Reports attendance of House in Council Chamber to hear Opening Speech, 9.		
Reports receipt of Writ, 11, 13.		
Reports issue, and Return of Writ 27 <sup>(2)</sup> , 181, 215, 249, 437.		
Informs House of irregularities at an Election, and issue of Proclamation curing same, 11, 13.		
Reports presentation of Address-in-reply to Governor, and Answer to Address-in-reply, 17.		
Lays on Table Warrant appointing Elections and Qualifications Committee, 11, 25, 93; reports maturity of Warrant, 23, 53, 111.		
Lays on Table Election Petition, 260.		
Reports receipt of Deputy Speaker's Commission to Administer Oath, 53.		
Reports resignation of Member of Elections and Qualifications Committee, 92.		
Directs Member to discontinue his speech on the ground of irrelevance or tedious repetition, 102 <sup>(2)</sup> .		
Reports resignation of Member, 165.		
Reports death of Member, 175, 225.		
Gives Casting Vote, 322.		
Resumes Chair at request of Chairman of Committees, to restore order arising in Committee of Supply, 442.		
Issues his Warrant committing the Honorable Member for West Macquarie, Mr. Crick, to the custody of the Sergeant-at-Arms, 442.		
Directs Sergeant-at-Arms to bring Mr. Crick to the Bar, and an apology having been offered, directs his release from Custody, 450.		
Calls attention to nature of amendments made by Legislative Council in Crown Lands Bill, 398.		
Calls attention to nature of amendments made by Legislative Council in Parliamentary Representatives Allowance Bill (No. 2), 396.		
Calls attention to nature of amendments made by Legislative Council in Sydney Water Supply (Partial Distribution) Bill, which he considered should be disagreed to, 411.		
Calls attention to nature of amendments made by the Legislative Council in the Wollongong Harbour Trust Bill, and regrets that the necessity for calling attention to such matters was growing in frequency, 419.		
<b>RULINGS OF—</b>		
That no debate should take place on the subject of a Petition on the motion for its reception; motion made to dissent from and withdrawn, 101.		
That the motion for the adjournment of a debate having been negatived, and a speech on the main question having intervened, the same motion may be again made, 102.		
That the motion having been carried that all the words stand in an original motion no amendment could be made except by way of additions thereto, 104.		
That amendment proposed to be inserted in Committee in the Public Works Act Amendment Bill was inadmissible, being outside the order of leave and the scope of the Bill, 119.		
That on the motion for the adjournment of the House a discussion on the conduct of a Judge was not irregular provided the language was not disrespectful to the Judge, 125.		
That Wentworth Irrigation Bill does not create an expenditure from the Consolidated Revenue Fund, 229.		
That Blackfriars and Shepherd's Nursery Estates Bill was properly introduced as a Public Bill, 291.		
That Bathurst Cattle Sale-yards Bill was within the Order of Leave, 292.		
That Parliamentary Representatives Allowance Bill (No. 2) was not in contravention of the Constitution Act and Amendment Act in consequence of Members holding offices of profit under the Crown, 296.		
That Inland Waters Conservation Bill imposed a penalty, and was therefore beyond the Order of leave, 320.		
That Enel Bill was not outside the Order of leave by reason of the imposition of penalties in clause 4 and 6, 320.		
That Sheep District Boards (Powers Restoration) Bill did not require to be covered by a Message, 342.		
That Illawarra Harbour and Land Corporation Bill was not properly before the House, its provisions not being authorized by the Order of Leave, nor the notices in the <i>Gazette</i> , 372.		
That Coal Mines Regulation Bill was not beyond the Order of Leave, 374.		
That amendment proposed in Committee of the Whole on Council's amendment was not admissible, as being beyond the scope of and irrelevant to the amendment, 397.		
That a Member using offensive words in Committee, and having withdrawn them, the Member to whom the words were used could not demand an apology, 429.		
That amendment was in order to refer a rival route with proposed Railway to Parliamentary Standing Committee on Public Works, 435.		
That Member could not discuss the import of words taken down in Committee of the Whole on which a motion to refer to the House had been made, 442.		
That in urgent cases of disorder in Committee Speaker could resume Chair to restore order at the request of the Chairman or otherwise, 442.		
<b>SPECIAL ADJOURNMENT :—</b>		
Motion made for, and passed, 18, 79 ( <i>Easter</i> ), 91, 139 ( <i>Queen's Birthday</i> ), 221, 413, 417, 425, 455-		
<b>SPECIAL AREAS (See "CROWN LANDS").</b>

1889.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

BALANCES OF ROADS VOTES.

(INFORMATION RESPECTING.)

Ordered by the Legislative Assembly to be printed, 24 September, 1889.

RETURN to an Order made by the Honorable the Legislative Assembly of New South Wales, dated the 1st August, 1889, That there be laid upon the Table of this House, a Return showing,—

“The amount to the credit of the Roads Officers in the various Roads Districts of the Colony on the 31st December of each year since 1883 up to date; also showing the amount of such sums written off by the Treasurer, and when written off; also specifying all cases in which the local Roads Officers have been consulted prior to writing off such sums, and whether written off on the recommendation of such officers.”

(Mr. Wall.)

Department of Public Works,  
Office of Commissioner and Engineer for Roads, 16 September, 1889.

STATEMENT of Balances to credit of Road Officers with amounts written off on the 31st December of each year since 1883. (Detailed statements herewith.)

Year.	Balances.			Written off.			Remarks.
	£	s.	d.	£	s.	d.	
1883 .....	534,271	1	2	14,922	6	3	As the specification of all cases in which Road Superintendents have been consulted prior to the "writing off" balances since 31st December, 1883, would necessitate great delay in submission of the return, a general statement will probably be sufficient to meet the question. Local road officers are instructed to furnish particulars of balances not required for expenditure, and the amounts are written off accordingly. Balances of a trivial nature are written off without consulting local officer. Where votes or balances thereon lapse in terms of the Audit or Appropriation Acts, the amounts are of necessity written off, and local officer advised thereafter. The balances written off represent, in the majority of instances, the amount unexpended and not required after completion of specific work. Where expenditure of written off votes is found to be requisite, the amount is obtained by re-vote on Estimates of a subsequent year.
1884 .....	417,274	7	9	52,281	8	10	
1885 .....	256,649	13	2	54,755	0	3	
1886 .....	288,400	17	7	19,180	5	5	
1887 .....	293,325	6	7	24,798	6	1	
1888 .....	393,572	19	10	1,332	13	0	
	£ 2,183,994	6	1	167,269	19	10

Sydney : Charles Potter, Government Printer.—1889.

1889.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

ROADS.

(AMOUNT SPENT ON, WITHIN MUNICIPALITIES BY THE DEPARTMENT.)

Ordered by the Legislative Assembly to be printed, 23 July, 1889.

[Return prepared in fulfilment of a promise made by the Secretary for Public Works, in reply to a question by Mr. Perry, M.P., on the 9th July, 1889.]

- (9.) Roads within Municipalities:—Mr. Perry asked the Secretary for Public Works,—  
(1.) Has any money been expended by the Roads Department on roads within municipalities during the last twelve months?  
(2.) If so, will he give the names of the municipalities and the amounts expended in each?  
Mr. Bruce Smith answered,—A Return of this character will take some time to prepare, but will be drawn up and laid upon the Table of the House as quickly as possible, giving the information asked.

AMOUNTS issued to Municipalities from 1st July, 1888, to date, 17th July, 1889.

Department of Public Works,  
Office of Commissioner and Engineer-in-Chief for Roads.

1889.

---

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

---

ROADS.

(CONSTRUCTION OF, WITHIN MUNICIPAL BOUNDARIES.)

*Ordered by the Legislative Assembly to be printed, 19 September, 1889.*

---

*[Return prepared in fulfilment of a promise made by the Secretary for Public Works, in reply to a question by Mr. T. T. Ewing, M.P., on the 28th June, 1889.]*

Question.

Mr. EWING asked THE SECRETARY FOR PUBLIC WORKS,—What amount does the Department of Works save yearly by causing municipalities to construct and maintain the continuations of those scheduled roads which lie within municipal boundaries?

Answer.

Mr. BRUCE SMITH answered,—It will take some time to prepare this information, but a return will be compiled and laid upon the Table of the House as quickly as possible.

From reports furnished by local officers it would appear that to maintain the continuations of scheduled roads which are not provided for on 1889 Estimates, the sum of £13,010 would be required at 1889 schedule of rates.

---

1889.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

**ROADS.**

(APPLICATION BY ALEXANDER WILSON TO PURCHASE—COUNTY BLAND.)

*Ordered by the Legislative Assembly to be printed, 25 June, 1889.*

*[Laid upon the Table of the House, in accordance with promise made by the Honorable the Secretary for Lands, in answer to Question No. 9, Votes and Proceedings No. 26, of 16th May, 1889.]*

RETURN showing cost to the Government of work performed in connection with applications by Alexander Wilson to purchase certain roads, parishes of Warralenga and Brymar, County Bland.

MONEY EXPENDED ON, TAMWORTH TO WARIALDA, TAMWORTH TO GLEN INNES, NARRABRI TO MOREE.

---

*Ordered by the Legislative Assembly to be printed, 13 August, 1889.*

[Return prepared in fulfilment of a promise made by the Secretary for Public Works on the 3rd July, 1889, in answer to a question by Mr. Hassall, M.P.]

---

Questions and Answers.

- (13.) Roads—Tamworth to Warialda, Tamworth to Glen Innes, and Narrabri to Moree:—Mr. Dowel, for Mr. Hassall, asked the Secretary for Public Works,—Will he be pleased to furnish a Return, showing the amount of money expended, from the 1st January, 1879, to 31st December, 1888, on the following roads, viz., Tamworth to Warialda, Tamworth to Glen Innes, Narrabri to Moree? Mr. Bruce Smith answered,—A Return, giving the desired information, shall be prepared and laid upon the Table of the House as quickly as possible.

## No. 1.

## Petition from Residents of Cordeaux River.

The respectful memorial of the undersigned landholders and residents on the Cordeaux River, near Wollongong, in Illawarra, in the county of Camden,

RESPECTFULLY SHOWETH,—

That they are much inconvenienced by the want of a road to their respective farms.

That from the commencement of their residence they have had a road leading from the public road, where it crosses John Garrett's 36 acres, adjoining Collins' 100 acres, now held by Robert Fishlock, after passing which it leads through Casey's 50 acres, Young's 50 acres, and Patrick Collins' 50 acres, to the lots north and east, the name of the purchaser not being known to your memorialists.

That from the rough nature of the ground, being intersected with gullies and creeks, the road we have been using is the only practicable one, but the present proprietor refuses to let us have the use of it any longer.

That the roads measured on the boundaries of some of the farms of your memorialists lead up to the ranges, and are utterly useless to them.

That unless relief be granted your memorialists will be obliged to abandon their farms, whereon, in some instances, the labour of years has been expended, and utter ruin to them and their families must ensue.

Your memorialists would therefore urgently, but respectfully, request that a surveyor be instructed to mark out the road above named, and have it proclaimed a public road.

And your memorialists will ever pray, &c.

John Stewart, Keira Vale,  
James Brown,  
Thomas Cleverton,  
John Osborne,  
Patrick Murphy,  
John Andrews,  
James Dugan,

Allen M'Lean,  
Edward Andrews,  
John Stafford,  
James Taylor,  
W. Stafford,  
W. S. Makin.

Wollongong, 18 June, 1861.

Acting Surveyor-General.—M.F., 16/7/61. Forward to Mr. J. F. Mann in letter, requesting him to make necessary survey and report.—A.G.M., 9/9/61. Licensed-Surveyor J. F. Mann, 12/9/61. Returned, 24/12/61.

## No. 2.

## Mr. Licensed-Surveyor Mann to The Surveyor-General.

Sir,

Sydney, 21 December, 1861.

1. I have the honor to transmit the plan and book of reference of a line of road through certain farms near the head of the Cordeaux River, Illawarra, which I have surveyed according to the instructions received in your letter, No. 61-1,278, of the 12th September.

2. This road, which was petitioned for by John Stewart and twelve other individuals, runs parallel with the Cordeaux River, commencing at the south boundary of John Collins', now R. Fishlock's 100 acres. According to the assertions of many old residents this line was in use prior to any farms being measured on the river, and up to a very recent period. Mr. Fishlock, however, objects to any further thoroughfare through his land, and has fenced across the road, and otherwise obstructed the traffic by falling timber, &c. In the measurement of this 100 acres Mr. Shone does not appear to have reserved this road, but marked off a line 50 links wide round the east boundaries of the farms on this river. This line is comparatively useless, as it is crossed by numerous deep gullies and water-courses, which could only be crossed by expensive bridges and cuttings. I have traced this line of reserved road from Kembala Creek, and find that it is available southerly to the south-east corner of T. Cleverton's 84 acres, and westerly to point A. From this point I have traced a line south to the north side of Fishlock's land, and thence following nearly the course of the old existing track to the south side thereof. This line would satisfy all the petitioners, as it passes over a level country, avoiding all deep creeks and gullies, and the land it would occupy is poor and scrubby. This line, however, passes close to Fishlock's residence, and this fact may be raised as an objection. The residence is a mere hut, and as it is possible to take another course at a greater distance than 200 yards, and which would necessarily pass over good soil, any opposition to the line as shown on my plan ought not to be entertained.

I have, &c.,

JOHN F. MANN,  
Licensed Surveyor.

The enclosed plan and book of reference of the road from T. Cleverton's 84 acres to the road from Cordeaux River to Wollongong, near the south boundary of Robert Fishlock's 100 acres, are forwarded with the view to the opening of the line under the Act 4, William IV, No. 11.—A.G.M., B.C., 10/4/62, No. 521.

Minute for Council, 16/4/62.

## No. 3.

## Minute Paper for The Executive Council.

Department of Lands, Sydney, 25 April, 1862.

THE accompanying plan and book of reference of a proposed road from T. Cleverton's 84 acres to the road from Cordeaux River to Wollongong, near the south boundary of R. Fishlock's 100 acres, are recommended for the approval of His Excellency the Governor and the Executive Council, with a view to the formation of the line under the Act 4 William IV, No. 11.

JOHN ROBERTSON.  
The

The Executive Council advise that the intended formation of the road herein referred to as a parish road, be notified in the manner prescribed by the Act 4 William IV, No. 11.—CHAS. COWPER, JUNR., Clerk of the Council. Minute 62-14, 1/5/62; confirmed, 8/5/62; approved, 9/5/62.—J. Y.

The Surveyor-General is requested to say whether a copy of the plan has been sent to the Bench.—M.F., B.C., 22/5/62. Copies of the plan and book of reference have been sent to the Police Office, Wollongong.—A.G.M., B.C., 30/5/62. No. 62-737; notified in *Government Gazette* of 10th June, 1862. Clerk of the Council, 14/6/62. Clerk of the Council.—M.F., B.C., 25th September.

## Gazette Notice.

Department of Lands, Sydney, 7 June, 1862.

His Excellency the Governor, with the advice of the Executive Council, having deemed it expedient to open and make a parish road (to be maintained at the expense of the parishes through which it passes), from T. Cleverton's 84 acres to the road from the Cordeaux River to Wollongong, near the south boundary of Robert Fishlock's 1,100 acres, running through the lands supposed to be the property of Messrs. James Dugan, James Brown, and Robert Fishlock, notice is hereby given that, in conformity with the provisions of the Act of the Governor and Council 4th William IV, No. 11, a Plan and Book of Reference, showing the intended line of the road above mentioned, are now deposited at the office of the Surveyor-General, in Sydney, and at the Police Office, Wollongong, and all persons interested therein are requested to transmit in writing to the Clerk of the Executive Council, within one month from this date, any well-grounded objections, which may exist to the formation of the road in question.

By His Excellency's command,

JOHN ROBERTSON.

Messrs. Smith and Waring to The Surveyor-General.

## No. 5.

Sir,

We have the honor to acknowledge the receipt of your letter 62-52, of the 30th ultimo, forwarding copies of a Plan and Book of Reference of a road about to be opened from T. Cleverton's 84 acres to the road from the Cordeaux River to Wollongong, near the south boundary of Robert Fishlock's 100 acres.

We have, &c.,

C. T. SMITH, J.P.

GEO. WARING, J.P.,

Mayor.

## No. 6.

The Clerk of the Executive Council to The Secretary for Lands.

Objection to Road.

Sir,

In compliance with the request contained in Mr. Under-Secretary Fitzpatrick's letter of the 14th ultimo, No. 274, I do myself the honor to forward to you the objection lodged with me to the formation of the proposed parish road, noted in the margin.

I have, &c.,

CHAS. COWPER, JUN.,

Clerk of the Council.

Surveyor-General.—M.F., 18/7/62.

The objection is not, in my opinion, of sufficient weight to induce the abandonment of the intention to open the road, and I would therefore recommend its confirmation. I consider, however, that the parties desiring the road should make provision for fencing it where it passes through enclosed lands before the road is formerly opened.—A.G.M., 2/8/62.

Approved.—JOHN R., 25/8/62.

From T. Cleverton's 84 acres to the road from the Cordeaux River, to Wollongong, near the south boundary of Fishlock's 1,100 acres.  
One enclosure.

[Enclosure.]

[Enclosure.]

To the Clerk of the Executive Council,—  
Sir,

16 June, 1862.

Referring to your notice, 7th instant, I have the honor to protest against another parish road being made through my land, for the following reasons, namely :—Because there is one road already through the land, and the proposed road will pass through land that cost me a large sum to clear ; and secondly, because a road equally good can be made adjoining my land without going directly through it.

I have, &c.,  
ROBERT FISHLOCK,  
Cordeaux River, Illawarra.

## No. 7.

## Executive Council Minute.

Department of Lands, Sydney, 30 August, 1862.

It is recommended to His Excellency the Governor and the Executive Council that the line of road from T. Cleverton's 84 acres to the road from the Cordeaux River to Wollongong near the south boundary of Fishlock's 1,100, as notified in the *Gazette* of the 16th June last, be confirmed, under the Act 4th William IV, No. 11, notwithstanding the objection made thereto.

JOHN ROBERTSON.

Clerk of Executive Council.—R. W. W. (for the Under Secretary), B. C., 30/8/62. The Executive Council advise that the road herein referred to be now confirmed as a parish road, in accordance with the provisions of the Act 4 William IV, No. 11.—CHAS. COWPER, JUNR., Clerk of the Council.

Minute 62-29, 1/9/62. Confirmed, 9/9/62. Approved.—J. Y., 13/9/62. Notice in *Government Gazette* of 26th September, 1862. Principal Under Secretary, 30/9/62.

## No. 8.

*Gazette Notice.*

Department of Lands, Sydney, 24 September, 1862.

WITH reference to the Government Notice dated 7th June last, relative to the opening and making a parish road from T. Cleverton's 84 acres to the road from the Cordeaux River to Wollongong, near the south boundary of Robert Fishlock's land : notice is hereby given, in accordance with the Act of Council 4 William IV, No. 11, that having duly considered the objection which has been made to the proposed road, in conformity with the said Act, His Excellency the Governor, with the advice of the Executive Council, has been pleased to confirm the said road, and it is therefore hereby declared expedient to open and make the road referred to, according to the Plan and Book of Reference to be seen at the office of the Surveyor-General at Sydney, and at the Police Office, Wollongong ; and all persons intending to claim compensation in respect of the said line are hereby reminded that notice must be served upon the Colonial Secretary within forty days from the date hereof, in such manner and form as are provided by the sixth section of the Act above referred to, or they will be for ever foreclosed from such claim.

By His Excellency's Command,

JOHN ROBERTSON.

## No. 9.

## Petition.

To the Honorable Charles Cowper, Esq., Colonial Secretary of New South Wales.

The Memorial of Robert Fishlock, of the Cordeaux River, near Wollongong, Illawarra, in the Colony of New South Wales, farmer,

HUMBLY SHOWETH :—

That he is seized of an estate of inheritance in possession of one hundred acres of land situate at the Cordeaux River aforesaid, which he purchased of John Collins.

That a parish road has been proclaimed to be made in pursuance of the Government notice of the 7th day of June last from "T. Cleverton's 84 acres to the road from the Cordeaux River to Wollongong, near the south boundary of Robert Fishlock's."

That the said new line of road cuts through the cultivated land of the said Robert Fishlock's 100 acres from north to south, at the north-west end thereof, and then in a south-east direction close to the farm buildings and dwelling house of the said Robert Fishlock into the reserved road which runs through his land at the south end thereof.

That it will require 280 rods of fencing on the line of the said road.

That the said new road will deprive the said Robert Fishlock of 1 acre and 3 rods, or thereabouts, of his cultivated and cleared land.

That unless the said road is properly fenced in, his ground and crops will be open to the depredation and spoil of all cattle, &c., passing and repassing along the said road.

That the said new road will cut off the said Robert Fishlock from the supply of water along the west boundary of his said ground.

That he estimates his loss of land, &c., as before mentioned at the sum of £100.

That he hereby gives notice that he assesses his damage at the sum of £100 for compensation of the same.

That the said Robert Fishlock is a poor man, and his property is now under mortgage, and his deeds are not in his own possession, so that he cannot have immediate reference to the grant. That he might set forth the date and particulars thereof.

That he has been informed and believes there is no right reserved in the said grant for the making of roads.

Dated this 29th day of October, 1862.

Signed for and on behalf of the said Robert Fishlock by

RICHARD WARING,

His Solicitor, Wollongong.

Mr.

Mr. V. For the Secretary for Lands.—A., 11 November. B.C. 14. Surveyor-General.—M.F., 18 November.

See the late Surveyor-General's memo. upon 62-S,244, and approved of by the honorable the Secretary for Lands. That the parties desiring the road should make provision for the fencing where it passes through enclosed lands before the road is formally opened. Total length of fencing including both sides, would be about 281 rods, at 4s. 6d. per rod, £63 4s. 6d. I think the parties requiring the road ought to be so informed.

The parties may be so informed.—P. F. ADAMS (for the Acting Surveyor-General), 11/3/63. Petitioners informed, 24/3/63.

### No. 10.

#### The Colonial Secretary to The Under Secretary for Lands.

Sir,

Colonial Secretary's Office, Sydney, 24 November, 1862.

In reply to your letter of the 30th September last, No. 53, I am directed to state, for the information of the Secretary for Lands, that no applications have been received in this office for compensation in respect to the line of road from T. Cleverton's 84 acres to the road from the Cordeaux River to Wollongong, excepting that from Mr. Waring on behalf of Robert Fishlock, which has been already forwarded to you under blank cover.

I have, &c.,

W. ELYARD.

The Surveyor-General as usual.—M.F., 25/11/62.

### No. 11.

#### The Acting Surveyor-General to Messrs. Stewart, Brown, and Others.

Gentlemen,

Surveyor-General's Office, Sydney, 24 March, 1863.

With reference to your petition that a road might be opened from T. Cleverton's 84 acres to the road from Wollongong to the Cordeaux River, I have to inform you that the road having been now confirmed only awaits your provision for its fencing through the enclosed land prior to its being formally opened.

I have, &c.,

W. R. DAVIDSON,

Acting Surveyor-General.

### No. 12.

#### R. Waring, Esq., to The Acting Surveyor-General.

Sir,

Wollongong, 23 January, 1864.

On the 24th September, 1862, a parish road was proclaimed (No. 107) from T. Cleverton's 84 acres to the road from the Cordeaux River to Wollongong, near the south boundary of Robert Fishlock's.

This road cuts through the cleared land of Robert Fishlock, and the road is not defined nor can it be so by the plan, the consequence of which is that people who go that way trespass all over the land of the said Robert Fishlock, and it is a continual annoyance and damage to him, and will, without the road is laid out and fenced, work his ruin. It is a case of very great hardship.

He only asks that the road should be properly marked out so that the same may be fenced, and as it is understood that a surveyor from your Department is about to be sent down to Central Illawarra Municipality, it would be desirable that he should, at the same time, mark the road out according to plan.

Your giving directions to that effect will be a great relief, both to Robert Fishlock as also to those settlers that live beyond him and make use of the road, but who are continually at variance, not knowing the right road.

I have, &c.,

RICHARD WARING,

On behalf of ROBERT FISHLOCK.

Memo. for Deputy Surveyor-General.—The petitioners, Messrs. J. Stewart, J. Moran, and others, that were desirous of having this road opened were informed by letter, dated 24th March, 1863, 63-918, "that the road having now been confirmed only awaits your provision for its fencing through the enclosed land prior to its formal opening." The petitioners have not replied to that letter, which makes it a great hardship to Mr. Fishlock. Should not the petitioners be reminded?—T.H.L., 21/3/64.

Inform Mr. Fishlock.—P.F.A., 22/3/64. Mr. Fishlock can prevent the use of the road until it has been formally opened.—1 April. He can without doubt, and may be so informed.—1 April. R. Fishlock, 11/4/63. Petitioners informed.—April. Let me see 64-1,483.—To Mr. Fishlock, 15 September.

### No. 13.

#### The Acting Surveyor-General to R. Waring, Esq.

Sir,

Surveyor-General's Office, Sydney, 11 April, 1864.

In reply to your letter of the 23rd January last, complaining that the road from T. Cleverton's 84 acres to the road from the Cordeaux River to Wollongong is not defined, and stating that Robert Fishlock, through whose land the road passes, suffers great loss from travellers choosing their route

route across it, I have to inform you that Mr. Fishlock can prevent the use of the road until such time as it has been formally opened, which will not take place until the petitioners for the opening of the road have made provision for fencing the enclosed lands through which it passes.

I am, &c.,

W. R. DAVIDSON,

Acting Surveyor-General.

Deputy Surveyor-General.—I think the petitioners may be reminded, 16/9/64. Yes.—W.R.D., 13/10/64. Petitioners reminded, 14/10/64.

#### No. 14.

#### The Acting Surveyor-General to Messrs. Stewart, Brown, and Others.

Gentlemen,

Surveyor-General's Office, Sydney, 14 October, 1864.

I have the honor to inform you that Mr. Robert Fishlock can prevent the use of the road from T. Cleverton's 84 acres to the road from the Cordeaux River to Wollongong until such time as it has been formally opened, which will not take place until you have made provision for fencing the enclosed lands through which it passes.

I have, &c.,

W. R. DAVIDSON,

Surveyor-General.

#### No. 15.

#### The Council Clerk, Dapto, to The Secretary for Lands.

Sir,

Council Chambers, Dapto, 4 April, 1872.

I am directed by the Mayor of the Municipal Borough of Central Illawarra to request that a road at the Cordeaux River leading from T. Cleverton's 84 acres to the road from the Cordeaux River to Wollongong, near the south boundary of Robert Fishlock's land, may be opened as soon as convenient by the proper officer.

This road is now stopped by Robert Fishlock, who has placed thereon certain obstructions such as to cause hindrance to the public; and the Council, at the request of several parties who travel thereon, decline any action in causing the removal of such obstruction until the road is duly declared opened.

The *Government Gazette*, dated 24th September, 1862, page 1841, furnishes full particulars relative to this subject.

I have, &c.,

GEO. OSBORNE,

Council Clerk.

It is recommended that the Council be informed that the road having been proclaimed and confirmed, the opening rests with them. But as a considerable time has elapsed since the survey, the marking may be obliterated, in which case it will be re-marked on application.—ROBT. D. FITZGERALD (for the Surveyor-General), B.C., 22/4/72.

Approved.—J.B.W., 25/4/72. The Council Clerk, Dapto, informed, 4/5/72.

#### No. 16.

#### The Council Clerk, Dapto, to The Secretary for Lands.

(Extract from 72-709.)

Sir,

Borough of Central Illawarra, Council Chambers, Dapto, 15 May, 1872.

I am instructed by the Worshipful the Mayor of this Borough to acknowledge with thanks the receipt of your letter of the 4th instant, in reply to a letter from this Council, dated the 4th ultimo, on the subject of the opening and removal of obstructions to the road at the Cordeaux River to Wollongong, and also to request that you will be pleased to cause an officer to be sent at your earliest convenience, for the purpose of re-marking the road in question, as promised by you on making application.

I have, &c.,

GEO. OSBORNE,

Council Clerk.

#### No. 17.

#### Mr. H. Love to The Secretary for Lands.

Sir,

Cordeaux, Fig-tree Post Office, 23 May, 1872.

I have the honor to request, on the part of myself and others, that the road known as Fishlock's, which leads from the Cordeaux River Road to O'Brien's Road may be opened with all possible despatch.

I and others have petitioned the Municipal Council of Central Illawarra to that end, but can get no satisfactory reply.

The road is, and has been for some time past, blocked by Robert Fishlock, through whose land it runs, and we have no outlet, except by trespass.

I have, &c.,

HUGH LOVE

(Per E. F. SMITH).

Mr. Surveyor Arnheim is requested to re-mark the road referred to.—ROBT. D. FITZGERALD, (for Surveyor-General), 29/5/72.

Transferred to Mr. Licensed-Surveyor Sheaffe, who will be good enough to re-mark the road, in accordance with the tracings of it, and forward his report and account to me for transmission to the Surveyor-General.—E. H. ARNHEIM, 18/12/72.

## No. 18.

## The Council Clerk, Dapto, to The Secretary for Lands.

Sir,

Council Chambers, Dapto, 3 July, 1872.

I am instructed by the Worshipful the Mayor of this Borough to request that you will, as soon as convenient, cause a surveyor to be sent here for the purpose of pointing out the boundaries of the road from T. Cleverton's 84 acres to the road from the Cordeaux River to Wollongong. In reply to a letter, dated the 4th of April last, you stated that this request would be complied with on application. As the road in question is now totally unavailable to the public, by reason of felled timber being placed thereon at the instance of Robert Fishlock, this Council would esteem it as a favour by an officer being sent to unravel the existing doubts as to the boundaries.

I have, &amp;c.,

GEORGE OSBORNE,  
Council Clerk.

Mr. Surveyor Arnheim has been instructed to mark this road.—ROBT. D. FITZGERALD (for Surveyor-General), 20/7/72. Lands, 22/7/72. Inform for approval.—O.R., 23/7/72. Council Clerk informed, 31/7/72.

## No. 19.

## Mr. Licensed-Surveyor Sheaffe to The Surveyor-General.

Sir,

9 March, 1873.

In furtherance of instructions conveyed to Mr. Surveyor Arnheim by your blank cover memorandum, No. 72-25, of 29th May, 1872, and by him transferred to me 18th December, 1872, I have the honor to transmit plan of road from a reserved road on the south of T. Cleverton's 84 acres, to the road from Wollongong to the Cordeaux, within J. Garrett's 46 acres, and to report that I proceeded to mark the road as surveyed by Mr. Licensed-Surveyor Mann, but found that it was impossible to lay out the line shown by Mr. Mann, as S. 42° 30' E. 22° 30', and terminate it on the Wollongong Road, or south of Robert Fishlock's line, as by starting from the corner of the paddock, shown on the original plan. This bearing is directly on the barn, which barn was there at the time of Mann's survey. It appears Mr. Mann made a mistake in reading this bearing. The old track which was in use then being plainly visible still, and in the position of the road shown on my plan, which was pointed out to me by a son of Fishlock's as the road measured by Mann; but as this does not agree with the plan as proclaimed, and this being known to Mr. Fishlock (he having had it surveyed) it appeared to me impossible to open the road as proclaimed, I therefore have made a resurvey of the whole road, and propose that it be now proclaimed again.

2. I am aware that the opening of this road will be opposed by Robert Fishlock, who has always opposed it in the most violent manner, demanding that fencing shall be given him, and as it is unavoidable to take it within 200 yards of his house, it appears necessary to obtain his consent, which can be done by granting him fencing (which he is not entitled to), his land being unenclosed; but as he can prevent it being opened, I presume such consent must be obtained if you decide on opening it. I would also explain that Fishlock will most probably not oppose the proclamation of this road, he being of opinion that it is quite illegal; but would such proclamation make it legal, it passing within 200 yards of his house?

3. The traffic depending on this road is very small, and hardly seems to warrant the expense of opening under these circumstances, as all the farms between Fishlock's and Kembla Creek, on the bank of the Cordeaux, are unoccupied, with the exception of Hugh Love's, which also was unoccupied at the time of my survey. I am not aware of any other necessity for this road.

4. The remainder of this road, from Fishlock's north boundary to the reserved road south of T. Cleverton's 84 acres, agrees with the road as proclaimed, and will not be opposed, nor can fencing be demanded, as the lands are all unenclosed and unoccupied.

5. I have prepared a fencing return, in case you decide on granting it through Fishlock's.

6. I have marked this road in a permanent manner on both sides, and would explain that I was a considerable time occupied in trying to find marks of the original survey which does not appear to have been marked, and as, with the exception of a small portion of cleared land on Fishlock's, the road is through the very densest scrub, I was fully occupied during the time charged for, besides losing the time travelling, as I had no other work in the vicinity.

I have, &amp;c.,

G. H. SHEAFFE,  
Licensed Surveyor.

The discrepancies referred to in this report, and shown on Mr. Sheaffe's plan, will necessitate a new proclamation of the road. I would also submit whether, under existing circumstances, it would not be advisable to allow R. Fishlock compensation for fencing.—E. H. ARNHEIM, B.C., 17/3/73.

[Enclosures.]

3 June, 1873.

THE accompanying plan and book of reference of road from T. Cleverton's 84 acres, to the road from Wollongong to the Cordeaux River, near the south boundary of R. Fishlock's 100 acres, county of Camden, are forwarded with the view to the opening of the line as a Parish Road under the Act of Council 4 William IV, No. 11, in lieu of road confirmed in *Government Gazette*, 24th September, 1862, folios 1841 and 1869. 276, a 1,603. Tracing herewith for the Police Office at Wollongong.

ROBT. D. FITZGERALD  
(For Surveyor-General).

The Under Secretary for Lands.

Approved.—J.S.F., 23/6/73. Minute, 27/6/73.—The Executive Council has authorized the proclamation of this road. Minute 73-30 confirmed, 30/6/73. (See Roads, No. 73/780). The Bench of Magistrates at Wollongong, forwarding plan and book of reference, 12/7/73. *Government Gazette*, 22/7/73. The Clerk of the Executive Council, 25/7/73.

Book of Reference of Road from T. Cleverton's 84 acres to the road from Wollongong to the Cordeaux River, near the south boundry of R. Fishlock's 100 acres, to be opened as a parish road, under the Act of Council, 4 William IV, No. 11, in lieu of road confirmed in *Government Gazette*, 24th September, 1862, folios 1841 and 1869.

Parish Roads.

Department of Lands, Sydney, 22 July, 1873.

HIS Excellency the Governor, with the advice of the Executive Council, having deemed it expedient to open and make the several parish roads mentioned in the Schedule appended hereto, to be maintained at the expense of the parishes through which they pass, notice is hereby given, that, in accordance with the provisions of the Act 4th William IV, No 11, plans and books of reference, showing the intended lines of the roads in question are now deposited at the office of the Surveyor-General in Sydney, and at the Police Offices mentioned.

It is requested that any well-grounded objections that may exist to the formation of the roads in question may be transmitted in writing to the Clerk of the Executive Council within one month from this date.

By His Excellency's Command,  
JAMES S. FARNELL.

No. 21.

The Clerk of the Executive Council to The Secretary for Lands.

Sir,

Executive Council Office, 16 September, 1873.

In compliance with the request contained in the Under Secretary's letter of the 25th July last, I do myself the honor to forward to you the objection lodged with me to the formation of the proposed parish road noted in the margin.

From J. Cleverton's 84 acres to the road from Wollongong to Cordeaux River, near R. Fishlock's 100 acres, county of Camden.

I have, &c.,

ALEX. C. BUDGE,  
Clerk of the Council.

I cannot recommend the confirmation of this road, the objection raised by Mr. Fishlock that it approaches within the prescribed distance of the principal house on the grant being, under the existing law, insurmountable.—ROBT. D. FITZGERALD (for the Surveyor-General), 21/10/73.

Approved.—J.S.F., 29/10/73. The Council Clerk, Dapto, informed, 29/11/73.

[Enclosure.]

To the Clerk of the Executive Council,—

In pursuance of the notice, dated Department of Lands, Sydney, 22nd July, 1873, stating that His Excellency the Governor, with the advice of the Executive Council, had deemed it advisable to open and make a road from T. Cleverton's 84 acres to the road from Wollongong to the Cordeaux River, near the south boundary of my 100 acres, county of Camden, the said road passing through my property, and requesting that any well-grounded objection that might exist to the formation of the said road should be submitted to the Clerk of the Executive Council, I do hereby give you notice that I object to the road in question being opened and made, on the grounds that the said road is placed nearer to my house than it should be, and that I shall be compelled to fence my land at a cost of not less than £28, and that I shall lose 3 acres of land, which I value at £45.

Dated this 20th day of August, A.D. 1873.

ROBERT FISHLOCK  
(By FRANCIS WOODWARD, his Attorney).

No. 22.

Petition.

To the Honorable the Minister for Lands,—

The memorial of the ratepayers and inhabitants of that portion of the Illawarra Municipality called the Cordeaux River,

RESPECTFULLY SHOWETH,—

That your memorialists are proprietors of land or reside at the Cordeaux River, distant from the Wollongong and Kiama road about 4 or 5 miles, and from the town of Wollongong about 7 miles.

That there are two roads connecting the Cordeaux River with the town of Wollongong, namely, O'Brien's Road and the American Creek Road; but there is a proclaimed road at the Cordeaux River, as shown on the accompanying plan, and coloured pink, which would be of great convenience for the use of many of the residents there, enabling them to have access to the American Creek Road, which is nearer, and also more suitable, being less steep than O'Brien's Road.

That such proclaimed road was used by the public for a period of about fifteen years, but has been obstructed by the proprietor of the 100 acres formerly belonging to John Collins, and afterwards Robert Fishlock, and now Robert Wilson, and your memorialists are desirous of having such road opened.

Your memorialists therefore respectfully request that you will cause the necessary steps to be taken to open the road in question for the use of the public.

ROBT. OWEN,  
THOS. MAKIN, SENR.,  
MICHAEL MORAN  
(And seven others).

Presented by the Honorable R. Owen, M.L.C. Have this matter dealt with as soon as possible.—T.G., 18/1/75. This road was proclaimed but not confirmed, owing to the legal objection raised that it passes within the prescribed distance of Mr. Fishlock's house.—P.F.A. Mr. Fishlock might be asked to state the lowest amount he will take as compensation for land and fencing, and to allow of the road being confirmed and opened.—T.G., 7/3/76. Mr. Fishlock asked accordingly, 22/3/76.

No. 23.

Petitioners to S. W. Gray, Esq., M.P.

Sir,

Wollongong, 24 April, 1876.

About two months since I and some other persons residing at the Cordeaux River handed a petition to the Honorable R. Owen, M.L.C., which he has presented to the Honorable Thos. Garrett, Minister for Lands, together with a tracing of the road from Wollongong to the Cordeaux River.

This road goes through Fishlock's 100 acres, and being used for many years was the subject matter of the petition. This land was John Collins' original 100-acre Crown grant—the latter sold to Fishlock, he lately sold it to Mr. Robert Wilson.

Fishlock, several years ago, stopped up this road by falling trees across it, and was by the Court of Petty Sessions committed to take his trial at the Wollongong Quarter Sessions, and being found guilty was, by Judge Dowling, remanded for sentence, with the understanding that if he (Fishlock) cleared off the timber and left the road open for public use again he would not be called up for sentence.

About five or six years since Fishlock again stopped up the road by putting fences across it, and by his violent threats and actions frightened all those who were entitled to use said road from coming on to it.

it. His alienee, Mr. Robert Wilson, persisted in keeping this road closed, causing great inconvenience to several settlers at the back of the road, and prevented the Municipal Council laying out money in repairs of same.

It is respectfully requested that the Minister for Lands will take the proper steps to have said road again opened.

Yours, &c.,

W. S. MAKIN, SEN.

(For self and other petitioners).

Mr. Robert Wilson may be asked if he has any objection to the road being carried out.—T.G., 22/5/76. Robert Wilson informed, 5/6/76.

No. 24.

Mr. R. Wilson to The Secretary for Lands.

Sir,

Cordeaux River, 12 June, 1876.

In reply to yours of 5th ultimo, No. 76-699, asking if I have any objection to a road, leading from Wollongong to the Cordeaux River, being opened through my farm of 100 acres, I beg to inform you that the best and most suitable road for the whole of the residents of the Cordeaux River settlement has been opened and is in full use of the public between Wollongong and the Cordeaux River, and running through a portion of my farm of 100 acres in question.

I have a most decided objection to any other road being opened through the said land, and especially so to the one in question, as it would run through the centre of my farm within a few yards of my dwelling-house and through paddocks now under cultivation. If compelled to do so, I shall take every reasonable and legal objection in my power.

But if the petitioners for this road are willing to pay me for the land it would take from me the damage I would sustain by it running through the centre of my farm and sufficient to pay for fencing it on each side; then I might waive my objection to its being opened.

I have, &c.,

ROBERT WILSON.

I cannot recommend that this road be confirmed on the terms here offered at the expense of the Crown. It is however recommended that the Municipal Council be made aware of them, as they may be desirous of making terms with Mr. Wilson.—ROBT. D. FITZGERALD (for Surveyor-General), 29/6/76.

Approved.—T.G., 3/7/76. The Council Clerk, Dapto, informed, 8/7/76.

No. 25.

Mr. C. C. Russell to The Acting Surveyor-General.

R. 276A, 1,603, Roll.

Dear Sir,

Wollongong, 13 May, 1887.

To save a long explanation, I enclose you copy of my instructions.

Will you be kind enough to let me know at your earliest convenience, whether the road, defined by R. 276A, 1,603 Roll, has been confirmed and opened, and by whom and when.

Your kind attention will much oblige.

Yours faithfully,

CHAS. C. RUSSELL.

The road in question, viz., that from T. Cleverton's 84 acres, to the road from Wollongong to the Cordeaux River, has not been confirmed, and consequently has not been opened. It is recommended that the writer be so informed.—E. TWYNAM, 16/5/87. Under Secretary for Lands.

Inform.—C.O., 17/5/87. C. C. Russell informed, 18/5/87.

[Enclosure.]

Mr. Charles C. Russell, Solicitor, Wollongong.

Sir,

4 May, 1887.

Mr. John T. Craddock has blocked the public road leading from the Cordeaux River Road to Haggett's and Bartlett's land.

This is to authorize you to take immediate action to have the road opened, and we hereby agree to be responsible to you for costs.

THOMAS MACNAMARA,  
M. FISHLOCK,  
MICHAEL MORAN.

THOMAS HAYES,  
GEORGE WALKER,  
JOHN MURRAY.

No. 26.

The Under Secretary for Lands to Mr. C. C. Russell.

Sir,

Department of Lands, Sydney, 18 May, 1887.

With reference to your letter of the 13th instant, respecting road R. 276A, 1,603 Roll, I have the honor to inform you that the road in question, viz., from T. Cleverton's 84 acres to the road from Wollongong to the Cordeaux River, has not been confirmed, and consequently has not been opened.

I have, &c.,

CHARLES OLIVER,

Under Secretary.

11

No. 27.

The Council Clerk, Central Illawarra, to The Secretary for Mines.

Sir, Borough of Central Illawarra, Council Chambers, 28 December, 1887.

I have the honor to inform you that I have been instructed by resolution of Council, passed on the 14th instant, to respectfully request that you will cause the necessary steps to be taken to have a reserved road leading from a farm now in the occupation of Mr. John Sutherland, through land, the property of the Honorable John Stewart, Thos. Macnamara, and John Craddock to the Cordeaux Road confirmed and opened, as Mr. Craddock has fenced the road across in his holding, and will not allow the others ingress or egress.

Mr. H. O. McCabe has been in the locality and had the tracing with him, and states there is a road there; and as he has been instructed to survey the continuation of O'Brien's Road from Parson's Boundary to the Cordeaux River would be able to mark the proper road, whilst in the neighbourhood, if instructed by your Department.

Trusting the matter will receive your favourable consideration, as Macnamara and others are completely shut in, not having access to any road for vehicular traffic,

I have, &c.,  
WILLIAM OSBORNE,  
Council Clerk.

Forward to the Department of Lands and inform.—G.E.H. (for the Under Secretary), 29/12/87.  
Informed, 29/12/87. The Under Secretary for Lands.—G.E.H., B.C. (for the Under Secretary), 29/12/87.

From the information afforded in this letter, the position of the road referred to cannot be identified in this office. The writer should perhaps be requested to supply further particulars such as the name of parish, and numbers of portions through which the road is said to pass, or to furnish a sketch showing the position of the road.—A. J. STORRS (for Surveyor-General), 13/2/88. The Under Secretary for Lands. Approved.—S.F., 9/2/88. The Council Clerk informed, 14/2/88.

No. 28.

The Under Secretary for Lands to The Council Clerk, Central Illawarra.

Sir, Department of Lands, Sydney, 14 February, 1888.

Referring to your letter of the 28th December last, asking to have a reserved road, leading from a farm now in occupation of one John Sutherland, through land, the property of the Honorable John Stewart, Thomas Macnamara, and John Craddock, to the Cordeaux Road, confirmed and opened, I have the honor to inform you that the position of the road referred to cannot be identified in this office, and to request you to be good enough to supply further particulars, such as the name of parish and numbers of portion through which the road is said to pass, or to furnish a sketch showing the position of the road.

I have, &c.,  
STEPHEN FREEMAN  
(For the Under Secretary).

No. 29.

Mr. B. Lipscombe to The Secretary for Lands.

Sir, Wollongong, 22 March, 1888.

I have the honor to enclose herewith a petition from the residents of the Cordeaux River, in this district, in reference to the proclamation of a road marked on the Government plan, which is fenced across by Mr. J. T. Craddock.

Trusting the matter will receive your early attention and favourable consideration,

I have, &c.,  
BENJ. LIPSCOMBE.

[Enclosure.]

The Honorable the Minister for Lands, Sydney,—

The Humble Petition of the undersigned landholders and residents of the Cordeaux River, parish of Kembla,

RESPECTFULLY SHOWETH,—

1. That they are put to great hardship and inconvenience in consequence of a road delineated on the plan of the parish of Kembla, county of Camden, Land District of Wollongong, through the lands I 146, Patrick Collins', jun., 50 acres, portion 199; James Young's I 143, 50 acres, portions 198; Michael Casey's I 142, 50 acres, portion 197; and Patrick Collins' I 130 (ex road) 100 acres, being closed by J. T. Craddock, now the owner of the said 100 acres, who, having fenced across the said road, whereby we are prevented from getting access to the Cordeaux River Road.

2. That application has been made to the Municipal Council of Central Illawarra to have this road opened, which they have failed to do, in consequence of the said road not having been duly proclaimed.

Your Petitioners humbly pray the road in question be proclaimed and opened for the benefit of all residing in the locality, and the public generally.

And your Petitioners, as in duty bound, will ever pray.

THOMAS MACNAMARA,  
MICHAEL MORAN,  
JOHN MORAN,  
Freeholders, Cordeaux.

[Here follow twenty-three other signatures.]

No. 30.

## No. 30.

The Council Clerk, Central Illawarra, to The Secretary for Lands.

Sir,

Borough of Central Illawarra, 31 March, 1888.

In reply to your favour of the 14th February last, No. 88-2 Roads, requesting further information to enable the Department to identify the road referred to in my application of the 28th December last, I have the honor to forward same from the parish map, as follows, viz. :—

Parish of Kembla, second edition; from farm, 8½ acres, Albert Haggett and Windham Bartlett, through Patrick Collins' 50 acres, No. I 146-672; James Young's 50 acres, I 143-672; Michael Casey's 50 acres, I 142-672, and Patrick Collins' 100 acres, I-130-672, to the Cordeaux Road.

The present proprietor (John Craddock) of the latter two farms has closed the road, and stopped the owner of the first named two farms from all means of ingress or egress to or from the said Cordeaux Road, which is the only vehicular road available. Although the road now asked to be confirmed is plainly marked on the above-named parish map, and area of the last named 100 acres is stated as ex road, should the Department request the surveyor who has been instructed to survey the continuation of O'Brien's Road from Parson's boundary to re-mark the above. It could be done with a very trifling expense, and would be a boon not only to the few farmers immediately interested, but would also be a benefit to the general public, and once officially proclaimed and confirmed, the Council would lose no time in putting it into trafficable repair.

Hoping the matter will receive your most favourable attention,

I have, &amp;c.,

WILLIAM OSBORNE,  
Council Clerk.

It is recommended that the Municipal Council of Central Illawarra be informed that the road in question has not been confirmed as Mr. Fishlock's objections were considered to be valid, and barred the establishment of the road.—A. J. STORPS (for the Surveyor-General), 23/4/88.

Inform.—S.F., 27/1/88. The Council Clerk, Central Illawarra, informed, 30/4/88.

## No. 31.

The Under Secretary for Lands to The Council Clerk, Central Illawarra.

Sir,

Department of Lands, Sydney, 30 April, 1888.

In reply to your letter of the 31st ultimo, applying for the confirmation of the road from Messrs. A. Haggott and W. Bartlett's 8½ acres, through P. Collins' 50 acres, Jas. Young's 50 acres, M. Casey's 50 acres, and P. Collins' 100 acres to the Cordeaux Road, parish of Kembla, county of Camden, I have the honor to inform you that Mr. Fishlock's objections were considered to be valid, and barred the establishment of the road in question.

I have, &amp;c.,

STEPHEN FREEMAN  
(For the Under Secretary).

## No. 32.

F. Woodward, Esq., M.P., to The Secretary for Lands.

Sir,

Legislative Assembly, Macquarie-street, 16 May, 1888.

I do myself the honor, at the instance of the Borough Council of Central Illawarra, to forward a letter addressed to you by the Council Clerk of such Council upon the subject of the objections to the road passing through Collins', Casey's, and Collins' land to the Cordeaux River.

I have, &amp;c.,

FRAS. WOODWARD.

The lithograph of the parish of Kembla, referred to in enclosed letter from the Borough Council of Central Illawarra does, as stated, show the road that was marked and preliminarily notified, but abandoned on account of its proximity to Fishlock's house.

With regard to the statement made by the Council that the road in question was originally reserved and excluded from the area of Fishlock's, formerly Collins', 100 acres, it should be stated that the reservation applies to the road from the southern boundary of the land to the crossing of the Cordeaux River, and, consequently, not to the road under consideration, which has not been reserved. Probably the Borough Council and Mr. F. Woodward, M.P., should be so informed.—A. J. STORPS (for Surveyor-General), 18/5/88. Yes.—S.F., 19/5/88. F. Woodward, M.P., informed, 22/5/88.

[Enclosure.]

To the Honorable the Minister for Lands, Sydney,—

Sir,

Borough of Central Illawarra, Council Chambers, 12 May, 1888.

In reply to your letter, No. , stating that Fishlock's objections to the road passing through Collins', Casey's, and Collins' land to the Cordeaux Road were considered valid, I have the honor to invite your attention to the fact that the revised map, years subsequent to Fishlock's objections, shows a 50-link road, and gives the area of said farm (Collins') 100 acres, ex road.

I have further to state that by the original survey of the farms in the Cordeaux neighbourhood, roads were shown as outside the boundaries of the farms, but that in regard to this particular locality was condemned as impracticable, and there is no other way of getting to or from the farm at present occupied by T. Macnamara.

Trusting the Department will reconsider the matter and cause the said road to be opened,

I have, &amp;c.,

WILLIAM OSBORNE,  
Council Clerk.

13

No. 33.

The Under Secretary for Lands to F. Woodward, Esq., M.P.

Sir,

Department of Lands, Sydney, 22 May, 1888.

With reference to your letter of 16th instant, enclosing a communication from the Borough Council of Central Illawarra upon the subject of the objections to the road passing through Collins', Casey's, and Collins' land to the Cordeaux River, I have the honor to inform you that the lithograph referred to by the Council Clerk shows the road that was marked and preliminarily notified, but abandoned on account of its proximity to Fishlock's house.

With regard to the allegation that the road in question was originally reserved and excluded from the area of Fishlock's (formerly Collins') 100 acres, I have to state that the reservation applies to the road from the southern boundary of the land to the crossing of the Cordeaux River, and consequently not to the road under consideration (viz., through Collins', Casey's, and Collins' land) which has not been reserved.

I have, &amp;c.,

F. H. WILLIAMS

(For the Under Secretary).

No. 34.

F. Woodward, Esq., M.P., to The Secretary for Lands.

Sir,

Wollongong, 23 June, 1888.

I have to acknowledge the receipt of your letter of the 22nd instant, further upon the subject of the opening and proclaiming of the road through Collins' 100 acres, Casey's and Collins' 50 acres, and to respectfully urge for your consideration a letter from the Council of the Borough of Central Illawarra, conveying a resolution of such Council thereon, and dealing with the alleged objection to the completing of this case.

I have, &amp;c.,

FRAS. WOODWARD.

Forwarded to Mr. J. W. Deering, Metropolitan District Surveyor, for report, as to the present necessity, in the public interest, for the opening of this road; also, with regard to the cost of fencing that might be claimed.—A. J. STORRS (for Surveyor-General), 3/7/88.

Instruction No. 45.

Returned to the Metropolitan District Surveyor, with instruction No. 1,801, of the 9th July, 1888, with my report, No. 17, of 14th July, 1888.—E. C. S. CHAPMAN, Licensed Surveyor, Camp, Wollongong, 14/7/88.

[Enclosure.]

To the Honorable the Minister for Lands, Sydney,—

Sir,

Borough of Central Illawarra, Council Chambers, 21 June, 1888.

I have the honor to inform you that I am instructed, by resolution of Council, passed on the 20th instant, to respectfully request that you will be pleased to cause the originally marked and preliminary notified road through Collins' 100 acres, Casey's and Collins' 50 acres to be proclaimed resumed if necessary, as the house (Fishlock's), which was then considered a bar, has been removed long since, and at the time of its being closed there were few only interested in its being opened; but the adjoining lands, especially Macnamara's, have been since purchased and cultivated, under the impression that there was a reserved road through the said farms, and until recently the public were not prohibited from travelling.

Again requesting your favourable consideration.

I have, &amp;c.,

WILLIAM OSBORNE,

Council Clerk.

No. 35.

Memorandum from The District Surveyor, Sydney, to Mr. Licensed-Surveyor Chapman.

9 July, 1888.

Proposed road through Collins' 100 acres, Casey's 50 acres, Young's 50 acres, and Collins', jun., 50 acres, parish of Kembla, county of Camden.—No. 1,801, 9th July, 1888.

MR. CHAPMAN is requested to be good enough to report as to the present necessity in the public interest, for the opening of the above road, having reference also to any cost for fencing (if any) that might be claimed.

JOHN W. DEERING,

Metropolitan and Coast District Surveyor.

For report see my letter, No. 17, of the 14th instant, returned herewith.—E. C. S. CHAPMAN, Licensed Surveyor, 14/7/88.

No. 36.

Mr. Licensed-Surveyor Chapman to The Metropolitan and Coast District Surveyor.

Sir,

Camp, Wollongong, 14 July, 1888.

In accordance with your instruction, No. 1,801, of the 9th July, 1888, on Roads 87-43<sup>a</sup>, I have the honor to report that on the 12th instant I visited the locality and made a careful inspection of the proposed route, with the following result:—

1st. That the road required, though not properly pointed out by the Council (Central Illawarra), extends from the Cordeaux Road, near the southern boundary of Patrick Collins', now John Craddock's, 100 acres northerly, passing through the following farms:—Patrick Collins', now John Craddock's, 100 acres aforesaid; Michael Casey's, now also J. Craddock's, 50 acres; James Young's, now John Stewart's,

50

50 acres; Patrick Collins', jun., now Thomas Macnamara's, 50 acres; and Haggett and Bartlett's 84 acres, so as to connect O'Brien's Road, which passes along the southern boundary of Mr. Marshe's 51 acres (shown on litho.\* by brown band), with the Cordeaux Road.

\*Appendix A.

2nd. That the survey of a road affording the connection, as particularized in paragraph 1, is necessary in the public interests, as it would be a more direct outlet than the Wattle Creek Road and passes over almost level country, while the Wattle Creek Road is very rough and stony.

3rd. Commencing at the north-east corner of Haggett and Bartlett's 84 acres, the old measured road between that portion and Robert Owen's 160 acres may be accepted, the country along which is level and as firm as could be obtained. The gully shown on litho. is only small, and a good crossing could easily be made, the land on either side being unimproved.

4th. From the south-east corner of Haggett and Bartlett's 84 acres, if the old measured road, along the back of Patrick Collins', jun., and Thomas Macnamara's 50 acres, were accepted, it would cross just above the junction of two very steep gullies, but, though they are fully 30 feet deep, their width does not in either case exceed 10 feet, so that two small culverts would be all that would be required; and, for this reason, I do not think it advisable, for the sake of securing a fair crossing, to make a deviation into Macnamara's land, as shown on litho. by a black band, though Macnamara would not object.

5th. From the south-east corner of Macnamara's 50 acres, it will be necessary to run the road through J. Young's 50 acres, as shown by blue band on litho. This line would pass through unimproved land, and meet with no difficulties.

6th. From the southern boundary of J. Young's 50 acres it would be better to run the road as shown on litho. by blue band, passing through M. Casey's 50 acres and Patrick Collins' 100 acres, in a southerly direction, both the last-mentioned portions being now the property of John Craddock, who objects to the road passing through his property in any position without compensation. This line would altogether do away with the road as measured by Mr. Licensed-Surveyor Sheaffe, plan R. 276A 1,603, which latter road passes right through Craddock's improvements and within 50 yards of his house, which is erected on M. Casey's 50 acres, as shown on litho.

7th. Although the line of road as proposed by me appears to keep rather far back, yet an excellent line could be obtained, and no serious difficulties would be met with, as it would pass sufficiently far away from Craddock's house and surrounding improvements to allow Craddock no legal right to object to the confirmation or resumption.

8th. The whole of J. Craddock's land is cleared and well grassed, and I estimate the value of it at £8 per acre.

9th. The cost of erecting a good three-rail split fence would be 4s. 6d. per rod, and Craddock says if securely fenced he would not object to the line of road as proposed by me under the foregoing circumstances.

I have &c.,

E. C. S. CHAPMAN,  
Licensed Surveyor.

P.S.—While in the locality engaged upon other surveys, I further ascertained that the line of road as herein proposed by me would afford the following additional advantages to the settlers in the locality:—

1st. That it is a most practicable route, passing as it does, over firm country of easy grades throughout.

2nd. That the village of Kembla, near Mount Kembla, on the Cordeaux Road, owing to the coal industry, is increasing rapidly, and even now offers a market for all produce, and is not more than 3 miles from P. Collins' (now J. Craddock's) 100 acres, the whole of this road being recently well formed, with easy grades.

3rd. That this line of road would be the most practicable outlet for vehicular traffic for not only those actually along the route, but also the present owners of M. Larkins' 151½ acres, P. Murphy's 72 acres, and Wm. March's 51 acres, and many others, all of whom informed me that they would obtain suitable vehicles and travel this road with their produce, while at the present time they are obliged to depend entirely upon pack-horses, their only outlet being Moran's Road (*vide* litho.), along which they have to encounter such steep grades that in wet weather it is almost impassable, even for the pack-horses.

4th. Wattle Creek Road, on the western side of the Cordeaux River, is not only rough, but would be much longer, and necessitate crossing the river twice.

E. C. S. CHAPMAN,  
Licensed Surveyor.

15th August, 1888.

Papers, Roads 89-143<sup>2</sup>; instruction, 1801, of 9th July, 1888, herewith.

Transmitted. It appears from this report that Mr. Licensed-Surveyor Chapman proposes an excellent road (coloured blue on litho.) to supersede Road R. 276A 1,603, surveyed by Mr. Surveyor Sheaffe, and objected to by John Craddock, on account of passing about 50 yards from his house. The road proposed avoids all this, and it seems to me desirable that this road should now be surveyed and opened as a public road. Attention is invited to the fact that Craddock requires compensation for fencing.—J. W. DEERING, 18/7/88.

Macnamara has applied for a road at Quarter Sessions, and such a road may be unnecessary if that now proposed were surveyed and opened.—J. W. D., 26/7/88. Mr. Deering is requested to cause this road to be marked on the ground in the position suggested herein.—E. TWYNAM, 16/8/88. The Metropolitan District Surveyor.

### No. 37.

F. Woodward, Esq., M.P., to The Secretary for Lands.

Sir,

Wollongong, July, 1888.

I have the honor to enclose herewith a letter addressed to you by the Council Clerk of the borough of Central Illawarra, bearing upon the subject of the opening of a road through Collins', Casey's, and Collins' lands to the Cordeaux River Road, together with a petition upon the same subject signed by residents of the Cordeaux River district. May I request that this matter have your early attention.

I am, &c.,

F. WOODWARD.

The

The District Surveyor has recently been asked to report as to the present public necessity for the establishment of this road. It is recommended that Mr. F. Woodward, M.P., and petitioners, be so informed, and that this letter and petition will also be forwarded to the surveyor.—A. J. STOPPS (for Surveyor-General), 24/7/88.

Approved.—S.F., 26/7/88. F. Woodward, M.P., informed, 27/7/88. Forwarded to Mr. J. W. Deering, Metropolitan District Surveyor, in connection with instruction No. 45, of date 5th July, 1888.—A. J. STOPPS (for Surveyor-General), 31/7/88.

[Enclosures.]

To the Honorable the Minister for Lands, Sydney,—  
Sir,

Borough of Central Illawarra, Council Chambers, 12 July, 1888.  
I have the honor to inform you that I am instructed, by resolution of Council passed on the 11th instant, to forward through the Council the enclosed petition, all the signatures to which are genuine of those who require to use the road in question. Trusting the matter will receive your favourable consideration, and that the prayer thereof may be granted,

I have, &c.,  
WILLIAM OSBORNE,  
Council Clerk.

Subject:—Opening road through Collins', Collins', and Casey's land to the Cordeaux River Road.

To the Honorable the Minister for Lands, Sydney,—

The Humble Petition of the undersigned landholders and residents of the Cordeaux River, parish of Kembla,

RESPECTFULLY SHOWETH:—

1. That they are put to great hardship and inconvenience in consequence of a road delineated on the plan of the parish of Kembla, county of Camden, Land District of Wollongong, through the lands I 146, Patrick Collins', junr., 50 acres; James Young's I 143, 50 acres; Michael Casey's I 142, 50 acres; and Patrick Collins' I 130 (ex road), 100 acres being closed by J. T. Craddock, now the owner of the said 100 acres, having fenced across the said road, whereby we are prevented from getting access to the Cordeaux River Road.

2. That application has been made to the Municipal Council of Central Illawarra to have this road opened, which they have failed to do, in consequence of the said road not having been duly proclaimed.

3. That the road in question would be a great convenience to at least nine farms in the neighbourhood, and that it has been used by the residents for more than twenty years, and that if such was opened to the public it would not injure the properties through which it passes.

4. That no other practicable road can be got by which your petitioners can get their produce to market.

That you will be pleased to take the foregoing facts into consideration and grant us the redress asked.

As, in duty bound, your petitioners will ever pray.

THOMAS MACNAMARA, Freeholder.  
JOHN MORAN, Freeholder.  
MRS. MURPHY, Freeholder.

[Here follow twenty-four other signatures.]

#### No. 38.

The Under Secretary for Lands to F. Woodward, Esq., M.P.

Sir,

Department of Lands, Sydney, 27 July, 1888.  
With reference to your letter of the instant enclosing a communication from the Borough Council of Central Illawarra, and a petition from certain residents of the Cordeaux River district, respecting the proposed opening of a road through Collins', Casey's, and Collins' lands to the Cordeaux River Road, I have the honor to inform you that the District Surveyor has recently been asked to report as to the present public necessity for the establishment of the road in question, and that your letter under reply, with enclosures, will be forwarded to the Surveyor.

I have, &c.,

STEPHEN FREEMAN  
(For the Under Secretary.)

#### No. 39.

The Metropolitan and Coast District Surveyor to Mr. Licensed-Surveyor Chapman.

Proposed road at Cordeaux River through J. Craddock's 100 acres and 50 acres, J. Stewart's 50 acres, to Moran's Road, parish of Kembla, county of Camden.—No. 2,133.

16 August, 1888.

MR. LICENSED-SURVEYOR CHAPMAN is requested to be good enough to survey, and mark upon the ground the above road, for proclamation under the Act 4 William IV, No. 11, and to transmit Plan, Book of Reference, &c., in the usual manner.

JOHN W. DEERING,  
Metropolitan and Coast District Surveyor.

Returned to the Metropolitan and Coast District Surveyor with my plan and letter No. 24 of 21st September, 1888.—E. C. S. CHAPMAN, Licensed Surveyor.

#### No. 40.

Mr. Licensed-Surveyor Chapman to The Metropolitan and Coast District Surveyor.

Sir,

Marrickville, 21 September, 1888.  
I have the honor to transmit herewith the plan of a road known as Macnamara's Road at the Cordeaux River, in the parish of Kembla, county of Camden, extending from Moran's Road to the Cordeaux Road, and measured by me on the 19th instant in accordance with your instruction, No. 2,133 of the 16th August, 1888, on Roads 87—<sup>130</sup>/<sub>130</sub>.

2nd. When carrying out the actual survey, I found that there was no necessity to cause a severance of John Stewart's 50 acres, as the old reserved road is suitable for public traffic. The land is so scrubby that when I inspected the route, *vide* Roads 87-14<sup>2</sup>, I thought the road ran higher up the hills.

3rd. The old measured road along the back of M. Casey's, now J. Craddock's 50 acres, and William Shones' 36 acres is very rough throughout, and in many parts impassable.

4th. The route as surveyed by me through J. Craddock's 50 and 100 acres respectively will make a good road, and at the same time necessitate as little severance of those lands as possible, and be situated at a reasonable distance from his house and improvements, &c.

5th. The line of road measured by me passes over good sound country, and will make an excellent road, and of easy grade throughout.

6th. I found it most difficult to establish the original positions of the old measured road accepted by me, owing to the scrubby nature of the land and the age of the original surveys; in this way considerable time was unavoidably taken up.

7th. Should it be decided to fence the road through Craddock's land, I ascertained that a good 3-rail split fence could not be erected under 5s. per rod.

8th. The distances by me do not agree with the originals, but I carefully fixed the respective boundaries as nearly as I could from the marked trees found, &c., in every instance the original chain used appears to have been too long.

I have, &c.,

E. C. S. CHAPMAN,  
Licensed Surveyor.

Instruction No. 2,133 of 16th August, 1888, on roads 87-14<sup>2</sup>. Voucher No. 88-13,635, £21 10s. 6d., four days field; two days field, £16 16s. Account reduced with consent of Mr. Chapman Passed.—G.O.M., 15/3/88.

Transmitted,—JOHN W. DEERING, Metropolitan District Surveyor, B.C., 3/10/88. Roads Branch.

#### No. 41.

### The Acting Surveyor-General to The Under Secretary for Lands.

R. 3,577-1,603. Tracing herewith for the Police Office at Wollongong.

7 February, 1889.

THE accompanying plan and Book of Reference of road known as Macnamara's Road, viz., from Moran's Road at the eastern boundary of A. Haggett and W. Bartlett's 84 acres to Cordeaux Road, near the south boundary of P. Collins, now John Craddock's, 100 acres, parish of Kembla, county of Camden, are forwarded with the view to the opening of the line as a parish road, under the Act of Council 4, William IV, No. 11, in lieu of road confirmed in *Government Gazette* of 24th September, 1862, folios 1841 and 1869.

E. TWYNAM,

Acting Surveyor-General.

For approval.—F.H.W. S.F., 9/2/89.

Approved.—W.J.L., 11/2/89.

Minute, 18/2/89.

#### [Enclosure.]

BOOK of Reference of road known as Macnamara's Road, viz., from Moran's Road at the eastern boundary of A. Haggett and W. Bartlett's 84 acres, to Cordeaux Road, near the south boundary of P. Collins (now John Craddock's) 100 acres, parish of Kembla, county of Camden, to be opened as a parish road, under the Act of Council, 4 William IV, No. 11, in lieu of road confirmed in *Government Gazette* of 24th September, 1862, folios 1841 and 1869.

No.	Portion of Road.	Reputed owner.	Occupier.	Character of Land.	Bearings.	Length in chains.	Enclosures.	Character and state of preservation of fencing.	Cultivation.	Breadth of road.	Area.	Remarks.
	From Moran's Road, at the eastern boundary of Albert Haggett and Wyndham Bartlett's 84 acres, to the northern boundary of Michael Casey's, now John Craddock's, 50 acres.	Boundary	Road ..... #### No. 42.

### Minute for The Governor and Executive Council.

Preliminary notification of road.

Department of Lands, Sydney, 18 February, 1889.

THE authority of His Excellency the Governor and the Executive Council is sought for the opening of the undermentioned line of road, as shown by the accompanying Plan and Book of Reference, in accordance with the provisions of the Act 4th William IV, No. 11, viz.:—Road known as Macnamara's Road, viz., from Moran's Road at the eastern boundary of A. Haggett and W. Bartlett's 84 acres to Cordeaux Road near the south boundary of P. Collins (now John Craddock's) 100 acres, parish of Kembla, county of Camden, in lieu of road confirmed in *Government Gazette* of 24th September, 1862; folios, 1841 and 1869.

WILLIAM JOHN LYNE.

The

The Executive Council advise that the intended formation of the road referred to be notified in terms of the said Act.—ALEX. C. BUDGE, Clerk of the Council. Min. 89/12, 19/2/89. Approved.—CARRINGTON, 19/2/89. Confirmed, 26/2/89. Bench, Wollongong, with Plan and Book of Reference, 28/2/89. Notified, 5/3/89; folio, 1,774. Clerk, Executive Council, 6/3/89. Advertised, 1/3/89. Await objections.

In view of all the circumstances and the fact that this road is to be opened in lieu of another road previously defined, I am of opinion that there is no alternative to confirmation, which is now recommended accordingly.—E. TWYNAM, 3/5/89. The Under Secretary.

Has anything transpired since preliminary notification to throw a doubt on the action of the Department in proclaiming this road?—W.H., 7/5/89.

No; but I was informed when writing my minute of the 3rd instant that Mr. Abbott, M.P., was taking active steps, on behalf of the proprietor, in opposing the opening of this road. Also, I observe that there is a notice of motion on the Business Paper for Tuesday, 21st instant, by Mr. Abbott, M.P., that the papers in this case be laid before Parliament.—E.T., 9/5/89. The Under Secretary.

Submitted.—W.H., 10/5/89. Should be confirmed.—S.F., 28/5/89. Approved.—J.N.B., 1/6/89.

#### No. 43.

#### The Under Secretary for Lands to The Bench of Magistrates, Wollongong.

Gentlemen,

Department of Lands, Sydney, 28 February, 1889.

I have the honor to forward, for deposit in the Police Office at Wollongong for public inspection and information, copies of Plan and Book of Reference of a road which is about to be opened as a parish road under the Act of Council 4th William IV, No. 11, viz.:—Road known as Macnamara's Road, &c., parish of Kembla, county of Camden.

2. Receipt of the Plan and Book of Reference must be acknowledged.

3. At the expiration of forty days you will be good enough to advise this Department as to whether the Plan and Book of Reference have been duly exhibited for public inspection.

I have, &c.,

H. CURRY

(For the Under Secretary).

#### No. 44.

#### Gazette Notice.

Department of Lands, Sydney, 5 March, 1889.

#### Preliminary Notification of Parish Roads.

His Excellency the Governor, with the advice of the Executive Council, having deemed it expedient to open and make the several parish roads mentioned in the schedule appended hereto, to be maintained at the expense of the parishes through which they pass, notice is hereby given that, in accordance with the provisions of the Act 4 William IV, No. 11, plans and books of reference showing the intended lines of the roads in question are now deposited at the office of the Surveyor-General in Sydney, and at the Police Offices mentioned.

It is requested that any well-grounded objections that may exist to the formation of the road in question may be transmitted in writing to the Clerk of the Executive Council, within one month from this date.

By His Excellency's Command,

WILLIAM JOHN LYNE.

#### SCHEDULE REFERRED TO.

Roads No.	Description of roads.	Names of reputed owners or occupiers through whose properties the roads pass.	Police Offices at which the plans and books of reference have been lodged.
87-129 R. 3,577.	Road known as Macnamara's Road, via Moran's Road, at the eastern boundary of A. Haggett's and W. Bartlett's 84 acres, to Cordeaux Road, near the south boundary of P. Collins' (now John Craddock's) 100 acres, parish of Kembla, county of Camden,—in lieu of road confirmed in <i>Government Gazette</i> of 24th September, 1862, folios 1841 and 1869.	Boundary roads; John Craddock; John Garrett; Peter Carr.	Wollongong.

#### No. 45.

#### The Under Secretary for Lands to The Clerk of the Executive Council.

Sir,

Department of Lands, Sydney, 6 March, 1889.

In drawing your attention to the notice in the *Government Gazette* of the 5th instant, respecting the intended formation of a parish road, viz., road known as Macnamara's Road, &c., parish of Kembla, county of Camden, I am directed to request that you will have the goodness at the end of one month from the date thereof to inform me whether any objections have been received by you in respect of the said road in pursuance of the notice alluded to.

I have, &c.,

H. CURRY

(For the Under Secretary).

## NEW SOUTH WALES.

## LANDS FOR PUBLIC PURPOSES ACQUISITION ACT.

(RESUMPTION OF LAND, TOWNSHIP OF NARRANDERA, FOR APPROACH TO BRIDGE  
OVER THE MURRUMBIDGEE RIVER.)

Presented to Parliament, pursuant to Act 44 Vic. No. 16, sec. 6.

NOTIFICATION OF RESUMPTION OF LAND UNDER  
44 VICTORIA No. 16

NEW SOUTH WALES, } By His Excellency The Right Honourable  
to wit. } CHARLES ROBERT, BARON CARRINGTON,  
a Member of Her Majesty's Most  
(L.S.) Honourable Privy Council, Knight  
CARRINGTON, Grand Cross of the Most Distinguished  
Governor. Order of Saint Michael and Saint  
George, Governor and Commander-in-  
Chief of the Colony of New South  
Wales and its Dependencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the construction of a Bridge over the Murrumbidgee River, in the township of Narrandera, in the said Colony, for and towards the completion of which said works public funds are available, and whereas the land hereinafter described is required for approaches to the said works: Now I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do, by this notification, published in the Gazette, and in a newspaper, that is to say, in the "Narrandera Argus," circulated in the Police District wherein the said land is situated, declare that the land hereinafter described has been resumed for the public purposes hereinafter mentioned, that is to say, for and in connection with the approaches to the above Bridge, to the intent that, upon the publication of this notification in the Gazette, the legal estate in the said land shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty, for the purpose of the said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and

discharged from all trusts, obligations, estates, interest, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the intent further that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee with the powers stated in the said last-mentioned Act. And I declare that the following is the description of the land hereinbefore referred to, that is to say:—

All that piece or parcel of land situate in the township of Narrandera, in the county of Cooper, Colony of New South Wales, being allotment 2 of section 26 of the original subdivision of the said township containing 1 acre 2 roods and 19 perches, now or formerly the property of S. I. Flood. Bounded on the north by Gundagai-street: Commencing at a point on the south side thereof, distant 2 chains easterly from its intersection with the east side of Adams-street being the north-east corner of allotment 1 and bearing easterly 2 chains; on the east by a line bearing southerly to the Murrumbidgee River dividing it from allotment 3; on the south by a line westerly along the bank of that river 2 chains more or less to the south-east corner of allotment 1; and on the west by a line bearing northerly dividing it from that allotment, to the point of commencement.

In witness whereof, I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twenty-third day of September, in the year of our Lord one thousand eight hundred and eighty-nine, and in the fifty-third year of Her Majesty's Reign.

By His Excellency's Command,

BRUCE SMITH.

GOD SAVE THE QUEEN!

1889.

NEW SOUTH WALES.

**RAILWAYS AND TRAMWAYS.**

(QUARTERLY REPORT OF RAILWAY COMMISSIONERS, ENDING DECEMBER, 1888.)

Presented to Parliament, pursuant to Act 51 Vic., No. 35, sec. 44.

Offices of the Railway Commissioners of New South Wales,  
31st January, 1889.

TO THE HONORABLE THE MINISTER OF RAILWAYS,—

Sir,

In accordance with the provisions of the 44th clause of the Railway Act of 1888, 51 Vic. No. 35, we have the honor to submit, for the information of Parliament, our report for the quarter ending 31st December, 1888, upon the subjects specified, viz. :—

- (I.) "The state of the traffic returns, with the approximate cost and earnings of trains, per ton,\* per train mile, in respect of goods and passengers respectively, carried during the past quarter."
- (II.) "The general condition of the lines, and accommodation for the traffic."
- (III.) "The special rates, if any, which have been made, and the reasons for making such rates."
- (IV.) "The appointments and removals of employes, with the circumstances attending each case."

I.—STATE OF THE TRAFFIC, &c.

Railways.	Quarter ending 31st December, 1887.	Quarter ending 31st December, 1888.
Revenue from all sources ... ..	£671,253	£757,881
Expenditure ... ..	£422,994	£419,150
Number of passengers ... ..	3,789,015	4,170,043
Tons of goods... ..	830,511	688,150
Tons of live stock ... ..	17,603	29,805
Train miles run ... ..	1,724,439	2,097,116
Earnings per train mile ... ..	7/9½	7/2¾
Expenditure per do ... ..	4/10¾	4/-

\* The information as to the earnings per ton per train mile, the officers state, cannot be given, as such a large proportion of the train mileage is used for carrying both goods and passenger traffic.

Tramways.	Quarter ending 31st December, 1887.	Quarter ending 31st December, 1888.
Revenue from all sources ... ..	£57,986	£62,408
Expenditure ... ..	£58,849	£58,326
Number of fares collected ... ..	13,130,373	14,346,102
Train miles run ... ..	340,110	377,386
Earnings per train mile ... ..	3/5	3/3 $\frac{1}{4}$
Expenditure per do. ... ..	3/5 $\frac{1}{2}$	3/1

The falling off in the tonnage of goods carried (over 140,000 tons) is due to the suspension of the work at the collieries in the Newcastle District, owing to the strike of the miners.

#### II.—CONDITION OF THE LINES.

The report of the Engineer for Existing Lines is printed as an appendix, page 5.

#### III.—SPECIAL RATES.

The special rates authorized are printed in an appendix, page 5.

#### IV.—STAFF.

This information will be found on pages 6, 7, and 8.

#### GENERAL REMARKS.

The Commissioners entered upon their duties on the 22nd October, 1888, and since that date have travelled over and inspected the entire system of railways placed under their charge.

##### *Condition of the Lines.*

The Commissioners have found, on their personal inspection of the lines, that a considerable amount of money will have to be spent out of revenue in excess of what has been done in the past in painting station-buildings and in relaying the permanent way with steel rails, as a large quantity of the original rails and light chairs, weighing only 25lb. each, which were put in many years ago, are still in the roads, and the rails show much signs of wear. The Commissioners hope, however, to be able to effect economies in various ways, so as to meet this additional expenditure to a great extent.

##### *Rolling-stock.*

The rolling-stock generally is far from being in a satisfactory state, very little painting having been done for years past; and a large number of antiquated carriages with open sides are still standing on the books at their original value. Many of these carriages cannot be brought into use for the ordinary and general traffic, and consequently difficulty is often experienced in providing sufficient rolling-stock for the ordinary working. We propose to renew these vehicles out of revenue as soon as possible.

The locomotives are also needing much attention, as when we took office no less than 74 out of a total of 429 engines were under or waiting repairs.

Revenue

Revenue in future years should, in our opinion, be called upon to bear much larger sums for replacing engines, waggons, and carriages than has been the case in past years, instead of adding to the stock at the expense of the capital account, except to meet increased traffic and opening of new lines.

There are no less than 42 types of locomotives, and the types of carriages and waggons are also numerous, making it very expensive to maintain the stock, contributing to its being kept out of work much longer than should be the case when repairs are required, and also necessitating a greater amount of stores being kept on hand than would be the case under a different system. Plans are being prepared for standard types of engines, carriages, and waggons, and we hope by adopting greater uniformity and consequent interchangeability of parts in a few years to materially improve the rolling-stock without increasing the expenses.

There have been great complaints throughout the Colony regarding the inability of the Department to provide waggons for the conveyance of live stock. This, as is well known, has arisen partly in consequence of the live-stock vehicles not having been increased since 1885, in consequence of a decision not having been arrived at regarding the "combination truck"; the traffic has also been unusually heavy. After carefully considering the question in all its bearings with the principal officers of the Department, we came to the conclusion that, although theoretically there was a good deal to be said in favour of the combination truck, yet in the actual daily working of the railways the advantages gained would not justify us in paying the largely-increased cost of constructing such trucks; we have therefore ordered 100 cattle-waggons and seventy-five sheep-vans of the ordinary type, and this addition to the stock will, we think, meet the present requirements of the country.

#### *Accommodation for the Traffic.*

Throughout the country we found the accommodation generally sufficient for the traffic, the stations and sidings having originally been well laid out. A good number of requirements of a minor character were, however, brought before us, which will be dealt with. On some of the sections of the lines opened in the early days of railways, such as at Newcastle, Maitland, &c., it will be necessary to spend a considerable sum of money at an early date to facilitate the growing trade.

Several collieries are being opened out between Hamilton Junction and Teralba, and it may be necessary ere long to continue the duplication of the short piece of double line authorized from Hamilton Junction to Adamstown as far as Teralba, a length of 9 miles.

The suburban traffic of Sydney calls for an early decision regarding the extension of the railway from Redfern into the city, as, unless the line is carried further into the city (which course we strongly recommend, as not only will it be a great convenience to the public, but will, in our opinion, ensure a large development of traffic), the station at Redfern must be rearranged and considerably enlarged. We have authorized a modification of the existing lines at the Redfern Station, so as to give slight relief for a time.

The quadrupling of the lines from the city to Homebush, and the doubling of the line from Granville to Liverpool, must also be proceeded with at an early date.

The

The goods traffic of Sydney requires consideration at our hands, as the long cartage to Redfern Station, and the inadequate accommodation there, does not afford satisfaction to the public, and a plan is under consideration for providing a new outwards goods depôt at Darling Harbour.

*Tramways.*

The rolling-stock for the tramways was found to be very deficient, and so soon as it was decided by Parliament not to lease the lines we called for tenders for the construction of twenty-four additional cars, eight of which will be delivered by the month of March and the remainder early in June. When these vehicles are available the requirements of the public will be much more satisfactorily met, and we anticipate a considerable increase in traffic in consequence.

We have the honor to be,

Sir,

Your most obedient Servants,

E. M. G. EDDY,

W. M. FEHON,

CHARLES N. J. OLIVER,

} Railway  
Commissioners.

## APPENDIX.

## APPENDIX 1.

## Minute from Engineer for Existing Railways to Secretary for Railways.

Department of Public Works, Railway Branch, Existing Lines,  
Engineer's Office, Sydney, 14 January, 1889.

*Subject* :—Report on condition of lines, quarter ending 31st December, 1888.

As directed in the Commissioner's M. P. 88-22,178, I have the honor to report as follows on the condition of the Railways and Tramways under my charge, for the quarter ending 31st December, 1888:—

The Railway Lines generally have been maintained in good running order, with the exception of a few places, where, on account of the settlement of the banks and other causes, roughness has been found, and difficulty experienced in keeping a good running top on the road.

Between Picton and Albury, on the Southern Line, the need for early renewal of the rails is beginning to make itself apparent; and from Goulburn, southerly, the work of renewing the sleepers has had to be continued with as much despatch as possible. The sleepers on the Cooma Line, as far as Bungendore, are also decaying rapidly.

The newly-opened portion of the Illawarra Line, between Waterfall and Clifton, has given trouble, more especially near Stanwell Park. At this place there are heavy embankments which are not yet consolidated, and require the closest attention to keep them safe for traffic. The road over them needs lifting from end to end after every rainfall, and considerable time must elapse before their condition can be regarded as satisfactory.

On the Western Line, from Orange to Wellington, the road is rough and knotty in places in consequence of the decayed condition of the sleepers, which are being replaced as rapidly as practicable, and there are soft spots on the banks and at bridge ends from Wellington to Nevertire. Between Nevertire and Nyngan the permanent-way is very rough and difficult to keep in even fair running order. The formation on this section is of a soft and spongy character, and the ballast is not of a suitable quality to form a solid road-bed; consequently the road is too lively, and is knocked out of line by passing trains, which here travel at a high rate of speed. From 490 miles to Bourke there are long banks of black soil which go down and give trouble after every rainfall, and in continuous wet weather render it necessary to reduce speed over them.

The cuttings between 136 miles and 142½ miles, on the Mudgee Line, continue to slip, so that the night patrol is still necessary to ensure the safety of trains passing over that portion of the line.

The bridges have been carefully attended to, but there are several of the timber structures in the Metropolitan District which will require extensive repairs or renewal at no distant date.

The Tramway Lines have been kept in good order and condition, although on portions of the Metropolitan Lines the rails are much worn, and will require to be renewed at an early date.

The relaying and wood-paving of the lines from Hunter-street to Liverpool-street, and from Elizabeth-street to College-street, have been completed. The whole of the line from Redfern Station to the terminus is now laid with heavy rails, and the greater portion wood-paved, which will enable the maintenance expenses of this section to be considerably reduced.

GEORGE COWDERY.

## APPENDIX 2.

## New South Wales Government Railways.

STATEMENT, in accordance with clause No. 44 of the Railway Act, showing the special rates which have been made, and the reasons for making such rates, quarter ending 31st December, 1888.

Article.	Rate.	Reason for such Rates.
Bismuth .....	3rd class .....	High value of mineral, and would bear higher rate.
Glass .....	4th class .....	To be charged same as plate-glass.
Bricks .....	10 miles and under, 1s. 3d. per ton; 11 and 12 miles, 1s. 4d. per ton; 13 and 14 miles, 1s. 5d. per ton; 15 miles, 1s. 6d. per ton. Subject to miscellaneous class conditions.	To encourage the brickmaking industry.
Butter-kegs and cases empty return..	Free .....	In consideration of full loading one way, and to encourage the trade.
Starving stock.....	25 per cent. reduction on ordinary rates .....	In order to assist the owners of stock during the drought.
Permanent-way material .....	"B" rate, plus loading and unloading charges if done by Department.	Former rate considered too high.
Poultry and sucking-pigs in coops and cases.	By measurement, 140 cubic feet to the ton. 1st-class rates for 1 ton and upwards; 2nd-class for less than 1 ton.	To provide that suitable coop is sent.
Wooden hurdles .....	1st class.....	No rate previously fixed.
Goods wrongly described on "consigning notes," causing them to be booked at wrong rates, and consequent application for refund.	Penalty of 10 per cent. on correct rate is now abolished	Considered that the penalty should not be continued.
Live stock carried for various owners in the same waggon.	The 25 per cent. additional charge is now cancelled ...	To encourage traffic.
Grain carried on down journey from shipping ports.	The charge of 20 per cent. added to "A" rate is now repealed.	In view of the failure of the crops in the interior.
Grain only, not ground grain or flour	To be charged the same rate on the down as on the up journey.	" "
Empties .....	Small baskets, one in the other, to be treated as single packages.	As it is practically one parcel.

APPENDIX 3.

1889.

## NEW SOUTH WALES.

**RAILWAYS AND TRAMWAYS.**

(QUARTERLY REPORT OF RAILWAY COMMISSIONERS, ENDING MARCH, 1889.)

Presented to Parliament, pursuant to Act 51 Vic., No. 35, sec. 44.

Offices of the Railway Commissioners of New South Wales,  
30 April, 1889.

TO THE HONORABLE THE MINISTER OF RAILWAYS,—

Sir,

In accordance with the provisions of the 44th clause of the Railway Act of 1888, 51 Vic. No. 35, we have the honor to submit, for the information of Parliament, our report for the quarter ending 31st March, 1889, upon the subjects specified, viz. :—

- (I.) "The state of the traffic returns, with the approximate cost and earnings of trains, per ton,\* per train mile, in respect of goods and passengers respectively, carried during the past quarter."
- (II.) "The general condition of the lines, and accommodation for the traffic."
- (III.) "The special rates, if any, which have been made, and the reasons for making such rates."
- (IV.) "The appointments and removals of employes, with the circumstances attending each case."

## I.—STATE OF THE TRAFFIC.

Railways.	Quarter ending 31st March, 1888.	Quarter ending 31st March, 1889.
Revenue from all sources ... ..	£563,328	£585,730
Expenditure ... ..	£369,643	£390,676
Number of passengers ... ..	3,893,607	3,975,585
Tonnage of coaching traffic ... ..	261,873	267,213
Tonnage of goods traffic ... ..	731,344	949,671
Tonnage of live-stock traffic... ..	17,583	26,342
Train miles run ... ..	1,621,956	1,780,194
Earnings per train mile ... ..	6/11½	6/7
Expenditure per do ... ..	4/6½	4/4½
Percentage—Expenditure to Earnings ... ..	65·67	66·69

\* NOTE.—Information as to the cost and earnings of trains, per ton per mile, cannot be given, as a large proportion of the train mileage is used for carrying both goods and passenger traffic.

187—A

[1,303 copies—Approximate Cost of Printing (labour and material), £13 17s. 7d.]

The increased tonnage shown by the goods returns is almost wholly due to the coal traffic at Newcastle, which represents an increase of over 200,000 tons in the first quarter of 1889, as compared with 1888.

Tramways.	Quarter ending 31st March, 1888.	Quarter ending 31st March, 1889.
Revenue from all sources ... ..	£64,293	£65,130
Expenditure ... ..	£58,359	£53,138
Number of fares collected ... ..	14,823,639	15,211,755
Train miles run ... ..	350,252	380,996
Earnings per train mile ... ..	3/8	3/5
Expenditure per do. ... ..	3/4	2/9½
Percentage—Expenditure to Earnings ... ..	90·78	81·59

#### II.—CONDITION OF THE LINES.

A report as to the condition of the lines will be found attached as an Appendix, page 5.

#### III.—SPECIAL RATES.

The special rates authorized during the quarter will also be found in Appendix, page 5.

#### IV.—STAFF.

See Returns. Appendix, pages 6 to 10.

#### GENERAL REMARKS.

##### *State of the Traffic.*

The revenue for the quarter under review, as compared with the corresponding period of 1888, shows an increase of £22,402, which does not appear at first sight so favourable a return as anticipated. It is necessary, however, to point out that the relative proportions which the quarter's transactions would have borne to each other were disturbed by several causes. The principal of these were the celebration of the Centenary of the Colony in January, 1888, and the occurrence of the Easter Holidays at the end of March of that year—these events contributing an exceptional revenue to 1888 of about £10,000.

This year, on the contrary, events generally tended to decrease the traffic, as there was a great depression in trade and a general failure in all agricultural crops, affecting the revenue to a serious extent; while the earlier arrival of the wool-clips resulted in a decrease of consignments amounting to over 4,000 bales, which would under ordinary circumstances have been conveyed, but, for the reasons mentioned, were carried in the December quarter of last year.

Special concessions on rates for the conveyance of starving stock and grain, flour, &c., also somewhat affected the returns.

In expenditure an increase of £21,000 is shown, which has been principally caused by the additional length of 61 miles worked in the 1889 quarter, and a heavy expenditure in the Locomotive Branch of £18,370, arising largely from the necessity for extensive repairs to, and renovation of, rolling-stock, &c.

Towards

Towards bringing the expenditure within reasonable limits, reductions have been effected in the Staff to the extent of £34,000 per annum, but owing to the consideration extended to the officers in connection with their retirement, the reductions are not immediately operative, and therefore the full effect will not be immediately felt.

*Condition of the Lines.*

Steps are being taken to improve the condition of the permanent-way and fencing of the lines throughout the country as speedily as possible.

It appears that the following renewals must take place at an early date, viz. :— 60 miles of relaying with steel rails, 150,000 sleepers to be replaced, 150 miles of fencing to be renewed.

*Accommodation for the Traffic.*

Many of the works asked for in our tour of inspection of the lines have now been completed; the remainder are in hand and will be executed by the Engineer as early as possible.

The modification of the lines at Redfern Station, which was referred to in our last report as having been authorised, has been brought into use, with the most beneficial effect on the punctual working of the trains.

We propose to proceed with the duplication of the line between Granville and Liverpool, and the widening of the lines between Eveleigh and Homebush so soon as the necessary funds are voted by Parliament.

*Rolling-stock, Railways.*

Since the Report for the quarter ending 31st December, 1888, was made, the rolling-stock generally has been the subject of special consideration and inquiry, and we find that its condition is such that the ordinary method of renewing vehicles out of revenue, year by year, will not enable us to put the stock into proper condition for many years to come.

Revenue in past years has not been made to bear anything like the amount of money for renewals that should have been the case, as will be seen from the fact that for the 33½ years ending June last, only 16 engines, 27 passenger vehicles, and 442 goods vehicles have been replaced from that source.

It is estimated that a sum of more than £1,000,000 has been underspent out of revenue on the rolling-stock.

As so large a proportion of the stock is so antiquated and defective, we recommend that a special vote of £500,000 be placed at our disposal in order that we may get the stock into fair condition as quickly as possible.

This sum, we might reasonably ask, should be placed absolutely to our credit, seeing that the Treasury has unduly benefited in the past by receiving money which should have been spent to keep the stock in better condition, and the capital account has been shown as earning a profit which was not really earned; but as we feel this would not be sound from a commercial point of view, we propose to extinguish the special credit during the next ten years by an annual payment out of working expenses of £50,000, in addition to providing, from the same source, money for keeping the stock in proper condition, and renewing a fair number of vehicles each  
year

year beyond what will be done out of the fund now proposed to be specially voted. By this means we trust in a few years to have the whole of the rolling-stock in a proper and efficient state.

*Tramway Rolling-stock.*

The rolling-stock of the tramways has also been specially reported upon, and it would appear that not a single vehicle has been replaced out of revenue since the tramways were first inaugurated in 1879, and that although 135 cars stand in the books against the Sydney tramway system, no less than 11 have been sold, broken up, or condemned, and 9 other vehicles are reported as unfit for traffic.

This practically shows the stock to be 20 vehicles short of what actually has been provided. These 20 vehicles we propose to replace out of revenue during the current year.

The returns which have been submitted show to us that before the close of next year a considerable number of additional vehicles will become unfit for traffic, and must be renewed.

The average life of the cars above referred to appears to have been only about seven years, and this short life is principally accounted for by the use of unseasoned timber in their construction. There is practically no seasoned timber in the Colony, and we propose laying in a considerable stock of timber for seasoning, and this plan will later on be of material assistance in reducing the cost of maintaining the rolling-stock.

The carrying capacity of many of the cars has also been reduced by taking off the upper decks. This decreased carrying power should have been met by building cars out of revenue.

The putting of the rolling-stock into proper repair, and also providing vehicles in place of those which have ceased to work, must of necessity have the effect for some time to come of reducing the return on the capital outlay, while at the same time the past returns on capital will have been shown unduly high, in consequence of revenue having been relieved of these charges.

E. M. G. EDDY,  
Chief Commissioner.  
W. M. FEHON,  
CHARLES N. J. OLIVER,  
Commissioners.

---

## APPENDIX I.

## Minute from The Engineer for Existing Railways to The Secretary to The Railway Commissioners.

New South Wales Government Railways,  
Engineer for Existing Lines Office, Sydney, 10 April, 1889.

*Subject:*—Report on condition of lines for the quarter ending 31st March, 1889.

I HAVE the honor to report as follows on the condition of the railway and tramway lines under my charge for the quarter ending 31st March, 1889.

The maintenance of the permanent way and works has received careful attention, and for the most part the roads are in good running order. There are, however, portions where, on account of the decayed condition of the sleepers, rails almost worn out, and other causes, fair results only have been achieved.

The Southern Line, as far as Picton, is in good order. From Picton to Goulburn, about 2½ miles has been relaid with steel rails, and a large number of the old sleepers will have to be renewed as soon as practicable. The road on the section is in fair running order. From Goulburn to Albury generally the permanent way is in fair condition, but the sleepers are still decaying and further renewals are required. More ballast is necessary throughout the section, and at places the rails are much worn. From Goulburn to Bowning the road is rough and knotty on account of the bad state of both rails and sleepers.

The branch lines are in good running order except portions of the Narrandera-Jerilderie Line, on which a few rough and knotty spots are found. The sleepers on the Cooma branch continue to decay rapidly as far as Bungendore, and on the curves are so bad that it has been necessary to put in additional sleepers to hold the road to gauge.

The Western Line, from Springwood to Bathurst, is in fair running order, but the worn condition of the rails, more especially between Rydal and Tarana, renders it a difficult matter to keep the joints up and the road to gauge. The old sleepers on some of the eight-chain curves over the Blue Mountains are also a source of trouble, and need early renewal. From Bathurst to Wellington there are large numbers of decayed sleepers which must be replaced at once. Between Nevertire and Nyngan the road has been much improved, extra labour having been employed, but from the cause alluded to in my last report, the maintenance of this section in good order for the fast traffic cannot be accomplished as economically as could be desired. The long banks near Bourke have been favoured by the continued drought, and have not given much trouble.

The Mudgee Line is now in fair running order, but the sleepers between Wallerawang and Rylstone are very bad, and require to be renewed at the earliest possible opportunity. There have been very few slips on this line during the quarter on account of the very dry weather, but stones continue to fall between Carlos Gap and Brogan's Creek, and it has not been considered safe to dispense with the night patrol-men.

Between Blayney and Cowra the road is knotty, and out of line in places, but these defects are being remedied.

The Northern lines are in good running order, but between Newcastle and West Maitland, the rails are much worn and the sleepers much decayed. Over the plains between Breeza and Boggabri, the permanent way, owing to the protracted drought, is not in such good order as could be wished.

The line from Hawkesbury to Hamilton Junction has been much improved, several of the soft spots which existed having been got rid of.

The fences throughout the lines are greatly in need of renewal. Tenders have been invited for renewing about eight and a half miles on the Southern Line and about ten miles on the Northern Line, but there are several other places where the old fences will not last much longer.

The Metropolitan Tramway lines are in good order. As was anticipated, the substitution of heavy rails on the section Railway Station to Bridge-street has been the means of effecting a marked saving in the cost of maintaining the section. The rails in Oxford and Parramatta Streets are, however, wearing rapidly and the question of relaying these portions of the system will have to be considered at an early date.

The Newcastle-Plattsburg Line is in good order, with the exception of twenty chains at Lambton, where there is a very bad clay bottom. Measures are being taken to improve the foundation and drainage of the line here, and it is expected that very shortly the source of trouble will have been removed.

GEORGE COWDERY.

## APPENDIX II.

## New South Wales Government Railways.

STATEMENT, in accordance with clause No. 44 of the Railway Act, showing the special rates which have been made, and the reasons for making such rates, quarter ending 31st March, 1889.

Article.	Rate.	Reason for such Rates.
Warwick Farm Race Course .....	1st class return, 3s. ; 2nd class return, 1s. 9d.....	To encourage traffic.
Camden Line.....	Return tickets to be issued between stations on Camden Line at single fare and a half.	" "
Solid Molasses for use of cattle .....	"A" rate, if in truck loads. This rate does not apply to ordinary storekeepers' consignments.	" "
Cypress pine .....	"A" rate. All South-Western stations to Darling Harbour, any length in truck loads; plus 25 per cent.	To encourage traffic. This pine is now being obtained at various stations on South-Western Line.
Matte or regulus .....	"A" rate .....	To encourage traffic from Sunny Corner.
Lode tin .....	To be charged as crude ore.....	To encourage traffic.
Flour, bran, and pollard, carried on down journey from shipping ports.	The charge of 20 per cent. added to "A" rate is now repealed.	" "
Boats carried to regattas .....	Boats carried by rail to regattas, having paid full fares one way, are returned free on production of a certificate from the secretary to the regatta committee that they have started for at least one race.	" "
Theatrical companies .....	Theatrical companies not numbering less than six are allowed to travel first class for second class fares.	" "

## APPENDIX III.

## NEW SOUTH WALES GOVERNMENT RAILWAYS AND TRAMWAYS.

RETURN, in accordance with clause No. 44 of the Railway Act, showing the Appointments of Employees from 1st January to 31st March, 1889.

1889.

NEW SOUTH WALES.

**RAILWAYS AND TRAMWAYS.**

(QUARTERLY REPORT OF RAILWAY COMMISSIONERS, ENDING JUNE, 1889.)

Presented to Parliament, pursuant to Act 51 Vic., No. 35, sec. 44.

Offices of the Railway Commissioners of New South Wales,  
30 July, 1889.

TO THE HONORABLE THE MINISTER OF RAILWAYS,—

Sir,

In accordance with the provisions of the 44th clause of the Railway Act of 1888, 51 Vic. No. 35, we have the honor to submit, for the information of Parliament, our Report for the quarter ending 30th June, 1889, upon the subjects specified, viz. :—

- (I.) "The state of the traffic returns, with the approximate cost and earnings of trains, per ton,\* per train mile, in respect of goods and passengers respectively, carried during the past quarter."
- (II.) "The general condition of the lines, and accommodation for the traffic."
- (III.) "The special rates, if any, which have been made, and the reasons for making such rates."
- (IV.) "The appointments and removals of employees, with the circumstances attending each case."

I.—STATE OF THE TRAFFIC.

Railways.	Quarter ending 30th June, 1888.	Quarter ending 30th June, 1889.
Average number of miles open ... ..	2,102	2,131
Revenue from all sources ... ..	£535,365	£545,659
Expenditure ... ..	£398,657	£389,716
Number of passengers ... ..	3,883,410	4,100,460
Tonnage of coaching traffic ... ..	261,053	275,633
Tonnage of goods traffic ... ..	908,537	914,955
Tonnage of live-stock traffic ... ..	20,980	23,946
Train miles run ... ..	1,671,893	1,834,579
Earnings per train mile ... ..	6/4 <sup>2</sup>	5/11 <sup>1</sup> / <sub>2</sub>
Expenditure per do ... ..	4/9 <sup>1</sup> / <sub>2</sub>	4/3
Percentage—Expenditure to earnings ... ..	74.43	71.42

\* NOTE.—Information as to the cost and earnings of trains, per ton per mile, cannot be given, as a large proportion of the train mileage is used for carrying both goods and passenger traffic.

Tramways.	Quarter ending 30th June, 1888.	Quarter ending 30th June, 1889.
Revenue from all sources ... ..	£58,148	£62,761
Expenditure ... ..	£54,402	£55,849*
Number of fares collected ... ..	13,374,112	14,148,862
Train miles run ... ..	353,725	384,447
Earnings per train mile ... ..	3/3½	3/3¼
Expenditure per do. ... ..	3/0¼	2/10¼
Percentage—Expenditure to Earnings ... ..	93·56	88·98

\* Includes £2,800 for new cars.

## II.—CONDITION OF THE LINES.

A report as to the condition of the lines will be found as an Appendix, page 3.

## III.—SPECIAL RATES.

A statement of the special rates, and the reasons for making the same, will be found attached, Appendix, page 3.

## IV.—STAFF.

These returns are given as an Appendix, pages 4 to 7, showing a saving of £20,000 per annum.

## GENERAL REMARKS.

The revenue for the quarter as compared with the corresponding period of 1888, shows an increase of £10,294, all descriptions of traffic showing an improvement.

The increase in traffic would have been larger had it not been for the phenomenal rainfall experienced in May, which in one week caused a loss in revenue of £12,000.

Throughout the rest of the quarter the traffic was considerably affected in some districts in consequence of the bad state of the roads, rendering it almost impossible for the teams to travel.

The working expenses in the Engineering Department were considerably augmented in consequence of a large additional extra staff having to be employed to repair the damage caused by the floods. The total expenditure, however, for the quarter shows a reduction.

## CONDITION OF THE LINES AND ACCOMMODATION FOR THE TRAFFIC.

Materials have been ordered for relaying about 90 miles of Railway, and tenders have been invited for 50 miles of fencing.

Various works have also been ordered during the quarter for affording additional facilities for the traffic.

Progress is being made with the earthworks for duplicating the lines between Granville Junction and Campbelltown, and Adamstown and Teralba.

The earthworks for duplicating the line between Hurstville and George's River, and Sutherland and Waterfall, will also be shortly put in hand, so as to prepare for the coal traffic expected.

We have the honor to be,

Sir,

Your most obedient Servants,

E. M. G. EDDY,  
Chief Commissioner.

W. M. FEHON,  
Commissioner.

CHARLES N. J. OLIVER,  
Commissioner.

APPENDIX.

## APPENDIX.

## APPENDIX I.

Minute from The Engineer for Existing Railways to The Secretary to the Railway Commissioners.

New South Wales Government Railways,  
Engineer for Existing Lines Branch, Sydney, 12 July, 1889.

*Subject*:—Report on condition of lines for the quarter ending 30th June, 1889.

I HAVE the honor to report as follows on the condition of the Railways and Tramways under my charge for the quarter ending 30th June, 1889:—

The maintenance of the railway lines this quarter has involved a large expenditure in consequence of the damage done by the phenomenal rains which fell about the end of May. The lines generally suffered from the rainfall, but its effects were most severely felt on the Illawarra and North Coast Lines, the Southern Line as far as Fairfield, and the Northern Line to Murrurundi. Extensive slips occurred on the two first-named lines, causing stoppage of traffic. The Southern Line was blocked for a time by the water coming over the line at Duck River, near Granville. Traffic had to be suspended between East and West Maitland where the water was about 4 feet over the rails, and a wash-away occurred near Musclebrook in which the down mail train narrowly escaped destruction on the morning of the 27th May. Early in May an accident occurred on the Jerilderie line in consequence of the sudden subsidence of a portion of a bank. A large slip at Liverpool Range, near Murrurundi, which first came down some years ago, again started early in June, but the measures taken prevented any interruption of the traffic, and it is hoped, have been effectual in removing the danger of any further slips at this place. The heavy rains also caused slips of earth and rock in the cuttings on the Mudgee line, but no suspension of traffic was rendered necessary. A large amount of extra labour had to be employed in making good the damage caused, and very shortly the whole of the repairs made necessary will have been completed.

The roads where the effects of the rainfall were not so destructive have been kept in fair running order although soft and knotty in places. The rapid decay of the inferior sleepers, however, makes it a difficult matter to keep a good top on the road, and the road in line and to gauge. These remarks apply more especially to portions of the Southern line from Goulburn southerly, the Cooma line as far as Bungendore, the Western line between Springwood and Dubbo, and the Mudgee line, and there is now trouble in getting sleepers on account of the boggy condition of the bush at various places.

The old iron rails on several sections of the Southern, Western, and Northern Lines are badly worn and urgently require to be replaced.

The soft condition of the permanent way from Nevertire to Dubbo, in consequence of the excessive rains, required a reduction of speed, but the country having dried up the road is now so far improved as to admit of full speed being resumed.

The bridges, buildings, and other works have been well maintained, and with the exception of the fencing, which urgently needs renewal on several sections, are in fair order.

The tramway lines have been kept in good running order generally. A considerable length of the City and Suburban lines, however, will have to be relaid at an early date.

GEORGE COWDERY.

## APPENDIX II.

New South Wales Government Railways.

STATEMENT, in accordance with clause No. 44 of the Railway Act, showing the special rates which have been made, and the reasons for making such rates, quarter ending 30th June, 1889.

Article.	Rate.	Reason for such Rates.
Bullion from Orange.....	2nd class, previously 3rd class .....	To develop traffic.
Shooks to Eastwood .....	Free .....	Same as other stations.
Storage for lost property .....	Same as cloak-room .....	Charges too high compared with value.
Gasoline, Hartley Vale to Darling Harbor.	22s. 10d. per ton, min. 4 tons .....	To equalize rates from other places.
Lime for purposes of manure .....	"M" class.....	Same as ordinary manure.
Slack, Vale Colliery to Eskbank .....	6s. per truck of 6 tons, waggons to be loaded and unloaded in one working day (12 hours).	To place rates on same footing as from other collieries.
Butchers' small goods .....	25% reduction from parcels rates, now applicable to fresh meat, to be extended to butchers' small goods.	To develop traffic.

## APPENDIX III.

## NEW SOUTH WALES GOVERNMENT RAILWAYS AND TRAMWAYS.

RETURN, in accordance with clause No. 44 of the Railway Act, showing the Appointments of Employees from 1st April to 30th June, 1889.

**Commission.**

VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland, Queen, Defender  
of the Faith, and so forth,—

To our trusty and well-beloved—

CHARLES EDWARD ROBERTSON MURRAY, Esquire, District Court Judge for the Northern  
District of our Colony of New South Wales,—

Greeting:—

KNOW YOU, that We, reposing great trust and confidence in your ability, zeal, industry, discretion, and integrity, do, by these presents, authorize and appoint you to make a diligent and full inquiry touching all questions which have been in any way raised in our Legislative Assembly of our Colony of New South Wales, whether specifically or in course of debate, as to any alleged unfitness of WILLIAM MEEKE FEHON, Esquire, for appointment as one of the Commissioners for Railways under the Government Railways Act of 1888, and touching the truth of any charges which have been so as aforesaid made against the said William Meeke Fehon: And We do by these presents grant to you full power and authority to call before you all such persons as you may judge necessary, by whom you may be better informed of the truth in the premises, and to require the production of all such books, papers, writings, and all other documents as you may deem expedient, and to visit and inspect the same at the offices or places where the same or any of them may be deposited, and to inquire of the premises by all lawful ways and means: And We do give you power at your discretion to procure such clerical and other assistance as you may deem necessary for enabling you duly to execute this Our Commission: And our further will and pleasure is that you do within one month after the date of this Our Commission certify to us, in the office of our Colonial Secretary, under your hand and seal, what you shall find touching the premises: And we hereby command all Government officers, and other persons whomsoever within our said Colony, that they be assistant to you in the execution of these presents: And we do hereby declare this Our Commission to be a Commission for all purposes of the Act 44 Victoria No. 1, intituled "An Act to regulate the taking of evidence by Commissioners under the Great Seal."

In testimony whereof, We have caused these Our Letters to be made patent, and the Great Seal of our said Colony of New South Wales to be hereunto affixed.

Witness, Our Right Trusty and Well-beloved Councillor, CHARLES ROBERT, BARON CARRINGTON, Knight Grand Cross of Our Most Distinguished Order of Saint Michael and Saint George, Our Governor and Commander-in-Chief of Our Colony of New South Wales and its Dependencies, at Government House, Sydney, in New South Wales aforesaid, this nineteenth day of February, in the fifty-second year of Our Reign, and in the year of Our Lord one thousand eight hundred and eighty-nine.

CARRINGTON.

By His Excellency's Command,  
GEORGE R. DIBBS.

Entered on record by me, in REGISTER OF PATENTS, No. 13, pages 309-10, this nineteenth day of February, one thousand eight hundred and eighty-nine.

For the Colonial Secretary and Registrar of Records,  
CRITCHETT WALKER  
(Principal Under Secretary).

WHEREAS it is necessary to extend the time by which the Commissioner is to make his report in the Fehen Inquiry Commission : Now, therefore, I do hereby, with the advice of the Executive Council, extend the time within which the said Commissioner is to make such report to and for a further period of one month beyond the time in and by the said Commission appointed for such purpose, to take effect from the 20th instant.

Given under my hand, at Government House, Sydney, this thirtieth day of March, one thousand eight hundred and eighty-nine.

CARRINGTON.

By His Excellency's command,  
HENRY PARKES.

Entered on record by me, this second day of April, one thousand eight hundred and eighty-nine.

WHEREAS the time appointed for the return of the Commission in the matter of the Fehen Enquiry Commission was, by an instrument dated the 30th ultimo, extended for a period of one month : And whereas it is necessary to extend the same still further : Now, therefore, I do hereby, with the advice of the Executive Council, extend the time within which the Commissioner is to make his return to and for a further period of one month beyond the time in and by the aforesaid instrument appointed for such purpose,—to take effect from the 20th instant.

Given under my hand, at Government House, Sydney, this twenty-fourth day of April, one thousand eight hundred and eighty-nine.

CARRINGTON.

By His Excellency's command,  
HENRY PARKES.

Entered on record by me, this twenty-fifth day of April, one thousand eight hundred and eighty-nine.

For the Colonial Secretary and Registrar of Records,  
CRITCHETT WALKER,  
Principal Under Secretary.

**FEHON INQUIRY COMMISSION.**

**MINUTES OF PROCEEDINGS.**

*TUESDAY, 26 MARCH, 1889.*

The Commissioner sat at No. 81, Phillip-street, Sydney.

Mr. William Meeke Fehon attended. He stated that he did not intend to call witnesses, because, to do so would put him in the position of a defendant.

The Commissioner explained to Mr. Fehon that he was not there as a defendant, but as an interested witness.

Mr. Fehon was then sworn and examined.

*WEDNESDAY, 27 MARCH, 1889.*

The Commissioner sat at 10 a.m.

Patrick Joseph McMahon, of 279, George-street, was examined as to his statement, alleged by Messrs. Want and Lyne, M's.P., to have been made in conversation as to Mr. Fehon's alleged connection with Messrs. Wright, Heaton, & Co.

W. H. Denneen, goods superintendent at Redfern railway station, who had been subpoenaed to give evidence, attended at 2 o'clock p.m., and requested that for urgent reasons his examination might be postponed until the morrow.

The Commissioner acceded to the request.

*THURSDAY, 28 MARCH, 1889.*

The Commissioner sat at 9.30 a.m.

Copies of railway regulations and tables of tolls relating to the carriage of wool between the years 1879 and 1886 were received from the Colonial Secretary's Office.

Thomas Stephens Sherritt and W. J. Moore were examined.

*FRIDAY, 29 MARCH, 1889.*

The Commissioner sat at 10 o'clock a.m.

Robert Wilford Dickson, Joseph Heylin, Charles Howard, and Charles Lambert were examined.

Mr. Fehon was present during the examination of Mr. Heylin.

*SATURDAY, 30 MARCH, 1889.*

The Commissioner sat at 10 a.m.

Mr. Fehon was present.

Jas. Steers and Thomas Stephens Sherritt were re-examined.

*TUESDAY, 2 APRIL, 1889.*

The Commissioner sat at 2 o'clock p.m.

Francis Lord was to have been examined, but did not appear. [The Secretary visited the Colonial Secretary's office and the office of the Chief Inspector of Police, and ascertained that Francis Lord had been "served." Subsequently the Commissioner received from Mr. Lord an explanation of his absence.]

*WEDNESDAY, 3 APRIL, 1889.*

The Commissioner sat at 10 o'clock a.m.

Mr. F. A. Wright and Mr. W. H. Denneen were examined.

*THURSDAY, 4 APRIL, 1889.*

The Commissioner sat at 10 o'clock a.m.

Messrs. Edwin Charles Leary, J. McLaughlin, and C. B. Lowe were examined.

*FRIDAY,*

*FRIDAY, 5 APRIL, 1889.*

The Commissioner sat at 10 o'clock a.m.  
Mr. Greatrex and Mr. Abigail, M.P., were examined.

---

*MONDAY, 8 APRIL, 1889.*

The Commissioner sat at noon.  
Mr. Greatrex was re-examined, and Mr. McDonald was examined.

---

*TUESDAY, 9 APRIL, 1889.*

The Commissioner sat at 10 o'clock a.m.  
Mr. David Kirkcaldie (Railway Traffic Manager) and Mr. John Williams (Crown Solicitor) were examined.

---

*WEDNESDAY, 10 APRIL, 1889.*

The Commissioner sat at 10 o'clock a.m.  
No witnesses were examined ; and only formal business was transacted.

---

*THURSDAY, 11 APRIL, 1889.*

The Commissioner sat at 12 o'clock (noon).  
Mr. J. P. Garvan, M.P., attended and was examined.

---

*TUESDAY, 16 APRIL, 1889.*

Mr. F. A. Wright attended and asked the Commissioner to call as witnesses—Messrs. F. Farnell, M.P., Richard Beattie, Arthur S. Lee (of Orange), and H. B. Copeland.

---

*WEDNESDAY, 17 APRIL, 1889.*

The Commissioner sat at 1 o'clock p.m.  
Mr. Fehon was present.  
Mr. Lyne, M.P., was examined.

---

*THURSDAY, 18 APRIL, 1889.*

The Commissioner sat at 10 o'clock a.m.  
Mr. Fehon was present.  
Mr. Allen Lakeman, M.P., was examined.

---

*MONDAY, 29 APRIL, 1889.*

The Commissioner sat at 2 o'clock p.m.  
Mr. Frank Farnell, M.P., and Mr. H. B. Copeland (of the Lands Office), were examined.

---

*TUESDAY, 30 APRIL, 1889.*

The Commissioner sat at 10 o'clock a.m.  
Mr. Fehon was present.  
Mr. J. H. Want attended and was examined by the Commissioner, and cross-examined by Mr. Fehon.

---

*WEDNESDAY, 1 MAY, 1889.*

The Commissioner sat at 10 o'clock a.m.  
No evidence was taken.

---

*THURSDAY, 2 MAY, 1889.*

The Commissioner sat at 10 o'clock a.m.  
Mr. Fehon was present.  
Mr. Ninian Melville, M.P., attended, and was examined.  
Mr. J. H. Want, M.P., and Mr. W. M. Fehon, were re-examined.

---

*FRIDAY, 3 MAY, 1889.*

The Commissioner sat at 10 o'clock a.m.  
No evidence was taken.

## LIST OF WITNESSES.

## REPORT.

To His Excellency the Right Honorable CHARLES ROBERT, BARON CARRINGTON, a Member of Her Majesty's Most Honorable Privy Council, Knight Grand Cross of the Most Distinguished Order of Saint Michael and Saint George, Governor and Commander-in-Chief of the Colony of New South Wales and its Dependencies.

MAY IT PLEASE YOUR EXCELLENCY,—

In accordance with the direction contained in the Commission herewith, I have the honor to report as follows, annexing hereto the extension of the shorthand-writer's notes of evidence taken before me, and such of the documents, &c., that I have inspected, as I think it my duty to attach.

Concerning the obligation imposed upon me by the Commission which I have the honor to hold, I take it that, though I am directed to certify what I shall "find touching the premises," still I am not to presume that my finding is to be conclusive in any aspect, or is in the nature of a verdict; but that it is to be taken merely as an expression of opinion upon which your Excellency and your Advisers may or may not be pleased to act according as it may appear that my opinion is or is not justified by the evidence which I have taken, or that I have or have not sufficiently exhausted the opportunities at my disposal of arriving at the truth; and, therefore, as the inquiry which I have made has necessarily been, as I shall hereafter explain, of a twofold, and in reality, I may say, of a manifold, nature, and as I may appear to be right in some and wrong in other conclusions, I feel bound to set out separately my several opinions touching different parts of the subject of investigation, in such manner that each may be taken by itself and distinctly criticized. And I wish it to be understood that, from the peculiar nature of the inquiry, seeing that I am placed in the position of having not only to find the truth from the mouths of witnesses, but also to discover who may be able to inform me, and to determine whether I am justified—having regard to the advantages of economy and fair expedition—in summoning any person, I have been unable to marshal the evidence in such sequence as I should have wished, and I have been compelled to hear much irrelevant matter; this will account for

what may seem to be the want of relation between the various witnesses in respect to the order in which their evidence stands, and the apparent want of pertinence in much of what they have deposed. I called Mr. Fehon first, and let him give his account of everything which then seemed material to the inquiry, so that no question could be made of the propriety of his being present whenever he wished, during the examination of other witnesses; he did not wish to waste his time by attending when such evidence was being given as directly affected only Wright, Heaton, & Company—evidence to prove or disprove facts of which he disavowed all knowledge, such disavowal being the basis of his contention.

The subject matter of this inquiry is, as I have said, primarily twofold. 1st. The question of rumours reflecting upon Mr. Fehon's conduct in his office of Traffic Manager of the Victorian Railways. 2nd. The question of his connection with what are known as the "wool frauds." The first head of inquiry divides itself thus—and for convenience I will distinguish different questions by letters on the margin.

A 1st. Were rumours affecting Mr. Fehon's character in existence in Victoria  
 B about 1872? 2nd. If so, was there any real foundation for them? The second  
 C head of inquiry involves two main questions. 1st. Was the firm of Wright,  
 D Heaton & Co., in fact guilty of fraudulent practices in connection with the carriage  
 E of goods on the N.S.W. Railways. 2nd. If they were so guilty, was Mr. Fehon  
 F a party to the carrying on of such practices? And the former of these questions  
 G is thus again divisible. 1st. Was a certain system known as "averaging," as used  
 H by Wright, Heaton, & Co., in fact morally wrong? 2nd. Was the firm guilty of  
 intentional "understating" of weights of goods carried on the railways? And, in  
 connection with the question marked on the margin E, this inquiry is further  
 involved—were practices similar to those known as "averaging" carried on in  
 Victoria in fraud of the railway system of that Colony by M'Culloch & Co.? If so,  
 was Mr. Fehon a party to such a course of dishonesty? I do not think it expedient  
 to further analyse the branches of this investigation, as any such subdivision would—  
 though it could easily be made—be unnecessarily minute. Though I have sought  
 for evidence to answer all questions arising, I have still felt bound to treat them as  
 of varying importance, in the light of the evidence which I have called, and the  
 opinions which I have formed; if I should attempt to follow out each to the fullest  
 possible extent, this inquiry would be almost interminable. I feel that it is my  
 duty to conclude as soon as I fairly may, in justice both to the country and to Mr.  
 Fehon, seeing that it would be cruel to him to hold these serious charges pending  
 unduly long, and that it is most important that the possible instability of his  
 appointment should, one way or the other, be put an end to; and, moreover, that  
 the expense and inconvenience should be avoided that would be caused by the  
 appointment of a Deputy Judge in my place, as I have now reached the limit of  
 time at my disposal, having applied to this matter even more time than I should  
 have been able to devote to it, if a contemplated, but now abandoned, change in  
 the distribution of work among the District Court Judges had not chanced to result  
 in giving me a few more days in Sydney than I should otherwise have had.

A I now pass to the consideration of the different questions marked by letters.

B This question must undoubtedly be answered in the affirmative; but I conclude  
 that no real foundation existed. On searching the record of debates in the Victorian  
 Assembly, I find, in vol. 15, that in the year 1872 the papers *in re* the resignation  
 of Mr. Fehon were called for by Mr. Orr, Member for the Murray, and produced.

