes on No. 73.*

Submitted.—F.H.W., 10/4/83. I understand from personal inquiry at the Mines Department that Mr. Warden Aldcorn, at Araluen, could act if required.—F.H.W., 11/4/83.

By Under Secretary for Lands:—Would it be convenient for one of the Commissioners to make the appraisal?—C.O., 17/4/83. Chief Commissioner.

By Chief Commissioner of Conditional Sales:—Mr. Burne, the Commissioner for the Southern Division, can act if desired.—A.O.M., 18/4/83. Under Secretary.

By the Under Secretary for Lands:—Prepare instructions.—C.O., 18/4/83.

## No. 74.

## The Chief Commissioner to The Under Secretary for Lands.

Sir, Conditional Sales Division, Department of Lands, 20 April, 1883.

Reverting to your letter of the 9th March, 1882, and to the opinion, copy of which was therein forwarded, given by the late Attorney-General, Mr. Wisdom, on the question submitted to him from the Mining Department as to whether land held under mineral licenses is open to conditional purchase, I am now directed by Mr. Secretary Farnell to state to you, for the information of the Minister for Mines, that the effect of the opinion referred to has called attention to the regulations under which such licenses are issued, with respect to which, the following minute from the Deputy Surveyor-General was brought under the consideration of the late Minister, Sir John Robertson.

"Attention is directed to the fact that this opinion has been sent without any attention being specially drawn to the case in which it was given, and which, involving an issue between a conditional purchaser and the holder of a prospecting license, would require that the interests of the conditional purchaser should be attended to as well as that of the holder of the license, and would require that steps be taken to prevent an issue of deed to the conditional purchaser if he has no right to the land owing to previous licenses. As, however, in my capacity of Chief Mining Surveyor, I was aware of the necessity, I have had the conditional purchase papers (C.P. 81-270, Armidale) noted, to prevent the completion of sale till the question of the right of any prospecting license against the M.C.P. is decided; and I would now recommend the consideration of the whole question of how alienation of Crown Lands by conditional purchase or otherwise is affected by such prospecting rights, and whether they legally exist. Of course the opinion of the Crown Law Officer is based upon the supposition that the prospecting license has been issued according to law, but in my opinion, for the following reasons, the regulations under which such area is said to be held under the mineral license are illegal, as being *ultra vires* :—

- "1st. There is nothing to show who has the right of issuing the licenses, and they certainly have not been issued as required, by the Governor, as neither he nor the Minister for Mines knew anything about them.
- "2nd. The issue of the license is made absolute by the word 'shall' in the 1st clause, contrary to the words of the 63rd clause of the Act, which are simply that 'it shall *be lawful* for the Governor to cause to be issued,' &c.
- "3rd. There is no privilege given in the 63rd clause other than those given to a holder of a miner's right, and no distinction between the holder of the 'right' and the 'license,' except that the one is to look for gold and the other for other minerals. Whence then comes the power (not possessed by the holder of a miner's right) of taking possession of 40 acres, 80 acres, and 640 acres, without the knowledge of the Minister for Lands, and to thus defeat conditional sale and sale by auction?
- "4th. Whence comes the right of having the form of the land thus taken possession of other than that prescribed under the miner's right, or the conditions of taking possession and marking other than those attached to a miner's right?
- "5th. If (as I believe) a miner can only hold one miner's right, how can he hold several mineral licenses, as permitted under these regulations?
- "6th. How can the grounds of forfeiture (which involve rights and privileges) be distinct from those in the case of a 'miner's right,' seeing that the law makes the rights and privileges 'the same'?
- "7th. The 63rd clause is evidently intended simply to give a prospector a right to be on Crown Land without being considered a trespasser, but not to confer such extensive powers and rights, &c., as are given to him under the regulations; and to evolve such rights from that clause as are given under the two codes of regulations (which contradict each other) is simply to legislate by regulations rather than by Act of Parliament." I

I am to observe, that it cannot be denied that the regulations referred to largely encroach upon the province of land administration, and admit of being availed of to cover very serious abuses and obstructions to the operations of the laws relating thereto; and that while within proper limits the granting of licenses for the protection of persons searching for minerals other than gold, and their operations (as the holders of miners' right are protected) from being interfered with by pastoral lessees or conditional purchasers would be in harmony with the Land Laws, the difficulty arises from rights being conferred or professed to be conferred by the Mining Regulations that are foreign to those given to the holders of miners' rights, inconsistent with the laws referred to, as well as in themselves, and certainly never contemplated by the Legislature.

Sir John Robertson expressed an intention of directing the attention of the Government to this question, with a view to the Mining Regulations being amended so as to bring into accord the provisions relating to the licenses and the miners' rights; and I am directed to state that, in the opinion of Mr. Secretary Farnell, the sooner the existing regulations relating to this matter are repealed the better.

I have, &c.,

A. O. MORIARTY,  
Chief Commissioner.

### No. 75.

#### The Under Secretary for Lands to Mr. H. Burne.

Sir,

Department of Lands, Sydney, 20 April, 1883.

I am directed to forward herewith your formal appointment as appraiser, under the Lands Acts further Amendment Acts of 1880, to determine the value and ownership of the improvements, and which existed on the land therein specified at the date it was conditionally purchased by Mills, Laing, and Christie. The leading facts of the case are recounted in that letter. In furnishing your award, you will please note on sketch or tracing the position of the improvements, and show a proposed form of measurement, in accordance with regulations, that would include the improvements.

A copy of those regulations, under the Act referred to, which have special reference to the subject of appraisements, and in strict accordance with which the present appraisement must necessarily be carried out, is appended for your information; and as it is not improbable that, in previous instances, you have conducted appraisements under the provisions of the 28th clause of the "Crown Lands Alienation Act of 1861," I may point out that the "Lands Acts further Amendment Act of 1880" differs from that Act, by withholding from the claimant the privilege of concurring in the appointment of the Government appraiser, or of appointing a second appraiser upon his own behalf.

*(Copy of the Regulations referred to.)*

#### APPRAISEMENTS.

##### Appointment of appraisers.

13. Whenever it shall become necessary or desirable to hold an appraisement, it shall be conducted in manner herein-after mentioned (that is to say) :—

The Minister will appoint one or more appraisers. The appointment shall be made in writing, shall be delivered to the appraiser or appraisers, and attached to the appraisement when made; and such appraisement shall, unless altered or vetoed by the Minister after the receipt of a report and recommendation from three such appraisers, be binding, final, and conclusive upon all persons and to all intents and purposes whatsoever.

In case of death or failure to act by appraisers.

14. In case such appraisers or any of them die or become incapable to act before the making of their appraisement, or fail to make their appraisement within sixty days after their appointment, or within such extended time (if any) not exceeding thirty days as shall have been duly appointed by them for that purpose, the matters referred to them shall be again referred to appraisement as if no former reference had been made.

Appraisers to give notice of time and place appointed for appraisement.

15. The appraiser or appraisers shall appoint a time and place for holding a Court of Appraisement at some convenient place in the district, and shall give not less than fourteen (14) days' notice in writing thereof to all parties interested.

Appraisement to be conducted in open Court.

16. The appraisement shall be made in open Court, and upon due inquiry and consideration of any evidence, documentary or otherwise, which may be laid before the appraiser or appraisers by the claimant, or which may have been produced at their own instance or at the instance of the Government; and the appraiser or appraisers may examine the parties as witnesses on oath.

Appraisement to be transmitted to the Minister for Lands.

17. Every appraisement or award shall be in writing, and shall be transmitted to the Minister and deposited in his office.

You will observe that the appraisement must be conducted in open Court; that not less than fourteen days' notice in writing of the time and place appointed for the holding of it must be given to Messrs. Mills (Wentworth Court, Sydney), Laing (Newcastle), Christie (Sydney), and to all persons interested in the case, and that, to prevent the delay, inconvenience, and disappointment of a second reference, it must be made within a period of, at furthest, ninety days from the date of your appointment. This period, however, as will be noticed, comprises a term of sixty, with an allowed extension of thirty days; and if it be found necessary to take advantage of this extension, proper notice must be given to all parties and the fact clearly represented when you furnish your award.

As the determination of the question at present rests with you alone, the necessity of the exercise upon your part of the greatest care will readily be recognized; and you should, by rigidly adhering to the regulations, by giving due publicity to the proceedings, and by attentively weighing any matters that may come under your consideration, endeavour to prevent any complaint being urged either against your valuation or the means by which you arrived at it. And as the character of the improvements, apart from the consideration of their value, may materially affect the case, you will be good enough to make a careful inquiry into their nature, construction, and uses,—to report whether they answer the requirements of law,—to show in the award the appraised value of each item,—to state, if possible, whether they are capable of being included in an area corresponding to their value and measured in accordance with the regulations,—and to show upon the enclosed tracing their relative positions, with sufficient accuracy to enable the Department, without further reference, to determine this point. Care

Care should be taken that the declaration, printed on the back of your letter of appointment, be made prior to the commencement of the inquiry. When the award is furnished, it should be accompanied by a report containing, with whatever information may be valuable, the names of the persons upon whom the required notice was served, the place where the appraisement was conducted, the date upon which it was held, and the names of those who were present and supplied evidence. It is necessary that your letter of appointment should be returned, and it is desirable that the minutes of any evidence should at the same time be transmitted to this Department.

I have, &c.,  
CHARLES OLIVER,  
Under Secretary.

[Enclosure A to No. 75.]

Appointment of Appraiser to determine the value of improvements forming matter of dispute.

Tracing to follow

WHEREAS on the 14th September, 1882, Frederick M. Mills, William Laing, and W. B. Christie conditionally purchased, under the 19th section of the Crown Lands Alienation Act of 1861, the portions of land hereunder described, and whereas, under a report received from the local surveyor, Laing's mineral conditional purchase was declared void, as it appeared that the land was improved to a sufficient extent to bar selection, viz., £110; Mills' selection was also reported to be improved to the extent of £25; in view of this report, it is proposed to excise from the purchases in question 135 acres, but as applicants protest against this course, the Secretary for Lands has decided that the value of the improvements shall be determined by appraisement: Now I, the Minister for Lands, in pursuance of the powers vested in me, under and by virtue of the Lands Acts further Amendment Act of 1880, do hereby appoint Henry Burne, of East Maitland, in the Colony of New South Wales, to be the appraiser to determine the value of the said improvements on the land in question at date of the application to purchase same.

In witness whereof, I have hereto set my hand, this 20th day of April, 1883.

JAMES S. FARNELL.

Description of land referred to:—

90 acres, 50 acres, and 130 acres, parish of Bullangong, county of Murray, as shown on tracing.

I, the within-named Henry Burne, do solemnly and sincerely declare that I am not directly or indirectly interested in the matter referred to me, and that I will hear and determine it faithfully, honestly, and to the best of my skill and ability.

HENRY BURNE.

Subscribed and declared, this sixteenth day of July, A.D. 1883, before me,—

O. WILLANS, J.P.

No. 76.

The Under Secretary for Lands to Mr. F. M. Mills.

Sir,

Department of Lands, Sydney, 20 April, 1883.

With reference to your application to conditionally purchase, under the 19th section of the Crown Lands Alienation Act of 1861, 130 acres of land, parish of Bullangong, county of Murray, I am directed to inform you that, under a report received from the local surveyor, it would appear that the land contained improvements sufficient, when taken in connection with other improvements on adjoining selections, to bar selection. In view of the circumstance that the value of the improvements has been disputed, the Secretary for Lands has decided that their value shall be determined by arbitration.

The appraisement has been instituted under the Lands Acts further Amendment Act of 1880; and in order that you may understand its provisions in regard to the matter of appraisements, a copy of those regulations which have special reference to the subject is hereto appended.

(Copy of the Regulations referred to.)

APPRAISEMENTS.

Appointment of Appraisers.

13. Whenever it shall become necessary or desirable to hold an appraisement, it shall be conducted in manner herein-after mentioned (that is to say),—

The Minister will appoint one or more appraisers. The appointment shall be made in writing, shall be delivered to the appraiser or appraisers, and attached to the appraisement when made; and such appraisement shall, unless altered or vetoed by the Minister after the receipt of a report and recommendation from three such appraisers, be binding, final, and conclusive upon all persons and to all intents and purposes whatsoever.

In case of death or failure to act by Appraisers.

14. In case such appraisers, or any of them, die or become incapable to act before the making of their appraisement, or fail to make their appraisement within sixty days after their appointment, or within such extended time (if any) not exceeding thirty days, as shall have been duly appointed by them for that purpose, the matters referred to them shall be again referred to appraisement as if no former reference had been made.

Appraisers to give notice of time and place appointed for appraisement.

15. The appraiser or appraisers shall appoint a time and place for holding a Court of Appraisement at some convenient place in the district, and shall give not less than fourteen (14) days' notice in writing thereof to all parties interested.

Appraisement to be conducted in open Court.

16. The appraisement shall be made in open Court, and upon due inquiry and consideration of any evidence, documentary or otherwise, which may be laid before the appraiser or appraisers by the claimant, or which may have been produced at their own instance or at the instance of the Government; and the appraiser or appraisers may examine the parties as witnesses on oath.

Appraisement to be transmitted to the Minister for Lands.

17. Every appraisement or award shall be in writing, and shall be transmitted to the Minister and deposited in his office.

Mr. Henry Burne, of East Maitland, has been appointed appraiser, and the date of his appointment, it may be mentioned, corresponds with that of this letter. His attention has been particularly drawn to the fact that the appraisement must be conducted in open Court; that not less than fourteen days' notice in writing of the time and place appointed for the holding of it must be given to you and to all parties interested in the case; and that, to prevent the delay, inconvenience, and disappointment of a second reference, it must be made within a period of at furthest ninety days from the date of his appointment. This period, however, as will be observed, comprises a term of sixty, with an allowed extension of thirty days; and it has been explained to him that due notice must be given to you and to all persons concerned, should he find it necessary to take advantage of the extension.

As

As the character of the improvements, apart from the consideration of their value, may materially affect the case, the appraiser has been instructed to make a careful investigation into their nature, construction, and uses, and to report whether, in his opinion, they answer the requirements of law.

I have, &c.,  
CHARLES OLIVER,  
Under Secretary.

No. 77.

The Under Secretary for Lands to Mr. W. B. Christie.

Sir,

Department of Lands, Sydney, 20 April, 1883.

With reference to your application to conditionally purchase, under the 19th section of the Crown Lands Alienation Act of 1861, 130 acres of land, parish of Bullangong, county of Murray, I am directed to inform you that, under a report received from the local surveyor, it would appear that the land contained improvements sufficient, when taken in connection with other improvements on adjoining selections, to bar selection. In view of the circumstance that the value of the improvements has been disputed, the Secretary for Lands has decided that their value shall be determined by appraisalment.

The appraisalment has been instituted under the Lands Acts further Amendment Act of 1880 ; and in order that you may understand its provisions in regard to the matter of appraisalments, a copy of those regulations which have special reference to the subject is hereto appended.

*(Copy of Regulations referred to.)*

APPRAISEMENTS.

Appointment of Appraisers.

13. Whenever it shall become necessary or desirable to hold an appraisalment, it shall be conducted in manner herein-after mentioned (that is to say),—

The Minister will appoint one or more appraisers. The appointment shall be made in writing, shall be delivered to the appraiser or appraisers, and attached to the appraisalment when made ; and such appraisalment shall, unless altered or vetoed by the Minister after the receipt of a report and recommendation from three such appraisers, be binding, final, and conclusive upon all persons and to all intents and purposes whatsoever.

In case of death or failure to act by Appraisers.

14. 16. The appraisalment shall be made in open Court, and upon due inquiry and consideration of any evidence, documentary or otherwise, which may be laid before the appraiser or appraisers by the claimant, or which may have been produced at their own instance or at the instance of the Government ; and the appraiser or appraisers may examine the parties as witnesses on oath.

Appraisalment to be transmitted to the Minister for Lands.

17. Every appraisalment or award shall be in writing, and shall be transmitted to the Minister and deposited in his office.

Mr. Henry Burne, of East Maitland, has been appointed appraiser, and the date of his appointment, it may be mentioned, corresponds with that of this letter. His attention has been particularly drawn to the fact that the appraisalment must be conducted in open Court ; that not less than fourteen days' notice in writing of the time and place appointed for the holding of it must be given to you and to all parties interested in the case ; and that, to prevent the delay, inconvenience, and disappointment of a second reference, it must be made within a period of at furthest ninety days from the date of his appointment. This period, however, as will be observed, comprises a term of sixty, with an allowed extension of thirty days ; and it has been explained to him that due notice must be given to you and to all persons concerned, should he find it necessary to take advantage of the extension.

As the character of the improvements, apart from the consideration of their value, may materially affect the case, the appraiser has been instructed to make a careful investigation into their nature, construction, and uses, and to report whether, in his opinion, they answer the requirements of law.

I have, &c.,  
CHARLES OLIVER,  
Under Secretary.

No. 78.

The Under Secretary for Lands to Mr. William Laing.

Sir,

Department of Lands, Sydney, 20 April, 1883.

With reference to your application to conditionally purchase, under the 19th section of the Crown Lands Alienation Act of 1861, 140 acres of land, parish of Bullangong, county of Murray, I am directed to inform you that, under a report received from the local surveyor, it would appear that the land contained improvements sufficient, when taken in connection with other improvements on adjoining selections, to bar selection. In view of the circumstance that the value of the improvements has been disputed, the Secretary for Lands has decided that their value shall be determined by appraisalment.

The appraisalment has been instituted under the Lands Acts further Amendment Act of 1880 ; and in order that you may understand its provisions in regard to the matter of appraisalments, a copy of those regulations which have special reference to the subject is hereto appended.

*(Copy*

*(Copy of Regulations referred to.)*

## APPRAISEMENTS.

## Appointment of Appraisers.

13. Whenever it shall become necessary or desirable to hold an appraisalment, it shall be conducted in manner herein-after mentioned (that is to say),—

The Minister will appoint one or more appraisers. The appointment shall be made in writing, shall be delivered to the appraiser or appraisers, and attached to the appraisalment when made; and such appraisalment shall, unless altered or vetoed by the Minister after the receipt of a report and recommendation from three such appraisers, be binding, final, and conclusive upon all persons and to all intents and purposes whatsoever.

## In case of death or failure to act by Appraisers.

14. In case such appraisers, or any of them, die or become incapable to act before the making of their appraisalment, or fail to make their appraisalment within sixty days after their appointment, or within such extended time (if any) not exceeding thirty days, as shall have been duly appointed by them for that purpose, the matters referred to them shall be again referred to appraisalment as if no former reference had been made.

## Appraisers to give notice of time and place appointed for appraisalment.

15. The appraiser or appraisers shall appoint a time and place for holding a Court of Appraisalment at some convenient place in the district, and shall give not less than fourteen (14) days' notice in writing thereof to all parties interested.

## Appraisalment to be conducted in open Court.

16. The appraisalment shall be made in open Court, and upon due inquiry and consideration of any evidence, documentary or otherwise, which may be laid before the appraiser or appraisers by the claimant, or which may have been produced at their own instance or at the instance of the Government; and the appraiser or appraisers may examine the parties as witnesses on oath.

## Appraisalment to be transmitted to the Minister for Lands.

17. Every appraisalment or award shall be in writing, and shall be transmitted to the Minister and deposited in his office.

Mr. Henry Burne, of East Maitland, has been appointed appraiser, and the date of his appointment, it may be mentioned, corresponds with that of this letter. His attention has been particularly drawn to the fact that the appraisalment must be conducted in open Court; that not less than fourteen days' notice in writing of the time and place appointed for the holding of it must be given to you and to all parties interested in the case; and that, to prevent the delay, inconvenience, and disappointment of a second reference, it must be made within a period of at furthest ninety days from the date of his appointment. This period, however, as will be observed, comprises a term of sixty, with an allowed extension of thirty days; and it has been explained to him that due notice must be given to you and to all persons concerned, should he find it necessary to take advantage of the extension.

As the character of the improvements, apart from the consideration of their value, may materially affect the case, the appraiser has been instructed to make a careful investigation into their nature, construction, and uses, and to report whether, in his opinion, they answer the requirements of the law.

I have, &c.,

CHARLES OLIVER,  
Under Secretary.

## No. 79.

Messrs. Garrett, Richardson, & Brett to The Chief Commissioner.

Sir,

4, Spring-street, Sydney, 21 April, 1883.

We have the honor to protest, on behalf of Mr. J. R. Chaffey, against the voidance of the mineral conditional purchase noted in the margin, which voidance took place for alleged vagueness of description.

We are prepared to prove that the description furnished was ample, M'Neill and party's description being fixed by survey, and Kingsland and party bounding M'Neill and party on the north; Mr. Chaffey's description commenced 18 chains due south of Kingsland and party's southern boundary, and we submit that this description is good and valid, from the fact of M'Neill's northern boundary being identical with Kingsland and party's southern boundary. And we may call your attention to the fact that an error in the description does not vitiate purchase (*vide* clause 14 of the Lands Act of 1875).

Trusting that this matter may receive your early and favourable consideration,—

We have, &c.,

GARRETT, RICHARDSON, & BRETT,  
Agents for J. R. CHAFFEY.

*Minutes on No. 79.*

A copy of the application should be made and sent to Charting Branch.—Urgent, C.N., 23/5/83.

## No. 80.

Memorandum by Under Secretary for Mines.

## Regulations relating to mineral licenses.

THE reasons given by the Deputy Surveyor-General for supposing the regulations relating to mineral licenses are "illegal, as being *ultra vires*," are given in paragraphs 1, 2, 3, and 7 of his minute as quoted. The other paragraphs merely ask questions, which could easily be answered, but as they cannot be regarded as reasons for attacking the validity of the regulations, I propose not to notice them.

As to paragraph 1, I admit there is nothing in the regulations to show who has the right of issuing mineral licenses, and I submit there is no necessity therefor. I also admit that such licenses have not been issued by the Governor personally, but I deny that the law requires them to be so issued. I do not know upon what authority the statement that the Minister for Mines knows nothing about them is made, but I think it must have been made under some misapprehension.

As

As to paragraph 2, the words quoted certainly occur in the Act and regulation, but the one is not, I think, contrary to the other. The Act, section 63, says, "It shall be lawful for the Governor to cause to be issued, &c." "Governor," by the interpretation, means the Governor with the advice of the "Executive Council." The Governor with such advice, as empowered by the Act, made the regulation, which says the licenses shall be issued; and, to give full effect to the powers conferred by the Act, the Governor, with such advice, has appointed persons to issue such licenses. Thus the Governor does cause the licenses to be issued. The wording of the Act and the procedure under it in regard to the issue of miners' rights and business licenses are exactly similar.

As to paragraph 3, it may be admitted that no privilege is given under section 63 to the holders of mineral licenses, in regard to minerals, which is not by the Act given to holders of miners' rights in regard to gold, but the Act does not in any way limit the extent of land to be held in virtue of the rights or the licenses,—it leaves this to the discretion of the bodies respectively empowered to make regulations relating to gold and to other minerals. There is nothing in the Act to prevent the Mining Board from allowing 640 acres of land to be held in virtue of one miner's right, whereas sixteen mineral licenses are required under the regulations in question to hold 640 acres for the purpose of searching for coal.

As to paragraph 7, it is not apparent how the intention of the 63rd section of the Act in regard to prospectors is made evident, seeing that in it there is no reference to prospectors. If the word "extensive" has reference to the extent of the area to be occupied, it is quite clear the framers of the Act purposely left that to be defined by regulations. If it refers to the tenure in virtue of a miner's right or mineral license, the Act itself properly makes that as strong as possible, so that the men who, by their industry and enterprise, have helped to develop the resources of the Colony shall not be deprived of the fruits of their labours by conditional or other purchasers who may seek to rob them. It is quite certain that the conditional purchaser cannot be robbed of his purchase by the miner, and it should be, and I think now is equally certain that the miner cannot be robbed by the conditional purchaser.

A careful perusal of the Act and the regulations will, I am satisfied, convince any one that the regulations are not *ultra vires* and are not illegal.

As regards the observation of the Chief Commissioner that the regulations are capable of being abused, I venture to think the same may be said of all regulations, but I doubt whether he can point to a single instance in which these particular regulations have been abused in the manner indicated, and I submit that the conditions attached to holdings under them are such as to reduce the chance of such abuse to a minimum. I fail to see how they can be said to encroach upon the province of land administration, and they certainly cannot do so in a greater degree than the regulations relating to mineral leases, to which no objection has been taken. They may, and indeed I believe do, lead to the alienation and settlement of the public lands, which I presume is the object of land administration.

H. W., 25/4/83.

*Minute on No. 80.*

By Under Secretary for Mines:—Submitted.—H. W., 25/4/83.

No. 81.

The Under Secretary for Mines to The Chief Commissioner.

Sir,

Department of Mines, Sydney, 9 May, 1883.

I have the honor to point out that a conditional purchase for mining purposes, No. 82-261, at Queanbeyan, by W. B. Christie, includes 2 acres of land (No. gold lease 30), which were taken possession of and applied for to lease for mining, before the date of the conditional purchase; and I am to ask therefore, that in measuring the purchase care may be taken to have the said 2 acres excluded therefrom.

I have, &c.,

HARRIE WOOD,

Under Secretary.

No. 82.

The Under Secretary for Mines to The Chief Commissioner.

Sir,

Department of Mines, Sydney, 10 May, 1883.

It appears from the survey of gold leases at Captain's Flat that several of them are included in the conditional purchase for mining purposes, No. 82-261, at Queanbeyan, by Mr. W. B. Christie.

Should the purchase be allowed to stand, the portions occupied under miners' rights at the date it was made will be excluded; and as the alienation of the surrounding land will prevent the development of the auriferous deposits, which appear to be valuable and likely to afford employment to a large number of miners, the Secretary for Mines is of opinion that the purchase being bad in part may fairly be deemed wholly bad, and in the public interest be voided.

Under these circumstances, I am directed to ask you to be so good as to move the Secretary for Lands to disallow the said purchase by Mr. Christie.

Enclosed is a tracing showing the position approximately of the purchase referred to as described in the application, and the portion of the several portions occupied in virtue of miners' rights.

I have, &c.,

HARRIE WOOD,

Under Secretary.

*Minute on No. 82.*

By Chief Commissioner of Conditional Sales:—Charting Branch, with reference to measurement of conditional purchase referred to.—A.O.M., 22/5/83.

## No. 83.

## The Under Secretary for Mines to The Chief Commissioner.

Sir,

Department of Mines, Sydney, 11 May, 1883.

Referring to the application of Mr. William Laing, No. 82-260, of the 14th September, 1882, to conditionally purchase for mining purposes about 50 acres of land in the parish of Bullongong, I have the honor to request that you will be good enough to move the Secretary for Lands to cause the surveyor, when measuring the said purchase, to exclude from it the land tinted pink on the tracing annexed, on the ground that such land was applied for to lease for mining purposes before the date of the purchase, namely, on the 10th of August, 1882.

I have, &amp;c.,

HARRIE WOOD.

*Minutes on No. 83.*

Mr. Brown,—Urgent. A copy of the application should be made and sent to Charting Branch.—C.N., 17/7/83.

Conditional Sales Branch,—No action should be taken in this case until return of papers 83-3,218 Miscellaneous, noted to Mr. Commissioner Burne, 4th May, 1883. When received, may attach and return to Charting Branch.—ARTHUR J. BURNELL, 14/8/83.

## No. 84.

## Memorandum by Secretary for Mines.

I HAVE read the letter of the Chief Commissioner of Conditional Purchases, containing extracts from the minute of the Deputy Surveyor-General, urging his objections to the existing regulations in reference to the granting of mineral licenses.

The 63rd section of the Mining Act, 37 Victoria No. 13, provides that it shall be lawful for the Governor to cause documents to be called "mineral licenses" to be issued.

It appears to me that there are three means in which the Governor could carry out this provision:—

1st—By an Executive authority in each case upon application for a mineral license.

2nd—By the regulation which he might direct some reasons to issue such licenses.

3rd—By an Executive authority appointing persons to issue such licenses.

It is needless for me to point out that the first course is practically impossible, because of the great delay such a course would entail upon the applicant for a license, and because of the great inconvenience such a system would produce.

The second course has not been adopted, although it would perhaps have been a very simple one, by making a regulation that all the Wardens and Wardens' Clerks should be allowed to issue them.

The third course I am informed has been adopted, and Executive authority has from time to time been given authorizing the Wardens' Clerks and other persons who have been notified in the Gazette to issue these licenses.

I have no hesitation in saying that by this means the Governor has fully and in accordance with the law acted in such a way as to cause documents to be called "mineral licenses" to be issued in conformity with the 63rd section of the Mining Act, and such licenses are as effectual as if issued by the Governor himself.

The second objection of the Deputy Surveyor-General is to my mind of very small consequence, because assuming that the regulation goes beyond the power given to the Governor (and I do not admit that it does) in making the issue of the licenses mandatory, it could not have that effect, because the statute does not give such a power, and if the regulations went beyond the power conferred by the Act it would only be bad in so far as it exceeded that power and no further, and it would not be wholly nugatory in consequence of such excess. The construction of a statute depends upon the apparent intention of the maker, to be collected either from the particular provision or the general context, though not from any general references drawn merely from the nature of the objects dealt with by the statute; and applying this doctrine, it is quite clear that the intent of the Legislature was that the Governor might authorize these licenses to be issued, and he has given that authority and has directed the delegates so authorized to act so as to exercise no discretion, but that does not prevent him from doing so in any particular application.

The third objection at first sight appears to have some force in it, because whatever privileges are conferred by miners' rights to mine for gold the mineral licenses confer on the holder thereof the same rights and privileges in respect to or in connection with mining for minerals other than gold. What rights and privileges are conferred by miners' rights? There are many which it is unnecessary to refer to, but the mineral license carries all these with it. The Act is silent as to the area which may be held under a miner's right, but it enables the Governor to call together a Board (*vide* sec. 65), which should have powers "subject to the provisions of the Act, in respect of all matters not otherwise provided for thereby, to make regulations from time to time for mining for gold."

Such a Board was called together and it framed regulations, amongst which it provided for the area to be held under a miner's right.

I do not think this is a right or a privilege conferred by the Mining Act as contemplated in the 63rd section of the Act. The area to be held under lease or mineral license is to be the subject of a regulation to be made under the 64th section of the Act.

I have no hesitation in stating that the regulation prescribing the forms of the area is not *ultra vires*, for it undoubtedly, by express enactment in the 64th section, declares that "the Governor shall have power to make regulations for prescribing the terms and conditions upon which miners' rights and mineral licenses shall be granted; for prescribing the extent and form of the land to be demised by any leases or occupied under any mineral licenses under the Act, and the manner in which applicants shall mark out the land they apply for."

The Act enables the Governor to cause to be issued mineral licenses, but in no way curtails the number which shall be held by one person, either directly or indirectly. The

The 64th section of the Act appears to me to be of very wide scope, and to be framed entirely for the purpose of enabling the Governor to make regulations to deal with miners' rights, leases, and mineral licenses, and under this section the Governor could make one set of regulations applicable to the granting of miners' rights and another set to those of mineral licenses. This course has been adopted, and I am not prepared to say that it has been done either inconsiderately or unwisely.

7th. The argument contained in this paragraph cannot be for one moment entertained—reading the 63rd section of the Act with the 64th. If the contention of the Deputy Surveyor-General is correct, why should power be conferred, as it is by the 64th section of the Act, upon the Governor to prescribe the extent and form of the land to be demised by lease or occupied under any mineral or other license, &c.? This appears to me to mean in the word "occupied" something more than being in the mere possession of Crown Lands, as contended for by the Deputy Surveyor-General.

The observations of the Deputy Surveyor-General have evidently been made upon the assumption that the 63rd section is the only one which deals with mineral licenses; and if that was so, more force might be attached to his observations than can be possibly given to them after reading the 61th section of the Act, and also considering the other references in the Act to mineral licenses.

Mr. Moriarty's remarks are entirely beside the question. Experience has taught that many of the provisions of the Land Laws and much of its administration have resulted in abuses of the worst character, but that is no reason for not attempting to administer those laws as they are, and not as we would wish them to be. It is not because of the speculative abuses which may (but so far have not) arise under the Mining Act that it is not to be administered in accordance with the law as it exists.

I do not agree with Mr. Moriarty's remarks that the regulations relating to "mineral licenses are inconsistent with the laws to which he refers as well as in themselves, and never contemplated by the Legislature."

Such a doctrine as his might have effect if coming from the Supreme Court—and it is the only authority which can definitely decide that question; however objectionable its decisions may be, they alone can have any effect in the construction of an Act of Parliament, the words of which are to be read in their popular, natural, and ordinary sense, giving them a meaning to their full extent and capacity.

J. P. ABBOTT, 12 May, 1883.

Minutes on No. 84.

By the Under Secretary for Mines :—The Chief Commissioner of Conditional Sales, B.C., 14/5/83.—  
H. W.

By the Deputy Surveyor-General :—Having given an opinion to the best of my ability, I can only recommend that, as the question of whether the regulations referred to are or are not *ultra vires* seriously affects the dealing with land by this Department, the question be referred for the consideration of the Crown Law Officers—ROBT. D. FITZGERALD, for Surveyor-General, 9 June, 1883. The Chief Commissioner.

I may perhaps add that it appears to me that even the Governor, under the 64th clause, cannot give "rights and privileges" (under which term the areas are fixed in the regulations) to the holder of a mineral license other than those held under a miner's right, as the law in clause 63 defines them to be "the same"; also that the law everywhere (and the practice, I believe) confines the issue of miners' rights to one right to one individual. How, then, can one individual hold 640 acres under sixteen mineral licenses?—R.D.F., 11 June.

No. 85.

The Under Secretary for Mines to The Chief Commissioner.

Sir,

Department of Mines, Sydney, 31 May, 1883.

With reference to my letter of the 10th instant, containing a request that the conditional purchase of Mr. W. B. Christie, No. S2-261, Queanbeyan, may be disallowed, on the ground that it includes several portions of land applied for and occupied in virtue of miners' rights at the date of the said purchase, I have the honor to inform you that it now appears that another portion of the land comprised in the conditional purchase was occupied by J. H. Blatchford in virtue of a miners' right at the date of such purchase, and that he had placed upon the land improvements of considerable value.

In view of these additional circumstances of the case, I am now directed to ask you to be so good as to move the Secretary for Lands to declare the aforesaid conditional purchase void with the least possible delay, as the mining interest is prejudiced by the inability to issue the leases.

I have, &c.,

HARRIE WOOD,

Under Secretary.

No. 86.

The Under Secretary for Mines to The Chief Commissioner.

Sir,

Department of Mines, Sydney, 6 June, 1883.

Referring to your letter of the 21st of November last (S2 8,003), in which you state that the Minister for Lands had decided to exclude 135 acres from the conditional purchase S2-261 made by W. B. Christie, and to subsequent correspondence on the subject, I have the honor to state that it has been represented to this Department that an appraiser has been appointed to value the improvements, and the Department has been warned not to issue the leases pending the decision upon such appraisalment.

I have to request that you will be pleased to state whether the matter has been so referred, and whether there is any possibility of the decision of the late Secretary for Lands being disturbed, so as to affect the lessees of the 135 acres.

I have, &c.,

HARRIE WOOD.

No. 87.

The Under Secretary for Mines to The Chief Commissioner.

[Urgent.]

Sir,

Department of Mines, Sydney, 12 June, 1883.

I have the honor to invite attention to my letters of the 10th and 31st ultimo, asking that you would be good enough to move the Secretary for Lands to declare void the conditional purchase 82-261, at Queanbeyan, made by Mr. W. B. Christie, as the mining interest is being prejudiced by the said purchase; and I am directed to inquire what action (if any) has been taken in the matter.

I have, &amp;c.,

HARRIE WOOD,  
Under Secretary.

No. 90.

Messrs. M'Grath and party to The Secretary for Lands.

Sir,

Braidwood, 26 June, 1883.

On the 24th I received a note from Mr. A. Ryrie, describing an interview you gave Mr. R. Hassall and himself on 22nd, in the matter of our mineral leases applications at Captain's Flat, Molonglo, in which he said that I, as well as all the other shareholders, had received official notice, on the 20th April last, that Christie had applied for a fresh appraisal of our improvements thereon. Mr. Ryrie expressed surprise that none of us acquainted him of it. It would be impossible for us to have done so, as not one of us had received any official notice of application; so when we all saw and told Mr. Ryrie this to-day he was astonished indeed, and told us his informant was Mr. Wilson, an official in your department, and suggested that we bring this Mr. Wilson's conduct, in wilfully trying to mislead him and us, under your notice.

I have, &amp;c.,

JOHN M'GRATH,  
(For self and party).

No. 91.

The Under Secretary for Mines to The Chief Commissioner.

Sir,

Department of Mines, Sydney, 29 June, 1883.

I have the honor to invite your attention to my letter of the 14th ultimo, asking you to be so good as to move the Secretary for Lands to cause the surveyor, when measuring the 50 acres of land applied for by William Laing, under application 82-260, to be conditionally purchased for mining purposes, to exclude from it the land tinted pink on the tracing enclosed in my letter, on the ground that such land was applied for to lease for mining purposes before the date of the purchase.

I have, &amp;c.,

HARRIE WOOD,  
Under Secretary.

No. 92.

Mr. H. J. Wilson to The Secretary for Lands.

Sir,

Major's Creek, 8 July, 1883.

I take the liberty of writing to you to introduce myself, which I can best do by calling your attention to the time when you were on a visit to this district and honored Lodge Peabody with your presence, in company with Brother Charles De Boos. At that time I had a walk with you, and you may remember

remember my name, which is Henry John Wilson. At that time you said if you could ever be of service to me you would be very happy to do so. Now, dear sir, I am one of the prospectors of the Molonglo Copper Mine, which a Mr. Christie is trying to take from us.

I can assure you, sir, it cost me and my mates a great deal of suffering and hardships, for last winter was a dreadful one in those mountains, and we suffered dreadfully from the rain and snow, besides spending our last shilling of our earnings to develop the mine. As soon as this was done we went to Queanbeyan to take up the land; and, to make quite sure how to do this, we sent a telegram to Mr. Harrie Wood, the Under Secretary of Mines, for instruction how to take up the land, as we, being gold-miners, knew nothing about taking up other minerals. He told us to mark our land in 80-acre blocks, as many such blocks as we marked to be applied for as mineral leases. We did exactly as he told us; but it appears that even he (the Under Secretary) did not know what was right, or he purposely led us astray. Had he given us proper instructions these troubles would not have come upon us, for if we lose this copper, it simply means ruin to a lot of honest and hard-working men; and I do say most respectfully, though earnestly, where it will end God only knows, for these so-called gentlemen are more despicable than I can find language to express, for they came to us as friends, partook of our food, and some of them slept in our blankets, while we sat all night shivering with the cold, and in return these very men are trying to deprive us of what some of us have spent years searching for, by a dodge of trying to undervalue our labour. But we believe and trust that, so long as yourself and the gentlemen with whom you are associated are in power, that no such wrong will be allowed as this Mr. Christie contemplates; and feeling assured of your sympathy in this hard case, I have ventured to lay these few true facts before you, feeling assured you will forgive me for being so bold in addressing you, and humbly asking your assistance as far as you can give it, I beg to subscribe myself—

HENRY JOHN WILSON.

Sir,

Queanbeyan, 18 July, 1883.  
In transmitting the attached award, I have the honor to state that the appraisalment was made strictly in accordance with the requirements of the regulations under the Lands Acts further Amendment Act of 1880.

Fourteen

Fourteen days' notice, in writing, of the time and place appointed for the holding of it was given to W. B. Christie, Frederick M. Mills, and H. McNeill and party. It was conducted in open Court, at Queanbeyan, on the 17th and 18th July, 1883, and during the investigation there were present the following persons, who were examined as witnesses upon oath.—W. B. Christie, Charles Scott, Thomas Brooks, Henry Wilson, Donald Dawson, John McGrath, Edward Holihan, Hugh McNeill, and J. H. Blatchford. With respect to the evidence, minutes of which are forwarded herewith, and the general merits of the case, I may state that the improvements (if they may be so termed) are shown to consist of several shafts or holes, varying from 3 to 20 feet in depth, scattered about over an area from 400 to 500 yards apart, and a trench of some 40 feet in length and 3 feet deep.

These excavations, though doubtless the result of considerable labour on the part of McNeill and party, were evidently made in the search for copper ore, and are, I am of opinion, not of a nature or value to bar conditional purchase under the Land Law of this Colony.

With regard to the case of J. H. Blatchford, whose complaint is that the mineral conditional purchase of W. B. Christie, consisting of 130 acres, includes his gold-mining lease and valuable improvements thereon, and also other improvements to the east and south of the 8-acre lease held by him under the Mining Act, it will be seen, on reference to the evidence of W. B. Christie, that he states it was not his intention to take in any of Blatchford's ground or improvements, and that if it is found that his mineral conditional purchase does encroach on Blatchford, and Brian applied for lease No. 83, he is perfectly willing to allow his description to be so amended as to exclude the whole of their lease and improvements so encroached upon.

The proscribed declaration was made previously to the appraisement, and my letter of appointment is herewith returned.

I have, &c.,

HENRY BURNE,

Appraiser.

[Enclosure A to No. 97.]

At a Court of Appraisement held at Queanbeyan, this 17th day of July, 1883, relative to the value and ownership of improvements said to be upon the mineral leases applied for by H. McNeill and party, and included in the mineral conditional purchases of Messrs. W. B. Christie, Frederick M. Mills, and William Laing, situated at Queanbeyan, on the 14th September, 1882:—

*William Bate Christie*, licensed surveyor, being duly sworn, states:—I appear for Mr. Frederick M. Mills and William Laing in this case regarding his mineral conditional purchase; Mr. Mills is at present in Armidale; I will proceed to call my witnesses.

Sworn before me, at Queanbeyan, this 17th July, 1883,—

HENRY BURNE, Appraiser.

W. R. CHRISTIE.

*Charles Scott*, being duly sworn, states:—*By Mr. Christie*: I was present on the ground when you ran a line; I saw some trenches cut, deep trenches across the reef; I should say these trenches were worth 2s. 6d. a yard; I have had considerable experience as a contractor in cutting water-tables.

*By H. McNeill*: I can't say whether the line was on your lease.

*By Mr. Christie*: I saw McNeill and party on the ground at these trenches; the party I speak of appeared to be the owners of the trenches.

Sworn before me, at Queanbeyan, this 17th July, 1883,—

HENRY BURNE, Appraiser.

CHARLES SCOTT.

*Thomas Brooks*, being duly sworn, states:—*By Mr. Christie*: I visited McNeill and party's land last September; I was one of a party who were thinking of purchasing from McNeill and party; I saw certain trenches there, and I saw some of McNeill's party there, and I see some of them in Court now, whose names are now stated by them to be Henry Wilson, Hugh McNeill, and Thomas Daly; I recognize them as the parties I was in treaty with to purchase the land; they claimed to have made the trenches, and claimed ownership; I have had twenty-five years' experience of all kinds of work as a Government contractor; the trenches averaged from 2 to 4 feet deep, and from 20 to 30 feet in length; the week following I saw a plan, which I now recognize as the same, showing the work that I saw when on the ground; there are two trenches and two shafts shown upon it; those are the trenches which were shown to me by the parties in Court that I have named; both the shafts and the trenches were on mineral lease 23; one of those shafts was considered by McNeill's party and myself valueless; that shaft was 10 or 12 feet deep; the others (in the trench) were about 20 feet deep; the sinking was described by the men themselves as soft sinking, easy to work; I think 2s. 6d. a yard would be ample for the trenches; the trenches were worth from £7 to £8; the shaft of 20 feet deep was worth 10s. a foot—£10; there was a bank of the creek stripped for exposing the reef; there was no one working at it; that was about a week's work for one man, worth from £2 10s. to £3; I think it was about 8 or 10 chains from the 20 feet shaft—it may be not so much; I was taken by McNeill and party over the three portions Nos. 23, 24, and 25.

*By Appraiser*: I saw no other improvements—no buildings whatever.

*By H. McNeill*: I am a Government contractor; I recollect going to your place and having dinner; I saw two trenches there on the ground; I didn't sink any shafts for the Government; I have had work of the kind done as a contractor; I will swear that you showed me no other improvements than those I have mentioned; I will swear that you took me from peg to peg of the three portions, from Daly's to Irwin's; your party pointed out the improvements I have mentioned as all the improvements; on these portions I only saw the face of the bank stripped—no shaft; the valueless shaft I would sink for 10s. a foot.

*By Mr. Christie*: I was to give £3,300 for the three portions, and for that reason I considered they showed me all the improvements upon these portions; the improvements spoken of would not be considered as improvements under the Land Act.

*By Mr. McNeill*: I came to buy the copper land—not the work done.

Sworn before me, at Queanbeyan, this 17th July, 1883,—

HENRY BURNE, Appraiser.

THOMAS BROOKS.

*William Bate Christie*, being duly sworn, states:—I visited the land in dispute on the 7th September, 1882; I was employed professionally to inspect the lode and report on the cupriferous character of the land, as also to report on the title of the land, by a syndicate of Newcastle of which Mr. Brooks, who was a member, accompanied me; at the Lands Office, Queanbeyan, I found a mineral conditional purchase had been made by John Robert Chaffley, on the 17th August preceding, of 300 acres: there was an error in his description, which I thought would vitiate his purchase; on my return to Sydney I ascertained from the Deputy Surveyor-General and the Chief Commissioner of Conditional Purchases that he would be allowed to amend his description under the Act of 1875; I advised the party of which I am a member to step in and take up the three mineral conditional purchases, to prevent his putting H. McNeill and party out; having put Chaffley out, it was our intention to deal with McNeill and party—I stated so to McNeill and Daly; we took up these selections on the 14th September, 1882: on the 7th September, a week before selecting, I inspected the three portions, Nos. 23, 24, and 25, held by McNeill and party as mineral leases, and applied for by them on the 5th of June, 1882; I found their starting-point agreed with the description tendered to the Land Agent; on portion 23 there were two trenches, cross-cuts—they were from 2 to 4 feet wide and about 3 feet deep; in my report to the party by whom I was employed, I stated one trench was about 40 feet in length and the second one 35 feet in length; there was a shaft 20 feet deep in one of the cross-cuts; the trenches and shaft could have been cut in about three weeks by two men; I valued this work and the stripping on the bank

bank at £18 or £20; there was a hole which has been spoken of as the "valueless" shaft—it was a prospect hole; those were the whole of the improvements upon the land on the 7th September; the cubic contents of the two trenches and the shaft were 35 cubic yards; I saw Mr. Vickery's report, and he gave the measurement of the trenches and shafts at 42 cubic yards, and stated these were all the improvements on the land; the syndicate I speak of paid H. M'Neill and party a deposit of £50, which I consider in excess of all the work done.

*By H. M'Neill:* I have had a great deal of experience in mining matters, in valuing mining work, &c.; on the 7th September, 1882, there were two trenches on portion No. 23, one about 3 chains south of the other; I will swear that the shaft spoken of as "valueless" is not on the lode but close to it; I was told it was "useless" by one of the men showing me the ground; the shaft might be within a yard of the lode; I was three or four hours on the ground.

*By Appraiser:* After seeing the improvements I have stated, I asked if there was anything further, as we didn't want to buy a pig in a poke.

Sworn before me at Queanbeyan, this 17th July, 1883,—

W. BEDE CHRISTIE.

HENRY BURNE, Appraiser.

*Henry Wilson, being duly sworn, states:—By H. M'Neill:* I am a miner, and engaged in that occupation thirty-two years, and have had a good deal of experience in working on hard rock; I have been on the Molonglo Copper-mine for some time; I am a shareholder in your party; there is a shaft on portion 23 at the foot of what has been spoken of as a stripping on the creek bank; it is about 9 feet deep, and I would not sink it a penny under £2 a foot; there is another shaft in the trench, the labour cost £2 a foot in cutting it; I sunk the greater part of it with a mato; the shaft is through rock, the rock is hard; there is only one shaft sunk in the trench; there are about 6 inches of gravel that the trench is cut through and rock lower down; the gravel is only on one part of the trench; I value that at £1 a foot; there is a small shaft about 3 feet deep; I cannot value that, as I did not sink it; there is another shaft, the one spoken of as "valueless," about 10 feet of cement and boulders and 3 feet of very hard rock has been cut through; it is 13 feet deep, 8 feet 6 inches long, and 4 feet 6 inches wide; it was sunk for a main shaft to work a lode; it is customary to sink large shafts to work a lode; it was the very thing that was wanted to work the ground with; I would sink it to the rock for 3s. a foot, and I have had £5 a foot for sinking through better drilling rock; to sink it all through I wouldn't do it under £2 5s. a foot; there is another shaft on No. 23, I think 9 or 10 feet deep; there is water in it; I know where there are three more shafts, but I don't know whether they are on Nos. 23 or 24; I didn't sink them and cannot value them.

*By Mr. Christie:* The rock is hard where the shaft is sunk through the trench; I cannot say how long I was working at the shaft on the bank of the creek; I was dismissed from the putting up of Holtermann's battery before I commenced work at this shaft; I was dismissed about the 28th or 29th July, and I then went to work on this shaft; I worked in the trench with my mate; the shaft of 9 or 10 feet I cannot say whether it was ever used; I don't know whether the three shafts are on the rock or not; the shafts and trenches, &c., were all used under the Mining Act, and not the Land Act.

*By H. M'Neill:* I was the holder of a mineral license at the time the mineral conditional purchases were selected by Christie and party working on the ground before I commenced to work.

Sworn before me at Queanbeyan, this 17th July, 1883,—

HENRY WILSON.

HY. BURNE, Appraiser.

*Donald Dawson, being duly sworn, states:—By H. M'Neill:* I am a miner; I have been mining for thirty years, and have had considerable experience in mining matters; I have seen the copper lode at Molonglo; I saw several shafts there; I am a disinterested party; there is a shaft in the trench about 20 feet deep; I could not sink that as far as it has gone for less than £2 a foot; I saw another shaft to the south about 20 yards from it through cement and rock; it was a large shaft, from 10 to 14 feet deep—the "valueless" shaft as it is called; to the best of my belief the shaft was on the lode, as it bore copper stains; I should think it beneficial for working the ground, though some might not for sinking; this I should charge 35 shillings a foot for that part that was not rock, and for the rock nothing less than £2 a foot; I saw a trench there; I will swear that when I inspected the ground there was only one trench, which I think was between 40 and 50 feet long and 3 to 4 feet in width I should think; I would not attempt to take it out for less than £1 a foot; I saw another shaft near the bank of the creek—it is some time since I was there, and I cannot tell the depth; we miners don't consider a shaft more than started if it is not more than 20 feet deep; it was only started; I think it worth £2 a foot to go through that rock; I saw some of the rock thrown on top; I don't know which portion these are on, but they are on M'Neill and party's copper land; I saw about nine shafts on your land; I can't say anything about the depth of any others than those I have described; what I saw of most of them was rock; I was working for Mr. Holtermann a short distance from this land—I was sinking in the rock; the shafts are scattered some 400 or 500 yards from others; I was requested by Warden Aldcorn to inspect these shafts—I inspected them accordingly; I have made an estimate of what the work done would be worth; there were three others with me—they were not shareholders; we valued the work done at from £137 to £140; I gave that estimate to Warden Aldcorn; if I estimated it now, I should estimate it at more, because I have had more experience, but I have had no experience on your ground whatever.

*By Mr. Christie:* I have had thirty years' experience; I inspected the improvements in October or November last, to the best of my belief; I never worked or stuck a pick on M'Neill's ground; I was working for gold on Holtermann's ground; it is a blue slate with quartz through it and mundic; Holtermann's ground is on the north-eastern side of the river; the hill I was working on sloped down to the Molonglo River; M'Neill's ground is on the opposite side of the river; the rock on M'Neill's side of the river is of the same character as on Holtermann's ground; it is fairly hard rock chiefly where I saw the shafts on M'Neill's ground; the 20-foot shaft is blue slate chiefly, and has stains of copper all through it; I went down it, and speak from the appearance of it without trying it; I am not a shareholder with M'Neill's party, but was asked to attend and give evidence; I live at Gundaroo; I am not sure whether M'Neill and party's mineral leases were surveyed at the time I saw the shafts; the work I saw I believed was on the ground claimed by M'Neill and party, as the ground was marked out by them; I don't know the dimensions of an 80-acre block; the shafts were about the centre of the block, and the furthest shaft from the 20-foot shaft was from 400 to 500 yards; I couldn't swear that the shaft 500 yards away would be on the 80-acre block at all; I can't swear that the shaft 400 yards away is within the 80-acre block; I went to estimate the work that was done at Mr. Warden Aldcorn's request; I was a neighbour of M'Neill for some months; one of the party wrote to me and requested me to come in and give evidence, and I thought I might as well come, to save the expense of being summoned; William Harkness, Henry Stephens, and Johnson were the men who accompanied me to estimate the work, and we estimated the work and gave it to Mr. Aldcorn; the other men were camped near the ground; the shafts were not abandoned, but the tools were lying near, and fresh dirt that had been thrown up; this was in October or November, as near as I can judge; if the mineral conditional purchase was selected by Christie and party on the 14th September, 1882, the work I saw being done must have been afterwards; I was in Court till the order was made for witnesses to leave, and I then left.

Sworn before me, at Queanbeyan, this 18th July, 1883,—

DONALD DAWSON.

HENRY BURNE, Appraiser.

*John M'Grath, being duly sworn, states:—By H. M'Neill:* I am a miner, and have a miner's right; I know the improvements on portion No. 23; there is a trench about 40 feet long and from 3 to 5 feet deep, and about 3 feet wide—it is nearly all rock; there is a shaft 20 feet deep in the trench; there is another shaft which has been described as the "valueless" shaft; it would be a valuable shaft in my opinion, as it would, I think, lead to the lode; there are copper stains on the rock; there is a shaft near the creek about 8 feet 6 inches deep; there is another near the bank of the creek, 3 feet deep, all rock; there is another shaft 8 feet 6 inches deep, gravel and boulders; on portion 24 there are four shafts, two of them 9 feet each deep and one 6 feet, the other 2 feet deep; the sixth shaft is all rock; all the work was done previous to the 14th September, 1882; I value the whole of the work at £160; there is about £50 worth on portion 24 out of £157; there has been no work done on this land since it has been in dispute; it was first surveyed about the 27th September, 1882, and the second survey was on the 26th February last, by Mr. Robertson; there has been copper ore taken away since the 14th September, 1882; I saw where some one had been working at the 20-foot shaft knocking off the copper ore.

*By Mr. Christie:* There are nine shafts and one trench on the ground; there are not ten shafts on the ground to my knowledge; there are not twelve to my knowledge; the improvements would be of no value except for mining; a beast falling into one of the shafts would of course render it an injury to the land for grazing upon, or the owner of the beast; I have heard the evidence of nearly all the witnesses.

By

*By H. McNeill*: The shafts are beneficial to the owners of the copper mine.

*By Mr. Christie*: Some of them might be injurious to a pastoral occupant, and others might be useful; if the shafts were not full a beast could not reach the water; if a horse, bullock, sheep, or any pastoral stock got into one of the shafts nearly full, that is, one of the deep ones, it could not get out without assistance.

Sworn before me at Queanbeyan, this 18th July, 1883,—

HENRY BURNE, Appraiser.

JOHN McGRATH.

*Edward Holihan*, being duly sworn, states:—*By H. McNeill*: I am a miner and the holder of a mineral license; I know the copper land as held by our party; on portion 23 there is a trench, only one, about 40 feet long, and an average depth 3 feet; there is a shaft in the trench 20 feet deep, all rock; there is another shaft 13 feet deep and 8 feet 6 inches long, 5 feet wide; there is another shaft near the creek, a shallow one; there is another shaft about 9 feet deep; on portion 24 there are three shafts; I remember now there are four shafts on portion 24; I value the whole work on the two portions at between £150 and £160; there has been no work done on this land by the party since it was taken up by Christie and my party; these shafts are improvements to the land for mining purposes; all those shafts are sunk with a view to enhance the property.

*By Mr. Christie*: I value the improvements at from £150 to £160, and I am a mate of the last witness; I came to no arrangement with the last witness as to the valuation; I have had experience in mining work; these improvements are valuable for mining purposes; they might be beneficial to pastoral occupation; if a beast fell into a 9-feet shaft he might get out; the shafts in their present condition could be useful for stock if the shafts got full of water; the shafts are mostly on a hill; I have seen plenty of water-holes on a hill.

*By H. McNeill*: Any of the shafts might answer for a well; they would be useful if they would hold water; they would hold water.

Sworn before me at Queanbeyan, this 18th July, 1883,—

HENRY BURNE, Appraiser.

EDWARD HOLIHAN.

*Hugh McNeill*, being duly sworn, states:—I am one of the party known as H. McNeill and party, applicants for three mineral leases of 80 acres each at Molonglo, and the holder of a mineral license dated the 22nd August, 1882, and the holder of a miner's right; on the 30th May, 1882, I went over this land, and in a day or two after I saw copper stains; on the 5th June I made application to the Mining Registrar at Queanbeyan for three blocks of 80 acres each; we commenced working on the ground; we first sunk a shaft 7 or 8 feet deep near the creek; the shafts and trench are as described by previous witnesses on the land, with the exception that the rock was projecting above the surface over the 20-foot shaft; there is only one trench; some of the sinking in the shaft is worth £5 a foot; I had £5 a foot myself for taking out rock that is not so hard as what is in some of those shafts; the shafts are great improvements to the land, in my opinion, for mining purposes; I swear positively the ground could not be worked to advantage without some of the shafts; there is one called the "valueless" shaft, which I reckon one of the best for working the lode—it is a large shaft, which could be centered with timber to work two buckets; I estimate the value of the work done on these two blocks at £155.

*By Mr. Christie*: I value the sinking of this shaft at £2 a foot; the estimate is my own; the shaft of the creek 8 or 9 feet worth £2 a foot; the 20-foot shaft I reckon worth £2 15s. a foot; a trench £1 a foot, about 40 feet long; the "valueless" shaft worth £2 a foot, 13 feet; another shaft, 3 feet deep, worth £1 a foot; another shaft, about 8 feet deep, on No. 23, worth about 10s. a foot; the shafts and trench above mentioned are on portion 23; on portion 24 there is one shaft about 2 feet deep, worth 10s. a foot; there is a shaft 9 feet deep worth 25s. a foot; there is another shaft 9 feet deep worth £2 a foot; and a 6-foot shaft, 3 feet of it was through solid rock, £2 a foot, the other 3 feet worth 15s. a foot; those are all the improvements (£184 10s. total value). I stated just now the estimate I came to of the whole work was £155; I have had a good deal of practical experience; I consider these shafts and trench as great improvements to the value of the land; The shaft (9 feet near the creek) would make a splendid well; there is nothing round the shaft to prevent stock falling into it; I have seen water in the 20-foot shaft; I have seen water in the 13-foot shaft; I have not seen sufficient water in these shafts for cattle to reach it; the 2-foot shaft could be sunk cheaper, and so would be of value; I have heard the evidence as given by the other witnesses.

Sworn before me at Queanbeyan, this 18th July, 1883,—

HENRY BURNE, Appraiser.

HUGH McNEILL.

[Enclosure B to No. 97.]

At an adjourned Court of Appraisement held at Queanbeyan, this 18th day of July, 1883, relative to the gold-mining leases and improvements of J. H. Blatchford, on the Molonglo Gold-field, said to be included in conditional purchase of W. B. Christie, selected at Queanbeyan, on the 14th September, 1882:

*John Huacham Blatchford*, being duly sworn, states:—In July last I took possession of certain ground at Captain's Flat, Molonglo, by virtue of my miner's right, and made several valuable improvements upon it; I commenced mining operations and obtained payable gold; I worked the ground from that time to the present, and am still working it, employing about twenty men; about a month since I received intimation from the Mines Department that a mineral conditional purchase of Mr. Christie embraced all my ground, or nearly so, and the improvements.

*By Mr. Christie*: I produce a plan which I received from my partner as coming from the Mining Department. [Examination continued.] At the date of Mr. Christie's application the land he applied for was occupied as mining tenements by various persons of my party and men in my employ, viz., George Emerson, William Harkness, Richard Hobday, William Skinner, Samuel Macalister, Henry Stephens, Harry Bishop, Henry Hinchcliffe, myself, and others, in virtue of their miners' rights; payable gold was found upon the land, and within three months of Mr. Christie's application the land was proclaimed a gold-field; at the date of Mr. Christie's application (14th September, 1882), the land, his mineral conditional purchase, contained improvements to the value of £2,700, as follows:—Dams, £50; tunnel, £200; a large shed, with iron roof, 61 feet by 44 feet, £300; engine, battery, &c., £2,000; blacksmith's shop, £30; weatherboard cottage with iron roof, £70; log hut, £10; baker's oven, £5; a garden, £5; since the date of its being taken up by Mr. Christie, and prior to my knowing that other improvements have been made, a water race has been cut 3 miles long, which I value at £200; a cottage of seven rooms, £120; extension of tunnel, £420; a tramway from battery to lease No. 30 and claim 17, £200; stable, £20; six men's huts, £80; these are the grounds of my objection.

*By Mr. Christie*: I was in lawful occupation of this land under the Mining Act; I have no special permission to dig for gold on your mineral conditional purchase; I was digging there for gold before your conditional purchase was taken up; I claim nothing beyond what I hold under the Mining Act and the regulations thereunder.

*By Mr. Christie*: I mean the portions held by me under the Mining Act as mining tenements, and not the whole of Mr. Christie's conditional purchase was held by me; I have not dug or searched for gold other than on the land held by me as mining tenements.

Sworn before me, at Queanbeyan, this 18th July, 1883,—

HENRY BURNE, Appraiser.

JOHN H. BLATCHFORD.

*William Bede Christie*, being duly sworn, states:—The tracing produced by Mr. Blatchford purports to be a tracing not of my selection, but on the face of it it bears these words,—“owing to vagueness of description, the boundaries of Christie's mineral conditional purchase as shown are to a certain extent approximate.” My description was not intended to take in any of Mr. Blatchford's ground or improvements; and if it is found that my mineral conditional purchase does encroach on M'Bray's and Blatchford's applied for lease No. 83, of 8 acres, I am perfectly willing to allow my description to be so amended as to exclude the whole of their mining lease and improvements, which lie to the east and south of the 8-acre lease No. 83, and the lease itself.

Sworn before me, this 18th July, 1883,—

HENRY BURNE, Appraiser.

W. BEDE CHRISTIE.

Award.

## Award.

To all to whom these presents shall come, Henry Burne, of Goulburn, in the Colony of New South Wales, sends greeting. WHEREAS on the twentieth day of April, in the year of our Lord one thousand eight hundred and eighty-three, I was duly appointed by the Minister for Lands, in the Colony of New South Wales, as the Appraiser to determine the value of the improvements which belong to Hugh M'Neill and party, and J. H. Blatchford and Bray, and which existed on the Crown land specified below, at the date, viz., 14th September, 1882, upon which it was conditionally purchased by Frederick M. Mills, William Laing, and W. B. Christie: And whereas I have entered upon the consideration of the value of the said improvements, and have heard and considered the evidence produced before me: Now I, the said Henry Burne, do hereby declare that the improvements specified in the following Schedule were the improvements which existed on the land at the date before mentioned, and declare that the sums set against them respectively were the values of the said improvements at that date:—

## Description of improvements.

A shaft 20 feet deep, sunk by M'Neill and party (apparently on reef), but of value only for mining purposes, £20; other shafts or excavations of no value.

In witness whereof, I have hereunto set my hand, this 18th day of July, 1883.

HENRY BURNE,  
Appraiser.

## Description of land referred to.

130 acres, 140 acres, and 130 acres, mineral conditional purchases, parish of Bullangong, county of Murray.

## No. 98.

## Mr. H. Wilson to The Secretary for Lands.

Sir,

Queanbeyan, 19 July, 1883.

I wish to correct an error as to a slip I made while excited and confused under cross-examination by Mr. W. B. Christie yesterday, in giving my evidence in M'Neill and party's case before Mr. Commissioner Burne, at Queanbeyan. I stated that I was in Mr. Holtermann's employ at Molonglo, on 28th or 29th July, 1882, whereas I find, when I had time to think on the matter, I was dismissed from Holtermann's employ on either the 7th or 9th July, 1882. I wish to have this note read alongside my depositions when under your consideration.

I have, &c.,  
HENRY WILSON.

## Minutes on No. 98.

Cannot trace conditional purchase with information given.—W.B., 30/7/83. The writer should be requested to furnish information as to name of land district and date, and area of conditional purchase to which he refers.—E.B. Mr. Fitzpatrick,—This letter refers to the Captain's Flat mining case.—M.R.L., 31/1/84.

## No. 99.

## Memorandum.

As the case has reference to a dispute as to improvements on certain mineral conditional purchases, it is submitted that the papers be referred to the Chief Commissioner.

F.H.W., 24/7/83.

By the Under Secretary for Lands:—The Chief Commissioner.—C.O., 24/7/83.

By Chief Commissioner of Conditional Sales:—The appraisement determines the value of the improvements at a sum insufficient to affect the conditional purchases, which, unless the appraisement should be altered or vetoed by the Minister, as provided in the 16th section of the Act of 1880, should be measured as applied for, subject to such modification as may be necessary to conform to the rules of measurement prescribed by law and the public interest, and to avoid interference with the rights of other parties. The several parties may be apprised.—A.O.M., 24/7/83.

By Secretary for lands:—Approved.—J.S.F., 27/7/83. Urgent. Inform.—W.B., 28/7/83. Mr. Fitzpatrick.

## No. 100.

## Messrs. H. J. Withers &amp; Co. to The Chief Commissioner.

Sir,

9, Macquarie Place, 26 July, 1883.

On behalf of T. H. Blatchford and others, we do ourselves the honor to request that the mineral conditional purchase made by W. B. Christie may be cancelled. Our clients applied for this land under the Mining Act of 1874, and have improved it to a considerable extent sufficient to bar the land from conditional purchase.

We have, &c.,  
HENRY J. WITHERS & CO.

## No. 101.

## Mr. A. Ryrie, M.P., to The Secretary for Lands.

Sir,

Micalago, 27 July, 1883.

As Mr. Commissioner Burne has held the Appraisement Court with reference to the Captain's Flat mining case, and as the miners are anxious to know what is to be your decision, I write to request that you will inform me at your earliest convenience the result. I can assure you it is looked forward to with much interest by a large section of the mining community in various localities. I desire to bring under your notice the distinct assurance given by Sir John Robertson, late Minister for Lands, that these men would get their land, and to the fact that their claims were jumped in a most unjust manner. I also desire to draw your attention to a letter from your Department stating that you had decided they should get Nos. 23 and 24 blocks, covering an area of 135 acres, and they trust you will not revoke your decision once given, upon which they have been relying. They have also a letter from the Mines Department,

dated after you had sent the matter for re-appraisal, that their leases would be ready in about fourteen days, acting upon the decision of the Lands Department.

As I am fully aware you are anxious to see these unfortunate men dealt justly by, I hope you will be able to see your way towards bringing this long and anxious matter to a close, and either inform them that they can retain possession of their hard-earned labours or that they must be turned out of their homes penniless after years of prospecting.

I have, &c.,

ALEXANDER RYRIE.

*Minutes on No. 101.*

By Under Secretary for Lands:—Chief Commissioner.—C.O., 30/7/83.

By the Chief Commissioner of Conditional Sales:—The result of the appraisal has already been communicated to Mr. Ryrie, and, unless an appeal to three appraisers should be made, is decisive of the respective claims.—A.O.M., 28/8/83.

### No. 102.

Messrs. Garrett, Richardson, & Brett to The Chief Commissioner.

Sir,

4, Spring-street, Sydney, 30 July, 1883.

With reference to our letter of the 21st April last, concerning the mineral conditional purchase noted in the margin, we have now the honor to ask (understanding that the mineral leases for the same ground have been refused) that the voidance of our client's application should be reversed, and that his claim to the land should be allowed, being prior to that of Messrs. Christie and party. The voidance took place on account of alleged insufficiency or vagueness of description, but, as pointed out in our letter above referred to, we contend that the description was ample and sufficient.

We may add that we are prepared (when called upon to do so) to pay back the refund, which was drawn without our knowledge.

Trusting that the matter may receive your early and favourable consideration,—

We have, &c.,

GARRETT, RICHARDSON, & BRETT,

Agents for Mr. J. R. CHAFFEY.

Quambayan,  
M.C.P. 32-235,  
J. R. Chaffey.

*Minutes on No. 102.*

Conditional Sales Branch,—Should not the different parties be apprised in accordance with Ministerial decision, Miscellaneous 83-13,663, and the papers then returned to Charting Branch for further action?—ARTHUR J. BURNELL, 1/8/83.

By the Chief Commissioner of Conditional Sales:—There is no sufficient ground, in my opinion, for revoking the cancellation of the conditional purchase here referred to, which took place 10th November, 1882, under the decision of the late Minister. The statement of the writers that the refund was drawn without their knowledge may be perfectly true, but is of no importance, as the refund was paid to the order of the applicant himself.—A O.M., 3/8/83.

By the Secretary for Lands:—Approved.—J.S.F., 21/8/83.

### No. 103.

Mr. A. Ryrie, M.P., to The Secretary for Lands.

Sir,

Micalago, 2 August, 1883.

As it is reported in the public papers that you have decided in favour of Christie & Co., as against McNeil & Co., in the Captain's Flat copper case, may I ask if you would forward me your official decision as early as you can, so that these unfortunate men may know what they are to do. It is stated that Mr. Burne, the Commissioner, valued the improvements under £40. As Mr. Burne never visited the ground, is the evidence brought forward by this wealthy syndicate to be taken before that of hard-working and practical men?

*Minute on No. 103.*

Chief Commissioner.—JOHN G. B., 6/8/83.

### No. 104.

The Chief Commissioner to Mr. A. Ryrie, M.P.

Sir,

Department of Lands, Conditional Sales Division, Sydney, 2 August, 1883.

In reference to your letter of the 27th ultimo, requesting information, on behalf of Messrs. McNeil and party, as to the result of the Court of Appraisal relative to the value and ownership of improvements upon the mineral leases applied for by them, and included in the mineral conditional purchases noted in the margin, I have the honor to inform you that the appraisal determines the value of the improvements at a sum sufficient to affect the conditional purchases referred to; and the Secretary for Lands has decided that unless the same should be hereafter altered or vetoed, as provided in the 16th section of the Act of 1880, the selections shall be measured as applied for, subject to such modifications as may be necessary to conform to the rules of measurement prescribed by law and in the public interest, and to avoid interference with the rights of other parties, to which effect the necessary instructions have been given.

I have, &c.,

WM. BLACKMAN,

(For Chief Commissioner).

Quambayan,

No. 105.

The Chief Commissioner to Mr. W. B. Christie.

Sir,

Department of Lands, Conditional Sales Division, Sydney, 3 August, 1883.

In reference to the correspondence concerning the disputed possession of the land embraced by the selections noted in the margin, I have now to inform you that the appraisal recently made determines the value of the improvements at a sum insufficient to affect such selections; and the Secretary for Lands has decided that unless the same should be hereafter altered or vetoed, as provided in the 16th section of the Act of 1880, the conditional purchases shall be measured as applied for, subject to such modifications as may be necessary to conform to the rules of measurement prescribed by law and in the public interest, and to avoid interference with the rights of other parties, to which effect the necessary instructions have been given.

I have, &amp;c.,

A. O. MORIARTY,

Chief Commissioner.

No. 106.

The Chief Commissioner to Mr. H. Wilson.

Sir,

Department of Lands, Conditional Sales Division, Sydney, 6 August, 1883.

With reference to your letter of the 19th July last, wishing to correct an error given in evidence when under cross-examination before Mr. Commissioner Burne, I have to request that you will furnish information as to name of land district, date and area of the conditional purchase to which you refer.

I have, &amp;c.,

WM. BLACKMAN,

(For Chief Commissioner).

No. 107.

Mr. B. O. Holtermann, M.P., to The Secretary for Mines.

Dear Sir,

674, George-street, Sydney, 8 August, 1883.

You will kindly excuse my troubling you in bringing the following mining and mineral conditional purchase in short under your notice.

At Captain's Flat, Molonglo, near Queanbeyan, a party of miners took up gold-mining leases and prospecting (shafts) areas. When erecting a large machine for me and a small company, these men, ten in number, found some traces of a copper lode; not knowing how to take it up, applied for information to the Mining Department, received a reply, acted in accordance with such information, and marked the land in blocks,—gave the general required notices. A short while after, a party of — knew a point in the Land Act; then, after pumping all they could out of these finders, went to Queanbeyan, on a Thursday, and paid for all the land as a mineral conditional purchase, without any knowledge whatsoever by the real finders and honest miners. At this stage the finders had no mineral licenses, but by my advice at once took same out, on a Tuesday I think. After this a more — party found out by also the former and original finders that the first party or jumpers, or—, had not described the land properly. They then went on a Thursday, after the original finders had their mineral licenses, and again paid for this land under another description and a little more correct one, but not true. It then came to have the work or labour, &c., valued, and the original finders were going to have 135 acres, instead of 240, copper prospecting land. To this the second jumpers objected as not being correct at Queanbeyan, and, I believe, gained the case as to the value of the work done by them. But then comes the rub—the first jumpers were thrown out because they had not described same correctly; but as to the second jumpers, I can state that their description is also wrong, in taking in several gold-mining leases in their described mineral conditional purchase to which several miners object. I am among this lot, with a 7-acre lease. As the real case stands, it is thus: the second jumpers paid their money as a mineral conditional purchase after the finders had the mineral licenses and miners' rights, and still have wrongly described their intended mineral conditional purchase, to which they have no right whatsoever by justice.

Hoping you will do all you can for the original finders, and cancel Mr. Christie's mineral conditional purchase on this gold-field,—

I have, &amp;c.,

B. O. HOLTERMANN.

No. 108.

The Under Secretary for Mines to The Chief Commissioner.

Sir,

Department of Mines, Sydney, 8 August, 1883.

I have the honor to invite your attention to my letter of the 29th June last and previous correspondence, asking you to be good enough to move the Secretary for Lands to cause the surveyor, when measuring the 50 acres of land applied for by W. Laing, under application No. 82-60, to be conditionally purchased for mining purposes, to exclude from it the land tinted pink on the tracing enclosed in my letter, on the ground that such land was applied for to lease for mining purposes before the date of the purchase. Unless it should appear proper to void the mineral conditional purchase on the ground urged in regard to mineral conditional purchase No. 82-261, that being bad in part by reason of its including land occupied for gold-mining purposes, it is bad as a whole.

I am also to request that you will be good enough to favour me with an early reply.

I have, &amp;c.,

HARRIE WOOD,

Under Secretary.

No. 109.

## No. 109.

## Mr. Licensed-Surveyor Christie to The Secretary for Lands.

Sir,

98, Victoria-street, Sydney, 14 August, 1883.

Referring to mineral conditional purchases, Nos. 82-259, 260, and 261, made by Messrs. Mills, Laing, and myself, at Queanbeyan, on 14th September, 1882, I have learnt that complaints are being made that they embrace certain gold leases at Captain's Flat, notably those of Mr. B. O. Holterman, M.L.A.

In order to avoid any further complications in this case, which has now been under the consideration of your Department for nearly twelve months, I have the honor to state that we never had either any intention of, or desire to interfere with any of the gold leases in question; and further, as it cannot be determined whether our mineral conditional purchases do or do not embrace the said leases without actual survey of the land, we are quite willing to allow our descriptions to be so modified as to exclude all land applied for as gold leases if, on actual survey, it is found that we do clash with them.

In consideration of the length of time this case has been under consideration, I venture to urge that the survey be made at as early a date as possible, as the twelve months prescribed by law has nearly expired.

I have, &amp;c.,

W. B. CHRISTIE,  
Licensed Surveyor.

## No. 110.

## The Under Secretary for Mines to The Chief Commissioner.

Sir,

Department of Mines, Sydney, 20 August, 1883.

I have the honor, by direction of the Secretary for Mines, to invite your attention to my letter of the 10th of May, asking you to be so good as to move the Secretary for Lands to disallow the conditional purchase, No. 82-261, at Queanbeyan, by Mr. W. B. Christie.

It was therein pointed out that, if the purchase were allowed to stand, the portions occupied under miner's right at the date it was made would have to be excluded; and it was submitted that, as the alienation of the surrounding land would prevent the development of the auriferous deposits, which appear to be valuable, the purchase being bad in part might fairly be considered wholly bad, and in the public interest be declared void.

I have, &amp;c.,

HARRIE WOOD,  
Under Secretary.

*Minutes on No. 110.*

By Chief Commissioner of Conditional Sales:—The measurement has already been directed to be made, with such modifications as may be necessary to conform to the rules of measurement prescribed by law and the public interest, and to avoid interference with the rights of other parties. Such measurement will of course exclude the land held under mining lease or miners' rights as already mentioned, to which however the conditional purchaser does not lay any claim; but the conditional purchase cannot be declared void on account of the boundaries having in part interfered with such areas.—A.O.M., 22/8/83.

By the Secretary for Lands:—Approved.—J.S.F., 27/8/83.  
Inform.—W.B., 27/8/83. Mr. Fitzpatrick.

## No. 111.

## The Chief Commissioner to Messrs. Garrett, Richardson, &amp; Brett.

Gentlemen,

Department of Lands, Conditional Sales Division, Sydney, 22 August, 1883.

With reference to your letter of the 30th ultimo, applying for the reversal of the voidance of the mining conditional purchase of J. R. Chaffey, as noted in the margin, the mineral leases for the same ground having been refused, I am directed to inform you that the Minister for Lands sees no sufficient reason for revoking the cancellation of the selection in question, which took place on the 20th November, 1882, under the decision of the late Minister.

With respect to the statement made by you that the refund was drawn without your knowledge, I am to state that the refund was paid to the order of the applicant himself.

I have, &amp;c.,

WM. BLACKMAN,  
(For Chief Commissioner).

## No. 112.

## The Chief Commissioner to The Under Secretary for Mines.

Sir,

Department of Lands, Conditional Sales Division, Sydney, 27 August, 1883.

With reference to your letter of 20th instant, requesting the disallowance of the conditional purchase noted in the margin, and its cancellation, in the public interest, &c., I am directed by the Minister to inform you that the measurement has already been directed to be made, with such modifications as may be necessary to conform to the rules of measurement prescribed by law and the public interest, and to avoid interference with the rights of other parties. Such measurement will of course exclude the land held under mining lease or miners' rights, as already mentioned, to which, moreover, the conditional purchaser does not lay any claim; but the conditional purchase cannot be declared void on account of the boundaries having in part interfered with such areas.

I have, &amp;c.,

WM. BLACKMAN,  
(For Chief Commissioner).

No. 113.

Queanbeyan,  
M.C.P. 82-261,  
J. R. Chaffey.

C.P. 82-261,  
14 September,  
1882, 130 acres,  
W. B. Christie.

## No. 113.

Mr. B. O. Holtermann, M.P., to The Secretary for Lands.

Sir,

Sydney, 27 August, 1883.

I have the honor to forward for your inspection copies of application of John Robert Chaffey and William Bede Christie for land therein described.

This land includes a portion applied for by M'Grath, M'Neill, and others, under mining lease (see Chaffey's application), they being the actual prospectors of the ground; but their right being disputed by the first-named applicants, who base their claim on a mineral conditional purchase.

The application of Chaffey has been refused for vagueness of description, and I would respectfully submit that, as Christie's is equally indefinite, and also interferes with, if not includes existing gold-mining leases, it be refused also.

I have, &amp;c.,

B. O. HOLTERMANN,  
(Per W. G. SLACK).

## [Enclosure A to No. 113.]

JOHN ROBERT CHAFFEY, Sydney, 17th August, 2h. 5m., 19th section, area 300 acres, £150. Situated county Murray, parish Bullangong, south of and 18 chains from the south-west and south-east boundary of 80 acres recently applied for under a mining lease by Messrs Kingsland and Irving and party, and running from that point due south. This land applied for under a mining lease by Messieurs M'Grath, M'Neill, Edwards, Hughes, and party.

## [Enclosure B to No. 113.]

CONDITIONAL purchase 261 of 1882, by William Bede Christie, of Wentworth Court, Sydney, for 130 acres, 19th section, county of Murray, parish of Bullangong. Commencing at a point 10 chains east from the south-east corner of 140 acres applied for by William Laing this day as a mineral conditional purchase, and bounded thence by lines south, west, north, and east to point of commencement, and adjoining the said William Laing's 140 acres mineral conditional purchase on the south, and lying to the westward of gold leases numbers 4 and 14.

Queanbeyan, 14th September, 1882.

## No. 114.

The Chief Commissioner to Mr. A. Ryrie, M.P.

Sir,

Department of Lands, Conditional Sales Division, Sydney, 28 August, 1883.

Adverting to the correspondence respecting the Captain's Flat mining case, I have now the honor to inform you that the result of the appraisalment has already been communicated to you (under date of 2nd instant), and, unless an appeal to three appraisers should be made, is decisive of the respective claims.

I have, &amp;c.,

WM. BLACKMAN,  
(For Chief Commissioner).Queanbeyan,  
M.C.P. 82-250,  
F. M. Mills  
M.C.P. 82-260,  
W. Laing,  
M.C.P. 82-261,  
W. B. Christie.

## No. 115.

The Chief Commissioner to Mr. B. O. Holtermann, M.P.

Sir,

Department of Lands, Conditional Sales Division, Sydney, 29 August, 1883.

Referring to your letter of the 8th instant, urging, on behalf of the holders of certain mineral leases, the cancellation of the mineral conditional purchases noted in the margin, I have the honor to inform you that the mineral conditional purchases in question will be measured so as to avoid interference with the gold mineral leases and occupation.

I have, &amp;c.,

WM. BLACKMAN,  
(For Chief Commissioner).Queanbeyan,  
M.C.P. 82-250,  
F. Mills,  
130 acres, now  
80 acres,  
M.C.P. 82-260,

140 acres, now  
50 acres,  
M.C.P. 82-261,  
130 acres,  
W. B. Christie.

## No. 116.

Mr. A. Ryrie, M.P., to The Secretary for Lands.

Sir,

Union Club, Sydney, 29 August, 1883.

In reply to your letter of the 28th instant, with regard to the Captain's Flat mining case, I beg, on behalf of the miners, to appeal to the appointment of three appraisers, according to the Act.

I have, &amp;c.,

ALEX. RYRIE.

## No. 117.

Messrs. Garrett, Richardson, &amp; Brett to The Secretary for Lands.

Sir,

7, Gresham-street, Sydney, 1 September, 1883.

In reply to the letter of the Chief Commissioner of the 22nd ultimo, respecting the mineral conditional purchase noted in the margin, in which it is stated that the Minister for Lands sees no reason for the revocation of the cancellation of the selections in question, we have now the honor to protest in the strongest manner possible against the decision you have arrived at, and to point out to you that the information we furnished of M'Neill and party's ground having been surveyed establishes our claim to the ground beyond all doubt, as their northern boundary is Kingsland and party's southern boundary; and as our client describes his land as starting 18 chains south of the latter, we maintain that our client's claim to the land is clear, and cannot by any means, other than the regulations to surveyors, be placed in any other position; and we further protest against the matter being decided until it has been fully considered by the Charting Branch, to which it should be referred with this and our former letters.

Trusting that you may see the fairness of entertaining our protest and having the request in the latter part of this letter complied with,—

We have, &amp;c.,

GARRETT, RICHARDSON, & BRETT,  
Agents for J. R. CHAFFEY.Queanbeyan,  
M.C.P. 82-250,  
J. R. Chaffey.

No. 118.

## No. 118.

## Memorandum by Surveyor-General.

Quacanbeyan.—Mineral conditional purchase 82-259, F. M. Mills, for 130 acres.  
 Mineral conditional purchase 82-260, William Laing, for 140 acres.  
 Mineral conditional purchase 82-261, W. B. Christie, for 130 acres.

5 September, 1883.

In view of Sir John Robertson's decision on Conditional Sales 82-8,003 Survey, action was taken on Conditional Sales 83-939 Survey, reducing the area of F. M. Mills' mineral conditional purchase No. 82-259 to 90 acres, and of W. Laing's mineral conditional purchase No. 82-260 to 50 acres. It has since however been decided on Miscellaneous 83-13,663, that these conditional purchases shall be measured as applied for (subject to any necessary modification in form). It is presumed that instructions for the measurement of these and Christie's mineral conditional purchase 82-261 should not be issued until the applicants have returned the refund vouchers sent them, and the conditional purchases have been restored to their original areas. Certified copies of the applications will be required for transmission to the surveyor.

[Urgent.]

ROBERT D. FITZGERALD,  
 (For Surveyor General).

*Minute on No. 118.*

By Chief Commissioner of Conditional Sales:—The applicants may be invited to return the refund vouchers for difference of area, but I apprehend there is no necessity for delaying the instructions for measurement.—A.O.M., 6/9/83.

## No. 119.

## Mr. H. Copeland, M.P., to The Secretary for Lands.

Sir,

Sydney, 6 September, 1883.

Referring to a communication from your Department, dated 2nd August, 1883, and marked Miscellaneous 83-13,663, I have the honor to draw your attention to the following:—

1. That the lands referred to therein as selected by Messrs. F. M. Mills, W. Laing, and W. B. Christie, on the 14th September, 1882, were at that date in the possession of Thomas Daly, Hugh McNeill, Edward Holihan, William Edwards, and John McGrath, who had made three applications for mineral leases, but were at the time of the selection by Mr. Christie and party working under five mineral licenses, four of which were granted on the 22nd August, 1882, and the 5th on the 13th September, and who were strictly carrying out the provisions and regulations relating to mineral leases.

2. That section 63 of the Mining Act states that "every such mineral license shall be in force for a period of twelve months from the date thereof, and shall during the said period confer on the holder thereof the same rights and privileges in respect or in connection with mining for minerals other than gold as are declared by this Act to be conferred on holders of miners' rights in respect to mining for gold," and that section 40 of the same Act, amongst other privileges conferred on holders of miners' rights, provides against any one trespassing pending the application for the lease, and which section I would commend to your attention.

3. Should you, however, consider that I am erroneous in my view that the holding of the mineral licenses by McNeill and party gave them a title against all comers, then I would submit that they were protected by the improvements made, as set forth in the letter of the Under Secretary for Mines, dated 4th December, 1882, and numbered 82-12,600, in which the Department admits their value as £130.

4. It has been stated that Mills and Laing's selections were made by Christie as their agent, and further, that Christie's application is not sufficiently definite in its description, and also includes land held under gold lease by Messrs. Holtermann and Blatchford.

I have, &amp;c.,

HENRY COPELAND.

*Minute on No. 119.*

By Chief Commissioner of Conditional Sales:—The contention of the parties in this matter has heretofore been as between the applicants for leases and the conditional purchasers, and as regards the latter, how far the land was barred from conditional purchase by improvements. On these respective issues the decision so far has been in favour of the applications by conditional purchase.

This representation raises more prominently the claims which the miners may have had to the land which they were working in virtue of mineral licenses taken out by them after their applications for leases had been made, but prior to the date of the conditional purchases of Mills and others. It has been held, under an opinion of the late Attorney-General, that land in the possession of a person holding a mineral license under the Mining Act is not open to conditional purchase, and it would on first-view appear as if this ruling sustained the present contention. I am not prepared to suggest that it should be overruled, without at least this question being dealt with by the Mining Department, to which perhaps it more strictly pertains. In a very similar case (*Smith v. Garot*), it appeared to me that the *de facto* possessor holding a license his possession became a valid holding on the land becoming Crown land, notwithstanding the failure of his lease application; but in that instance it was decided by the Minister for Mines that the applicant had not formally taken possession in virtue of his mineral license, and, although he was in possession prior to the conditional purchase, the latter was sustained. There is in the present instance no allegation that the land was formally taken possession of under the mineral license, whatever the process may be.—A.O.M., 11/9/83. Under Secretary for Mines, B.C., 18th September, 1883.

## No. 120.

## Mr. B. O. Holtermann, M.P., to The Secretary for Lands.

Sir,

674, George-street, Sydney, 6 September, 1883.

I have the honor to acknowledge receipt of your communication of 29th August, bearing reference as noted on margin hereof.

I would respectfully urge, as an additional reason why the mineral conditional purchase referred to should be cancelled is that, from the very position they occupy to the adjoining gold-mining leases, the granting

granting of such mineral conditional purchases will cut off all reasonable access to said leases, rendering the proprietors thereof liable at any time to prosecution for trespass.

This might be to some extent obviated by measuring the mineral conditional purchases in square blocks; but I would still urge that these mineral conditional purchases should be refused,—both from the vagueness of description in application, the fact that the land now applied for by Mr. Christie was so applied and paid for while an application from Mr. Chaffey, who had also paid for it, was pending (Mr. Chaffey having since been refused), and from their proximity to the Molonglo gold-leases.

I have, &c.,  
B. O. HOLTERMANN.

No. 121.

Mr. W. B. Christie to The Chief Commissioner.

Sir, 98, Victoria-street, Sydney, 6 September, 1883.

Referring to the conditional purchases noted in margin, which have been under consideration for the past twelve months, I understand that instructions to survey are being delayed pending the return of refund vouchers, which you sent to me on behalf of the applicants, in September or October, 1882.

In one of my letters about that time I declined to accept refund, and, as it will expedite the survey, I now have the honor to inform you that the refund vouchers were destroyed shortly after receipt by me, and they cannot therefore be returned.

I have, &c.,  
W. B. CHRISTIE,  
Licensed Surveyor.

F. M. MILLS, C.P.  
82-260, W. Laing,  
C.P. 82-260, W.  
B. Christie, C.P.  
82-261, applied  
for at Quean-  
beyan, 14 Sep-  
tember, 1882.

No. 122.

The Under Secretary for Mines to The Under Secretary for Lands.

Sir, Department of Mines, Sydney, 10 September, 1883.

I have the honor to forward to you a copy of the letter sent to the Department by Mr. Warden Alcorn, in reply to the charges brought against him by Mr. W. B. Christie, in respect of the Warden's action in reporting on the value of improvements made on certain land at Queanbeyan, claimed by Messrs. M'Grath and others.

I have, &c.,  
HARRIE WOOD,  
Under Secretary.

Minutes on No. 122.

Submitted.—J.G.B., 28/9/83.

By Chief Commissioner of Conditional Sales:—On return of other correspondence from Mines.—A.O.M., 2/10/83. Resubmit specially in ten days, or on return of papers.—W.B., 3/10/83.

[Enclosure to No. 122.]

The Warden, Braidwood, to The Under Secretary for Mines.

Sir, Warden's Office, Braidwood, 29 August, 1883.

With reference to the letter of Mr. W. B. Christie, of the 25th July last, referred to me for report, by your B.C. 27/8/83 (Mines 7,228), I have the honor to state as follows:—In my letter of the 6th November last to your Department, I reported precisely what I had done in the matter of valuing the work performed by Mr. M'Grath and party, on the land applied for by them as mineral leases. If, as Mr. Christie states, Donald Dawson, at the inquiry held before Mr. Commissioner Burne "proved that Mr. Alcorn, when called upon for a report on the cases, did not himself inspect the land at all, but sent him (Dawson) and three other miners \* \* \* \* \* to state the value of the work done," then I can only say that he proved what was untrue.

Not having seen the evidence, I do not know what Dawson did state, but I cannot help thinking that the words above quoted must be a misrepresentation of it, unless indeed he (Dawson) was so excited by what I have been informed was a worrying cross-examination of the witnesses by Mr. Christie, that he was led to make incorrect statements.

However, I beg to repeat what I stated in my report,—that I not only inspected, but, as carefully as I could, measured all the work pointed out to me by some members of the party who performed it. After I had done so, not having myself any practical knowledge of the cost of such work, I asked not Dawson, whom I did not know, but another person, who has the reputation of being a very experienced reefing miner, to give me some idea of the rate at which such cutting and sinking could be done. He agreed to do so, but said he would like if some one else went with him. I then asked another miner who was standing by if he would give his assistance, which he agreed to do. As they were about proceeding to the ground, they suggested that Dawson had had a good deal of experience as a miner, and they might as well take him with them; I said I had no objection to this. From the statement agreed upon by these men, and from opinions otherwise obtained as to what was a fair rate for such work, I made up from my measurements the amounts which I gave in my report as the approximate value of the labour expended, apart from any question as to whether the result of said labour was "improvement" or not. As the above is all that Mr. Dawson had to do with the matter, Mr. Christie's insinuation, conveyed in the words "a friend, and at that time neighbour, of M'Neill and party," scarcely deserves notice.

I feel confident that the opinions I received were honest, and not "interested opinions," while it may be that some of the evidence brought forward at the late inquiry on behalf of Christie and party was not quite disinterested. Accompanying my report was a statutory declaration made by one of the prospectors as to the cost of the labour, when he had not the least knowledge of what amount I had made up as the value. This person, although interested, has for twenty-five years borne the character of being honest and straightforward. In another paragraph Mr. Christie states that "Dawson proved that those alleged improvements \* \* \* were made in October or November, &c." Again, I must say there is some mistake or misrepresentation. If any of the work was done either in October or November, it must have been a very small proportion indeed. I saw the ground in September, and I am certain that little, if anything, had been done in the way of work between my two visits. In confirmation of this I may point out that in the letter from M'Grath and party to your Department, dated 18th September, 1882 (with present papers), they state that they had expended £103 7s. 6d. at that date. Altogether, therefore, whatever legal bar may be in the way to prevent these men from reaping the reward of their labour and enterprise, I have no doubt but that my valuation is a not unfair approximation to the actual cost.

In respectfully offering the foregoing explanation, it may be no part of my duty to retort upon Mr. Christie, but I may perhaps be excused if I express my desire to indignantly repel the unfounded accusation contained in his letter, and particularly in the concluding paragraph.

However I may have shared in the sympathy manifested for the unfortunate prospectors in the districts of Braidwood and Queanbeyan, I protest against the insinuation that I allowed this in the very smallest degree to influence my official conduct, censure upon which, however, from Mr. Christie, to whose action in the matter his own terms "disgraceful" and "contemptible" have been pretty freely applied by the community in general, is perhaps of small moment.

I have, &c.,  
JAMES ALDCORN,  
Warden.

W. F. ROBERTSON,  
Mining Registrar, Court-house, Braidwood.

## No. 124.

## The Chief Commissioner to The Under Secretary for Mines.

Sir, Department of Lands, Conditional Sales Division, Sydney, 21 September, 1883.

With reference to my letter of the 27th ultimo, relative to the disputed claims to mineral land at Captain's Flat, I have now, by direction of the Minister for Lands, to enclose the correspondence in the matter, and to invite attention more particularly to a letter from Mr. Copeland, in which it is alleged that at the date of the conditional purchases of Messrs. Mills and others, viz., on the 14th September, 1882, the miners M'Neill and party were in possession of certain portions in virtue of mineral licenses under the Mining Act.

Mr. Farnell would be glad if the Minister for Mines would cause the statement to be investigated, and I am to request that you will be so good as to advise me of the result, and of the precise areas (if any) which were so held.

I have, &c.,

A. O. MORIARTY,  
Chief Commissioner.

## Minutes on No. 124.

By the Under Secretary for Mines:—In order to comply with the wish of the Lands Department, it will be necessary to refer the matter to a Warden for inquiry. The question is whether, as Mr. Warden Aldcorn has hitherto dealt with this case, it should be referred to him or to Mr. Warden Woore, who has recently been appointed to the district.—H.W., 25/9/83. Submitted.

By Secretary for Mines:—Refer to Mr. Aldcorn.—J. P. ABBOTT, 25/9/83.

## No. 125.

The Under Secretary for Mines to The Chief Commissioner.

Sir,

Department of Mines, Sydney, 24 September, 1883.

Reverting to the matter of the conditional purchase, No. 82-261 (Queanbeyan) by Mr. W. B. Christie, I am directed to point out that the said purchase was made some few days before the proclamation of the gold-field; but in view of the fact that such purchase comprises auriferous deposits, I am to ask you to be so good as to move the Secretary for Lands to exercise the power conferred on him by the 11th section of the Mining Act, and declare the conditional purchase to be held under section 14 of the Act 25 Victoria No. 1, with a view to grant permission to search therein for gold.

I have, &amp;c.,

HARRIE WOOD,

Under Secretary.

*Minutes on No. 125.*

By the Chief Commissioner of Conditional Sales:—Urgent.—A.O.M., 27/9/83.

By the Chief Commissioner of Conditional Sales:—This had better perhaps await the result of the reference made to the Mining Department as to the holding of the land under license by miners at the date of conditional purchase.—A.O.M., 28/9/83. By Secretary for Lands:—Approved.—J. P. ABBOTT, 28/9/83.

## No. 126.

Mr. Warden Aldcorn to The Under Secretary for Mines.

Sir,

Warden's Office, Braidwood, 8 October, 1883.

With reference to your B.C., 27 October, 1883, on letter of Lands Department, relative to disputed claim to mineral land at Captain's Flat, I have the honor to state that I requested the parties to meet me on the ground on the 5th instant.

Four of the five holders of mineral licenses (with present papers) met me and pointed out five 40-acre portions which they had formally taken possession of previous to the 14th September, 1882.

These portions were marked by pegs and trenches at the corners, as required by the regulations. The men stated that they could only mark the lots approximately to 40 acres each, on account of the rugged nature of the country. They commenced to mark out the portions on the southern boundary of a block of three 80-acre portions for which they had applied as mineral leases, and marked them along the eastern boundary of said lots. Their applications for mineral leases having been under consideration, and having found the mineral (copper), they have since simply kept possession, awaiting the decision of the Department.

I do not know that there is anything further calling for my report on the present reference. The parties are ready (if necessary) to make statutory declarations as to their having marked out and taken possession under their mineral licenses, as they were advised to do, after Mr. Chaffey attempted to dispossess them by his mineral conditional purchase.

I have, &amp;c.,

JAS. ALDCORN,

Warden.