No

No comment on the matter seems then to have been made in the House. Afterwards—on November 20th of that year (page 2131)—Mr. Zeal asked, “If it was the intention of the Government to acknowledge the exceptional services of Mr. Fehon, in organizing and reducing to economical working order the Traffic Branch of that Service by placing a sum on the Estimates as a retiring allowance.” Mr. Gillies answered that “he believed Mr. Fehon was a very valuable officer; he understood, however, that the case had been dealt with by the late Government, and therefore, at the present time, he did not think it proper to interfere; but it was open to the House to say what bonus ought to be given to Mr. Fehon.” Afterwards, on December 11th (page 2340), Mr. Zeal suggested the placing of £500 on the Estimates as a gratuity to Mr. Fehon. Mr. Longmore, speaking of Mr. Fehon, said “he was a most valued and efficient officer, and personally he would be very glad if the Government could see their way to ask the House to recognize his services in some substantial manner.” On neither occasion was there a word said by any Member to the discredit of Mr. Fehon. Meanwhile, on November 28 (page 2222), the case of one Hiddle, an engineer, who had recently been discharged from the s.s. “Victoria,” was discussed on a motion for adjournment. Allusion was made, on the *tu quoque* principle, to the case of certain persons who had been dismissed from the Government Printing Office by the former Government. Mr. Longmore, speaking on the subject, said that, “he did not do any injustice.” Mr. Orr interjected, “Oh.” Mr. Longmore then went on to say, “the honorable member for the Murray had better hold his tongue; that honorable Member went through the country speaking the vilest slanders, according to his own showing, of the late Traffic Manager, and in his (Mr. Longmore’s) presence he subsequently acknowledged—he stated in the most craven manner—that he was sorry for having done it.” Mr. Longmore then spoke on the subject of Hiddle. Mr. Orr followed, first addressing himself to Hiddle’s case, and continued thus:—“He would not pursue the case further. But he would claim the indulgence of the House, while he offered a few observations in reply to the insinuations which had been thrown out against him by the honorable Member for Ripon and Hampden; and he defied that honorable Member to contradict one single word of what he was going to say. One day, about the time that Mr. Fehon was clearing up his affairs in the Railway Department, he called upon the late Minister for Railways. He had finished his business with that gentleman, and was about to leave, when Mr. Fehon, who was present, said, ‘I was at Echuca lately, and I was told that you had stated there that I had an interest in the firm of M’Culloch & Co., carriers, while connected with the Railways.’ His (Mr. Orr’s) reply was, that he could not help that; he made the statement believing it to be true, and he still believed it to be true; and that, if the Minister for Railways had time to go into the matter, he was prepared there and then to state the grounds on which he came to the conclusion. He did so. He went over the history of the working of the Railways for five years. He showed that, during that period, there was not a year in which some change was not made in the wool rates. He stated that the firm of M’Culloch & Co. had information of every change weeks, if not months, before he (Mr. Orr) had, although he was in the same trade. He stated that, in connection with the Darling trade, M’Culloch & Co. had their goods carried for £1 per ton less than he or any one else knew anything of. The honorable Member for Ripon and Hampden could not deny this. [Mr. Longmore: ‘It is not in accordance with fact.’] It was true. If it could be proved not to be the fact, he would place his resignation in Mr. Speaker’s hands to-morrow. After he had gone through his statement,

statement, Mr. Fehon assured him he was altogether mistaken in asserting that he had any connection with the firm of M'Culloch & Co.; but no explanation was offered as to the discrepancies. He (Mr. Orr) said he accepted the statement, and was satisfied so far. But he desired to call the attention of the House to another fact which subsequently came to his knowledge. In an advertisement published by the late Minister of Railways, or under his sanction, the words 'Darling District' were used instead of 'Darling River,' and by that means M'Culloch & Co. were able to get the goods carried to the Murrumbidgee for £1 per ton less than the general public. He was prepared to move for a committee to have this matter thoroughly investigated, because he was satisfied that no one department under the late Government could bear less scrutiny than that over which the honorable Member for Ripon and Hampden presided." Mr. Bent then spoke. He said, "he considered it not out of place to remind the honorable Member for the Murray that some people had better wash their dirty linen at home. If the honorable Member was aware that the things he had referred to were going on, why did he not report them?" Mr. Bent then went on with the Hiddle matter; and not a word more was said about Mr. Fehon. This is all I find on the subject of Mr. Fehon, and all that on search made has been found in volumes 14, 15, and 16. The fair conclusion is that, as nothing was said, there was nothing, in fact, to be said in the way of attack on Mr. Fehon's character. The account given by Mr. Fehon himself suggests such a feeling of jealousy as would induce Mr. Orr to jump to a false conclusion; Mr. Steers traces all the rumours he heard to Mr. Orr; the peculiar transaction narrated by Mr. Leary, which—though Mr. Fehon could have had no part in it—indirectly led to his promotion, explains an old, and as M'Culloch & Co. grew in prosperity, increasing animus against them which would strengthen the feeling of suspicion when Mr. Fehon actually joined their firm; these considerations show how easily an unjust accusation would be accepted; on the other hand, Mr. Williamson—Mr. Lyne's authority for the existence of the rumours—a man who ought to be able to form some opinion as to their truth, expressed in effect to Mr. Lyne an opinion favourable to Mr. Fehon, and in answer to a telegram requesting him to inform me—verifying his statement by statutory declaration—of all he knew of the matter, he sent the letter I forward, as well as the two letters addressed to Mr. Fehon. Mr. Lakeman, who was looked upon by Mr. Lyne and Mr. Want as another special authority on this matter, explains that the rumours he heard on this matter emanated entirely, in his opinion, from the agents of rival carriers, whom M'Culloch & Co. were almost driving out of the trade; while Messrs. Steers, Leary, and Lakeman all speak in very high terms—they being the only witnesses who had any real knowledge of Mr. Fehon's repute in Melbourne—of his character for probity. I need hardly allude to Mr. Want's or Mr. Melville's evidence touching this part of the inquiry, as their opinion of Mr. Fehon's unfitness was based upon other grounds, and what information they did, by letter, receive is beyond the possibility of examination, and is, to say the least of it, as Mr. Want himself suspected, very doubtful. I forward one remarkable production—anonymous—which Mr. Want received after his return from Japan; of course he attached no value to it; he produced it simply because I had asked for all letters.

On the whole, therefore, I conclude that the rumours were the outcome of jealousy, working upon and assisted by a train of circumstances which gave them colour.

One aspect of the case, which seems to have operated on the minds of Mr. Lyne and Mr. Want, I pass over as having nothing to do with the subject of this inquiry; though for some purposes argument may well be founded on it. It is this—is it expedient to appoint to a high office of trust a man whose character is tarnished by even unfounded public rumours? I have nothing to do with this: I have only to say what I think about the truth of the rumours, such as they are; and they could hardly be said to exist in New South Wales but for the action taken.

To proceed to the second main head of inquiry. I begin with the sub-division E. This is very difficult to answer. On New South Wales railways, from the first, carriage of wool was charged by the bale. Up to 4 cwt. there was a certain charge; above 4 cwt. there was an increase in charge of 15 per cent. In, or certainly as early as, 1878, a standard of 250 lb. (afterwards increased to 280 lb.—but this is immaterial) was fixed; bales not exceeding this weight were entitled to a rebate of 15 per cent. from the 4 cwt. charge. It is clear that a system called averaging was permitted by the Department in relation to the 4-cwt. standard. The General Order No. 28 (herewith), issued in 1881, recognizes such a system as existing, and seeks—in a rather clumsy way—to define it. I conclude, however, on the evidence, that this General Order was, almost universally, either unknown or ignored, and that the system of averaging in relation to 4 cwt. was simply in practice this—to divide the aggregate weight of a consignment by 4 cwt., and to charge for as many bales as were represented by the quotient, though that number might exceed, but could not be allowed to come to less than, the actual number of bales. This, it will be seen, was a recognition by the Department of the fact—whether originally true or not—that the bale charge was only a convenient way of arriving at a tonnage charge, and that the basis of the implied tonnage charge was 4 cwt.; in other words, that the Department held out that it charged per ton carriage equal to five times what it charged per bale—that five bales fairly went to the ton. Probably this was a mistake; probably the original idea was that—say—a 3-cwt. bale was the average; the meaning of the 15 per cent. increase over 4 cwt., being this: that, as no bales could well weigh under 2 cwt., so, to keep the real average at 3 cwt., no bale should be allowed to go over 4 cwt. without paying an increased charge; 15 per cent. being fixed as a generally fair and convenient increase. But the action of the Department itself would lead carriers to suppose that 4 cwt. was really the assumed average, instead of a maximum; and, when the 250-lb. standard was introduced, then carriers might fairly draw the further conclusion that there were in fact two standards—250 lb. and 4 cwt.—and that, as averaging about 4 cwt. had been permitted, so a similar system in relation to 250 lb. would be legitimate. It is, I understand, the practice of the Department to make every fair concession to owners of goods carried, and to charge at the lowest rate under which the goods can be brought; *e.g.*, if the tonnage rate on goods carried in a truck, not being a full truck load, exceeds the full (6 tons) truck-rate, then that truck-rate, and not the tonnage-rate, is charged. It must be borne in mind too that the 250-lb. limit was borrowed from Victoria; it was adopted for the purpose of competing with Victoria; there was great competition; Mr. Kirkcaldie's evidence bears this out, and goes to show that it is highly probable that every fair concession would be made by the Department. I do not attach much weight to Mr. Paull's minute (see extract from *Sydney Morning Herald* of July 27, 1886, herewith); but he certainly seemed to be acting

C  
E

on

on the assumption that averaging about 250 lb. was permitted; Mr. Kirkcaldie admits, in his evidence, that he thinks such a system would be fair, to a limited extent; though it had never been formally recognized, and the fact that the General Order No. 28 makes no reference to the 250-lb. standard would leave it to be implied that the Department had never authorized such a practice. But then, again, that very order, issued more than three years after the adopting of the 250-lb. standard, only defined an already existing practice older than that standard, and would not, by omission only, necessarily negative the new and partly recognized process of averaging. Mr. Fehon's evidence—and here I may touch and answer the questions G. and H.—explains, I think truly, how the 250-lb. standard came to be fixed—about 1875—in Victoria. He says that no system of averaging was in force in Victoria in relation to the 4-cwt. standard even; when scoured wool began to come in, the 250-lb. limit was invented to meet it. The 4-cwt. limit had been fixed so as to discriminate roughly between the washed (on the sheep's back) and the greasy wool. Scoured wool generally went under 250 lb.; so that the class of wool, branded on the bales, would be a fairly accurate means of telling whether the weight did or did not exceed 250 lb. or 4 cwt.; and individual weighing was unnecessary, as a rule. In New South Wales, however, a system of averaging in relation to the old 4-cwt. standard had been in force, it appears to me, before the 250-lb. limit was introduced; and I can see nothing more natural than that such a practice should—itself loosely applied—be stretched to reach the ingenious device by which, the aggregate weight of a consignment being returned correctly, the weights of individual bales were in fact falsified, so as to bring, apparently, as many bales as possible under the 250-lb. limit, by adding to the real weights of other bales, still keeping them within the 4-cwt. Mr. Denneen has satisfied me (this evidence was not taken down, the shorthand-writer being away when the witness unexpectedly called) that, practically, averaging about 250 lb. was allowed, to this extent: that if a number of bales were brought to a railway station showing an aggregate weight which, when divided by the number of bales, did not exceed 250 lb., then no declaration of individual weights would be required, and the whole would be allowed to pass as severally not exceeding 250 lb. This would be a step towards the system of what may be called “compound averaging” that I have alluded to. Whether the adopting of such a system was an act of dishonesty on the part of the carrying firms depends on many considerations. If they really believed that the officers of the Department were aware of, and allowed, the practice, there was certainly no dishonesty in adopting it; otherwise, there was; if the carriers thought the 4-cwt. bale system was intended as an approximation to a tonnage system which recognized that five bales generally went to the ton, then they might naturally suppose, when the 250-lb. limit was fixed, that the Department had discovered that another class of wool generally went about nine bales to the ton, and for such light bales a lower rate was adopted; they knew the Department was willing to make concessions, and was very eager for the trade; they would imagine that this departure from the letter of the rate-books, similar in its nature to the old system of averaging, and apparently balancing the injustice of charging a 4-cwt. rate for bales under 4 cwt. by only charging a 250-lb. rate for others over 250 lb., was agreeable to the authorities, who certainly seem to have tolerated it for years.

On the whole, therefore, first, I can see nothing to lead to the conclusion that such a course of practice came from without, and originated, or was adopted,

in

in Victoria; and, secondly, I am inclined to the opinion that it was considered legitimate and involved no conscious dishonesty in New South Wales.

But now another question arises: If this system was legitimate, did Wright, Heaton, & Co., give consignees of "commission wool" the benefit of it? It would be a fraud on their part if they took the advantage and did not pass it on to their principals. This is a question not gone into, as far as I can discover, on the trial before Sir James Martin: in that case the charge was conspiracy to defraud the Government: I have not gone specially into it, because I do not consider it is fairly involved in this inquiry: in the view that I take of the evidence connecting Mr. Fehon with the internal working of Wright, Heaton, & Co., I do not think it necessary to load the inquiry with evidence of this nature; because, if there is nothing to show his knowledge of the system of averaging and its associated understating, a general and important course of conduct in relation to wool, then, *a fortiori*, the more special question of how accounts were sent in to consignees would probably be unknown to him. On the whole, I am inclined to think that the benefit was *not* passed on to consignees. I do not find this with much certainty; and I say the same with regard to understated weights. There is strong evidence to show that, in numbers of cases, aggregate weights of consignments of wool were in fact understated: some of these were "contract," some "commission," wool: three clips, the documents connected with which I have seen, carefully worked out by the Railway Department, and tabulated—out of an enormous total—show numerous understatements; aggregate weights being reduced so as in some cases to enable the agent to bring the average of all the bales untruly under 250 lb.; in other cases understating of the aggregate weight being coupled with and made auxiliary to "compound averaging." So much as to my conclusion on the question whether frauds were committed: then comes the further question—were they known to Mr. Fehon? The first step in this part of the inquiry is to determine this:—were they the independent work of the Branches, or were they known at the Head Office? As to this question, Mr. Wright throws the blame of understating on local managers, whose position and salary depended on the earnings of their Branches; he also—as other witnesses belonging to the firm—says that it was impossible, in the rush and pressure of business, for the Managing Director to compare weigh-bills and railway consignment notes, although they would generally arrive together and be put upon his desk; still, considering the fact that a great part of the profit of the firm was the difference between the carriage paid to teamsters, added to the railway carriage, and the contract rate of carriage of "contract wool," and that it is admitted that the duty of carrying out the rather elastic system of "averaging" was imposed upon the local managers, it seems unreasonable to suppose that the Head Manager—Managing Director—did not glance at a good many of the consignment notes and weigh-bills for the purpose of comparison; and that, if he did, he escaped the discovery that the local managers were understating aggregates as well as "averaging" bale weights; as each consignment note and each weigh-bill shows the aggregate weight plainly.

But, assuming that dishonest practices were winked at, if not instigated, by the Managing Director, whether it were Mr. Wright or Mr. Heaton, is there anything to show that Mr. Fehon was a party to them? Now, first of all, as to this, I have the evidence to the contrary of every witness who knows anything about the working

working of the firm. But probability and evidence of facts and documents may fairly be considered equally, if not more, valuable tests. First, it is hardly probable that a dishonest source of profit should be divulged to a partner who stood in the position also of a rival. The rivalry is specially indicated by Mr. Fehon's history of the Queensland transactions. There were also the necessarily strained relations on the Victorian trade border. For whatever reason the partnership was formed into a company, the jealousy of interference spoken of by Mr. Wright would probably operate to repel Melbourne directors. As far as documentary evidence goes, I find, by perusing the minute-book, that Mr. Fehon's account of the small number of his attendances—corroborated by Mr. Wright—is correct; that the business brought forward at meetings is of such a general nature as not to indicate to the directors present any peculiarity in the internal management of the company; and that there was at one time, at any rate, a good deal of difference of opinion, showing something like hostility, between the Sydney and Melbourne interests. As to the books kept by the firm, there is nothing on the face of the accounts to lead to the discovery that any peculiar practice existed. With regard to Mr. Fehon's relation to and interest in the company, I am quite satisfied with the correctness of his statement, that he was, as a shareholder, a trustee for the firm of M'Culloch & Co. I do not, comparing Mr. Fehon's and Mr. Wright's letters (December 11–13) see such a discrepancy as Mr. Want thought threw grave suspicion on Mr. Fehon's truthfulness, and so strengthened the presumption against him: Mr. Fehon's explanation, corroborated by Mr. Wright, of the matter of the 650 shares is borne out by the share register of the company as well as by the evidence of Mr. C. B. Lowe—an absolutely independent and unassailable witness.

In conclusion, therefore, I find, in obedience to the command that I have had the honour to have imposed upon me, and which I have sought, by diligent and full inquiry, to the best of my ability to obey—within the further time accorded to me,—that, touching all questions which have been in any way raised in the Legislative Assembly of New South Wales, whether specifically or in course of debate, as to the alleged unfitness of William Meeke Fehon, Esquire, for appointment as one of the Commissioners for Railways, under the Government Railways Act of 1888, and touching the truth of any alleged charges which have been so as aforesaid made against him the said William Meeke Fehon, that the said William Meeke Fehon was not, nor is, for the reasons in such questions expressed or implied, unfit for appointment as aforesaid, and that such alleged charges are untrue: and I hereby, in manner directed, certify such finding under my hand and seal, this third day of May, 1889.

(L.S.) C. E. R. MURRAY,  
Commissioner.

FEHON COMMISSION OF INQUIRY.

MINUTES OF EVIDENCE

Taken by Mr. District Court Judge Murray during the course of his inquiry, as Commissioner appointed for the purpose, into certain allegations and charges preferred against Mr. William Meeke Fehon, one of the Railway Commissioners of New South Wales, by Mr. John Want, M.P.

TUESDAY, 26 MARCH, 1889.

Mr. William Meeke Fehon examined:—

THE Commission was formally opened by the Commissioner at 2 o'clock p.m. Mr. William Meeke Fehon was in attendance. Before the formal opening,—

*Mr. Fehon* said: I would wish to ask what my position is?

*The Commissioner.*] Well, your position really is as a witness—in theory, as a witness on your own behalf—or, generally, your position is that of a witness; and, beyond that, you have a right, under the circumstances, to be represented here during the whole of the proceedings by an attorney, or by counsel, or personally, or both.

*Mr. Fehon.*] That puts me in the position of a defendant.

*The Commissioner.*] You are in the position of a witness having an interest, recognized as having an interest, in the result of an inquiry. Therefore, because you have an interest, you have a right to be represented. That is how the matter stands. If you prefer to be represented under the circumstances of course I will give you an opportunity to-day; perhaps there is hardly any necessity for it, as the shorthand notes will all be copied.

*Mr. Fehon.*] I will not be represented. My first impulse was to take no part in the matter, because I felt I was not affected by it. I have a further consideration, and that is, that it has gone forth, not only here but in the other Colonies that there is something wrong about me.

*The Commissioner.*] I simply wish to ask you about everything attaching to the time during which these matters alluded to have gone on.

*Mr. Fehon.*] I have not brought anything with me in the shape of documents but the printed statement already published. I can answer questions, but really I have nothing to say beyond what is in that printed statement.

William Meeke Fehon was then sworn.

1. *The Commissioner.*] Your name is William Meeke Fehon? Yes.
2. To begin with, will you tell me the position you held before leaving the Victorian railway service? I am glad you have taken that as part of the inquiry, because I was under the impression that this inquiry was to be limited to the Wright, Heaton business. I think it is fair to go back to this. I was appointed to the Victorian railways in 1858; and I attained the position of traffic manager.
3. In what year were you appointed traffic manager? About 1869 or 1870. I remained in that position until March, 1872, and I was offered a partnership in the carrying business of William M'Culloch & Co. I considered it to be to my advantage to accept it, and I accordingly resigned my appointment on the Victorian railways after about fourteen years' service.
4. Now, before you resigned that appointment, did you hear any rumours or anything said reflecting upon your fairness as traffic manager in regard to the firm of M'Culloch & Co., or any other firm? Not one word. And as evidence of that I left the department with the goodwill and respect of not only the staff but also of the citizens of Melbourne. I was presented with a handsome testimonial and a service of plate by the citizens of Melbourne in the Town Hall, and the presentation was made by the Mayor, and the address was signed by three Mayors of Melbourne; and in addition to that I was presented with a very valuable present by the staff. It is not worth while stating exactly what that was; and I left the service on the very best possible term, without one shadow of an imputation on my character.
5. When did you first hear these suggestions made that you had favoured M'Culloch & Co.? In November, 1872.
6. How many months after you resigned was that? I think it was the same year. I left in March, and I think it was in the following November; and that statement was never made but by one man.
7. Who was that? A man named John Orr, a carrier, who was also a representative of the Ovens district in Parliament. Shortly after I left the railways the North-Eastern line was opened for traffic. Mr. Orr's business was altogether in the North-East district. We had done no business in that district previously, but with the opening of the line we established ourselves in all the principal townships, and naturally we interfered to some extent with Mr. Orr's business, and it is only on these grounds that I can account for Mr. Orr making such an unfounded statement.

W. M. Fehon,  
Esq.  
26 Mar., 1889.

- W. M. Fehon, Esq.  
26 Mar., 1889.
8. Your theory is that jealousy was the foundation? Yes. I was to leave the railways in February, but the Commissioner asked me to remain another month, so that my successor might be initiated into his duties. I did so, and as a result I had to go into M'Culloch's business without having an opportunity of satisfying myself as to the value of the assets as represented on the last balance-sheet. The consequence was that I individually lost fully £1,000 through obliging the Department by remaining over that month. I wrote a letter to the *Argus*; I do not know whether you have read it.
9. Yes. You remember a letter which is dated 30th November, 1872, written by you to the Editor of the *Argus*, a copy of which appears in the papers ordered to be printed by the Legislative Assembly, on the 8th January last? Yes.
10. Does that letter state the facts correctly? Yes. It is taken from the *Argus* newspaper, and I gave a copy of it to Sir Henry Parkes.
11. You are positive as to this—that, so far as you can find out, Mr. Orr was the one originator of those stories—those charges made against you as to M'Culloch & Co.? Yes. He was the originator of them. I have never discovered any other source.
12. In point of fact, was there ever any foundation for that charge? Never the slightest.
13. When was it next raked up after the first occasion? By Mr. Want. I never heard a word in the interval.
14. Mr. Want, I believe, is an absolute stranger to you? I met him in Melbourne on one occasion. It was just a casual introduction. We are not well acquainted.
15. What interest had you in the firm of M'Culloch & Co.? One fourth.
16. That was a limited liability company? No; it was a private firm then. There were three of us: Wm. M'Culloch, John Jackson, and myself.
17. Jno. Jackson held a fourth and you held a fourth? Yes.
18. That was strictly a carrying company? Yes.
19. For the carriage of all kinds of produce and other things? Yes.
20. What was the principal "head" of carriage—wool or other produce? It was serving the pastoral community with stores and bringing wool back, using steamers on the Murrumbidgee and Darling. We used to contract with the squatters to bring their wool down and take their stores up.
21. M'Culloch & Co.'s firm, I think, was afterwards formed into a limited liability company, was it not? Yes.
22. What year was that? We were about seven years partners, so it would bring it to 1879; it would be 1878 or 1879.
23. Was it kept practically under the same management? With the assistance of a board of directors; and I was a managing director and Mr. Jackson was the other managing director. For the first three years we agreed to remain managing directors at a salary of £1,250. The shares were held in very few hands, and were held by some leading men in the city of Melbourne.
24. Of course the firm of M'Culloch & Co., in carrying, had a good deal to do with the railways—through the Victorian railways, and from Echuca, and so on? Yes.
25. Now, to go further on, you remember the question that arose in the prosecution of Messrs. Wright, Heaton, & Co., arising out of the fact that there were differential rates depending upon the weight of the bales? Yes.
26. Is it a fact that the system of charging special rates upon bales of wool exceeding 250 lb. existed in Victoria? There was a limit of 3 cwt.
27. Was the system borrowed from Victoria by Mr. Goodchap? Well, we experienced great difficulty in weighing such large quantities of wool, especially at Echuca, when three or four boats would come in together. Then we had to fall back upon the system of charging a weight that would cover all washed wool.
28. Are you speaking as one of M'Culloch's firm or as traffic manager on the railways? Both; because I was traffic manager.
29. When you were traffic manager will you kindly explain generally what the system of charging was for carrying wool bales? 3 cwt., I think, was the limit. We adopted these weights because we considered that 3 cwt. would cover all washed wool, and very little greasy wool came under that weight especially in those days. And it is easy for a man to tell a bale of wool at sight, whether it is a bale of washed or a bale of greasy. So that it did not matter about the weight, if it were a bale of washed we should distinguish it and know the weight.
30. Do I understand that there was only one single charge for the two sets of bales; that all bales however light they might be under 3 cwt. were charged the same rate, and all bales over 3 cwt. were charged the same rate, or was there an increasing and a decreasing rate? I cannot say from memory where the line was drawn; but over a certain weight an increasing charge was made. For instance, a bale of locks might weigh 7 cwt., and then it was usual to make a difference in the charge.
31. There was no decreasing charge? There was no sliding scale. It was a division of greasy and washed wool.
32. And that was an easy way of averaging the charge without the trouble of weighing? Yes.
33. I suppose if a very big bale were sent it would be weighed? In rolling a bale of wool a goods porter could tell immediately whether it were over weight or not; and most of the wool came by bont, and the weigh-bills were made out on the squatters' stations and produced to the railway authorities, so that they knew themselves what the weight of the wool was; all they had to do was to pick out anything over-weight.
34. The regular practice was to produce these to the goods clerk? Yes.
35. And they would charge according to the squatters' way-bill? Yes. I speak from a knowledge of what took place; but I never had anything to do individually with the clerical work. When on the railways I had nothing to do with way-bills and wool charges beyond advising the Minister of the day as to what charge I thought would be the best to be made. I had nothing to do with the detail work of the department.
36. During your whole experience (this is a very important question) of the Victorian lines—the working of the lines—did you ever hear, or had you any knowledge, of any complaints being made by anyone that the railway authorities were being misled by any carriers as to the weight of the wool that was being carried? I never heard such a question raised.
37. Never in any way at all? Never heard a whisper of such a thing.

- 38-39. Of course you have heard about these prosecutions, and the charges that were made before the prosecutions, in the papers and in the city, with regard to Wright, Heaton, & Co.;—up to that time had you ever heard of such accusations or suggestions of such practices having been adopted anywhere? No.
40. That was the first time you heard of anything of the kind? Yes.
41. So far as you know, have the Victorian railway authorities ever been misled or defrauded in that way? I do not know it myself, and never heard it suggested.
42. Not by anyone? Not by anyone.
43. Now we will go back to the time when M'Culloch & Co. finally (as I understand) decided to start business in Sydney—that is, a branch business;—do you remember the date of that? Speaking from memory, I should think it would be about two years after I joined Messrs. M'Culloch, about 1874.
44. Who was the manager of that branch? We took in as a partner for the Sydney branch Mr. M'Laughlin, manager for Forsyth & Co., of Wagga. We formed a good idea of his ability, and made him an offer of a managing partnership in Sydney, he to have no interest at all in the Melbourne business.
45. That is to say, the books of the two branches would be kept distinct, and he would have an interest in the proceeds of the Sydney business? Yes; but this was before M'Culloch & Co. was formed into a limited liability Company. He could not make very much headway, and he bought up two or three other carrying businesses, such as Woods, Barbour, & Co., and others. But even then they found that they were making very little profit, until negotiations —
46. Were Wright, Heaton, & Co. their bitterest opponents? Yes. I was saying that negotiations were opened up with Wright, Heaton, & Co. to buy an interest in their business. I do not know how it originated. They purchased a third share in Wright, Heaton, & Co.'s business.
47. That was after they became a limited liability Company? I rather think it was bought by the firm just before M'Culloch & Co. were formed into a limited Company. I am not quite sure about that. But M'Culloch & Co. had no voice in the management of Wright, Heaton, & Co.'s Sydney business.
48. Wright, Heaton, & Co. were then a partnership? Yes.
49. The terms with regard to the division of profits were, I think, that M'Culloch & Co. had a third? Yes.
50. Had Wright, Heaton, & Co. an interest in M'Culloch & Co.? No.
51. It was only M'Culloch & Co. that had an interest in Wright, Heaton, & Co.? Yes.
52. Do you remember what sum was paid? I think £4,000. I am not sure.
53. And both Companies were at this time simply partnerships unregistered? I am not quite sure about M'Culloch & Co. It was just about the time, at all events, that M'Culloch & Co. were formed into a limited liability Company. No! No!! I am wrong. It was not M'Culloch & Co. who were formed into a Company, because I remember coming over with Mr. Jenkin Collier to look over their plant, and I went over the place.
54. What did you come here for? To look into the assets of Wright, Heaton, & Co.
55. To look into their branches in different parts of the country? Yes.
56. Then of course you inspected their books as well as their plant? I do not think the books were inspected. I think the business was bought on their last balance-sheet. They produced their balance-sheet.
57. Then it was on the strength of that balance-sheet and the plant that you did this? Yes; and the advantage we should derive from not being in opposition to them. We reckoned that we could command better prices without opposition.
58. Then what it really came to was this: That M'Culloch & Co. ceased to exist in Sydney at all. They were no longer competing with Wright, Heaton, & Co.; but, on consideration of M'Culloch & Co. withdrawing, Wright, Heaton, & Co. agreed to sell for a certain sum their interest in their business to M'Culloch & Co. Then M'Culloch & Co. held that interest as M'Culloch & Co.? Yes, as an establishment of M'Culloch & Co.
59. In point of fact, as an investment of part of the realized capital of M'Culloch & Co.? Yes.
60. Wright, Heaton, & Co. have no interest in M'Culloch & Co.? No.
61. When were Wright, Heaton, & Co. formed into a Company—was it before or after the completion of the negotiations? It was long after the completion of the negotiations, because we ran along some time after that as a private firm; but the directors of M'Culloch & Co. thought it unwise to hold an interest in Wright, Heaton, & Co.'s business, in which their liabilities were not limited. Therefore they wanted Wright, Heaton, & Co. to form into a Company, and then the interest of M'Culloch & Co. in Wright, Heaton, & Co.'s firm was represented by shares.
62. What was the total number of shares in Wright, Heaton, & Co.? I think it was 12,000, out of which M'Culloch & Co. had 4,000.
63. Which were placed in the names of certain shareholders in M'Culloch & Co.? Yes.
64. Then the printed statement handed in is correct? Yes.
65. That resulted in your having in your name a certain number of shares? Yes; 500.
66. You may as well follow the history of your shares in this Company—of the shares which remained in your name in Wright, Heaton, & Co.—first of all you held 500? Yes.
67. How long did that amount continue to be the only shares you held? I never took any interest in the matter, so I scarcely know.
68. Explain the object in putting them in your name. The object was to give us voting power at Wright, Heaton, & Co.'s meetings. We wished to have certain control over Wright, Heaton, & Co.'s business, so that we might look after the amount of money we had invested in it. Some time afterwards we opened a place of business at Rockhampton—M'Culloch & Co. I mean. Wright, Heaton, & Co. opened a place of business in Brisbane.
69. That was a mutual arrangement I suppose? No; we were in opposition to each other, and they intended to extend their business to Queensland. We found our Rockhampton business was not a very profitable one; so it seemed to be an anomaly for people who were interested together in New South Wales to be in opposition to each other in Queensland. We therefore agreed to a proposal made by them, that we should acquire a further interest in their business, so as to enable them to go largely into the Queensland trade.
70. To withdraw opposition? Yes. They took our staff and business over at Rockhampton. Under this new arrangement our one-third interest was increased to one-half, for which M'Culloch & Co. paid £25,000.
71. Was that paid in cash or by arrangement? In cash.
72. Both branches then became Wright, Heaton, & Co.'s? Yes.

W. M. Fehon,  
Esq.  
26 Mar., 1889.

- W. M. Fehon, Esq.  
26 Mar., 1889.
73. Was that the occasion when Mr. Heaton went up to Rockhampton? I think he used to make several trips north.
74. Did he go up to Rockhampton then? Yes.
75. Has he continued to manage the North Queensland branch since then? Yes, altogether.
76. Do you know a man named P. J. McMahon? No.
77. Do you know of his having gone up to Rockhampton? I have been told so.
78. Have you met him? I might have met him; but I should not know him if I were to see him now.
79. You are aware that he was alluded to by Mr. Want as having given some information? Yes; and I took the trouble to go to Mr. Heaton and ask who P. J. McMahon was.
80. What did he tell you? He told me that Mr. McMahon had been in his employment, and had to be discharged as an unsuitable man.
81. This Rockhampton and Brisbane arrangement would only result in M'Culloch & Co. holding 6,000 shares? Yes.
82. Meanwhile, was the capital of Wright, Heaton, & Co. increased? Yes, to £80,000.
83. When was that? In 1882. In making these statements I do so entirely from memory. It was virtually this, that M'Culloch and Co. found the money for extending the business to Queensland.
84. Yes; and after consideration of that they withdrew from their position and paid the money; and the consideration on the other side was getting one-sixth additional of the whole capital and profits? Yes.
85. That was the 4th August, 1882? Yes.
86. Up to this time had your nominal interest as a shareholder in Wright, Heaton, & Co.'s remained the same? It must have been the same.
87. You had not speculated in shares outside of your interest as a shareholder, merely as a trustee of the Company? I never had any interest in it as an individual.
88. How were the extra 4,000 shares distributed? I could not tell from memory. Mr. Want gives it in one of his statements.
89. In point of fact the capital was increased? Yes.
90. As far as the statement by Mr. Want as to your holding shares is concerned, is that correct;—have you ever found out? Never. I have not troubled about it. I thought it immaterial. It would require M'Culloch's minute books to give correct information on these points.
91. You do not care to commit yourself by saying that what Mr. Want said he had discovered as to the standing of shares in your name is correct or not? He might be correct. The shares might have been in my name, though I do not know it.
92. I want you to explain to me about these 650 shares—give me the history of the 650 shares which stood in your name up to not long ago, somewhere about the middle of last year. First of all I think you have ceased to be a member of M'Culloch & Co., and therefore of Wright, Heaton, & Co.; you ceased to be a member some time ago? In March, 1883, I sold my last shares in M'Culloch & Co. I left for England in March, and just before I left I sold my last lot of shares.
93. Do you remember whether you actually transferred your shares—whether the transfers were completed in M'Culloch & Co.'s? Yes.
94. You went right out? Yes.
95. And you ceased to have an interest in that Company? Yes, and never entered any other Company.
96. Of course then you ceased to have any interest in Wright, Heaton, & Co., because you never had had any interest, except as representing M'Culloch & Co. Will you explain to me about the 650 shares, because in point of fact there were 650 shares in Wright, Heaton, & Co., still standing in your name. When you went out of M'Culloch & Co. what did you do with regard to your shares which you held on account of M'Culloch & Co. in Wright, Heaton, & Co? As soon as M'Culloch & Co. got the shares in Wright, Heaton, & Co.'s in the names of various shareholders in M'Culloch & Co. they immediately signed transfers; the individual shareholders who held the shares executed transfers to M'Culloch & Co.
97. Though these transfers were executed they were not registered? No.
98. Otherwise your voting power would have been gone? Yes. But when I ceased to become a shareholder in M'Culloch & Co. my power to vote ceased; and therefore they had to put that power in some other person's name.
99. Did you take an interest in what became of those shares? No.
100. Can you account for these 650 shares remaining in your name until last year? I will tell you all I know about them. One day I received a letter from Mr. Wright, stating that as a matter of convenience for himself —
101. When was that? I do not know. This letter stated that as a matter of convenience for himself he was putting a number of his shares in the names of a few friends, and that he had placed 650 in my name; and he asked in this letter if I would please execute a blank transfer and send it back to him. At that time there was no question of wool frauds, or anything else. I regarded Wright, Heaton, & Co. as a good business firm, and I had no hesitation in allowing Mr. Wright to put these shares in my name, although it is a thing I do not care about in ordinary circumstances.
102. How many years was this before the wool fraud prosecutions? From one to two years.
103. You are aware that a charge was made against Mr. Wright (outside this business) of practically appointing a number of dummies to hold shares for him—that was in relation to his position as a Minister of the Crown, I think? Yes; I saw it in the Parliamentary statements here, but I think he had ceased to be a Minister at that time.
104. As far as you know of anything that has occurred since, was Mr. Wright making a dummy of you then for the sake of shifting the nominal ownership of shares out of his own name? He never told me his object, and I do not know it.
105. You are quite sure he never did tell you? I am quite sure.
106. You think it was after he had gone out of office? Yes; I remember it was after I came back from England when he put those shares in my name in October, 1885.
107. Mr. C. B. Lowe, who is he? I do not know. He and several others had shares in their names: there were some good names. I believe the shares were put in their names without their knowing it.
108. What was the first you discovered the next time your attention was called to these 650 shares? I did not know of it until I saw Mr. Want's statement.
109. You executed the transfer at the time the shares were put in your name? Yes.

110. To whom did you execute the transfer of these 650 shares? I think it was a blank transfer; but if I had been asked by Mr. Want to make a statement about these 650 shares, I could not state it on oath.
111. Now we will go back a little;—what was the arrangement made between Wright, Heaton, & Co. and M'Culloch & Co. after the latter bought in to Wright, Heaton & Co.'s business, for supervision of the business in Sydney by M'Culloch & Co.? The understanding was that a director of M'Culloch & Co. should be a nominal director in Wright, Heaton, & Co.'s, and have power to sit on the board, and that we should always attend their meetings—that is, that whoever was the representative man should attend the meetings of Wright, Heaton, & Co.
112. Who was the first director who acted in that way? I think myself. I was managing director of the firm, and it devolved upon me to attend those meetings, which never occupied more than an hour.
113. Do you remember on how many different occasions you came over to those meetings? I can state that, because it was taken from Wright, Heaton, & Co.'s minute-book. I think Mr. Wright says "seven times," and four of those were formal meetings in connection with the formation of the Company.
114. Do you remember what sort of business was carried on at those meetings? The first four meetings were for the purpose of settling the terms and arranging matters between the two Companies.
115. Was no other business done than that at any of those meetings? I cannot remember, but you will see from the minute-books.
116. What took place at the other three meetings? I can tell you in general terms. The business was to read the minutes, to report the financial position of the firm, to give an idea of what the prospects of the coming season might be, and, in general terms, to talk over the finances and business of the Company. The detail business was never mentioned. The meetings usually occupied from half an hour to an hour.
117. Do you remember that at any of these meetings any allusion was made to any special source of profit? No.
118. You are quite sure of that? Quite sure.
119. Do you remember whether any allusion was made to Mr. Goodchap having instituted a new system of differential charges for wool bales? No; nothing of that kind was mentioned at all.
120. I think you said that part of the business of the meetings would be to estimate future profits. By "estimating profits" do you mean contracts made with the squatters for the coming season, and so on—and would the rates of cartage on those contracts be alluded to? Very likely they would have been alluded to to show that there was a profit, although a profit always depends upon the season.
121. Wright, Heaton, & Co. had no teams themselves? They had when we first knew them, but they sold them out.
122. They made sub-contracts with carriers? Yes.
123. Then a great many of these contracts for wool were made as contracts for so much between the station and Sydney? There was always a contract from the station to Sydney, or on board ship, or warehouse.
124. Sometimes it was a price through to the nearest railway station, and then the railway carriage was added as against the squatter? No. I do not think they made many contracts that way. It was supposed to be a through price to the railway station or on board ship.
125. Do you remember any conversation taking place at these meetings touching the margin of profit that would be left to Wright, Heaton, & Co. after they had paid the carrier, and paid the railway charges; and as to how the margin of profit was to be made? Of course the profit was calculated upon the cartage they had to pay. The railway part of the question would never be considered.
126. The railway charge would be taken as a fixed thing. Thus they would add the carters' charges, and add a certain percentage to that as profit? Yes.
127. During any conversation you had with persons connected with the firm, did you at any time hear any allusion made to any special source of profit—to the railway as being in any way any source of profit, that is to say, any profit being made out of railway charges as railway charges? No.
128. You are quite sure of that? Yes.
129. In point of fact, if you had heard allusion would you not have considered that something shady was going on? I should have reported it to the Melbourne directors as a dishonorable thing; but those who know M'Culloch & Co. know they would not stoop to shady things.
130. Assuming that such profits had been made; assuming that, by working the railway in a particular way, whether actually deceiving or actually not deceiving the railway authorities, but still departing from the strict intention of the charges, if in that way a profit had been made, if the firm had made a profit out of that in addition to making a profit in the legitimate way by a certain increase on the carriers' charges, how would you have looked upon such a course of conduct as that? As a dishonorable transaction.
131. Have you ever taken any interest in these "wool frauds" prosecutions? I did not.
132. Did you not, out of curiosity, go into the thing and try to find out what it amounted to? I had ceased to have any interest in either M'Culloch & Co. or Wright, Heaton, & Co. when these "wool frauds" were on, and I was not interested individually in the result, except that I knew the people interested. I used to hear occasionally, when I dropped in at M'Culloch's office, where I used to drop in and have a chat, I used to hear occasionally about it, but I did not read the newspaper accounts.
133. Did you see the dates alluded to in the prosecution? Yes; it went back to 1880.
134. Did it not strike you that at that time M'Culloch & Co. were shareholders in Wright, Heaton, & Co.'s business? Yes; they were.
135. Did it strike you in such a way as to notice it? Well, I know M'Culloch & Co. were indignant about it, but I did not trouble myself about it. I was a little bit shocked when I first heard about it, because I never had the slightest anticipation of any irregularities.
136. At whom was M'Culloch & Co.'s indignation levelled? At Wright, Heaton, & Co.
137. They were disgusted? They were.
138. They did, in point of fact, try to find out what was the ground of the prosecution? It was common property at the time, through the press. They knew what was taking place.
139. Then I understand you to say that you and other members of the firm ———? I was not connected with the business then.
140. But you went to the place did you, and they expressed astonishment and disgust at there being such a suspicion? Yes.
141. As to whether the prosecution was well founded or not you were never able to satisfy yourself? No. Of course it is like anything else; if a man has an interest in a Company, and sells out, he ceases to have

W. M. Fehon,  
Esq.  
26 Mar., 1889.

W. M. Fehon, Esq.  
26 Mar., 1889.

have an interest in it. That was my position with Mr. M'Culloch. I was his friend then and am now. Mr. M'Culloch and I have great confidence in each other.

142. Then from first to last you did not know anything about the internal working of their management? I did not know anything of the internal working of Wright and Heaton's business from first to last.

143. Did you ever examine the New South Wales charge sheets to see how they worked? No. I never had anything to do with the working of the business.

144. You assumed that they worked on the square? Yes.

145. You remember that Mr. Want, or some other Member, made a statement in the House that it was M'Culloch & Co. who introduced—who first worked out and imported to New South Wales, and introduced to Wright, Heaton, & Co. this—what it was suggested they looked upon as a clever dodge. Is there, or is there not, in fact, any truth whatever in that as far as any of your knowledge or experience goes? Not the slightest.

146. I understand you to say there never was a suspicion as between M'Culloch and the Victorian railways? There never was anything of the kind. It is not likely I would give up my business as traffic manager to join a swindling business. Just before M'Culloch & Co. and Wright, Heaton, & Co. amalgamated in Queensland Mr. Heaton was going on a trip through Queensland to open branches. I was on my way up to Cairns, where I was interested in a sugar estate. I called at Wright, Heaton, & Co.'s office and found that Mr. Heaton was going away on the following day. As we had got the Rockhampton business and they the Brisbane business I thought we would start there, and so I took a passage in the same steamer and we were passengers together. We went to Brisbane and Mr. Heaton bought two or three carriers' businesses at Roma and at other places. He went to Townsville and bought one or two there. I left him there. He thought he had done a smart thing in buying these businesses in the name of Wright, Heaton, & Co. But I took up the position, when we came back, that we were together and that upon what was done in the name of Wright, Heaton, & Co. M'Culloch & Co. had an equitable claim to be represented. I did this to put the screw on Mr. Heaton to bring about an amalgamation of our interests, because I thought it folly for us to be antagonistic up there. Mr. Wright said to Mr. Heaton, "Mr. Fehon is correct."

147. Who first started the Queensland business? Messrs. M'Culloch and Co. started first at Rockhampton; and our opponents desired to hunt us out. That was a very short while after I ceased to have anything to do with the business—that was the second purchase of an interest in Wright, Heaton, & Co.'s business.

I do not think there is anything more to ask you this afternoon. But if there is anything else you would like to state you may do so. I (Mr. Fehon) do not know of anything else bearing upon the case we have referred to.

To-morrow morning I shall sit at 10 o'clock, and I should like you to be here to hear what evidence is given, as it may or may not affect you. There may be some evidence which may directly affect you, and therefore I would prefer you to be here at 10 o'clock. It is not that I want you as a witness. I may ask you some questions at a further stage.

### WEDNESDAY, 27 MARCH, 1889.

Patrick Joseph McMahon examined:—

Mr. P. J. McMahon.  
27 Mar., 1889.

148. *The Commissioner.*] Your name is Patrick Joseph McMahon? Yes.

149. What are you? I am a stock and station agent?

150. Some time ago you were employed with Wright, Heaton & Co.? Yes.

151. When was it that you went into their employment? I do not exactly know. I think it was about April.

152. In what year? I am not quite sure. I think it was in 1882?

153. In what capacity did you go into their employment? First of all I was at Dubbo for four or six weeks, just getting into the run of the business. I went to Townsville as their manager.

154. When you were at Dubbo you were there for the purpose of getting initiated into the business? Yes.

155. What particular work were you doing at Dubbo? Nothing particular; just looking around.

156. From Dubbo you went—where? To Sydney. I was in their employment some little time before I went to Townsville. I was doing nothing here in their employment. I was merely waiting to go to Townsville.

157. Was that the new branch? Yes; I opened the branch myself.

158. Do you remember the date of your going to Townsville? I think it was in June, 1882.

159. How long did you remain at Townsville? Two or three months. I left some time in November. I was in their employment about six weeks before I left.

160. On account of a falling out? Well, I never could find out. I asked for an inquiry but never got it. Mr. Edward Heaton took me up there, and I could never find out the reason I left.

161. Did they send you a notice dismissing you? They sent me a telegram. I left all the papers in connection with the affair with a solicitor in Townsville. I could get no recompense, and so I did not bother any more about them. There was no agreement signed unfortunately, consequently I had no action against them.

162. Was the branch continued after that? Yes; they have had six or eight managers since I left.

163. When you were waiting in Sydney at any time, did you become acquainted with Mr. Fehon? No.

164. Did you know him? I knew him twenty years ago at least.

165. *Mr. Fehon.*] At Echuca? Yes.

166. *The Commissioner.*] You were at Echuca some time ago, and became acquainted with Mr. Fehon then? Yes, casually. It is quite sixteen or twenty years that we have been acquainted.

167. Well, now, I want you to be very particular about this. You had a conversation some time ago with Mr. J. H. Want, I believe? Yes.

168. Do you remember when that was? No; I cannot.

169. What was the conversation about? They said that somebody had told them that I knew all about these cases, and Mr. Want and Mr. Lyne came down to my office.

Mr. P. J.  
McMahon.

27 Mar., 1889.

170. You did not know how they knew that you knew? No.
171. You told Mr. Want something? Yes, I did, in the presence of a witness.
172. What was it you told Mr. Want? He asked me if I was in the employment of Messrs. Wright, Heaton, & Co., and he asked me if I knew whether Mr. Fehon was connected with the firm of Wright, Heaton, & Co. I said I did not, but I was under the impression that he was, but I would not swear it.
173. In point of fact Mr. Fehon was connected with the firm, but you did not know it? No.
174. Did Mr. Want ask any questions as to what you believed or thought about Mr. Fehon's acting in connection with the business of the firm? No; I don't think so, because I told him at once what I knew in connection with Mr. Fehon.
175. What Mr. Want says is—and I want you to listen to this carefully, because it is to be presumed that what Mr. Want said in the House he had some foundation for—he said, "I went to Mr. McMahon in company with the member for The Hunne, Mr. Lyne. Mr. McMahon made no bones about telling us what he knew. He authorized me to use his name. He said, 'I am not afraid of any one or of anything that you may say in the House or out of it;'"—was that true? I did not say anything of the kind; I had never spoken to Mr. Fehon since I saw him at Echuca.
176. Do you positively swear as to the word "boss," said to have been used on that occasion? Well, I do not remember that expression; I might have used it.
177. But if you used the word "boss," in what relation did you use it;—Mr. Want says that you pointed out to him that Mr. Fehon was to be your boss? No; that is not so. But I qualify that in this way: I was under the impression that Mr. Fehon was in the firm. I told Mr. Want that if Mr. Fehon came to my office I would look upon him as my boss.
178. Who first used the word "boss"? I do not know. Mr. Lord was in the office at the time—Mr. Frank Lord, owner of Raby Station, Warren.
179. Where is he? He is up there.
180. What did Mr. Heaton, in point of fact, tell you about Mr. Fehon? Well, coming up in the steamer he simply said that the two firms had amalgamated. I think Mr. Fehon's name was used. But it is so long ago I do not remember. I think his name was mentioned.
181. Mr. Want says you told him that Mr. Fehon was managing director of Wright, Heaton, & Co. during the time the "wool frauds" were going on? I did not say so.
182. Are you quite sure about that? Quite sure.
183. I understand you now to say that you did, when you went up to Queensland to manage this branch, know a good deal about the managing and working of Wright, Heaton, & Co.'s business? Yes; but all my business was done with Edward Heaton.
184. Now, can you say whether or not during the time you were in Sydney on that occasion (having known Mr. Fehon before) you saw Mr. Fehon? I saw him in Sydney several times.
185. For how long? I cannot say.
186. How long were you in Sydney? Well, I was living in Sydney.
187. Between the time that you came back from Dubbo and then, I mean? It was about that time.
188. What do you mean by "several times"? Oh, perhaps half-a-dozen. We passed each other in the street.
189. Within what period was it that you saw him "several times"? I cannot say; it was six years ago.
190. Did you speak to him ever? No. We were generally passing in the street.
191. Are you speaking of the time before you went to Dubbo or of afterwards? Well, it is so long ago I cannot tell. I have seen Mr. Fehon fifty times during the past seven or eight years.
192. From what you saw of him then, from the places or the circumstances under which you saw him, could you form an idea as to what business he was concerned in—in fact why he was in Sydney? Well, at one time it was known that negotiations were going on between Wright, Heaton, & Co. and McCulloch & Co. I think it was in connection with that that he was over; but I do not know. Mr. Fehon was a well known man, and I could not help noticing him.
193. I ask you again, do you or do you not believe this: that Mr. Fehon was the managing director of Wright, Heaton, & Co.? No. I thought he had something to do with the firm, but I did not know in what capacity.
194. Mr. Heaton was the man who gave you instructions? He was the only one.
195. From whom did your letter of dismissal come? I did not get one. I got a telegram suspending me. I believe it was brought about by some disunion among my clerks in the office. I may tell you that I have no love for Wright, Heaton, & Co., who treated me in a most scandalous way, and I have ever known Mr. Fehon as being an honorable man.
196. Is what you have told me all and everything that you know concerning Mr. Fehon's relations to Wright, Heaton, & Co.? Yes.
197. Were you ever at a meeting of the Company itself, in Sydney? No. A man may have impressions but be unable to swear to them.
198. Had you an impression? I had an idea, but no positive information.
199. You see, being connected with a firm, and being connected with its internal working, are two different things. Was there anything that led you to believe that Mr. Fehon was concerned in the internal working of the firm? I do not think there was really.
200. Did you convey that impression to Mr. Want? I did tell him I had an impression, but that I could not swear it. I have never had any communication from Mr. Fehon or any instructions or anything else.
201. Did you ever at any time have an opportunity of becoming acquainted with Wright, Heaton, & Co.'s business in the carriage of wool? At the time I was in the firm there was no wool.
202. Was it the off season? Yes.
203. In point of fact did you know anything at all on the subject of what is known as the "wool frauds"? No. I know nothing at all. My office was conducted properly at Townsville.
204. Was there any wool carried there when you were there? Yes. It was just commencing.
205. Was there anything shady in the transactions there? No. I used to inspect the books myself.
206. As to New South Wales carriage, you know nothing about it? Not the slightest.
207. Mr. Fehon (who was present).] Mr. McMahon may perhaps tell who were the managing directors of Wright, Heaton, & Co.? Well, I think Edward Heaton and Mr. Wright were.
208. They were the persons you got your instructions from? Yes.
209. You never saw me at any of their offices do any business at all in connection with the carrying Company? No.

Mr. P. J.  
McMahon.  
27 Mar., 1889.

210. *The Commissioner.*] You see I must find out the exact facts as well as I can. You know the charge made against Mr. Fehon, and you know that your name has been used in relation to that charge. In point of fact, Mr. Want has made you the principal foundation for his charges? Well, I told him he could use my name. I suppose the others gave him plenty of information, but would not allow him to use their names.
211. Now, after what Mr. Want has positively asserted in Parliament, do you still assert that you have no knowledge whatever in any way of Mr. Fehon being concerned in the internal working of the business of Wright, Heaton, & Co.? I have no positive information.
212. Have you any knowledge other than positive? Well, I did suppose he was connected with the firm.
213. I am not asking you about his being connected with the firm, because he was? Well, that is the only way in which I meant he was connected with the firm.
214. That is what you meant? Yes; and I believe I told Mr. Want that.
215. You suppose that being connected with the firm he might know something about the working of the firm—is that what you mean? Yes; that is something after what I think.
216. Mr. Want goes on to say that, "Mr. Fehon is managing director of the company"—you say you did not tell that? Yes; I could not have said it because I knew the managing directors were Messrs. Wright and Heaton.
217. Do you know from any conversation you have had with Mr. Lord since, that he recollects what was said on that occasion? Yes; I think he does. We both spoke pretty strongly after Messrs. Want and Lyne left. Mr. Lord told me I should not have answered their questions.
218. What was the manner of Mr. Want at the time—was he cool and collected? Oh yes; he was quite collected. He seemed to have plenty of desire for information.
219. Was Mr. Lyne eager to? Yes.
220. Did they seem to be anxious for information? They were particularly anxious.
221. I should like you to tell me now, as nearly as you remember, exactly what did occur at this interview? Mr. Want put a question to me in the same form as you have done. He asked if Mr. Fehon was connected with the firm. I said I had that impression, but that I could not swear to it. He asked if I would recognize him as my superior in the office, and I answered, "Yes," and that I would give him my chair.
222. What was said after that; do you remember? No; I do not remember very well.
223. Do you remember what Mr. Lyne said? Mr. Lyne said nothing. They were not five minutes in the office altogether.
- 223½. What was said about your name? I said that they might use my name; I had nothing to be afraid of.
224. What was your state of feeling at the time; were you pleased that this had taken place? No; I was sorry.
225. Were you inclined to be cool, or were you excited yourself? No; I was not excited.
226. I suppose you had heard about the accusation before that made against Mr. Fehon in the House, so that you knew what they were driving at? Yes; but I think it was the evening before the day on which Mr. Want spoke that he came to my place.
227. Before the Government went out? Yes; I have not spoken to Mr. Want or to Mr. Lyne since.
228. I suppose that is all you know about this matter? I think so. I think I told Mr. Want it was a good appointment.

THURSDAY, 28 MARCH, 1889.

Thomas Stephens Sherritt examined:—

Mr.  
T. S. Sherritt.  
28 Mar., 1889.

229. *The Commissioner.*] What is your name? Thomas Stephen Sherritt.
230. What are you doing now? I am with Messrs. Dawson and Sons, solicitors.
231. You were with them at the time of the alleged wool frauds prosecution? Yes.
232. In what capacity? In the capacity of costs clerk.
233. At one time you were in the service of Wright, Heaton & Co.? I was.
234. First at Armidale and then at Glen Innes? Yes.
235. Were you at Armidale after the line had been opened there? Yes. I was living at Armidale.
236. How long were you in their employment at Armidale? I cannot tell.
237. Was it some months? Yes. I fancy it was about eight or nine months.
238. What position did you hold? I was general clerk in the office.
239. Had you an office outside the railway station? Yes; there was a little office outside.
240. And there you were employed as forwarding clerk? Yes.
241. What was your duty then? Principally making out what they called way-bills for goods going to Wright, Heaton & Co.'s, in Sydney, and for goods coming up.
242. When you were at Armidale was any wool coming down? I cannot say. I had nothing to do with the wool there.
243. Then you went to Glen Innes, still remaining in their service? Yes.
244. You went shortly before the opening of the line? Yes.
245. About two months before? Yes.
246. How long were you in their service at Glen Innes? About thirteen or fourteen months.
247. So you were there for nearly a year after the railway opened at Glen Innes, in their employment? Yes.
248. What did you do? I used to do almost everything in the office there, helping most of the other clerks.
249. What were you nominally? I was not a clerk there virtually, but nominally I was.
250. Who was the manager at your branch there? Mr. J. C. Hine; since dead.
251. While you were at Glen Innes had you much to do with the carriage of wool carried by Wright, Heaton & Co. for squatters? Yes, a great deal.
252. Was there a weighbridge at Glen Innes? Yes, there was.
253. Was that one of those station weighbridges, or one of the large ones for weighing a lot, or were both kinds there? They had both; a large weighbridge that waggons could go on, and a smaller weighbridge at the goods-shed.

Mr.  
T. S. Sherritt.  
28 Mar., 1889.

254. What was the practice with regard to the weighing of wool that came down for transmission? There was a way-bill usually sent with the wool brought from the station by the carrier.
255. Did that show the particular weight of each bale? Yes.
256. When the way-bill was so sent down with the weights was the wool then put on to the scales at Glen Innes, or was it not weighed? Sometimes it was put on the scales.
- 256½. Did you take down the weights? No; I used to take the consignment-notes and get the receipt back. I gave a form to the carter who tore it in two and gave me back the receipted half, and gave half to the porter.
257. Did that consignment-note show the weight? It showed the weight I put on the consignment-note. They did not run the wool at hundredweights, but at so much per bale—under 4 cwt. so much, under 5 cwt. so much, and under 6 cwt. so much per bale. And I would have instructions given me to this effect:—"You had better send this down at such a rate; all bales weighing 6 cwt. and over send down as under 6 cwt., and all bales of 5 cwt. and over send down as under 5 cwt."
258. Then there was a 4-cwt. standard? Yes. But I think that was the last standard.
259. Had not they a 250-lb. standard as the minimum bale? I am almost sure they had. I was told to send down bales that were under 4 cwt. at the minimum.
260. What was the minimum? I do not remember.
261. Are you aware that there was on some lines a minimum of 280 lb. which was afterwards, I think, reduced to 250 lb., or raised from 250 lb. to 280 lb.? I know nothing about that.
262. So far as you can remember then the 4-cwt. standard was the minimum? So far as I remember, but I am not sure.
263. Do you mean to say that it was the regular practice for the manager to instruct you to send wool down at weights below the weights actually shown? Oh, yes.
264. How was it that the porters did not discover that? They did discover it. But the receiving porter at Glen Innes, Fitzgerald, was in Wright, Heaton, & Co.'s employ before the line was opened, and having no further use for him when the line was opened, Mr. Hiney, who was a great friend of Mr. Higgs, the manager, got him appointed a porter.
265. Can you say that he was aware of these proceedings? Yes. He never questioned weights; he never altered them.
266. It was after the weighing of the wool that the false entering of the weight took place? Oh no.
267. Before? Yes.
268. But it was weighed afterwards? Yes; after this the wool would very likely be put on the scales.
269. And then the discrepancy would not appear, if there was nobody to take notice of it? No. I may say that I have known times when the receiving porter, Fitzgerald, has been busy elsewhere, and has said "Oh, never mind that."
270. And then it was not weighed? No.
271. Do you say that during the whole time you were acting in this capacity the same practice went on? I may make one or two exceptions.
272. What exceptions are these? Well, that was when the head porter would go up to look at the wool going down, perhaps once in three or four months; and then we had to send the correct weights.
273. How did you know when the head porter was going round? We never knew. We had to alter the notes afterwards.
274. Was your attention drawn by him to the fact that the consignment-notes were wrong? Yes.
275. If this was the regular practice, then every time that he happened to go up himself he would be almost sure to discover that the weight on the consignment-note was less than it appeared in the scales? Yes, if he weighed the wool.
276. But you say it was sometimes not put on the scales? Sometimes not.
277. Did he go round by accident, or because he suspected something? I think it was because he suspected something, because he and the manager, Hine, were not good friends.
278. But they afterwards got more friendly? Yes; and Chapman, the porter, used to get presents from Hine.
279. Do you remember any occasion on which you returned wool correctly? Oh, yes.
280. To what extent did you make incorrect returns? To a great extent. But if the wool was not contract wool, the advantage would all be gained by the consignee, and not by Messrs. Wright, Heaton, & Co.
281. It was only contract wool on which an advantage would be gained by Wright, Heaton, & Co.? Yes.
282. What proportion of contract wool had you in proportion to the wool the freight on which would be paid by the consignee? The latter was a small amount.
283. When wool did go through that way did you know it was going through in that way? Yes.
284. In these cases, did you send correct returns? Yes; I took the carrier's way-bill, which I assumed was correct.
285. During all this time had you only instructions from Hiney, or did you receive any instructions from any others—from members of the firm? No.
286. Not from members of the firm? No. In fact the head of the firm was only up there once.
287. Can you remember any specific conversation you had with Hiney about this matter? I have had some conversation with him. He was speaking about some wool from Vivers, of King's Plains. He said, "Be sure and send that wool down correctly." What I mean by "correctly" is, correctly for our firm.
288. Did he at the time define the word "correctly," so as to lead you to infer that it meant that, and not absolutely correct? Oh, yes; because he first initiated me.
289. When he first initiated you into this system, what did he say? Oh, he only told me how to do it. He said, "You can send it over to Fitzgerald; he will not say anything."
290. Did he make any allusion to frauds? He said, "We have a contract with the consignor to deliver his wool at a certain price, and the cheaper we can get it down by railway so much more profit shall we make."
291. During all this time that this was going on, can you say (now this is very important) from your own observation and knowledge whether the railway authorities, the real railway authorities—I don't mean Fitzgerald or men like him—were cognizant of this system which was being adopted? I do not think the real railway authorities knew of it. I knew the head clerk up there, and I do not think he was cognizant of it; and the head porter would have stopped it.

Mr.  
T. S. Sherritt.  
28 Mar., 1889.

292. From the conversation you had with Hiney did you conclude that it was an open honest fraud, or a *sub rosa* proceeding? I really did not think it honest, but I was in the firm and did not give a great deal of thought to it. And Mr. Hiney said they had done it at Uralla and Tamworth.
293. Did he ever say to you anything like this—"The railway people know all about it?" No; I do not think so. He told me always to do it with contract wool.
294. Did he justify it morally with you? No.
295. What age were you when you went to Glen Innes? I think I was about 17.
296. How many other clerks were there altogether in the office there? Only one.
297. Was he cognizant of this? Yes; because when I happened to be out he would do it for me.
298. Did you never raise any question, and say, "This is a queer way of treating the Government?" No; I thought it was part of my duty. I did not take any view of the moral aspect of the question.
299. Did you ever during this time hear the expression "averaging" used? I think I did.
300. In what relation was it used? That is a thing that I do not think was done at Glen Innes; but I have heard that averaging used to be done on the Western line. A fellow clerk, named Simpson, at Glen Innes, said that on the Western lines averaging took place, but not so barefaced as there.
301. Was he a witness on the Wright, Heaton & Co.'s case? No.
302. I understand "averaging" to mean this: It being difficult to weigh specific bales of wool, and comparatively easy to weigh a lot on the regular weigh-bridge—where there are different weights of bales on the same lot—the whole weight is taken out and then divided by the number of bales to find the mean weight of a bale. Was anything of that kind done? No. It was done in a more bold way.
303. By that system, one might arrive at a wrong conclusion, one way or the other. Your system arrived necessarily at only one wrong conclusion, and that was always the one way? Yes.
304. Can you say what was the largest number of pounds you would knock off a bale that was in excess of any given standard to bring it within that standard? Yes; I would bring it to the next standard, and from one standard to another.
305. So that a 4 cwt. 3 qr. bale you would return as under 4 cwt.? Yes.
306. There was no *pro rata* charge between the standards? No.
307. How came you to leave Glen Innes? My mother came down, and I told the manager I would like to go to Sydney, and he gave me a letter to the head office, and I came down and went on there.
308. In what capacity? In the railway inwards department.
309. That means the receipt of goods? Yes.
310. Had you while employed there anything to do with the carriage of wool which involved a knowledge of this system you have spoken of? Yes.
311. Explain how it was? If wool was sent down from Glen Innes to Sydney consigned direct to the agents—to Mort & Co., or others, I would get the receipts.
312. You would get the consignment notes made out in your office at Glen Innes, on whatever plan was being adopted there? Yes.
313. Would you at the same time get the squatters' way-bills? Yes; we used to send the squatters' way-bills, the consignment notes, and the invoices.
314. Did the invoice show the weight? Sometimes it did, and sometimes not.
315. Does the consignment note, which is the material document for showing the weight sent from the local railway station, show that weight, and the weigh-bill show the weight as taken down by the wool-growing station? Yes. The head office made the charges, and Wright, Heaton, & Co. the contract.
316. Did the way-bill come down to Sydney? Yes.
317. And then the way-bill was always there to be compared with the consignment note? Yes.
318. Did they come down in one envelope or pinned together? The invoice was by itself; and I used to open the consignment notes and the squatters' way-bills.
319. If this system were adopted with regard to the charges at Wright, Heaton, & Co.'s agency at the Railway Station there must have been a discrepancy in weights between the squatters' way-bills and the consignment notes? Yes.
320. Did the squatters' way-bills show aggregate weights or bale weights? Bale weights.
321. Did they show the bale weights by the pounds? Yes.
322. Then these all came into the office in Sydney? Yes.
323. What was done with them? They were taken out of the bags and put on Mr. Heaton's table, and then sent out by Mr. Heaton to different departments.
324. What different departments? To different departments in the office. They were given to me sometimes. There might be some private letters for clerks. They all came to the inwards receiving department.
325. On any occasion while you were there did any member of the firm make any remark to you about weights? No.
326. Did you hear any remarks made by any of the other clerks? I heard some of the clerks mention the matter of weights to Mr. Heaton. The clerk Stevenson came to me first and said on one occasion, "It is a shame that they have not sent down a less weight for this wool. See what they could have done." He added, "I will go and tell Mr. Heaton about it;" and I said, "The clerk who sent that down will get into a row."
327. Did he tell Mr. Heaton? He went into Mr. Heaton's room, and I saw through the open window of the room that Stevenson was standing near the window, and I heard Mr. Heaton say, "Of course it's a great shame."
328. That was the only occasion, was it? Well, I have known Stevenson go to Mr. Windsor, the secretary, who used to write to the clerk about it. Only in serious cases would he go to Mr. Heaton.
329. Can you remember any other specific occasion? No, not any specific occasion; only generally.
330. Where is the office where you were employed situated in Sydney? No. 241, Pitt-street.
331. Is that the building in which all the offices of Wright, Heaton, & Co. are, or are they spread about Sydney? I think that is the only one.
332. Where is the Board room? I think behind Mr. Heaton's private room.
333. Did Mr. Wright, or any other members of the firm as far as you could see, have any management of the details of the business? Not in my time.
334. Mr. Heaton was the only person who managed the details? Yes.
335. He appeared to be the sole manager in Sydney? Yes; he was managing director entirely.

336. Did you see Mr. Wright or any other members of the firm? I have seen Mr. Wright in the office, and spoken to him several times; but I did not speak much to him in the office.
337. When you arrived in the morning was Mr. Heaton generally there? Yes.
338. And when you left in the evening? Yes.
339. Did you meet him ever casually when you were arriving or leaving? Yes, I have met him at times; sometimes late at night.
340. On any of those occasions was it customary for him to shake hands with you? No; sometimes he would not speak.
341. Did he ever shake hands with you or with any of the other clerks? Not that I saw.
342. How long were you in the Sydney office? It must have been about four months.
343. How was it you left the Sydney office? I was in one day when Mr. Heaton asked me if I would like to go away. I said, "I have only just come to Sydney." He asked me to go to Normanton to take charge of an office there, where they had an outside manager.
344. What did you say to that? I told him I would see; and I finally arranged to go.
345. Did you go? Well, I started and got to Brisbane, and met a friend who said that Normanton was a bad place and full of fever.
346. And so you came back to Sydney? Yes.
347. Did that result in your having any dispute? Yes; that resulted in my leaving.
348. What salary were you getting in Sydney? Thirty-five shillings or thirty-seven shillings and sixpence.
349. What salary were you to get at Normanton? Four pounds, and a rise in a month, and a trip to Sydney, with all expenses paid, at the end of a certain period.
350. Up to the time when you left, had you any reason to suppose you were not trusted by Wright, Heaton, & Co.? No; because I received two telegrams at Brisbane, telling me to go to Normanton, after I had sent them a telegram saying I was not going.
351. What salary did you get at Glen Innes? Five shillings less than I got in Sydney.
352. What salary are you receiving from Dawson and Sons? Two pounds ten shillings.
353. What was the date of your leaving Wright, Heaton, & Co.'s employment? About August or September, 1885.
354. That was about twelve months before you were called as a witness in the case of the alleged railway wool frauds? Yes.
355. What employment did you go into? I went to Harriss and Attwood's, wholesale grocers, in George-street.
356. How long did you stay with them? Three days.
357. How was that? It was entirely on account of salary. They did not give me the salary I had expected to receive. I left; and on the following Monday I went to Dawson's, where I have been ever since—for three and a-half years.
358. After you had been there some time, I suppose twelve months, something occurred about these wool fraud prosecutions? Yes.
359. Who was the first person you had an interview with about them? I think someone came down to me from Mr. M'Laughlan, the solicitor's, office.
360. Mr. M'Laughlan was acting for the defendants? I think so.
361. In consequence of this visit did you go anywhere? I went up to Mr. M'Laughlan's office.
362. Did you see any member of the firm of Wright, Heaton, & Co. there? I saw Mr. Heaton.
363. What occurred between you and him? He shook hands with me.
364. Was that the first time he had shaken hands with you? I am not sure.
365. You had some conversation about Glen Innes? Yes.
366. What was it? He asked me what I knew about it. I replied that the goods there were sent down under weight. He said, "I believe you are subpoenaed by the other side?" I said, "No, I am not." He said: "We have done nothing to you; what is the use of giving evidence against us?" I told him I had not been subpoenaed, when he remarked, "But you will be." I think he asked what I had to do with the wool at Glen Innes. I told him that nobody consigned it but myself. But I am not sure now whether it was Mr. Heaton or Mr. M'Laughlan who asked me whether I would like a trip. I fancy it was Mr. Heaton, but I would not like to say.
367. What did you say? I said "No; I do not want to go anywhere at all." He asked me who told me to understate wool at Glen Innes, and I told him Hiney did.
368. There was some other conversation as to which you were cross-examined before the late Chief Justice Martin at the trial. Do you remember it? I said they asked me to go away on a trip.
369. Did he use any expression equivalent to calling you dishonest for having admitted that you joined in this system? Yes. Mr. M'Laughlan said:—"Don't you know that you are a thief for having done this;" and he said that I should be charged with the defendants.
370. Did he use any other expression? He said it would look very well if he should tell Mr. Dawson about it. He put it in a very strong light, and asked if I knew it was criminal.
371. Did you receive anything for giving evidence? Yes; 2s. a day for nine days.
372. Is that all? Yes.
373. You got no bonus? No.
374. Is there anything more you can think of that you have not told me about this matter that you know? Nothing, except that when I was leaving Mr. M'Laughlan's office, he opened the door as wide as possible (there were eight or nine clerks in the other room), and said "No, Mr. Sherritt, your evidence is no use to us." I was sure it was done to let the clerks believe that I had come to volunteer evidence. But as a matter of fact, I had been asked to come down to the office.
375. You are aware that your evidence in this matter is important—do you now positively swear that so far as your recollection goes this evidence is true? Yes; every word is true.
376. You have not diverted one iota? No.
377. This is substantially true? Yes; I am quite prepared to swear it is true.

Mr.  
T. S. Sherritt.  
28 Mar., 1889.

William James Moore examined:—

- Mr. W. J. Moore. 378. *The Commissioner.*] Your name is William James Moore? Yes.
379. What are you? A clerk in the Railway Department at Darling Harbour.
- 28 Mar., 1889. 380. At one time you were employed by Wright, Heaton, & Co.? Yes.
381. When did you first enter their employment? In May, 1881.
382. In what capacity? As clerk.
383. At what salary? 10s. a week.
384. How old were you then? 15 years.
385. Where did you first go when you entered that service? I went to Dubbo, and remained there twelve months.
386. Where did you go to then? I went from Dubbo to Nevertire.
387. How long did you remain there? About a fortnight, when I came back to Dubbo.
388. How long did you remain then at Dubbo? I was on and off at Dubbo for about two years, occasionally going to Wellington, Narromine, and Nevertire.
389. Did you then leave their employment? No. I was in their employ nearly three years.
390. Where did you go after leaving Dubbo? I went to Trangie, between Dubbo and Nevertire. I was also at Nyngan.
391. When did you leave their service? In the year 1884, I fancy. I think it was about two years and nine months from the time I went into their employment.
392. During this time did you receive an increase of salary? Yes, every year. When I left their service I was receiving £2 per week.
393. Beginning with the first place that you went to—Dubbo,—what did you do there? I was junior clerk in the wool receiving and goods forwarding office.
394. I suppose that during a good part of the year the traffic in wool from Dubbo to Sydney was large? It was during two or three months in the year.
395. I suppose from the beginning of July until the end of December? Well the wool season began in August.
396. When you were first at Dubbo had you any knowledge of any practice connected with the weighing of or charging by weight for wool? Yes.
397. Was the wool carried by Wright, Heaton, & Co. mostly contract wool, or mostly wool the carriage of which was paid by the consignees themselves? It was mostly contract.
398. What was the proportion of the other? Very small.
399. Did you know at Dubbo, on the first occasion, what the railway charges were per bale for wool; or, rather, did you know the principle on which the wool was charged? Yes. The wool was carried at a 250-lb. and also at a 4-cwt. rate.
400. Was that system of charging in vogue before you went there? Yes.
401. Was there no intermediate charge? No. Up to 250 lb. there was one charge; over 250 lb. and up to 4 cwt., there was an increase.
402. Would a bale of 3 cwt. 3 qrs. be charged as a 4-cwt. bale? Yes.
403. Was there no *pro rata* charge above 4 cwt? Yes; there was a charge for 5 cwt. and 6 cwt.
404. That being so, was there during your experience at Dubbo, any peculiar system adopted by Wright, Heaton, & Co. with regard to paying the Railway Department for the weight of wool carried by the Department for them? Yes.
405. What was the system? The system was this: The difference between the 250-lb. rate and the 4-cwt. rate was so much, that they used to try and send as many bales down as they possibly could at the 250-lb. rate. Thousands of bales would run between 250-lb. and 4 cwt. Those bales in the majority of cases were consigned at the 250-lb. rate, as if they did not exceed 250 lb.
406. Did that practice cease at any time, or did it continue during your whole experience in Wright, Heaton, & Co.'s employment? It continued all the time.
407. Did you in your capacity as clerk have to make out any consignment-notes? I did.
408. During the whole period? During part of the time that I was located at Dubbo; during the first year of my apprenticeship. I did not make any out afterwards.
409. While this was your business, what was the practice with regard to entering the weights? Well, it would be done in this way: If there were 40 bales of wool weighing a given weight, according to the carrier's way-bill, they would be worked out as 30 bales at 250 lb. and the ten remaining would go to fill up the weight.
410. Do you mean that the aggregate weight was in the end brought up to the proper total by working the intermediate rates at a less charge than the railway would have been entitled to if the correct weight of each individual bale had been given? Yes.
411. Is that what was understood as averaging? I never heard it mentioned in that way.
412. When did you first hear the term "averaging" mentioned? Down in Sydney, during the trial.
413. Are you quite sure you never heard the system discussed as "averaging" until the word was suggested at the trial? I am quite sure I did not.
414. Describe how the thing was worked with regard to the making out of the consignment-notes as compared with the carriers' way-bills. First of all the carrier brought his way-bills? Yes.
415. Did the way-bill show the individual weight of each bale? In nearly every case. In some cases forty bales would be shown as one lot, and one aggregate weight.
416. What proportion of the lots was shown in aggregate only? There were a good many, but not so many as the other.
417. Supposing a lot came to you in aggregate, you could not tell, without weighing, what each individual bale weighed? No.
418. You assumed that the whole weight was correct;—did you have the means of telling the weight of each bale? No.
419. Well, what would you do? We would work it out in the manner I have just explained.
420. Did you take it by guess? I never went and looked at a lot all the time I was there.
421. What would be your ultimate object in making out the weights in this way? The object would be to make a profit out of it.

- 422-3. From what you could see was it defrauding the Government? Yes; because instead of the Railway Department reaping the benefit the forwarder would.
424. Take the case of a lot giving detailed weights: Supposing you had a lot in which several bales were detailed, how would you act with regard to that;—would you adopt a similar plan, or adopt any plan having relation to the particular weights of the particular bales? It would be just on the same principle.
425. Used you, or used you not, in that case to return the correct weight of the bales as given on the way-bills for the purpose of being charged by the Railway Department? It would be worked out on a similar system. I rarely returned the individual weights.
426. In working out one of these plans of charging did you compare with the way-bill to see whether you had departed very far from the actual weights of the bales? Sometimes.
427. Why was that? Well, I would not like the thing to go out too glaring.
428. You were careful not to make the discrepancy too clear? Yes. I must admit that at that time it was my first experience of office work. This system was in vogue and I adopted it.
429. You are talking now about the first twelve months, when you were acting as receiving clerk? I was not receiving clerk at that time; but only for some months of the year.
430. What other place did you fill? I first joined as messenger, and afterwards became clerk.
431. When you were a messenger I suppose you had no knowledge of this? No. During the first wool season I knew nothing about the wool. It was at the end of my time at Dubbo that I had anything to do with the transmission of wool. Up to the 2nd of October I was acting as receiving clerk and had been for four months.
432. After that you went somewhere? Yes, I went to Nevertire.
433. What did you do at Nevertire? I made out accounts in the ledger.
434. Did that involve any knowledge of this system? No.
435. Did any of your employment after that involve any knowledge of the system? No sir, I do not think I had any connection with the wool.
436. It was during four or five months that you were connected with the transmission of the wool? Yes.
437. Do you know how many bales you sent through during that period? There might have been 20,000. I cannot say.
438. By whose instructions did you first adopt this plan. Was it by any one's special instructions? Well, I took that office from Webster, who was clerk there before me. He initiated me into the system.
439. How did he explain it to you? He showed me a way-bill, and said it was customary for the firm to get as many bales down at the 250-lb. rate without making it appear that there was any difference in the weight.
440. Did you suggest that this was not quite square? Yes.
441. What did he say? He treated it in a jocular—in a light way.
442. Afterwards, did you have any instructions from, or connection with, any other member of the firm? Yes; with Hansard, one of the defendants.
443. What conversation did you have with him? He told me how to do it; and one day he rebuked me for not having sent down a sufficient number of bales at the 250-lb. rate, and he took a way-bill and made it out himself.
444. To show you how you could improve upon it? Yes.
445. Did you have any other conversation with any other member of the firm? No, sir.
446. Some little incident occurred with regard to one Gillhan;—what was that? That was something connected with Mr. Hansard.
447. Where did that occur? At Dubbo. Mr. Hansard rebuked Mr. Gillhan for not having sent a sufficient number of bales of a certain sort at a certain rate. Mr. Gillhan made out a consignment-note properly, and Mr. Hansard was very much incensed about it, and then took a consignment-note and made it out himself.
448. Have you any knowledge at all of Mr. Fehon? No, sir.
449. Did you ever see him in your life? Yes, I saw him this morning.
450. Yes; but before? No, I never saw or heard of him before.
451. Did you ever hear any report in the office from anyone as to who had initiated this very peculiar system of making out weights? Not until I came to Sydney, subpoenaed to appear as a witness in the trial.
452. As far as you know, did it originate with the firm? I believe it did.
453. What was the report you heard in Sydney? That Mr. Windsor was the originator.
454. Was it ever reported that the system had been imported from Victoria? I don't remember.
455. I suppose the clerks sometimes had conversations on the subject themselves? Yes. The clerks themselves used to talk about it in the office.
456. When this system was carried out, how was it that the railway authorities at the railway stations did not discover the discrepancy between the weights returned on the consignment-notes and the actual weight on the way-bills? I don't know.
457. At Dubbo there were two weighbridges? Yes.
458. Was there one for weighing individual bales? Yes.
459. To what extent was that used? I never saw a bale on it.
460. Was it the practice at the railway station to accept the consignment-notes as correct? Yes.
461. Would it have been possible to weigh each individual bale except in the slack season? No.
462. Did you ever know of a case of a single bale being tested? Yes.
463. Where? At Nyngan.
464. How long before the last proceedings? Twelve months.
465. Can you remember why that was tested? No.
466. What were you doing there? I was with Croker & Co.
467. Was this a lot sent by Wright, Heaton, & Co.? Yes.
468. Do you think Croker & Co. put the Government up to test the lot? I don't know; I heard it said that the receiving porter had his suspicions about that lot.
469. During the time this practice was going on can you say whether the railway authorities themselves were cognizant of it? I hardly think they were; they might have been.
470. While doing your duty at Wright, Heaton, & Co.'s, was it treated as an open thing, as something done with the knowledge of the railway people? I never knew that the officers of the Department had any knowledge of it.

Mr. W. J. Moore.

28 Mar., 1889.

- Mr. W. J. Moore.  
28 Mar., 1889.
471. What was your belief at the time? That they did not know of it.  
472. What do you think about it now? I can hardly understand that such a tremendous swindle could have gone on so long without detection. I did what I did because otherwise they would have dismissed me.  
473. Was it known to all the clerks? To most of them.  
474. How came you to leave the service of Wright, Heaton & Co.? They placed me at manual labour at Nyngan, and I was not at that time capable of it.  
475. What sort of labour? Shifting bags of grain in the grain store, and so I left them.  
476. There was no particular dispute? No.  
477. Where did you go? I went to Dubbo, and afterwards joined Croker & Co., and afterwards I went to Mr. Cass, general agent, at Coonamble. I remained with him three or four months. After that I went to McCallum & Co., and then I was brought down here by the Attorney-General to give evidence at the trial.  
478. How did they find out that you could give evidence? I don't know.  
479. Was that the last employment you were in before you were taken into the Railway Department? Yes.  
480. You have been in the Department ever since? Yes.  
481. Have you ever been dismissed from any employment? No; except in the case of the winding up of a business. I left Croker & Co., because they were winding up, and Cass' also.  
482. Had you a row with Hansard at one time? Yes.  
483. What was that? It was over a game at billiards.  
484. How long was that before you left Wright, Heaton, & Co.? Twelve months.  
485. As much as twelve months? Yes; or nearly twelve months. I was suspended and dismissed for six weeks and then went back and stayed eight or nine months.  
486. When you left you left on good terms? Yes.  
487. Where did you have the row with Hansard? That was at Nyngan.  
488. From first to last you never heard anything about Mr. Fehon? No.  
489. You never heard any rumour that this system of returning false weights had been introduced or borrowed from Victoria? I never heard it mentioned at any time.  
490. Is there anything more you can tell me about this matter? Only that I have never heard it mentioned that Mr. Fehon was connected with Wright, Heaton, & Co.  
491. Did you ever hear of Messrs. M'Culloch & Co. having bought into Messrs. Wright, Heaton, & Co.? Yes; I heard that they were connected in some way or another.  
492. Did you ever hear that M'Culloch & Co. had joined in the internal management of the Company? No.  
493. Did you on any occasion see Mr. Heaton at Dubbo, or any place? Yes.  
494. What was he doing? I do not know what his business was; I think it was general business with the managers.  
495. What was the name of the manager at Dubbo? Mr. Bonamy.  
496. Had you ever any conversation with Mr. Heaton about this matter? No, sir.  
497. You know how important this evidence is. Have you any hesitation as to the correctness of this evidence of yours, or do you now assert, on your oath, that this evidence is perfectly true? I will swear that it is perfectly true.  
498. You have no doubt about it? No doubt.  
499. Your cross-examination before the late Sir James Martin was short? I think it occupied about half-an-hour.

---

FRIDAY, 29 MARCH, 1889.

Robert Wilford Dickson, examined:—

- Mr. R. W. Dickson.  
29 Mar., 1889.
500. *The Commissioner.*] Your name is Robert Wilford Dickson? Yes.  
501. What is your occupation? I have none. I have lost my situation through coming down from the country to-day to attend this Commission.  
502. What were you doing? Teaching for Mr. Smith at his place, 25 miles from Narandera.  
503. I will take a note of that, because it may entitle you to some further consideration on the part of the Government. What salary were you getting? £30 a year and my board. It is a small salary, but they were selectors; but still it was a home. I have lost it.  
504. I do not understand how it was necessary that you should lose it? Well times were dull, and the selector said that he could hardly afford to pay for a tutor for his children; and that as I was coming down to Sydney, I had better try and get something better.  
505. At one time you were in the Railway Department? Yes.  
506. In what capacity? Book clerk.  
507. Where? At Wellington.  
508. Then you left? Yes.  
509. Were you dismissed, or did you give it up voluntarily? No. I was induced by Mr. Bornthorne, manager for Wright, Heaton & Co., at Wellington, to join Wright, Heaton & Co.'s firm.  
510. What wages were you getting from the railway before you left? 7s. a day.  
511. What did Wright, Heaton & Co. give you? £3 10s. per week.  
512. You joined as what? G. O. B. clerk—that is, goods outward book clerk.  
513. You stayed at Wellington—how long? I was in the Railway Department there some six months. I was eighteen months altogether at Wright, Heaton & Co.'s.  
514. How long at Wellington? I don't remember the exact period. I left Wellington and went to Nevertire, and from there to Nyngan, in the same capacity. I was afterwards appointed manager at Tarrago.  
515. How long were you at Tarrago? Fifteen months.  
516. How came you to leave? Well; I did not leave. I was travelling securing wool contracts, and while I was away an assistant was sent from Sydney to take charge of my place during my absence.  
When

When I had finished my wool contract business I was sent for to come down to Sydney. Mr. Heaton was then away in Queensland, and I waited about and could not see him, and that was how I left. I was not discharged.

Mr. R. W.  
Dickson.

29 Mar., 1889.

517. You were taken into their service in 1888? Yes.
518. After leaving their service where did you go next? I got a position under Government as clerk to the unemployed at Rookwood. I was clerk, and I kept a store in the camp.
519. How long were you there? I was there two years, till the thing was wound up.
520. Where did you go then? I went to look for employment, and got my present position.
521. How long ago was that? Twelve months ago.
522. Before you went into the service of Wright, Heaton, & Co., and while you were in the employment of the Railway Department at Wellington, what were your exact duties? I was called the platform porter.
523. Had you anything to do with the transmission of wool there? Yes.
524. Sent down by Wright, Heaton, & Co.? Yes.
525. What had you to do with the transmission of wool? I used to see the lots and the weights.
526. What was the practice. Did the wool always come with the way-bills? Yes.
527. Was it the practice to weigh the wool by the lot? Yes.
528. Do you remember it ever having been weighed by the bale? No, except on one occasion, when there was some dispute about five or six bales.
529. Was that some of Wright, Heaton, & Co.'s wool? Yes.
530. How did the dispute arise? The head porter thought there was more weight than was stated.
531. What was his name? Hickey.
532. He thought the bales appeared heavier than the weights that appeared on the consignment-notes? Yes.
533. Do you know what was the result? I think the head porter was right in his estimate.
534. You say there were five or six bales;—were they bales of wool? Yes.
535. Was the discrepancy a small or a large one? I do not remember; I know there was a discrepancy.
536. Then the practice was to accept Wright, Heaton, & Co.'s weights given on the consignment-notes? Yes.
537. And those showed the details of the lot? Yes.
538. In the Railway Department, when you accepted the weight of the wool, did you generally test the aggregate by putting the lot on the large weigh-bridge? We generally accepted the lots with the bills and the weight given.
539. While you were in the service of the Railway Department did you in any way know or suspect any peculiar dealing with weights by Wright, Heaton, & Co.? Yes.
540. What did you know? How I came to know was in dealing with hides.
541. What did you find out? I found out that the weight of them was wrong.
542. What did you find? There was only half the weight given; that is to say, that the weight given was 50 lb., while they actually weighed 100 lb.
543. They were understated in the consignment-note? Yes.
544. Of course you could easily put them on the scales? Yes. I told this to the station-master, and told Bonthorne to rectify it.
545. Did Bonthorne give any explanation about this? No; he said it was a clerical error.
546. How often did that occur? Only this once.
547. Were there any other occasions in regard to which you suspected anything wrong with the individual wool bales? No.
548. How was it you came to leave the railway service? It was at the request of Bonthorne. I was asked to come up to Nyngan and to join Wright, Heaton, & Co.'s.
549. Up to the time you went into Wright, Heaton, & Co.'s (except that you had found these hides wrong), had you any suspicion that there was anything shady going on? No.
550. Was there anything suspected by the station-master or the good's-shed clerk? Yes; the station-master did; and cautioned all the porters to see all the wool from Wright, Heaton, & Co.'s weighed.
551. You were initiated into the business at Nyngan? Yes.
552. Who gave you instructions? Mr. Bonamy. After I had been there three months he sent me down to Sydney, and I was in this office for another two months, before the line opened to Tarago.
553. While you were learning the ways of the office at Nyngan and Nevertire you say you received instructions principally from Mr. Bonamy? Yes.
554. Did you receive special instructions with regard to your knowledge of how wool bales were to be dealt with? Yes.
555. What were they? To get the wool down as light as we could. There was a lot of difference between greasy wool and washed wool. We would try to get the greasy down as washed wool.
556. Do you remember the principle on which the railway schedules went in making extra charges or reducing charges according to the increased or reduced weight of a bale. Do you remember what that was? No.
557. Do you remember there were certain limits above which an increase was made and below which a decrease was made? Yes.
558. Do you remember a limit of 250 lb.? Yes, that was the lowest; greasy wool was sometimes sent down under that.
559. Was most of the wool that went through what was known as contract wool? Yes.
560. In passing a lot of contract wool through I suppose as a general rule the individual weights were given on the squatters' way-bills? Yes, all the way-bills showed the individual weight of each bale.
561. In making out the consignment-note for a lot, do I understand you to say that the total weight of the lot was reduced, or only the individual weight of the bales altered? Well, that would reduce the total. Supposing there were twenty bales on a truck, fifteen of the heaviest bales would be put down at the lower limit, and the balance would be heavy bales.
562. So you would reduce the aggregate? Yes.
563. Then how is it the Government did not discover that by putting the wool on the weighbridge? Well, the weighbridge at Nyngan was not Government.
564. So the aggregate weights were misstated at Nyngan? Yes.

Mr. R. W.  
Dickson.  
29 Mar., 1889.

565. When the weighbridge opened at Nevertire was there a weighbridge? Yes; but it was never used; it had no approach, and the teams could not possibly draw up to it; and so they had to accept our statements.
566. Was there a small weighbridge? Yes.
567. Was it the practice to use that? No; only in weighing the ordinary passengers' stuff.
568. Would it have been possible, considering the quantity of wool coming through, to weigh each individual wool? Scarcely; sometimes there would be thirty or forty teams waiting to be discharged at the same time.
569. How many bales a day came through, on an average, at Nyngan and Nevertire? I cannot say; but I have seen fifty teams at Nyngan waiting to be discharged.
570. To what extent did this practice of understating go—was it confined to a few lots out of a load or all? All. All the goods taken through the firm were taken at the stated rates.
571. As many bales as possible were made out under the 250 lb. limit? Yes.
572. Do you remember the net limit? Yes; 4 cwt.
573. Some bales, I suppose, would be stated above 250 lb.? Yes.
574. What would be the weight of such bales? Well, it would be very heavy wool; they would come up to 510 lb.
575. What would a 510 lb. bale be stated at? Well, we would try and pass it through at the 250 lb. rate, but we might pass it at the 4 cwt. rate.
576. What was your reason for not bringing it down to 250 lb.? Well, to avoid suspicion. The porters could judge of the weight of a bale by handling it; we had to put in a big figure occasionally.
577. While this was going on at Nyngan or Nevertire, was there a question raised by the station-master, or porter, or goods-shed clerk? I never heard it at Nyngan.
578. In the G.O.B. book, in making it up, did you necessarily compare the way-bill with the consignment note? Yes; we had the true weights in the G.O.B. book, which would prove all the weights, because we had to charge the Sydney people with the carriage of the weights. And the same with the luggage. If we sent luggage down we would put the true weights in the G.O.B.
579. The consignment note showed the wrong weight? The one that the porter received showed the incorrect weight, but we sent a true consignment note to our consignees in Sydney. The railway people got the understated weight, and the true weights we sent to the agents. We had what is called "dumping" (dummying?).
580. What is that? It is a railway bill which we would make out and give to the porter, who would sign it. We sent the real one to Sydney which the book clerk signed.
581. How was it that the book clerk signed bills where weight was different from that signed by the porter? Oh, they did not seem to think anything was wrong; they did not take particular note of how the work was done. Besides, they had such confidence in the firm of Wright, Heaton, & Co., and Mr. F. A. Wright was Minister for Railways.
582. When you were getting in the orders for the firm did you see anything of Mr. Heaton or Mr. Wright? I never saw Mr. Heaton but once. I saw Mr. Wright on the occasion of the opening of the railway to Bourke.
583. I understand that at Nyngan and Nevertire you got initiated into this practice, which you were instructed to adopt by Mr. Bonamy? Well, not exactly instructed—it was the regular thing. I found it in vogue, and adopted it. The system was what was called "foxing it down," and we got bonuses.
584. Explain that? Well, if a clerk is sharp, and gets his wool through well, he would get a bonus at Christmas time.
585. Of how much? £10 or £20.
586. Was any bonus given to anyone outside the firm? A cheque for £5 was given by Mr. Bonamy to the head porter, Silvertown.
587. Was this practice generally known, or only known by a few? It was generally known, and talked about, except by the town boys. We were told to take what advantages we could of the weights, and send the wool down cheap.
588. I suppose at Nevertire and Nyngan wool and hides were the principal things you sent down? Yes, and copper from Nymagee.
589. What was done with the copper? I never had much dealing with the copper. I had the wool.
590. Did not it strike you that this was a very peculiar proceeding; in fact, a swindling of the Government? Yes.
591. Why did not you expostulate? I did, to a man named Jenkins, at Binalong.
592. Did you comment on the practice when you first found it out? Only to my fellow clerks. I did not mention the matter to my superiors.
593. Did not it strike you that you were rendering yourself liable to some prosecution or other? No, not individually; it struck me that the firm might be.
594. Did you consider it honest or dishonest? Well, I did not consider it honest, nor on the part of the employé dishonest. Of course it was dishonest; but I did not take much notice of the matter. I was getting good wages.
595. Before you went to Tarrago did you ever hear the term "averaging" used? No.
596. Did you hear the expression used at any time? I heard it when I was in the railway service at Wellington, before I went into the firm.
597. Can you remember what you understood "averaging" to mean then? No; I had nothing to do with it then.
598. Having heard the expression "averaging" used at Wellington, can you remember whether afterwards, when you found this peculiar practice being carried on, whether that was spoken of as being justified by the principle of averaging? Yes. The first two or three entries I made I found it out, and spoke about it to a clerk named Pond, who is now somewhere near Tamworth, I think. I said, "This is what you term 'averaging'—'understating.'" He said, "Yes; it is 'foxing,' and you have to get the stuff down cheap."
599. Was that the only occasion that averaging was spoken of after you left the railway service? Yes, I think so.
600. Do you remember when you were cross-examined at the trial before the late Sir James Martin, whether you were asked about averaging then? I think I was.
601. If you were, can you remember whether between the time you were asked about "averaging" on this occasion and the occasion when you had the conversation with the clerk at Nyngan, you had heard the term used? No, I never did.

602. After leaving Nyngan and Nevertire, you came down to the Head Office? Yes. I was there from the time I left Nyngan to the time of the opening of the railway to Bourke.
603. What were you doing in Sydney? I was in the Store Department. I had nothing to do with wool.
604. Before going to Bourke, did you get any instructions from the firm? Only this,—that Mr. Edward Heaton said, "You thoroughly understand the G.O.B., because you know you have been at Nyngan, and you must thoroughly understand how we get the wool down." I said "I was thoroughly up," and he said, "go to Nyngan."
605. Had the G.O.B. been spoken of before by the clerks in the country as involving any particular practice, or in a joking way? Well, the term was used in a joking way—it was a by-word among the boys.
606. You were not a boy then? No; I am 39 now, and it is six years ago.
607. You went to Tarago? Yes.
608. You had to deal with wool there? Yes; and after the season closed I went travelling for the next season.
609. During the time you were seeing to the transmission of wool what practice did you adopt? The same as at Nyngan.
610. And kept the books? Yes, with the assistance of a clerk named Lambert.
611. You mentioned the name Jenkins? Yes, he was the manager at a place called Binalong. I once had some hides to deal with and wrote to him for information. He wrote back, "leave the hides till I come." I did so; and he came and put them through.
612. How did he put them through? By understating them, the same as the wool.
613. Do you remember a conversation with Lambert in Jenkins' presence about this practice? Yes; Lambert and I had made up our minds to tell Jenkins.
614. What did Lambert object to? To understating. I told Jenkins; and he said, "Do as you have done before; we will shunt him." However, he stayed on.
615. Did you have any discussion with Jenkins as to how the Tarago branch was managed? Yes; he was a kind of travelling inspector, and used to come over about once a month.
616. What special conversation had you with him about the way in which the branch was getting on? On one occasion at the end of the month the books were made up and he said, "I thought there would have been a better show—more profits. You are sending the wool down too heavy; send it down as light as you can." I told him I should be "bowled out" if I sent it down lighter. And I was bowled out by a porter who unloaded a truck I had loaded myself, and I had to make out a new way-bill.
617. Did he report this to the station-master? I don't know. The station-master was named Booth and was a strict man. I explained to him that I had made a clerical error.
618. Did he accept your explanation? No. He said, "I shall have to report this to Mr. Crawford, the Inspector of Line. I think a lot of this has been going on for a long time."
619. That was long before the prosecution? Yes.
620. Had you a dispute with Wright, Heaton, & Co. when you left them? No.
621. You must have had some dispute or you would not have left them? No. Mr. Heaton was away, and when I went away from the locality to travel for wool they sent a man named Digman to take my place at the branch. When I got back to Tarago I said to this man, "You can go down now, I do not want you any longer." He answered, "Oh, I have got a letter appointing me to this position," and he showed me the letter; and then I received a letter asking me to go down to Sydney. I went down. I was in Sydney three weeks, during which time I received my wages. Mr. Heaton was away in Queensland, and I was waiting about to see him, and then I got another engagement.
622. Had you another engagement before you left? I had one in view.
623. Do you know why you were supplanted at Tarago? Yes. Jenkins was not satisfied with my method of sending the goods down. Digman was celebrated for doing this work well. He used to do it at every place he went to; and when I went away for wool contracts they sent him to Nyngan and found that he made more profits than I did. When I came down they said, "look at what young Digman has done in your absence."
624. How long before you left your actual management at Tarago was it that you were bowled out? It was while Digman was there.
625. Then the profits of your making could not have been reduced through your being bowled out, because after this you were not there long? Yes. But it was at the end of January that the porter discovered this.
626. Do I understand you to say that that took place while Digman was there? Well, that was a mistake of mine, because I remember being questioned by the firm, to whom I wrote, and said that I had been bowled out, and therefore could not send the wool down lighter.
627. Of course you sent this particular load down correctly? Yes, and had no opportunity of doing it again, because there was a man named Barbour there who suspected me. The firm of Wright, Heaton, and Co. was once Wright, Heaton, Barbour, & Co., and it was against the agreement that Wright, Heaton, and Co. should establish a station there. Barbour, not liking this, used to try and do me an injury there. One of the porters said to me, "You will have to be very careful about your weights. Barbour says you are doing us."
628. How long was it before the questioned lot was sent that Barbour cleared out? It was some months. I think in June or July.
629. Then Permewan, Wright, & Co. came upon the scene? Yes.
630. They would have the same knowledge, I suppose, as Barbour would have? Yes.
631. During all this time under whose instructions did you consider you were? Mr. Ed. Heaton appeared at that time to be the acting manager. At that time I was under the impression that Mr. Wright had retired from the firm, because all the time I was down in Sydney I never saw Mr. Wright in the office.
632. Did Mr. Heaton come to Tarago while you were there? No.
633. Do you know Mr. Fehon by sight? I have never seen him.
634. Did you ever hear of his being a member of the firm? Never in my life till I saw this question raised in the papers.
635. Did you ever hear of M'Culloch & Co. being concerned? Yes; we all knew M'Culloch was a partner.
636. Did you hear anything to lead you to conclude that M'Culloch & Co. or any member of that firm was concerned in the internal management of Wright, Heaton, & Co.? No; I only knew that they had an interest in the business.

Mr. R. W.  
Dickson.  
29 Mar., 1889.

Mr. R. W.  
Dickson.  
29 Mar., 1889.

637. By the way, there was a peculiar expression used with regard to the carriage of wool—"foxing." Was there any other expression used to express the same thing? Do you remember the term "school" ever having been used? Yes. Nyngan was called the "school" because it was a terminus, and all new clerks were sent there.

At this stage of the evidence Mr. Fehon was sent for by the Commissioner, and appeared.

638. *The Commissioner.*] Did you ever hear it suggested, or said, that this practice of understating, with regard to wool or anything else, had been imported from any other Colony? Yes.

639. What was said? They said that M'Culloch belonged to the firm.

640. Did you ever send direct to M'Culloch & Co.? Yes.

641. Was wool sent to M'Culloch & Co.? No; I never sent any to Melbourne.

642. What other goods were sent to Melbourne? Luggage, and other things.

643. Direct? Yes; we would send them to the Sydney office, and they would go by boat. It might be luggage, or it did not matter what it was, we would get it down. We would send it down understated, or under some other class—class of charges. There were classes which charged so much per ton.

644. What leads you to suppose that Messrs. M'Culloch & Co. must have been aware of the understating of goods sent through to Melbourne? Because they would get two weights; they would get the railway weight, and they would get the true weight in the correspondence.

645. I understand you to say that while you were at Nyngan and Nevertire some goods, but not wool, were sent to M'Culloch & Co., consigned through the firm of Wright, Heaton, & Co.? Yes.

646. On how many different occasions can you remember that goods were sent through M'Culloch & Co.? I cannot tell; but as I said they were parcels and small goods. I remember on one or two occasions making out notes for such goods, and putting my vouchers in the bag for Sydney.

647. Can you say whether you did this more than twice? No, I cannot. I know at Tarago I did. I was not the clerk to do the work; I was the G.O.B. clerk.

648. Can you say now with regard to those goods that you did send down from Nyngan or Nevertire to M'Culloch & Co., whether they were understated or not? I do not know whether they were understated here. I should have understated them on the way-bill whether they were going to Melbourne or to Sydney.

649. But can you say whether or not the goods you did send to M'Culloch & Co. from Nyngan or Nevertire were understated? I could not state it as a fact; it was a practice, but these particular parcels might not have been dealt with in the same way.

650. That is to say you would have drawn no distinction between the two parcels? No.

651. I suppose a good many parcels were sent down correctly? Yes. It would not be worth while to use the practice in small parcels, but with a large parcel weighing 2 cwt. we would get it down for 1 cwt.

652. So that really there is nothing you can definitely state as having occurred between Nyngan or Nevertire and Melbourne? No.

653. What about Tarago? I remember one parcel.

654. What was it? A piece of machinery.

655. Do you remember its weight? It was pretty heavy; I know I understated it.

656. To what extent? I forget; but I got it down for considerably less than the proper charge.

657. What was the actual weight? I do not remember; but it was a large piece of machinery sent to M'Culloch & Co.

658. About how much—was it a ton? No; I think it was a little over 1 cwt.

659. Do you remember by how much you understated it? No.

660. Did you hear about it afterwards? No.

661. Do you remember the date of the consignment? No.

662. What documents did you send down with it? Only the consignment note.

663. What would it show? It would show the signature of the railway porter who consigned it.

664. That would be the understated weight? Yes; and then there would be the paper with the full weight.

665. Would this document showing the two weights be addressed to Melbourne, or would the document showing the true weight only be addressed to Wright, Heaton, & Co.? It would be addressed to Wright, Heaton, & Co., Sydney. As far as I was concerned Sydney was my destination.

666. As far as you were concerned was there anything on the face of the documents to indicate to the Melbourne people that a false weight had been given to the railway people? No. Only in this way—the ticket signed by the porter would bear the weight I put on; the true weight would be on the paper I sent to the firm in Sydney. They might in Sydney have given the true weight to Messrs. M'Culloch & Co., or they might have been making a profit out of that firm for all I know.

667. As far as your knowledge goes, I understand there was nothing to lead you to conclude that M'Culloch & Co. would be privy to the working of the alleged frauds on the railway? No.

668. Do you remember any other occasions when you sent goods to Melbourne? Well, I have no distinct remembrance; but there were a few other occasions when we got goods sent down as cheap as we could.

669. Did I understand you to say something about its being known or reported that M'Culloch & Co. had indulged in the same practice? No.

670. All you knew of it was that it was a practice originating in Wright, Heaton, & Co.'s, and not from outside? Yes.

671. You had no knowledge of how long this practice had been going on? Oh, for several years, because Jenkins told me that the practice had been in vogue for a long time. It was done at Penrith in 1870 or 1871. Jenkins is one of their leading men, and he said he used to do it at Penrith.

672. I suppose you are aware of the fact that this evidence you have given involves very important issues—that it may involve very serious issues and consequences? Yes.

673. Are you prepared to swear that this evidence of yours is substantially true? Yes.

This concluded the evidence of this witness.

*Mr. Fehon*, addressing the Commissioner, said he would like to make an explanation.

*The Commissioner.*] As you wish to make an explanation, I will take it as evidence.

*Mr. Fehon.*] It is simply for your guidance in examining witnesses in such transactions as have been referred to that I wish to make some explanation. For instance, supposing this statement is correct that this piece of machinery referred to by the witness was sent from a country station to be sent to Melbourne through Wright, Heaton, & Co., in Sydney. Wright, Heaton, & Co. would receive all the documents,

documents, and simply put the machinery on board the steamer at Sydney, and consign it to Melbourne, with whatever charge they would like to put on. Messrs. M'Culloch & Co. would receive it and charge their own cartage, together with whatever charges Wright, Heaton, & Co. had on the machines. So that there was no connection between any transaction with any country station in New South Wales and Messrs. M'Culloch & Co. in Melbourne. No goods would go through by rail from a country station in New South Wales to Melbourne. They would go to Sydney and end at Sydney, so far as Wright, Heaton, & Co. were concerned; so that there could be no connection between the two firms.

Mr. R. W.  
Dickson.  
29 Mar., 1889.

674. *The Commissioner.*] Would Messrs. M'Culloch & Co. have any opportunity on the face of the documents sent of seeing what charge had been made by the railway for the carriage of the goods in New South Wales? Not the slightest. Wright, Heaton, & Co. would simply send an item of (say) £1 12s. 6d., or whatever it was. They would hand it to the Steam-boat Company, who would hand the paper to Messrs. M'Culloch & Co. and their charge.

675. The only way in which Messrs. M'Culloch & Co. could possibly find out that there had been an overcharge would be by looking at Wright, Heaton, & Co.'s charge, and comparing that with the tables in New South Wales and the actual weight of the goods? Yes.

676. Messrs. M'Culloch & Co. would have the steamer's weight, and the charge on the New South Wales railway would be charged by Wright, Heaton, & Co. to Messrs. M'Culloch & Co.? Yes.

677. Would that be charged by itself? No; it would be lumped up with commission and other charges.

678. As far as your experience goes it would not be detailed? No. Messrs. M'Culloch & Co. knew nothing about the detailed payments of Wright, Heaton, & Co. All they knew was that they would be liable to Wright, Heaton, & Co. for a lump sum, which they would charge to the consigner. It is material to your Honor that you should have as much information on the subject as possible, and that is the reason why I have ventured this explanation.

Joseph Heylin, examined:—

679. *The Commissioner.*] Your name is? Joseph Heylin.

Mr. J. Heylin.  
29 Mar., 1889.

680. What are you? I am a farmer stationed 2 miles from Bathurst.

681. Some time ago you were employed in the Railway Department? I left 30th April, 1886. I had been there from 30th June, 1882.

[Witness here handed in a certificate showing that he left the service voluntarily.]

682. You first went into the Department as probationer at Bathurst? Yes.

683. And you went to Nevertire in charge of the goods shed? Yes.

684. For how long? Several months.

685. Were you goods-shed clerk? Yes.

686. You received goods for transmission both ways? Yes.

687. When did you go to Nevertire? In March, 1885. Part of the time I was at Nyngan.

688. You went, of course, through one wool season when you were at Nevertire? Yes.

689. You had charge of the transmission of wool at Messrs. Wright, Heaton, & Co.'s branch there? Yes.

690. I suppose you were thoroughly up in the whole of the system of the carriage of wool there? Yes.

691. Were there two weighbridges there then—a platform weighbridge and a larger one? Yes, there were two.

692. What was the practice—to weigh the teams or the individual bales? To weigh the teams.

693. As a general rule you were content to take the aggregate weight shown by the weighbridge, and then to receive the consignment-note from Wright, Heaton & Co.'s clerk, to show the individual weights? Yes.

694. Were the teams weighed as a rule? No.

695. What proportion of the teams were put on the weighbridge? I suppose there would not be more than two-fifths.

696. During the time you were there did you know what was the system adopted in making out the consignment-notes for the purpose of charging the railway carriage? Yes. The system was to make as few bales as possible go as 4 cwt. and under, and as many under the 250lb. One rate was 11s. for 4 cwt. The scale was a 15 per cent. reduction under 250lb., a 15 per cent. rise over the 4 cwt. and a 15 per cent. rise over the nett hundred.

697. You say the practice was to adopt a system which reduced the carriage as much as possible? Yes.

698. You were aware that in nine cases out of ten in which a load came down a way-bill came down, which showed not only the aggregate but the individual weights? Yes, but I did not see them; I, as goods clerk, did not see the squatters way-bill. I only saw the bill given by Wright, Heaton & Co.

699. But did not that show that the Railway Department was receiving less for carriage than it might have received if you had taken the trouble to look and insisted upon seeing the squatters' way-bill? Yes; if the averaging system had not been in force.

700. When did you first hear the word averaging used? At Nyngan.

701. Was that during the time of your probation or after you had been manager? It was when I was relieving the goods clerk.

702. By whom was the term used first, to your knowledge? I think the first person I heard speak of it was the station-master at Nyngan, a man named Beattie.

703. What did he tell you about averaging? I saw the way-bills come in and asked him if that was the practice. He took the consignment-note out of my hand and looked at it, and at me a little while, and did not speak. He went out, and I asked him afterwards if this was all correct, and he said, "Oh, yes, it's all right—the practice has been done all along."

704. And you continued it? Yes.

705. And you regarded this as averaging? Yes.

706. I suppose you know that no construction that can be put on the word can make that mean averaging? Yes.

707. It might have been averaging to take a big lot of 5 tons containing a certain number of bales, and divide the whole lot by the number of bales, that would have been averaging? Yes.

708. This "averaging" was not averaging, but simply a dodge to bring the charge as low as possible? Yes.

709. Your opinion is that it was known to the authorities? Well, it was known to the station-master, to Mr. Tibbwal the station-master at Nevertire.

710. Did not you think it was a swindle? Yes; I was positive in my mind it was a swindle. 711.

- Mr. J. Heylin. 711. Did you look upon in as a practice known to all the authorities, and in that sense a swindle by the railway authorities in favour of the carriers? Yes.
- 29 Mar., 1889. 712. Of course, the thing being known and accepted by the authorities, you could not interfere? No. There were several other things I spoke about. Wright, Heaton, & Co. had the use of the Government sheets to cover their chaff. I sent them a bill once charging them 2s. 6d. a day for them; but there was a row, and the station-master told me to take it off and not send it any more.
713. Do you know whether Wright, Heaton, & Co. ever made any presents to any of the station hands? Yes.
714. On what occasion? At Christmas time generally.
715. What sums would they give? I do not know. They offered me £5 as a Christmas-box, the Christmas I was at Nevertire.
716. That would be the Christmas of 1885;—what did you say to that? I refused it.
717. Who was the individual who offered it? The manager there.
718. What did he say? He said I had been of great assistance to them in getting their business done, and they had a practice of giving a Christmas-box to their employees and railway servants; but I refused it.
719. Outside of wool, have you heard of any other peculiar practice with regard to the statement of weight? No.
720. With regard to hides? No; it was only wool.
721. Do you remember on any occasion being asked by any members of the firm not to mention anything of the kind? No.
722. Did you never see the way-bills? Yes, sometimes; but not from Wright, Heaton, & Co.; it was from other firms.
723. Was this system of "averaging," which was not averaging, carried on by other firms besides Wright, Heaton, & Co.? Yes; Messrs. Philip, Somers, & Co., the agents for Permewan, Wright, & Co., and others adopted it.
724. What carriers did not adopt it? The small carriers, who brought their own wool in; but sometimes, acting upon the practice adopted for the large firms, I did it for the small carriers. But unless I did it they would not do it.
725. Did you receive instructions to this effect? No; these small carriers were really the owners of the wool. Wright, Heaton, & Co., would, of course, charge 2s. 6d. for making out a consignment-note for owners, and so Wright, Heaton, & Co.'s manager complained when I made out consignment-notes for the small owners; and I was told about it by the manager.
726. When Wright, Heaton, & Co.'s clerk made out a consignment-note did he average or make it out according to the way-bill? It would depend upon whether the wool was going through Wright, Heaton, and Co.'s or not.
727. You were called as a witness by Messrs. Wright, Heaton, & Co., at the trial? Yes.
728. What communication had they with you before they called you? None whatever, except the subpoena.
729. Were not you examined by an attorney before you came into Court? I believe I was examined by Mr. McLaughlin.
730. You know nothing about Mr. Fehon? I never heard of him until I saw his name in the papers.
731. There were no consignments of wool sent through Wright, Heaton, & Co. direct to Melbourne, from the station? No, it was sent direct to Sydney.

Charles Howard was the next witness examined:—

- Mr. C. Howard. 732. *The Commissioner.*] Your name is? Charles Howard.
- 29 Mar., 1889. 733. What are you? Goods clerk, at Nevertire.
734. When did you enter the railway service? In August, 1882.
735. In what capacity? As assistant goods clerk.
736. Where did you go? I went to Bathurst, then to Nevertire, Nyngan, Byrock, Bourke, Blayney, and Nevertire.
737. Have you always been in the same capacity in each place? Yes.
738. Of course you knew all about the transmission of wool by seeing the way in which things were managed? Yes.
739. Now at each place where you have been, has there always been a branch of the firm of Wright, Heaton, & Co., or only in some of the places. Yes.
740. I suppose you have been through several wool seasons? Yes.
741. I suppose you know the scale of charges for the carriage of wool on the railways? Yes.
742. When you first went into the railway service in 1882, did you find any particular practice in vogue as to charging for the carriage of bales of wool that was not strictly consistent with the table? I saw that at Nevertire first, after I left Bathurst.
743. When was that? Well, I arrived in October.
744. Then you first became aware of the existence of a peculiar system? Yes.
745. Before that you had been in the service two months? Yes.
746. What practice did you find in vogue? I found the practice of what is called averaging the bales—that is making as many bales as possible go at the 250-lb. rate.
747. It comes to this—that though it is termed "averaging" it is not averaging? Yes.
748. What was the result of this averaging in connection with the total charge, was it to increase or reduce the actual charges. Would it reduce the charge on wool below what it would have been if each individual bale had been properly weighed and charged for? Yes.
749. Was that a regular practice, or a practice adopted by some firms only? It was adopted by two firms—Wright, Heaton, & Co. and Permewan, Wright, & Co.
750. First of all, at Nevertire; can you remember how you came to find out that this practice was in vogue? A person of the name of Lee was goods clerk then, and I believe it was he who first gave me an insight as to how they were doing it.
751. Can you remember what Lee told you? No.
752. I mean the style of the conversation? No.

753. Did he tell it to you as being something above board or not? I cannot quite remember. He was my superior officer then.
754. Was it said in a joking way or in a way that would indicate fraud? It was through some joke that we happened to talk on the subject. The manager for Wright, Heaton, & Co. came into the office, and I passed a consignment note to him and asked if there was not some mistake, and he answered, "Yes," and took it to his office and brought it back.
755. Was the charge less when he brought it back? Yes.
756. Do you remember who was the clerk on the occasion? Yes. Webster.
757. Was he an old hand? Yes; two or three years.
758. Was it explained how it was that Webster did this? No. I merely handed him the consignment note back, and it was returned in an altered form.
759. Was it in the "averaging" form or in the way-bill form? We never saw the way-bills.
760. Was the station-master aware of this? No.
761. Did this occur during the whole time you were at Nevertire? Yes. It was adopted at Nyngan, Byrock, and Bourke.
762. At those stations did the station-master know of it? No.
763. It was simply left to the goods clerk? Yes.
764. Can you say whether more than one of the goods clerks at Nyngan were aware of this? I cannot say.
765. Did you have any conversation about this? Yes. I told a man named Buckland and others about it.
766. What was your individual opinion about it? I said that the system was adopted by Wright, Heaton, & Co., and by Permewan, Wright, & Co., and I looked upon it as a business advantage.
767. You never saw any document sent down? No.
768. Do you know whether the practice was adopted by any of the producers themselves who brought their own produce down to the station? I cannot say; I do not remember.
769. Did you ever make out any consignment notes? No; I could not do it.
770. Did you ever receive a Christmas box or an offer of one from Wright, Heaton, & Co.? Yes; once or twice.
771. What was the amount? I cannot exactly remember the amount; it was not much.
772. Was it as much as £5 or was it less;—a man does not easily forget an amount of that kind? There was a £1 and another £1, and I believe there was something larger than that; it was not over £5.
773. Was this at Christmas? Yes.
774. Who gave it to you? I believe Mr. Bonamy.
775. What did he say to you? I do not know. I was in poor circumstances at the time, only getting £50 a year.
776. Do you know if it was the practice of the firm to give presents to other officials, porters, or goods clerks? No. I think the largest amount I received was £5.
777. How came you to be subpoenaed on the trial before Sir James Martin? I was asked. I went to Mr. McLaughlin who asked me all I knew about it.
778. You must have been aware all this time, that the Railway Department was being paid less than it might have been paid under a different system? Well, there was every appearance of it.
779. Was it quite open? Yes; the consignment note came in and was given to the head porter, who gave it to me, and the same weight were sent to Darling Harbour.
780. Of course, you could not find it out unless the consignment note were compared with the way-bills? No.
781. Was there ever any complaint of the consignment notes not tallying with the weights of the bills? I think there was a case at Nyngan, by a man named Hogan a porter, who was acting as ganger at the time to some men who were unloading.
782. Whose wool did he explain about? Wright, Heaton, & Co.
783. Your impression is that he saw that a consignment note did not agree with the weight? I think he disputed the aggregate.
784. In the thick of the season was the aggregate weight always taken on the way-bridge or only sometimes.—Was the team run on to the waybridge? It was never done at all.
785. Oh, then that was left to Wright, Heaton, & Co., too, as well as the weight of the bales? Yes; of course, I do not swear that this practice of averaging was in vogue, because I never saw a squatter's way-bill.
786. Have you heard any of the officials talk about it? Yes; a station-master named Beattie, who has since been called upon to resign.

Mr. C. Howard.  
29 Mar., 1889.

Charles Lambert examined:—

787. *The Commissioner.*] What is your name? Charles Lambert.
788. What are you? I am Manager for Wright, Heaton, & Co., at Byrock.
789. You were at one time in the employment of the Railway Department? Yes.
790. When did you first go into the Department? 1st July, 1882.
791. In what capacity? As goods clerk.
792. Where? At Wellington.
793. How long did you remain there? I went as assistant at first, and I was there altogether fifteen or sixteen months.
794. Then where did you go? I went to Nevertire as goods clerk.
795. How long did you stay there? Thirteen months.
796. From there where did you go? From there I was sent as relieving clerk on the Western line.
797. For how long? From November, 1883, to August, 1887. I resigned.
798. Was it the year of the alleged wool fraud prosecution? It was the year Macalister's case was concluded.
799. Where did you go? I went with Rich & Co., merchants and forwarding agents.
800. How long ago is it since you went into Wright, Heaton, & Co.'s employment? On the 3rd January, this year.

Mr. C. Lambert.  
29 Mar., 1889.

Mr.  
C. Lambert.  
29 Mar., 1889.