*Minutes on No. 126.*

By the Under Secretary for Mines:—This report may be forwarded for the inspection of the Lands Department.—H.W., 11/10/83. Submitted. By Secretary for Lands:—Approved.—J. P. ABBOTT, 11/10/83. By Under Secretary for Mines:—The Chief Commissioner of Conditional Sales.—H.W., Under Secretary, B.C., 12/10/83.

By Chief Commissioner of Conditional Sales:—Charting Branch, as to whether the land in question as held under mineral license is so far indicated herein as to admit of present action regarding the mineral conditional purchases. The question of the area covered by the license is also directly involved.—A.O.M., 15/10/83.

## No. 127.

Mr. W. B. Christie to The Secretary for Lands.

Sir,

98, Victoria-street, Sydney, 24 October, 1883.

Referring to the mineral conditional purchases noted in the margin, I have the honor to bring the following facts under your notice:—

Messrs. Daly, M'Neill, Holihan, and M'Grath were the holders of mineral licenses, dated 22nd August, 1882.

I do not propose to burden this already too voluminous and tedious case with details of their failure to mark the licenses in terms of the Mining Act, which in itself will be sufficient to oust their present claim to our land, at the present stage, but I will invite your attention to the application (mineral conditional purchase) made by Mr. John Robert Chaffey, on the 17th August, 1882, that is five days prior to the date of the licenses.

Our mineral conditional purchase applications were made on the 14th September, 1882, and they dispossessed Chaffey, whose application was subsequently refused as being vague and uncertain.

If our applications had not been made, Chaffey's must have held good, and he could have claimed to amend the error in his description, under the 14th clause of the Amendment Act of 1875.

The land therefore ceased to be Crown Land on the 17th August, and consequently no claim under license of the 22nd August could be maintained over the same land, which was already alienated.

On the 14th September, I and my partners, Messrs. Mills and Laing, came in with our descriptions, which over-ride Chaffey's, and he subsequently applied for and received the refund of his deposit.

The claim of Messrs. Daly, M'Neill and party now made to upset our right to the land must depend entirely on their right to upset Chaffey's claim; but as they had no such right, they consequently cannot interfere with our title to the land.

This point, I submit, must be fatal to further interference with our mineral conditional purchases on the part of the mineral license holders; and I therefore most respectfully urge that you will be pleased

642—H

to

Queanbeyan,  
14 September,  
1882, F. M. Mills,  
82-259, W. Laing,  
82-260, W. B.  
Christie, 82-261.

to cause the surveys to be made with as little delay as possible, as the case has now been standing over for more than twelve months, and we are suffering serious loss and inconvenience by being unable to develop the property pending your decision.

I have, &c.,

W. B. CHRISTIE,  
Licensed Surveyor.

No. 128.

Memorandum by Surveyor-General.

Mineral conditional purchases 82-259 and 261, Queanbeyan, Messrs. Mills, Laing, and Christie. From Mr. Warden Aldcorn's report, as far as that may be considered sufficient, it would appear that the lands held by the miners under their mineral prospecting licenses are, as now indicated by pencil shading upon the tracing, with Conditional Sales 83-939 Survey (Sec No. —.) Attention is however invited to my previous submission that the existing regulations under which mining prospecting areas are taken up are *ultra vires*.

There do not appear any fresh grounds for consideration since my previous memorandum, and it is now submitted as to whether the instructions for survey should not be issued forthwith.

ROBERT D. FITZGERALD,  
(For Surveyor-General).

The Chief Commissioner, Conditional Sales.

15 November, 1883.

*Minutes on No. 128.*

By Chief Commissioner of Conditional Sales:—I do not know that it is necessary to embarrass the present matter with the general question as to the legality of the regulations with respect to mineral licenses: I have already stated my concurrence in the view that those regulations go beyond the law, and offer wide openings for abuse. It would not be difficult to adduce arguments in support of this contention going beyond those urged by the Deputy Surveyor-General, and appear upon the papers, and in which the Minister has expressed concurrence; but the matter has been fully before the Minister for Mines, who is responsible for the regulations in question being maintained, and I do not know that it is any part of my duty to attempt to controvert his views. It is in this instance sufficient, at present, I submit, to determine to whom the right pertains, so far as it is the province of this Department to recognize it, of the actual land in dispute, that is to say the workings occupied by the miners, and which have been conditionally purchased by the applications that have to be measured. It is enough to know that such workings were in possession of persons entitled to hold them, with whatever area, in pursuance of licenses under the Mining Act at the time of the conditional purchases of Messrs. Christie and others, and consequently that, under the advice of a late Attorney-General, they were not open to conditional purchase. The measurement should certainly therefore be exclusive of any land actually being occupied and worked under mineral license. Whether the full area of 40 acres, as described by the Warden, should in each case be excluded from the conditional purchases is a question that must depend upon how far the Minister may see fit to act on the views of the Minister for Mines, that such areas are tenable and debarred from conditional purchase under the mining regulations.—A.O.M., 15/11/83.

By Secretary for Lands:—It appears that a part of the land applied for as a mineral conditional purchase was in prior occupation under mineral licenses, therefore the mineral conditional purchase, so far as it is affected by the mineral licenses, is void; that is to say, the land applied for as a mineral conditional purchase that embraces the mineral license areas is void. As to the area that the mineral license holders are entitled to, that is a matter for the Department of Mines to determine.—J.S.F., 16/11/83.

No. 129.

The Chief Commissioner to Mr. A. Rylie, M.P.

Sir, Department of Lands, Conditional Sales Division, Sydney, 19 November, 1883.

Referring to the disputed cases as to certain lands at Captain's Flat, between certain miners on the one hand and Messrs. Christie and party on the other, I have now to inform you that the Minister for Lands has decided that, as part of the land applied for as mineral conditional purchases was in prior occupation under mineral lease, therefore the mineral purchases, so far as they are affected by the mineral licenses, are void, that is to say, that the land applied for as mineral conditional purchases that embraced the mineral license areas is void.

As to the area that the mineral license holders are entitled to, that is a matter for the Department of Mines to determine.

I have, &c.,

WM. BLACKMAN,  
(For the Chief Commissioner).

No. 130.

The Chief Commissioner to Messrs. Christie and party.

Sir, Department of Lands, Conditional Sales Division, Sydney, 19 November, 1883.

Referring to your mineral conditional purchases, as opposed to the lands held by certain miners at Captain's Flat, I have the honor to inform you that the Minister for Lands has decided that, as part of the land applied for as a mineral conditional purchase was in prior occupation under mineral licenses, therefore the mineral purchases, so far as they are affected by the mineral licenses, are void; that is to say, that the land applied for as a mineral conditional purchase that embraces the mineral license areas is void.

As to the area that the mineral license holders are entitled to, that is a matter for the Department of Mines to determine, and the actual area upon which refund of deposit on the conditional purchases will take place must await adjustment.

I have, &c.,

WM. BLACKMAN,  
(For the Chief Commissioner).

## No. 131.

The Chief Commissioner to Mr. B. O. Holtermann, M.P.

Sir, Department of Lands, Conditional Sales Division, Sydney, 20 November, 1883.

Adverting to the correspondence on the subject of the mineral conditional purchases of Messrs. W. B. Christie and party as conflicting with the claims of Messrs. M'Neil and party, miners, of Captain's Flat, I have the honor to inform you that the Minister has now decided that the purchases in question, so far as they are affected by the mineral licenses of M'Neil and party, are void, that is to say, that the land applied for as a mineral conditional purchase that embraces the mineral license areas is void.

I have, &amp;c.,

WM. BLACKMAN,  
(For Chief Commissioner).

## No. 132.

The Chief Commissioner to Mr. H. Copeland, M.P.

Sir, Department of Lands, Conditional Sales Division, Sydney, 20 November, 1883.

Adverting to the correspondence on the subject of the mineral conditional purchases of Messrs. W. B. Christie and party, as conflicting with the claims of Messrs. M'Neill and party, I have the honor to inform you that the Minister has now decided that the purchases in question, so far as they are affected by the mineral licenses of M'Neil and party, are void; that is to say, that the land applied for as a mineral conditional purchase that embraces the mineral license areas is void.

I have, &amp;c.,

WM. BLACKMAN,  
(For Chief Commissioner).

## No. 133.

The Chief Commissioner to The Under Secretary for Mines.

Sir, Department of Lands, Conditional Sales Division, Sydney, 20 November, 1883.

Adverting to the correspondence on the subject of the conflicting claims of Messrs. W. B. Christie and party and M'Neill and party to certain land situate at Captain's Flat, I have the honor to inform you that the Minister for Lands has now decided that the mineral conditional purchases made by the former, so far as they are affected by the mineral licenses of the latter, are void; that is to say, that the land applied for as a mineral conditional purchase that embraces the mineral license area is void.

In view of the above, I have therefore to request that you will be good enough to cause me to be informed as to the area that the mineral license holders (M'Neill and party) are entitled to for the purpose of adjusting the area allowed to the mineral conditional purchasers.

I have, &amp;c.,

WM. BLACKMAN,  
(For Chief Commissioner).

## No. 134.

The Under Secretary for Mines to The Chief Commissioner.

Sir, Department of Mines, Sydney, 23 November, 1883.

Referring to the papers No. 83-10,039 (forwarded to you from this office on the 13th ultimo), and to my letters respecting the conflicting claims of Mr. W. B. Christie to certain lands noted in the margin, and those of Messrs. M'Neill and party, the applicants to lease, I have the honor to inform you that the Secretary for Mines has decided that those who endeavoured (as in this case) to deprive M'Neill and party of the fruits of their search and industry are not entitled to any consideration beyond their bare legal rights, and he is of opinion that those (if any) they should themselves be left to enforce.

I have, &amp;c.,

HARRIE WOOD,  
Under Secretary.

*Minutes on No. 134.*

By Chief Commissioner of Conditional Sales:—Inform Under Secretary for Mines.—A.O.M.,  
26/11/83.

Charting Branch.—Mr. H. Hare,—Urgent.

## No. 135.

The Chief Commissioner to The Under Secretary for Mines.

Sir, Department of Lands, Conditional Sales Division, Sydney, 28 November, 1883.

With reference to your letter of the 23rd instant, numbered as per margin, and to my letter of the 20th idem, conveying to you the decision of Mr. Secretary Farnell in regard to the mineral conditional purchases noted in margin, I have now the honor to inform you, in reference to the last paragraph of my letter, requesting you to state the area that the mineral license holders were entitled to hold in view of such decision, that the matter will be finally dealt with on the basis of Mr. Warden Aldcorn's report of the 8th ultimo, and for that purpose the papers in connection with the case have been forwarded to the Survey Department, with a view to the adjustment of the area available for the purchases in question.

I have, &amp;c.,

WM. BLACKMAN,  
(For Chief Commissioner).

*Minutes*

M.C.P.s Nos.  
82-259, 82-260,  
82-261.

Queanbeyan  
M.C.P.s 82-259,  
82-260, 82-261

*Minutes on No. 135.*

By Under Secretary for Mines :—Instructions have been issued to one of the surveyors on the staff of this Department to define the boundaries of the land held by M'Neill and party under mineral licenses. Will the Chief Commissioner please say whether it is now intended that the boundaries of the land held under license shall be defined by an officer of the Surveyor-General's Department.—H.W., B.C., 30/11/83. [Very urgent.] Chief Commissioner of Conditional Sales.

By Chief Commissioner of Conditional Sales :—It may be presumed that the one measurement will suffice to determine anything in this case that is still unsettled ; and as the land embraced by the mineral license (as stated by the Warden) is inclusive of nearly the whole area in question, probably the measurement of the remnant for the purposes of the conditional purchasers may await the measurement above stated to be in progress ; but probably the conditional purchasers should have the option of refund of their deposits.—A.O.M., 3/12/83.

By the Secretary for Lands :—Approved.—J.S.F., 7/12/83.

## No. 136.

## The Chief Commissioner to The Under Secretary for Mines.

Sir, Department of Lands, Conditional Sales Division, Sydney, 11 December, 1883.

With reference to your memorandum of 30th ultimo, stating that instructions have been issued to one of the surveyors on the staff of your Department to define the boundaries of the land held by M'Neill and party, under mineral licenses, and requesting to be now informed, in connection with my letter to you of 28th ultimo, whether it is intended that the boundaries of the land held under license shall be defined by an officer of the Surveyor-General's Department, I have, by direction of the Minister, to inform you that it is presumed that the one measurement will suffice to determine anything in the case that is still unsettled ; and as the land embraced by the mineral licenses (as stated by the Warden) is inclusive of nearly the whole area in question, probably the measurement of the remnant for the purposes of the conditional purchases may await the measurement stated by you to be in progress. I am to add that the statement of the Warden has been communicated to the applicants, who have in the meantime been offered the option of refund of their deposits.

No. 140.

## No. 140.

Mr. B. O. Holtermann, M.P., to The Secretary for Lands.

Sir,

674, George-street, Sydney, 20 December, 1883.

Referring to your letter of 20th ultimo (No. as per margin), I have the honor to submit as follows:—

Correspondence  
83-6,301.

Understanding that Messrs. Chaffey and Christie have jointly or severally applied, under mineral conditional purchase, for the excess of land over the claims of M'Neil and party, I respectfully protest against any of the land in question being apportioned to Mr. Chaffey or Mr. Christie, for the following reasons:—

- 1st. Mr. Chaffey made an application for the land referred to, which application was refused.
- 2nd. Mr. Christie made application for the same land, and paid application fee, while the application of Chaffey was under consideration; and this application (Christie's) was, I submit, illegal—in fact, would appear to have been made on the chance of Chaffey's being refused.
- 3rd. Both application of Chaffey and that of Christie have been declared void, and neither of them have made any new application for any spare ground.
- 4th. The land in question has been proclaimed a gold-field, and is consequently not open to mineral conditional purchase.
- 5th. Had either Chaffey or Christie wished to occupy any spare land over M'Neil and party's claim, they should have made a fresh application, and such application it is imperative should have been made before the land was proclaimed a gold-field. This, I respectfully urge, they have not done; and, further, their original applications cannot be considered as applications for spare ground, and in any case such original applications have been declared void.

Under all the circumstances I therefore consider myself perfectly justified in pressing my protest as hereinbefore written; and

I have, &amp;c.,

B. O. HOLTERMANN.

*Minutes on No. 140.*

The last action in this case is "to await result of survey to be effected by Mines." This letter is a protest against Messrs. Chaffey's and Christie's mineral conditional purchases. It is submitted as to whether Mr. Holtermann (the writer) should be informed of above state of the case.—E.B., 15/1/84. Attention is called to 83-10,808 (See No.—). Inform.—W.B. Mr. Fitzpatrick.

## No. 141.

The Chief Commissioner to Mr. B. O. Holtermann, M.P.

Sir,

Department of Lands, Conditional Sales Division, Sydney, 4 February, 1884.

Referring to your letter of 20th December, 1883, protesting against Messrs. Chaffey and Christie being allowed, under certain mineral conditional purchases, the excess of land over the claim of M'Neil and party, I have to inform you that the case is at present awaiting result of a survey to be effected by the Mining Department in relation of the mineral licenses.

I have, &amp;c.,

WM. BLACKMAN,

(For Chief Commissioner).

## No. 142.

Question and answer of the Legislative Assembly.

Department of Lands.—Legislative Assembly, Tuesday, 5th February, 1884.—Question No. 12.

Copper Leases at Molonglo:—Mr. Holtermann asked the Secretary for Lands:—

- (1.) What action has he taken with reference to certain copper leases at Molonglo, taken up under mineral licenses by H. M'Neil, E. Holahan, and others, whose right thereto had been disputed by certain holders of a mineral conditional purchase?
- (2.) Has the application of Mr. W. B. Christie and others to purchase under mineral conditional purchase certain spare land in excess of that held by M'Neil and Holahan at Captain's Flat, Molonglo (such land being within a proclaimed gold-field) been refused, or otherwise?

Mr. Farnell answered,—

- (1.) It is understood that the areas referred to are held by Mr. M'Neil and party, and are in course of survey for them, pursuant to their applications.
- (2.) The land held under mineral license has been excluded from the conditional purchases of Messrs. Mills, Laing, and Christie.

*Minutes on No. 142.*

Submitted.—T.B., 6/2/84. Conditional Sales Branch to place with papers relating to the conditional purchase.—E.H.S., 7/2/84.

## PRICE'S APPLICATION FOR A MINERAL CONDITIONAL PURCHASE.

## No. 1.

## Application by Mr. J. Price.

Application for the conditional purchase, for mining purposes, without competition, of unimproved Crown Land by James Price, of Buttai.

Received, with a deposit, this 28th day of August, 1873, at 10 o'clock, by—

C. DELOHERY,  
Land Agent for Maitland District.

Sir,

I am desirous of purchasing, without competition, for mining purposes other than gold-mining, under the Crown Lands Alienation Act of 1861, the undermentioned portion of unimproved Crown Land; and I tender herewith a deposit at the rate of ten (10) shillings per acre on the area for which I apply.

I am, &c.,

JAMES PRICE.

The Crown Lands Agent, Maitland.

## Description.

County of Northumberland, parish of Stockrington, 320 acres, adjoining Muir's 640 acres grant, now the property of James Price; bounded on the north by William Payne Price's selection of 320 acres; south by McDonnell's free selection of 50 acres; east by J. Price's freehold 640 acres; and west by Government land.

*Minutes on No. 1.*

By Surveyor-General:—Mr. Spark to measure if unobjectionable.—J.H. (for Surveyor-General), 28th October, 1873.

Forwarded to Mr. District-Surveyor Evans as requested.—JAMES L. SPARK, licensed surveyor, 12th January, 1874. To Mr. Licensed-Surveyor Maitland.—THOMAS EVANS, 22nd January, 1874. Mr. Licensed-Surveyor Madsen's letter of 23rd July, 78/33.

## No. 2.

## Declaration by Mr. J. Price.

H.

[Alienation Act, 1861.]

Declaration of conditional purchaser for mining purposes.

I, JAMES PRICE, of East Maitland, do solemnly and sincerely declare that I am the lawful owner, by conditional purchase, of the land hereunder described, and that an expenditure equal to £2 per acre for the area of the land has been made on mining operations other than gold-mining on the land, and since the selection on 28th August, 1873. And I make this solemn declaration conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled "An Act for the more effectual abolition of Oaths and Affirmations taken and made in various Departments of the Government of New South Wales and to substitute Declarations in lieu thereof and for the suppression of voluntary and extra-judicial Oaths and Affidavits."

JAMES PRICE.

Taken and declared at East Maitland, this 9th }  
day of September, 1876, before me,— }

C. DELOHERY, Commissioner for Affidavits.

## Description.

County of Northumberland, parish of Stockrington, 320 acres, on 28th August, 1876, being conditional mining purchase No. 176/35 of 1873, in the District of Maitland.

*Minutes on No. 2.*

Interest credited at Treasury, £8 5s. 6d.—W.H.B., 6/10/76.  
form.—H.A.F., 31/1/77.

Examined and found correct in

## No. 3.

## Mr. Licensed-Surveyor Madsen to The Surveyor-General.

Sir,

Lochinvar, 23 July, 1878.

I have the honor to transmit herewith the plan of one portion of land containing 320 acres, numbered 86, in the parish of Stockrington, county of Northumberland, applied for by James Price, under the 19th section of the Crown Lands Alienation Act of 1861, surveyed in accordance with instructions dated 28th October, 1873, No. 81, to Licensed-Surveyor Spark. Improvements: fencing, £20. There is also a heap of railway irons (value £250), but as they are only loose on the ground I do not know if such can be called improvements. This portion is more than 80·00 in one direction, but it being enclosed by previous applications this rule cannot be applied. Portion No. 56 has been measured very erroneously, but finding the original corners I had to conform to such, more so as nearly all the old measurements in this locality are of the same quality, probably caused by the extreme roughness of the locality. At the same time I have taken care that Muir's 640-acre grant has not been encroached upon. By measuring

over

## 3

over that portion it appears that its width at the north-east corner of No. 56 is 80.00 and that its east boundary bears 359°, to which I have made the west boundary parallel, viz., plan with letter dated 23rd July, 1878.

I have, &c.,  
H. F. MADSEN,  
Licensed Surveyor.

*Minutes on No. 3.*

This portion extends 14 chains beyond the usual limits; this was unavoidable on account of previous alienation. Submitted that the survey be accepted.—W. D. ARMSTRONG, 5 July, 1880. May be received.—R.D.F., 7 July, 1880. Should not the Conditional Purchase Inspector be asked to report?—W.D.A., 7 July, 1880.

## No. 4.

J. McElhone, Esq., M.P., to The Secretary for Lands.

Sir,

Sydney, 8 October, 1878.

Enclosed I have the honor to forward you an application from Mr. James Price, of East Maitland, to transfer a mineral selection taken up by him of 320 acres at Stockrington, county of Northumberland, on 28th August, 1873, to the 21st section of the Land Acts, to enable him to hold it without residence in virtue of his freehold of 291 acres joining it.

Mr. Price originally took up the land in this way—under the 41st, 42nd, and 43rd sections of the Lands Acts of 1861, on 19/6/73; but some time after his taking it up he was advised that he could not hold the land in this way, as under the Land Act of 1861 he could not hold over 320 acres as a selection in any way; he then took it up as a mineral selection. I have the honor to request that Mr. Price's application may be granted, if it can be done within the spirit and meaning of the Lands Acts.

I have, &c.,  
J. McELHONE.

*[Enclosure to No. 4.]*

Mr. J. Price to The Secretary for Lands.

Sir,

East Maitland, 7 October, 1878.

I have the honor to inform you that, on the 19th June, 1873, I selected at East Maitland 320 acres of land, under the 41st, 42nd, and 43rd sections of the Lands Act of 1861, as adjoining my freehold land of 291 acres, situated at Stockrington, county of Northumberland, without residence. Some time after I selected this land I was advised that I could not hold the land in this way. I then, on the 28th August, 1873, took it up as a mineral selection, and have improved the land according to the Act.

I have the honor to request that you will cause this selection to be transferred to me under the 21st section of the Lands Act, to enable me to hold it without residence in virtue of my freehold of 291 acres adjoining it and mentioned above.

I have, &c.,  
JAMES PRICE.

*Minute on No. 4.*

By Chief Commissioner:—Special.—A.O.M., 14/10/78.

## No. 5.

The Chief Commissioner to Mr. J. Price.

Sir,

Department of Lands, Conditional Sales Division, Sydney, 17 July, 1879.

With reference to your mineral conditional purchase noted in the margin, I am directed to inform you that the Minister for Lands has decided that this purchase shall be reduced by 70 acres, which are included within J. Usher's prior purchase of the 24th July, 1873, and to enclose you a refund order for the excised area.

Maitland,  
M.C.P. 73-9,100,  
320 acres, now  
250 acres.

You, however, have the option of demanding a cancellation of the entire purchase. I may add that, upon application at the Treasury, you will receive a proportionate refund of any moneys you may have paid on account of interest in this selection.

Your early reply is requested.

I have, &c.,  
A. O. MORIARTY,  
Chief Commissioner.

## No. 6.

Mr. J. Price to The Under Secretary for Lands.

Sir,

East Maitland, 25 July, 1879.

In reply to your letter of the 17th July instant, respecting my mineral selection of 320 acres, at Stockington, Maitland, and numbered in the margin conditional purchase 73-9,100, I do myself the honor to inform you that I originally took up this selection on the 19th June, 1873, as a conditional purchaser under the 22nd section, adjoining my freehold property of 640 acres, and paid the deposit of 5s. per acre. On the 28th August following I was apprised that this selection was not allowed, as my freehold and conditional purchase contained more land than I was legally entitled to hold. I immediately then took up the same land (320 acres) as a mineral selection, and paid the additional 5s. per acre, together with the refund deposit voucher sent to me from the Treasury. Since then I have made improvements on the land to the value of £2 per acre, and have regularly paid up the interest due on the balance of purchase money; and as six years have now been allowed to elapse before any intimation was given me of the intention on the part of the Government to reduce the area (the land having been surveyed and passed), it appears to me a very hard case that after so long a period a reduction should now take place in the area on the grounds mentioned in your letter. J. Usher's selection was not virtually made prior to mine, as my first purchase, as before stated, was made some weeks before his, and through a mistake cancelled and re-selected by me without drawing the money already paid from the Treasury.

I desire also to point out that my selection has, as already stated, had improvements put upon it to over the value of £2 per acre, as required by law, and the adjoining selection of J. Usher's has never had a sixpence spent upon it during the six years he has had possession. I therefore trust that, on reconsideration, you will see fit to alter the decision you have already arrived at in the matter, and allow the area of the selection to remain as originally selected (320 acres).

I have, &c.,  
JAMES PRICE.

*Minutes on No. 6.*

By the Chief Commissioner:—Inform that the selection dates only from the renewal application as for mineral land. Charting Branch may be asked to state the areas of the portions named in the accompanying letters. Should be communicated to the applicants.—A.O.M., 7/8/79.

No. 7.

The Chief Commissioner to Mr. J. Price.

Sir, Department of Lands, Conditional Sales Division, Sydney, 28 August, 1879.

Adverting to your letter of the 23rd ultimo, relative to the conditional purchase quoted in the margin, I am to inform you that the selection dates only from the renewal application as for mineral lands, viz., 28th August, 1873.

I have, &c.,  
A. O. MORIARTY,  
Chief Commissioner.

C.P. 73-9,160,  
320 acres, now  
250 acres,  
28 August, 1873  
Maitland.

No. 8.

Notification by Mr. J. Price.

K. [Alienation Act, section 21.]

Notification of alienation of conditional purchase by James Price, in the district of Maitland.

I HEREBY notify to you, as the Agent for the Sale of Crown Lands for the District of Maitland, that I have this day alienated to Charles Smith and the Honorable John Frazer, of Sydney, the two hundred and fifty (250) acres of land, situated in the county of Northumberland, parish of Stockrington, which I selected at Maitland as a conditional purchase, under the 21st section of the Crown Lands Alienation Act of 1861, on the 28th August, 1873.

JAMES PRICE,  
Buttai, East Maitland.

Dated at Sydney, this 30 April, 1880.

Witness—JAMES N. BRUNNER, a Magistrate.  
To the Agent for the Sale of Crown Lands at Maitland.

I have duly registered the above notification of alienation in the records of this office.  
Land Office, East Maitland, 10 May, 1880. C. DELOHERY,  
Agent for the Sale of Crown Lands.

*Minutes on No. 8.*

By the Chief Commissioner:—(Urgent.) The Crown Lands Agent at Maitland will be good enough to note and sign this and the attached notice of transfer if correct, and return.—W.B. (for Chief Commissioner), B.C., 6 May, 1880. Crown Lands Agent, Maitland.

Noted and signed as directed, and returned herewith.—C. DELOHERY, Land Agent, B.C., 10 May, 1880. The Chief Commissioner, Lands Department, Sydney.

No. 9.

The Chief Commissioner to The Hon. J. Frazer, M.P., and Mr. C. Smith.

Gentlemen, Department of Lands, Conditional Sales Division, Sydney, 13 May, 1880.

Maitland, James  
Price, 250 acres,  
28 August, 1873

I am directed to inform you that the conditional purchase noted in the margin has been registered in the books of this Department as transferred to you.

I have, &c.,  
A. O. MORIARTY,  
Chief Commissioner.

[Enclosure to No. 10.]

## NOTIFICATION of alienation of conditional purchases.

Alienor.	District.	Date of selection.	Area.	Section.	Alience.
James Price .....	Maitland .....	28 August, 1873.	250 acres.	21	Messrs. Charles Smith and the Honorable John Frazer, M. L. C.

Department of Lands, Conditional Sales Division,  
Sydney, 13 May, 1880.

No. 11.  
Gazette Notice.

Department of Lands, Conditional Sales Division, Sydney, 27 August, 1880.

It is hereby notified, for the information of all parties interested, that declarations having been received, under the 18th clause of the Crown Lands Alienation Act of 1861, as to the fulfilment of the conditions of residence and improvements upon the undermentioned conditional purchases, the claims of the holders thereof have now been severally referred, as hereunder detailed to Commissioners, pursuant to the Lands Acts Amendment Act, 1875.

Due notice will in each case be given by the Commissioners to the claimants of the times and places appointed for investigation of the claims in open Court.

JAMES HOSKINS.

No. 12.

Memorandum by Secretary for Lands.

CONDITIONAL Purchase 73-9,160, James Price (recently transferred to Charles Smith). Will you please ascertain the present state of this case and let me know.—E.H.S. (for the Minister), 28/8/80.

*Minutes on No. 12.*

Mr. Capper,—The case is being sent on as a claim.—W.H.C., 28/8/80.

Mr. Capper,—The Minister wishes a special report to be obtained from the Inspector (Mr. Smith if possible, if he has the district) in this case.—E.H.S. (for the Minister), 28/8/80.

The conditional purchase is within district of Maitland, which is under the supervision of Mr. Argent. Should Mr. Smith be specially instructed to report, or may the case be forwarded to Commissioner Bolding to-day?—W.H.C., 30/8/80.

As the conditional purchase is in Mr. Argent's district the Minister wishes a report to be specially obtained from him.—E.H.S. (for the Minister), 30/8/80.

No. 13.

The Chief Commissioner to Mr. T. Argent.

Sir,

Department of Lands, Conditional Sales Division, Sydney, 31 August, 1880.  
I am directed by the Minister for Lands to request that you will be good enough to visit specially the conditional purchase noted in the margin, and forward your report thereon to this Department without delay. Tracing and copy of application herewith transmitted for your guidance.

I have, &c.,

WM. BLACKMAN,  
(For the Chief Commissioner).

Maitland, 28 August, 1873, 320 acres, 19 section, James Price transferred to Charles Smith & the Honorable John Frazer, M. L. C.

## Memorandum by Secretary for Lands.

CONDITIONAL purchase 73/9160, Maitland. Declaration made in 1876 referred to Mr. Argent for report on 31st August, 1878. Reminded on 11 October, 1880. Please remind inspector again.—E.H.S. (for the Minister), 12/11/80. Mr. Capper.

## No. 16.

## The Chief Commissioner to Mr. T. Argent.

Sir, Department of Lands, Conditional Sales Division, Sydney 12 November, 1880.

I am directed to remind you that you have not yet furnished this Department with your report upon the conditional purchase noted in the margin, and to request, therefore, that you will do so with as little delay as possible.

I have, &c.,

A. O. MORIARTY,  
Chief Commissioner,  
(Per W. H. CAPPER).

320 acres,  
District of Maitland, county of Northumberland parish of Stockrington, selected on 28 August, 1873, by James Price.

## No. 17.

## Mr. T. Argent to The Chief Commissioner.

Report by Thomas Argent, Inspector of Conditional Purchases, respecting the selection of James Price, made at Maitland, on 28th August, 1873.

Sir, West Maitland, 11 December, 1880.

I have the honor to report that I visited and inspected the above-described conditional purchase on the 11th December, 1880.

The land, which consists of one mineral conditional purchase, and comprises 250 acres, is occupied and used by as a mineral conditional purchase, and the selector, who follows the avocation of, had at the time of my visit made the improvements hereunder particularly described, the value of which I estimate at the sums respectively stated, viz. :—

130 double-headed iron railway rails, each 21 feet long and 5 inches broad, cost	...	...	...	...	...	£450	0	0
50 chains 2-rail split fence	...	...	...	...	...	50	0	0
10 roods 2-rail split fence	...	...	...	...	...	2	0	0
						£502	0	0

and charred remains of what is said to have been 40 chains 2-rail split fence, said to have cost £40, and to have been destroyed by bush fire.

According to the Conditional Purchase Register at East Maitland Court-house, the area of the mineral conditional purchase appears to have been reduced from 320 acres to 250 acres. The iron rails hereinbefore referred to are stacked up together on the place shown on the tracing herewith. Mr. Price informed me that they will be laid shortly, as soon as the proprietors of the Minmi Colliery have tunnelled through the hill situated about a quarter of a mile from where the rails are.

I have, &c.,

THOMAS ARGENT,  
Inspector of Conditional Purchases.

*Minutes on No. 17.*

Improvements consist for the most part of railway iron rails, which have not yet been brought into use, but are stacked on the ground ready to be used when the tunnel through the hill is complete. 19 section conditional purchase. Value of improvements as given by Inspector is not, even with the fence (since burnt down), sufficient to cover area at £2 per acre, submitted to the Minister in the first instance, as he ordered a special report.—W.B., 6/1/81.

By the Secretary for Lands:—This case should be sent to the Commissioner for inquiry. Mr. McElhone, M.P. informed.—J.H., 16/2/81.

## No. 18.

## The Chief Commissioner to The Hon. J. Frazer, M.P., and C. Smith.

Gentlemen, Conditional Sales Division, Department of Lands, Sydney, 1 March, 1881.

I am directed to invite your attention to the notice in the Government Gazette of the 27th August, 1880, by which you will perceive that your claim to the conditional purchase, made by James Price at Maitland on the 28th August, 1873, and transferred to you on 30th April, 1880, has been referred by the Minister for Lands to Commissioner Bolding for inquiry, in accordance with the 25th clause of the Lands Acts Amendment Act of 1875 and the regulations relating thereto, as to the fulfilment by you of the conditions thereof.

2. I am to inform you that due notice of the time and place appointed for the purpose will be given you by the Commissioner referred to.

I have, &c.,

A. O. MORIARTY,  
Chief Commissioner of Conditional Sales.

## No. 19.

The Chief Commissioner to J. McElhone, Esq., M.P.

Sir, Department of Lands, Conditional Sales Division, Sydney, 1 March, 1881.  
 Referring to the conditional purchase made by James Price of Maitland, as noted in the margin, I have the honor to inform you that the Minister having called for a special report from the Inspector of Conditional Purchases in this case, which has been received, decided that it was one calling for inquiry before a Commissioner, and the papers have been accordingly sent to Mr. Commissioner Bolding, of which course Messrs. Frazer and Smith, the present claimants, have been informed.

I have, &c.,  
 EDWARD BROWN,  
 (For the Chief Commissioner).

C.P. 78-0,160,  
 320 acres, 28th  
 August, 1873.

## No. 20.

Mr. Commissioner Bolding to The Chief Commissioner.

Report of an inquiry held at West Maitland, on the 26th September, 1881, by H. J. Bolding, Commissioner for the Northern Coast Division, respecting the conditional purchase of Charles Smith and Honorable J. Frazer, made at Maitland on the 28th August, 1873, a mineral purchase by James Price.

C.P. No. 73-  
 0,160, section 19.

Sir,  
 I have the honor to transmit herewith, for the consideration of the Honorable the Minister for Lands, minutes of evidence taken at an inquiry under the "Lands Acts Amendment Act of 1875," held by me in pursuance of the reference notified in the Gazette of the 27th August, 1880, in the matter of the above-described conditional purchase.

The claimant having been duly served with notice of the time and place of holding the inquiry, was present thereat.

The following facts bearing upon the fulfilment by the selector of the conditions of purchase were elicited in evidence, viz.:—The selector states that improvements worth £74 in dam and fencing are on these 250 acres (applied for as 320 acres), and there are 30 tons of iron rails, &c., worth £450, and sleepers worth £45, which being upon the selection he claims as improvements to it. He now finds they will not be so allowed until used in the formation of an intended railway across his land, but as this will be a continuation of a line now constructing by tunnelling through the mountain on the south, he cannot lay down his rails until the precise point of his southern boundary which the line will reach has been determined by the further excavation to the northern slope of the mountain. He thinks there may be 150 yards of rock or thereabout yet to get through, and that it may be perhaps some months doing, and meantime he is delayed in commencing raising coal on his own land. He therefore applies for extension of time, and states it is his own interest to get the rails down as soon as possible, and this is evidently true. He also desires to have the full area of 320 acres allowed to him, the reduction of 70 acres not being now necessary for the purpose for which it was made. His railway will be worth £1,000. I have therefore to report that I find such conditions in progress, and to recommend that this conditional purchase await completion of improvements within reasonable time, and the area as applied for, viz., 320 acres, be allowed to the selector if the former difficulty has been removed.

I have, &c.,  
 H. J. BOLDING,  
 Commissioner.

*Minute on No. 20.*

By the Chief Commissioner:—Has any reduction of area to 250 acres actually taken place?—  
 A.O.M., 13/12/81.

## [Enclosure to No. 20.]

James Price, sworn, states:—I selected, on 28th August, 1873, 320 acres, county Northumberland, parish Stockington, which was reduced to 250 acres before my transfer to Smith and Frazer in May, 1880, and so far as I know the 70 acres have not been restored; but I desire to have the whole 320 acres applied for, and I make application on behalf of Smith and Frazer that the selection may be extended to the 320 acres, and if the refund has been made for the 70 acres disallowed they and I will be prepared to repay it on having information that we may do so. It is a mineral purchase, and the improvements on it are not as yet completed. There is fencing, more than a mile of two rails worth 4s. per rod or £64, now erected, and a dam worth £10 is complete. I contemplate making a railway on this land to join the Government Railway at Hexham, but it will be a continuation of J. and A. Brown's now being constructed; as the actual point of junction is not yet fixed, we are obliged to wait for this matter being determined before completing our portion, but we have on our land, and have had it there for six or seven years, 30 tons of railway rails and chain, &c., which cost £15 per ton as they now lay, and 300 ironbark sleepers worth £45. There was some fencing burnt down. When these rails, &c., are completely used, as they will be as soon as possible, the railway will be worth more than £1,000.\* Brown's railway is being made and has been so making for about six years past, and they work from the south, tunnelling, and until they reach my south boundary I cannot tell exactly where they will touch my south boundary, and therefore cannot tell where to begin my railway, which will be as a junction to or continuation of theirs, and will take it across my land from the south boundary to my north boundary and so onward to the railway at Hexham. I am expecting that they will very shortly reach my boundary, but cannot say now how near they are. I think they may have about 150 yards yet to come, and then they come out on the side of the mountain and about on the level of my south boundary. I therefore request the necessary extension of time to enable me to complete the improvements, which will be commenced at the earliest possible opportunity. I am anxious to get the work done, having ascertained that I have coal on my land which I cannot work until it has been done.

£64	
10	
Completed ..	£74
£450	
45	
Unfinished ..	£495
Will be worth,	
when finished,	£1,000.

\* Total will probably be £1,074 for 320 or 250 acres mineral purchase.

JAMES PRICE.

Taken and sworn at West Maitland, this 26th }  
 September, 1881, before me, — }  
 H. J. BOLDING, Commissioner.

## No. 21.

Mr. C. Smith to The Chief Commissioner.

Sir,

Sydney, 4 January, 1882.

Referring to a notice sent to Mr. Price from your Department, but which we regret to say has been inadvertently mislaid, respecting his mineral selection of 320 acres, made at Maitland on the 28th August, 1873, inquiring if he would be willing to take 250 acres in lieu of his original application (70 acres thereof being then unavailable), I have the honor to request that you will be good enough to cancel the said selection with a view to our forthwith making a fresh application, embracing the whole area which we understand is now available.

Your early attention to this matter will greatly oblige.

I have, &amp;c.,

C. SMITH.

(For self and JOHN FRAZER).

*Minutes on No. 21.*

By the Chief Commissioner:—It appears from the enclosed reports that an expenditure equivalent to £2 per acre of the 250 acres has been incurred in respect of the mineral conditional purchase of James Price, but the expenditure is represented by rails and sleepers for a railway not yet constructed, being designed as the continuation of a line now under construction by tunnelling through adjacent land.

I do not think such expenditure could be recognized as satisfying the requirements of the law. On the other hand it has *bona fide* been incurred, and it would hardly be equitable to claim a forfeiture on the circumstances.

The area selected was 320 acres, of which 70 acres having been found unavailable, was cancelled, and the applicant was, in July, 1879, offered the usual option of a refund upon the whole purchase. The present request, though out of date, regarded as a reply to that offer, is consistent with it, and as it affords a solution of the difficulties of the case I submit it for favourable consideration.—A.O.M., 6/1/82.

The 250-acre portion is not yet measured.

By the Secretary for Lands:—Approved.—JOHN R.

## No. 22.

The Chief Commissioner to Mr. C. Smith and the Hon. J. Frazer, M.P.

Gentlemen, Department of Lands, Conditional Sales Division, Sydney, 30 January, 1882.

Deposit paid  
£125.

I desire to inform you that the application made by James Price at Maitland on the 28th August, 1873, and transferred to you on 30th April, 1880, for the conditional purchase of 250 acres of land, is void.

2. Enclosed is a form which, on being filled up in accordance with the instructions thereon, and forwarded to the Treasury, Sydney, will enable you at once to obtain the refund of your deposit.

I have, &amp;c.,

A. O. MORIARTY,  
Chief Commissioner.

## No. 25.

Application by Mr. W. F. Longfield.

District of Maitland.

[Alienation Act, section 19.]

No. 1 of 1882.

Application by William Frederick Longfield for the conditional purchase, without competition, of 320 acres unimproved Crown Land.

Received by me, with a deposit of £160, this second day of February, 1882, at 10 o'clock,—

C. DELOHERY,

Agent for the Sale of Crown Lands at Maitland.

Sir,

2 February, 1882.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown Land hereunder described, containing 320 acres; and I herewith tender the sum of £160, being a deposit at the rate of 10s. per acre on the area for which I apply.

I am, &amp;c.,

WILLIAM FREDERICK LONGFIELD,

care of Messrs. McDonald, Smith, &amp; Co.,

29, Hunter-street, Sydney.

To the Agent for the Sale of Crown Lands at Maitland.

Description.

County of Northumberland, parish of Stockrington, 320 acres, portion 86, as per plan herunto annexed at back hereof.

## No. 26.

Notification by Mr. W. F. Longfield.

II.

[Alienation Act, section 19.]

Notification of alienation of conditional purchase by William F. Longfield, in the district of Maitland.

I HEREBY notify to you, as the Agent for the Sale of Crown Lands for the district of Maitland, that I have, in consideration of the sum of 10s., this day alienated to Charles Smith and the Honorable John Frazer, of Sydney, the 320 acres of land, situated in the county of Northumberland, parish of Stockrington, which I selected at Maitland, as a conditional purchase, under the 19th section of the Crown Lands Alienation Act of 1861, on the 2nd February, 1882.

W. F. LONGFIELD,

29, Hunter-street, Sydney.

Witness,—

H. E. STRATFORD, J.P.

Dated at Maitland, this 2nd February, 1882.

To the Agent for the Sale of Crown Lands at Maitland.

I have duly registered the above notification of alienation in the records of this office. Fee of 15s. paid, including 7s. 6d. for registration fee and stamp duty.

Land Office, East Maitland, 2nd February, 1882.

C. DELOHERY,

Agent for the Sale of Crown Lands.

Received into the office of the Registrar-General, at Sydney, this 26th day of August, A.D. 1883, at 10 o'clock in the forenoon, from Frederick Bennett, of Sydney, a copy of the above transfer verified by J. M. Bonthorne, of East Maitland, and numbered 636, Book 252.

Declaration by Mr. C. Smith.

F.

[Alienation Act, 1861.]

Declaration of conditional purchaser for mining purposes.

I, CHARLES SMITH, of Sydney, do solemnly and sincerely declare that myself and John Frazer are the lawful owners, by conditional purchase, of the land hereunder described, and that an expenditure equal to £2 (two pounds) per acre for the area of the land has been made on mining operations other than gold-mining on the land, and since the selection on 2nd February, 1882; and I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled "An Act for the more effectual abolition of Oaths and Affirmations taken and made in various Departments of the Government of New South Wales and to substitute Declarations in lieu thereof, and for the suppression of voluntary and extra-judicial Oaths and Affidavits."

Description.

County of Northumberland, parish of Stockrington, 320 acres, portion 86, being conditional mining purchase No. 1 of 1882, in the district of Maitland.

Taken and declared at Sydney, this 13th }  
day of May, 1884, before me,— }

CHARLES SMITH.

ALEXANDER DEAN, J.P.

(THIRD SESSION.)

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

**DEPARTMENT OF MINES.**

**STOCK AND BRANDS BRANCH.**

(ANNUAL REPORT FOR THE YEAR 1882.)

*Ordered by the Legislative Assembly to be printed, 26 October, 1883.*

The Under-Secretary for Mines to The Minister for Mines.

Sir,

Department of Mines, Sydney, 10 October, 1883.

I have the honor to submit herewith the Report of the Chief Inspector of Stock for the year 1882, and beg leave to invite attention to the several matters of interest contained therein, especially the return in Appendix 2, the collection and preparation of which has delayed the completion of the Report.

I have, &c.,

HARRIE WOOD,

Under-Secretary for Mines.

*REPORT of the Chief Inspector of Stock, for the year ending 31 December, 1882.*

The Chief Inspector of Stock to The Under-Secretary for Mines.

Sir,

Department of Mines, Stock Branch, Sydney, 1 May, 1883.

I have the honor to submit for your consideration my Report on the working of this Branch for the year ending 31st December last, which is, as usual, based very much upon Inspectors' estimates, the owners still showing very little inclination to furnish data.

I.—INSPECTORS AND THEIR WORK.

1. *The Inspectors.*

There are now forty Inspectors, having charge of fifty-one Sheep Districts.

2. *The Inspections made.*

The inspections made during the year were as follows:—

Of Stock	...	...	...	...	...	...	11,685
Of Reserves	...	...	...	...	...	...	1,879
Of Pounds	...	...	...	...	...	...	299
Of Pastures	...	...	...	...	...	...	3,275
Total							17,138

This would give an average of 428 inspections made by forty Inspectors. ———

3. *Horses, cattle, and sheep inspected.*

*Horses.*—The number of horses inspected during the year was 44,466, by thirty-eight Inspectors, and in the remaining districts no inspections were made.

*Cattle.*—The number of cattle inspected during the year was 556,739.

*Sheep.*—The number of sheep inspected during the year was 18,941,439. This is an excess of 4,549,024 on last year's inspection.

4. *Distance travelled by Inspectors during the year on duty.*

The total number of miles travelled by thirty-eight Inspectors was 126,838, being an average of 3,337 each per annum.

5. *Prosecutions and Convictions.*

The prosecutions instituted during the past year were as follows:—

Under Sheep Act	...	...	...	...	...	...	109
„ Lands Act, trespass on reserves	...	...	...	...	...	...	56
„ Brands Act	...	...	...	...	...	...	2
„ Pastures Act	...	...	...	...	...	...	87
Total							254

The number of convictions were:—

Under Sheep Act	...	...	...	...	...	...	98
„ Lands Act	...	...	...	...	...	...	38
„ Brands Act	...	...	...	...	...	...	2
„ Pastures	...	...	...	...	...	...	70
Total							208

## II.—HORSES.

1. *The number.*

By returns the number of horses in the Colony during the twenty-one years previous to and including 1882 was as follows :—

Year.	No.	Year.	No.
1861	251,497	1872	304,100
1862	233,220	1873	328,408
1863	273,389	1874	334,462
1864	262,554	1875	357,696
1865	284,567	1876	366,703
1866	282,587	1877	328,150
1867	278,437	1878	336,468
1868	280,201	1879	360,038
1869	280,818	1880	395,984
1870	280,304	1881	398,577
1871	337,597	1882	328,026

This shows a decrease during the year of 51,646.

2. *The different breeds.*

*Draught.*—The number returned under this head is ordinary, 65,002 ; thoroughbred, 9,774 ; total, 74,776.

*Light harness.*—The number returned as ordinary is, 79,637 ; thoroughbred, 6,200 ; total, 85,837.

*Saddle.*—The number of ordinary is given as 144,078 ; thoroughbred, 11,320 ; total, 190,048.

3. *Horses introduced.*

*From other districts.*—The number of stud horses introduced is 349, and stud mares, 187 ; ordinary mares, 740 ; and 1,705 horses.

*From other Colonies.*—The number introduced by sea was 40 stud horses, 38 stud mares, and ordinary, 50 mares, 33 horses.

The number introduced overland was 136 stud mares and 90 stud horses, and ordinary 170 mares and 140 horses.

*From England and other Countries.*—The numbers introduced under this head was 37 stud mares and 47 stud horses, and ordinary, 4 mares and 22 horses.

4. *Horses fit for sale.*

The number returned as being fit for market during the present year is 18,163 draught, 17,253 light harness, and 22,741 saddle.

Of this number it is estimated that 6,315 are really first-class animals, and specially suited for the India and China markets.

There were sent from three districts 650 horses to be shipped from Sydney, and from two districts 637 horses for Melbourne for Foreign Countries.

5. *How horses are kept.*

The number kept in paddocks is given as 269,922 ; running at large, 59,240 ; and kept both ways, 21,499.

6. *Increase and decrease.*

In sixteen districts the horses are increasing in number, but to no great extent ; the reasons given are—improved value, greater demand, and breeding for importation.

In nineteen districts the number has decreased considerably, the reasons given are—drought, starvation, ceasing to breed, sheep pay better.

In two districts horses are returned as stationary, and from three districts there are no returns.

7. *Improvement.*

In thirty-five districts the horses are said to be improving ; the principal reasons given are—introduction of superior stud horses, breeding from choice mares, and more attention to the rules of breeding, and better prices obtainable. In three districts breeding of horses is, so far as regards improvement, reported as stationary, and no returns from two districts.

8. *Diseases.*

In thirty districts the horses are reported to be free from any disease ; and in ten districts there were slight cases of strangles.

9. *Losses.*

The losses from drought, starvation, wire in chaff, and other accidents as reported, amount to 11,522.

10. *Wild Horses.*

The number of wild horses in the Colony is estimated at 16,266, which shows a decrease on the previous year of 7,126.

11. *Other information.*

In some districts it is suggested all horses should be kept in paddocks, and wild and inferior ones destroyed.

## III.—CATTLE.

## 1. Number.

The returns of cattle in the Colony during the twenty-one years ending 31st December, 1881, stand as follows :—

Year.	No.	Year.	No.
1861	2,271,923	1872	2,287,660
1862	2,620,383	1873	2,794,327
1863	2,032,522	1874	2,856,699
1864	1,924,119	1875	3,134,086
1865	1,961,905	1876	3,131,013
1866	1,771,809	1877	2,746,385
1867	1,728,427	1878	2,771,583
1868	1,761,411	1879	2,914,210
1869	1,795,904	1880	2,580,040
1870	2,195,096	1881	2,597,348
1871	2,014,888	1882	1,859,985

This shows a decrease during the year of 416,452.

## 2. Different breeds.

*Shorthorns*.—The number of pure bred and stud Shorthorns is estimated at 48,704, and ordinary 940,149; total, 988,853.

*Herefords*.—Pure and stud 18,717, and ordinary 146,355; total, 165,072.

*Devon*.—Pure and stud 5,217, and ordinary 17,075; total, 22,292.

*Black Polled*.—Pure and stud 29, ordinary 100; total, 129.

*Ayrshire*.—Pure and stud 189, ordinary 510; total, 699.

*Crosses*.—Well-bred, 2,819; ordinary, 896,150; total, 898,969. The Crosses are estimated as follows :—Shorthorn and Hereford, 445,911; Shorthorn and Devon, 109,139; Hereford and Devon, 50,405; Shorthorn and Black Polled, 180; the balance, 293,334, being unrecognizable.

## 3. Stock introduced.

*From other districts*.—Stud bulls, 227; stud cows, 779; total, 1,056. Store cattle, 6,670; fat stock, 6,874; total, 13,544.

*From other Colonies by sea*.—Stud bulls, 13; stud cows, 15; total, 28.

*Overland*.—Stud bulls, 56; stud cows, 65; total, 121. Ordinary bulls, 219; ordinary cows, 232; total, 451.

*From England and other Countries*.—Stud bulls, 7; stud cows, 1; total, 8.

## 4. Increase and decrease.

In three districts the cattle are reported to be increasing slightly—in one district 10 per cent., and one district 40 per cent. In four districts they are said to be stationary, and in the other thirty-one districts they are decreasing as follows :—In eight districts slightly; in seven districts, very much; in six districts, considerably; in one district, to a great extent; one district, 50 per cent.; one district, 33 per cent.; one district, 30 per cent.; one district, 20 per cent.; one district, 15 per cent.; one district, 10 per cent.; and three districts, 5 per cent. The principal cause assigned for the large and somewhat general decrease is that owners are clearing off cattle and putting sheep on their runs. The decrease is also attributable to the drought and severity of the winter, which carried off large numbers in several districts.

## 5. The "cast" of fat and store cattle.

The estimated "cast" of fat cattle to be sent to market during the coming year is 151,850, and store cattle, 192,888. From twelve districts the fat cattle are principally sent to Melbourne; from three districts they are principally sent to Adelaide, and the remaining districts supply the markets of Sydney, Maitland, Mudgee, Bathurst, and Orange. The principal demand for store cattle comes from Victoria, and for breeding stock from Queensland and the far north, where new country is being taken up.

## 6. How kept.

The number of cattle kept wholly in paddocks is returned as 1,569,441; on open runs, 388,799; and the balance, 117,774, are depastured both ways.

## 7. Improvement and deterioration.

In twenty-three districts the cattle are said to be improving; in ten districts they are stationary; in five districts are deteriorating; and two districts not stated. The principal reasons given for the improvement are—introduction of good stud stock, care in selection, and in culling and keeping in paddocks. The reasons given for the deterioration are—inattention to breeding, owners getting rid of cattle, and substitution of sheep for cattle.

## 8. Their diseases and ailments.

In nine districts on forty runs the cattle were affected with Pleuro-pneumonia during the past year. In four districts out of eighteen runs, the outbreak was only very slight, one district severe, and in four districts out of seventeen runs, slight. In twenty-nine districts the cattle are reported as being free from Pleuro-pneumonia.

In six out of the nine infected districts, it is reported the cattle became infected by contagion from diseased travelling stock; one district by drinking from troughs after infected cattle; one district unaccountably, and one district latent in herd.

In four out of the nine affected districts, and on twenty-seven stations, inoculation was practised with satisfactory results; in one district on three stations, an effectual cure; one district on five stations disease stopped; one station beneficial; and on two stations in one district where the cattle were infected very slightly, inoculation was not practised.

The number of owners in favour of inoculation is given as, 3,512; against it, 731; undecided, 1,010; and for the balance 1,068, their opinions are not known.

The number of owners in favour of compulsory inoculation in the case of infected herds is given as 2,244; against it, 1,995; undecided, 899; and the balance, 1,077, are not known.

9. *Losses from disease.*

The number of cattle reported to have died from Cumberland disease is 240; from blackleg, 26; from tuberculosis, 5; from swelling in jaw or throat, 6,270; from ophthalmia, 65; total, 6,607. From starvation, 13,300 are reported to have died, and cancer has been very prevalent.

IV.—SHEEP.

1. *The number.*

The number of sheep in the Colony during the twenty-one years ending 31st December, 1882, stand as follows:—

Year.	No.	Year.	No.
1861	6,119,169	1872	17,873,696
1862	6,550,896	1873	18,990,595
1863	7,169,126	1874	22,797,416
1864	9,082,463	1875	25,353,924
1865	9,650,106	1876	25,269,755
1866	11,644,593	1877	21,521,662
1867	15,066,377	1878	25,479,484
1868	16,000,090	1879	30,062,910
1869	16,848,217	1880	35,398,121
1870	16,218,825	1881	36,591,946
1871	16,766,012	1882	36,114,814

*Return of sheep to Petty Sessions.*

The number of sheep in the Colony at 1st January, 1883, as returned to the several Clerks of Petty Sessions for 1882, and the increase or decrease for the year is as follows:—

Districts.	No. of Sheep, 1st January, 1882.	No. of Sheep, 1st January, 1883.	Increase.	Decrease.	Districts.	No. of Sheep, 1st January, 1882.	No. of Sheep, 1st January, 1883.	Increase.	Decrease.

## Increase and Decrease.

This shows a net decrease of 477,132. But although the lambing was very poor in some parts of the Colony, and only middling in a good many districts, the deficiency is not actually so great as this would make it appear, as over 1,600,000 sheep went from this Colony into Queensland during the year.

## Sheep in lots under 500.

The number of sheep registered under section 42 of the amended Sheep Act as belonging to owner of less than 500 was 614,871.

## 2. The different breeds.

## (1) Merino.

### 3. Sheep introduced.

From other districts.—Stud, 25,252 ; ordinary, 1,135,795 ; total, 1,161,047.

From other Colonies, by sea.—Stud, 59,110 ; ordinary, 4,046 ; total, 63,156.

Do. do. overland.—Stud, 22,654 ; ordinary, 88,258 ; total, 110,912.

From England and other countries.—Stud, 34.

### 4. Long-wooled Sheep.

Amongst the long-wooled sheep the Lincoln is said in a large majority of the districts to give the best returns in wool and in weight of mutton, the crossed-bred sheep being second.

### 5. The "cast" of fat and store sheep.

The annual "cast" of fat sheep for the ensuing season is estimated at 2,869,668 ; and store sheep 2,723,282.

### 6. How sheep are kept.

Paddocked ... ..	31,570,004
Shepherded ... ..	3,000,188
Both ways ... ..	1,544,622
<b>Total</b> ... ..	<b>36,114,814</b>

### 7. Condition of the flocks.

In thirty-one districts the sheep are said to be improving ; the principal reasons given being—careful breeding and paddocking, introduction of high-class rams, and more careful classing and culling.

In two districts they are said to be stationary, and in four districts they are deteriorating. The reasons given are—severe drought, bad season, and bad management.

### 8. The lambing.

The general average for paddocked sheep is returned by inspectors at 58½ per cent., and shepherded sheep at 50½ per cent.

With the exception of three districts the lambing was very low, the reasons given being—previous bad season, drought, and starvation.

The paddocked sheep show an increase over the shepherded sheep of 8 per cent.

9. *The clip.*

*Lambs.*—The number of lambs shorn in the grease was 3,814,788 ; the number washed, 102,300 ; total lambs shorn, 3,917,088.

*Sheep.*—The number of sheep shorn in the grease was 29,505,143 ; hot water and spout, 273,600 ; creek-washed, 1,780,984 ; and scoured, 323,900.

The average weights of the clip are estimated as follows :—

	Lambs. lbs. ozs.	Sheep. lbs. ozs.
Grease... ..	1 14½	5 0
Washed ... ..	1 4½	—
Hot water and spout ... ..	—	3 0
Creek-washed ... ..	—	2 14
Scoured ... ..	—	2 9½

## Condition of clip.

The condition of the clip is generally sound, but light in yoke, and free from grass-seeds and dust ; but in some districts the clover burr has been a great nuisance.

## Average per sheep.

The total clip in the Colony for the year 1882, according to the number of sheep, would be 29,505,143 sheep shorn in the grease, average clip 5 lbs. per sheep = 147,525,715 lbs. ; 273,600 sheep, hot water and spout, average clip, 3 lbs. per sheep = 820,800 lbs. ; 1,780,984 sheep, creek-washed, average clip, 2 lbs. 14 ozs. per sheep = 5,120,329 lbs. ; 323,900 sheep, scoured, average clip, 2 lbs. 9½ ozs. = 840,115 lbs. Lambs, 3,814,788 lambs shorn in the grease, average clip, 1 lb. 14½ ozs. per lamb = 7,271,940 lbs. ; 102,300 lambs, washed, average clip per lamb, 1 lb. 4½ ozs. = 131,391 lbs. ; total clip, 161,710,290 lbs.

## Exportation of clip.

The clip grown in the Colony of New South Wales is exported to England, America, France, and other countries, through the principal ports of the three border Colonies, in addition to our port of Sydney, and is often mistaken as the produce of the other Colonies.

The following is an estimate of the clip shipped at Sydney, and also the proportion sent across the borders and shipped by the other Colonies at Melbourne, Adelaide, and Brisbane, for the years 1881 and 1882 :—

Port of Shipment.	Greasy.	Washed.	Total.
1881.			
	lbs.	lbs.	lbs.
Sydney .....	92,330,393	5,948,846	98,279,239
Melbourne .....	49,242,876	3,172,718	52,415,594
Adelaide .....	9,233,039	594,884	9,827,923
Brisbane .....	3,077,681	198,295	3,275,976
	153,883,989	9,914,743	163,798,732
1882.			
Sydney .....	94,984,110	10,795,261	105,779,371
Melbourne .....	39,538,985	2,901,814	42,440,799
Adelaide .....	12,652,620	450,000	13,102,620
Brisbane .....	350,000	37,500	387,500
	147,525,715	14,184,575	161,710,290

## Classing the clip.

In twenty-one districts the clip is reported as being well classed, and in the other districts it is not considered so, the reasons being that owners do not think it pays, and the difficulty of obtaining competent woolsorters.

## Wool-presses.

A great number of different kinds of presses are used—those most in favour are Williams and Robinson's ; rack, screw and pinion are also used, and there is still room for improvement in the mode of pressing, especially by small owners.

## Woolpacks.

The woolpacks used are mostly Calcutta and Dundee, of various sizes, from 4 ft. 6 in. x 2 ft. 2 in. to 5 ft. 3 in., and the weight from 10 to 12 lbs.

On twenty-one stations the wool is dumped before leaving.

## Ear-marking.

In nearly all the districts the system of ear-marking sheep is now properly carried out, and nearly all the owners approve of it.

## Tattoo-marking.

This system of marking is mostly used by owners of stud sheep, but where used in the general flocks it has been found to act as good preventive to sheep-stealing.

10. *Diseases in sheep.*

No scab or catarrh has been reported during the past year.

## Foot-rot.

In eight districts the sheep have been slightly affected with foot-rot during the year, the reasons given being too much wet, rich low country, country not suitable. The remedies principally used were arsenic and blue-stone, with satisfactory results.

Fluke.

## Fluke.

In eleven districts the sheep were affected with fluke—eight slightly, and the other three to a considerable extent; the reasons were—a want of salt herbage, unsound country, dry season, and partly inherited. The remedies used were salt, tar and turps, sul. iron, and salt and sulphur, with good results.

## Worms.

In four districts the sheep were slightly affected with worms. The causes given were—bad and sour feed, too rapid growth of pasture, wet lands. The remedies used were salt, tar, and turps, with favourable results.

## V.—TRAVELLING STOCK.

1. *Trespass on reserves.*

In nineteen districts the reserves and driftways for travelling stock are reported to be frequently trespassed upon by the neighbouring squatters and selectors. In sixteen districts they are free from trespass; and from four districts there are no reports. Inspectors suggest various remedies, viz., fencing, and the adoption of more stringent measures, resumption of more land for reserves, and the appointment of caretakers, &c.

2. *Grass on reserves and driftways.*

In fourteen districts the Inspectors report that as a rule there is not sufficient grass on the reserves and driftways in their districts to enable fat stock to reach the markets in good condition; in seven districts there is only sufficient in good seasons; in three districts, generally; in twelve, as a rule there is sufficient grass; and from three districts there is no report.

3. *New roads for travelling stock.*

In nine districts new roads for travelling stock are required; in twenty-four districts they are not required; and in the remaining seven districts the Inspectors report that there are no Crown Lands available.

4. *New reserves for travelling stock.*

In eleven districts new reserves for travelling stock are required; in nineteen districts there are sufficient; and in the balance there are no more Crown Lands available.

5. *Travelling charges for stock.*

In fifteen districts travelling charges for stock have been collected on thirty-two separate occasions, the total amount collected being £1,480 7s. 9d.

6. *Laws relating to travelling.*

In thirty-eight districts the Inspectors report that the provisions of the Amended Sheep Act relating to travelling stock are working well, and have almost put an end to loafing.

7. *Sheep travelling for grass and water.*

Sheep to the number of 1,743,871 passed through sixteen districts in search of grass and water. Of this number, 146,096 were described as loafing sheep; the balance, 1,597,775, were compelled to travel on account of the drought.

## VI.—REGISTRATION OF HORSE AND CATTLE BRANDS.

1. *Brands registered.*

The number of horse and cattle brands registered up to the 31st December, 1882, is 47,984; the number of brands registered during the year 1882 were,—horse brands, 1,328; cattle brands, 1,114; equal to 1,521 applications.

2. *Brands transferred.*

The brands recorded during the year 1882 were—horse brands, 61; cattle brands, 75.

3. *Brands cancelled.*

The brands cancelled (horses and cattle) in 1882 were 15.

4. *Addresses changed.*

The number of addresses of owners changed in 1882 was 48.

5. *Compliance with the Act.*

In thirty-seven districts the provisions relating to registration and other requirements of the Act are reported as being fairly carried out; from three districts no returns were received.

6. *Benefits of the Act.*

In thirty-nine districts the Inspectors report that the Brands Act prevents “duffing,” facilitates identification, and otherwise is a great protection to stockowners.

## VII.—POUNDS.

1. *Number and Inspection.*

There are 307 pounds in the Colony, some of which have been closed for want of pound-keepers. The whole of the pounds are inspected periodically by the various Inspectors of Stock.

2. *State of yards.*

Forty-four of the pound-yards are reported to be old, some very bad and require renewing; the remainder are said to be in fair and good condition.

The supervising and keeping of the yards in good order rests with the local Benches of Magistrates.

### 3. *Keeping and depasturing pound stock.*

The provisions made for the proper sustentance of impounded stock, according to the reports received are, with few exceptions, satisfactory. As a rule poundkeepers have now paddocks for the stock.

### 4. *Management of pounds.*

The poundkeepers are reported to be performing their duties in a satisfactory manner, and the appointment of Inspectors of Stock as Inspectors of Pounds appears to have had a beneficial effect.

## VIII.—NOXIOUS ANIMALS.

### 1. *The districts in which the Pastures and Stock Protection Act is in force.*

The Act has been brought into operation in forty-eight districts out of fifty-one, and steps are being taken to compel the districts in which the Act is not in force to bring it into operation.

### 2. *Receipts and expenditure under the Act.*

The amount of assessment paid by stock-owners during the year 1881 was £15,208 11s. 11d., and the amount expended £13,715 9s. 8d. The amount of assessment raised by stock-owners in 1882 was £45,772 12s. 8d., and the amount expended was £54,397 0s. 9d.; the difference being the amount of subsidy granted by the Government to the several Boards.

### 3. *Estimated number of noxious animals.*

The returns from the Inspectors estimate the number of kangaroos as 4,832,904, wallabies 3,628,027, native dogs 30,879, and rabbits 2,500,000.

### 4. *Increase and decrease.*

With the exception of rabbits, the decrease of noxious animals during the past year has been very considerable; in twenty-seven districts the decrease is reported as considerable; in nine districts it is slight; in three districts they are reported as increasing; and from one district there is no return.

### 5. *Number destroyed.*

The number of kangaroos destroyed during the past year was 1,452,829, of wallabies 347,842, of native dogs 6,980, and rabbits 188,257.

### 6. *Steps taken for their destruction.*

In the majority of the districts, hunting with dogs, drives, shooting, and trapping, have been tried with satisfactory results. In a few districts poison has been used, and from five districts no report is given.

### 7. *Amendments suggested in the Act.*

It is very generally suggested that the Government should administer the Act; that uniform rates be levied; that special officers be appointed; that one rate be fixed for the payment of scalps; and that its provisions be such as to secure general, vigorous, and simultaneous action.

### 8. *The rabbit pest.*

It is deeply to be regretted that the area of land infested with rabbits, instead of becoming less, has largely increased during the year, principally through the inefficiency of the law.

More than one effort was made during last year to enforce the Pastures and Stock Protection Acts of 1880 and 1881, and compel owners to destroy the rabbits on their land, but without effect; for there are some portions of the amended measure of 1881 which completely neutralize the compulsory provisions under which it was intended to oblige owners to rid their land of the pest; and the general result is that the rabbits have increased and spread to an alarming extent, till they are now to be found over nearly one-third of the Colony.

While this was largely owing to the dilatoriness and want of co-operation which exist among the pastoralists as a class, it was also in a very great degree caused by the general adoption in the infested districts of the system of paying for the destruction of the rabbits by bonuses for the scalps delivered, than which nothing can be more objectionable or likely to defeat the object in view.

### 9. *Losses from tame and native dogs.*

The losses for the past year from the ravages of native dogs were 45,621 sheep, valued at £20,540; and from tame dogs, 50,128 sheep, of the value of £25,322; amongst which were some valuable stud sheep.

### 10. *The meat export trade.*

Although the seasons have been again upon the whole unfavourable to the development of an export trade in meat, and although a large number of our sheep (1,600,000) were sent from this Colony into Queensland during the year, the business has steadily progressed; and it is bound to do so to a very much larger extent with the return of ordinary favourable seasons; for not only does the meat now realize fair prices (and it will bring very much better when the trade has become a dead meat one), but in almost all the recent shipments the condition of the meat has been very good, and the trade, if ordinarily well conducted, may now be said to be carried on without risk.

## IX.—COMMONS.

### 1. *Number and extent.*

The number of commons in the Colony is 123, with an average extent of about 1,250 acres each. The number of temporary commons is 99, with an average extent of 2,000 acres each.

### 2. *Number of commoners, stock, &c.*

The average number of commoners to each common is estimated at 210, and the average number of stock kept on each common is 419.

In twelve districts the commons are reported to be used for other purposes than that of grazing commoners' stock.

## X.—GENERAL.

1. *Artificial grasses.*

In twenty-four districts artificial grasses have been sown during the year to a small extent, the most successful being lucerne and prairie.

2. *Number and division of runs.*

The number of open or unenclosed runs in the Colony is 1,288; the number enclosed is 8,802; the number partially subdivided is 4,403, and the number properly subdivided is 5,687.

3. *Miles of fencing.*

The number of miles of fencing is estimated at 920,000, at an average cost of £51 per mile, making a total cost for fencing of £46,920,000.

4. *Dams, tanks, and wells.*

The number of private dams used for stock purposes is estimated at 9,475, at an average cost of £101. Number of tanks, 15,858; average cost each, £180 5s.; and the number of private wells used for stock purposes is estimated at 2,195, at an average cost each of £307 10s.

Cost of private dams, £956,975; cost of private tanks, £2,858,404 10s.; cost of private wells, £674,962 10s.; total, £4,490,342.

5. *Noxious plants and weeds.*

In twenty-five districts the land is reported as being slightly infested with Bathurst burrs, and in ten to a large extent; in four the land is not infested, and one district is not stated.

In fifteen districts the land is slightly infested with trefoil burr, in seventeen districts to a large extent; in six districts the land is not infested, and in the remaining two districts no return is given.

In sixteen districts variegated thistle is reported to a slight extent, in sixteen to a considerable extent; six districts are reported as free from it, and two districts are not stated.

In twelve districts black thistle is reported to a slight extent; in eighteen to a great extent; nine districts are reported to be free from it, and from one district no return is given.

Other noxious weeds are reported to a slight extent from thirteen districts; to a great extent from sixteen districts; ten districts are said to be free from them, and from one district there is no return.

6. *Cost of clearing.*

The cost of clearing the commons of noxious weeds throughout the Colony is estimated at £16,718; the temporary commons, £19,816, the police paddocks, £3,913; the travelling stock reserves, £55,899; and the droving roads throughout the Colony at £64,860; making a total lump sum for clearing the lot of £161,206.

## XI.—PUBLIC TANKS AND WELLS.

The public watering places constructed by the Government in the dry country are in a fair state of repair, but extensive improvements have been recommended by Mr. Inspector Gilliat, which when completed will greatly add to the efficiency of the works.

Provision has been made for a number of new works, and the construction of them already commenced, and by the end of the coming year it is hoped that at least twenty new works will be either constructed, in the course of construction, or tendered for.

ALEX. BRUCE,  
Chief Inspector of Stock.

## APPENDIX 1.

## Annual Report of the Inspector of Public Tanks and Wells for the year 1882.

Sir,

Ivanhoe, 25 January, 1883.

I have the honor to hand you my report for the past year.

1. The officers on the field staff are three (3), one inspector and two overseers. One of the latter is stationed at Ivanhoe, in charge of the South-west Division; the other at Bourke, in charge of the North-west Division. The extension of works for the purposes of Public Water Supply has made it desirable to recommend the appointment of a third overseer for the current year, and if the sanction of Parliament is obtained it may be convenient to re-arrange the divisions for the better working of the staff.

2. The distance travelled by the Inspector of Public Tanks and Wells during the year is 5,648 miles, an average of 470 miles per month.

3. During the year, eighteen works were inspected, and reports and specifications prepared when required for alterations and repairs.

4. Sites have been selected, and the construction for twenty-two new works, recommended for the approval of the Hon. the Secretary for Mines, on the following roads:—

Wilcannia to Albert Gold-fields	...	...	...	...	10
Coonabarrabran to Gunnedah	...	...	...	...	3
Narrabri to Moree	...	...	...	...	1
Collareendibri to the Narran	...	...	...	...	1
Bangae on the Narran to Goodooga	...	...	...	...	2
Cobar Stock Tank	...	...	...	...	1
Mossgiel to Paddington...	...	...	...	...	1
Booligal to Mossgiel	...	...	...	...	1
Balranald to Ivanhoe	...	...	...	...	2

Vide Schedule C.

5. Four new works have been taken over from the Department of Public Works, and nine have been condemned, and recommendation made for the construction of new works to replace them, leaving thirty-three effective works under this Department.

6. Sixteen works have been rented, at a gross total of £645 stg., or an average of £40 6s. 3d. stg. per work, which rating the value of the various works at an average of £1,500 gives a return gross of £2 13s. 9d. per cent.

7. I am able to report that the Department of Public Works has notified its intention to adopt, in the future construction of tanks, the principle I have so constantly advocated of supplying water from troughing; and I feel the more confidence in again urgently recommending that no time should be lost in supplying the necessary machinery to all those works to which stock are still admitted. I am still of opinion that a simple double whip with iron troughing and, for the present, the puddle supply tank, which has been successfully used in the South-west Division, will prove the cheapest, as well as the simplest and most easily repaired form of machinery that can be adopted for the purpose.

Vide Schedule A

8. Difficulty has been experienced in leasing the works on some of the roads; this is perhaps traceable to one or more of the following causes:—

- (1.) From the interruption of traffic during the dry season, the result of the distance between the works, or other water being too great for stock or teams to travel;
- (2.) The neighbourhood of works to water equally or more permanent; and
- (3.) To the fact that at most of the public tanks considerable bodies of water are left immediately around the work after rain, from which stock and teams are enabled to supply themselves for some considerable time without payment.

The *first* of these difficulties this Department has endeavoured to reduce, by the recommendation of sites for new works at such distances from each other that stock can travel without inconvenience, as well as for the construction of new works in the intervals between those that are too far apart. The maximum distance between water, it is considered, should not exceed 15 miles.

The *second* cause fortunately is not of frequent occurrence; and there appears no way of dealing with it at present, except perhaps by putting the works so situated in the most effective order and affording the utmost convenience for the safe and speedy supply.

The *third* cause affects to a greater or less extent nearly all of the public tanks. I would recommend the fencing of the 200-acre special lease, at each work so affected, which should include the principal surface water in the immediate neighbourhood. The outlay required for fencing at each work, say 2½ miles, would be amply repaid in a few years by the increased rentals; and if the tenure of the lease is extended to three or five years, instead of one as at present, the difficulty of obtaining suitable tenants would cease, respectable improvements would be erected, vegetable gardens formed, and a marketable value, based on the traffic of the road, would be acquired at the respective works.

9. A matter of very considerable importance, but which does not seem to have received the consideration it deserves, is the fact that many of the principal stock routes are still unsurveyed. As a consequence, through most of the dry country, where no real topographical difficulties exist beyond perhaps a slight detour here and there, to avoid a "cane grass" swamp, the track follows a winding devious course miles farther between two points than it need be.

The expense of traversing, straightening, and erecting mile-posts on the stock routes throughout the waterless districts would not be great, while the saving of mileage upon each ton of goods and head of stock passing over them will be enormous.

The advantages of having the roads so marked before laying out the water supply are too apparent to need remark, but even the straightening of the roads between existing works will ensure an immense saving of distance on almost every stock route with which I am acquainted.

10. The outlay recommended in Schedule A, for alterations and repairs during the year 1883, may appear considerable, but I have no hesitation in submitting it for the approval of the Hon. the Secretary for Mines, since I am convinced that it will place the works in the most effective working order, and go far towards completing a permanent reform in the method of this service.

Schedule B

B.

RETURN of Public Tanks and Wells, Department of Mines, 1st January, 1883.

SOUTH-WEST DIVISION. MR. OVERSEER CASEY.

<i>Road—Deniliquin to Hay.</i>	Boonoona Tank, tank.
Pine Ridge, dam, ineffective.	Mount Manara, well, condemned.
16-miles Gums, tank.	12-mile, tank.
<i>Road—Hay to Booligal.</i>	35-mile, tank.
One-tree, tank.	48-mile, tank.
Quondong, tank.	<i>Road—Wilcannia to Hungerford.</i>
<i>Road—Booligal to Wilcannia.</i>	Capago, dam.
Jumping Sand Hill, well.	<i>Road—Balranald to Ivanhoe.</i>
Mossgiel, well, condemned.	Box Creek, tank.
Holy Box, condemned.	Youhl Plain.
Waiko or Ivanhoe, condemned.	Til Til.

NORTH-WEST DIVISION. MR. OVERSEER HANSEN.

<i>Road—Bourke to Eringonia.</i>	<i>Road—Bourke to Cobar.</i>
The Lake, tank, condemned. } Constructed by Survey	Two Water-holes, tank, full.
Native Dog, tank, condemned. } Department.	Corilla, tank, full.
<i>Road—Eringonia to Culgoa.</i>	Curraweena, tank, full.
18-mile, tank, condemned. } Constructed by Survey	Tindarie, tank, full.
Ledknappa, tank, condemned. } Department.	Nullamut, tank, full.
<i>Road—Bourke to Wanaaring, Porroo.</i>	<i>Township of Cobar.</i>
Goonery Spring, well.	Stock, tank, full.
<i>Road—Wilcannia to Hungerford, Paroo.</i>	Town, tank, full.
Peri Sand Hill, tank.	<i>Road—Cobar to Nyngan.</i>
Yentabangee, tank.	Booroomugga, tank, full.
Warramurtie, tank.	Muriel, tank, full.
Goomboolara, tank.	Hermitage, tank, full.
	<i>Road—Cobar to Louth.</i>
	Cuttygulyaroo, tank, full.
	<i>Road—Bourke to Hungerford.</i>
	Ford's Bridge, tank.

WORKS UNDER NO OVERSEER AT PRESENT.

<i>Road—Dangar Bridge to Wilby Wilby.</i>	<i>Township of Parkes.</i>
Bunghill, tank.	Bushman's Dam, dam.
<i>Road—Walgett to Bangate, Narran.</i>	<i>Township of Junee.</i>
Boro, tank.	Junee, dam.

SPRINGS.

<i>Road—Bourke to Eringonia.</i>	Coonbilly, spring, non-effective.
Lila, spring.	Yantabulla, spring, non-effective.
<i>Road—Bourke to Hungerford.</i>	<i>Road—</i>
Youngarrina, spring, non-effective.	Tambar, spring.
Warroo, spring, non-effective.	

SUMMARY.

	Effective.	Non-effective.	Total.
Tanks .....	28	4	32
Dams .....	3	1	4
Wells .....	2	4	6
Springs .....	2	4	6
Total .....	35	13	48

C.

Sites have been selected, and the construction of the following works during the year 1883 have been recommended for the approval of the Hon. the Secretary for Mines:—

<i>Road—Wilcannia to Tipsooburra, Albert Gold-field.</i>	<i>Road—Travelling Stock Reserve, near township of Cobar.</i>	
Wells .....	Tank .....	1
Water-holes enlarged, dammed, and fitted with whips and troughing .....	<i>Road—Mossgiel, via Paddington, to Cobar.</i>	
	Tank .....	1
<i>Road—Coonabarabran to Gunnedah.</i>	<i>Road—Booligal to Mossgiel.</i>	
Wells .....	Tank .....	1
<i>Road—Narrabri to Morge.</i>	<i>Road—Balranald to Ivanhoe.</i>	
Tank .....	Tanks .....	2
<i>Road—Collarendibri to the Narran.</i>

1883-4.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

DEPARTMENT OF MINES.  
(STOCK AND BRANDS BRANCH.)

REPORT OF THE CHIEF INSPECTOR OF STOCK FOR THE YEAR ENDING 31<sup>ST</sup> DECEMBER, 1883.

*Ordered by the Legislative Assembly to be printed, 3 July, 1884.*

TO THE HONORABLE JOSEPH PALMER ABBOTT, ESQ., M.P., MINISTER FOR  
MINES, &C., &C., &C.

Sir,

I have the honor to submit herewith the Report of the Chief Inspector of Stock for the year 1883, and to invite attention to the Appendix 2 which has been prepared in accordance with your directions, and contains a large amount of useful details not published in previous Reports.

From the information contained in the Report it appears that the effect of the recent drought had not very seriously affected the number of stock up to the end of last year.

The clip of wool for 1883 shows a very satisfactory increase.

During the year efforts were made to secure better provision for travelling stock, both as regards grass and water. The drought however seriously retarded the work of constructing tanks, &c., as well as the selection of suitable sites and the inspection of works. Nevertheless a large amount of useful work has been performed by the Inspector of Tanks and Wells during the year, as will be seen by reference to his Report and schedules as contained in Appendix 1.

The search for water along the stock routes by boring has been rendered more difficult and expensive, and in some localities has been entirely prevented, by reason of the drought.

The rabbit pest, which was dealt with under the Pastures and Stock Protection Act until the end of April, 1883, and subsequently under the Rabbit Nuisance Act, 1883, increased the work of the Branch to such an extent as to tax to the utmost the zeal of the Chief Inspector, and it was only by his untiring energy and the diligence of the officers under him that the accumulation of arrears was prevented.

I have, &c.,

HARRIE WOOD,  
Under-Secretary for Mines.

Department of Mines,  
Sydney, 30th June, 1884.

[1,365 copies—Approximate Cost of Printing (labour and material), £241 14s. 9d.]

## The Chief Inspector of Stock to The Under Secretary for Mines.

Sir, Department of Mines, Stock Branch, Sydney, 1 April, 1884.  
I have the honor to submit for your consideration my Report on the working of this Branch, for the year ending 31st December last, which is as usual based very much upon Inspectors' estimates, the owners still showing very little inclination to furnish data.

## I.—INSPECTORS AND THEIR WORK.

1. *The Inspectors.*

There are now forty Inspectors, having charge of fifty-four Sheep Districts.

2. *The inspections made.*

The inspections made during the year were as follows :—

Of Stock	...	...	...	...	...	...	...	15,326
Of Reserves	...	...	...	...	...	...	...	2,309
Of Pounds	...	...	...	...	...	...	...	282
Of Pastures	...	...	...	...	...	...	...	4,704
Total	...	...	...	...	...	...	...	22,621

This would give an average of 611 inspections made by thirty-seven Inspectors.

3. *Horses, Cattle, and Sheep inspected.*

*Horses.*—The number of horses inspected during the year was 49,291, by thirty-seven Inspectors, and in the remaining districts no inspections were made.

*Cattle.*—The number of cattle inspected during the year was 475,883.

*Sheep.*—The number of sheep inspected during the year was 19,247,757. This is an excess of 806,318 on last year's inspection.

4. *Distance travelled by Inspectors during the year on duty.*

The total number of miles travelled by thirty-seven Inspectors was 147,662, being an average of 8,990 each per annum.

5. *Prosecutions and Convictions.*

The prosecutions instituted during the past year were as follows :—

Under Sheep Act	...	...	...	...	...	...	...	142
„ Lands Act, trespass on reserves	...	...	...	...	...	...	...	...
„ Brands Act	...	...	...	...	...	...	...	2
„ Pastures Act	...	...	...	...	...	...	...	242
Total	...	...	...	...	...	...	...	386

The number of convictions were—

Under Sheep Act	...	...	...	...	...	...	...	105
„ Lands Act	...	...	...	...	...	...	...	...
„ Brands Act	...	...	...	...	...	...	...	2
„ Pastures	...	...	...	...	...	...	...	208
Total	...	...	...	...	...	...	...	315

## II.—HORSES.

1. *The number.*

By returns the number of horses in the Colony during the twenty-three years previous to and including 1883 was as follows :—

Year.	No.	Year.	No.
1861	251,497	1872	304,100
1862	233,220	1873	328,408
1863	273,389	1874	334,462
1864	262,554	1875	357,696
1865	284,567	1876	366,703
1866	282,587	1877	328,150
1867	278,437	1878	336,468
1868	280,201	1879	360,038
1869	280,818	1880	395,984
1870	280,304	1881	398,577
1871	337,597	1882	328,026
		1883	326,964

This shows a decrease during the year of 1·062.

2. *The different breeds.*

*Draught.*—The number returned under this head is—Ordinary, 66,413; thoroughbred, 10,403; total, 76,816.

*Light harness.*—The number returned as ordinary is 76,976; thoroughbred, 9,726; total, 86,702.

*Saddle.*—The number of ordinary is given as 149,005; thoroughbred, 14,441; total, 163,446.

## 3

3. *Horses introduced.*

*From other districts.*—The number of stud horses introduced is 139, and stud mares, 239; ordinary mares, 249; and horses, 550.

*From other Colonies.*—The number introduced by sea was—Stud horses, 51; stud mares, 67; and ordinary, 30 mares, 37 horses.

The number introduced overland was 175 stud mares and 292 stud horses, and ordinary 52 mares and 91 horses.

*From England and other Countries.*—The numbers introduced under this head was 33 stud mares and 32 stud horses, and ordinary, 21 mares and 35 horses.

4. *Horses fit for sale.*

The number returned as being fit for market during the present year is 7,226 draught, 9,261 light harness, and 14,721 saddle.

Of this number it is estimated that 3,847 are really first-class animals, and specially suited for the India and China markets.

There were sent from three districts 380 horses to be shipped from Sydney, and from two districts 220 horses for Melbourne for Foreign Countries.

5. *How Horses are kept.*

The number kept in paddocks is given as 174,137; running at large, 42,137; and kept both ways, 47,567.

6. *Increase and decrease.*

In sixteen districts the horses are increasing in number, but to no great extent; the reasons given are—Improved value, greater demand, and breeding for exportation.

In fourteen districts the number has decreased considerably; the reasons given are—Drought, starvation, ceasing to breed, sheep pay better.

In six districts horses are returned as stationary, and from remaining districts there are no returns.

7. *Improvement.*

In thirty-two districts the horses are said to be improving; the principal reasons given are—Introduction of superior stud horses, breeding from choice mares, and more attention to the rules of breeding, and better prices obtainable. In three districts breeding of horses is, so far as regards improvement, reported as stationary, and no returns from remaining districts.

8. *Diseases.*

In thirty districts the horses are reported to be free from any disease; and in ten districts there were slight cases of strangles.

9. *Losses*

The losses from drought, starvation, wire in chaff, and other accidents as reported, amount to 2,834.

10. *Wild Horses.*

The number of wild horses in the Colony is estimated at 15,439, which shows a decrease on the previous year of 827.

## III.—CATTLE.

1. *Number.*

The returns of cattle in the Colony during the twenty-three years ending 31st December, 1883, stand as follows:—

Year.	No.	Year.	No.
1861	2,271,923	1873	2,794,327
1862	2,620,383	1874	2,856,699
1863	2,032,522	1875	3,134,086
1864	1,924,119	1876	3,131,013
1865	1,961,905	1877	2,746,385
1866	1,771,809	1878	2,771,583
1867	1,728,427	1879	2,914,210
1868	1,761,411	1880	2,580,040
1869	1,795,904	1881	2,597,348
1870	2,195,096	1882	1,859,985
1871	2,014,888	1883	1,640,753
1872	2,287,660		

This shows a decrease during the year of 219,232.

2. *Different Brands.*

*Shorthorns.*—The number of pure-bred and stud shorthorns is estimated at 45,412 ; and ordinary, 751,148 ; total, 796,560.

*Herefords.*—Pure and stud, 16,000 ; ordinary, 134,399 ; total, 150,399.

*Devon.*—Pure and stud, 5,216 ; ordinary, 27,132 ; total, 32,348.

*Black Polled.*—Pure and stud, 65 ; ordinary, 510 ; total, 575.

*Ayrshire.*—Pure and stud, 189 ; ordinary, 1,370 ; total, 1,559.

*Crosses.*—Pure and stud, 2,804 ; ordinary, 655,098 ; total, 657,902. The crosses are estimated as follows :—Shorthorn and Hereford, 405,847 ; Shorthorn and Devon, 65,439 ; Hereford and Devon, 30,140 ; Shorthorn and black-polled, 152 ; the balance, 156,324, being unrecognizable.

*Alderneys.*—Pure and stud, 80 ; ordinary, 333 ; total, 413.

*Cross-bred Alderneys.*—197 ; Shorthorn and Hereford, 800.

3. *Stock introduced.*

*From other districts.*—Stud bulls, 15 ; stud cows, 261 ; total, 276 ; store cattle, 20,000 ; fat stock, 5,000 ; total, 25,000.

*From other Colonies by sea.*—Stud bulls, 5 ; ordinary bulls, 144 ; ordinary cows, 97 ; total, 241.

*Overland.*—Stud bulls, 6 ; ordinary bulls, 351.

*From England and other Countries.*—Stud bulls, 26 ; stud cows, 15 ; total, 41.

4. *Increase and decrease.*

In nine districts the cattle are reported to be increasing slightly—in two districts 10 per cent. In two districts they are said to be stationary, and in the other thirty districts they are decreasing as follows :—In eight districts slightly ; in three districts, very much ; in four districts, considerably ; in one district, 20 per cent. ; in another, 40 per cent. The principal cause assigned for the decrease in the remaining districts is that owners are clearing off cattle and substituting sheep on their runs. The decrease is also attributable to the drought and severity of the winter, which carried off large numbers in several districts.

5. *The "cast" of fat and store cattle.*

The estimated "cast" of fat cattle to be sent to market during the coming year is 178,140, and store cattle, 158,930. From ten districts the fat cattle are principally sent to Melbourne ; from two districts they are principally sent to Adelaide, and the remaining districts supply the markets of Sydney, Maitland, Mudgee, Bathurst, Orange, and Tamworth. The principal demand for store cattle comes from Victoria, and for breeding stock from Queensland and the far north, where new country is being taken up.

6. *How kept.*

The number of cattle kept wholly in paddocks is returned as 1,006,319 ; on open runs, 366,378 ; and the balance, 93,653, are depastured both ways.

7. *Improvement and deterioration.*

In twenty-three districts the cattle are said to be improving ; in nine districts they are stationary ; in eight districts are deteriorating. The principal reasons given for the improvement are—Introduction of good stud stock, care in selection, and in culling and keeping in paddocks. The reasons given for the deterioration are—Inattention to breeding, owners getting rid of cattle, and substitution of sheep for cattle.

8. *Their diseases and ailments.*

In fourteen districts, on sixty-five runs, the cattle were affected slightly with pleuro-pneumonia ; and in twenty-one districts the cattle are reported as being free from that disease.

In eleven of the infected districts the disease was caused by contagion, in two districts its cause could not be traced.

On eight stations out of three infected districts it is reported inoculation checked disease ; on six stations, in two districts, with satisfactory results, and on one station effectual cure.

The number of owners in favour of inoculation is given as 2,045 ; against, 464 ; undecided, 929 ; and for the balance, 681, their opinions are not known.

The number of owners in favour of compulsory inoculation in the case of infected herds is given as 2,062 ; against it, 511 ; undecided, 705 ; and the balance, 1,019, are not known.

9. *Losses from disease.*

The number of cattle reported to have died from Cumberland disease is 106 ; from blackleg, 30 ; from swelling in jaw or throat, 1,840 ; from ophthalmia, 512 ; total, 2,493. From starvation 8,009 are reported to have died, and cancer has been very prevalent.

## IV.—SHEEP.

1. *The number.*

The number of sheep in the Colony during the twenty-three years ending 31st December, 1883, stand as follows :—

Year.	No.	Year.	No.
1861	6,119,169	1873	18,990,595
1862	6,550,896	1874	22,797,416
1863	7,169,126	1875	25,353,924
1864	9,082,463	1876	25,269,755
1865	9,650,106	1877	21,521,662
1866	11,644,593	1878	25,479,484
1867	15,066,377	1879	30,062,910
1868	16,000,090	1880	35,398,121
1869	16,848,217	1881	36,591,946
1870	16,218,825	1882	36,114,814
1871	16,766,012	1883	37,915,510
1872	17,873,696		

Return

## Return of Sheep to Petty Sessions.

The number of sheep in the Colony at 1st January, 1884, as returned to the several Clerks of Petty Sessions for 1883, and the increase or decrease for the year is as follows:—

Districts.	No. of Sheep, 1st January, 1883.	No. of Sheep, 1st January, 1884.	Increase.	Decrease.	Districts.	No. of Sheep, 1st January, 1883.	No. of Sheep, 1st January, 1884.	Increase.	Decrease.
Albury	28,970	381,984	53,014		Hartley	6,971	6,123		848

## Increase and Decrease.

This shows an increase of 1,800,696. In nine districts the increase varied from 100,000 to 400,000; in twelve districts from 30,000 to 80,000; and in seventeen districts from 5,000 to 20,000. Whilst ten districts show a decrease from 100,000 to 800,000; fifteen districts from 15,000 to 50,000; and thirteen districts from 3,000 to 10,000.

The increase 1,800,696 is considerably under the ordinary increase, and is to be accounted by the severe drought in some of the western and north-western districts, and the severity of the winter in the upland districts.

## Sheep in lots under 500.

The number of sheep registered under section 42 of the amended Sheep Act as belonging to owner of less than 500 was 716,650.

## 2. The different breeds.

## (1) Merino.

## Superfine Combing.

## (3) Sheep introduced.

From other districts.—Stud, 32,201; ordinary, 733,962; total, 766,163.

From other Colonies by sea.—Stud, 5,848; ordinary, 35,026; total, 40,874.

Do do overland.—Stud, 16,369; ordinary, 55,013; total, 71,382.

From England and other countries.—Stud, 470; ordinary, 258; total, 728.

## 4. Long-woolled Sheep.

Amongst the long-woolled sheep the Lincoln is said in a large majority of the districts to give the best returns in wool and in weight of mutton, the crossed-bred sheep being second.

## 5. The "cast" of fat and store Sheep.

The annual "cast" of fat sheep for the ensuing season is estimated at 2,395,281, and store sheep, 3,820,496.

## 6. How Sheep are kept.

Paddocked ... ..	32,296,190
Shepherded ... ..	4,429,786
Both ways ... ..	1,189,534
	37,915,510

## 7. Condition of the flocks.

In thirty-three districts the sheep are said to be improving; the principal reasons given being—Careful breeding and paddocking, introduction of high-class rams, and more careful classing and culling.

In two districts they are said to be stationary, and in five districts they are deteriorating. The reasons given are—severe drought, bad season, and bad management.

## 8. The lambing.

The general average for paddocked sheep is returned by inspectors at 64 per cent., and shepherded sheep at 57 per cent.

With the exception of four districts the lambing was very low, the reasons given being—Previous bad season, drought, and starvation.

The paddocked sheep show an increase over the shepherded sheep of 7 per cent.

## 9. The clip.

*Lambs.*—The number of lambs shorn in the grease was 4,833,437; the number washed, 83,241; total lambs shorn, 4,916,678.

*Sheep.*—The number of sheep shorn in the grease was 30,075,145; hot water and spout, 317,375; creek-washed, 2,156,874; and scoured, 149,468.

The

The average weights of the clip are estimated as follows:—

	Lambs.		Sheep.	
	lbs.	ozs.	lbs.	ozs.
Grease ... ..	1	14	5	2
Washed ... ..	1	6	—	—
Hot water and spout ... ..	—	—	3	0
Creek-washed ... ..	—	—	3	0
Scoured ... ..	—	—	2	12

#### Condition of clip.

In twelve districts the clip is reported as good and sound; in three districts poor and wanting in yoke; in six districts light, but sound; and in the remaining districts fairly grown and sound.

#### Average per sheep.

The total clip in the Colony for the year 1883, according to the number of sheep, would be 30,075,145 sheep, shorn in the grease, average clip 5 lbs. 2 ozs. per sheep = 154,135,118 lbs.; 317,375 sheep, hot water and spout, average clip 3 lbs. per sheep = 952,125 lbs.; 2,156,874 sheep, creek-washed, average clip 3 lbs. per sheep = 6,470,622 lbs.; 149,468 sheep, scoured, average clip 2 lbs. 12 ozs. = 411,037 lbs. Lambs.—1,833,437 lambs, shorn in the grease, average clip 1 lb. 14 ozs. per lamb = 9,062,695 lbs.; 83,241 lambs, washed, average clip per lamb 1 lb. 6 ozs. = 114,456 lbs.; total clip, 171,146,053 lbs.

#### Exportation of clip.

The clip grown in the Colony of New South Wales is exported to England, America, France, and other countries, through the principal ports of the three border Colonies, in addition to our port of Sydney, and is often mistaken as the produce of the other Colonies.

The following is an estimate of the clip shipped at Sydney, and also the proportion sent across the borders and shipped by the other Colonies at Melbourne, Adelaide, and Brisbane, for the years 1882 and 1883:—

Port of Shipment.	1882.			1883.		
	Greasy.	Washed.	Total.	Greasy.	Washed.	Total.
	lbs.	lbs.	lbs.	lbs.	lbs.	lbs.
Sydney.....	94,984,110	10,795,261	105,779,371	110,789,090	5,223,804	116,012,894
Melbourne .....	39,538,985	2,901,814	42,440,799	39,664,312	1,018,164	40,682,476
Adelaide .....	12,652,620	450,000	13,102,620	13,899,151	.....	13,899,151
Brisbane .....	350,000	37,500	387,500	551,532	.....	551,532
	147,525,715	14,184,575	161,710,290	164,885,335	6,241,968	171,146,053

#### Classing the clip.

In nineteen districts the clip is reported as being well classed, and in the other districts it is not considered so, the reasons being that owners do not think it pays, and the difficulty of obtaining competent woolsorters.

#### Wool-presses.

A great number of different kinds of presses are used; those most in favour are Williams and Robinson's; rack, screw and pinion, are also used, and there is still room for improvement in the mode of pressing, especially by small owners.

#### Woolpacks.

The woolpacks used are mostly Calcutta and Dundee, of various sizes, from 4 ft. 6 in. × 2 ft. 2 in. to 5 ft 3 in., and the weight from 10 to 12 lbs.