801. While you were in the railway department at Wellington, were you cognisant of the way in which the goods traffic was managed? Yes.
802. Especially the carriage of wool? Yes.
803. At that time what did you know about the practice of the carriage of wool? The wool was carried by bale then; it is carried by weight now. There were certain rates,—there was so much for a 4-cwt. bale, so much for a 250-lb. bale, and so much for a 500-lb., and so on. The rule was to divide the rate equally among the bales so as to make as many average 250 lb., and as many 4 cwt., in fact to distribute them.
804. What was the object? To bring the wool more under a tonnage rate.
805. I do not understand that. Was the object to save trouble, or to bring the charge down as low as possible? Yes.
806. What do you mean by a tonnage rate? Well, there was really no tonnage rate for wool, but if five bales of wool weighed a ton, that would be each bale 4 cwt. If that were charged at 11s. a bale, that would mean £2 15s. a ton.
807. Was that the object of it or was the object to get the charge down as low as possible? I think that was partly the object—not to charge too much for the whole.
808. What was this system known as? Averaging.
809. When did you first hear this expression used? At Wellington. I was there, and Mr. Farnell, who was head goods clerk—I being his assistant—said that that was the way the wool was always sent.
810. Supposing a lot of wool came in; there was a way-bill with that lot, was there not, sent to the agents? Yes.
811. If the wool came through the agency of any carrying firm the way-bill was delivered to the carrying firms clerk; if the wool came to the consignee that would be delivered to the railway? No; I never saw that done. When I made out the consignment-notes I never got the squatters' way-bills. I did not make out the consignment-note from the way-bill. I used to do it on the averaging system. Sometimes I have known little selectors bring in their own wool on their own teams, and they would not have way-bills, and those were the only people who would bring wool down themselves.
812. Did you ever know of a case of a lot coming down with a way-bill in the possession of a carrier, not being sent to any agent? I do not know; there might have been.
813. You always took the consignment-note from the carrying agent? The porter took it first and handed it to the office.
814. Did the goods clerk never attempt to check or to interfere with the weights on the consignment-notes of Wright, Heaton, & Co.? Not that I know of.
815. And yet you say the averaging system was in force? Yes; but the weights were distributed in a certain manner. The actual weights of the way-bills might have been obtained if we had insisted upon seeing the way-bill; but we always booked the wool in bulk—so many bales, so much; we did not book the weight of each bale.
816. Were you not aware that this system reduced the profits of the Department? No; I thought it was organized by the Department. That was what I was given to understand.
817. Who gave you to understand that? Mr. Farnell.
818. Afterwards, did you have any conversation with other persons about this system? Well, I have spoken to the agents about it. I might have said, "Oh, you have not distributed the weight in this case," and I would give them the document back.
819. How would that be made out? So many bales, so many tons.
820. If the way-bill itself had been made the basis of charging, I suppose then the consignment-note for the purposes of your office would have shown, not the actual weight of the bales, but so many under 250 lb., and so many under 4 cwt., and you would have required the aggregate to tally with the other? Yes.
821. Did you require the aggregate to compare with the consignment-note? Yes; so that we might know how to charge. For instance, twenty bales weighing 4 tons, each bale must be charged 4 cwt. We required the aggregate weight to know the average weight of each bale. The weights on the consignment notes were only "under so much," and "under so much."
822. Are you sure that this expression, "averaging," was used as a rule on your first arrival? Yes. It was used in regard to the first wool I ever booked.
823. Did that continue right on? Yes. Until the rate was altered to tonnage rate.
824. Then the waggons would never be put on the weigh-bridge? No.
825. During the time this was going on, did you know of any wool being weighed for the purpose of finding out whether the consignment-notes were really correct or not? No.
826. Did you hear of any complaints being made that the Department was being defrauded? No. Of course I never thought that there was anything wrong about averaging, thinking it was the rule of the Department.
827. Were the station-masters aware of it? Yes.
828. How do you know that? Because the station-master at Nevertire knew of it. After I left there I was never longer than a month with any station-master.
829. You remember the fact that a prosecution was instituted against the members of Wright, Heaton, & Co.'s firm for alleged conspiracy in regard to this very practice? Yes.
830. What was the first mention you heard of this prosecution? I heard of it at Bathurst. I was reading a Sydney paper wherein was a report of Mr. Abigail having brought the matter up in the House, and I remarked to another person in the room, "Oh, this averaging is known; everybody knows about it—it is a rule of the Department."
831. Did it strike you that under this system of what is called averaging there was a great deal of latitude—what I mean is that one man by ingeniously working the system might reduce the charges lower than another man working the same system would do? If they had the same average weight they must bring it to the same.
832. Was it a difficult thing for a man, unless he understood it, to arrive at the lowest charge that was consistent with the aggregate? I saw no difficulty in it—in bringing as many bales as possible under the 250 lb., and distributing the remainder among the 4-cwt. rate.
833. It was usual for wool at a terminus not to be weighed at all? I was never at a terminus.

834. In some places there was no possibility of weighing—in those cases unless the way-bill was looked at by the clerk he had no means of telling whether the amounts were correct or not? It was not the goods clerk's duty to do that. It would be the duty of the porters to do that.

835. Oh! the porters were the men who could have detected this? Yes.

836. Did the porters ever come and complain to you that they had detected short weight? No.

837. There is no doubt about this—the charges that were actually made on wool fell considerably short in comparison with what they would have come to if this averaging system had not been adopted? Oh, yes, certainly.

838. But the main authorities were not acquainted with this? Well, I thought they were; because we all knew about it.

839. Did you ever hear the expression "foxing," in lieu of the expression "averaging"? No; I don't remember it.

840. Did you ever discover any system by which hides could be understated? No; they were charged by the ton.

841. But if they were understated they would be an obvious fraud on the railway? Yes.

842. The only consignment-notes you saw were those brought by the porter to you? Yes.

843. Did anyone, to your knowledge, ever receive any presents from Wright, Heaton, & Co.? I never heard of it.

844. Did they never offer you anything? No; but I was moving about. I was relieving clerk, and might not happen to be at a station at Christmas.

845. Did you ever see anything of Mr. Heaton or Mr. Wright while you were in the railway service at their offices? No; the only time I saw Mr. Wright was when he was Minister for Works and made a tour of the western district and called at the railway station.

846. You are quite positive, as far as you understood it, that this system of averaging, as it was called, was an open system? Yes.

847. Are you sure it was an open system in every sense of the word, or was it open only to the clerks about the station, or was it a generally known system; was it known everywhere? Yes. One thing that led me to believe it was known in Sydney was this: they sent some wool from Nevertire; and a consignment-note was checked and signed by the Darling Harbour people, and they paid an overcharge we asked for.

848. Did that consignment-note show the exact weight of the bales? It showed the number of bales and the total weight.

849. How was the amount payable made out on that, on what basis could it be made out? Well, the goods were charged 4 cwt. each, but they averaged under that.

850. Then if there had been no such system of averaging, they would have been charged correctly? Yes. This was an overcharge on the averaging system but not on the other.

851. So you gather that the Darling Harbour people must have known that the averaging system was in vogue at Nevertire, and that they signed the sheet therefore? Yes; in the way I have stated. They were generally very strict in the matter of overcharges and undercharges; the sheets were all certified.

852. I suppose you know nothing about any consignment of any goods direct to Melbourne? No.

853. Though you are now in Wright, Heaton, & Co.'s employment, does your knowledge of the practice at the local station enable you to say what the practice was in Sydney as to the transmission of charges or documents on their goods? No.

854. You do not, in fact, know what it is? No.

855. As far as you know, when did the system of averaging begin? In July or August of 1886 I was in Darling Harbour sorting out consignment-notes in connection with the preparation of evidence against the defendants in the trial, and I found consignment-notes made out on this principle dated 1872.

856. I suppose a careful examination of those consignment-notes would have shown what existed to anyone, if the examination had been made, long before it was discovered? Yes.

857. I suppose that sometimes there were bales over 4 cwt. and under 5 cwt.? Well, if I had two bales—one weighing 248 lb. and the other 251 lb., and I did not average, I should have to charge the 251-lb. bale so much.

858. But averaging, in your opinion, did not justify a reduction of the aggregate weight? No.

859. To understate the aggregate weight would be a swindle? Yes. At any rate it certainly would not be correct to allow that, but the porters were at fault, because they were there to check the weights.

860. And it really, according to your explanation, depended upon the porters? Yes.

861. It depended entirely upon the porters, and not upon the clerks, whether mistakes were made or not? Anything outside the office it was the porters' duty to look after. Now, if I consign wool I make out the consignment-note, and I put in a number of bales and let him put the weight on.

862. I suppose that every station that receives wool now has a weighbridge? Yes.

863. Is every single load now weighed? Yes. But the weights are never the same; they never agree with the station way-bill.

864. At the station the weights appeared heavier? Yes. We weighed each bale separately. In one case some bales were 12 lb. or 13 lb. lighter when weighed by us.

865. Would that be in the drying? Yes, it would, but this was greasy wool. In another case there was a difference of 8 lb.

SATURDAY, 30 MARCH, 1889.

James Steers was the next witness examined:—

866. *The Commissioner.*] Your name is —? James Steers.

867. What are you? I am an insurance adjuster at present.

868. At one time, I believe, you were in the employment of Wright, Heaton, & Co.? In Permewan, Wright, & Co.

869. Do you remember that some time ago—not long ago—Mr. Want was making some inquiries touching this matter of Mr. Fehon? Yes.

870. Did Mr. Want or Mr. Lyne come to you on the subject? Neither of them came to me.

- Mr. J. Steers. 871. Did anyone come to you? I met Mr. Want a couple of times; he did not come to see me. I had some business with him, and it was during the transaction of the business that the conversation arose.
- 30 Mar., 1889. 872. Did you give Mr. Want any information as to anything that you knew about Mr. Fehon's relation to Wright, Heaton, & Co.? No.
873. I do not put it in the way of giving information for the sake of giving information, but did you, in the course of conversation, mention anything touching the question which had then come before the House—the question affecting Mr. Fehon in relation to Wright, Heaton, & Co.? Well, I will reply generally because it was an ordinary conversation.
874. I will tell you this, Mr. Steers—there is no newspaper reporter here. So if I see reason to think that anything you say should not go any further, I shall take care that it does not, because I may, if I choose, not allow these official notes to be published at all, so what I am asking in regard to this matter may be confidential? Well, the first time I met Mr. Want was, I think, the night after he made his second accusation touching this matter. I do not think he had spoken to me before.
875. Was that in December or January? I do not know. The same morning an article or letter appeared in the *Herald* on the subject, in which J. Tovey referred to his conduct. I said to Mr. Want, "I suppose you are not going any further in this matter?" He answered, "No; I do not want to put any man away, if they would only let me alone." He added, "I suppose you do not want to say anything about it?" I said, "No, I am not interested in the matter at all in any shape or form." I do not think there was anything more.
876. After that, had you any other conversation with Mr. Want on the subject? He did mention it to me once or twice afterwards, but I do not remember any specific remarks.
877. Do you remember the purport of what he said? He said this: "If Mr. Fehon had all these qualifications, it was a great wonder he did not get the appointment in Victoria"; and I think he asked me if I could give him any information. That was a few days before he went away. I replied, "I do not think there can be any question as to Mr. Fehon's fitness for the appointment. As to anything else, I have nothing to say."
878. That is all you can remember? That is all I can remember.
879. Are you quite sure you did not tell Mr. Want anything that could indicate Mr. Fehon's unfitness for the appointment? I am quite positive of that.
880. That is all you can remember that took place between Mr. Want and yourself? Yes.
881. Now, to go back;—what did you know before this of Mr. Fehon? Well, I think I have known him slightly for about sixteen years. I knew him by repute before that. I knew him as the managing director of Messrs. McCulloch & Co.
882. Did you know him by repute when he was in the Victorian Railway Service? Slightly.
883. Did you know the occasion on which he resigned and went into Messrs. McCulloch & Co.? Yes.
884. What repute did he bear in the Victorian Railway Service? Very good.
885. Were there any suggestions then that he was acting rather unfairly and in the interests of one firm? I remember once Mr. John Orr, of Victoria, called attention to it.
886. Was attention called to something before or after Mr. Fehon left the Victorian Railway Service? If I remember correctly it was immediately after; but I think two or three times he brought something up.
887. And the first time—was that before? The first time I heard was before.
888. In the House? No; out of the House.
889. He made some charge? Yes.
890. Did you hear any other charge? No; I was connected then with Permewan, Wright, & Co.
891. Can you say whether the first time you heard anything of this kind was before or after it had become known that Mr. Fehon was going to leave the railway service and join Messrs. McCulloch & Co.? When Mr. Orr made the assertion it was before Mr. Fehon left the railway service.
892. Did Mr. Orr allude to the fact that Mr. Fehon was leaving the public service or not? What he said was that he could see that McCulloch & Co. were getting all the plums. I think those were the exact words he used.
893. As a matter of common repute, in the course of conversation with others, was anything of this kind talked about? No.
894. Was there any other source for those rumours than Mr. Orr? No.
895. Are you quite sure of it? Yes.
896. On other occasions you have heard Mr. Orr say the same thing? Yes.
897. He made an attack upon Mr. Fehon in the House? Yes; that was after he left the service. Our firm was then Permewan, Hunt, & Co., and I can remember Mr. Hunt saying what a fool Orr was. Mr. Hunt did not think anything of it.
898. What was Mr. Hunt's opinion of Mr. Fehon? Very good. Mr. Fehon was looked upon as the most dangerous rival the firm had, as being a man of greater ability than other men. Whenever Mr. Fehon was going up to the country the usual watchword was, "Look out for Mr. Fehon."
899. Do you mean that Mr. Fehon was too smart a man—in the American sense of the term; or in the common sense? No; that he was an able man.
900. After this attack had been made by Mr. Orr,—I want you to answer the question generally—what was the opinion of the community generally in relation to the attack? I can hardly answer that, except in respect to the community I was in. Any reference that was made to the attack was made on one line of railway; but I never knew anybody to quite understand the attack.
901. Was it looked upon as an attack founded upon real facts, or upon jealousy? Founded upon business jealousy.
902. That was the general opinion? Yes. I knew all the carriers at that time. There were six or seven different firms in Melbourne, but though they heard these things they did not believe them.
903. Riverina wool was coming down then, and there must have been great rivalry between them? Yes.
904. Did Mr. Want, after touching upon the question of Mr. Fehon's character, allude to this question of Mr. Fehon's leaving the railway service, or did he allude to any other question than that of Mr. Fehon's being connected with the firm of Wright, Heaton, & Co.? I do not remember.
905. What do you know about Mr. Fehon's connection with Wright, Heaton, & Co.? I do not know anything about it. I knew him years ago as a director of the firm.
906. I suppose that you knew that the two firms were connected? Yes.
907. What position did you hold in Permewan, Wright, & Co.? I was manager for New South Wales.

908. Where was the head of the firm? In Melbourne.

909. Of course you could not speak as to what would be the proper course or conduct in relation to the internal management of one firm in regard to goods which another firm had brought, because Permenan, Wright, & Co. were a firm in Melbourne with a branch office in Sydney? All I know about it is that I saw Mr. Fehon, Mr. Jackson, or Mr. McCulloch came over to Sydney at stated times, and I thought they came on business.

910. That is all you know about this? Yes.

911. As to any connection between Mr. Fehon and the so-called wool frauds you know nothing? No.

912. *Mr. Fehon (who was present) to witness.*] You say that you knew me by repute for a long time; did you ever hear a whisper or a word to my detriment, or against my honorable conduct in business, or in connection with the Victorian Railways, except what you have just stated you heard from Mr. Orr? No. I may say that I know a number of railway officers in New South Wales, and I have never heard the men say a word against Mr. Fehon.

913. *The Commissioner.*] So it comes to this, that so far as any communication you have made to Mr. Want is concerned, I understand there was no communication made by you that could form a foundation for an attack upon Mr. Fehon? No. And, as I said before, when Mr. Want spoke about the matter, I said "I will have nothing to do with it."

The witness Sherritt, already examined, was re-examined:—

914. *The Commissioner.*] During the course of your dealings with Wright, Heaton, & Co., transmitting goods to Sydney, had you any goods to transmit through to Melbourne? No, nothing at all that I am aware of.

915. I do not remember the exact date of you going into the Service? I really could not tell you; it is a long time ago.

916. Was it about three and a half years? I think it was over five years ago.

917. Did you know Mr. Fehon personally? No; I have seen him before, because he has been pointed out to me.

918. Did you know at the time you were in Wright-Heaton's service whether or not Mr. Fehon had anything to do with the firm? Nothing to my own knowledge, only by one of the clerks named Stephenson telling me; he told me Mr. Fehon was in the firm.

919. What did he mean by "in the firm?" It being a limited liability company, I suppose he meant that he was a shareholder.

920. How did that arise? We were speaking about the firm, and he told me that Wright, Heaton, and Fehon, and some others had joined.

921. You never received any instructions except from Mr. Heaton? No.

922. How was it that Stephenson came to talk about the firm? I think I asked him who were in the firm.

923. Was it anything to do with the working of the firm? Oh, no.

924. It was only a matter of general curiosity as to who your masters were? That was all.

925. How often did you see Mr. Fehon in Sydney? I only saw him in the office on one occasion; he was walking through into Mr. Heaton's room.

WEDNESDAY, 3 APRIL, 1889.

William Henry Denneen was examined:—

926. *The Commissioner.*] Your name is —? Wm. Henry Denneen.

927. What is your employment? I am clerk in the Railway Department.

928. How long have you been in the Railway Department? Between eleven and twelve years.

929. Where were you stationed at first? I first started at Picton.

930. And you went to Bourke? Yes, in September, 1885, at the opening of the railway to that place.

931. That was eight or nine months before the wool prosecution began? Yes.

932. Before you went to Bourke, had you any experience of the practice of carrying wool? Yes.

933. Where? I was at Ironbarks and Blayney in 1881.

934. Were you goods clerk then? I was clerk and did a number of different things.

935. When you were at Blayney had Wright, Heaton, & Co. a branch there? Yes.

936. Had you any opportunity when you were there of seeing any peculiar course of conduct that went on with regard to the carriage of wool? Only in the ordinary way of business; that is, I would deal with the consignment-notes.

937. When you were at Blayney did you ever look at the carriers' way-bills? Very seldom. They were not handed in to the railway; it was not the practice to hand them in.

938. What was the practice? We weighed in bulk. They described how many bales were 250 lb. and how many 4 cwt. We weighed in gross.

939. You had two weigh-bridges at Blayney? Yes.

940. Did you or did you not weigh individual bales? No; it would not have been practicable.

941. At Blayney had you any reason to suppose that the weights given were not correct? No.

942. You never tested them, except by the gross weight? The head porter would be the man to test the weights.

943. Did he ever report to you as to whether there was any difference in the weights? Not that I recollect; though he might have said something about the gross weights being wrong; but it would be very trivial.

944. Did you discover any mistakes given on the consignment-notes? No.

945. From Blayney where did you go? I went to Byrock, in the same capacity.

946. I suppose there is a larger staff there? Yes.

947. How about your experience there? We treated the consignments in a similar way as at Blayney.

948. Had Wright, Heaton, & Co. an office there? Yes.

949. When there, did you hear anything about understating? No.

950. Were you still at Byrock when the prosecutions came on? When they were initiated I was there. I was brought from Byrock for that purpose.

Mr. J. Steers.

30 Mar., 1889.

Mr. Sherritt.

30 Mar., 1889.

Mr. W. H.

Denneen.

3 April, 1889.

Mr. W. H.  
Denneen.  
3 April, 1889.

951. What did you do with regard to working up the case? We got the carriers' way-bills from the agents, such as Gillespie & Co. and others here, the consignees of wool that had come through Wright, Heaton, & Co. We compared the way-bills with the weights specified by Wright, Heaton, & Co. on the consignment-notes.
952. How many way-bills did you get? Several hundred.
953. How many bales did they represent? Between 40,000 and 50,000.
954. Then you compared these with the corresponding railway consignment-notes? Yes.
955. Did you go right through them? Yes; we took bale by bale.
956. Have you any memorandum of the conclusion you came to? The conclusion I came to was that there had been gross understatements.
957. Yes. But did you keep any figures? Well, the statement upon which I gave evidence was given to the Court.
958. Can you remember now, approximately, the conclusion you came to? Yes; that the Railway Department had been underpaid to the extent of several thousands of pounds.
959. Between what time? Between the years 1879 and 1886.
960. About seven years? Yes.
961. By the way, are you speaking of wool sent from one station or several stations? Of all stations at which fraud were discovered.
962. Are these under statements entirely confined to Wright, Heaton, & Co.? Yes.
963. Can you roughly remember the sum arrived at as the result of your inquiries? No, I cannot.
964. Do you remember whether it was over or under £10,000? It was considerably over £10,000.
965. Was it over £20,000? Yes, I am rather inclined to think it was over £20,000.
966. In giving your evidence you said the Railway Department has been underpaid £1,887 3s. 2d., was that with regard to particular consignments? Yes.
967. Will you explain the process which seems to have been gone through in making out these under-statements? Yes; at the time these understatements were made there was a bale-rate in force. If there was a bale at Byrock which went 250 lb. we charged 12s. 9d. a bale; but if it went 251 lb. we would charge the 4-cwt. bale rate, 15s. Wright, Heaton, & Co. represented that some bales actually weighing 3 cwt. and 4 cwt. weighed only 250 lb.
968. They gave the aggregate correctly? Yes; but they understated the weight of each consignment. For instance, they would raise the weight of some of the bales that were over 250 lb. to 4 cwt., for the purpose of getting those over 250 lb. sent as under 250 lb.
969. That was the system which they called averaging? Yes.
970. Did you find anything by comparing the consignment-notes with the way-bills; did you find any aggregate understatements? Yes, I found some; but there were not so many.
971. Did you notice under what particular conditions these aggregate understatements were made? No; they were made at other stations—at Byrock and others.
972. Can you remember the number of aggregate understatements there were? No.
973. Can you say what was the proportion of understated aggregates in the whole of the lot? I do not think it would be more than 200 or 300.
974. Sometimes, I suppose, the wool, even if correctly weighed at the squatter's station, would weigh less when it got to the railway-station; is that so in your experience? Yes; in some cases it would weigh a little less; in other cases it would weigh more, from dust and so forth.
975. But as the result of carrying it in very dry and hot weather it might weigh less? Yes.
976. Before you were brought down to Sydney, had you any communication with anyone about these matters? The manager used to come into the office and jest about things.
977. In what way? He would say, "Did I suppose there would be trouble about the matter?"
978. That was Wright, Heaton, & Co.'s manager? Yes.
979. During all this time, while you were at Blayney and Byrock, did you hear of any system in force that went by the name of averaging? Yes; there was a system alluded to.
980. What was that system? When a consignment of, say, ten bales of wool, and each went over 4 cwt., we would charge for as many bales as were represented, that is to say, supposing they received a consignment of ten bales, weighing 44 cwt., instead of charging them as ten bales and putting 15 per cent. on each bale, we would charge them as 11 bales.
981. That came to rather less? Yes. We would only average when the bales went over 4 cwt.
982. In making this comparison between the weights on the way-bills and the consignment-notes, and in calculating out the deficiency, did you put this system of averaging into force? Yes, in cases where it should have been.
983. You gave credit for that? Yes; we allowed that.
984. Did you know what the origin of this system of averaging was;—how did it first arise? I cannot say.
985. Is there no written order or printed instruction allowing it? No; not that I am aware of.
986. In 1881, when you first heard of it—? Oh, there was a general order issued about that, in 1881 sometime. That is when I first became aware of it.
987. Are these general orders to be got now? Oh, yes; I think I have one or two of them.
988. Are you sure that that was the only system of averaging that you knew of then? Yes.
989. Are you sure there was no system of averaging of this kind—with regard to bales under and bales over 250 lb. weight to take the aggregate weight, and increase on paper the number of bales actually under 250 lb.? I never heard of that.
990. When did you first hear of such a practice of averaging? At the time of the initiation of the prosecution.
991. From whom did you hear of it? I heard of it from Mr. Kirkcaldie, assistant traffic manager in Sydney.
992. He told you something about what had been done? Yes.
993. What did he tell you about this averaging system? That bales represented to weigh under 250 lb. actually weighed more.
994. Yes; but as to the system in force called averaging, what did he say? Oh, he did not mention that. He merely said that the bales of wool had been represented on documents as being under 250 lb. when they were over that weight.
995. Did you hear of something called averaging which was outside the rule of averaging of which you have told me? I only heard that in Court.

Mr. W. H.  
Denneen.

3 April, 1889.

- 996-7. From whom? When the defence was set up.
998. During the whole of your experience in the Railway Department are you quite sure that such a system was not actually in force? I am quite sure.
999. Did you ever hear any rumours or suspicions that there was such a thing going on? No. Not until these prosecutions commenced.
1000. You were asked at Darlinghurst about this, when you said there had been a practice for many years of averaging wool. Do you still say that? I always said that a bale of wool weighing 251 lb. should be charged 4 cwt.
1001. How came you to say that? Well, some conversation in connection with the matter on one occasion took place between the porter and myself. It was a matter in which I had to give my decision, and I told him that.
1002. Who was contending that it should be charged less? No one; only I told him to be careful in weighing.
1003. Was it not said that if, for instance, there were two bales, one weighing 130 lb. and another 160 lb., they should go as 250 lb.? No.
1004. You were very strict? I carried out the rate-book in its entirety.
1005. Do you remember saying anything about the matter "ending in smoke"? No. It was represented by Lee & McAlister that I said so—but it was Mr. McAlister himself who said it. I was in his office, and he said "how do you think the case will go?" I answered, "I do not know," and he said, "it will all end in smoke."
1006. That is, as far as you know, the only foundation for the question put to you? Yes.
1007. You know Mr. McAlister to be a straightforward man generally? Yes, I always found him so.
1008. Then you were asked about a conversation with Sinclair? Yes. That was utterly false—I never spoke to the man in my life.
1009. Who was he? I think he was employed in a store up there. I think he was called in the Sydney Court, but he never put in an appearance; he happened to stop at the same hotel as myself. We used to say "Good morning," but as to having a conversation—that was totally false.
1010. You were also asked about a conversation with Mr. Anderson—did you have any conversation with him? No, not about these cases at all. I think he represented that I said the practice was allowed.
1011. Do you know anything about Mr. Fehon? No.
1012. You do not know whether there was any transmission of goods between M'Culloch & Co. and Wright, Heaton, & Co.? No.
1013. When you were put on to work up this evidence, was your work simply to make this comparison with the consignment-notes and way-bills, or had you anything to do with regard to finding out who were concerned in the matter? Only to work out and make comparisons.
1014. As far as M'Culloch & Co. were concerned, you did not go into the question? I looked in the books to see if I could find any similar cases in regard to M'Culloch & Co., but I could not find any. I looked through all the station books for the purpose.
1015. Just explain how it was that, so far as you could find out, they were disconnected with this? Well, I looked at several clips, and the bales in their case seemed to have been properly charged for originally; no representations were made about bales being put under 250 lb.
1016. Do I understand that there was wool that was consigned to M'Culloch & Co. down from Bourke to Sydney? No; some station on the South-western line.
1017. How came it to be forwarded to Messrs. M'Culloch? Oh, they must have had an agency there; they had in the early days, before they amalgamated with Wright, Heaton, & Co.
1018. Looking through their consignment-notes, what conclusion did you come to? That they had not been guilty of adopting similar practices.
1019. Was it that there was no positive evidence of it, or was there, judging from the consignment-notes and way-bills, positive evidence that they had not done it? Well, with the documents I came across, there was no positive evidence; but, judging from the maximum charge made in the first instance, I thought it impossible for it to have been done.
1020. How long were you at work altogether examining these consignment-notes? Several months. There were several other clerks engaged in the work.
1021. What did you understand was the object of making this search with regard to M'Culloch & Co.? It was not only with regard to M'Culloch & Co., but all firms.
1022. What conclusion did you come to with regard to the firms that were not proceeded against? Oh, some firms were guilty who had not been proceeded against.
1023. But M'Culloch & Co. had not been guilty of it? That was my opinion.
1024. Did you ever hear it suggested that the practice had been imported from Victoria? No.
1025. The search you made was an exhaustive one? Yes, extending over several months.
1026. I suppose your search was confined to wool? Yes.
1027. What salary are you receiving now? £200 a year.
1028. At Byrock what were you receiving? £150 a year.
1029. Since the time you first went into the Railway Service have you been continuously in the service of the Department? Yes.
1030. Have any complaints been made against you? Not any that I am aware of.
1031. No disrating? No; I get a rise once a year.

Francis Augustus Wright, M.P., was examined:—

1032. *The Commissioner.*] Your name is ———? Francis Augustus Wright.
1033. At present you are member for ———? Glen Innes.
1034. Some time ago there was in existence, and is now, the firm of Wright, Heaton, & Co.? Yes. It was a partnership originally, but now it is a Company. Originally, there were myself, Edward Heaton, and David McNeil in the firm.
1035. You were a general carrying firm and forwarding agents? Yes.
1036. Carrying on business then only in New South Wales? Yes, only in New South Wales.
1037. Having offices and agencies in many parts of the Colony? Yes.

F. A. Wright,  
Esq., M.P.

3 April, 1889.

F. A. Wright, Esq., M.P. 1038. Do you remember the fact that Messrs. M'Culloch & Co. started a branch of their carrying firm in Sydney? Yes. They started a branch in King-street.

1039. And then of course there was competition? Yes, there was before the final amalgamation was brought about.

3 April, 1889.

1040. What was the first occasion on which Wright, Heaton, & Co. and M'Culloch & Co. came into contact in that way—I mean on the question of amalgamating or becoming connected? I think about 1876. Mr. William M'Culloch called to see me with Mr. Laughlin, manager for Henry Brooks & Co., of Sydney. These gentlemen called with the view of either buying our business or coming to some arrangement by which the two businesses could be worked jointly; but nothing came of it on that occasion. This is, as nearly as I can remember, after the establishment for some time of M'Culloch's business in Sydney, which was first established as "Wm. M'Culloch & Co. (Limited)," and afterwards as "M'Culloch, Woods, Barbour, & Co." Mr. Fehon called on two or three occasions, and saw me in reference to the question of amalgamation. The result of these interviews was that I eventually promised to visit Melbourne. I may say a proposal was made to make the two businesses one company. In pursuance of this wish they furnished me in Sydney with details of their business, including an account of their plant, stock, and all things appertaining to it, and balance-sheets for two or three years. Mr. Heaton and myself went to Victoria to examine their plant, and we came to the conclusion that their business was a sinking affair, while ours was a prosperous one, and we declined to go into it. While we were in Melbourne our partner, Mr. M'Neil, in writing to us, expressed a wish to sell out of the business if he could obtain a satisfactory price, as he was anxious to visit Scotland. After negotiations with M'Culloch & Co. they eventually purchased M'Neil's portion of the business, which was a third of the whole for £6,000 or £7,000. That was the first interest they had in our business. That was in 1878 or 1879. Some year or so after this, M'Culloch's pointed out the peculiar position they held, being a joint stock company, and holding shares in an unregistered company (Wright, Heaton, & Co.), and mainly at their solicitation we were induced to register our business as a joint stock company. We became a registered company in the year 1880. The original capital of the Company was 12,000 shares of £5 each. They were paid up to £2 or £3. Messrs. M'Culloch held 4,000 shares.

1041. They held the same interest in the Company after it was registered, as was represented by M'Neil's share? Yes. Some year or two after the Company was incorporated we increased our capital by the issue of 4,000 additional shares. These shares were sold to Messrs. M'Culloch & Co. at a premium of £3 per share, making the shares paid up to £6 5s. per share. They were continually representing that they had a small interest in the business, and capital was wanted, and for the privilege of increasing it, they paid this premium. In 1884 or 1885, the capital of the Company was further increased by the issue of another 8,000 shares, paid up to £2 each. This amount was presumedly a profit made in the year of £16,000. This sum, in place of being divided amongst the shareholders, was retained in the shape of a new issue of shares, we thinking that we should strengthen our position by holding the £16,000 in hand. That is the history of the progress of the Company, so far as the connection with M'Culloch & Co. is concerned. Since then it has passed through various phases.

1042. Now, to go back, Mr. Wright, when the first negotiations were opened between the two Companies, when the examination was made of the books or accounts of Wright, Heaton, & Co. by M'Culloch & Co. Mr. Jenkin Collier and Mr. Jackson, who were both directors of the Company, visited Sydney and some of our country branches. At that time we only had five or six country branches. I think they visited all the branches. They examined our stock-list and plant account, and our books, so far as related to the profits of the business, that is, they examined the bank-book, cash-book, and all books that showed results. After this examination they became satisfied that the idea of purchase was a good one.

1043. Was Mr. Fehon in any way concerned in this examination? No. He had nothing to do with it. He was first connected with the subject of amalgamation, which fell through. Mr. Fehon had nothing, personally to do with the accounts. He did not come to the Colony at all.

1044. After that examination they bought one-third interest? Yes.

1045. After the purchase of that, how were Messrs. M'Culloch & Co. represented in Wright, Heaton, & Co? They were not represented at all until the Company was registered as a joint stock company.

1046. Of course, having a large interest in it they would have an interest in seeing how Wright, Heaton, & Co's. business was worked. How did they, or did they in any way, by agency or otherwise, join in the working of the firm? Up to the time of registration they were not represented by any person.

1047. Did not any of the directors of Messrs. M'Culloch & Co. come over periodically and examine the books of Wright, Heaton, & Co.? No; we were simply a private partnership, and Mr. Heaton and I dominated the business by reason of our two-thirds interests. Mr. Collier had known me for a long time and had confidence in me, and they never sought to make any examination.

1048. What was Mr. M'Neil's position in the firm? He had been the manager of our branch in the west.

1049. He was not a manager in Sydney? No. I was resident partner in Sydney and M'Neil in the country. Mr. Heaton devoted the principal part of his time to travelling around inspecting the several branches and making contracts for the carriage of wool.

1050. Up to the time when the partnership was formed into a company, had M'Culloch & Co., though they held a third interest, in any way interfered with the management of the Company, or were they in any way interested in the Company except in respect of their share? This is the position. They never sought representation. I suppose the reason they wished to have the firm turned into a company was in order that they might be represented. I will not swear though that they never visited the office; but I will swear that none of them ever made any examination of the kind you mention. They were not represented until after the formation of the Company.

1051. After that how was the firm represented? After the incorporation of our Company M'Culloch & Co. were represented by one of their body.

[The witness here read a minute of a meeting held in May, 1880, where it was arranged that a director might appear by proxy under the Articles of Association, and showing that Mr. Fehon was represented by Mr. Munro.]

1052. *The Commissioner.*] Have you gone through the history of the meetings held after that? No; I have not read the minute-book.

1053. You were present, I suppose, almost always at meetings of the directors? Nearly always.

1054.

1054. How often did the directors meet? The first meeting was held in May, the next in June. At that meeting Mr. Fehon was represented. The first general meeting of the Company took place immediately after, on 23rd June. I was present, and Mr. Fehon was represented by proxy.

F. A. Wright,  
Esq., M.P.  
3 April, 1889.

1055. What was the business? The business was generally a verbal report by myself and a comparative statement of the business of the Company, that is, a statement showing by analysis the progress of the past three or four months in comparison with the corresponding period of the previous year. But to all intents and purposes the business remained as much under my and Mr. Heaton's management as before the incorporation.

1056. During the course of these meetings, until recently, did the meetings consider any details of the business of not? No; never. I will leave the minute-book with you. I suppose no joint stock Company ever existed where there was less consideration of these things. Mr. Heaton did all he could to block the bringing of business before the board.

1057. About how many meetings was Mr. Fehon at? On 26th May and 7th January, 1881, when he was a director, he was present by proxy; in February, 1882, he was present in person; on 31st March, 1882, by proxy; on 7th, 28th, and 30th January, he was present personally. So that practically he was only present at three meetings personally.

1058. When he came up to attend these meetings he remained in Sydney some days? He remained a week.

1059. Can you say whether he went into the affairs of the Company for the purpose of seeing how affairs were worked and examined for himself the details? I can say that he never opened a book of the Company's, and never questioned an employé as to the business matters of the Company. He never examined any papers or books in the office. I may state beyond that, very frequently, when Mr. Fehon was in Sydney, he and I have chatted over business matters, but only private matters. There was no reserve as far as I was concerned. I never spoke to the directors about details.

1060. Now I must go into the substance of the charges against Mr. Fehon. You remember what is known as the wool frauds prosecution, and the practice which was treated by the Crown as a fraud, but justified, I understand, by your firm as bearing a different construction;—it was a practice by which the profits on the carriage of wool were increased beyond what they would have been if the practice had not been in existence? No, it did not. It decreased the cost of carriage to the squatter, because by that practice we were enabled to reduce the amount of the contract.

1061. Well, it was a practice affecting the cost of carriage? Yes.

1062. And it enabled you to compete with Victoria and South Australia, and so reduce the profits of Messrs. M'Culloch & Co.? My contention is that we made no profit out of the alleged wool frauds, because whatever advantage we gained was given to our constituents, and they received the benefit of getting cheaper carriage.

1063. Was Mr. Fehon, in fact, aware of the existence of the practice itself? Not to my knowledge.

1064. Did you hear anything that led you to suppose that he did know of it? No.

1065. Can you say with any amount of certainty, whether he did or did not know it? As far as my knowledge is concerned, and my conversation with him, I do not think he did know of it.

1066. I suppose you often spoke of the fact that M'Culloch & Co. were competing with the Company on the Victorian border? It was often a source of strained correspondence because we were hostile to them and they could not fight us; we knew that they having a large interest in our business they could not retaliate.

1067. By reducing your contracts you were able to get wool which formerly they used to get? Yes.

1068. This would be alluded to in conversation between you and Mr. Fehon? He frequently spoke about them, saying we could extend our business north or west. It often led to acrimonious correspondence, they saying we had got them into a corner.

1069. Was any allusion ever made to the actual rates of carriage on the New South Wales line? No; in all my correspondence I was careful not to give them the benefit of any information. Our policy was to keep them in the dark as much as possible.

1070. It was immaterial to you what became of their firm, but it was material to them not to fight against Wright, Heaton & Co.? Yes. That was one reason why I was not at first in favour of the amalgamation of the business, lest they should attract our trade to Victoria.

1071. Do you know whether any members of the firm of M'Culloch & Co. ever came to your branches to find out how things were going on? No; I have no knowledge of the kind. Of course directors would be allowed to go anywhere. I should state that they always appeared to show the utmost delicacy with regard to us. They never approached any of the employés, but confined themselves to the head office; and they generally used to stop not more than five minutes to speak to Mr. Heaton and myself.

1072. Was there a good deal of jealousy between the two firms owing to the fact of the competition in Queensland? There was no competition only at the inception. It was a case of diamond cut diamond. M'Culloch & Co. made arrangements to open a branch there and took over the Queensland business.

1073. Is there any correspondence between the two firms now in existence in your office? Well, the old firm of M'Culloch & Co. is bought out. The Australian Shipping and Carrying Company bought out the old firm. That Company has since gone into liquidation, and the assets of the Company have been purchased by another Company, called M'Culloch's Carrying Company, and the correspondence that takes place is simply that of an agency; they are our agents in Victoria, and we their agents here.

1074. You say there was some correspondence of an acrid nature between the two firms; have you any copies of those papers? I daresay they can be found.

1075. Were there differences at the meetings between the directors representing Messrs. M'Culloch & Co. and those representing Wright, Heaton, and Co.? Yes.

1076. On what matter? On the question of making calls, and there was some falling-out about Mr. Heaton's action in Queensland.

1077. From first to last, are you perfectly certain Mr. Fehon never took any part or went in any way into the internal working of your firm? Yes.

1078. When goods were sent through by train after the two firms amalgamated from some place in New South Wales to constituents of Messrs. M'Culloch & Co. in Victoria, what was the practice? The practice on both sides was as follows:—The consignor or shipping house sent an invoice to the consignee or receiving house, setting forth the description of the goods, whom from, whom to, and what charges were to be collected. That is what we called debiting charges forward.

1079.

F. A. Wright,  
Esq., M.P.  
3 April, 1889.

1079. How would the railway charges in New South Wales appear—in bulk sum; how many distinct heads would there be? There would be “road carriage,” “railway carriage,” “cartage in Sydney to the Customs House,” “entry,” “stamps for bill of lading,” and “commission.”

1080. Was there anything on the face of these documents to show to M'Culloch & Co. what the distinct railway charge had been? No. I can, if you like, provide you with a form of our invoice and a number of invoices from them to us.

1081. With regard to “averaging,” Mr. Want, you will remember, in making that attack upon Mr. Fehon, said that the system, whatever it was, had been imported from Victoria;—now, is there any foundation whatever for that statement of any kind? Not to my mind.

1082. Do you know when it originated first? As far as I know, in the year 1878. I am told by Mr. Bonamy that the practice existed in 1872. My knowledge extends to 1878; but when those charges were brought on I looked into the matter, and I found that it came into existence co-equal with the system of charging different rates on wool.

1083. Was that originally a Victorian system? Not that I know of.

1084. Is there anything of any kind to lead you to suppose or imagine that in any way the system has been imported from any other Colony? No; I have no knowledge personally or by hearsay that it was imported.

1085. Have you ever heard it stated otherwise than by Mr. Want? No. I know this, that the system of rebates has been allowed in Victoria, and the agents took advantage of it. But that is very different from the wool carrying system here. In Victoria a consignee of (say) 5,000 bales would receive a rebate of 6d. But the agents would send it from themselves to themselves, and the load would include several lots, whereas the intention of the Government was, that it should be one clip.

1086. When did you hear of that system first? Fourteen or fifteen years ago, when my attention was called to it.

1087. Your attention being particularly called to that peculiar system, can you say whether the system of averaging was one to which your attention was not called as being in force in Victoria? I have no recollection of ever hearing that the system arose in Victoria.

1088. As far as your firm was concerned, it was not introduced from Victoria? No, distinctly not. It was introduced to our firm by a very old English railway employé, who is now dead.

1089. What was his name? Ben. Windsor.

1090. When did he come into your firm? As far back as 1867 or 1868. It was the time the railway was running to Mount Victoria. By the way, Ben. Windsor is not dead, but he is paralyzed and imbecile.

1091. And was it then, when he first came into the firm, that he introduced the system? No; not for some years.

1092. Did he think the system out, or did he get it from some other place? I cannot tell. He was a man of large railway experience in England. Our western branches suddenly adopted the system of prepaying the railway on contract wool. This appeared to me an unnecessary expenditure of money, but they persisted in the practice.

1093. When did that system of prepayments start? I think in 1878.

1094. Do you know who originated it? It originated with our branches in the west by this man Windsor. I know that I wrote to Mr. Heaton about it, and protested against it, and he said they were determined to do their own business independently of the Sydney office. Some time after I found out the reason of this.

1095. How long before the prosecutions was it that you found it out? Two or three years.

1096. How did you find it out? In conversation with Mr. Heaton.

1097. In point of fact, the consignees knew nothing of the averaging system. They would have known if they had had to pay the railway charges themselves? No; I do not think they would necessarily. They would not have taken the trouble to analyse the charges.

1098. But they would see that the consignment note did not tally with the station way-bill? They did not get a way-bill, but only a ticket giving the lump sum. The weight was given to the railway, but not by the railway.

1099. As far as you are personally concerned, all you have got to say in defending this system is that you found it had come into force, and you left it to go on? Yes; and I understood that every carrier did it. I could impeach all the best men in New South Wales for the practice. My complaint against the Government is that my firm should be singled out for prosecution when there were many other carriers and merchants in Sydney who have done so. There is not a storekeeper or merchant who cannot be prosecuted on the same grounds.

1100. That does not include the question of “understating”? No.

1101. What about understating? I was ignorant of it. No doubt there was understating, but it was not recognized by the firm.

1102. How do you account for it having been adopted by the employés? Well, there was a spirit of emulation amongst the branch managers; in one or two cases the men were paid bonuses on the returns from their stations. The strongest proof that there was no general knowledge is the fact that in all our numerous branches, to the number of seventy-six, only four stations adopted the practice, viz., Gundagai, Cootamundra, Young, and Bowning or Wagga. You can have any books in my possession.

[Witness here handed in copies of consignment notes and invoice forms in connection with business done by Wright, Heaton, & Co. and M'Culloch & Co.]

In point of fact (continued the witness) we only booked wool that we had under contract at the average rates; that was no robbery of the public. If there was any cheating it would be cheating the railway, because wool, not contract wool, would be sent in the ordinary way.

1103. Do you say that wool not under contract was charged strictly according to the rates? It was always booked to be paid by the consignee.

1104. Was the system of averaging [adopted with regard to that wool, or only with regard to contract wool? The system of averaging was general, but we only get a benefit from contract wool.

1105. Are you sure the averaging system was adopted with regard to wool upon which the consignee had to pay? It was generally adopted; there were cases where it was not adopted. The practice, of course,

was

was to average it, but we only paid the railway carriage for wool under contract. If we sent wool to London it was charged at so much per lb. If delivered in Melbourne it was charged so much per ton. We would charge them so much, as per contract, so much per ton.

F. A. Wright,  
Esq., M.P.

3 April, 1889.

1106. There were no means whereby the consignee in Melbourne could practically tell on what system the charges were made? It did not affect the consignees, because our contract with them was a rate from the sheep station, delivered to the point of destination; and whether we paid more to get it down or less was not their business. We have had to pay more in bad seasons. The year before last we lost 15s. a ton on 60,000 bales.

1107. As to this system of averaging, I want you to explain exactly what you took it to mean? The system of averaging I took it was an equitable way of carrying the wool. The Railway Department according to their scheduled rates, carried the wool at per bale, not exceeding 4 cwt., and for scoured wool at per bale, not exceeding 250 lb. There was a fixed rate up to 250 lb. and above that there was an increase of 15 per cent.; and above 4 cwt. and under 5 cwt., there was an increase of 15 per cent., and over 5 cwt., and under 6 cwt., there was another increase. I may state an instance that came under my notice in 1878 or 1879. Our agent at Harden went away to get married, and I went there to do his work while he was away. During the fortnight there were three teams came in with wool from Gibson's Crackabla (?) Station. These three teams had between them 100 bales of wool, ninety-two of which weighed under 4 cwt., and the residuum—the balance of the wool weighed 4 cwt. This wool was simply consigned to us as agent. That was the first time that the unjust and inequitable position struck me. This gentleman had sent upwards of ninety bales out of 100, some of them less than the authorized weight, and seven or eight bales exceeding the weight by 3 or 4 lb. per bale. It struck me as unjust that he should have to pay the 15 per cent. increase on a few bales, when the bulk of the bales were under the recognized weight.

1108. What did you do? I averaged them. I called the attention of the goods' clerk or the head porter to what I had done, and the wool was loaded, and the man refused to sign the consignment-bill note.

1109. Did you write the word "average"? No; I simply filled in the weights and produced Mr. Gibson's weights, and I showed the porter that the weights on the weigh were a *fac simile* of the consignment-note. He refused to sign the consignment-note, and the matter was referred to the station-master.

1110. Do you remember the station-master's name? I cannot remember. That wool went on in due course to Sydney, and four days after its departure I received from the railway officials the consignment-note receipted, with the information that the Traffic Manager had been communicated with, and recognised the justice of what I had done as a fair and equitable thing. That is the only case in which I have averaged wool.

1111. You mean the average was under 4 cwt.? Yes.

1112. Was it before you had heard anything about this averaging that you did this at Harden? Yes.

1113. After this, the system came into force by which the 250 lb. rate was used? Yes; Windsor was the first man that did it.

1114. The first time you heard of it was about 1878 or 1879? Yes. It arose in this way. Mr. Heaton was in Sydney, and I went into the question of prepaid wool. I asked him why we should pay money before it was repaid to us. Then he told me why it was done. He said it was done for the purpose of enabling us to get a profit on the contract wool, and to compete with others by cutting down our prices. We had the Darling trade on one side and the Riverina on the other then.

1115-6. What I do not understand is this. How did that really become material. In this way; that you might have gone on contracting with the consignors to carry the wool down to the station and to let them pay the railway rates, and you might have held out the inducement to them that the railway rates would, by the application of this proceeding, be lower than they would at first sight imagine, so that you would have got the benefit of their custom whether you adopted the plan in your own favour, or whether they were to adopt the plan in their favour. It would not make any difference to them? It would have made a difference to us. I will give an illustration. I call upon a squatter and ask him if I can carry his next season's wool. He inquires what I can do it for, and at once calculates what it will cost him. He calculates the cost of the team and the railway freight, and arrives at a certain result. Now, if we had told him of this advantage with the railways, he would have calculated differently, and arrived at a different result. We made no contracts other than direct to the metropolis either in Sydney or Melbourne. Our contracts were always to the metropolis. The teamster would bring the wool to the station, and we would act as agents there, and any advantage of averaging would have gone to us.

1117. Then it came to this: The squatters were kept in the dark as to the system of averaging? Yes.

1118. If it was a system accepted by the railway, how is it that information was not given to anybody? Because it was an unwritten law in the Department, and as fully recognized as anything in their regulations.

1119. But it was unwritten only in favour of the carrying firm? No; there were scores of cases where the squatters had availed themselves of these privileges, but they lived near the railway station and made out their own consignment-notes.

1120. Do you say that, generally speaking, it was recognized by the officers of the Department for the purpose of enabling the Department to do more work by enabling the carrying firms to make, what appeared to the squatters, more advantageous contracts. I do not know, but I know that thousands of bales of wool have been forwarded by the railway officials, who made out the squatters' notes themselves.

1121. There never was any notice or notification sent out by the Department, but there was a notification touching averaging of another kind? Yes.

1122. Do you remember what that was? I think it was averaging bales under and over 4 cwt. I do not think it referred to the lighter bales.

1123. That was specifically allowed? Yes.

1124. Between what limits? It was simply this: That the gross weight of a consignment of wool not exceeding 4 cwt. per bale would be allowed, notwithstanding the fact that one portion of the consignment might consist of bales of more than 4 cwt. and the other portion of bales of less than 4 cwt. I can show that we have over estimated 92 tons.

1125. How do you account for that? Carelessness in invoicing the wool.

1126. What was the date of the issue of this notification? I cannot remember.

1127. It was Mr. Heaton who had some conversation with Mr. Goodchap at Orange? Yes.

1128. Afterwards Mr. Goodchap was called at the trial before the late Sir James Martin and was not examined

F. A. Wright, Esq., M.P.  
3 April, 1889.

examined on either side? I do not remember his being at the Criminal Court at all. I remember his being at the Water Police Court. I think I can produce letters from squatters saying, "If you are a thief, so am I." Mr. Jas. Mosely, of Tibberena, wrote to Mr. Dibbs and to me on the subject. The case for the defence was not concluded.

1129. How did the case in the Court go on? I will tell you how it was. It was late in the day, and Sir James Martin said he would send the case to the Jury on the evidence of Stephenson.

[Witness here gave a history of the case of the Crown v. Wright, Heaton, & Co.]

1130. After this Lee and M'Alister's case came on? Yes. They were tried and acquitted by the jury; but I may state that I have it from the foreman of the jury that, with one exception, they were unanimously in favour of the defence.

1131. I do not know whether you have anything more to tell me. I thought you were in Sydney, and I summonsed you immediately after Mr. Fehon, who has been examined. He might have appeared here to hear your evidence, but he is away. As part of the case against Mr. Fehon comes the question whether there were or were not wool frauds, and so I thought it fair to put your evidence in such a way that you might have an opportunity of being present whenever witnesses who were called at the trial were giving evidence; but you were away, and I could not put the matter off any longer. I called not only witnesses for the prosecution, but witnesses for the defence. I should certainly have allowed you to be present if you had liked during the examination of these witnesses? The only man I should have liked to hear was the man named Denneen. I wrote a letter to Mr. Fehon on 13th December, and I adhere to that letter now. In it I told him that he never held a share, except as a trustee for the Company. I wonder Mr. Fehon has not produced his trust deed with Messrs. M'Culloch & Co.

[Witness at this stage verified his statement in this letter to Mr. Fehon by reference to the minute-book of Wright, Heaton, & Co.]

Mr. Fehon (the witness continued) remained nominally the owner of 650 shares up to the middle of last year. The explanation of that was this;—that at about the time I left Parliament, just before or just after, I was desirous of distributing my shares for the purpose of selling a few, because things were not all straight. Having left the business a little over three years previously with a paid up capital of £86,000, I found that during my three years of public life the capital had decreased from £86,000 to £26,000, and I was desirous of selling some of my shares, and for that purpose I distributed them amongst the names of certain friends, Mr. Fehon being one.

1132. I suppose that was because if the shares appeared to have been sold by you it would have damaged the Company? Yes. Had my shares been placed in the market for sale it would have run things too fine. The scrip was transferred, as you see by this minute-book, from Wright to Mr. Fehon, 650; to Mr. Jackson, 577; to Mr. C. B. Lowe, 750; to Mr. T. F. Dye, 538; and others. I sent the scrip to Mr. Fehon, and asked him to sign them in blank, which was done.

1132½. Finally, what was done with these shares? They were re-transferred to me in June last.

1133. How was that? Because things became a little more prosperous, and I would not sell them. Of course that was before Mr. Fehon was appointed Railway Commissioner, and before there was any thought of his appointment.

1134. Who wrote these minutes? The secretary of the Company, Mr. Chas. Greatrex.

1135. How long has he been with you? Four years.

1136. What are these shares to the number of five, referred to in the minute-book. Are they *bona fide*? I gave these shares to my clerks, who were to pay their book value. Some kept their shares, and some gave them back.

1137. Were these shares originally allotted to them? Yes.

1138. However, that is a matter altogether outside of this inquiry. When did you first become Minister for Works? In May, 1883.

1139. What was your special object in doing this? Well, first I had been elected Member of Parliament, and there was something in the Constitution Act to the effect that "any private trading company with twenty members of the firm could contract with the Government," and so I said to them, "I will give you these shares, and you shall have the interest, and when they are paid for you shall have them."

1140. How long have you known Mr. Fehon? I never saw him until he came over to see about the business, when he was one of the managing directors of Messrs. M'Culloch & Co.

1141. You did not know him when he was in the Railway Department? No.

1142. Did you ever hear anything of Mr. Fehon having got into trouble in connection with Messrs. M'Culloch & Co., while in the Railway Service of Victoria? Yes.

1143. When was that? Shortly after I first saw Mr. Fehon.

1144. What did you say? I told him I had learned something to the following effect—that he, in his official capacity, had given contracts to Messrs. M'Culloch & Co., and afterwards resigned, and became a partner in the firm. He laughed and said, "I never had any power to give any large contract, and M'Culloch's never had any large contract with the Railway Department, and I never left the service to join them," and he explained that the statement originated in a statement made by Mr. Orr of the Victorian Parliament.

1145. Did you make it your business to find out the facts from any other source than Mr. Fehon himself? No; I heard it, and I asked Mr. Fehon if it were true, and he denied it. But for many years past I have been on visits to Melbourne, and I have heard Mr. Fehon spoken highly of. In every relation of mine with Mr. Fehon, I have found him straightforward and honorable.

1146. As far as his reputation in Melbourne goes—how about that? I do not think there is a man stands higher there. I have had many chances of hearing favourable opinions expressed about him.

1147. I suppose you are not acquainted with Mr. Orr? No; I never saw him. I have seen his place of business. I would like to say that so far as Mr. Want's charges as to Mr. Fehon's complicity with these alleged wool frauds are concerned, Mr. Fehon knows no more than Your Honor does at this moment. Mr. Heaton and I governed the business from beginning to end. I have no desire to shirk my fair responsibility. If anyone has done a wrong it is very unfair that another man should be responsible. Mr. Want told me in Mr. J. M'Laughlin's office, that he had made charges against Fehon for the purpose of damaging the Government.

1148. What is Mr. M'Laughlin's address? Mercantile Chambers, Pitt-street.

1149. What else? Mr. Want said that having made these charges in the House he was twitted by Garrett

- Garrett with having prostituted his office of Attorney-General of the Colony, and, in a cowardly way, had not carried out his duties. F. A. Wright,  
Esq., M.P.  
3 April, 1889.
1150. Do you remember the date of this? It was on the day of Mr. Want's last attack, or the day previous. He further told me, in M'Laughlin's office, that he intended to be as mild as he could when he next spoke, and added that there were no wool frauds, and that if I should stand for a constituency he would give me a letter saying that the wool frauds were only a "trick of the trade." Mr. Want held out his hand to shake hands with me, and I said, "What have I done to you, Want, that you should persecute me like this," and he said, "I would not do it for the world—God forbid I should." As Mr. Want was leaving the office Mr. M'Laughlin said, "Remember what you promised, Jack—remember that you have promised to say there were no wool frauds, and that they were only a 'trick of the trade.'"
1151. Had you any conversation with Mr. Lyne on the subject? No, not till last night; I told him I had been subpoenaed to attend here to-day, and I said, "Your statement and Want's don't agree." He answered, "Oh, yes they do." I said, "No; Want goes much further than you do as to what took place." That was speaking of the interview with M'Mahon.
1152. Do the books of your firm in Sydney show the process by which the weight of wool was arrived at? No; they are simply a reflex of the squatters' way-bills.
1153. But do not they also show the amount arrived at on the consignment-notes? They show what we paid to the railway, but nothing else.
1154. Then you admit yourself the existence of this system of arranging? Yes. We have always said so and regarded it as an unwritten law.
1155. Stephenson in his evidence said that on one occasion you had him in the office, and speaking of Windoe in relation to the charge that he had made you said, "The Manager must be a damned fool for not doing something." Do you remember that? I think it was a man who had not taken advantage of arranging, and I said, "The man must have been a damned fool to have neglected his business." At the time he gave that evidence he had three assistants under him, and they were behindhand with their work and could not check the weights. I never checked an invoice in the place in my lifetime.
1156. I suppose on some occasions you checked the work of some of the branches to see how they were doing their work? No.
1157. Are you sure of that Mr. Wright? Yes.
1158. Stephenson said that you once said, "Oh, that is good wool Stephenson"? I have no recollection of saying it.
1159. The main contracts are made in Sydney, I suppose? Yes.
1160. Are the contracts with teamsters made in Sydney? No; at the branches. A good deal of Stephenson's evidence was true, but a great deal was presumption.
1161. Did Stephenson leave your employment before he gave evidence? What took place was this. He left the employment of the firm, and said he was going to give evidence. He sent Windoe to say that he would like to see me, I having before ordered him out of the office. On this occasion I declined to see him. Then he got frightened, and made statements that had a substratum of truth in them with a lot of lies on top.
1162. What became of him finally? I do not know. I heard that he was employed in some mercantile firm in San Francisco.
1163. Do you know how he came to leave Sydney? No. I know they say he was spirited away with a large sum.
1164. Did you hear anything about it? Yes; from Mr. Dibbs, in Parliament.
1165. Did he, in fact, disappear in a very peculiar way? Yes. His wife called to see me, and I declined to see her. I am told that he was in Sydney when the Crown said he was absent, and when the Crown knew he was here.
1166. What was he wanted for when he was not found? When our case came on the second or third time before Mr. Justice Stephen, Mr. Salomons announced that owing to the absence of two witnesses, he must ask for the release of prisoners. Stephenson was one of the two missing witnesses.
1167. He had been in your employment a good many years? Yes, some four or five years, and he was a very good clerk.
1168. Was he honest? Yes.
1169. He was originally joined in the prosecution as a defendant? Yes.  
That will do for the present.

THURSDAY, 4 APRIL, 1889.

Edwin Chas. Leary was examined:—

1170. *The Commissioner.*] What is your name? Edwin Chas. Leary.
1171. What are you? I have come down to Sydney in regard to these contracts which the Government are about to call. Mr.  
E. C. Leary.  
4 April, 1889.
1172. At one time you were in the employ of Messrs. M'Culloch & Co., carriers? No. I have been intimately connected with them since Wm. M'Culloch was in business. I entered the Victorian Railway Service in 1861.
1173. In what capacity? Clerk.
1174. In what Department? In the Goods Department.
1175. Who was then Traffic Superintendent? John Carruthers.
1176. Was the firm of M'Culloch & Co. in existence as a carrying firm then? No; they came into existence in 1862 or 1863. William M'Culloch was a traveller for Messrs. Isaacs & Co., wine and spirit merchants.
1177. You were acquainted with him? Yes.
1178. How long did you remain in Melbourne in that capacity? Till 1865.
1179. And the firm of M'Culloch & Co. started in 1862 or 1863? Yes. Reynolds and Inglis were the great carrying firm then.
1180. During the time you were employed in that capacity in the Victorian Railway Service, what knowledge had you of the firm of M'Culloch & Co.? Well, Messrs. Reynolds and Inglis sold out to Messrs. Morley and Carriek, and Mr. Morley had more than he could do, as he was connected with a large  
231—E sugar

Mr.  
E. C. Leary.  
4 April, 1889.

sugar company, and so he sold out to Wm. McCulloch & Co. between 1862 and 1863. At that time Messrs. McCulloch commenced carrying on the railways. In September or October, 1862, I received the first train of wool from Sandhurst to Melbourne. I was receiving foreman. At that time Mr. Fehon was travelling auditor for the railway. Shortly after opening to Sandhurst, I think it was Mr. W. H. F. Mitchell, then Commissioner for Railways, granted a special to Sandhurst to bring down wool that had been landed at Sandhurst waiting for the opening of line. I superintended the loading of three special trains with flour and coal for the Sandhurst Gas Company. A train was loaded up with wool for Melbourne. Shortly after there was some unpleasantness occasioned by several carriers complaining of the unfair way in which they had been treated by the granting of this concession to one firm of carriers, viz., Messrs. McCulloch & Co. It resulted in John Carruthers, Traffic Superintendent, taking the onus of granting the special and resigning his position. Immediately afterwards he received the appointment of Traffic Superintendent of the Hobson's Bay Railway, of which the then Commissioner of Victorian Railways was a large shareholder. It was rumoured at the time that Mr. Carruthers took the blame upon himself rather than that Mr. Mitchell should be blamed. Mr. Carruthers was succeeded by Mr. Jereny, who had been acting as assistant traffic superintendent. I cannot remember whether it was in 1862 or 1864, but it was on the day the Prince of Wales was married, when the railway employees gave a ball in honor of the Prince of Wales' marriage. The ball committee were settling up, and I was present when Mr. Jereny complimented Mr. Fehon on his appointment of assistant traffic superintendent. In 1865 I left the Railway Department, and entered the Roads and Bridges Department, and was out of the Service for five years. Mr. John Stephenson was Secretary for both Railways and Roads and Bridges. I then made some 70 miles of road from Healsville to Wood's Point, then called the Yarra Track. I returned to Melbourne in 1870, and saw Mr. Stephenson, and we went together to Mr. Fehon, traffic superintendent. I was then appointed assistant wharf master at Echuca, and remained in the Government service till 1873, when Messrs. John H. Orr & Co., carriers, gave me the appointment of their manager in the Albury trade. I remained with them only two seasons, and went into the service of Mr. Fred. Bayne, as manager, and remained in his employ until 1880. Then I came to Sydney and went over to Queensland. I have had no experience in connection with the railways since then. Such is my history from 1861 to 1880. Since then I have been in Queensland.

1181. You said there were complaints made? The complaints I understand were made at the action of Mr. Carruthers in allowing three specials. Mr. Carruthers took the responsibility. At that time there were several carriers who said they had the same right.

1182. Were Messrs. Jno. Orr & Co. one of the firms that complained? Yes.

1183. Were Messrs. McCulloch & Co. the only firm allowed to use those special trains? Yes. The freight from Moama to Sandhurst was £14 a ton. The concession was that they brought it down at 30s. a ton.

1184. What reason was given for allowing Messrs. McCulloch & Co. only to send their wool down? That they had a large quantity of wool waiting at Sandhurst stacked alongside the railway temporary platform.

1185. Did that question ever come before the Victorian Parliament? No; the moment any unpleasantness occurred Mr. Carruthers resigned.

1186. Mr. Fehon was auditor at that time? Yes; and had no control over the traffic.

1187. Then these rumours in no way directly or indirectly affected Mr. Fehon? No.

1188. Do I understand you to convey this idea that that information is material because it explains the animus which Mr. John Orr had against the Railway Department? Yes. There was a lot of jealousy among the carriers. We were doing an immense trade after the line opened, and carriers would make contracts with firms to do all their carrying at certain rates, and I have a document which explains the way in which the carriers used to get a concession for a lot amounting to 200 tons. The sheets would show the rates, but the carriers would take this at a through rate. After closing their bargains with their customers, the carriers would wait upon the Traffic Manager, and, if they could get a line of 200 tons, would arrange with the Traffic Department for a concession.

1190. Was the Traffic Department authorized to make special concessions? Yes.

1191. According to the tariff? Yes. Take a large line of wire. The carriage of this would involve no friction, no necessity for covering, no special labour on the part of the railway employees. It could be thrown out anywhere, and there was no storage required; and so the Department would make a concession on wire; and they would also make concessions on large lines of flour and sugar.

1192. These were recognized as fair concessions? Yes. But in the border trade, at Albury, Wahgunyah, and Echuca, with the view of securing the Riverina wool, there were further concessions made.

1193. Was public notice given that these rebates were allowed? I do not know whether they were gazetted.

1194. But were they generally known? Not outside the railway and the carriers. The railway voucher would be forwarded to the consignees in Riverina, showing on the face of them the classification of goods and the different rates.

1195. Whereas I understand the carriers had paid less? Well, there was a rebate allowed of something like 23 per cent.

1196. But did that appear on the face of the document? No.

1197. The carriers got the advantage? Yes.

1198. And getting lower rates, they could afford to charge less to the consignors? Yes. [*Witness here handed in a paper showing certain rates.*]

1199. What I understand you to say is that the railway charges which did not appear on the face of those documents were all lumped? Yes.

1200. The rate then was 5s. 6d. for all bales up to 4 cwt.? That was the minimum rate.

1201. Are these rates fixed as per ton, averaging five bales? Yes.

1202. So 75s. would be the charge practically for an average of five bales? Yes.

1203. Then the difference had to cover the cost of the carriage by your own steamers? Yes.

1204. Then I understand you to say that you got the rebate? Not on wool, only on goods. Still, after a time there was an allowance. I forget now the exact percentage. I think discount was allowed. Several thousand bales were carried for one carrier.

1205. Was that intended to be allowed when these bales were carried for one carrier or for one owner? For the carrier.

1206. Do you ever remember any concession being made to one owner? No. The Railway Department did not know any of the owners. They arranged direct with the carriers. 1207.

Mr.  
E. C. Leary.  
4 April, 1889.

1207. Through the course of this making of concessions in favour of wool or of goods, was there any under-hand course of conduct on the part of the carriers, or was it openly recognised by the Department that they were to get these concessions? It was recognized by the Department that they should get certain concessions.
1208. In taking that advantage, was there any system adopted which virtually resulted in defrauding the Railway Department? Not that I am aware of. The Victorian Government said that all bales up to 4 cwt. should be charged a certain rate, and above that, a rate and a half.
1209. Over 4 cwt. it was a rate and a half, not 15 per cent? Yes.
1210. Did that continue right up to 1880, the time you left? Yes.
1211. Above 4 cwt. was there another jump, or was 4 cwt. the limit? Four cwt. was the limit.
1212. Suppose there are 4 cwt. and a few pounds over, would the weight charged be 6 cwt.? Yes.
1213. But going below 4 cwt., was there a rebate? No. The Department was discriminating as between scoured and greasy wool.
1214. Was there any discrimination with regard to bales weighing 250 lb. and 280 lb.? No.
1215. Was there any concession for dumped wool? There was a special concession for it.
1216. Do you remember whether that concession did not also include bales, whether dumped or not, going not more than 250 lb. or 280 lb.? I forget; but there was something in regard to 3 cwt.
1217. What was that? There was a rebate on dumped wool of, I think, 10 per cent., below the Wakool Junction. There was a concession on bales not exceeding 3 cwt.
1218. You had a very full knowledge of the rates then? Yes.
1219. You say there was no 250 lb. or 280 lb. standard fixed. I say so. It was in consequence of our being able to store a larger number of dumped bales in trucks that the rebate was made.
1220. That is, the truck could generally carry more weight in wool than it had space for? Yes.
1221. Was there any system adopted in respect to these 3 cwt. and 4 cwt. bales known as averaging? Well, I was going to explain: The fault in a great measure rested with the railway employés. Half-a-dozen teams would be drawn up to the platform. The carrier would go into the station with his consignment note, which would show the number of bales. It would give the grand total of 5 or 6 tons. The carrier's clerk would immediately consign it to the Railway Department. The Railway Department would just take the brands and number and pass it on. But amongst this lot there might have been several bales of wool weighing over 4 cwt. If the attention of the loading foreman was not drawn to this they would get through at a fixed rate, instead of going at a rate and a half. But in that case the carrier was not to blame, because he had no knowledge of the weights, the tonnage shown on the bottom of his way-bill was, freight (say) 6 tons; but, notwithstanding, a detailed list might have been sent down to the carrier six weeks previously by post.
1222. To the head office in Melbourne? To the local manager. Every local office carried out the carrying trade themselves.
1223. He would probably have received the detailed account of the wool by post? Yes.
1224. And so he would, if he chose, have the chance of comparing the individual bales with the weight on the consignment note? He does not give the weight—he does not show so many bales for weight. He sends so many bales; the manager of this branch would send back his charges to the station, and would take advantage of their rate. But, in making out his tenders, he calculates all at an average of 4 cwt. Of course, if the manager drew attention to these bales being overweight, the contractor would be the loser.
1225. Then the carriers, in making out tenders, based them upon an average of 4 cwt.? Yes.
1226. Below Wakool Junction they would get the concession in favour of bales not exceeding 3 cwt., and in cases of sending down big bales there was loss or no loss according to whether or not the Railway Department found it out? Yes.
1227. Was not the way-bill showing the detailed weights actually brought down by the carrier himself to the bank of the river? No. I forgot to tell you that when I first came to Sydney I was with T. S. Mort & Co., and I had to weigh every bale, and I used to see a great discrepancy between the station weight and the actual weight. The local weight was larger than the station weight.
1228. How do you account for that—adjustment of scales? To a slight extent.
1229. I suppose sometimes the wool would pick up moisture? Some wool would.
1230. But where wool has been shorn in a dry season, in dusty salt-bush country, would not that make a difference? Only to the extent of 1½ lb.
1231. In that way the Railway Department sometimes lost what they ought to have had—the difference between one freight weight and the freight and a half in case of individual bales? Yes; but that was because they did not have men at the station qualified to distinguish between the weights of different bales.
1232. Was there any regular system adopted according to which managers or clerks at branches were instructed to adopt—any such thing as averaging, or a practice going by any name like averaging;—that is, running a lot of bales through, at some over and some under 4 cwt. at the average which that number of bales would give, dividing the total weight of the consignment by the number of bales;—was that, as a system, recognized by the Department? No.
1233. Did you ever hear the word “averaging”? No.
1234. The carriers' clerks tried to get their wool down as cheap as they could? Yes.
1235. And the Railway Department tried to stop them? Yes; but they failed, because they did not have competent men to look after things. The work was left to foreman porters, who might, on occasions, get five or six big lots of wool in, which they would attend to, but not weight.
1236. Was there any wool carried by you that was not contract wool on which the agents or consignors were to pay the railway carriage? Yes.
1237. Was a different system adopted in regard to them? No; the same system.
1238. All the advantage in the case of getting the wool down at a rate that would be under the full rate would go, not to the firm you represent, but to the other agents? Yes.
1239. I think you said you only acted as agent for one firm? For Jas. Orr and Mr. Payne.
1240. One after the other? Yes.
1241. Did you see much of Mr. Orr himself when you were in his employment? Yes.
1242. Did he ever give you any special instructions as to the carriage of wool? He left it to me quite, so far as I was aware, while I was in his service. As the wool came down, so I consigned it. We were doing

- Mr. E. C. Leary. a large trade then between Albury and Echuca. I used to send down advice notes to Mr. Orr. I made out no accounts. They were made out in Melbourne, by Mr. Stewart. The only colleague I had then was a local one.
- 4 April, 1889.
1243. Did you ever hear him speak of Mr. Fehon? Mr. Fehon was at that time Traffic Superintendent in the railway employ. Mr. Fehon retired from the Railway Department about 1873.
1244. What year was it that you were in John Orr's employment? In 1871.
1245. That was before Mr. Fehon left the Railway Department? Yes; he left it to join M'Culloch & Co.
1246. Do I understand you to say that you heard no remark made by Mr. Orr about Mr. Fehon? No. Well, I did on one occasion, and I was very much annoyed with it. When I was assistant wharf master I received a memorandum from a Melbourne office, asking me to apply for the position of manager. I entrusted my application to Mr. J. Orr, who was then a Member of Parliament. He put my application in his pocket, travelled down in the same train, said I was not eligible for the position, and that he was in treaty with me to take the management of his business. He said he was on friendly terms with Mr. Fehon. When I charged him with it he said, "I wanted you, and so I put your application in my pocket."
1247. Mr. Orr spoke in a friendly way of Mr. Fehon? Yes.
1248. Did you ever hear him speak in an unfriendly way? No. The reason I left Mr. Orr was that he closed his business, and Mr. Payne offered me the position of manager for him.
1249. When did Mr. Orr close his business? At the end of the season, 1873.
1250. That would be just after Mr. Fehon had left and gone into Messrs. M'Culloch & Co's.? Yes.
1251. At that time do you know if there was anything about competition between M'Culloch & Co. and Mr. Orr.? Well, the grumbling at that time was in connection with the steamer trade along the Murray. Messrs. M'Culloch & Co. had three steamers, and they had chartered one or two boats from South Australia. The unpleasantness arose through Messrs. M'Culloch & Co. in a measure securing all the boats and trying to oust Mr. Orr out of the Albury trade. Mr. Orr was very bitter about that matter. Mr. Clifton was their business manager then. Mr. Jas. M'Culloch was head of the business at Echuca. There was a lot of unpleasantness.
1252. That lasted after the time when Mr. Fehon left the Railway Service and joined M'Culloch & Co.? Yes.
1253. The feeling was not against Mr. Fehon? No. It was against the firm, in touching the trade below Echuca.
1254. With regard to Mr. Fehon, do you know what particular part of business of Messrs. M'Culloch & Co. he first went into? I only know that he joined the firm. I have met Mr. Fehon once; we travelled together from Deniliquin to Hay. That was to obtain the trade for the following season. We were both on that.
1255. That would be as against Payne & Co.? Yes; they were in opposition.
1256. If it was a fact that Mr. Fehon was instrumental in extending M'Culloch & Co.'s business towards the north-east, that is to Albury, then I suppose, from your knowledge, he would have brought the firm of M'Culloch & Co. most effectually into opposition with Orr & Co.? Yes; but M'Culloch & Co. had been in this trade for years.
1257. In 1873, which was the time that Mr. Fehon joined Messrs. M'Culloch & Co., I understand that you had then gone into the employment of Payne & Co.? Yes.
1258. Did you at that time hear any rumours about Mr. Fehon? No; except that he had left the Railway Department. At the time he left, I think, it was rumoured that the Department had given him handsome compensation.
1259. How did he stand in reputation with the public,—that is with regard to integrity? Always very high.
1260. Did you hear it suggested that he had been favouring Messrs. M'Culloch? No, sir.
1261. Are you positive? I am sure that all through the Echuca district they were all pleased to know that Mr. Fehon had gone into the carrying business and joined Messrs. M'Culloch & Co.
1262. Why were they pleased? Because they knew he was an able man.
1263. This right to ask for concessions was general among the carriers? Yes; any carrier who brought himself within the limit.
1264. Did you hear that M'Culloch & Co. were specially favoured? No. They received ordinary concessions on account of their large trade.
1265. Are you sure that you did not hear that Mr. Fehon had favoured Messrs. M'Culloch & Co. before he left the Department, and so had made himself so useful that they rewarded him by taking him into partnership? I am sure I did not hear of it. I think Mr. Jackson was the last man who would ask Mr. Fehon for concessions that would not be granted to any other man, and I should think that any man would be afraid to go to Mr. Fehon's office and ask for anything outside the rules of the Department.
1266. You mean that he would go out of the office quicker than he came in? Yes. I have never received any favour from him.
1267. During the whole time you were in Victoria and about Victoria, what character for integrity and straightforwardness did Mr. Fehon have there? The highest.
1268. Was there ever any imputation thrown by anyone, or did any reports go round in any way against his integrity? No.
1269. I understand you to say that you did not in fact hear of these rumours, which did seem to have gone about among some people, to the effect that he had favoured M'Culloch & Co.? No; I never heard any of the rumours. I doubt whether the people through Riverina heard it.
1270. I understand you were employed by a firm directly competing with Messrs. M'Culloch & Co., at the very time Mr. Fehon left the Railway Department? Yes.
1271. And Mr. Fehon was in direct opposition to you in respect to getting the Hay-Booligal traffic? Yes. I afterwards tried to arrange with him, and Mr. Jackson to take over Payne's business in 1879 by purchase.
1272. Was it sold? No. It came to the knowledge of the bank who took over his plant, and paid his creditors and gave him £1,000.
1273. You might explain how it was that you came to let it be known that you did know something about this

this matter—your motive? Well, I think it was last Saturday. I was staying at the Royal Exhibition Hotel, and the landlord asked me if I would allow a gentleman who had come down from the country to come into my room. I said, "Yes."

1274. Who was the gentleman? Mr. Dickson. Speaking of Narrandera, he asked me if I knew that district. I told him I had had ten years of the camping trade, and we spoke of the different stations.

1275. As far as New South Wales is concerned, did you consign wool from Albury to Sydney as well as Melbourne? Yes; through our manager there; my junction was Echuca, and from there to Melbourne.

1276. Have you had any communication at all with Mr. Fehon before you came here? No.

1277. Does Mr. Fehon know anything about your coming to give evidence? I saw him the day he arrived, but I did not speak to him.

Mr.  
E. C. Leary.  
4 April, 1889.

Charles Bruce Lowe examined:—

1278. *The Commissioner.*] Your name is Charles Bruce Lowe? Yes.

1279. You are at present a stock and station agent? Yes.

1280. Are you acquainted with Mr. Fehon? By sight only. I could not swear that I know him by sight.

1281. Well, this is the matter I summoned you to explain. You know Mr. F. A. Wright? Yes; I have known him for a great number of years.

1282. Some years ago some shares were transferred to your name by Mr. Wright? Yes; so he told me.

1283. Explain the whole meaning and history of that transaction? The history of the transaction is this:—I became a partner in Brown Bros. in 1883, and I had to put so much in the business, and Mr. Wright, who had been a friend of mine for some years, became my guarantor at the bank for an overdraft; and in the course of business—we had our offices in the same building—Mr. Wright said to me one day when I was in his office, "I want you to do me a favour,—will you allow me to transfer these shares into your name." Under ordinary circumstances I might have asked the reason, but as I was under an obligation to him I said, "Oh, if it will oblige you I will do it," and he put the scrip before me, and I never read it and I signed it, and then he turned it over and signed the transfer, and I did so, and never heard anything more about it.

1284. Do you, in fact, know what the object was? I have not the slightest idea.

1285. Do you know the history of these shares? No.

1286. Did you hear of them being retransferred to Mr. Wright? No; the thing passed entirely from my memory until these proceedings arose.

1287. That is all you know? That is all I know.

1288. You know nothing about the working of Wright, Heaton, & Co.? No.

Mr.  
C. B. Lowe.  
4 April, 1889.

John M'Laughlin sworn and examined:—

1289. *The Commissioner.*] What is your name? John M'Laughlin.

1290. You are a solicitor? Yes.

1291. Of course you know Mr. John Want very well? Yes.

1292. Is Mr. Fehon a stranger to you? He is an entire stranger to me; I never spoke to him.

1293. Of course you remember this affair in the House when the Government went out—the occasion when the Parkes Government went out? Yes; and I heard a debate on the subject.

1294. Some time ago, shortly before that, do you remember a conversation taking place in your office at which Mr. Want and Mr. Wright were present? Yes.

1295. Do you know the occasion I allude to? Yes.

1296. Who was present besides you three—anyone else? Nobody else.

1297. Do you remember what day it was? About six or seven days before the motion for the adjournment of the House was moved, which ended in the defeat of the Government.

1298. I want you to tell me the whole of that conversation, as nearly as you can remember? It was a private conversation.

1299. But not privileged? Well, yes; I do not see why I should not tell it. Mr. Wright was in my office on business—he is a client of mine. Mr. Want is a personal friend, and he called at the same time, and knowing what was going on about Mr. Fehon and the speeches he had made in the House. I smiled and said to Mr. Want, "Here is a friend of yours." I added, "If we had Mr. Fehon here, I would fix up all these differences between you." And Mr. Wright said to Mr. Want, "Jack, what have I done to you that you should worry me in this style about that old matter?" Mr. Want replied, "Nothing. If I had known as much before those prosecutions were commenced, as I knew while they were proceeding, I would not have initiated them. If I had seen Mr. Kirkcaldie's minute in time, they would not have been proceeded with. I am very sorry for the unpleasantness, but I cannot allow Mr. Fehon or anyone else to contradict me point blank when I am in the right. If he had defended himself by defending the so-called wool frauds, and justified the transactions. I would not have discussed the matter with him or with you. But on this matter of being in the firm, he has raised an issue which forces me to go on with it." I think I joined in the conversation and stated that the matter was carried on on an absurd principle; that it appeared to be an admission that there were wool frauds when, as a matter of fact, the evidence that Wright, Heaton, & Co. produced, and Lee and Macalister produced showed that averaging wool was allowed and acquiesced in by the Department. I said to Mr. Want, "If you can tell me where the fraud comes in for the carriage of two bales of wool—one weighing 3 cwt. and the other 5 cwt.—if they were paid for as two 4-cwt. bales of wool, I should be glad. In such a case the railway people get paid for every pound of wool carried and every bale. The regulation, if it had not been treated in this way, would have been absurdly unfair to the consignor of the wool; and the railway authorities treated this averaging as an equitable proceeding between the Government and their customers." Mr. Want said that Mr. Fehon did not inferentially in his letters go upon that question, but went on to contradict him about "being a member of the firm"; and he knew he was right, because he was put to the trouble of searching at the Registrar-General's Office. Mr. Want then said that he was very sorry he would have to go on with it, for his own sake, as it was not his habit to annoy

Mr. J.  
M'Laughlin.  
4 April, 1889.

Mr. J.  
M'Laughlin.  
4 April, 1889.

annoy any poor devil; and he added, "When I commenced the matter, I was forced on to say more than I would have said by interruptions from Mr. Garrett and Mr. Abigail. I did not intend to say anything unkind of Mr. Fehon in the debate; but I bore in mind how 'Little Abigail' worried me, when I was Attorney-General, to have these prosecutions gone on with. Mr. Fehon's name was amongst the list that Abigail was ferretting out, and also another firm with which Mr. M'Culloch was concerned; and when I alluded to the matter the interjections of Mr. Garrett and of Mr. Abigail, in stating that I had prostituted my office as Attorney-General in not prosecuting Fehon, forced me to go on, and I was very sorry that my remarks hurt Fehon. But now his letter and yours give me no opportunity of letting the matter drop. If, as Mr. M'Laughlin says, you and he had defended yourselves, or answered the matter by showing that the alleged frauds were not frauds at all, but transactions carried on with the sanction of the authorities, the matter would be entirely different." The conversation, as far as I can remember, then ended so far as this was concerned. Mr. Want had private business with me; he left, and I resumed with Mr. Wright on professional business.

1299½. That is the whole conversation? Yes, as far as I can just now remember. I did not know I was to be examined about this or I would have refreshed my memory.

1300. Has there been any other conversation? I have had conversation with Mr. Want privately on the prosecution of Wright and others.

1301. How many witnesses were subpoenaed to give evidence for the defence? We must have had at least thirty witnesses actually subpoenaed and in attendance.

1302. Only a part of them were called because the judge died? Yes. There were between twenty and thirty witnesses.

1303. Who were the most important witnesses for the defence who were not called? I cannot now give you the names from memory, but have the names in the office.

1304. Do you know whether any of them are now living in Sydney? Most of them were railway servants, and there were in addition a large number of railway porters and other persons who had left the service.

1305. Can you give me their names? I can find out from my briefs. I will see.

1306. Have you a copy of that minute of Kirkcaldie, sanctioned by Mr. Goodchap? I have a copy of it. The original is in the Crown Solicitor's office. It was not issued with Mr. Goodchap's sanction. [*Witness here gave a history of the proceedings in the Supreme Court.*] When the question arose (said witness) as to Stephenson having gone away, I offered in Court that the evidence given before Sir James Martin should be used against the defendant on the second trial. Mr. Pilcher, for the Crown, declined that offer. The Crown waited to get Stephenson, and were made same offer, and instead of accepting the offer, they virtually agreed to what was practically a non-suit, and the defendants were discharged. The Crown was trying to make the excuse for not going on with the case that these witnesses were sent away, and yet they refused to accept my offer.

1307. Do you remember something about a letter during that conversation at your office? Yes. There was something about that.

1308. Mr. Want said he would at any time say that the wool "frauds" were a trick of trade, and that he had not seen this minute of Kirkcaldie's. Do you remember him saying these words? About the letter? No, I do not remember that.

1309. The general purport came to this, that Mr. Want took it that Mr. Fehon had raised such a defence that it forced him to go on with the matter? Yes. He said, "He substantially calls me a liar, and I must go on with it; but I will make it as mild as I can when I speak."

1310. Did he express any opinion then on Mr. Fehon? He said he was a very decent sort of fellow. "I have," he said, "no spite against him. I do not know him, and he is evidently a very decent fellow."

1311. Did he say anything about the effect of his motion on the Government? I do not think he wished to put the Government out, but to punish Abigail for the way in which he worried him when he was Attorney-General. I now remember that Mr. Wright said, "Well, Jack, I am glad to hear you say that I was not guilty of more than a trick of trade. I may stand for a constituency some day, and may perhaps ask you to give me a letter to that effect." Mr. Want answered, "I will do it, old man, with pleasure."

1312. Can you remember saying, "Now mind, Jack, don't forget your promise"? No; I cannot say that I do.

1313. I suppose you did not think this Government would go out then? No. Mr. Want intended to let everything drop in his last speech, but he got no answer from the Government, and feeling himself snubbed, somebody said, "You would carry a vote of censure in the House this evening," I interjected, and said, "Why, this is the strongest motion of censure you can have if you call for a division and carry the adjournment"; and he said he would do it if Sir Henry Parkes would not reply, as he would not be treated with silent contempt.

#### FRIDAY, 5 APRIL, 1889.

Charles Arthur Greatrex sworn and examined:—

Mr. C. A.  
Greatrex.  
5 April, 1889.

1314. *The Commissioner.*] What is your full name? Charles Arthur Greatrex.

1315. You are in the employment of Messrs. Wright, Heaton, & Co. as secretary? I am.

1316. When was it that you went into their employment first? About June, 1884.

1317. Not before June, 1884? No.

1318. Who was secretary before you? Mr. Windsor.

1319. He is dead I believe? No.

1320. He is incapacitated—paralysed—is he not? Yes.

1321. Is he capable of giving evidence? Well, perhaps he is capable of giving evidence, but I should not think it would be reliable.

1321½. For what reason? He seems to me to be suffering from softening of the brain or something of that sort; his conversation is not intelligible altogether.

1322. Had you been in the employment of Wright, Heaton, & Co. before in any capacity? No; not prior to June, 1884.

1323. You then went in as secretary? No; I joined the staff as a clerk.

Mr. C. A.  
Greatrex.

5 April, 1889.

1324. How long did you remain as a clerk in the office before you became secretary? I became acting secretary about two years ago, but I was only permanently appointed secretary about twelve months ago.
1325. It was after the prosecutions for what are known as the "wool frauds" that you were appointed acting secretary? Yes.
1326. Before that what had been your duties in the office? I was about four months at one of the country branches.
1327. Which one? At Byrock.
1328. In what capacity? As accountant; I had charge of the books there.
1329. What four months were those you spent at Byrock? From June up to the end of November, 1884—that was my first four months in the service.
1330. After November, 1884, where did you go? To the head office, Sydney.
1331. Have you remained there continuously ever since? Yes, with the exception of one or two trips into the country.
1332. For a day or two only, or some months? For a week or two only.
1333. For what purpose did you make these trips—on holiday or business? Business; I have been out once or twice auditing.
1334. During the four months you were at Byrock the station was still the terminus of the line? Yes.
1335. Those four months would run nearly to the end of the wool season? Yes; I daresay most of the wool was in by the end of November.
1336. I suppose thousands of bales of wool came into that station? Yes; the business was very large.
1337. Had you, yourself, any knowledge of the practice of the office in making out consignment notes for wool sent down to Sydney by Wright, Heaton & Co? Well, I did, and yet I did not. That is a peculiar question. I never consigned a bale of wool myself, and I never made out a consignment note.
1338. Who made them out? As far as I can recollect during that time we had two or three clerks there who made them out.
1339. What was your duty then with regard to consignment notes? I had nothing whatever to do with them. I had the cash-book, the ledgers, and the day-book to look after, and I had nothing to do with the traffic.
1340. Did you, or did you not, see the consignment notes? Well, I have seen plenty of them lying about the desks.
1341. But did you see them in such a way as that your attention was drawn to the way in which they were made out? No.
1342. Did you see the way-bills that came in with the carriers of the wool from the stations? Yes.
1343. Those, I believe, contained the detailed weights of the bales? Yes, the weight of each bale.
1344. Do you remember how the consignment notes were made out—in what form? On the ordinary Government consignment form.
1345. But how did they state the weights of the bales? Well, I really could not answer the question; I have no recollection whether the weights were stated or not.
1346. Can you remember whether they were detailed showing the weight of each bale, or whether they set them forth as so many under 250 lbs., so many under 400, so many under 500, and so on? I believe they were put down in the general way you describe.
1347. Have you any knowledge of any special practice with regard to the making out of consignment notes in relation to the actual weights of the bales as they appeared on the way-bills? I believe the practice was to average the bales.
1348. Can you define "averaging"—what kind of "averaging" was followed? I know more about it now than I did then.
1349. I want to know what you knew from your experience then? Well, I believe the total weight was divided to see how many bales would go under one weight, or over a certain weight, and that they were broken up in that way. Say twenty bales would be stated as under 2½ or 4 cwt., and the remainder over. I believe that was the practice.
1350. Yes; then could you, if you had to do it, from what you knew then, have made out a consignment note according to the practice of your office, knowing the number of bales and the aggregate weight? I do not know that I could have done it then, but I could now.
1351. Of course the matter was complicated by the fact that there were two standards of averages 250 lbs. and 4 cwt? Yes; as I said before, I never made out a consignment note.
1352. Did you from any conversation in the office, learn the general principle upon which the consignment notes were made out? I have some recollection of having asked some one in the office how wool was consigned, and I believe they explained it to me, and that they averaged the weights of the bales.
1353. Do you remember whether they had to get as many bales as possible under each standard? Yes; I believe they had.
1354. Irrespective of what the actual weights were? No; I am not aware that the actual weights were ever understood, but they certainly tried to bring as many bales under the lower rate as they possibly could, but the actual weights would not be interfered with in a case of that kind.
1355. Did this averaging have any relation to the actual weights of the bales, or did it only relate to the aggregate weight of the whole consignment of a number of bales? I do not quite follow you.
1356. In making out consignment notes, what were the data upon which the clerk would go? The data would be the actual way-bill weight of the wool, and the number of bales.
1357. Yes; but when you say the way-bill weight, do you mean the way-bill as stating the aggregate weight, or the details? We would take the way-bill as stating the weight of the whole consignment.
1358. The actual weight of the individual bales was not taken into consideration, but only the aggregate weight? No; they simply stated so many bales as over or under certain weights.
1359. The ultimate object was, keeping the aggregate weight of a number of bales correct, to bring as many as possible under the different standards? Yes; that was the object as I understand.
1360. That would involve, I suppose, a fair amount of ability and care on the part of the clerk? Yes, it would.
1361. It could not be done by a man right off the reel as soon as he went into the office; at least, it could not be done satisfactorily? No.
1362. Can you say by whose instructions consignment notes were made out in this particular way? No, I could not.

Mr. C. A.  
Greatrex.  
5 April, 1889.

1363. Was it, or was it not, a proceeding kept from the railway officials, or was it a proceeding of which you know the railway officials were aware? As far as I know, the railway officials were aware of it.
1364. Which railway officials do you speak of? I refer to the goods clerk--clerks in charge of the goods station, more especially at Byrock.
1365. Do you think the station-master at Byrock was aware of it? I should think so, because I do not see how he could possibly remain in ignorance of it.
1366. Was there much passenger traffic at Byrock at the time you were there? Yes, there was at that time, Byrock being the terminal station.
1367. Did the station-master concern himself very much with the goods traffic? As a matter of fact, I saw very little of the station-master; he was mostly in our place after business hours.
1368. The goods clerks had most to do with the goods traffic? Yes; the goods station was some distance away from the passenger station.
1369. You say the goods clerks were aware of the practice regarding consignment notes; did the porters seem to be aware of it? As they handled the wool they could not help being aware that some bales were double the weight of others.
1370. Yet these bales would appear as coming under the same standard? So many would be given as of one weight and so many of another.
1371. Of course the individual bales were not in any way marked or re-marked when the consignment note was made out, to show the class under which they came? No.
1372. They were not marked with their weights on the station? All the bales I have seen were marked with the station weights.
1373. Do you mean that the weight was given in lbs.? Yes.
1374. Are you sure of that? Yes; so far as it applies to all the wool that has come particularly under my notice. Of course I do not refer to any general lot of wool that comes into the station. I have shipped several consignments of wool home to England, and I have always had a specification from the station giving the weights of the bales, and these were marked on the bales.
1375. Do you know where the weights were marked on the bales? Generally on the side I believe.
1376. Yes, but were they put on at the producing station? Yes; that is where they would be put on. As to this point of the marking of the weights on the bales, I would not be very positive, but to the best of my knowledge and belief the weights were on the bales. Perhaps the fact of having specifications before me stating the weights of the bales and the circumstance that all bales of merchandise coming into this port have the weights marked on them, may have confused me a little on the point.
1377. You have told us what you recollect of the way in which wool was consigned to Sydney from Byrock. Now using your recollection as well as you possibly can, can you say there was no underhand understating by way of averaging the weights of the bales? None whatever.
1378. Are you positive of that? Positive. Our office at Byrock was open to the railway officials; and as a matter of fact during the whole four months I was there, two of the Government goods clerks and very often two or three of the porters were in the place several times a day.
1379. But that would not give them any opportunity of comparing the way-bills with the consignment notes? Well, the books were always on the table lying open, and they could have examined them. I should not have offered any objection.
1380. The books would not show the weights given in the way-bills? No; but the way-bills were on the file.
1381. As soon as the wool was sent on, the way-bills were forwarded to Sydney? Yes; they were sent down the same night pinned to our invoices.
1382. Was the receipted part of the consignment note also sent on? Yes; that was also forwarded to Sydney.
1383. You left Byrock and came to Sydney? Yes.
1384. And went into the office as clerk? Yes.
1385. When you were in the office in Sydney as clerk, did you then have an opportunity of seeing the way-bills and the invoices, and parts of the consignment notes? Yes; I have seen the papers on their arrival, but it was no part of my duty to deal with them at any time. I merely saw them as anyone else would see them, lying in bundles.
1386. What was done with them? Well; we use despatch bags in which these papers are sent from the various stations. These bags were unlocked in the office by the boy and passed inside to the Managing Director's room. There the bags were opened and the papers taken out by Mr. Heaton, who was manager in Sydney at the time I came here. The papers were divided, invoices being laid on one side, general correspondence and shipping papers on another, and so on, and then the whole were passed out and distributed to the individuals who had to do the work to which they referred.
1387. During the whole time you were there Mr. Heaton was the office manager? Yes; up to the time he went to Queensland. Mr. Wright took up the work then.
1388. When did Mr. Heaton go to Queensland; before or after the wool fraud prosecutions? After the wool fraud prosecutions.
1389. Up to that time he was manager in the Sydney office? Yes; I believe so.
1390. Can you say whether Mr. Heaton, from what you observed, did in fact examine and compare the way-bills and consignment notes in any case? No; I am not aware that he ever did. As a matter of fact these way-bills, with the consignment notes attached, came down folded up, and they were merely passed out in that condition from Mr. Heaton's room. Mr. Heaton would pass them out as he received them without opening them up at all.
1391. Do you remember any particular case in which he called attention to any peculiar ways in which the local managers had made out consignment notes? No; I have no recollection of anything of the sort.
1392. Do you remember his speaking of anyone as having failed to do his duty with regard to these notes? No; I never heard anything of that sort.
1393. You are aware, I suppose, that the principal profits of the firm were made out of the difference between what the squatter would pay to Wright, Heaton, & Co., to have his wool brought down, and what it would cost them to bring the wool down. Of course, that was the profit? Yes; I am not aware that there was any other profit. Of course there was carriage on other goods, and I should not think wool furnished more than half of the profits of the firm.

1394.

Mr. C. A.  
Greatrex.  
5 April, 1889.

1394. It was very important to the firm to reduce the amount they had to pay the Railway Department for the carriage, and the less they had to pay the railway the more profit would be made, of course? Yes.
1395. That being so, was it not Mr. Heaton's practice to go into the question of whether the local managers had done their duty to the firm in not overpaying the Railway Department by the way in which they had made out their consignment-notes? Well, he may possibly have done so, but I am not aware of the fact.
1396. Was it never brought under your notice that that was made a question? No.
1397. Are you quite sure? Positive.
1398. When was it that you said you were appointed acting secretary? I was appointed after Mr. Windsor was attacked with paralysis, and the first Board meeting at which I was present as acting secretary was held on August 31st, 1887.
1399. That was long after the wool fraud prosecutions? Yes.
1400. Can you say whether the same kind of business was dealt with at directors meetings during your time, as was brought before them previously; whether there had been any alteration? I believe the business dealt with by the directors at meetings attended by me was similar to what they had dealt with previously.
1401. What sort of business was brought before the meetings of directors? You have the business stated in the minute-book.
1402. I have looked at that, but of course it does not show necessarily everything that is done. I understand it is usual to bring before the meetings of directors a statement of the way in which the business is going on? Well, the managing director usually makes a verbal statement.
1403. Does he produce a statement on paper and a balance-sheet? He furnishes a rough statement of the profit and loss for the month; shows how the banking account stands, and brings under notice any matter in the shape of correspondence that may require consideration by the Board, or in which he does not care about acting on his own judgment. On the whole, the business of the directors' meeting is merely formal.
1404. What details of the management does that statement, of which you have spoken, involve? Well, it shows the income and expenditure.
1405. Does it show the number of wool contracts? During the wool season it is usual to mention that so many wool contracts have been completed, so many are in course of completion, and that so many have gone out for signature. It may also be mentioned that certain offers have been made but have not been accepted.
1406. Nothing in the way of details would be given? Mr. Wright or Mr. Heaton might report that ninety or 100 or 110 wool contracts had been completed.
1407. Would the amount of the contracts be given? No; I have never known the amount of a specific contract to be given.
1408. I suppose that in the course of conversation it would be customary to mention what profits were expected to be made with regard to particular contracts in particular parts of the country? No; I am not aware even of that having been done.
1409. Is it customary for the secretary to take down very full notes or enter very fully in the minute-book everything that is done at the meeting, or are these entries in the minute-book merely general statements? Merely general.
1410. There is a great deal of conversation at these directors' meetings which does not appear on the books? Oh, yes.
1411. How long do the meetings usually last? I should think not more than half an hour.
1412. Being present at these meetings, have you noticed whether or not it is usual for conversation to turn upon the details of contracts? No, never.
1413. What does the conversation usually turn upon? There is usually a great deal of talk about matters that have nothing to do with business at all.
1414. There was a great deal of talk about these wool prosecutions? Yes.
1415. Were you present at any meetings in any capacity at that time, or before? No; I was never present at any Board meeting until I was acting secretary.
1416. So that you cannot say what was talked about then? No.
1417. At the time the prosecutions were going on there was considerable talk about the bases of the prosecutions in the office. I suppose averaging was spoken of? Yes.
1418. Where did you first hear averaging spoken of at all—I mean the word "averaging" as applied to these wool consignments? I think it was at Byrock.
1419. You had heard it then, and heard of it also afterwards? Yes.
1420. Did not you hear "averaging" spoken of in this way, that it was all fair and square with regard to 4 cwt. bales, but that it was not fair and right with regard to the 250 lb. bales, that it could not fairly apply where bales were under or over 250 lb.? As I understood it at Byrock, it was the usual custom to which no exception was taken.
1421. Did you understand, then, that it was fairly applicable, by a little stretch of conscience, to the bales that ran near 250 lb. to bring them under 250 lb.? No; I understood that it was the proper thing to do, and really never gave it a second thought.
1422. You mean with regard to 250 lb. as well as 4 cwt. bales? Yes. All those who were at Byrock had been in the office for some considerable time, and I understood that they knew what they were doing and were doing what was right.
1423. You did not hear averaging spoken of as a "smart," but not perfectly legitimate proceeding so far as it applied to bales over 250 lb.? I never heard it spoken of in that way at all.
1424. Did you not hear after the prosecution came on that while it was admitted that averaging might be all very well with relation to 4 cwt. bales, it was contended that it was not legitimate to bring bales that really weighed over 250 lb. under the 250 lb. standard? Yes! it was after the prosecutions were instituted that I really began to understand what the thing meant at all.
1425. You had only a crude personal knowledge previously? Yes.
1426. What did you understand by "averaging" afterwards when it was brought under your notice? I understand that the full meaning of "averaging" was to endeavour to get the maximum number of bales under 250 lb. and the minimum number over, in any one consignment.

Mr. C. A.  
Greatrex.  
5 April, 1839.

1427. Then, of course, if the bales were a heavy lot to bring as many as possible under the 4 cwt. ? Yes.
1428. That would be by increasing the weights of some few bales so as to diminish the apparent weight of a number of others ? Yes ; not interfering with the correct total.
1429. There being no *pro rata* increases between the standards ? No.
1430. At the time when the prosecutions were on, was it not a matter of common conversation in the office, that Wright, Heaton, & Co. had been rather smart with the Government ? That was the construction that was put upon it.
1431. That was the conclusion come to by the officers themselves ? Well, it was looked upon in this way that the Government ought to have known that this practice of averaging was being followed and that there was no excuse for their not knowing as the thing was so palpable.
1432. You mean that no porters having ordinary experience could possibly help finding out that the bales were in excess of the consignment-notes ? They could not help knowing it except in the case of stupid men who never thought anything about it.
1433. In the thick of the wool season there was a great rush of wool at the terminal station ? Yes.
1434. So much so that it was almost impossible for a man to consider what sort of bale he was handling or how it came into the consignment-note ? Yes.
1435. The principal consideration was to get the wool out of the way ? Undoubtedly.
1436. I suppose the porters had as much as they could do to perform the manual work ? Yes.
1437. So that a smart clerk could work a swindle if he liked without being detected by the porters ? Well, I believe that in some instances they used to check the weights at Darling Harbour.
1438. They would be pretty well rushed there too in the thick of the wool season, because they would have the wool coming in from everywhere ? Yes.
1439. You say you first heard the question as to the fairness of this averaging discussed at the time of the wool fraud prosecutions ? Yes.
1440. Are you quite sure you never heard of it before ? Certain.
1441. Was it never talked about in the office before that ? Not prior to the wool fraud prosecution being started.
1442. Are you quite sure of that ? Yes ; as far as I heard.
1443. Was not a general kind of under-statement of the weights of wool bales spoken of in the office at any time ? No ; not at any time.
1444. Was it not possible to find out from the books themselves, on examination whether goods had been understated or not ? No ; I do not think the books would show any under-statement if there were any.
1445. What books do you keep ? Do you mean in the whole office or only in the inwards department.
1446. In the inwards department ? In that department we have three "Inwards Railway Books" for the North, South, and Western lines, all in the same form, and an outstanding book containing a record of all accounts rendered from the railway books.
1447. Are there any other books ? No ; not in connection with that department, except that there are ledgers kept in each department.
1448. Down to what details do entries in the ledgers go ? It is very rarely that any charges for wool are passed to the ledger at all. The outstanding book referred to before really takes the place of the ledger.
1449. What is the size of the outstanding book ? It is fairly large one.
1450. I should like to see one of the inwards railway-books and the outstanding-book ? I will bring them from the office. [*The books were produced and examined by the Commissioner, with the assistance of the witness, whose examination was continued.*]
1451. We have here the inwards railway-book for the Western line. What is the meaning of the reference number in the first column ? It is a consecutive number only.
1452. Are they entered in another book ? Yes ; in the inwards outstanding-book.
1453. That book shows the outstanding accounts ? It shows that an account of the charges entered in this book has been made out and rendered, and whether it has been paid.
1454. This railway-book shows the name of the consigner, usually the squatter in the case of wool ? Yes.
1455. Then the name of the carrier ; is that the carrier from the producing station down to the railway ? Yes.
1456. Of course Wright, Heaton, & Co. have generally contracted with the squatter for conveying his wool right from the station to Sydney, and the carrier is simply a sub-contractor ? Yes.
1457. The marks given in the next column are the brands on the bales ? Yes.
1458. Then come the description of the goods and their weight ; what weight is this given ? I could not positively say whether they are the way-bill weights, but I presume they are.
1459. The "rate" mentioned in the next column is the contract rate ? Yes.
1460. That would be the way-bill weight that is given then ? Yes.
1461. I see after mentioning the stations from which the goods are sent, and to which they are consigned there is a column devoted to railway charges ? Yes ; the railway charge is not shown, the amounts given are merely the sums collected on account of the railway charge.
1462. The railway charge does not appear in your book, in the case of contract wool ? No. Except perhaps in some cases further on in the book.
1463. What is the meaning of the amounts "paid on" ? That simply shows how much the branches debit Sydney with, the Branch books showing the profits in each case. This book does not show the profits made on any individual clip. This book only shows the aggregate weight of a consignment.
1464. This book throws no light on the question how the railway charge is arrived at ? No, that could only be got at by examining the consignment-notes, and comparing them with the way-bills or approximately, by comparing the way-bill with the weight in the book, this weight being that given by the squatter in his own way-bill.
1465. The way-bills go to the consignees ? Yes.
1466. Now turning to the outstanding book ; this shows the amount that you have collected from the consignees on account of goods that have been carried ? Yes. The first column shows the reference number which appears in the railway-book. The second column shows the name of the consignee ; the third column the amount to be collected, as extended from the railway-book.
1467. "Collecting book folio," what does that refer to ? That is the collector's book.
1468. Then there is the "date of payment." So this book shows the actual collections, and not the amounts to

to be collected? Yes, it does; the entry of the date of payment is only made when the amount has been collected. The allowance column is filled with amounts allowed in reduction of over-payments. Then there are the total and folio columns.

Mr. C. A.  
Greatrex.

5 April, 1889.

1469. These books show nothing that could lead to any conclusion as to how charges are calculated with reference to weights? No.

1470. Has it been customary to produce these books at the meetings of directors? No, never.

1471. Are you quite sure? Positive.

1472. Mr. Heaton used to examine these books occasionally I suppose? He may have looked over them, but he never to my knowledge calculated weight or anything of that sort, or made any audit.

1473. Was there always an auditor or two auditors permanently appointed, or appointed for distinct occasions? There was one permanent auditor appointed, but he never audited the traffic books. He audited the general business books of the Company, these being really subsidiary books. He confined his attention to the cash-books, the ledgers, and the balance sheet.

1474. None of those contain any weights? No, those books only contain totals.

1475. You know nothing, I suppose, about a correspondence which took place between the two firms—M'Culloch & Co. and Wright, Heaton, & Co.; I mean the old correspondence? No. That was before your time? Yes.

1476. Were you secretary when a certain transfer of shares was made; do you remember a lot of Mr. Wright's shares being transferred to different persons—Mr. Fehon being one of the transferees? The only transaction I remember was one in which Mr. Fehon was the transferor and Mr. Wright the transferee.

1477. Yes; that was recently, comparatively? Yes.

1478. There were 650 of Mr. Fehon's shares transferred to Mr. Wright's name? Yes.

1479. Were the transfers produced at the meeting of directors? Yes.

1480. Do you remember how these transfers had been executed; in what form? On the back of the scrip.

1481. In what form;—were they transfers to any particular person or transfers in blank to be afterwards filled in, and afterwards filled in in Mr. Wright's name? I could not answer without looking at the scrip.

1482. What becomes of the scrip? I have the whole of it.

1483. At the same time some shares were transferred from Mr. Lowe? Yes.

1484. Were all these transfers made under different or under similar conditions? I think they were all under similar conditions.

1485. You do not remember when the original transfers to Mr. Fehon and Mr. Lowe as transferees were made? No.

1486. You could not tell for what purpose they had been made without reference to the book? No.

1487. Had you yourself any knowledge of Mr. Fehon? No; I am not aware of having seen Mr. Fehon until after his appointment as Commissioner.

1488. You had heard of him? Yes.

1489. In what relation? I knew he was an ex-director of the Company from hearsay.

1490. It was before your time that he was deputed to go to Queensland—or that he went to Queensland with some commission on behalf of the Company? I do not know anything about that.

1491. You might bring that old scrip to me on Monday; that is, the 650 shares retransferred to Mr. Wright, and the other shares that were transferred at the same time? Yes; I will.

Francis Abigail, Esq., M.L.A., sworn and examined:—

1492. Your name? Francis Abigail.

1493. You are a Member of Parliament, and were in the House at the time of what are known as the wool fraud prosecutions? Yes.

1494. You were not a Minister then? No.

F. Abigail,  
Esq., M.L.A.

5 April, 1889.

1495. I understand you took a great deal of interest in the matter;—you thought a very serious public wrong had been committed, and considered it your duty to find out all you could about it? Yes; it gave me a great deal of thought and anxiety for fourteen months.

1496. When was it that you first went into the matter? In 1885.

1497. As early as that? Yes; it was in my hands months before it came before Parliament in any shape or form.

1498. Months before it became publicly known? Yes. I was perfect in the information or evidence as far as I possibly could be.

1499. My principal object is to find out whether there was anything in the course of the evidence which connected Mr. Fehon with what are called the wool frauds? No. Mr. Fehon's name never came under my notice in any shape or form until Mr. Want brought it before the Parliament on 11th December.

1500. That was long afterwards? Yes.

1501. I understand that it was your object—and you did all you could to further that object—to find out everything possible about this matter before the prosecutions were instituted? Yes.

1502. And after the prosecutions were instituted, too? Yes. I supplied the Crown Law Office with a good deal of information through Mr. J. H. Want.

1503. In carrying out your object I suppose you had two ends in view, one being to find out how the frauds had been committed, and the other to find out who were the persons concerned? No; I did not consider it any part of my duty to find out the persons implicated, but simply to show that a public wrong had been done. Information was supplied to me as a Member of Parliament, and I was urged that my public duties demanded that I should take what steps I thought necessary to protect the public interest in exposing a public robbery, and I obtained all the information I possibly could to assist me in proving that a wrong had been done, leaving it to the Crown Law Officers to find out who had done it. In prosecuting my inquiries the names of certain firms came under my notice.

1504. And they involved the names of individuals? Yes; some of them. For instance, Wright, Heaton, & Co., and Lee and M'Allister. I think those were the only names that came under my notice specifically.

1505. And in dealing with the question as against Wright, Heaton, & Co., I understand you to say that the name of Mr. Fehon never came up at all? No; never came under my notice in any shape or form, neither directly nor indirectly.

1506.

F. Abigail,  
Esq., M.L.A.  
5 April, 1889.

1506. And the very first you heard of his name was when the matter was brought up in the House? Well, I do not know whether I am expected to state what occurred in the Cabinet, but Mr. Fehon's name first came under my notice when it was submitted to Cabinet by Sir Henry Parkes as that of one of the applicants for the position of Railway Commissioner. At that time some rumours were mentioned as to Mr. Fehon's connection with M'Culloch and Co. That was the first time I ever heard his name associated in any way with the wool frauds. What was said on that occasion led to Sir Henry Parkes applying to some distinguished people in Victoria, and they supplied evidence satisfactory to him that Mr. Fehon was not connected with these frauds.
1507. Was Mr. Fehon at that time personally known to any Member of the Cabinet? Yes, he was personally known to Mr. Clarke; to me he was a perfect stranger, and I had never met him in my life.
1508. Was he known only to Mr. Clarke? Yes, I believe so. Mr. Clarke, I believe, recommended him to Sir Henry Parkes. I was personally opposed to the appointment.
1509. Upon what ground? Upon the ground that I did not think it was necessary to go out of the Colony to secure a man for that position.
1510. Not on the ground of anything against Mr. Fehon; not on the ground of any suspicion against him? Oh no.
1511. Since Mr. Fehon's name has been brought prominently before the public, have you taken any steps to find out whether there was anything in these charges? No, I have not felt called upon to do that. I wish to say here, that I have read Mr. J. H. Want's remarks on this question in Parliament, delivered on 11th January last, in which he said that Mr. Fehon was connected with M'Culloch & Co.; that M'Culloch & Co. were connected with the wool frauds; that I knew all that, and that in my letters to the Crown Law Officers in my own handwriting I had mentioned Mr. Fehon's name. I am in a position to say that there is not a word of truth in that statement; that I did not know Mr. Fehon in any relation of that kind, and did not mention his name in any of the letters written to the Crown Law Officers. The letters are in the Crown Law Offices, and you can obtain them.
1512. Of course, but it is not my function to find out whether the Government were right or wrong? I am very positive in my statement that until Mr. Fehon's name was mentioned in the Cabinet I never heard it before in my life, and I know nothing whatever to justify anybody in saying Mr. Fehon was connected with those transactions. Nothing ever came under my notice during the fourteen months spent in investigation to connect him with the wool frauds.
1513. During those fourteen months you saw a great many people? I had communications from every part of the Colony; every post brought me letters in large numbers and documents bearing the names of the parties who had been participators in the frauds, and there was nothing whatever in any of these bearing directly or indirectly on Mr. Fehon.
1514. And finally, when the trial took place before Sir James Martin, did you go out of your way to notice whether the Crown case was supported by the best practicable evidence that could be produced, or did you think that witnesses who might fairly have been called were not summoned? I think Mr. Want allowed two of the chief witnesses to escape with his knowledge.
1515. Was Stephenson the name of one of them? Yes, I think it was. I know I told Mr. Want a fortnight before their disappearance that they had been offered £1,000 and a free passage each to any part of the world, if they would go. I informed Mr. Want of it at the time and I think that the non-production of witnesses led to the defeat of the prosecution.
1516. You do not remember the name of the other witness who escaped? No.
1517. Was it Lambert? I could not tell. However, they wrote to the late Parkes Government from San Francisco offering to come back and give evidence for a certain sum of money and this proves that my information was correct.
1518. Have you any objection to state from whom you got the information that this offer was made? Well, I should object to give that because it would implicate people who are holding positions now which might be affected.
1519. I will not press you as that would be going too far I think. You have nothing more to tell me I suppose? No, not at present, but if I think of anything I will communicate with you.

Francis Lord, junior, sworn and examined:—

- Mr. F. Lord, junior.  
5 April, 1889.
1520. What is your name? Francis Lord, junior.
1521. You are a grazier living near Warren? Yes.
1522. What is the name of your station? Raby.
1523. You know Mr. J. H. Want? Yes.
1524. And Mr. Patrick Joseph MacMahon? Yes.
1525. You were present on a certain occasion, not long ago, when Mr. Want and Mr. Lyne came together to Mr. MacMahon's office? Yes.
1526. Were you present while a conversation was going on in the office? Yes.
- 1526½. Did you listen sufficiently to enable you to give an account of it? No, I did not. I was writing at a table away from where Mr. Lyne and Mr. Want were speaking to Mr. MacMahon.
1527. I think he asked you to stay in the room? He motioned to me to go on with my writing, but I did not hear anything of the conversation that occurred between them.
1528. Have you any recollection at all about it? I knew what it was about and I could give some idea as to what brought Mr. Want and Mr. Lyne to Mr. MacMahon's office. I know the remarks which led to their visit as I was with Mr. MacMahon when he made some remarks to Mr. Tom. Want at a Café.
1529. That let you in to the secret as to what this conversation was about? Well, I was in the office when Mr. Want and Mr. Lyne called Mr. MacMahon, he being out at the time. They told me they had called to see him owing to something they had heard from Mr. Tom. Want, and they waited until Mr. MacMahon came in. The conversation was not carried on in a loud tone of voice.
1530. Did you in point of fact hear it? No, I am quite sure I did not. If I had heard anything I would readily give you the information you seek. I did not think I was justified, under the circumstances, in taking any notice of what transpired.
1531. Did you hear anything at all of the conversation? No, nothing.
1532. Did you hear anything of any conversation that occurred afterwards between any of the three gentlemen? No. Of course I know the remark Mr. MacMahon made which led to Mr. Want and Mr. Lyne coming there; that is all I do know. The remark was made by Mr. MacMahon to Mr. Tom. Want.
1533. What was the remark? Mr. MacMahon said he looked upon Mr. Fehon as his boss, and that if

Mr.

- Mr. Fehon came to his office he would give up his chair to him; that was when he went to Townsville, in Wright, Heaton, & Co.'s employment. Mr. F. Lord,  
jun.  
5 April, 1889.
1534. How did the subject come up? We were all standing in the bar together when the question of Mr. Fehon came up, and Mr. MacMahon made that remark.
1535. And as far as you know, it was in consequence of this remark that Mr. Want and Mr. Lyne called on Mr. MacMahon? Yes; I thought it was very injudicious on his part to make remarks of that kind in a public place, and I told him so afterwards.
1536. How long after that was it that Mr. Want and Mr. Lyne called? Next day. They stated to me that that was their business with Mr. MacMahon. They told me Mr. MacMahon could give information that Mr. Fehon was in a certain position in Wright, Heaton, & Co. when he (MacMahon) was employed to go to some place they mentioned.
1537. Was it Townsville? No; they mentioned some other place, and I told them they were in error, and that the place was Townsville. I told them I had known Mr. MacMahon intimately for a good many years, and knew that he went to Townsville in the employment of Wright, Heaton, & Co. As to the conversation which afterwards took place, I did not think I was justified in listening to what was no business of mine, and what I did not wish to hear. I was rather put out about the whole thing, because I thought it beneath the dignity of Members of Parliament to set inquiries afoot on the strength of a chance statement, such as that made by Mr. MacMahon. If I had heard anything I would tell you.
1538. I have no doubt about that. Mr. Fehon is a stranger to you? A perfect stranger; I never saw him but once, and that was at the Grosvenor Hotel, when his name was prominently before the public, and my attention was directed to him as he passed.
1539. How long have you been engaged in squatting—in wool producing, in New South Wales? About twenty years.
1540. How have you been in the habit of getting wool carried from Warren, or other places? I was living for thirteen years at Goonoo, 20 miles from Wellington.
1541. How did you get your wool carried during that time? Well, in latter days Wright, Heaton & Co. used to enter into a contract to carry it at so much per ton.
1542. You did not bother yourself with the question of railway charges? Oh, no. They used to agree with me to deliver the wool from my station to my agent in Sydney at so much per ton.
1543. Have you had any experience of sending wool to the railway-station and consigning it down by rail yourself? No, I have not had any experience of that; for even when I was managing Burrawang, my father's station, we used to follow the same practice as I have mentioned.
1544. So you do not know anything about the practices connected with the carriage of wool? No; I do not know anything personally. I have read in the papers about it, but nothing beyond that.
1545. You know nothing of the practice of averaging? No.
1546. What is the ordinary practice with regard to the marking of wool bales on the station; what marks are made on the bales? Well, some people go to the trouble of printing descriptions of the wools contained in every bale; and they put on the name of the run, or it may be only a letter, as an identifying brand; then they may put "first ewes," "hoggets," and so on.
1547. Is it usual to put the weights on the bales? Not to print it. Perhaps when a bale is taken off the scale a "raddle" mark may be put on it as a check, to be copied into the book afterwards.
1548. But if the man was there to enter the weights at once, it was not usual to "raddle"? No.
1549. If the "raddle" marks were put on a bale, and the bale was afterwards carried some distance, would the marks be likely to last or be rubbed off? I should think they would rub off.
1550. Then, as far as you can say, the "raddle" mark would be practically of no use in showing on the face of the bales what their weights were? No; it was not usual to paint the weights on the bales.
1551. It is done, I believe, when the bales are shipped from Sydney? I do not know anything about that. I have never seen the weight in any shape put on in ink.
1552. The ordinary brands are made with stencil plates? Yes.

MONDAY, 8 APRIL, 1889.

Charles Arthur Greatrex was further examined:—

Mr. W. M. H. Fehon was present.

- The witness: I put in some scrip for 650 shares in the name of Mr. Fehon, with a transfer to Mr. Wright on the back. Mr. C. A.  
Greatrex.  
5 April, 1889.
1553. *The Commissioner.*] I see there are further transfers; there are 508 shares in the name of Tilmouth F. Dye. They are also endorsed as transferred to Mr. Wright, on June 27, 1888. Then there are shares transferred to John Jackson in the same way, and to Geo. R. Bonamy 350. Do you know anything about the circumstances of these transfers? I know that they took place in the usual way.
1554. You were secretary at the time? Yes.
1555. Do you know the history of the scrip previous to these transactions? I do not.
1556. In whose possession was this scrip at the time these transfers were made? In Mr. Wright's prior to the transfer being made.
1557. In whose writing was the transfer? In the hand writing of Mr. McDonald our present accountant.
1558. That is the body of the transfer? Yes.
1559. Did you see him write on the body of this transfer? I cannot say that I did.
1560. You know nothing about any transfer of shares preceding this to Mr. Fehon and to these holders? I do not.
1561. Is all the old scrip kept in the office after being returned? Since I have been secretary it has. I would not like to say what was done before then.
1562. Have you searched for any former scrip in the name of Mr. Wright transferred to Mr. Fehon and others? No.
1563. How long has Mr. McDonald been accountant? Since 1886.
1564. What is his full name? James S. McDonald.
1565. The practice is to cancel the scrip after endorsement of transfer and issue fresh scrip? Yes.
1566. And then the old scrip is left in the office and put away? Yes. 1567.

Mr. C. A. Greatrex.  
8 April, 1889.

1567. *Mr. Fehon.*] That scrip was all re-transferred to Mr. Wright in one day? Yes. Perhaps you will permit me to state what I believe to be the history in this particular instance. On looking at the back of this scrip in Mr. Fehon's name, as I understand it, the scrip was signed by Mr. Fehon in blank, and this is borne out by the fact that it is witnessed by W. W. Banbury, who left the employment of the Company in the year 1886. That, to my mind, is conclusive evidence that this scrip must have been signed in blank before the transfer took place.
1568. *The Commissioner.*] What became of Banbury when he left? For some time he was in Sydney out of employment, and he subsequently went to Brisbane.
1569. What was he? He was accountant.
1570. *Mr. Fehon.*] Did you send these people notices of meetings and balance-sheets? I am not aware of having sent you one—I would not be positive about Mr. Jackson.
1571. *The Commissioner.*] What would be your reason for not sending notices to these shareholders? Well, we understood that Mr. Wright held the scrip. Although the transfer had taken place, we knew Mr. Wright had some scrip that was not transferred—because on two or three occasions he had talked about transferring this scrip, but he never gave the scrip out for that purpose until we made this general transfer. You will find in the minute book that no scrip had been transferred for a considerable time.
1572. *Mr. Fehon.*] As a matter of fact, you did not treat me as a shareholder? No.
1573. *The Commissioner.*] You never understood that Mr. Fehon was practically a shareholder at all? No. I was aware that he had been a shareholder. If it is any information to you I may say that during the time I have been in the Company's service, since November, 1884, I am not aware of ever having seen any director, except the two managing directors, look at the Company's books.
1574. Those two managing directors being? Mr. Wright and Mr. Heaton. I have never seen Mr. Jackson or Mr. M'Culloch, or indeed, any other director on the floor of the office; they have always been in the managing director's room.
1575. As to conversation taking place between the directors, other than the managing directors and the managing director, have you any knowledge? None whatever.
1576. What do you mean by none whatever? I mean I know of none except that at which I have been present at Board meetings.
1577. Can you say whether or not details of business have been gone into at the directors' meetings? No; never on any occasion.
1578. What appeared to be the relations between Mr. Heaton and the directors who represented M'Culloch & Co.; did they appear to work amicably together or did there appear to be any jealousy? No; their relations so far as I am aware have always been cordial.
1579. And yet you say the details of business were not gone into? Yes.
1580. Are you quite sure of that? Certain.
1581. Is Mr. M'Donald down at the office now? Yes.
1582. Will you go down and ask him to come up? Yes.