On twenty-three stations the wool is dumped before leaving.

#### Ear-marking.

In nearly all the districts the system of ear-marking sheep is now properly carried out, and nearly all the owners approve of it.

#### Tattoo-marking.

This system of marking is mostly used by owners of stud sheep, but where used in the general flocks it has been found to act as good preventive to sheep-stealing.

#### 10. Diseases in Sheep.

No scab or catarrh has been reported during the past year.

#### Foot-rot.

In four districts the sheep have been slightly affected with foot-rot during the year, the reasons given being too much wet, rich low country, country not suitable. The remedies principally used were arsenic and blue-stone, with satisfactory results.

Fluke.

**Fluke.**

In eight districts the sheep were affected with fluke—six slightly, and the other two to a considerable extent; the reasons were—a want of salt herbage, unsound country, dry season, and partly inherited. The remedies used were salt, tar and turps, sul. iron, and salt and sulphur, with good results.

**Worms.**

In four districts the sheep were slightly affected with worms. The causes given were—Bad and sour feed, too rapid growth of pasture, wet lands. The remedies used were salt, tar, and turps, with favourable results.

**V.—TRAVELLING STOCK.****1. *Trespass on the Reserves.***

In twenty-nine districts the reserves and driftways for travelling stock are reported to be frequently trespassed upon by the neighbouring squatters and selectors. In seven districts they are free from trespass; and from four districts there are no reports. Inspectors suggest various remedies, viz., fencing in the Reserves, and the adoption of more stringent measures, resumption of more land for reserves, and the appointment of caretakers, &c.

**2. *Grass on reserves and driftways.***

In eighteen districts the Inspectors report that as a rule there is not sufficient grass on the reserves and driftways in their districts to enable fat stock to reach the markets in good condition; in nine districts there is only sufficient in good seasons; in one district, generally; in eight, as a rule, there is sufficient grass; and from four districts there is no report.

**3. *New roads for travelling Stock.***

In nine districts new roads for travelling stock are required; in twenty-four districts they are not required; and in the remaining seven districts the Inspectors report that there are no Crown Lands available.

**4. *New reserves for travelling Stock.***

In ten districts new reserves for travelling stock are required; in twenty-five districts there are sufficient; and in the balance there are no more Crown Lands available.

**5. *Travelling charges for Stock.***

In eleven districts travelling charges for stock have been collected on eighteen separate occasions the total amount collected being £951 4s. 8d.

**6. *Laws relating to travelling.***

In thirty-seven districts the Inspectors report that the provisions of the Amended Sheep Act relating to travelling stock are working well, and have almost put an end to loafing.

**7. *Sheep travelling for grass and water.***

Sheep to the number of 2,169,770 passed through twenty-one districts in search of grass and water. Of this number, 157,000 were described as loafing sheep; the balance, 2,012,770, were compelled to travel on account of the drought.

**VI.—REGISTRATION OF HORSE AND CATTLE BRANDS.****1. *Brands registered.***

The number of horse and cattle brands registered up to 31st December, 1883, is 49,485. The number of brands registered during the year 1883 were:—Horse brands (alone), 376; cattle brands (alone), 292; and horse and cattle brands, 833; making a total of 1,501 applications,—being a decrease of twenty applications on the previous year (1882).

**2. *Brands transferred.***

The brands recorded during the year 1883 as transferred were:—Horse brands, 6; cattle brands, 12; horse and cattle brands, 58; total, 76.

**3. *Brands cancelled.***

The brands cancelled (horse and cattle) in 1883 were 13.

**4. *Addresses changed.***

The number of addresses of owners changed in 1883 was 55.

**5. *Compliance with the Act.***

In thirty-seven districts the provisions relating to registration and other requirements of the Act are reported as being fairly carried out; from three districts no returns were received.

**6. *Benefits of the Act.***

In thirty-seven districts the Inspectors report that the Brands Act prevents "duffing," facilitates identification, and otherwise is a great protection to stockowners.

## VII.—POUNDS.

1. *Number and Inspection.*

There are 314 pounds in the Colony, some of which have been closed for want of poundkeepers. The whole of the pounds are inspected periodically by the various Inspectors of Stock.

2. *State of yards.*

Forty-three of the pound-yards are reported to be old, some very bad and require renewing; the remainder are said to be in fair and good condition.

The supervising and seeing that the yards are kept in good order rests with the local Benches of Magistrates.

3. *Keeping and depasturing Pound stock.*

The provisions made for the proper sustenance of impounded stock, according to the reports received, are with few exceptions satisfactory. As a rule poundkeepers have now paddocks for the stock.

4. *Management of Pounds.*

The poundkeepers are reported to be performing their duties in a satisfactory manner, and the appointment of Inspectors of Stock as Inspectors of Pounds appears to have had a beneficial effect.

## VIII.—NOXIOUS ANIMALS.

1. *The districts in which the Pastures and Stock Protection Act is in force.*

The Act has been brought into operation in forty-eight districts out of fifty-one, and steps are being taken to compel the districts in which the Act is not in force to bring it into operation.

2. *Receipts and expenditure under the Act.*

The amount of assessment paid by stock-owners during the year 1882 was £39,477 Os. 7d., and the amount expended £51,619 19s. 8d. The amount of assessment raised by stock-owners in 1883 was £32,781 14s. 2d., and the amount expended was £44,087 16s. 11d.; the difference being the amount of subsidy granted by the Government to the several Boards.

In seventeen districts full rates were paid, in four districts half rates were paid, and in seventeen districts less than half rates were paid.

3. *Estimated number of noxious animals.*

The returns from the Inspectors estimate the number of kangaroos as 3,822,266, wallabies 2,916,532, and native dogs 24,628.

4. *Increase and decrease.*

The decrease of noxious animals during the past year has been very considerable; in twenty-four districts the decrease is reported as considerable; in seven districts it is slight; in five districts they are reported as increasing; and from four districts there is no return.

5. *Number destroyed.*

The number of kangaroos destroyed during the past year was 750,846, of wallabies 330,109; and of native dogs 7,195.

6. *Steps taken for their destruction.*

In the majority of the districts, hunting with dogs, drives, shooting, and trapping, have been tried with satisfactory results. In a few districts poison has been used, and from four districts no report is given.

7. *Amendments suggested in the Act.*

It is very generally suggested that the Government should administer the Act; that uniform rates be levied; that special officers be appointed; that one rate be fixed for the payment of scalps; and that its provisions be such as to secure general, vigorous, and simultaneous action.

8. *Losses from tame and native Dogs.*

The losses for the past year from the ravages of native dogs were 64,050 sheep, valued at £26,964; and from tame dogs, 64,326 sheep, of the value of £32,724; amongst which were some valuable stud sheep.

9. *The Rabbit Nuisance Act of 1883.*

This Act came into force on the 1st May, 1883, and from the inspections made during the next few months, it was found that the runs and holdings in the south-western portion of the Colony, to the extent of nearly one-third of its entire area, were more or less infested with rabbits.

At the end of the year, although very little land had been wholly cleared (only some fifteen runs which had been infested being reported as clean), the number of rabbits had, with a very few exceptions, decreased on all the runs and holdings, and very fair progress had been made in the work of destruction—considering how recently the Act had come into operation—that during the two to three months shearing operations were going on very little rabbit work was done through the scarcity of men, and that the greater part of the infested country has been suffering severely from drought.

Now that the real state of the runs and holdings is known, and that Inspectors are better acquainted with their districts and duties, it is believed that steady progress will be made, and the Colony cleared of the pest, more especially as the Minister has decided to place Government parties on the runs of defaulting owners at their expense.

## IX.—COMMONS.

1. *Number and extent.*

The number of Commons in the Colony is 120, with an average extent of about 1,250 acres each. The number of temporary Commons is 120, with an average extent of 2,000 acres each.

2. *Number of Commoners, stock, &c.*

The average number of Commoners to each Common is estimated at 210, and the average number of stock kept on each Common is 419.

In fourteen districts the Commons are reported to be used for other purposes than that of grazing Commoners' stock.

## X.—GENERAL.

1. *Artificial Grasses.*

In twenty-four districts artificial grasses have been sown during the year to a small extent, the most successful being lucerne and prairie.

2. *Number and division of Runs.*

The number of open or unenclosed runs in the Colony is 920; the number enclosed is 7,703; the number partially subdivided is 3,707; and the number properly subdivided is 5,634.

3. *Miles of fencing.*

The number of miles of fencing is estimated at 930,000, at an average cost of £50 per mile, making a total cost for fencing of £46,500,000.

4. *Dams, tanks, and wells.*

The number of dams used for stock purposes is estimated at 8,579, at an average cost of £141. Number of tanks, 17,071; average cost each, £232; and the number of wells used for stock purposes is estimated at 2,038, at an average cost each of £194 9s.

Cost of dams, £835,838; cost of tanks, £3,960,472; cost of wells, £428,088; total, £5,224,398.

5. *Noxious plants and weeds.*

In nineteen districts the land is reported as being slightly infested with Bathurst burrs, and in eleven to a large extent; in six the land is not infested, and four districts not stated.

In twelve districts the land is slightly infested with trefoil burr, in fourteen districts to a large extent; in nine districts the land is not infested, and in the remaining five districts no return is given.

In twelve districts variegated thistle is reported to a slight extent, in thirteen to a considerable extent, nine districts are reported as free from it, and six districts are not stated.

In thirteen districts black thistle is reported to a slight extent; in fifteen to a great extent; six districts are reported to be free from it, and from six districts no return is given.

Other noxious weeds are reported to a slight extent from eight districts; to a great extent from eleven districts; eleven districts are said to be free from them, and from ten districts there is no return.

6. *Cost of Clearing.*

The cost of clearing the Commons of noxious weeds throughout the Colony is estimated at £26,375; the temporary Commons, £74,357; the police paddocks, £5,043; the travelling stock reserves, £75,599; and the droving roads throughout the Colony at £60,915; making a total lump sum for clearing the lot of £242,289.

## XI.—PUBLIC TANKS AND WELLS.

The public watering-places constructed by the Government in the dry country are in a fair state of repair, but extensive improvements have been recommended by Mr. Inspector Gilliat, which when completed will greatly add to the efficiency of the works.

Provision has been made for a number of new works, and the construction of them already commenced, and by the end of the coming year it is hoped that at least twenty new works will be either constructed, in the course of construction, or tendered for.

I have, &c.,  
ALEX. BRUCE,  
Chief Inspector of Stock.

## APPENDIX 1.

## Annual Report of the Inspector of Public Tanks and Wells for the year 1883.

Sir,

Sydney, 3 April, 1884.

I have the honor to hand you herewith my Report for the year 1883.

1. The number of officers on the field staff were the same as during the previous year, viz., one inspector and two overseers.

2. The distance travelled by the inspector during the year is 4,827 miles—an average of 402 miles per month.

3. Twenty-one works were inspected and Reports prepared, with recommendations for the repairs and alterations considered necessary in each case.

*Vide Schedule A.*

4. Reports covering recommendation for the construction of thirty-one new works on the following roads have been submitted for the consideration of the Hon. the Secretary for Mines, viz. :—

Cobar to Wilcannia ... ..	6	Whitton to Euabalong ... ..	3
Byerock to Gongolgon ... ..	1	Parkes to Condobolin ... ..	1
Paddington to Mossgiel ... ..	1	Cobar to Louth ... ..	1
Wilcannia to Thackeringa ... ..	10	Collarendebri to Angledool ... ..	1
Gongolgon to Brewarrina ... ..	1	Bangate to Goodooga ... ..	1
Balranald to Ivanhoe ... ..	2		
Urana to Corowa ... ..	2		31
Jerilderie to Tocumwall ... ..	1		

5. Owing probably to the severity of the drought throughout the north and north-west, only three new works have been transferred from the Department of Public Works, but it is understood several are approaching completion. A dam at Wallace Town, between Junee and Wagga, and another at Hurley's, between Junee and Temora, have also been transferred, making thirty-eight effective works under this Department.

6. Eighteen works have been leased at a total income of £741 sterling, an average of £41 sterling each; this, bearing in mind the severity of the drought during the past year, which has left the principal Stock routes without feed, is not unsatisfactory. Although, when the works are fitted throughout with troughing and machinery for lifting water, the special leases of 200 acres, fenced to include the surface water in the immediate neighbourhood, and the provisions of the Watering Places Bill now before Parliament have been passed, it may be safely anticipated that greater competition will be induced, and better rentals obtained for these works than has been the case hitherto.

7. Departmental arrangements have been made under which in future all repairs and alterations to the Public Watering Places will be carried out by the Department of Public Works, upon requisition from the Hon. the Secretary for Mines. Within the Department the duties of the overseers have been transferred to the local Stock Inspectors, by which means a closer supervision, it is expected, will be practicable, than was the case when only two overseers had this important duty, extending over so large an area to attend to.

8. Arrangements are also being made for testing the rates of evaporation at some of the public watering places in the different districts; this service, it is anticipated, will be in operation during the present year.

9. Three lines of test-borings have been sanctioned during this and the previous year by the Hon. the Secretary for Mines, viz. :—

From Wilcannia to Thackeringa, on the South Australian boundary, 170 miles.

From Bourke via Wanaaring, on the Paroo, to Tippoburra, near Mount Brown, in the extreme north-west of the Colony, 290 miles.

From Collarendebri, on the Barwon, via the Narran, to Barringum, on the Queensland border, about 100 miles. The most important and valuable information may be hoped for in the result of these experiments.

10. Schedule A gives a return of the roads and sites for new works recommended for 1884.

Schedule B, a return of the repairs and alterations recommended at the public watering places.

Schedule C, a return of the tanks, dams, wells, and springs.

HARRY GILLIAT,

Inspector Public Tanks and Wells.

## SCHEDULE A.

*New works proposed for the year 1884.*

I HAVE the honor to submit for the consideration of the Honorable the Secretary for Mines the annexed list of new works recommended for the year 1884.

These works will probably comprise thirty-one, viz., eleven wells and twenty tanks, and these are distributed over fourteen lines of road (it is not possible to give at present the exact number of bores that may be required on any of the roads).

1st. The road between Cobar and Wilcannia, recommended by me in 1880, has been recently surveyed and the plan of that portion from Cobar to Lake Barnato completed; that between Lake Barnato and Wilcannia has not yet been received from the Surveyor-General, but the positions of the new works are approximately given in the accompanying list, and the sites I anticipate defining before the end of the year.

The

These will include on the first portion of the road--

1st. The purchase of Messrs. Dickson and Leslie Bros. station tank between the 6 and 7 mile posts from Cobar.

2nd. A tank near the 23-mile post.

3rd. A tank between the 38 and 39 mile posts.

And for 1884 three other tanks between Lake Barnato and Wilcannia.

On the completion of the proposed railway to Cobar this road will probably carry a very heavy traffic of stock, wool, and supplies, &c. I have no hesitation in urging the attention of the Department of Public Works being called to the importance of clearing the scrub and timber a chain and a half wide from the more heavily wooded portions at an early date.

2. The road from Byerock, on the railway extension between Bourke and Nyngan, to Gongolgon, on the Bogan, connecting there with the T.S.R. to Brewarrina, on the Darling, has not yet been surveyed, but in consideration of the traffic that will take this direct route from the N.W. by Brewarrina to the railway in preference to following the Darling down to Bourke, it is submitted it should be completed without delay in order the site for the proposed tank, about half way between the two places, may be selected in time for its construction early next year.

3. The road from Mossgiel to Paddington connects with that to Cobar, and on being extended to Lake Barnato will join the new line to Wilcannia. It opens up a large area of valuable and well-stocked pastoral country in one of the least naturally watered districts; and the traffic, I venture to think, will be very considerable on the completion of the railway to Cobar.

A large tank is recommended on this line, in the Cowrowra Swamp, Reserve 817, about half way between Paddington and Mossgiel.

I would further recommend this line of road, say from Lake Barnato, via Paddington, Cowrowra Swamp, and Conoble to Mossgiel, being notified as a travelling stock reserve.

4. The road between Wilcannia, via Mount Gipps, to Thackeringa, on the South Australian boundary, is not notified as a travelling stock reserve, although a considerable traffic passes over it yearly to Adelaide. The market there, if not large, is a very good one, and will always attract the attention of our stock breeders west of the Darling.

On this road I recommend a series of borings with a view of testing the question of subterranean water supply both for public purposes and in the interests of the run holders. It is a matter of the greatest importance to this large district, with its low average rainfall.

5. The borings are recommended at an average distance of 15 miles apart.

6. The road between Gongolgon and Brewarrina, T.S.R. 9, connects with the new line between Gongolgon and the railway at Byerock. The site for the tank will be defined at the same time as that on the latter road.

7. On the road from Balranald to Ivanhoe, T.S.R. 299, two tanks are submitted for construction between Clare and Ivanhoe, the sites for which have been previously recommended.

8. The road from Urana to Corowa, T.S.R. 997, a tank and dam at Coreen or Daysdale.

9. On the road between Jerilderie and Tocumwal, T.S.R. 1,214, a tank at the Murray Hut.

10. Between Whitton (late Hulong) Railway Station, on the Murrumbidgee, via Rankin's Springs, and Euabalong, on the Lachlan, T.S.R. 1,167-2,084, three tanks are recommended on that portion of the road between Whitton and the Conaipara Creek.

11. Between Parkes and Condobolin, T.S.R. 934, the site for this tank has not yet been fixed, but will probably be on reserve 1,013, about half way between the two places. It will be inspected and reported on before the end of the year.

12. On the road from Cobar to Louth, near the 64-mile post from Cobar, and about 14 miles from Louth, a tank has been recommended; and I would further submit that the reserve of 2 square miles, marked by Mr. Surveyor Robberds at this point, be notified as a reserve for stock and water.

13. On the road between Collarindabri, on the Barwon, and Angledool, on the Narran, T.S.R. 162, usually known as the 60-mile tank, I have recommended a bore being put down for a well.

14. On the road between Bangate, on the Narran, and Goodooga, on the Bokhira, Reserve 941, in my report of the 11th November, 1882, a bore was recommended at this point, but the Department of Public Works not being informed, have recently let the construction of a tank; under these circumstances I have withdrawn my recommendation for a well and substituted a tank, but I think it important in connection with this line of road to extend the T.S.R. from Goodooga to the Culgoa, and from the Culgoa to Barrington, on the Warrego.

15. On the T.S.R. south, and without the boundaries of the township of Cobar, a tank is recommended for the use of stock and traffic.

#### SCHEDULE B.

##### *Repairs and alterations recommended.*

I BEG to hand you the annexed statement of repairs and alterations recommended as urgent, for the consideration of the Hon. the Secretary for Mines.

I have considered it desirable to urge the application of machinery for lifting water into troughing at all the works. The plan it has been decided to adopt in the construction of future works, and from which great advantages may be anticipated in economizing water, and protection of the tank.

I have to recommend that gauges indicating the depth of water may be placed in all tanks where not already erected.

With

With reference to the fencing of the special leases, immediate action is recommended to secure the leasing of many of the works. I beg leave to submit the following recommendations:—

- 1st. That the fencing should be of a substantial character and sheep proof, posts not more than 8 feet 6 inches from centre to centre. Five wire and a top-rail where timber is obtainable; seven wires, the two top ones of No. 6 gauge, where timber is not obtainable.
- 2nd. That the fencing of the lease should include as much as possible within its limits of the surface-water collecting in the neighbourhood.
- 3rd. That provision may be made for increasing the size of the special leases.
- 4th. That the Surveyor-General may be informed of the importance attached by this Department to the early survey of these leases, both at works now approved for construction by the Secretary for Mines, and at the completed works, where such survey has not yet been made.
- 5th. That the Department of Public Works may be requested to furnish the Surveyor-General with the defined position of new works as soon as convenient after the decision has been made.
- 6th. That the Surveyor-General may be requested to furnish tracings of these surveys when completed, for the information of the Commissioner and Engineer for Roads and Bridges, as well as to this Department.

STATEMENT of the Inspector of Public Tanks and Wells of repairs and alterations recommended as urgent, for the consideration of the Hon. the Secretary for Mines.

South-west Division, Deniliquin to Hay, Sixteen mile—Gum's Tank.

Fitting with machinery for raising water supply tank, troughing, repairing fencing around tank, sheep-proof fencing around special lease.

Hay to Booligal—One-tree Tank.

Fitting with machinery for lifting water, supply tank and troughing, repairing and strengthening fencing around tank, sheep-proof fencing around special lease which should include as far as possible the most lasting surface-water in the neighbourhood.

This work was neglected by the lessees, and from the silting of the connecting-pipe between the main and watering tanks stock were admitted to the former, and have cut up the embankments.

The road has been diverted from the surveyed line, and brought by a considerable detour across the embankment, at the lower end of the tank; if this can be altered without much expense it will be of advantage, preventing stock being disturbed when watering in large mobs around the work to avoid making a thoroughfare through the special lease.

Quondong Tank.

Fitting with machinery for lifting water, supply tank and troughing, repairing and strengthening fencing around tank, fencing special lease, to include as far as possible the surface water collected in the neighbourhood.

As at the previous work the road has been brought across the embankment at the lower end of the tank.

Booligal to Wilcannia—Jumping Sand Hill Well.

Adopting the present sheep-troughing for the use of cattle and sheep, one now bucket, fencing special lease.

Holy Box Well.

My report on this well, with the evidence submitted on the quality of the water, prevents me from recommending any further outlay upon it.

It has little or no use, and was in good order when I saw it in February last.

Boonoonna Tank.

In my report on this work, 26th February, 1883, I state, "As these repairs amount to a reconstruction of the tank it may appear desirable that they should be referred to the Department of Public Works to be carried out." I have not been informed what action has been taken on this report, but if not forwarded at the time I would recommend that a copy should be attached to this statement, for the information of that Department.

Twelve-mile Tank.

Fitting with new machinery for raising water, altering sheep-troughing for the use of sheep and cattle, repairing and strengthening fencing around tank, closing the old high-level drains and bringing wide shallow contour drains in at a low level, with a reduced fall; fencing special lease to include the swamp.

Thirty-five Mile Tank.

Fitting with new machinery for lifting water, altering present troughing for the use of sheep and cattle, about 2½ miles of new wide and shallow drains, enlarging silt tank, fencing special lease.

Forty-eight Mile tank.

Fitting with new machinery for lifting water, fencing special lease.

Balranald to Ivanhoe, Box Creek Tank.

Fitting with new machinery for lifting water, supply tank, altering sheep-troughing for use by both sheep and cattle; fencing special lease.

Yöuhl

## Youhl Plain Tank.

Fitting with new machinery for lifting water, supply tank, altering troughing for use by both sheep and cattle; about 2 miles of additional drains; fencing special lease.

## Til Til Tank.

Fitting with new machinery for lifting water, supply tank, altering sheep troughing, fencing special lease.

## Wilcannia to Hungerford—Copago Tank and Dam.

In my memo. on this work, 19th February, 1883, I recommended that the Department of Public Works might be made acquainted with the state of this tank with a view to constructing a new one at the same site. I am not informed what action has been taken, but if not yet dealt with I should recommend a copy being forwarded for the information of that Department.

## North-west Division—Wilcannia to Hungerford—Peri Sandhill Tank.

This work from its situation close to the numerous springs in the vicinity has never been leased and but rarely used.

The supply from the Springs is so much more reliable and permanent, I cannot recommend any further outlay on the tank. It might be included within a special lease around the springs and one or more of them opened and connected with a supply tank and 300 feet of troughing. The springs could be opened by boring or uncovering and banking up.

## Yentabangee or Nipper's Creek Tank.

Fitting with machinery for lifting water, supply tank, and troughing; strengthening and repairing fencing around tank. Fencing special lease, so as to include as much as possible of the surface water in the neighbourhood.

## Warramurtie Tank.

From its situation about half-a-mile from the Warramurtie water-hole in the Paroo Channel, this tank has not found a tenant, and has been rarely used except by a few teamsters stopping at the adjoining public-house. The water-hole is the more permanent of the two, and I recommend that any further outlay should be made there by fencing the water. Both might be included within special leases, and a tenant having control of the water might then be found.

## Goomboolara Tank.

The Commissioner and Engineer for Roads and Bridge's minute 6/10/83 states that the repairs at this tank have been ordered. I have only further to point out the importance of including the fencing of the special lease which it is considered should embrace all flood water conserved without the tank as far as possible.

## Warrego to Bourke—Ford's Bridge Tank.

Fitting with machinery for lifting water, supply tank, and troughing; substantial sheep-proof fencing around tank; fencing special lease.

## Bourke to Cobar—Two Water-holes Tank.

Same as previous work.

## Corilla Tank.

Same as previous work.

## Curraweena Tank.

Same as previous work.

## Tindarie Tank.

Same as previous work.

## Nullamut Tank.

Same as previous work.

## Cobar to Louth—Cuttygullaroo Tank.

Same as previous work.

## Cobar to Nyngan—Booroomugga Tank.

Machinery for lifting water, supply tank, and troughing; fencing special lease; gates to present fencing.

## Muriel Tank.

Machinery for lifting water, supply tank, and troughing; fencing tank; fencing special lease.

## Hermitage Tank.

Machinery for lifting water, supply tank, and troughing; fencing special lease.

## Cobar—Town and stock Tanks.

With reference to these works I have no reason for altering the recommendations in my report of the 4th December, 1882, for the construction of a stock tank at the site marked on the T.S.R. without the town and vesting these works in the hands of local trustees for the use of the stock of the inhabitants.

In my memo. 10/10/83 I have pointed out what appear to me the objections to utilising the new reservoir for the town for stock purposes; should these objections be upheld by the Hon. the Secretary for Mines, a copy of my report might be forwarded for the information of the Commissioner and Engineer for Roads and Bridges.

## Walgett to Wilby Wilby—Bunghill Tank.

Fitting with machinery for lifting water, supply tank, and troughing. I would submit for consideration the advantage to be obtained by completing the embankment around this tank, and admitting the flood water through a flume or sufficiently large inlet pipe; the embankments can then be utilized hereafter for additional storage by pumping in.

Fencing special lease to enclose as far as possible the surface water collected near the work.

Walgett

## Walgett to Bangate—Boro Tank.

Damage was done to this work by the first rain after it was completed. A side of the watering tank and a portion of the embankment fell in and buried the connecting pipe, stopping the supply. The stone flagging on the sides of the watering tank have also silted or been forced by the trampling of large stock into the bottom.

I recommend fitting this work with machinery for raising water, supply tank and troughing, closing the embankment as suggested at the previous work, and fencing the special lease.

## Lightning Ridge Tank.

Fitting with machinery for lifting water, supply tank and troughing, closing embankment and fencing special lease, so as to include the considerable body of water that collects on each side of the tank after rain.

NOTE.—The watering-places at these works will not be used when the main tank is fitted with suitable machinery, so no further outlay is recommended upon them. At the same time when they fill from flood water they may be used as additional silt tanks from which to pump into the embankment.

## SCHEDULE C.

## PUBLIC Tanks and Wells in charge Department of Mines at 1st January, 1884 :—

SOUTH-WEST.		Town Parkes.
<i>Road—Deniliquin to Hay.</i>		
Pine Ridge, dam ineffective. 16-mile Gums, tank.		Bushman's Dam.
		<i>Town Junee.</i>
<i>Road—Hay to Booligal.</i>		Junee, dam.
One-tree, tank. Quondong, tank.		Wallaceton, dam.
		<i>Road—Wilcannia to Hungerford.</i>
<i>Road—Booligal to Wilcannia.</i>		Copago, dam.
Jumping Sand Hill, well. Mossiel, well, condemned. Holy Box, condemned. Waiko or Ivanhoe, condemned. Boonoon, tank. Mount Manara, well, condemned. 12-mile tank. 35-mile tank. 48-mile tank.		<i>Road—Balranald to Ivanhoe.</i>
		Box Creek, tank. Yohl Plain. Til Til.
		<i>Road—Junee to Temora.</i>
		Hurley, dam.
NORTH-WEST.		Narrabri to Moree.
<i>Road—Bourke to Eringonia.</i>		
The Lake, tank, condemned. } Native Dog, tank, condemned. }	Constructed by Survey Department.	Galathera, tank. Boggy Creek, tank.
<i>Road—Eringonia to Culgoa.</i>		<i>Road—Bourke to Cobar.</i>
18-mile, tank, condemned. } Ledknappa, tank, condemned. }	Constructed by Survey Department.	Two Water-holes, tank. Corilla, tank. Currawcena, tank. Tindarie, tank. Nullamut, tank.
<i>Road—Bourke to Wanaaring, Paroo.</i>		<i>Township of Cobar.</i>
Goonery Spring, well, artesian.		Stock, tank. Town, tank.
<i>Road—Wilcannia to Hungerford, Paroo.</i>		<i>Road—Cobar to Nyngan.</i>
Peri Sand Hill, tank. Nipper's Creek, tank. Warramurtie, tank. Goomboolara, tank.		Booroomugga, tank. Muriel, tank. Hermitage, tank.
<i>Road—Dangar Bridge to Wilby Wilby.</i>		<i>Road—Cobar to Louth.</i>
Bunghill, tank.		Cuttygulyaroo, tank.
<i>Road—Walgett to Bangate, Narran.</i>		<i>Road—Bourke to Hungerford.</i>
Boro, tank. Lightning ridge		Ford's Bridge, tank.
SPRINGS.		Road.
<i>Road—Bourke to Eringonia.</i>		
Lila, spring.		Coonbilly, spring, non-effective. Yantabulla, spring, non-effective.
<i>Road—Bourke to Hungerford.</i>		
Youngarrina, spring, non-effective. Warroo, spring, non-effective.		Tambar, spring.

## SUMMARY.

	Effective.	Non-effective.	Total.
Tanks .....	28	4	32
Dams .....	3	1	4
Wells .....	2	4	6
Springs .....	2	4	6
Total .....	35	13	48

## APPENDIX 2.

ALPHABETICAL return of the several holdings in the Colony, together with the acreage and the number of Horses, Cattle, and Sheep thereon at 1st January, 1884, as returned to the various Clerks of Petty Sessions and Inspectors of Stock.

Name of Run or Holding.	Acreage.	Name of Owner	No. of Stock.			Petty Sessions to which Return was made.
			Horses.	Cattle.	Sheep.

1883-4.

## NEW SOUTH WALES.

Legislative Council.

# FOREST BRANCH, DEPARTMENT OF MINES.

(ANNUAL REPORT OF THE.)

*Ordered by the Council to be printed, 25 June, 1884.*

To the Honorable Joseph Palmer Abbott, Esq., M.P., Minister for Mines, &c.

Sir,

Owing to the destruction of the records, plans, &c., of the Forest Branch, in the Garden Palace, and the difficulty of finding suitable office accommodation after the fire for the officers of the Branch having seriously retarded the work of collecting and recompiling the information destroyed, I was unable to submit a report for the year 1882. The work of the two years 1882 and 1883 is therefore necessarily referred to in this report, and the details of the work are set out fully in the able memorandum of the Chief Clerk (Mr. W. F. Piper) hereto appended.

During the past two years the work of the Branch has largely increased, especially that relating to ringbarking; yet, notwithstanding the increase, not only has the current work been kept well in hand, but most of the lost records have been as far as practicable replaced. During last year 116 specimens of timbers were prepared for the Calcutta Exhibition, and eighty-seven specimens have also been prepared for and are now exhibited in this Department. These have all been labelled and arranged by the Inspector of Forests, who has prepared a list of the local and botanical names, orders, dimensions, habitats, and uses of the timbers.

The revenue of the Branch shows a very satisfactory increase, that for 1882 being £13,046 18s. 10d., and that for 1883 being £16,685 19s. 7d.; the expenditure for the two years being respectively £12,591 19s. 5d. and £15,398 15s. 11d. A considerable portion of the expenditure is however due to inspecting and reporting upon applications for permission to ringbark timber on Crown Lands. The Inspector of Forests, in his report herewith, expresses an opinion that the fees for ringbarking and for timber-cutting, and the royalty charged on timber cut, are all too low, and should be increased. This matter will probably receive due consideration when the Regulations, some of which require amendment, come to be revised.

In view of the advantages of working our timber reserves under the regulations relating to State forests, as providing better security against the destruction of young trees and the waste of matured timber, the advisability of converting as many as possible of the reserves into State forests is worthy of consideration. The extension of the period for which block licenses are granted is also a matter deserving attention, as it is thought the effect of such extension would be to prevent the culling of the most valuable timber trees, and the leaving of the less valuable matured trees to decay.

The reckless destruction of cedar has for years past been carried on to such an extent that it became necessary to adopt the most stringent measures to prevent the complete extinction of this valuable timber. The Inspector of Forests has taken the initiatory steps towards the protection of the young trees in our cedar brushes and the planting out of saplings in suitable localities.

The Inspector recommends the establishment of one or more nurseries for the purpose of propagating suitable kinds of indigenous and imported forest trees for planting in the forest reserves, and for distribution amongst landowners who will form plantations on their land. And he furnishes with his report a list of rare indigenous and foreign trees of which he thinks plantations should be formed in suitable localities.

Plantations of wattle have been formed on some of the reserves along the Great South-western Railway line, and fifty catalpa trees were planted on the railway reserve at Cootamundra. I regret to say some of the wattle plantations on the narrow reserves along the railway line have not been a success, possibly in some cases due to the drought, and in others to the unsuitability of the sites; and it is questionable whether, in view of the cost of protecting the young plants from fire, these narrow reserves are suitable for such plantations.

During the year some of the timber reserves have been improved by the lessees of runs thinning out the saplings under supervision, with a view to improve the grass and to facilitate the destruction of rabbits. The Inspector of Forests is of opinion that this work, as tending to the reforestation of our timber reserves by natural reproduction, should be carried out by the Government, but the funds at the disposal of the Department have not been sufficient for this purpose. The

The preparation of maps showing the extent of the timber reserves, the kinds of timber most abundant thereon, and the extent of land over which ringbarking has been permitted, now in course of preparation, will, when complete, afford valuable information respecting the effect of ringbarking upon the timber supply of the localities where it is carried on. The immediate effect of ringbarking appears to be an increased growth of grass, but whether such increased growth will in all cases be maintained for any long period after the destruction of the trees, or how the local rainfall will be affected thereby, are problems which time will solve. There can be little doubt that the destruction of useless trees, where they can be replaced by others of a more useful kind, or in localities where good timber is abundant, must be advantageous, but elsewhere the benefits derivable from ringbarking may be less permanent than could be desired.

In order to secure greater proficiency on the part of Forest Rangers in the performance of the duties devolving upon them, it has been decided that applicants for such appointments shall be examined; and it is hoped that by this means, and under the able direction of the Inspector of Forests, the rangers generally will in time be qualified to undertake any duties connected with forestry which may be required of them.

Instructions have been given for the preparation for publication of a work on the Forest Flora of this Colony, containing lithographs of leaves, flowers, fruit, and bark of the principal useful timber trees, also the local and botanical names, the uses, habitats, and scientific and popular descriptions of each species illustrated.

It is proposed to collect flowering specimens of trees, to form an herbarium; also seeds and seedlings of rare or useful trees for raising trees or for exchange.

During the year the following collections were made and forwarded as under:—

Thirty-three species of tree seeds to the Inspector of Forests, Melbourne.

136 species of dried flowering specimens from the Lachlan and Murrumbidgee districts, to Baron von Mueller, K.C.M.G., F.R.S., Government Botanist, Melbourne.

Sixty-seven species of seeds and seed-vessels, dried flowering specimens, and fifty-four species of timber specimens, to the Director of the Botanic Gardens, Melbourne.

On the whole a large amount of useful work has been performed by the Branch, at a moderate cost, and credit is due to the officers generally for the zeal they have displayed in the performance of their duties.

I have, &c.,

HARRIE WOOD,

Under Secretary for Mines.

Department of Mines,  
Sydney, 28 April, 1884.

## Memorandum from Chief Clerk to Under Secretary for Mines.

Sir,

Forest Conservancy Branch, Sydney, 26 April, 1884.

I have the honor to submit a memorandum for the years 1882 and 1883 upon the work performed by this Branch of the Department.

I may premise by pointing out that in consequence of the loss of map records and a large quantity of partly-completed ringbarking work, by fire in the Garden Palace, and circumstances preventing, until several months after, any addition being made to the limited office staff, it was not practicable to collect at the usual time the information required for the report for 1882.

Even before September, 1882, the office staff was scarcely adequate to carry out the large amount of work, much of it new and of a very urgent nature, but the fire added largely to the difficulties, for not only was it necessary to obtain duplicates of reports and papers, but continual reference had to be made to maps and records of the different departments.

### WORK PREVIOUS TO 1ST JANUARY, 1882.

This being the first report since the business has been worked separately from that of the Occupation of Lands Branch, some particulars of what was done towards preserving the timber supply may be of interest.

The first timber reserves were proclaimed in 1871, to protect some of the magnificent forests of brush and hardwood in the Clarence Pastoral Districts, and the flooded red-gum forests on the Murray River.

Other reserves were made from time to time in various parts of the Colony until on 31st December, 1881, they numbered 461, with an approximate area of 3,401,447 acres, 250 of these, with an area of about 1,709,289 acres, being proclaimed as exempted from operation of the ordinary timber licenses.

Up to 24th September, 1878, the exempted reserves were worked under permit licenses at a fixed fee, issued under authority of the Minister or the Executive Council, but the system was found to work very unsatisfactorily. As the timber-getters were practically unchecked, they roamed over a whole reserve, and caused much waste. On the Murray forests enormous quantities of timber were cut under colour of permits issued for specific purposes, *i.e.*, local works; some was allowed to lie unused, but by far the larger quantity was exported without any equivalent being received for its value.

In 1877 and 1878 various propositions were made for regulating the cutting of timber in forests, and the Legislative Assembly having, on the 2nd of April in the latter year, passed a resolution to the effect that regulations should be made for the management of timber reserves throughout the Colony, the existing Regulations Nos. 1 to 43 were proclaimed on 24th September following.

It is the object of the State Forest Regulations to ensure sufficient supervision to prevent the wasteful cutting of timber and the needless destruction of young trees; therefore the cutting is restricted to matured trees on a portion of a reserve at one time. Purchasers of licenses are given the exclusive right for a term of years to work the timber on defined blocks, thus enabling them to erect machinery so that timber may be cut to advantage—not merely culled; and blocks or portions of reserves are closed after the matured timber has been removed, so as to allow the young trees and saplings to grow into good timber, the possible deterioration from age of a few trees on the unworked portion of a reserve being more than compensated for by the results attained.

Royalty, where imposed, is paid upon the quantity of timber felled, thus preventing as far as practicable wasteful felling. Of course due allowance is made when measuring faulty trees. The amount of royalty it is hoped will recoup the State for the protection of young timber, thinning out, planting, &c., while so far as regards the timber-getter, the charge may be considered as some payment for the advantage of an undisturbed supply, as the land around him cannot be conditionally purchased to secure its timber, nor can other timber-getters interfere.

The Regulations have worked very well, though experience has shown certain modifications to be desirable, especially with regard to the mode of dealing with the more distant reserves, often difficult of access. It has however been decided to await the fresh legislation which is necessary for really effective control.

Forest regulations require to have both force and elasticity to meet the varying requirements of different localities.

It should be considered that when framing the existing Regulations there was not any sufficiently successful precedent to afford a safe guide, the circumstances of the Colony being so different from the more populous parts of the globe; and that, though plantations have been made in other Australian Colonies, this was the first to deal with the cutting of timber over large forest areas with a view to preventing waste and conserving the supply of indigenous timber. Happily in many of our forests natural regeneration will save the cost of making plantations, though it will be necessary to thin out the saplings to enable them to grow into good timber trees.

Although timber reserves were made in 1871, it was not until 22nd September, 1875, that special officers were appointed to supervise them, Mr. J. A. Manton being the first Forest Ranger.

With regard to the question of central or local control as applied to forests, the following remarks from the Report on New Zealand Forests, by Captain Campbell Walker (Deputy Conservator of Forests, Madras), may not be out of place:—

#### *“Local control.”*

“Experience of all countries is opposed to entrusting control of forests conservancy to local and non-professional bodies, tried in Germany, France (communal forests), several times in India, and in Victoria.

“Some central controlling agency, with adequate machinery, working upon a uniform and pre-conceived plan or system, is necessary—utilize local agencies.

“Local bodies, naturally more or less ignorant of the very rudiments of forestry, of necessity take too local and limited a view; they are subject to constant changes amongst the members, to local and political influence and bias, and to very natural inclination of members of all such bodies to make the best of things financially during their life-time without regard for the welfare of future generations.

“To forests, from their nature, the usual maxim of political economy, which leaves such undertakings to private enterprise, cannot be applied. Their vast extent, the long term that a tree takes to reach

reach maturity, and that the consequence that few persons live long enough to obtain any—and more especially the highest—returns from their expenditure, even once in the course of their lives, are proofs that the necessity that forest management should be conducted upon permanent principles, and not be left to the negligence, avarice, or caprice of individuals, and therefore point to the State as the proper administrator, bound to take care that, in supplying the wants of the present generation, there is no reckless waste—no needless forestalling of the supply of future generations.

“This is matter of experience, not in India only, but in all other countries of the world.

“Take time by the forelock before the crop of standing timber has been exhausted or deteriorated by indiscriminate felling and want of system.

“Ask France, Austria, and India what it will cost to remedy the devastations of the past.

“Control of state forests should be unalienable except by Act of Parliament.”

#### 1882-83—OFFICE.

The work connected with forest management was attached to the Occupation of Lands Branch up to March, 1882, when a separate Branch was formed; and I, who had attended to this business since October, 1876, had the honor of being appointed Chief Clerk of the new Branch, submitting papers direct to the Under Secretary for Mines.

In June, 1882, there not being room in the old Occupation Office, and additional assistance being urgently required, the office was removed to the basement of the Garden Palace, though at the time the place was scarcely fit for occupation, there being no means of heating the rooms, &c.

On 21st September, 1882, the building was burnt down, and the whole of the records, maps, and a large amount of nearly completed work (ringbarking reports, &c.) were lost.

The old Lands Office was then temporarily occupied, and business resumed without the waste of a day, every effort being made to repair the loss.

In July, 1883, the Branch was removed to the new and more convenient offices in Phillip-street, the whole Department being under one roof.

In 1882 it was directed that maps should be prepared showing the timber reserves, kinds of timber most abundant, and extent of land for which permission has been granted to ringbark, &c. This work is now in progress.

In March, 1883, Mr. H. Wilkinson was appointed to undertake the examination of the numerous plans and descriptions connected with ringbarking applications, made by the draftsmen, thus relieving the Chief Clerk of some purely professional work.

During the year 1883 the following papers were received and dispatched:—

Papers Registered.	Letters Dispatched.
10,448, exclusive of 839 timber license returns.	Manuscript letters, 3,437. Letters on printed forms, 3,270. Blank-cover communications, 1,857.

#### THE STAFF.

The staff employed, together with the date each officer entered the Department, and the salary voted for him, are shown on Schedule A.

The late Inspector of Forests, Mr. Henry Kendall, died 1st September, 1882. During part of the year he had been employed in the Lachlan pastoral district, inspecting and reporting upon applications for permission to ringbark timber, but unfortunately he was unable to withstand the hardship attending constant travelling in a dry season.

On the 1st December following, Mr. John Duff, of the Botanic Gardens, was appointed Inspector; for some time previously, by permission of the Colonial Secretary, he had been specially engaged in reporting upon the alarming spread of pine scrub in portions of the Murrumbidgee and Lachlan districts.

Up to 1st March, 1882, there were nineteen forest rangers employed; thirteen additional rangers were then appointed, the boundaries of the rangers' districts were altered, and the timber reserves reallocated, so as to secure more effectual supervision. Upon passing of the Appropriation Act for 1883, it was found expedient in the interest of the service to make fresh arrangements; accordingly, in July and August, six of the rangers were offered and accepted the position of assistant rangers, and other appointments were made, which increased the number to thirty-one forest rangers and ten assistant rangers.

Two junior rangers were also appointed, with a view to their being trained in the office before they are sent out into the field; ultimately, it is intended that they should be promoted to the position of rangers, if they show a capacity for the work.

The boundaries of the districts were again revised, the land districts being grouped together as far as practicable, and the eastern half of the Colony, which may be roughly described as the portion lying east of a line extending in a general south-westerly direction from where the Queensland boundary intersects the Macintyre River to the junction of the Wakool and Murray Rivers, divided into twenty-five districts; rangers have, however, to go beyond the boundaries of those districts when required.

During the year 1883 two rangers exchanged with officers of other departments, one assistant ranger resigned, and it was found necessary to dismiss one ranger and one assistant ranger.

#### REVENUE AND EXPENDITURE.

Appended are particulars of revenue for year 1882	...	...	Schedule B.
Do. do. do. 1883	...	...	do. C.
Expenditure for years 1882 and 1883	...	...	do. D.
Details of revenue from specified reserves for 1883	...	...	do. E.
Comparative statement of revenue and expenditure for the last seven years	...	...	do. F.
Particulars of prosecutions by forest rangers for illegally cutting timber, and penalties inflicted, 1882 and 1883	...	...	do. G.

The

The revenue shows a considerable increase, particularly from the exempted forest reserves, proving that these are becoming of greater value every year; and as other sources of supply become exhausted, either by clearing for settlement or from a somewhat wasteful use of the timber, no doubt that both the demand upon the reserves and the revenue from them will become much greater.

A large proportion of the expenditure incurred during the last two years has been on account of expense connected with ringbarking duty; indeed, in some cases nearly the whole time of the forest ranger has been taken up in inspecting country and reporting upon applications under the Act of 1881.

The prolonged drought has also tended to increase the cost and difficulty of travelling.

#### RESERVES AND TIMBER.

Appended are Schedules showing—Summary of number and area of timber reserves—Schedule H. Distribution of reserves amongst forest rangers—Schedule J. Details of area and particulars of timber upon reserves—Schedule K.

The reserves in the more settled districts have been, as a rule, regularly inspected, but some of those in the outside districts have not had so much attention paid to them as is desirable, partly in consequence of the rangers being employed on other duty, and partly in consequence of the prolonged drought.

As shown on Schedule E, a considerable and increasing quantity of timber is now being cut under forest license on the exempted reserves, royalty being paid in 1883 on nearly ten million superficial feet. The demand is extending to reserves in localities where formerly timber was plentiful on unreserved Crown Lands.

The reckless felling and waste of large quantities of cedar in some of the northern coast districts led to large seizures of that valuable timber being made in 1882; from the reports, it appears that some of this timber had been lying for upwards of fourteen years, and much of it had become rotten; many of the trees were felled so as to fall over logs already cut, often splitting and destroying both.

There are now many million feet of cedar lying felled in the different brushes and on the creeks and rivers. To encourage the early removal of this timber, it has been decided not to permit for the present the felling of cedar on the exempted forest reserves, unless on blocks already under license. With a view to protecting the small quantity of cedar now standing upon Crown Lands, a notice was issued 29th November last prohibiting the felling of cedar excepting by the holders of endorsed licenses.\*

Timber-getters, to secure a monopoly of a good belt of timber, or to prevent others getting any, often fell a much larger number of trees than they really require or can remove within a reasonable time. To check this wasteful practice the 45th Regulation was proclaimed on 13th July, 1883. Timber-getters are now required to remove their timber during the currency of the license under which it was felled; but power is given to extend the time if required, so that timber cut with a *bona fide* intention of removing it without unnecessary delay will not be interfered with.

On 11th May, 1883, a notice was inserted in the Government Gazette and the newspapers exempting the kurragong tree from the operation of licenses to cut timber; the Crown lessees were also cautioned against cutting down the trees, and were advised to lop only the lighter branches when feed is required in time of drought.

It is however to be feared that this and other trees, such as the myall and she oak, will gradually die out, as stock which now roam over the whole country eagerly eat the young seedlings.

It would probably pay well if landowners in the western districts would cultivate the kurragong in enclosures, removing the fences as soon as the shoots and smaller branches are beyond the reach of stock. It is stated that this tree thoroughly resists drought, and that judicious lopping of the branches will not injure it.

In connection with this matter, it may be thought worthy of consideration whether an experimental nursery should not be established on the dry saltbush country to raise trees under the ordinary conditions which all settlers would have to contend with in making plantations on the great western plains. By this means the most suitable kind of trees, and the best way of dealing with them in a dry hot climate, might be discovered and published for general information.

On 18th June, 1883, directions were received to prepare specimens of timber for the Calcutta Exhibition Commission. Instructions were accordingly issued to rangers in the Moama, Wagga Wagga, Grafton, Port Macquarie, and Ulladulla districts, and specimens of 116 kinds of trees were procured, prepared, and shipped by 15th September following.

During 1882 and 1883 permission has been granted to clear the scrub and undergrowth on 15 water reserves and 17 forest reserves; aggregate area, about 120,897 acres. Of these, the clearing on 2 water reserves, area 2,900 acres, and 6 forest reserves, area 32,048 acres, has been completed. These reserves are in, or closely border upon, the rabbit-infested districts. All such work is done under the constant supervision of an officer appointed by the Department; the useless scrub is cleared, and the pine saplings thinned to the distance of about 12 feet apart (15 feet on water reserves), and in one case the lower branches lopped.