John Shield McDonald examined:—

Mr. J. S. McDonald.  
8 April, 1889.

1583. *The Commissioner.*] Your name is John Shield McDonald? Yes.
1584. You are now accountant at Wright, Heaton, & Co's? Yes.
1585. When did you first go into the firm? In July, 1886.
1586. As accountant? No; I did not assume that position until about two months afterwards.
1587. And you have been accountant ever since? Yes.
1588. This is some scrip from the office originally issued in the name of Mr. Fehon, but transferred on the back to Mr. Wright;—now that is in your handwriting, what do you know about it? The scrip was in blank at first.
1589. When did you first see this scrip? Not until Mr. Wright gave it to be transferred on 27th June last.
1590. Did there appear anything under the signature of the transferrer? It was just as you see the signature there, the transferrer and the witness.
1591. Was Mr. Wright's name on it then as transferee? I cannot say; I wrote the body of the scrip.
1592. Does this apply to the three other persons concerned? Yes.
1593. Is this one in Mr. Low's name under similar circumstances? Yes.
1594. Do I understand you to say that the very first you knew about that scrip was when it was produced by Mr. Wright for you to fill up the body on the back? Yes.
1595. I see it is filled up "in consideration" of "natural affection;" you first wrote "value received," and then substituted "natural affection;" I suppose it was Mr. Wright's instructions? I wrote them out in the usual way, and put "value received," and altered it afterwards.
1596. What has become of those shares since—the shares represented by this scrip? They were transferred to Mr. Wright.
1597. Are they in his name now? I do not know. There have been some changes in the shares. Whether the numbers attached to those scrips have been changed or not I do not know, without looking at the share register, which contains a history of the transfer of shares.
1598. You have been in the office since 1886? Yes.
1599. Do your duties compel your attendance at meetings of the directors? No.
1600. I suppose your duties are simply in relation to books? Yes, as general accountant.
1601. Do you yourself know anything about the working of the firm, that is the business part? No; the traffic is out of my department.
1602. Will you bring up your share register at 2:30 this afternoon? Yes, sir.
- [At 2:30 p.m. the witness reappeared and produced the share register of the Company, and explained to the Commissioner the method of keeping it.]
1603. *The Commissioner* (alluding to the share register). This shows all dealings with shares in which Mr. Fehon took part? Yes.
1604. And that shows where the 650 shares were retransferred to Mr. Wright, in whose name they appeared now? Yes.
1605. Examining the register, you find there were no transactions in shares by Mr. Fehon, except the

- 500 and 800 he held, and were transferred bodily to Mr. Jackson in the first place, and then afterwards the 650 transferred to him by Mr. Wright were transferred bodily to Mr. Wright? Yes.
1606. There are no dealings going on in shares now? No.
- 1606½. Whose handwriting is the latter part of this book in? In that of my predecessor—Mr. Bandbury.
1607. There is nothing you know about this matter that it strikes you to tell me? No; only that the calls on these shares were paid by Mr. Wright.

Mr. J. S.  
McDonald.

8 April, 1889.

TUESDAY, 9 APRIL, 1889.

David Kirkcaldie sworn and examined:—

1608. *The Commissioner.*] What is your name? David Kirkcaldie.
1609. What is your employment now? Chief Traffic Manager of New South Wales.
1610. What was your occupation in 1886? Assistant Traffic Manager.
1611. You remember the prosecutions against Wright, Heaton, & Co., and other firms, in connection with the wool frauds? Oh, yes.
1612. At that time you were Assistant Traffic Manager? Yes.
1613. For how long before that had you been Assistant Traffic Manager? About three years.
1614. And before that? I held the position of what was called Office Superintendent. That was prior to 1883. In 1883 I was appointed Assistant Traffic Manager.
1615. You had had experience in traffic of all kinds of goods? Yes.
1616. When did you first go into the service? At the end of December, 1876. I had had fourteen years' experience on the home railways.
1617. In what capacity did you first enter here? Simply as clerk.
1618. What was the first promotion that you got? Well, I was a clerk for about eighteen or twenty months; then I was appointed chief clerk to the Goods Superintendent; then I was in that position until the beginning of 1880, when I was appointed chief clerk to the Traffic Manager, and then about a year after that I was appointed Office Superintendent; and then I was, as I say, in 1883 appointed Assistant Traffic Manager.
1619. In 1886, at any rate, you knew all about the system of carriage of wool? Yes.
1620. Had you heard, at that time mentioned, the system of averaging? Yes.
1621. I believe there was a system that went by the name of averaging? Yes, with regard to bales of a certain weight, bales of 4 cwt. and upwards, but not with regard to any others. For instance, if there were twenty bales weighing 3 tons 18 cwt. they were all charged as 4-cwt. bales, but if there were twenty bales weighing 4 tons 2 cwt. we would charge twenty-one bales. At one time, I may explain, that for all bales not exceeding 4 cwt. we charged a specific rate; for all bales weighing upwards of 4 cwt. we charged 15 per cent. above that rate, so that if it weighed a quarter more than 4 cwt. it was 15 per cent. more. Well, there was an outcry from squatters and forwarding agents that that was not fair, and it was agreed about 1879 that instead of charging them in that way we should charge them for every 4 cwt., or portion of 4 cwt.—we should charge for one bale. We divided the gross weight by 4 cwt., and if there was anything over we called that an extra bale, unless it exceeded 4 cwt., and then we would charge for two extra bales.
1622. That charge would come to less than if the 15 per cent. had been added on to each bale that happened to be a little over 4 cwt.? Yes.
1623. That system, you say, was instituted in 1879? Yes, in 1878 or 1879.
1624. Was that the only system recognized by the department as coming under the head of averaging? Yes.
1625. There was a minimum rate of 250 lb.? About the time the South-western line was made, in 1879, we began to compete with the Victorian Railway Department for Murrumbidgee wool. The Victorian Department had one rate for 4-cwt., another rate for 300-lb., and another rate for 250-lb. bales,—these rate being quoted to catch the New South Wales (Murrumbidgee) wool. Thus it became necessary, if we were to have any chance of getting the Murrumbidgee wool, that we should adopt the same principle. It was then decided that we should have two rates—one for 4-cwt. bales, and another for bales weighing not more than 250lb.
- 1625½. Allowing a deduction of 15 per cent. off those bales? Yes.
1626. And that system was in force up to the year 1886? Yes.
1627. Was there recognized by the department any system of averaging which applied to bales under 250lb.? No.
1628. Are you quite sure of that? Perfectly sure: I never heard of it.
1629. Did you, up to the time of the alleged wool frauds, hear of some system of this kind being in operation? Never.
1630. No rumour at all about it? Not the slightest. The first man to tell me was Mr. Goodchap, who had been told by M'Callum, who was the informer.
1631. Who was M'Callum? He was in the employment of Wright, Heaton, & Co. He had written to Mr. Abigail and told him there was some dishonest system of charging for the wool going on, and he cited certain clips of certain years. Mr. Abigail put questions in the House, and in such a way that we had not the remotest conception as to what he wanted the information for. He asked for the number of bales in certain clips of wool, and he said that frauds had been committed. Some time after that Mr. M'Callum had an interview with Mr. Goodchap, and gave him an idea as to how the frauds were done, and then Mr. Goodchap sent for me and asked me to look into the whole thing. And then I had to get our consignment notes and the invoices and the carrier's weigh-bills from Harrison, Jones, and Devlin and other firms, and their accounts from the forwarding agents; and by making comparisons I discovered where the frauds came in. But from our books alone we could never have told whether any fraud had been committed. But with our books and these documents from the forwarding agents we could tell.
1632. Did you personally go through the whole thing and carefully examine it? Yes.
1633. And what did you find? I found that in the larger number of cases they understated the gross weight.

Mr. D.  
Kirkcaldie.

9 April, 1889.

Mr. D.  
Kirkcaldie.  
9 April, 1889.

1634. Did you notice under what particular conditions of the wool season these understatements were made? In the thick of the wool season, when our men had not time to weigh the bales. The greater frauds were practised in the height of the wool season.

1635. What proportion of the misstatements would be the aggregate understatements? I should say 75 per cent. to the whole.

1636. As to detailed misstatements, what did you find? Well, it was difficult to find these out. If a sharp man were acting for Wright, Heaton, & Co., he could send the wool down at a very low rate? If forty bales came to the station. As a matter of fact they averaged 265 lb. They would come to the station and say that ten of these bales went under the 4 cwt. rate. That would bring the other thirty bales with an average a good deal less than 250 lb.

1637. That would be in the case where the contractor paid the carriage? Yes. Where consignees paid the carriage there was nothing of the kind done; in the case of contract wool it was pretty well universal.

1638. In the case of contract wool the Railway Department would be defrauded, and in cases where it was not contract it was not done? That is so.

1639. In making these investigations, did you go through many consignments of wool sent direct by the producers? No, I don't think we did. The forwarding agents, matter was such a large affair that my time was taken up entirely with it.

1640. Did you make any approximate calculation as to how much less had been paid to the Government than ought to have been paid? It is difficult to know; but I imagine it ran between £12,000 and £15,000.

1641. The aggregate? Yes.

1642. Some statement was made that it was £60,000? Oh, many wild statements were made. You must remember that it was not alone on wool that these frauds were committed. There were some cases in which they simply understated the weight. I will give you another example. Take forty bales averaging 265 lb. If they come to a station where there is no weighbridge this gross weight was reduced to such an extent as to bring every bale to 250 lb.

1643. I suppose that unless the aggregate weight could be determined by putting wool on to the station weighbridge, the forwarding agents would have no opportunity of testing the weight themselves, so that they could not practically arrive at these understatements or the assumption that the wool had lost weight in transit without the Railway Department themselves being aware of it? Not the slightest chance, because teams came right into the station, unless we were not busy, and took a lot of bales and weighed them. But you must remember that the forwarding agents had their premises in our yard, and in many cases they had men who were once our men. Consequently they would know what the porters were going to do with the wool as well as the porters themselves, and I can assume this (as in a good many cases there were no frauds committed). I think in some cases the forwarding agents' men saw the bales were going to be weighed, and took care there should be no discrepancy of weight.

1644. As far as you could find out, was the largest amount of fraud practised by general understating or by these manipulations by which the bales were brought under 250 lb.? By the manipulation.

1645. The averaging system which applied to bales under and over 4 cwt. had been recognized by the Department? Yes, for years.

1646. Was it never suggested that such a system ought in justice to be also applied to the minimum standard of 250 lb.? No; the question was never raised.

1647. In point of fact, if a number of bales were sent down and they ran in and out of 250 lb., a little under and a little over, so that they would average about 250 lb., the Railway Department would be overpaid so far as the actual aggregate weight was concerned, unless there was averaging? Yes.

1648. In spite of that being so, are you quite sure there was never any tacit recognition of the right to average above 250 lb.? I am perfectly certain of it, and if the question had ever been raised it would have come before me.

1649. If the question had been raised, can you say it would have been permitted? I think it is a reasonable assumption to say that it would have been permitted; I do not mean raising and lowering, but in the way you put it. If there were 5 bales weighing 252 lb. and 5 bales weighing 248 lb., I think it would be a reasonable thing to charge for 10 bales at 250 lb.

1650. What is your experience with regard to the weight of wool-bales as to the proportion out of consignments that would in fact not exceed 250 lb.? Rather a small proportion. There are some places where they have no proper wool-presses; but the great majority of bales are over 250 lb.

1651. I notice that in the freight list the 250-lb. minimum is not put under the general head, but under the head "dumped wool";—can you explain how it came to be put under that head? No. I think it was only done to make it appear simple. We had always been giving 15 per cent. on dumped bales, because though we lost it in trains we gained it by economy of working. We have knocked off the rebate now.

1652. Was 280 lb. ever the minimum instead of 250 lb.? Yes; about three years ago. The reason that came in was that three years ago last October I went down the Darling to see what we could do with regard to securing the trade of that district.

1653. Oh, that is since the wool frauds? Yes.

1654. Oh, then we need not go into that.

1655. Since the frauds prosecutions the system has simply been one of aggregate weight? Yes.

1656. There is a special minute of yours that was alluded to in the course of the examination during the prosecutions? Yes.

1657. Where is that? The Crown Solicitor must have it. I have not seen it since the trial, but I can remember what it was.

1658. What was it? It was in connection with a case such as that stated just now. Two or three bales, some over 250 lb., and some under—where the average was say 250 lb., Wright, Heaton, & Co. made application in the year, I think, 1886. They could see the drift of Abigail's questions.

1659. Oh, this was after Abigail's questions in the House? Yes.

1660. You are sure of that? Yes. At Byrock Station two cases were brought before us by Wright, Heaton, and Co.'s manager there, in which he asked that the whole lot might be charged for as 250 lb. As far as my memory serves me, the average was 248 lb., but there were five or six bales which weighed upwards of 250 lb. each, and when I saw the average was only 247 lb. in one case and 248 lb. in the other, I wrote a minute, in which I said "it appeared to me only a fair thing that the whole consignment should

Mr. D.  
Kirkcaldie.  
9 April, 1889.

should be charged for as bales, weighing not more than 250 lb. But I said, before adopting this change, "I want to know what the practice is at other stations. How is it that Byrock is the only station in which it has arisen, and therefore before action is taken upon this minute I want to know what the practice is at other stations." I never saw that minute again until the case was before the Court. I sent it to the Goods Superintendent, who sent it to Darling Harbour Station-master, who knew nothing about it. Upon the strength of my opinion, and the incorrect minute written by the station-master at Darling Harbour, the Goods Superintendent authorized a refund of £1 6s. 10d. We had charged each bale over 250lb. as 4 cwt. Wright, Heaton, & Co. objected to this, and said we ought to take the bad with the good, seeing that there were bales under 250lb. That was the case that led to the incorrect minute. This action gave colour to the statement made subsequently that averaging was recognized.

1661. Are you quite sure that up to the time of the writing of that minute there never had been any question at all one way or the other about 250-lb bales? I am absolutely certain. There cannot be any doubt about that.

1662. In the "merchandize rates" for October, 1885, there is this paragraph:—"When wool is consigned in quantities, and the average weight per bale is over 4 cwt., the charge will be for as many bales as there are 4 cwt., or portion of 4 cwt. in the total weight." This means that you divide the whole weight by 4 cwt. If this would make the charge greater, the consignor would not be bound to put it in force? No.

1663. But if it made it less, he would have the right to put it in force? Yes.

1664. When did this paragraph first appear? In 1879 or 1880.

1665. Was it always printed in the merchandize rates book? No; it was used as a general order first.

1666. Can you explain why it did not appear on the sheet? No.

1667. You say it did appear in the merchandize rates book earlier than this? I think so. However, the general order was in existence.

1668. I should like to see it? I will get it for you.

1669. But the special minute of yours is what was relied upon by the defence;—you are quite sure that that bore date only a few months before the prosecution? Yes.

1670. And you are quite sure that the claim for refund itself applied to something that was dated after Mr. Abigail first asked questions in the House? Yes. He asked a question in 1885, and their application was written in February, 1886, and my minute was written on 31st March, 1886. My minute must have been written about a month before Mr. Goodchap wrote to me and told me what M'Callum had told him.

1671. During all this time, I suppose, you had no personal knowledge of the different carrying firms except in course of large operations? I knew some of Permewan, Wright, & Co.'s and Lee & M'Alister's people.

1672. You knew the heads of the firms? Yes.

1673. On what sort of matters? On all kinds of matters relating to the business.

1674. Do you mean touching rates and charges? Yes; but more in regard to a general policy than anything else, because I knew that Wright, Heaton, & Co. were thoroughly conversant with the whole of the country. Before I went to Wilcannia I talked with Mr. Wright to get his views before I started, so as to clear my mind of any cobwebs and enable me to go down there with much valuable information.

1675. When was it that you went down to Wilcannia? In October, 1885—either the end of September or the beginning of October. I went for the purpose of reporting as to the trade in the Darling District, and that was the time that I came back and suggested we should alter the 250-lb. rate to 280 lb.; it was done with the view of catching the traffic.

1676. That was just before the "wool fraud" prosecutions? Yes; but this was for a certain district in the Darling; it was not generally approved for some months.

1677. That 280-lb. question did not come into the "wool fraud" question? No.

1678. During all the conversations you had with members of the firm of Wright, Heaton, & Co., was not this question about averaging above the 250 lb. ever mooted? No; it was never alluded to in the remotest degree.

1679. You are quite sure of that? Yes.

1680. Were other things of the same kind alluded to? I cannot remember.

1681. Did the conversation you had with heads of the firm extend to the details of the business—with Mr. Wright as well as Mr. Heaton? Yes.

1682. Do you remember whether you ever had any conversation with them on the other question of averages? I could not possibly remember.

1683. Did they never suggest that that other system of averaging was too limited, and should be more extensive? No.

1684. Are you quite sure? Perfectly sure.

1685. I understand that you admit it might have been quite fair to have done something like extending this system of averages? Yes; in the way I say.

1686. And if you had had your attention called to it you would have recommended it? Yes.

1687. Had you, up to the time when the wool frauds were first brought before the notice of the public by Mr. Abigail, any suspicion that frauds were being perpetrated? Not the remotest.

1688. Had you at any time while you were Traffic Manager any communication with Mr. Fehon? No.

1689. When did you first know him personally? Ten or eleven years ago. I was introduced to him in Melbourne.

1690. What was he then? I think he was connected with Messrs. M'Culloch & Co. then. Yes, I am sure he was. I cannot remember where I was introduced to him, or the conversation we had. I should not have remembered the introduction at all if it had not been that I knew he had been Traffic Manager in Victoria.

1691. Did he ever come to you on any business? No. He was never with anyone in my company talking over business.

1692. Was he ever alluded to by Mr. Wright or by Mr. Heaton as being concerned in Wright, Heaton, & Co.? No. Only in a way of rumour.

1693. In what way? I heard that M'Culloch & Co. had bought largely into Wright, Heaton, & Co., and that Mr. Fehon was a shareholder. Mr. Fehon's name was impressed upon me by reason of his being connected with Victorian Railways.

1694. As to these Victorian rumours? Oh, I heard them ten years ago.

1695. Was that in Sydney? I can only remember that I heard them; I cannot say where.

Mr. D.  
Kirkcaldie.  
9 April, 1889.

1696. I mean those rumours about his favouring Messrs. M'Culloch & Co.? Oh, yes; I heard them in a sort of general way.
1697. You were not called at the trial before Sir James Martin? No; I was not called, but I was sitting beside Mr. Salomons all the time; it was a complicated case, and my assistance was required.
1698. And yet you were not called as a witness? No; but I was in the Water Police Court. When we went before Sir James Martin all the witnesses were ordered out of Court. Mr. Simpson and Mr. Rogers asked that I should go outside, being a witness in the case. Mr. Salomons said he could not go on with the case unless I was beside him, and it was questionable whether he would call me as a witness, and so Sir James Martin said I should be allowed to remain.
1699. Is there anything you can think of that bears on this matter? No. Of course I did not mention the frauds on carriage of tobacco, which were a number of understated weights.
1700. Did those go to any very great extent, or to an extent that could be explained by accident? Oh, it could not be explained by accident.
1701. What was the extent? Well, it was very difficult to find out. In some cases the lots came consigned from Wright, Heaton, & Co. in the country to Wright, Heaton, & Co. in Sydney. It was only by a fluke that we could go to firms here and say, "Did you get this stuff?" It was more difficult than in the case of wool which was consigned to Harrison, Jones, and Devlin, or some other firm.
1702. Cannot you form an estimate as to how much the railway was defrauded of? No; it is simply impossible to do so. As to the practice of charging according to weight per bale it was in existence in South Australia and Victoria long before it came into existence here.
1703. When was it first adopted in New South Wales? In 1878, 1879, 1880.
1704. Can you say whether the practices resulting from that system of charging originated in New South Wales or in any other place? It is very difficult to say.
1705. Have you any knowledge of it? No; but I think that if the Victorian system were the least rigid they might have practised it there.
1706. That is only surmise? Yes; it is a surmise that it would be done. Take Echuca, it is a very heavy station. They take the wool direct from the boats, and unless they weigh each individual bale it is impossible to find out whether they are being defrauded or not.
1707. And weighing each bale would be an operation that would run away with the profits of the railway—that is to say, they would require so many men for the work that it would reduce the profits? Yes.
1708. One suggestion made was that in connection with these weighbridges the railway authorities were wrong? Oh, no; there was in one case a scale out of adjustment, and it was rumoured at the time that it had been done to prevent it from weighing, but it was only the result of an accident.
1709. Well, you have no knowledge of any kind of anything that went on in Victoria? Not the remotest.
1710. With regard to aggregate weights, frauds might have been practised in New South Wales under the old system before the new bale system came in? Yes.
1711. The bale system has been in force as long as the railways have been in existence? Yes.
1712. And the 250-lb. "manipulation," we will call it, was only a further extension of the 4-cwt. averaging system? Yes.
1713. Can you remember whether this minute of yours was produced at the trial? Yes; it was in the Court.
1714. Was it put in as evidence, or was there a fight over it, and was it rejected? I cannot remember.
1715. I cannot find from Sir James Martin's notes that there was a fight over it.

John Williams sworn and examined:—

Mr  
J. Williams.  
9 April, 1889.

1716. *The Commissioner.*] Your name is —? John Williams.
1717. You are Crown Solicitor? Yes; I have been Crown Solicitor for a good many years.
1718. You were Crown Solicitor at the time of the "wool frauds" prosecution, and you took considerable interest in trying to find out about the matter? I got up the case in the ordinary way.
1719. In point of fact, you are always consulted in matters of this kind by the Attorney-General? I cannot say so.
1720. But in this matter you were consulted? Yes.
1721. In relation to the persons who had to be prosecuted—the persons against whom there might appear to be evidence—I suppose you went into that matter? No, not specially.
1722. Did you generally? For the Attorney-General—not for myself.
1723. Did not you go into the question actually? No; he went into the question.
1724. You went into the question? Only to carry out his instructions.
1725. In the course of investigating this case, did the name of Mr. Fehon come up, as far as you know? A man named Stephenson, a Crown witness, did mention Mr. Fehon's name. He said he was a shareholder and director.
1726. Anything more than that? And that Mr. Fehon inspected the books. He also mentioned that Mr. John Woods, of Manly, was a shareholder and director, and that he inspected the books.
1727. Was the question entertained as a question to be considered whether the prosecution should extend to and include Mr. Fehon or not? That I cannot tell you. Mr. Want, who was Attorney-General at that time, could tell you.
1728. Did you consider the question? No. I had nothing to do with it. I did consider the question, but not for the purpose of taking action.
1729. And what was the conclusion? That there was no evidence whatever of Mr. Fehon's knowledge of the alleged fraud.
1730. That is the conclusion you came to? Yes. It seems to me quite possible that he might be a director and shareholder and yet not know the particular way in which the figures appear in the books in connection with any frauds. It did not appear, as far as I remember, that he was actively engaged in the management of the business in the same way that Mr. Wright and others were.
- 1731-2. He was not, in point of fact, a person that could be included in the prosecution? I do not know what conclusion the Attorney-General came to; but I suppose he came to the same conclusion, or else he would have included Fehon's name in the list of persons to be indicted.
1733. There were ten persons included in the charges? Yes; Stephenson was our main witness, and without his evidence to connect the parties charged the case could not go on.
1734. And Stephenson gave evidence at the trial before Sir James Martin? Yes.

1735. In Lee and McAlister's case he was not called? Oh, no; that was altogether a different matter.
1736. Before there could be any further trial of Wright-Heaton's case Stephenson could not be found? No; he went away. The Crown, through the Police, was allowing him £3 a week for the maintenance of himself and family while he was waiting as witness. It was discovered suddenly that he had gone to New Zealand. If I recollect rightly a letter was received from him, intimating that on certain terms he was willing to come back; but that was evidently a trick, as we had reason to believe before any answer could reach him he had gone on to Central California.
1737. As far as you know, did he go to Central California? I cannot say.
1738. Do you remember an offer being made by the defence to allow his depositions or his former evidence before Sir James Martin to go in as evidence? I do not recollect anything about such an offer.
1739. Mr. McLaughlin mentioned the matter the other day, and said that something of the kind had occurred? I have no recollection of it. If such an offer was made no doubt it is in writing.
1740. And you have no knowledge of it? I have no recollection of it.
1741. As regards Mr. Fehon, do I understand you to say that the way in which Stephenson connected him with the question of the alleged wool frauds was that he said that Mr. Fehon had been in the office as a director? Yes; and that he had been in the office and examined the books.
1742. Did he say for what purpose he examined the books? I think as director.
1743. But in point of fact you know that no examination of the books could show the frauds—that was the view you took of the matter? Yes, and I presume the view the Attorney-General took on the matter, or he would have included Mr. Fehon's name.
1744. Then in the view you took of the matter you had all the available evidence that could be procured? Yes.
1745. Now do you remember a minute of Mr. Kirkcaldie's being spoken of at the trial? Yes.
1746. What was the history of it? I do not know. Kirkcaldie denies that there was a minute in these terms.
1747. Who spoke of it? The defendant's attorney and counsel spoke of it; and I think Kirkcaldie was asked about it.
1748. Was Kirkcaldie called at the Police Court? I cannot recollect. I believe he was a witness.
1749. If there was a minute was it ever in the possession of the Crown? Well, I do not know what minute you refer to.
1750. Well, any such document alluded to in that way, did it come into the possession of the Crown? The defence said there was a certain minute; Kirkcaldie denied it, and said there was something else.
1751. Mr. Kirkcaldie has said that there was a minute, but he does not know where it is. He is under the impression that it is in your possession? I doubt whether we ever had it; but I will go through the papers. I have no recollection of it.

Mr.  
J. Williams.  
9 April, 1889

THURSDAY, 11 APRIL, 1889.

James Patrick Garvan, M.P., sworn and examined:—

1752. *The Commissioner.*] What is your full name? James Patrick Garvan.
1753. You were Minister for Justice when Mr. John Want was Attorney-General? Yes.
1754. At the time of the wool frauds prosecution? Yes, I was.
1755. Did you take an interest in the subject matter of the prosecutions as being Minister for Justice? It did not come under my cognizance? Yes.
1756. Were you consulted in any way whatever? No; in no way whatever.
1757. You only took an ordinary interest in the matter as a Minister? Yes. In fact, I took less than the ordinary interest of a Minister.
1758. Did you at any stage of the proceedings consult with the other Ministers on the subject? No, not that I can call to my mind.
1759. It rested entirely with the Attorney-General? Entirely.
1760. Did the question as to whether the prosecutions should be instituted come before you? I cannot remember that it did; it rested entirely with the Attorney-General.
1761. Mr. Abigail took an interest in this? Yes.
1762. He was in opposition at the time? Yes.
1763. Then you did not consult with him? No.
1764. Then you did not go into the question as to who should be prosecuted? No.
1765. Did you ever hear Mr. Fehon's name mentioned in relation to it? No.
1766. Did you ever hear it mentioned before the matter was brought up in the House? No. I never saw him until after his appointment as Commissioner for Railways.

J. P. Garvan,  
Esq., M.P.  
11 April, 1889

Mr. F. A. Wright attended and suggested to the Commissioner that he should call as witnesses Messrs. Frank Farnell, M.P., Richd. Beattie, Arthur S. Lee, of Orange, and H. B. Copeland. The last-named gentlemen, he pointed out, was at present in the Lands Office, Sydney; but he was the assistant for two or three years of the man Stephenson, and he (Mr. Wright) would like the Commissioner to examine him. He could rebut the evidence of Stephenson as to the statement that Mr. Heaton and he examined the witnesses one morning.

*The Commissioner.*] Well, Stephenson has not been called here, so that his evidence is not in.

*Witness.*] Mr. Copeland can give you information with regard to the particular way of dealing with the goods.

*The Commissioner.*] I would certainly call them if I thought that under the circumstances it was necessary.

WEDNESDAY, 17 APRIL, 1889.

William John Lyne, M.P., sworn, and examined:—

1767. *The Commissioner.*] What is your full name? William John Lyne.
1768. You are member for the Hume? Yes.
1769. Some time ago you went in company with Mr. John Want to see Mr. MacMahon, I believe? Yes.
1770. Do you remember the day? No, but I think the date is mentioned in *Hansard*.

W. J. Lyne,  
Esq.,  
M.P.  
17 April, 1889.

W. J.  
Lyne, Esq.,  
M.P.  
17 April, 1889.

1771. It was shortly before the motion was brought on which the former Parkes Government went out? I think it was a fortnight or three weeks.
1772. Where did you see Mr. MacMahon? In his own office in George-street, or just above it; I think it is in one of the streets that go down from the other side of George-street. I had had a message from Mr. Brock, which I delivered to Mr. Want. It was a verbal message to the effect that Mr. Brock told me that he had seen MacMahon, and he wished me to know that he had been in Wright, Heaton, and Co.'s employ, and he could give me some valuable information in reference to Mr. Want's charges against Mr. Fehon; and Mr. Brock wished me to see him. I conveyed this message in substance to Mr. Want, and Mr. Want asked me to go with him to see Mr. MacMahon.
1773. Will you give me as clear an account as you can of the conversation that took place when you saw Mr. MacMahon? Mr. MacMahon said he had been in the service of Wright, Heaton, & Co., and that he had had charge of their business up north at, I think, Townsville; that Mr. Heaton went with him by steamer to Townsville to place him in charge there; that previous to that he was aware that Mr. Fehon had been once or twice in Wright, Heaton, & Co.'s office examining—I think I am right in this;—I think he said examining the books on behalf of the Melbourne people. On the steamer going to Townsville Mr. Heaton told him that Mr. Fehon was a director in Wright, Heaton, & Co.'s, and that in future he was to look upon Mr. Fehon as one of his bosses. I think that is the substance of the conversation.
1774. How long did it last? I think it lasted a quarter of an hour. In addition to that, Mr. MacMahon said he could give day and date for everything upon reference to his papers and books, but he could not then give the actual day and date as to when this took place; but I think he said it was in 1882 or 1883. However, he was not positive on that point, as he said he should like to look at his books or papers.
1775. Was there any conversation then further than that touching the question of Mr. Fehon's being concerned in the working of the firm; anything to that effect? Well, I could not say; there might have been a little additional conversation; but I considered that he took Mr. Fehon as being one of the managers of the firm, by Mr. Heaton telling him he was one of his bosses; but I cannot call to mind what other conversation took place; there was a little more, but that was the substance of it.
1776. Do you remember who used the word "boss" first? Mr. MacMahon, I feel sure; and he used it more than once, he used it three or four times.
1777. Do you remember anything being said by MacMahon as to whether his name was to be used in the House? I understood him to say he did not mind. In fact he seemed to me to feel that Wright, Heaton, and Co. were not his friends at the present time, and that he had no cause to mind what might be said; and subsequently I heard that there had been some unpleasantness between MacMahon and Wright, Heaton, & Co.
1778. It simply came to this—that MacMahon informed you and Mr. Want of all he did know about the matter touching Mr. Fehon? He said by reference to his papers and books he could give day and date for everything, and led us to believe he could be more clear as regards the day and date if he had the books.
1779. Mr. MacMahon's recollection is that he did tell Mr. Want that if Mr. Fehon came to his office he would look upon him as his "boss"? He said that Mr. Heaton told him to look upon him as his "boss."
- [At this stage Mr. William M. Fehon—the Commissioner suggesting that he should attend—entered the room, and remained to hear the remainder of this witness's evidence.]
1780. *The Commissioner.*] When did you first see Mr. Fehon? In the Works Office, in 1886.
1781. You were then Minister for Works? Yes.
1782. Did Mr. Fehon come to see you, or did you go to see him? He came to me with a note from Sir Patrick Jennings.
1783. You had some conversation then on the subject of the Railway Commissioners? Yes. The Bill constituting the Railway Commissioners was then being prepared, and Mr. Fehon came to see me and had a general conversation in reference to the Commissioners who would be appointed, and told me that he had been in the Victorian railway service, and that he did not expect he would get the chairmanship. I think he said he supposed Mr. Goodchap would be appointed chairman, but that he thought he, Mr. Fehon, was quite qualified for one of the other two positions.
1784. Did he volunteer that statement, or how did it arise? Well, it arose this way. Mr. Fehon had had a conversation with Sir Patrick Jennings, who had sent him to me, and certainly the conversation arose at Mr. Fehon's instance, and not mine, because I had not sent for him. I think Mr. Fehon also said something about his going to England; and that if Mr. Goodchap was not likely to be appointed a chairman he (Mr. Fehon) would assist anyone in the matter.
1785. What more was said in allusion to his suggestion that he might have one of the commissionerships? I told him that the Bill I was preparing was in that state that it was impossible to say whether it would ever be passed, and I think I explained my intentions as far as the provisions of the Bill referring to the Commissioners were concerned, but I gave Mr. Fehon no promise, and I think the conversation then terminated.
1786. As a result of this conversation, had you it in your mind that Mr. Fehon might be a proper person to appoint as one of the Commissioners, or a person who might apply to be appointed as one? I looked upon it as an application, and that if the Bill passed he would be an applicant, and in consequence of this I made some enquiries in Victoria, and through them I had found out that Mr. Fehon been assistant traffic manager, and afterwards traffic manager in the Victorian railways, and that at the time he left the Victorian railways, about sixteen years before, there had been some rumours afloat, and matters had been threatened to be brought before the Assembly, or it had been brought before the Assembly, that it was supposed that Mr. Fehon had used his position as traffic manager to favour Messrs. M'Colloch and Co., and was mixed up with them somehow or other. I heard nothing more than these rumours which had been afloat.
1787. Did you hear that from one person or from more than one person? I only spoke to one person directly about it. I will not say I did not hear it from other persons.
1788. Who was that one person? It was Mr. Williamson, in the Railway Department. I must say that he told me these were only rumours; he knew nothing that would warrant them. I must say this in justice to Mr. Williamson. In fact he spoke personally in favour of Mr. Fehon.
1789. Do you remember the words he used when he expressed his opinion as to the truth of these rumours? I could scarcely give you the words.
1790. The tenor? The tenor was that Mr. Fehon was said to be guilty of the facts alleged by the rumours; and the substance of those rumours was that Mr. Fehon had been in the Department, and at the same time favouring M'Colloch & Co.

1791. That was all the conversation you had with Mr. Williamson? That was the substance of it. I think he said he thought Mr. Fehon an able man.

1792. Did you make actual inquiries of any one else at all? No; not directly, that I can call to mind. I think it is more than likely that I heard the rumours from several persons but not in a way that would take hold of my mind.

1793. Can you say how the balance appeared to you to turn after the conversation you had had in this relation—for or against Mr. Fehon? I felt the rumours were so strong that I certainly should not have appointed Mr. Fehon; and Mr. Lakeman afterwards said that the rumours were so strong at Hay that he had no doubt they were true. But this conversation took place at the time Mr. Want was bringing the matter before the House.

1794. You did not go down to Melbourne on purpose to make inquiries? No; I have business relations down there. At that time it was expected the Bill I was preparing would have passed. But I know nothing at all excepting these rumours. I think the day after Mr. Fehon was appointed to his present position I met him in George-street, and I told him he must expect to be pretty roughly handled in the House, and that is what I was referring to at the time.

1795. Was it before the institution of the Wright-Heaton prosecution proceedings that you went down to Melbourne and made these inquiries? I think it was after. As far as I can recollect it was just before the Government went out of office; but I did not go down purposely to make these inquiries.

1796. Do you remember the date when the Government went out of office? A few days before Christmas,—in 1886. Mr. Clarke spoke to me about Mr. Fehon at the Rosehill Racecourse, and he asked me if I thought Mr. Goodchap would accept the position of one of the two Commissioners. I said, "I do not think so." Then he said, "Do you think Fehon is a good man?" I said I did not know anything about his capacity, but I did not think that, under the circumstances, Mr. Fehon should be appointed, and I detailed to him as near as I could the inquiries I had made, and the conclusion I arrived at.

1797. Did Mr. Clarke say how long he had known Mr. Fehon? I think he did, but I will not speak positively.

1798. On the subject of the wool frauds prosecutions, you were Minister for Works when those prosecutions were going on? Yes; from the first to the last of them.

1799. And being Minister for Works at the time I suppose you took considerable interest in the prosecutions? No; the matter was in the Attorney-General's hands.

1800. But still you knew what was going on? Yes; and I was consulted on one or two occasions in Mr. Want's office.

1801. Do you remember whether Mr. Fehon's name came up in the course of consultation in any way? Yes.

1802. In what relation? In relation to Messrs. M'Culloch & Co.

1803. On the question as to whether he should be prosecuted or not? As to whether Messrs. M'Culloch & Co. should be prosecuted, and Mr. Fehon was looked upon as one of the principal men in Messrs. M'Culloch's.

1804. Well, the final conclusion was that Messrs. M'Culloch & Co. were not to be joined. The final conclusion was that there was a breach in the technical evidence.

1805. So that they could not be proceeded against successfully? Yes; and I believe that Mr. Goodchap caused the Victorian Government or Railway Department to be written to, asking them to prosecute Messrs. M'Culloch & Co.

1806. That is all you know about the question of the connection of Mr. Fehon with what were called the wool frauds? Yes.

1807. As to the wool frauds themselves have you any personal knowledge of the subject? Yes.

1808. In what direction? In relation to the question generally as to whether or not there were wool frauds perpetrated? Yes. I have no doubt the frauds were perpetrated—that Wright, Heaton, & Co. made a saving in consequence of taking the average weight of bales.

1809. Have you any particular fact or facts upon which you go on coming to that conclusion? Well, I saw all the papers and documents at the time they were brought out. There were several men sent to the different stations to look these papers up.

1810. That is you think the saving was made by adopting the practice of averaging? Yes.

1811. Was there any other fact that led you to the same conclusion? Yes, this. That my brother who is managing a station for me had some wool on one occasion when I was present, to be taken away by Wright, Heaton, & Co. I said to him "why are our teams idle;" and he said that Wright, Heaton, & Co. had contracted to take the wool away at a price right down to the ship, at about the same price as it would cost him for the railway carriage alone.

1812. That is about all you have got to tell me on this matter, I suppose? Yes.

1813. *Mr. Fehon (to witness).*] You say that Mr. Goodchap wrote to Victoria asking the Government to take proceedings against M'Culloch & Co.? He told me that the Government or the Department were written to.

1814. For what? The wool frauds.

1815. What wool frauds? The wool frauds he concluded were being carried on in Victoria.

1816. Do not you think the Department know their own affairs sufficiently well to take proceedings against anybody offending against their regulations and charges; to protect themselves in cases where carriers or others were guilty of attempting to defraud them? I certainly should; but I know Mr. Goodchap complained to me that they had not instituted proceedings.

1817. Has Mr. Goodchap any information that Messrs. M'Culloch & Co. had defrauded the Department of Victoria? He must have had some information that led him to that conclusion.

1818. Did he give you any information? No.

1819. He wrote? Yes, or caused communication to be sent.

1820. And do not you think the Government would take action in the matter if there were any truth in it? I do not know. I think the Government looked upon it as a fight between Victoria and New South Wales, and I believe it was thought that it was a fight between the two Colonies. I stated that Mr. Goodchap told me he wrote to the Victorian Railway Department or the Victorian Government with the view of having proceedings taken against Messrs. M'Culloch & Co. This was for practices very much the same as those carried on here.

1821. This is a new issue raised altogether.

W. J.  
Lyne, Esq.,  
M.P.  
17 April, 1890.

W. J.  
Lyne, Esq.,  
M.P.  
17 April, 1889.

1822. *Witness.*] I may still further say that a discussion took place at one of the interviews I had with Mr. Want (and others were present) as to whether Messrs. M'Culloch & Co. had not been guilty of the same practice that Wright, Heaton, & Co. had been guilty of; and in consequence of our not getting hold of some technical evidence nothing further was done. But the impression left on my mind was that the same thing was being done by Messrs. M'Culloch & Co. as far as they could, because there were certain rates made by the Victorian Government encouraging the traffic for Victoria, showing clearly the desire on the part of the Victorian Government to get as much as possible of the trade of New South Wales.

1823. *Mr. Fehon.*] You say no technical evidence was got; was any evidence got? I do not know. So far as I was concerned I had nothing whatever to do with the prosecutions after the matter went from the Works Department to the Attorney-General's Office.

1824. Who were the Sydney directors of Wright, Heaton, & Co.? I do not know.

1825. Are you aware that Mr. John Woods was one? Yes.

1826. Was there ever any idea of Mr. Woods being prosecuted? Not that I know of.

1827. Can you tell why Messrs. M'Culloch & Co. were thought to be guilty of irregularities in Melbourne while Mr. John Woods, living in Sydney, was not thought of? No. I only know that it was said that some of the directors of Messrs. M'Culloch & Co. were directors of Wright, Heaton, & Co.

1828. Did you ever hear anything to your knowledge against the way Messrs. M'Culloch & Co. did their business? No.

1829. It is all hearsay? Yes.

1830. You say that Mr. Williamson gave you information? Yes. It was at his own house, I think, but am not sure. He said to me, in answer to question, there were rumours, and, in justice to him, I must state that his feeling to you personally was favourable.

1831. Did he know anything to my detriment? No.

1832. And he was assistant accountant of the Victorian Railways, and was there when I was;—you say your first knowledge of me was when I came to you with a letter from Sir Patrick Jennings? Well, with reference to the letter, you called it to mind by stating there was a letter. I had forgotten the letter at the time. I think, so far as I know, that was the first time I had seen you.

1833. Do you remember me telling you that Sir Patrick Jennings was an old friend of mine; that I called upon him for the purpose of giving any assistance I could in regard to these new railway matters; that I had lately returned from England, and had assisted Mr. Murray Smith in selecting Mr. Speight for the Victorian Railways, and what a difficult thing it was to secure a suitable person; and that having gone through that in England, I thought the information I obtained there might be of service to Sir Patrick Jennings, as an old friend of mine, in making a selection of commissioners;—do you recollect that? I cannot remember the whole of it. I remember you said something about being willing to assist me, or something to that effect.

1834. Do you remember my suggesting that the Government should go to England or America for a Chairman? No; but I remember you saying something about assisting.

1835. You say positively that I made an application to you for one of the positions? You said you did not expect yourself to get the Chairmanship, and you queried as to whether Mr. Goodchap would get it, and left on my mind the impression you would take one of the other positions.

1836. Was anyone present? No.

1837. I wish there had been a third person present, then we could have it settled; as it is it rests as it stands. All you have heard about me has been rumour; nothing but rumour;—you have never heard anything of my character that would debar me from holding the post I hold of your own personal knowledge,—do you know anything? No.

1838. Can you produce anybody who does know anything? Well, I do not know in what way you mean.

1839. As a business man, or as a man of honor? No; I do not.

1840. *The Commissioner.*] In that relation, Mr. Lyne, did you make any inquiries apart from these specific rumours—did you hear anything about the general character for probity that Mr. Fehon bore in Melbourne? I never heard anything against Mr. Fehon, or in favour of him in that respect. I never made any inquiries. My impression was that Mr. Fehon was a member of the firm of Wright, Heaton, & Co. during the wool frauds.

1841. Did it stand in this way,—that you thought it an unwise thing, in the interest of the country, that a man whose character had something standing against it should be appointed to a responsible position, because he might not be sufficiently honorable to hold that position, or was it that you thought it an unwise thing for a Government to risk its own position by appointing a man whose appointment, in consequence of these rumours, might be made serious grounds for an attack upon the Government? The reason I took exception was that I thought it an impolitic thing to do, and that, as a rule, the people of the country would not endorse it. I knew nothing against Mr. Fehon, but rumours were against him.

1842. Impolitic politically, or impolitic in this sense—as to whether Mr. Fehon could really be entrusted with the office? I should not like to say that I suspected Mr. Fehon myself, because I did not; but I thought it unwise that any Minister should appoint anyone in whom the whole of the people would not have had supreme confidence. I thought it would have been an injudicious thing to make the appointment when there were rumours not then cleared up.

1843. Do you mean that it would have been a very impolitic thing to appoint a man (say) as Chief Justice, who, though he might be a man fit for the appointment, was a man, against whose character there were rumours in which a good many people believed—is that the sense in which you mean it? Yes; that is it. There were many rumours which might have no foundation at all; but it would not have been politic under the circumstances to make the appointment.

1844. Can you say, as far as your belief and opinion go, whether or not Mr. Want knows more about this matter than you do, and has in his knowledge facts material to the subject matter of this Commission, beyond those which you have in your knowledge? Certainly; I think he knows a great deal more about this than I do.

1845. Therefore do you think it important that he should be called as a witness? I certainly think so. I think that he having made the charge against Mr. Fehon, and having had charge of the wool fraud business, it is absolutely essential that he should be called.

1846. You spoke of Mr. Lakeman, I think? Yes.

1847. Has he mentioned any facts of his own knowledge or the existence of rumours? The existence of rumours.

rumours. He said he was living at Hay at that time, and it was commonly thought that Mr. Fehon was in some way mixed up with Messrs. M'Culloch & Co. when he was in the Railway Department.

1848. Did he lead you to understand that the rumours were afloat before Mr. Fehon left the service or after? Before; and he attempted to prove that by saying that it was pretty well shown by Mr. Fehon being made a director two days after leaving the service.

1849. *Mr. Fehon.*] It was not a Company till seven years afterwards.

1850. *Commissioner.*] Did Mr. Williamson give you to understand that the rumours were afloat only after or before Mr. Fehon left the Service? I understood it was before. That is my impression. My impression was that Mr. Fehon resigned his position in consequence of the rumours.

W. J. Lyne,  
Esq., M.P.  
17 April, 1889.

THURSDAY, 18 APRIL, 1889.

Mr. Allan Lakeman, M.P., sworn and examined:—

1851. *The Commissioner.*] Your full name is—? Allan Lakeman.

1852. You are now member for Balranald? Yes.

1853. You were living in Hay as long ago as 1872? Yes. I have lived there since 1870.

1854. And you had a good many transactions with the Hay people? Oh, a great many; doing a large business.

1855. In connection with the carriage of goods to Melbourne? I was manager for Wortre, a storekeeper, who did a large business.

1856. Had you any dealings with M'Culloch & Co.? Yes.

1857. Did you become acquainted with Mr. Fehon at any time? Yes.

1858. When did you first become acquainted with him? I can hardly tell.

1859. Before or after he left the Victorian Railway Service? I think it was after.

1860. He was then a partner in Messrs. M'Culloch & Co.'s? When I first became acquainted with him I think he was a partner.

1861. When did you first know of Mr. Fehon? Almost as soon as I went to Hay. He was traffic manager of the Victorian railways I think. He had to do with the goods traffic at any rate. I think it must have been almost as soon as I went to Hay. All our business relations then were with Melbourne; we did not know Sydney at all; we could not get to Sydney.

1862. Well, did you at any time hear any rumours going about affecting Mr. Fehon? Oh yes. We heard of course, being mixed up with business, and other agents wanting our business. We always did our business through Messrs. M'Culloch and Co.

1863. And there were rival carriers competing for your business? Yes, one or two.

1864. Who were they? I think Payne was one; I do not remember the other.

1865. Did Mr. Orr come down as low as that? No.

1866. Well, that being so, did you hear at any time any rumours concerning Mr. Fehon in relation to anything? Yes.

1867. What were these rumours? These rival agents used to say that they could not compete with Messrs. M'Culloch and Co., because they had advantages from the railway that they could not get. Of course I am only telling you rumours; because if I could have given any direct evidence probably I should have volunteered it. For this reason I don't know why I am subpoenaed.

1868. What was the effect of these rumours as connected with Mr. Fehon? Mr. Fehon was I think the traffic manager of the Victorian railways in those days, or had something to do with the traffic.

1869. Do I understand that Mr. Fehon's name was mentioned, or was it only that the other rival carriers' agents complained that Messrs. M'Culloch & Co. got concessions which they did not get from the Railway Department generally? Yes.

1870. And was Mr. Fehon's name mentioned? Well, it is really so long ago; I cannot say for certain. His name might have been mentioned, but I cannot swear that; I think it must have been mentioned.

1871. Did you hear afterwards, at any time later on, Mr. Fehon's name mentioned in relation to these rumours? Mr. Fehon joined Messrs. M'Culloch & Co. after that.

1872. You know nothing yourself? No.

1873. What can you say about this. Did you hear those rumours which appeared to connect Mr. Fehon with the suggestion of unfair advantages being given to Messrs. M'Culloch & Co. by the department before or after Mr. Fehon left the Railway Department and joined Messrs. M'Culloch & Co.? I think it would be after.

1874. As far as you remember did you hear Mr. Fehon's name, as specially favouring Messrs. M'Culloch & Co., mentioned after he had left the Railway Department and joined Messrs. M'Culloch & Co.? I do not think so. You see it is a terrible long time ago to tax one's memory with—1872.

1875. Yes it is. Whatever these rumours were, can you say that they were apparently spread by or emanated from these rival firms, or were they general public rumours? They came first from the rival firms; there is not the slightest doubt about it.

1876. In point of fact, Messrs. M'Culloch & Co. were the largest carriers doing business between Melbourne and Hay? Yes; they had a monopoly.

1877. That being so, was there jealousy? Yes, a good deal of jealousy.

1878. Do you know of any legitimate system by which the larger carriers did get an advantage on Victorian railways, because they were large carriers? I do not know that.

1879. Did all the carriers who took goods to Hay get concessions from the Victorian Government in the shape of rebates for goods carried beyond a certain line in New South Wales? I think so.

1880. That was the result of competition between New South Wales and Victoria? Yes.

1881. So the more goods a firm carried the more rebate they would get, and the more they would benefit? Yes.

1882. Afterwards you became acquainted with Mr. Fehon personally? Yes; he was then in the firm of Messrs. M'Culloch & Co.

1883. How did you become acquainted with him? I cannot say. It was through having business with him.

1884. How long after this were you generally acquainted with Mr. Fehon? Well, I think he must have been in Hay about 1876. I am only speaking from memory, but I fancy it was probably before that.

1885. Have your dealings since that been principally, as they were before, with Melbourne or with Sydney? Principally with Melbourne.

A. Lakeman,  
Esq., M.P.  
18 April, 1889.

- A. Lakoman Esq., M.P.  
8 April, 1889.
1886. Have you had an opportunity of hearing how Mr. Fehon was spoken of in Melbourne since then? Yes; Mr. Fehon has been a man who, as far as I know, has been held in great respect in Melbourne. Except for those rumours—I think it was mentioned in the House, when Mr. Fehon joined the firm of M'Culloch and Co., it was stated that he had been working for the firm; and I think a satisfactory explanation was given of the transaction, and nobody really believed the accusation.
1887. Except for those rumours, whatever they were worth, has there been anything else of any kind suggested against Mr. Fehon's integrity? Not that I know of.
1888. What became of those rumours: did they die out or keep alive? Oh, they died out. They interested none but the rival carrying firms.
1889. What was the repute in which M'Culloch & Co. themselves were held in Victoria for integrity and straightforwardness in business—good or bad? Good.
1890. Before the wool fraud prosecutions began in New South Wales did you hear any rumours of M'Culloch & Co. getting the better of the Victorian Railway Department in the same sort of way? No.
1891. Not at all? No.
1892. After the prosecutions were there no rumours? I did not hear of them. You see I have been out of business for six years, and have not had much to do with Victoria. I have been living generally at Hay.
1893. And Hay still has a good deal of commercial intercourse with Victoria? Yes; but not so much as in former days.
1894. *Mr. Fehon.*] You said just now that the rival carrying firms said that Messrs. M'Culloch & Co. got concessions from the railway to do the business on advantageous terms? Yes.
1895. Now, did not Messrs. M'Culloch & Co. at that time own nearly all the steamers running on the Murrumbidgee, or have them under their control, and was not it the question of doing the business quickly and satisfactorily that influenced the storekeepers at Hay in dealing with Messrs. M'Culloch & Co. And did you ever reap any advantage from dealing with Messrs. M'Culloch & Co.—that is any peculiar advantage? No.
1896. You say that rival firms could not compete. Did you ever experience that you got your goods delivered cheaper by dealing with Messrs. M'Culloch & Co.? Yes.
1897. But you did not participate in any advantage through the goods coming through Messrs. M'Culloch & Co.'s hands? No; I dealt with M'Culloch & Co., because they did the work better, but we never had anything to do with the railway freights, they were always managed by the carrying firms.
1898. You have known me incidentally for a good many years now, and we have done a great deal of business together. Did you ever of your own knowledge know, or hear, or did anyone else hear of any act on my part that might be considered dishonourable or unbusinesslike. Was not my conduct always straightforward in my dealings with you? I have always found you so, always. I would not do my business with a man who tried to sharp me; and if I thought Messrs. M'Culloch & Co. did this, I would not have dealt with them.
1899. As a matter of fact, Messrs. M'Culloch & Co. did all the business of Hay and all the surrounding district? Yes.
1900. Do you think if there had been any foundation for the statement made by John Orr in the Victorian Assembly, in reference to my having assisted Messrs. M'Culloch & Co. in any shape or form during the time I was traffic manager of the lines;—do you not think that if publicity was given to it that some notice of it would have been taken by the Government if there had been any truth in it? I have mentioned before that no one seemed to believe it. The matter was mentioned by Mr. Orr, but nobody believed it.
1901. I will give £100 to the charities in Sydney if it can be shown that M'Culloch & Co. were benefited by me when I was in the department. I would give £1,000!
1902. *The Commissioner.* What reputation has the Victorian Railway Service borne. Is it strict or easy-going? We used to think it strict.
1903. What was the comparison between that Colony and this? Oh, we never knew anything of New South Wales in those days. There was only one *Sydney Morning Herald* taken there. We used to run after the *Melbourne Argus* every morning when it came in by post; and we used to think the Victorian Railway Service a good one.
1904. *Mr. Fehon.*] A well organized service? Yes.

MONDAY, 29 APRIL, 1889.

Frank Farnell, Esq., M.P., sworn, and examined. —

- F. Farnell, Esq., M.P.  
29 April, 1889.
1905. *The Commissioner.*] What is your full name? Frank Farnell.
1906. You are member for —? Senior member for Central Cumberland.
1907. You went into the Railway Service first of all in what year? I think about 1880, as goods clerk, at Blayney.
1908. How long were you at Blayney? About twelve months.
1909. From there you went to —? Wellington.
1910. Still a goods clerk? Yes; I was goods clerk there and travelling paymaster. I stayed there about two years; then I removed to Sydney; and I was appointed to do the single duties of travelling paymaster, &c., which I continued to do for two years further.
1911. Then after that? After that I retired, I left the Service.
1912. I suppose it was while you were goods clerk you had an opportunity of becoming acquainted with the practice of the railway with regard to the payment of the carriage of goods? Yes.
1913. You have heard of this system which was spoken of as averaging? Yes.
1914. When did you first hear it spoken of? When the clerk whom I was relieving, or was about to relieve, was instructed to leave for Sydney or some other place, he was asked to instruct me how to proceed with the duties, because before then I had been in a mercantile firm. I took my instructions from him, and carried them out. There was never any question raised as to whether I was right or wrong, and I always pursued the one practice both at Blayney and at Wellington.
1915. You got these instructions before you acted at Blayney? Yes; before I was left in charge.

1916.

F. Farnell,  
Esq., M.P.

29 April, 1889.

1916. What was his name? Pickering. He was acting as relieving clerk, pending my appointment, which was made by Mr. Lackey.
1917. In the system in which he instructed you as part of that system, was there a recognized practice called "averaging"—that is with regard to the transactions in wool? Yes; more particularly was it adopted at Wellington, where there was a greater wool traffic than at Blayney. While I was at Wellington I had to instruct one or two probationers. One was named Lambert, who gave evidence in the Wright-Heaton case, and he bore out the statements I make now.
1918. Do I understand you to say that that was the system which you had learned from Pickering? Yes.
1919. I want you to describe the system fully, not only as it applies to one particular weight of bales, but the system called "averaging" fully? There were two ways of averaging. For instance, you might get a lot of wool in and weigh it, and in the aggregate it would weigh a certain weight. Well, then you take the number of bales, and then you divide it in the weight, and see what they give under the regulations which provide for a certain charge—under 250 lb., under 4 cwt., or under 5 cwt., and upwards; but where there were a certain number of bales in the one consignment of different qualities of wool (say ten bales weighing a certain weight, and fifteen bales weighing another certain rate, I presume them to be put down that way to distinguish the qualities of wool. As a means of doing justice to the consignees as well as to the Government, I used to see how many I could put under—it might be 4 cwt.—and how many under 250 lb., so as to make the weight total up.
1920. In making the calculation, did you take notice at all of the actual individual weight of bales, or did you only take notice of the aggregate weight? Well, it would have to be divided by the aggregate. Some of the bales would probably weigh 5 cwt.; but then there would be others weighing only 220 lb., some only 4 cwt. I used to take the aggregate and divide it, and see how many I could put under 250 lb. and how many under 4 cwt. and 5 cwt. I regarded it as unjust to the consignees if I charged them ten bales of wool under 4 cwt., when there were bales in the consignment weighing only 3 cwt.
1921. I understand that as you understood it and acted upon it this rule of averaging applied as much to the 250 lb. standard as it did to the 4 cwt. standard? Yes.
1922. You are aware that a notification was issued by the Department dealing with the question of averaging under and over 4 cwt. specifically? I do not remember any such notification.
1923. Did you never see it? No; I simply went by the regulation laid down in the merchandise rate-book.
1924. You say the system of averaging, so far as you know, applied to 250-lb. bales as much as to 4-cwt.? Yes.
1925. This was in spite of the existence of the general order, dated December, 1881, and of the existence of the rule which it applied to, supposing there was such a rule? Yes.
1926. You say that, in spite of the fact that this memo. assumes you to know the individual weight of the bales, you could not practically know the individual weight of the bales, and therefore could not act on this memo.? Yes.
1927. But was it not possible to get the individual weight of the bales from the way-bills, supposing they were shown to you? Yes; if they were shown; but they were given to the agents—to Wright, Heaton, & Co., or to Permewan, Wright, & Co.; and I presumed they made out the consignment note for the Railway Department from the weights supplied by the station-holders. I may say that if there was any doubt as to the weight of the bales, the carriers (especially Wright, Heaton, and Co.), were required to show their consignment notes. I know I have, on some occasions with their goods, asked for consignment notes, and found everything correct.
1928. Did you ask for way-bills? Yes; and they were always at my disposal.
1929. They would have shown the individual weight of the bales? Yes.
1930. Then it really was not material to you to know the individual weight of the bales, but only material to know the number of bales and the aggregate weight? That is all. I looked to the head porter for the aggregate weight of the trolley-load of wool, and I based my calculations accordingly.
1931. You never heard of the limit of the 4 cwt. and 14 lb. as being the limit above which you must charge the individual bale at 15 per cent. increase? I am pretty well sure I did not.
1932. With regard to your making out the consignment notes, in point of fact when wool came through by any of the carriers, did not they make out the consignment note themselves, and then it was for you to accept or reject them? Yes.
1933. Would you reject a consignment note if you saw something wrong? Well, it was not my place to see whether the weights were right or wrong. My duty was to invoice them according to the rates laid down for my guidance in the merchandise rate book.
1934. The invoices, as far as the weights are concerned, are founded upon the consignment note? Yes; upon the consignment note and the weights given in by the head porter.
1935. How was it you had to be instructed in the system involving averaging if it was only your duty to make out the invoices, and if the invoices were entirely founded upon the consignment note;—what I mean is this: if you made out the invoices entirely on the basis of the consignment note as far as the weights went, then you have nothing to do with the practice of averaging, because that deals entirely with the making out of the consignment note, does it not? Well, in some cases it does, in others not. If a man came in with say twenty-five bales to send to Sydney, they would be weighed and I would take an average. But in many cases these consignment notes were made out by Wright, Heaton, & Co., and I presumed from the station way-bills in charge of the carrier; but in all these cases the aggregate weight agreed with the weight which they had on the invoices—which they had on their way-bills.
1936. But if you were making out the weights for a man who brought his own wool in and had no one to help him—a "boss-cockey"? Well, in such cases, the wool would be run over the weigh-bridge and the weight brought to me, and I would make out a consignment note for him and let him sign it.
1937. And in that case did you never ask him for the weight of individual bales? No.
1938. In point of fact he would have the weights of his bales if you thought necessary to get them? No.
1939. Do you consider this legitimate according to the system.—Supposing a man has the weights of his bales given to him, was it legitimate according to the averaging system, as you took it, to so vary the actual weight of the bales as to bring as many bales as possible under each particular standard so long as the aggregate weight was kept correct? I always recognized that as perfectly legitimate as between the consignee and the Government. I always recognized that, and would not give the Government any advantage over the consignee, or let the consignee have any advantage over the Government. 1940.

F. Farnell,  
Esq., M.P.  
29 April, 1889.

1940. Then you took it that the bale system was a convenient approximation to a tonnage rate really, and that the standards were put as averages, on which a certain charge was to be made, not the maximum weight of the bales, but the average weight of the bales to be charged at a certain rate? Yes.

1941. The Government considered that 5s. for 250 lb. carriage was fair, not that 5s. was fair for something under 250 lb., but they would let bales up to 250 lb. go at that rate? Just so. I think it was done this way. The agents made out their consignment note from the way-bill sent in by the squatter. They looked through the individual weights of every bale, and when they saw them under 250 lb., they would say—so many under 250 lb., or they would say—so many over 250 lb. and under 4 cwt., and they would put so many at this weight. But in all these cases the aggregate weight corresponded with the weight which was taken by the Railway Department in taking the weight of the whole consignment of the trolly.

1942. Yes; but they varied their weight from the actual weights, lowering some and raising others? Yes; but in all cases the aggregate weight amounted to that given in by the man in charge of the weigh-bridge.

1943. Reducing the aggregate would be to your mind a fraud? Yes. If it had been shown that an aggregate weight of a lot did not amount to the same weight as the weight handed in to me by the head porter, I should have thought there was something wrong. But I never knew this to be done.

1944. Did you ever know of any general system of understanding the aggregate by Wright, Heaton, & Co.? No. I have in reference to other people who have sent goods—not wool; and we have refused to receive them and weigh them, and found the weights larger than they represented them to be. But I never remember any such case in connection with Wright, Heaton, & Co.

1945. Did you ever hear questioned either the legitimacy or the propriety of this system? Never.

1946. I understand you to say that you applied the system yourself to the wool of these men who could not make out their own consignment notes.

1947. That you are quite sure about? Yes; where the men were ignorant of the regulations or of how to make out a consignment note.

1948. These were not many, I suppose? No.

1949. How many? Oh, I suppose about half-a-dozen in a season.

1950. You heard Mr. Abigail in 1885 ask certain questions in the House, and know there was a good deal of talk about the matter? Yes. I had left the service then and stood for Central Cumberland. I was defeated, and was reappointed to the service, and remained about eight or nine months later, and then we had another general election.

1951. When you heard of all this talk about charges and understating and all that sort of thing, did you then bring your mind to bear upon this question at all, as to whether anything peculiar had been going on? Yes; it was brought under my notice more prominently by the fact that Mr. Kirkcaldie made some remark as to calling me as a witness for the Crown, and I told him that it was no use calling me as a witness, because I was one of those who did not believe in the alleged frauds, and had carried out the same system when I was goods clerk. I also called upon Mr. Goodchap, and the matter cropped up, and I told him I was going to give evidence against him. He said, "What evidence are you going to give?" I answered, "I shall state what were my duties."

1952. In the course of your conversation with Mr. Kirkcaldie or with Mr. Goodchap, did they seem to be themselves certain at that time as to what the practice of the Department was, or did they themselves seem to be in any doubt about it? I think not. I think they were pretty sure that the Railway Department had been, I will not say robbed, but that what was due to it properly had never been received, or that what it had properly earned had never been received.

1953. Neither seemed to have any belief in the "unwritten law" of the Department as it was called? No.

1954. But still I understand that so far as you understood it, this system was actually practised by the Department? Yes; I did what I believed was just and fair; dealing fairly by the Department and by the consignees; and it was never questioned.

1955. This system resulted in fact in the wool being sent down as cheaply as the aggregate weight could be sent down in the number of bales? Yes; that was the result. If I had to charge a consignment of ten bales, weighing in the aggregate 35 cwt.—there being five bales over, 250 lb., and five bales under 4 cwt, and I charged ten bales under 4 cwt.; I should be charging the consignee for 5 cwt. which the Department did not carry.

1956. I suppose you do not know anything at all about any other part of this matter. Is Mr. Fehon a stranger to you? I never met him till the other day at a deputation. I had never been introduced to him.

1957. Of his former history you know nothing? No; except this—that when the charges were brought against him by Mr. Want I was one of those who spoke in the House, and said I was surprised that Mr. Want, having possession of these facts, had not communicated them to someone before. There was a man named M'Mahon who once told me that Mr. Fehon was connected with the firm of M'Culloch & Co. I knew nothing about Mr. Fehon until he was appointed.

1958. You knew nothing about his connection with Wright, Heaton, & Co? No.

1959. Had you any dealings in your capacity as goods clerk with M'Culloch & Co.? No.

Henry B. Copeland sworn and examined:—

Mr. H. B.  
Copeland.

1960. *The Commissioner.*] What is your name? Henry B. Copeland.

1961. What are you? A clerk in the Lands Department.

1962. You were once in the service of Wright, Heaton, and Co.? Yes.

29 April, 1889.

1963. When did you first go into their service? I left in February, 1885, and had been there then, I think, a little over two years and six months.

1964. In what capacity? As clerk.

1965. In what part of the office? In the "Inwards Department."

1966. Railway inwards? Yes; goods coming to Sydney.

1967. Were you aware of the whole practice of the office with regard to the Railway Inwards Department? Yes.

1968. Now, as to consignments of wool especially will you tell me what the practice was in dealing with the documents showing the weights and the charge of wool consigned and carried by train from places in the

Mr. H. B.  
Copeland.

29 April, 1889.

the country to Sydney through Wright, Heaton, and Co.? In the first instance, the wool was brought into the railway station. Of that part we knew nothing. We simply got the invoices from Wright, Heaton, & Co.'s agent at the railway station. Of course he set the railway invoice notes attached to his invoices; that is, he would send the railway waybills and the station waybills.

1969. The station way-bill showed the weight of each bale, I suppose; I mean the wool-producing station? Yes; in some cases they would get the detailed weight.

1970. That was one document; the other document was from Wright, Heaton & Co.'s agent to the agent in Sydney? Yes.

1971. What did they show? They showed the detailed weight.

1972. Then there was a consignment-note; did that come too? Yes. That would show a certain number of bales and the detailed weight of that number of bales.

1973. I suppose it did show the number of bales, and the standard at which the bales were charged? I think so.

1974. What was done with those documents when they came down to the office? They were checked; but if we knew the agent was a trustworthy man we would not check them.

1975. What did you check them with? With the station way-bills.

1976. Whose hands did they pass through? Mostly Mr. Heaton's. Mr. Wright was most of the time Minister for Works, and had not anything to do with the office.

1977. After opening them what did he do with them? Passed them on to us.

1978. Then after that? They were kept in our hands.

1979. Did Mr. Heaton examine them himself personally? I could not say.

1980. Did he make comments upon them on any occasion? No, not that I know of. Of course some letters contained cheques. He would sort the letters and distribute them among the clerks. He would give the cheques to the accountant and the way-bills to Stephenson.

1981. Oh, you were under Stephenson? Yes. He was the Inwards clerk.

1982. You cannot tell whether Mr. Heaton compared the consignment notes and the way-bills? I do not think he did, because he would not have time.

1983. In the thick of the wool season how many would arrive? Oh, in the wool season we used to be at the office at all hours getting through the work. I am sure Mr. Heaton would never have had time to go through them.

1984. Was there anyone there to compare the weights on the way-bill with the weights appearing on the consignment note? No. Stephenson and myself would keep them after we had checked them. All we checked was the brands; the weights did not trouble us at all. We used to see that the brands were right, and then we would put them away.

1985. As to the system upon which the clerks at the different stations had made out the consignment note, was not it your duty, or Stephenson's to see that they had not made mistakes? Well, I had very little to do with that. Stephenson used to check the rates from the different stations. I had very little to do with that. A times he used to check them, but not always.

1986. Do you remember Mr. Wright or Mr. Heaton calling Stephenson's attention to a particular consignment note as having been stupidly or badly made out? He would frequently call his attention to mistakes that had been made.

1987. What sort of mistakes? I really could not say.

1988. Do you remember his calling attention to the fact that a manager at an out station had not given the firm sufficient advantage of a system called averaging? No.

1989. Did you hear of a system called "averaging"? I knew there was something of the style in vogue, but what it was I could not say; my business mainly was making out accounts.

1990. What accounts? As they came down I would charge for the railway carriage, and the first carriage by the teamsters, and the commission. I would send these accounts to the different consignees.

1991. A different account would be made out in the case of contract wool and wool not sent by contract I suppose? Well, the contract wool charges used to be made out at the up country station at contract rate, and all we had to do was to charge it on to the consignees.

1992. Then when you had to charge commission, that would be wool that was not contract wool? Yes.

1993. What proportion of this was there? It was mostly non-contract wool.

1994. Well then in that case you would have to make out an account against the consignee showing the charge for cartage to the railway station, the railway carriage, and commission? Yes.

1995. On what basis did you make the charge for the railway carriage? Simply on what was charged.

1996. The railway freights used to be added on after the way-bill came to Sydney? We used to get tickets from Darling Harbour. What came in the way-bill was simply the carrier's charges. The invoice contained only the carrier's charges, and the railway freights used to be charged at Darling Harbour. We used to add this on.

1997. Did you add on the actual charge made at Darling Harbour, or did you add on a charge calculated on the basis of the weights appearing in the way-bill? I believe that nearly everything was charged according to Darling Harbour tickets.

1998. The contract charges were for weight, so much per ton apart from the sizes of the bales? Yes; I think so. But we simply used to make a contract with the station and carry it at one rate so much per ton.

1999. You would, in that case, get your actual weight from the way-bill? Yes, and from the consignment note.

2000. Did you not, in the case of non-contract wool, make out the accounts sent on to Sydney consignees from the weights given on the way-bill? I do not think so.

2001. How did you make them out? From the Darling Harbour bills.

2002. By repeating the charge? Yes.

2003. Are you sure that contract wool was less in quantity than non-contract wool? Well, it is four years since I was there. I would not be positive, but I am pretty certain there was far more non-contract wool than contract. But at that time there had been bad seasons and that might account for it.

2004. You cannot say how these accounts of non-contract wool were made out? Oh, yes; from what I can remember the only charges were carriers and the railway note which we received, and which we used to add on to the back and our commission.

2005.

Mr. H. B.  
Copeland.  
29 April, 1889.

2005. Are you sure that you did not in the case of non-contract wool take the weights of the bales out of the way-bill and calculate what the railway charges would be upon those bales taking them by their individual weight? I know what you mean; but I never did it, and I do not know that Stephenson did it.
2006. It would involve a great deal of labour? Yes; and considering that we were kept back in the office until midnight throughout the season we had no time to do it.
2007. You say you remember comparisons being made for checking the work of men in the country? Yes; I cannot remember who they were. But I know there were one or two men at the stations who were continually making mistakes; and it was Stephenson's business to correct them. But as to charging consignees with that sort of thing, so far as I know, it was never done.
2008. Did you ever hear such an expression as "foxing," or any such term in the office in relation to the carriage of wool? No.
2009. Stephenson did say that Mr. Wright used to come to him in the morning with the invoices and squatters way-bills and the railway consignment rates, and point out peculiarities in the weights of the wool and that kind of thing. Do you remember that occurring? No; of course Mr. Wright was only there a short time when I was there.
2010. Do you remember Mr. Heaton doing it? No.
2011. Do you remember a letter being written by the office to local managers with regard to the way in which they were carrying on their business? Yes; we used to write memos, and letters telling them of the corrections which had been made, so as to make the books agree.
- 2011½. Do you remember comments being made by Mr. Heaton or by Mr. Wright to the effect that some of these men had not put a lot of bales under the 250lb. standard which they could have done. No.
2012. I suppose you know of the existence of the 250lb., the 4 cwt., and other standards? Yes.
2013. And you knew that they were the basis of making out railway charges? Yes.
2014. Did you yourself ever go into the question as to how the railway charges had been made out on particular consignments? Oh yes; I used to check them, but I never found any "foxing" work going on.
2015. What would you define "foxing work"? Well you asked me if I had heard of this.
2016. Yes. I mean if you had heard of the expression? Well I never found that there was any hanky panky work going on.
2017. When you examined the consignment notes, did you find that they were made to tally with the actual weights of the way-bill except in the aggregate? I should think it was only the aggregate.
2018. You say there would be a certain number of bales, and a good many would be a little over 250 lb., some a little under (I mean on the weight), some under 4 cwt. and some over—did you take into consideration at all those actual weights, and see whether the weights given in the consignment note tallied with those, or did you merely take the aggregate, and see if the aggregate weight given in the consignment note tallied with the aggregate weight on the way-bill? I looked after the aggregate to see if that agreed with the consignment note.
2019. Then you did not compare each bale? No.
2020. So the way-bill might show not a single bale under the 250 lb. standard, and yet the consignment note might show several bales under the 250 lb. standard? I do not think so.
2021. Do you know anything about the system of averaging? Yes; but I think it only showed the aggregate weight and number of bales. When I used to check them, I used to count up the number of bales on the consignment note, and the number on the way-bill, and as a rule these agreed.
2022. But not always? Well, no; because sometimes the department would get some other person's wool in the consignment.
2023. Well then you did not see whether it involved the system of averaging? That was the plan of the up-country people. What I had to find out was whether the railway people had charged the full amount. I would have to see that I had the consignment note from the railway people for the full number of bales of wool.
2024. After the railway people had made out their charge did you question the fact of whether they had charged you for the wool you had to charge the consignee for? Yes.
2025. The consignment note was in fact made out by Wright, Heaton, & Co's. agent? Yes; but the railway people at Darling Harbour used to send us the ticket for the value of the railway rate.
2026. That ticket was supposed to be based on the consignment note? Yes.
2027. Half the consignment note was kept by the department and transmitted to Sydney, about the same time as the wool, to arrive not later than the wool? Yes.
2028. And another part of it had to go to the local manager and that part was sent down to Wright, Heaton, & Co.? Yes.
2029. Is there a "butt" kept for the Railway Department? No. One part is in the possession of Wright, Heaton, & Co., and the other in the possession of the railway people at Darling Harbour.
2030. Did you know anything or see anything of Mr. Fehon while you were in the office? Well, I really could not say. I believe that he used to attend the meetings, but as to whether he did, I would not swear, because I would not know the man if I saw him.
2031. You don't know him by sight? No.
2032. Did he ever come into the office? Well, I understood he was connected with Messrs. M'Culloch & Co. I could not swear that he came to our place, not knowing his name; but if he were to walk into this room now I should not know him.
2033. How came you to know his name? Well, M'Culloch's people used to come to the office, and Mr. Fehon might have come.
2034. Did you ever see Mr. Fehon examining the work of the office there? No.
2035. If he made any examination it would be at the meetings of the Board-room at which you would not be present? Yes.
2036. Or as to whether he knew or did not know anything about the internal working of the office, you know nothing? I know he used to attend the Board meetings; but he never came into the office itself.
2037. You were subpoenaed to give evidence for the defence at the trial of Mr. Wright, Heaton, & Co.? Yes.
2038. Did you know beforehand what sort of general questions would be put to you? No.
2039. Have you told me all you consider material touching this matter? I think so.
2040. Did you read Stephenson's evidence before Sir James Martin or before the Police-court? Yes; I fancy so.
- 2041.

2041. Did you notice anything peculiar about any of his evidence? From what I know, he was not speaking the truth. Of course he might have been speaking the truth.

[Witness here reads Sir James Martin's notes (printed) of Stephenson's evidence.]

2042. *The Commissioner.*] Having read Stephenson's evidence, is there any remark you would like to make on it? Well, I fancied all through that he was telling lies.

2043. In what respect? Well, I thought if any dirty work was going on it was done by himself, because I do not see how Mr. Wright or Mr. Heaton could do it.

2044. What sort of a man was Stephenson, as far as you saw of him? He was a peculiar sort of man.

2045. I mean was he a straightforward man, or otherwise? He was straightforward as far as it suited him. Mr. Wright used to speak sharply to him sometimes about mistakes, and he would prevaricate and do anything to get out of trouble. He seemed to be always frightened to go in to speak to Mr. Wright and Mr. Heaton. I do not know why. My idea of his turning Queen's evidence was to pay them out for snubbing him.

2046. What snubs had he received from them? Well, sometimes he would make mistakes. He was a very peculiar fellow. I do not know whether he was a Catholic or an Orangeman, because he used to slate both Mr. Wright and Mr. Heaton because one was a Catholic and the other an Orangeman. Mr. Heaton was a Catholic, and Catholic priests and sisters used to come into the office, and Stephenson used to pass nasty remarks about them. He also used to make nasty remarks about Mr. Heaton. He cared for neither of his employers.

TUESDAY, 30 APRIL, 1889.

Mr. William Meeke Fehon attended and put in two letters received by him from Mr. J. M. Williamson, of Victoria, concerning the question of the mention of his name by Mr. W. J. Lyne, M.P., in giving evidence herein.

2047. *The Commissioner.*] Are there any men in town now from Melbourne who are acquaintances of yours, or who know your history? There was a gentleman from Melbourne who knows me in Sydney yesterday, but he has gone to the Mountains. He has known me for twenty-five years. But I have made up my mind that I will not call a single witness. If a charge were brought against me I could easily answer it.

2048. This is not exactly a charge against you—it is an inquiry to elicit the truth? Well, I wrote two letters to Sir Henry Parkes, and if no statement is made to disprove these letters my case is complete. Mr. Williamson was a lad when I was in the Victorian Railway Service. Mr. Want, in the House, said that if the Parkes Government knew what the Jennings Government knew they would never have appointed me. Mr. Lyne said he had an application from me for one of the Commissionerships; and then he began to make inquiries about me. Now that was a long time afterwards—at all events it was after the Wright-Heaton prosecutions. Then again, Mr. Williamson says that Mr. Lyne began to make inquiries after I was appointed Commissioner.

John Henry Want, Q.C., sworn and examined:—

Mr. Fehon was present.

2049. *The Commissioner.*] Your full name is—? John Henry Want.

2050. You are now Member for—? Not yet. I am elected Member for Paddington, but am not yet sworn in.

2051. Mr. Fehon is a stranger to you? A perfect stranger. I have never seen him in my life before.

2052. It was, I think, in December last that the question of the propriety of Mr. Fehon's appointment first came up in the House? The first time it came up to my knowledge was when it came up in the House in December.

2053. On three occasions you spoke on the subject in the House, and finally on the motion for adjournment which caused the resignation of the Government? I think only once before the motion for adjournment.

2054. To go into the older part of the subject-matter—do you of your own knowledge know anything of the facts connected with Mr. Fehon's resignation of his post in the Victorian Railway Service? Absolutely nothing; only from hearsay.

2055. Have you made any particular inquiries about it? I received two letters from some man whose name I cannot give now, but I will at a later date, for I have only just arrived, and have not had time to get them.

2056. Have you got the letters? No; I gave them to Mr. Melville when I went away in case anything should arise in regard to this matter during my absence. I cannot now remember his name, but it was someone who gave me authority to use his name if I liked, and he was connected with the Railway Department; I will get the letters. And in addition to those letters, I heard things from others whom I cannot recollect now. I must candidly admit those were only rumours.

2057. What were those rumours? That the firm of M'Culloch & Co., of which I ascertained beyond all doubt that Mr. Fehon had been a partner, had received certain privileges. I ascertained that before Mr. Fehon became a partner he had been, I think, chief clerk in the goods department in the Victorian Railways; that afterwards he was appointed Traffic Manager; that after being so appointed Messrs. M'Culloch & Co. had greater privileges granted to them than any other carriers; that it was alleged that it was through Mr. Fehon that they obtained those advantages; and I may say that I was told that Mr. Lakeman, who was a Member of Parliament, could, to a great extent, substantiate those statements. Mr. Lakeman was not sitting in his place in the House when I returned, and I had no opportunity of seeing him. But I was also told by several other Members of the House that Mr. Lakeman had informed them that every one knew at the place—I think it was Bourke—that if they wanted any privileges on the railways they had to send goods through M'Culloch & Co.

2058. Was it Bourke or Hay? I cannot remember. That was the first information I received with regard to them.

2059. Do I understand you to say that the principal authority you were referred to was Mr. Lakeman as to this Victorian business? I think so. But I may say that I was told that if I searched the records of the Parliamentary debates in Melbourne I would find that some question had arisen before the House there

Mr. H. B.  
Copeland.

29 April, 1889.

W. M.  
Fehon, Esq.

30 April, 1889

J. H. Want,  
Esq., Q.C.

30 April, 1889.

J. H. Want,  
Esq., Q. C.  
6 April, 1889.

there as to Mr. Fehon having given undoubted privileges to this firm. I arrived back here without having an opportunity of seeing them, and I have never seen them. But I was told that some question had arisen in the Victorian Parliament on the matter.

2060. Do you remember Mr. Orr's name being mentioned? No. I never heard of any name in connection with it, but simply the general statement that there had been a debate in the House with regard to Mr. Fehon having given undue privileges to Messrs. M'Culloch & Co., and I then ascertained that immediately after Mr. Fehon's leaving the railway service he became a member of Messrs. M'Culloch & Co.'s firm. Then I came back to Sydney.

2061. Where were you? In Melbourne. When I was there the news of Mr. Fehon's proposed appointment appeared in the Melbourne papers. I made inquiries as quickly as I could, and I came back to Sydney and found that he was appointed. At that time I had written out a proposed vote of censure on the Government with regard to Mr. Fehon's appointment from what I had previously known and heard. I then had no time, and I could not get sufficient information to justify me in proceeding with a direct charge against Mr. Fehon of what I thought at the time had been brought against him with regard to the Victorian question; and in the state of public business then I did not proceed with that vote of censure. But when I say I intended to move that, I intended to move it in connection with some other information I had obtained with regard to Mr. Fehon's connection with Messrs. Wright, Heaton, & Co. I mention this to show that these two things were together when I contemplated this. Those are the only grounds I had with regard to the question of the Victorian matter.

2062. Now, can you remember the name of any particular person who either gave you information on this first matter—information, that is to say, not referring to the third person, or the name of any person to whom you were particularly referred? No. I can only give you that one whose name I have already referred to; the other was general information with regard to clubs and other places. I cannot remember even this, but if I could I should not.

2063. When in Melbourne, did you gather that these were old rumours merely mentioned as matters of history, or were they existing (still alive) rumours? They were still-alive rumours, though some time before the thing had taken place there were rumours. Men said, "I see you have appointed Fehon a Railway Commissioner. You had better see what was said about him with regard to M'Culloch & Co., and his resignation from the railways here."

2064. Without mentioning the names of any particular persons but knowing the connection in which these conversations occurred, can you say whether or not they appeared to you to be intended as assisting you in any attack which you might wish to make upon the then Ministry, or were they spoken in the interests of the country? Certainly not. Knowing I was a Member of the Parliament of New South Wales, they simply talked in an off-hand way, as who should say, "What a funny appointment"; and not as an attack upon the Ministry; and I do not see how it can be said that it was an attack upon the Ministry.

2065. You had in your mind another reason why you thought it doubtful whether Mr. Fehon should be appointed? Yes. This matter was a minor one to me, and you will find in *Hansard*, page 1038, in December, the following words which I used in my speech in the House:—

Then, again, with regard to the appointment of Mr. Fehon. He had never made in this House an accusation which he was unable to prove. He was not in a position to charge Mr. Fehon with anything, but he could only say that if the members of this Government had had brought before their knowledge what was brought before the Dibbs and Jennings Government, when he occupied the position of Attorney-General, he was perfectly certain that they would have received information which would have shown that this gentlemen was not fit for the appointment.

Subsequently, on 9th January, in the House (*Hansard*, January, page 1512):—

I said distinctly that I made no charge against Mr. Fehon, because I was not able to prove one, and all that I said was—and I can refer to *Hansard* to show that I am correct—that the Jennings Government were in possession of facts, which, if this Government had known, would have disentitled Mr. Fehon to the appointment he had received at the hands of the present Government. I said nothing more than that, and I made no charge; and it was only when the honorable member for Camden (Mr. Garrett) and the Premier charged me with corruption in the discharge of the duties of my office in not prosecuting Mr. Fehon, and when the Premier told me in so many words that he did not believe what I said, that I felt compelled, in justification of myself, to point out what I really did know when I occupied the position of Attorney-General.

Immediately Mr. Fehon gave his explanation with regard to the question of his resignation of his Melbourne appointment, I stated, as I am reported in the January number of *Hansard*, that I was quite willing to accept Mr. Fehon's explanation with regard to the matter, so far as I was personally concerned.

2066. Having got the information which you had got, and then reading what Mr. Fehon had written in reply touching this matter, did you, in point of fact, then feel that you were justified in making any further attack upon him in relation to that matter on the ground of those rumours? Yes; but forgive me for saying that I have made no attack upon Mr. Fehon in any shape. I have only asked for an explanation which should honorably acquit him; and if, on the other hand, he could not give an explanation, that he should be dismissed from his position. I should be pleased if Mr. Fehon satisfied me and the Government. All I asked for was an explanation.

2067. To your mind, having heard what you had heard, and having had the opportunities you have told me you have had of making inquiries in Melbourne, being in that condition of mind, was Mr. Fehon's explanation, which he then made, a satisfactory explanation, so as to really exonerate him from anything like serious suspicion in relation to that part of the matter? Mr. Fehon's explanation as regards that matter alone was sufficiently strong to weigh against what was mere rumour, which I had heard, and I was therefore willing to accept that statement, sooner than rely upon what I have already said was only the hearsay of others, and I said so publicly.

2068. You mean that the information was of such a nature that to your mind it was fairly answered by the specific explanation given? Yes; I said in the House in January (*Hansard*, page 1511):—

A prominent matter has been made of the question of Mr. Fehon's resignation from the Victorian railways. That was not my charge against him.

That Melbourne question was not the thing that weighed with me; it was something much more important. 2069. That something which you considered more important had been in your mind from the first? Yes. And when I was in Melbourne and heard certain things, it was the fact of my knowing something else previously which fixed the matter more strongly in my mind.

2070. And made these rumours much more effective in your mind? Yes. In fact I should have paid no attention to those rumours, because they were not sufficient for me to act upon by themselves alone.

2071. Can you say whether the fact that you knew something apparently affecting Mr. Fehon's character had anything to do with your receiving the information about him which you did receive. Did the persons who gave you the information know or not know, at the time they spoke about it, that you yourself had something in your mind? They knew nothing whatever about it. And I may say that the facts which I knew at first were not sufficiently strong even for me to have felt justified in communicating them to anybody as an existing fact, until I returned from Melbourne, and searched for evidence in Sydney, which corroborated the evidence which I had received before I went to Melbourne.

2072. Are you sure when you say that you did not allude in any way to Mr. Fehon, as someone against whom there was a suspicion arising from something which you knew? Not a word. I think I have said it was simply a question of rumour in Melbourne. I think I may state here, what I knew before I went to Melbourne, was from persons who had themselves admitted that they had been equally guilty with those whom they said Mr. Fehon was associated with. I did not place sufficient reliance in their word alone to feel justified in damaging any man's character by giving that publicity. I returned to Sydney. I made search at the Registrar's Office and other places, and inspected papers in the Crown Law Offices, and those, to my mind, confirmed what I had been told before I went to Melbourne; therefore, I am perfectly certain from recollection and from what I know would have been my course of conduct, I never mentioned a word to anybody, in any shape or form, in connection with Wright, Heaton, & Co.

2073. But while you were in Melbourne, where you knew Mr. Fehon was known, you considered you had rather a good opportunity of finding out something more about him? I think I was only two days in Melbourne after I heard of Mr. Fehon's appointment, and I had very little opportunity of searching to find out anything.

2074. Did you know that Mr. Fehon was likely to be appointed before he was appointed? The first thing I heard of it was when the news came to Melbourne; and when I heard the name, I was not certain whether it was the name I had heard in connection with Wright, Heaton, & Co.

2075. Then it stood this way—that some years before you believed that a Mr. Fehon had been in some way connected with Wright, Heaton, & Co? Yes—that I had been informed so.

2076. That you knew Wright, Heaton, & Co. had been guilty of fraud? I knew that they had been prosecuted.

2077. And you went to Melbourne on pleasure? Yes.

2078. And when there you learnt that Mr. Fehon was likely to be appointed Commissioner? Yes.

2079. And that was the first time you heard of the likelihood of Mr. Fehon being appointed? That is so.

2080. And then the two names became associated in your mind? Yes.

2081. And then you thought he might be the same man? I thought it might be so.

2082. And then came these rumours? Yes; people used to say, "I see you have appointed our old man Fehon. I suppose you know nothing about his having to resign from the Victorian Railway Service for his connection with Messrs. M'Culloch & Co."

2083. You were Attorney-General in 1886, when what were known as the wool fraud prosecution was instituted? I was. The inquiry, and the search into the matter commenced long before that. It commenced by a question asked by Mr. Abigail in the House with regard to some bales of wool, and I was not in office then.

2084. Do you remember when you did go into office? I cannot. There had been a question asked with regard to the carriage of some bales of wool before I was in office. I then went into office, and the matter was further proceeded with by Mr. Abigail with some other questions.

2085. You were Attorney-General during the whole time that the Government was taking cognizance of the subject matter of the criminal prosecution in connection with the alleged wool frauds? That is so; from the beginning to the end of the first trial; from the inception of the inquiry to the conclusion of the first trial; and I may add, that of course there were three or four other firms also implicated in similar transactions.

2086. As Attorney-General, you went into the whole matter, I suppose, as carefully as you could? I did. I took a great deal of pains.

2087. And you did your best to get all the facts? Yes. It was a question of work day and night. We had to go through documents and papers relating to Wright, Heaton, & Co., and it was the hardest job I ever had in my life.

2088. I suppose one element in getting up the case was; who were to be prosecuted? Yes. It was a question of which firm should be prosecuted, and what members of each particular firm should be brought within the pale of the law.

2089. Now in the course of making these inquiries, did the name of Mr. Fehon come up? In the first instance, no, except in this way. Two men in Wright, Heaton, & Co.'s employ, whose names I forget, turned informers.

2090. Was Stephenson one? Yes. They gave me information to the effect that a certain firm had been connected with Wright, Heaton, & Co., in carrying out these, what were called "Wool frauds"; but there were tobacco frauds, and frauds in connection with other kinds of produce; but they were generally known as the "Wool frauds"; they embraced tobacco and many other things. The firm which these men mentioned as being in connection with Wright, Heaton, & Co., was Messrs. M'Culloch & Co. Messrs. M'Culloch & Co. being a Melbourne firm, and as I thought harder to get at than any of our own. I first of all made inquiries as to who were members of Messrs. M'Culloch & Co. from their men. They then told me that Messrs. M'Culloch & Co. (and you will find this on record in the papers in the Crown Solicitor's Office, I have seen them there, I think, lately) were directors in Wright, Heaton, & Co.

2091. Do you mean the papers in print? No. It is printed in blue type. At all events these men told me exactly the same as was set up in the Wright-Heaton case—that Messrs. M'Culloch & Co., were shareholders in Wright, Heaton, & Co. during the time that these wool and tobacco frauds were being carried on; that a member of the firm of Messrs. M'Culloch & Co. was in the habit of coming over here to represent Messrs. M'Culloch & Co., who was supposed to be on the directorate; that is to say Messrs. M'Culloch were on the directorate, and a member of their firm came over here to represent them; that they came over every month or two; that as they had large interests in the business they used to make inquiries as to how everything was going on, and they took their place as directors and inquired into the business of

the

Esq., Q.C.  
30 April, 1889.

the firm in which they took an active part. I was then told that Mr. Fehon was the name of one who had come over most frequently and, to use their own expression, that he was one of the "bosses" of the firm; that they used to be sent out to outlying places such as the end of the termini; that Mr. Fehon was one of those who took the most prominent part. I have some difficulty in remembering the name of the second gentleman. I was told that Mr. Fehon inspected the books, of course I took no particular notice of Mr. Fehon's name then, except that I wanted to see whom I could connect with Wright, Heaton, & Co.

2092. Any other information? At that time no, except this: that in the defence that was set up you will find on record in the papers, which I will find, that the defendants, or their counsel in the course of his address, stated that Messrs. M'Culloch & Co. were partners; that they were directors in Wright, Heaton, & Co.

2093. Did that statement appear to implicate the members of the firm of M'Culloch & Co., to connect them with the internal working of the firm, or only to show them as directors? Only to show them as directors.

2094. How was it it became apparently material to the question of the guilt of the accused what relation Messrs. M'Culloch & Co. had to them? Because we proposed, if we could, to prosecute M'Culloch & Co. as well; and then to find out who they were we had to find out the members of the firm. When I found out the members of the firm, and heard that one of them came over, it led me to ask which of the firm came over to Wright, Heaton, & Co., and then I thought that if I could establish Mr. Fehon's connection with the firm sufficiently to show that he was aware of what was going on, I should have included him with Wright, Heaton, & Co., and then with Messrs. M'Culloch & Co.

2095. Yes; but you say that the statement that Messrs. M'Culloch & Co. were connected with Wright, Heaton, & Co. was made either in the course of statement made by one of the accused, or else in the course of the address of counsel for the accused? It arose in the first instance from the statements of the informers themselves in this way: I was getting through them the names of all those who I could show had actually taken an active part in connection with the carrying out of those frauds, and I wanted to ascertain who there was in Wright, Heaton, & Co.'s firm that I could actually connect with the commission of the offence, or a guilty knowledge.

2096. But you said that in the statement of the accused, or in the course of the address of their counsel, it was stated in Court that Messrs. M'Culloch & Co. had some connection, and that some of their firm were directors in Wright, Heaton, & Co.; how did they make it material? The defence set up was that what had been done by Wright, Heaton, & Co. was not a fraud, because it was sanctioned by the Railway Department. They then went on to show that other firms had been carrying on the same kind of business with the consent of the Railway Department, and then it came up that Messrs. M'Culloch & Co. were doing the same thing over there, and were connected with Wright, Heaton, & Co. And that was one of the very things that made me think Mr. Fehon must have known what was going on, because, being a director—and as the defence said that it was ordinary business sanctioned by the Department, and no crime—Mr. Fehon must have known it, because there would have been no reason for disguising it. I thought if they supposed this thing was perfectly genuine, and sanctioned by the Department, Mr. Fehon, as a director, should have known something about it. Because an enormous amount of money was made out of these transactions. I think it came to something like £60,000 in a few years. I believe from the time it was first commenced until the time it was detected the calculation was that it came to something like £60,000, and that is a big item in a commercial business for a director not to know anything about.

2097. Finally, you did not include Mr. Fehon as a defendant? I prosecuted no one in the case except I could bring evidence corroborative of the accomplices. The evidence of an accomplice is considered unworthy of belief unless corroborated. The records will show that no man was prosecuted there unless we could bring evidence corroborative of the accomplice. That evidence was the handwriting, initials, or books, or where other witnesses could give proof of the different defendants in connection with the offence. I was not in a position to get any absolute corroborative testimony in regard to Mr. Fehon, and he was left out, as also were a number of others, against whom these accomplices had given testimony in respect to whom I could bring no corroborative testimony.

2098. This suggested case against Mr. Fehon stood then on the evidence of Stephenson and this other man whose name you do not remember? That is so.

2099. And that evidence, I understand, was evidence presumably to your mind connecting Mr. Fehon with a knowledge of the way in which the firm of Wright, Heaton, & Co. were earning their profits? Yes; and with regard to his being monetarily interested in the firm to a large extent.

2100. That is what I understand you meant when you mentioned in the House that there was a technical difficulty? That is the difficulty to which I alluded. These were conversations with these men, and it was very difficult to get any evidence from them; but this was in conversation in my own room in the Attorney-General's Office, before the prosecution was initiated. It was the groundwork of the charge, and then Mr. Fehon and others were thrown on one side and the prosecution was initiated only against those who were subsequently brought to trial.

2101. There was nothing afterwards that came to your knowledge touching Mr. Fehon's connection with this affair? Nothing. Mr. Fehon's name was a blank in my memory.

2102. Until the appointment? Yes; except that there were long consultations as to whether the firm of Messrs. M'Culloch & Co. should not be prosecuted in reference to some alleged frauds of theirs.

2103. Was it as to whether they should be prosecuted in New South Wales, or whether the Victorian Government should be asked to prosecute? Well, there were many legal difficulties surrounding the question, and it became a question for consultation; but that was not with regard to the prosecution of Mr. Fehon alone, but with regard to the prosecution of the firm of Messrs. M'Culloch & Co. generally.

2104. Was that in relation to the carriage of wool alone? I think so.

2105. That is with regard to the question of averaging, not with regard to the question of understating? No.

2106. It was on the question of averaging the wool bales in a way that was defrauding the Government, or reducing the takings of the Government? Yes, you can call it that if you like; that is a polite way of putting it.

2107. Was it suggested that Messrs. M'Culloch & Co. had been guilty of this in New South Wales? Yes, certainly.

2108. Where was it—was it in course of business between Wagga and Albury? Yes, I think so, but I cannot tax my memory now.

2109. Or was it that some wool was actually sent through Wright, Heaton, & Co., but consigned to Messrs.

Messrs. M'Culloch & Co. in Melbourne, going to Sydney by train, and then by steamer to Melbourne, and that it was assumed that Messrs. M'Culloch & Co. managed to transmit on the New South Wales railways practically themselves? I cannot tax my memory now without looking into the matter, but my impression is that there was in some way a diverting or a reducing of the profits on the Government Railways in New South Wales.

J. H. Want,  
Esq., Q.C.  
30 April, 1889.

2110. Did you go into the question of the tariff on the Victorian lines? Yes, but it was only lightly touched.

2111. Who were the firms prosecuted here? Messrs. Lee & M'Alister, Wright, Heaton, & Co., and Permewan, Wright, & Co. These were the three firms charged, and I took little trouble about the M'Cullochs afterwards. I only mentioned the M'Cullochs because you asked if Mr. Fehon's name cropped up again.

2112. Do you remember whether it was suggested to the Victorian Government that they should institute proceedings against Messrs. M'Culloch & Co. for frauds which the New South Wales Government supposed had been committed in Victoria? It was determined by the Cabinet that we should communicate with the Victorian Government in regard to it.

2113. Do you think that is to your knowledge, in point of fact, that Messrs. M'Culloch & Co. came in as possible defendants? No; they came in in connection with the question of diverting our own railways; but the Ministry had several long consultations as to whether Messrs. M'Culloch & Co. should be prosecuted, and finally whether the Victorian Government should be communicated with, with regard to the position in which they stood.

2114. They were communicated with? I believe they were.

2115. But they did not institute any proceedings? I cannot say.

2116. I think that in the course of one of your addresses in the House you said that this practice of wool-frauds appeared to have originated in Victoria? I think I did say so. My grounds for saying so were these—that these informers told me, rightly or wrongly, that when Messrs. M'Culloch & Co. first joined Messrs. Wright, Heaton, & Co., the practice of averaging first commenced, and that it was the Melbourne firms who pointed out to Wright, Heaton, & Co. how they could "work the oracle."

2117. That was all the information you received on that point? No. I think I may say that Mr. Kirkcaldie, who was one of the persons employed in working up the case, satisfied me that the heaviest part of the frauds took place after the year when Messrs. M'Culloch & Co. joined the firm. I think the papers we had went back to the day when Messrs. M'Culloch & Co. joined the firm; and I think you will find that the charges made against the defendants were charges of defrauding the Government within the time when Messrs. M'Culloch & Co. joined the firm and the date of prosecution.

2118. Any other ground? Not that I can remember.

2119. Then the matter died out with regard to Mr. Fehon until you went to Melbourne? Yes. The thing died out. Sir James Martin died. I resigned before the second trial came on. Stephenson gave evidence when I was Attorney-General, and when the second trial was ready these informers were *non est*. I may say that the circumstances of their disappearance, as the police records will show, left no doubt in my mind, and, as I was informed, no doubt in the minds of the police, that these men had been got rid of; and knowing that the only person who could derive any advantage in getting rid of them were those being prosecuted, it led me to believe still more strongly that there was something criminal or crooked in the transactions, or there would have been no desire on the part of the defendants to get rid of one of the witnesses for the Crown. And believing that, and that Mr. Fehon (as I can prove and will prove before I finish) was connected with the firm both as a shareholder and director during the time those frauds were being practised, I felt I was justified in asking the Government to make a most searching inquiry into the matter.

2120. After you came back from Melbourne did you make inquiries? Immediately I returned from Melbourne, I went to the Registrar-General's Office first. And I would ask leave to produce the records of the Registrar-General's Office to show what I found out. I found out that in a certain year, I believe 1881, the firm of Wright, Heaton, & Co., admitted Messrs. M'Culloch & Co., as partners. I knew from the records of the House, and from the informers in the criminal cases, and from Mr. Wright's own admission when a member of the House, that a number of clerks had been given shares, and what I may call a dummy company had been formed for the purpose of registering it as a liability company. The circumstances surrounding that as detailed to me by these informers, who were clerks, were not of a nature to inspire me with much respect for either of the two firms. I then found that immediately after Messrs. M'Culloch & Co. had been admitted as partners, and the dummy company formed, the first registration of the company was made, as will be shown by a perusal of the records of the Registrar-General's Department. I found, and I am speaking now from memory, but I crave leave to refer to the documents to substantiate what I say, that the different members of the firm of Messrs. M'Culloch & Co. had a certain number of shares registered in the name of each of those partners. It was not in this way that Messrs. M'Culloch & Co. had so many shares, or that one member of the firm had so many shares, but I found the names of individual partners in Messrs. M'Culloch & Co. registered as shareholders. To make sure as to whether Mr. Fehon was really connected with the firm or not, I searched for his name. I found what appeared to be his original signature, his own proper signature, convincing me that he knew shares were registered in his name. This confirmed the statement that had been made to me by the informers that Mr. Fehon had a large interest, a pecuniary interest, in Wright, Heaton, & Co.'s business, at the time when the wool frauds were being carried on. I then found that for several years shares were passing backwards and forwards every year, and at no time, to the best of my memory, were there ever less than 500 shares registered in Mr. Fehon's name—sometimes there were a great many more, I think, extending up to 1,300. In *Hansard*, page 1517, is a report of my saying, "Mr. Fehon one year had 500; another, 680; another, 1,300; then 500, and then 600 shares"; the company being, if I may use the word, "re-registered" every year, according to Statute. I found Mr. Fehon's name appearing every year, and shares set opposite his name, varying from 500 to 1,300. During all those years I knew, as everybody now knows, the wool frauds were at their height. This again corroborated the statements I had already received when I was Attorney-General. Finding that that was so, I had before me then the rumours in Melbourne, the statements of the informers, and the corroborative testimony which is now on record in the Registrar-General's Department of Mr. Fehon's undoubted connection with the firm of Wright, Heaton, & Co. during many

J. H. Want,  
Esq., Q.C.  
30 April, 1889.

years when transactions were being carried on, which resulted in the prosecution of that firm. With all these things unexplained, I took upon myself to ask the Government to make a thorough examination in order that Mr. Fehon might clear himself, or if he could not, that he should be cleared out of his office, if it were possible.

2121. In addition to the information you got by looking at the Registrar-General's papers, you also received some information from some persons, I believe? Yes.

2122. Who were those persons? Mr. Lyne, who had been Minister for Works with me, told me that if I called upon a Mr. MacMahon, who had been connected for some time with Wright, Heaton, & Co., he would prove that what I said in my first address to the House, with regard to Mr. Fehon's connection with the firm of Wright, Heaton, & Co., and as to his taking a prominent part in the conduct of their business, was true; he would be able to give me evidence upon it, and prove that what I said was perfectly correct. I called with Mr. Lyne and saw Mr. MacMahon, who, in Mr. Lyne's presence, told me that when he was connected with the firm Mr. Fehon was there taking a prominent part in the conduct of Wright, Heaton, & Co.'s business, and that Mr. Heaton had told him on one or two occasions, "This is Mr. Fehon," and told Mr. MacMahon that Mr. Fehon was a director of the company, and that he must look upon Mr. Fehon as his "boss." Mr. MacMahon said, "I am not afraid of anyone; I can say that Mr. Heaton pointed out to me that Mr. Fehon was to be my boss; he was managing director in Wright, Heaton, & Co.'s during the wool frauds." He further told me that he was going to Townsville, on one occasion, to take charge of that end of the firm's branch, and that Mr. Heaton told him that if he got any instructions from Mr. Fehon, he must remember that Mr. Fehon was his "boss." One other gentleman gave me information—I do not know whether he intended it to be used or not, but this does not much matter, because it was nothing definite—he told me he could substantiate a good deal of what I said in the House.

2123. Was that Steers? Yes, that was the name. He said, "If you want me I will give you information to show that you are not far out with regard to your statements about Mr. Fehon." I called at his office several times but he was out, and I got no information from him. I felt, that backed up as I was with these registration copies and MacMahon's evidence, that I was justified in again asking the Government for an inquiry into the matter.

2124. I understand that Mr. MacMahon informed you that not only on the occasion of Mr. MacMahon's journey to Queensland, but on other occasions, Mr. Heaton had conversations with him? I understood him to say that in conversation.

2125. Are you sure he mentioned other occasions? He gave me the impression that in conversation with the firm generally he was told that Mr. Fehon was a director, but that when he went to Townsville he was told that he was his "boss." The definite conversation with regard to his being boss was when MacMahon was going to Townsville. Mr. Lyne was present at the conversation.

2126. Did anything peculiar strike you with regard to the state of MacMahon's mind, in relation to Wright, Heaton, & Co. generally on that occasion? No; I may say that I have heard or read somewhere that Mr. MacMahon had some disagreement with Mr. Wright. Is it in respect to that?

2127. Yes. Did he seem to have no animus? No, on the contrary. One of my brothers told me that he knew a Mr. MacMahon who could give me a lot of evidence with regard to Mr. Fehon, in connection with Wright, Heaton, & Co.; and I went and saw MacMahon, who was a stranger to me. I said to him, "My brother tells me you can give evidence to show that Mr. Fehon was connected with Wright, Heaton, & Co." He said, "I don't know your brother, and have had no conversation with him"; and for 10 minutes I could get nothing out of him. Mr. Lyne then produced a letter from somebody telling him (Mr. Lyne) that if he called upon Mr. MacMahon he could give him important evidence.

2128. Was it Brock who wrote that letter? Yes, I think it was Brock. I think you are right; and it was only when Mr. Lyne mentioned this person's name (and I believe it was Brock) that Mr. MacMahon was got to open his mouth at all. So far from there appearing to be any malice on the part of Mr. MacMahon, I was inclined to think he rather snubbed me; so much so, that I told my brother that he said he did not know. My brother, T. V. Want, said, "Well, he might not have wished to tell you, but I have heard so"; and he told me this long before I had heard about MacMahon from Mr. Lyne.

2129. Did MacMahon explain to you how it was that it became rather an important question at the time he was going in the steamer to Queensland whether or not Mr. Fehon had something to do with the firm? He did.

2130. What did he say? I cannot remember, but he did.

2131. Do you remember whether he said that the two firms had been competing for the Queensland trade, and that now—speaking of that time—the firm of M'Culloch & Co. had as much interest in it as Wright, Heaton, & Co., or something like that? I cannot remember, but he certainly gave me a clear reason for it. He gave us a reason which showed me that there was a necessity for him to explain to Mr. MacMahon that he should understand clearly that Mr. Fehon was connected with the firm largely. I cannot remember the reason, but it was a very good one, and one that confirmed MacMahon's statement in mind.

2132. But he did not give you any information as to the nature of Mr. Fehon's connection with the working of the firm? From what I can remember it was to this effect—that if he found him in any way apparently differing in certain ideas from him, he must remember that Mr. Fehon's interests and Wright, Heaton, & Co.'s were identical. It was to this effect—do not be astonished if you get told by Mr. Fehon to do something, because his name and that of Wright, Heaton, & Co. are the same. It was after receiving all that evidence that I moved the adjournment of the House again, and because I thought that Mr. Fehon's letter and Mr. Wright's amounted to no explanation whatever with regard to the connection with Wright, Heaton, & Co.

2133. Taking all that you had found out about shares, and all that you had heard from Steers and MacMahon, do I understand that it came to this or anything more—that Mr. Fehon was evidently and had evidently been a shareholder in Wright, Heaton, & Co. for some years; that those years were, some of them at any rate, years during which what were called the wool frauds were going on; that he had actually been a director during part of the time, and that, therefore, to your mind a fair, almost necessary, conclusion was that he must have at least known of the existence of this practice called wool frauds? That is exactly it, and with this addition. The way the books were kept, and the process by which the manipulation of these wool bales was carried on, were such as to enable anyone who had a knowledge of the business to ascertain what was being done, the amount made by the carrying on of the frauds being so large.

large. And as the defence set up was the production of some minute by the Railway Department which, they alleged, authorised them to average the bales, I could come to no other conclusion than that a person who had at any time been a director must have been cognisant of the way in which the business was being done.

J. H. Want,  
Esq., Q.C.  
30 April, 1889.

2134. Did you examine the books of the firm? No.

2135. Were they produced in evidence? I cannot remember; but there were a lot of books we wanted and could not get.

2136. Do you remember whether a subpoena was sent to any member of the firm or clerk to produce them? I cannot remember.

2137. Was it not possible for the department to have obtained possession of some of the books of the firm if the prosecution had really chosen? Of course we could have got what they had, but the question was whether the books we wanted would have been given us.

2138. Then it comes to this, you did not, in point of fact, get access to the books to examine them? Speaking from memory, I say "No."

2139. So it was impossible to say what they would have disclosed? It was utterly impossible to say that. The only evidence we could get was from the documents of the Railway Office, and of the consignees of the wool, both which would bear the signatures of members of the firm.

2140. How was it to your mind that you concluded that—say—the managing director in Sydney could probably have become aware, from the documents transmitted to Sydney, or from the books kept in Sydney, of the peculiarity in making out the railway charges, which went by the name of wool frauds? Well, the squatters paid one price to Wright, Heaton, & Co., who paid another price to the Railway Department, which was a less charge than they ought to have paid; and I concluded therefore that their books would show what they had paid the department by the weight of wool, and what the consignees had paid them, and which should have been the amount paid to the railway. I imagined therefore that they would have a book which would show the amount which they had received in payment of the carriage, as well as a book which would show what they paid to the railways; the balance between the two would be the profit of the fraud.

2141. That would apply to non-contract wool? Yes.

2142. Would that apply to contract wool? Yes, if I remember rightly. No; I think you are right. That would only apply to certain wool—I think non-contract wool. I should have liked to be making as much money as was made by these frauds, and not know it.

2143. I suppose the principal profit of that kind was made by applying the system of averaging; or was it by the system of averaging or by actually under-stating—I mean under-stating the aggregate weights? It was by an improper system of averaging, and by distinctly under-stating the weight with regard to tobacco—principally in regard to goods received from, I think, Cootamundra, and goods received from Tumut—they were the worst cases.

2144. Well, now, to go to another matter;—do you remember a conversation that took place in Mr. M'Laughlin's office when Mr. Wright was present—that was shortly before the motion for the adjournment? I only saw Mr. Wright once in Mr. M'Laughlin's office, and I remember it distinctly.

2145. Do you remember what took place then? Yes. I went to M'Laughlin's room, not knowing anyone was in there; Mr. Wright was there. Mr. M'Laughlin turned round and said, "Hullo! here you are, two enemies face to face." I said, "Mr. Wright knows I am no enemy of his as well as I do." We shook hands. I said, "I am very sorry I have had to do what I have done, and more particularly to rake up an old sore." I added, "I have been dragged into this thing by their charging me in the House with acts of corruption, and after I came back from Melbourne I had made up my mind to let the matter drop, because I had not got corroborative testimony, but they have dragged me into this matter—and I would always rather pick a man up than knock him down at any time, as Mr. Wright knows." Mr. Wright said, "Oh, well, it is very hard upon me and my family that this thing should be dragged up again; but I quite admit, Want, there was nothing else for you to do. I do not blame you in the matter at all; but it is very hard on me, and you know, as well as I do, that the reason why we entered into these so-called wool frauds was because we were induced to do so by the Government," and he added, "You remember that minute which was produced in Court?" I said, "I remember it perfectly well. If I could put the same construction on that minute that you put upon it—so far as the wool frauds are concerned—I should have had very great hesitation in prosecuting at all in the case. That minute only turned up at a very late period of the case. The railway people put one construction on it, you put another. Of course, it remains for the public to see who was right and who was wrong." He then said to me, "I think of going up for Glen Innes some day, and I wish you would give me a letter or authorise me to say that that minute made a very great difference in the case." Well, I did not give any answer to that. I thought I had better not say anything more. I did not give him a letter, nor did I authorise him to use any such statement, because I knew of the tobacco frauds, which were a great deal worse than the wool frauds. I have been on very friendly terms with Mr. Wright for very many years—a personal friend I may say—and I was very loth to have any further conversation about the matter. I think now it was a good deal the fault of the department that the frauds were carried on—their laxity in inquiring into the matter. But I have not the slightest doubt at the same time that all these firms seized upon the opportunity of doing something which they knew was morally if not criminally wrong.

2146. Mr. M'Laughlin joined in the conversation? Yes.

2147. Do you remember alluding to the kind of defence Mr. Fehon had set up? I do not think so; but it is quite possible.

2148. Do you remember saying, "If Mr. Fehon had admitted that he was connected with Wright, Heaton, & Co.—if he had justified his position—I would not have said anything about it"? What I said was this: "If Mr. Fehon had given a proper explanation of how he came to be connected with these matters, and had shown that he was absolutely clear, instead of simply saying that he was not a member of the firm, and had not held these shares, I should not have gone any further"; but Mr. Fehon had simply said in effect, "This is not true," whereas the records in the office show that it is so; and Mr. Wright said in the office, "There is no doubt about it, Mr. Fehon has made a mess of it," and I said, "You have made a mess of it too in your letter." He said, "Well, I am in that trouble that I don't know what I am doing." I said, "If Mr. Fehon had said in his letters that what Want says is perfectly true, namely, 'that I was a shareholder and so on,' it would have been different, but he gave a cock and bull yarn about the transfer

of

J. H. Want,  
Esq., Q.C.  
30 April, 1889.

of shares." But it was after that that I saw Mr. M'Mahon. And when Mr. Fehon said that he only held these shares in trust (that was in reference more particularly to my having stated he was a shareholder almost up to the date of his appointment, which he appeared to be by the records of the Registrar's office), I said, "If he will explain this matter away, or will give some reason for the extraordinary proceedings in connection with the transfer of shares; I do not want to go on with it, and I shall be only too glad to see Mr. Fehon clear himself of the whole thing." I also said to Mr. Wright, "The most painful thing to me is that I have to rake up all these things about you."

2149. You made some allusions to Mr. Abigail? I remember saying, "This is a judgment on little Abigail, for he worried the Government like a terrier does a rat, and drove us into the prosecutions, and now the thing has recoiled on his own head"; and I think I said, "You have got to thank Abigail for having rooted the thing up at all"; and, as a matter of fact, it was Abigail who rooted it up. He made us begin the prosecutions two months before we were ready, because he was mentioning facts in the House and asking questions which resulted in several witnesses getting away. We had to start because everyone was clearing out. I have received a number of anonymous letters in regard to this matter; I have burnt them all; I have paid no attention to them.

2150. With regard to Mr. Fehon? Yes.

2151. *Mr. Fehon to witness.*] The statements you have just made have regard to what induced you to make the remarks in the House you did? Yes.

2152. Has anything transpired since to alter your views;—would you take the same course to-day as you did then? Undoubtedly; that is to say, to ask for a thorough explanation of what appeared to me to be facts, which now, unexplained, disentitle you to hold your position.

2153. In *Hansard* (page 1044) you are reported to have said, "I am in a position to say that Mr. Fehon's name arose in this matter, in the first instance, from his connection with the carrying firm of M'Culloch & Co.?" Yes.

2154. Then you are reported to have said, "There is no doubt whatever that the wool frauds started in the firm of which Mr. Fehon was a prominent partner";—did you allude to Messrs. M'Culloch & Co.? Yes.

2155. And have you anything to justify the statement? Only what I have already alluded to—that the information of the informers given to me—

2156. But what did the informers know about it? They said that the representatives of Messrs. M'Culloch & Co. were those who instituted the wool frauds in this Colony.

2157. That statement was made by the informers? Yes.

2158. And if you could not justify the information, do you think you were justified in making this statement? I said I was informed so, and the fact is, that it was just about that date that the wool frauds began.

2159. Then again, on page 1044, you are reported to have said, "He traced Mr. Fehon's appointment in the Government offices in Melbourne, where, he believed, he was traffic manager—an office he was compelled to vacate in consequence of his connection with the large carrying firms in Melbourne"? I have already said what I did with regard to that.

2160. And that I was compelled to vacate my office? I said that on the information I received in Melbourne; and I am confirmed in that to this extent, that a similar statement was made by a Member of Parliament in Melbourne.

2161. Then again you say, "The noise made by his connection with Messrs. M'Culloch & Co. led to his retirement from the Public Service"? I have given the information on which I made those statements.

2162. In page 1512 you are reported as follows:—"I felt that some proper inquiries would be made as to the truth of my statements and as to the reliability of the charges I had laid at the door of Mr. Fehon. On that occasion I did not say one word about the question of Mr. Fehon resigning his Melbourne appointment, nor did I say one word about his having been charged with taking that action to avoid dismissal, but the whole of my address was confined to his connection with Wright, Heaton, & Co." Is not that in contradiction to your previous statement? No.

2163. In one place you say you traced my connection with the Victorian Railways and M'Culloch & Co., and then you say ———? The charge I really made was in connection with the charge about Wright, Heaton, & Co.

2164. *The Commissioner.*] These questions are not material to the issue.

2165. *Mr. Fehon.*] I think you called upon Mr. Allen Selwyn Smith? Yes.

2166. Did you ever have any conversation with Steers? I did not call upon him. I met him in the street. And I was asked to call on M'Mahon.

2167. Did you not have any more conversation with Steers after that which you had in the street? Yes; I believe I am wrong; I did call upon him to get some information, but he was away, and I did not see him.

2168. Did you satisfy yourself that I was ever a partner in Wright, Heaton, & Co.'s? Yes. I found you were a shareholder.

2169. Does that make me a partner? When I found it was a dummy company I did not regard it as a company, and I put you down as a partner.

2170. What is your authority for saying I was managing director? The informers told me that the representative of M'Culloch & Co. was a managing director. Mr. Wright, in his letter, admits that you were a director, which you deny, and Mr. M'Mahon told me you were a managing director.

2171. Where do I deny that I was a partner? In one of your letters.

[Mr. Want here quoted the second paragraph in Mr. Wright's letter to Mr. Fehon, dated 13th December, 1888, as follows:—"That you ceased to have any business transactions (as a director) with the firm since August, 1882.]

2172. Where do I deny that I was a director? In your letter of 11th December, to the Colonial Secretary. There you say, "It was uphill work, and resulted in overtures being made which ended in an amalgamation of our Sydney business with that of Wright, Heaton, & Co., the partners in that firm managing the business without any control from the Melbourne partners"; while Mr. Wright, in his letter, says distinctly you were a director; and that was what I pointed out in Mr. M'Laughlin's office, that between you you had bungled it.

2173. *Mr. Fehon.*] I said in the same letter that the business was put into a company, and that I was the representative from Melbourne, and in the next paragraph—? My answer to that is, that in that very paragraph you say, "I was one of the eight; Messrs. Wright, Heaton, & Co. were the managing directors; Messrs. M'Culloch & Co. took no part directly or indirectly in the management of the business," while Mr. Wright said you were a director.

J. H. Want,  
Esq., Q.C.  
30 April, 1889.

2174. Do you consider that being a director implies the management of a business? I should think so.

2175. Have you ever been a director? Yes.

2176. Did you know what the officers of your Company were doing? Certainly. I should think I had been guilty of a great breach of trust if I did not.

2177. According to your argument, a director is anxious to know that a man is robbing him? I think the duty of a director is to direct a company.

2178. On page 1515 of Hansard you are reported to have said, "It is unfortunate that this Colony should be saddled with a gentleman whose name had been so much called in question in the sister Colony." When you made that statement did not you know that my name stood high in the other Colony? So far as I knew, it stood the very opposite.

2179. Can you give me the name of anyone who spoke against it? No; I only speak from memory. I can only say that what I have seen in the papers I have been led to form a different conclusion from what I drew.

2180. But surely you can give me a single name? I cannot. But I will give you a letter with one name. If you ask the question I say that the impression, instead of being favourable, was the very opposite. But from the documents you have since published, and the testimonials sent to you, and from the inquiries I have made, I have formed a different opinion, and that was the reason for my stating that I was willing to accept the explanation you gave with regard to the Victorian Railways. I said that in the *Daily Telegraph*, and in the House.

2181. I did not see it, and I have read them all very carefully.

2182. You say Mr. M'Mahon and Mr. Steers also gave evidence against me; can you name anyone else? No, I cannot.

2183. Did Steers give you any information? No, except that he could give me information; I never mentioned his name in the House.

2184. Suppose Mr. Steers gave contrary evidence, and Mr. M'Mahon did the same, what would then be your opinion? I should think that one of us was telling an untruth.