The permission to scrub confers no claim to the land, and the work is done at the cost of the lessee, who hopes to be repaid by the increased growth of grass, trees being left at a distance sufficient to permit grass to grow, and the greater facility with which the clearing will enable him to deal with the rabbit pest.

#### WATTLE PLANTATIONS.

It was arranged by the Minister for Mines and the Minister for Works that Wattle Plantations should be formed in suitable places along the railway lines.

In September, 1882, the work of preparing the ground and sowing was accordingly commenced, under the supervision of Mr. Forest Ranger Meredith, who was entrusted with the duty, and plantations were made at intervals extending from Minto to near Bowring.

In the following year work was resumed, under the direction of the Inspector of Forests, on land near Cootamundra, where also a catalpa plantation was formed, and extending westerly for about 20 miles from Old Junee, part of the land prepared in 1882 was re-sown, some of the seeds or young plants having failed, probably in consequence of the very dry weather.

The plantations were also cleared of grass, where required, to prevent destruction by burning. As the wattle is so easily killed by fire, this will always be a difficult matter, and the charge a recurrent one.

#### RINGBARKING.

\* Since withdrawn upon representation made respecting the difficulty and loss of time involved in getting at the cedar, which, excepting on some of the exempted reserves, is now found growing only in almost inaccessible localities.

## RINGBARKING.

In Schedule L is shown in tabulated form particulars of the applications for permission to ringbark timber on land held under five years pastoral lease.

448 applications have been finally dealt with, out of a total of 532 received during the years 1882 and 1883, permission being granted in 342 cases, for an aggregate area of 2,653,571 acres, or about 4,146 square miles.

Reports for the Department of Lands have also been obtained upon applications to ringbark upon 534 auction and pre-leases.

Formerly all such applications were dealt with by the Occupation of Lands Branch; but about March, 1881, instructions were received to suspend action pending legislation. Applications were therefore merely received and registered until February, 1882, when a decision being arrived at between the Departments of Lands and Mines as to the mode of proceeding under the Act of 1881, it was directed that applications referring to auction and pre-emptive leases should be forwarded to the Lands Department, and those referring to five years leases (runs) to the forest rangers for report.

Although the annual leases are dealt with by the Lands Department, it was decided that reports should be obtained through the forest rangers. Schedule M shows the number of applications referred for inspection and reports made in each year.

Subsequently to the applications being forwarded for report, and in consequence of a judgment in the Supreme Court to the effect that improvements to the amount of £40 on a measured portion of 640 acres barred it from selection, it was decided not to grant permission to ringbark upon land measured into portions, and it was directed that all applications should be referred to the Department of Lands to ascertain what measurements were made.

This direction necessarily caused some delay, especially in dealing with those already forwarded for report, as the Lands Department required complete plans, and it was found that the data supplied by the applicants were often vague, and required to be supplemented before the position of the areas could be charted.

To avoid loss of time in the case of applications received after the above decision, duplicate plans are prepared, one of which is sent to the ranger to report, and the other to the Lands Department to ascertain particulars of measurements, reserves from lease and tenure, *i.e.*, whether or not the land is held under annual or auction lease; the two actions are therefore going on at the same time.

Unfortunately, while awaiting information, a very large number of partially completed cases were burnt in the destructive Garden Palace fire.

Every effort was made to obtain duplicate reports, maps, &c., as quickly as possible, but the unavoidable delay necessarily caused some inconvenience to applicants.

The work of inspecting and reporting has not been carried on without difficulty. Many of the rangers were but recently appointed, all were new to the work required of them, and the prolonged drought in the western districts made both feed and water very scarce, rendering it difficult to travel long distances.

In order to relieve the work where it was unusually heavy, rangers were sent from other districts to assist.

Certain trees, such as the kurragong, cooba, wilga, myall, she oak, &c., useful either for fodder or for shade or ornament, are never included in authorities to ringbark; nor, in view of the very large areas being operated upon on Crown and alienated lands, is it considered desirable to permit ringbarking on reserves for the preservation of timber, though in many cases all of the timber may not be of value for commercial purposes.

When inspecting for the purpose of reporting, rangers are instructed to give consideration to the quality and value of the timber, with regard to local circumstances, probable extent of ringbarking operations upon alienated lands—often the whole of the timber is destroyed—and probable requirements for future settlement, mining operations, &c.

In dealing with applications much must necessarily depend upon the judgment of the inspecting officer, and though, as may be expected, dissimilar views respecting value of the timber are sometimes held, it is thought public interests have been well conserved.

Representations having been made to the effect that for the purpose of getting rid of pine scrub in the western districts it is necessary to destroy the large trees which are continually shedding seed, it was directed in 1883 that where the scrub is increasing all white pine, excepting the very smallest, should be preserved in belts, while upon the remaining areas the whole of that timber might be ringbarked.

As showing the dense growth of the pine (*Frenela sp.*) in some localities, the following figures are given from actual measurement:—

Area.	No. of Pines.	Height in feet.
3 feet by 1½ .....	36	4 to 15
1 foot square .....	23	3 to 12
Equilateral triangle, sides 1 foot.....	3	18 to 25

The first being at the rate of 348,000 and the second over a million per acre.

There is no doubt that the present effect of ringbarking timbered country fairly clear of scrub is to increase the growth of grass enormously. In some cases comparatively sound country becomes very boggy after rain, and springs appear in places formerly dry; but reports seem to show that in some districts, unless the scrub and undergrowth are cleared, ringbarking will rather tend to increase their growth, while the cost of clearing would be considerable, estimated at 20s. per acre where the scrub is dense; but if sufficient grass grows after ringbarking, fire, as the more ready means, would probably be resorted to by the lessees.

I have, &c.,

W. F. PIPER,  
Chief Clerk.

Not under special supervision .....	.....	7	9,290½
		666	4,893,826½

\*Appointed after end of year

## SCHEDULE K.

NAME and Number and Area of Reserves, with particulars of the Timbers.

County.	Number and name of Reserve.	Area in acres.	Description of principal kinds of Timber.	Report on Timber and general remarks.
Ashburnham .....	1,035 .....	580	Lachlan pine.....	Thickly timbered with good young timber (none matured).
Do .....	1,147 .....	3,500	Lachlan pine, forest oak .....	Thickly timbered ; only a few pine trees matured ; distant about 9 miles from Parkes.
Do .....	1,373 .....	320	Ironbark, Lachlan pine.....	Heavily timbered ; generally of good quality.
Do .....	1,374 .....	290	Ironbark, pine .....	do
Do .....	1,403 .....	12,800	Pine, ironbark, stringybark.....	Fairly timbered ; pine good, ironbark and stringybark fair to medium.
Do .....	1,484 .....	6,280	Pine .....	Heavily timbered ; pine of first-class quality ; many thousands of the large trees have been cut for the mills at Forbes.
Do .....	1,730 .....	6,500	.....	Heavily timbered ; pine good, ironbark and stringybark of fair quality.
Do .....	1,731 .....	2,300	.....	do
Arrawatta.....	958—Mount Gagan	3,600	Ironbark (narrow leaf), pine.....	The good timber is very much scattered and mixed with scrub.
Do .....	1,336 .....	6,400	.....	.....
Auckland.....	337—Myrtle Creek	1,960	Ironbark, turpentine, white box, hickory, bloodwood, spotted gum, messmate, white gum, mountain ash.	Situated 7 miles from Candelo ; very thickly timbered with healthy timber in all stages of growth.
Do .....	774.....	2,000	Blackbutt, woollybutt, mountain ash, grey gum, bloodwood, forest oak, green wattle.	The matured trees average from 8 to 10 feet in circumference.
Do .....	775 .....	3,840	Blackbutt, woollybutt, stringybark, messmate, white box, blue gum, mountain ash, hickory, sassafras, wattle.	The timber is distributed over the whole area, and will average about twenty matured and twenty-two young trees per acre ; the young timber is all very healthy and straight.
Do .....	825.....	350	Blackbutt, mountain ash, stringybark, bloodwood.	Timber fairly distributed over the whole area ; situated 3 miles from Merimbula.

SCHEDULE K—continued.

County.	Number and name of Reserve.	Area in acres.	Description of principal kinds of Timber.	Report on Timber and general remarks.
Auckland.....	911—Glenbog .....	7,000	Sassafras, lightwood, stringybark, black and white ash, messmate, gum.	Including a basin at the top of Nimityballe Mountain; vegetation in basin of luxuriant growth; timber generally sound; difficult of access.
Argyle.....	151—Lake George .....	365	Gum, stringybark, apple-tree.....	Reserved for firewood; timber evenly distributed.
Baradine.....	1,272—The Robertson.....	54,200	Pine, ironbark.....	Thickly timbered with young trees in good condition; a fair number matured.
Do .....	1,657.....	17,920	.....	.....
Do .....	1,872.....	2,600	Pine, ironbark.....	There is a healthy growth of young pine and ironbark in the proportion of about fifty-five young and two matured trees to the acre.
Baradine & Leichhardt	1,430—Ceelnoy .....	351,900	Ironbark, pine.....	Thickly timbered.
Bathurst.....	84—Gubbenbun .....	3,900	Stringybark, white box.....	Thickly timbered with healthy young trees; no matured timber.
Do .....	87 .....	985	Stringybark, white box.....	No matured stringybark; about six matured and six young box trees per acre.
Do .....	91 .....	2,398	White box, apple-tree, mountain gum, stringybark.	The timber on this reserve has been damaged by fire, and is of inferior quality.
Do .....	179.....	862	Stringybark.....	About one matured tree and twenty-five saplings per acre.
Do .....	184 .....	2,820	Pine .....	.....
Benarba .....	814—Keelo .....	2,500	do.....	.....
Do .....	1,297.....	700	do bloodwood, gum .....	The timber is in patches of thick scrub; timber scarce in the locality.
Do .....	1,298 .....	1,400	do do do .....	do do do .....
Do .....	1,299.....	1,000	do do do .....	do do do .....
Beresford .....	157—Cooma.....	1,929	Box, white gum .....	For firewood.
Do .....	266—Murrumbucks .....	960	White and black pine, peppermint, white gum, messmate.	There is a large quantity of matured and young pine, the other timbers are only fit for firewood.
Do .....	287—Bulgandramine..	2,500	White gum, peppermint, messmate..	Well timbered; suitable for firewood.
Do .....	397 .....	240	Stringybark, peppermint, messmate, white gum.	For firewood.
Do .....	427—Illamatong ...	1,470	do do .....	.....
Do .....	438 .....	20½	.....	Timber suitable for fencing and firewood. Also reserved for a trigonometrical station.
Do .....	460—Dangelong .....	195	.....	Fairly timbered; timber scarce in the locality.
Do .....	498 .....	280	Peppermint, white gum .....	Fairly timbered; quality inferior.
Do .....	622 .....	1,066	White gum, peppermint, bastard box.	Timber suitable for fencing and firewood.
Do .....	653 .....	1,200	Peppermint, white gum .....	Timber suitable for fencing and firewood.
Do .....	716—Green Hills .....	1,019	White gum, peppermint.....	Fairly timbered, for firewood and fencing material.
Do .....	717—Montague .....	534	do do .....	Timber inferior, suitable for firewood.
Do .....	877.....	3,200	Cabbage gum, black sallee .....	Timber only suitable for fencing and firewood.
Beresford & Wallace	223—Bradley .....	3,160	Stringybark, blackbutt, white gum, peppermint.	Fairly timbered; quality inferior.
Bland.....	1,357 .....	1,464	Lachlan pine, white box .....	Densely timbered with young pine; requires thinning.
Do .....	1,413.....	1,294½	Pine, white box .....	Fairly timbered.
Do .....	1,460 .....	370	Pine, white and yellow box .....	Timber mostly of good quality.
Do .....	1,574 .....	512	Pine, white box .....	The pine is of good quality, box inferior.
Do .....	1,825—Wyrri .....	11,520	Pine, ironbark, white box .....	Fairly timbered; pine good, ironbark and box faulty.
Do .....	1,830A .....	3,260	Pine, red gum, forest oak, white box .....	The pine and red gum are of good quality; other timber inferior (in lieu of 1,830 revoked).
Do .....	1,831 .....	3,600	Pine, forest oak, white and yellow box.	Box timber is of superior quality; pine requires thinning.
Do .....	1,832 .....	360	Pine, forest oak, white box.....	The pine and forest oak require thinning.
Do .....	2,068 .....	837	Pine, white and yellow box .....	The best of the matured timber felled prior to the reservation of the land; the young timber is healthy and of good quality.
Do .....	2,185 .....	1,400	Pine, white box .....	The pine is of excellent quality, and fairly distributed over the whole area.
Do .....	2,190—Dinga Dinga .....	1,240	Lachlan pine, white box.....	Timber of fair quality.
Do .....	2,330 .....	1,160	do white and yellow box .....	The pine and yellow box are of good quality.
Do .....	2,538 .....	7,520	do white box, yellow box, forest oak, ironbark.	The pine requires thinning; the other timbers are of fair quality.
Do .....	2,745 .....	3,080	Lachlan pine, white box, yellow box .....	The pine is young and of good quality, but requires thinning (in lieu of 1,833 cancelled).
Do .....	2,864 .....	724	do forest oak, box.....	Pine valuable; box and oak good.
Do .....	2,873 .....	10,880	Pine .....	.....
Do and Harden .....	1,274—Burthong .....	3,260	Ironbark, stringybark .....	Lightly timbered. The best of the matured timber used before the reserve was proclaimed.
Do and Montague .....	1,855—Weddin .....	34,560	Lachlan pine, white box, yellow box, ironbark.	Thickly covered with young timber in good condition.
Bligh .....	62 .....	882	Ironbark, gum, box .....	Thickly timbered; timber scarce in the district.
Do .....	109 .....	125	Apple, white box.....	Timber of inferior quality.
Do .....	110.....	400	Ironbark, box, pine .....	Timber fair; pine requires thinning.
Do .....	111.....	700	do do .....	do do .....
Do .....	124.....	2,250	do apple, pine, box, stringybark.	The best of the matured timber has been cut.
Do .....	130.....	268½	.....	.....
Do .....	158.....	12,646	Apple, pine, ironbark, box .....	Timber of good quality.
Do .....	142.....	1,970	Red gum, stringybark .....	This contains the best stringybark timber in the district.

## SCHEDULE K—continued.

County.	Number and name of Reserve.	Area in acres.	Description of principal kinds of Timber.	Report on Timber and general remarks.
Bligh	143.....	2,150	Stringybark, red gum .....	Timber thickly distributed over the whole area, with a fair proportion of good matured timber.
Bourke	281—Berrembed ...	1,760	White box, yellow box, red gum.....	The best matured timber has been removed.
Do	303A—Ganmain ...	1,920	Red gum, white box, yellow box.....	do do do
Do	892—Coolaman A ..	35,200	Murray pine, white and yellow box, bull oak.	Pine is the only timber of commercial value on this reserve; the box and bull oak are useful for shelter.
Do	892—Coolaman B ..	755	Murray pine, white and yellow box	Lightly timbered.
Do	1,251—Ganmain 2	12,786	Murray pine, white and yellow box, and bull oak.	The best of the matured pine has been removed; but there is a splendid growth of young pines of prospective value; about 6 square miles ringbarked in error by the lessee.
Do	1,421—Malong ...	13,280	Pine .....	The box and bull oak timber has been ringbarked; there is a good growth of young pines of prospective value.
Do	1,439—Currajong..	25,555	Murray pine, white and yellow box, bull oak.	Pine requires thinning; most of the matured trees have been cut.
Do	2,652.....	62,000	Pine .....	The box timber and some pine 7 inches in diameter have been ringbarked, but there is still a large quantity of matured timber and thick growth of young pine.
Do	2,548—Clear Paddock..	10,240	do .....	This area contains pine in all stages of growth; requires thinning.
Do	2,761.....	7,400	do .....	Reserve embraces fine belts of pine, with young trees growing in intervening spaces. A fair growth.
Do	2,784.....	8,440	Ironbark, box, pine .....	
Do	2,785.....	16,000	do do .....	
Do	2,786.....	4,550	do do .....	
Do	1,654—Willandra..	11,520	Murray pine, box .....	Fairly timbered; young pine requires thinning.
Do and Cooper..	180.....	1,400	Red gum, box .....	Well timbered.
Boyd	182.....	1,280	do do .....	do
Do	1,731—Coleambally	1,566	Murray pine, box .....	Box of little commercial value; pine healthy and sound. The surrounding district is very thinly timbered.
Do	1,754—Argoon No.1	1,692½	do do .....	do do do
Do	1,755 " No.2	640	do do .....	do do do
Do	1,756 " No.3	1,052½	do do .....	do do do
Do	1,757 " No.4	538	do do .....	do do do

Do	1,783.....	640	do do .....	do do do
Do	1,785.....	693	do do .....	do do do
Do	1,884.....	937	do do .....	do do do
Do	1,905—Carrabarry	2,240	Red gum, box .....	The gum timber is of good quality.
Do	1,997—Waddi.....	1,207½	do do .....	Thickly covered with timber in all stages of growth.
Do	1,998.....	1,162½	Murray pine, box .....	Well covered with young pine; few matured trees.
Do	2,238.....	2,163½	Murray pine.....	Well timbered; few matured trees.
Do	2,258.....	1,200	Red gum .....	Fairly timbered; young trees healthy and sound.
Do	2,526.....	560	Murray pine, box .....	Matured pine, averages 12 to 15 inches through; box inferior; timber scarce in the district.
Do	2,527.....	640	do do.....	Pine of good quality; timber scarce in this part of the district.
Brisbane.....	96 .....	1,360	Stringybark, blue gum, red gum, box, forest oak.	Well timbered.
Do	95A.....	3,602½	Ironbark, pine, red gum, box.....	Timber of excellent quality.
Do	154—Wyhong .....	135	Ironbark, box, stringybark, grey gum.	The stringybark is of good quality; other timber inferior.
Do	179—Wingen .....	760	Ironbark, stringybark, box, spotted gum.	Well timbered; fair quality.
Boyd	183—Gibber Gunya	400	Ironbark, stringybark, grey gum, spotted gum, box.	Most of the matured timber is stunted; good healthy growth of saplings.
Do	216 .....	254	Box, red gum, forest oak, stringybark, yellow jacket, grey gum.	Timber fairly distributed, and of medium quality.
Do	221.....	1,800	Red gum, grey gum, box, stringybark, ironbark.	Matured timber inferior; good supply of young timber.
Buccleugh	1,064—Red Hill ...	7,680	Stringybark, red gum, white box, apple.	Stringybark and gum of good quality; other timbers inferior.
Do	2,341—Weejasper	23,040	Mountain ash, stringybark, ribbon gum, white gum, blackbutt, yellow box, apple-tree.	Timber of fair quality in all stages of growth.
Do	2,926—Cooleman..	5,500	Messmate, stringybark, ribbon gum	Timber evenly distributed, and of fair quality.
Do	3,120—Pine Mountain..	1,776	Pine.....	Pine timber scarce in the district.
Do	3,150.....	7,680	Stringybark.....	
Buckland, Parry, and Brisbane	1,266—Crawney ...	10,780	Stringybark, gum .....	Also a camping reserve.
Buller	590—Acacia Creek	700	Pine.....	In lieu of 842, cancelled.
Do	1,439.....	1,000	do .....	do do
Cadell	1,022—Backwater Creek	6,720	Flooded red gum.....	A thick growth, fair number matured of good quality; saplings require thinning.
Do	1,697—Tantonan ..	5,760	Flooded red gum, pine.....	Thickly timbered.
Do	1,698.....	1,120	Flooded red gum.....	Well timbered.
Do	1,794—Moama .....	45,749	Flooded red gum, box .....	Thickly covered with healthy timber in all stages of growth.
Do	2,420.....	1,450	Flooded red gum, box.....	Well covered with healthy timber.

## SCHEDULE K—continued.

County.	Number and name of Reserve.	Area in acres.	Description of principal kinds of Timber.	Report on Timber and general remarks.
Cadell	2,915--Thule S. Ext.	640	Flooded red gum	
Camden	38--Illawarra	580	Woollybutt, mountain ash, swamp mahogany, beech.	On sea-coast timber of inferior quality, but useful as a breakwind.
Do	57--Cordeaux	24,500	Blackbutt, turpentine, blue gum, stringybark, messmate.	Timber of fair quality.
Do	78	580	White box, messmate, peppermint, bloodwood.	Timber fairly distributed; of medium quality; also reserved for recreation.

Do	384	570	Blackbutt, messmate, white gum	Thickly timbered.
Do	390—Bungarby	1,280	Cabbage gum, peppermint, white box	Thickly timbered.
Do	411—Gecar	420	White gum, peppermint	Well timbered; fair quality.
Do	422	1,100	Cabbage gum, pine	Thickly timbered; quality inferior; suitable for firewood and fencing.
Do	428—Snowy River	4,500	Cabbage gum, pine	Fairly timbered; cabbage gum fair; pine inferior quality.
Do	457	240	Spotted gum, messmate, white gum, peppermint.	Thickly timbered; quality inferior.
Do	491	40	White gum, peppermint	Timber suitable for firewood only.
Do	727	5,100	Peppermint, gum, stringybark	Fairly timbered.
Do	728	370	Stringybark, white gum, green wattle.	Fairly timbered; for fuel.
Do	747	300	White gum, peppermint, green wattle.	Fairly timbered; also reserved for travelling stock and water.
Do	828A	750		
Do	874	2,350		Timber for firewood and fencing.
Do	905	360		Also reserved for camping.
Do and Auckland	282—Kurrimbucco	4,000	Turpentine, blackbutt, stringybark, white box, messmate, peppermint.	Very thickly timbered with trees in all stages of growth; condition good.
Do	385—Mila	1,440	Turpentine, messmate, ribbon gum, blackbutt, peppermint.	Fairly timbered.
Westmoreland	Bindo	1,920	Mountain ash, blackbutt	Thickly timbered.
Do	22—Council Chambers Flat.	15,360	do	do
Do	23—Lippy's Creek	11,520	do	do
Do	36—Ballour	1,160	Stringybark, ironbark, white box, yellow box, red gum, white gum.	do quality fair.
White	1,273—The Robertson B	5,060	Pine	Fairly timbered.
Do	1,788	2,000		
Do and Baradine	1,273—The Robertson A	151,400	Pine, ironbark	Thickly timbered; trees in all stages of growth.
Wynyard	1,705—Murragulderic	7,500	Stringybark, red gum, white box, cabbage gum.	Thickly timbered; quality good; saplings require thinning.
Do	1,871	1,280	Hardwood	
Do	1,872	640	Ironbark, stringybark	
Do	1,873A	1,280	Ironbark, stringybark	The young stringybark requires thinning.
Do	1,873B	880	Ironbark, stringybark	do do
Do	1,874A	1,920	Ironbark, stringybark, yellow box, white box, red gum.	Thickly timbered; medium quality.
Do	1,874B	1,920	Ironbark, stringybark	Fairly timbered; young stringybark requires thinning.
Do	1,918—Carrabost	22,400	Stringybark, red gum, white box, yellow box.	Well timbered; good quality.
Do	2,040—Adelong	79,867	Stringybark, apple-tree, cabbage gum, grey box, blue box, messmate.	Fairly timbered; required for mining purposes.
Do	2,097—Euadera	8,786	Stringybark, white box, apple-tree, red mountain gum.	do do
Do	3,009	2,960		
Do and Selwyn	1,961—Bago	64,000	Mountain ash, messmate, stringybark.	Thickly covered with timber in all stages of growth; quality very good.
Do	Lord Howe Island	4,000		To preserve the indigenous timber

## APPENDIX.

## Annual Progress Report for the year 1883.

The Inspector of Forests to the Under Secretary for Mines.

Sir,

Forest Conservancy Branch, Department of Mines, Sydney, 7 March, 1883.

In submitting my first annual report, I have the honor to inform you that as I have only held the office of Inspector of Forests for a period of fifteen months, and as I am unacquainted with many of the officers of this Branch and their districts, and some of the duties of my office being new to me, this report must necessarily be less interesting and the information more curtailed than may be expected on future occasions when more knowledge of the above subjects has been acquired.

This report must therefore consist chiefly of descriptions of districts visited and reports furnished by myself, with recommendations for future advancement in the work of forest management.

The Forest Departments of Victoria and South Australia have advanced, in some respects, more rapidly than that of New South Wales, especially with the propagation, distribution, and planting of suitable kinds of trees, which advancement may be attributed chiefly to their having longer had practical officers to supervise them and trained men to carry out the necessary details; also to larger sums having been devoted annually to propagating trees, planting, thinning, and pruning in Forest Reserves, and for the distribution of plants to farmers and landholders for the purpose of encouraging them to form plantations on their land. And in order to carry on the work of forest conservation systematically it will be necessary that the New South Wales Parliament should vote larger sums annually for carrying on the practical work of the Forest Branch; and as I do not consider that the Government derive anything approaching a fair or sufficient revenue from our indigenous timbers, much if not the whole cost of the field work of Forest Conservation might be defrayed by increasing the timber-cutters' license fees, the upset price of timber blocks, ringbarking fees, and the royalty on the more valuable kinds of timbers, especially on those (such as red cedar) which are becoming scarce.

In the vicinity of extensive plains, and in districts where trees are not plentiful and are required for stock, breakwinds, and climatic purposes, timber-cutting should either be entirely prohibited, or, if allowed, the license fees, royalty, &c., should be increased to the fullest extent, so as to discourage timber-cutting in such localities.

I will now describe under the different headings the work done throughout the past year, and that proposed to be proceeded with in future.

I have, &amp;c.,

JOHN DUFF.

*Inspection of Forest Reserves, &c., in 1883.*

The wattle plantations within the railway reserves on the Great Southern Line, extending from Minto to Bowring, a distance of 163 miles, were inspected and reported upon. January, 1883.

Inquiry was made into the individual claims of the cedar-cutters on the Bellinger and Nambuccra Rivers, and estimates furnished of the quantities and value of the cedar in each claimant's case, the position where lying, with recommendations for its disposal, the said cedar being then under seizure. February and March.

The Dorrigo and Orara Forest Reserves were inspected and reported upon during the same months; and in accordance with instructions received from the Honorable the Minister for Mines, reports were furnished upon the quality and uses of the American timber tree (*Catalpa speciosa*), and steps taken to get this tree introduced from Victoria.

Inquiry was made into the Forest Ranger's management of the Bellinger, Macleay, and Nambuccra Rivers Districts, and reports submitted in connection therewith; and during the same period the proposed cedar reserves on Pee Dee, Five Day, and Nulla Nulla Creeks were inspected and recommended for reservation. April and May.

Detailed instructions were issued, by the authority of the Honorable the Minister for Mines, to five Forest Rangers to collect 116 specimens of indigenous trees, with leaves and seeds of same, for the Calcutta International Exhibition Commission; and wattle-planting on the Great Southern Railway reserves was proceeded with from Binalong to Coolamon up till the beginning of November. June.

The thinning-out of surplus saplings and scrub by the pastoral lessees on the following Forest Reserves was inspected and reported upon, viz.:—The Brookong and Yamma Forest Reserves—F.R. No. 1,880, F.R. No. 1,901, and F.R. No. 1,902. The undermentioned reserves, all situated in the Murrumbidgee District, were likewise inspected, and most of them reported upon, viz.:—F.R. No. 1,879, W.R. No. 523, Gillenbah F.R., W.R. No. 420, F.R. No. 2,081, F.R. No. 2,049, F.R. No. 2,762, W.R. No. 2,442, and G.M.R. in parish of Lockhart. July and August.

A piece of land was selected and prepared on the railway reserve at Cootamundra Station in which to plant fifty trees of *Catalpa speciosa*, presented to this Branch by the Inspector of Forests, Victoria, with the permission of the Honorable the Secretary for Agriculture, and at the request of the Honorable J. P. Abbott, Minister for Mines, the trees being planted during the month of August.

The Honorable the Minister for Mines has requested me to arrange for completing the planting of the reserve at Cootamundra with *Catalpas* during the ensuing winter, and also to select and prepare land for another plantation of *Catalpas* on a reserve at West Maitland.

116 timber specimens, collected by the Forest Rangers for the Calcutta International Exhibition Commission, were prepared by Mr. John Taylor, timber merchant, Sussex-street, Sydney, and forwarded with leaves and seeds of same per s.s. "Rosetta" to Calcutta. September.

Lists, furnishing the local and botanical names, orders, dimensions, habitats, and uses of the above timbers, were compiled and forwarded, with printed labels to be affixed to the specimens in the Exhibition, to the Secretary to the Exhibition Commission, which lists are hereto appended.

Instructions were issued to several Forest Rangers in the Coast Districts to collect cedar seeds, and to report as to the quantity of seedling cedar plants to be found in their respective districts; and also to submit estimates of the cost of preparing seed-beds for sowing the cedar seeds, the object being to procure an abundant supply of plants for planting in the forest reserves adapted to their growth.

October. The wattle plantations on the Great Southern Railway Line were inspected and reported upon, and arrangements made for the removal of grass, &c., from around the wattle plants, to prevent their being burned, four men now being employed in clearing the plantations.

November. Mr. John Taylor, timber merchant, Sydney, was authorized to prepare a collection of the duplicate timber specimens forwarded to the Calcutta International Exhibition for exhibition in this Department. Eighty-seven specimens have accordingly been sawn into quarter and half sections, planed and polished, and are now labelled and arranged on the ground floor of the Department of Mines. Appended is a list of the local and botanical names of the above specimens.

December. The Gulpa Island and Moira Forest Reserves, on the Edwards River, were inspected and reported upon; and the Moama, Moama Extended, Campbell's Island, and Thule Forest Reserves, on the Murray River, were inspected, and some of them reported upon.

Inquiry was also held into the sale of Block 49, Moama Forest Reserve, to the lessee of Cobram Run, and a report submitted in connection therewith.

#### *Forest Nurseries.*

One or more nurseries are much required in connection with the Forest Branch for the purpose of propagating suitable kinds of indigenous and imported forest trees for planting in the forest reserves, and for distributing to landholders who will guarantee forming *bona fide* plantations on their land. Such nurseries are established in connection with the Forest Departments of Victoria, South Australia, India, America, and most of the Forest Departments throughout the world.

#### *Ringbarking.*

Future permissions for ringbarking should only be granted on condition that belts of trees of from half to one mile wide be left around blocks of say 5 miles square; and if the land is only leased for pastoral pursuits, one or two clumps per acre of about a dozen trees in each, or single trees at distances of from 40 to 50 feet apart, should be left in addition.

#### *Thinning and Pruning, &c., in Forest Reserves.*

Hitherto nothing has been done by the Forest Branch in the way of thinning and pruning in the Forest Reserves; but a number of the pastoral lessees, in the Murrumbidgee District chiefly, have obtained permission from the Department to thin out several of the reserves on their runs at their own expense, their object being to facilitate the destruction of rabbits and obtain an increased supply of grass.

This work has been carried out under the supervision of the District Forest Rangers, assisted by temporary officers to constantly supervise the workmen employed, and the result is that, in addition to an increased supply of grass, the saplings left are vastly improved and stimulated in their growth by the removal of surplus saplings and scrub, which, if left, would be merely robbing the trees that should remain of the light, moisture, and nutriment necessary for their free and vigorous growth.

In order however to ensure the efficient performance of this very important work, I would prefer that it should be entirely carried out by officers and men employed by the Department, the pastoral or other lessees paying an increased rental for land thus improved, to meet part or the whole expense incurred in thinning and clearing these reserves.

#### *Forest Rangers.*

As it is desirable that Forest Rangers placed in charge of districts should be practically acquainted with the details of forest management, and with this object in view, the Honorable J. P. Abbott, Minister for Mines, has decided that all newly appointed Forest Rangers shall pass an examination previous to being appointed, and shall in the first instance be placed as Junior or Assistant Rangers, and ultimately promoted to the charge of districts if found suitable.

The Junior or Assistant Rangers stationed at the Head Office might with great advantage to themselves and the Forest Branch be also placed for one year each in the State nursery, or in Messrs. Shepherd & Co.'s nursery, which is on a more extensive scale, and receive six months' training in the out-door plant department, three months in the propagating department, and three months in the seed warehouse.

This training would enable them to become practically acquainted with the management of seeds, the nature, growth, and various modes of propagating forest trees, besides being the means of sending into the field a class of Forest Rangers superior in practical knowledge and training to most of those hitherto appointed.

The Junior Forest Rangers might also be permitted to peruse, after office hours, any practical or scientific books or periodicals on botany, arboriculture, &c., which belong to this branch of the Department.

#### *Forest flora.*

It is proposed to publish a work on the forest flora of New South Wales, furnishing lithograph drawings of leaves, flowers, fruit, and bark, botanical and local names, uses, habitats, and scientific and popular descriptions of each species illustrated.

In this work it is only proposed to illustrate and describe the principal useful timber trees of New South Wales, which would be the means of assisting Forest Rangers and others to readily and correctly identify the species. A similar work is now being published by the Government of South Australia.

I have also to recommend that a carefully and accurately compiled essay upon and list of the indigenous trees of New South Wales, compiled by Mr. Andre Nilson, of the Survey Department, Sydney,

Sydney, from the most reliable authorities on the subject, should be printed at the Government Printing Office.

In the meantime this would be an excellent and convenient book of reference, and I can ultimately add to the information contained in it when I have gained more knowledge by travelling of the Colony, and the habitats and local uses of the timbers.

*Collecting flowering specimens of trees to form an herbarium, seeds, plants, &c.*

It is intended that the Inspector of Forests, when travelling, shall collect flowering specimens of trees to form an herbarium for reference and exchange, seeds for raising plants of trees becoming scarce or desirable to cultivate in the forests, and seedling plants of useful or rare trees, any surplus specimens, seeds, or plants, being intended for exchanging with kindred institutions; and as the Inspector will require assistance with this work, it is suggested that the Junior Forest Rangers stationed at the head office should accompany him alternately for this purpose, and also with the view of imparting to them a practical knowledge of the indigenous forest trees and the field work of Forest Rangers.

*List of useful, rare, indigenous, and foreign trees desirable to form plantations of.*

A list is hereto appended of rare, indigenous, and foreign trees which it would be desirable to form plantations of in suitable localities throughout the Colony.

*Donations received.*

Fifty plants of *Catalpa speciosa*, from the Inspector of Forests, Melbourne, with the permission of July, 1833. the Honorable the Secretary for Agriculture.

Lists furnishing the botanical names of a collection of tree and scrub specimens from the Lachlan and Murrumbidgee Districts were sent to this Branch by Baron F. von Mueller, K.C.M.G., F.R.S., &c., &c., Government Botanist, Melbourne; also a copy of his "Census of Australian Plants."

A copy of the catalogue of the plants cultivated in the Melbourne Botanic Gardens was received from Wm. R. Guilfoyle, Esq., F.L.S., Director of the Melbourne Botanic Gardens.

*Seeds, dried flowering specimens, and timber specimens sent from Forest Branch, Department of Mines, Sydney.*

A collection of thirty-three species of tree seeds was sent to the Inspector of Forests, Melbourne. September 1833.

A collection of 136 species of dried flowering specimens from the Lachlan and Murrumbidgee Districts was sent to Baron F. von Mueller, K.C.M.G., F.R.S., Government Botanist, Melbourne. October, 1833.

Collections of sixty-seven species of seeds and seed-vessels, dried flowering specimens, and fifty-four species of timber specimens, each 18 inches long, were forwarded to Wm. R. Guilfoyle, Esq., F.L.S., Director, Botanic Gardens, Melbourne. January, 1834.

*List of Timber specimens arranged on ground floor of the Mining Department, Sydney.*

Acacia melanoxylon. Blackwood.	Eucalyptus sp.? Stringybark.
" sp.? Hickory.	" pilularis. Blackbutt.
" sp.? Golden green wattle.	" sp.? White box.
" sp.? Silver-leaved borce.	" sp.? Round-leaved box.
" sp.? Yarren or myall.	" melliodora. Yellow box.
" doratoxylon. Currawang.	" albens? White box.
" sp.? Umbrella bush.	" sp.? Red box.
" salicina. Cuba or native willow.	" sp.? Black ironbark.
" hakeoides. Black wattle.	" robusta. Swamp mahogany.
" sp.? Yarren.	" microcorys. Tallowwood.
" sp.?"	" saligna. Grey gum.
" sp.? Black myall.	Eugenia ventenatii. Large-leaved water gum.
" sp.? Myall.	" myrtifolia. Brush cherry.
Avicennia officinalis. Mangrove.	Exocarpus cupressiformis. Native cherry.
Angophora intermedia. Apple-tree.	Frenela endlicherii. Red or black pine.
Banksia integrifolia. Honeysuckle.	" robusta. Common, white, or scrub pine.
Backhousia myrtifolia. Scrub myrtle.	Flindersia oxleyana. Yellowwood.
Ceratopetalum apetalum. Coachwood.	Geijera parviflora. Dogwood.
Cargillia pentamera. Black myrtle.	Gmelina leichhardtii. White beech.
Casuarina quadrivalvis. Swamp oak.	Melaleuca leucodendron. White or broad-leaved tea-tree.
" torulosa. Forest oak.	" styphelioides. Prickly-leaved tea-tree.
" equisetifolia. Bull oak.	Myrtus acmenoides. Lignum vitæ.
" suberosa, fœm. She oak.	Melia australis. White cedar.
" " mas. He oak.	Orites excelsa. Red ash.
Cedrela australis. Red cedar.	Rhus rhodanthema. Yellow cedar.
Doryphora sassafras. Sassafras tree.	Stenocarpus salignus. Beefwood.
Eucalyptus rostrata. Red gum.	Syncarpia laurifolia. Turpentine tree.
" maculata. Spotted gum.	Sloanea australis. Maiden's blush.
" resinifera. Mahogany.	Sterculia diversifolia. Kurrajong tree.
" leucoxylon. Red ironbark.	Tristania suaveolens. Beech or swamp mahogany.
" crebra. Grey ironbark.	" neriifolia. Small-leaved water gum.
" piperita. Redwood or peppermint.	" conferta. Brush, bastard, or white box.
" virgata. Mountain ash.	" laurina. Broad long-leaved water gum.
" corymbosa. Bloodwood.	Tarrietia actinodendron. Black stavewood.
" longifolia. Woollybutt.	Wilga.
" obliqua. Messmate.	Total, 71 species, or 87 timber specimens, including
" sp.? Mountain gum.	duplicates.
" sp.? Stringybark.	

COLLECTION of Timbers procured for the Commission by the Forest Rangers under the Department of Mines of New South Wales, by the authority of the Minister, and prepared at the expense of the Commission to order by Messrs. John Taylor & Co., of Sussex-street, Sydney.

[No. and distinguishing Letter.]	Local Name.	Botanical Name.	Description of Trees and their Economic Uses.
25 A. (quarter section)	Red gum	<i>Eucalyptus rostrata</i> Ord.—Myrtaceæ.	Timber highly valued for strength and durability, especially for piles and posts in damp ground; used also for ship-building, railway sleepers, bridges, wharves, and numerous other purposes. H. 60-80; D. 6-8. <i>Habitat</i> —River banks and flats subject to inundation; Murray River and other Southern districts.
25 A. (railway sleeper)	Red gum	<i>Eucalyptus rostrata</i> Ord.—Myrtaceæ.	Same as preceding species.
1 B.	Spotted gum	<i>Eucalyptus maculata</i> Ord.—Myrtaceæ.	Timber used in ship-building, for bridges, girders, navies of wheels, cart and buggy shafts, cubes for street-paving, staves, shingles, and general building purposes requiring a strong, close-grained, and durable timber. H. 100-150; D. 3-4. <i>Habitat</i> —Northern and Southern coast districts.
2 B.	Mahogany	<i>Eucalyptus resinifera</i> Ord.—Myrtaceæ.	Timber strong and durable; used for ships' knees, shingles, posts, and general building purposes; not liable to shrink, and lasting underground. H. 80-120; D. 2-3. <i>Habitat</i> —Northern and Southern coast districts.
3 B.	Red ironbark	<i>Eucalyptus lenocoxylon</i> Ord.—Myrtaceæ.	Timber tough, strong, hard, heavy, and durable, largely used for railway works, bridges, piles for wharves, girders, wheelwrights' work, rails, shingles, &c. H. 80-100; D. 3-4. <i>Habitat</i> —Interior and Southern districts.
4 B.	Grey ironbark	<i>Eucalyptus crebra</i> Ord.—Myrtaceæ.	Timber similar in quality and used for same purposes as red ironbark. H. 80-100; D. 2-3. <i>Habitat</i> —Northern and Southern districts.
5 B.	Honeysuckle	<i>Banksia integrifolia</i> Ord.—Proteaceæ.	Timber tough; used for knees of boats, bullock-yokes, &c. H. 30-40; D. 1-2. <i>Habitat</i> —Sandy beaches, Northern, Southern, and Western districts.
6 B.	Redwood or peppermint.	<i>Eucalyptus piperita</i> Ord.—Myrtaceæ.	Timber durable, known to have kept sound in moist soil for forty years; used for posts, shingles, house-building, &c. H. 80-100; D. 2-3. <i>Habitat</i> —Southern and Western districts.
7 B.	Mangrove	<i>Avicennia officinalis</i> Ord.—Verbenaceæ.	Timber used for boat-building, bullock-yokes, mallets, &c., and burnt for its ash, which is used in soap-making; leaves eaten by cattle, and considered very nutritious. H. 12-20; D. 6-9 inches. <i>Habitat</i> —In salt-water estuaries, extending along the Australian sea-coast.
8 B.	Mountain ash	<i>Eucalyptus virgata</i> Ord.—Myrtaceæ.	Timber splits freely, and is used for shingles, palings, rails, and house-building. H. 90-100; D. 2-3. <i>Habitat</i> —On high mountains and on the sea-coast, Southern and Western districts.
9 B.	Sassafras	<i>Doryphora sassafras</i> Ord.—Monimiaceæ.	Timber fragrant, and disagreeable to all kinds of vermin, soft and weak; used for lining inside of houses, furniture, &c.; bark contains a medicinal property, which is valued as a tonic. H. 60-80; D. 1½-2. <i>Habitat</i> —Brush forests, Northern, Southern, and Western districts.
10 B.	Blackwood or black sally.	<i>Acacia melanoxylon</i> Ord.—Leguminosæ.	Timber dark-coloured, hard and close-grained; much valued for furniture, picture-frames, cabinet-work, fencing, bridges, &c. H. 40-60; D. 1½-2. <i>Habitat</i> —Southern and Western districts.
11 B.	Red gum	<i>Eucalyptus rostrata</i> Ord.—Myrtaceæ.	Timber close-grained and durable, almost as hard as iron when dry; used for house-building, machinery, railway-sleepers, bridges, &c. H. 100-150; D. 3-6. <i>Habitat</i> —Rich soil on river banks and flats, Southern district.
12 B.	Bloodwood	<i>Eucalyptus corymbosa</i> Ord.—Myrtaceæ.	Timber durable, used for posts, piles, rails, &c., very durable underground in damp situations. H. 80-100; D. 2-4. <i>Habitat</i> —Northern and Southern coast districts.
13 B.	Hickory	<i>Acacia</i> sp.? Ord.—Leguminosæ.	Timber tough, used for tool-handles, mallets, &c. H. 50-60; D. 12-15 inches. <i>Habitat</i> —Brush gullies, Southern coast districts.
14 B.	Woollybutt	<i>Eucalyptus longifolia</i> Ord.—Myrtaceæ.	Timber used for felles, shafts, spokes, agricultural implements, house-building, &c. H. 100-130; D. 3-4. <i>Habitat</i> —Rich alluvial flats along river banks, Southern and other districts.
15 B.	Messmate	<i>Eucalyptus obliqua</i> Ord.—Myrtaceæ.	Timber splits freely, and is used for house-building, fencing, &c. H. 100-150; D. 3-4. <i>Habitat</i> —Southern coast districts.
16 B.	Mountain gum	<i>Eucalyptus</i> sp.? Ord.—Myrtaceæ.	Timber very tough, and said to be the most durable and best timber in the Braidwood district; used for bridges, girders, planking, wheelwrights' work, &c. H. 100-150; D. 2-3. <i>Habitat</i> —On mountains, Southern coast districts.
17 B.	Beech or swamp mahogany.	<i>Tristania suaveolens</i> Ord.—Myrtaceæ.	Timber used for buggy and coach frames, tool-handles, mallets, &c. H. 50-60; D. 12-18 inches. <i>Habitat</i> —Moist situations, Northern and Southern brush forest.
18 B.	Stringybark (thin brown bark.)	<i>Eucalyptus</i> sp.? Ord.—Myrtaceæ.	Timber used for palings, rails, shingles, and general building purposes. Bark used for roofing houses and sheds. H. 50-60; D. 15-18 inches. <i>Habitat</i> —Poor stony ridges, Southern coast districts.
19 B.	Stringybark (thick white bark.)	<i>Eucalyptus</i> sp.? Ord.—Myrtaceæ.	Timber similar in quality and used for same purposes as the preceding species. H. 50-60; D. 15-18 inches. <i>Habitat</i> —Poor stony ridges, Southern coast districts.
20 B.	Scrub myrtle	<i>Backhousia myrtifolia</i> Ord.—Myrtaceæ.	Timber hard, tough, and close-grained; used for tool-handles, mallets, &c. H. 20-30; D. 9 inches 1 foot. <i>Habitat</i> —Damp places, Northern, Southern, and Western districts.
21 B.	Blackbutt	<i>Eucalyptus pilularis</i> Ord.—Myrtaceæ.	Timber strong and durable; much valued, and extensively used in house carpentry, bridge planking, ships' decks, cubes, &c. H. 100-150; D. 3-4. <i>Habitat</i> —Northern and Southern coast districts.
22 B.	White box	<i>Eucalyptus</i> sp.? Ord.—Myrtaceæ.	Timber tough and durable; used for making harrows, ploughs, dray poles and bodies, &c. H. 90-100; D. 2-3. <i>Habitat</i> —On rich open forest land near the sea, Southern coast districts.
23 B.	Beefwood	<i>Stenocarpus salignus</i> Ord.—Proteaceæ.	Timber red coloured; used for making furniture, picture-frames, walking-sticks, veneering, fancy and coopers' work. H. 40-80; D. 1-2. <i>Habitat</i> —Brush forests, Southern and Northern districts.
24 B.	Coachwood or lightwood.	<i>Ceratopetalum apetalum</i> Ord.—Saxifragaceæ.	Timber fragrant, light, soft, tough, and close-grained; used for joiners' and cabinet work, boat and coach building, tool-handles, &c. H. 50-70; D. 1½-2. <i>Habitat</i> —Brush forests, Northern and Southern coast districts.
25 B.	Round-leaved box.	<i>Eucalyptus</i> sp.? Ord.—Myrtaceæ.	Timber hard, heavy, close-grained and durable; used for making harrows, ploughs, bridges, &c. H. 50-60; D. 1½-2. <i>Habitat</i> —On open forest ridges, Southern coast districts.
26 B.	Ribbon or bastard box.	<i>Eucalyptus tereticornis</i> Ord.—Myrtaceæ.	Timber heavy and close-grained; used for bridge and house building, ship-building, plough-beams, wheelwrights' work, &c. H. 50-80; D. 2-3. <i>Habitat</i> —Open forest ridges, Northern and Southern coast districts.

No. and distinguishing Letter.	Local Name.	Botanical Name.	Description of Trees and their Economic Uses.
1 C.	She ironbark .....	<i>Eucalyptus paniculata</i> ..... Ord.—Myrtaceæ.	Used for railway works, such as bridges, sleepers, carriages, &c.; timber very durable. H. 100-150; D. 3-4. <i>Habitat</i> —Northern and other districts.
2 C.	Red ironbark .....	<i>Eucalyptus leucoxylo</i> ..... Ord.—Myrtaceæ.	Timber used for similar purposes to the preceding species; hard and durable. H. 80-100; D. 3-4. <i>Habitat</i> —Northern and other districts, common.
3 C.	White ironbark ...	<i>Eucalyptus crebra</i> ..... Ord.—Myrtaceæ.	Timber used for railway and other works; is hard, tough, and durable. H. 100-150; D. 2-3. <i>Habitat</i> —Northern and other districts.
4 C.	Grey gum .....	<i>Eucalyptus saligna</i> ..... Ord.—Myrtaceæ.	Timber hard and durable; excellent for railway sleepers and other purposes. H. 100-150; D. 3-5. <i>Habitat</i> —Northern coast districts.
5 C.	Tallow-wood .....	<i>Eucalyptus microcorys</i> ..... Ord.—Myrtaceæ.	Timber used for flooring and other building purposes requiring strength and durability; wood, as local name implies, of a greasy nature. H. 100-150; D. 3-6. <i>Habitat</i> —Northern coast districts.
6 C.	Water gum (small leaved).	<i>Tristania neriifolia</i> ..... Ord.—Myrtaceæ.	Timber hard, close-grained, and durable; used for axe and other handles, cogs of wheels, &c. H. 80-100; D. 1½-2. <i>Habitat</i> —Northern and Southern coast districts.
7 C.	Broad-leaved apple-tree.	<i>Angophora intermedia</i> ..... Ord.—Myrtaceæ.	Timber subject to gum-veins; used for navcs and spokes of wheels, blocks, &c. H. 80-100; D. 2-3. <i>Habitat</i> —Northern and Southern districts.
8 C.	Black stavewood...	<i>Tarrictia actinodendron</i> ..... Ord.—Sterculiaceæ.	Timber strong and close-grained; used for staves and building purposes. H. 70-80; D. 3-4. <i>Habitat</i> —Northern brush forests.
9 C.	Turpentine .....	<i>Syncarpia laurifolia</i> ..... Ord.—Myrtaceæ.	One of the most valuable known timbers for piles in salt or fresh water, as it is proof against the <i>Teredo</i> insect; used also for sleepers, ship-building, and other purposes requiring a strong and durable timber. H. 150-180; D. 4-5. <i>Habitat</i> —Brush and open forest country, nearly throughout the Colony.
10 C.	Maiden's blush ...	<i>Sloanea Australis</i> ..... Ord.—Tiliaceæ.	Timber soft and durable; used for cabinet and ornamental purposes. H. 80-100; D. 3-4. <i>Habitat</i> —Northern and Southern coast districts.
11 C.	Coachwood or lightwood.	<i>Ceratopetalum apetalum</i> ..... Ord.—Saxifragaceæ.	Timber soft, tough, and durable; emitting an agreeable fragrance; used for coach-building, staves, and cabinet-work. H. 100-150; D. 2-4. <i>Habitat</i> —Northern brush forests.
12 C.	Flooded gum .....	<i>Eucalyptus rostrata</i> ..... Ord.—Myrtaceæ.	An excellent durable timber, used for ship-building, flooring-boards, weather-boards, and building purposes generally. H. 100-150; D. 3-4. <i>Habitat</i> —Margin of brush forests and damp places, Northern and Southern districts.
13 C.	Brush bastard or white box.	<i>Tristania conferta</i> ..... Ord.—Myrtaceæ.	Timber strong, hard, and durable; used in the construction of wharves and bridges, and for ship-building, &c. Much valued as an ornamental shade tree. H. 100-150; D. 3-5. <i>Habitat</i> —Common in brush forests in Northern and Southern districts.
14 C.	Large-leaved water gum.	<i>Eugenia ventenatii</i> ..... Ord.—Myrtaceæ.	Timber close-grained, hard, heavy, tough, and beautifully marked; used for tool-handles, poles of drays, ribs of boats, &c. H. 40-60; D. 2-3. <i>Habitat</i> —Banks of water-courses, Northern brush forests.
15 C.	Black myrtle .....	<i>Cargilia pentamera</i> ..... Ord.—Ebenaceæ.	Timber close-grained, tough, and durable. H. 80-100; D. 2-3. <i>Habitat</i> —Northern brush forests.
16 C.	Swamp oak .....	<i>Casuarina quadrivalvis</i> ..... Ord.—Casuarineæ.	Timber used for shingles and staves. H. 50-60; D. 1-2. <i>Habitat</i> —Southern and Western districts, on banks of creeks and marshy places.
17 C.	White or broad-leaved tea-tree.	<i>Melaleuca leucodendron</i> ..... Ord.—Myrtaceæ.	Timber exceedingly hard, heavy, and close-grained; said to be almost imperishable underground in moist places; used for piles, posts, ship-building, &c. H. 40-50; D. 1-2. <i>Habitat</i> —Marshy places in Northern and Southern coast districts.
18 C.	Lignum vite .....	<i>Myrtus acmenoides</i> ..... Ord.—Myrtaceæ.	Timber very hard, durable, and tough; used by coachbuilders, &c. H. 60-70; D. 1½-2. <i>Habitat</i> —Northern brush forests.
19 C.	Brush cherry .....	<i>Eugenia myrtifolia</i> ..... Ord.—Myrtaceæ.	Timber elastic; used for staves, oars, boat-building, &c. Fruit edible, acid, makes a good preserve. H. 50-80; D. 1½-2. <i>Habitat</i> —Brush forests, Northern and Southern districts.
20 C.	Forest oak .....	<i>Casuarina torulosa</i> ..... Ord.—Casuarineæ.	Timber used for shingles and cabinet-work. H. 60-80; D. 1½-2. <i>Habitat</i> —Common on open forest ridges, Northern, Southern, and Western districts.
21 C.	Yellow-wood .....	<i>Flindersia Oxleyana</i> ..... Ord.—Meliaceæ.	Timber yellow when fresh, hard, and used for cabinet purposes. H. 60-80; D. 2-3. <i>Habitat</i> —Northern coast districts.
22 C.	Forest oak .....	<i>Casuarina torulosa</i> ..... Ord.—Casuarineæ.	Timber used for shingles and cabinet-work. H. 60-80; D. 1½-2. <i>Habitat</i> —Common on open forest ridges, Northern, Southern, and Western districts.
23 C.	Coachwood or lightwood.	<i>Ceratopetalum apetalum</i> ..... Ord.—Saxifragaceæ.	Timber fragrant, soft, close-grained and tough; used for cabinet and joiners' work, coachbuilding, &c. H. 100-150; D. 2-2½. <i>Habitat</i> —Northern brush forests.
24 C.	Red ash .....	<i>Orites excelsa</i> ..... Ord.—Proteaceæ.	Timber used for shingles, farm implements, and various purposes; it is hard and durable. H. 70-80; D. 2-3. <i>Habitat</i> —Northern and Southern brush forests.
25 C.	Broad long-leaved water gum.	<i>Tristania laurina</i> ..... Ord.—Myrtaceæ.	Timber hard, tough, and close-grained; used for tool-handles, cogs of wheels, &c. H. 50-60; D. 1-2. <i>Habitat</i> —Banks of creeks, in shady places, Northern coast districts.
26 C.	Brush cherry .....	<i>Eugenia myrtifolia</i> ..... Ord.—Myrtaceæ.	Same as No. 19 C, already described.
27 C.	Beech or white beech.	<i>Gmelina Leichhardtii</i> ..... Ord.—Verbenaceæ.	Timber much valued for flooring-boards and ships' decks, &c.; silvery white, and not liable to shrink. H. 100-150; D. 3-4. <i>Habitat</i> —Northern brush forests.
28 C.	Swamp mahogany	<i>Eucalyptus robusta</i> ..... Ord.—Myrtaceæ.	Timber much valued for shingles, wheelwrights' work, shipbuilding, and building purposes generally. H. 100-150; D. 2-4. <i>Habitat</i> —Swampy places in Northern, Southern, and Western districts.
29 C.	Black ironbark ...	<i>Eucalyptus</i> sp. ? ..... Ord.—Myrtaceæ.	Timber used for girders, beams, and railway works; said to be a rare distinct species, only recently discovered. H. 150-170; D. 2-3. <i>Habitat</i> —On the margin of and in the brush forests.
30 C.	Prickly-leaved tea-tree.	<i>Melaleuca styphelioides</i> ..... Ord.—Myrtaceæ.	Timber very hard, heavy, and close-grained; excellent for posts in damp situations, piles, &c., and said never to be known to decay. H. 50-80; D. 1½-2. <i>Habitat</i> —Damp situations, Northern districts.
31 C.	Red cedar.....	<i>Cedrela australis</i> ..... Ord.—Meliaceæ.	One of the most useful and valuable timbers known, being very durable, easily worked, and most excellent for furniture and all descriptions of ornamental indoor work. H. 150-180; D. 4-8. <i>Habitat</i> —Chiefly confined to the gorges and eastern slopes of the Northern coast ranges.
32 C.	White cedar.....	<i>Melia australis</i> ..... Ord.—Meliaceæ.	Timber soft, not durable, easily worked, and sometimes used for shingles; flowers fragrant, a good deciduous shade tree. H. 50-80; D. 3-4. <i>Habitat</i> —Moist places in the Northern brush forests chiefly.
33 C.	Golden green wattle	<i>Acacia</i> sp. ? ..... Ord.—Leguminosæ.	Timber sometimes used for axe-handles, &c.; the bark very valuable and in great demand for tanning purposes. H. 50-70; D. 1½-2. <i>Habitat</i> —Rich moist flats, Northern coast districts.

No. and distinguishing Letter.	Local Name.	Botanical Name.	Description of Trees and their Economic Uses.
34 C.	Mountain ash .....	Genus? ..... Ord.—Sapindaceæ.	Timber excellent for staves, oars, wheels, tool-handles, and for boat and house building purposes; very durable, free from knots, and straight-grained. H. 150-200; D. 2-3. <i>Habitat</i> —Northern brush forests.
35 C.	Yellow cedar .....	<i>Rhus rodanthema</i> ..... Ord.—Anacardiaceæ.	Timber yellow when fresh, close-grained, and useful for various purposes. H. 70-80; D. 2-3. <i>Habitat</i> —Brush forests, Northern districts.
1 D.	Hoop Moreton Bay or Colonial pine.	<i>Araucaria Cunninghamii</i> ..... Ord.—Coniferæ.	Timber white, easily worked, decays rapidly if exposed; used chiefly for indoor work. The pine from the mountains is preferred to that grown on the lowlands near the coast. H. 100-150; D. 4-5. <i>Habitat</i> —Mountains and brush forests, Northern districts.
2 D.	Laurel or white sycamore.	<i>Sterculia discolor</i> ..... Ord.—Sterculiaceæ.	Timber said to be good, but rarely used. H. 30-60; D. 1-2. <i>Habitat</i> —Forest brushes, Clarence and other Northern districts.
3 D.	Light yellow-wood	Genus? .....	Timber not used, but considered suitable for fancy purposes. H. 30-40; D. 1-2. <i>Habitat</i> —Brush forests, Clarence district.
4 D.	Native tamarind..	<i>Diplogottis Cunninghamii</i> ..... Ord.—Sapindaceæ.	Timber close-grained, durable; not used, but suitable for various purposes. Fruit edible. H. 40-60; D. 1-2. <i>Habitat</i> —Brush forests, Northern and Southern districts.
5 D.	Pencil cedar .....	<i>Sloanea Woollsi</i> ..... Ord.—Tiliaceæ.	Timber used for lining houses, &c. H. 40-50; D. 1-2. <i>Habitat</i> —Northern brush forests.
6 D.	Beefwood .....	<i>Stenocarpus salignus</i> ..... Ord.—Proteaceæ.	Timber red-coloured, hard, close-grained, and easily split; used for veneering, coopers' work, fancy-work, &c. H. 70-80; D. 2-3. <i>Habitat</i> —Brush forests, Northern and Southern districts.
7 D.	Three-veined myrtle.	<i>Rhodamnia trinervia</i> ..... Ord.—Myrtaceæ.	Timber hard and close-grained; not used. H. 20-30; D. 1-1½. <i>Habitat</i> —Brush forests, Northern and Southern districts.
8 D.	Light yellow-wood	<i>Daphnandra micrantha</i> ..... Ord.—Monimiaceæ.	Timber yellow when fresh, easily worked and takes a good polish. H. 40-60; D. 1-1½. <i>Habitat</i> —Clarence and other Northern brush forests.
9 D.	Silky oak .....	<i>Grevillea robusta</i> ..... Ord.—Proteaceæ.	Timber much valued for staves, lining houses, and other purposes. H. 70-80; D. 2-3. <i>Habitat</i> —Northern brush forests.
10 D.	Not known .....	Genus? .....	Timber used for fancy purposes. H. 20-25; D. 1-1½. <i>Habitat</i> —Clarence brush forests.
11 D.	Black myrtle .....	<i>Cargillia pentamera</i> .....	Timber soft when fresh, tough and durable. H. 80-100; D. 2-3. <i>Habitat</i> —Northern brush forests.
12 D.	Not known .....	Genus? .....	H. 20-30; D. 9-12 inches. <i>Habitat</i> —Clarence district.
13 D.	Bastard myall.....	<i>Acacia Cunninghamii</i> ..... Ord.—Leguminosæ.	Timber dark-coloured, hard, heavy, and close-grained; would be useful for cabinet purposes. H. 10-20; D. 9-12 inches. <i>Habitat</i> —Northern and Southern districts.
14 D.	Sassafras or bitter bark.	<i>Doryphora sassafras</i> .....	Already described.
15 D.	Cyprus pine .....	<i>Frenela Macleayana</i> .....	Timber used for indoor purposes. H. 20-30; D. 6-12 inches. <i>Habitat</i> —Northern districts.
16 D.	Mountain ash .....	Genus? ..... Ord.—Laurineæ.	Timber described as good and suitable for various purposes, but not used. H. 30-40; D. 1-2. <i>Habitat</i> —Mountain brush forests, Clarence district.
17 D.	Sally wattle.....	<i>Acacia</i> sp. ? ..... Ord.—Leguminosæ.	Timber good, but not used. H. 20-30; D. 6-9 inches. <i>Habitat</i> —Banks of creeks, Northern districts.
18 D.	Corkwood or pitury	<i>Duboisia myoporoides</i> ..... Ord.—Scrophulariaceæ.	Timber white, soft, close-grained and firm; used for carving and wood-engraving; bark resembles the cork oak, and it is used medicinally. H. 20-25; D. 1-2. <i>Habitat</i> —Northern and Southern districts.
19 D.	White bark .....	Genus? ..... Ord.—Laurineæ.	Timber described as good, but not used. H. 20-30; D. 6-12 inches. <i>Habitat</i> —Northern brush forests.
20 D.	Rosewood.....	<i>Dysoxylon Fraserianum</i> ..... Ord.—Meliaceæ.	Timber fragrant, and much valued for indoor work, furniture, cabinet-work, turning, wood-engraving, &c. H. 50-70; D. 3-4. <i>Habitat</i> —Brush forests, Northern districts.
21 D.	White beech .....	Genus? .....	Timber used for flooring boards, ships' decks, &c. H. 70-80; D. 3-4. <i>Habitat</i> —Northern brush forests.
22 D.	Black apple .....	Genus! ..... Ord.—Laurineæ.	Timber not used. H. 30-40; D. 9-12 inches. <i>Habitat</i> —Northern brush forests.
23 D.	Ironwood or stave-wood.	<i>Tarrictia actinodendron</i> .....	Timber used for staves and building purposes. H. 50-70; D. 3-4. <i>Habitat</i> —Northern brush forests.
24 D.	Grass-tree.....	<i>Xanthorrhœa arborea</i> ..... Ord.—Liliaceæ.	A valuable gum or resin is obtained from the stem of this plant. H. 12-16; D. 6-12 inches. <i>Habitat</i> —Northern and Southern districts.
25 D.	Bangalow palm ..	<i>Ptychosperma elegans</i> ..... Ord.—Palmeæ.	A very ornamental feathery-leaved palm, stems sometimes used for fencing. H. 100-130; D. 6-9 inches. <i>Habitat</i> —Northern and Southern brush forests.
1 E.	Black or red pine..	<i>Frenela Endlicherii</i> ..... Ord.—Coniferæ.	Timber beautifully mottled and striped with black, white, and yellow; much used and valued in the Lachlan and Murrumbidgee districts for the interior lining and roofing of houses, mantel-pieces, skirting-boards, &c. H. 60-90; D. 1½-2. <i>Habitat</i> —Dry sandy ridges chiefly, Lachlan and Murrumbidgee districts.
2 E.	White or common pine.	<i>Frenela robusta</i> ..... Ord.—Coniferæ.	Timber much used in the Lachlan and Murrumbidgee districts in the construction of weather-board houses, for fencing, telegraph poles, &c. This is the common scrub pine of the interior, millions of acres of land being so densely covered with it as to be rendered useless. H. 60-90; D. 1½-2. <i>Habitat</i> —Rich flats and low sandy ridges. Lachlan and other interior Southern districts.
3 E.	Bull oak .....	<i>Casuarina equisetifolia</i> ..... Ord.—Casuarineæ.	Timber used for log-fencing, gates, and shingles; not much valued. H. 30-40; D. 12-18 inches. <i>Habitat</i> —Rich soil, Lachlan and other interior Southern districts.
4 E.	She oak .....	<i>Casuarina suberosa</i> , fem .....	Timber used for bullock-yokes, malls, tool-handles, &c.; very valuable fodder trees; largely used and much valued in the interior districts as food for stock during periods of drought. H. 20-30; D. 12-18 inches. <i>Habitat</i> —Dry sandy ridges, Lachlan and other interior Southern districts.
5 E.	He oak .....	<i>Casuarina suberosa</i> , mas ..... Ord.—Casuarineæ.	
6 E.	Red or flooded gum	<i>Eucalyptus rostrata</i> ..... Ord.—Myrtaceæ.	Timber much valued for strength and durability, and extensively used for bridges, waggons, railway-sleepers, wheelwrights' work, ship-building, &c., and largely used and greatly valued for durability as piles and posts in damp situations. H. 80-120; D. 6-8. <i>Habitat</i> —River flats subject to inundation, Murray River and other Southern districts.
7 E.	Red box .....	<i>Eucalyptus</i> sp. ? ..... Ord.—Myrtaceæ.	This species is not generally known, but the timber is valued for fencing, and it is said to be one of the best kinds of the Southern box. H. 30-50; D. 1-2. <i>Habitat</i> —Chiefly confined to dry stony ridges in the Lachlan district.
8 E.	White box .....	<i>Eucalyptus albens</i> ..... Ord.—Myrtaceæ.	Timber durable; used for fencing, uprights, rafters, &c. H. 60-60; D. 1½-2. <i>Habitat</i> —Principally on rich flat land; distributed over the Lachlan and other Southern districts.

No. and distinguishing Letter.	Local Name.	Botanical Name.	Description of Trees and their Economic Uses.
9 E.	Yellow box .....	<i>Eucalyptus melliodora</i> ..... Ord.—Myrtaceæ.	Timber hard, tough, durable, and close-grained; used chiefly by wood-engravers. An excellent shade tree. H. 40-50; D. 1½-2. <i>Habitat</i> —Common in Lachlan, Murrumbidgee, and other Southern districts.
10 E.	Stringybark ... ..	<i>Eucalyptus obliqua</i> ? ..... Ord.—Myrtaceæ.	Timber strong, hard, tough, and durable; used for posts in fencing, supports in mines, &c.; bark used for roofs of houses, &c. H. 80-100; D. 2-3. <i>Habitat</i> —Chiefly on dry stony ridges, Lachlan and other districts, widely distributed.
11 E.	Silver-leaved boree or myall.	<i>Acacia</i> sp. ? ..... Ord.—Leguminosæ.	Timber fragrant, hard, heavy, tough, and close-grained; used for cabinet-work, veneering, picture-frames, pipe-making, &c. This is one of the most valuable fodder trees in the Lachlan and Murrumbidgee districts. H. 20-30; D. 9 inches-1 foot. <i>Habitat</i> —Generally fringing the margin of plains, in rich moist soil, Lachlan and other Southern districts.
12 E.	Yarren or myall ...	<i>Acacia</i> sp. ? ..... Ord.—Leguminosæ.	Timber similar to boree; used for stockwhip handles, cabinet-work, pipes, picture-frames, veneering, &c.; leaves eaten by stock, but not so good feed as boree. H. 20-30; D. 9 inches-1 foot. <i>Habitat</i> —Intermixed with box, pine, and other trees, Lachlan and other Southern districts.
13 E.	Currawang or spearwood.	<i>Acacia doratoxylon</i> ..... Ord.—Leguminosæ.	Timber hard, tough, heavy, and close-grained; used for gates, buggy-poles, furniture, &c., and by the aboriginals for boomerangs and spears; leaves eaten by stock. H. 20-30; D. 9 inches-1 foot. <i>Habitat</i> —Chiefly on summit of dry stony ridges, Lachlan and other Southern districts.
14 E.	Umbrella bush ..	<i>Acacia</i> sp. ? ..... Ord.—Leguminosæ.	Timber similar to and used for same purposes as yarren; leaves eaten by stock; and it is an excellent shade tree. H. 15-20; D. 6-9 inches. <i>Habitat</i> —Open plains or margin of plains, in rich moist soil, Lachlan and other Southern districts.
.	Cuba or native willow.	<i>Acacia salicina</i> ..... Ord.—Leguminosæ.	Timber tough and hard, but not used; a good shade tree; leaves eaten by stock. H. 30-40; D. 1-1½. <i>Habitat</i> —Banks of creeks and moist places, Lachlan and other Southern districts.
16 E.	Silver wattle .....	<i>Acacia decurrens</i> var <i>mollis</i> ..... Ord.—Leguminosæ.	Timber similar in quality to green wattle, and used for same purposes; bark used for tanning. H. 20-30; D. 6-9 inches. <i>Habitat</i> —Intermixed with yellow box, pine, &c., Lachlan and other districts.
17 E.	Green wattle .....	<i>Acacia decurrens</i> ..... Ord.—Leguminosæ.	Timber light, tough, and strong; used for staves; bark used for tanning. H. 30-40; D. 1-1½. <i>Habitat</i> —Moist shady places; Southern, Western, and Northern districts.
18 E.	Wilga .....	Genus? .....	Timber not used; a very handsome spreading shade tree; leaves eaten by stock. H. 40-50; D. 1-1½. <i>Habitat</i> —Lachlan and other Southern districts.
19 E.	Quandong.....	<i>Fusanus acuminatus</i> ..... Ord.—Santalaceæ.	Timber hard and close-grained; used for cabinet-work. Fruit makes excellent tarts and jelly, of the same flavour as black guava; seeds used for necklaces, bracelets, and other ornaments. H. 15-20; D. 6-9 inches. <i>Habitat</i> —Lachlan and other Southern districts.
20 E.	Native cherry .....	<i>Exocarpus cupressiformis</i> ..... Ord.—Santalaceæ.	Timber close-grained; used for turning and cabinet purposes. A handsome shade tree. H. 15-20; D. 6-9 inches. <i>Habitat</i> —Southern, Northern, and Western districts.
21 E.	Black wattle .....	<i>Acacia hakeoides</i> ..... Ord.—Leguminosæ.	Timber not used; a very common scrub pest in the Lachlan and Murrumbidgee districts. H. 8-12; D. 3-6 inches. <i>Habitat</i> —Lachlan and other Southern districts.
22 E.	Emu Bush .....	<i>Heterodendron olaceifolium</i> ..... Ord.—Sapindaceæ.	Timber very hard and heavy; used for rollers, &c. Seeds eaten by emus. H. 15-20; D. 6-9 inches. <i>Habitat</i> —Lachlan and other Southern districts.
23 E. &	Dogwood .....	<i>Geijera parviflora</i> ..... Ord.—Rutaceæ.	Timber close-grained, not used; leaves of broad-leaved species eaten by stock. H. 15-20; D. 9-12 inches. <i>Habitat</i> —Lachlan and other Southern districts.
24 F.	Pin or needle bush	<i>Hakea leucoptera</i> ..... Ord.—Proteaceæ.	Timber not used; a common and useless scrub in Lachlan district. H. 12-15; D. 3-6 inches. <i>Habitat</i> —Lachlan and other Southern districts.
25 E.	Giant hopbush ...	<i>Dodonæa lobulata</i> ..... Ord.—Sapindaceæ.	Timber hard and cross-grained, not used; one of the best fodder shrubs in the Lachlan district. H. 10-15; D. 3-6 inches. <i>Habitat</i> —Lachlan and other Southern districts.
27 E.	(No specimen	forwarded.)	
28 E.	Kurrajong .....	<i>Sterculia diversifolia</i> ..... Ord.—Sterculiaceæ.	Timber soft, fibrous, and useless; leaves eaten greedily by stock. A strong fibre is obtained from the bark, and it is a most ornamental shade tree. H. 40-50; D. 2-3. <i>Habitat</i> —Chiefly confined to dry stony ridges, Lachlan and other districts.
29 E.	Ironbark .....	<i>Eucalyptus leucoxyton</i> ..... Ord.—Myrtaceæ.	Timber hard, heavy, close-grained, strong, and durable; used for railway sleepers, girders, uprights, piles, posts, &c., and for the same purposes as red gum. H. 60-70; D. 2-3. <i>Habitat</i> —Dry stony ridges, Lachlan and other districts.

List of Specimens of Leaves, with numbers and alphabetical letters corresponding with those of Timber Sections. Obtained for the Commission by the Forest Rangers under the Department of Mines.

NEW SOUTH WALES

## FOURTH ANNUAL REPORT

UPON THE

## OCCUPATION OF CROWN LANDS BRANCH

OF THE

## DEPARTMENT OF MINES,

NEW SOUTH WALES,

FOR THE YEAR

1882.

---

Printed in accordance with Resolutions of both Houses of Parliament.

---

SYDNEY: THOMAS RICHARDS, GOVERNMENT PRINTER.

1883.

## FOURTH ANNUAL REPORT.

---

TO THE HONORABLE J. P. ABBOTT, M.P., &C., MINISTER FOR MINES.

Sir,

In submitting the Report of the Chief Officer upon the working of the Occupation of Crown Lands Branch of this Department during the year 1882, I desire to invite attention to the praiseworthy efforts made by the Chief Officer and his staff to carry on the current work of the Branch, in addition to replacing the records destroyed by fire in the Garden Palace, notwithstanding that in consequence of that fire they were deprived of office accommodation and appliances.

The destruction of the map showing the boundaries of runs, which, at the date of the fire, was approaching completion, is especially to be regretted, as (to say nothing of the time and money necessary to replace that valuable compilation) such a map would have been most useful in view of the provisions of the law which now makes the area of land under lease an important item in determining the rents of runs.

The provisions of the Land Acts Further Amendment Act of 1880, as regards the increase in the rents of runs, have so far had the effect of causing only four runs to be abandoned, on account of the inferior quality of the land, but they have caused an increase in the number of applications for extension of lease, on account of the improved grazing capabilities of the runs, and have probably induced lessees to expedite the making of improvements in order to be able to claim such extension. The Chief Officer supplies some interesting figures respecting the value of such improvements, and the saving to the lessees in rent by reason of the extension of leases.

During the year the Branch was relieved of the work connected with forest management and the leasing of tanks and wells, and the whole of the remaining work of the Branch was brought under the control of the Chief Officer. These changes will, it is thought, increase the efficiency of the Branch, and enable the Chief Officer and his staff to devote special attention to the important work of replacing the lost records.

Department of Mines,  
Sydney, 12 July, 1883.

I have, &c.,  
HARRIE WOOD,  
Under-Secretary for Mines.

## REPORT from Chief Officer.

Sir,

Occupation of Lands Office, 31 May, 1883.

I have the honor to hand you a report upon the work performed by this branch during the year 1882.

The loss of books and records caused by the disastrous fire of 22nd September must be pleaded in excuse for some incompleteness of detail, as well as for some of the delay in forwarding this report.

Staff.  
Appendix A.

A list of the officers employed, with particulars of service and salary, is shown in Appendix A, together with comparative statement of correspondence.

Ill-health deprived the office of the services of one of the senior clerks for about seven months, and the Chief Clerk of the Pastoral Lease Branch, after an absence of six months, in a vain endeavour to recover his health, was, in August, finally removed by death.

Up to the end of February the business of the Forest Branch was conducted by me, with the assistance of a forest ranger and a clerk; but after the passing of the Ringbarking Act it became evident that the assistance long asked for could no longer be withheld without detriment to the conduct of public business, and a separate branch was formed, acting independently of this office; no record is therefore retained here of the business performed under this head.

It was also considered advisable that the granting leases, under 38th section of Act of 1875, of land containing tanks and wells constructed at the public expense should be treated apart from the ordinary course followed in granting leases under that section, and since June that duty has devolved upon the Stock Branch, which, besides dealing with questions of the site, construction, supervision, and repairs of such works, has now undertaken to provide for granting leases of the land containing them; no report is therefore afforded concerning such leases.

During the past year a change was effected in the arrangements of the office by which all business passes to me through one channel, instead of being classed into two separate branches, as was for several years the practice.

The removal of the Forest Branch caused a marked diminution in correspondence, and the clerical work of the staff has also been reduced by the use of an additional number of printed forms.

Expenditure and  
receipts.  
Appendix B.

The increase of office expenditure shown in Appendix B has been caused by the necessity for temporary assistance in copying documents lent to the office and in replacing books of register and of record, a task which has been carried on under disadvantages consequent upon a want of accustomed office appliances.

Drafting Branch.

It is to be regretted that the head of the Drafting Branch has been unable to supply me with any details of the work performed in the branch which is under his charge; but whatever may be the extent of work, its characteristic is to develop those particulars concerning runs the accurate knowledge of which is rendered more desirable and necessary year after year by the progress of events and the requirements of the law.

The duties have comprised the tedious task of compiling diagrams of runs for the purposes of appraisement and of compensation, together with the revision of area, elsewhere referred to; the issue of instructions to survey boundaries and applying plans of survey received to run maps; supplying tracings of run boundaries to the Lands and other Departments, upon requisition; reporting upon applications for subdivision, and the necessary revision and reconstruction of descriptions.

A map of the Colony, upon a scale of 8 miles to an inch, and showing the names and boundaries of runs, was far advanced towards completion when it was burned, and the compilation of this desirable work has been commenced afresh.

When local or staff officers ceased to be employed in appraising the rent of runs it became evident that the duty, which had hitherto devolved upon appraisers, of supplying this office with a record of the land withdrawn from the lease of each run by purchase, pre-emptive lease, or otherwise, could no longer be imposed upon them with safety or justice.

This information could be obtained from no existing record, and since the Department of Lands declined to compile it from the records of their various branches, an attempt was made to supply appraisers with a diagram of each run referred to them, showing the land withdrawn and the area remaining available for lease up to the date of the compilation, leaving to them any correction or addition that local investigation might enable them to supply.

These diagrams, after return and noting, were, together with accompanying awards in appraisement, unhappily destroyed by the fire, with the exception of a very few, and the replacing them has pressed heavily upon the resources of the Drafting Branch, notwithstanding liberal assistance provided by employment of temporary draftsmen.

Compensation.

Closely connected with the preparation of these diagrams is the method of dealing with claims for compensation (under 13th section, clause 5) on account of rent paid in advance upon land afterwards withdrawn from lease.

A refund of rent, in proportion to the area withdrawn from a run after the rent is determined and paid, has been authorized, in order that a fixed rent may be equitably applied to a fluctuating area of land, and detailed plans of runs are necessary in order to test the accuracy of claims preferred on this account, and when a record of the state of a run at the time of appraisement has been charted upon a plan it is evident that to make any subsequent addition or correction will be a task ready and simple when compared with the lengthened investigation now necessary.

Appendix C.

In Appendix C is shown the number of runs in each district the lessees of which have been paid compensation on account of land withdrawn from lease since rent was determined and paid. The sums refunded amount to £2,001 7s. 5d.

Number of runs.  
Willylaw, Liver-  
pool Plains Dis-  
trict.  
Appendix D.

The number of runs under lease was shown to be 4,336 in 1881; to these must be added one new run, a tender for which was accepted in 1882, and an increase of eleven, caused by subdivisions of existing runs, whilst twenty-nine runs, as shown in Appendix D, were forfeited during the year, leaving the number under lease in 1882 at 4,319.

Of the twenty-nine runs forfeited for non-payment of rent the area under lease has in twelve cases become so small that the lessees have declined to pay the minimum rent of £10, and in four cases it may be asserted that they have declined to pay the minimum rate per section on account of the inferior quality of the land.

The

The leases of 622 runs expired in 1882, and, under 15th section of Act of 1861, 403 claims were made for extension of leases on account of improved grazing capabilities effected by the work of lessees. Expired leases.

In 319 cases these claims were admitted, and reports show the value of improvements upon these leaseholds to be estimated at £730,757, of which £310,196 apply to provision for securing water; and the increase of grazing capabilities has been estimated at 1,620,478 sheep, the natural capabilities (1,006,122 sheep) having been arrived at by taking a proportion of the number which it was estimated might be kept upon these lands during a portion of a year, but the actual number of sheep that could have been kept during any one year upon the runs in their natural state would certainly not reach 500,000, and the number that can now be kept permanently grazing must exceed two and a half million.

Some details, compiled from appraisers' reports, with respect to the value and nature of the improvements effected upon these runs are given in Appendix E, and in comparing appraisers' awards of the present rental value of these runs with the rent at which their leases have been extended it will appear that a concession of rent amounting to £24,856 10s. yearly for five years has been granted on account of the increase of capabilities obtained, which represents 8·02 per cent. a year upon the outlay expended in securing water. Appendix E.

The rents at which new leases might be entered upon were determined in 300 cases at the amounts awarded by appraisers. In one case the run was inaccessible from snow at the time of the appraiser's visit, and it was decided that survey should be made before determining the approximate area of the run. In two cases the awards were referred for the report of three other appraisers before the rent was determined; in the one case the award first made was upheld, and in the other no conclusion was arrived at before the end of the year, as a reference was made to the Department of Lands concerning pre-leases upon which no rent had been paid for many years, but which had not been declared cancelled, and the question had to be determined whether or no their area had reverted to the run, and could be appraised as a portion of it. Renewal of leases.

Appendix F contains a nominal list of the runs whose leases expired in 1882, their area as estimated in 1878, the area as estimated upon revision for appraisement, the area appraised and the rent determined; in the Summary is shown the amount of rent paid during the expired leases. Appendix F.

Appendix G contains the same information concerning the area of runs whose leases have been extended from 31st December, 1882, to 31st December, 1887. Appendix G.

An alphabetical list of all runs whose leases have been extended under the provisions of the Act of 1861 is supplied in Appendix H, together with the date at which each notification of extension was published in the Gazette, and from the Summary it will be seen that the number granted during the past year bears a large proportion to the total number extended, viz., 1,195; and reference to reports of past years will show that only 582 had been extended during the fifteen years prior to the passing of the Act of 1880. It is suggested that convenience to the public would result if these runs were distinguished by some mark in the list showing rent of runs, which is published yearly by the Treasury. Appendix H.

The total area contained within the boundaries of the 3,133 runs whose area has been revised for the purpose of appraisement is estimated at 118,843,684 acres, but the area appraised cannot now be obtained for the whole of these runs. Area of runs.

The estimate of the total area of 621 runs revised during the year was increased by 1,412,977 acres, which, added to the increase shown in former reports, makes a total increase of estimate since 1878 amounting to 7,579,115 acres in 3,133 runs.

The area withdrawn from 621 runs whose leases expired in 1882 is returned as 1,085,306 acres, and the area withdrawn at the time of appraisement from 2,521 runs is shown as 12,472,960 acres, leaving the area under lease within those runs at 65,642,880 acres.

The establishment of a minimum rate per section, and the removal of restrictions imposed by law upon former appraisers, have caused an increase of rent amounting to £106,208 upon 2,521 runs,\* notwithstanding any decrease in value caused by withdrawal of land from lease since their last valuation; and 1,787 runs remain to be brought under the provisions of the Act of 1880. Increase of rent.

Appendix I contains particulars of eight runs which were appraised afresh during the currency of their leases, on account of an erroneous estimate of area at the time of appraisement; by this course an increase of rent for 1883, amounting to £397 10s., was obtained.† Appendix I.

A comparative statement of the number of transfers of runs during the past three years is shown in Appendix J; no deduction can apparently be drawn from the fluctuations in the recorded number of such transactions, which vary from 494 in 1879 to 970 in 1881. Appendix J.

As has been stated in former reports, there is no existing record which shows the actual area under lease in any one year; but taking such records as we have of the area appraised for a basis, it has been estimated that 127,828,720 acres (or 199,748 square miles) were under lease in 1882. Area under lease.

It was pointed out in the Report for 1881 that some check upon such an estimate would be afforded if the total area alienated, held under pre-emptive lease, and reserved from lease outside the settled districts, could be supplied; and in furtherance of that object the subjoined statement is offered, in which lately acquired information is applied to the total area of the Colony and of the settled districts, as estimated by the late chief draftsman of this office:—

Total area of the Colony	...	...	...	...	...	acres.	acres.
Area of settled districts	...	...	...	...	...	26,250,000	199,000,000
Area of land purchased outside settled districts up to end of 1882	...	...	...	...	...	26,401,994	
Area of land pre-leased	...	...	...	...	...	11,410,000	
Estimated area within population areas and other reserves from lease outside settled districts	...	...	...	...	...	4,250,000	
Estimated area not yet under lease	...	...	...	...	...	1,000,000	
						69,311,994	

which

\* This number has been increased by subdivision since appraisement to 2,532.

† Particulars of a run, the rent of which was not determined until 1882, though the lease expired in 1881, are included in this appendix.

which shows total area left under pastoral lease to be 129,688,006 acres, or 1,859,286 acres more than the estimate based upon details obtained from appraisements of runs. The actual area may lie between the two estimates, and it may be noted that the difference is little more than half that which appears in the estimates of the total area of the Colony formed by the Surveyor-General and by the late chief draftsman of this office respectively.

Special leases.

A comparative statement of the number of leases granted under 38th section of Act of 1875 and 19th section of Act 1880 is appended, showing the number of leases and the rent received from them during the past six years.

	1877.	1878.	1879.	1880.	1881.	1882.
Number of leases .....	101	111	200	214	279	285
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
Annual rent .....	882 2 0	1,065 7 0	1,319 8 0	1,673 17 0	2,490 18 0	1,826 1 0

The transfer to the Stock Branch of leases of land containing tanks and wells constructed at public cost accounts for the reduction shown on account of rent for 1882.

Appendix K.

Appendix K contains some particulars of leases current in 1882; the number granted for each of the purposes specified is shown, together with their aggregate area and rental. The estimated value of improvements upon these leaseholds is returned as £84,399 10s.

There were fifty-six new leases granted during the past year, twenty-seven were cancelled, and five leases which expired by effluxion of time were not renewed.

Trespasses.

A record of action taken for the suppression of trespass can only be given for the last quarter of the year. During that time seventeen cases were brought under notice; in eleven the trespasses were voluntarily abated upon notice given; in the remaining six cases informations were laid and complaints heard before Local Benches, with the result of three convictions, and fines amounting to £5 15s.

Destruction of Records.

It seems appropriate that reference should be made to the removal of this office to the Garden Palace during the past year, as well as to the steps taken to meet the difficulties arising from the catastrophe which occurred so soon afterwards.

Business was conducted by us in that building from 1st September, and the requisite fittings and furniture may be said to have been completed by the 21st of that month. Between the hours of 5 and 6 in the morning of Friday the 22nd a fire broke out which destroyed the whole of the building and its contents before the usual hour of attendance.

It may be here remarked that the accommodation afforded would have proved very convenient for the conduct of work, but the public were beginning to complain of inconvenience of access, and the dust and temperature were trying to those employed.

The value of the office furniture and appliances destroyed, irrespective of the numerous and convenient fittings constructed by the Colonial Architect, may be estimated at £275 for the Clerical Branch, but I have been unable to obtain an estimate of the value of the material and instruments lost by the Drafting Branch.

The value of plans, books, records, and forms destroyed cannot be estimated, either as to their intrinsic value, or as regards the increased expenditure caused by the want of them.

A memorandum was submitted upon the course to be followed in the reconstruction of such descriptions of runs as could not be recovered, a copy of which is given in Appendix L. The public and lessees were requested by advertisement in all newspapers published in the Colony to supply assistance by forwarding correspondence received from this office, and lessees of runs were also written to individually asking for plans and descriptions of boundaries of runs held by them, in order that copies might be made, and record again entered of transactions that had received official recognition.

The Departments of Lands, Treasury, and Auditor-General were able to supply valuable material towards the reconstruction of records and registers from the various notices and returns forwarded in ordinary routine from this office to the several Departments.

Lithographic stones containing maps of runs that had been published were fortunately not in our keeping and were preserved, and the records of the offices of two Commissioners of Crown Lands also escaped destruction.

Fresh forms were prepared and appraisers requested to supply duplicates of the awards recently made, and this they were able to do from their notes, so that the important business of determining rents was scarcely delayed, and the preparation of fresh diagrams of runs appraised was at once entered upon.

The accommodation afforded by the Department of Lands enabled us to resume work with scarcely a day's intermission; and though embarrassment, difficulty, and delay must necessarily follow such a holocaust as occurred, the ordinary course of office business was scarcely arrested, and it is hoped that less inconvenience has hitherto been suffered by the public than could at first have been anticipated.

I have, &c.,

T. WARRE HARRIOTT,  
Chief Officer.

## APPENDIX A.

## SALARIES of Officers employed in 1882.

Name of Officer.	Date of entering the Office.	Rank.	Salary.	Totals.

## APPENDIX C.

SCHEDULE showing number of Runs upon the Rents of which Refunds were made during 1882.

District.	No. of Runs.	Area upon which Refund was paid.	Amount of Refund.
		sections.	£ s. d.
Bligh .....	10	79·83	268 11 3
Darling .....	2	66·5	144 0 10
Gwydir .....	4	43	103 16 4½
Lachlan .....	15	110	338 16 5½
Murrumbidgee .....	20	275·16	891 18 3¾
Warrego .....	3	25·31	73 14 3
Wellington .....	6	60·91	180 10 0
	60	660·71*	2,001 7 5¾

\* There are now no records to show the actual area upon which refund was made. Land being withdrawn at different periods of the year, compensation is offered in proportion to the time of withdrawal, and therefore the area actually withdrawn was much larger than that shown above, which is the amount reduced to its equivalent for one year, entered for the purposes of calculation and forwarded to the Treasury. Since our own records are destroyed, the above information could only be compiled from notices supplied by us to the Treasury.

## APPENDIX D.

SCHEDULE of Runs whose Leases were forfeited in 1882 on account of non-payment of Rent.

## APPENDIX L.

MEMO.—Reconstruction of Descriptions of Runs.

SEVERAL descriptions of runs outside the Settled Districts will require to be written afresh, in consequence of the destruction of records by the recent fire.

The method to be adopted in order to arrive at a description which would have an official significance, without an authentic record of past arrangements, requires determination.

When leases were first granted those whose claims to a lease were recognised were called upon to supply descriptions of the land proposed to be included within their several leaseholds, and special officers were appointed to decide between conflicting claims, by a prescribed course of proceedings, such decisions being ratified by His Excellency when approved of.

Some such practice might now be followed; but it is suggested that no complete reconstruction need be at once attempted, but that where no authentic copies of established descriptions are recovered the boundaries of runs could be definitely settled upon expiry of existing leases.

It may be pointed out that under the provisions of the law the Crown is not called upon to decide conflicting claims preferred under current leases, and as a matter of fact the result of litigation in determination of such claims has often been decided by evidence quite outside the documentary evidence supplied by this Office. 6th sect. Occ. Act of 1861.

It would also seem that upon the expiry of a lease the Crown has power to dictate not only the amount of rent but also the limits of the land for which a new lease will be granted; and, under the circumstances which have arisen, it is submitted that advantage might be taken of any such power to revise and render definite the description of every run upon the expiration of existing leases; outstanding disputes, settlements between lessees that have not yet been ratified by the Crown, and other difficulties hitherto dealt with under pressure of immediate requirements only, would be thus systematically encountered. Sect. 9 Occ. Act, 1861.

In

In carrying out such a course the claims and convenience of the outgoing lessees, as well as those of the public, would require consideration. These may be referred to as including—

1. Claims under existing leases.
2. Any desire to exclude a portion of unprofitable or inconveniently situated land.
3. Any desire to subdivide or adjust the internal boundaries of several runs held by one lessee.
4. Making run boundaries conterminous, and making county or land district boundaries conterminous with run boundaries.
5. The exclusion of land within population boundaries, commons, and similar reserves.

To obtain such consideration revised descriptions might be placed before outgoing lessees, and any objection raised or modification desired inquired into, but no new lease granted except under a definite and determinate description; and there seems no reason why such description should not be published as a portion of the required notice concerning determination of rent for a new lease.

As nearly three-fourths of the runs can be shown on charts with sufficient accuracy to show what was described as being comprised within their boundaries, and as old gazetted descriptions are available, it is anticipated that but few cases can arise where the right of occupation under an existing lease could be disputed, or where claims by a lessee could not be admitted or checked, should occasion require.

Occupation of Lands,  
27th September, 1882.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

---

FIFTH ANNUAL REPORT

UPON THE

OCCUPATION OF CROWN LANDS BRANCH

OF THE

DEPARTMENT OF MINES,

NEW SOUTH WALES,

FOR THE YEAR

1883.

---

ORDERED BY THE LEGISLATIVE ASSEMBLY TO BE PRINTED,  
22 *April*, 1884.

---

SYDNEY: THOMAS RICHARDS, GOVERNMENT PRINTER.

1884.

## FIFTH ANNUAL REPORT.

---

TO THE HONORABLE JOSEPH PALMER ABBOTT, ESQ., M.P., MINISTER FOR MINES, &c.

Sir,

In submitting the accompanying Report made by the Chief Officer upon the working of that Branch of this Department which is under his control, it affords me much pleasure to invite your attention to the very satisfactory manner in which the work of the Branch has been conducted during the past year.

The large amount of valuable information respecting the pastoral and special leases in this Colony contained in the Report and Appendices cannot fail to be interesting, while the concise and perspicuous form in which the facts are presented reflect credit upon the Chief Officer.

Department of Mines,  
Sydney, 18 April, 1884.

I have, &c.,

HARRIE WOOD,

Under Secretary.

---

The Chief Officer, Occupation of Lands, to The Under Secretary for Mines.

Sir,

Occupation of Lands Office, 15 April, 1884.

I have the honor to hand you my report upon the work performed in this office during the year 1883.

Staff.  
Schedule 1.

The number of staff officers was twenty-two, of whom eight were employed in the Drafting Branch, which also gave employment to three temporary and three contract draftsmen during the year.

A nominal list of the staff, with particulars of service and salary, is given in Schedule 1, which shows £5,225 to be the yearly expenditure for salaries of permanent officers.

A comparative return of correspondence during the past four years is given in an Appendix to Schedule. It has sensibly diminished during the past year, which may be accounted for in part by causes alluded to in my last report, and also, I am encouraged to think, by the more prompt attention bestowed upon applications and inquiries, a result much assisted by the increased and excellent accommodation now afforded to the staff.

Expenditure and  
revenue.  
Schedule 2.

The details of the total expenditure borne by the office, amounting to £10,651 5s. 6d., are shown in Schedule 2, which also contains a comparative statement of expenditure during the past four years.

The revenue collected through the agency of this office amounted to £266,236 0s. 8d., the details of which, with comparative returns for four years, are shown in an Appendix to Schedule 2.

Report of Chief  
Draftsman.  
Schedule 3.

The Report of the Chief Draftsman is appended as Schedule 3, and a return is attached showing details of mileage surveyed in each pastoral district under the provisions of the 41st section of the Lands Acts Amendment Act of 1875, together with the cost of survey, and the apportionment of cost between the lessees and the Crown.

The total length of boundary lines which have thus been defined upon the ground is nearly 833 miles, and, added to this, above 103 miles have been surveyed at the cost of the lessees interested, making an addition of 936 miles, of which at least one-third was of pressing necessity for the solution of difficulties connected with the estimate of area of runs.

The assistance of lessees towards the compilation of plans showing land withdrawn from lease has been liberally afforded, in cases where claims to refund of rent have been preferred on account of such withdrawals; but the difficulty surrounding this responsible undertaking can scarcely be appreciated by those not accustomed to deal with such matters.

The Chief Draftsman has alluded to the special difficulty found in preparing plans of runs in the Maneroo District, and to the expectation of obtaining from appraisers material assistance in supplementing our scanty information upon the boundaries of those runs. Such expectations were of the nature of a forlorn hope, for those officers were only temporarily employed, and being paid by fees, the time necessary to elucidate such particulars as we desire could only be occasionally afforded, and unless a lessee were both competent and willing to assist, the information would be almost unattainable by any means at an appraiser's command.

Boundaries defined by those of adjoining runs or by unsurveyed natural features, described by local and possibly obsolete names, may be sufficient for occupants' requirements, but do not meet our present demands, whilst the area of unprofitable country that may be included within the actual claims of a run appears to render some lessees unwilling to assist in determining to which run such land belongs, since it cannot now be held at less than 20s. a section.

The destruction of records that would have shown how such claims were formerly recognized, and fencing being upon land withdrawn from lease rather than upon the actual boundaries of such runs, make the preparation of plans required an onerous and tedious task, whilst the contracted area of the land remaining under lease precludes such action and outlay towards forcing a conclusion as might be advisable under other circumstances.

There were 132 runs in the Maneroo District whose leases expired in 1883; the area contained in them is estimated at 2,664,749 acres, of which more than one-half, or 1,399,620 acres, has been withdrawn from lease, leaving the average area of each run at less than fifteen sections; and it is scarcely a matter for surprise that some of the inaccuracies discovered should have occurred when endeavouring to supply appraisers with definite information as to boundaries, and as to the area withdrawn within those boundaries.

#### PASTORAL LEASE BRANCH.

The number of runs whose leases expired in 1883 was 533, and claims to an extension of lease were established for 176, leaving the rent at which a new lease would be granted to be determined in 357 cases.

Appraisers.  
Schedule 4.

Ten appraisers were appointed to inspect these runs, to make awards of rent, and to report upon the effect of improvements made by lessees; the names of these appraisers, and the districts within which they were employed, are given in Schedule 4.

Appraised rents  
Schedule 5.