2185. Supposing Mr. M'Mahon denied the alleged statement with regard to the use of the word "boss?"

2186. *The Commissioner.*] That is not quite fair, because Mr. M'Mahon said he might have used the word "boss."

2187. *Witness.*] I can only say that Mr. Lyne took it down in his pocket-book.

2188. *Mr. Fehon.*] Don't you think you went on very flimsy charges when you had to take Mr. Lyne round with you to this man? I made no charge. I simply made statements, and asked the Government to inquire into them. I did not take Mr. Lyne round. He took me round, because he said he had heard that Mr. M'Mahon could give me information. I have made no charges against you at all. I have stated facts, and I want an explanation of them.

2189. *The Commissioner.*] Mr. M'Mahon did not deny the use of the word "boss." I said to him, "Do you positively swear to the word 'boss' used on that occasion." He said, "I am under that impression, and I told Mr. Want that."

2190. *Witness.*] He said more than that, and he said, in answer to me, that he would look upon Mr. Fehon as his "boss."

2191. *Mr. Fehon.*] You say you were informed that M'Culloch & Co. had privileges on the Victorian railways more than anyone else;—can you say who told you? I think it is contained in one of these letters which I shall produce. Secondly, I was told that Mr. Lakeman could give me evidence to that effect.

2192. Did Mr. Lakeman give you any information? No; he was away.

2193. Then that statement was based upon what you might have heard from Mr. Lakeman? Yes. I was told that Mr. Lakeman had said he would prove what he had said.

2194. You say, "Immediately after leaving the Victorian Railway Service Mr. Fehon became a member of Messrs. M'Culloch & Co.'s firm";—did you make any inquiries on that subject? I was told so in Melbourne, and I say that by your letter you said so yourself.

2195. Did not you see in my letter that I resigned my position in the Railway Service, and then joined the firm? Yes; but I thought it was funny that you should have joined a firm about which there was a discussion and a debate.

2196. You say you cannot give the names of anybody? No. I did not trouble myself about the Melbourne business, because I was not in a position to prove anything. I commenced my speech in the House by saying I was not in a position to prove anything, and therefore I made no charge.

2197. Are you aware that when you made the statement that "it was a bad thing for this Colony to be saddled with a gentleman whose name had been so called in question"; that I had been highly complimented on leaving the Railway Service in Victoria? I had not the remotest idea of it. But I still think that a man whose name was bandied about —

2198. What do you mean by "bandied about"? I speak from what I have seen and heard; and I say that you ought to be above suspicion. I cannot remember the source of my information in Melbourne, except the letter I have mentioned, or in Sydney, except those names I have mentioned.

2199. Who is the man who gave you this letter in Melbourne? I do not know. I gave the letter to Mr. Ninian Melville, and I have not seen Mr. Melville from that day to this. I asked Mr. Melville to make inquiries in Melbourne.

2200. If you were in Melbourne and heard these rumours, would it not have been right to have gone to some Member of the Victorian Government before making any statements in the House.

2201. *The Commissioner.*] Mr. Want's conduct is not on its trial. If you keep to the scope of inquiry we shall get through it quicker.

2202. *Mr. Fehon.*] You say that after my appointment you went to the Registrar-General's office and the Crown Solicitor's office to find out about me? I went there to confirm what I had been told.

2203. But in your speech in the House you said that if the Parkes Government knew what the Jennings Government knew I should never have been offered the appointment, and yet you had to go to the Registrar-General's

J. H. Want,  
Esq., Q.C.  
30 April, 1889.

- Registrar-General's Office? The Jennings Government were aware of the fact that Messrs. M'Culloch & Co., of which you were a director, had been accused of participation in this question of wool frauds, and there was such moral evidence to show that you were connected with it that alone would have prevented us from giving you employment; but to prove that the information was sufficiently strong to bring it before the House, I made various inquiries to see if it was true.
2204. Can you give me the slightest information as to how Messrs. M'Culloch & Co.'s name was connected with the wool frauds? In the first place because I found that all the partners of the firm of which you were a member were the largest shareholders in Wright, Heaton, & Co. That is one reason.
2205. On the same principle, whoever was a shareholder would be equally amenable? If they had taken part in the business.
2206. Can you prove that I took part in the business? Only by the information I got and Mr. Wright's letter, in which he says you acted as director.
2207. But anything beyond that? No. If I could you would have been placed with others in the dock.
2208. That being so, do you think you were entitled to say what you did in the House? Yes. Because I believed you were not fit to hold the high position, and because I believed you were a partner in Wright, Heaton, & Co. right up to the appointment, through your own neglect in not taking your name off the register.
2209. You had a great number of witnesses from Wright, Heaton, & Co.'s in connection with the wool frauds. Did you ever hear my name mentioned in connection with the frauds? Your name and the name of Messrs. M'Culloch & Co. dropped out before the prosecution went to counsel. Your name was simply mentioned in passing. I do not think it was mentioned more than once in the whole transaction. They always treated you as Messrs. M'Culloch & Co. You were not alluded to as Mr. Fehon, but as Messrs. M'Culloch & Co.
2210. I consider one of the serious statements you made was the statement that M'Culloch & Co. "have been in the habit of doing the same thing in Victoria as here?" From the information I received I had not the slightest hesitation in saying that this was so.
2211. Can you give me the name of anybody at all who informed you on that point? The informers.
2212. But they were employed in Sydney? Yes; but they knew all about the transactions.
2213. Did you state that M'Culloch & Co. were defrauding the Victorian Railways in the same way? Well, I suppose it was from the information that was received. I do not know. My own impression is that we were told by the informers that M'Culloch & Co. had been working this system in Victoria, and that when they came here they introduced the practice here.
2214. Were these informers ever employed by M'Culloch & Co. in Melbourne, or did they know anything about them? I have not the slightest idea.
2215. And you make that statement? Well, I would only have a right to say that it was started by M'Culloch & Co., under the circumstances.
2216. You say the Cabinet communicated with the Victorian Government? I believe so.
2217. Did you ever get a reply? I could not tell you. I think we went out of office.
2218. Don't you think if there had been any foundation for it the Victorian Government would have prosecuted them? I cannot vouch for the Victorian Government. I can only vouch for myself.
2219. Your statements in reference to myself were based upon rumours, and you cannot give the names of the persons who supplied you with the information? Excuse me, I said nothing of the kind. I have given the names of persons who have given me the information, and I have shown where you can find records, and I have found there quite sufficient to justify me, as a public man, holding a public position, to ask for an explanation of it. If you are innocent of the matter, it is more to your benefit that it should be brought up at once. If you are guilty, I have only done my duty. If anyone is to blame in the matter at all it is yourself, for allowing those names to remain on record as against you. If your version of the story is correct, their removal would have placed you in a very different position, and I claim that I was perfectly justified in taking the course I have taken.
2220. Is there anything in my letters to Sir Henry Parkes incorrect? I think that your letter, in conjunction with Mr. Wright's, has made the matter worse, as far as appearances are concerned, because they are in direct contradiction of one another; and if those letters had not been written, and I had not formed that opinion of them, I should not have gone on, but I should have left the Government to do what they liked. But they were so glaringly inconsistent to my mind that I was compelled to go on.

THURSDAY, 2 MAY, 1889.

Mr. Fehon was present.

Ninian Melville examined:—

N. Melville,  
Esq., M.P.  
2 May, 1889.

2221. *The Commissioner.*] Your name is —? Ninian Melville.
2222. You are a Member for Northumberland? Yes.
2223. Mr. Fehon is a stranger to you? Yes.
2224. Some time ago, in December, there was a debate in the House touching the propriety of Mr. Fehon's appointment as one of the Railway Commissioners? Yes.
2225. You then expressed an opinion of Mr. Fehon's fitness for the office? Yes.
2226. Did you then speak from any knowledge of your own or from information you had received? From information I had received from other persons.
2227. From whom had you received information at that time? Well, it would be difficult to particularize, because most of the Members of the Opposition had been speaking concerning the wool frauds, and it was in connection with them and Mr. Fehon's connection with Wright, Heaton, & Co. that I passed my remarks.
2228. It was not upon any rumours upon anything affecting Mr. Fehon in relation to his duty as Traffic Manager of the Victorian Railways? My remarks were based absolutely upon Mr. Fehon's connection with Wright, Heaton, & Co., and the prosecution that had taken place with regard to them.
2229. So at that time you had not in your mind any reference to any rumours which had affected Mr. Fehon in relation to his resignation of his position as Traffic Manager some years ago in Victoria? No, not at that time.

2230.

N. Melville,  
Esq., M.P.  
2 May, 1889.

2230. Have you since made any inquiries on that head? Well, it would hardly be truthful to say that I have, and yet it is almost untruthful to say I have not, if you can understand that position. I think the better way will be to tell you exactly what I have done, because I am not desirous of saying one word which is not absolutely true, and I do not want to convey, even by implication, any unjust impression. On the occasion of that debate Mr. Want spoke afterwards and he corroborated, or confirmed, the implication which I had made. Mr. Want's confirmation was called in question, which led to an investigation taking place. Mr. Want and myself visited the Crown Law Offices, and there attempted to make an examination of an immense bundle of papers. In looking through the papers, in one of them the name of the firm of McCulloch & Co. appeared to have been used in some respect with regard to the prosecution in reference to the wool frauds. Following that we visited the Registrar's office, and there examined the list of shareholders of Wright, Heaton, & Co. The list shewed that Mr. Fehon had been a shareholder from the time of, I think I may say, the incorporation of the Company up to the day when we were making an examination of this question; that Mr. Fehon's name disappeared (I am speaking from memory), from the list of shareholders for a short period at or about the time the trial was going on, and reappeared again on the share list; also McCulloch's name. About this time Mr. Want received a letter from a person residing either at Caulfield or Surrey Hills, near Melbourne.

2231. Can you tell me the name of the writer? No, I will tell you why. The letter set forth some charge against Mr. Fehon while he was connected with the Victorian railways. There were two letters. The first made reference to the report which appeared in the Melbourne papers of the debate here, and conveyed the intimation that the writer was in a position to give further information. That letter was answered by me, and a second letter came conveying the implication I have just given, and saying that the persons were prepared to give further information. To the best of my remembrance now the letter either implied that the writer had been dismissed by Mr. Fehon, or that Mr. Fehon had left in consequence of the writer's charges—dismissed from the Railway Service. The list of shareholders I copied myself with the exception of one page. Then Sir Henry Parkes requested Mr. Fehon to give an explanation, which Mr. Want and myself did not consider satisfactory, and early in January I left for Melbourne with a twofold object—(1) to attend to some private business of my own, taking the letter with me; and (2), to visit this person to see what credence and value could be given to the statement he was making. I reached Melbourne on Tuesday morning. I attended to my own business, and before I had time at my disposal to visit this person I received a telegram from Mr. Jas. Fletcher, M.P., intimating that the Government had been defeated on the Fehon question. The next day I received a telegram from Sydney requesting me to return in consequence of the formation of a new Government. I came to the conclusion that the Fehon matter was completely settled, the Government being settled there was an end to it; and I did not visit the person, and never saw him. Upon clearing up all my letters and documents in the Opposition room when I came back, and believing the whole matter to be completed, I destroyed those two letters, and the letters I had kept at the Registrar-General's Office. In obedience to the command of this Commission I have made a minute search of all letters and documents in my possession to see if I had them.

2232. And you are correct? Yes. I have not got them. This all took place previous to the appointment of this Commission.

2233. The actual sequence of affairs, and your own private business, led you on to make no further inquiries? Yes.

2234. In Sydney, also, I suppose you made no further inquiries about the matter? No. My opinion about it, and the opinion that led me to take exception to Mr. Fehon's appointment was this, that Mr. F. A. Wright, one of the directors of Wright, Heaton, & Co., had been prosecuted for what were called the "wool frauds," and I thought that if he, as a Minister of the Crown, had been prosecuted, a leading shareholder was equally guilty, and should have been equally tried.

2235. And you did not, therefore, I understand, attach any weight to these former suspicions of, or reflections on, Mr. Fehon, which date back to the early seventies? Do you speak in regard to Victoria.

2236. Yes? I cannot express an opinion, seeing that I have made no inquiries in Melbourne.

2237. You did not then consider that really an important element in the question? I did not consider it at all. My protest against Mr. Fehon's appointment is based upon the fact that the Company were prosecuted, of which Mr. Fehon was a shareholder, and if one of the directors was responsible to Parliament, a large shareholder was also responsible. And my explanation is that, if Mr. F. A. Wright was placed in the dock with the haze of suspicion around him, Mr. Fehon was equally guilty, and my charge was levelled more especially against one of those Ministers of the Crown, who had never ceased in his attack upon Wright, Heaton, & Co., while Mr. F. A. Wright was a Minister, and who was one of the Ministry who had appointed this shareholder to his position.

2238. That was Mr. Abigail? Yes.

2239. *Mr. Fehon.*] To tell you the truth, I have not read Mr. Melville's remarks until this morning. But, to use a Colonial phrase, you (to witness) were very rough on me. You say, "Let the Honorable gentleman go to Hay, and ask the townspeople whether the Victorian railways were run in the interest of the Colony, or in the interest of Mr. Fehon, who represented a certain Company?" I was speaking then with regard to McCulloch & Co.

2240. What justified you in making that remark? The information I had received that the same principle with regard to the carriage of wool and other matters, was carried over the Victorian Railways as was carried on here.

2241. Can you tell me who gave you that information? I could not give you a name. I am in the unfortunate position of having, believing the whole thing to be settled, destroyed the letters I referred to as having received from Caulfield, and one received from Hay.

2242. And you do not think in the light of subsequent events that you can justify that remark? I will not say that.

2243. You made a statement to the effect that I was a dishonorable man. I ask you to justify that remark? I say that the prosecution here revealed the fact that a system prevailed with regard to the railways, and from information I received I was bound to believe that the same system was in existence on the Victorian railways.

2244. Cannot you give the name of a single individual who told you? I cannot give you the name because as I have already told his Honor, the letters, and I exceedingly regret that the letters —

2245. *The Commissioner.*] Can you tell who was the writer of that letter? No; believing the whole thing was settled I destroyed the letters.

2246.

- N. Melville,  
Esq., M.P.  
2 May, 1889.
2246. What was the purport of the letter from Hay? That the firm of M'Culloch & Co. had carried on and were now carrying on business on the same lines as those for which Wright, Heaton, & Co. were prosecuted.
2247. *Mr. Fehon.*] I do not know the writer of the letter. To be true in the sight of all that is true and holy, I never saw the writer. Has anyone else seen the letter? Yes, Mr. Want.
2248. Did not you think that letter of sufficient importance to put it before the public? Well, I never act upon a letter unless I know the writer, or that the substance is substantiated.
2249. But you say that your action was based on this letter? Yes; I say that I acted from information that the same system was going on in the other Colony.
2250. *The Commissioner.*] What is that system you refer to? Well, I do not understand the technicalities, but the general principle is this—that there appears to be a system of charging the person receiving the articles more than the railways get.
2251. How that is arrived at you do not know? I regret, in the interest of Mr. Fehon and of the inquiry, the letters are destroyed.
2252. Did that letter from Hay give a specific explanation of how this thing was carried on, or was it in general terms? In general terms.
2253. *Mr. Fehon.*] You say (*Hansard* p. 1024) "Mr. Fehon was one of three Commissioners to whom we were asked to entrust the expenditure of a million of money, but who, if everyone in this world got his deserts, would be now on his trial for robbing the railways of New South Wales." What is your justification for that? The fact that Mr. Wright was on his trial. I held that if it was fair and just to place Mr. Wright in the dock, Mr. Fehon should be put there too, being a shareholder.
2254. But what reason had you to come to that conclusion? Because you were a large shareholder of the firm.
2255. Did it ever come to your knowledge that I took part in the business? No. But I came to the conclusion that you had held a large number of shares which had been charged, and that you were interested in M'Culloch & Co. I felt that you as a shrewd business man would know something about it.
2256. Simply a matter of opinion on your part? That is all.
2257. Did you ever hear anybody accuse me of a dishonorable act in any shape or form in any of the inquiries you made of me. Has any individual of whom you have made inquiries ever given you any information, that would lead you to suppose that I was a dishonorable man? I have in conversation with many persons, who might have known you, heard them express the same opinion as I did.
2258. I am speaking of Members of Parliament who knew me? From conversations I have had, and opinions I have heard expressed, my impression was then, and is now, that the Government did wrong in placing you in the position of Commissioner, and that you should not be there.
2259. Can you justify that by any act on my part that has come to your knowledge? I justify it on the ground I have already given. I know nothing personally against you, Mr. Fehon.
2260. *The Commissioner.*] The question is this—apart from the conclusion you draw from the facts connected with the "wool frauds," have you heard an expression of opinion disadvantageous to Mr. Fehon's general character, and probity as a private individual from any person? I know nothing detrimental to Mr. Fehon. Personally and privately, I know nothing detrimental to him.
2261. Did you hear in Melbourne or anywhere else how, generally, and apart from all these railway and wool matters, Mr. Fehon's reputation stands? Mr. Fehon's personal reputation I have never heard anything about; but his appointment as Railway Commissioner by those I have conversed with is condemned.
2262. These are, I suppose, chiefly persons opposed to the administration and appointment of Sir Henry Parkes? No. The opposition is based on the broad grounds I have taken it on.
2263. *Mr. Fehon.*] You say (*Hansard* p. 1024), "This thief, who escaped a criminal prosecution, and whose only railway experience was in connection with the Hobson's Bay railway, and the St. Kilda line, &c.; how can you justify calling me a "thief"?" Well, the justification is that the firm you belonged to were placed on their trial.
2264. I was not a member of the firm? If the records of the Registrar-General's Office do not convey the fact that you were a member of the firm, then I do not associate you with the action of the firm.
2265. *The Commissioner.*] You considered that Mr. Fehon was a member of a certain firm, and you thought a charge against that firm was equivalent to a charge against a member of it? Yes.
2266. *Mr. Fehon.*] And that justified you in calling me a "thief?" In that sense. I do not accuse Mr. Fehon privately at all.
2267. *The Commissioner.*] Were you under the impression that Mr. Fehon had only been connected with the Hobson's Bay line? I was under the impression that he was associated with Mr. Finlayson in the Hobson's Bay railway.
2268. By the way, was there not a little element running through all those debates in the House—in the first debate—in the way of intercolonial jealousy? No; because I have lived in Victoria, and had opposed expressions against Victorian people and Victorian management.

Wm. Meeke Fehon re-examined:—

- W. M. Fehon, Esq.  
May, 1889.
2269. *The Commissioner.*] Perhaps, as this matter affected you personally very much, and you must have noticed it at the time, perhaps you will remember that the occasion on which Mr. Orr made the attack upon you in the Victorian Parliament, was an occasion on which the dismissal of a man named Hibble, who had been engineer on board the "Victoria," was brought up by Mr. Walsh, on a motion of adjournment? No.
2270. At any rate, you did notice that Mr. Orr took the opportunity afforded by a motion for adjournment to make this attack upon you? No; I do not remember that. I remember the broad facts of the case only.
2271. I will read this extract from the Victorian Parliamentary Debates, p. 2222. Mr. Longmore, speaking on the subject of persons who had been dismissed from the Government Printing office, said, "I did not do any injustice," whereupon Mr. Orr interjected, "Oh," and Mr. Longmore said, "The honorable Member for the Murray had better hold his tongue. That honorable Member went through the country speaking the vilest slanders, according to his own showing, of the late traffic manager, and

W. M.  
Fehon, Esq.  
2 May, 1889.

and in his (Mr. Longmore's) presence, he subsequently acknowledged—he stated in the most craven manner—that he was sorry for having done it.” Mr. Longmore then spoke on the subject of Hiddle. Mr. Orr followed, first addressing himself to Hiddle's case, and continued thus :—“ He would not pursue the case further, but he would claim the indulgence of the House while he offered a few observations in reply to the insinuations which had been thrown out against him by the honorable member for Ripon and Hampden, and he defied that honorable member to deny one single word of what he was going to say. One day, about the time that Mr. Fehon was clearing up his affairs in the Railway Department, he called upon the late Minister for Railways, when Mr. Fehon, who was present, said, ‘ I was at Echuca lately, and I was told that you had said there that I had an interest in the firm of M'Culloch & Co., carriers, while connected with the railways.’ He (Mr. Orr's) reply was that he could not help that. He made the statement, believing it to be true, and he still believed it to be true, and that if the Minister for Railways had time to go into the matter, he was prepared there and then to go into the grounds upon which he came to that conclusion. He did so. He went over the history of the working of the railways for five years. He showed that during that period there was never a year in which some change was not made in the wool rates. He said that the firm of M'Culloch & Co. had information of every change weeks, if not months, before he (Mr. Orr) had, although he was in the same trade. He said that in connection with the Darling trade M'Culloch & Co. had carried their goods for £1 per ton less than he or anyone else knew anything of. The honorable member for Ripon and Hampden could not deny this. [Mr. Longmore: It is not in accordance with fact.] It was true. If it could be proved not to be a fact he would place his resignation in the Speaker's hands to-morrow. After he had gone through his statement Mr. Fehon assured him he was altogether mistaken in asserting that he had any connection with M'Culloch & Co., but no explanation was offered of the discrepancies. He (Mr. Orr) said he accepted the statement, and was satisfied so far; but he desired to call the attention of the House to another fact which subsequently came to his knowledge. In an advertisement published by the late Minister for Railways, or under his sanction, the words ‘ Darling District’ were used instead of ‘ Darling River,’ and that by that means M'Culloch & Co. were able to get goods carried to the Murrumbidgee for £1 per ton less than the general public. He was prepared to move for a Committee to thoroughly investigate this matter, because he was thoroughly satisfied that no one department in the late Government could bear less scrutiny than that over which the honorable member for Ripon and Hampden presided.” Mr. Bent then spoke. He said :—“ He considered it not out of place to remind the honorable member for the Murray that some people had better wash their dirty linen at home. If the honorable member was aware that the thing he had referred to was going on, why did he not report it?” Mr. Bent then went on with the Hiddle matter; and not a word more was said about you. Now you did read that report before you wrote that letter to the *Argus*? Yes.

2272. After you wrote that letter did the matter come up in the House again? No; it was never mentioned.

2273. Did Mr. Orr “ get on ” to you in the House after that? No; he never did. He was completely “ squelched ”; that letter of mine completely shut him up.

2274. You have already given an account in your letter of what took place? Yes.

2275. Do you remember Mr. Orr going through a long account of the working of the railways? No; he did not. He did not seek to justify himself at all. You must remember I had left the Service at that time.

2276. Do you remember him stating his grounds and going into the question as he said he did? No; I am sure he did not.

2277. Do you remember him alluding to the changes in the wool rates? No; he said that if he had made any statement that was not true he was very sorry for it.

2278. To the best of your recollection he did not go through this long statement? He made no charge against me at all in Mr. Longmore's presence. He simply said that he did not say that such was the case, but that he might have said such might be the case. And when I charged him with prevarication he said, “ If I have made any wrong statement, I am sorry for it; ” and Mr. Longmore said, “ You had better shake hands and make it up.”

2279. Take the statement which he says he made, namely, that “ not a year passed without changes being made in the wool rates, and that the firm of M'Culloch & Co. had information of every change weeks or months before he (Mr. Orr) did, though in the same trade ”—what about that? Well, as soon as the rates were approved by the Commissioner they were given to the Press.

2280. Were they continually changed? We were continually making reductions because we were competing then for the trade of New South Wales. We got the Murrumbidgee wool and the Lachlan wool, and then we tried to get the Darling wool; and then we had to get lower rates to get it from South Australia and bring it to Echuca. Consequently we made greater concessions at Echuca, Lachlan, and other places.

2281. What was done? A new rate-book was sent to the Government Printer, and copies would be distributed; there was no such thing as a private concession.

2282. Mr. Orr says that M'Culloch & Co. had information of the change; I suppose he means they received information of the intention to make an alteration? Well, Mr. Orr occupied the same relative position to M'Culloch & Co. as a retail grocer does to Fraser & Co. in this city. He was a mosquito, and that is why he was so bitter; he was not in competition at all.

2283. But when you were in the Railway Service was it possible for M'Culloch to have got knowledge of the intended change before it was made? As a rule the traffic manager would consult with the department as to the arrangements for the coming wool season. Perhaps we would make no alteration, or perhaps we would make a concession, to get wool. The Victorian Railways made concessions for two or three years of 6d. per bale on all wool brought from the Darling District up to and over 10,000 bales; it did not apply unless 10,000 bales were brought.

2284. That concession would not affect small carriers? No.

2285. I suppose it was possible, and not improbable, that before a change was actually gazetted, M'Culloch & Co. or other carriers might know that it was going to be made? No; nothing would be known until the political head of the department had given his sanction to it; and then it would be published.

2286. I suppose it was quite possible that M'Culloch & Co. having so much more work to do and so many more agents, might in fact, learn facts in regard to an intended change of rates that other carriers might

W. M.  
Fehon, Esq.  
2 May, 1889.

not happen to learn? No; I cannot say that. M'Culloch & Co. never asked me a question when I was traffic manager as to any change of rates. In fact I saw very little of M'Culloch; he was away. The wool rates were decided some months before the shearing time. M'Culloch & Co. who initiated carrying wool by contract, and others would have to know what the railway rates would be for the coming season, and so the rates were changed generally some time before the wool season. John Orr at the time I left the railways was not interested in one ounce of goods on the rivers; so he had little knowledge of the carriage of wool. It was only a couple of years after I left the railway that he commenced at Echuca.

2287. Who managed M'Culloch's firm while he was in England? His brother James, and Mr. Jackson.

2288. Did they not in any way interest themselves in trying to find out as soon as possible what the railway contemplated doing? Yes; they all wished to do that.

2289. How did they show their anxiety to know? Oh, they might come to the office, and if the weights were not fixed I would tell them they were not fixed.

2290. In course of conversation I suppose they might have found out? No; it was so thoroughly at variance with the style in which business was done; it was impossible for one to get an advantage over another.

2291. I suppose there would be an anxiety shown to know whether any concessions were to be made as early as possible so that they could found on that a reduction of charges they would make to the squatters in the contract price. That being so, did they try to hurry the department up in bringing the contemplated changes actually into operation, or saying what they intended to do? Of course the carriers were anxious to get the information as early as possible, and so were the squatters.

2292. It was just possible, therefore, that Mr. Orr might on occasions, by accident, not have been so well informed as M'Culloch & Co.? Well, Mr. Orr was not engaged in the trade.

2293. He was engaged in the north-eastern trade? Yes. He had nothing to do with New South Wales except up to Wagga.

2294. But still he did to a certain extent come into competition with M'Culloch & Co. on the river between Albury and Waygunyah? No; he had no boats.

2295. He would come into competition this way; when there was a high river and they could get their boats up to Albury, then they would take wool which Mr. Orr might get carried, if otherwise, by teams down to Seymour? No; we were in opposition to him on the roads.

2296. Up to the time when you left the railway there was then, I suppose, a certain amount of competition? Wool then used to come to Albury by teams and go down the river by steamer, and at the tail end of the season by teams down to Melbourne.

2297. And pretty nearly all the wool that went down the river M'Culloch & Co. took? No; there was another firm called the Old Cornbury.

2298. Well, how do you account for Mr. Orr's jealousy when you left the Service? As soon as I left the Service the Government opened the line to Seymour, and M'Culloch & Co. immediately opened branches to Seymour and established themselves in the north-eastern district, and we came into competition with Mr. Orr.

2299. In respect to the wool which was taken down by the north-eastern line, there were concessions made on the New South Wales side? I do not think there were any concessions in those days. They afterwards made concessions in regard to wool coming inside or outside an imaginary line.

2300. Mr. Orr goes into the question of the Darling trade. He says that M'Culloch & Co. had their goods carried for £1 per ton less than he or anyone else knew anything of? I never knew Mr. Orr send a ton of goods up the Darling.

2301. In this respect as to the Darling trade, I suppose you can only gather that if he thought he had any foundation it must have been something that somebody else put him up to—some other carrier; because you say he never touched the Darling wool? He never did.

2302. Do you think there was any one else making a catspaw of him? No. If there had been any foundation for Mr. Orr's statement there were plenty of men in the House who would have had it inquired into.

John Henry Want, Esq., Q.C., re-examined:—

J. H. Want,  
Esq., Q.C.  
2 May, 1889.

[The witness handed in an anonymous letter he had received, signed "*Veritas Vincit*," from Toolamba. He said he knew nothing about it, and had not acted upon it. He had received other anonymous letters which he had torn up directly he got them. This one arrived after he had left. He handed this letter in simply because the Commissioner had said he wanted all letters he had received. The letter was not put in.]

2303. *The Commissioner.*] Can you remember the names of the writer of the other two letters you handed to Mr. Melville? I have been trying to remember. The writer alleged himself to be employed in the railway, and if this will lead up to it Mr. Fehon may remember that he said he had brought up some matter to Mr. Fehon in connection with the administration of the department in regard to which Mr. Fehon was either censured or called to account. That may lead Mr. Fehon to remember the name. I think his address was Hawthorne or some other place in Victoria.

2304. Did he speak of himself as being in the Service? No; he simply said he could confirm me in my statements with regard to Mr. Fehon having resigned his appointment in consequence of the attention of the Government or of the department being called to his having favoured M'Culloch & Co. as against other carriers; and the second letter was something with regard to Permewan, Wright, & Co., and setting out some other charge which he had brought while in the department against Mr. Fehon.

2305. The second letter of the same writer? Yes. The second letter, I must admit, led me to think there was some unpleasantness between him and Mr. Fehon.

2306. What made you think so? It was only this—that he said he had brought the charge against Mr. Fehon with reference to the administration of the department. It was that Mr. Fehon was up at some mining place in Victoria at a time when he was supposed to be conducting some inquiry into something which had gone wrong on the railway. I remember that distinctly. And he alleged that Mr. Fehon had been found fault with or censured. The language of the letter was couched in such a way as to lead me to suspect that there was some unfriendly feeling between them, and therefore I would not make use of either of the letters, and did not, though I had them in my possession at the time I made my address to the House; but I gave them to Mr. Melville to ascertain if the person was reliable before I would make use of them.

2307.

2307. Were they the letters of an ignorant or of an educated man? Well, I should say the writer was not a scholar, but an educated man—a man you would find amongst a superior class of railway employees. He explained himself clearly.

2308. Did he not say then what his occupation was? No; he said he had been in the same department with Mr. Fehon.

2309. He did not say whether he continued in the same employment? I do not think so. I thought the fact of an inferior officer making this charge against a superior officer showed that perhaps there might be something more than a simple desire to further justice, so I would not use the letters. The writer told me I could use his letter and his name, that he was not afraid, and he signed his name. I am very sorry the letter is missing; I gave it to Mr. Melville with the best intention.

2310. *Mr. Fehon.*] As to the circumstances you speak of, this is all Greek to me. You cannot tell us the name of the writer of these letters, but as a matter of fact my conduct has never been called in question; my work and action have never been challenged in the slightest degree by the political head of the Victorian railways or by anyone else.

2311. *Witness.*] I only mentioned this, because I thought you might remember the name. I never made any charge directly or indirectly against Mr. Fehon. I simply asked for an explanation. There is no one will be more happy to see Mr. Fehon's character cleared than I.

William Meeke Fehon re-examined:—

2312. *The Commissioner.*] Do you know anything of this other allusion Mr. Orr makes as to the words "Darling District" being substituted in an advertisement for the words "Darling River"? The Darling District extends from both sides of the Darling down to the Lachlan, and extends, I think, to the Murrumbidgee, at Balranald. I do not know, from memory, whether the rates were for the Darling District on the river.

2313. What do you say to his other remark that as a result M'Culloch & Co. would get their goods down for £1 per ton less than others;—what would that mean? The Railway Department gave a concession of 6d. per bale on all wool coming from the Darling up to and over 5,000 or 10,000 bales. That was to induce the steam-boat captain to bring the Darling wool to Echuca instead of taking it to South Australia. It was a direct inducement for him to turn his boat up to Echuca instead of going down the river. But the amount would be only 4s. a ton; it would not be £1. Besides, that was all published.

2314. Of course the bigger carriers would get the advantage of the concession, because they carried more stuff? Yes. We never saw Darling wool in Melbourne for some time after the line opened to Echuca.

2315. I think it was Mr. Wright who said that he understood that that concession on the Victorian lines was a concession intended to be made to one consignor, that it was taken advantage of by the large carrying firms declaring themselves to be the owners. That was the intention? It was intended to encourage carriers and steam-boat captains to bring their boats and wool to Echuca. The intention was that the carriers should get the advantage, because a consignor could not have so many bales.

2316. I forget whether I asked you whether up to the time you left the Victorian Railway service there was any 250-lb. standard? No. Our standard was 3-cwt. and over. Our division was simply to divide the greasy from the washed wool; it was a bale charge, and was all based upon carrying at a deadweight.

2317. There was some standard taken, and then the increase above that standard was nominally in the form of a percentage increase, was it not? Yes, in one way. But we reckoned greasy about five and a half bales, and washed seven and a half or eight bales to a ton.

2318. That was found convenient? Yes. We found it impossible to weigh the wool over the scales, and we had to agree to a bale rate.

2319. A wool-bale is always the same size? Yes.

2320. The advantage to the Railway Department, I suppose, of light wool is only that it is easier to handle, but if it reduces, in so far as it reduces the capacity of a ton, there is a disadvantage in light wool so called. I suppose it is not worth the while of the department to make any reduction in favour of light wool because it occupies quite as much space, and the only tangible advantage is that it is more easily handled and more quickly loaded? Well, it is impossible to fully load a truck with light wool unless it is dumped, and that is why we used to give a concession for dumped wool. We used to make a concession of 1s. a bale.

2321. When was the 250-lb. standard introduced in Victoria? I don't know anything about that standard in Victoria.

2322. Do you remember when the "scoured" standard came in? About fourteen or fifteen years ago.

2323. It was about that time that the 250-lb. standard was fixed in Victoria? There was a scoured standard fixed. I do not know whether it was 250 lb. or not. I think it was.

2324. Do you know whether that was the reason why the New South Wales Railway Department, in 1879, themselves adopted this standard—because Victoria had adopted it, and allowed certain concessions? I never knew anything about the New South Wales rates.

2325. Was it about the year 1879 that the Victorian Department adopted the "scoured" wool standard? I think it was about 1875.

2326. At that time you were a member of the firm of M'Culloch & Co.? Yes.

2327. Do you remember, when that standard was fixed, what system the department adopted with regard to that standard—whether they were strict, and only allowed wool which actually did not exceed 250 lb. to get the rebate, or whether they allowed a system of averaging bales in such a way that they were apparently of a certain weight? If a bale were 2 or 3 lb. over the standard it would be charged.

2328. When the wool was coming down in quantities it was impossible to weigh the bales at the railway station? Nearly every squatter marks the weight of his bales.

2329. Where was that done? Most of the scoured wool was at the Darling.

2330. Are you sure that the weight was commonly put on? Well, it was very commonly put on.

2331. Was that a regular practice? No. But there was always this: Every load of wool that went away with the carrier would have a way-bill; if it went away by the steamer it would have a bill of lading, and there would be given the individual weight of every bale, and when that steamer went to Echuca the station-master or the wharf-master would ask to see the steamer's bill of lading.

2332. Was it not the practice at Echuca, where there was an immense lot of wool coming down, simply to take the aggregate weight of the lots? No.

2333. What documents were sent down from Echuca to Melbourne by the Railway Department? The way-bill

J. H. Want,  
Esq., Q.C.,  
2 May, 1889.

W. M.  
Fehon, Esq.  
2 May, 1889

W. M.  
Fehon, Esq.  
2 May, 1889.

way-bill would show the approximate weight for the purpose of making up the tonnage statistics, but the way-bill would be so many bales to collect. There was no necessity for the weight of these bales where you carried at a weight per bale.

2334. Well, then came in the question whether a particular bale exceeded 250 lb. or not, because a consignment was made up in this way—so many bales not exceeding 250 lb., so many bales not exceeding 4 cwt. Was there no high standard? I think there was a weight and a half.

2335. The question is this—are you positive that the Railway Department was careful, in taking the weights of individual bales, in seeing that each particular bale did not in point of fact exceed 250 lb., or did they permit any practice such as this—that the number of the bales in a consignment should be taken, that the aggregate weight should be taken, and that then a calculation should be made as to how many bales could be got in that number apparently not exceeding 250 lb.? I never heard of the word “averaging” until it was used in connection with the Wright-Heaton case. In Victoria it was an unknown custom. It was never allowed in my time when I was in charge, and it was never allowed when I was a partner in M’Culloch & Co.

2336. It is suggested that this practice started in Victoria? You will not get one item of evidence to prove that. I have as good a knowledge as anybody of the system in Victoria, and the system of averaging was never done in Victoria. Messrs. M’Culloch & Co. used to pay for a number of bales overweight every season.

2337. Are you sure that averaging was never done there? I will stake my life on it.

2338. Now as to the 4-cwt. bales—was any system like averaging adopted in regard to these bales? Never—not in connection with any class of wool at all.

2339. Was there such a system as this—that a bale going a little over 4 cwt. was passed as 4 cwt.? No. I know we have paid where it has been 2 lb. over.

2340. The foundation of the “wool-frauds” prosecutions was this. On one side it was stated that the system of averaging was a fraud, and was worked to make a profit out of the department. On the other hand it was stated that it was legitimate—quite legitimate; that there was averaging allowed to 4 cwt., and that there was no reason why they should not average to 250 lb. Then it is contended, not by Wright, Heaton, & Co., but in relation to the other matter, that that was an ingenious system borrowed from Victoria, and I suppose, as a reason why it should have been borrowed from Victoria, it was known to be a fact that the 250-lb. bale system had been adopted in Victoria, and it was suggested that M’Culloch & Co., being large carriers in Victoria, took advantage of this system and imported it into New South Wales. I do not express any opinion as to whether it is right or wrong. I wish you to understand that I express no opinion at all. I say it may just as probably be perfectly fair and legitimate as not, and if it were the practice in Victoria under the circumstances it would bear the same aspect as in New South Wales. I want to know whether, as far as your knowledge goes, it ever was the practice at all in Victoria? It never was the practice, and I would consider it, I will not say dishonest, but a very unfair system of conducting business—unfair to the country, and unfair to the customers, and if there is any advantage the carrier can take out of the railways it is the property of the man who owns the wool.

2341. Except, of course, on contract wool? Yes; on contract wool the carrier scrapes as much as he can.

2342. What proportion did the commission wool bear to the contract wool in Victoria in M’Culloch & Co.’s business? One-third commission, two-thirds contract.

2343. Then you would think this system we have spoken of a fraud? I should think it unfair. If Wright, Heaton, & Co. were making any profit-out of the railways in the manner indicated they must have known it was an irregular process, otherwise why did not they tell me. But James M’Culloch and Jackson, who both represented M’Culloch & Co. since I ceased to be one of the company, never knew it.

2344. Where were you when the prosecutions started? I was in Melbourne. I had been home, and shortly after my return the prosecutions began.

2345. When you heard about the prosecutions, did you then get a clear idea, so as to find out what the subject-matter of the prosecutions was? I understood that, instead of declaring the weight of individual bales, the defendants had been lumping them together and striking an average.

2346. You were out of both firms then, except for these shares which Mr. Wright put in your name? Yes.

2347. After the prosecutions, in spite of there being no condemnation, what was your own private opinion about the necessity of the proceedings? Well, I was very much astonished that such a thing had taken place, and M’Culloch & Co. felt very much ashamed of having been associated with Wright, Heaton, & Co.

2348. Your impression was that it was not a fair thing to do? Yes.

2349. That being so, did not you think it a rather risky thing allowing Mr. Wright to put these 650 shares in your name? They were put in my name before the wool prosecutions, and I paid so little attention to the matter at the time that if I had been asked six months afterwards if I had shares in Wright, Heaton, & Co. I should have said I had not one. I would not have touched the name of Wright, Heaton, & Co. with a 40-rod pole after the prosecutions. This system has been carried on in this colony for years with the knowledge and consent of the railway officials, not only by Wright, Heaton, & Co., but by other carriers, until it became an acknowledged custom, which was never challenged until a question was asked in the House. And if the question had not been asked in the House the thing would have been going on now. The railway people got so used to it that it would have been going on now.

2350. That is quite apart from any system of under-stating? Yes. And another thing, and the most lax thing the railway servants could do was to take the weight on paper without weighing the goods.

2351. But how could that be managed at a place like Echuca during the wool season? I am speaking of small goods. It is a most lax thing to take the statement of any customer.

2352. You said something about scoured wool coming down with weights on it? Yes. Where the weights have been on, it has been from the scouring establishments.

2353. What was done by the officials at Echuca in the thick of the wool season to satisfy themselves that bales claiming to go under 250lb. really did go under that weight? Here they have not drawn the line between washed wool and scoured, because the weight, which has been fixed, is generally the maximum of that particular class of wool. With greasy wool we would fix a rate that would cover the whole of the greasy wool, and the same with washed and scoured wool.

2354. Do you mean that the Department would not trouble their heads to weigh those bales, but would assume them to not go over 250lb.? As a rule, a man handling the wool could tell the weight of a bale; and he could tell locks and pieces. It was a bad thing, no doubt, in this Colony, making this 250-lb. average. I say this 250-lb. average was taken advantage of by all the carriers.

2355.

2355. Who is Mr. Walker, of Permewan, Wright, & Co? This anonymous letter writer ("Veritas Vincit") asks, "Did not Mr. Fehon, when Traffic Manager, give orders at the goods sheds on the Victorian Railways for all unconsigned goods to be given to M'Culloch & Co.? I know this took place at Castlemaine and Sandhurst." Do you know of any explanation for this statement, or assumption, or suggestion? As a rule goods were always consigned to one or other carter or carrier, unless a man consigned his own goods; and the Railway Department generally made some contract with some carter to do the cartage.

2356. Do you remember whether any special order was made at Castlemaine or Sandhurst? That would come under the notice of the Station-master, not mine.

2357. Do you know anything about it? No.

2358. Was a question put at any time in the Victorian Assembly as to whether you were a shareholder in M'Culloch & Co. at the same time that you held the position of traffic manager? There never was any charge made against me.

2359. Never? No. The Minister for Railways refused to accept my resignation.

W. M.  
Fehon, Esq.,  
2 May, 1889.

## APPENDICES.

### A.

Copy of a letter from Mr. Williamson, of the Victorian Railway Department, to Mr. Fehon.

Railway Department, Accountant's Branch,

Spencer-street, Melbourne, 24 April, 1889.

Dear Sir,

I understand the Hon. Wm. J. Lyne made use of my name when giving his evidence before your Board.

I have not seen the evidence, but conclude it was not favourable to you. I cannot see how he could with effect have used what I said as being my individual views of anything derogatory to you.

The conversation took place a few days after your appointment as Railway Commissioner, and referred to an *outside* rumour circulated to a limited extent when you left this Department for Messrs. M'Culloch & Co.'s.

I have known you for over twenty-eight years, many of which were spent as fellow officers of this Department; and were my evidence required, it would be of the most favourable nature to you.

I am satisfied Mr. Lyne did not see the full effect of using my name in connection with a private and casual conversation.

I am, &c.,

J. W. M. WILLIAMSON,

Acting Sub-Accountant.

W. M. Fehon, Esq., Railway Commissioner,  
Sydney, New South Wales.

### A 2.

Copy of a letter from Mr. Williamson, of the Victorian Railway Department, to Mr. Fehon.

Railway Department, Accountant's Branch,

Spencer-street, Melbourne, 24 April, 1889.

Dear Mr. Fehon,

I was very much annoyed when I heard Mr. Lyne had used my name in your case, and must express my astonishment at such evidence being received.

I do not deny alluding to certain rumours when having a casual conversation with him, soon after your present appointment was made, but I never gave them as my individual opinion, or in any way authorized use to be made of them. Where would we all be were every casual word used in such a way?

You will observe I write the accompanying note in my official capacity, for the simple reason that it may be more effectual should you wish to use it.

At first I resolved to submit myself for examination, but owing to the difficulty as to sparing time, &c., I gave the idea up. I hope the letter will undo whatever harm has been done, if any, and that you will win the day.

I remain, &c.,

R. W. WILLIAMSON.

### B.

COPY of a letter from Mr. Williamson to Judge Murray (Commissioner), in answer to an inquiry as to whether he could give evidence on the Commission with regard to rumours in Melbourne concerning Mr. Fehon:—

Railway Department, Accountant's Branch, Spencer-street,

Melbourne, 30 April, 1889.

Sir,

In reply to your telegram of this day's date, I have to say I know nothing that could be accepted as evidence with reference to rumours about Mr. Fehon.

So little attention did I give them that I have not the faintest idea as to where I heard them, or who was my informant.

Of my own personal or official knowledge I know of no foundation whatever for any of them. And my opinion is they were untrue.

Under these circumstances I consider the Satutory Declaration you ask for would be useless, and it is simply impossible for me to attend in Sydney and give evidence as you suggest, owing to the fact of the Acting Accountant being subpoenaed to Hobart in connection with the Tasmanian Main Line Railway Case.

I have to express my deep regret that a few words, casually and thoughtlessly used in the course of a private conversation, should be used as they have been.

I am, &c.,

J. W. M. WILLIAMSON,

Acting Sub-Accountant Victorian Railways.

C. E. B. Murray, Esq.,  
Commissioner in Fehon Inquiry,  
81, Phillip-street, Sydney.

## C.

COPY of a letter from the Honorable Francis Longmore, of Victoria, to the Commission, in answer to an inquiry concerning Mr. Fehon's retirement from the position of traffic manager in Melbourne, and other matters connected therewith. [Memo.—This letter was not received until three weeks after the inquiry had been sent to Mr. Longmore, and consequently it arrived in Sydney after Commissioner Murray had written out his report.]

Sir,

Tullaree, Tarwin Lower, 7 May, 1889.

In reply to your communication of 17th April, I beg to state that when I wrote formerly in answer to Sir Henry Parkes' letter to me on the same subject, I stated all that I knew of any importance to the inquiry with reference to Mr. Fehon's retirement from the position of traffic manager of the Victorian Railways. I said his reasons for retiring seemed satisfactory, but I did not specify them. They were as follows:—My predecessor in office had appointed a gentleman to the position of Secretary for Railways who knew very little, if anything, of the work he had to do. I sent out a minute to him containing some important alterations that I wished made in charges for the carriage of grain, and instructed him to inform the traffic manager. Mr. Fehon brought the secretary's memorandum to me and asked if it contained my instructions. I said "No." I called the secretary in, showed him his error, and explained my views to him. He wrote another memorandum, which Mr. Fehon again brought to me, that showed that the secretary was incapable of performing the work he had undertaken. Mr. Fehon asked if he was to be expected to work under such a man. I did not give him a reply, when he said with some bitterness, that he had during his life been supplying brains to such fools as the secretary, and would do so no longer. A few days after he sent in his resignation. I never heard any rumours of Mr. Fehon having favored McCulloch & Co. while he was traffic manager. I did hear that Mr. Fehon joined McCulloch & Co. very shortly after he resigned his position as traffic manager of the Victorian Railways. I have no private information to give the Commission with reference to Mr. Fehon, and I don't think it should have been suggested to me that such information would be acceptable. The nearest magistrate to me lives 16 miles distant across a rough country, and I hope the Commission will not consider it necessary for me to undertake the journey for the purpose of making these statements on oath.

I have, &c.,

FRANCIS LONGMORE.

To the Secretary, Fehon Commission Inquiry,  
Sydney.

## C 2.

Copy of an anonymous letter received by Mr. Want, M.P.

Dear Mr. Want,

Toolamba, 16 January, 1889.

I wish to put the following questions; the answers will be for your information, in connection with Mr. Fehon:—Did he not, when Traffic Manager, give orders at the goods sheds on the Victorian railways for all unconsigned goods to be given to McCulloch & Co. for delivery? I know this took place at Castlemaine and Sandhurst. This can be proved by persons employed in the sheds at the time; and with regard to this, was not the question put in the Legislative Assembly whether Mr. Fehon was a shareholder in McCulloch's firm, at the same time held the position of Traffic Manager? And was not this the cause of his having to sever his connection with the Railway Department in Victoria? And was it to be expected that Messrs. Permewan, Wright, & Co. would stand by and see this done and not enter a protest? Mr. Walker of the latter firm could answer this question. And was not Mr. Fehon's name in the Registrar-General's office as a shareholder in the Limited Liability Co. of McCulloch & Co.?

I hope you will excuse me for this scrawl, but I have disguised my hand as much as I can. I hope you will receive this all right, and if any more facts will be acceptable about this matter please notify me in the missing-friends column of the *Age* newspaper, and

Oblige yours in heart,

VERITAS VINCIT.

P.S.—I have been under the impression that I had better disguise my hand, but the facts are the same.

Yours,

V.V.

— Want, Esq., M.P., Sydney.

## C 3.

GREAT SOUTHERN, WESTERN, AND RICHMOND RAILWAYS.

General Order, No. 28.—M.P. 81-16,015.

As some misapprehension seems to exist respecting the proper mode of calculating the trainage charges on wool exceeding 4 cwt. per bale, I have to direct the attention of the Staff to the following examples:—

(1.) Should the consignment consist of *one* bale weighing not more than 4 cwt. 0 qrs. 14 lb., it is to be charged for as a 4-cwt.-bale, but if it exceeds 4 cwt. 0 qrs. 14 lb., 15 per cent. additional is to be charged for all weight in excess of 4 cwt. See Goods Rate Book—page 20.

(2.) But should the consignment consist of say 60 bales, averaging 4 cwt. 0 qrs. 12 lb. each (none of which exceed 4 cwt. 0 qrs. 14 lb.), the correct plan is to find out the gross weight and divide by 4 cwt. This would give 61 bales, and leave a balance of 2 cwt. 1 qr. 20 lb., so that the consignment should be charged for as 62 bales; but should any of the bales weigh over 4 cwt. 0 qrs. 14 lb., each one over that weight should be charged the higher rate, in accordance with Example No. 1.

W. V. READ,

Traffic Manager.

Traffic Manager's Office, Sydney, 30th December, 1881.

## C 4.

[Extract from *S. M. Herald*, 27 July, 1886.]

## THE ALLEGED RAILWAY FRAUDS.

YESTERDAY, in the summons division of the Water Police Court, the hearing of the complaint against Francis Augustus Wright, Edward Heaton, George R. Bonamy, Henry R. Wilson, Benjamin Windsor, Donald Turner, Henry Hansard, and Edward Webster, charged, on the information of Charles Augustus Goodchap, with having conspired amongst themselves to cheat and defraud the Commissioner for Railways of divers large sums of money, was continued before Mr. Whittingdale Johnson, S.M.

Charles A. Goodchap, recalled, said, in reply to Mr. Rogers, that averaging was not allowed in what were called competitive districts; the regulation was that goods coming from beyond a certain radius should be allowed a percentage reduction; there was no averaging.

To

To Mr. Irving: The Government gave no guarantee of the accuracy of the weight of goods; he did not think the Government weighed the wool at the stations; he knew of no inscription on tickets to the effect that the Government did not guarantee the accuracy of the weights.

To Mr. Salomons: The large firms, like Wright, Heaton, and Company, had sheds near the railway stations; the defendant Wright, or any of the other defendants, had not directly told him that there was a system of averaging in vogue with reference to bales of wool under 4 cwt.; witness had no knowledge that averaging was carried on until the present prosecutions were entered into; he did not up to the time the prosecution against Lee and M'Alister was commenced know of any minute (relating to the averaging of bales of wool) by Mr. Paull, station-master at Darling Harbour.

Mr. Rogers: Do you know how the department arrived at the weights of wool at Rydal, Wallerawang, Bathurst, and Orange?

Witness: Mr. Wright, the then Minister for Works, in a minute, required that the carriers' way-bills (which corresponded with the station way-bills) should be seen by the officers of those stations.

To Mr. Rogers: He did not know whether the sheds had been erected by Messrs. Wright, Heaton, and Co., at the railway station, after Mr. Wright's order, that sales of produce should not be made in the railway yards, had been made.

To Mr. Gannon: The refund to the defendant firm was made without witness's knowledge; what were called the irregularities also happened without witness's knowledge; Mr. Paull was subordinate to Mr. Evans; the minutes produced had not passed under Mr. Read, Traffic Manager, nor Mr. Evans, but had gone through their department, and had been signed on their behalf; witness left it to these officers to carry out the rate-sheet, and if they departed from it they did a wrong act.

To Mr. Salomons: He left it to his subordinates to carry out the rate-sheet, and if they departed from it they did wrong; in reply to a subsequent minute, Mr. Evans signed the memorandum produced. [Mr. Salomons desired to put in the minute signed by Mr. Evans, but Mr. Rogers objecting, his Worship said it would be better to call Mr. Evans as a witness.]

Mr. Salomons: Had Mr. Paull, despite his long service, any authority to make the statement he did, or to alter the rates?

Witness: No.

Examination continued: These charges went back to 1885, and the statement by Mr. Paull was in 1886; the first that witness knew of this statement was four or five days ago. Mr. Abigail moved for a certain return on the 18th March, 1885, and the return was made on the 10th December, 1885; there was a recess between, causing delay.

Mr. Rogers: Who is this Mr. Abigail? (Laughter.)

Witness: A Member of Parliament.

## D.

COPIES of Correspondence regarding charges made in the Legislative Assembly against Mr. Fehon, which was ordered by the Legislative Assembly to be printed, 8 January, 1889.

Telegram from W. M'ulloch, Esq., to W. M. Fehon, Esq.

Market-street, Melbourne, 8 December, 1888.

CONGRATULATE you on splendid opportunity given of clearing your character from foul lies uttered Parliament yesterday, and justifying Government appointing you. Insist Board making most searching inquiry previous joining me, for my sake as well as yours. The fuller and more searching inquiry the better for you.

W. M'ULLOCH.

For Sir Henry Parkes' information.—W. M. FEHON.

Sir,

Colonial Secretary's Office, Sydney, 10 December, 1888.

I am directed by the Colonial Secretary to call your attention to the accompanying copy of the official report of the proceedings of the Legislative Assembly on the 7th instant.

You will observe that Mr. Want, the Attorney-General in the late administration, made a statement that he, as law adviser of the Crown at the time, had it in contemplation to prosecute you for being concerned in the railway frauds for which others were prosecuted in 1886, and that he further alleged that you were guilty of gross misconduct as an officer of the Victorian Railway Service in favouring some private carrying firm presumably for your own advantage. These imputations against you by a person in Mr. Want's public position assume so serious a complexion that only one course is open to the Government, and you are now called upon to offer any explanation and evidence which you may deem necessary in vindication of your character. It is not doubted that you will be able to clear yourself of the aspersions cast upon you, and render any further proceedings unnecessary.

I have, &c.,

CRITCHETT WALKER,

Principal Under Secretary.

W. M. Fehon, Esq.

Sir,

Department of Railways, Sydney, 11 December, 1888.

I have the honor to acknowledge receipt of your letter of yesterday's date, directing my attention to the official report of last Friday's proceedings in the Legislative Assembly, and particularly to the remarks made by Mr. Want, the late Attorney-General, wherein he stated "that when he was Law Adviser of the Crown he had it in contemplation to prosecute me for being concerned in the railway frauds, for which others were prosecuted in 1886, and further, that I had been guilty of gross misconduct as an officer of the Victorian Railway Service in favouring some private carrying firm, presumably for my own advantage."

In reply, I will place before you, for the information of the Colonial Secretary, such facts as will, I trust, prove clearly to the Government, the Assembly, and the country, that the statements made were utterly groundless, and should never have been uttered, except the person making them was in possession of some reliable information, which in this case was impossible, as there does not exist one atom of truth on which to hang the ingeniously arranged statement of the Member for Gundagai.

I will first reply to the charge affecting my position as Traffic Manager of the Victorian Railways.

A statement of a somewhat similar nature was circulated some sixteen years ago, by a man long since dead, and who occupied a position in the Victorian Legislature.

By good fortune I have preserved a letter written by me to the editor of the Melbourne *Argus* in 1872, which I attach hereto, and which is the best evidence I can offer as to the untruthfulness of the charge. It effectually silenced the man who invented the falsehood, and I have never heard a word on the subject since, until my appointment as one of the Railway Commissioners of New South Wales.

As

As a fact the Government of the day very unwillingly accepted my resignation. I was presented with a handsome service of plate and an address by the citizens of Melbourne. The presentation was made in the Town Hall by the Mayor, and the address is signed by the Mayor and the three Mayors preceding him. I was also the recipient of a handsome testimonial from the staff of the Victorian Railways, and in my thirty years' experience in Melbourne I cannot call to mind a single public officer who left the Service with such flattering marks of official and public esteem.

Mr. Longmore was the political head of the Railways when I resigned. I have not seen him for some years, but I believe his address is Upper Tarwin, Gippsland. Should you communicate with him I am sure he will give Mr. Want's statement a most emphatic denial, as would also the Hon. Wm. Wilson, who resides in Melbourne, and was, I think, twice Minister for Railways during the time I held the office of Traffic Manager.

Any inquiry the Government chose to make can only confirm my statement.

The other charge is one Mr. Want should know something about, but here also he is equally at fault.

The history of my connection with Wright, Heaton, & Co. is as follows:—

Shortly after I joined the firm of Wm. M'Culloch & Co. we thought it desirable to establish a branch of our business in Sydney, and for which purpose we took a fresh partner, who was to reside in Sydney and conduct the business. It was up-hill work, and resulted in overtures being made which ended in an amalgamation of our Sydney business with that of Wright, Heaton, & Co.; the partners in that firm managing the business without any control from the Melbourne partners.

Wm. M'Culloch & Co. was then a limited company, and we did not like holding a share in Wright, Heaton, & Co.'s business, where our liability was unlimited. Consequently they were induced to put their business also into a limited liability company. Twelve thousand shares were issued, of which Wm. M'Culloch & Co. (limited) had 4,000. For the purpose of securing a full voting power at half-yearly meetings the 4,000 shares were divided amongst eight shareholders in Wm. M'Culloch & Co. (limited), each having 500 placed in his name in trust for the company. I was one of the eight. Messrs. Wright and Heaton were the managing directors, and Wm. M'Culloch & Co. took no part directly or indirectly in the management of the business.

I paid occasional visits to Sydney to attend the meetings of the company, to ascertain in general its position, but beyond that I knew nothing of its internal working.

The business was extended to Queensland and the capital was increased, resulting in some more shares being placed in the names of the Melbourne trustees.

In 1882 I gradually sold out my interest in Wm. M'Culloch & Co.'s, and in March, 1883, I started on a trip to Europe. Just prior to leaving I sold the last of my shares, and since that date I have not had one penny interest in any carrying business. Whilst in Wright, Heaton, & Co. (limited) I never at any time, held a share in my own right. When dividends were paid it was to Wm. M'Culloch & Co. (limited) and calls were also paid by the cheque of that company, although the shares were placed, as a matter of convenience, in individual names.

It was some two years after my return from Europe that Wright, Heaton, & Co. were charged with irregularities in connection with their wool consignments, and to no person was it a greater surprise than to myself, so that by no process of reasoning can I in the slightest degree connect myself with what Mr. Want so intimately associates me.

My statement is capable of proof, and I defy Mr. Want or any other person to prove that I had the slightest knowledge of or that I was directly or indirectly associated with any irregularity.

I can do no more than give a most complete denial to every statement made to my discredit, and should the Government or the Opposition Members of the Assembly be able to prove to the contrary, I will at once return to the Government the Commission with which I have been honored.

I have made considerable sacrifice to accept the office conferred on me, but I should most certainly have declined it had I known that its possession would have entailed my name being dragged before the public, in connection with dishonorable transactions in which I had no part.

I have, &c.,

W. M. FEHON,

Railway Commissioner.

The Principal Under Secretary.

[Enclosure.]

MR. ORR, M.L.A., AND MR. FEHON.

To the Editor of the Argus.

Sir,—I seek the favour of your columns to reply to an attack made on my public and private character in the House of Assembly on Thursday last by Mr. Orr, M.L.A. for the Murray district. The purport of his statement is, that I was connected with the firm of Wm. M'Culloch & Co. before I left the Railway department, and that I was in the habit of showing that firm special partiality.

I first heard of such a rumour being circulated after I left the railway, and at once saw the Commissioner on the subject, and asked him to make an appointment with Mr. Orr, allowing me to be present, so that I might ascertain how far he had authorised such a report, and that Mr. Longmore might ascertain its truth or otherwise.

Whilst we were talking, Mr. Orr happened to call about other business, and after transacting same was leaving the office, when I told him I wished to have a few words with him in Mr. Longmore's presence relative to a false rumour which had been circulated about myself, and of which I believed he was the author. I repeated the substance of the statement, when he replied that he had not spread the report as a fact, but had remarked that he thought such might be the case. Feeling indignant at his reply, I told him that he had concocted and spread the report knowing it to be untrue. Finding that he was cornered up, he said if he had made any statement which was not true he was sorry for it. I then accepted his apology; we shook hands, and I considered the matter ended.

After he left the office Mr. Longmore remarked to Mr. Fyfe, of the Railway department, who was present through the interview, that Mr. Orr had lowered himself very much in his estimation.

I thought that Mr. Orr, seeing he had done me a gross injustice, would at least have refrained from making any further remarks on the subject; but, on the contrary, I was informed a short time afterwards, when on his election tour, he remarked in conversation with a friend of mine, "That he had a great dislike to me, and that if he got in the House he did not care so much for the £300 per annum as for the opportunity it would give him of slating me." This threat he has taken the first opportunity of carrying into effect.

The fact is, Mr. Orr was and is a carrier, and seems to be so blinded by jealousy at my joining a firm in the same line of business that he allows no opportunity to pass of attempting to injure me.

In conclusion I may say that whilst traffic manager my conduct towards M'Culloch & Co. and all other firms doing business with the department is open to the strictest investigation, and I have now reason to know that to my efficient and straightforward conduct alone I am indebted for the offer of an interest in M'Culloch & Co.'s business, which my meagre salary and great responsibility as traffic manager alone induced me to accept.

I much regret having to trouble you with so long and unpleasant a communication, but as Mr. Orr in making his statement is protected by the privileges of the House, I have no other means of laying the facts of the case before the public.

I am, &c.,

W. M. FEHON.

Dear

Melbourne, 30th November, 1872.

Dear Sir Henry,

Moss Vale, 12 December, 1888.

I meant yesterday to have written you a note respecting an interjection made by Mr. Lyne on last Friday night, when the Railway Commissioners were being discussed in the Assembly, but I was busy in the office up till the time we left by the mail train. The remark I allude to was to the effect that I applied to Mr. Lyne when he was Minister for Works for one of the Commissionerships of Railways. The interview he refers to was the first and only time I ever met him officially, and it occurred as follows:

About two years since I noticed in the papers that the Jennings Government were thinking of putting the Railways of New South Wales under a Board of Commissioners, a short while after I was in Sydney, and it occurred to me that, as I had recently returned from England, where I was asked by Mr. Murray Smith, the Agent-General, to assist him in the selection of a chairman for the Victorian Board, that I might give Sir Patrick Jennings, whom I had known for some years, the benefit of my experience in London, where I interviewed a large number of gentlemen in connection with that appointment.

I called on him at his office, and he was much pleased with the information I gave him, and he asked me if I would call on Mr. Lyne and have a talk with him on the subject, and as I did not know that gentleman he gave me a note of introduction. I went to his office and saw him, and we had a general talk over the subject, but as he was busy the interview was short. My only object in seeing Sir Patrick Jennings and Mr. Lyne was the idea that I might be able to give them some useful information. At that time I had not the slightest idea that I would have accepted such a position had it been offered. If Mr. Lyne will tax his memory I feel sure he will do me the justice to say the above is exactly what took place.

The Colonial Secretary.

I am, &c.,

W. M. FEHON.

Sir,

Colonial Secretary's Office, Sydney, 12 December, 1888.

With reference to my letter of the 10th instant, I am now directed by the Colonial Secretary to transmit to you a further report of the proceedings of the Legislative Assembly, by which you will see that Mr. J. H. Want, M.P., makes charges against you in a clear and definite form.

(11 Dec., 1888.)

I am to request that you will kindly furnish me with such further explanation as you may desire to make.

I have, &c.,

CRITCHETT WALKER,

Principal Under Secretary.

W. M. Fehon, Esq.

Sir,

Department of Railways, Sydney, 13 December, 1888.

I have the honor to acknowledge receipt of your letter of yesterday's date, forwarding for my information a further report of the proceedings of the Legislative Assembly, wherein Mr. Want repeated his charges against me but in a clearer and more definite form.

This is the first instance in my long official and commercial experience, extending over thirty years in Australia, that my honor and honesty has been impugned; and it is very humiliating to me to be, as it were, put on my trial to answer charges for which, as I stated in my previous communication, there is no foundation; but in deference to the wish expressed in your letter I will, for the information of the Colonial Secretary, give replies as concise as possible to what I gather from *Hansard* report to be Mr. Want's points.

It appears to me that he based his statement (first) on the information supplied by two persons whom he terms informers, and (secondly) from returns he has perused in the Registrar-General's Office, and upon this information he builds up his case, wherein he charges me with being the arch-rogue who invented what he terms the wool frauds, and he does not hesitate to call me a thief and everything else that is dishonest and dishonorable, and not only myself, but the firm, and afterwards company, of Wm. M'Culloch & Co. (limited).

It is not my intention now, nor am I required to defend others who are equally able to defend themselves from such baseless insinuations, but I may state that all the gentlemen whose names appear as shareholders in Wm. M'Culloch & Co. (limited) on Wright, Heaton, & Co.'s prospectus are highly honorable men, and are esteemed as such by all who know them.

I can understand the stories of the informers proving true in regard to what may have come under their individual notice, but as I never did one act, or gave the slightest advice in respect to the manner in which Wright, Heaton, & Co.'s business should be carried on, I fail to see how the informers could give Mr. Want any information regarding myself.

In my previous communication I gave as nearly as possible the date of my severance from Wm. M'Culloch & Co., and the history of my connection with Wright, Heaton, & Co., but I may repeat that I sold my last shares in Wm. M'Culloch & Co. (limited), in February, 1883, and as Wright, Heaton, & Co. shares were an asset in Wm. M'Culloch & Co.'s business, I consequently ceased to have the slightest interest in that company also.

I find that I only attended six meetings of Wright, Heaton, & Co. (limited), during the whole time I had any association with the company, and the last one was in August, 1882. The minute book of the company can prove this.

Although I ceased to have any interest in Wm. M'Culloch & Co. (limited), in February, 1883, I find the Wright, Heaton, & Co. shares were not taken out of my name till September, 1884, and 650 shares, which Mr. Wright had placed in my name, I find to my surprise they were not transferred from my name till June last, although I had signed a blank transfer at the time they were so placed in my name; however the 650 shares never belonged to me in any shape or form, which is easy of proof, so that Mr. Want's two charges, first, that "I am even now a shareholder in Wm. M'Culloch & Co. (limited)," and second, by that "on the day I was appointed I held a large number of shares in a company, some members of which having been prosecuted on two different occasions" fall to the ground.

I believe I am justified in saying that the books of Wm. M'Culloch & Co. (limited) and Wright, Heaton, & Co. (limited) are open to the inspection of any person the Government may appoint to prove the truth or otherwise of my statement.

My removal from the Railway Department of Victoria to a partnership in the firm of Wm. M'Culloch & Co. I need not again touch. I have made my statement, which the Government can verify by reference to Crown Ministers in Victoria, who know all about the circumstances, and who can vouch for my probity and honorable conduct during a long series of years.

In conclusion, as I feel deeply aggrieved, I may be excused for saying that nothing can justify a man being attacked as I have been, and that no privilege should shield one whose words might blast the future of an innocent man. It is very well for Mr. Want to say he bears me no ill-feeling, but his language nevertheless has the same effect as if he did, and if he only knew me better I believe he would have been the last to become the mouthpiece of such a gross injustice.

I have, &c.,

W. M. FEHON,

Commissioner for Railways.

The Principal Under Secretary.

Sir,

Colonial Secretary's Office, Sydney, 13 December, 1888.

I have the honor to enclose copies of the Official Reports of the Debates in the Legislative Assembly of this Colony, on Friday and Tuesday last, in which it will be seen that Mr. J. H. Want, late Attorney-General in the Jennings administration, made a strong attack upon the character of Mr. W. M. Fehon, who was lately appointed by this Government to the office of Railway Commissioner.

I shall feel much obliged if you will cause such strict inquiries to be made as will place beyond doubt the question of Mr. Fehon's character and conduct as an officer in the Railway Service of Victoria.

If any other information can be afforded respecting Mr. Fehon's character as a citizen of your Colony, I shall feel much indebted to you for any such information being supplied to this Government.

I have, &c.,

HENRY PARKES.

The Honorable Duncan Gillies, M.P., Victoria.

Sir,

Colonial Secretary's Office, Sydney, 13 December, 1888.

I have the honor to transmit herewith copies of the official reports of Debates in the Legislative Assembly of this Colony in which attacks were made upon the character of Mr. W. M. Fehon, lately appointed by this Government to the office of Railway Commissioner. I shall feel much obliged if you will inform me of any knowledge you may possess bearing upon the misconduct imputed to or insinuated against Mr. Fehon, either in his capacity as an officer of the Railway Service of Victoria, or in any other capacity.

I have, &c.,

HENRY PARKES.

The Honorable William Wilson, Melbourne.

[Similar letters were addressed to the Honorable Francis Longmore, Melbourne; the Honorable James Service, Melbourne.]

Dear Sir Henry,

Department of Railways, Sydney, 17 December, 1888.

In compliance with your request, I forward herewith a short memorandum as to dates, &c., bearing on the charges made against me by Mr. Want, and in addition I forward two letters received by me, which also bear on the same subject—one from Mr. Harold Selwyn Smith, respecting my standing in the Victorian Railway Service, and the other from Mr. F. A. Wright, regarding my association with the Company of Wright, Heaton, & Co.

I also enclose a copy of Wright, Heaton, & Co.'s prospectus, wherein you will see the dealing was between Wm. M'Culloch & Co. (limited) and Wright, Heaton, & Co., and not between individuals and that company.

As these three documents are all in corroboration of my previous communication, I trust you will have them so dealt with that they may have the same publicity as the charges it has pleased Mr. Want to make against me.

I am, &c.,

W. M. FEHON.

The Colonial Secretary.

[Enclosures.]

MR. FEHON'S CASE.

JOINED Wm. M'Culloch & Co. in March, 1872.

Ceased his connection with them in February, 1883.

Has held no interest in any carrying company since February, 1883.

Wright, Heaton, & Co.'s business was put into a company in March, 1880, when Wm. M'Culloch & Co. (Limited) had 4,000 shares, which, for convenience of voting, were divided amongst eight of Wm. M'Culloch & Co.'s shareholders, Fehon having 500 placed in his name.

In August, 1882, the capital of W. H. & Co. was increased, and 800 more shares were placed in Fehon's name until March, 1883, when Fehon sold out of Wm. M'Culloch, and consequently ceased to be a shareholder, when the interest which stood in his name, in Wright, Heaton, & Co., was transferred to John Jackson, who was also a shareholder in Wm. M'Culloch & Co.

In 1885 F. A. Wright, without Fehon's knowledge, placed 650 of his shares into Fehon's name, and 1,835 into the names of other persons. After doing so he wrote Fehon, and asked him to sign a blank transfer. These shares Wright allowed to remain in Fehon's name till June last, but these shares Fehon never had the slightest interest in.

Fehon never saw one of Wright, Heaton's business books, and never gave the slightest order or advice in connection with working Wright, Heaton's business; neither did he ever have any conversation with any member of the staff as to the way they should conduct their business.

Wright, Heaton's prospectus does not even mention Fehon's name as a trustee for Wm. M'Culloch & Co.'s interest—the names being Hon. C. J. Jenner (late Chairman of Committees in the Legislative Council of Victoria) and Mr. Jenkin Collier, the well known contractor.

As a fact, Fehon never had a single shilling in Wright, Heaton's business, except that as a shareholder in Wm. M'Culloch & Co.; he was interested in all the assets of that company, and of which the shares (M'Culloch's) held in Wright, Heaton, & Co. formed a portion.

Mr. Want stated he could find nothing against Fehon when getting up the case against Wright and Heaton.

All his statements are based on the word of two informers who could know nothing of Fehon.

W. M. Fehon, Esq., Commissioner for Railways, Moss Vale,—

Dear Sir,

Ellenboro Chambers, 97, Castlereagh-street, 13 December, 1883.

I deem it only courteous to you to annex copy of a note I addressed to Mr. J. H. Want yesterday, and which is self explanatory.

Yours, &c.,

H. SELWYN SMITH.

My dear Mr. Want,

Sydney, 12 December, 1883.

If the *Herald* correctly reports your reference in the House last night to Mr. Fehon in connection with the inquiry I conducted relating to the Victorian Railway Department in 1862, you must have misapprehended my reply to your request that I would tell you whether I had held an inquiry into Mr. Fehon's conduct while he was in the service of the Government.

I told you distinctly that I had not, and I explained further to you. In the year 1862 the Governor in Council appointed me under commission to investigate and report upon every Department of the Victorian Railways, excepting only that of the Engineer-in-Chief.

In the course of my duties I became acquainted with Mr. Fehon, who was then in charge or sub-charge of the goods-sheds. I formed a high opinion of his special abilities for the discharge of the duties assigned to him, and to this effect commended him to the Commissioner of Railways—the late Sir W. H. F. Mitchell, and to the Traffic Superintendent, the late Mr. John Carruthers. He was, I think, immediately thereafter appointed to the full charge, a position he held up to the time he resigned the service.

My report to the Government is a Parliamentary document in Victoria, and a reference to it will show that Mr. Fehon's Department was commended, and he certainly was not the subject of any special inquiry by me. It seems to me to be due to Mr. Fehon to write what I have done.

Yours, &c.,

H. SELWYN SMITH.

J. H. Want, Esq., M.P., &c., &c.

Wright, Heaton, & Co. (limited), 241, Pitt-street, Sydney, 13 December, 1888.

My dear Mr. Fehon,—

It was with great pain that I read the very unfair and in some respects untruthful statements made on Tuesday night in the Assembly by Mr. J. H. Want reflecting on you.

It is the worst possible form of attack, because to those unacquainted with the facts of the case it bears the semblance of truth; and I have no doubt that Mr. Want has the fullest belief in his statement and was actuated by a sense of duty in making the charges.

I shall be very pleased, if called upon, to give evidence upon oath, which can be confirmed by others if necessary, that will convince every fair-minded man in the community that you are entirely guiltless of the charges brought against you, so far as your connection with Wright, Heaton, & Co. is concerned.

The facts I can prove are as follows:—

- 1st. That you never held a share in Wright, Heaton, & Co., other than as a trustee.
- 2nd. That you ceased to have any business transactions (as a director) with the firm since August, 1882, that being the date of your last attendance at any meeting of the directors of which up to that time you had been one from 1880. Your total attendance at meetings were seven, four of which were formal for the initiation of the company; and in September, 1884, the interest in our firm which stood in your name, viz., 1,300 shares, were transferred to Mr. John Jackson, who had succeeded you as a director to represent the Melbourne interest.
- 3rd. That you never looked into or examined in any way any business books of the firm, and that no person other than the employees and the Managing Directors, Mr. Heaton and myself, have ever done so; in fact no details of the business or any books, other than the minute, bank, or transfer books, have been before a board meeting, or been looked at by any director other than those entrusted with the management.
- 4th. Dealing with that part of Mr. Want's speech in which he says you were recently, and he believes still, a shareholder of my company, it has arisen from the fact that in October, 1885, just about the time I went out of office and Parliament, I transferred, as a matter of convenience to myself, 650 of my shares to your name, and, at the same time, 750 to C. B. Lowe, of Sydney; 508 to Tunmouth F. Dye, of Brisbane; and 577 to John Jackson, of Melbourne. This transfer took place at my request, and without the knowledge of yourself or the other gentlemen named, neither of whom were considered as shareholders, or acted as such, the shares being retransferred to me in blank within a week from the date of issue. The transfer in our books took place in June last.

This is the only portion of Mr. Want's charge *re* W., H., & Co. that can be considered serious against you; and the facts I have stated can be proved by numbers of reliable witnesses. I have shown this to Mr. Heaton, who entirely approves of it, and, like myself, is perfectly willing to submit himself to any examination in relation to this matter.

I remain, &c.,

F. A. WRIGHT.

W. M. Fehon, Esq.

MEMORANDUM OF ASSOCIATION OF WRIGHT, HEATON, & Co. (LIMITED).

3.—The objects for which the Company is established are the carrying on and in such place or places as the company may from time to time determine, and for the purchase of (in all its branches) the business heretofore carried on by Francis Augustus Wright, Edward Heaton, Edward Bell Barber, and Jenkin Collier, with Caleb Joshua Jenner, as Trustees for William M'Culloch & Co. (limited), under the style or firm of "Wright, Heaton, Barber, & Co.," as agents to the Railways of New South Wales, contracting and general carriers, express agents, Customs, shipping, insurance, general and forwarding agents, merchants and traders, and the goodwill thereof; and all the property (real and personal) of and belonging to or used in or about or in connection with the said business, whether in the name of the firm or in that of individual partners, and to undertake all or any part of the liabilities of the said Wright, Heaton, Barber, & Co. in relation thereto, as and from the first day of February, one thousand eight hundred and eighty.

We, the several persons whose names and addresses are hereunto subscribed, are desirous of being formed into a company in pursuance of this memorandum of association, and we respectively agree to take the number of shares in the capital of the company set opposite our respective names.

Names.	Addresses and description of Shareholders.	Number of Shares held by each Shareholder.
W. M'Culloch .....	Gentleman, 123 Collins-street, Melbourne .....	Five hundred shares.
James M'Culloch .....	Gentleman, 123 Collins-street, Melbourne .....	Five hundred shares.
C. J. Jenner .....	Importer, 18 Market-street, Melbourne .....	Five hundred shares.
Jenkin Collier .....	Contractor, George-street, East Melbourne .....	Five hundred shares.
W. M. Fehon .....	Carrier, 123 Collins-street, Melbourne .....	Five hundred shares.
W. G. Sprigg .....	Accountant, 18 Market-street, Melbourne .....	Five hundred shares.
William Cain .....	Contractor, South Yarra, Melbourne .....	Five hundred shares.
L. Munro .....	Gentleman, Sydney .....	Five hundred shares.
F. A. Wright .....	Carrier, 485 George-street, Sydney .....	Two thousand six hundred and seventy-seven shares.
David M'Neil .....	Carrier, Tamworth, New South Wales .....	Two thousand shares.
Edward Heaton .....	Carrier, Orange, New South Wales .....	Two thousand six hundred and seventy-seven shares.
John Woods .....	Contractor, Manly Beach, New South Wales..	Six hundred and forty-six shares.

INCREASE

## INCREASE OF CAPITAL.

Memorandum of Resolution carried at an adjourned Extraordinary General Meeting of Shareholders, held at the Company's Offices on Friday, 4th August, 1882.

That the capital of the Company be increased to £80,000, by the issue of 4,000 new shares at £5 each, and that the new shares be offered to William McCulloch & Co. (limited), on the following terms, viz. :—That they purchase them at six pounds five shillings (£6 5s.) per share, viz., £3 5s. paid up, and that the bonus of £12,000 be added to the present value of existing shares, and further, that the six thousand pounds (£6,000), at present written off goodwill account, and the six thousand pounds (£6,000) brought forward on the last year's balance-sheet be used to further write up the value of the 12,000 existing shares, another £1 per share making them paid up, £4 5s. per share, but all shares participate equally in dividends irrespective of amount paid up.

Sir,

Premier's Office, Melbourne, 20 December, 1888.

I have the honor to acknowledge the receipt of your letter of the 13th instant, requesting to be furnished with some information respecting the character of Mr. W. M. Fehon, recently appointed to be a Railway Commissioner in New South Wales.

As I mentioned in my previous note to you on this subject, Mr. Fehon resigned his position as Traffic Manager in the Victorian Railway Department previous to my becoming the Minister at the head of that Department in 1872.

The date of his retirement was the 31st March, 1872. It was entirely voluntary on his part, and, as was well known at the time, it was with the intention of joining the carrying firm of McCulloch & Co.

I may state that some months after Mr. Fehon's retirement he made an application to me for a retiring allowance, on the special ground, that while he was in the Railway Department, he had rendered exceptional service to the Government. No retiring allowance was, however, granted to him, because he left the Service voluntarily, in order to benefit himself.

I know nothing, and have not heard of anything, detrimental to Mr. Fehon's character and conduct as an officer in the Railway Service of Victoria. As regards his reputation as a citizen, I take the liberty of forwarding to you a printed report of a farewell luncheon given to Mr. Fehon previous to his departure from Melbourne to assume the responsibility of his office as one of your Railway Commissioners. It will be noticed that a number of well-known public men were present and took part in the proceedings. This circumstance may well be allowed to speak for itself.

I have, &c.,  
D. GILLIES,  
Premier.

The Colonial Secretary, New South Wales.

[Enclosure.]

"The Argus," 3 November, 1888.

## FAREWELL LUNCHEON.

MR. W. M. FEHON, who was recently appointed a Commissioner of Railways in New South Wales, was entertained at luncheon yesterday, in the supper-room at the Town Hall, by a large number of Melbourne citizens. The chair was occupied by Mr. James Service, M.L.C., and amongst those present were Mr. Deakin (the Chief Secretary), Mr. Simon Fraser, M.L.C., Mr. R. Ford (Railway Commissioner), Mr. R. Speight, Mr. D. M. Davies, M.L.A., Mr. C. W. Langtree, and Mr. C. H. James, M.L.C.

The CHAIRMAN, after the usual loyal toasts had been honoured, and also that of His Excellency the Governor, stated that he had been requested to apologise for the absence of Mr. Gillies. However, there were two or three members of the Ministry present, and he proposed the health of the Government, in order that Mr. Deakin might be able to add his testimony to the value of their guest.

The toast was drunk with enthusiasm.

Mr. Deakin, replying, said he proposed to say nothing about the Government, except that it and past Governments had been under great obligations to Mr. Fehon, both in connection with the Central Board of Health, and also with the railway service of the Colony. Mr. Fehon, in the high and honourable position he was going to occupy, could do much to cement the relations of the two Colonies. Although he was partially parting from friends in Melbourne, he was passing to other friends of theirs, and would assist them in making this one of the freest, most progressive, populous, and most powerful continents in the world. (Cheers.)

The Chairman rose to propose the health of the guest. He said that Mr. Fehon had been amongst them for many years in a variety of capacities, but whether as a public servant or as a private citizen his ideas and time were always at the disposal of the public. Mr. Fehon deserved that respect which the meeting manifested towards him in so high a degree. Mr. Deakin had referred to his connection with the Central Board of Health. In that capacity, if in no other, he had rendered valuable aid, but he had done much in the movement to have the city extended westward. (Hear, hear.) If he did not get all his own way, he submitted a scheme which was practicable, and which it would have been wise to adopt. (Hear, hear.) They all regretted losing him, but whilst he was being lost from Melbourne he was being gained in Sydney, and both were equally Australian cities. It was a satisfaction to them all to know that the railways in New South Wales would be under the direction of a gentleman, who, if he had not served his apprenticeship on our railways, was for a long time connected with them. He was very gratified to think that New South Wales had seen fit to select a gentleman from Victoria. The feeling in Sydney towards Melbourne was one of kindness in the highest degree, although there were a good many persons who believed that no good thing could come out of Nazareth, but they came to Nazareth to get a good thing for their railways. Mr. Fehon would prove in a very short period that he was the right man in the right place. Whilst he was a man of personal ability, and capable of working a huge machine, he was a man of kindly feeling, generous disposition, and had a knowledge of how to work a system in which a large number of persons were engaged. They could look forward to seeing the new system of railway management in New South Wales, which was adapted from Victoria, working as smoothly with Mr. Fehon as one of the Commissioners, as it did here under the presidency of Mr. Speight and his worthy coadjutors.

The toast was drunk amid cheers.

Mr. Fehon said that he was overcome by the flattering manner in which he had been entertained, and by the words of Mr. Service and Mr. Deakin. He looked back upon his career and could not think that he deserved it. There were some gentlemen present whom he had known for over thirty years, and when men could be friends for that length of time there could not be much the matter with any of them. Twelve months ago he would not have accepted the appointment, because he was not dissatisfied with this Colony, in which he had carried on his business, but he felt that Mrs. Fehon required a change, and the position offered to him was a high and honourable one. The work to which he was going was congenial, for besides being a railway man, he was well acquainted with the other Colonies. He was, in his opinion, a man after Mr. Service's heart—a federalist. One fact which gave him great satisfaction was that the New South Wales Government had appointed as his colleagues two gentlemen with whom he could work for the good of the Colony. A person could take a train at Adelaide to-day and go through to Brisbane in a few hours, a trip which five years ago was regarded as impossible. He would try to justify the confidence which the New South Wales Government had reposed in him, and to give satisfaction to the large number of friends who would watch his career with interest.

Mr.

Mr. G. Coppin, M.L.A., proposed the health of the Chairman, who, he said, was the father of our foreign policy. Since that policy was created the Colony had progressed more than it had ever done previously in the same space of time, for we had attracted attention from all parts of the world through our own and other exhibits. It was to be regretted that Mr. Service had taken his departure in peace from the scene of the storms and broils in the Legislative Assembly. He (Mr. Coppin) would far sooner see him back there again. (Hear, hear.)

The Chairman said that he was pleased, in his old age, to think that during the thirty-five years he had lived here he had secured, to a certain extent, the kindly feeling of his neighbours and fellow men. That was a goal worth aiming at, although he confessed that it was not the goal he aimed at at first. After all the old political disturbances, and fights, and other troubles they had been engaged in, the successes they had accomplished, the difficulties they had overcome, and were to overcome, welded them together and gave them a kindly feeling towards one another which would last while life did. Mr. Coppin had been good enough to refer to the future. No one could tell what would happen. He could repose at his ease in the other chamber, and had no desire to go down to the Assembly so long as nights were passed in doing worse than nothing. (Hear, hear.) Nothing was more pleasing to him than a good stand-up fight, when it was conducted in a friendly and amiable spirit, but it was a monstrous state of things when public affairs could not be conducted without personal bitterness. (Hear, hear.) The public business could only be conducted when the constitutional practice was adhered to. Some people said that it was the province of the Opposition to oppose. He denied that utterly. It was the duty of the Opposition to criticise thoroughly and heartily, but without personal abuse, such as we have had too much of in the Australian Colonies. He could say, as one who had visited the old country, that nothing made the blood fly to his face more than to read telegrams in the papers there about scenes in the Australian Parliaments. The blood was brought to the face of every Australian in England on reading such telegrams. It depended upon the constituencies whether the country should have those scenes or not. The duty of every constituency was to see at the ensuing general election that the men who disgraced Parliament should no longer be sent there. (Cheers.)

Mr. W. Wilson proposed the health of Mr. Speight and the other Railway Commissioners.

Mr. Speight, responding, said that he was glad that the selection of the Victorian Railway Commissioners met with the approbation of the Colony. (Cheers.) If it were not that they felt they were strongly backed up in whatever course they took by public opinion, their duties would be too much for them to carry out. Mr. Fehon would do well to be careful of public opinion, and see that no friction existed in his department. He would ensure success if he preserved unanimity amongst the Commissioners. Discord was bad enough outside, but it was ten times worse inside. He was glad to have had the opportunity of wishing Mr. Fehon God-speed.

The gathering then broke up.

Sir,

Australian Club, Melbourne, 17 December, 1888.

I have the honor to acknowledge receipt of your favour of 13th instant, and in reply thereto beg to state that Mr. Wm. M. Fehon was Traffic Manager of the Victorian Railways during 1869 and portion of 1870, when I received my appointment as Commissioner of said Railways.

The late Mr. Thos. Higinbotham was then Engineer-in-Chief, and head of all the Departments. I found this arrangement very awkward, and therefore deemed it advisable that a change should be made in the responsibilities of the several offices, and in carrying out the new arrangements I obtained most valuable assistance from Mr. Fehon.

I appointed him Traffic Manager as head of the Department, and during all the time I held office as Commissioner of Railways, I had every reason to be more than satisfied with his general knowledge of the duties to be performed, and his tact in managing that branch of the Service, and looked upon him as a most valuable, capable, and efficient officer, and in recognition of the ability displayed by him I was instrumental in securing an increase in salary.

I may further state that privately I have known him ever since, and can confidently say that in my opinion a more honourable or upright gentleman does not exist, and one incapable of doing a mean or dishonourable action.

The Colonial Secretary, New South Wales.

I have, &c.,

WILLIAM WILSON.

Sir,

119 Collins-street, West Melbourne, 17 December, 1888.

I have the honor to acknowledge receipt of yours of 13th instant, and have read your enclosed Hansard in the matter of Mr. Fehon.

In reply, I beg to say first, that I have no knowledge whatever of the things charged against that gentleman, and second, that I do not know of anything in Mr. Fehon's career which renders him unfit to hold any office or post in which the strictest honour and probity are essential qualifications.

I am, &c.,

The Colonial Secretary, New South Wales.

JAMES SERVICE.

Sir,

"Tullaree," Tarwin Lower, 21 December, 1888.

I have the honor to acknowledge receipt of your letter of the 13th instant, also official reports of debates in the Legislative Assembly of your Colony, in which attacks were made upon the character of Mr. W. M. Fehon, lately appointed by your Colony to the office of Railway Commissioner.

In your letter you ask me to inform you of any knowledge I may possess "bearing upon the misconduct imputed to or insinuated against Mr. Fehon, either in his capacity as an officer of the Railway Service of Victoria or in any other capacity."

In reply, I beg to say that Mr. Fehon was Traffic Manager of the Victorian railways when I had charge of them in the years '69 and '71, and I never heard any "misconduct imputed or insinuated against him." I looked upon him as a very able officer.

He resigned his position voluntarily for reasons that I sympathised with at the time.

I know nothing whatever of his dealings since he became connected with M'Culloch & Co.

I have, &c.,

The Colonial Secretary.

FRANCIS LONGMORE.

Dear Sir Henry,

Railway Commissioners' Office, 23 December, 1888.

I have much pleasure in handing herewith for your perusal and information an address signed by the Mayor and Councillors of the City of Melbourne, as well as by the principal merchants and others of that City, wherein they express their sympathy with me in the charges recently brought against me by Mr. J. H. Want, and their confidence in my integrity and honor.

I am, &c.,

The Colonial Secretary.

W. M. FEHON.

[Enclosure.]

To William M. Fehon, Esq.

HAVING noticed that an unwarranted attack has been made upon your character by some persons who have either allowed their feelings to blind their sense of honor and of justice, or who have some ulterior object in view, we, who have personally known you for many years, desire to assure you of our unshaken faith in your probity and honor, and of our thorough belief that you could never have given cause for the aspersions so wantonly cast upon you.

Sir,

Colonial Secretary's Office, Sydney, 22 December, 1888.

In reference to the statements made in the Legislative Assembly by Mr. J. H. Want, impugning your character in connection with the important office you hold in the Civil Service of this Colony, I have read your several letters of explanation, and have received and carefully considered the replies to inquiries made in Victoria, copies of which I forward herewith for your information.

On behalf of the Government I have pleasure in informing you that it is considered that the aspersions cast upon your character have been fully and satisfactorily met.

W. M. Fehon, Esq.

I have, &c.,  
HENRY PARKES.

1889.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

---

RAILWAYS.

(REPORT OF COMMISSIONERS ON ACCIDENT AT NEWTOWN, 7 SEPTEMBER, 1889.)

---

*Ordered by the Legislative Assembly to be printed, 12 September, 1889.*

Minute by The Secretary for Railways to The Under Secretary for Finance and Trade.

ACCIDENT.

I HAVE the honor, by direction of the Railway Commissioners, to report, for the information of the Honorable the Minister for Railways, that on Saturday last the train leaving Parramatta for Sydney at 10:25 a.m. became derailed when passing Newtown Station.

The engine was running first and it, together with brake-van and a 1st-class American car, travelled for a distance of 140 yards off the rails. When brought to a stand-still both the up and down line were blocked. The down road was cleared about 1 p.m. and the up road a little later.

The only passenger who complained of injury was a Mrs. Perkins, aged 60. She will be visited by Dr. Woodward, Railway Medical Officer, to-day.

A full inquiry as to the cause of the accident will be made.

H. M'L., 9/9/89.

---

Minute by The Secretary for Railways to The Under Secretary for Finance and Trade.

ACCIDENT AT NEWTOWN.

ADVERTING to my minute of yesterday, relative to the derailment of a train at Newtown on Saturday morning, I have the honor, by direction of the Railway Commissioners, to forward herein, for the further information of the Honorable the Minister for Railways, a copy of the report of the Board appointed to inquire into the cause of the accident.

The Commissioners desire me to add that a very liberal permanent staff is employed in connection with the maintenance of the suburban line, but in consequence of the state of the ballast considerable difficulty has been experienced during the late unfavourable weather, in keeping the road in fair condition, and a considerable extra staff has been employed, at one time as many as 100 extra hands having been at work on the 13 miles to Granville. At the date of the accident sixteen extra men were employed in the neighbourhood of Newtown, the station where the derailment occurred. The Commissioners are making arrangements to at once completely reform the road-bed of the suburban section, as this will not only make the road perfect but will also lead, later on, to considerable economy in the maintenance charges.

H. M'L., 10/9/89.

## Report of Board.

## ACCIDENT AT NEWTOWN.

IN accordance with the directions of the Commissioners we have carefully considered the circumstances which led to the accident at Newtown on Saturday last, and now beg to submit report thereon.

The up Suburban passenger train, which is timed to leave Parramatta at 10.25 a.m., left Burwood, which is its last stopping-station, at 10.56 a.m., passed Petersham at 11.2 a.m., and arrived at Newtown at 11.4 a.m., where, as already reported, the tender, engine, and two leading vehicles, left the road.

The train consisted of—

Engine	...	...	...	...	...	...	No. 180
Brake-van ...	...	...	...	...	...	...	" 7
1st class American car	...	...	...	...	...	...	" 66
"	...	...	...	...	...	...	" 63
2nd class "	...	...	...	...	...	...	" 103
"	...	...	...	...	...	...	" 96
"	...	...	...	...	...	...	" 97
Compo. brake-van...	...	...	...	...	...	...	" 64

in the order named.

The engine and tender, brake-van No. 7, and first-class American car No. 66, were slightly damaged, and the cost of replacing them on the road and putting them in an efficient state of repair is estimated at £85.

About 125 chairs, 16 fish-plates, and 1 rail were broken, and several rails bent. The estimated cost of replacing them is £60.

We have come to the conclusion that, while the accident was contributed to in some measure by the engine running tender first, the primary cause was the want of sufficient ballast under the sleepers. This led to a local subsidence of one end of one sleeper, when the weight of the tender passed over it, destroying the balance of weight on the tender wheels, particularly on the wheels which first left the road to the extent of the additional weight which would be imposed upon the last wheel at the opposite corner by following this subsidence of road.

We recommend that the whole of the Suburban line be rebudded on sound hard ballast with as little delay as possible.

GEORGE COWDERY.  
W. THOW.  
DAVID KIRKCALDIE.

## LEGISLATIVE ASSEMBLY.

## NEW SOUTH WALES.

## LIGHT RAILWAYS.

(REPORT OF ENGINEER-IN-CHIEF ON.)

*Ordered by the Legislative Assembly to be printed, 30 September, 1889.*

RETURN to an Order of the Honorable the Legislative Assembly of New South Wales, 26th September, 1889, That there be laid upon the Table of this House,—  
 “The Report of the Engineer-in-Chief on Light Railways, dated 1st  
 “February, 1888.”

(Mr. Fletcher.)

## Minute by The Engineer-in-Chief to The Secretary for Public Works.

*Subject:—Proposed light lines of Railway.*

In attention to the Minister's memo., received on the 11th ultimo, requesting me to prepare an estimate of the cost “of providing lines for opening up the country that will be lighter than those we have previously been constructing,” I have the honor to submit the following report:—

I may in the first instance remark, that unless proper surveys and sections have been taken over the country through which these proposed light lines are to be constructed, it will be impossible to give any reliable estimate of the cost of such lines; and I will therefore assume that the meaning of “light lines,” for which an estimate is now required, has reference only to cost of road, including rails and all other ironwork, sleepers, ballast, and labour in laying.

Perhaps I may be permitted without presumption to point out to the Minister that the main cost of most of the existing lines has been caused by the difficult nature of the country through which they have been constructed, involving heavy earthworks, tunnels, bridges, and culverts.

These are the principal items of cost, the permanent way, as it is called, forming only a small portion of the expenditure; and, therefore, a light railway can only refer to rails, &c., of a less weight, smaller sleepers, and less ballast, the other items of cost depending entirely upon the nature of the country traversed.

If lighter engines and rolling stock be used with reduced speed, rails of 40 lb. to the yard can be adopted with sleepers of less size and little ballast.

The following is an approximate estimate of the cost at which 1 mile of railway could be constructed, if the conditions assumed as to the physical character of the country could be guaranteed.

Estimate for 1 mile of road.	
Permanent way material, 40 lb. ... ..	£440
Laying permanent way, 1,760 yds., at 2/-	176
Sapling sleepers, 1,760 yds., at 2/-	176
3" ballast (12 ft. wide), 600 cub. yds., at 3/-	90
Forming 80 chains, at £1 ... ..	80
Culverts and bridges per mile ... ..	300
Fencing 640 rods, at 2/6 ... ..	80
Total... ..	£1,342

The ironwork for the permanent way is the cost delivered in Sydney, no charge having been included for conveyance up the country, which might vary according to the distance carried, from one to six or seven pounds per ton; nor has any sum been named for stations or platforms, water supply, signals, turn-tables, stock-yards, level crossings, over-bridges, superintendence, &c.

The cost of bridges and culverts is only for an assumed line of country under the most favourable circumstances, and therefore no reliance can be placed upon such an estimate, except under such conditions.

I need hardly repeat that no reliable estimate can be made of the cost of any railway, until proper surveys have been made and information obtained as to where ballast and timber, &c., for such line can be found.

I desire to take this opportunity of replying to many statements in letters to newspapers, newspaper articles, and in speeches on the question of gradients or inclines on the railways of this Colony.

The general and expressed opinion appears to be that I have adopted inclines as steep as 1 in 40 merely to show how difficulties could be overcome, and to give as much trouble as possible to those who had to maintain the railways.

It

It has been stated that such inclines as 1 in 40 could have been easily improved by making a little more cutting at one end, and a little more embankment at the other, and "the thing was done."

The unfortunate accident on the Hawkesbury line brought forth many statements of that kind, and, had it been possible, the construction branch would have had to bear the blame.

I am surprised that any one can be so reckless in statement, and so ignorant as to suppose for one moment that I would use an incline of 1 in 40 if any better incline could be got at anything like a reasonable cost, or that there is any more difficulty in maintaining a railway in good running order on an incline of 1 in 40 than 1 in 80, or that there is any more difficulty in constructing a line with inclines of 1 in 40, than upon a flatter gradient.

I may be pardoned if I informed those gentlemen who are so fond of writing to newspapers on subjects they do not understand, that if the railways in this Colony had been limited to inclines of 1 in 80, which was suggested a short time ago, instead of 1 in 40, which has best suited the country through which the railways have been constructed, they would never have been built.

The construction of the railway system has only been accomplished by using steep inclines, and, on some of the lines sharp curves; these, however, have not been used capriciously, but to overcome the physical difficulties of the country.

I will give one example:—On the Southern railway between Picton and Mittagong, in a distance of 15 miles from the former station, the country rises 1,500 feet. Had this portion of the line been made level there would have been a cutting at one end 750 feet deep, and an embankment 750 feet high at the other.

An average gradient for the length would give an incline of 1 in 52, but as the country is undulating 1 in 30 and 1 in 33 have been used, not from any desire on my part to show how difficulties could be overcome, but to avoid excessive, and in my opinion, unnecessary works.

At the time this line was made, money was hardly obtainable, and economy in construction was imperative.

As bearing on the question of light railways I append extracts from a report "of a discussion on economical railways" at the Institution of Civil Engineers, London, in March, 1886.

JOHN WHITTON.

*Mr. Baker*:—It had been often stated that Americans built cheaper railways, but the work was not of the same kind. Consider for a moment how the cost of a railway was made up, and it would be seen that it was impossible. He had made an analysis of the cost of 43 miles of line which he had completed some time ago in Ireland, in a poor part of the country, in the midst of a small population, and apparently under conditions which prevailed in undeveloped places in America; yet the works of that line had cost £4,520 per mile, and it had been stated in the papers that similar lines in America had been built for £3,000 per mile. He wished to point out that such lines could not have been similar in any respect. On the borders of Vermont he had to negotiate on the spot for the construction of a line through a poor country, and got the figures down at £3,000 per mile, but the works were entirely different. Pricing out the works on the American line at the Irish prices he obtained figures given in column B in the annexed table, those going to make the £4,520 per mile already referred to, being given in column A:—

	Cost per mile.		A.		B.
Earthwork (quarter rock) .....	£1,150	$\times \frac{2}{3}$	=	£766	
Permanent way and sidings .....	1,790	$\times \frac{1}{2}$	=	895	
Fencing .....	260	$\times \frac{1}{3}$	=	316	
Bridges (35) .....	490				
Level crossings (187) .....	270				
Stations (11) .....	560				
	£4,520			£1,977	

By following the contour of the ground more closely the cost of the earthworks was only two-thirds of that of Ireland. By altering the permanent way and laying 56 lb. iron rails, instead of 70 lb. steel rails, taking the nearest timber to be found, and putting it in the road with all the sap, in a condition to last only two and a half years, using only a nominal amount of ballast, and practically dispensing with bridges and station accommodation, a line of that sort might be made in Ireland under the same conditions for £1,977. For the Vermont line, as already stated, he had tenders from some contractors on the spot for £3,000; but although the £3,000 was lower than £4,520, it was 50 per cent. higher than the amount for which similar work could be done in Ireland. It might be asked, "Why was it desirable to build a £3,000 line in one place and not in the other?" It largely depended upon whether a company was spending its own money or that of somebody else. If it was spending its own money it would be economical to make the line for £4,520; but if it was spending the money of somebody else, and did not care whether the line was to earn a dividend or whether only to pay working expenses, it was a matter of indifference. In the case of Ireland the money was, as a rule, guaranteed by the counties, and if the line did not earn a dividend it had to be made up; and it had been found by long experience that, no matter how poor the country, or how small the traffic, the true economy was to build lines, not like those mentioned in the papers, which could be made for £3,000 per mile in America and £2,000 per mile in Ireland, but lines which could be afterwards worked at a low percentage. On the line to which he had referred the £4,520 per mile was sufficient to provide steel rails and creosoted sleepers, which would last many years; bridges, in every instance, of stone or iron; the fence walls adjoining the bridges, all of stone; the level crossings (187) had all iron gates with solid limestone gate-posts, or, if that could not be got, they were built of masonry, 3 feet square; the stations and level crossing cottages were all of masonry, and the points, crossings, and signals were as perfect as on a first-class railway. Such a line could be worked at 60 per cent., while the other could only be worked at 90 per cent., of the receipts. The earnings, therefore, were in the one case 40, and in the other 10 per cent.; so that, with equal gross receipts, the former would pay double the interest on twice the capital. That was the key to most of the differences that had been referred to. If the Americans would only give English engineers £3,000 or even £2,000 a mile for non-paying lines in Ireland, he believed they would build the works for that sum. But when Englishmen had to find money for themselves, knowing their own business as well as the Americans did, they had found by long experience that it was economical to build substantial and durable lines. Highly as he appreciated American skill and enterprise, he was not afraid of American competition; but almost every work in connection with railways depended upon the price of labour.

*Mr. Matheson*:—It might be wise to put up cheap bridges at first; but when they had to do work at all approaching that of English bridges, they soon became loose and untrustworthy. When he was first in America, in 1880, he heard of the famous bridge over the Ohio, at Louisville, with spans of 370 feet. He also saw in New York the elevated railroad, with some miles of spans of 60 feet, all having pin connections. When he visited the Louisville Bridge on a subsequent occasion in 1885 there were watchmen employed day and night to screw up loose nuts after the passage of a train before letting another train on. The whole plan of railway construction in America was different from that of English railways, and it was difficult to compare the two. He had travelled on main lines and important branches in America where there were no stations, only a few sheds, no fencing, no ballast, no signals, and not a single over-bridge in 300 miles, every crossing being on the level; and when towns sprang up round the stations, express trains could not be run. Every town had a municipal law that the trains could not run through at more than so many miles an hour. Signals, ballast, and fencing could be easily added, but not over-bridges, for all the approaches had then to be altered at a great cost. If the Americans would be content themselves with admitting that their system was the best as a temporary device, there would be nothing to say against it; but it was fallacious to compare the cost of American and English railways, as if there was any common standard of comparison.

## McSHARRY v. COMMISSIONER FOR RAILWAYS.

### No. 1.

#### Minute by The Secretary for Public Works.

McSharry's case.—In connection with Murrumburrah to Young Railway.  
I SHOULD like to see Mr. Whitton *re* this matter and arbitration. W.J.L., 6/5/86.

Engineer-in-Chief, B.C., 6/5/86. Will the Minister please let me know when he can see me.—J.W., 7/5/86. Under Secretary, B.C., 7/5/86.

If Messrs. McSharry & Co. will send in their amended claim for the construction of the works on the Young contract I will go through the various items, if the Minister wishes me to do so, and say what sums I am prepared to certify for, and to offer that amount for settlement. If they refuse to settle, I advise that they be left to their legal remedy.—J.W., 7/5/86. Under Secretary, B.C.  
The claim should be submitted as suggested.—W.J.L., 13/5/86. Inform, 14/5/86.

### No. 2.

#### The Commissioner for Railways to T. Jones, Esq., M.P.

Sir,

Department of Railways, Sydney, 18 May, 1886.

With reference to your personal interview with the Honorable the Minister for Public Works respecting the claim of Messrs. McSharry & Co., in connection with their contract for the construction of the Murrumburrah to Young Railway, I have the honor, by direction of Mr. Secretary Lyne, to inform you that if Messrs. McSharry & Co. will submit an amended claim it will be considered by the Engineer-in-Chief, who will report upon its merits.

I have, &c.,

CH. A. GOODCHAP,

Commissioner for Railways.

### No. 3.

#### Messrs. O'Rourke and McSharry to T. Jones, Esq., M.P.

Sir,

Gundagai, 25 May, 1886.

We beg to acknowledge receipt of letter dated 18th May, addressed to you by the Commissioner for Railways, intimating that if we send an amended statement of our claims on the railway from Murrumburrah to Young "it will be considered by the Engineer-in-Chief, who will report upon its merits."

In reply thereto, we have the honor to state that it is now fourteen months since the Government took possession and began to work the above line, and ten months since all works, contract as well as extras, were finished by us. Since then we have persistently tried to obtain a settlement of our claims by the Engineer-in-Chief, but our efforts were not only unsuccessful but were frequently met by rebuffs on the part of his principal assistant. Mr. Whitton himself told us that if we were not satisfied with his decision we could go to the Supreme Court.

We were not satisfied with his decision, and we have taken his advice and gone to the Supreme Court; and after due consideration of the matter we think that it would not be advisable to suspend our action there merely for the purpose of giving the Engineer-in-Chief another opportunity of considering and reporting upon the merits of our claims, which have been before him so many months.

Nevertheless, as we have no wish to go to law, but, on the contrary, would, if possible, avoid it, even at the last hour, we would be perfectly willing to submit the matters in dispute between us and the Engineer-in-Chief to arbitration.

We have, &c.,

O'ROURKE & McSHARRY.

Submitted by Mr. Jones, M.P. Please acknowledge, and send to Mr. Whitton.—W.J.L., 31/5/86.  
Acknowledge; then to Engineer-in-Chief.—D.C. McL., B.C., 1/6/86. Seen.—J.W., 9/6/86.

#### The Engineer-in-Chief to The Crown Solicitor.

Sir,

Engineer-in-Chief's Office, Sydney, 25 June, 1886.

Herewith I have the honor to forward a Supreme Court summons, served on me yesterday afternoon, at 3:46 o'clock, in an action at the suit of John O'Rourke and James McSharry, the contractors for the Murrumburrah-Young Railway.

I have, &c.,

JOHN WHITTON.

### No. 5.

#### M. H. Stephen, Esq., to The Crown Solicitor.

Sir,

Denman Chambers, Phillip-street, 17 November, 1886.

Having now given up many hours to the study of O'Rourke v. Commissioner for Railways, I am more satisfied than ever that it is simply impossible for such a case to be tried at Nisi Prius. It is almost a certainty that the presiding Judge will express the same opinion when he is apprised of the nature of the case. I do not see how the matter in dispute can be fairly decided by any other than a professional man. It may be difficult to obtain one in this Colony competent unacquainted with any of the facts, and who may be regarded as thoroughly unbiased. It would be worth while to search the Colonies for an arbiter whom both sides could trust. I write this because I desire, if possible, to be placed in a position, should a suggestion as to arbitration be made, either by the Bench or at the Bar, to act in accordance with what the views of the Government might be in such a contingency.

Yours, &c.,

M. H. STEPHEN.

## No. 6.

C. E. Pilcher, Esq., to The Crown Solicitor.

Commissioner for Railways *v.* O'Rourke and others.

My dear Williams,

Chambers, 18 November, 1886.

I have read the particulars of plaintiffs' claim against the Commissioner, and the answer suggested on defendant's behalf to each claim. I cannot see how the case can possibly be tried by a jury, unless the services of a Judge and jury can be secured for at least two months for the purpose of its trial. Last item in plaintiffs' account is a separate action. I would suggest that the matter in dispute be referred to arbitration. If a competent arbitrator can be procured who has a knowledge of railway matters, and unknown to either party, a great saving of time would result, and most probably a more satisfactory result. I have not seen what Messrs. M. H. and C. B. Stephen have written upon this subject, but understand they agree with me.

Yours, &amp;c.,

C. E. PILCHER.

## No. 7.

The Crown Solicitor to The Commissioner for Railways.

Sir,

Crown Solicitor's Office, Sydney, 20 November, 1886.

With reference to the action O'Rourke and another *v.* you, I have the honor to inform you that I was yesterday instructed by the Honorable the Minister for Works at a meeting at the Attorney-General's chambers, at which the Attorney-General and Mr. Pilcher were present, to consent to the matters in dispute in this action being settled by arbitration.

I had previously received a letter from Mr. Pilcher on the subject, of which letter I forward a copy herewith.

I also forward a copy of the memorandum agreeing to the reference.

I have, &amp;c.,

JOHN WILLIAMS,  
Crown Solicitor.

## No. 8.

Crown Solicitor.

Asking who was to be appointed arbitrator on behalf of Government in matter O'Rourke & McSharry *v.* Commissioner for Railways.

(Mr. Poole has been nominated.)

## No. 9.

Arbitration.

In the Supreme Court of New South Wales.

Between John O'Rourke and James McSharry, plaintiffs, and the Commissioner for Railways, defendant.

The twenty-second day of November, one thousand eight hundred and eighty-six.

UPON hearing, Mr. Darley, Queen's Counsel, and Mr. O'Connor, of Counsel, for the abovenamed plaintiffs, and Mr. Salamons, Queen's Counsel, and Mr. Cecil Bedford Stephen, of Counsel, for the abovenamed defendant. By consent it is ordered that this action and all matters therein in dispute between the parties hereto be referred to the final determination of three arbitrators, to be chosen as hereinafter provided, the award of a majority of whom shall be final and conclusive on all parties; the award of the said arbitrators to be for a sum certain for the plaintiffs, or an award for the defendant, as the arbitrators may find, such award to be made within one calendar month from the close of the said arbitration, to be made in writing, and when made to be delivered by the said arbitrators to the Prothonotary of the Supreme Court; and that, unless restrained by any rule or order of the Supreme Court or Judge thereof, the party in whose favour the said award shall be made may, twenty-one days after the service of a copy of the said award on the solicitor or agent of the other party, enter the said award as the verdict in this cause, and shall be at liberty to sign final judgment thereon; the arbitrators to assess the amount of their fees at foot of the award. The costs of this action and of the arbitration, and of and incidental to the reference to arbitration and of the award, to follow the verdict so to be entered as aforesaid, and to be taxed in the ordinary way. One arbitrator to be chosen by each party, and the third arbitrator to be appointed by both parties. If the parties cannot agree upon such third arbitrator, such third arbitrator to be appointed by the arbitrators to be chosen by the parties, as aforesaid. This submission may be made a rule of Court, and is subject to the provisions of the Arbitration Act of 31 Victoria No. 15.

John McLaughlin, plaintiffs' attorney.

P. FAUCETT.

The Crown Solicitor to J. M'Laughlin, Esq.

O'Rourke and another v. the Commissioner for Railways.

Dear Sir,

Crown Solicitor's Office, Sydney, 29 November, 1886.

I am instructed to inform you that William Thomas Poole, Esq., is the arbitrator appointed by the defendant.

The Minister for Works has directed me to suggest that if you can make an appointment and meet him in the course of to-day or to-morrow the third arbitrator will probably be agreed to. Mr. Lyne understood you to say that you would call at the office of the Department of Works for this purpose, as on last Saturday.

Yours truly,

JOHN WILLIAMS,  
Crown Solicitor.

No. 11.

The Commissioner for Railways to Mr. W. T. Poole.

Sir,

Railway Branch, Sydney, 30 November, 1886.

I have the honor to inform you that I have appointed you to be arbitrator on my behalf for the purpose of determining the amount of compensation (if any) to be paid to Messrs. O'Rourke & McSharry for alleged breach of agreement in connection with the construction of the line of railway Murrumburrah to Young, and to refer you to the Crown Solicitor for the completion of the necessary arrangements.

I have, &amp;c.,

CHAS. A. GOODCHAP,  
Commissioner for Railways.

No. 12.

The Commissioner for Railways to The Crown Solicitor.

O'Rourke and another v. Commissioner.

Sir,

Railway Branch, Sydney, 1 December, 1886.

Referring to correspondence that has passed relative to the above case, I have the honor to inform you that Mr. W. T. Poole has been appointed arbitrator on behalf of this Department, and he has been referred to you to complete the necessary arrangements.

I have, &amp;c.,

CHAS. A. GOODCHAP,  
Commissioner for Railways.

No. 13.

The Crown Solicitor to J. M'Laughlin, Esq.

O'Rourke and another v. The Commissioner for Railways.

Dear Sir,

Crown Solicitor's Office, Sydney, 9 December, 1886.

I am in receipt this morning of your letter of yesterday's date. I am not aware whether Mr. Poole has or has not been assisting the Engineer-in-Chief in the preparation of the defence. I do not think such is the case; but, whether or no, I must decline to recognize any right in you to dictate as to who shall be appointed arbitrator on the part of the Commissioner.

I am told that the arbitrator you have appointed is so closely connected in business with a firm said to be creditors of the plaintiffs to a very large amount that it may be considered to be difficult for him to give an impartial hearing to the case; but I do not feel warranted on that account to take exception to his appointment. If the arbitrator makes the declaration required by the 44th section of the Railway Act, that is all that either of the parties can require; and I shall accept your arbitrator's declaration without question, whatever may be said as to any business relations to either party.

The parties, as you are well aware, were unable to agree as to the third arbitrator, and finally left his appointment to the two arbitrators named, and I do not think, therefore, that they (the plaintiffs and the defendant) can properly now interfere.

If, as you say, your clients and the Minister for Works have agreed to appoint some person as the third arbitrator, the defendant will have to submit to the action taken by the Minister. I, however, know nothing of any such agreement, and have therefore referred your letter to the Minister, and upon receipt of his reply will communicate with you.

Yours truly,

JOHN WILLIAMS,  
Crown Solicitor.

No. 14.

The Crown Solicitor to J. M'Laughlin, Esq.

O'Rourke and another v. The Commissioner for Railways.

Dear Sir,

Crown Solicitor's Office, Sydney, 11 December, 1886.

In reply to your letter of yesterday's date, I can only repeat the statement in my last letter to you—that I have forwarded your letter, to which that was a reply, to the Minister for Works for his consideration. As soon as I receive a reply from him I will inform you of any determination he may arrive at.

Yours very truly,

JOHN WILLIAMS,  
Crown Solicitor.

No. 15.

## No. 15.

## J. M'Laughlin, Esq., to The Secretary for Public Works.

O'Rourke and another v. The Commissioner for Railways.

Dear Sir, Mercantile Mutual Chambers, 118, Pitt-street, Sydney, 23 December, 1886.

I have, on behalf of my clients, to submit to you either of the following gentlemen, viz., Mr. Jas. Fletcher (the late Minister for Mines) or Mr. De Courcy Browne, for the position of umpire herein, conditionally, of course, upon your declining to accept one of the other gentlemen already nominated by me.

I cannot, however, see why you cannot accept either Mr. Griffin or Mr. Lyall, the latter being your own nominee, either of whom would do justice to both parties, and either of whom would expedite matters, and save great delay and expense to both parties.

Trusting that the matter may now be brought to a speedy settlement,—

I have, &amp;c.,

J. M'LAUGHLIN.

Forward to the Crown Solicitor. I cannot agree to the first named; and I do not think Mr. De Courcy Browne could act, as he is a Member of Parliament. I should like to learn if Mr. Williams has taken action *re* previous letter.—W.J.L., 24/12/86.

I think you had better name to-day the appointment of Mr. Judge M'Farland as umpire, for Mr. M'Laughlin's approval.—W.J.L., 24/12/86.

## No 16.

## The Crown Solicitor to The Secretary for Public Works.

O'Rourke and another v. The Commissioner for Railways.

Sir, Crown Solicitor's Office, Sydney, 24 December, 1886.

I have the honor to return herewith the letter of Mr. M'Laughlin, of date 23rd instant, just handed to me, and to state that I am not aware that I can take any action in respect of the previous letter.

The parties disagreed as to the third arbitrator, and the appointment was left to the two arbitrators appointed. They agreed upon Mr. Miller, who, it was found upon reference to him, could not act, and they have since been unable to agree as to the third arbitrator.

Since then the matter appears to have been taken out of the hands of the arbitrators by Mr. M'Laughlin, who has on several occasions interviewed you on the subject.

I think the better way of dealing with the matter will be to inform the arbitrators that both parties think objection cannot be taken to Mr. Judge M'Farland, and to suggest that, if they (the arbitrators) see no objection, Judge M'Farland should be appointed by them.\*

I should mention that the letter (which I suppose is the one referred to in your minute) from Mr. M'Laughlin, of date 20 December, was only received by me this morning, and from its great length—four half-sheets of foolscap—had not been replied to when I received your minute of this day's date.

I have, &amp;c.,

JOHN WILLIAMS,

Crown Solicitor.

\* This course may be followed, but first it should be ascertained whether Mr. McSharry agrees to Mr. M'Farland. I was informed that such was the case.—W.J.L., 24/12/86.

## No. 17.

## The Crown Solicitor to J. M'Laughlin, Esq.

The Commissioner for Railways *ats.* O'Rourke and another.

Dear Sir, Crown Solicitor's Office, Sydney, 29 December, 1886.

I must request your attention to the very serious inconvenience your irregular interference with the action of the two arbitrators named by the plaintiffs and the defendant respectively is occasioning.

One of several advantages to be gained by referring this case to arbitration, instead of trying same before a jury, was understood to be, that, as the matter in dispute related to the classes of work in railway construction to be done under the contract which would be better understood by persons having experience in railway work, a great saving in time and expense of witnesses would be effected by the arbitrators appointed being railway engineers or contractors; and, acting upon this understanding, the defendant appointed Mr. Poole, who has had considerable experience as a railway contractor. It was thought at first that the gentleman named by the plaintiffs also had been connected with railway contracts, but this was subsequently found not to be the case. The defendant, however, could not legally take objection to the appointment on that ground.

As you are aware, you afterwards had several interviews with the Minister for Works for the purpose of agreeing upon the third arbitrator, but no agreement could be come to, as your client (who accompanied you on each occasion) objected to all the names submitted by the Minister, and as the Minister could not accept any of the persons named by you, (as it is thought you must have known) the appointment was at your suggestion left to the two arbitrators.

After several meetings the arbitrators agreed upon Mr. Miller, an experienced railway contractor, when residing in Melbourne, and I at once telegraphed to him to know if he would accept the appointment; in reply, he informed me he could not, as he was about to sail for Western Australia.

Upon this the arbitrators again met, and various names were submitted by each, but as an agreement was not come to by them as quickly as you or your client thought should be the case, you (most improperly, I submit) took the matter out of their hands and called upon the Minister to agree with you in appointing the third arbitrator; and you still, I am informed, are urging the Minister to act in the matter.

I have no doubt whatever but that if you had left the matter in the hands of the arbitrators the third arbitrator would have been appointed long before this.

I

I am informed that you claim a right to confer with the Minister upon the ground that as you have not taken out the order of reference the matter is still in your hands, and that as the arbitrators appointed having only been verbally named by the parties they are not entitled to act. I shall not venture to offer any opinion as to the propriety of this objection, taking into consideration your repeated recognition of their having acted; but I think I am justified in requesting that the order of reference shall be taken out before anything further is done with reference to the appointment of the third arbitrator.

The persistent way in which you have endeavoured to take the appointment of the third arbitrator out of the hands of the arbitrators is remarkable. When you told me that you had had a conversation with the Minister on the subject in the Bondi main sewer, I thought you intended it as a joke, the point of which I did not see; I find, however, upon referring to Mr. Lyne, that you only stated a fact—that he was inspecting the Bondi main sewer when you came up and at once entered into conversation on the subject of the appointment of the third arbitrator, but no conclusion was arrived at, as might have been expected.

You should not have spoken to the Minister at all on the subject; but as you felt at liberty to do so, I must congratulate you upon your choice of the place of conference as being singularly free from all chance of casual interruption, and one in which (as the sewer is several miles long) the Minister could not escape until you had fully explained your views to him. How well the incident would tell in a work of fiction! "Conference between a Minister of the Crown and a leading solicitor in the main public sewer on important public business." It is to be hoped that some one will utilize the idea.

I understood from you when I met you last week that you had in some way intimated to Mr. Judge M'Farland that your client wished to name him as the third arbitrator, and that the Judge had written to you to state that he was willing to act. I have mentioned this to the Minister for Works, and he has authorized me to say Judge M'Farland's appointment will meet with his approval.

As I am sure Mr. Poole will not object to Judge M'Farland, and as I assume that your arbitrator will not make any objection, I suggest that the order of reference be taken out with these three names inserted therein, or with the names of the two arbitrators, and that they, by indorsement thereon, appoint Judge M'Farland.

I must mention that your delay in bringing this matter to a hearing is very detrimental to the defendant, not only in difficulty in dealing with the witnesses, but the Counsel engaged for the defence, after waiting for some time, have left town for their vacation, and will have to be specially sent for if the arbitrators meet before February.

Yours truly,  
JOHN WILLIAMS,  
Crown Solicitor.

#### No. 18.

J. M'Laughlin, Esq., to The Crown Solicitor.

O'Rourke and another v. The Commissioner for Railways.

Dear Sir, Mercantile Mutual Chambers, 118, Pitt-street, Sydney, 4th January, 1887.

I am in receipt of your favour of the 29th ultimo, and as Christmas season is now over, would suggest that romance and fiction be set aside whilst we deal with facts.

I never interfered with the arbitrators in any way whatever, much less irregularly; and if Mr. Lyne is responsible for what you state took place on the occasion of the inspection of the Bondi sewer, I regret to have to say that he has given you an erroneous statement of what occurred.

I went there at the invitation of Mr. Pritchard to witness the opening of a section of the work, and an official inspection by Mr. Lyne, Mr. Bennett, and others; and whilst the party were partaking of refreshments, Mr. Lyne said to me, "Oh! M'Laughlin, did you get a letter from me to-day?" I said, "No." He replied, "Well, I wrote you one, or at least directed one to be sent to you, asking you to call and see me to-morrow." I said, "I expect I shall receive it in the morning, and will call." He replied, "No, you need not, I can tell you now what I want you for. It is to talk over that affair of McSbarray's and the appointment of a third arbitrator. I think Andrew Lyall of Melbourne, who is now in Sydney, would be a good man; although he is not a practical man, he is very clever and straightforward, and I think would do very well." I replied, "You had better write or get Mr. Williams to write to me proposing him. I will then see my clients, and if they agree, will write in reply accepting him, and the matter will be closed." He said, "No; you had better come and let us have a chat over it."

I then promised to call upon him, and nothing further was said upon the subject. So you will see this conversation was commenced by the Minister, and without being discourteous to him, I could not avert it. The next day, I called upon you, informed you of what had occurred, and told you I did not care about seeing him or having a conversation with him behind your back without your permission. Your reply was, "Oh, bless you, I do not mind; you are perfectly at liberty to see him; he can do as he pleases in the matter; I have only to carry out his instructions." And you left me to understand I had your permission to see the Minister without your intervention, at any time I chose; but at my suggestion you accompanied me to his office at our first two interviews.

A very inventive mind indeed would be required to write a readable work of fiction upon this incident without the facts being all thrown overboard; but were you to devote your ability to fiction writing, I cannot say what the result might be.

At the first meeting of the arbitrators Mr. Miller's name was agreed upon, and when he could not act, I received a report from the arbitrators appointed by the plaintiffs that there was no probability of the arbitrators agreeing about a third arbitrator, and that Mr. Poole insisted at once upon two unjustifiable conditions, viz.:—That the third arbitrator should be an engineer or contractor and personally known to him.

Mr. Watkins submitted a number of names, including engineers and contractors and men of high commercial standing and integrity, but they were all rejected.

Agreement was almost hopeless, and he further reported to me that Mr. Poole appeared to be well posted up in the defendant's case, and that he had taken the papers home and had studied them; and on receiving this report, I, believing I had your permission to see the Minister, and not liking to give you again the trouble of accompanying me, called upon Mr. Lyne, showed him the report I had received from the plaintiffs' arbitrator, and agreed to accept his nominee, Mr. A. Lyall, to expedite matters, but it appears the Engineer-in-Chief dissuaded him from adhering to his nomination.

I know from past correspondence that your ideas about Mr. Poole receiving the defendant's version of the case from the Engineer-in-Chief differ from mine, but I still say it is highly irregular for an arbitrator when appointed to be spoken to or instructed in the case by either of the parties. He is in the position of a Judge or jurymen, whoever nominates him, and the defendant's officers ought to have known better than to have furnished any of the particulars of the case to Mr. Poole. Their case ought to be safe in your hands, and they should not desire to have one of the intended judges biased into an advocate. I only hope Mr. Poole will be strongminded enough not to be affected by any version of the case he may have heard, but to decide upon the evidence to be hereafter adduced in the proper manner.

My clients will not now agree to Judge M'Farland, inasmuch as Mr. Whitton has been speaking to him on the subject of the case. I nominated Judge M'Farland without his knowledge or the consent of my clients. His name was refused by the Minister. Mr. Whitton then, it appears from the Judge's letter to me (which I showed you), mentioned the matter irregularly to the Judge; and now, on my submitting the matter to my clients, they inform me he is a particular friend of Mr. Whitton's, and that the latter gentleman has been speaking to the Judge about the appointment, and they will not agree.

I will draw up the order, if you think matters can be expedited; but I think, if the defendant's arbitrator or the Minister were to resist conditions being imposed by the Engineer-in-Chief, a third arbitrator could easily be agreed upon, especially as the defendant's proposal to now accept Judge M'Farland gets rid of the hard-and-fast rule formerly laid down for Mr. Poole of only having a contractor or engineer.

Suppose you forward me a list of names the defendant will agree to, including those nominated by the Minister and Mr. Poole, and I will forward a similar list, including those nominated by Mr. Watkins, both parties to be bound by their nomination, I think we ought to be able to fix upon a good man.

Yours faithfully,  
JNO. M'LAUGHLIN.

### No. 19.

#### The Crown Solicitor to The Under Secretary for Public Works.

O'Rourke and another v. Commissioner *re* appointment of Judge M'Farland as third arbitrator.

Sir,

Sydney, 5 January, 1887.

I have the honor to state that I have to-day received a letter from Mr. M'Laughlin, the plaintiffs' solicitor, declining to accept Judge M'Farland as the third arbitrator herein. I send an extract from Mr. M'Laughlin's letter.

I have, &c.,

JOHN WILLIAMS.

#### EXTRACT.

My clients will not agree to Judge M'Farland, inasmuch as Mr. Whitton has been speaking to him on the subject of the case. I nominated Judge M'Farland without his knowledge or the consent of my clients. His name was refused by the Minister. Mr. Whitton then, it appears from the Judge's letter to me (which I showed you), mentioned the matter irregularly to the Judge, and now, on my submitting the matter to my clients, they inform me he is a particular friend of Mr. Whitton's, and that the latter gentleman has been speaking to the Judge about the appointment, and they will not agree.

#### The Crown Solicitor to J. M'Laughlin, Esq.

O'Rourke and another v. The Commissioner for Railways.

Dear Sir,

Crown Solicitor's Office, Sydney, 7 January, 1887.

Your letter of date 14th January instant is to hand. As to that portion of it in which you inform me that your client declines to agree to your nomination of Judge M'Farland as the third arbitrator, I have to state that I have written to the Minister, forwarding an extract from your letter, and will let you know his reply as soon as I am informed.

You are mistaken as to the time at which I intimated that there was no objection to your seeing the Minister; it was whilst the appointment of the third arbitrator rested with the parties themselves, not after it had been left to the two arbitrators to act. It was your interference during the time the arbitrators were dealing with it that seemed to me irregular.

I am sure you are not correct when you profess to give the words spoken by me, "Oh! bless you, &c." I never used that expression at any time. The other portion of the statement is correct. I have to carry out the Minister's instructions; and my objection to your interference was, not that it was without reference to me, but at a time when the arbitrators were dealing with the matter.

I hope you will not think I am treating you with want of courtesy in not answering your letter by one of corresponding length. Fifteen folio letters are very well as between attorney and client, but are not usually of much use in the ordinary correspondence in an ordinary action.

Yours very truly,

JOHN WILLIAMS,

Crown Solicitor.

### No. 21.

#### J. M'Laughlin, Esq., to The Crown Solicitor.

O'Rourke and another v. Commissioner for Railways.

Dear Sir,

Mercantile Mutual Chambers, 118, Pitt-street, Sydney, 7 January, 1887.

I am in receipt of your letter of to-day's date, and note with thanks your promise to send me the Minister's reply as soon as you are informed of it.

I cannot understand a judge or arbitrators being complicated by any agreement the parties to an action may arrive at; and when it was reported to me that it was impossible for the arbitrators to perform the duties the parties wished them to accomplish, I made another attempt to get that done by the parties themselves. I now think, however, that had the matter been left to you and myself, in the ordinary way, without the intervention of any Minister or Engineer-in-Chief, unless by way of previous instructions, matters would have been satisfactorily arranged before now.

My

My client was never present at any meeting that took place for the purpose of appointing a third arbitrator, but was close by, so that I might refer to him for instructions; and my experience in this case will teach me to adhere strictly to my former rule of only dealing with the solicitor of the other side, whatever may be the wishes of himself or his client, even if that client be the Government of the Colony.

The length of my letter did not reach that of yours to which it was a reply, and mis-statements of facts in that letter (for which I do not hold you responsible) prevented me from leaving any portion of it unanswered; and if your allusion to attorney and client is an insinuation that my reply was written for the purpose of increasing costs against my clients, you ought to be able to understand how I treat it.

It does not seem creditable that the third arbitrator cannot be agreed to, and if you send me the list I asked for, and I send you mine, I still hope that an agreement can be come to, and the enormous expense now being incurred by my clients, which will eventually fall on the Government, will be cut short.

Yours faithfully,

JNO. M'LAUGHLIN.

J. M'Laughlin, Esq., to The Crown Solicitor.

O'Rourke v. Commissioner for Railways.

My dear Sir, Mercantile Mutual Chambers, 118 Pitt-street, Sydney, 13 January, 1887.

When can I hear from you in reference to a third arbitrator?

If the Commissioner will instruct you to forward the list I asked for, it is more than probable I will be able to select a name from it.

The delay is causing serious expense.

Yours truly,

JNO. M'LAUGHLIN.

P.S.—If you think an interview will help the matter, I will call any time you appoint.—J. M'L.

No. 23.

Minute of the Commissioner for Railways.

Commissioner for Railways *ats.* McSharry & Co.

ARBITRATION case in connection with disputed sum due on contract for railway. Mr. J. G. Griffin, C.E. Mr. W. H. Jennings, Contractor; Mr. James Fletcher, M.P.;—for consideration as eligible for the appointment of arbitrator. The above names are suggested; the appointment of one of them, Mr. J. M'Laughlin, on behalf of McSharry & Co., has expressed his willingness to accept.—CH. A.G., 25/1/87.

For Minister's consideration.

I understand that this arbitration has been delayed for a considerable time, because neither side could agree to the person who has to be appointed third arbitrator or umpire. Much expense is being incurred in consequence, the witnesses being detained in Sydney, and this must ultimately fall upon one of the parties to the dispute. The names of the three persons mentioned in this paper have been submitted as qualified to act as arbitrator to me, and the other side has agreed to accept one of them. In the interests of economy, I cannot delay any longer the settlement of the question, and I therefore agree to Mr. W. H. Jennings being selected as the third arbitrator.

JOHN SUTHERLAND, 25/1/87.

Crown Solicitor.—CH. A.G. B.C., 25/1/87.

Write to Mr. J. M'Laughlin, as under:—

Referring to your interview to-day with the Minister, with reference to the appointment of a third arbitrator in the above case, at which three names were submitted by you, with a view to the Minister selecting one therefrom, I have the honor to inform you that Mr. Secretary Sutherland approves of Mr. W. H. Jennings, one of the names so submitted by you, being the third arbitrator.—I have, &c.

J. M'Laughlin, Esq., to The Commissioner for Railways.

O'Rourke and another v. Commissioner for Railways.

Dear Sir,

Sydney, 25 January, 1887.

I have to acknowledge receipt of yours of to-day, intimating that the honorable the Minister for Public Works had been pleased to agree to Mr. W. H. Jennings acting as third arbitrator herein; and I have to ask that you will, if you have not already done so, advise the Crown Solicitor of the Minister's decision.

I have, &c.,

JOHN M'LAUGHLIN.

Already done.—A.R., 27/1/87.

## No. 25.

## The Engineer-in-Chief to The Secretary for Public Works.

O'Rourke and McSharry's claims—Arbitration and proposed appointment of Mr. Jennings as arbitrator.

Sydney, 1 February, 1887.

I HAVE just been informed that Mr. Jennings has been named as the third arbitrator by Messrs. O'Rourke and McSharry, and that the Minister has intimated his intention of concurring in this appointment.

I think it necessary that I should state I have heard that it was intended Mr. Jennings should be a witness on behalf of the plaintiffs, and that he, in conjunction with several other persons, inspected the portion of the line between Murrumburrah and Young, for the purpose of giving evidence.

I distinctly remember that the late Minister (Mr. Lyne), on Mr. Jennings' name being proposed as third arbitrator, declined to accept him as such, giving as his reason that he (Mr. Jennings) in a conversation with him had expressed an opinion favourable to the plaintiffs' claim.

Mr. M'Laughlin must have known, when proposing Mr. Jennings, that it had been intended to call him as a witness, and he was aware that the late Minister (Mr. Lyne) objected to the appointment on the ground stated, and if he (Mr. M'Laughlin) failed to mention these circumstances to the Minister, and allowed him to make the appointment under the impression that Mr. Jennings was perfectly unprejudiced in this matter, I would submit that the Minister is not bound by the assent given by him to the appointment.

JOHN WHITTON.

*Minute of Commissioner for Railways*

The Minister for Works, before formally deciding upon Mr. Jennings' appointment, asked me to see the Crown Solicitor to ascertain if any objection could be advanced. I called upon Mr. Williams, who accompanied me to the office for the purpose of making inquiry in the Construction Branch. Mr. Williams saw me shortly afterwards, and stated that the appointment of Mr. Jennings\* was received favourably; that Mr. Poole, the Commissioner's arbitrator, quite concurred in Mr. Jennings being the third arbitrator. I so informed Mr. Secretary Sutherland, and the letters of concurrence were then despatched. If the Engineer-in-Chief's information is correct, I quite agree with him as to the impropriety of Mr. Jennings being selected, and shall be prepared to hear that Mr. Jennings had himself seen the impropriety of his acting as arbitrator if he has formed already any opinion in the case favourable either to one side or the other.—CH.A.G., 4/2/87.

\* I have seen Mr. Williams to-day, who says that the person he was inquiring about was Mr. Warren, and it was with reference to the appointment of this person that he said the nomination was viewed favourably, &c. I do not know how the confusion of the names arose; I certainly was referring to Mr. Jennings.—CH.A.G., 10/2/87.

## No. 26.

## Memo. by The Secretary for Public Works.

Department of Public Works, Sydney, 9 February, 1887.

I AGREE with the Commissioner that if Mr. Jennings went and viewed the works as stated by the Engineer-in-Chief, he should resign or be requested to resign.

This is a very important case, and Mr. Jennings was appointed by the desire of all parties concerned for his abilities and disinterestedness. Inform and request an immediate reply.

JOHN SUTHERLAND.

Write to Mr. M'Laughlin.—CH.A.G., 10/2/87.

## No. 27.

## The Commissioner for Railways to J. M'Laughlin, Esq.

McSharry v. Commissioner for Railways.

Sir,

Sydney, 10 February, 1887.

With reference to my letter to you of the 25th ultimo, intimating that Mr. Secretary Sutherland had agreed to the appointment of Mr. W. H. Jennings as third arbitrator in the above case, I have the honor, by direction of the Minister, to inform you that it has come to his knowledge that Mr. Jennings is not wholly impartial in this matter, inasmuch as it is understood he had visited the works in connection with this action, and that he was to have been called as a witness in the case; moreover, Mr. Jennings is said to have expressed himself in favour of the plaintiffs' claim in a conversation with Mr. Lyne, the late Secretary for Works, before his appointment as third arbitrator was thought of.

Under these circumstances it will be seen, I think, that Mr. Jennings cannot fairly act as third arbitrator in the matter if he has already formed any opinion favourable either to one side or the other.

I have, &c.,

CHAS. A. GOODCHAP,

Commissioner for Railways.

## No. 28.

## Mr. W. H. Jennings to The Commissioner for Railways.

McSharry v. Commissioner for Railways.

Sir,

Sydney, 12 February, 1887.

Referring to your letter of the 10th instant, addressed to Mr. J. M'Laughlin, the solicitor for the plaintiff, and which has been handed to me, I desire to point out that very grave misapprehension exists with regard to my connection with the matter at issue.

While desiring at the onset to absolutely deny that there is the least foundation for any charge of partiality, or that I have expressed opinions to Mr. ex-Secretary Lyne or any one else, I would direct your attention to the fact that my acceptance of the office of third arbitrator in this matter would not be creditable to me if I was in any way biassed, nor do I think it will be believed that I would jeopardise my reputation for unimpeachable honor and integrity by any action of the sort.

As

As regards the actual facts, I deem it right to explain that until some four months since the plaintiff was a total stranger to me, and at that period he waited on me and said that as he had an action against the Crown he desired me to accompany him to Murrumburrah and inspect some work, with a view of eliciting my opinion; and I consented to visit the work by special train the same day, but I neither had nor saw any plan, specifications, or other documents respecting the items in dispute, nor did I ever offer an opinion on the merits of the case; but, on the other hand, I distinctly told the plaintiff that I could not assent to being made a witness till I was furnished with full information as to the details of his claims. Since that time I have learned nothing and have not perused any documents bearing on the subject; therefore I am not eligible as a witness either for or against the plaintiff; and I may here state that under any circumstances it was optional with me to allow my judgment to be the sole arbiter as to which side would be benefited by any evidence I might give.

Up to the present time I have not been placed in possession of any knowledge of Mr. McSharry's claim, nor have I either formed or expressed any opinion, and nothing but an absolute distortion of facts could construe any conversation had by me with anyone into giving expression to an opinion on this case.

It is true that Mr. Lyne spoke to me on the subject privately in the country one day, but no word or thought escaped me that would lead him to reasonably think that I had preconceived an opinion, and I wish to distinctly deny the truth of the statement in your letter which charges me with having expressed myself in favour of the plaintiff's claim.

In proof of my assertion, I would point out that Mr. Lyne, at a subsequent conversation with me at Manly Beach, voluntarily said that he would use his best efforts to have me appointed to the position of third arbitrator or umpire in the case; and this fact shows that at that period at least he held the opinion that I was perfectly impartial, though subsequently he appears to have made assertions anomalous to his then views, but which I find it impossible to reconcile with actual facts or with his conversations with me.

Under the circumstances narrated by me, I cannot see that I am in any way disqualified from acting in accordance with the appointment made in your letter of 25 January, and I should feel that it was an undue reflection on me if that appointment was not adhered to.

I have, &c.,  
W. H. JENNINGS.

---

No. 29.

J. McLaughlin, Esq., to The Commissioner for Railways.

McSharry and others v. Commissioner for Railways.

Dear Sir,

Mercantile Mutual Chambers, 118, Pitt-street, Sydney, 14 February, 1887.

I have to acknowledge receipt of yours of the 10th instant as to the appointment of Mr. Jennings as third arbitrator herein, and have forwarded a copy to Mr. Jennings, as he is the person affected by the statements therein.

If the allegations in your letter should turn out to be true, I cannot, on behalf of the plaintiffs, press you to adhere to his nomination, and must allow you to withdraw from it and appoint some one else; but I would suggest that Mr. Jennings be asked for an explanation before his appointment is withdrawn.

I trust there will be no further delay, but agree that the question raised in your letter had better be determined before the arbitration is entered into.

I have, &c.,  
JOHN McLAUGHLIN.

The question is, are the circumstances as given in Mr. Jennings' letter sufficient to warrant the withdrawal of his name as third arbitrator? Perhaps the Minister would like to have the views of the Engineer-in-Chief and the Crown Solicitor on the point.—CH.A.G., 15/2/87.

It may be referred to the officers named, but I can see nothing that would justify me in altering the arrangements.—J.S., 16/2/87.

No. 31.

The Commissioner for Railways to The Crown Solicitor.

Re McSharry's Arbitration.

Sydney, 1 March, 1887.

As the parties in the above matter are pressing me for a settlement of their question, I am directed by Mr. Secretary Sutherland to ask you to be good enough to immediately return the papers handed to you by the Engineer-in-Chief (Mr. Whitton), and let the Department have your advice in the matter.

I have, &c.,  
CHAS. A. GOODCHAP,  
Commissioner for Railways.

---

No. 32.

## No. 32.

## The Crown Solicitor to The Commissioner for Railways.

Sir,

Sydney, 2 March, 1887.

I have the honor, in compliance with the request in your letter of yesterday's date (returned with the papers handed to me by the Engineer-in-Chief relating to the appointment of Mr. Jennings as the third arbitrator in the case of O'Rourke and another v. the Commissioner for Railways), to state, that I should think Mr. Jennings' admissions in his letter of date 12th February last, that the plaintiff had waited upon him, and informed him that he had an action against the Commissioner, and desired that he, Mr. Jennings, should accompany him to Murrumburrah and inspect some work with a view to eliciting his opinion, and that he consented to visit the work by special train next day—and I suppose actually did visit the work in company with the plaintiff,—although this is not in direct terms admitted by Mr. Jennings, should be sufficient to disqualify him from acting as an arbitrator in this matter.

Mr. Jennings denies that he expressed an opinion to Mr. Lyne or any one else as to the work subsequently to the receipt by you of Mr. Jennings' letter. I again saw Mr. Lyne, and he again stated that upon his mentioning the matter of the dispute with O'Rourke and McSharry to Mr. Jennings, and remarking that there was nothing in the claim, Mr. Jennings replied that he would not say that he thought their claims were not without foundation. Mr. Lyne was not sure whether Mr. Jennings said that he had visited and inspected the work, but any doubt as to this is removed by the admission in Mr. Jennings' letter that he had done so.

I think it is impossible to say that a person who has been spoken to with reference to his appearing and giving evidence for a plaintiff, who, moreover, has visited the work in respect of which the dispute has arisen, and who has expressed the opinion Mr. Jennings did, in conversation with Mr. Lyne, can be said to be impartial and without prejudice.

I should have returned the papers before, but I drafted an affidavit for Mr. Lyne to make, as to his conversation with Mr. Jennings, and forwarded same to his residence at Manly, but have not yet had same returned to me, in consequence, probably, of his having been out of town. I wrote again yesterday to him on the subject, and will forward his reply as soon as received.

I have, &amp;c.,

JOHN WILLIAMS,

Crown Solicitor.

This letter is dated the 2nd (to-day is the 7th), so that five days have elapsed, and to my own personal knowledge Mr. Lyne has been in town during the latter portion of this time, but nothing has been done, and I must come to a decision without further delay.—J.S., 7/3/87.

## No. 33.

## The Crown Solicitor to J. M'Laughlin, Esq.

O'Rourke and another v. The Commissioner for Railways.

Dear Sir,

Crown Solicitor's Office, Sydney, 1 March, 1887.

Referring to your letter of yesterday's date received this morning, I now beg to return the draft order altered in the body of the order as you suggested.

You must understand that I only deal with and approve of the draft order. I have struck out the draft forms of appointment of the arbitrators as having nothing to do with the order, as it will be sufficient for each party to write his appointment upon the order when made.

I must remind you that the third arbitrator you name, Mr. Jennings, has not been finally agreed to, and I think it is probable that the Minister will not consent to his being so appointed.

Yours, &amp;c.,

JOHN WILLIAMS,

## No. 34.

## J. M'Laughlin, Esq., to The Crown Solicitor.

O'Rourke and another v. Commissioner for Railways.

Dear Sir,

Mercantile Mutual Chambers, Pitt-street, Sydney, 3 March, 1887.

I think it might be as well to have the appointment in one document. Mr. Watkins has already received an appointment from me, and Mr. Poole has been appointed by you.

Mr. Jennings has been nominated and appointed by the Commissioner for Railways, which appointment I have acquiesced in; but matters will be more regular if the appointment of the three arbitrators is contained in one document, signed by the attorneys for both parties, and I accordingly send you a draft for your perusal. As to your letter saying that Mr. Jennings' appointment as third arbitrator is not agreed to by you, I have to remind you that the Commissioner has written to me appointing him. I cannot, therefore, reopen this matter, having regard to the protracted delay which has already taken place and the immense expense incurred in keeping a large number of witnesses in Sydney.

Yours, &amp;c.,

J. M'LAUGHLIN.

## No. 35.

## The Crown Solicitor to J. M'Laughlin, Esq.

O'Rourke and another v. Commissioner for Railways.

Dear Sir,

Crown Solicitor's Office, Sydney, 4 March, 1887.

I have received this morning your letter of yesterday's date, with a draft order referring this matter to arbitration in a form entirely differing from the draft previously submitted.

You say that you think it might be desirable as well to have the appointment of the arbitrators in one document—that is, I suppose, you mean in the order of the Court. I do not agree with you in so thinking. The order of the Court should be taken out in the form in which it was made—that is, that  
the

the matter in dispute in the action be left to the arbitrament of three arbitrators, one to be appointed by each party; and if the parties fail to agree as to the third arbitrator, that he should be appointed by the other two arbitrators.

The order of the Court was not that two persons to be in such order named now by you should be the arbitrators. It was always intended that the appointment of the arbitrators should be subsequent to the issuing and service of the order.

I must therefore request you to take out the order in the ordinary form, leaving the appointment of the arbitrators to be dealt with in the usual manner.

I notice what you say with respect to Mr. Jennings, as his nomination was made by the Minister in ignorance of the fact that he had attended with your witnesses and examined the works in respect of which the disputes in the action have arisen, a fact which was well known to you at the time you submitted his name to the Minister, but which you did not think fit to mention to him; the nomination of Mr. Jennings was made without the Minister having that full knowledge of the facts which you possessed.

As I am at present instructed, the question as to Mr. Jennings' appointment is considered to be an open one; it may be that your concealment of the fact that he had been spoken to as to giving evidence on your behalf at the trial, and attended with your other witnesses to inspect the works, will not be considered by the Minister to be an objection to his acting, but you should obtain his decision as to this.

I therefore return your recent draft, and must decline to consider same.

As I suggested to you yesterday morning, when speaking with reference to your first order, probably the only way the question as to the form of the draft can be settled will be by reference to the Prothonotary; and with that view I have forwarded a copy of the original draft sent in by you to him, and shall be prepared to attend before him at any time you may appoint.

Yours, &c.,  
JOHN WILLIAMS.

No. 36.

J. M'Laughlin, Esq., to The Crown Solicitor.

O'Rourke and another v. Commissioner for Railways.

Dear Sir,

Mercantile Mutual Chambers, 118, Pitt-street, Sydney, 7 March, 1887.

I am in receipt of your favour of the 4th instant. I did not intend to convey a desire to have the appointment of arbitrators embodied in the order, but in a separate document containing the three names, instead of one document appointing Mr. Poole and two others appointing the other two.

As suggested by your letter, that I should obtain the Minister's decision as to Mr. Jennings, I called upon him this morning, and he informed me he had determined to adhere to his appointment of Mr. Jennings as third arbitrator, and had so instructed you. You are wrong in saying that I concealed anything from the Minister in reference to Mr. Jennings, and it is not a fact that he visited the works with my witnesses; but he did visit the works with Mr. McSharry, with a view of seeing the nature of the works, and to give an answer as to whether he would undertake to act as an arbitrator or witness, and he was never asked to act in either capacity until nominated as third arbitrator.

Mr. Lyne knew that he had seen the works, and would, he stated, have appointed him, but at a private interview (according to Mr. Lyne's version) Mr. Lyne stated that "he intended to appoint him umpire to decide McSharry's bogus claims," and Mr. Jennings replied that he was not prepared to say then they were bogus claims; and if he had stated so it appears Mr. Lyne would have nominated him, however wrong it would have been to have made such a statement without hearing the case, and however wrong it was on the part of Mr. Lyne to try and get an expression of opinion from an intended judge.

After the appointment was made by Mr. Secretary Sutherland, I certainly understood you to say that although Mr. Jennings had seen the works with Mr. McSharry, you looked upon him as a very good man, though I admit you afterwards said "you understood we were speaking of Mr. Warren," but Mr. Warren had never seen the works; but, after all, any arbitrator must see the works, and must hear the versions of both the parties and their witnesses.

I feel sure you will be as pleased as myself to bring this already protracted matter to an end as early as possible, so that there may be some finality to it.

Yours faithfully,  
JOHN M'LAUGHLIN.

No. 37.

The Crown Solicitor to J. M'Laughlin, Esq.

O'Rourke and another v. The Commissioner.

Dear Sir,

Crown Solicitor's Office, Sydney, 7 March, 1887.

I am in receipt of your letter of this day's date.

If the Minister has decided to adhere to the appointment of Mr. Jennings, I have not as yet been so informed.

Whether Mr. Jennings visited the works in company with the other witnesses, I of course cannot say; I have been so informed, and you admit that he did visit the works with Mr. McSharry.

You must be mistaken in stating that this was done with a view to his seeing whether he would act as an arbitrator. This visit, I have been informed, was made when you were preparing for trial, and long before it was thought to be likely that the matter would be left to arbitration.

I give an unqualified denial to your statement that after Mr. Sutherland had appointed Mr. Jennings I looked after him as a very good man. I knew nothing of Mr. Jennings, whether he was a good man for the appointment or otherwise, and never expressed any opinion to you on the subject when speaking with an officer of the Railway Department. I said with reference to the person I understood was appointed (Mr. Warren) that I was told that no objection could be taken to him, but this was not in reference to his having visited the works, but to a statement that he was a personal friend of the plaintiffs.

You

You must be referring to something you have heard in the Railway Department, not to anything I told you, as I have never in any way or at any time said to you that I approved of Mr. Jennings' appointment. The first thing I heard with reference to it was that he was one of the persons you had intended to call as a witness on the trial, and it is not likely with this knowledge I should have said that I thought he was a good man to act as third arbitrator.

I do not of course object to the arbitrators seeing the works, but I think they should visit them in their capacity as arbitrators, and not as persons expecting to give evidence on either one side or the other.

I am neither pleased or the reverse at the appointment of Mr. Jennings. This appointment rests with the Minister, not with me, and as I have before mentioned, he has not communicated that decision to me.

I think the paragraph in your letter, to which this is in reply, referring to the interview with Mr. Lyne shows that Mr. Jennings will enter upon the arbitration with a strong feeling against the Government.

Yours truly,

JOHN WILLIAMS,  
Crown Solicitor.

### No. 38.

#### Minute of the Secretary for Public Works.

*Re* McSharry's arbitration case.

7 March, 1887.

If this were a legal question I should be guided in my decision by the opinion of the Crown Solicitor, who evidently considers that the visit paid by Mr. Jennings to the Gundagai line at the instance of the plaintiffs should preclude him from continuing in the position of third arbitrator, to his appointment to which I had given my concurrence.

We have in Mr. Jennings' letter of the 12th February a statement of the circumstances under which he visited the line, and his assurance given to the plaintiff's solicitor and counsel that until he had seen all the papers in the case and the plans and specifications he was quite unable to form any opinion upon the merits of the claim.

He distinctly avers that from that time to the present he has seen no papers and no plans, and that he has formed no judgment whatever upon the case.

I have a personal knowledge of the character of Mr. Jennings, and I can with the greatest reliance and confidence accept his statement as truthful beyond all question.

I have further to consider that, if I yield to the pressure brought upon me to withdraw Mr. Jennings' name as third arbitrator, no other name has been suggested, and no provision made for commencing the arbitration.

I learn that in consequence of the difficulty, real or imaginary, of obtaining a third arbitrator, the costs in the case have been daily increasing, so much so that at least it becomes a question whether it will not arbitrarily be decided by driving the plaintiff into the Insolvent Court.

I have no desire that an injustice of this kind should be done; moreover these heavy costs might ultimately fall upon the Department, and my conviction is that there has been no justification for the cruel delay that has taken place.

Under these circumstances I deem it to be a duty which I owe to my office to adhere to my decision to offer no objection to Mr. Jennings acting as third arbitrator; and I enjoin upon all concerned to proceed at once to a settlement of the case, in order that there may be no more waste of time and money.

JOHN SUTHERLAND.

Inform Mr. Jennings that no objection is offered to his continuing as third arbitrator; also, Mr. M'Laughlin that Mr. Jennings' nomination is no longer objected to, and that it is hoped no time will be lost in adjudicating upon the case. Then forward to the Engineer-in-Chief and Crown Solicitor.—  
CH.A.G., 7/3/87.

No. 41.

## The Commissioner for Railways to The Crown Solicitor.

McSharry's Arbitration.

Sir,

Department of Railways, Sydney, 9 March, 1887.

With reference to the proposed appointment of Mr. Jennings as third arbitrator in the above case, I am directed by the Honorable the Minister for Public Works to inform you that he has decided to offer no objection to such appointment; and as he is anxious that there shall be no further delay in the matter, he will be glad if you will have the goodness to expedite its settlement.

I have, &amp;c.,

CH. A. GOODCHAP,

Commissioner for Railways.

*Minute of Engineer-in-Chief.*

I trust I may be permitted to express my deep regret that Mr. Jennings should have been nominated as third arbitrator in this case after the strong objections which have been shown to his appointment; and, under the circumstances, I may be allowed to claim to be relieved from all responsibility for the result of the arbitration.—JOHN WHITTON, 8/3/87.

I am not aware of any valid objection having been shown to Mr. Jennings acting as third arbitrator. As regards Mr. Whitton's claim to be relieved from all responsibility for the result of the arbitration, I do not know how far Mr. Whitton's responsibility extends after the case has been remitted to arbitration, but so far as it does extend, Mr. Whitton cannot be relieved, and I depend upon him for acting in the best interests of the Department. I must repeat my wish that no further delay shall be allowed to take place in bringing this case to a conclusion.—JOHN SUTHERLAND. The Engineer-in-Chief.

## The Crown Solicitor to The Commissioner for Railways.

Sir,

Crown Solicitor's Office, Sydney, 9 March, 1887.

I have the honor to inform you that on the 7th March instant I received a letter from the attorney for the plaintiffs in the case of O'Rourke and another v. the Commissioner, stating that the Minister has finally approved of Mr. Jennings being appointed to be the third arbitrator, and I am informed that a formal intimation of that fact has been sent from your Department to Mr. M'Laughlin.

As yet I have not received intimation from your Department that this is the case.

May I suggest that it is undesirable and certainly unusual that information of this sort should be communicated by a defendant to the other side—that is, the plaintiff's attorney—and not to the defendant's attorney. I do not call attention to this on the ground that it is a want of courtesy, but that I cannot be supposed to act upon the assumption that Mr. Jennings has been so appointed on information received from the attorney on the other side, but should be so informed by you.

I have, &amp;c.,

JOHN WILLIAMS,

Crown Solicitor.

Express my regret that the information did not reach the Crown Solicitor earlier. It was directed to be sent to him simultaneously with the communication to Mr. M'Laughlin, who had been writing to the Department on the subject; but the papers were sent to the Engineer-in-Chief, and there was an interchange of minutes between Mr. Whitton and the Minister before it was discovered that the Crown Solicitor had not been informed. A communication was sent to him yesterday before the receipt of this communication. I quite understand and appreciate the importance of the Crown Solicitor receiving intimation from the Department first.—CH. A. G., 10/3/87.

No. 43.

## The Commissioner for Railways to The Crown Solicitor.

O'Rourke and another v. Commissioner.

Sir,

Department of Railways, Sydney, 10 March, 1887.

I have the honor to acknowledge receipt of your letter of yesterday's date, in which you state that you received an intimation from the plaintiffs' attorney in the above case of the appointment of Mr. Jennings as third arbitrator, but no notice from the Department to that effect.

I must express my regret that the information did not reach you earlier. It was directed to be sent to you simultaneously with the communication to Mr. M'Laughlin, who has been writing to the Department on the subject; but the papers were sent to the Engineer-in-Chief, and there was an interchange of minutes between Mr. Whitton and the Minister before it was discovered that you had not been informed. A communication was sent to you yesterday before the receipt of your letter under reply.

I may add that I quite understand and appreciate the importance of your receiving intimation from the Department at the earliest moment, and care will be taken that there shall be no neglect in this respect.

## The Engineer-in-Chief to The Secretary for Public Works.

Sydney, 10 March, 1887.

Further *re* appointment of Mr. W. H. Jennings as third arbitrator in the case of McSharry *v.* Commissioner for Railways.

WHEN Mr. M'Laughlin first proposed the appointment of Mr. Jennings as third arbitrator in this case—Mr. Secretary Lyne, Mr. Williams, and myself being present—I objected on the ground that Mr. Jennings had been engaged by Mr. McSharry to give evidence in the Supreme Court against the Department, and also that he had been over the line with the contractors. This Mr. M'Laughlin did not deny.

Mr. Lyne said, "I also object to Mr. Jennings, as I met him on the Mountains, at the 'Carrington Hotel,' and we walked out together, when he expressed an opinion favourable to the contractors' claims."

I therefore consider that it would be impossible to believe that Mr. Jennings, after having been spoken to by the plaintiffs, and having been over the line with them, and no doubt having heard their version of their grievances, can be looked upon as impartial and without prejudice; and in my opinion he should not be appointed, as he would be, in fact, *the umpire*.

Another objection to Mr. Jennings for this office is that he never had a railway contract, so far as I can ascertain, nor is he conversant with railway practice, and cannot therefore be familiar with the technicalities of railway work.

I wish not to be misunderstood in this matter, and I must explain why I am anxious that a thoroughly impartial arbitrator should be appointed, and one perfectly familiar with railway construction.

The contractors' claims are, I believe, about £70,000. It is the first arbitration case against the Railway Department; and if the award should be in favour of the plaintiffs, other claims of a similar kind, and, if possible, more startling, may be anticipated.

By the appointment of Mr. Jennings the contractors have had the nomination of two arbitrators as against one nominated by the Government.

I have seen for the first time to-day a memo. written by the Minister, and dated February 9th, in which the following occurs:—"If Mr. Jennings went and viewed the works, as stated by the Engineer-in-Chief, he should resign, or be requested to resign." Mr. Jennings admits in his letter, dated 12th February, that he did visit the works, as stated by me, and therefore he *should* be called upon to resign, in terms of the Minister's minute.

JOHN WHITTON.

## No. 45.

## The Secretary for Public Works to The Engineer-in-Chief.

*Re* McSharry's arbitration.

Sydney, 12 March, 1887.

THERE is nothing stated in the Engineer-in-Chief's paper of the 10th instant which has not already been fully met and replied to beyond the objections taken to Mr. Jennings' appointment on the ground that he never had a railway contract, and consequently is not familiar with the technicalities of railway work.

I was satisfied, before consenting to his nomination, that Mr. Jennings possessed the necessary ability and disinterestedness to act as arbitrator in this matter. I am quite sure, moreover, that the case is quite safe in his hands, and that justice will be done.

In my opinion it would be injudicious to appoint as arbitrator a person who had or has had a railway contract, unless his disinterestedness, direct or indirect, could be assured. The reason for this is so obvious that I need not dwell upon it, except to say that Mr. Whitton unintentionally confirms it by the statement "That if the award should be in favour of the plaintiffs, other claims of a similar kind, and, if possible, more startling, may be anticipated."

They might be anticipated with more certainty of being realized if a railway contractor were appointed third arbitrator.

As regards the alleged inconsistency between my minute of the 9th February and my subsequent action, I must point out that my minute was written upon the assumed accuracy of Mr. Whitton's statement, the force of which, however, was considerably weakened when Mr. Jennings' explanation of the conditions of his visit was received. I then stated, as I state now, that I could see nothing that would justify me in altering the arrangement that had been made.

JOHN SUTHERLAND.

## The Crown Solicitor to The Commissioner for Railways.

*O'Rourke and another v. you.*

Sir,

Crown Solicitor's Office, Sydney, 11 March, 1887.

I have the honor to forward herewith a copy of the order referring this case to arbitration (which was taken out yesterday) served upon me this morning.

Mr. Poole has been named as the arbitrator on your behalf. I have therefore endorsed a memo. appointing him upon the copy order. It is necessary that the appointment of the third arbitrator be signed by the plaintiff and yourself, as, although the Honorable the Minister has, it is said, approved of the third arbitrator, his appointment has not yet been made.

I have, &c.,  
JOHN WILLIAMS,  
Crown Solicitor.

Return in letter Mr. Poole's appointment to Crown Solicitor.—CH.A.G., 15/3/87.

No. 47.

## The Commissioner for Railways to The Crown Solicitor.

McSharry and another v. Commissioner.

Sir,

Department of Railways, Sydney, 17 March, 1887.

I have the honor to return herein copy of the order referring the above case to arbitration, with Mr. Poole's appointment as arbitrator on my behalf endorsed on back thereof.

I have, &amp;c.,

CH. A. GOODCHAP,

Commissioner for Railways.

No. 48.

## J. M'Laughlin, Esq., to The Crown Solicitor.

O'Rourke and another v. The Commissioner for Railways.

Sir,

Mercantile Mutual Chambers, 118, Pitt-street, Sydney, 12 March, 1887.

I enclose arbitration order with endorsement, in accordance with your letter. Kindly forward, as arranged, for the Commissioner's signature. I am unable to see my clients to-day to get the appointment of Mr. Watkins signed, or to get the other appointment signed in blank, but there can be no objection to the Commissioner's signing first, when I will get the appointment completed and serve you with copy. I regret that my departure inadvertently from the terms of our verbal interview yesterday should have caused you the extra trouble of writing your letter of to-day's date.

Yours, &amp;c.,

JNO. M'LAUGHLIN.

No. 49.

## The Crown Solicitor to J. M'Laughlin, Esq.

O'Rourke and another v. The Commissioner for Railways.

Dear Sir,

Crown Solicitor's Office, Sydney, 12 March, 1887.

I return the order of reference with your letter of this day's date. The endorsements upon the order are not in the form agreed to yesterday. I am sure you will recollect that your suggestion, to which I agreed, was that you should endorse on the order an appointment by the plaintiffs of their arbitrator, and by the defendant of his arbitrator, the names being filled in, but that the appointment of the third arbitrator should be left in blank, and that if this were done I would forward the order with such endorsement to the Commissioner, but that I would not forward any paper on which Mr. Jennings' name appeared as arbitrator, leaving it to the Commissioner to fill in his name if he desired so to do.

At the same time I informed you that I was then sending a copy of the order served upon me in this matter, with an endorsement thereon appointing Mr. William Thomas Poole the arbitrator named by the Commissioner, and that as far as I was concerned that was all I had to do in the matter.

You must allow me to object, without wishing to be offensive in so doing, to your making an arrangement with me to one effect, and your clerk, in your name, writing and stating the arrangement not in the terms agreed upon.

Yours, &amp;c.,

JOHN WILLIAMS,

Crown Solicitor.

No. 50.

## The Crown Solicitor to The Under Secretary for Public Works.

Sir,

Crown Solicitor's Office, Sydney, 12 March, 1887.

I have the honor to request that you will be pleased to ask the Honorable the Minister for Works if he is aware whether Mr. William Henry Jennings, who has been approved of as the third arbitrator in the case of O'Rourke and another v. The Commissioner for Railways, is identical with the William Henry Jennings who was tried at the Court of Quarter Sessions, Sydney, on the 3rd June, 1873, on a charge of bribery in connection with some Government works.

The defendant in that case was William Henry Jennings, the contractor for additions to the Benevolent Asylum at Liverpool; and the attempted bribery was said to be in respect of a sum of £10 forwarded to Wm. Roberts, the foreman of works in charge of the building.

The defendant Jennings was acquitted.

I have obtained, and forward herewith for the perusal of the Minister, the original depositions in the case, and shall be obliged by your returning same to me when no longer required by the Minister.

I have, &amp;c.,

JOHN WILLIAMS,

Crown Solicitor.

Submitted.—12/3/87. Railways.—J.R., B.C., 12/3/87. Are there any papers in the Public Works Office on this subject.—J.S., 15/3/87.

## No. 51.

## Minute by The Under Secretary for Public Works.

Subject:—Papers respecting charge of bribery against Messrs. Jennings & Pallister.

Department of Public Works, Sydney, 14 March, 1887.

CAREFUL search has been made, but no record can be found in this office of any charge of bribery against Messrs. Jennings & Pallister, the contractors for work at Liverpool Asylum during 1873. Ask the Colonial Architect.—J.R., 14/3/87.

There are no papers respecting the matter referred to in this office.—J. McSHANE, for Colonial Architect, 15/3/87. Submitted.—J.R., 15/3/87.

## No. 52.

## The Crown Solicitor to The Commissioner for Railways.

Sir,

Crown Solicitor's Office, Sydney, 16 March, 1887.

I have the honor to forward herewith, for your perusal, a letter I have received from the attorney for the plaintiffs in the action O'Rourke and another v. The Commissioner, submitting names with reference to the appointment of the third arbitrator herein.

Most of the names have been already submitted and rejected. The names of Mr. Griffin and Mr. Fletcher were submitted to Mr. Lyne, and were not approved of by him. You will recollect that they were also submitted to the present Minister with Mr. Jennings' name. Mr. Johnson, of Melbourne, I cannot find is known to anyone here. Mr. Brock has been appointed by you on several arbitrations. I do not know anything as to Sir Thomas M'Ilwraith. Mr. W. P. Manning is an accountant only, I think, in the employment of Mr. Billyard, solicitor. I cannot say anything as to Mr. Sheerin's or Alderman Taylor's fitness for the appointment; and Mr. Francis M'Dermott, who was recently temporarily employed in your Department as a land valuer I think you will admit should not be appointed. Mr. Matheson, M.P., is probably known to the Minister.

It is advisable that names should be submitted on your behalf; and I beg to suggest Wm. Wakefield, Esquire, formerly a railway contractor; Alex. Kerr, Esquire, formerly engineer for the late P. Higgins; Mr. Morrell, architect; Mr. Mansfield, architect; — Gordon, Esquire, engineer to the Melbourne Waterworks. I am informed also that Mr. Forsyth, now of the firm of Richardson & Wrench, but formerly Manager of the Joadja Mine, would be a suitable person for the appointment, but personally I do not know anything of him. Mr. Judge M'Farland was formerly suggested by the plaintiffs, and assented to by me, but before the matter was finally concluded the plaintiffs withdrew his name.

As there does not seem to be any probability of the plaintiffs agreeing to any person you may name, I would suggest that an offer be made to the plaintiffs that they should name three persons and that you should name three persons, and that one of the Judges be requested, after hearing both sides, to appoint the third arbitrator from the six names so submitted.

I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

As it would seem from Mr. M'Laughlin's letter to the Crown Solicitor that the plaintiffs have some objection to join in Mr. Jennings' appointment, although the reason given is not one for Mr. M'Laughlin's consideration, nor can I admit it exists, I am not unwilling that the course suggested in the letter of the Crown Solicitor of the 16th instant should be followed, viz: that each side should submit three names, and that a Judge of the Supreme Court should select the third arbitrator therefrom. Looking to the list of names submitted by Mr. M'Laughlin in his letter of the 14th instant, the following may be selected from the plaintiffs' list for submission, viz:—Mr. G. R. Johnson, architect, Melbourne; Mr. T. A. Brock, agent, Sydney; Mr. J. J. Sheerin, architect, Sydney; Mr. W. Wakeford, contractor; Mr. Alex. Kerr, contractor; Mr. J. Gordon, engineer for the Waterworks;—as the three to be submitted by the Commissioner for Railways. The Crown Solicitor will please submit the proposition to the plaintiffs' solicitor, and obtain, if possible, their consent to the arrangement, with a view to a speedy selection being made by the Supreme Court.—J.S., 17/3/87. The Crown Solicitor, B.C.

[Enclosures.]

Without prejudice—O'Rourke and another v. The Commissioner for Railways.

Dear Sir,

Mercantile Mutual Chambers, 118, Pitt-street, Sydney, 14 March, 1887.

I cannot help seeing that the dispute between the Engineer-in-Chief, yourself, and the Minister about Mr. Jennings' appointment is sure to cause unpleasantness, and after your statements, I, on behalf of the plaintiffs, have no desire, if it can be avoided, of having the case tried before arbitrators in whom you have no confidence, and the plaintiffs only want justice without further delay. You will remember I was willing to accept four of the names submitted by the late Minister, and he finally withdrew all except two.

Now, if plaintiffs do not join in Mr. Jennings' appointment, will the Minister, without further delay, select an arbitrator from the following list; you then let me know the one selected, when the Commissioner can fill it in on the order now in your possession:—J. G. Griffen, Esq., C.E.; James Fletcher, Esq., M.P.; G. R. Johnson, Esq., architect, Melbourne; F. A. Brock, Esq., Sydney; Sir Thomas M'Ilwraith, C.E., Brisbane; W. P. Manning, Esq.; Joseph J. Sheerin, architect; Alderman John Taylor; Francis M'Dermott, Esq.; G. M'L. Matheson, Esq., M.P., C.E.

I am not sure about Members of Parliament being able to act, as the order provides for fees, and accepting an appointment might jeopardise their seats. I think, however, there ought to be no difficulty in selecting a name from amongst the others, if the Minister is willing to rescind Mr. Jennings' appointment.

Kindly give me an early reply, and oblige,—

Yours, &c.,

JOHN M'LAUGHLIN,

(Per J.D.)

John Williams, Esq., Crown Solicitor.

Without

Without prejudice—O'Rourke and another v. The Commissioner for Railways.

Dear Sir,  
 Mercantile Mutual Chambers, 118, Pitt-street, Sydney, 15 March, 1887.  
 I hope you have forwarded my letter of yesterday's date to the Commissioner or Minister, and that I will receive an early reply. I understood from one of your clerks you were disappointed at one of the names I mentioned at our interview not being in my letter. It was omitted for two reasons: first, I had not the permission of that gentleman to nominate him; and in the next place, I would have had to take the responsibility of his appointment upon myself instead of letting it rest on the plaintiffs; and as it was understood between us that you did not wish to hold me to any of the names written hastily by me, that the interview was to be considered private, I left this name out; and I have reason for believing that if agreed to he would not act, and wish to avoid any further hitch, if possible.

John Williams, Esq., Crown Solicitor.

I am, &c.,  
 JNO. M'LAUGHLIN.

No. 53.

W. J. Lyne, Esq., M.P., to The Crown Solicitor.

Dear Sir,  
 17 March, 1887.  
*Re* the case of McSharry v. Railways. I do not think it necessary I should sign an affidavit setting forth my reasons for not appointing Mr. Jennings, of Manly, as third arbitrator. They were these: Having accidentally met that gentleman at Katoomba previous to his nomination, a conversation ensued in reference to McSharry's claims, when he informed me he had seen a portion of the work, in company, I think he said, with a party who went over the line in McSharry's interest, and that some of his claims at any rate were fair. I believe I mentioned this to Mr. Whitton and yourself when his name was submitted. Though I am convinced Mr. Jennings is an honorable man, I consider it would not be just, either to him or myself, to make the appointment after such an expression on his part.

Yours truly,  
 WILLIAM JOHN LYNE.

No. 54.

The Engineer-in-Chief to The Secretary for Public Works.

*Re* McSharry's arbitration (further).

Sydney, 17 March, 1887.

THE Minister's memo. on the above matter, dated 12th March, was not received by me until the 16th inst.

In writing my minute dated the 10th inst., I was under the impression that it would be desirable to have a person in the position of umpire or third arbitrator in so important a case as this who fully understood the whole of the matters in dispute, and who would, from his knowledge of railway works, have no difficulty in arriving at a sound decision.

I quite agree with the Minister "that it would be injudicious to appoint as arbitrator" a person who had or has had a railway contract, unless his disinterestedness, direct or indirect, could be assured.

I should certainly not recommend for such a position any person who has a railway contract; but so far as my experience extends, I have generally found railway contractors as straightforward and honorable as any other class, there being both good and bad amongst them, and they certainly possess far more knowledge of the subject under discussion than persons who have not been accustomed to railway works.

The Minister will perhaps pardon me for taking exception to his remark that "my minute of 9th February was written upon the assumed accuracy of Mr. Whitton's statement, the force of which, however, was considerably weakened when Mr. Jennings' explanation of the conditions of his visit to the works was received." My statement was strictly correct, and was admitted by Mr. Jennings to be so, and his explanation in no way weakened the accuracy of my remarks.

I said that I had heard that Mr. Jennings had been engaged by the contractors as a witness to give evidence in the Supreme Court, and that he had been over the railway works with the contractors, both of which he admits, and therefore I considered he was disqualified for the position of third arbitrator.

JOHN WHITTON.

P.S.—I have delayed forwarding my answer to the Minister's memo. of the 12th March, under the impression that Mr. Jennings' name had been withdrawn, which would have rendered any further reply unnecessary. As I now find that Mr. Jennings has been appointed third arbitrator or umpire, I have considered it desirable to reply.—J.W., 4 April, 1887.

No. 55.

The Crown Solicitor to J. M'Laughlin, Esq.

Sir,  
 Crown Solicitor's Office, Sydney, 18 March, 1887.  
 Upon receipt of your letter of 14th March instant, I waited upon the Engineer-in-Chief and the Commissioner, and after conferring with them forwarded your letter with a letter suggesting the names of several persons who I thought might be suggested as persons from amongst whom the third arbitrator might be selected.

In reply my letter has been this afternoon returned to me, with a minute thereon by the honorable the Minister for Works, proposing that each side should submit their names, and that a Judge of the Supreme Court select the third arbitrator therefrom.

The list of names submitted in your letter of date 14th March instant is chiefly composed of the names of persons who have already been proposed by you and objected to by the Minister. With respect to two of the gentlemen named, they have been rejected by both the late and present Minister. Why they should be again submitted it is difficult to understand.

The

The Minister proposes that out of the names mentioned in your letter, Mr. G. R. Johnson, architect, Melbourne; J. A. Brock, agent, Sydney; and J. J. Sheerin, architect, Sydney, on behalf of the plaintiffs; and on behalf of the Commissioner, Mr. W. Wakeford, of Sydney, contractor; Mr. Alex. Kerr, formerly manager for the late P. Higgins; and Mr. E. Gordon, engineer for Waterworks, Melbourne, be submitted to a Judge for the selection of the third arbitrator; and the Minister directs me to submit this proposition to you.

From our conversation this afternoon, when I mentioned the matter and read the Minister's minute to you, I suppose you will not agree to same, but I consider that I am still bound to formally submit the matter to you.

If you do not agree to the proposal, and will suggest (in writing) any other way in which the difficulty as to the appointment of the third arbitrator can be dealt with, I will submit same to the Minister.

Yours, &c.,  
JOHN WILLIAMS,  
Crown Solicitor.

### No. 56.

#### The Commissioner for Railways to The Crown Solicitor.

Sir,

Department of Railways, Sydney, 18 March, 1887.

I have the honor to acknowledge your letter of the 14th instant, drawing attention to the very large fees paid to Counsel by the plaintiff in the case of *O'Rourke v. The Commissioner for Railways*, and to the heavy claim for expenses made by Mr. Simpson, one of the witnesses for the defence in that case, and intimating that the action of the plaintiff in regard to Counsel's fees left you no alternative but to make a considerable advance upon the retainer and refresher which you proposed for the Counsel for the Crown.

In view of the importance of the matter, I submitted your letter for the information of Mr. Secretary Sutherland, and the Minister has written a minute thereon, a copy of which I append for your guidance.

I have, &c.,  
CHAS. A. GOODCHAP,  
Commissioner for Railways.

*O'Rourke v. Commissioner.*—I heard by current rumour of the great expense that was being incurred in this case (to fall ultimately upon the unsuccessful litigants), and I wished to do all I could to lessen that expense by bringing the matter to a speedy settlement. I agree with the Crown Solicitor that the plaintiffs seem to be most lavish in regard to the fees they are giving, but I do not know that any action can be taken to restrain them; if it can be it should, or if it is necessary ultimately something may be done to reduce the costs by taxation. Our expenditure must be kept as low as possible consistent with every effort being made to win the case.—J.S., 16/3/87.

### No. 57.

#### The Crown Solicitor to The Commissioner for Railways.

Sir,

Crown Solicitor's Office, Sydney, 23 March, 1887.

I have the honor to forward herewith a letter of date 19th March, and another, of date 22nd March, from Mr. M'Laughlin, with reference to the case *O'Rourke* and another *v. the Commissioner for Railways*.

I have replied to the first letter, and upon receipt of the second I yesterday afternoon called at the Railway Department and perused the correspondence between you and Mr. M'Laughlin as to the appointment of Mr. Jennings, which I had not previously seen. The letters of the Commissioner are dated 25th January, 10th February, and 7th March. I have obtained copies of these letters, and propose to submit them to Counsel to advise whether together they do not constitute an appointment of Mr. Jennings.

If it is thought such is the case, it will have to be considered whether one of the four persons mentioned in Mr. M'Laughlin's letter of 22nd March should be accepted in lieu of Mr. Jennings.

As you will notice that I am to give a reply to that letter before 4 o'clock this afternoon, will you please bring this matter under the consideration of the Minister.

I have, &c.,  
JOHN WILLIAMS,  
Crown Solicitor.

[Enclosures.]

*McSharry v. Commissioner for Railways.*

Dear Sir,

Mercantile Mutual Chambers, 118, Pitt-street, Sydney, 19 March, 1887.

I am this morning in receipt of yours of the 18th instant, the contents of which you were good enough to mention to me yesterday.

I regret that there has been so much delay in attending to my letter of the 14th instant, as it involved considerable expense.

I think it might have been possible to have agreed to a third arbitrator were it not for your determination to adhere to Mr. Poolo as one of the arbitrators, particularly after the circumstances which have transpired, and which I brought to your knowledge. I have submitted the names of some of the most respectable men in the Colony, but although well qualified for the position the Government have declined them all. Now you suggest on behalf of the Commissioner three names, two of which have been refused long ago for reasons mentioned to you, and the third name is objectionable for reasons given to you yesterday.

I am quite willing on behalf of my clients to make fresh nominations altogether, but both you and the Government have declined to go to arbitration unless Mr. Poole is amongst the number. I therefore can only ask that the reference to arbitration be rescinded, and that the case be tried by a Jury in the ordinary way; and unless I receive your consent to this course I will apply in Chambers on Wednesday morning to rescind the order, or to compel the Commissioner to proceed before the three arbitrators who have been appointed in the ordinary and regular manner.

Faithfully yours,  
JNO. M'LAUGHLIN.

P.S.—Kindly return me the original order and oblige.—J. M'L.  
John Williams, Esq., Crown Solicitor, Sydney.

O'Rourke and another v. Commissioner for Railways.

Dear Sir,

Mercantile Mutual Chambers, 118, Pitt-street, Sydney, 22 March, 1887.  
Since writing mine of Saturday last to you, I have consulted Counsel, who have advised me that there is no necessity to apply to a Judge to compel the defendant to proceed before the arbitrators already appointed, and that it is only necessary to apply to them, or a majority of them, to fix a day to proceed. I, as plaintiffs' attorney, having the conduct of this case, applied to Mr. Poole to fix a day suitable to his convenience, to proceed with the arbitration, but he has not thought fit to reply to my communication to him. Still, however, to give you an opportunity, if you are really desirous of cancelling Mr. Jennings' appointment, and at once having the arbitration entered upon, I will consent to your adopting this course, on condition that you are willing to accept the nomination as third arbitrator of either Sir Thomas M'Ilwraith, of Queensland, Mr. G. R. Johnson, or Mr. W. B. Shaw, both of Melbourne, or Mr. Brock, the latter of whom I understand is already acting in a similar capacity for the Government in other arbitrations.

The delay in this matter is ruinous to my clients, and will be a source of immense expense to the unsuccessful party eventually. Unless therefore you consent to substitute one of these names in lieu of Mr. Jennings before 4 o'clock on Wednesday afternoon it is my intention to apply to the three arbitrators already clearly and definitely appointed by the parties to fix a day to proceed with the arbitration, and this offer will not extend beyond that time.

I have, &c.,  
JOHN M'LAUGHLIN.

The Minister approves of Counsel's opinion being taken on this point. I presume this is the object for which this letter was to be submitted to the Minister.—A.R. (*pro* Commissioner). Crown Solicitor.—A.R., B.C., 23/3/87.

Counsel's opinion has been taken, and he has stated (verbally) that he thinks the correspondence does constitute an appointment. The chief question to be determined is, assuming Counsel to be right, does the Minister prefer allowing the plaintiff to claim to be entitled to have Mr. Jennings to act as arbitrator, or to accept the offer made, giving the option of naming in place of Mr. Jennings any one of the four named, submitted in the letter forwarded with this? It will be noticed that I have to send a reply before 4 o'clock to-day.—JOHN WILLIAMS. The Commissioner for Railways.—J.W., B.C., 23/3/87, 3 p.m.

No. 58.

The Crown Solicitor to The Under Secretary for Public Works.

[Urgent.]  
Sir,

Crown Solicitor's Office, Sydney, 19 March, 1887.  
I have the honor to request that you will return to me copy depositions in the matter of the Queen v. Wm. Hy. Jennings, recently forwarded to you for the information of the Honorable the Minister.

I have, &c.,  
JOHN WILLIAMS,  
Crown Solicitor.

Papers herewith, 22/3/87. Crown Solicitor.—J.R., B.C., 22/3/87.

No. 59.

The Crown Solicitor to J. M'Laughlin, Esq.

O'Rourke and another v. The Commissioner.

Dear Sir,

Crown Solicitor's Office, Sydney, 21 March, 1887.

I am in receipt this morning of yours of 19th March instant.

I do not see how what you are pleased to call my determination to adhere to Mr. Poole as one of the arbitrators can have affected the appointment of a third arbitrator, and I would remind you that I do not determine anything in the matter, but carry out instructions forwarded to me.

It is unusual for either party to object to the arbitrator appointed by the other; and with reference to your objection to Mr. Poole, that he has already gone into the matter with Mr. Whitton, and been allowed inspection of the contract, specification, and other papers relating to the matter in dispute, I have ascertained by personal inquiry from Mr. Whitton and Mr. Quodling that this is not a fact; Mr. Poole has not seen the papers, and Mr. Whitton has had no communication with him on the subject, beyond informing him in a general way of the nature of the disputes he would have to deal with.

Your demand has been throughout the attempt to appoint arbitrators, that you should be allowed to appoint two; from your objection to Mr. Poole it would seem that you have improved upon this, and now require to be allowed to appoint the three arbitrators.

Of the three persons lately named by the Minister, and rejected in the letter to which this is in reply, the only objection to Messrs. Wakefield and Kerr, taken by you, is that they have been in time past contractors under the Government. They are not so now, nor, as far as can be seen, are they likely to be so again for some time. They are intimately acquainted with the class of work to which the present arbitrations have arisen, and therefore are thought to be specially qualified to act in this matter. As to the third gentleman named, Mr. Gordon, the only objection I remember you to have taken to him was that he resides out of the Colony, but if I mistake not this objection would apply to more than one of the persons who have been named by you.

With

With respect to your request that the order of reference to arbitration be rescinded, and that the case be tried by a jury in the ordinary way, you are well aware that I have no authority to consent to any such arrangement, and that I cannot reply thereto until the Minister returns to Sydney, who, you are aware, is at the present time at Newcastle, and will not return to Sydney before Tuesday.

I deny that three arbitrators have been appointed; no appointment of any arbitrator, excepting Mr. Poole by the Commissioner, has yet been made. It may be that without a full knowledge of certain facts, very material to be known by the Minister, he has signified his approval of a person named by you as third arbitrator, but upon further information he withdrew his consent, and I certainly understood from you that you admitted that the appointment could not be made.

I shall of course, if you intend to make any application in Chambers, expect the usual and ordinary notice, and cannot accept your letter as such notice.

In compliance with your request, I return herewith the original order in the same condition as I received it—that is, without appointment of the arbitrators endorsed thereon having been filled in and signed by either party.

Yours truly,  
JOHN WILLIAMS,  
Crown Solicitor.

The Assistant Secretary for Railways to J. M'Laughlin, Esq.

Sir,

Department of Railways, Sydney, 24 March, 1887.

Referring to the interview which I had yesterday afternoon with your Mr. Marks, and at which a promise was given that I should be advised yesterday evening as to whether or not you would extend the time for reply from the Crown Solicitor, *re* arbitration, O'Rourke and M'Sharry, from 4 p.m. yesterday until 4 p.m. to-day, I beg to remind you that no such intimation as promised has been received by me.

I am desired, however, to inform you that definite instructions have been given in the matter by the Minister to the Crown Solicitor this morning.

I am, &c.,  
A. RICHARDSON,  
Assistant Secretary of Railways.

---

No. 61.

J. M'Laughlin, Esq., to The Commissioner for Railways.

O'Rourke and another *v.* the Commissioner for Railways.

Sir,

Mercantile Mutual Chambers, 118, Pitt-street, Sydney, 24 March, 1887.

Referring to Mr. Richardson's request of yesterday, asking for a further delay in this matter, I regret that I cannot, in justice to my clients, accede to it. The many obstacles that have been placed by the Government in the way of this case proceeding, and the frequent and captious objections of the Engineer-in-Chief to the different arbitrators that have been nominated by us, together with his refusal to appoint some disinterested person himself, have been ruinous to my clients, and certainly reflect no credit on the Department.

In my last letter to you ample time was given, and a clear notice of the plaintiffs' intention to proceed with the arbitration forthwith unless prompt steps were taken to relieve my clients from the unnecessary and uncalled for denial of justice to which they had been subjected. I have therefore, in pursuance of the terms of my notice to you, called on the arbitrators that have been duly appointed by the parties to fix a day to proceed with the arbitration; and, in the event of your not appearing, after due service of notice thereof on you, I will demand from the arbitrators that the case shall be proceeded with in your absence.

I have sent a copy of this letter on to the Crown Solicitor.

I have, &c.,  
JNO. M'LAUGHLIN,  
(*per* J. MARKS).

---

No. 62.

The Crown Solicitor to J. M'Laughlin, Esq.

O'Rourke and another *v.* the Commissioner for Railways.

Dear Sir,

Crown Solicitor's Office, Sydney, 24 March, 1887.

I am in receipt of your letter of this day's date.

Mr. Richardson, I am informed, called at your office yesterday before the time mentioned in your letter of the 22nd instant had expired, and requested, on behalf of the Minister, that the subject-matter of that letter might remain open until to-day. Your clerk said he could not give a final answer, but promised to see you and inform Mr. Richardson; this was not done, and you now claim, I understand, that the matter shall be considered as concluded yesterday. The Commissioner cannot, of course, accept this determination on your part, and must resent any attempt to force him to go to arbitration with Mr. Jennings as one of the arbitrators.

As I have already informed you, the Commissioner is willing that Mr. Brock, who is one of the four persons mentioned in your letter of the 22nd instant, shall be the third arbitrator.

I must also remind you that your letter of 22nd March is the first time you have claimed that the correspondence with reference to Mr. Jennings' appointment operated as an appointment; to that date your request was that an appointment should be made, and upon the original order which you forwarded to me three forms of appointment were endorsed—one for the plaintiffs' arbitrator, one for the

the defendant's arbitrator, and the third for the third arbitrator, as soon as he was agreed upon. The whole of the negotiations as to the third arbitrator have gone upon the assumption that Mr. Jennings had been approved of but not appointed, as will be seen by reference to the correspondence. I decline to admit, therefore, that the letter from the Commissioner to which you refer can be dealt with as an appointment.

As I have stated in a former letter, the Commissioner is willing to accept Mr. Brock, who has been proposed by you; but if you now decline to allow him to act as arbitrator, I must take the necessary steps to restrain you from proceeding until the third arbitrator has been properly appointed. I shall be obliged by your sending me a reply to this at your earliest convenience.

Yours truly,  
JOHN WILLIAMS,  
Crown Solicitor.

No. 63.

J. M'Laughlin, Esq., to The Crown Solicitor.

O'Rourke and another v. The Commissioner for Railways.

Dear Sir, Mercantile Mutual Chambers, 118, Pitt-street, Sydney, 24 March, 1887.

I have given way so often to you in this matter, and been subjected to such unfair and unwarrantable delays by the Railway Department, that, on behalf of my clients, I fixed a time peremptorily in which you should decide to go on with the arbitrator you had appointed, or to select some one of the four mentioned by me.

That time expired at 4 o'clock yesterday afternoon. After its expiration Mr. Richardson did call, but the interview was at his request without prejudice, and my clerk informed him that, although the time was passed, he would refer the matter to me. He did so this morning, when I at once refused, which refusal was intimated to you, as I could only look upon it, in view of past transactions, as a subterfuge of the Engineer-in-Chief for a further delay.

I well know the Minister for Works and yourself were in town all Tuesday and Wednesday, when a decision could clearly have been come to as to the choice I left you. This delay is a repetition of what has been going on for the last four months, and its unwarrantable character is displayed by the fact of your now seeking to nominate a gentleman who was proposed to you nearly four months ago, and whom, as it now appears without any reason, you persistently objected to. Should plaintiffs accept him they have no guarantee that a similar course may not be taken as that which followed Mr. Jennings' appointment, and I must therefore adhere to the terms of my letter of this morning's date, and insist upon the arbitration proceeding.

You will of course take what steps you think advisable, but I will be no party to any further delay. I am advised by Counsel, and must accept their opinion, which agrees with my own, that Mr. Jennings' appointment is quite sufficient.

Your statement that Mr. Jennings has been approved of but not appointed is rather an anomaly.

I am, &c.,  
JNO. M'LAUGHLIN.

No. 64.

J. M'Laughlin, Esq., to The Crown Solicitor.

O'Rourke and another v. The Commissioner for Railways.

Dear Sir, Mercantile Mutual Chambers, 118 Pitt-street, Sydney, 24 March, 1887.

I have to intimate to you that in pursuance of my letter to you of the 22nd instant, I have called upon the arbitrators duly appointed to fix a time to proceed with this arbitration, and I enclose you copy of letter addressed to each.

Mr. Richardson, of the Commissioner for Railways Department, waited upon me yesterday, and requested me to extend the time mentioned in my letter of 22nd instant for twenty-four hours; but I cannot accede to his request, and I have formally written the Commissioner for Railways notifying him of my refusal so to do, and I now beg to send you herewith copy of the letter I have sent him.

I have, &c.,  
JNO. M'LAUGHLIN.

No. 65.

J. M'Laughlin, Esq., to Messrs. R. G. Watkins, H. J. Poole, and W. H. Jennings.

O'Rourke and another v. The Commissioner for Railways.

Dear Sirs, Mercantile Mutual Chambers, 118, Pitt-street, Sydney, 24 March, 1887.

You are already doubtless aware that you have been appointed arbitrators in this case of John O'Rourke and James McSharry against the Commissioner for Railways to determine all matters in dispute in an action pending between these parties. Mr. Watkins has been appointed by the plaintiffs. I have received notice that Mr. Poole has been appointed by the defendant, and Mr. Jennings has been appointed by both parties in compliance with the order referring the matter to arbitration. I shall be pleased, therefore, to hear from you when you will be prepared to meet the parties, receive from me copies of the issues you have to try, and proceed definitely with the case.

I have, &c.,  
JOHN M'LAUGHLIN,  
Plaintiffs' Attorney.

P.S.—I am not aware of Mr. Poole's exact address, but have sent him triplicate of above addressed to Redfern.—J.M'L.

## No. 66.

## The Commissioner for Railways to The Crown Solicitor.

Sir, Department of Railways, Sydney, 24 March, 1887.  
 Adverting to the correspondence which has passed in connection with the application for a third arbitrator in *O'Rourke and McSharry v. the Commissioner for Railways*, I have the honor to say that I do not like any of the names proposed by the plaintiffs, but if there is no alternative I will accept Mr. Brock as the third arbitrator.

I have, &amp;c.,

CH. A. GOODCHAP,  
 Commissioner for Railways.

## No. 67.

## The Crown Solicitor to J. M'Laughlin, Esq.

O'Rourke and another v. The Commissioner for Railways.

Dear Sir, Crown Solicitor's Office, Sydney, 24 March, 1887.  
 I am instructed by the Minister for Works to state that he is willing, in order to bring the matter to a hearing, to accept Mr. Brock as the third arbitrator in the matter.

If, therefore, you will fill in the form of appointment endorsed on the original order, I will have same signed.

Yours truly,

JOHN WILLIAMS,  
 Crown Solicitor.

## No. 68.

## The Crown Solicitor to J. M'Laughlin, Esq.

O'Rourke and another v. The Commissioner.

Dear Sir, Crown Solicitor's Office, Sydney, 25 March, 1887.  
 Your letter of date 24th March to hand this afternoon. I have not time to answer it at length, but I think I am bound to state that the objection to Mr. Brock was, as you are well aware, solely on the ground that it was thought the third arbitrator should be a person having some knowledge of railway work, which, it is admitted, he has not. The consent to accept him was given on the ground that of the four persons named he appeared to be the least objectionable.

I do not see that the statement that Mr. Jennings had been approved of but not appointed is, as you term it, an anomaly. He was approved of by the Minister, but not appointed by the Commissioner. Upon it being found that he had inspected the works, and spoken strongly in favour of the plaintiffs' claim, he was objected to. On his explanation, the Minister overruled the objection; but you are aware that exception was taken to him on another ground, which you admitted rendered his acting in the matter undesirable.

Immediately upon receipt of your letter I arranged for a consultation with Counsel as to the most expeditious way to challenge Mr. Jennings' appointment, and you may feel assured that no time will be lost in taking the necessary proceedings in that behalf.

If it is necessary, I can show, beyond all doubt, that Mr. Richardson's visit to your office was before 4 o'clock in the afternoon.

Yours truly,

JOHN WILLIAMS,  
 Crown Solicitor.

## No. 69.

## The Crown Solicitor to The Commissioner for Railways.

O'Rourke and another v. The Commissioner for Railways.

Sir, Crown Solicitor's Office, Sydney, 28 March, 1887.  
 I have the honor to inform you that I wrote to the plaintiffs' solicitor, stating that you would agree to Mr. Brock as third arbitrator, and in reply have received a letter stating that Mr. Richardson did not call at Mr. M'Laughlin's office until after the hour mentioned in his letter, and that he therefore claims that the time within which Mr. Brock might have been appointed had expired, and that the arbitration shall proceed with Mr. Jennings as third arbitrator.

Mr. Jennings has called upon Mr. Poole to meet the other two arbitrators at the "Oxford Hotel," King-street, Sydney, on Tuesday, the 29th instant, at 10 o'clock, to proceed in the arbitration.

I have, &amp;c.,

JOHN WILLIAMS,  
 Crown Solicitor.

For Minister's information.—CH. A. G., 29/3/87. Seen.—J. S., 30/3/87.

## J. M'Laughlin, Esq., to The Crown Solicitor.

O'Rourke and another v. The Commissioner for Railways.

Dear Sir, Mercantile Mutual Chambers, 118, Pitt-street, Sydney, 30 March, 1887.  
 Referring to my conversation with you yesterday, when you stated your willingness that I should apply direct to the Commissioner for his signature to the appointment of the third arbitrator, I now beg to advise you that I have seen him, and he states that in his opinion it is better that any documents requiring his signature should be sent by me through you. As I think it desirable that the appointment

appointment of the three arbitrators should be contained in one document, I beg to send you copy order with the appointment of the three arbitrators endorsed on back, the first and last of which are signed by my clients. Will you please forward the same to the Commissioner for his signature, and on its receipt by you return it to me.

I am, &c.,

J. M'LAUGHLIN.

No. 71.

The Crown Solicitor to J. M'Laughlin, Esq.

O'Rourke and another v. The Commissioner.

Dear Sir,

Crown Solicitor's Office, Sydney, 31 March, 1887.

In reply to yours of yesterday's date, forwarding a copy of the order of reference in this matter, with the appointment of the arbitrator endorsed thereon, I must remind you that when you asked me if I would obtain the signature of the Commissioner to an appointment endorsed on the order, I distinctly informed you that I would have nothing to do with any appointment in the matter; but I added that I had no objection to your seeing the Commissioner on the subject, if you thought fit to do so.

I quite agree with the Commissioner in thinking that it is better that any document requiring his signature should be sent through me; but it does not follow from this that I am bound to obtain his signature to any document you may think fit to send to me.

You state in a former letter that your Counsel has advised that the Commissioner has joined in the appointment of the third arbitrator. I do not admit that such is the case, and I certainly shall not take any steps that will confirm the appointment.

I return the copy rule herewith.

I have, &c.,

The Crown Solicitor to The Commissioner for Railways.

Sir,

Crown Solicitor's Office, Sydney, 14 September, 1887.

I have the honor to forward herewith a copy of the award in the matter of the arbitration, O'Rourke and another v. you, which has been lodged with the Prothonotary of the Supreme Court.

I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

[Enclosure.]

COPY OF AWARD.

In the Supreme Court of New South Wales.

Between John O'Rourke and James McSharry, plaintiffs, and the Commissioner for Railways, defendant.

WHEREAS on the 22nd day of November, 1886, an order was made by His Honor Mr. Justice Faucett, by consent, whereby it was ordered that this action then pending in the Supreme Court of New South Wales, and all matters therein in dispute between the parties thereto, should be referred to the final determination of three arbitrators, to be chosen as therein provided, the award of a majority of whom should be final and conclusive on all parties; and it was by the said order further ordered that the award of the said arbitrators should be for a sum certain for the plaintiffs, or an award for the defendant, as the said arbitrators might find: And that the said arbitrators should assess the amount of their fees at the foot of their award, and that the said award should be in writing, and should be made within one calendar month from the close of the said arbitration, and when made should be delivered by the said arbitrators to the Prothonotary of the Supreme Court, and that the submission thereby ordered should be subject to the provisions of the Arbitration Act, 31 Victoria, No. 15: And whereas Robert George Watkins, William Thomas Poole, and William Henry Jennings were duly chosen and appointed arbitrators under and in accordance with the provisions of the said order, and afterwards inquired into and heard evidence in regard to the said action and all matters by the said order referred to them: And whereas by consent of the parties in writing, duly given and agreed upon under the provisions of the said Act, the time for making the said award was extended for one calendar month beyond the time so limited in the said order, which extended time has not yet expired: Now, we, William Henry Jennings and Robert George Watkins, a majority of the said arbitrators, having so inquired into and heard evidence in regard to the said action and the said matters so referred, do, by virtue of the powers conferred on us by the said order, hereby make our final determination and award in writing, in reference to the said action and the said matters by the said order so referred, as follows—We award to the plaintiffs the sum of £20,433 10s. 11d.

In witness whereof, we have hereunto set our hands at Sydney this 10th day of September, A.D. 1887.

Signed and published this 10th day of September, A.D. 1887, }  
in the presence of,—

JOHN SHEPHERD, Solicitor, Sydney.

W. H. JENNINGS.

ROBERT GEORGE WATKINS.

In further pursuance of the said order we assess the fees of the said Arbitrators at the sum of £1,804 5s. each.

Signed this 10th day of September, A.D. 1887, }  
in the presence of,—

JOHN SHEPHERD.

W. H. JENNINGS.

ROBERT GEORGE WATKINS.

No. 73.

The Crown Solicitor to The Commissioner for Railways.

Sir,

Crown Solicitor's Office, Sydney, 1 October, 1887.

I have the honor to forward herewith, for your information, a copy of the opinion of Messrs. Pilcher and Stephen on the award in the arbitration O'Rourke and another v. the Commissioner.

I suppose the recommendation of Counsel will be adopted, but it will be as well that I should be informed of the decision arrived at by the Minister.

I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

[Enclosure.]

OPINION.

O'Rourke and another v. Commissioner for Railways.

WE have considered the award of the majority of the arbitrators in this case, in consultation with the Crown Solicitor, and Mr. B. C. Simpson, engineer for the works. We had also before us an analysis showing the items composing the amount awarded, namely, £20,433 10s. 11d.

With the view of determining whether objection could be legally made to the award, on the ground of its being erroneous, our attention was directed to the following facts:—

The arbitrators appear to have disallowed the great bulk of the plaintiffs' claims, and in particular the claim for subsidence of the banks, and many items which hinged thereon. The dispute regarding the claims for subsidence was the main contest in the case, involving the largest amounts, and taking up a very large proportion of the time consumed at the arbitration. The contest was whether or not the District Engineer had directed certain allowances for subsidence to be made in the construction of the banks, and the decision has been in favour of the engineer's statements.

A lump sum of £10,000 seems to have been allowed for compensation for alleged delays, said to have been caused partly by the district engineer, partly by reason of the last mile of the extension being kept from the contractors for the period of about a year, and partly by delays arising from other causes. It is not possible to know how this sum was arrived at, or how distributed amongst the various causes.

Further, a sum of £4,000 is said to have been allowed for the extra cost of earthwork disposed in embankments beyond amounts shown in the disposal sheet. It is contended that the contract clearly provided that the earthwork was to be disposed of where the engineer directed, within certain observed limits, and that defendant's evidence showed that no loss was caused by the alleged causes of delay. Although we believe these contentions to be quite correct, yet we cannot advise that any objection can be successfully raised against the award on either of these grounds. The law is that an award may not be impeached for error either of law or fact in the decision, and that it is absolutely final unless it omits to decide the matters submitted, or decides something in excess of the powers of the arbitrators, or is erroneous on the face of it, or unless misconduct of the arbitrators can be shown.

As none of these grounds can be taken, it is useless to inquire whether the decision is right or wrong on the law or the evidence.

Deducting the sums of £10,000 and £4,000 above referred to, the balance of the award, £6,433 10s. 11d., is made up apparently of comparatively small items, which were disputed by the defendant, but the decision as to which was entirely within the province of the arbitrators.

We are therefore of opinion that no legal grounds exist on which it could be possible to set aside the award.

CHAS. E. PILCHER.  
CECIL B. STEPHEN.

Chambers, 28 September, 1887.

## No. 74.

Return in further answer to Question No. 1 in Votes and Proceedings No. 7, 4th October, 1887.

## RAILWAYS—O'ROURKE &amp; MCSHARRY v. COMMISSIONER FOR RAILWAYS.

As to the circumstances leading to this case being referred to arbitration, at whose suggestion, and by what authority the reference to arbitration was made, I beg to state that the case was entered for trial on 13th September, 1886, before a Special Jury of Twelve, briefs were delivered, and the defendant was prepared to go to trial.

One of the issues raised on the pleadings was as to the want of certificate by the engineer in respect of the so-called extra works sued for in the action.

To get rid of the effect of this plea, the plaintiffs, on 7th September, filed a claim, in the Equitable Jurisdiction of the Supreme Court, praying that an injunction to restrain the defendant from availing himself of that plea should be granted.

The application was made to Sir William Manning, Primary Judge in Equity, on Friday, the 10th September, and opposed by Messrs. Stephen, Salomons, and C. B. Stephen, on the defendant's behalf; but the order was granted.

A copy of the shorthand-writer's notes of this application is forwarded herewith. Against this order defendant gave notice of appeal to the Full Court, and on Monday, 13th September, made application to the Chief Justice (Sir James Martin) for an order to postpone the trial until the next sittings, on the ground that the defendant was unduly prejudiced by having his defence altered by the injunction.

The Chief Justice granted the order. Upon the application for the injunction, Sir William Manning spoke strongly as to the plea being inequitable, and these observations were reported in the daily papers.

Shortly after this I received a note from the Engineer-in-Chief, informing me that the Minister had directed him to state that the case was to be left to arbitration, and requesting me to see the Minister on the subject.

I informed defendant's Counsel that it was proposed to leave the case to arbitration. They, especially Mr. Salomons, strongly advised that this course should not be adopted, and expressed very confident opinions that we should succeed upon the appeal from Sir William Manning's order.

I therefore saw the Minister, Mr. Lyne, and informed him of the opinion of Counsel, and stated further that both Mr. Whitton and myself thought it would be better to allow the action to be proceeded with. He, however, told me that he had made up his mind that the case should be arbitrated, and that he had so informed the plaintiffs' attorney or Counsel—I am not sure which.

The matter was then proceeded with; but a formal agreement as to the terms of the arbitration was not arrived at, and it was ultimately determined that the Minister, the Attorney-General (Mr. Want), who was plaintiffs' Counsel, and Mr. Pilcher, who had taken Mr. Salomons' place, should meet at the Attorney-General's Chambers. This meeting, at which I attended, was held on 19th November, when the Minister adhered to his previously expressed intention. A formal agreement was assented to, and I was directed by the Minister to carry out same.

On the following day I wrote to you informing you of this.

I may here mention that the defendant's Counsel then were Mr. M. H. Stephen, Mr. Pilcher, and Mr. C. B. Stephen.

The agreement to refer to arbitration prevented the appeal against Mr. Justice Manning's order for an injunction being proceeded with, and the order of reference was taken out in the usual way.

3 October, 1887.

JOHN WILLIAMS.

No. 75.

No. 75.

J. M'Laughlin, Esq., to The Crown Solicitor.

*Re* McSharry & Co. v. The Commissioner for Railways.

Dear Sir,

118, Pitt-street, Sydney, 6 October, 1887.

Your report upon this case, which was laid upon the Table of the Legislative Assembly yesterday by the Attorney-General, and published in to-day's daily papers, has been brought under my notice by Mr. McSharry.

In the absence of Mr. Want, the plaintiffs' leading Counsel, I think it my duty to call your attention to the following statement contained in the report:—

"And it was ultimately determined that the Minister, the Attorney-General (Mr. Want), who was plaintiffs' Counsel, and Mr. Pilcher, who had taken Mr. Salomons' place, should meet at the Attorney-General's Chambers."

Mr. Want will no doubt deal with this matter on his return to the Colony, but I think it is your duty to him, as well as to the plaintiffs and the Administration of Justice, to correct the erroneous impression conveyed by your minute. On the occasion you refer to Mr. Want was not the plaintiffs' Counsel. You must have been aware at the time that the plaintiffs' Counsel were Sir Frederick Darley and Mr. O'Connor. When the Crown availed themselves of the services of Sir Frederick Darley as Chief Justice, and Mr. Want ceased to be connected with the Crown, I retained his services for the plaintiffs in place of Sir Frederick Darley's, which the plaintiffs had lost. Before Mr. Want received the appointment of Attorney-General he certainly had a retainer from the plaintiffs in a previous action, which was discontinued before this action was commenced, but, as you must remember, from your intercourse with him, he was in no way concerned with the plaintiffs until after he ceased to be Attorney-General, and after the interview you refer to.

I am, therefore, surprised that your minute should have been written so that it might bear the construction that Mr. Want was plaintiffs' Counsel, whilst acting as Attorney-General, at an interview which you consider to have been of so very important a nature. I think, therefore, it is your duty to see at once that an authenticated correction is given with full publicity to the erroneous impression your minute has conveyed.

With regard to your speculation as to what the result of an appeal from Sir William Manning's order restraining the Crown from setting up as a defence to the action the plea that Mr. Whitton had not certified that the line was constructed to his entire satisfaction, I have at the present time nothing to do, but might remark that inasmuch as the Commissioner for Railways had taken over the line with the consent of the Engineer-in-Chief many months previously, and he had been asked in writing time after time if he was dissatisfied to point out anything he was dissatisfied with, and he could not do so, I can only say it would have surprised me if any Court of Appeal would have decided that the Primary Judge was wrong in holding that such a defence against an action for the price of the work done was inequitable.

My clients are in entire harmony with you in lamenting that the case did not take the usual course and go before a Judge and jury, not that the expenses would have been lessened, or the trial completed in a shorter period than was occupied over the arbitration, but they believe they would have obtained a sum nearly equivalent to the amount due to them.

The Engineer-in-Chief's estimate of the cost of this railway was £185,000; the plaintiffs received £159,000, and after being put to ruinous expenses and delay and vexatious litigation have now obtained at the hands of the arbitrators a contribution towards the balance of £20,433 10s. 11d., making in all about £180,000, or £5,000 less than the Engineer-in-Chief estimated the railway would cost. I must, under these circumstances, express my great surprise that the Government should consider that there is any apology due to the public that persons treated as the plaintiffs were should be paid costs that they were put to in their vain endeavour to struggle for payment of their labour.

Seeing that your minute has been made public without regard to its injurious and unfair effect on the plaintiffs, I reserve to myself the right to give this letter the same publicity as your minute.

I have, &amp;c.,

JNO. M'LAUGHLIN,  
Plaintiff's Solicitor.

No. 76.

The Crown Solicitor to The Commissioner for Railways.

Sir,

Crown Solicitor's Office, Sydney, 17 December, 1887.

I have the honor to state I received from Mr. M'Laughlin—the attorney for Messrs. O'Rourke and McSharry—on 8th instant, the letter of date 7th instant, which I forward herewith, suggesting that the amount of the award in the recent arbitration case and interest thereon should be paid at once.

As the second paragraph of this letter is not clear, I wrote to Mr. M'Laughlin, and on 9th instant received the letter of that date, which is also forwarded herewith.

This letter purports to be written without prejudice, and as I could not understand in what way the plaintiffs could be prejudiced by stating their willingness to receive the amount awarded, I have inquired of the writer of that letter as to why it was said to have been written without prejudice, and he informs me that he intended it to be understood that the receipt of the award should not be taken to waive any right the plaintiffs might have to costs.

It may, therefore, be worth considering whether it is not to the advantage of the Government to pay the amount of the award, and thus stop the increase of the amount payable for interest.

I have, &amp;c.,

JOHN WILLIAMS,  
Crown Solicitor.

[Enclosures.]

O'Rourke and McSharry v. The Commissioner.

Mercantile Mutual Chambers, 118, Pitt-street, Sydney, 7 December, 1887.

Dear Sir,

I notice the taxation of the costs herein cannot be completed until some time long after vacation, and interest is running against the Government at the rate of 8 per cent. at a time when they can borrow money at about half that rate; and as I believe Mr. McSharry is paying about 8 per cent. upon an overdraft, I would suggest that the amount of the verdict and interest thereon be paid now, unless the Government think the use of the money worth 8 per cent.

I

I will, therefore, consent to accept the verdict and interest, without prejudice to the plaintiffs' position in any way whatever, and this will leave the costs and interest thereon to be the only balance due under the judgment.

This proposition is made without prejudice.

Yours truly,  
J. M'LAUGHLIN.

J. Williams, Esq., Crown Solicitor.

O'Rourke and another v. The Commissioner.

Mercantile Mutual Chambers, 118, Pitt-street, Sydney, 9 December, 1887.

Dear Sir,

In reply to yours of the 8th, I certainly do not intend that the amount of the verdict should be paid twice; but what I mean is, that the payment now shall not in any way prejudice the taxation of the costs, and the payment of the full balance that will be due for costs and interest.

Without prejudice.  
John Williams, Esq., Crown Solicitor.

Yours faithfully,  
J. M'LAUGHLIN.

This question is purely a financial one, and might be referred to the Treasury. We are paying 8 per cent. upon the amount awarded—the interest will be saved from the date of payment.—CH.A.G., 30/12/87. £4 7s. 8d. per diem.

The Treasurer to say. I think the money should be paid—it is chargeable to Loan.—JOHN SUTHERLAND, 30/12/87. The Under Secretary for Finance and Trade, B.C., 30/12/87. The amount can be paid at once on the production of a proper voucher.—J.F.B., 3/1/88.

### No. 77.

#### The Crown Solicitor to The Commissioner for Railways.

Sir,

Crown Solicitor's Office, Sydney, 16 January, 1888.

I have the honor to forward a copy of a letter I have this morning received from the plaintiffs' attorney in O'Rourke and another v. you, in answer to one sent by me, with a draft form of release which I proposed should be given upon amount of the award being paid.

As Mr. M'Laughlin suggests it is unusual to require a release from the plaintiffs when the amount paid is the amount of a judgment, the Attorney-General's authority to receive the amount of the verdict being taken to be sufficient. The payment now proposed to be made will not be in satisfaction of the judgment, but upon account thereof, only as the costs are payable under the judgment when the amount has been ascertained by taxation. I therefore propose taking the Attorney-General's opinion as to whether the payment can be safely made to the plaintiffs, and have submitted a case for that purpose.

I have, &c.,  
JOHN WILLIAMS,  
Crown Solicitor.

[Enclosure.]

O'Rourke and another v. Commissioner for Railways.

Dear Sir,

Mercantile Mutual Chambers, 118, Pitt-street, Sydney, 14 January, 1888.

I am in receipt of your favour of the 12th instant, notifying that the Commissioner had decided to pay the amount of award herein and interest, and forwarding a draft release. As it is unusual to give a release for moneys recovered under a judgment in the Supreme Court, I do not see why you should ask for one in this case. If you will pay the money I will accept it on the terms of the correspondence, in part payment of the judgment, signed so as to save interest recurring pending the taxation of the costs on the amount of the award.

Yours, &c.,  
JNO. M'LAUGHLIN.

Sir,

Crown Solicitor's Office, Sydney, 19 January, 1888.

In compliance with your verbal request, I have the honor to return herewith the papers relating to the proposed payment of the amount of the award in the recent arbitration between Messrs. O'Rourke and McSharry and the Commissioner for Railways, which were forwarded to me on 7th instant.

I have, &c.,  
JOHN WILLIAMS,  
Crown Solicitor.

[Enclosures.]

Dear Sir,

Mercantile Mutual Chambers, 118, Pitt-street, Sydney, 5 February, 1888.

Kindly let me know whether you intend to avail yourself of my offer to accept amount of award in McSharry's case, on account, to save interest running on same or not, during to-morrow at latest.

I may say I remained in town during a portion of the vacation expecting you would require my personal receipt, as plaintiffs' attorney, for cheque.

John Williams, Esq., Crown Solicitor.

Yours, &c.,  
JOHN M'LAUGHLIN.

Dear Sir,

Crown Solicitor's Office, Sydney, 8 February, 1888.

In reply to your note of date 5th instant (received this morning), inquiring whether it is intended to accept your offer to accept the amount and interest to date, leaving the question of costs open, I would refer you to my letter of 12th January, in which I intimated that the Commissioner was willing to accept the offer made, upon receiving a release from your client; this you declined to do, but intimated that you were willing to receive it in part payment of the judgment.

I do not at all doubt but that your client would be bound by all your acts in the regular course of practice, but I doubt whether a settlement in the way you propose can be said to be in the regular course of practice.

I understood that the difficulty in dealing with the matter in the way I suggested was that Mr. McSharry had left on a visit to another Colony. I am informed, however, that he is in Sydney at the present time. I

I think the Commissioner will be willing to pay the amount of the award and interest to date upon a voucher for same, signed by Mr. McSharry, with the authority at foot, also so signed, directing the payment to you.

I regret that you should have remained in town during a portion of the vacation expecting that I should require your personal receipt as the plaintiffs' attorney; this was certainly not caused by anything said by me in the matter.

When replying to this letter you may as well return the draft form of release submitted with my letter of 12th January.

Yours, &c.,

JOHN WILLIAMS,  
Crown Solicitor.

John M'Laughlin, Esq., Solicitor, Sydney.

Sir,

Crown Solicitor's Office, Sydney, 9 February, 1888.

I have the honor to inform you that on 16th January I submitted a case for the opinion of the Attorney-General, as to whether, with safety, the amount of the award and interest thereon in the matter of the arbitration, O'Rourke and another v. you, could, in the present position of the action, be paid with safety to Mr. M'Laughlin, the attorney in the case. Upon this the Attorney-General advised, on 6th instant, that Mr. McSharry's consent should be obtained to any payment to Mr. M'Laughlin.

Having received a note from Mr. M'Laughlin in this matter, of date 5th February, and having received Mr. Attorney-General's opinion, I, on 7th instant, wrote to Mr. M'Laughlin a letter, of which I forward a copy herewith, and, in reply, have received a note requesting that a voucher for signature may be sent to him (copy note herewith). I would therefore request that you will be pleased to forward the voucher, with interest calculated to date of payment, to me.

I have, &c.,

JOHN WILLIAMS,  
Crown Solicitor.

The Commissioner for Railways, Sydney.

Forward voucher.—CH. A.G., 10/2/88. Voucher for amount of award, with interest from date of entering judgment, until 15th instant:—Award, £20,433 10s. 11d.; interest, £573 5s. 2d.; total, £21,006 16s. 1d.,—forwarded to Crown Solicitor, 14/2/88.

McSharry and another v. Commissioner for Railways.

Dear Sir,

Mercantile Mutual Chambers, 118, Pitt-street, Sydney, 9 February, 1888.

Replying to yours of yesterday, just received, I shall be obliged if you will kindly send the form of voucher you require Mr. McSharry to sign.

John Williams, Esq., Crown Solicitor, Sydney.

Yours faithfully,

JOHN M'LAUGHLIN.

McSharry and another v. Commissioner.

Sir,

Department of Railways, Sydney, 14 February, 1888.

In compliance with the request contained in your letter of the 9th instant, I have the honor to forward herein for the claimants' signature the voucher for the amount of the award in the valuation with interest added to date.

I have, &c.,

CHAS. A. GOODCHAP,  
Commissioner for Railways.

The Crown Solicitor, Sydney.

Sir,

Crown Solicitor's Office, 16 February, 1888.

I have to acknowledge the receipt (yesterday afternoon) of your letter of date 14th instant, in the case of McSharry v. the Commissioner for Railways, enclosing a voucher for the amount of the award with interest calculated to 15th instant.

Mr. M'Laughlin claims that he is entitled to interest up to the actual receipt of the money, and not of the voucher; it will be as well therefore to state the interest as calculated to 17th, if it can be arranged that the money shall be actually received on that day.

I return the voucher herewith.

I have, &c.,

JOHN WILLIAMS,  
Crown Solicitor.

The Commissioner for Railways, Sydney.

Sir,

Crown Solicitor's Office, Sydney, 23 February, 1888.

With reference to the recent payment of the amount of the award to the plaintiffs in the action, O'Rourke and another v. you, I have the honor to forward herewith, to be kept with the papers, the original memorandum, signed by Mr. McSharry, of the terms upon which the payment was made.

I have, &c.,

JOHN WILLIAMS,  
Crown Solicitor.

The Commissioner for Railways, Sydney.

In the Supreme Court of New South Wales.

Between John O'Rourke and James McSharry, plaintiffs, and the Commissioner for Railways, defendant.

THE amount of the award in this action is twenty thousand four hundred and thirty-three pounds ten shillings and eleven pence, and interest on same from the eleventh day of October last, the date upon which judgment was signed, to the eighteenth day of February instant, amounts to the sum of five hundred and eighty-six pounds thirteen shillings and eleven pence. As the costs have not yet been taxed, and there may be delay in the taxation thereof, it has been arranged between the plaintiffs and the defendant that the amount of the said award, and the interest as above stated, shall be at once paid to the plaintiffs, who will receive same in full and final settlement of the amount payable under the award for the amount awarded and all interest thereon, leaving the question of the costs of the action the sole matter unsettled between the parties in this action.

In witness whereof the said plaintiffs and the said defendant have respectively hereto set their hands this 20th day of February, 1888.

Witness—JNO. McLAUGHLIN.

J. McSHARRY,  
(O'Rourke & McSharry.)

**APPENDIX.**  
**O'ROURKE & M'SHARRY v. THE COMMISSIONER FOR RAILWAYS.**  
**ANALYSIS OF ARBITRATORS' AWARD.**

No. of Item	Description of work.	Amount claimed.	Amount awarded.	Amount concurred with by Government nominee.	Remarks.
		£ s. d.	£ s. d.	£ s. d.	
1	CLAIMS NOS. 1 AND 2. Excavations, cuttings to embankments.....	309 7 6	300 0 0	300 0 0	Plaintiffs admit an overcharge by error of 162 cubic yards, £20 5s., in widening cuttings. The award therefore is £10 17s. 6d. in excess of their claim. They have also awarded payment for 257 cubic yards, £32 2s. 6d.; widening cuttings, 12, 19, and 45, proved to have been executed without order, and necessitated by wrongful disposal; also plaintiffs uncorroborated measurements have been taken as a basis of award, although the Government measurements of disputed cuttings were checked and proved correct by Messrs. Murdoch & Stawell.
2	Excavation, outlet drains to cuttings.....	8 5 4	8 5 4	.....	Price claimed by plaintiffs is 2s. 6d., price of cuttings to embankment, including a lead up to 1 mile. Price paid is 1s. 2d., the Schedule rate for outlets, there being no lead. Claim allowed.
4	Excavation from banks 22, 48, and 49 .....	97 5 4	97 5 4	97 5 4	This work is the excavation of soft-stuff from tops of banks spoiled on the slopes. The price awarded, 2s. 6d., is average price for cuttings with maximum lead of 1 mile. The price paid, 1s. 2d., is price for side cuttings on the ground that there is no Schedule rate, and that the labour involved in this work is much less than that allowed for side cutting.
6	Excavation from road approaches (stations)...	186 0 6	186 0 6	.....	Price claimed by plaintiffs, 2s. 6d., notwithstanding evidence of Messrs. Warren, Kerr, Murdoch, and other witnesses that 2s. was the proper Schedule rate.
7	Stuff weathered off slopes—cuttings .....	1,095 0 0	450 0 0	450 0 0	Part of claim allowed, notwithstanding evidence of District Engineer, corroborated by Mr. Murdoch, that allowance has been fairly made in measurements of cuttings.
8	Filling up bottom culvert No. 2 .....	43 15 0	22 0 0	22 0 0	Half of claim allowed, notwithstanding evidence that work was paid for in measurement of cutting No. 2.
9	Barrowing stuff over 10-foot culvert .....	1,545 5 0	301 0 0	.....	Original account for this work, £301, disallowed by Engineer-in-Chief, has been allowed. It will be observed that although the accounts rendered by the plaintiffs for this work in 1884 they have claimed £1,154 5s. in this action.
10	Barrowing stuff over 8-foot culvert.....	476 12 6	160 0 0	.....	Work not ordered, nor was any claim advanced after completion, in compliance with clauses 103 and 104 of specifications.
23	Diversion of watercourses, inlets and outlets to tank at Young.	414 10 0	200 0 0	200 0 0	Price claimed, 3s. 4d.; price paid, Schedule rate, 1s. 8d.; rate awarded, 2s. 7½d. Evidence proved that this work was ordered and partly paid for, as diversion of watercourses, before special contract for tank was entered into.
42	Forming .....	36 5 0	20 0 0	20 0 0	Forming "not marked on section," as provided for in contract, allowed.
44	Reforming banks .....	4,615 0 0	2,400 0 0	.....	Maintenance provided for in clause 17 of General Conditions. Amount awarded much exceeds the cost of this work, no account of which was ever rendered.
45	Metalling road approaches .....	85 2 6	27 12 6	27 12 6	Plaintiffs' measurements have been allowed. Their excessive price disallowed, because price was settled by letter, Ex. 109.
49, 52	Gravel and earth blinding (stations) .....	567 0 6	280 0 0	.....	Half claim allowed, i.e., 5 inches in depth of blinding has been allowed.
50	Earth blinding (level crossings) .....	41 2 6	20 0 0	.....	Very little blinding done, and that in an unsatisfactory manner. Half claim allowed.
65	Portland cement concrete.....	39 7 1	39 7 1	39 7 1	Price of 6 to 1 concrete allowed, although proportions proved varied from 7:03 to 1 to 7:81 to 1. This, in Government payment, was reduced to proportionate Schedule rates for 6 to 1 and 8 to 1.
66	Extra for not tipping concrete from height ...	33 14 5	33 14 5	.....	Claim of 2s. 6d. a yard for not being allowed to tip concrete from a height allowed, although plaintiffs statement that it was lowered in buckets was proved to be false, and evidence proved that tipping from a height was prejudicial to the work.
70	Concrete round piles, Clarke-street .....	23 8 0	23 8 0	23 8 0	Concrete required to remedy plaintiffs' bad pile-driving allowed.
89	Sills and struts to fence-posts .....	77 18 3	39 0 0	39 0 0	Half claim allowed for sills and struts, notwithstanding that clause 100 of Specification states that they are included in price for fence.
93	Extra cost of long decking .....	171 8 0	100 0 0	100 0 0	Though lengths of decking required for bridge-decking were 11 feet, 16 feet, and a small quantity of 24 feet, 10 per cent. extra awarded. No claim was ever made, in monthly accounts, as required by contract if claim was intended.

No. of Item.	Description of work.	Amount claimed.	Amount awarded.	Amount concurred with by Government nominee	Remarks.
CLAIMS NOS. 1 AND 2—continued.		£ s. d.	£ s. d.	£ s. d.	
101	Extra price for painting .....	234 9 6	80 0 0	80 0 0	Extra price of 2d. per square yard awarded for work complained of by every officer superintending this work.
119	Ballasting station yards, &c. ....	337 17 0	78 0 0	78 0 0	Plaintiffs' measurement, at price allowed by the Department, have been allowed in award.
124	Picket fencing.....	26 15 1	26 15 1	26 15 1	Plaintiffs' measurements have been allowed in award.
126	Erection and removal of 7 wire fence.....	65 10 0	30 0 0	30 0 0	As nothing is credited in award on account of £14 4s. paid in item 127, but included in plaintiffs' item 126, $\frac{2}{3}$ of plaintiffs' claim is awarded, rejecting the Departmental measurements, and accepting that of plaintiffs' witnesses, who were not on the works when the fencing was erected or removed.
128	Old fencing removed .....	110 15 0	10 0 0	10 0 0	Farmers' fences removed in clearing the line, and cost included in that of earthwork.
130, 131	District Engineer's office .....	350 0 0	15 0 0	15 0 0	Extra work value £8 proved.
132	Sinking shafts at bridges.....	27 14 0	27 14 0	27 14 0	Plaintiffs' measurements allowed.
133	Carriage of permanent-way material .....	63 14 0	18 4 0	18 4 0	Railway haulage at 10s. per ton allowed in award.
134	Unloading and stacking ditto .....	11 7 6	6 16 6	6 16 6	2s. 6d. per ton awarded, although 1s. per ton for the same work is awarded in item 143.
135	Floating brick piers with cement .....	40 2 6	20 0 0	20 0 0	Half claim awarded. Government measurements proved by dimensions in written order, Exhibit D 67.
136-7-8	Painting brickwork with cement .....	601 0 0	446 0 0	.....	4s. per square yard awarded, although it is denied in evidence that any order for such work was given, and a dozen witnesses proved that no extra expense was incurred thereby, but that it was a convenience to plaintiffs.
139	Letting go and re-straining wire fence .....	102 0 0	30 0 0	.....	Paid for in item 126.
142	Cutting rails for curves.....	70 0 0	50 0 0	.....	3s. 7d. per rail awarded. Proved that no such payment had ever been made by Department. No claim made in progress accounts.
143	Unloading permanent-way .....	409 10 0	117 0 0	117 0 0	Delivery taken in waggons for plaintiffs' convenience. No objection ever made. Price awarded, 1s. per ton.
144	Cash paid carriage under protest.....	370 10 0	272 15 0	272 15 0	2s. 4d. per ton rebate awarded.
CLAIM No. 3.					
145	Removing telegraph poles .....	0 7 9	0 7 9	0 7 9	Not ordered.
147	Road diversion, cutting 7.....	41 9 11	3 3 9	3 3 9	Day work claimed. Schedule rate, 2s. per cubic yard, paid. 2s. 6d. per cubic yard awarded.
148	Removing boulders at fence line.....	31 1 3	2 6 9	2 6 9	Day work, of which no account was rendered, is claimed. 2s. 6d. per cubic yard paid in cutting measurement. Award apparently on the assumption that only 2s. was allowed.
149	Removing boulders for side drains.....	2 17 7	0 13 6	0 13 6	No such work known to be done nor claimed in final account of September 19, 1885.
150	Filling up old drains at Young .....	2 17 7	2 17 7	2 17 7	Not claimed in progress accounts when alleged to have been done.
151	Filling up water-race.....	0 9 7	0 9 7	0 9 7	Ditto.
152	Laying and breaking road for crossings.....	26 1 8	26 1 8	.....	Day-work price awarded; notwithstanding evidence that it includes all the cost of laying points and crossings, for which payment has been accepted by plaintiffs in measurement.
153	Altering bridge at 247 miles 54 chains at bank .....	35 1 7	22 0 0	22 0 0	Bank improperly altered without instructions, three-fifths of claim awarded.
155	Laying sleepers—cutting 52.....	7 11 2	7 11 2	7 11 2	Plaintiffs' error, 1s. per sleeper for shifting about 10 chains.
156	Filling up diggers' holes, &c. ....	6 6 0	6 6 0	6 6 0	Plaintiffs' account of day of which no details were furnished accepted in award. Government return rejected.
157	Forming Creek-street, Young .....	19 0 0	19 0 0	19 0 0	Ditto.
159	Carting and spreading ballast, Zouch-street.....	3 8 9	1 14 6	1 14 6	Work denied by District Engineer and by Mr. J. G. , who subsequently did it and was paid for it; half claim awarded.
160	Drilling holes in rails.....	22 6 2	11 0 0	.....	Half claim awarded. Evidence proved that this was always included in price for plate-laying and had not been claimed in progress accounts.
161	Making approaches, Booroowa-street.....	62 14 2	20 0 0	.....	Award exceeds plaintiffs' claim, as £46 16s. has already been paid for this work.
163	Putting and ramming earth under goods-shed .....	23 19 1	10 0 0	10 0 0	Extra work of ramming denied by District Engineer, Inspector Leck, and Mr. J. G. Gough in evidence.

No. of Item.	Description of work.	Amount claimed.	Amount awarded.	Amount concurred with by Government nominee.	Remarks.
CLAIM No. 3—continued.		£ s. d.	£ s. d.	£ s. d.	
164	Repairing culverts under bank 15 .....	28 19 4	7 10 0	7 10 0	Provided for by clause 17 of general conditions respecting maintenance of works being contractor's risk.
165	Repairing 10 feet culvert under bank 40 .....	20 0 6	7 10 0	7 10 0	Ditto.
166	Excavation for box drains in banks 41 and 42 and covering same.	22 11 2	22 11 2	22 11 2	£12 15s. omitted by error from certificate No. 32.
169-70	Altering gates, &c., at Young .....	30 10 9	11 0 0	.....	Evidence proved that this alteration was in favour of plaintiffs by saving them gate-posts. Already overpaid by clerical error.
173	Forming approach, Main-street .....	32 18 2	16 0 0	.....	Half claim awarded, notwithstanding evidence that this work was paid for in excavation of tank at Young.
174	Forming approach, Lynch-street.....	34 17 10	15 8 2	.....	Award exceeds claim by £15 18s. Plaintiffs have already been paid £40 5s. 6d. for this work ( <i>vide</i> D 125), and they now claim only £39 15s. 4d., and in their final account of September 19, 1885, they only claimed £30 11s. 4d.
175	Levelling station platform, Currawang .....	7 13 6	3 17 0	3 17 0	Half claim awarded notwithstanding that plaintiffs have already been paid according to Inspector Palmer's return of time, checked with plaintiff's manager, and 20 per cent. added.
176	Clearing out culvert, 247 miles 50 chains.....	0 6 5	0 6 5	0 6 5	Allowed in award.
177	Stacking fence at Engineer's Office .....	3 6 0	3 6 0	3 6 0	do
179	Repairing culverts, banks 1, 2, 4, &c. ....	22 17 10	7 10 0	7 10 0	Provided for by clause 17 of general conditions, respecting maintenance being contractor's risk.
180	Making concrete shutes, Lynch-street .....	10 15 9	10 15 9	10 15 9	Claim awarded notwithstanding evidence that when plaintiffs asked for day work payment for this work they agreed to accept the Inspector's return of same. This, if allowed, with 20 per cent. added, would entitle them to about 13s. ( <i>Vide</i> D 72.)
181	Repairing culverts, Kingsvale to Young .....	15 1 2	7 10 0	7 10 0	Provided for by clause 17 of general conditions respecting maintenance being contractor's risk
183	Cutting overflow between tank and aprons at Young.	10 8 10	6 0 0	.....	Payment proved to have been accepted by plaintiffs in measurement.
184	Excavation for concrete shutes at inlet of tank, Young.	3 14 8	1 0 0	1 0 0	Paid for at Schedule rate.
185	Puddling-drain at tank, Young .....	7 17 3	7 17 3	.....	Puddling ordered to strengthen bank is paid for, £21 1s. 2d. Puddling drain was proved to have been necessitated by damage done to works by plaintiffs in defiance of orders.
187	Concrete in shute, Main-street .....	1 16 9	1 16 9	1 16 9	Claim awarded notwithstanding evidence that when plaintiffs asked for day work payment for this work they agreed to accept the Inspector's return of same. This, if allowed, with 20 per cent. added, would entitle them to about 13s. ( <i>Vide</i> D 72.)
188	Concrete in shute, inlet to tank .....	1 19 5	1 19 5	1 19 5	Paid at schedule rate.
192	Pitching inlet and outlet to tank .....	19 8 2	10 0 0	10 0 0	Pitching inlet has been paid for. Pitching outlet was necessitated by drain cut in defiance of orders.
193	Concrete aprons, overflow to tank .....	9 19 2	6 3 0	6 3 0	This is a repetition of item No. 189. If taken together, and paid for on the basis of the Inspector's return of time, with 20 per cent. added, plaintiffs would be entitled to £13 2s. 1d., or £3 18s. 8d. less than the award.
194	Sheet-piling at 10-feet culvert, at 245 miles 13 chains 15 links.	89 15 9	41 0 0	.....	Paid for at Schedule rates, according to contract.
CLAIM No. 5.					
2	Straightening rails from Narrandera .....	50 0 0	50 0 0	50 0 0	£39 is admitted to be due. It was, however, omitted from Government certificate and plaintiffs' accounts, and was only claimed after the commencement of this action.
4	Extra cost of disposal of earthwork places in embankment beyond what is specified.	9,487 18 3	4,000 0 0	.....	Plaintiffs' claim for 119,000 cubic yards of earthwork run to embankment more than is specified. Their own evidence proved that the total quantity claimed to have been excavated was only 15,431 cubic yards more than the quantity shown on the disposal sheets to go to bank, and Ex. D. 74 proves that 11,233 cubic yards of this was widening of cuttings for station purposes, and that the excess was really only 1,723 cubic yards, and more than four times this quantity was actually spoiled at cutting 11, at King Vale, and between cuttings 38 and 39. The plaintiffs' contention—that although "cutting to embankment" is paid for by the cubic yard, as measured in cutting, the quantity disposed to bank should be estimated by the bulk of bank—is like calling a pint of froth a pint of ale.

No. of Item	Description of work.	Amount claimed.	Amount awarded.	Amount concurred with by Government nominee.	Remarks.
5	CLAIM NO. 5—continued. Extra cost of timber in additional bridge .....	£ s. d. 1,369 10 0	£ s. d. 50 0 0	£ s. d. 50 0 0	Timber-work is proved, by plaintiffs' exhibit No. 233, to have been paying work. The greater portion of extra work was substituted for brickwork, which was not profitable (see Ex. 233), for plaintiffs' convenience; and had such an unreasonable claim been advanced at the time of order the work could profitably have been let to other contractors.
4	CLAIM NO. 6. Loss of profit to plaintiff by withdrawal of West Fork.	193 6 5	75 0 0	.....	Part claim awarded for loss of profit on 25½ chains of plate-laying withdrawn from contract in one place although 2 miles 19 chains were added elsewhere.
1	CLAIM NO. 4. Delay in getting possession of land, and disturbance in possession.	3,337 7 2	10,000 0 0*	.....	Delay acknowledged; no damage proved; but evidence of Messrs. Whitton, Simpson, Warren, Kerr, Murdoch, and plaintiffs' manager, Crosbie, conclusively disproves damage. The enormity of this claim is shown by D 115. Disturbance denied by plaintiffs' manager and station contractor. Damage generally denied and disproved by Ex. D 40, showing length of leads when second mile of permanent-way was supplied, and evidence from witnesses on both sides (Johnson, Walker, &c., for plaintiffs; and Warren, Kerr, Murdoch, &c., for Government) that no extra expense occurred with such leads. Every specific damage, such as loss of interest on sleepers, entirely refuted by evidence. Computed by Mr. Anthony; not proved. Even if due to delays by Government this is included in extra percentage charged to represent "extra cost" on all works. No proof advanced by McSharry's statement.
2	Loss sustained through delay in obtaining permanent-way material provided for in contract; also in making junction with main Southern line.	5,812 10 5			
5	Salaries of professional and clerical staff—September 1, 1884, to September 7, 1883.	2,970 8 4			
6	Interest on moneys unduly withheld by Government.	3,543 11 11			
1	CLAIM NO. 6. Extra cost by reason of Government Engineer's delay in setting out culverts, bridges, and other works; and interference of the Government Engineer in culverts, cuttings, and other earthworks.	16,780 4 0			
2	Increase in wages through delay in completion of works.	937 10 0			
1	CLAIM NO. 7. Interest on moneys expended on contract.....	9,332 0 0	10,000 0 0*	.....	Interest charged on all subsequent payments from December 31st, 1884, without regard to whether the money on which interest is charged was then expended or not.
2	Time and expenses of principals and loss by reason of their being occupied in directing the works of this contract.	3,000 0 0			
3	Depreciation in value of plant, through same lying idle after date on which contract should have been finished.	3,000 0 0			
4	By reason of damage done to permanent-way by floods.	5,000 0 0			
Totals .....		.....	20,433 10 11	2,289 3 7	Several false statements entirely disproved by evidence. See Ex. D 5 respecting culverts.  No proof, except McSharry's statement by Murdoch's evidence proves that such an increase is usual at the latter end of works.  This is interest on claims in litigation. Plaintiffs' default that completion of contract was after date, and evidence proves that they were not prevented from tendering unsuccessfully for other work. No damage proved.  Plaintiffs' default that contract was not finished in time, and no particulars of damage proved.  The £2,400 penalty for not completing in time more than covers all expense of damage done by flood, and the damage here claimed is nearly equal to the entire cost of permanent-way laying.

\* NOTE.—The £10,000 here awarded are not allotted to any particular claims, but it is alleged were put in to make up a sufficient sum to pay the plaintiffs' expenses in this suit.

1889.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## RAILWAYS.

(REPORT OF WILLIAM THOW, M.I.M.E., ON CONDITION OF ROLLING STOCK IN NEW SOUTH WALES.)

*Ordered by the Legislative Assembly to be printed, 30 July, 1889.**[Papers laid upon the Table of the Legislative Assembly in accordance with a promise made by the Colonial Treasurer in answer to Question No. 10, 30th July, 1889.]*

## Memo. by The Railway Commissioners.

Office of the Railway Commissioners of New South Wales, Sydney, 30 July, 1889.

THE Railway Commissioners, on finding that the rolling-stock and locomotives were in a very unsatisfactory condition, and that special steps would have to be taken to bring everything up to a proper standard, and also with the view of economical maintenance in the future, that standard plans for stock of all descriptions would have to be adopted, deemed it advisable to obtain an early and full report on the subject generally, and for this purpose Mr. Thow's services were obtained.

Parliament now having called for this Report the Railway Commissioners send it forward, but consider it desirable to state that some of the recommendations made in the paper have not yet been considered by them.

## The Locomotive Engineer, South Australia, to The Railway Commissioners, Sydney.

Gentlemen,

Athenæum Club, Sydney, 20 March, 1889.

On receipt of your memorandum of instructions, dated January 30th last, I commenced the investigation of the questions therein enumerated, and now beg to submit the following report:—

A preliminary inspection of the Eveleigh workshops and the rolling stock at that time undergoing repair in them was at first made in order that a general idea of the matters to be considered might be obtained, and afterwards I proceeded to examine in detail the performances of your engines when engaged in daily duty over those portions of your railways which are most difficult to work. For this purpose I rode on the footplates of engines, both goods and passenger, from Sydney to the Hawkesbury, Katoomba, Bathurst, Newcastle, Goulburn, Harden, and back to Sydney, on different occasions when they were engaged in hauling the ordinary traffic trains.

I saw the engines working under their ordinary conditions, without any of those preparations or efforts to effect maximum results, which frequently destroy the practical and comparative value of special tests, consequently the conclusions at which I have arrived, based, as they are, on work which your engines are doing daily, would not be materially altered by a long acquaintance with the questions involved. I was not so fortunate, during my inspections, as to see the effect of bad weather on the hauling power of the engines, on the steepest grades, but of course that disturbing cause has been taken into account.

When at Newcastle I paid especial attention to the requirements of the coal traffic in the various yards, and consider there is need for powerful engines to conduct it.

## Condition of Rolling Stock.

During my inspections I examined the state of your rolling stock. I found it to be very far from good, or in an efficient state of repair. The waggon stock is particularly bad. The state of the carriages is not good, and many of the locomotives are very greatly in need of repair. This condition of things is due, in a great measure, to the insufficient accommodation and want of machinery which the Department suffered from prior to the removal of the workshops from Redfern to Eveleigh.

Locomotives

## Locomotives.

As a basis on which to rest the whole question of suitable engines for your circumstances, I asked for and obtained, through your office, the limit of static load per axle for locomotives when working fast trains. The opinion of Mr. Cowdery, Engineer for Existing Lines, is as follows:—

“The static load of 14 tons per axle on a well-balanced locomotive is safe. It would, however, be better to reduce this, so as to keep down cost of maintenance of track, which increases considerably with high speed on account of the dynamic effects of the engines, especially at the rail joints, which are on our roads rather weak. If a greater load per axle is required the existing bar fish-plates should be replaced by angle fish-plates, which would increase the strength of track considerably, and also tend to decrease cost of maintenance.”

Thus 14 tons per axle is the starting point for the question, and it seems to me as great a load as your present track should be called upon to sustain. At some future time the permanent way will be, I expect, strengthened, and able to carry safely heavier loads per axle. This important expectation I have allowed to guide me in coming to a decision as to the types of engines to be recommended.

Your present permanent way is not, I regret to say, in perfect order; the joints are unusually numerous and not strong, and the rails are in many places out of form. As a consequence the engines ride very roughly over portions of the road, especially when running at high speeds, by which their wear and tear is unduly increased. Engines out of order necessarily react on the road, and the maintenance of both engines and road becomes more costly than it would be if the permanent-way was placed in efficient condition. As previously stated my inspections have been made during dry weather, but I can readily understand the accuracy of statements made to me in effect that the condition of the road becomes worse in places during the winter months than even now, and that then engines working over it consequently suffer more.

Taking into consideration the heavy character of the work to be done by your engines, the frequency and sharpness—S chains—of the curves on your lines, the comparatively high speeds at which the quickest of your trains must occasionally run, the limit of load per axle as above expressed, and the prospect of your having an improved permanent way at no very distant day, I have arrived at the general conclusion that your lines and traffic require six-wheels coupled engines for goods trains, and that for express passenger trains it is not advisable to employ engines with more than four-coupled wheels.