A return is given in Schedule 5 which shows the area and rent of each run for which a new lease was offered. This shows the estimate of the total area of the 357 runs to be 9,748,421 acres (or 841,348 acres more than they were estimated at in 1878). Out of this area 2,181,278 acres have been withdrawn from the leaseholds; and the new rent proposed is an increase of £6,772 19s. 10d. upon the rent paid for 1883, or an addition of about 12s. 8d. a section, whilst the estimated area appraised is increased by 26 sections.

Rent was also determined in two cases that were held in abeyance for reasons given in a former report; and fresh appraisements were made in sixteen cases where it was shown that an erroneous estimate of area had been made at the former appraisements.

The particulars of these runs are given in Appendix to Schedule.

Average rate of  
rent.  
Schedule 6.

In Schedule 6 is given the total area appraised in each pastoral district during the year, together with the average rate per section of rents determined. The average of the whole is £1 11s. 2 1/2d.; and in drawing conclusions from these figures, the large area of the more valuable land that has been withdrawn from these leaseholds should be borne in mind, as well as the fact that but few of the runs could, in their original state, be placed in a high class as regards grazing capacity.

In computing the refund of rent to be offered on account of land withdrawn since appraisement the average per section paid for 240 runs, coming in that manner under review, was ascertained to be £2 12s. 3 1/4d., ranging from £3 18s. 1 7/8d., in the Murrumbidgee District, to 8s., in the Albert; and this would

would seem to represent a more just average to quote as rent now demanded and paid for pastoral lands than the average paid for all runs, a large proportion of which will not carry stock in their natural state, and the rents of which have been arrived at under varied circumstances.

There were 305 claims preferred for extension of leases at former rent, on account of grazing capabilities having been permanently increased by means of improvements made by lessees on Crown Lands under lease. 263 of these were entertained, and inquiry caused the Minister to be satisfied that the claims should be conceded in 176 cases, whilst in 87 it was decided that the conditions of the 15th clause of the Occupation Act of 1861 had not been complied with, and extension was therefore not granted. Extension of Leases. Schedule 7.

A return (Schedule 7) shows the names and other particulars of these runs, from which it appears that the estimate of their total area is 7,318,260 acres (or 188,800 acres more than was estimated in 1878); from this area 107,060 acres have been withdrawn, leaving 11,267 sections under lease, for which rent at the former rate represents 9s. 10½d. a section.

The distribution of this area and rent amongst the several pastoral districts is shown in an Appendix; and in another is given some particulars concerning improvements and grazing capabilities, as reported by the inspecting appraisers.

The natural capabilities are said to have been increased by 551,854 sheep, but as most of the runs are naturally waterless, the actual development would be represented by larger figures than can be obtained by comparing the present permanent grazing capability with an estimate of what such country might carry during a portion of a year.

By comparing the present rent with what would have been proposed, had the leases been renewed instead of extended, it appears that £8,816 12s. 6d. is the yearly rent remitted on account of the effect produced by lessees' improvements on Crown Lands.

The total value of improvements on these 176 runs is estimated at £426,594, of which £202,730 represent outlay in securing water, and the remission of rent shows 4·3 per cent. upon expenditure for water.

Claims for refund of rent, on account of land withdrawn from runs since they were appraised, have occupied much time and attention. Refunds of rent. Schedule 8.

In Schedule 8 some particulars are given of the number of runs dealt with in each pastoral district, together with the area withdrawn and the refund paid upon it.

The total amount (£16,196 3s. 9d.) does not represent a sum to be deducted from the rent for 1883, but it is the amount accepted by lessees in compensation for withdrawals made since the commencement of the leases current at the date of claims made, up to the date which the several accounts reach. The proportion to be debited against rent for 1883 would be £8,274 4s. 7d.

The number of runs liable to rent for 1883 was 4,315, and the leases of five additional runs were sold during the year, whilst subdivisions also increased the number by 12; but 3 new leases offered were not entered upon, and rent for the year was not paid upon 28 current leases. Unpaid rents. Schedule 9.

Particulars of the 31 runs for which rent was not paid are given in Schedule 9, to which is appended a detailed statement of the runs sold at auction and the subdivisions sanctioned.

There were no tenders for new runs received, and five outstanding from former years were declined. Tenders. Schedule 10.

A comparative statement is appended showing the number of transfers recorded in each pastoral district during the past four years; there were 538 in 1883, against 912 in 1882.

The total area estimated to be under lease is 125,880,398 acres, or 196,688 sections, but, for reasons given in former reports, this must be considered as approximate only. Taking this estimate and applying to it the total rent due for 1883, less refund paid, viz., £255,899 9s. 7d., the average rate per section paid for all lands under five years' pastoral lease appears as £1 6s. 0½d. Area and rent of all runs.

The total increase in the estimate of area included within the boundaries of runs, owing to information supplied by extended survey, now amounts to 8,609,253 acres.

#### SPECIAL LEASES.

A return is appended (Schedule 11) showing the number of leases under the 38th section of the Lands Acts Amendment Act of 1875, which were current in 1883, together with their rent and the purpose for which they were granted. The number of applications received during the year was 259, and 208 were dealt with, 52 having been granted, 139 declined, and 17 withdrawn by applicants, whilst 70 expired by cancellation and effluxion of time. Special leases. Schedule 11.

The number of these leases and the rent received for them during the past four years is shown below:—

	1880.	1881.	1882.	1883.
Number of leases .....	214	279	285	268
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
Annual rent .....	1,673 17 0	2,450 18 0	1,826 1 0	1,679 14 0

There were also 17 occupations of old standing permitted without leases, upon which £73 12s. 6d. was paid.

The number of trespasses upon Crown Land reported during the year was 516. In 108 cases the trespass was abated upon remonstrance; steps were taken by the trespassers to obtain a legal right to occupy in 24 cases; and in 118 proceedings for penalty under the Lands Act were taken, which resulted in 93 convictions, the amount of fines inflicted being £97 11s. 6d. Trespasses.

I have, &c.,

T. WARRE HARRIOTT.

## SCHEDULE 3.

## ANNUAL REPORT, 1883.—DRAFTING BRANCH, OCCUPATION OF LANDS.

2 April, 1884.

THE staff of this Branch consists of eight staff officers; three temporary and three contract draftsmen were also employed during the year. The work of the Branch during the year 1883 has been confined almost entirely to dealing with claims for compensation for land withdrawn from runs since the date of last appraisement, and the revising descriptions and preparing tracings (in duplicate) of the runs to be appraised during the year.

The descriptions of the runs for appraisement were revised where practicable, but, owing principally to the loss of our original plans of survey, the revision could not be made complete; every endeavour, however, was made to insure the accuracy of the areas to be appraised, and, with the exception of the Monaro and the eastern portion of the Murrumbidgee districts, very little error has been found in those areas. In these two districts our difficulties were insurmountable, and no attempt was made to revise the descriptions of the runs in that locality. The runs for the most part are small, and bounded either by unsurveyed ranges, or creeks, or arbitrary lines. Few of the runs are fenced, and we cannot therefore pick the boundaries up from the survey of measured portions as we are able to do in most of the other districts. In some cases we were able to show but very approximately only the boundaries of the runs, and in many could only supply the appraiser with a tracing showing the alienation in and around the run, and leave the boundaries for him to mark on his sketch. Our expectations of obtaining information from the appraisers to enable us to correct our charts were not realized, and they appear to have failed to get the revised descriptions from the lessces that were prepared by the Commissioners, and under which they held their runs. I feel convinced that in many cases the runs in this locality are much under-estimated in area; and in the Monaro District I am aware of a large extent of country not bringing in any revenue. I hope to be able to get the runs in this district in a more satisfactory state, but owing to the press of other important work I am unable to give it the time it requires at present.

About fifty duplicates of plans destroyed in the Garden Palace have been obtained from surveyors; and during next year I hope to obtain duplicate plans of all the most important run surveys.

The compilation of run maps on a scale of 2 miles to an inch has been carried on by two draftsmen; and reliable maps of the counties of Bourke, Cooper, Sturt, Nicholson, Warradgerry, Waljeers, Franklin, Gipps, Dowling, Staplyton, Burnett, and Murchison, showing measured land, &c., have been compiled. The compilation of the Colony map has been deferred until a few more of such county maps as do not exist in the Surveyor-General's Office are compiled; a fresh start may however be made during the year 1884.

The

The number of tracings showing alienation prepared during the year for dealing with claims for compensation amount to about 250, which, in view of the proposed new Lands Act, are made very complete, and are compiled on a scale of 40 chains to an inch. The tracings showing alienations prepared for appraisal amount to about 550; these are in nearly all cases on a scale of 2 miles to an inch, and consequently too small for detailed information.

We commence the year 1884 with about 1,500 tracings of runs showing alienation, being about one-third of the runs in the Colony; of these, nearly 600 are plans giving all information, and are drawn to a scale of 40 chains to an inch.

I append a Schedule giving the results of survey under the 41st clause. The number of surveys conducted under the 4th clause of the Regulations of 1880 only amount to 5, representing a distance of 103 miles 15 chains 29 links, towards which the Government has not contributed.

FRANCIS GERARD,  
Chief Draftsman.

APPENDIX—SCHEDULE 3.

1883.

(THIRD SESSION.)

NEW SOUTH WALES.

**ADDITIONAL TIMBER REGULATIONS.**

(UNDER CROWN LANDS ACTS OF 1861 AND LANDS ACTS AMENDMENT ACT OF 1875.)

Presented to Parliament by Command.

Department of Mines, Forest Branch. Sydney, 13 July, 1883.

**ADDITIONAL TIMBER REGULATIONS.**

WHEREAS by the Crown Lands Alienation and Occupation Acts of 1861, and the Lands Acts Amendment Act of 1875, power was given to the Governor, with the advice of the Executive Council, to make Regulations as therein provided: And it is expedient that Regulations should be made for the purpose of providing for the removal of timber felled on Crown Lands, or bark stripped from trees growing on such lands: Therefore His Excellency the Governor, with the advice of the Executive Council, has been pleased to make the following Regulations.

JOSEPH P. ABBOTT.

**REMOVAL OF TIMBER.**

No. 46. Notwithstanding anything to the contrary contained in the Timber Regulation No. 37, of 24th September, 1878, all timber felled on Crown Lands, or bark stripped from trees thereon, shall be removed from Crown Lands during the currency of the license under which it was felled or stripped respectively: Provided that, if the Minister is satisfied that difficulties exist to the removal of the same within the prescribed period, he may extend such time for removal, upon such terms and conditions as he shall think proper; and all such timber felled or bark stripped which shall not be removed during the currency of such license, or during the further period allowed for that purpose by the Minister, shall be liable to be seized by and on behalf of the Government, and sold by auction or by private contract, upon such terms and conditions and in such manner as the Minister may from time to time direct; and the proceeds of such sale, after the deduction of all expenses, shall be paid into the Consolidated Revenue.

1883.

(THIRD SESSION.)

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

**TIMBER RESERVES.**

(ACREAGE, INCOME, COST, &c.)

*Ordered by the Legislative Assembly to be printed, 11 October, 1883.*

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated the 27th April, 1883, That there be laid upon the Table of this House a Return showing,—

- “ (1.) The total acreage under Timber Reserves at 31 December last.  
 “ (2.) The total income received during the year 1882 from such Reserves,  
 “ for rent, royalty, and timber licenses.  
 “ (3.) The total cost during 1882 for Forest Rangers and managing the  
 “ Timber Reserves.  
 “ (4.) The rent per section which the pastoral tenants pay for the Timber  
 “ Reserves.”

(*Mr. Barbour.*)

RETURN.

	£	s.	d.
1. 4,003,000½ acres.			
2. Rent, royalty, and timber licenses ... ..	11,292	18	10
Ringbarking fees ... ..	1,033	14	0
Total ... ..	£12,326	12	10

3. £12,591 19s. 5d. This includes £729 11s., cost of wattle plantations.

4. So far as can be ascertained, the average rate paid is from £1 12s. 1d. to £2 per square mile.

1883-4.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

**WINDSOR AND RICHMOND COMMONS.**  
(ALLEGED ILLEGAL OCCUPATION OF.)

*Ordered by the Legislative Assembly to be printed, 2 April, 1884.*

RETURN to an *Order*, made by the Honorable the Legislative Assembly of New South Wales, dated 20 November, 1883, That there be laid upon the Table of this House,—

- “ (1.) Copies of all correspondence, minutes, &c., by the Minister for Lands and any official of the Lands Department, having reference to the illegal occupation by Mr. McQuade, M.L.A., and any other person, of a large portion of the Windsor or Richmond Commons.
- “ (2.) Copies of all letters, correspondence, &c., from Mr. McQuade, M.L.A., and any other persons, in illegal occupation of above Commons.
- “ (3.) Copy of the Minister’s decision (if any) in the above case or cases.”

*(Mr. McElhone.)*

## WINDSOR AND RICHMOND COMMONS.

### No. 1.

#### The Surveyor-General to The Colonial Secretary.

Sir,

Surveyor-General's Office, Sydney, 16 January, 1847.

I have the honor to acknowledge the receipt of your letter of 10th December, 1846, relative to the intention of the Crown to regrant, with certain exceptions, the lands which have been set apart for Commons; and in attention to the latter paragraph of your communication, by which you request my report upon the subject of the portions of the grants which it will be requisite to exclude from the new deeds, I have the honor, for the information of His Excellency the Governor, to enclose a tabular statement with remarks showing the present condition of the Commons and what is required to be excluded in regranteeing them, observing that such space might now be left for the future extension of the towns as in the discretion of the surveyors (whose report on each can be obtained) and the town authorities may appear expedient.

I have, &c.,

T. L. MITCHELL,

Surveyor-General.

[Enclosure to No. 1.]

#### SCHEDULE of lands set apart for Commons in New South Wales.

Name in deed.	Area.	Parishes in which situated.	Particulars of towns, &c., which have been taken out of the Common.
* * Richmond Hill .....	* * 600 acres .....	* * St. Matthew and Pitt Town .....	* * None.
* *	* *	* *	* *

### No. 2.

#### The Surveyor-General to Mr. Assistant-Surveyor Galloway.

Sir,

Surveyor-General's Office, Sydney, 20 March, 1847.

In reference to the subject of the lands which have been set apart for Commons, the present tenure of which, as you are aware, has impeded the issue of deeds of grant of the allotments in the principal towns, I have now to inform you that it is proposed to regrant such portions of these Commons as have not been alienated by the Crown or applied to other purposes, and that in the ensuing Session of Council some legislative measure is to be introduced for this purpose; in the meantime all that is necessary to be done in preparing reports upon, and fresh descriptions of, the Commons should be proceeded with. I therefore forward to you a copy of a tabular account of the present state of the Commons which was prepared for the Colonial Secretary, and have to request that you will forthwith take such steps as will enable you to prepare fresh descriptions for insertion in any deed or deeds which the Legislative Council may recommend.

It will not, perhaps, be necessary to make entire surveys of the boundaries of these Commons or to introduce lengths of lines, the apparently advisable course being to refer to existing alienations as boundaries, and to let the deeds of grant of such alienations determine the lengths and bearings. Should there however be any serious encroachments or occupancies, it may be necessary to make them the subject of special report; and it will be advisable to exclude from those Commons out of which towns have been taken sufficient land for the extension of such towns, and even to provide, if necessary, for the establishment of other towns or villages, and to make reservations for any other objects of public utility, convenience, health, or enjoyment—such as spots for burial-grounds or sites for schools and churches.

You will therefore from time to time, as your survey and examination may be completed, hand to me a sketch with a description and report on each of the Commons, but referring specially for instructions should any difficulties to a satisfactory conclusion of your reports be presented.

As this may for a time require your whole attention I have directed Mr. Assistant-Surveyor Shone to hold himself in readiness to perform any surveys in your district to which the Public Service may require immediate attention.

I have, &c.,

T. L. MITCHELL,

Surveyor-General.

### No. 3.

#### Mr. Assistant-Surveyor Shone to The Surveyor-General.

Sir,

Camp, Windsor, 4 September, 1848.

In accordance with the instructions contained in your letter, No. 47-81, originally addressed to Mr. Galloway, on the subject of the lands set apart for Commons, and directing their measurement in order that fresh descriptions might be prepared for insertion in any deed or deeds the Legislative Council may recommend, I do myself the honor to forward herewith a survey of Richmond Hill Common, the description of which I have not as yet made out, as I am in doubt whether to include therein all the encroachments which have been made beyond the original boundaries or to prepare the description from the present alienations which are fenced in.

The most serious encroachment on this Common is that by Mr. Beddell, the present owner of the adjoining land. The other encroachments of the farms on the western side of the Common are (as it will be seen by the plan) of minor importance in places, and may, in a measure, be accounted for by Governor Macquarie, giving (as I have been informed) permission to parties holding farms on South Creek to build back on higher ground in case of floods.

The description can be made out when I receive your instructions in the matter.

I have, &c.,

WM. SHONE.

No. 4.

## No. 4.

## The Surveyor-General to Mr. Assistant-Surveyor Shone.

Sir,

Surveyor-General's Office, Sydney, 24 October, 1848.

With reference to your letter of the 4th ultimo, wherein attention to the instructions conveyed to you by letter, 20th March, 1847, addressed originally to Mr. Assistant-Surveyor Galloway, you forward a survey of the Richmond Hill Common, I have now to request that you will be so good as to furnish forthwith a description of the Common, including the Common, it being the intention of the Government, as intimated to me by the Colonial Secretary, that the question of encroachments should be dealt with by the Trustees themselves.

I have, &amp;c.,

T. L. MITCHELL,  
Surveyor-General.

## No. 5.

## The Surveyor-General to The Colonial Secretary.

Sir,

Surveyor-General's Office, Sydney, 22 December, 1848.

Referring to the correspondence which has taken place relative to the proposed new deeds of grant of Commons, particularly to your letters of 10th of December, 1846, and of 2nd March, 1847, and to your communication of 13th March, 1848, by which it was intimated to me that the descriptions for the new deeds are to embrace all the encroachments, and that the Trustees are to be left to deal with the encroachments, I have the honor to state, for the information of His Excellency the Governor, that very careful surveys have now been made, and descriptions prepared of two more of these Commons, namely, Nelson Common, in the parish of Pitt-town, and Richmond Hill Common, in the parish of Saint Matthew and Pitt-town, and I have the honor to forward copies of the descriptions of both Commons herewith.

The Nelson or Pitt-town Common, as far as can be gathered from the old maps, was intended for the district of Nelson, now the parish of Pitt-town.

The Richmond Hill Common is entirely removed from the district which was formerly called Richmond Hill, and it is difficult to say what lands it was intended to benefit; I have, however, requested the Assistant-Surveyor, Mr. Shone, to make enquiry.

Both these Commons are greatly encroached upon, and should it be considered expedient I would suggest that the removal of encroachments by the Trustees or the obtaining of rent from the encroachments would be greatly facilitated were the Trustees furnished with copies of the plans of the survey.

I have, &amp;c.,

T. L. MITCHELL,  
Surveyor-General.

## No. 6.

## Deed of Grant.

VICTORIA, by the Grace of God of the United Kingdom of Great Britain and Ireland Queen Defender of the Faith and so forth.

To all to whom these presents shall come.

Greeting:

WHEREAS by a certain instrument bearing date on the twelfth day of August in the year of our Lord one thousand eight hundred and four under the seal of the territory of New South Wales and under the hand of His Excellency Philip Gridley King Esquire then our Captain-General and Governor-in-Chief of our said territory the land hereinafter particularly described was allotted as Common land for the use of the settlers and other cultivators holding the surrounding allotments on the east side of the South Creek granted up to the date above mentioned and excluding those holding land on the east side of the Hawkesbury Road but the instrument aforesaid is deemed insufficient in law for the purposes of securing and regulating the rights of Common intended to be thereby granted And whereas by a certain Act of the Governor and Legislative Council of our said territory of New South Wales passed in the eleventh year of our reign intituled "*An Act to enable Trustees of Commons in New South Wales to have perpetual succession and to empower them to regulate the use of such lands as may be granted as Commons within the said Colony and for other purposes relating thereto*" certain provisions were made for the purposes in the title to the said Act mentioned and it is proposed and intended that a grant of the hereinbefore mentioned land should be issued to James Rochester of Windsor James Pendergast of Pitt Town and Samuel Marsden of Windsor and their successors of the same land To hold the same for the benefit of the said settlers and other cultivators holding the surrounding allotments on the east side of the South Creek granted up to the date of the instrument hereinbefore recited and excluding those holding lands on the east side of the Hawkesbury Road as aforesaid to the end of the said land may be vested and held according to the intent and meaning thereof.

Now know ye that in order to promote the interest and convenience of the said settlers and other cultivators holding the surrounding allotments as aforesaid and for the purpose of better securing and regulating the rights of Common intended to be granted hereby and by the hereinbefore recited instruments We do give and grant unto the said James Rochester James Pendergast and Samuel Marsden as Trustees of the Richmond Hill Common and their successors to be appointed as in and by the said Act is provided All that piece or parcel of land in our said territory situated in the County of Cumberland and parishes of Saint Matthew and Pitt Town containing by admeasurement six hundred and eight acres and three roods be the same more or less commencing at the north-west corner of the Common and bounded on the west by the portions of land granted to Carroll Curry and Payne Bates and Aspinall being a line bearing south forty-six chains to a reserved road one chain wide separating W. Aspinall's thirty acres from Joseph Jenkinson's thirty acres then on the west by the reserved road being a line bearing south one chain to Joseph Jenkinson's north-east corner then on the west by Joseph Jenkinson's and Joseph Dullage's grants of thirty acres each being a line bearing south six degrees east twenty chains sixty links then on the west by the thirty-acre portions of land granted to Jacob Russell Richard Burman and James Baker being a line bearing south thirty-one degrees thirty minutes east thirty-five chains twenty links to the north-east corner of Francis Fowke's thirty-acre grant being a line bearing south four degrees east ten chains forty links to a mark on the present fence being the southern boundary point

of

of the Common then on the south-east by Charles Marsden's grant of nine hundred acres being a line bearing east forty degrees north eighty-four chains then on the north-east by the old Hawkesbury Road separating it from Andrew Thompson's grant of two hundred and sixty acres being a line bearing north thirty degrees west sixty chains seventy links then on the north by William Balmain's grant of two hundred and seventy acres being a line bearing west fifty-seven chains fifty links to the north-west corner of the Common as aforesaid being the land advertised as number nine on the Government notice dated 15th January 1850 To have and to hold unto and to the use of the said James Rochester James Pendergast and Samuel Marsden as such Trustees as aforesaid and their successors as aforesaid for ever as a Common to permit the use and benefit of the same to the said settlers and other cultivators holding the surrounding allotments on the east side of the South Creek as aforesaid under and subject to such regulations as may from time to time be made by the said James Rochester James Pendergast and Samuel Marsden and their successors by virtue of the provisions in the said recited Act contained or of any other law or authority in that behalf enabling them Provided nevertheless and we do hereby except and reserve unto us our heirs and successors all such parts and so much of the said land as may hereafter be required for a public way or public ways canals or railroads in over and through the same to be set out by our Governor for the time being of our said territory or some person by him authorised in that respect and also all sand clay stone gravel indigenous timber and all other materials the natural produce of the said land which may be required at any time or times hereafter by the Government of the Colony for the construction and repair of any public ways public works bridges or canals or for naval purposes or railroads or any fences embankments dams sewers or drains necessary for the same together with the right of taking and removing all such materials and also all land within one hundred feet of high-water-mark on the sea-coast and on every creek harbour and inlet of the sea And also all mines of gold and of silver with full and free liberty and power to search for dig and take away the same And also the right of full and free ingress egress and regress into out of and upon the said land for the several purposes aforesaid And we do further reserve unto us our heirs and successors full power for us or them or for the Governor for the time being of our said territory to resume and take possession of all or any part of the said land not hereinbefore reserved which may be required at any time or times for any public roads or works whatsoever And we do also reserve unto us our heirs and successors and to the Governor for the time being of our said territory by such person or persons as shall be by them or him authorised in that behalf full power to make and conduct through the said land all common or public drains and sewers which may be deemed expedient Provided always that if the trusts conditions reservations and provisoes herein contained or any part thereof be not duly observed and performed by the said trustees and their successors then the said land shall be forfeited and revert unto us our heirs and successors and these presents and every matter and thing herein contained shall cease and determine and become absolutely void to all intents and purposes And it shall be lawful for us our heirs and successors by our Governor for the time being of our said territory or some person by them or him authorised in that behalf to re-enter upon and take possession of the said land or any part thereof and the said Trustee or Trustees and their successors and all occupiers thereof therefrom wholly to remove In testimony whereof we have caused this our grant to be sealed with the seal of our said territory.

Witness our trusty and well-beloved Sir Charles Augustus Fitzroy Knight Companion of the Royal Hanoverian Guelphic Order Governor-General of all our Australian Possessions and Captain-General and Governor-in-Chief of our territory of New South Wales and its Dependencies at Government House Sydney in New South Wales aforesaid this thirteenth day of April in the sixteenth year of our reign and in the year of our Lord one thousand eight hundred and fifty-three.

CHAS. A. FITZROY. (L.S.)

*Minute on No. 6.*

Entered on record by me this eighteenth day of April one thousand eight hundred and fifty-three the words from "and its Dependencies" to "New South Wales" having been previously interlined in the attestation at page 315. This registration is now a verbatim copy of the original Deed as executed.

E. DEAS-THOMSON,  
Colonial Secretary and Registrar.

No. 7.

Memorandum.

Richmond Hill Common, 500 or 600 acres, near Mulgrave.

RANGER to see whether any Crown Lands other than the Common are fenced or occupied in this locality.—A.O.P., 17/10/76. Davis, *Australian Office*, Windsor.

*Minutes on No. 7.*

By Surveyor-General:—Forwarded to Mr. D.-S. Evans in accordance with the decision of the Secretary for Lands.—ROBT. FITZGERALD, for Surveyor-General, 5 June, 1878. Mr. District-Surveyor Thos. Evans.

Mr. Licensed-Surveyor Pitt for survey.—THOMAS EVANS, 15 June, 1878.

No. 8.

Mr. Crown Lands Ranger Watson to The Officer-in-Charge, Occupation of Lands.

Sir,

Ryde, 23 October, 1876.

I have the honor to state, from information which I received, I think that Mr. William Smith, near Mulgrave Railway Station, has about 30 acres of Crown Land fenced in with his property, situated near Mulgrave Station. The land referred to is known as the "No Man's Land," and it is at the junction of South and Eastern Creeks and joining Mr. C. Marsden's 900 acres.

I saw Mr. Smith about it. He did not give me a very satisfactory answer. I told him that I should report it to the Government.

I have, &c.,

G. O. WATSON,  
Crown Lands Ranger.

*Minute on above.*

Immediate.—A.O.P., 25 Oct., 1876.

## No. 9.

Mr. Crown Lands Ranger Watson to The Officer-in-Charge, Occupation of Lands.

Sir, Ryde, 25 October, 1876.

I have the honor to state, having been requested to report, that the Trustees of the Richmond Hill Common are letting off portions of the said Common.

It is of no use to the few Commoners, *four*, including *five*, Trustees, making nine in all.

Two of the Commoners stated that the Government should resume and sell it in small lots, as it is of no use to them. I was told that Mr. McQuade has 80 acres, William Smith 80 acres, and Joseph Schofield 20 acres of the said Common. There is very little timber on it. The names of the Trustees are Mr. McQuade, T. B. Johnson, C. W. May, J. Gow, and Michael Raper. The Common contains 600 acres.

I have, &c.,

G. O. WATSON,

Crown Lands Ranger.

*Minutes on No. 9.*

Are the parties referred to identical?—A.O.P., 2/1/77. The parties are identical; the 30 acres mentioned as occupied by Smith adjoins the Common.—G. O. WATSON, 4/1/77. Submitted.—E.L.

For the information of the Under Secretary for Lands. The District-Surveyor should perhaps report.—A.O.P., 16/2/77. Deputy Surveyor-General.

By Surveyor-General:—Mr. D.-S. Evans is requested to report.—ROB. D. FITZGERALD, for Surveyor-General, 3rd March, 1877.

## No. 10.

Mr. District-Surveyor Evans to The Surveyor-General.

Sir, East Maitland, 10 May, 1877.

In compliance with your B.C. instructions of 9th March, No. 77-95, I have the honor to report on a suggestion by Crown Lands Ranger Watson, that the Richmond Hill Common should be sold as stated by Mr. Watson.

Mr. McQuade has a considerable part of the Common included in his paddock, about 20 acres. This is admittedly an encroachment, but one of very old standing. This land is the most valuable part of the Common. Messrs. Smith and Schofield, between them, have more than double that quantity enclosed, also an encroachment of very old standing. The exact extent of these encroachments cannot be ascertained without a survey.

Fifteen persons named in the margin are entitled to Commoners' rights, and these elect the five Trustees; and I think, considering the small number of Commoners, that it would be useless to expect the Trustees to take proceedings against the persons encroaching, some of whom are on the trust.

The land is subject to resumption by the Crown, and therefore is still Crown land, and therefore no period of possession would give a title.

As far as I am aware there is no reason for the sale of the Common. It was granted as a refuge in times of flood, and the necessity exists as much at the present time as formerly. It may be stated that most of the Commoners are poor persons, who are most unlikely to take proceedings against the persons encroaching on the Common, but to whom the use of the Common, even as encroached upon, is of very great use.

I have, &c.,

THOMAS EVANS,

District Surveyor.

Names of Commoners:—  
Edward Raper,  
Michael Raper,  
J. B. Johnson,  
Robert Drew,  
Wm. McQuade,  
James McQuade,  
Samuel Armour,  
John Gow,  
D. Cunneen,  
Mrs. Williams,  
Mary Pendergast,  
Christopher May,  
John McQuade,  
John Brown,  
Wm. Smith.

*Minutes on No. 10.*

By the Surveyor-General:—Upon the report by Mr. District-Surveyor Evans it is submitted for the consideration of the Secretary for Lands that a survey of the Common be made, with a view to the abatement of the encroachment by McQuade and others.—ROB. D. FITZGERALD (for Surveyor-General), 13 June, 1877. Under Secretary for Lands, for approval. By Secretary for Lands:—Approved.—J.S.F., 18/5/78.

## No. 11.

Mr. Licensed-Surveyor Pitt to The Surveyor-General.

Sir, North Richmond, 31 July, 1878.

In reference to your instructions to District-Surveyor Evans, dated 5th June, 1878 (163), I have the honor to state that I have made a survey of the existing outlines of Richmond Hill Common, and herewith forward plan.

The plan shows correctly the true position of the fences, the survey having been very carefully made with the theodolite, and twice gone over.

This Common was remeasured by Mr. Surveyor Shone in 1848. After his survey, and from his boundaries, a new deed was issued.

The bearings and lengths given in the deed do not close by calculation. I think this has occurred by describing boundaries without making any allowance for variation.

I enclose calculations for latitude and departure from the description in the deed, and similar calculations from my traverse.

The line CE on my plan I have no doubt whatever is as near as possible the true boundary of Marsden's grant as laid down by Surveyors Shone, Whitaker, and Armstrong.

The eastern boundary of the Common is the old Hawkesbury Road. It is shown on Mr. Shone's plan, and described in the deed of Common as a straight line; the existing fence is not a straight line, but curved inwards, as shown on my plan. The same applies to the south boundary of the Common. Mr. Shone represents the northern boundary of the Common on his plan by a dotted line entirely within the existing fence, forming the southern boundary of Balmain's grant, but the notes on his plan make no reference whatever to any encroachment.

The western boundary of the Common is the most difficult to determine as it forms the boundaries of several small grants which were measured by Surveyor Grimes in or about the year 1799. According to

to Mr. Shone's plan the boundary of the Common commences nearly a chain north from the existing north-east corner of Mary Carrol's grant, and terminates on the northern boundary of Marsden's 900-acre grant, at a point 8 chains south 50 degrees west from the south-west corner of the fence encroachment by McQuade.

The red lines on my plan follow these boundaries of Mr. Shone's exactly by allowing a variation of 1 degree 7 minutes, but the starting point will be a little further south, namely, 36 links north from Mary Carrol's corner as fenced.

If Mr. Grimes' field-notes could be obtained they would no doubt furnish the necessary information for determining the boundaries in question. The red dotted lines on my plan, which I now forward, correspond with the boundaries shown on an old plan in my possession, but there is not sufficient information on it to enable me to connect with accuracy the terminal points A and C.

I am therefore unable to proceed further with the survey. I wish to be instructed, first, as to boundary of the old Hawkesbury Road; am I to run a straight line, or one parallel to the existing fence; secondly, as to Balmain's boundary; and thirdly, as to the boundaries of the grants on South Creeks.

In the event of a line of railway being constructed to connect the Northern and Western lines the southern junction will probably be on this Common. Consequently it is highly important that the boundaries of the Common should be accurately and permanently defined, and at the same time settle the question of encroachments, as in all probability the land will be considerably enhanced in value.

Having spent considerable time in this survey, both in the field and in the office, and with unsatisfactory results, I trust that as my traverse lines are only temporarily marked you will give this matter your earliest attention.

I have returned, under separate cover, Mr. Shone's field-book, together with a copy of my field notes. From the latter you will perceive that I made a survey of the outlines of Thompson's and Stogdell's grants, with a view, if possible, of ascertaining the variation of the compass since the date of original survey. The variation, so far as I could ascertain from existing marked trees on the boundary of Nelson Common, is 1 degree, but the western boundary of Marsden's grant is apparently only half a degree.

I have enclosed the correspondence.

I have, &c.,

GEO. M. PITT.

No. 16.

The Under Secretary for Lands to The Trustees, Richmond Hill Common.

Gentlemen,

Department of Lands, Sydney, 3 May, 1882.

I am directed to invite your attention to my letter of the 29th July, 1881, requesting you to inform me whether the encroachments upon the Richmond Hill Common have been removed, and I am to request you to be good enough to furnish a reply thereto at your earliest convenience.

I have, &amp;c.,

CHARLES OLIVER,

Under Secretary.

No. 17.

The Trustees, Richmond Hill Common, to The Under Secretary for Lands.

Sir,

Windsor, 20 May, 1882.

We do ourselves the honor to acknowledge receipt of correspondence in the matter of the Richmond Hill Common, Mulgrave, near Windsor.

And in reply thereto, and more particularly to Mr. J. B. Johnston's communication to your Department of date July 9th, 1881, stating that there are numerous and extensive encroachments upon the Common by the parties named, and amounting in the whole to about 135 acres, and there is a small encroachment by Mr. John Gow of about 5 perches, enclosing a waterhole which is a public benefit, this last encroachment is the only one we are cognizant of, and it was not for the public benefit, and it was made by Mr. Gow for his own sole use, and thereby to deprive the other commoners of the use of the water therein collected, but the encroachment has been removed by some person other than Mr. Gow, and not by the direction of any of the Trustees.

With the exception of the encroachments by Mr. John Gow we are not aware of any other, in fact the parties holding land abutting upon the Common, have, either by themselves or their representatives, been in possession of their respective holdings, and have occupied the same for fifty or sixty years. Since we have occupied the position of Trustees we have in no way encroached upon the Common.

We may mention that the Trustees of the Common forwarded to your Department about October last, explaining their administration of the affairs of the same, but we have received no reply to the same.

The Common has been dedicated and granted by the Crown to Trustees for the use of the settlers in time of flood, and being high land affords an excellent refuge at such times, in fact they, the settlers, have no other refuge so easily available and convenient.

We have, &amp;c.,

JOHN M. McQUADE,

Senior Trustee.

C. W. MAY.

*Minutes on No. 17.*

There are papers in the department on this matter. Where is the communication of the 9th July last, herein referred to?—J.D.D., *pro* F. H. WILSON, 26/5/82. ## No. 22.

The Trustees, Richmond Hill Common, to The Under Secretary for Lands.

Sir,

Windsor, 6 April, 1883.

In reply to your letter Miscellaneous 82-19,735, and to several other letters on the same subject, we do ourselves the honor to inform you that we are not aware of any encroachments having been made on the Richmond Hill Common, or any encroachments thereon that we can legally cause to be removed.

We have, &c.,

JOHN M. McQUADE,

Senior Trustee.

C. W. MAY.

*Minutes on No. 22.*

Submitted that the papers be returned to the Surveyor-General.—F.H.W., 14/4/83.

By Under Secretary for Lands :—The Surveyor-General.—C.O., 16/4/83.

## No. 23.

Memorandum by Surveyor-General to Under Secretary for Lands.

15 May, 1883.

THE Richmond Hill Common was surveyed by Mr. Shone in 1848, and considerable encroachments existed, as shown on his plan, but no action appears to have been taken for their removal.

In 1876 the Crown Lands Ranger drew attention to the encroachment on the Common, and upon the report of Mr. District-Surveyor Evans, the Secretary for Lands approved of a re-survey, with a view to the abatement of the encroachments. This re-survey was performed by Mr. Licensed-Surveyor Pitt in 1878, from which it appears that the encroachments still exist as at date of survey by Mr. Shone, and a tracing from Mr. Pitt's plan is enclosed.

The attention of the Trustees has been drawn to these encroachments, and a tracing showing same forwarded to them, but they state that they are not aware of any encroachments thereon that they can legally cause to be removed.

It is submitted for the consideration of the Secretary for Lands as to what further action should now be taken.

G. LEWIS,

(For the Surveyor-General).

*Minutes on No. 23.*

Submitted. Richmond Hill is one of the few Commons for which deeds have issued.

Submitted whether, in view of the fact that a deed has issued for the Common, and the statements made by the Trustees that they are not aware of any encroachment, the Crown should take any further action.—J.D.D., 21/5/83.

Unless it is deemed advisable to call for a further report from a surveyor as to whether the encroachments have been removed, the latest report being dated 31st July, 1878.—F.H.W., 22/5/83.

The Trustees having stated that there are now no encroachments no further action is necessary.—C.O., 26/5/83.

For the information of Survey Office.—J.D.D., 28/5/83.

By the Surveyor-General :—District-Surveyor Woolrych will be good enough to say if the encroachments still exist.—G. LEWIS (for the Surveyor-General), 30 May, 1883.

## No. 24.

## Memorandum by Surveyor-General.

ATTENTION is invited to the minute of the Under Secretary, dated the 26th instant, upon the enclosed papers.

The instruction to Mr. District-Surveyor Woolrych does not appear to be in accordance with the decision referred to. The papers were referred to Survey Office with a view to the decision being noted, and not for the purpose of again referring the case to a surveyor.—J.D.D., 31/5/83. F.H.W., 1/6/83.

*Minutes on No. 24.*

The Survey Office can perhaps state the reason and object of the proposed reference, in view of the fact that the Trustees can alone proceed, state that there are no encroachments.—C.O., 4/7/83.

Also why the reference was about to be made without further submission of the case.—C.O., Survey Office, 5/7/83.

By the Surveyor-General:—In consideration of the facts that two Ministers required reports on the encroachments, and that the encroachment is stated to be in the possession of one of the Trustees, I thought that the case should be brought under the consideration of the Secretary for Lands rather than be dealt with by the Under Secretary; but before requesting that such reference be made I desired to make sure of the facts (as reported by Mr. L.-S. Pitt), by a further reference to the District-Surveyor, a course which, in my opinion, is at all times open to the Surveyor-General, for whom the action was taken.—ROBT. FITZGERALD (for Surveyor-General), 25 July, 1883. Submitted.—F.H.W., 30/7/83.

By the Under Secretary for Lands:—I do not observe that the Deputy Surveyor-General dealt with the case (on the occasion referred to by me) as stated by him. After a direction having been given by me, if further or other action is deemed necessary for some reason not apparent, when the papers were before me, it is proper that my attention should be drawn to the matter.—C.O., 31/7/83. The Surveyor-General.

The Deputy Surveyor-General.—2/7/83.

By the Surveyor-General:—I am of opinion that the Surveyor-General has a right, in the public interest, at any time to obtain a report from a surveyor on any matter, and also that this case should be referred to the Secretary for Lands. The action taken, though signed by Mr. Lewis, was under my direction, and for the Surveyor-General.—ROBT. D. FITZGERALD (for Surveyor-General), 3/7/83.

By the Under Secretary for Lands:—Certainly the Surveyor-General has, and that right has not been questioned; but when I give a direction it should be carried out, unless some reason is advanced to the contrary, and my attention should be drawn to it. That course has not been adopted in this instance, and I drew attention to the fact, and now submit that any other mode of procedure would be irregular, as I may direct certain action which may be put aside in the Survey Office without reference to me. I am sure it can never be held that the permanent head of a department is to be treated in this manner and his directions ignored.—C.O., 13/8/83.

By Secretary for Lands:—With reference to Mr. G. Lewis' memo., which was submitted to the Under Secretary for Lands, relative to alleged encroachment on the Richmond Hill Common, I am of opinion that the memo. of the Under Secretary of the 26/5/83 was a correct view of the matter, especially when read in connection with the letter of the Trustees in answer to a letter from this Department.

The memorandum of the Deputy Surveyor-General containing his opinion as regards the functions of the Surveyor-General relative to his obtaining reports on any public matter from his professional officers, and the submission by him, when necessary, to the Minister in the usual course is correct.

I understand that the Surveyor-General desires the matter of the encroachments on the Richmond Common to be considered by me. The Trustees of the Common hold it in fee simple for the use and benefit of the Commoners, therefore they are the only persons who can legally eject or proceed against trespassers. If the Trustees fail to do their duty it is then for the Commoners to take action in regard to them. The Government most certainly cannot proceed to eject trespassers of their own motion. Mr. George Lewis' memorandum shows that the department has heretofore taken such action as was open to them to preserve the rights of the Commoners. I confess that I am unable to suggest any further action in the matter which would be effective. Perhaps the Commoners, or some of them, might be informed of the facts of the case. This is of course a mere suggestion.—J.S.F., 29/8/83.

By Under Secretary for Lands:—There is one question in connection with this matter which may perhaps not have been clearly put by me, that has not been observed, and I therefore venture to re-submit the papers. The question is whether after my memorandum of the 26th May last further action should have been taken in the Survey Office in opposition to that memo. without my attention having been drawn to the supposed necessity for it. If it be held that such a course is proper my decisions invariably given, as in this case, on behalf of the Minister, when I do not deem a personal reference to the Minister necessary, may be set aside in the Survey Office without my being aware of the fact.—C.O., 30/8/83.

By the Secretary for Lands:—In my memorandum of the 29th instant I did not observe that further reference had been directed to the District Surveyor subsequent to the Under Secretary's minute of the 26th of May. Most certainly this instruction should not have been given without the matter first being submitted to the Minister through the Under Secretary.—J.S.F., 30/8/83.

By Under Secretary for Lands:—The Surveyor-General.—C.O., 30/8/83.

By the Surveyor-General:—I do not understand how I can be said to have "put aside," ignored, or not carried out any action directed to be taken by the Under Secretary, the direction of the Under Secretary being that "no further action was necessary"; but as previously stated, I considered that 130 acres of a Common should not be let fall into the hands of one of the Trustees without at least the knowledge of the Minister. Before however requesting that the case be brought before him (a course which is sanctioned in his minute of 30th August, 1883), I considered it advisable to check the information received and to make certain that the encroachment was held by one of the Trustees—a course which with all due deference it appears to me must be correct as a preliminary step before requesting a resubmission through the Under Secretary; and I would now submit that if it be found beyond all doubt that a part of the Common is in possession of one of the Trustees he might be required to state under what right he holds it.—ROBT. D. FITZGERALD (for Surveyor-General), 7 September, 1883. The Under Secretary for Lands.

By

By Under Secretary for Lands:—The course now suggested by the Deputy Surveyor-General may be pursued.—C.O., 19/9/83.

By Secretary for Lands:—Approved, but this is the submission that should have been originally made by the Survey Office.—J.S.F., 20/9/83.

No. 25.

Memorandum by Surveyor-General to Mr. District-Surveyor Woolrych.

Reserve Branch, Surveyor-General's Office, Sydney, 23 September, 1883.

Memorandum of Instructions.

Subject.

Mr. District-Surveyor Woolrych is requested at his early convenience to report if the encroachments on the Richmond Hill Common still exist, as shown on tracing attached, which is a copy of Mr. Pitt's plan, 1878.

G. LEWIS,  
(For the Surveyor-General.)

Reply.

I have examined the Common alluded to and find the encroachments shown by Mr. Licensed-Surveyor Pitt's plan still existing.

That part tinted pink on tracing is claimed by Schofield, that in yellow by William Smith, and that in brown by John Michael McQuade.

R. BAYLIS MACKENZIE,  
27 October, 1883.

Transferred to Mr. Surveyor R. B. Mackenzie.—  
F. B. W. WOOLRYCH, 29 Sept., 1883.

Received 2nd October, 1883.—R. BAYLIS MACKENZIE.

No. 26.

Question by J. McElhone, Esq., M.P., with answer by The Secretary for Lands.

Wednesday, 14 November, 1883.

Question,—

(25.) Windsor and Richmond Commons:—Mr. McElhone asked the Secretary for Lands,—

- (1.) Is it a fact that Mr. McQuade, M.L.A., or any other person, is in possession illegally or otherwise of a large area of the Windsor and Richmond Commons?
- (2.) Is Mr. McQuade, M.L.A., a Trustee of the Common?
- (3.) What steps (if any) has he taken to dispossess Mr. McQuade, or other persons, of the parts of the Common as above; and will he give early instructions to remove all trespassers off the above Common, irrespective of the position they occupy?

Mr. Farnell answered,—

- (1.) Mr. McQuade, M.L.A., is not in occupation of any portion of the Common. It is alleged that Messrs. J. Schofield, W. Smith, and J. M. McQuade claim portions of the Common.
- (2.) No.
- (3.) The Common is not Crown Land. It was dedicated in 1804, and a deed of grant issued in 1853.

---

No. 27.

Question by J. McElhone, Esq., M.P., with answer by The Secretary for Lands.

Thursday, 20 November, 1883.

Question No. 3,—

- (3.) Windsor and Richmond Commons:—Mr. McElhone asked the Secretary for Lands,—What are the names of the persons who are in possession of any part of the Windsor or Richmond Commons, and what area of the said Common or Commons are the persons referred to in possession of?

Mr. Farnell answered,—

It is alleged that there are encroachments upon the Common by Messrs. Schofield, W. Smith, and J. M. McQuade, of 27½ acres, 66½ acres, and 20 acres respectively.

---

No. 28.

Memorandum.

Richmond Common.

AREA, 608½ acres; dedicated, August 12th, 1804; deed issued, April 13th, 1853. Trustees present:—  
J. M. McQuade, C. W. May, J. Schofield, W. Smith, D. Cunneen.

Trespasses on Common.

1. Schofield, about 27½ acres; 2. Smith, about 66½ acres; 3. McQuade, about 20 acres. Total, about 114 acres. Taken by railway, about 2½ acres.

RESERVE AT VEGETABLE CREEK.

(PETITION OF RESIDENTS OF EMMAVILLE.)

---

*Received by the Legislative Assembly, 30 April, 1884.*

---

To the Honorable the Speaker and Members of the Legislative, in Parliament assembled.

The humble Petition of the undersigned, Residents of Emmaville, Vegetable Creek,—

HUMBLY SHOWETH:—

That by reason of a reserve, gazetted November 23rd, 1883, with an area of 630 square miles, which embraces the whole of the district surrounding the township of Emmaville, and the consequent refusal of the Mining Department to grant leases within such reserve, they are suffering great loss and hardship in their mining and business avocations, and they greatly fear that the whole mining industry of the district will become disorganized and ruined.

2. Your Petitioners respectfully draw your attention to the Mining Registrar's Annual Report, showing that the amount of revenue derived from mineral leases amply compensates the Government for the right to mine for minerals other than gold; and therefore they humbly show the anomaly of enforcing a tax in the form of royalty and want of tenure in a district that is now reduced to the working of our more difficult deep leads and lodes.

3. Your Petitioners view with alarm the action taken in completely locking up such an immense area, and they cannot but fear that the power to place such a restriction on any district may at some time be used to the great injury of the State; and while fully recognizing the necessity for the reservation of land for various public purposes, they are of opinion that more careful steps should be taken in gleaning information as to the need and area of such.

4. The refusal of the Mining Department to grant mineral leases within the area described, your Petitioners respectfully submit, will seriously affect the mining industry, inasmuch as land can only be worked under the 28th section of the Mining Act, which does not give sufficient title to induce capitalists or people of moderate means to carry out the prospecting and exploring operations necessary to develop the mines.

5. Geologists and mining experts aver that the future of this district depends upon the developing of the wet leads and hard lodes, for which purpose companies and capital will be required; the introduction of one or either of which, your Petitioners respectfully submit, is entirely frustrated by the existence of the present regulations, and the chances of the working miner improving his position are greatly lessened.

6. Your Petitioners therefore humbly ask that immediate steps may be taken to allow the ordinary mineral lease regulations to be again brought into force on mineral lands within the prescribed reserve, with such concessions in respect of the original excessive labour conditions as will admit of the lands being worked profitably by the miner, who, under the original regulations, has frequently to lose the result of much outlay in labour and capital through inability to constantly work wet or poor ground when low prices only are obtainable for tin ore.

7. And your Petitioners humbly pray that your Honorable House will take such immediate steps as may, in your opinion, be necessary to relieve them of the grave and serious disabilities they labour under.

And your Petitioners, as in duty bound, will ever pray.