At the present time it is manifest that the four-wheels coupled engines in your service have got as much work to do as they are fit for, and yet the prospect of increasing express traffic must not be lost sight of. The expected strengthening of the permanent-way will permit, when it takes place, enlarged four-wheels coupled engines to be used. In the meantime it is possible to obtain engines of greater power than those at present in use, and up to the limit which the accepted load of 14 tons per axle imposes.

I am led to this general conclusion mainly on the ground of cost of working. It may seem a platitude to assert that engines with only two wheels coupled work with much less friction than those which have four coupled to the cylinders, or that those with four have much greater freedom in action than others which have six or eight wheels coupled, but I find a great disposition in your service to employ engines with six and eight wheels coupled for duties which can be much more economically executed by simpler machines. The internal friction of locomotives at work rapidly increases with the number of wheels coupled. This is the case even on straight lines, but on curved roads, like many of those in this Colony, the proportion of power thus wasted is greatly increased. Recognizing this fact, it is usual for engineers, when obliged by circumstances, to adopt locomotives with numerous coupled wheels to make every effort to minimize the length of the “rigid” or coupled wheel-base, but here I find it is thought a matter of small importance to couple six wheels together in a rigid base of 15 feet to work over S-chain curves in great numbers. So important is the shortness of “rigid” wheel-base generally considered where curved lines have to be worked that expedients such as flangeless tyres are adopted, and in other cases the coupled wheels are crowded together under the boiler-barrel to the sacrifice of steadiness rather than prolong the wheel-base when rigid.

I am aware it may be contended in support of an opposite view that there are engines on your lines which have six wheels coupled in conjunction with a 15-foot rigid wheel base, and that such engines exhibit no undue wear of tyre-flange, although they are working round the 8-chain curves on the mountain section; but if that be a fact, it does not, in my opinion, prove the non-existence of severe friction and waste of power in such machines; it merely shows that the friction and strains induced find other outlets than through the tyre-flanges. That the friction exists, and that it is measurable by the reduced useful work done per pound of fuel consumed by such engines, and by the cost of their repairs, as compared with such costs and useful duty of other engines which have shorter wheel-bases, cannot be doubted. The Locomotive Department does not possess amongst its useful appliances a steam indicator, nor have any diagrams been taken from the cylinders of its engines to show the power exerted in them, as contrasted with the useful effect on the trains hauled. Had such data been at hand, or time at my disposal to secure it, the greater waste of power in the form of friction and loss, per pound of fuel consumed, would be demonstrated by the diagrams for the long wheel-base engines, when working up grade and round sharp curves.

The aim of successful locomotive working, anywhere, must be to haul 100 tons over 1 mile at the least possible cost, therefore the minimization of internal friction in engines is a very important matter. It means economy of fuel and less expenditure for repairs, and these increments of daily saving, multiplied by the year's operations in so large a concern as yours, represent so important a sum as to deserve attention even here, although coal is cheap.

The question of speed has also a direct influence on this matter, hence it is more necessary to limit the number of coupled wheels in engines for quick passenger traffic than in those for slower speeds or goods traffic.

While on this subject of economy in working, I will mention another disposition in the practice of your Locomotive Department which I am not able to endorse, viz., the employment of steel fire-box plates, and steel or iron tubes. The experience which I have had of such materials during the last six and

a half years, which were supplied in sixteen engines by a first class American firm, has proved absolutely their great inferiority for economic purposes as compared with copper plates and brass tubes in the construction of locomotive boilers. And it has been as thoroughly proved that the substitution of copper plates and brass tubes in the same boilers has made them very much better steam producers, thereby increasing the practical power of the engines, enabling them to do more work. I strongly recommend the abandonment of steel for such purposes.

### Types of Locomotives.

Having shown the basis of the recommendations to be made, I will now refer to the various types of engines in your service.

As to what constitutes a type may be matter for expression of opinion. If each difference in main dimensions amongst rolling stock creates a type, then you have forty-two types of locomotives on your system, but for every practical purpose the classification shown on the published Table No. 3, dated January 6th, 1888, and signed "W. Scott," is useful. By it the locomotive stock is divided into twenty-eight distinct types, and each placed under a distinguishing class number, with their leading dimensions, particulars, and descriptions added.

It will be convenient to refer to that table in connection with this portion of my report.

- (a) I recommend that the following classes be abandoned without delay, broken up or sold:—1<sup>N</sup>, 5, 6<sup>N</sup>, 10, 13, 20<sup>N</sup>, and 23<sup>N</sup>, on account of their age, their unsuitability, or the smallness of the numbers in the classes they represent. There are fifteen engines in all.
- (b) That the following classes be not repeated, and that as little money be spent in repairing them as possible; that they be allowed to wear themselves out, along with any stores belonging to them in stock, of a special character, then abandoned, altered, or sold, as opportunity arises:—14, 23, 29, 36, 60, 67, 105, 127, 131, 285, 294, and 304 classes, numbering eighty-seven engines in all.
- (c) In addition to the above, it is suggested that the following classes also be not repeated, but that they be altered into more useful engines, in a manner to be described below, viz., classes 17, 48, 79, 351, and 373, of which there are one hundred and thirty-two engines in all.
- (d) Thus there remain classes 93, 153, 205, and 255, or one hundred and ninety-five engines, which I consider may be continued as adopted types, if found necessary, or repeated, either in their present proportions or slightly modified, so as to meet, in the best way, the features of your lines and growing traffic. The modifications suggested will be described.

Before proceeding to detail the alterations to the existing engines referred to above in Clauses *c* and *d*, which appear to me advisable, I beg to mention that in almost all your engines there is, in my opinion, a serious deficiency of heating surface with which to work economically in the matter of fuel consumption. In proof of this opinion I find that your engines are working with very contracted blast orifices; in some cases they are extremely small, showing that their boilers require to be forced. I have therefore to recommend, that in the renewal of boilers for engines belonging to the classes mentioned in above clauses *c* and *d*, or in the designs for any new engines, efforts be made to give greater heating surfaces in proportion to their tractive forces. This can be done in most cases by using tubes  $1\frac{1}{2}$  inches instead of 2 inches external diameter, and by pitching them correspondingly close. The boiler barrels, generally speaking, are sufficiently large to do so. The same effort should be made in cases where the renewal of both tube-plates is contemplated. I am convinced considerable economy will result therefrom. It seems convenient for you to purchase coal which is not of the best quality, hence, much more liberal heating surfaces are required for boilers using it than necessary, when they are fed with the best steam coal only. It should be borne in mind, that because an engine gets sufficient steam to move along, and does not stick on the track for want of it, that is no proof that the engine has economically speaking sufficient heating surface. An engine may burn twice over her economic allowance.

The alterations which I have to suggest for the engines mentioned in clause *c* are as follows:—

That the 34 engines in classes 17 and 48, or as many of them as may be thought necessary—17 class being the best first to operate on—be converted into tank engines for the Newcastle coal traffic. That they be supplied with side tanks, to hold 1,500 gallons or more, in conjunction with a combined coal-bunker and tank of convenient size behind the firebox. That the main frames be extended backwards to carry this tank and coal-bunker, and to admit of a four-wheeled swing-link bogie, pinned under the driver's footplate. That the main frames be also extended forwards to admit a two-wheeled swing-link pony truck (American type) in front of the cylinders. This arrangement will give the engines all the requisite adhesive weight to balance the effort of their cylinders, as well as guidance, great steadiness on the road, and flexibility on your sharpest curves. When new boilers are given to them, the heating surface for 17 class should be (say) 1,400 square feet in a strongly built boiler to work at a pressure of 140 lb. per square inch; and for 48 class the heating surface should be (say) 1,500 square feet in a less strongly built boiler, to work at a pressure of 120 lb. per square inch.

The alterations which I recommend for the suburban tank engines of 351 class is to remove their existing cylinders, which are 15 inches in diameter, and substitute for them cylinders of 16 inches diameter. The existing heating surface, although small, will sustain this alteration. These engines are not well proportioned, but the change proposed will make them much more suitable for their work than they are at present.

With regard to the engines of 373 class, known as the "Vulcan"—a type which has been more or less criticised—

I recommend that their cylinders, which are 19 inches in diameter, be removed, and cylinders of 18 inches diameter substituted. An anxiety to provide sufficient power for your growing traffic has over  
cylindere

cylindered these engines. The heating surface of their boilers and the weight available for adhesion, are nearly correct for cylinders of 18 diameter by 26 inches stroke. I anticipate that the alteration proposed—if it is carefully carried out—will make much more useful machines of them than they are at present. In designing the new cylinders great care should be exercised to give the exhaust passages ample area and easy direction. The existing exhaust passages are cramped and crooked, and must throttle, to a very considerable extent, the escape of the exhaust steam. The construction of the slide valves and valve spindles is not good. I recommend the adoption of the ordinary design of valve buckle, with arrangement of steam chest to permit of easy removal. More efficient means of firmly bracing the main frames together, in the neighbourhood of the cylinders, should be devised, so as to resist effectually the bending effort of the cylinders. The springs under the engines are approximately 30 per cent. too strong, and should be proportioned to the loads imposed on them.

The faulty construction of these engines illustrates very fairly the unfortunate consequences which purchasers must expect to suffer by placing their orders in the hands of builders who are not the best and most experienced, unless complete drawings and specifications are supplied from which they cannot depart.

With regard to the engines mentioned in clause *d*, I recommend as follows:—

Class 93, of which there are seventy-two in your service, is one of the best designed and proportioned engines in it. The only alteration I have to suggest affects the heating surface. When new boilers are required for these engines, or if any new engines of the same type are ordered, it will improve the adhesive weight of the engine—which is scarcely sufficient—if the boilers are made heavier and suitable for a working pressure of 140 lb. to the square inch, and if the heating surface is increased to, say, 1,430 square feet. This surface can be obtained by using, say, 200 tubes  $1\frac{1}{2}$  inches outside diameter, without enlarging the diameter of the existing boiler barrel.

Class 158, of which there are six in the service, is, I think, your best suburban engine. Its cylinders, wheels, and boiler are in fair proportion, but the weight on the coupled wheels is excessive, and has been complained of as too severe on the permanent-way.

This defect could be cured by extending the main frames backwards, so as to carry a combined tank and coal bunker, and permit the addition of a single swing link pony truck (American type) behind the coupled wheels. I do not urge this alteration as an absolute necessity, but merely as the best remedy for the complaints above alluded to.

Class 205.—There are seventy engines in it, known as the English Mogul Goods. They are employed largely on the Mountain Section, and generally where heavy work is done. They are very good, well-built engines, but I consider them deficient in heating surface. They would work much more economically with enlarged boilers, and by the additional weight thus imposed on their coupled wheels, their present tendency to slip, in wet weather, would be advantageously reduced. When new boilers are required for these engines, the heating surface should be increased, if possible, to 1,450 or more square feet, with 140 lb. per square inch as a working pressure. The weight for adhesion should be increased from the present 36 tons to 39 or 40 tons. It is complained of these engines that their valves have too much lead, but that defect, where it exists, is easily and inexpensively remedied by reducing the angular advance of the eccentrics.

It is also said, that the coupled springs cant over. This defect can also be remedied, at a very moderate cost, by substituting for the present top plate ends, and links (which are arranged as shown at A—with pins through the links and plate) solid ends and claw links, to embrace the whole width of the top plate (see B.) The leverage given by the wide claw will prevent canting.

Should it be decided to obtain more of these engines, I suggest that the pony truck in the new ones be made with a much shorter radial arm, and of the swing-link pattern. For your ordinary heavy goods traffic I doubt if any better engine, when altered as above indicated, can be obtained.

Class 255 contains forty-seven engines. All have inside cylinders and four coupled wheels, which are 6 ft. 1 in. diameter. Forty-one of these engines have cylinders 18 in.  $\times$  26 in., and the remaining six, which are the oldest, have cylinders 17 in.  $\times$  26 in. The last seventeen engines of this type supplied have Joy's patent valve motion, and these are, I think, the most useful of the class. Thus there are, strictly speaking, three types in this class, and made by different firms.

I hold the opinion that coupled wheels so large as these (73 inches) are not advisable for your lines, and will therefore recommend for your express traffic a similar engine with smaller wheels, larger boiler, and consequently increased power.

I have now to deal with that part of my instructions which requires me to report upon the types of engines to be adopted in the future for the following services, viz. :—

- 1st. Express passenger.
- 2nd. Heavy mail and express stock trains.
- 3rd. Tank, suburban engine.
- 4th. Ordinary goods engine.
- 5th. Heavy coal and shunting engine.

This part of the inquiry has been, according to instructions given, considered in conjunction with Mr. Midelton and Mr. Neale. I am not able to endorse the views held by the former gentleman as to the best engines, taking your circumstances fully into account, for any of these services. And, in consequence of Mr. Neale having arrived so very recently in the Colony, he has not had sufficient time to make himself acquainted with the requirements of the service, or the duties to be performed by such engines. Although glad to discuss the points involved, and have the benefit of Messrs. Midelton and Neale's views thereon, I am only able to place before you the following recommendations as results personally arrived at, after a patient and critical study of the whole question.

*First.*—With regard to an express engine. As previously stated, a four-wheels-coupled engine is in my opinion, better suited for the speeds and conditions of your service than a six-wheels-coupled machine. And having regard to the limitation of load per axle by your engineer, viz., 14 tons, the weight for adhesion in engines with four coupled wheels becomes 28 tons. The question to be dealt with therefore is, the best means under your circumstances of utilizing that amount of adhesive weight.

As already stated, you have in the Joy's motion express engines of 255 Class excellent machines, and I think it wise to so modify them as to secure duplication of their parts as far as possible, and at the same time take full advantage of the limit of weight per axle.

The sooner a stronger permanent way allows the introduction of machines of greater weight and power the easier it will be to conduct satisfactorily a growing traffic, but in the meantime the power of the Joy's motion engines can be increased in any repetition of the design, by reducing the diameter of the coupled wheels to 5 ft. 6½ in., and by enlarging the boiler so as to contain at least 1,300 square feet of heating surface. The additional weight obtainable from an enlarged boiler is required to increase the total adhesive weight of the engine from 25¼ tons to 27½ or 28 tons.

This proposed engine would have a power about 10 per cent. in excess of your present express locomotive. It would climb the grades with greater ease, and run down them with sufficient freedom. But the great advantage to be obtained is that this new engine would duplicate with existing engines of 255 Class so far as concerns cylinders, pistons, valve motion, connecting and coupling rods, axles, axle-boxes, bogie, brake-gearing, main framing, and many other important and unimportant details. Even the tyres for the coupled wheels should be made duplicates of those used for the Vulcan engines, Class 373. Thus I do not suggest a new type for express passenger work at present.

*Second.*—For the heavy mail and fast stock service I recommend a new engine, built on lines very similar to those of 205 Class. This engine to have cylinders 19 inches diameter by 26 inches stroke, with six coupled wheels 4 feet 6 inches diameter, and arranged in a rigid wheel base of 11 or 11½ feet. The front end to be carried on a single-wheeled swing-link pony truck (American type). A large strong boiler will be required for this engine, in order that it may work with economy. It should be pressed to 140 lb. per square inch working pressure, and have a heating surface of about 1,550 square feet—*more, if convenient*. The total load arranged for adhesion should be at least 40 tons. These engines would exert the same power, practically, as your present goods engines of 205 Class; but they would be more lively, and freer to run at speeds required for heavy mail and stock trains, in consequence of their enlarged wheels. Many of the details used in 205 Class can be employed in these new engines, if makers are so instructed.

*Third.*—Respecting a suburban tank engine. Your suburban traffic has become sufficiently heavy to require either more powerful engines to deal with it, or the alternative of shorter and more frequent trains. If the latter method of meeting the case is possible, I recommend that your present engine—Class 158—be repeated, with the addition of a swing-link single pony truck behind, in order to remove the objection felt by the Permanent Way Branch to the loads per coupled axle imposed by this engine on the track. The strengthening of the track would of course make the pony truck less requisite, but I think in any case for engines which run in both directions a flexible guiding wheel is an excellent provision. On the other hand, if it is not possible, with the limited number of lines between Sydney and Homebush, to run shorter trains, then a more powerful and active suburban engine is a necessity. This can be provided in two ways, according to the increased power required. A four-wheels-coupled engine similar in design to 158 Class, and having about 13 per cent. more power, can be arranged within the limit of load per axle. It would have cylinders 17 inches diameter. The wheels, tyres, axles, axle-boxes, and minor details to be duplicates of 158 Class, but the front bogie should, if convenient, be made of the swing-link type, and a single pony truck placed under the coal-bunker. The boiler of this engine should have 1,100 square feet of heating surface, and the load resting on the rails from the coupled wheels should be about 27½ tons. If 13 per cent. of increase in power is not sufficient to meet future requirements, then engines having six wheels coupled must be adopted, so as to keep within the limit of load per axle, and good tank engines with larger cylinders can be readily arranged. In that case I recommend inside cylinders 18 in. x 24 in., with six coupled wheels 4 feet 6 inches in diameter. These wheels to be arranged under the boiler barrel in a rigid base not more than 11½ feet long. A single swing link pony truck to be arranged in front of the cylinders, and a four-wheeled swing link bogie behind the fire-box. This machine will exert 40 per cent. more power than your present suburban engines of 158 class, it will be more lively in action with heavy loads, and easy on the road. The boiler should contain about 1,350 square feet of heating surface, and the

the adhesive weight from the coupled wheels should be 33 tons. The tank capacity may be 1,200 or 1,500 gallons, with a corresponding coal space. The grate area should be  $17\frac{1}{2}$  or 18 square feet.

*Fourth.*—For ordinary goods service I recommend repetition of 205 class, but modified (so as better to meet your circumstances), as described on page 3, viz.:—Enlarged boiler, a swing link American pony truck instead of the present truck, and slight alterations in the spring links and position of eccentrics.

*Fifth.*—For heavy coal and shunting purposes I have already recommended (see page 3) the conversion of classes 17 and 48, in order to remove them from the list of comparatively useless into that of more useful engines. If, however, it is not convenient to effect this change, and new engines be preferred, then I recommend that engines which shall duplicate, in all essentials, with your existing 93 class be obtained, but arranged as side tank engines with bogies at ends, in a manner similar to that described for 17 and 48 class on page 3, and also for the new suburban tank engine recommended above. As before stated, the engines of class 93 have done, and are doing, excellent service, and to repeat them in this modified form of tank engines, will, I feel assured, give satisfaction. Their boilers should contain 1,430 square feet of heating surface, and the incline of the cylinders, which is at present 1 in  $9\frac{1}{2}$ , should be increased to 1 in  $8\frac{1}{2}$ , to permit of removing the front leading axle 12 inches or so nearer to the driving axle, thus shortening the rigid wheel base to 10 ft. 3 in. or thereabouts, but chiefly in order to get sufficient weight on the wheels of the front pony.

### Generally.

In arranging the single wheeled pony trucks recommended, special care should be taken to adjust their radial arms in length, so that in moving round curves of 8 chains radius, the flange of the pony wheel will run against the inner rail of the curve, and travel parallel with it, not in an angular direction to it.

*Tenders.*—I recommend that they be made no bigger than the distance of your suitable water supplies necessitate, so that the force of the engines which should be devoted to hauling paying loads is not absorbed in dragging greater quantities of water after them than absolutely required. And further, that the tenders be carried on three axles, two of which may be arranged, if necessary, in a bogie behind. This makes a very good arrangement, and gives all the flexibility to tenders which your sharpest curves can require.

This review of your existing locomotives, and my recommendations for future types may be thus summarized:—

- A—That 15 engines be broken up or sold at once.
- B—That 87 engines be allowed to wear themselves out or sold.
- C—That 132 engines be altered into more useful machines, but not repeated.
- D—That 195 engines contained in classes 93, 158, 205, and 255, be adopted as standard machines, and slightly modified as opportunity occurs.
- E—That the future express engine be 255 class, modified.
- F—That the future mail and express stock engine be a new type similar to class 205.
- G—That the future tank suburban engine be either a new and more powerful type, or 158 class, modified.
- H—That the future ordinary goods engine be 205 class, modified.
- J—That the future heavy coal and shunting engine be either the existing 17 and 48 classes, converted into tank engines, or 93 class repeated as a tank engine.

### Carriages—ordinary.

Exclusive of the state, dining, sleeping carriages, and composite brake vans, there are 580 ordinary passenger vehicles in the service, and they consist of twenty-two different types, thus divided:—

Second class, 7 types	...	...	...	...	...	...	290	vehicles.
First " 9	"	"	"	"	"	"	157	"
Composites, 6	"	"	"	"	"	"	133	"

The different types of each division are as follows:—

#### *Second Class.*

- A—43 old open, 3rd class, converted.
- B—156 ordinary short 4-wheeled.
- C—7 six-wheeled radial.
- D—37 American 8-wheeled Bogie.
- E—17 original Redfern "
- F—27 improved " "
- G—3 Cleminson altered 8-wheeled Bogie.

#### *First Class.*

- H—30 ordinary short 4-wheeled.
- J—6 Redfern "
- K—6 eight-wheeled radial "
- L—15 6-wheeled "
- M—4 saloon 8-wheeled Bogie.
- N—37 American 8-wheeled Bogie.
- O—31 original Redfern 8-wheeled Bogie.
- P—25 improved " "
- Q—3 Cleminson altered " "

*Composites*

*Composites.*

r	—46 ordinary short 4-wheeled.
s	—18 six-wheeled radial.
r	—8 Ashbury 12-wheeled Bogie.
u	—25 American 8 " "
v	—12 original Redfern wheeled Bogie.
w	—24 improved " "

Respecting the above stock, I recommend that the 43 old open converted "thirds," classified A, be condemned at once as quite unfit for passenger use, removed out of service, broken up or sold.

That the 163 "seconds," classified B, C, the 55 "firsts," classified H, K, L, M, and the 64 "composites" classified E and S, be also condemned, on account of their ages, costliness of maintenance, the extreme shortness of their compartments, lowness of roofs, and general discomfort. That they be removed out of service, broken up or otherwise disposed of, so soon as new vehicles of improved types can be substituted. It is thus proposed to remove as early as convenient 325 vehicles from the service.

The remaining carriages are 84 "seconds," classified D, E, F, G; 102 "firsts," classified J, N, O, P, Q; and 69 "composites," classified R, U, V, and W, or a total in all of 255 vehicles. These carriages are the best of the stock now under consideration, and the only portion of it worth spending money upon for maintenance. Even some of them afford extremely poor accommodation.

I am moreover of opinion that none of the types herein recommended for maintenance should be repeated, and suggest that your future carriage stock be built from designs differing widely from the existing types, so as to give reasonable accommodation and comfort to travellers.

I am conscious that the above recommendations necessarily involve a very large expenditure, but I think it is quite time that the line of action which the Carriage Branch is to follow in the future be chosen and undeviatingly worked to, so that the much more costly practice of patching up time after time comparatively worthless stock—which can never give satisfaction—may be discontinued.

*Mail Vans.*

The stock of mail or post office vans consists of 24 vehicles, and although plain and simple in their fittings, they appear to me to be sufficiently suitable to be repeated if necessary.

*Passenger Brakes.*

There are 166 passenger brake-vans in the service, and with few exceptions they are built as composites for second-class passenger accommodation. These vehicles constitute six distinct types, as follows:—

- (a) 2 eight-wheeled bogie, mail and brake.
- (b) 30 do do second and brake.
- (c) 93 six-wheeled rigid, do
- (d) 17 new four-wheeled rigid, do
- (e) 12 old do do do
- (f) 12 eight-wheeled radial.

The two combined mail and brake vans classified (a) are good useful vans for the Melbourne express and mail traffic. The 30 long and 110 short composite second-class and brake, classified (b), (c), (d), are suitable for the mountain and suburban work. These five types, or any of them, may, in my opinion, be repeated when it becomes necessary to increase this section of the stock. The remaining types, classified (e) and (f), should be abandoned as early as convenient. The twelve old four-wheeled vans especially are not worth further expense to maintain.

*Sleeping-cars.*

There are seventeen sleeping-cars, and they form two classes. Nos. 8 and 9 differ from the others. They were imported from America five years ago, and are of the class known in the States as drawing-room cars. They are carried on six-wheeled bogies instead of four, are more commodious than those of the ordinary type, but their weight is correspondingly greater. They accommodate twenty passengers, and weigh per passenger when empty nearly 26½ cwt. The other fifteen cars carry the same number, and although not so convenient, they weigh per passenger about 18 cwt., a difference of about 47 per cent. of dead weight per fare. This matter is so important, where heavy inclines are worked, as to deserve keen attention when designing future cars. The original sleepers imported from America ten and twelve years ago are still in much better order than the others subsequently constructed in the Colony to the same design. This result is important, and is greatly due to the inferiority and unseasoned condition of the timber used in the colonial cars as compared with the American vehicles.

*Miscellaneous Stock.*

There are 275 miscellaneous vehicles classed amongst the passenger stock, viz. :—

- 152 horse-boxes,
- 73 carriage-trucks,
- 7 prison-vans,
- 31 workmen's vans, and
- 12 hearses.

These vehicles are of the usual designs, some of them in need of repair, but fairly well built and suitable for repetition (so far as the bodies are concerned) when more of them are required, but they should have iron or steel under-frames.

The State carriages, of which there are two, and one dining-car, are vehicles for special and not for public service; for that reason I do not think they come within the limits of my inquiry at this stage.

Merchandise

### Merchandise Stock.

There are 8,940 vehicles for merchandise traffic in this service.

Neglecting variations of minor importance (although very numerous) in their dimensions and styles of construction, and arranging them in accordance with the main features by which they are recognized in the service, I find there are twenty-three distinct types.

The bulk of the waggon stock is already classified under the distinguishing letters A, B, C, D, E, F, G, H, and I. Each letter represents a type differing widely in style and purpose from the others, but these and the other types, which constitute the whole stock, contain many varieties not described or noticed in the books of the Department. It would be a very protracted task to ascertain the extent and nature of such variations, and I do not think it essential to this inquiry, beyond pointing out the importance of uniformity, since each variation imposes a tax on the economic working of the whole.

The different types are as follows:—

A—236 shallow waggons, 6" curb.
B—232 deep do 30" sides.
C—404 covered vans, various.
D—5,505 medium and deep waggons.
E—370 swing bolster timber trucks.
F—11 long Cleminson waggons, shallow.
G—354 eight-wheeled bogie waggons.
H—201 dump-cars.
I—93 "Brown's" waggons.
J—300 ballast waggons, Cowdery coupling.
K—60 travelling water-tanks, various.
L—46 powder-vans, various.
M—461 sheep-vans, ordinary.
N—2 do special bogie.
O—418 cattle-vans, ordinary.
P—1 do special bogie.
Q—48 dead-meat vans, various.
R—15 combination trucks.
S—7 accident vans.
T—2 ten-ton accident cranes.
U—1 travelling gas-supply van.
V—1 do do reservoir.
W—172 goods brake-vans.

The condition of the merchandise stock on your lines, with the exception of the special vehicles classified s, t, u, v, and w, is, for the greater part, almost as bad as it is possible for rolling stock to be in, and I am not able to recommend you to continue the repetition of the present designs in any case.

This unsatisfactory result has been mainly brought about by using timbers insufficiently seasoned or affected by dry rot, in these vehicles, and also to some extent through the want of paint after manufacture. The camber or hogging of the under-frames is a very common feature, and in some instances most marked, reaching as much as 3¼ inches in short 15-foot waggons, a consequence of the above defects.

The cause for unseasoned timber in these vehicles is probably due to the following:—First, the Department itself has never kept any stock of timber seasoned and ready for use; and secondly, orders for new vehicles in the past have been given spasmodically, and to the lowest tenderers, without consideration as to whether they were possessed of a sufficient stock of seasoned timber to carry out the work properly. These remarks apply with equal force to the timbers in some of your carriages.

To avoid repetition of these results in the future, I recommend the employment of iron or steel, instead of timber, in the under-frames of all your passenger and merchandise stock, and also the adding of a sufficient quantity of suitable timber to the materials kept in store, in order that it may season; and to avoid perpetuation of the almost endless varieties now existing amongst the carriages and waggons on your lines, I suggest that new designs should be made for vehicles of the future, and rigidly followed, as standard types.

I enclose herewith three tracings showing an 8-tons open waggon, a carriage under-frame, and a carriage bogie, built of iron bars, and adopted as standards for the 5' 3" gauge of the South Australian Railways. They give satisfaction, and I think the arrangements observed to secure lightness and strength worth attention.

The following is my valuation of your existing engines, carriages, waggons, and other vehicles, for passenger and goods traffic on the railways:—

429 Locomotives ... ..	£736,750
1,065 Passenger vehicles ... ..	335,780
8,940 Merchandise do ... ..	700,150
Total ... ..	£1,822,680*

Although the matters dealt with in the above report are presented in a condensed form, I believe that features of moment have not been overlooked in arriving at the opinions expressed. Upon so wide a question further time might be occupied by a more exhaustive investigation of details than I have been able to undertake within the period at disposal, but I feel assured extended inquiry would lead practically to the same conclusions.

Workshops.

\* The valuation as per the Report of the Commissioner for Railways for 1887 is £3,256,421.

### Workshops.

I examined the machinery in the workshops at Sydney, Newcastle, Bathurst, Penrith and Goulburn. I do not consider it in excess of your requirements, although, so far as that for metal working is concerned, it is quite sufficient for many years to come. There is, however, a deficiency of woodworking machinery, and a few additions, not many, may be required to that section.

I recommend a reduction in the number of machines which exist at present in the steam sheds at Penrith, Bathurst, and Goulburn; that they be transferred to Eveleigh where they can be put to more constant and profitable use, and that the heavy repairs to engines be discontinued at such stations. This will result in economy.

The workshops at Newcastle are very far from convenient. They are numerous, small, disjointed buildings, difficult to work without an undue expenditure of engine and boiler power.

The Eveleigh shops, in the main, are suitable, although it is to be regretted that plans were not adopted to avoid the introduction of internal traversers with their deep inconvenient pits; especially in the carriage and waggon works. Such expedients are only justified where areas available for shops are limited, or so shaped as to render their employment desirable. Overhead cranes without traversers and without the sacrifice of the valuable shop-room which they necessitate, answer every purpose where they are properly arranged, so as to permit of engines and carriages being lifted bodily, both ends at once, instead of, as at Eveleigh, only one end at a time.

Other departures from modern practice and best arrangements, in the Eveleigh works, might be mentioned, but as they cannot be remedied now, it is sufficient to point out that they entail some delay and expense in the execution of work not felt in well arranged establishments.

### Timber Drying-sheds.

I have considered this question, and recommend that an open shed, say, 200 feet long by 65 feet wide be erected where shown on the attached plan, viz., between the carriage-shops and the stores-sheds at Eveleigh. If so placed it can be conveniently approached either by road or rail. It has been suggested for this purpose to utilize the existing retaining wall which is built at *a a* on plan, below the public street, but for timber sheds solid walls are unsuitable, they prevent the free circulation of air, and so interfere with the seasoning of the timber, and beside this objection there will be less risk of accidental fire, if the shed is placed at the distance suggested from the public street.

### Axle-boxes.

Samples of the numerous and various patterns of carriage and waggon axle-boxes have been examined. I do not consider any of them good enough for oil-boxes on your stock. They are poor in design for the most part; but the principal cause of so much oil being wasted is want of efficient fitting between the pieces of the boxes. The joint between the top and bottom parts of an oil-box should be a machine fit; here they are rough surfaces, as they came from the moulding shop.

I enclose a tracing of a carriage and waggon axle-box which I have found to give excellent results in South Australia. It is a little expensive to manufacture as compared with those in use here, but it very soon pays for its cost by economy in consumption of oil and maintenance.

### Brown's Waggon.

I am of opinion that the plan which is illustrated by the altered underframe, No. 39, Class I, exhibited in the new paint shop at Eveleigh for strengthening these vehicles so as to permit the attachment of side buffers and the ordinary system of draw gear will be found efficient as an alteration.

The cost of such work, for materials and labour, will probably amount to £20 or £22 per vehicle, if so much of the existing drawbars is utilized as may be possible.

Very little aid is obtainable in this case from machine labour, hence its costliness.

### Cowdery Coupling.

I have examined many waggons fitted with this apparatus, and conclude it is not an appliance of sufficient merit to warrant adoption on your railways. As a means for coupling vehicles together it is less reliable and much more expensive to make and to maintain than the ordinary hook and chain, and, as a means for the prevention of accidents to employes, it is too uncertain and imperfect in its action to secure that end.

I find it has been removed from about 130 waggons of the original 400 to which it was applied, and consigned as useless to the scrap heap. I concur in the opinion which led to this action, namely, that expediency and safe working demand its entire removal at an early date from the remainder of the vehicles to which it is attached.

### Tram Cars.

My recommendations on this subject were forwarded to you on the 2nd instant.

I have the honor to be,  
Gentlemen,

Your most obedient servant,

WILLIAM THOW, M.I.M.E.,  
Locomotive Engineer, South Australian Railways.

RAILWAYS.

(REPORT OF MR. J. ANGUS, C.E., ON THE CONDITION OF PERMANENT-WAY AND WORKS.)

---

*Ordered by the Legislative Assembly to be printed, 13 August, 1889.*

---

Sydney, 29th April, 1889.

NEW SOUTH WALES RAILWAYS.

REPORT on the condition of Permanent Way and Works, more especially the portions laid with iron rails.

Gentlemen,

In accordance with your instructions I beg to inform you that I have examined the following lines:—

**Sydney to Granville Junction**—Length, double line, 12 miles 15 chains; 1 mile 5 chains of four lines of rails.

*Rails.*—This line was originally laid with 75-lb. double-headed iron rails.

It has been relaid with steel rails, with the exception of 3 miles 23 chains 93 links.

From the various dates on the steel rails I find they commenced to exchange iron rails for steel in 1880.

It would have been advisable to entirely relay these portions with new sleepers, chairs, and other materials instead of exchanging rails only.

It is a bad system to turn new steel into old chairs and sleepers, except in such places as through stations, where owing to breaks the sleepers and chairs will wear out two or more sets of steel rails.

Irrespective of the principle being bad, it is not economical maintenance, as running lines, especially passenger lines, require good second hand sleepers putting in. The present system requires new ones to be used; a better system would be to relay as much road per annum as would provide materials for repairs. By doing this the lines would be kept in a high class state. Materials are ordered to relay the down line with bull-headed steel rails and 40-lb. chairs.

*Sleepers.*—The sleepers on this length are better than on other sections, and have been well looked after. There are about 3,000 defective ones in the road, but I should estimate that 2,000 of those would be suitable for repairs.

*Ballast.*—Very inferior quality.

*Fencing.*—The fencing is in a defective state, and about 6 miles requires renewing.

*Bridges.*—In fair order. Ironwork to be painted.

*Level and Oct. Gates.*—In fair order.

*Stations.*—Buildings in fair order, except small repairs and painting. Sanitary arrangements bad.

*Loading Gauges* require adjusting.

*Materials in Stock.*—Sleepers, nil; 20 iron rails, 38 steel rails; fish-plate bolts and spikes, nil.

---

**Main Line—Granville Junction to Picton**—Double line for 60 chains, single line for 39 miles.

*Rails.*—The portion of double line, from 13 miles 20 chains to 14 miles, is laid with double-headed iron and steel. The single line, from 14 miles to 53 miles, is principally iron, but steel rails have been turned into the old chairs and sleepers for a length of 12 miles 37 chains. There is also a length of 440 yards at 21 miles 43 chains laid with re-rolled iron rails, dated 1885. The steel rails are double-headed, and the dates vary from 1881 to 1887. The plan of turning new rails into old chairs and sleepers is unadvisable.

*Sleepers.*—The sleepers, although chair-worn, are in fairly good condition. It will, however, require about 6,000 new sleepers for repairs.

*Relaying.*—The iron rails are in fair condition for their age, but to provide second-hand rails and other material for repairs, I would advise 4 miles per annum of relaying to be executed.

*Ballast.*—Inferior in quality, and should be renewed.

*Fencing.*—One half requires renewing, as the bulk of the posts are rotten.

*Bridges.*—In fair order.

*Level and Occt. Gates.*—In fair order.

*Stations.*—In fair order (except in sanitary arrangements).

*Loading Gauges.*—Require repairs and adjusting.

*Materials in hand for repairs.*—Sleepers, nil; steel rails, nil; iron rails, 200. A few small materials in hand, but insufficient for repairs.

**Main Line—Granville Junction to Springwood—Length, 21 miles 20 chains double; 13 miles 41 chains single—Total length, 34 miles 60 chains.**

*Rails.*—The down line was laid with double-headed iron rails, and T faced rails over bridges. But a large number of steel rails of a similar section have been turned in for a length of 18 miles 77 chains 41 links.

The up line was laid with T iron rails, but steel and hydra rails have been exchanged for a length of 17 miles 75 chains, hydra rails and steel sleepers being laid for 1 mile 65 chains 19 links.

The iron rails, although not worn out, are becoming defective, and I would advise 5 miles of the worst portion to be relaid at once, which will provide materials for repairs.

*Hydra rails.*—This class of road should be taken out at once. It is bad in every respect.

*Sleepers.*—A large quantity are defective and I estimate that 6,000 sleepers will be required to exchange them.

*Ballast.*—Inferior quality, requires renewing.

*Fencing.*—10 per cent. requires renewing.

*Bridges.*—Generally in fair order.

*Stations.*—In fair order (some slight repairs required and sanitary arrangements improved).

*Level and Occt. Gates.*—In fair condition.

*Loading Gauges.*—Require repairs and adjusting.

*Material in hand for repairs.*—Nil; short in every respect.

**Eveleigh Junction to Kiama—Length, 60 miles 50 chains single line; double, 8 miles 15 chains—Total length, 68 miles 65 chains.**

*Rails.*—In fair order.

*Sleepers.*—In fair order, 1,000 required.

*Ballast.*—Inferior in quality.

*Fencing.*—In fair order.

*Bridges.*—In fair order.

*Level and Occt. Gates.*—In fair order.

*Materials in hand for repairs.*—No sleepers; a few rails in stock; small materials, nil.

**Main Line—Picton to Goulburn—Length, 81 miles 20 chains.**

*Rails.*—This portion of line is laid with 70-lb. T-headed iron rails; but I find that in course of repairs steel rails of a similar section have been used.

These rails have not been laid down in continuous lengths, but mixed with the iron—a very bad system, and should not be allowed.

The rails are showing hard wear, especially in the cuttings, where, owing to insufficient ballast under the sleepers, I found many crushed rails.

This section is not in good condition as regards labour.

It will be necessary to relay this line at the rate of 6 miles per annum in order to put the road in satisfactory condition, and to provide materials for repairs.

*Sleepers.*—Large number bad; 12,000 required for renewals, unless the specified quantity of relaying is executed at an early date.

*Ballast.*—Inferior quality.

*Fencing.*—25 per cent. requires renewing.

*Bridges.*—In fair order.

*Level and Occt. Gates.*—In fair order.

*Stations.*—Generally in fair order (some require painting and slight repairs).

*Loading Gauges.*—Require repairs and adjusting.

*Materials in Stock.*—Sleepers, 20; steel rails, 15; iron rails, nil; small materials, nil.

**Main Line—Goulburn to Bowring—Length, 3 miles 36 chains double line; 56 miles 44 chains single—Total length, 60 miles.**

*Rails.*—This division is laid with 70 lb. T-headed iron rails, mixed with steel rails, which have been turned in during repairs, not in continuous lengths; but wherever an iron rail was found defective a steel rail has been put in.

I estimate that 5 miles per annum be relaid to put the road in a satisfactory condition and to provide materials for repairs.

*Sleepers.*—10,000 sleepers are required for repairs.

*Ballast.*—Inferior quality.

*Fencing.*—25 per cent. requires renewing.

*Bridges.*

*Bridges.*—In fair condition.

*Level and Occt. Gates.*—In fair order (except slight repairs and painting).

*Loading Gauges.*—Require adjusting.

*Materials in Stock.*—All kinds, short, barely sufficient for repairs.

---

### Main Line—Bowning to Cootamundra—Length, 59 miles.

*Rails.*—Similar rails are used here as on the last section, but the bad system of mixing steel rails with iron is in operation generally.

The rails show the same wear as on the previous lengths, and it will be necessary to relay 4 miles to provide repair materials and put the line in satisfactory condition.

*Sleepers.*—A large number are defective, and 10,000 are required for repairs.

*Ballast.*—Inferior quality.

*Fencing.*—15 per cent. requires renewing.

*Bridges.*—In fair order.

*Level and Occt. Gates.*—In fair order.

*Loading Gauges.*—Require adjusting.

*Stations.*—In fair order (slight repairs required).

*Materials in hand.*—Short.

---

### Cootamundra to Wagga Wagga—Length, 56 miles.

*Rails.*—The rails on this section are similar to the preceding lengths, and it will be advisable to relay 5 miles, which will improve the road and provide materials for repairs.

*Sleepers.*—10 per cent. require renewing.

*Ballast.*—Slightly better in quality.

*Fencing.*—15 to 20 per cent. requires renewal.

*Bridges.*—In fair order, with the exception of a long timber-tresselled bridge at Wagga Wagga. This bridge shows signs of lateral weakness, and considerable repairs are done annually. The question of renewal in iron should be considered as the value of labour doing continual repairs is not economical maintenance.

*Level and Occt. Gates.*—In fair order.

*Stations.*—In fair order (except a few slight repairs).

*Loading Gauges.*—Require general inspection and adjustment.

*Materials.*—Short.

---

### Main Line—Wagga Wagga to Albury—Length of Line, 77 miles.

*Rails.*—This road is laid with T steel, and is in good order. The workmanship especially from 5 miles south of Wagga Wagga to Albury being very good.

*Ballast.*—The ballast is superior in quality to the other portions of the line. The broken stone being of a harder nature, mixed with clean gravel.

*Sleepers.*—In fair condition, but I should estimate that 1,800 are required for repairs.

*Fencing.*—The fencing generally is good, but it will be necessary to order one mile for repairs.

*Bridges.*—In fair order.

*Gates.*—In fair order.

*Stations.*—In fair order.

*Loading Gauges.*—Require adjustment.

*Materials in Stock.*—Fish-plate, bolts, and sleepers short.

---

### Cowra Branch—From Blayney Junction to Cowra—Length, 46 miles 28 chains.

*Rails.*—This section is laid with T steel, which are in good condition. The workmanship is, however, faulty in places.

*Sleepers.*—In fair order.

*Ballast.*—Fairly good.

*Fencing.*—Requires repairs and renewals.

*Bridges.*—In fair order.

*Gates.*—In fair order.

*Loading Gauges.*—Require adjustment.

*Stations.*—In fair order.

*Materials in Stock.*—All materials short.

---

### Cowra Branch—From Cowra to Demondrille Junction—Length, 63 miles 52 chains.

*Rails.*—The rails are steel and good throughout.

*Sleepers.*—In fair order.

*Fencing.*—In fair order.

*Bridges.*—In fair order.

*Gates.*—In fair order.

*Stations.*—In fair order.

*Loading Gauges.*—Require adjusting.

*Materials in Stock.*—No sleepers; other materials sufficient.

**Main Line—From Springwood to Locksley—Length, 4 miles 51 chains double line, 77 miles 69 chains single line—Total length, 82 miles 40 chains.**

*Rails.*—This length is laid with D-headed iron and steel—iron, 63 miles 77 chains; steel, 18 miles 43 chains. There are many bad iron rails, and I estimate that 6 miles of relaying with steel should be carried out as early as possible.

*Sleepers.*—The sleepers are in bad condition, and from detailed information it will require 16,000 sleepers to put the road in a satisfactory state.

*Ballast.*—Fairly good.

*Fencing.*—2½ miles required for renewals.

*Bridges.*—In fair order.

*Stations.*—In fair order, except slight repairs.

*Level and Occt. Gates.*—In fair order.

*Loading Gauges.*—Require repairs and adjusting.

*Materials in Stock.*—Sleepers, nil; barely sufficient rails and small materials.

**Main Line—From Locksley to Blayney Junction—Length, 42 miles 40 chains.**

*Rails.*—This road is laid with D-headed and T-faced iron rails—double-headed, 14 miles; T-faced, 28 miles 40 chains. From the quantity of defective rails found in the road, I estimate that 3 miles should be relaid, to provide rails for repairs.

*Sleepers.*—A large number are bad, and I estimate that it will take 9,000 sleepers to replace defective ones.

*Ballast.*—Fairly good.

*Fencing.*—In bad condition—7¾ miles require renewing.

*Bridges.*—In fair order.

*Loading Gauges.*—Require adjustment.

*Stations.*—In fair order, except slight repairs and sanitation.

*Materials.*—Generally short.

**Main Line—From Blayney Junction to Mumbil—Length, 61 miles.**

*Rails.*—This section is laid with T-faced iron rails, and from the number found defective it will be necessary to relay 1½ miles.

*Sleepers.*—It will be necessary to provide 15,000 sleepers for repairs, as there is quite this number bad in the road.

*Ballast.*—Fairly good.

*Fencing.*—3½ miles of fencing required.

*Bridges.*—In fair order.

*Level and Occt. Gates.*—In fair order.

*Loading Gauges.*—Repairs and adjustment.

*Stations.*—In fair order.

*Materials in hand for repairs.*—Nil.

**Main Line—From Mumbil to Trangie—Length, 87 miles.**

*Rails.*—This road is laid with single-faced iron rails. They are wearing very well, but it will be necessary to provide materials for repairs by relaying 1½ miles.

*Sleepers.*—5,000 sleepers required for repairs.

*Fencing.*—½ mile new fencing required.

*Stations.*—In fair order, except slight repairs.

*Bridges.*—In fair order.

*Level and Occt. Gates.*—In fair order.

*Loading Gauges.*—Require adjustment.

*Materials in Stock.*—Not sufficient for repairs.

**Mudgee Branch—Length, 85 miles 32 chains.**

*Rails.*—In fair order; 1 mile of relaying should be done, to provide repair rails.

*Sleepers.*—5,000 required for repairs.

*Ballast.*—Fair quality.

*Fencing.*—¾ mile required for repairs.

*Bridges.*—In fair order.

*Gates.*—In fair order.

*Stations.*—In fair order, except slight repairs.

*Loading Gauges.*—Require adjustment.

*Materials in hand for repairs.*—Short.

**Main Line—Mullet Creek to Hamilton—Length, 60 miles.**

*Rails.*—This line is laid with T-faced steel rails, 58 miles being steel. The rails are in fair condition. I would advise 1 mile to be taken up and relaid, and provide rails for repairs.

*Sleepers.*—In fair order.

*Ballast.*—Inferior in quality.

*Fencing.*—2 miles require renewing.

*Bridges.*—In fair order.

*Level and Occt. Gates.*—In fair order.

*Stations.*—In fair order (slight repairs required).

*Loading Gauges.*—Require adjusting.

*Materials for repairs.*—Short.

### Main Line—From Newcastle to 32 miles.

*Rails.*—This road is laid with 75 lb. D-headed iron rails, and is a double line for a length of 20 miles. It is an old road, and many of the rails require renewing. From the quantity found defective, I estimate that 5 miles should be relaid.

*Sleepers.*—A large quantity of the sleepers require renewing, and it will be necessary to provide 10,000 for repairs.

*Ballast.*—Bad quality, and should be renewed.

*Fencing.*—A considerable length of fencing requires renewing, from 5 to 20 miles being required. The fences are as bad as it is possible for them to be.

*Level and Occt. Gates.*—In fair order.

*Loading Gauges.*—Require adjustment.

*Stations.*—In fair order.

### Main Line—From 32 miles to 108 miles, between Bránxton and Blandford.

*Rails.*—This portion of the line is laid with D-headed iron rails, and has been partly repaired with steel. The rails generally are in fair condition. I would, however, advise 2½ miles to be relaid to provide materials for repairs.

*Sleepers.*—A very large number are bad, and 10,000 are required for immediate use.

*Fencing.*—Four miles required to make good defective fencing.

*Ballast.*—Bad.

*Bridges.*—In fair order.

*Level and Occt. Gates.*—Require repairs.

*Stations.*—In fair order, except a few minor repairs. Sanitary arrangements bad.

*Loading Gauges.*—Require adjustment.

*Materials in Stock.*—100 steel rails, 200 new sleepers; small materials short.

### Main Line—From 108 miles to 154 miles 40 chains, between Blandford and Werris Creek—Length, 46 miles 40 chains.

*Rails.*—This section is laid with D-headed iron rails for 5 miles, 38½ miles being single-faced iron rails, and 3¼ miles single-faced steel. The rails are fairly good, but I would advise 1 mile to be relaid, to provide materials for repairs.

*Sleepers.*—10,000 sleepers are wanted for repairs.

*Fencing.*—3 miles require renewals.

*Ballast.*—Fairly good.

*Bridges.*—In fair order.

*Level and Occt. Gates.*—In fair order.

*Stations.*—In fair order.

*Loading Gauges.*—Require adjusting.

*Materials in Stock.*—All materials short except rails.

### Main Line—From Werris Creek to Uralla—Length, 90 miles.

*Rails.*—This section is laid with iron T-faced rails from Werris Creek to Tamworth, a distance of 29 miles. They are fairly good rails, but I would advise 1 mile to be relaid, to provide repair materials. The remaining 61 miles are single-faced T steel rails.

*Sleepers.*—7,000 sleepers will be required for repairs.

*Ballast.*—Fairly good.

*Fencing.*—25 per cent. of the fencing between Werris Creek and Tamworth require renewing; 3 per cent. in the 62 miles.

*Bridges.*—In fair order. Slight repairs required.

*Stations.*—In fair order—except slight repairs.

*Loading Gauges.*—Require adjusting.

*Materials in Stock.*—Iron rails, 40; steel rails, 70; sleepers, nil; small materials, nil.

### Main Line—From Uralla to Queensland Border—Length, 147 miles.

*Rails.*—This section is laid with T-faced steel rails. They are in good condition.

*Sleepers.*—11,000 sleepers are required for repairs.

*Ballast.*—Fairly good.

*Fencing.*—2½ miles require renewing.

*Bridges.*—In fair order.

*Level and Occt. Gates.*—In fair order.

*Loading Gauges.*—Require adjusting.

*Materials in Stock.*—Sufficient at present.

### From Werris Creek to Narrabri—Length, 96 miles.

*Rails.*—The portion of line between Werris Creek and Gunnedah is laid with T-faced iron rails for a length of 41 miles.

These rails are wearing fairly well, but I would advise 1 mile to be relaid to produce rails for repairs.

*Sleepers.*—9,500 sleepers will be required for repairs.

*Ballast.*—Fairly good.

*Fencing.*—2 miles of new fence required.

*Stations.*—In fair order.

*Bridges.*

*Bridges.*—In fair order.  
*Gates.*—In fair order.  
*Loading Gauges.*—Require adjusting.  
*Materials in stock.*—Ample.

#### Maitland to Morpeth—Length, 4 miles.

*Rails.*—The rails on this branch are in good condition.  
*Sleepers.*—2,000 are required for repairs.  
*Fencing.*—2 miles required for repairs.  
*Ballast.*—Bad.  
*Bridges.*—In fair order.  
*Gates.*—In fair order.  
*Stations.*—In fair order; slight repairs required.  
*Loading Gauges.*—Require adjusting.  
*Materials in Stock.*—Nil.

#### Newcastle—Bullock Island Branch—Length, $1\frac{3}{4}$ miles.

*Rails.*—These roads are laid with D-headed steel, and is a double line; rails are fairly good.  
*Sleepers.*—In fair order; 500 required for repairs.  
*Ballast.*—Bad.  
*Loading Gauges.*—Require adjusting.  
*Fencing.*— $1\frac{1}{2}$  miles required for repairs.  
*Materials in Stock for Repairs.*—Short.

#### Cooma Branch.

The sleepers on this line require attention, and I would advise 9,000 to be provided for repairs.

STATEMENT showing Relaying, Resleeping, and Fencing required to be taken in hand at once.

#### SUMMARY of Report on condition of Permanent-way.

THE general condition of the lines is fairly good in respect to labour, but where the old iron exists a large number of rails will require exchanging or relaying. The rails between Picton and Bowning are the worst. On some lengths the gangers have made the most of the materials and ballast.

The ballast generally is very inferior in quality, being too large, and useless for men to repair their roads to the best advantage, irrespective of the size, there is an insufficient depth below the sleepers, causing the road to run hard, especially in cuttings, and the rails to become crushed some years before their time.

The sleepers should be all ironbark; and no other class should be allowed.

In laying down new flat-bottomed steel rails, I would advise their being secured to the sleepers with fang bolts, in lieu of screws and dogs. This would prevent the sleepers from becoming rail-worn and makes a more secure road.

The

The fang bolts would pass through the bottom flange of rail, and prevent the rails from creeping on the gradients to the extent which they do at present. I found some of the joints 12 inches out of square, in consequence of the rails not being more securely fastened to the sleepers.

*Fencing.*—A very large quantity is required for renewals, and it would be advisable to consider the best standard for adoption. I am of opinion that a wire fence with seven wires, three or more of them barbed, and the posts not more than 6 feet apart, would make a strong useful fence. At the present time the posts are about 8 feet 6 inches apart, which allows the wires to become too elastic.

*Bridges.*—Are generally in fair order; but no extensive renewal of wooden bridges should be executed without submitting the cost to the Commissioners, and in the case of the Wagga Wagga bridge this should be done at once. Special attention should also be given to painting, no ironwork being allowed to oxidise. Some parts of a bridge are more subject than others to oxidise, and these parts should be painted over when found necessary.

*Level and Occt. Gates.*—The platelayers should report on their condition monthly, after careful examination, to see that they are in working order, as I have known cases of cattle being killed, and the owner or occupier of the land stating in Court that it was owing to the gate or gates not being in working order. By the gangers giving a certificate on a certain date, it shows that they are giving the matter attention.

*Stations.*—Are generally in fair order, but there are many small repairs noticeable, which, if carefully supervised, should not exist. The sanitary arrangements are not good, especially in the gentlemen's portion, and some other scheme should be devised to do away with the obnoxious smells. I would also advise more light and ventilation to be given for the ladies' w.c., as in many cases the seats cannot be seen; the latter, in consequence, are in a dirty state.

*Loading Gauges.*—These appear to be of little use, as in many cases they are tied up or defective. When questions are asked why they are tied up, you are told because the carriage or van roofs have been made higher. The engineers, knowing this, should have taken the matter up, as the present arrangement is useless, no standard gauges existing.

*Mile and Gradient Posts.*—I would strongly advise standard posts being erected, as it is impossible to make a detailed report on permanent way unless you can measure at once from a grade or mile post. In many cases, when the mileage has been painted on the fence-rail, it has either been destroyed by fire or decayed.

*Inspection of Line by Inspector.*—The engineers should know that these men walk over their respective lengths once per month or so, as they cannot examine their road by riding over. There are many small defects which an inspector could point out to the gangers, and if repaired at once, a great saving in labour results.

*Platelayers' Gauges.*—No inspection takes place in respect of testing these gauges, and no two are alike. The inspectors should have standard gauges, and frequently test them, giving a certificate to the engineer once in six months that he has done so.

*Defective Crossings.*—A large number of these crossings require replacing, owing to the crossing points having worn down, allowing the wing rails to cut, and causing the carriage tyres to receive a blow or severe shock in passing over.

*Inspection of Rule-books.*—There is no inspection. On inquiring from the inspector, he informs you that the men were provided with books, but he cannot say if they have them now. This shows that no examination of the gangers takes place as to whether they understand the rules laid down for their guidance. In a number of cases the gangers cannot read or write. All those cases should be reported to the Commissioners, as it is a serious matter.

The gangers should also be provided with time-books, of a type to be sanctioned—no proper system of keeping time appears to exist.

In the workshops no system is in operation for arriving at cost of the various works executed either for repairs or other purposes. This is not on account of staff, as there is no lack of men.

I remain, Gentlemen,

Your obedient Servant,

J. ANGUS,

M. Inst. C.E.

To the Railway Commissioners.

1889.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

**RAILWAYS.**

(REPORT OF MR. R. PRICE-WILLIAMS, C.E., ON THE CONDITION OF ROLLING-STOCK AND THE PERMANENT WAY.)

*Ordered by the Legislative Assembly to be printed, 31 July, 1889.*

[Laid upon the Table of the Assembly, in accordance with the Colonial Treasurer's promise on 30th July, 1889.]

**Memo. by The Railway Commissioners.**

Office of the Railway Commissioners of New South Wales, Sydney, 31 July, 1889.

THE Railway Commissioners having found, from Mr. Thow's Report on Rolling-stock, that the conclusions they had arrived at as to the condition of the property were fully confirmed, and as the amount of money involved was so great, when they learnt that so eminent an authority on rolling-stock and permanent-way as Mr. R. Price-Williams, M. Inst. C.E., and late Member of the Council M.E., was in the Colonies, decided to obtain his services to investigate the subject further, feeling that Parliament would probably require the strongest evidence to justify so large a money vote being granted as would be necessary to place our railways on a proper footing.

It may be mentioned that when the Home Government contemplated the purchase of the Irish railways, and appointed a Royal Commission to report on the same, that the Commission engaged, as chief engineer, Mr. R. Price-Williams to value for them the rolling-stock, permanent-way, and works of the whole of the systems.

Mr. R. Price-Williams is also the author of a paper on the Permanent-way of Railways, for which he was awarded, by the Council of the Institution of Civil Engineers, the premier Telford Medal and Premium. Also, a paper on the Maintenance and Renewal of Rolling-stock, for which he was awarded, by the same Institution, the Gold Watt Medal and Telford Premium. Both these works are now recognized as standard authorities on these subjects.

E. M. G. EDDY,  
Chief Commissioner.  
W. M. FEHON,  
Commissioner.  
CHARLES OLIVER,  
Commissioner.

The Chairman, Railway Commissioners, to R. Price-Williams, Esq., C.E.

My dear Sir,

Department of Railways, Sydney, 30 July, 1889.

It is intended by the Minister to lay on the Table of the House a copy of your report to the Commissioners upon the railway property, and as you will not be so universally known in this country as you are at Home, I should feel obliged if you will favour me with a copy of the letter from Sir James N. Douglass, F.R.S., &c., which you referred to when we were speaking together recently.

Faithfully yours,  
E. M. G. EDDY.

R. Price-Williams, Esq., C.E., to The Chairman, Railway Commissioners.

My dear Sir,

Union Club, Sydney, 30 July, 1889.

I am much obliged to you for your letter of this date, and for your suggestion that I should furnish you with a copy of the letter of introduction my friend Sir James Douglass recently gave me to His Excellency Sir Robert Hamilton, the Governor of Tasmania, which I have the pleasure to enclose.

I should state that Sir James Douglass, F.R.S., is the engineer to the Trinity House, and a leading member of the Council of the Institution of Civil Engineers.

Yours faithfully,  
R. PRICE-WILLIAMS.

[Enclosure.]

My dear Sir Robert,

Trinity House, London, 20 March, 1889.

I beg to introduce to you my old friend and schoolfellow, R. Price-Williams, M. Inst. C.E., &c., who is on a visit to Tasmania in connection with the railways of the country.

Mr. Price-Williams is probably the greatest living authority on railways in all the branches of construction, rolling-stock, and maintenance; therefore you will, I am sure, be glad to make his acquaintance, and more especially when I assure you that no member of the Institution of Civil Engineers is more highly esteemed by his professional brethren.

With kind regards,

I am, &c.,  
JAS. N. DOUGLASS.

Sir R. Geo. C. Hamilton, K.C.B., &c.

## Report by R. Price-Williams, Esq., C.E., to The Railway Commissioners.

Sydney, 29 July, 1889.

To the Commissioners for Railways of New South Wales, Sydney,—

Gentlemen,

I have devoted the last seven weeks to a careful examination of the rolling stock, permanent way, and works of the New South Wales Railways, but I should have liked, before reporting to you upon the subject, to have extended my investigations, and to have worked out in greater detail the results I have arrived at, but I am so impressed with the exceeding gravity of the present condition of matters that I have decided to lose no time in furnishing you with this Report.

I should at once state that I find the locomotive, carriage, and waggon stock generally in a deplorable condition.

## Locomotive Stock.

Of the 429 engines at present working the traffic—for the most part constructed by leading locomotive builders—five have been on the line for the long periods of 33 and 32 years; twenty-nine for periods varying from 22 to 26 years, the mean life of the thirty-four engines being over 25 years; thirty-four others have been at work for periods between 15 and 20 years, nineteen (or more than half of them) being between 18 and 19 years old.

Further, there are 100 engines (or nearly a fourth of the whole stock) whose ages vary from 10 to 14 years; altogether, as will be seen from the following statement, there are at present 168 engines (or considerably more than one-third of the entire stock) whose mean age is exactly 15½ years, while the age of fifty-six others verges upon 10 years—the life-span, so far as regards the period of renewals, of a modern locomotive; the average age of the entire stock being 9½ years.

TABLE A.—Statement of Age of Locomotives.

Mean Age.	Date.	Age in years and Number.				Number.	Total.	Per centage on entire stock.
		Age.	No.	Age.	No.

						95		
9·42	Total number of Engines on 31 May, 1889 .....					429	429	100·00

In order to ascertain the amount of work done by these engines, which, perhaps, is the best test of the life value of the stock, a statement of the train mileage run by each engine has, at my request, been obtained from the published reports, a summary of which accompanies this paper. (Table No. 4.) From

a reference to it it will be seen that engine No. 391, which has been thirty-three years at work, has since 1862† run upwards of 609,000 miles, while engine No. 26, put on the line in 1866—ten years later—has very nearly reached the same great mileage. There are at present six locomotives whose mileage varies from 512,000 to 560,000 miles. Altogether the number of engines which have run between 400,000 and 500,000 miles is twenty-seven.

The mileage of fifty-one engines ranges between 306,000 and 398,000 miles—twenty-two having been put on the line so late as 1877, 1878, and 1879, the mileage of one of them (No. 416) having averaged as much as 32,000 miles annually—while 58 engines have already attained a mileage exceeding 200,000. Altogether 135 engines have run over 250,000 miles.

TABLE B.—Summary of table No. 4, Appendix.

Per centage of entire stock.	Number.	Mileages run since 1862 by Engines now in use.	
31.47	135	1 engine .....	609,141 miles.
		6 engines .....	From 511,706 to 561,153 miles.
		27 " .....	411,931 to 498,655 "
		51 " .....	300,095 to 398,194 "
		50 " .....	250,285 to 299,422 "
		58 " .....	200,844 to 248,591 "
13.52	58	58 " .....	151,004 to 199,611 "
17.95	77	77 " .....	Under 150,000 miles.
37.06	159	159 " .....	
100.00	429	429 engines.	

In order to fully realise the significance of these figures, it is necessary to remember that, in the case of a well maintained locomotive stock, 200,000 train miles\* is considered, in England, to be the limit which an engine should be allowed to run before all the principal parts subject to wear and tear have been entirely replaced, such for instance as the tubes, crank, axles, tyres, boiler, axle-boxes, &c., &c. In fact in many cases it is found preferable to construct an entirely new engine, taking credit for the scrap value of the old one, which, if not broken up, is employed for shunting or other minor duties.

\* Vide Molesworth, "Life of Rolling Stock."

I find that only sixteen engines have been renewed since 1855. The first renewal occurred in 1872, when the total stock was 67 engines; in 1877, four engines were renewed, the stock having in the meantime more than doubled. In the following year two more engines were renewed, the total number of engines in that year (1879) being 177. If, in this period of ten years, the stock had been properly maintained, nearly the whole of these 177 engines, many of which at that time were upwards of fourteen years old, and had been,—as the mileage statement shews,—so severely worked, ought by this time to have been renewed.

Table No. 1, Appendix.

All, in fact, that has been done in addition to these few renewals, has been the replacement of 46 new boilers‡ and some crank axles. Most of the engines I had the opportunity of examining, have evidently undergone nothing but ordinary repairs, with occasional replacements of minor parts, which become worn out in the course of a few years.

From a reference to the tabular statement which I have prepared from the printed reports, and from details as regards labour and materials, furnished me from the books at Eveleigh, it will be seen that in 1878 the cost of the materials required for the maintenance and renewals of the engines was then only about one-half that of the labour; since then the amount expended on materials has been very largely diminished, the cost of the materials in 1887 being only about one-eighth of that of the labour.

Table No. 2, Appendix.

During the last ten years the total expenditure on maintenance and renewal of engines up to the end of 1887 has been as follows:—

Wages...	...	...	...	...	...	...	...	£526,711
Material	...	...	...	...	...	...	...	174,929
								£701,640

The labour on the average being just three times the cost of the materials. The proportion of these two important items on well maintained English railways being about equal, or with a very small excess occasionally in the case of labour. In the colonies the cost of labour is very much greater, but after making full allowance for this it is quite clear that very little has been done in the way of renewals.

The average price paid for new engines by the Government during the last ten years was £2,710 per engine. The £701,640 expended during that period in the maintenance and renewals of engines would therefore have sufficed to purchase 259 new engines of the most modern and approved type. It however should be borne in mind that the £701,640 includes the necessary charges for ordinary maintenance, and also that the price paid for both labour and materials, as already stated, is considerably greater on the New South Wales railways than in the case of English railways.

See Table No. 3, Appendix.

The

† No record has been kept of the mileages run by each engine prior to 1862. ‡ NOTE.—Nearly all the engines which have had new boilers are old and worn out, and, with the exception of three, of types not intended to be renewed.

\* Table No. 3.  
Appendix.

The number of new engines added to the stock of the New South Wales Railways during the last 10 years has been 272,\* while the additional mileage opened during that period has been 1,347 miles, giving exactly a fifth of an engine (0·20) per mile, or a little less than the proportion which has obtained during the last ten years over the entire system; it is evident, therefore, that these new engines only represent the necessary equipment required for the mileage of new railway opened during this period.

From a reference to the before-mentioned Table 2 in the Appendix, it will be seen that the annual cost of the maintenance and renewals of the engines during the last 10 years has only averaged £246 per engine, the cost during the year 1887 amounting to but £228 per engine,† the expenditure on materials being relatively very small—

							1887.		
							£	s.	d.
Wages ...	...	...	...	...	...	...	203	2	0
Materials ...	...	...	...	...	...	...	25	7	0
							<u>£228 9 0</u>		

†Table No. 3  
appended.

It is clear from this that the amount spent on renewals during that time has been totally inadequate, and also that the 272‡ new engines added to the stock during the same period have been almost entirely relied upon to do the work of the worn-out and overworked engines which should have been renewed.

The period for the renewal of the boiler and fire-box (the cost of which, with the fittings, amount to about one-third of the entire engine), practically determines that of the engine itself, the train mileage usually allowed being 200,000 miles, the same as that usually allowed for the renewal of the engine, exclusive of the side frames and other portions not subject to much wear as already stated.

In the Australian Colonies, where the price of labor and materials is much greater, 250,000 train miles is usually allowed. Taking therefore this mileage as applicable in the case of the renewal of the engine itself, it will be seen from a reference to table B that there are at present 135 engines, or nearly one-third (31·47 per cent.) of the entire locomotive stock, which have already exceeded this mileage, and these, with the exception of a few renewed and reboilered, require immediate renewal. There are 58 other engines, or over 13 per cent. of the stock, which have run between 200,000 and 250,000 miles, and these, with the few exceptions already alluded to, will require almost immediate renewal.

Further, there are 77 engines, or about 18 per cent. (17·95), of the stock which have run between 150,000 and 200,000 miles, and these, where no boiler replacements have been made, will require to be renewed very shortly.

The 135 worn-out engines referred to fortunately include most of those enumerated in Table A, as having been at work for periods varying from 33 to 10 years, and of the various types it will be inadvisable to renew.

§Table No. 1,  
appended.

Deducting the 16 engines renewed since 1877,§ and 3 others of the standard types furnished with new boilers since 1881, and included amongst those which have run over 250,000 miles, the number of engines at present requiring renewal would, according to the age test, be 149, and by the mileage test, 116, as shown in the following table:—

TABLE C.

	Age test.		Per-centage.	Mileage test.		Per-centage.
	No.	Total.		No.	Total.	
<i>Engines to be entirely renewed—</i>						
Of ages varying from 33 to over 10 years, and mileages exceeding 250,000.....	168			135

Engines

### Engines of standard type No. 93 (heavy Mail and Express Stock Trains).

Of the 72 6-wheel coupled inside-cylinder engines of this type there are 29 whose mileage ranges from 441,000 to over 250,000 miles (six nearly 25 years old, and seven between 18 and 19 years old). These should be at once renewed, credit being allowed for the value of the old ones, such of them as are considered worth repairing being utilized as surplus or spare stock, ready for any special service, the number of spare engines of all classes at present being only four. See Table No. 6, appended

### Engines of standard type No. 205 (Ordinary Goods Engines).

Of the 70 6-wheel coupled engines, with inside cylinders, of this type,\* there are at present 13 which have run from 190,000 to 204,000 miles. These, however, were only added to the stock in 1882, and, I think, when they have run 250,000 miles they will need only to have their boilers renewed with other minor replacements and repairs. \*Table No. 6.

### Engines of standard type No. 255 (Express Engines).

Of the 47 4-wheeled coupled engines, with inside cylinders, of this type, four added to the stock in November, 1882, and January, 1883, have already slightly exceeded 200,000 miles, and these, when they have run 250,000 miles, should be dealt with as in the case of the 13 engines of the last-mentioned type.

### Engines of standard type No. 158 (Suburban Tank Engines).

Of this type—a four-wheel coupled engine with inside cylinders—used for the suburban traffic, there are only six in number, which were added to the stock in 1880.† Three of them have respectively run 262,000, 225,000, and 206,000 miles. The usual period for the renewal of the boiler in the first case has been exceeded, while in the case of the other two the mileage limit has been nearly reached. †Table No. 6.

Adopting the mileage run by each engine as the test of the present condition of the locomotive stock, it is evident that before the stock can be put into anything approaching a proper condition for working the traffic, at least 116 new engines of the standard types must be added to the present stock. In urging this to be done as speedily as possible the main consideration I have in view is of course the avoidance of the very serious risks involved in working the traffic with the stock in its present condition. Apart from this, however, so timely and necessary an addition to the working stock (which at present is scarcely

adequate for the requirements of the traffic‡), would largely conduce to greater economy and efficiency in working the traffic. For instance, with new engines, constructed by the best locomotive builders, embodying all the most recent improvements and with the principal working parts interchangeable, the locomotive working expenses would at once be considerably and permanently reduced, and what is of equal importance, the traffic, more especially on the steep gradient lines, will be worked, as in fact it ought to be now, with engines of greater power

and efficiency, so as to meet the rapidly increasing requirements of the traffic.

‡ Comparative equipment per mile of the New South Wales and Irish railways (the latter both in receipts and train miles per mile being very similar) is as follows:—

	N.S.W. Railways. No.	Irish Railways. No.
Engines .....	0·20	0·25
Carriages.....	0·49	0·59
Waggons.....	3·99	5·12

*Types of Engines not to be renewed.*

There remain to be dealt with the 234 serviceable engines of a great variety of types, in number 24, but in reality 32, inasmuch as engines classed under a given type differ in many respects in the size of the wheels, diameter and stroke of cylinders, wheel base, couplings, &c. It will be seen from the following tabular statement that, in addition to this most objectionable feature of difference of type, the whole of them (with the exception of types 351, 373, 285, 294, and two engines of type No. 127, added to the stock since 1884, and 48 in number) are of great age and have run very great mileages, in one case exceeding 600,000 miles, and in a great number of cases from 250,000 to 500,000 miles, all of them, with scarcely an exception, having run over 250,000 miles, without having had their boilers, fire-boxes, and other principal parts renewed. The lives of these engines are already gone:—

Total... 24 types.	Total .....	234 engines.		

As regards types Nos. 285, 294, and 304, six-wheel coupled engines, and Nos. 351 and 373 four-wheel coupled engines, they are comparatively new; but I am sorry to see they have, in many cases, been very much overworked, the annual run in many cases exceeding 30,000 miles per engine. These engines, although not the best suited for the traffic, are thoroughly good engines, for the most part, made by Messrs. Beyer, Peacock, & Co., and capable of doing a large amount of work for years to come, if properly maintained and not overworked.

It only remains for me to add, in connection with this matter of the locomotive stock, that the heaviest static load allowed on each axle is at present 14 tons; but, when the permanent-way is put into a proper condition, it will admit of a considerable increase in the static axle load, thereby enabling much heavier and stronger engines, of the standard type, to be constructed, and which are at present so much needed properly and economically to work the traffic on the steep graded lines.

## Carriage and Waggon Stock.

## CARRIAGES.

THE number of carriages of all descriptions in stock at the beginning of 1889 was 1,084. Of these 170 were, as the accompanying statement shows, of ages varying from 34 to 25 years, the mean age being  $28\frac{1}{2}$  years; 25 of ages varying from 20 to 25 years, and averaging  $17\frac{1}{2}$  years; the age of 127 others varies from 15 to 19 years, while the age of 103 carriages averages nearly 11 years ( $10\cdot80$  years), which is about the mean age of the entire stock, viz.,  $10\cdot76$  years.

TABLE E.—Age and number of carriage stock, 1889.

The number of carriages added to the stock during the last nine years (1878 to 1887)\* has been \* Table No. 3. 648, giving 0·48 of a vehicle for the  $1,347\frac{1}{2}$  miles of railway opened in that period, somewhat less than the average equipment per mile during the last ten years.\* It is quite clear, therefore, that this additional stock has, as in the case of the locomotive stock, been mainly relied upon to work the traffic and to save the cost of the renewals, which ought to have been done out of revenue during that period.

The annual cost of the maintenance and renewals of carriages on the New South Wales Railways during the last ten years has averaged £36 12s. per vehicle. Of this sum, however, very nearly two-thirds was spent in labour, clearly showing that, beyond the twenty-seven carriages renewed since 1872,† Table No. 1, Appendix. nothing whatever has been done to the stock beyond ordinary repairs. I may add that these facts, coupled with the wretched state of the carriages I have examined, prove conclusively that the carriage stock generally is at present in a very bad condition.

Having

Having regard to the extreme importance of continuing to work the traffic in a safe and efficient manner, I would strongly advise that at least 322 new carriages should, as soon as possible, be added to the stock.

## WAGGONS.

From a reference to the following Table F, it will be seen that of the 8,984 waggons of a great variety of types in stock at the beginning of this year, 5,372 new ones, or just two-thirds \* of the entire stock, have been added during the last ten years, corresponding very nearly with the number necessary † Added waggons  $\frac{5,372}{1,347\frac{1}{2}} = 3.99$  No. for the equipment of the 1,347 $\frac{1}{2}$  miles of railway opened for traffic during that period, viz., four waggons per mile. ‡

\*60.13 per cent  
†See Table No. 3  
appended

Of the 3,413 waggons of the old stock in use in 1878 only 332, † or less than 10 per cent. of the stock at that time, have been renewed out of revenue.

The age of 1,379 waggons, or just one-sixth of the present stock, varies from 34 to 15 years, the mean age being 18 $\frac{1}{2}$  years.

TABLE F.—Age and Number of Waggon Stock, February, 1889.

Serviceable .....			5,281	5,281	5,281	59.11
Total mean age .....				8,984	8,984	100.00

The age of 2,274 waggons, or just one-fourth of the stock, averages nearly twelve years, while the remaining 5,281 waggons, only added to the stock during the last nine years, and whose average age is about 5½ years, are already in a bad state of repair, many of the frames being "hog-backed," while the axle-boxes of nearly all the waggons I have examined—of a great variety of patterns—are in a very bad and neglected state. Altogether, the whole of the waggon stock is in as bad a condition as it is possible to conceive.

The cost of the repairs and renewals of waggons during the last ten years has averaged only £4 9s. per waggon, which is about the average cost on the principal English railways. Having regard to the much higher cost of labour and materials in the Colony, it is quite evident that the amount spent upon the maintenance and renewal of these waggons has been totally insufficient. The large proportion which

† Waggons, Repairs, and Renewals, 1887:—	
Wages .....	£33,618-5
Materials .....	11,529-3
	£45,147-8

the cost of the labour bears to the materials quite bears out this view.† As I have already pointed out in the case of the locomotive and carriage stock the 5,372 new waggons added to the stock out of capital to equip the new railways opened during the last ten years have been made to do the work of those waggons which ought to

have been renewed during that period.

I consider that the 1,379 waggons of ages, varying from thirty-four to fifteen years, should be replaced as soon as possible with new ones of the most approved type. The 2,274 waggons, whose average age is twelve years, I fear are scarcely worth renewal, and the cost of putting these, as well as the 5,281 waggons added to the stock during the last nine years, will necessitate a very heavy expenditure before they can be put into a good serviceable condition.

The outlay necessary to restore the present locomotive, carriage, and waggon stock to a proper and normal state of efficiency, so as to ensure for the future its being thoroughly maintained and renewed out of revenue, I estimate as follows:—

Estimate.

Number.	Description of Stock.	Amount required.	Total Amount required.
LOCOMOTIVES.		£	£
116	New locomotives of the standard types, to replace present worn-out stock, from 33 to 10 years old, at £2,565.	297,540	
175	Engines of the standard types, Nos. 93, 153, 205, and 255, to be rendered thoroughly efficient.	149,625	
138	Engines of types not to be renewed, to be put into serviceable condition .....	63,480	
429		£510,645	
CARRIAGES.			510,645
322	New carriages of standard types, to replace present worn-out stock from 34 to 15 years old, at £800.	257,000	
103	Carriages of an average age of 11 years to be put into a serviceable condition .....	41,800	
659	Carriages of an average age of 5 (462) years to be put into a thorough state of repair.	87,647	
1,084		387,047	387,047
WAGGONS.			
1,379	New waggons of standard types, to replace present worn-out stock from 34 to 15 years old, at £135.	186,165	
2,274	Waggons requiring heavy repairs, from 14 to 10 years old, to be rendered serviceable..	152,358	
5,281	Waggons of an average age of 5½ years to be put into a thorough state of repair .....	121,463	
8,934		£459,986	459,986
			£1,357,678

In the above estimate I have taken, in the case of the new locomotive, carriage, and waggon stock, the average prices paid by the Government during the last ten years,\* making full allowance for the scrap value of the materials, and also the life values still attaching to the serviceable engines and vehicles, not to be renewed.

\*See Table I. Appendix.

I am surprised, however, to find that neither the locomotive or Permanent-way Department are credited in the accounts with the scrap values of the material. This is contrary to the usual practice of railway companies, as it is manifestly improper that the revenue should be augmented by the proceeds of the sale of materials which ought rightly to be credited to the cost of the new materials replaced out of revenue.

In

In conclusion, I should say that the annuity required to pay off the £1,357,678 in periods of ten fifteen, or twenty years respectively, and with interest at  $3\frac{1}{2}$  per cent. would be as follows:—

In 10 years	...	...	...	...	...	...	£115,734 per annum.
In 15 years	...	...	...	...	...	...	£ 70,361 „
In 20 years	...	...	...	...	...	...	£ 48,009 „

The outlay of an amount such as this, judiciously applied, would, I consider, prove to be true economy, inasmuch as not only would it ensure the rolling-stock being rapidly restored to a thoroughly sound and efficient condition for working the constantly increasing traffic of the Government railways, but it would enable large and immediate economies to be effected in the amounts hitherto spent in the mere maintenance of the rolling-stock, amounts which, if the stock had been properly renewed from time to time—instead of being allowed to be overworked as it has been—would have more than sufficed to have both maintained and renewed the stock, so that at the present moment it would have been in a thoroughly sound and efficient condition.

I have, &c.,

R. PRICE-WILLIAMS.

NOTES.—No less than 21 of the above engines have run over 350,000 miles, and 33 of them have run for 15 years or more.

† Boiler of engine No. 426, of the same class, which has run 241,068 miles, was, when examined internally, found pitted and corroded, one of the plates being grooved nearly through. The copper tube plate was bulged fully ¼ in. ‡ The crown plate of the copper fire-box of this engine cracked whilst standing under steam, March 7, 1889. § The boiler of this engine had not (February 7, 1889) been examined internally for 11 years. On February 1, 1889, there were 31 boilers in the Northern District, which had not been examined internally for periods varying from 5 to 11 years, as follows:—

5 engines—boilers not examined internally for 11 years. 6 engines—boilers not examined internally for 7 years.

Boiler of engine No. 234 from this district, which was put on line October, 1883, and has only run 147,234 miles, was found to be badly pitted in barrel, April 1, 1889. ¶ The boiler of 400, though 23 years old, had not been examined internally for 9 years.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

**RAILWAYS.**

(REPORT OF MR. R. PRICE-WILLIAMS, C.E., ON THE CONDITION OF THE PERMANENT WAY AND WORKS.)

*Ordered by the Legislative Assembly to be printed, 13 August, 1889.*

Sydney, 10th August, 1889.

To the Commissioners for Railways of New South Wales, Sydney.

Gentlemen,

In reporting on the present condition of the permanent way of the New South Wales Railways, I have, for the reasons already given in regard to the Rolling Stock, confined myself to a careful examination of those portions of the different lines which are at present in the least satisfactory state.

Granville Junction to Goulburn.

	102

I regret to say I have found the main line between Granville Junction and Goulburn in a very bad state, more especially on the gradients between Picton and Mittagong, where there are nearly 3 continuous miles of 1 in 30, and had it not been for the ironbark sleepers—which, notwithstanding the severe punishment they have received, are generally in a sound condition, it would not in my judgment be safe to continue to work the express traffic at the present speeds.

Except a few isolated portions of the line where about 17½ miles\* have been rerailed with steel rails, that is to say, new rails put into the old chairs or laid upon the old sleepers in the case of the T rail, the whole of the line between Granville Junction and Goulburn is still laid with iron rails.

Of these iron rails, 10½ miles have been in the road thirty years and upwards, 16¾ miles for between twenty-five and twenty-six years, and 74¾ miles for periods varying from nineteen to twenty-two years. Altogether, at the end of last year, there were 102 miles of line between these two places where the iron rails have been in the road for periods exceeding nineteen years†; there were also 12 miles of iron rails of the same date still in the road on the suburban lines between Sydney and Parramatta.†

The condition of these rails is generally very bad, more especially on the gradients in the numerous rock cuttings, where I frequently observed little or no ballast under the sleepers; so that with the great speed

EXTRACTS from note-book, July, 1889:—

Noticed in cutting at about the 49th mile sleepers lying practically on the rock formation.

Noticed at 58 miles that there was not more than 1½ inch of ballast under sleepers. The ganger told me the chairs are always breaking here.

speed attained in descending these gradients both the rails and sleepers are being actually pounded to pieces on a rock formation. The formation in the cuttings is only 15 feet, which does not allow sufficient width for the side discharge necessary to keep the ballast in proper condition, a most important point in properly maintaining the permanent way.

The ballast, consisting chiefly of large pieces of broken sandstone, is of an inferior and unsuitable description. In packing the sleepers it becomes rapidly disintegrated, rendering it very difficult to maintain a good top to the road, and the fine sand produced gets into the machinery of the engines and does a great amount of mischief. The frequent records in my note-book, such as "rail ends badly crushed," "road very much out of line," "flat place in middle of rail," "outer rail in curve very much down," "bad ballast," "insufficient ballast," "no bottom ballast," "bad top," &c., sufficiently indicate the general condition of this portion of the main line over which, at great speeds, the express service between Sydney and Melbourne is carried.

The thick dark lines of axle-box grease, which I frequently noticed, trailed along the ballast for miles together without a break, not only testifies to the bad and neglected state of the permanent way and to the ballast not having for a length of time been opened out to lift and repair the road, but it also bears testimony to the bad and neglected state of the axle-boxes and rolling stock to which I have already drawn attention.

The whole of the iron rail permanent way between Granville Junction and Goulburn requires to be entirely renewed and as speedily as possible; the material from the small portions already laid with steel rails being taken up and utilized for the purpose of future repairs.

The practice of "rerailing" or putting new steel rails into the old chairs with the old sleepers and fastenings is at all times objectionable, but especially so where, as in this case, the ballast as a rule is insufficient and of an inferior quality.

In repairing the permanent way I notice what is still more objectionable, and that is, replacing a worn out iron rail with a new steel one, the effect of a mixed road of this kind on the running of the trains being very marked and injurious alike to the road and rolling stock.

Wherever the line has to be renewed the whole of the materials in the road should be taken out and replaced with new, and such as are still serviceable should be utilized for sidings or where iron rails continue in use. The ballast, if not too bad to admit of its being left in the road, should serve as the formation of the renewed road, and there should at least be 5 inches of good blue rock bottom ballast for the sleepers.

The total mileage of permanent way between Granville Junction and Goulburn is—

	mils.	chns.
Laid with steel rails in detached pieces	17	37
Laid with iron rails	103	41
	120	78

With the 80 lb. steel rails and 40 lb. chairs, which I am glad to learn the Commissioners have decided to adopt for the future, and the splendid material this Colony possesses in its ironbark sleepers, with plenty of the hard blue rock ballast, the permanent way of this portion of the Southern main line would be in a condition to meet the immediate and future requirements of the increasing traffic.

### Goulburn to Cootamundra.

Of the 119 miles of line on this section, 60 miles, or just half, has been in the road from fourteen to fifteen years, and the remainder from twelve to thirteen years. Only 9½ miles, situated on the graded portions of the line which were laid with iron rails fourteen years since (1875-1876) have been renewed with steel rails in detached pieces.

Locality.	Date of Opening.	Miles.
Goulburn to Gunning .....	Mar., 1875	30.20

Albury to Wodonga .....	Jan., 1883	1 0
		134 17

I am surprised to find that the 55½ miles of railway between Cootamundra and Wagga Wagga were laid with iron rails so late as 1878 and 1879 at a time when the price of steel rails in England was very low and just about the same as that of iron rails, viz., £4 10s. per ton; only 3 miles situated on gradients of 1 in 40 and 1 in 45.5 between Little Stony Creek and Bethungra Station have been relaid with steel rails. There are 5 miles of the iron rails on the gradients just west of Cootamundra which should at once be renewed; and the remainder of the road between Cootamundra and Wagga Wagga laid with iron rails should, for the reasons already stated, be replaced with steel at the

earliest possible period; the serviceable materials being utilized, as already suggested, for repairs on other lines where iron rails continue to be used.

The line between Wagga Wagga and Albury opened in 1880 and 1881 is laid with steel rails, and when it has been properly ballasted here and there with good blue rock ballast, the annual cost of the maintenance will be very small as compared with what it is at present.

### Great Western Railway.—Granville Junction to Bathurst.

Kelson to Bathurst .....	April, 1876	1.35	13
		130.77	

With the exception of about a mile and three quarters of what is termed the "hydra-headed rails," the whole of the up line between the Junction and Penrith was relaid with steel rails in 1886. These hydra-headed rails, which were only laid down in 1886, should at once be taken out.

On the down line between these two places there are still about 12 miles of iron rails which, with the exception of occasional replacements, have been in the road for periods varying from twenty-two to twenty-nine years. Here and there in the 12 miles small portions of the road have been rerailed with steel rails. The whole of this mileage, however, should be entirely relaid with steel rails, resleepered, and ballasted with blue rock ballast, the few steel rails and sleepers removed being utilized for repairs.

From Penrith to Springwood, a distance of about 14 miles, the line has been rerailed with steel, M. ch. and between Springwood and Locksley, 82½ miles, 18½ miles\* has also been rerailed with steel. \*18 43 †78 62 On the remainder of the line to Bathurst, a distance of about 78½ miles,† the iron rails which were laid in 1868 and 1870, and between 1872 and 1876, are still in the road.

The age of 11¼ miles of the permanent way varies from twenty-five to twenty-eight years, 27 miles from eighteen and twenty-one years; while 28½ miles ranges between fifteen to sixteen years. Altogether there are 67½ miles of way which, with the exception of occasional replacements, has been in the road for over fifteen years. Many of the rails and sleepers are in a bad condition, and the 4½ miles‡

M. ch. of way on the gradients just beyond Mount Victoria, two short lengths of about a mile. †4 34 each on the Lithgow Zig Zag, and two other short pieces near Macquarie's Plains Station, should be entirely renewed as soon as possible.

On the line between Bathurst and Blayney Junction, opened in 1876, there are two short pieces of way of about three-quarters and half-a-mile length respectively, between Perth Platform and George's Plains Station, which require to be entirely renewed, the serviceable material being used for repairing other parts of the road.

Great

## Great Northern Line.

The double line between Newcastle and West Maitland, which I carefully examined, I found to be in a very defective condition, both as regards rails, sleepers, fastenings, &c., and maintenance. This portion of the line was opened in 1857-1858, thirty-one years since, and according to Mr. Cowdery's tabular statement showing the age of the permanent way,\* there are still  $11\frac{1}{2}$  miles of the original iron rails still in the road; the ironbark sleepers here, as elsewhere, have been its salvation. Although many of them were, I observed, rather crushed, there is still a good deal of life in some of them. Having regard to the heavy character of the traffic on this portion of the line, I would advise that the whole of the  $11\frac{1}{2}$  miles be entirely renewed. I gather from Mr. Cowdery's tabular statement that there are, in addition, 83 miles of the Great Northern Line where the age of the iron rails varies from twenty-four to twenty-eight years,† and 71 miles more from sixteen to nineteen years old, so that altogether there are  $115\frac{1}{2}$  miles of rails on the line whose age, at present, exceeds sixteen years. This mileage corresponds very closely with that between Newcastle and Murrurundi, 119 miles, which was opened to the latter place in April, 1872, just seventeen years since. Having regard to these facts, I consider that the immediate renewal of the 5 miles of this permanent way between Newcastle and West Maitland,  $2\frac{1}{2}$  miles between Branxton and Blandford, and 1 mile between Blandford and Wern's, laid down in 1872, is the least that should be done, with the view to restoring the permanent way on these portions of the main line as quickly as possible to a thoroughly sound condition.

## Cost of Maintenance and Renewals of Permanent Way.

The cost of the maintenance and renewals of the permanent way of the New South Wales Government Railways, including the whole of the staff and office charges, has averaged during the last ten years (1878 to 1887) £228 per mile. The cost of the materials, however, viz., £41 per mile, constitutes but a very small proportion of this amount, while the cost of the labour is as much as £187 per mile, clearly showing that little beyond the ordinary maintenance has been done;—and further, that a large portion of the maintenance is attributable to the new lines opened during these ten years, which has averaged  $144\frac{3}{4}$  miles per annum—the total mileage maintained having more than trebled during that period.

The relative cost of labour to materials on the Great Northern Railway of England during the period of transition from iron to steel rails (1866 to 1875), is shown graphically on the following diagram, from which it will be seen that the cost of the materials largely exceeded that of the labour—the exact converse of what has occurred in the case of the New South Wales Railways, as shown on the uppermost diagram. (See Appendix Table No. 4.)

I would particularly draw attention to the fact that now that the whole of the main lines of the Great Northern and other English Railways have been renewed with steel rails of the best and heaviest

\* NOTE.—The average life of an iron rail on the most heavily worked portions of some of the principal English railways is  $17\frac{1}{2}$  millions tons of traffic. The average life of a steel rail on the same railways is about 161 million tons. Vide "Economy of Railway Working," Proceedings Inst. Mechanical Engineers, 1879:—

$$\frac{161,000,000}{17,500,000} = 9.2 \text{ times.}$$

class, the cost of the maintenance and renewals has not only been very largely reduced, but—as might have been expected—the cost of the materials is now very much less than that of the labour, and when the main lines of the New South Wales Railways have been similarly renewed with steel rails whose average life under like conditions of traffic is more than *nine* times that of an average iron rail,\* the cost of the maintenance and renewals of the permanent way will be very considerably and permanently reduced, more especially as regards the materials.

## GREAT Northern Railway (England) 1887. Maintenance and renewal of Permanent Way.

	Amount.	Cost per mile of railway.	Cost per mile of single line.
Wages ... ..	£91,874	£135.6	£76.9
Materials ... ..	54,317	80.1	45.5
Engine hire ... ..	5,055	7.5	4.2
	£151,246	223.2	126.6
Staff and office charges ...	11,910	17.5	10.0
	£163,156	240.7	136.6

Mean mileage of railway 477.75, equivalent to 1,194.3 miles of single line.

\*Appendix. Table No. 1.

Table No. 1.

£227 7s. 3d. See Table No. 2. £40 8s. 8d. in Table No. 2. Appendix.

New Mileage opened 1,363 = 1444.77 9 years.

The annual cost of the maintenance and renewals of permanent way on the Great Northern of England, has, owing to the large reduction in the price of steel rails, and the much greater durability of this material, been reduced since 1875 from £374 per mile of railway (for the most part double line), and £210 per mile of single line, to £241 per mile of railway, and £137 per mile of single line in 1887, a reduction of over 34 $\frac{3}{4}$  per cent. per mile of single line, whilst the cost on the New South Wales Railways, during the latter year, has been as much as £167 per mile for what has amounted to little more than mere maintenance.

The cost of entirely renewing the main line between Granville Junction and Cootamundra with 80-lb. steel rails, sleepers, &c., lifting and reballasting, after making full allowance for the value of both the old and serviceable materials, would be £1,584 per mile, and this for the 240 miles (239 miles 65 chains) between these two places would amount to £380,160. The whole of this work could be done in the course of the next three and a half to four years, the worst portions being taken first, two relaying gangs being employed simultaneously on the different portions of the railway to be renewed. The renewals of the 55 $\frac{3}{4}$  miles of iron rails between Cootamundra and Wagga Wagga, laid with iron rails, in 1878 and 1879, together with the necessary renewals, on the Great Western and Great Northern Lines might well be done out of revenue.

I would, in conclusion, draw attention to the fact that I observed on the line scarcely any materials for repairs in case of sudden failures or breakages in the permanent way.

I have the honor to be,  
Gentlemen,  
Your obedient servant,  
R. PRICE-WILLIAMS.

Gate lamp and socket ... ..	each	3 9 5	.....
Lever and set of double-purchase wheel gear for apparatus to work gates (exclusive of locking) ... ..	per set	9 5 0	.....
Set of 4 patent gate-stops, new pattern, including all connections within the crossing for gates as above ... ..	"	25 0 0	.....
Ground disc signal (Wood's patent) with lamp, 1" adjusting screw and joint to work with points ... ..	each	4 0 0	.....
Ground independent disc signal (Wood's patent), with lever, balance-weight, and shackle ... ..	"	4 5 0	.....

The above prices include packing and delivery f.o.b., London or Liverpool.

1889.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

RAILWAYS.

(CORRESPONDENCE, &c., IN CONNECTION WITH CANCELLATION OF CONTRACTS FOR RE-ROLLING RAILS.)

Ordered by the Legislative Assembly to be printed, 18 June, 1889.

[Laid upon the Table of the Honorable the Legislative Assembly of New South Wales, copies of papers in connection with the cancellation of contract for re-rolling rails in compliance with the promise made by the Honorable the Colonial Treasurer in reply to Question No. 4 of the 14th June, 1889.]

The Secretary, Eskbank Iron Company, to The Railway Commissioners.

Sirs,

The Eskbank Iron Works, Lithgow, 20 April, 1889.

Referring to our letter of 5th March from our Managing Director, with reference to our contract with the Railway Department for re-rolling 5,000 tons per annum for five years of worn-out iron rails, up to this time we have not been supplied with the quantity according to the contract, and you are now about 4,000 tons behind with deliveries, although not half the contract quantity has been delivered.

This entails on us a much greater expense in working than if the rails had been delivered as contracted for.

We regret again having to urge your delivery of the full quantity.

I am, &c.,

G. T. TAYLOR,

Secretary, Eskbank Iron Company.

For full report from Mr. Cowdery, as to time contract has to run, how many tons we are deficient to date, and what probability there is of supplying the quantity we are behindhand.—W.M.F., 25/4/89. Engineer for Existing Lines.

The contract will expire on 15th March, 1891. In accordance with the contract, the quantity of old rails supplied to the Company for re-rolling up to the end of last week, 20th instant, should have

	tons	cwt.	qr.	lb.	tons	cwt.	qr.	lb.	tons	cwt.	qr.	lb.
been	...	...	...	...	...	...	...	...	15,480	15	1	15
but the quantity supplied to that date was only	...	...	...	...	10,374	6	2	23				
Less used for rolling guards	...	84	4	3	18							
Old boilers sold to Company	...	106	9	0	12							
Returned to Department	...	20	13	0	0							
					211	7	0	2				
Net quantity	...								10,162	19	2	21
Deficiency	...								5,317	15	2	22

I do not think the Department will be able to supply the full quantity in the time.—G.C., 27/4/89. Secretary. Have instructions issued for all old rails on hand to be sent in for re-rolling as soon as possible.—W.M.F., 29/4/89. Engineer for Existing Lines. Noted, and all District Engineers instructed.—G.C., 30/4/89. Secretary. Seen.—W.V.R., 2/5/89.

The Secretary, Eskbank Iron Company, to The Commissioners for Railways.

Sirs,

The Eskbank Iron Works, Lithgow, 7 May, 1889.

Referring to the conversation with Mr. Sandford the other day, Mr. J. Rutherford, the Managing Director of the Eskbank Iron Company, will be seeing the Commissioners about other business during the week, when the subject of the conversation may be brought up with him.

I have, &c.,

G. F. TAYLOR,

Secretary, Eskbank Iron Company.

## Notes of Interview.

Office of the Railway Commissioners of New South Wales, Sydney, 9 May, 1889.

Notes of interview *re* the termination of contract with Eskbank Iron Company for re-rolling rails.*Present* :—The Chief Commissioner; Mr. J. Rutherford.

THE question of the terms upon which the Eskbank Iron Company should terminate the existing contract for re-rolling rails was discussed, and it was agreed without prejudice that the following proposal should be considered by both parties, *viz.*, that a sum of £7,500 in cash should be paid to the Company, the Company undertaking to purchase 10,000 tons of old iron rails within the next three years, at the price of £2 5s. per ton. A meeting to be held on the 15th instant to determine matter.

## Notes of Interview.

Office of the Railway Commissioners of New South Wales, Sydney, 10 May, 1889.

Notes of interview relative to contract with Eskbank Iron Company for re-rolling rails. *Present* :—The Chief Commissioner; Mr. A. Richardson, Comptroller of Stores.

It was intimated that the contract with the Eskbank Iron Company was for 25,000 tons, and that up to date 10,000 tons of old rails had been supplied, leaving 15,000 tons to be supplied, or 12,750 tons of re-rolled to be turned out by the Company.

The contract had two years to run, and we were unable to supply the quantity of old rails under the contract.

The saving that would be effected by cancellation of contract would be—

Inspection costs	... ..	£640 (2 years)
12,750 tons of rails, to be handled at 9d. per ton	... ..	478
Loss of weight in re-rolling process, at £2 5s. per ton	... ..	5,062
		£6,180

## Contract with the Esk Bank Company for re-rolling Iron Rails.

Original contract.

REFERRING to the enclosed form of agreement and our conversation on 11th instant, I shall be glad if you will let me know if, in your opinion, the Railway Commissioners have power to cancel this agreement by mutual consent, on terms to be agreed, and also to receive form of agreement to be executed by the Eskbank Iron Company on the one part and the Railway Commissioners on the other, cancelling the agreement on the following terms:—

£7,500 to be paid by the Railway Commissioners, and an undertaking to be given on their part to supply the Eskbank Company with 10,000 tons of iron rails during the next three years at £2 5s. per ton.

Crown Solicitor, 13th May, 1889.

E.M.G.E.

## The Crown Solicitor to The Railway Commissioners.

Gentlemen,

Crown Solicitor's Office, Sydney, 15 May, 1889.

I have the honor to state, with reference to your minute of date 13th May instant, referring to the proposed arrangement with the Eskbank Iron Company for the re-rolling of iron rails, that it is quite within your power to arrange with the Company for the cancellation of that agreement upon such terms as you may consider to be advisable, and that there is no objection to your entering into a written agreement to that effect, as to the form of which agreement I will forward draft for your approval in the course of the day.

I have, &amp;c.,

JOHN WILLIAMS,  
Crown Solicitor.

## Notes of Interview.

Office of the Railway Commissioners of New South Wales, Sydney, 15 May, 1889.

Notes of interview *re* the termination of contract with Eskbank Iron Company for re-rolling rails.*Present* :—The Commissioners; Mr. J. Rutherford.

THE proposal made at the meeting on the 9th instant was discussed, and it was determined that the contract should be terminated on the conditions then discussed, the Crown Solicitor to prepare the necessary agreement.

## Memorandum by The Railway Commissioners.

## Re-rolled Iron Rails Contract.

RE-ROLLED iron rails, such as have been turned out by the Eskbank Company, without the introduction of fresh material, are so soft that their life is exceedingly short, practically only a tenth of that of steel rails.

There are in stock about 11,700 tons of re-rolled rails, and they have been accumulating for nine years, in consequence of it having been considered unwise to put them into the main lines with the certainty of having to very soon incur the expense of replacing them.

New steel rails can now be obtained delivered in Sydney for about £6 per ton, and every ton of re-rolled rails, when putting together the value of the rails, cost of re-rolling, the loss of 15 per cent. of weight in the process of re-rolling, cost of inspection, handling, &c., has cost less than £7 11s.

Under

Under the contract, 12,750 tons of rails had still to be delivered for re-rolling, and we were unable to supply the requisite quantity. By the termination of the contract, the country will be saved in actual money, after purchasing steel rails of the same weight, about £19,760, besides which the steel rails will last quite ten times as long, and the cost of frequent relaying will also be saved.

The railway companies of the Old Country have for the last twelve or fifteen years abandoned the use of iron rails in consequence of the greater durability of steel rails, and this was done when steel rails were more than twice the price they are to-day.

### Memorandum of Agreement.

MEMORANDUM of agreement, made this 30th day of May, 1889, between James Rutherford, of Bathurst, in the Colony of New South Wales, grazier, and the Honorable William Forrest, of Brisbane, in the Colony of Queensland, gentleman, carrying on business together under the name, style, or firm of the Eskbank Iron Company, of the one part, and the Railway Commissioners, a corporation created by and under the Government Railways Act of 1888, of the other part. Whereas by an advertisement, of date the 22nd day of January, 1886, published in the New South Wales Government Gazette, the Commissioner for Railways for the said Colony advertised for tenders for the performance of the work for re-rolling rails upon the terms and conditions of a specification therein referred to, and whereas by a letter, dated 5th March, 1886, signed by William Sandford, on behalf of the Fitzroy Iron Company, and William Miller, on behalf of the Eskbank Iron Company, the said several Companies tendered to take delivery, re-roll, and deliver half the quantity each of the rails required to be re-rolled by the Railway Department, the minimum quantity to be 2,500 for each firm per annum for five years, the price to be £3 19s. per ton on unfinished rails, and to deliver 85 per cent. of new rails for every 100 tons of old rails delivered to the Companies, which tender was accepted by the Commissioner for Railways, the said tender, the specification therein referred to, and the acceptance of the said tender forming the contract between the parties. And whereas by a bond or writing, obligatory under seal bearing date 30th May, 1887, after reciting the advertisement for the said tender, the said tender and its acceptance by the Commissioner for Railways, James Rutherford, of Bathurst aforesaid, and the Honorable William Forrest, of Brisbane, carrying on business as the Eskbank Iron Company, and William Franklin Whitney, of Carcoar, and Robert Kelly, of Newtown, became bound to the Commissioner for Railways and his successors in the penal sum of £500, with a condition in the said bond in which, after reciting that the Eskbank Iron Company and the Fitzroy Iron Company, by the letter dated the 4th day of March last, jointly made the said tender thereunto annexed to re-roll and deliver a quantity of worn-out iron rails, that is to say, about 5,000 tons of rails per annum for the period of five years from the date of the acceptance of the tender, and to roll and deliver 85 tons of new rails for every 100 tons of old rails received by them, and to re-roll such rails at the rate of £3 19s. per ton, in accordance with the said specification which was annexed to the said bond, and reciting the acceptance of the said tender by the Commissioner for Railways, and reciting also that since the acceptance of the said tender the said Fitzroy Iron Company had requested to be allowed to withdraw from the said contract, and that the said James Rutherford and William Forrest, as the Eskbank Iron Company, should be permitted to enter into and carry out singly the whole of the said works, to which the said James Rutherford and William Forrest had agreed and the Commissioner for Railways had assented. The said bond was conditioned that if the said James Rutherford and William Forrest should perform the said tender and the contract entered into as aforesaid the said bond should be void, otherwise to remain in full force and virtue: And whereas the said James Rutherford and William Forrest entered upon the performance of the works in the said bond mentioned by them to be done and performed, and have acted in the performance thereof, and have received all payments due or payable to them in respect of the said works at the rate as abovementioned and agreed to this date: And whereas by the Government Railways Act of 1888 the Corporation known as the Commissioner for Railways was abolished, and a Corporation to be known as the Railway Commissioners of New South Wales was created, and by the said Act all contracts and agreements with the said Commissioner for Railways were thereby transferred to and vested in the said Railway Commissioners: And whereas the Railway Commissioners aforesaid and the said James Rutherford and William Forrest, trading as the Eskbank Iron Company, have agreed to terminate the said-recited agreement upon the terms following, that is to say:—That the Railway Commissioners shall pay to the said James Rutherford and William Forrest £7,500 of lawful British money, and shall sell to them within three years from the date hereof 10,000 tons of worn-out iron rails at or for the price or sum of £2 5s. per ton; the said rails to be delivered at Eskbank by the Railway Commissioners in about equal proportions during each year of the said term of three years, at or for the price of £2 5s. per ton, as and when such rails shall be delivered to them the said James Rutherford and William Forrest, and that the Railway Commissioners and the said James Rutherford and William Forrest shall execute mutual releases in respect of all claims, right of action or demands, causes of action or demand, which either of the said parties have or at any time hereafter would or might have against the other or others of them under the said contract: Now these presents witness, that in consideration of the premises and of the payment by the Railway Commissioners to the said James Rutherford and William Forrest of the sum of £7,500 of lawful British money at the time of the execution hereof (the receipt whereof is hereby acknowledged), and of the covenant on the part of the Railway Commissioners here and after contained, for the sale to the said James Rutherford and William Forrest of about 10,000 tons of worn-out iron rails, at the price and on the terms hereinafter mentioned, the said James Rutherford and William Forrest do hereby, for themselves, their executors and administrators, remise, release, and for ever quit claim unto the Railway Commissioners all and all manner of actions, suits, causes of action and suit, debts, sum or sums of money, claims, and demands whatsoever which they the said James Rutherford and William Forrest now have, or at any time hereafter might have, against the Railway Commissioners, for, by reason, or on account of the said-recited contract or agreement with the Commissioner for Railways or in respect thereof against the Railway Commissioners. And in consideration of the premises, the Railway Commissioners do hereby remise, release, and for ever quit claim unto the said James Rutherford and William Forrest, their executors and administrators, all and all manner of actions, suits, cause or causes of action or suits, accounts, sum or sums of money, claims, and demands whatsoever which the Railway Commissioners now have, or at any

time might have, against the said James Rutherford and William Forrest, for, by reason, or on account of the said-recited contract or agreement with the Commissioner for Railways, it being the intention of the parties hereto that the said contract shall be cancelled and put an end to as fully and completely as if the said contract had never been entered into. And there being at this time certain quantities of old rails at the works of the said parties hereto of the first part which have not been finally dealt with under the said agreement, it is agreed between the parties hereto as a substantive agreement, and not as a renewal or continuance of the said contract hereinbefore released, that the Railway Commissioners shall take over and pay the said parties hereto of the first part for all rails re-rolled to the date hereof at the price of £3 19s. per ton; that the said parties hereto of the first part shall take over all old rails at the works not commenced to be re-rolled, and pay the Railway Commissioners for same at the rate of £2 5s. per ton, unmanufactured; and also, all rails that are partially manufactured, at the same rate. And these presents also witness that for the consideration aforesaid the Railway Commissioners hereby covenant with and to said James Rutherford and William Forrest, their executors and administrators, that the Railway Commissioners shall and will sell and deliver at Eskbank to the said James Rutherford and William Forrest, within three years from this date, 10,000 tons, more or less, of worn-out iron rails at or for the price or sum of £2 5s. per ton, such rails to be delivered by the Railway Commissioners at Eskbank Iron Works in about equal proportions each year, and to be paid for from time to time, as delivered, at the said price or sum of £2 5s. per ton. In witness whereof, the said James Rutherford and William Forrest have hereunto set their hands and seals, and the Railway Commissioners aforesaid their Common Seal, the day and year first above written.

Signed, sealed, and delivered by the said James Rutherford }  
and by the said William Forrest, in the presence of,— }  
EDW. A. GADEN, Solicitor, O'Connell-street, Sydney.

J. RUTHERFORD.  
WILLIAM FORREST.

The Common Seal of the Railway Commissioners aforesaid }  
was affixed hereto in the presence of,— }  
W. V. READ.

E. M. G. EDDY,  
Chief Commissioner.  
CHARLES OLIVER,  
Commissioner.

We acknowledge to have received of the Railway Commissioners aforesaid the sum of £7,500, being the consideration money within mentioned to be paid by them to us.

J. RUTHERFORD.  
WILLIAM FORREST.

Witness—E. A. GADEN.

### Questions and Answers.

LEGISLATIVE ASSEMBLY, No. 40, WEDNESDAY, 12TH JUNE, 1889.

- (3.) Contracts with Mittagong Iron Works and Lithgow Iron Works:—Mr. Nicoll asked the Colonial Treasurer,—
- (1.) Have any arrangements been made for cancelling the contract with the Mittagong Iron Works and the Lithgow Iron Works for re-rolling iron rails?
  - (2.) If so, what compensation is to be given to these companies?
  - (3.) What is the intention of the Railway Commissioners *re* the disposal of old iron rails in the future?

Mr. McMillan answered,—

- (1.) Yes.
- (2.) £7,500. About £6,200 of this amount will be absolutely saved by avoiding the expense of keeping an Inspector at the works, and in avoiding a loss of 15 tons of rails on every 100 tons put in for re-rolling. A contract has also been made with the firm to take 10,000 tons of old iron rails at £2 5s. per ton, delivered within three years.
- (3.) To sell them to the best advantage.

1889.

No. 1.

Memorandum of Interview between The Commissioners and Mr. Evans.

Office of the Railway Commissioners of New South Wales,  
Sydney, 7 November, 1888.

THE Commissioners intimated to Mr. Evans that it was necessary for them to come to a decision at once as to increasing the stock of vehicles for carrying live stock traffic in the Colony. Before doing so, however, they were anxious to ascertain whether he would be willing to give the Commissioners the use of his combination truck on payment of a fixed sum per vehicle as royalty.

The Chief Commissioner pointed out that, although theoretically, there were a good many advantages in the combination truck, yet, practically, in the every day working of railways the advantages were far less than appeared on the surface, and a reasonable royalty would have to be fixed.

Mr. Evans stated that he feared that if he agreed to follow the course suggested by the Commissioners it would prejudice his position with the Government in regard to his claim for the absolute purchase of the patent rights in connection with his truck.

The Commissioners intimated that they could not enter in any way into the merits of this claim; neither did they wish to prejudice him in any way regarding it, but that as the general trade of the Colony was suffering from the present state of affairs it was necessary a decision should at once be come to in regard to constructing additional vehicles for live stock traffic, and unless an arrangement of the kind suggested was come to within a few days the Commissioners would have no alternative but to make other arrangements to meet the necessities of the case.

Mr. Evans promised to consider the whole question on behalf of himself and copartners, and give the Commissioners an answer in a few days.

It was clearly understood on both sides that whatever settlement may be come to it would not prejudice the existing question between Mr. Evans and the Government, but should the Government ultimately make any allowance to Mr. Evans on account of his claim, any royalty paid by the Commissioners under this arrangement would be accepted by him as in part liquidation of such allowance.

No. 2.

G. T. Evans, Esq., to The Railway Commissioners.

Gentlemen, "Verona," 10 November, 1888.

During the conversation which took place at our interview on the 7th instant, you requested me to state within a few days at what royalty the Commissioners might have the use in this Colony of the patented invention known as the Evans' combination truck. You will remember that at the interview I informed you that the Government had agreed to purchase the patent rights for this Colony for the sum of £16,000. You will find conclusive evidence of this in the Parliamentary papers on the subject, which the Legislative Assembly ordered to be printed on 5th October, 1887. Such

Such reference will at once convince you that it is out of the question for the patentees, who await the tender by the Government of the formal transfer of the patent rights (which they are ready to execute at any moment), to negotiate on the subject of sale or royalty. The purchase was made by the Government after they had been using fourteen of these trucks, built to their own order, for a period of two and a half years, and after they had themselves offered £15,000 for the patent rights, the original price asked for which was £17,000.

Personally I have no desire to do anything which might embarrass the Department, having regard to the admitted necessity for adequate provision being made without delay for the accommodation of the live stock traffic; but the patentees cannot, in justice to themselves, take up any other position than that which the Government, by its deliberate purchase, assigned to them.

I have, &c.,  
G. T. EVANS.

No. 3.

G. T. Evans, Esq., to The Colonial Treasurer.

Sir,

"Verona," 209 Cleveland-street, Sydney, 5 April, 1889.

I have the honor to invite your immediate attention to the papers connected with the claim of the Evans' combination truck proprietors for £16,000—sale to the Government of the patent rights of the invention entitled the Evans' combination truck.

These papers will show that everything has been done on the part of the proprietors to obtain a settlement of this matter without having recourse to legal proceedings, and, as it does not appear now to be possible to furnish further information to the Government, I shall be glad if you will have the whole subject looked into and settled.

That for a very long time the proprietors have been entitled to receive the sum of money mentioned, the letter of the late Commissioner for Railways to Mr. H. Halloran of 8th September, 1887, and the minute of Mr. Richardson to the Crown Solicitor of 12th idem, will clearly show.

No reasons have ever been assigned by the Government for the delay in paying the money, and in appealing to your experience as a man of business and your appreciation of what is fair, I am confident that you will give this letter an immediate and favourable reply.

I have, &c.,

GEORGE T. EVANS,  
(Pro Proprietors of E.C. Truck.)

[Enclosures.]

RAILWAYS.

(FURTHER CORRESPONDENCE RESPECTING EVANS' PATENT COMBINATION TRUCK.)

Ordered by the Legislative Assembly to be printed, 5 October, 1887.

No. 1.

The Locomotive Engineer to The Commissioner for Railways.

Centre-bar of Combination Truck No. 15—broken.

I HAVE to report, for your information, that combination truck No. 15 arrived at Dubbo by No. 68 up, on the 16th instant, loaded with sheep. When examining the train, it was discovered that the centre-bar, which hold the flaps of top deck, was broken, which allowed the flaps and top sheep to fall to the bottom.

The truck was taken to the cattle-yards, and the sheep unloaded, when it was found that twelve sheep were dead. The remaining sheep were loaded into sheep-van No. 220, and went on by No. 70 up on the same day.

W. SCOTT, 18/11/86.

Do nothing to the van till it is returned to Sydney.—CHAS. A.G., 18/11/86. I wish a searching investigation to be made into the cause of this failure.—CHAS. A.G. Loco. Engineer.—D.C.M'L., 19/11/86.

Accident—Combination Car 15.

THIS car arrived at Dubbo from Bourke at 7:30 p.m. on the 16th instant, loaded with sheep, and it was observed that the main support of the top deck had broken in two, and the flooring resting on the sheep below, which were released as quickly as possible, but twelve of them were dead. The remainder were reloaded into a spare sheep-van and forwarded to destination.

I shall be glad to be informed when the inquiries are completed what caused the breakage.

There were sixty sheep on each deck when despatched from Bourke.

This is the vehicle that was a cattle-truck and was altered under Mr. Evans' supervision into a combination truck.

W. V. READ,  
(Per D.K.), 18/11/86.

Loco. Engineer.—D.C.M'L., 19/11/86.

MEMO.—This is the truck that was altered under Mr. Evans' supervision, at a cost of £95.—W.S. (per R.J.S.), 18/11/86.

Minute of Secretary for Works.—Should like a thorough examination to be made of this truck by some disinterested person outside the Department.—W.J.L., 20/11/86. Who can be recommended?—21/11/86. Locomotive Engineer.—CHAS. A.G., 29/11/86.

Two gentlemen occur to me as qualified, viz., Mr. Ritchie and Mr. Brodie, both of whom have had experience of rolling-stock work, but at present have nothing to do with the Department in any way.—W. SCOTT, 23/11/86. The Commissioner.

Mr. Ritchie is, I think, managing for Hudson Brothers—the rival firm. To appoint him would be out of the question. Ask Mr. Brodie to see me.—CHAS. A.G., 25/11/86. Mr. Ritchie is not now managing for Hudson Brothers. He severed his connection with the firm some time ago.—D.C.M'L., 25/11/86.

I have seen Mr. Brodie. He used to manage for P. N. Russell & Co., and built for us the first railway carriages made in the Colony. Mr. Brodie afterwards, on his own account, constructed a large number of D trucks for the Department. He is not now engaged in the business, but has taken to bricks and mortar. He is well qualified to conduct this inquiry.—CHAS. A.G., 29/11/86.

Minute of Secretary for Public Works.—Approved.—W.J.L., 29/11/86.

Letter to Mr. Brodie. Send copy, with these papers, to Mr. Scott, and ask him to give Mr. Brodie every facility for the examination of the car.—CHAS. A.G., 30/11/86. Attended to. Locomotive Engineer.—D.C.M'L., 1/12/86. Assistant Locomotive Engineer.—W. SCOTT, 3/12/86. Arrangements made and every facility was rendered Mr. Brodie.—G.D., 4/12/86.

## The Commissioner for Railways to Mr. D. Brodie.

Sir,

Department of Railways, Sydney, 30 November, 1886.  
 With reference to your recent interview with me, I have the honor to request that you will be good enough, at your earliest convenience, to make an examination of a truck known as combination truck No. 13, now standing in the Redfern yard, and to report thereon.

The following statement of facts is necessary to enable you to comprehend fully the nature of the duty which I ask you to perform, and the direction which your inspection will have to take.

There is in existence, as you are doubtless aware, a patented truck, styled the "Evans Combination Truck." The proprietors of this truck have been pressing the Department to purchase the patent, and with a view to show the adaptability of the design to our present stock, and how easily and cheaply the stock could be converted, they some time ago obtained permission to alter one of our cattle-vans to the combination type, the understanding necessarily being that it should be made in all respects like a combination truck. The alteration was carried out by Mr. Wearne, under the supervision of Mr. Evans; and it is the altered truck which I now ask you to report upon.

The truck in question made its first journey, laden with sheep, on the 16th instant; and, on being examined on arrival at Dubbo, it was discovered that the centre-bar, which supports the upper deck, was broken in two, causing that deck, with the sheep upon it, to fall down upon the sheep beneath, no less than twelve of which were killed.

It is highly important that the real cause of the accident should be discovered, and it is in this view that I have asked you to inspect the truck.

I shall be glad if you will subject it to a searching examination, and let me have your independent and unbiassed opinion as to the origin of the accident. In the event of your requiring any evidence, Mr. Scott, the Locomotive Engineer, will no doubt furnish it. Mr. Wearne, who made the alterations in the truck, Mr. Evans, who superintended the work, and Mr. Braid, who inspected the truck when completed, might perhaps be called; but in this you will of course exercise your own judgment.

I have, &amp;c.,

CHAS. A. GOODCHAP,  
 Commissioner for Railways.

Mr. D. Brodie to The Commissioner for Railways.

Sir,

Annandale, 8 December, 1886.

In accordance with your instructions of 30th ultimo, I went to Redfern Railway Station and examined the truck known as "Combination Truck No. 15," and find the centre-bar, which was broken, the cause of the accident. This bar, being 17 feet 4 inches in length, and only 4 in. x 4 in. square of Oregon pine, without any supports between the ends, was, in my opinion, too weak for the purpose. Added to this, I find a flaw in this centre-bar which may have escaped the notice of Mr. Wearne or his men, but which tended to make it still weaker. I may state, in company with Mr. Scott, I saw the combination truck No. 13, and find, had No. 15 truck, when being altered, have had a partition similar to the one in No. 13 combination truck which acts as a support of the longitudinal bar, the accident would not have occurred. I may, in conclusion, state that I consider No. 13 combination truck, in certain details as to flats, hinges, &c., a superior truck, and that the workmanship in No. 15 truck was badly done.

I have, &amp;c.,

DAVID BRODIE.

For the Minister's information.—CHAS. A. G., 17/12/86. Seen.—W. J. L., 18/12/86. What is to be done with this waggon? It is useless in its present form. I propose that it be strengthened, so as to answer the purpose for which it was constructed.—CHAS. A. G., 20/12/86.

Minute of Secretary for Works.—Yes; let it be repaired and strengthened.—W. J. L., 24/12/86.

Locomotive Engineer.—D. C. M. L., 29/12/86. To Assistant Locomotive Engineer.—W. Scott, 30/12/86. Instructions given for the work to be done. Locomotive Engineer.—GEO. DOWNE, 5/1/87.

## No. 2.

## Minute by The Commissioner for Railways.

THE Minister is desirous of having an independent investigation into the merits of the various stock-cars that have been submitted for adoption on our railways. They are—

1. The Evans' car.
2. The Wilkinson car.
3. The Perry car.

The Minister considers that if a good traffic man, an experienced waggon builder and designer, and a practical stock agent were appointed a Board to investigate the question and report upon the designs of car under offer, the real merits of the case would be ascertained.

For this purpose, as regards two of the three members of the Board, he wishes telegrams sent to the Commissioner for Railways, Queensland, asking for the services of Mr. Thallon, Traffic Manager, and to the Board of Commission, Melbourne, for the services of their Chief Designer of Rolling Stock.

Please send telegrams accordingly.

Telegrams sent.—D. C. M. L., 7/12/86.

CHAS. A. G., 7/12/86.

## Combination Stock and Goods Trucks.

ON 7th December, 1886, the Commissioner directed that an independent inquiry should be made respecting the relative merits of the various trucks of the above design submitted to the Department—

1. Evans.
2. Wilkinson.
3. Perry.

And to this end suggested the appointment of the following gentlemen:—

- Mr. Thallon, Traffic Manager, Queensland Railways.  
 Mr. Badgery, Stock and Station Proprietor.  
 Mr. Gill, Foreman of Waggon Shops, Victorian Railways.

The services of these gentlemen have been secured, and arrangements have been made for their first sitting on the 20th instant, of which the parties interested are to-day being duly advised.

A. RICHARDSON, 11/1/87.

For Minister's information.—CHAS. A. G., 11/1/87.

Minute of Secretary for Works.—Approved.—W. J. L., 11/1/87.

## Combination Car Commission.—Report of Board, Friday, 28th January, 1887.

THE Board held nine meetings from the 19th to the 28th January inclusive. Fifteen witnesses were examined, comprising the inventors, men experienced in loading and unloading and travelling with stock, as well as officers of the Railway Department skilled in the construction of rolling-stock.

The Board visited the unloading station at the saleyards, Flemington, on the 19th instant, to witness unloading of stock and examination of Evans' truck, which is the only combination truck in use.

On the 22nd instant the Board visited the works of Messrs. Hudson Brothers, at Clyde, to inspect a truck in course of construction, the invention of Mr. W. B. Wilkinson, of Dubbo; and on 27th instant the same truck was again inspected at Flemington.

The instructions to the Board by the Commissioner for Railways were:—To inquire into the relative merits of three designs of combined-stock and goods-trucks for use on the Railways of this Colony, to take evidence thereon, and to make a report and a recommendation; but the Board, believing the great object in view was to recommend the truck most suitable

suitable for the conveyance of all classes of stock, as well as merchandise, permitted a number of persons who had models or plans of new inventions pertaining to combination trucks to exhibit them, and explain the mode of working and advantages they claim for their inventions. The great difficulty in providing a truck suitable for sheep and cattle lies in the fact that for sheep in upper and lower decks there must be abundant ventilation, and for cattle, as near as possible, a perfectly smooth surface inside to avoid injury, and to prevent cattle from seeing out.

The Board desires to express an opinion that it will not be possible to adopt a combined truck to thoroughly answer all the requirements of a stock truck, and at the same time possess the advantages of a merchandise waggon to such an extent as to supersede the present D trucks; but the models submitted prove that it is possible to construct a waggon suitable for both sheep and cattle, and, to some extent, for merchandise as well, thus enabling the Department to utilize it for up-country loading, instead of returning it empty, as has been the practice hitherto with the ordinary sheep-trucks.

The trucks and models submitted may be briefly described as follow:—

No. 1.—*Mr. George T. Evans* submitted two combination trucks, both of which he claimed were suitable for sheep, cattle, or merchandise. In one truck there is a division in the centre, thus forming four compartments for sheep, or two for cattle, and the other having no division; otherwise the chief features in these trucks are the same, viz., that the top deck necessary for the sheep-van is formed of several parts, and supported by a beam lowered from the roof, and by hinges at the sides of the truck which admit of the top deck, when not required for sheep, being lowered so as to form the sides of a cattle or merchandise waggon.

The weights of the trucks are—with the division, 7 tons 7 cwt. 1 qr.; without the division, 6 tons 12 cwt. 3 qrs.

No. 2.—*Mr. Thomas Perry* submitted a model of a combination truck, the principal of which was that the upper deck required for sheep was balanced by weights on the outside of each end, and lowered to the middle of the truck, or raised to the roof as required, for sheep or cattle; no alteration being made in the sides of the truck in either case. *Mr. Perry* claimed certain advantages in the under-frame of his truck which would reduce its weight, but it appeared that this did not affect the combination principle, as the same, if considered an advantage by the Department, was equally applicable to all classes of waggons. It was impossible to arrive at the weight of the truck from the model submitted; but we are of opinion the movable floor and balance-weights could not be less than 16 cwt., which would have to be added to the weight of the cattle-truck. It appeared also that as the truck was necessarily close for cattle sufficient provision could not be made for ventilation in the case of sheep. A commendable feature in this truck is that provision is made for draining the top deck, and also the rapidity with which the top deck can be raised or lowered.

No. 3.—*Mr. W. B. Wilkinson* submitted a combination truck, the chief feature of which was its adaptability to the system of end as well as side loading. Although the bulk of the evidence taken goes to show that end-loading is not the great advantage its advocates claim for it, we desire to point out that the witnesses examined have had only a very limited experience, and even that has been confined to trucks of the present pattern with fixed floors. In *Mr. Wilkinson's* truck provision has been made for the loader to walk from end to end of the train in an upright position on both floors, thus giving him control of the sheep, and a better opportunity of regulating the number in each truck. On the other hand, he has not overcome the difficulty of providing ample ventilation for sheep, or a smooth surface for cattle, and we consider his invention defective in these respects.

The weight of this truck is 7 tons 15 cwt. 2 qrs.; the floor area is 270 feet, or 65 lb. per square foot for sheep, and 135 feet for cattle.

*Mr. Wilkinson* stated in his evidence that the weight could be greatly reduced, but making every allowance for the alterations he mentioned, the truck must still remain very considerably heavier than the present sheep van. It is impossible to say what the expense of this truck, if adopted, would amount to; but the Board is of opinion, judging from the number of parts, that the cost must be excessive compared with the present design of sheep-van or cattle-truck, and considerably higher than either of the other two combination designs.

The Board was desirous of testing *Mr. Wilkinson's* truck as to end-loading, and arrangements were made with the Department, stockowners, and others to have the end-loading trucks now in use and a sufficient number of sheep at Homebush on Wednesday, 26th instant, but in consequence of *Mr. Wilkinson's* truck not being sufficiently advanced this had to be abandoned.

No. 4.—*Mr. Mulholland* submitted an imperfect model of a combination truck, available for sheep and cattle, embodying an ingenious system of end-loading, but inasmuch as he had made no provision for the smooth inside surface required for cattle, we considered his design defective.

A number of other models and plans were submitted, but none of them possessed such improvements as would warrant the Board in suggesting the adoption of their principles.

The Board intimated to the principal stock and station agents in the city the purpose for which it was sitting, and invited them to come forward with any suggestions they had to offer, but no one took advantage of the opportunity.

After inspecting the trucks, models, and plans submitted, and after carefully considering all the evidence, the Board is unanimously of opinion that the converted truck, without division, submitted by *Mr. Evans*, combines more advantages than any of the others. As a sheep-truck it gives more head room than the present pattern, while the ventilation at the sides and ends is all that could be desired. Compared with the sheep-trucks now in use, it gives a floor area of 280 feet for 6 tons 12½ cwt., or 1 square foot for every 53 lb.; whereas the sheep-truck has a floor area of 241 feet for 6 tons 17 cwt., or 1 square foot for every 63½ lb.

As a cattle-truck it gives considerably more head room, which is a decided advantage, as can be seen by the marks of the cattle's horns on the roof of the present trucks; on the other hand, it is 8½ cwt. heavier than the cattle-truck now in use.

As a merchandise truck it certainly is much heavier than the ordinary goods-waggon; but the evidence of the Department goes to prove that it has been largely used for the conveyance of all classes of goods to stations beyond Dubbo, and gives every satisfaction.

Another special advantage this truck possesses over other trucks is the fact that the floor of the upper deck, instead of being raised to the roof, thereby increasing oscillation, and straining the frame of the truck by unnecessarily adding to the top weight when the waggon is used for merchandise or cattle, is lowered, and forms a smooth side for cattle or merchandise. None of the parts, with the exception of the beam for supporting the top deck, are out of use at any time in the conveyance of sheep, cattle, or merchandise.

It is a question with the Board whether the flaps forming the top deck would be strong enough to withstand the tear and wear they would be subjected to if largely used for cattle; but in any case instructions should be given to all concerned, in the event of this truck being adopted, to lower them steadily, instead of allowing them to fall, when converting from a sheep to a cattle waggon.

The Board is also of opinion that the longitudinal beam should be supported by a prop fitted into a socket in the bottom floor when the truck is used for sheep, and which, when not required, could be carried up by the beam, to which it should be attached by hinge and loop.

A drawback to this design is the position of the doors for sheep, one being directly above the other, which necessitates the two decks being loaded or unloaded separately; but this would be overcome by inserting a door for sheep in the centre of the top deck.

Another disadvantage mentioned by several witnesses is that the floor of the top deck is higher than the present sheep-races, but this could easily be met by a movable board in the race.

To place the relative merits of the three best designs of combination cars more clearly before the Department the Board submits the following table:—

	Points considered separately.	Evans' Truck without division.	Perry.	Wilkinson.
Compared with the trucks now in use in the Department, and assuming their value at 10 points each.	Cattle-truck .....	9	7	5
	Sheep-van .....	12	4	8
	Goods-van .....	7	4	6
	Cost of combination parts .....	4	5	3
Considerations of secondary importance, assuming 5 points as the maximum.	Simplicity and strength of combination parts .....	4	5	4
	Weight per foot of floor area .....	5	4	3
	Facility for converting .....	4	5	4
	For end-loading .....	.....	.....	5
		45	34	38

The Board desires to express its opinion that the division inserted in Evans' Combination Truck is a decided disadvantage in the case of cattle or merchandise; while in the case of sheep, the advantage, if any, is very questionable, and causes great inconvenience and loss of time in loading and unloading. The workmanship upon the truck without division is certainly inferior in some respects, but that could be remedied without materially adding to the weight or cost, and in no way affects the design.

The question of cost of the different models could not be accurately ascertained; but Mr. Evans' Combination Truck without division is, in the opinion of the Board, the most economical and suitable in every way for the conveyance of sheep, cattle, and merchandise, and we recommend accordingly.

HENRY S. BADGERY.  
J. F. THALLON.  
J. GILL.

The Hon. John Sutherland, Minister for Public Works, Sydney.

No. 3.

H. Halloran, Esq., to The Commissioner for Railways.

Sir,

I have the honor, on behalf of the proprietors of the patent for Evans' Australian Combination Trucks, and with reference to my letter of the 18th December last, to request to be favoured, at your earliest convenience, with a settlement of the important matter therein involved.

As I understand that the Board appointed by the late Government reported in favour of the Australian Combination Truck to which I refer, I would suggest that a decision may be speedily arrived at.

I have, &c.,

HENRY HALLORAN.

Minute of the Commissioner for Railways.—There is some considerable doubt as to what the Board did recommend. I think it would be well to send a copy of the Board's report to the press in the first instance before any final action is taken.—CHAS. A.G., 8/3/87.

No. 4.

H. Halloran, Esq., to The Commissioner for Railways.

Sir,

I do myself the honor to invite your attention to my letter of the 3rd ultimo, in the matter of Evans' Australian Combination Truck, and the purchase by the Government of the right of patent for the same, and to say that the gentlemen whom I represent in the matter are very desirous of a settlement of the important question now before you.

I have, &c.,

HENRY HALLORAN.

No. 5.

H. Halloran, Esq., to The Secretary for Public Works.

Sir,

On behalf of the proprietors of the patent for Evans' Combination Truck, and with reference to the correspondence which has taken place, extending over a great many months, to the personal interview with which you favoured me, and the decision which I had hoped it might have been possible for you thereafter to arrive at, the report of a Board appointed and continuing at a very considerable cost, absolutely in favour of the Evans' Combination Truck over the other inventions of a similar character, I have now the honor to express a hope that you may be in a position soon to come to a decision in the matter.

Knowing how strongly interested you have shown yourself to be in matters of progress and public prosperity, and that the adoption of the offer of the patent belonging to the gentlemen whom I represent herein will be to the advantage of the public, and a saving to the revenue and a great general convenience—a matter in which I personally feel no small interest as a colonist and a citizen—and knowing, further, that the gentlemen concerned in the patent, though they have stated a price, are quite open to meet the Crown by the acceptance of such a price, equitable and considerate, as may be offered to them, for the great advantage which the legal use of their patent will secure to the Department, the revenue, and the public, I beg to express a hope that the question may be soon decided in such a way as may appear to you fair to all interests involved under the circumstances.

I have, &c.,

HENRY HALLORAN.

Minute of the Secretary for Public Works.—I require all the papers on this subject, with a *précis* of the whole case, by Monday next, that the Commissioner and I consult on what is best to be done in this important matter.—J.S., 17/8/87.

REPORT of the Committee appointed to inquire into the relative merits of certain designs of combined Goods and Live Stock Trucks.

WHEN the Live Stock Board was sitting in 1884, the Evans Combination Truck was brought under the notice of the Board, and in their report they referred to it in terms of commendation, and recommended that four of the trucks should be built for trial.

The Commissioner had already formed a favourable opinion of the truck, and he, with a view to a perfect trial being made recommended that fourteen trucks should be obtained, which Mr. Secretary Wright approved.

In due course the fourteen trucks were put into use, and after trial were reported upon by the Traffic Manager in terms which, on the whole, were favourable.

In March, 1886, Mr. Halloran, on behalf of the patentee, offered the entire patent of the truck to the Government for the sum of £17,000.

The merits of the truck, however, were not so well established as to warrant so large an expenditure at present, and moreover the enormous cost of introducing new stock, or altering the existing stock, was a point which required grave consideration.

Subsequently, Mr. Halloran intimated that the patentees were open to an offer.

Mr. Halloran made an offer to convert our existing stock of trucks to the Evans' pattern at the following prices:—For the old narrow trucks, £140 each; for the wide trucks, £130 each.

About this time, Mr. T. Perry and Mr. W. B. Wilkinson brought rival designs of combination trucks under the notice of the Commissioner, and on the 9th December, 1886, the Minister decided that a Board, consisting of a traffic expert, an experienced waggon builder, and a practical stock agent, should be appointed to inquire into and report upon the relative merits of the three designs; and Mr. Thallon, Traffic Manager of the Queensland Railways, Mr. Gill, of the Waggon Department, Victorian Railways, and Mr. H. S. Badgery were appointed accordingly.

It appears that the only one of the competing trucks the Board had an opportunity of seeing in actual use was the Evans' truck, and this was due to the circumstance of a number of them having been built by the Department.

After examining a large number of witnesses, the conclusion arrived at by the Board was that the Evans' improved truck was the most economical and the most suitable in every way, and they made their recommendation accordingly.

Mr. Thallon (being urgently required at home) quitted Sydney immediately after signing the report.

Mr. Halloran has written from time to time, pressing the Minister to come to a speedy decision with regard to the offers made on behalf of the patentees of the Evans' truck.

He now again writes, referring to the decision of the Board in favour of the Evans' truck, and to the offers made by the patentees to the Government. He says that although a definite sum has been asked for the patent, the persons interested are prepared to accept such a price, equitable and considerate, as may be offered them, and he (Mr. Halloran) hopes that a decision will be speedily arrived at.

Mr. Secretary Sutherland asks for the papers, with a *précis*, in order that he and the Commissioner may consult as to what is best to be done in this important case.

C.A.B., 19/8/87.

No. 6.

No. 6.

Mr. A. Wilson to The Secretary for Public Works.

Dear Sir,

7 Bent-street, 27 August, 1887.  
As I believe it will shortly be necessary to build a number of stock-waggons, and also probably to improve some of the old ones, I wish to bring under your notice the fact that on several occasions my firm have been requested to secure the use of those known as Evans' Combination Truck. On all sides I have heard the most encouraging reports as to their general convenience.

You have doubtless at your command a mass of information referring to various patents, but I feel sure the merits of that referred to speaks for itself.

I have, &c.,  
ALEX. WILSON.

No. 7.

Mr. A. Wilson to The Secretary for Public Works.

Sir,

I beg to address you on the Evans' Combination.

"Asche's Royal Hotel," Sydney, 29 August, 1887.  
I have been asked by many large and practical stockowners to bring under your notice the above mentioned truck, and ask you if there is any likelihood of its being adopted by your Department.

They know I am one of the shareholders, and advise me to push the matter, saying that the work done by the fourteen now in use (two years) speaks for itself. Mr. Samuel M'Caughy, one of our largest stockowners and a most practical man, was positive of its success the first day he saw it. He wrote several letters to this effect to the daily prints some time ago when the matter was before the Department, he being absolutely disinterested. His opinions should carry weight, as also will the fact that many stockowners instruct their agents to secure these trucks instead of the old ones. It is the only real combination truck before your Department.

I have, &c.,  
A. C. WILSON.

No. 8.

Phillip, Somer, &amp; Co., to The Commissioner for Railways.

Sir,

Nevertire, 4 September, 1887.  
We, the undersigned stock agents, seeing by the *Daily Telegraph* of the 3rd instant that there is a likelihood of the truck known as "Evans' Patent Combination" being accepted by the Department as the truck for carriage of live stock throughout the Colony, hereby enter a protest, upon the grounds that we have used the truck for both sheep and cattle, and find the patent inconvenient and impracticable, and not so good as the present sheep or cattle trucks now in use.

PHILLIP, SOMER, & CO.,  
Agents for Nevertire.

No. 9.

Railways.—Particulars of Service of Combination Trucks.

A RETURN of the Earnings and Mileage of the Combination Trucks now in use, from the 1st January to 30th June, 1886, distinguishing goods freight and live stock freight as compared with ordinary trucks.

EARNINGS and Mileage of the Combination Trucks as compared with other Live Stock Trucks during the period ended 30th June, 1886.

I ATTACH a return giving the information in as complete a form as it is possible to give it, without entailing a very great amount of extra time and labour to render it more complete.

The particulars supplied in regard to the combination cars, of which there are only fourteen, took a considerable time to compile, but it can readily be seen what labour was involved to get less complete information in regard to 272 sheep-vans and 300 cattle-waggons, while it must be apparent that the separation of the mileage run by these vehicles with live stock and goods traffic means an enormous amount of additional work.

W. V. READ, 24/8/87.

For the six months ended the 30th June, 1886.

No. of Trucks in use.	Live Stock.		Goods Traffic.		Totals.		Loaded Mileage. Per Mile.
	Loaded Mileage.	Earnings.	Loaded Mileage.	Earnings.	Loaded Mileage.	Earnings.	
Combination cars..... 14	55,232	£ 1,131 1 11	63,227	£ 4,203 10 4	118,459	£ 5,334 12 3	10½d.
Sheep-vans ..... 272	.....	39,767 7 0	.....	.....	1,764,491	39,767 7 0	5½d.
Cattle-waggons ..... 300	.....	36,311 11 4	.....	2,949 0 3	1,560,238	39,260 11 7	6½d.
	.....	77,210 0 3	.....	7,152 10 7	3,443,188	84,362 10 10	

Empty mileage run by combination cars ... .. 24,629, making gross 143,088 miles.  
" " sheep-vans ... .. 1,400,911 " 3,165,402 "  
" " cattle-waggons... .. 1,250,794 " 2,811,032 "

2,676,334 " 6,119,522 "

It is impossible to give the separate mileage run by cattle-waggons and sheep-vans with live stock and goods traffic without entailing a very large amount of labour and time to do so.

The information was asked for in a question. No resolution was passed. Will Commissioner please say whether it is to be laid upon the Table?—D.C.M'L., 26/8/87.

I do not know whether it is necessary to lay it upon the Table, but the document itself tells a significant story in favour of the combination trucks. For empty and full running mileage they have earned nearly 9d. a mile, while the cattle and sheep trucks have earned only something less than 3½d. per mile for six months' running. The empty running with the combination trucks was 19 per cent. of the full running, while the empty running was 44 per cent. in the case of the other live stock waggons. If the ordinary live stock waggons had earned as much as the combined waggons per mile travelled, the revenue would have been, instead of £79,027, no less than £224,116, or £145,089 more. It is not likely, of course, that the traffic would have been so adjusted as to admit of this large extra amount being earned, but I think 20 per cent. of it would have been; and that is a very low estimate. Even this would show a profit of £29,018 in six months.—CHAS. A. G., 26/8/87.

NOTE.—The above was submitted to Mr. Secretary Sutherland, together with all the papers bearing upon the offer of the patentees of the truck to confer their rights upon the Government, in consideration of the payment of the sum of £17,000. In view of the highly satisfactory results disclosed in this statement, in respect of economy from working the traffic with this truck, the Minister intimated to ask the patentees if they were prepared to accept the sum of £15,000.

The Commissioner for Railways to Henry Halloran, Esq., C.M.G.

Sir,

Department of Railways, Sydney, 3 September, 1887.  
With reference to your letter of the 16th ultimo and previous communications, offering, on behalf of the proprietors of the patent of "Evans' Australian Combination Truck," to sell to this Department the legal right to such invention, I have the honor, by direction of the Honorable the Minister for Works, to inquire whether the proprietors will accept the sum of £15,000 for the right to use their patent and all improvements effected therein.

I have, &c.,  
CHAS. A. GOODCHAP,  
Commissioner for Railways.

Henry

Henry Halloran, Esq., C.M.G., to The Commissioner for Railways.

Sir,

I have the honor to acknowledge the receipt of your letter of the 3rd instant, inquiring, with reference to previous correspondence, whether the proprietors of the patent of Evans' Australian Combination Truck are willing to accept the sum of £15,000 for the right to use their patent and all improvements effected therein; and in reply I am directed to submit, for the consideration of the Honorable the Minister for Public Works, that considering the great superiority of this invention over any other of the like sort, as unanimously reported by the Board appointed by the Government to investigate, and who strongly recommends its adoption, and the great financial saving which its adoption will secure—considering also the time that has elapsed since the patent was put under offer to the Government, and that the loss thereby occasioned to the proprietors—the offer of £15,000 appears an inadequate one; but that, as the Government bore all the cost of the Board appointed to test its superiority, they are willing to split the difference, and to accept the sum of £16,000, a sum which it is hoped, in the interests of the public, may be allowed to them, and which sum I am authorized to accept, and do hereby formally accept on their behalf, if the Government concur therein without further delay, for the legal right of patent and all improvements hereafter made therein in the Colony of New South Wales.

I have, &c.,

HENRY HALLORAN,

Agent for the Proprietors of Evans' Australian Combination Truck.

If the Minister approves of this amount being paid for the patent, I would recommend that no time should be lost in having our present live stock vans converted into combination trucks, and that tenders for this service be invited.—CHAS. A. G., 6/9/87.

Approved. I understand there are some eighty trucks lying at Wallerawang sidings, and others which have been condemned which require reconstruction. Let these first be taken in hand, if they can be reconstructed. There are documents in the Department to show which trucks require to be done, but whether new or old trucks are taken in hand they must be made according to the model now in the contractor's yard (Mr. Glasson). This truck should now be taken out and placed in the railway yard as a sample.—J.S.

The Crown Solicitor to draw up agreement for use of patent for New South Wales Railways; the consideration money, £16,000.—CHAS. A. G., 7/9/87. The Crown Solicitor.—A.R. (for Commissioner for Railways).

The Commissioner for Railways to H. Halloran, Esq.

Department of Railways, Sydney, 8 September, 1887.

With reference to your letter of the 5th instant, stating that the proprietors of the Evans' Australian Combination Truck design will accept the sum of £16,000 for their legal right therein, I have the honor to inform you that the Secretary for Public Works has approved of the acceptance of the terms named in your communication; but, before final settlement is made, it is necessary that an agreement should be drawn up and executed, conferring upon the Government patent rights for the use of the invention.

Instructions will be at once given to the Crown Solicitor for the preparation of the necessary document.

I have, &c.,

CHAS. A. GOODCHAP,

Commissioner for Railways.

Mr. A. Richardson to The Crown Solicitor.

The Honorable the Minister for Public Works having decided to accept a proposal made to him by the proprietors of the Evans' Australian Combination Truck to purchase the patent for New South Wales of that vehicle for the sum of £16,000, I have to request that the Crown Solicitor will be so good as to prepare, at his early convenience, the necessary deed of assignment of the patent.

The proprietors are to assign to the Government the patent right in the truck and any improvements which may hereafter be made in it.

I enclose the Letters of Registration in favour of Henry, William, and Thomas Hudson and Ambrose Thornley; assignment by Thornley of his right in the patent to the Messrs. Hudson; and final assignment of the patent by the Messrs. Hudson to G. T. Evans and A. Thornley, the present proprietors; also, letter of 5/9/87 from Mr. Halloran.

A. RICHARDSON, 12/9/87.

The Crown Solicitor to The Commissioner for Railways.

Crown Solicitor's Office, Sydney, 21 September, 1887.

In compliance with your verbal request, I have the honor to return herewith Mr. Halloran's letter to you of date 5th September instant (87-3,757 D-59) with reference to the proposed assignment to the Government of the invention entitled "Evans' Australian Combination Truck."

I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

The Crown Solicitor to The Commissioner for Railways.

Crown Solicitor's Office, 23 September, 1887.

I am directed by the Honorable the Attorney-General to return the papers referring to the purchase from Messrs. Evans and Thornley of the "Evans' Australian Combination Truck" to you, as it is understood that they are to be laid before the Cabinet for further consideration.

I therefore return the papers herewith.

I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

#### No. 4.

The Crown Solicitor to The Railway Commissioners.

Gentlemen,

Crown Solicitor's Office, Sydney, 3 May, 1889.

I have the honor to inform you that I have this morning been served with the statement of claim in the suit, Evans and another v. The Railway Commissioners, which I forward herewith.

Will you please instruct me as soon as possible as to the nature of the defence, if any, you intend to set up, and also forward the papers in the matter to me.

I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

I return papers herewith. The Commissioners desire me to say, that the paper enclosed by you, viz., statement of claim and also copy of Mr. Salomons first advising, has been left by them with the Hon. the Minister for Railways.—H.M'L. (pro Secretary), 29/5/89. Crown Solicitor.

#### No. 5.

The Crown Solicitor to The Railway Commissioners.

Evans and another v. The Railway Commissioners.

Gentlemen,

Crown Solicitor's Office, Sydney, 27 May, 1889.

I have the honor to inform you that it being necessary to prepare a statement of defence in this matter, I delivered brief to Mr. Salomons, Q.C., and Mr. A. H. Simpson for a consultation thereon.

It will be seen by the papers, that on 13th September, 1888, Mr. Salomons advised after a careful consideration of the high authorities noted at the foot of his opinion, that there had not been any final agreement binding upon the Government, and for reasons therein stated, he advised "that apart from the defence of no contract" the plaintiff be by the usual pleas put to proof of the validity of the alleged patent."

It

It was upon this advising of Mr. Salomons that the Department has proceeded to defend this suit. I now forward a copy of Counsel's joint advising from which it will be seen that Mr. Salomons has apparently altered his opinion, and it will be seen by the joint opinion of Mr. Salomons and Mr. A. H. Simpson, it is now advised that the plaintiff's claim shall be recognized and the action settled.

Will you please instruct me what action I am to take in this matter.

I may suggest that it is desirable that the Honorable the Minister should be referred to in this matter, and that if, as I suppose, under Counsel's advice the action has been settled, this should be considered as a confidential communication and not be discussed in the Department until an attempt has been made to settle the action.

I think I should mention that the case upon which Mr. Salomons' opinion was chiefly founded, *Rossiter v. Miller*, 5 Chancery Division, 648, which was a unanimous decision by the Court of Appeal, he informs me has been subsequently reversed by the House of Lords.

Will you please consider the matter as very urgent as the extended term for lodging the statement of defence expires on Wednesday next.

I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

Inform Crown Solicitor to stay proceedings. Government will pay claim.—W.M., 30/5/89. Mr. Ross.—G.E., 30/5/89. Crown Solicitor.—M.R., 30.

[Enclosures.]

A.

COPY OF OPINION.

I HAVE perused and considered all the papers bearing upon the case.

The first question "whether this correspondence creates a binding contract in respect of which the Commissioner is liable to pay the patentees the sum of £16,000." I answer in the negative, and I consequently advise in answer to the second question that the claim should be resisted. The matter depends in point of law on the legal effect of the following words (read in connection with Mr. Halloran's letter of September 5th), contained in the Commissioners' reply of September 8th. "I have the honor to inform you that the Secretary for Public Works has approved of the acceptance of the terms named in your communication, but before final settlement is made, it is necessary that an agreement should be drawn up and executed conferring upon the Government patent rights for the use of the invention. Instructions will be at once given to the Crown Solicitor for the preparation of the necessary document."

I am of opinion, after a careful consideration of the high authorities noted beneath my signature, that there was here no final agreement binding upon the Government, and that on the true construction of the Commissioner's said letter (particularly having regard to the words I have underlined), it will be held that an agreement as to the terms of, and the signing of a formal contract are considerations precedent to the Government being bound (note the words, "before final settlement is made," and the form of the preceding words—"the Secretary for Public Works has approved of the acceptance of the terms named," &c.) There is not here "a simple acceptance of an offer to purchase, accompanied by a statement that the acceptor desires that the arrangement should be put into some more formal terms" (see per Jessel M.R. in *Crossley v. Maycock*, page 181). The language of the same distinguished Judge (in *Winn v. Bull*, page 32), is in my opinion properly applicable in this case, *i.e.*, "where you have a proposal or agreement made in writing expressed to be subject to a formal contract being prepared, it means what it says: It is subject to, and dependent upon formal contract being prepared."

Here the Commissioner would be entitled to proof that the patent was a valid patent. It may be had on many grounds, and I advise that (apart from the defence of "no contract") the plaintiffs be by the usual pleas put to proof of the validity of the alleged patent.

For cases see margin.

13th September, 1888.

JULIAN E. SALOMONS.

B.

COPY.—JOINT OPINION.

WE have carefully considered the facts in this case. Since Mr. Salomons advised in this matter the case has assumed a different aspect, by Messrs. Evans and Thornley commencing proceedings in Equity, in which they can have alternative relief, *i.e.*,—specific performance of the contract, if there is a binding contract; or an inquiry as to damages for the wrongful user of their patent, if there is no contract. Looking at the evidence given by the Government officers themselves as to the saving effected by the new truck, it would be difficult to escape the payment of damages exceeding the amount claimed for purchase money of the patent. We advise, therefore, that the suit should be settled by payment of the £16,000 claimed, and that the patent should be assigned to the Government.

27th May, 1889.

JULIAN E. SALOMONS.

ARCH. H. SIMPSON.

No. 6.

The Under Secretary for Finance and Trade to The Crown Solicitor.

Sir,

The Treasury, New South Wales, Sydney, 30 May, 1889.

I have the honor, by direction of the Colonial Treasurer, to inform you that the Railway Commissioners have forwarded to the Colonial Treasurer your letter No. 89-538, of 27th instant, enclosing the joint opinion of Messrs. Salomons and Simpson on the claim of Evans and another *v.* the Railway Commissioners. In view of that opinion, which advises that the suit should be settled by the payment of the £16,000 claimed, and that the patent should be assigned to the Government, I am directed by Mr. McMillan to state that the Government will make the payment referred to; and I am to request that this may be notified to the concerned, and all legal proceedings immediately withdrawn.

I have, &c.,

G. EAGAR.

No. 7.

The Crown Solicitor to The Railway Commissioners.

Evans and others to The Railway Commissioners.

Gentlemen,

Crown Solicitor's Office, Sydney, 13 June, 1889.

This matter having been completed, I now return all the papers in connection therewith.

I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

1889.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

**RAILWAYS.**

(INDENT FOR LOCOMOTIVE BOILERS.)

*Ordered by the Legislative Assembly to be printed, 30 July, 1889.*

**Indent for Locomotive Boilers.**

- A. Ten locomotive boilers for passenger engines, to maker's No. 2,060.
- B. Six locomotive boilers for goods engines, to maker's No. 2,064.
- C. Two locomotive boilers for tank suburban engines, to maker's No. 1,910.
- D. Twelve locomotive boilers for goods engines, to maker's No. 2,560.
- E. Six locomotive boilers for passenger engines, to maker's No. 2,150.
- F. Four locomotive boilers for passenger engines, to maker's No. 1,780.

ITEMS A and C to be obtained from Messrs. Beyer, Peacock, & Co. They are to be duplicates of the boilers supplied to engines with the numbers given, except that the heating surface must be increased as much as possible by using tubes  $1\frac{1}{2}$  inch external diameter, pitched for  $\frac{1}{4}$  spaces.

Item B to be obtained from Messrs. Beyer, Peacock, & Co. They are to be duplicate with the boiler in their engine 2,064, except that the distance from the longitudinal centre line to the roof of the fire-box inside may be increased to 9 inches, so as to admit a greater number of tubes. The tubes to be  $1\frac{1}{2}$  inch external diameter, with not less than  $\frac{1}{4}$  spaces between them.

Item D is to be obtained from Messrs. Beyer, Peacock, & Co., and to be duplicate with the boiler supplied in their engine 2,560, except the heating surface. This is to be increased as much as possible by using tubes  $1\frac{1}{2}$  inch outside diameter, pitched for  $\frac{1}{4}$  spaces. The roofs of the fire-boxes in these boilers are to be strengthened by cross midfeathers placed about the centre of the box. They are to be 13 inches deep in the middle, and curved to 15 inches deep at the sides where they are riveted to the sides of the box. These midfeathers to be  $5\frac{1}{2}$  inches wide outside, and stayed by hollow copper stays, 1 inch bore and  $\frac{1}{8}$  inch thick, in a manner similar to the midfeathers supplied by Messrs. Dübs & Co. and Beyer, Peacock, & Co. in boilers furnished by them to the South Australian Government.

Items E and F to be obtained from Messrs. Dübs & Co., and to be duplicates with the boilers in their engines Nos. 2,150 and 1,780, except that the heating surface must be increased by using tubes  $1\frac{1}{2}$  inch external diameter, pitched for  $\frac{1}{4}$  spaces. The roof of the fire-box to be strengthened by a cross midfeather of the kind specified for item D.

*Generally.*—In all the boilers the fire-hole rings are to be circular in form, 14 inches inside diameter of hole. Each ring to be faced in a lathe, and formed with a lip to check closely over the copper plate which is to be bored out to receive it. The tubes are to be ferruled at the fire-box end only, and the copper stays throughout are to be bored from each end with central holes  $\frac{1}{8}$  inch diameter. These holes are to approach each other within  $1\frac{1}{4}$  inch at the centre of the stay. Each top corner stay in the sides and backs of fire-boxes is to be of iron, not copper.

1889.

LEGISLATIVE ASSEMBLY.

**RAILWAYS.**

(REPORTS RESPECTING WILKIN AND COTTON'S SIGNAL WIRE-TIGHTENERS.)

*Ordered by the Legislative Assembly to be printed, 3 September, 1889.*

Copies of Reports *re* Signal Wires, Railway Department.

Wilkins' Patent Wire-tighteners.

I HAVE had these in work now for several months and find them work very well. The prices, however, are, in my opinion, too high, and should be considerably reduced before an order could be given.

J. PARRY.

IN cases where the distant signal is a long way from the signal-box these wire-tighteners are necessary, and this is the best we have had yet. We are now testing another "Cotton's Patent," which, so far, acts well.

GEO. COWDERY.

I HAVE fixed Cotton's patent wire-adjuster to the up distant signal at Summer Hill signal-box, and found it work very well in working the signal, and will report further on this patent.

W. MURPHY.

Cotton's Patent Wire-adjuster.

THE signalmen report that the above works very satisfactory, and is a very decided improvement on the old screw adjuster.

H. LUDFORD.

BOTH Wilkins and Cotton's machines answer the purpose of keeping the signal wires taut, but neither of them can be termed a compensator. Of the two I prefer Wilkins'. The prices asked for them are as follows :—

	Machine complete, including Royalty.	Royalty only.
	£ s. d.	£ s. d.
Wilkins' ... ..	5 15 0	1 0 0
Cotton's ... ..	4 17 4	0 16 0

I recommend we order as required from either, and pay royalty asked, the machines to be made in the shops.

J. PARRY.

I HAVE seen Mr. Parry, who considers Wilkins' the best, and recommends its adoption. Fifty would cover all present requirements.

H. M'L.

MESSRS. FORWOOD, DOWN, & Co. written to and asked to reduce royalty charge, and reply received reducing same to 15s., which was accepted.

1889.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## RAILWAYS.

(RETURN SHOWING TRAVELLING EXPENSES OF, AND FREE PASSES ISSUED BY, COMMISSIONERS.)

*Ordered by the Legislative Assembly to be printed, 6 August, 1889.**[Laid upon the Table of the Legislative Assembly, in accordance with a promise made by the Colonial Treasurer on 2nd August, 1889, Votes Proof No. 70, Question No. 6.]*

THE Railway Commissioners entered upon their duties on the 22nd October, 1888. Shortly after taking office they proceeded upon a tour of inspection over all the existing railway lines, travelling a distance of 4,640 miles. They have also inspected the following new lines (besides others of a minor character) and visited the places mentioned:—Moss Vale to Robertson, Goulburn to Crookwell, Tarago to Braidwood, Galong to Burrowa, Corowa to Culcairn, St. Peters to Liverpool, Parkes to Forbes (visiting Molong, Parkes, Forbes, Eugowra, Cudal, and Orange), North Shore extension to Milson's Point (visiting Hornsby), Tempe to Longnose Point, Westmead to Dural, Narrabri to Moree, Narrabri to Walgett, Grafton to The Tweed (visiting Grafton, Casino, Lismore, Coraki, Ballina, Murwillumbah, and Tweed Heads, returning to Sydney *via* South Port and Brisbane), Bega to Eden (visiting Cooma, Nimitybelle, Bombala, Pambula, Eden, Tathra, Wolumlo, Candelo, and Colombo), Jerilderie to Deniliquin (visiting Moama, and returning *via* Melbourne), Cootamundra to Temora, Gundagai to Tumut, Adelong to Tumberumba, Tumberumba to Wagga Wagga, Kiama to Nowra, Cocma to Bombala, Byrock to Brewarrina, Nyngan, Cobar, Wilcannia, and Broken Hill (returning to Sydney *via* Adelaide and Melbourne), Cowra to Forbes and Parkes, Young to Forbes and Parkes, Parkes to Wellington, Parkes to Dubbo, Wellington to Gulgong, Mudgee to Gulgong; travelling by rail 9,800 miles, by vehicle 2,966 miles, by steamer 645, total, 13,411 miles, making the distance covered in inspecting existing and proposed lines 18,051 miles.

The Commissioners have only charged for their own personal out-of-pocket expenses in connection with their inspection of existing lines a sum of £17 15s. 10d. each since they took office. Had they charged according to the authorized scale they would have drawn £42 13s. 4d. each.

The sum of £522 15s. 3d. has been paid for expenses in connection with the inspection of proposed new lines. This sum includes over £300 paid for the hire of horses and conveyances, and to this amount must be added the cost of stabling and feed for horses in many instances, and in some the expenses of a District Officer accompanying the Commissioners. The exact personal expenses of the Commissioners cannot be stated; but it is obvious that a small portion only of the total expenditure can be debited to that account.

Twenty-two special trains have been used for the various tours of inspection, &c., which ran a distance of 7,240 miles. The cost of the specials to the Department was about £452. There is no specified rate for special trains for long distances. If the scale which is charged for ordinary distances was debited against this service the charge would be £2,854. A special train was never run where ordinary trains would meet the requirements of the duty to be performed.

Members of their families do not travel free on tram or train, although, according to universal railway practice, they are quite entitled to do so.

No travelling allowance was made to the Chief Commissioner, but a free passage was provided for the Chief Commissioner, his wife and daughter, according to the terms of his agreement with the Government. No payment whatever was made on account of Mr. Fehon.

The following list gives particulars of the free passes issued by the Commissioners:—  
RETURN of Free Passes issued from Head Office since October 23rd, 1888.

Date of Issue.	Names.	Remarks.
1888.		
23 Oct. ..	Mr. Thomas Roberts ... ..	Assistant Loco. Engineer, S.A. Railways.
27 " ..	Mr. Griffiths ... ..	Visitor, Queensland.
7 Nov. ..	Mr. J. E. Squire ... ..	Superintendent, Eastern Extension and China Telegraph Co.
13 " ..	Mr. Whittingham ... ..	Officer, Tasmanian Railways.
13 " ..	Mr. T. Murdoch ... ..	" " " " " "
17 " ..	Major King ... ..	On leave from his regiment in India.
20 " ..	Hon. John Hill ... ..	M.L.C., from Fiji.
21 " ..	Members of Victorian Rowing Club	Returning to Melbourne.
23 " ..	Mr. T. B. Merry ... ..	U.S. Commissioner to Exhibition.
23 " ..	Mr. J. B. Labatt... ..	Officer, Engineer-in-Chief's Office, Adelaide.
24 " ..	Mr. David T. Arnott ... ..	Press Representative (England).
12 " ..	Mr. V. Flugot ... ..	Representative of France at Exhibition.
3 Dec. ..	His Excellency the Governor of New Caledonia, Lady, and Secretary.	En route to Noumea.
10 " ..	Mr. Drew ... ..	Auditor-General for Queensland.
7 " ..	Sir Henry Bourke, Bart... ..	Deputy-Lieut., County Galway, Ireland.
13 " ..	Captain Ogilvey ... ..	A.D.C. to Governor of Victoria.
13 " ..	Mr. G. Verschaur ... ..	Scientist from Holland.
31 " ..	Mr. Chas. Mann, Q.C. ... ..	Crown Solicitor, Adelaide.
31 " ..	Mr. W. P. Street... ..	N.Z. Commissioner, Melbourne Exhibition.
31 " ..	Mr. A. Nisbet ... ..	English Railway Officer.
31 " ..	Mr. J. P. Morice... ..	Parliamentary Librarian, Adelaide.
1889.		
4 Jan. ..	Mrs. J. L. Drew ... ..	Wife, Victorian Minister, of the Crown.
4 " ..	Mr. J. Bennett (to Roschill) ... ..	Secretary, Rosehill Racing Club.
4 " ..	Officers H.M. ships on station ... ..	" " " " " "
7 " ..	Hon. F. M'Coppin ... ..	Executive Commissioner from U.S.A.
9 " ..	Miss Stanley ... ..	Daughter, Railway Engineer, Queensland.
10 " ..	Rev. W. H. Wilson ... ..	Consul, &c., Samoa.
10 " ..	Mrs. Robert Bland ... ..	Wife of M.P., Queensland.
11 " ..	Mr. J. P. Leserne ... ..	Consul-General, U.S. America.
11 " ..	Consul for France ... ..	On diplomatic service.
11 " ..	Consul for Chili ... ..	" " " " " "
12 " ..	Dr. Rennie ... ..	Commissioner from Adelaide to Exhibition.
14 " ..	Mr. Justice Mien... ..	Queensland Judge.
14 " ..	Mr. F. Allibon ... ..	Engineer, Deniliquin and Moama Railway.
16 " ..	Mr. P. R. Gordon ... ..	Commissioner from Brisbane, with wool exhibits.
17 " ..	Dr. Herbert Metcalfe ... ..	Visitor.
21 " ..	Captain Brantsen... ..	Distinguished officer, Dutch Navy.
22 " ..	Mr. and Mrs. Ferguson ... ..	Customs officer and wife, Wallangarra Station.
23 " ..	Mr. John Hughes ... ..	Visitor from England.
23 " ..	Lieut.-Col. Sheridan ... ..	Queensland Civil Service.
23 " ..	Mr. R. J. Creighton ... ..	Editor, "San Francisco Mail."
23 " ..	Mr. Henry Clarke ... ..	Member of N.Z. Government.
24 " ..	Mr. F. Want (to Loftus) ... ..	Trustee, National Park.
28 " ..	Bishop of Rochester ... ..	Visitor from England.
28 " ..	Mr. Parry ... ..	Private Secretary to Bishop.
29 " ..	Mr. A. Morton ... ..	Curator, Hobart Museum.
6 Feb. ..	Mrs. Aland ... ..	Wife, M.P., Queensland.
6 " ..	Mrs. Black ... ..	" " " " " "
11 " ..	Herr Pfaff... ..	Commissioner from Germany to Exhibition.
12 " ..	Mrs. Curnow ... ..	Wife, Queensland Railway Commissioner.
15 " ..	Chief Justice Fielding ... ..	On leave from Fiji.
19 " ..	Dr. Forster ... ..	Commissioner from U.S. to Exhibition.
23 " ..	Mr. Harbert ... ..	Officer, English Railways.
28 " ..	Hon. Mr. Yeo ... ..	Under Colonial Secretary, Queensland.
5 Mar. ..	Mr. K. R. Kirtaker ... ..	Indian Army Surgeon.
6 " ..	Mr. L. J. Byrne ... ..	Queensland Parliamentary Staff.
18 " ..	Lieut. Maux ... ..	United States Navy.
18 " ..	Sir Somers Vine ... ..	Visitor from England.
18 " ..	Mr. John Deasy, M.P. ... ..	English House of Commons.
18 " ..	Sir E. Strickland ... ..	President, Royal Geographical Society.
10 April	Lord Cranley ... ..	English House of Lords.
10 " ..	Mr. Garland ... ..	Secretary to Lord Cranley.
16 " ..	Mr. H. Bryan Moore ... ..	Secretary, Victorian Jockey Club.
16 " ..	Captain Mayne ... ..	Bombay Army.
26 " ..	Mr. J. Stark ... ..	Officer, Queensland Railways.

26 "	Major M'Gregor ... ..	Bombay Army.

1889.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

**RAILWAY REFRESHMENT ROOMS.**  
(REPORT OF GOVERNMENT ANALYST ON QUALITY OF LIQUORS FOR SALE AT.)

*Ordered by the Legislative Assembly to be printed, 8 October, 1889.*

The Inspector-General of Police to The Under Secretary of Justice.

Sir, Police Department, Inspector-General's Office, Sydney, 26 September, 1889.

I have the honor to forward herewith, for the information of the Minister of Justice, a report of the Government Analyst on the quality and composition of the spirituous liquors sold at the Railway Refreshment Rooms throughout the Colony, samples of which were obtained by the police on the 16th July last, at the stations named, and to suggest that the same be forwarded to the Commissioners for Railways.

I have, &c.,  
**EDMUND FOSBERY,**  
Inspector-General of Police.

[Enclosure.]

REPORT of the Government Analyst on the quality and composition of the spirituous liquors, sold at the Railway Refreshment Rooms throughout New South Wales.

To the Honorable the Minister of Justice,—  
Sir,

I have again the honor to submit the following report on the quality, strength, and composition of the spirituous liquors or alcoholic drinks offered for sale to the public at the various railway refreshment rooms throughout the country.

The samples were collected by the police from the refreshment bars at the following railway stations, namely:—

Southern Lines:—

Mittagong, Goulburn, Yass, Harden, Junee,\* Albury.

Western Lines:—

Penrith, Mount Victoria, Bathurst, Wellington, Nyngan.

Northern Lines:—

Singleton, Werris Creek, Murrurundi, Armidale.

A sufficient quantity was in every case supplied to enable me to examine each sample for all the commonly-known noxious ingredients, including all of those enumerated in the Licensing Act, but the full and exhaustive chemical analysis of every sample has not been attempted, inasmuch as gallons of each liquor would have been required, and at least six months of my undivided time and attention would have been necessary for the detection, the isolation, and estimation of some of the minor constituents of these liquors, which exist only in the most minute proportions. This aspect of the question has not been overlooked, and a qualitative analysis of such an exhaustive nature was accomplished, the results of which will be found in its place further on.

However, the practical problem here presented resolves itself into a strict inquiry as to the deleterious ingredients enumerated in section 89 of the Licensing Act, as well as for those mentioned in the Act for the Prevention of Adulteration of Malt Liquors, section 3, and for any fusel oil that may be present in quantities injurious to health, according to section 8 of the Act to prevent the Adulteration of Food and Drink and Sale of Injurious Liquors, and generally in the words of section 89 of the Licensing Act, to continue the search for "any other ingredient injurious to health."

After the most careful examination of each sample, no traces whatever could be found of either *coccus Indicus*, copperas, opium, Indian hemp, strychnine, tobacco, darnel seeds, extract of logwood, salts of zinc, lead, alum, or any extract or compound of the same.

So far, then, negative results only having been obtained, the inquiry was then directed towards the investigation of the nature and quality of the spirit contained in these liquors, and incidentally the quantity or the alcoholic strength.

The average alcoholic strength was found to be as follows:—

PERCENTAGE of Alcohol.

Liquor.	No. of Samples examined.	Highest.	Lowest.	Mean.
Pale Brandy .....	16	45·14	37·89	41·13
Dark Brandy .....	16	44·05	35·90	42·04
Rum .....	13	66·26	38·06	44·76
Whisky .....	15	50·30	37·33	41·00
Schnapps .....	16	42·30	39·55	40·57
Old Tom Gin .....	16	47·91	37·94	40·64
Sherry Wine .....	12	19·58	15·50	17·74
Port Wine .....	15	18·62	16·08	16·80
Colonial Wine .....	8	15·50	7·60	11·98
Imported Beer .....	25	7·05	5·85	6·56
Imported Stout .....	18	7·12	5·20	5·85
Colonial Beer .....	14	5·67	4·81	5·01

\* No intoxicating liquors are sold at the Wagga refreshment rooms.

According to the existing law in Great Britain, alcoholic liquors of the following strength may be sold retail to the public:—Brandies, whiskies, and rum, at not less than 25 degrees under proof, schnapps and gin, sweetened or unsweetened, of not less than 35 degrees under proof, whereby the following comparisons may be drawn, standard proof spirit containing 49·24 per cent. of absolute alcohol by weight:—

Liquor.	Legal limit for the U.K., not less than	Strength of liquor sold at the Railway Refreshment Rooms.	Difference of excess, proof degrees.
Pale Brandy .....	25 U.P.	14·92 U.P.	10
Dark do. ....		13·16 „	11½
Rum .....		8·00 „	17
Whisky .....		15·15 „	10
Schnapps .....	35 U.P.	15·95 „	19
Gin .....		15·79 „	19

Inasmuch as negative results only have been obtained as to the existence of noxious ingredients, the question may be asked, what then do they contain? what is their composition?

From a very large number of analyses made, the general composition of the spirits mentioned was found to be as follows:—

	Per centum.
Water .....	56·51
Alcohol .....	41·54
The higher alcohols .....	·15
Acetal .....	traces.
Compound ethers .....	·06
Acetic and other acids .....	·03
Extract .....	·46
Colouring matter .....	·08
Tannin, from minute traces to .....	·15
Essential oils .....	traces.
Ash from the evaporated residue .....	·01 to ·05

99·03

All these substances are found to exist in genuine whisky, gin, rum, and brandy, and may therefore be considered as the normal constituents of all spirituous liquors whatsoever; amongst these, the group designated the higher alcohols, *i.e.*, alcohols having a proportion of carbon atoms greater than common alcohol, alone demand attention. These bodies are known as fusel oil; and, as I have already had occasion to point out, render fusel oil a liquid of complex composition.

Fusel oil was found in all the samples of spirits examined in different proportions; the highest was in a sample of whisky, which contained ·13 per cent.; the lowest was found in one of the whiskies from Wellington, which gave barely the one-hundredth of a per centum, quantities in both cases which cannot be considered injurious to health.

In making the complete qualitative analysis of these liquors, for the detection of every foreign ingredient, injurious or otherwise, the following bodies were discovered, which enables one to form an adequate idea of the complexity of composition of an ordinary alcoholic drink. The sample selected as a type was the brandy from the Wellington refreshment room, which I consider to be genuine unadulterated brandy, and in keeping with the rest of the liquors from Wellington, which were of uniform good quality.

Detailed qualitative analysis of brandy from Wellington:—

Ordinary alcohol.	
Acetate of ethyl.	
Olanthylate of ethyl.	
Acetal.	
Aldehyde.	
Acetic acid.	
Propionic acid.	
Tartaric acid.	
Higher alcohols	} Fusel oil.
Propylic	
Butylic	
Amylic	
Amides.	
Sugar.	
Tannin.	
Colouring matter.	
Ash (or mineral ingredients).	

In the course of the analysis of the samples of malt liquors, all the beers, including imported and colonial brewed, were found to contain traces of fusel oil, but not in sufficient quantity to prove injurious to health when taken in moderation.

As some interest was manifested in the quantity of salt in beers, the samples of colonial beer from the following places were specially examined for this substance, and it will be noticed that the Murrurundi, Mittagong, and Goulburn beers contain excessive quantities. Anything over 60 grains may be considered excessive.

THE amount of salt (sodium chloride) in different samples of beer.

Sample taken from the Railway Refreshment Room at—	Quantity of salt found per gallon.
Armidale .....	42
Penrith .....	85½
Mittagong .....	72½
Harden .....	23
Goulburn .....	109½
Mount Victoria .....	26½
Bathurst .....	52½
Wellington .....	29
Nyngan .....	9
Do (second sample) .....	26
Murrurundi .....	59½
Do (second sample) .....	65
Werris Creek .....	31½
Do (second sample) .....	31½
Do (third sample) .....	31½
Do (fourth sample) .....	31½
Juncie Junction .....	25

The foregoing results, taken as a whole, point most conclusively to the fact that these liquors are of fair average quality, and I am of opinion that the samples submitted to me for analysis, and which are enumerated and described in the Appendix, are quite free from all injurious additions and adulterations.

I have, &c.,

WILLIAM M. HAMLET, F.I.C., F.C.S.,

Government Analyst.

Sydney, 25th September, 1889.

### APPENDIX.

List of samples collected by the police from the Railway Refreshment Rooms during July and August, 1889 :—

- From Mittagong—  
One sample each of whisky, pale brandy, dark brandy, gin, rum, port wine, ale, beer.
- From Geulburn—  
Colonial ale, dark brandy, pale brandy, schnapps, gin, whisky, rum, port wine.
- From Yass—  
Gin, pale brandy, rum, Scotch whisky, Colonial beer, dark brandy, schnapps, Irish whisky, sherry, port, Colonial wine.
- From Harden—  
Colonial beer, rum, dark brandy, pale brandy, gin, Scotch whisky (in bulk), Scotch whisky (in bottle), Irish whisky, schnapps, sherry, port.
- From Junee—  
Colonial beer, English beer, pale brandy, port wine, whisky, gin, sherry, rum, dark brandy.
- From Albury—  
Schnapps, gin, sherry wine, rum, Irish whisky, Scotch whisky, pale brandy.
- From Penrith—  
Colonial ale, pale brandy, gin, dark brandy, rum, whisky, port wine, sherry wine.
- From Mount Victoria—  
Ale, pale brandy, Scotch whisky, port wine, gin, rum, sherry, gin (another brand), dark brandy, schnapps.
- From Bathurst—  
Sherry, whisky, dark brandy, rum, gin, port wine, pale brandy, ale, do. (second sample).
- From Wellington—  
Seven samples of wine, undescribed, two samples of ale, two samples of stout, rum, brandy, two ales, four samples of brandy, two samples of gin, two samples of rum, one sample of schnapps, six samples of whisky, two samples of ale.
- From Nyngan—  
Port wine, dark brandy, pale brandy, sherry, Scotch whisky, Irish whisky, schnapps, gin, Colonial wine, two kinds of ales.
- From Singleton—  
Pale brandy, dark brandy, whisky, rum, port wine, sherry wine.
- From Murrurundi—  
Pale brandy, dark brandy, port wine, sherry wine, beer, Colonial ale.
- From Werris Creek—  
Pale brandy, dark brandy, rum, whisky, gin, port wine, sherry wine, beer (four samples).
- From Armidale—  
Pale brandy, dark brandy, whisky, gin, rum, port wine, sherry wine, Colonial wine, two beers.

NEW SOUTH WALES.

**RAILWAYS.**

(RETURN SHOWING TRAFFIC AT NARRABRI STATION.)

*Ordered by the Legislative Assembly to be printed, 22 May, 1889.*

[Laid upon the Table of the House in accordance with promise made by the Honorable the Colonial Treasurer in answer to Question No. 12 on Votes and Proceedings of the 24th April, 1889.]

RETURN showing—

- (1.) The amount of tonnage received at and sent from Narrabri Railway Station from the 1st January to 31st December, 1888.
- (2.) A similar return of live stock sent and received.
- (3.) The number of bales of wool and weight thereof sent from Narrabri Railway Station during the same period.
- (4.) The quantity of goods indented to Narrabri for Walgett and intermediate stations for above period.

(*Mr. T. G. G. Dangar.*)

RETURN of Business at Narrabri Railway Station.

Question No.	Particulars.	Answer.	
1	Tonnage of goods ... { Inwards ... ..	11,140 tons.	
	... { Outwards ... ..	1,730 "	
	Total ... ..	12,870 "	
2	Number of live stock {	Inwards—cattle ... ..	390
		" sheep ... ..	3,586
		Outwards—cattle ... ..	2,979
		" sheep ... ..	86,792
	Total ... ..	93,747	
3	Number of bales of wool (outwards) ... ..	50,258 bales.	
	Weight of same ... ..	7,500 tons.	
4	Goods indented to Narrabri for Walgett, &c. ... ..	882 "

## RAILWAYS.

(RETURN SHOWING PASSENGER TRAFFIC BETWEEN SYDNEY AND NEWCASTLE)

*Ordered by the Legislative Assembly to be printed, 25 September, 1889.*

[Laid upon the Table of the Honorable the Legislative Assembly of New South Wales in information regarding the Railway traffic between Sydney and Newcastle, as promised in reply to Question No. 1 of Tuesday, the 24th September, 1889.]

### Questions.

1. MR. SEE asked THE COLONIAL TREASURER,—

(1.) The number of first and second class passengers who travelled by each of the trains from Sydney to Newcastle and from Newcastle to Sydney during each of the months of May, June, July, and August?

(2.) The earnings from each of the said trains for first and second class passengers respectively for each of the said months, distinguishing the passenger traffic north of Newcastle from the earnings for passenger traffic between Newcastle and Sydney?

(3.) The total earnings for first-class and second-class passenger traffic between Sydney and Newcastle and Newcastle and Sydney only for each of the said periods?

### Answer.

The exact number of passengers who travelled by each train cannot be shown, as tickets are not taken for specified trains, and a record has not been kept during the whole of the period named of the passengers holding return halves of tickets and through tickets who have used the trains.

A return showing the passengers booked by the trains to stations between Sydney and Newcastle inclusive and to stations beyond Newcastle and of the bookings to stations between Newcastle and Sydney during the months of May, June, July, and August last is enclosed.

#### TOTAL BOOKINGS PER MONTH.

Month.	First Class.			Second Class.		
	Single.	Return.	Amount.	Single.	Return.	Amount.
Between Sydney and Newcastle—			£ s. d.			£ s. d.
May.....	508	1,018	759 0 7	2,521	2,241	870 4 10
June.....	450	958	631 18 10	1,957	2,211	748 3 9

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

In the second section, the author outlines the various methods used to collect and analyze the data. This includes both primary and secondary data collection techniques. The primary data was gathered through direct observation and interviews, while secondary data was obtained from existing reports and databases.

The third section details the statistical analysis performed on the collected data. This involves the use of descriptive statistics to summarize the data and inferential statistics to test hypotheses. The results of these analyses are presented in a clear and concise manner, highlighting the key findings of the study.

Finally, the document concludes with a discussion of the implications of the findings. It suggests that the results have significant implications for the field of study and provides recommendations for further research. The author also acknowledges the limitations of the study and offers suggestions for how these can be addressed in future work.

1889.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

RAILWAYS.

(CORRESPONDENCE, &c., RELATING TO THE COLLECTION AND DELIVERY OF GOODS, GREAT SOUTHERN, WESTERN, AND RICHMOND LINES.)

*Ordered by the Legislative Assembly to be printed, 3 September, 1889.*

[Laid upon the Table in accordance with the promise of the Colonial Treasurer, in reply to Question No. 4, of 7th August, 1889.]

J. M'Mahon & Co. to The Commissioner for Railways.

Sir,

Circular Quay, Sydney, 5 September, 1888.

I am reluctantly compelled, through the high price of fodder, and the demand of my workmen for higher wages or the alternative of a strike, to request that an increase of a  $\frac{1}{2}$ d. per bale may be allowed me in excess of the amount stipulated in my contract for the delivery of wool from the Railway sheds.

I have the honor to remind you that since 1884 I have been the successful tenderer for this contract, and I can confidently look back at the faithful discharge of my obligations to your Department in this regard.

As an additional reason for my demand of an increase in the price named for my contract, I would urge for your consideration that the Department requires the wool to be taken from the trucks onto my waggons, and in many instances the waggon has to pass over weigh-bridges several times. Further, I was confident that during the busiest portion of the season I hoped to be able to find assistance from other carriers in the work, but the heavy and constant lifts made that hope impossible, and I am constantly losing through the fulfilment of this portion of the contract, and here I may remind you that such was not stipulated in the bond of the Department. In fine, Sir, I beg to submit that I am at present paying an increase of 10 per cent. on fodder, 25 per cent. in wages, and yet I wish to assure you that I will by no means embarrass the Department; even at a loss, I shall continue to fulfil the contract until such time as you may finally arrange either to concede my request, or arrange for the cancellation of my bond.

I have, &c.,

J. M'MAHON & CO.

A rise of  $\frac{1}{2}$ d. per bale will probably represent £625 a year. It will be  $\frac{1}{2}$ d. per bale over West's tender, and also over M'Mahon's own tender. It will be remembered that while M'Mahon tendered at  $\frac{3}{4}$ d. he took over Denehey's tender at  $2\frac{1}{2}$ d. per bale. I do not understand the allusion made in Mr. M'Mahon's letter of 5th instant, *re* something required, not stipulated for in the contract. Will Traffic Manager report upon this. It would be a serious matter if Mr. M'Mahon were to cease doing the work during the height of the wool season, but he promises to meet the requirements of the Department for a time. To swap contractors in the midst of the wool season presents also great difficulty. Mr. M'Mahon has assured me personally that it would pay him better to forfeit £500, the amount of his bond, than to continue at present prices. Without saying one disparaging word of Mr. M'Mahon, who has done our work faithfully and well for many years, I cannot but feel that there is a "close borough" appearance in these transactions directly honest or hostile competition is removed a demand is made for increased price, and I am convinced that if we forfeited M'Mahon's £500 and invited fresh tenders, the Department would lose more than it will if it concedes the demand now made. At the same time the action of the Department is open to all manner of malinterpretations if a contract price is increased.—CH. A.G., 7/9/88. Traffic Manager. Mr. Harper.

Give me a full report on this matter first thing to-morrow morning. You will notice the paragraph marked. Give particulars of this extra work done by M'Mahon & Co., please.—J. HARPER. 10/9/88. Mr. Paull.

I beg to say that it is a matter of the very greatest importance that the wool should be delivered daily as it arrives, and more so than ever during the season we have just commenced, because from what I can gather from some of the largest shippers and brokers that the present season will far exceed all the past seasons by many thousands of bales, and this is being daily verified, because up to the date for the new clip, since the 1st August, we show an increase of 26,000 bales over the same period for 1887, and already the pressure for rolling stock is being keenly felt, as well as sheets for covering the wool, and this being the case when we have only just commenced the season, what will it be in the height of the season should there be the slightest delay to the trucks, &c. So that it is necessary all wool should be daily delivered as soon as it arrives direct from the trucks onto the teams, for by our doing that it saves the Department at the very least 50 per cent. in the handling, besides keeping down the complaints from consignees,

consignees, and risk of wet, fire, &c., &c. I am aware that the Department have the power to employ teams, &c., should the contractor fail to supply sufficient teams daily to cart the wool away, but I have no hesitation in saying that, should there ever be any need to revert to that, it would prove a failure, because we should have to employ all sorts, and the responsibility of correct deliveries, &c., would be very great, &c. Besides that, during the summer months, things are so busy it is most difficult to get teams at all, and they would not throw up their ordinary work to cart for only a short time. I have had to do with the wool now nearly twenty years, and I can say from my own knowledge that our present contractors, Messrs. M'Mahon & Co., make this work their special study. They have spared no time and expense, and I feel sure that should there be any change it would be for the worse, because the managing of so large an undertaking requires great experience. In fact, it requires a man of no ordinary stamp to keep all going when there is a great amount of work to be done in such a short time; and, while it does not matter to me one iota who does the work, so long as it is done well, but at the same time, I venture to say that we shall never get a man to come up to Mr. James M'Mahon in the carrying out of this work. I have always found him willing and agreeable to meet the Department in any way to get through the work. Last season, during the height of the season, he delivered over 160,000 in the months of October and November, and this was in addition to all other classes of traffic he delivered, and in the midst of it all we did not have a hitch. Respecting Messrs. M'Mahon & Co. stating that they were compelled to do work in connection with the delivery of the wool, which was not stipulated for in their contract, that is quite correct, and I think no greater proof can be seen than that they have always done what they could to work with the Department, when you consider that during the year 1887 they were compelled to weigh over our cart weigh-bridges over 4,000 loads of wool. This meant a deal of delay to their teams, because in numbers of cases, through our limited room here, and trying to keep the expenses down by delivering the wool out of the trucks direct on to the teams, in the case of mixed consignments (and there were thousands of them), teams would have to go on the bridges two and three times to make one load. This, of course, was owing to the wool coming from so many places where there was no weighing appliance, coupled with the regular testing of country weighings, which was kept up all the year round. And during the present year, to date, we have already weighed with his teams over 1,100 loads, and I do not see how this can be discontinued, without loss to the Department. If it was done away with I am sure it would never do for us to weigh each bale on the platform scales. We should be blocked in one day. Fancy doing such a thing when delivering over 80,000 bales in one month. Then, to supply weighing appliances to all the stations and platforms we get wool from where they have none, this would be a great expense, because so many would be lying idle after the wool season was over, and you cannot do this weighing on the truck weigh-bridges, there always being so many mixed consignments. Taking all these facts into consideration, coupled with the fact that the difference would only be some £600 odd a year, I see no reason whatever in attempting to touch the contract price of 2½d., but to allow them the ½d. per bale for the reasons I have honestly set forth. Our books can be examined to settle that point, and by this being done, it would put a stop to all misinterpretations, &c.—CHAS. PAULL, 11/9/88. Goods Superintendent.

Mr. Paull reports very fully on the subject, and I quite agree with him that it is highly desirable at this stage of the wool season, to retain the services of the present contractor. He has made the carriage of wool a speciality, and his plant is designed for the purpose, consisting almost entirely of waggons. I know of no other carrier, or half-a-dozen carriers, in Sydney who could provide so many suitable vehicles, and thus ensure such rapid delivery. As Mr. Paull says, we have to do a lot of weighing on the contractors' waggons, both for freight and testing purposes, and this involves serious detention to the carter, although of material importance to the Department. Then, as the Commissioner points out, were we compelled to call for fresh tenders in the present advanced state of the wool season, it is more than probable that the only competent carriers in the city would probably continue to demand a very high price, realizing that the necessities of the Department were their opportunities.—J. HARPER, 12/9/88. Traffic Manager.

I have to refer the Commissioner to Mr. Paull's minute of the 11th, and Mr. Harper's of the 12th instant. We are already pretty well in the thick of the wool season, and it would be a most serious matter if Mr. M'Mahon were to withdraw from the contract now, for there is not another contractor in the city who could take the work up with anything like satisfactory results. As the Commissioner points out, the increase of ½d. per bale means about £625 to the Department, but even if new tenders were called for it is highly probable that we would not get one for less than Mr. M'Mahon now asks; indeed if M'Mahon & Co. were to withdraw from the contract I feel confident that a new one would cost the Department, not only quite as much as £625 extra, but also the £500 which M'Mahon & Co. would forfeit, and I am sure the loss and inconvenience that would be caused to the Department through the unsatisfactory fulfilment of the contract would be very great. For these reasons I have no hesitation in recommending that the increased price asked for be conceded, but the contract should be reconsidered after the termination of the present wool season.—W. V. R., 15/9/88.

I recommend that an increased price of ½d. per bale be granted to M'Mahon & Co. during the wool season, ending the 30th March, 1889. It will then be time to consider whether fresh tenders shall be invited or the increased price be continued; if the former, I would make the penalty for non-fulfilment of contract such a figure as would make the contractor hesitate to offer the Department the alternative (in the height of the wool season) of an abandoned contract or an increased price.—CH. A. G., 17/9/88.

Approved.—J. S., 20/9/88.

### Memo. by The Acting Secretary for Railways.

M'Mahon's contract for delivery of Wool, &c., from Darling Harbour.

It will be seen from copy of letter written to M'Mahon & Co. on 21/9/88, that the late Minister agreed to pay an increase of a ½d. per bale on the contract price for delivering wool from the railway sheds, Darling Harbour, during the season, ending 31st March, 1889.

The Chief Traffic Manager will have a record of the contract price. Will he, therefore, be good enough to report upon the matter in view of the termination of the present arrangement on 31st instant. Should not fresh tenders be at once called for?

Chief Traffic Manager.

H. M. L.

(Pro Secretary), 4/3/89.

By

By the original tender the contract price was 2½d. per bale, but it was subsequently arranged to increase the price to 3¼d. per bale rather than run the risk of the successful tenderer throwing up the contract, because in that case we could not possibly have got the wool delivered for considerably more than 2½d. per bale plus the amount of the bond. It will be well to ascertain whether or not there is any doubt whatever about the present contract terminating on the 31st instant, and, if there is not, fresh tenders should, I think, be called for at once, so that tenderers may have every opportunity of considering the matter fully, and, if necessary, enabling them to obtain the plant before the next wool season. I enclose a draft specification, which I recommend for approval. The only alterations I have made in it are in clause 5, where I think it desirable to reserve the right of the Commissioners to charge a storage rate of 2d. per bale per day on all wool not taken delivery of on the day it arrives, and I have inserted a clause to that effect, as experience has shown us that such provision is very necessary. In clause 12 it is proposed to increase the amount of security from £500 to £1,500, the former amount being altogether insufficient. In clause 13 I propose that the amount to be deposited with the tender shall be £500 instead of £1,000. The reasons for these alterations are very strong. The contract is a very important one, and care should be taken to see that the bond is a thoroughly sound one in every respect. During the last wool season we delivered 350,000 bales of wool, and unless the contractor is a man who has a large number of drays with which to remove it, we would have been blocked over and over again, in fact, it would simply paralyze the traffic if the contractor were not equal to the demand made upon him.—D.K., 12/3/89.

In connection with the delivery of wool, &c., from Darling Harbour, the Commissioners are desirous of knowing whether M'Mahon & Co. would take up their contract after 31st March, 1889, at the rate of 2½d. per bale, or even at 3¼d. per bale. If so, would Mr. Kirkcaldie be prepared to recommend that the work be continued by M'Mahon & Co., or does he think it preferable to invite fresh tenders?—W. V. READ, 16/3/89. Chief Traffic Manager.

Mr. M'Mahon, of M'Mahon & Co., has had the specification read to him, and he agrees to accept the revised conditions, provided the contract is continued at the rate of 3¼d. per bale. The firm has always performed the work satisfactorily; and, judging from past experience, I do not think the Commissioners could do better than continue the contract, which will, I presume, be prepared by the Crown Solicitor as usual.—D.K., 23/3/89. Secretary.

Approved.—W.M.F., C.O., 27/3/89.

Sir,

Circular Quay, Sydney, 20 March, 1889.

I hereby offer to carry out, in accordance with specification read over to me by the Goods Superintendent (Mr. John Harper), and at the prices quoted below, the collection and delivery within the city boundary of goods, including wool, in connection with the Great Southern, Western and Richmond Railways, for a period of three years, terminating on 1st April, 1892.

		<i>Goods.</i>		£	s.	d.

I beg to submit as sureties herein the following:—Samuel Blue, lighterman, North Shore; Francis Buckle, Union-street, Pyrmont. I have, &c.,  
The Secretary of Railways. JAMES M'MAHON & CO.

Mr. Goods-Superintendent Harper to Mr. J. M'Mahon.

Sir,

Railway Station, Sydney, 30 March, 1889.

In reply to yours of the 20th instant, I beg to inform you that the Commissioners for Railways have decided to accept your offer for delivery of goods, &c. (wool at 3¼d. per bale) in terms of specification read to you. I will advise you when contract is ready.

I am, &c.,

J. HARPER,

Goods Superintendent.

Bond executed for contract to terminate on 1st April, 1892, on usual conditions, 3/6/89.

1889.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

RAILWAYS.

(RETURN SHOWING COST, OF CONSTRUCTION OF, FROM SYDNEY TO WARATAH, WARATAH TO  
ARMIDALE, AND ARMIDALE TO WALLANGARRA.)

*Ordered by the Legislative Assembly to be printed, 27 September, 1889.*

*[Laid upon the Table of the House in accordance with promise made by the Honorable the Colonial Treasurer,  
in answer to Question No. 1 on Votes and Proceedings of 31st July, 1889.]*

Question.

2. MR. SEE asked THE COLONIAL TREASURER,—

(1.) What is the total cost of each of the undermentioned lines of railway, including buildings, plant, and land resumed; also, the total cost of rolling-stock used thereon, and of the rolling-stock used on each of the said lines, and the mileage respectively, viz.:—Sydney to Waratah, Waratah to Armidale, and Armidale to Wallangarra?

Answer.

Information has not been kept separate for the particular sections asked for, but a return is submitted showing the cost of the line Homebush to Waratah and Newcastle to Wallangarra.

The rolling-stock is not allotted to any particular line but used generally over all sections, and the total cost is here given:—

			£	s.	d.
Cost of construction—Homebush to Waratah	...	...	2,224,209	3	3
Newcastle to Wallangarra	...	...	4,774,345	3	3
Rolling-stock—all lines	...	...	2,762,635	16	4

1889.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

---

RAILWAYS.

(RETURN SHOWING THE TOTAL NUMBER OF MILES OPEN, IN COURSE OF CONSTRUCTION, AND COST OF SAME.)

---

*Ordered by the Legislative Assembly to be printed, 1 October, 1889.*

---

*[Laid upon the Table of the Legislative Assembly, in accordance with a promise made by the Colonial Treasurer, in reply to Question No. 1, 26th July, 1889.]*

Questions.

1. Cost of Railways in the Colony:—MR. SEE *asked* THE COLONIAL TREASURER,—
- (1.) The total number of miles of Railway open in the Colony for traffic?
  - (2.) The total cost of same, including rolling stock and plant?
  - (3.) The number of miles of railway in course of construction?
  - (4.) The probable cost of same?

Answers.

- MR. McMILLAN answered,—
- (1.) 2,170½ miles, to 30th June, 1889.
  - (2.) £29,839,167.
  - (3.) 10 miles 51 chains (North Shore to Pearce's Corner).
  - (4.) Probable cost, £203,000.

1889.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

THE HAWKESBURY RIVER.

(PETITION FROM RESIDENTS OF, AGAINST DREDGING, AND IN FAVOUR OF LIGHT LINE OF RAILWAY FROM WINDSOR TO SACKVILLE REACH.)

*Ordered by the Legislative Assembly to be printed, 29 August, 1889.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned freeholders, farmers, and residents of the Hawkesbury River in and below Windsor,—

HUMBLY SHOWETH:—

1. That a succession of floods dating back to the ever-memorable flood of June, 1867, have silted up the Hawkesbury River and rendered it unnavigable except for vessels of small tonnage and very light draught of water.

2. That your Petitioners learn that it is contemplated to expend a large sum of money in dredging operations on the said river, for the purpose of rendering it navigable.

3. That your Petitioners, well knowing the character of the said river, are decidedly of opinion that such expenditure would be wasteful in the extreme, and could not possibly have the effect intended owing to the immense deposits of sand and other obstructions to navigation, which are not only acted upon by floods and freshets, but also by tidal influence; therefore no permanent good could be achieved, as the work would be destroyed almost as soon if not before completion.

4. That your Petitioners respectfully show that, in order to effect a permanent work which would be a great benefit to the district at large, and greatly add to the revenue derivable from the Richmond and Windsor line of railway, and also to that portion of the Hawkesbury Line on the Great Northern Line, Sydney to Newcastle, having its terminus at Brooklyn, can be gained by the construction of a light line of railway or tramway similar to that in existence between Campbelltown and Camden.

5. That the construction of such a light railway would enable the two termini of Brooklyn and Sackville Reach to be bridged by steamers, which would greatly increase the passenger traffic on the existing lines of railway by giving increased facilities to tourists, who could then perform the road journey in a few hours at a trifling cost.

6. That the work would be of a permanent character and act as a feeder to existing lines; large quantities of fruit, maize, and other produce, timber, firewood, &c., could be procured for carriage, and the passenger traffic would be of a payable nature.

7. That a survey of such a line was made by E. M. Halligan, Esq., one of the Government railway surveyors, and he reported that there were no engineering difficulties in the construction of such a line to the deep waters of Sackville Reach, from Windsor Railway Station, a distance of 9 miles by land and 22 miles by water, and that the cost would not exceed £20,000.

Your Petitioners therefore humbly pray that you will take these premises into your earnest consideration, with the view of preventing the wasteful expenditure of public money contemplated.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 115 signatures.]

No. 1.

Valuation by Richardson and Wrench.

Valuation of Freehold Wharf Property, Pymont, by order of E. C. Batt, Esq.

98, Pitt-street, Sydney, 1 October, 1888.

THE land comprises an area of about 8½ acres, peninsular in shape, having about the following frontages, viz. :—About 925 feet to Darling Harbour, also 316 feet to Darling Harbour (at end of land), and 932 feet to Jones' Bay on the west. There is also a frontage of 350 feet to John-street, and some frontage to Jones-street. The average width may be stated at about 350 feet.

The above figures are to the limit of reclamation almost all formed. The vendors have acquired from the Government the right to extend jetties in various positions of a length of 60 feet. Some of these they will erect almost at once, and leave the others for future work.

The situation is within the boundaries of the city of Sydney, and severed from the central part thereof by the harbour above named, the most active passenger and freight trades being carried on thereat.

The water is represented to be of a depth varying from 27 feet upwards.

While the size of the land would allow of its being parcelled out into various wharf frontages, it is preferable to treat it as a property of exceptional area, and in view of the great improvements now proceeding within 1,500 feet of it, under Government direction, as forming part of the railway scheme at Darling Harbour, together with the consideration as to whether the railway should not be carried round

491—A

as

[920 copies—Approximate Cost of Printing (labour and material), £12 13s. 0d.]

as far as the Sugar Company's and other extensive works, thereby passing through this property, and consequently giving it a readier means of get away for goods going to the country and elsewhere, when the completed scheme of city rail be established. It would develop into a magnificent asset by the erection of spacious bonded and free stores to work in conjunction with the wharf feature. The scope of land, the easy approach for vessels by reason of the handy position of the frontages, and the freeness of working the land, stamp it as a property of large prospective value. Seeing that it at present lacks the element of revenue returns as a quotation in the investment market, a difficulty is confessed in appraising the realizable value, and it can only be a question of time, when the great convenience of railway being connected to it, very large figures must represent the value of the property.

Our estimate of the value of the whole property is £150,000.

RICHARDSON AND WRENCH.

No. 2.

Messrs. Batt, Rodd, and Purves to The Colonial Secretary.

*Re* Pyrmont Wharfage property.

Sir,

88, Pitt-street, Sydney, 12 April, 1889.

Referring to negotiations between the Minister and the Commissioners for Railways and ourselves, we now offer to sell the property as it stands, *i.e.*, with the valuable store thereon (estimated by the architects, Messrs. McCredie Brothers, as worth £12,500) for the sum of £120,000. The title is leasehold, but a contract has been entered into with Mrs. Onslow for the reversion, so that on the death of Lady Macarthur, on payment of the sum of £20,000, the property can be converted into a freehold.

We have, &c.,

BATT, RODD, AND PURVES.

No. 3.

H. Gorman, Esq., to The Colonial Secretary.

My dear Sir Henry,

133, Pitt-street, Sydney, 30 April, 1889.

I enclose according to promise a copy of the conditional contract entered into for the acquiring of this property. The original, and which you signed to day, I hold with the plan.

To morrow I will send you a tracing of the plan.

Yours truly,

H. GORMAN.

[Enclosure.]

Tuesday 30th April, 1889—Private Contract.

Conditions and terms of sale of the undermentioned property sold by Hardie and Gorman, at Bell's Chambers, 133, Pitt-street, Sydney.

ON account of Robert Smith as mortgagee of property at Pyrmont, comprising 8 acres 1 rood and 37½ perches, or thereabouts, as per plan of Messrs. Achison and Schleicher marked A attached, being the parcels of land respectively coloured thereon pink, green, and yellow or brown, together with the parcels marked B and C respectively, and containing 1 rood and 37½ perches respectively, for the lump sum of £135,000.

1. The vendor will, within a reasonable time after the day of sale, prepare and deliver to the purchaser, or his solicitor, or the auctioneers an abstract of his title, and shall not be called upon to abstract, produce, or procure a covenant to produce any deeds, copies of deeds, or evidences of title, whatsoever in support of his title, or in verification of the abstract other than what are now in his possession, and no objections shall be made to any deed or deeds (if any) which shall appear to have been executed under a Power of Attorney, and the properties are sold subject to the existing tenancies or occupancies.
2. That all attested or other copies and evidences of title which the purchaser shall require, and which the vendor shall be able and willing to obtain, shall be procured at the purchaser's expense.
3. That all objections which under these conditions the purchaser can take to the title shall be made and delivered to the vendor's solicitor within seven days from the delivery of the abstract, and all objections not so taken shall be deemed to be waived, and within fourteen days from the delivery of the abstract, the purchaser shall, at his own expense, tender to the vendor or his solicitor a conveyance for execution.
4. That no error or misdescription of the property shall annul the sale, but a compensation shall be made or given, as the case may require, by the usual mode of arbitration.
5. That upon the completion of the purchase the vendor will deliver to the purchaser all deeds relating solely to the lot sold, but will retain such as relate to other lands sold by, or belonging to, the vendor, and from such completion the purchaser shall be entitled to the rents and profits of the lot or lots purchased by him.
6. If the purchaser shall fail to comply with these conditions or any of them, all money, bills, and promissory notes which he shall have paid to the auctioneers or vendor on account of his purchase, shall be absolutely forfeited to the vendor; and the vendor or auctioneers shall be at liberty to sue such purchaser for breach of contract; or at his option resell the property in any manner, and upon such terms and conditions as he may think proper; and all loss and expenses consequent upon such resale, and all damages which the vendor may sustain thereby, shall be recoverable by him from the purchaser as and for liquidated damages; and it shall not be necessary to give any notice of such resale.
7. That if the vendor shall be unable or unwilling to remove any objection which the purchaser shall be entitled to make under these conditions, the vendor shall be at liberty to rescind the contract, and upon returning to the purchaser all money, bills, and promissory notes given by him as aforesaid shall not be liable to any sum for damages, costs, charges, or expenses whatsoever incurred by the purchaser in and about the contract.

TERMS OF SALE.

The property is sold subject to the restriction and obligation embodied in a certain contract entered into with Mort's Dock Company by the mortgagor not to sell or lease any of the said property to anyone for the purpose of carrying on any slip, marine engineering, or ship building trade thereon for a period of ten years from the 1st day of November, 1887.

As to so much of the land as is held under the provisions of Torrens' Act, this contract shall be deemed to comprise the usual printed conditions of Messrs. Hardie and Gorman relating to land held under such Act, and the property is sold subject thereto.

Subject to the preceding terms and conditions of sale and subject to the approval of Parliament to this contract, which approval shall be asked for within seven days from the date hereof, I undertake, on behalf of the Government of New South Wales, immediately on such approval being obtained, to resume for public purposes the property hereinbefore described; and I hereby further agree to fix the compensation money at £135,000; and Hardie and Gorman, for mortgagee, agree to sell the same.

For vendor, mortgagee.—HARDIE AND GORMAN.

HENRY PARKES,

Colonial Secretary.

No. 4.

The Railway Commissioners to The Secretary for Public Works.

Proposed purchase of Pymont wharfage property (old A.S.N. Co.'s Works).

Office of the Railway Commissioners of New South Wales,

Sydney, 2 May, 1889.

Sir,

The Commissioners recommended the purchase of this property as it can now be obtained on favourable terms, and in consequence of its convenient position for the shipping trade of Sydney.

The Commissioners feel that this property is most conveniently situated, both for dealing with goods and coal traffic, whereas the Long Nose Point scheme, which has been under consideration, although admirably suited for coal, would be too far up the harbour for dealing with goods traffic.

We are considering a plan for approaching the property at a very much less cost than would be entailed by the Long Nose Point scheme. The owners of the land, when we declined to recommend the purchase of the property for £250,000, proposed that railway access should be afforded them, but as the scheme put before us would have materially curtailed the accommodation possessed by the department in the Darling Harbour Yard, we could not see our way to fall in with the proposal, as it would simply have had the effect of materially enhancing the value of private property to the inconvenience of the State. If however, the land becomes the property of the State, and avoids the necessity for making the Long Nose Point scheme, we recommend independent access being given to it, and our proposal for this shall be put forward at an early date.

I have, &c.,  
G. M. S. EDDY,  
Chief Commissioner.

No. 5.

Telegram from G. Pile, Esq., to The Secretary for Public Works.

3 May, 1889.

READ debate, re Darling Island. Have carefully estimated resumptions, Long Nose Point railway—one hundred and seventy thousand pounds.

GEO. PILE.

No. 6.

The Colonial Secretary to The Secretary for Public Works.

My dear Mr. Smith,

2 May, 1889.

I enclose copies of papers relating to the land known as Darling Island. In addition to the principal portions, coloured pink and green, which give an area of a little over 8 acres, with frontage to deep water of 2,700 feet, there are two small portions, which I have marked in pencil A and B,\* with the name "Batt" upon them. \* Vide Plan.

The documents consist of,—

- 1. Copy memorandum of agreement to sell.
- 2. Tracing of plan of property.

Yours, &c.,  
HENRY PARKES.

No. 7.

Conditions and Terms of Sale.

CONDITIONS and Terms of Sale for sundry Properties to be sold by auction, on \_\_\_\_\_ by Hardie and Gorman, at Bell's Chambers, 133, Pitt street, Sydney, on account of the parties whose respective names are attached to the same.

- 1. That the highest bidder shall be the purchaser, and in case of any dispute, the lot or lots shall be put up again at any former bidding, and no bidder shall retract his or her bidding.
- 2. The vendor shall be at liberty to bid once for each lot.
- 3. Upon the fall of the hammer the purchaser shall pay down to the auctioneers a cash deposit of twenty-five pounds per cent. of the whole amount of the purchase money, and the residue of the purchase money as in terms hereinafter mentioned.
- 4. The vendor will, within a reasonable time after the day of sale, deliver to the purchaser or auctioneers sufficient particulars so as to enable him to prepare his transfer, and the purchaser shall, within seven days from receipt of such particulars, at his own expense, tender to the vendor or his solicitor, for execution, a memorandum of transfer in conformity with the provisions of the Real Property Act, and shall complete his purchase within fourteen days after receipt of particulars of title, and from such completion of the purchase, the purchaser shall be entitled to rent and profit of the lot or lots purchased by him, and the properties are sold subject to the existing tenancies or occupancies (if any).
- 5. That no error or misdescription of the property shall annul the sale, but a compensation shall be made or given as the case may require, by the usual mode of arbitration.
- 6. If the purchaser shall fail to comply with these conditions, or any of them, all money, bills, and promissory notes which he shall have paid to the auctioneers or vendor on account of his purchase, shall be absolutely forfeited to the vendor, and the vendor or auctioneers shall be at liberty to sue such purchaser for breach of contract, or at his option resell the property in any manner, and upon such terms and conditions as he may think proper, and all loss and expenses consequent upon such resale, and all damages which the vendor may sustain thereby, shall be recoverable by him from the purchaser as and for liquidated damages, and it shall not be necessary to give any notice of such resale.
- 7. That, if the vendor shall be unable or unwilling to remove any objection which the purchaser shall be entitled to make under these conditions, the vendor shall be at liberty to rescind the contract, and upon

upon returning to the purchaser all money, bills, and promissory notes given by him as aforesaid, shall not be liable to any sum for damages, costs, charges, or expenses whatsoever incurred by the purchaser in and about the contract.

8. The vendor shall not be bound to pay for the proportion of any dividing fence or fences between the lots sold and unsold.

TERMS OF SALE.

That, upon the fall of the hammer, the purchaser shall pay into the hands of the auctioneers a cash deposit equal to twenty-five per cent. of the whole amount of the purchase money, and the balance in cash on execution of memorandum of transfer.

No. 8.

Hardie and Gorman to The Secretary for Public Works.

Sir,

133, Pitt-street, Sydney, 6 May, 1889.

By the direction of Mr. G. C. Westgarth, we have now the pleasure to hand you the surveyor's description of the Pymont property to be resumed by the Government.

We have, &c.,

HARDIE AND GORMAN.

[Enclosure.]

ALL that piece or parcel of land situated at Pymont, in the parish of St. Andrew, county of Cumberland, and Colony of New South Wales, be the hereinafter mentioned several dimensions, a little more or less, containing by admeasurement 8 acres 1 rood 37½ perches, more or less, and comprising parts of Thomas Jones' 55-acre grant and approved reclamations adjacent thereto.

Commencing at a point on the north-western side of John-street, Pymont, distant north 54 degrees 21 minutes east 200 links from its intersection with the north-eastern side of Mill-street; and bounded thence towards part of the south-west by a fenced line dividing it from original lot 5 of the Pymont Estate as occupied, bearing north 35 degrees 25 minutes west 251.15 links; thence again towards the south-west by a fenced line bearing north 54 degrees 16 minutes west 64.65 links to the southern extremity of the eastern termination of a lane called Jones-street leading from Mill-street; thence towards the west by that eastern termination of Jones-street, being a fenced line bearing north 3 minutes west 34.9 links; thence again on the south-west by a north-eastern side of Jones-street, being a fenced line bearing north 54 degrees 28½ minutes, west 173.66 links, to a north-eastern angle thereof; thence towards part of the north-west by a fenced line bearing north 18 degrees 45 minutes east 284.3 links, to a point on the limit of reclamation of Jones' Bay; thence again towards the north-west by the said limit of recreation, being lines bearing successively north 59 degrees 12 minutes east 90 links, north 59 degrees 25 minutes east 89 links, north 61 degrees 47 minutes east 45 links, north 63 degrees 56 minutes east 186.9 links, north 12 degrees 36 minutes east 50.75 links, north 11 degrees 20 minutes east 175.3 links, north 22 degrees 43 minutes east 290 links, south 71 degrees 4 minutes east 24.1 links, south 71 degrees 39 minutes east 29.8 links, and south 29 degrees 30 minutes east 38 links, to a point on the original high-water mark of Jones' Bay; thence by that high-water mark northern to a point thereon, distant in a direct line north 21 degrees 27 minutes east 213.9 links from the last-mentioned point; thence again towards the north-west, north, north-east, and south-east by the limit of reclamation of Jones' Bay, Johnstone's Bay, and Darling Harbour, being lines bearing, successively, north 56 minutes east 43.4 links, north 12 degrees 42 minutes east 40.2 links, north 40 degrees 37 minutes east 31.3 links, north 50 degrees 45 minutes east 40.5 links, north 58 degrees 49 minutes east 42.1 links, north 69 degrees 42 minutes east 12.4 links, south 76 degrees 56 minutes east 67 links, north 89 degrees 11 minutes east 63 links, south 75 degrees 7 minutes east 19.7 links, south 67 degrees 28 minutes east 43.6 links, south 53 degrees 25 minutes east 34.9 links, south 25 degrees 6 minutes east 35.7 links, south 67 degrees 25 minutes west 11.5 links, south 23 degrees 47 minutes east 19.6 links, south 7 degrees 20 minutes east 22.5 links, south 5 degrees 53 minutes west 165.4 links, south 11 degrees 50 minutes west 160.6 links, south 78 degrees 40 minutes east 14.6 links, south 25 minutes west 45.5 links, south 10 degrees 3 minutes west 37.6 links, south 18 degrees 33 minutes west 79.6 links, south 22 degrees 6 minutes west 338.2 links, south 19 degrees 18 minutes east 49.8 links, south 3 degrees 13 minutes east 51.4 links, and south 31 degrees 18 minutes west 398.2 links, to a point on the limit of reclamation of Darling Harbour at the northern extremity of the north-western side of John-street aforesaid; and thence towards the remainder of the south-east by part of the north-western side of John-street, bearing south 54 degrees 21 minutes west 462.95 links, to the point of commencement.

Please prepare description for resumption as quickly as possible.—J.B., 7/5/89.

No. 9.

Notification of Resumption.

NOTIFICATION OF RESUMPTION OF LAND UNDER 44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency the Right Honourable CHARLES ROBERT, BARON CARRINGTON,  
to wit. } a Member of Her Majesty's Most Honourable Privy Council. Knight Grand  
(L.S.) } Cross of the Most Distinguished Order of Saint Michael and Saint George,  
CARRINGTON, } Governor and Commander-in-Chief of the Colony of New South Wales and its  
Governor. } Dependencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with wharf accommodation and approaches thereto at Darling Island, in the City of Sydney, in the said Colony, for and towards the completion of which said works public funds are available; and whereas the land hereinafter described is required for the construction of the said works: Now I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do, by this notification published in the *Gazette* and in a newspaper, that is to say, in the *Sydney Morning Herald*, circulated in the Police District wherein the said land is situated, declare that the land hereinafter described has been resumed for the public purposes hereinafter mentioned, that is to say, for and in connection with the providing of wharfage accommodation for the berthing, loading, and discharging of vessels to the intent that, upon the publication of this notification in the *Gazette*, the legal estate in the said land shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty, for the purpose of the said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estate, interests, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the intent

intent further that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee, with the powers stated in the last-mentioned Act: And I declare that the following is the description of the land hereinbefore referred to, that is to say—

All that piece or parcel of land situated at Pymont, in the parish of St. Andrew, county of Cumberland, and Colony of New South Wales, be the hereinafter mentioned several dimensions a little more or less, containing by admeasurement 8 acres 1 rood  $37\frac{3}{4}$  perches more or less, and comprising parts of Thomas Jones' 55-acre grant and approved reclamations adjacent thereto: Commencing at a point on the north-western side of John-street, Pymont, distant north 54 degrees 21 minutes east 200 links from its intersection with the north-eastern side of Mill-street; and bounded thence towards part of the south-west by a fenced line dividing it from original lot 5 of the Pymont Estate, as occupied, bearing north 35 degrees 25 minutes west 251.15 links; thence again towards the south-west by a fenced lane bearing north 54 degrees 16 minutes west 64.65 links to the southern extremity of the eastern termination of a lane called Jones-street leading from Mill-street; thence towards the west by that eastern termination of Jones-street, being a fenced line bearing north 3 minutes west 34.9 links; thence again on the south-west by a north-eastern side of Jones-street, being a fenced line bearing north 54 degrees 28½ minutes west 173.66 links, to a north-eastern angle thereof; thence towards part of the north-west by a fenced line bearing north 18 degrees 45 minutes east 284.3 links to a point on the limit of reclamation of Jones' Bay; thence again towards the north-west by the said limit of reclamation, being lines bearing successively north 59 degrees 12 minutes east 90 links, north 59 degrees 25 minutes east 89 links, north 61 degrees 47 minutes east 45 links, north 63 degrees 56 minutes east 186.9 links, north 12 degrees 36 minutes east 50.75 links, north 11 degrees 20 minutes east 175.3 links, north 22 degrees 43 minutes east 290 links, south 71 degrees 4 minutes east 24.1 links, south 71 degrees 39 minutes east 29.8 links, and south 29 degrees 30 minutes east 38 links, to a point on the original high-water mark of Jones' Bay; thence by that high-water mark northerly to a point thereon distant in a direct line north 21 degrees 27 minutes east 213.9 links from the last-mentioned point; thence again towards the north-west, north, north-east, and south-east by the limit of reclamation of Jones' Bay, Johnson's Bay, and Darling Harbour, being lines bearing successively north 56 minutes east 43.4 links, north 12 degrees 42 minutes east 40.2 links, north 40 degrees 37 minutes east 31.3 links, north 50 degrees 45 minutes east 40.5 links, north 58 degrees 49 minutes east 42.1 links, north 69 degrees 42 minutes east 12.4 links, south 76 degrees 56 minutes east 67 links, north 89 degrees 11 minutes east 63 links, south 75 degrees 7 minutes east 19.7 links, south 67 degrees 28 minutes east 43.6 links, south 53 degrees 25 minutes east 34.9 links, south 25 degrees 6 minutes east 35.7 links, south 67 degrees 25 minutes west 11.5 links, south 23 degrees 47 minutes east 19.6 links, south 7 degrees 20 minutes east 22.5 links, south 5 degrees 53 minutes west 165.4 links, south 11 degrees 50 minutes west 160.6 links, south 78 degrees 40 minutes east 14.6 links, south 25 minutes west 45.5 links, south 10 degrees 3 minutes west 37.6 links, south 18 degrees 33 minutes west 79.6 links, south 22 degrees 6 minutes west 338.2 links, south 19 degrees 18 minutes east 49.8 links, south 3 degrees 13 minutes east 51.4 links, and south 31 degrees 18 minutes west 398.2 links, to a point on the limit of reclamation of Darling Harbour at the northern extremity of the north-western side of John-street aforesaid; and thence towards the remainder of the south-east by part of the north-western side of John-street bearing south 54 degrees 21 minutes west 462.95 links, to the point of commencement.

In witness whereof, I have hereunto set my hand and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this fourth day of June, in the year of our Lord one thousand eight hundred and eighty-nine, and in the fifty second year of Her Majesty's Reign.

By His Excellency's Command,

BRUCE SMITH.

GOD SAVE THE QUEEN!

#### No. 10.

#### Notice of Claim.

Lands for Public Purposes Acquisition Act, 44 Vic. No. 16.—First Schedule.—Notice of Claim and Abstract.

To the Minister for Works—

In pursuance of the "Lands for Public Purposes Acquisition Act," and of the enactments therewith incorporated, I hereby give you notice that I claim compensation in respect of the land hereunder described, which has been resumed under the said Act. The amount of such claim, and other the particulars required by the said Act, are stated in the subjoined Abstract.

#### ABSTRACT.

Robert Smith, of 2, O'Connell-street, Sydney, solicitor, as mortgagee in fee. See description embodied in notification of resumption, published in *Government Gazette*, 4th June, 1889, No. 290, page 3910. No quit rent payable. The property is believed to be unoccupied. The amount claimed for compensation is £135,000, as fixed by contract, dated 30th April, 1889, and made between Hardie and Gorman, as the vendor's agents, and the Honorable Sir Henry Parkes, for and on behalf of the Government. See Abstract of Title sent to Crown Solicitor 10th June, 1889. Norton, Smith, Westgarth and Co., of 2, O'Connell-street, Sydney.

ROBERT SMITH

(By his Attorney—G. C. WESTGARTH),

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

**RAILWAYS.**

(PAPERS IN REFERENCE TO CONSTRUCTION OF, TO LONGNOSE POINT.)

*Ordered by the Legislative Assembly to be printed, 23 July, 1889.*

EXTRACT from the Votes and Proceedings, Legislative Assembly, Wednesday, 26th June, 1889. No. 48.

- (4.) Railway to Longnose Point, Balmain:—Mr. Clubb asked the Secretary for Public Works,—
- (1.) Have the Commissioners for Railways reported to the Government in reference to the construction of a railway to Longnose Point, Balmain?
  - (2.) If so, has the Government considered such report; and what decision has been arrived at with regard to the said railway proposal?

Mr. Bruce Smith answered,—

- (1.) The Commissioners have reported.
- (2.) The report has not yet been considered, inasmuch as the lately acquired purchase at Darling Harbour promises to afford all the accommodation required for the present.

Sir,

Colonial Secretary's Office, Sydney, 9 May, 1889.

I am directed by the Colonial Secretary to transmit to you herewith a copy of an order of the Legislative Assembly for certain information respecting the "proposed railway to Longnose Point," and to request that you will bring the same under the notice of the Secretary for Public Works.

I have, &c.,

CRITCHETT WALKER,

Principal Under Secretary.

The Under Secretary for Public Works.

11. PROPOSED RAILWAY TO LONGNOSE POINT (*Formal Motion*):—Mr. Garrard moved, pursuant to Notice, That there be laid upon the Table of this House, copies of all minutes, reports, estimates, plans, and papers in reference to the proposed railway to Longnose Point, Balmain.  
Question put and passed.

Proposed line of railway from Tempe to Longnose Point, Balmain—6 miles 66 chains.  
In accordance with section 13 of the Public Works Act of 1888, we beg to report as follows:—

Cost of construction.

	£	s.	d.
The Engineer-in-Chief estimates the cost of construction of the line (exclusive of land and compensation) at ... ..	250,000	0	0
Annual cost.			
Capital expenditure at 3½ per cent. ... ..	8,750	0	0
The estimated expenses of working would be:—			
Locomotive ... ..	3,529	0	0
Permanent-way ... ..	2,000	0	0
Traffic and shipping charges ... ..	9,000	0	0
	£14,529	0	0

The Metropolitan Coal Company estimate that they will be able to send away 300,000 tons per annum if proper facilities are provided. There are eight other collieries along the Illawarra line, and although no reliable information can be obtained as to the tonnage of coal that would be sent over the new extension, if constructed, yet in all probability they would ship amongst them at least another 100,000 tons per annum.

The amount of revenue from this traffic appertaining to the new section of line would be £19,139.

We

We consider that this scheme should not be looked upon altogether as to whether it will pay in itself but as a necessary part of the Illawarra line scheme, as the coal properties cannot properly be developed without ample and expeditious means being provided for shipment at the deep waters of Port Jackson. It is not possible to make suitable arrangements at Darling Harbour for the shipment of large quantities of coal, and even assuming sufficient space and facilities existed at that point it would be very undesirable to take a heavy coal traffic amongst the numerous passenger trains running to and from Sydney.

In addition to the scheme as laid down in the plan, we recommend the putting in of a curve from off the Suburban line on to the new line so as to admit of traffic from the west and north to run direct to Longnose Point. It would also be a great advantage to put in a connection on the Sydney side with the Suburban line so as to admit of traffic being passed direct from Sydney to Longnose Point.

E. M. G. EDDY, Chief Commissioner.

W. M. FEHON, Commissioner.

CHARLES OLIVER, Commissioner.

The seal of the Railway Commissioners of New South Wales was hereto affixed, this nineteenth day of March, in the presence of,—

HUGH M'LACHLAN.

Proposed purchase of Pyrmont wharfage property (old A.S.N. Co's. Works.)

Sir,

Office of the Commissioners of New South Wales, Sydney, 2 May, 1889.

The Commissioners recommended the purchase of this property as it can now be obtained on favourable terms, and in consequence of its convenient position for the shipping trade of Sydney.

The Commissioners feel that this property is most conveniently situated, both for dealing with goods and coal traffic, whereas the Longnose Point scheme, which has been under consideration, although admirably suited for coal, would be too far up the harbour for dealing with goods traffic.

We are considering a plan for approaching the property at a very much less cost than would be entailed by the Longnose Point scheme. The owners of the land, when we declined to recommend the purchase of the property for £250,000, proposed that railway access should be afforded them; but, as the scheme put before us would have materially curtailed the accommodation possessed by the Department in the Darling Harbour yard, we could not see our way to fall in with the proposal, as it would simply have had the effect of materially enhancing the value of private property to the inconvenience of the State. If, however, the land becomes the property of the State, and avoids the necessity for making the Longnose Point scheme, we recommend independent access being given to it, and our proposal for this shall be put forward at an early date.

I have, &c.,

E. M. G. EDDY,

Chief Commissioner.

The Honorable the Minister for Public Works.

Dear Sir,

Landscape Villa, Darling-street, Balmain, 30 March, 1889.

I should be glad of any information *re* the proposed line of railway to the deep waters of Longnose Point, Balmain. I understand your Commissioners have recently gone over the route, and, as this line has been very favourably endorsed by the general public, I shall be glad to hear that you have decided to recommend it, at the earliest opportunity, to the Works Committee, with a view to an early commencement of this great national undertaking.

I am, &c.,

GEORGE CLUBB, M.P.

E. Eddy, Esq., Commissioner, Railways.

Acknowledged, 1/4/89.

Dear Sir,

Metropolitan Coal Company of Sydney, 27 March, 1889.

I have to acknowledge receipt of your letter of 26th instant, and in reply have to state that I will wait upon the Commissioners at the time appointed—Thursday, 28th instant, at 11 a.m.

I am, &c.,

GRESLEY LUKIN.

The Chief Clerk, Railway Department, Sydney.

Dear Sir,

Metropolitan Coal Co., Queensland Agency,

Sydney, 25 March, 1889.

I have to thank you for your note, with enclosure, of 21st instant. I find that though I had never seen or been advised of your reply to my letter of 26th ultimo, it was duly received in this office.

I much regret that I led you to suppose the contrary upon the occasion of our recent meeting.

May I ask you to fix a time when I may wait upon the Railway Commissioners for the purpose of representing the traffic requirements of this Company.

I am, &c.,

GRESLEY LUKIN.

A. Richardson, Railway Department, Sydney.

Appoint Thursday at 11 o'clock a.m.—A.R., 26/3/89. Informed, 26/3/89.

Dear Sir,

26 March, 1889.

In reply to your letter of 25th instant, I am requested to inform you that, if convenient to yourself, the Commissioners will be able to see you on Thursday next at 11 a.m.

Yours, &c.,

H. M'LACHLAN,

Chief Clerk.

Gresley Lukin, Esq., Queensland Agency, George-street.

Gentlemen,

## The Metropolitan Coal Company of Sydney (Limited),

Gentlemen,

Sydney, 25 February, 1889.

I am requested by my Directors to ask you what provision you propose to make for the haulage and delivery of the coal of this Company to ocean-going ships.

As I have advised you in previous correspondence, the output of this colliery from the beginning of next year can be made equal to 1,000 tons per day, while before the expiration of many weeks 500 tons may be brought daily to the surface; but it would now seem that the enterprise and expenditure of the Company will, for an unknown period, be comparatively fruitless, consequent upon the inaction, if not apathy, of those who control the railways of the country.

Mr. Goodchap refused to allow the Company to construct and employ its own rolling-stock; but agreed that the department would fit each truck with two properly constructed boxes for shipping the coal.

Under the present system of transport it is obvious that the Company is absolutely debarred from the only outlet which can make the colliery a profitable undertaking.

The creation of the Company, and the adherence of the English shareholders (who represent a large amount of contributory capital) were influenced by the known intentions of the Government to provide ample facilities for transport and loading of the product of the Illawarra coal-measures to the largest ocean steamers.

As a matter of fact, such intention was formally intimated to a deputation of the directors of this Company by the late Minister for Works in June last; but to-day we find ourselves, by default of the Government—after the expenditure of a great sum of money and successfully subduing the most extraordinary natural obstacles to a great development of our property known in the history of coal-mining in Australia—absolutely, without even the near prospect of the legitimate reward of our enterprise.

This Company is represented in London by an influential board, of which Sir James Fergusson, Bart., M.P., Under Secretary for State for the Colonies, is chairman. You will readily understand the influence these gentlemen might properly exercise with the managers of the great Australian ocean steamers, to consume our coal; but of what avail would it be under existing circumstances? If we had shipping facilities we could send 1,000 tons of coal a day over 28 miles of your line, support a population of 1,500 persons, and give you a revenue of £39,125 per annum.

For your information I cover copy of letters I addressed to you in December last, which contain some important facts which I need not here iterate.

That letter (15th December) deals with the question of the proposed deviation to Longnose Point, Herewith. and I may say here that you replied on 9th January (No. 88-7,828) that it had been referred to the Minister for Works, which was the last I heard of the subject.

I do not now wish to indicate to you any particular route or shipping place, but to emphasize the fact that we have no outlet for the coal.

My Directors rely upon ascertainable evidence in support of our case, as establishing a clear right to the intervention of the State, whether represented by the Commissioners or the Government, and as I am in some doubt whether I am right in addressing you on this subject, I will avoid possible delay by forwarding a copy of this letter to the Minister for Works.

Our position is most unsatisfactory. The department, through Mr. Goodchap, has refused to permit the employment of our own rolling-stock, and is not apparently providing the facilities to take its place. We have a great mine, rapidly approaching a costly and extraordinary development, that will admit of an output of 1,000 tons per day, and the railway monopoly of the country, that has already a perfect road system to within a few chains of deep water, does not make any effort to carry out a work that would alike largely augment its revenue and materially assist in developing one of the greatest industries of the territory.

I have, &amp;c.,

GRESLEY LUKIN,

Manager.

The Railway Commissioners, Railway Department, Sydney.

The Secretary, Metropolitan Coal Company,—

With reference to your letter of yesterday's date, relative to the proposed provision for the delivery of coal from the Metropolitan Company's mine, I am directed by the Commissioners to inform you that their position in the matter is explained in my letter to you, under date of the 9th ultimo; but I am instructed to add, for the information of your Directors, that since that date the Government has referred the proposed extension from Tempe to Longnose Point to the Commissioners, the route has been inspected, and the Government will be in a position shortly to decide what action to take in the matter.

## The Metropolitan Coal Company of Sydney (Limited),

Gentlemen,

Sydney, 15 December, 1888.

I am requested by my Directors to place before you the following material facts in respect to the operations of this Company as bearing upon the question of the proposed construction of a line of railway from Tempe to Longnose Point, Balmain, and the revenue that may be derived therefrom.

This Company has a nominal capital of £300,000, with a contributory capital of £200,000. Contributing shares, amounting to £100,000, have been already issued, and of this sum £60,000 has already been expended, while it is estimated that a further sum of £15,000 will be necessary to put the works now in progress in full working order.

The works already completed comprise a main circular shaft of 16 feet diameter, sunk to 1,150 feet, and finished with due regard in every particular to the requirements of the Mines Department. The cost of this work was £13,000. A railway siding from the 27-mile peg of the Illawarra line to the pit mouth, with all necessary accommodation for the truck traffic of the colliery. The cost of this work was £12,000. Pit-head frame, and motive power equal to an output of 1,500 tons per day, now on the ground, and in course of erection. Estimated cost, £15,000. Air-shaft now being sunk with all possible speed; present depth, 250 feet; estimated depth, 1,100 feet; diameter, 15 feet; estimated cost, £8,500.

So soon as the permanent machinery is in position, which should be in May next, the output of this mine can be made equal to 500 tons per day, and upon completion of the air-shaft, about April, 1890, the output can be doubled, or made equal to 1,000 tons daily.

Under

Under the existing railway system, the operations of this Company must be limited by the Sydney market, and the inadequate facilities offered by the Darling Harbour wharf, which is only accessible to vessels of light draught and small tonnage; but given a railway to Longnose Point, and the business of the Company can be at once expanded indefinitely, and the capacity of the present workings of the colliery would be at once taxed to their utmost limit. It would thus appear that if the projected line to Balmain be carried out, 1,000 tons of coal would daily pass over it. This would give 313,000 tons per annum, which at, say, 2s. 6d. per ton, would make the annual contribution of this one colliery £39,125, an income which, I venture to suggest, would of itself justify the construction of the line. But our case does not end here, for once this colliery is in touch with the great ocean shipping at Port Jackson we may fairly calculate upon an indefinite expansion of the trade, and, in anticipation of that demand upon the resources of the Company, my Directors have formulated plans for the duplication of the existing works, when an output of 2,000 tons per day will be easily attainable.

Of the vast nature, and the extraordinary value of the coal-measures lying along this part of the Illawarra line I need hardly speak; but it is relevant to the subject of this letter to say that the proved seam of coal in this mine is 13 feet in thickness without a flaw, that it is admitted to be the best steaming coal in Australia, while the area of land held by the Company comprises 18,000 acres.

I should add that my Directors will be pleased and desire to wait upon you at any time you may appoint, for the purpose of affording you any further information you may wish upon a subject that they are assured is alike of very great moment to the interests of your department as also to the shareholders of this Company.

Under separate cover I forward you a copy of the prospectus and articles of association of the Company.

The Railway Commissioners, &c., Railway Department, Sydney.

I have, &c.,  
GRESLEY LUKIN,  
Manager.

The Metropolitan Coal Company of Sydney (Limited),  
Sydney, 17 December, 1888.

Gentlemen,

Referring to my letter of 15th instant, with regard to the future traffic from the works of this Company over a possible railway from Tempe to Longnose Point, Balmain, permit me to add a further reason in support of such a work.

The terms upon which this Company hold the land comprised in the lease from the Crown include an annual rental and a royalty of 6d. per ton for every ton of coal raised. Thus the delivery of 1,000 tons of coal daily at Longnose Point would mean a revenue of £7,800 per annum to the Treasury from royalty alone.

The Railway Commissioners, &c., Sydney.

I have, &c.,  
GRESLEY LUKIN,  
Manager.

Sir,

27 February, 1889.

With reference to your letter of yesterday's date, relative to the proposed provision for the delivery of coal from the Metropolitan Company's mine, I am directed by the Commissioners to inform you that their position in the matter is explained in my letter to you under date of the 9th ultimo, but I am instructed to add, for the information of your Directors, that, since that date, the Government has referred the proposed extension from Tempe to Longnose Point to the Commissioners. The route has been inspected, and the Government will be in a position shortly to decide what action to take in the matter.

The Secretary, Metropolitan Coal Company, Sydney.

I have, &c.,  
D. VERNON,  
Secretary for Railways.

Sir,

9 January, 1889.

With reference to the application which has been made by the Metropolitan Coal Company for the construction of a line of railway from Tempe to Longnose Point, I am desired by the Commissioners to inform you that this being a work of railway construction, it would appear to be outside the scope of the functions devolving upon them under the Railway Act, and the matter has therefore been referred to the Honorable the Minister for Railways for such action as he may deem necessary.

Gresley Lukin, Esq., Metropolitan Coal Company, Sydney.

I have, &c.,  
D. VERNON,  
Secretary for Railways.

Sir,

Department of Railways, Sydney, 27 December, 1888.

I have the honor, by the direction of the Railway Commissioners, to submit herewith letters (2) from the Manager of the Metropolitan Coal Company, of Sydney, urging the construction of a line from Tempe to Longnose Point, and pointing out the benefits which would accrue both to the department and to the trade from the execution of that work.

Being a work of railway construction, it would appear to be outside the scope of the functions devolving upon the Commissioners under the Act, and I have, therefore the honor to forward the papers for such action as the Honorable the Minister may deem necessary.

The Under Secretary for Finance and Trade, Sydney.

I have, &c.,  
D. VERNON,  
Secretary for Railways.

Forward to the Cabinet.—J.F.B., 9/1/89. The Principal Under Secretary.—G.E., B.C., 9/1/89. Please find out if this proposed line has been submitted to the Commissioners.—J.B., 25/1/89. Yes.

[Enclosures.]

[Enclosures.]

Gentlemen, The Metropolitan Coal Company of Sydney (Limited), Sydney, 17 December, 1888.  
Referring to my letter of the 15th instant, with regard to the future traffic from the works of this Company over a possible railway from Tempe to Longnose Point, Balmain, permit me to add a further reason in support of such a work.

The terms upon which this Company hold the land comprised in the lease from the Crown, include an annual rental, and a royalty of 6d. per ton for every ton of coal raised. GRESLEY LUKIN,

Manager.

The Railway Commissioners, &amp;c., &amp;c., Railway Department, Sydney.

The Under Secretary for Finance and Trade, 27/12/88.

Sir,

Railway Department, Sydney, 26 February, 1889.

Will you kindly let us have by bearer papers referring to railway carriage of coal from Metropolitan Company's mine (Railways, 88-21,676) sent to you on 28th December last.

Yours, &amp;c.,

H. M'LACHLAN.

Under Secretary.

The required paper was forwarded to Works Department on 24th ultimo.—G.E., 26/2/89. H. M'Lachlan, Esq.—These papers were returned by the Treasury under cover to Works Department, with a number of papers having reference to railway matters, and I am informed, on inquiry at Works Department, that the papers were returned to the Railway Department. The papers have not been received in the records up to the present.—J.P., 26/2/89. The Chief Clerk.

Minute Paper.

Subject:—Proposed new Railway Lines.

Department of Public Works, Sydney, 7 December, 1888.

WITH respect to the list of railway lines which are ready for submission for the reports of the Board of Railway Commissioners, I have to submit for the consideration of my colleagues a further list of lines which are in such an advanced stage that they can be dealt with at once by the Commissioners, as in the case of those mentioned in the list already forwarded. The lines referred to are as under:—

Narrabri to Moree.

Westmead to Dural.

Narrabri to Walgett.

Tempe to Balmain.

JOHN SUTHERLAND.

Forward to Sir Henry Parkes.—JOHN SUTHERLAND, 20/12/88. Principal Under Secretary.—  
J.B., 20/12/88. Submitted, 22/12/88. Seen by Commissioners. Resubmit on Monday next.—  
A.R., 15/1/89. Resubmitted, 21/1/89. 88-16,268. Narrabri to Moree, Westmead to Dural,  
Narrabri to Walgett, Tempe to Balmain.—Principal Under Secretary, B.C., 20/12/88. 88-14,121.  
Under Secretary for Works, B.C., 20/12/88. (16,268) Proposed new railway lines. Submitted, 22/12/88.  
The Minister of Railways.—Mr. Burns will be good enough to forward these with necessary papers to  
Commissioners for report.—H.P., 2/1/89. The Under Secretary for Finance and Trade.—C.W., B.C.,  
3/1/89. Forward to the Commissioners.—J.F.B., 11/1/89. The Secretary for Railways.—G.E., B.C.,  
11/1/89. Received, 14/1/89.

Tempe

## Tempe to Balmain (Longnose Point).

LENGTH, 6 miles 66 chains; estimated cost, including 1,350 feet wharf and five steam cranes, £250,000 (exclusive of land).

We have no detailed report as to traffic likely to arise, but general report is herewith.

Mr. Inspector H. Richardson would perhaps be best officer to obtain information in advance of Commissioners. H. M.L., 11/2/89.

## Proposed line for goods traffic from Tempe to Balmain.

THE following is a copy of the report made by the Coaching Superintendent (Mr. H. Richardson) with regard to the probable traffic to be expected upon this line. Mr. Richardson says, under date 20th December, 1888:—

"I have gone through this line, and do not anticipate much local traffic. The Metropolitan Coal Company, at Helensburgh (28 miles from Sydney), will, in about three or four months, be in a position to put out a large quantity of coal, and we are certain to get all their shipping traffic; but I am not so sure of the other companies south of Helensburgh, as they have all got their private jetties, and are increasing them. During rough weather we should get the shipping traffic.

A. P., 11/2/89.

Extract from *The Sydney Morning Herald*, Wednesday, 4th July, 1888.

## RAILWAY STATIONS.

(To the Editor of the *Herald*.)

Sir,—I noticed in your Saturday's issue a paragraph on the opening of the Metropolitan Coal Company's works at Camp Creek. It appears that in a few months coal from this and other southern mines will come by rail to Sydney, and it is supposed that every facility will be afforded for placing the coal on ships which may convey it to all parts of the world. Now, Sir, will any man in reason presume that this can be at Darling Harbour with the present accommodation at the railway station? Why, it is not adequate for the requirements of the moment. It will be absolutely necessary to erect a few more sheds at Darling Harbour anyhow. But does it not seem more expedient to relieve the congested traffic at Darling Harbour or Redfern, which is now carried on with danger to limb and life of both men and horses?

This could easily be done by constructing a cheap railway line from (say) St. Peters to Longnose Point, Balmain. Sir Henry Parkes has no doubt not rushed into making proposals in connection with the railway to and from Balmain, which already has a population of over 30,000 people. It is to be hoped that Carlyle's witty words with regard to his countrymen do not apply with equal truth to the Balmaniacs; but there is no doubt they are either very good-natured or rather dormant.

I am, &c.,

THOS. WM. FLINN.

July 3, 1888.

A.R., 6/7/88, Mis. 89-1,158. 88-21,676 to Treasury with letter.—A.R., 28/12/88.

Extract from the *Balmain Leader*, Wednesday, 4 July, 1888.

## THE LONGNOSE RAILWAY QUESTION.—MONSTER MEETING.

A MEETING was held at the Town Hall last evening, called by requisition to the Mayor, to consider the advisability of agitating for having the proposed railway terminus in Glebe Island instead of Longnose Point. It became evident from the first that the Town Hall was useless for the holding of the meeting, and, at the suggestion of the Mayor, the immense audience, numbering some thousand, adjourned to the green fronting the Mayor's parlor. His Worship the Mayor occupied the chair, and most of the members of the Borough Council, and all the influential residents of the district put in an appearance.

The Mayor apologized for keeping the meeting—first the gas went out, and then he had to wait for resolutions. His Worship then read the requisition, as appeared in the *Leader* of Saturday, and then an apology from Alderman Burns, who was suffering from a sore throat. The Mayor spoke of the great importance of the meeting and the want of a suitable place for holding it, especially in taking the show of hands; he asked for the truth on the part of the speakers in advocating their pet route. He would not express any personal views on either route. Either one or the other would be for the benefit of Balmain. He regretted in the requisition mud had been thrown on the advocates of the Longnose routes. He asked a fair and respectful hearing for both sides.

Captain McClemens was called upon to move the first resolution. He said he had signed the requisition without reading it; his sight is not good. He wished well for Glebe Island, but thought the best route for the railway was Longnose Point. It was better for coaling and many other resources. He thought something ought to have been done for Glebe Island. It was a grand site, and with a railway there would be of the greatest benefit—for the fruit market. A loop-line to Glebe Island would cost £3,000, and Johnson's Bay could be available for much good. Such a line would pay itself in three years. It would give employment to many at present in want. He urged energy in trying to get the flat drained over Glebe Island. Moved: "That we highly approve of the railway proposed by the Government to Longnose Point (great cheers and laughter), as we consider it the best position for shipping coal in Port Jackson; but we would recommend a loop-line to Glebe Island for fruit and hay markets." This he thought was what was wanted; the Glebe Island market would improve Balmain far more than the railway at Longnose Point.

Mr. William Flood seconded. He did not go as far as advocating Longnose Point, but he found by opposing it would be giving room to Government to dissolve the motion of having the line at all. He would like the coal-staiths there or any other point, but it was nothing compared to Glebe Island for a market for produce; and repairing shops could also be placed there. The water could be deepened at a small expense. The spot was central. It would do away with the nuisance of Glebe Island Abattoirs. It would be cheaper and better for the Government to have made the terminus at Glebe Island, but he did not want to capsize the work already done. The speaker referred to promises by his minister when a child, that if he was satisfied with his lot he would go to heaven; well, he, through life, had not been satisfied with things as they were. Ever since he had been in Balmain candidates for election had promised

promised to get Johnson's Bay reclaimed, and something done for Glebe Island. In seconding the resolution he represented what he said. His sympathies were wholly with the Glebe Island; but, rather than make a division among the people, he gave way, and hoped that with the Longnose terminus Glebe Island loop-line would also be considered. The loop-line to the abattoirs would be of great advantage in stopping the driving of cattle in the streets.

Mr. Gow asked the ruling of the Mayor in the resolution whether it was in order. It being different from the requisition.

The Mayor said his ruling was quite free from personal feeling in the matter. He owned no property on either route; but the requisition clearly said "to urge upon the Government the advisability of carrying the railway to Glebe Island, in lieu of along to Longnose Point. We desire to urge upon the Ministry the reasons why the above route should be adopted, being better situated and far less expensive than that which means heavy outlay in buying up a lot of private property." The speakers had departed altogether from the requisition, and the mover and seconder were not in order; but, as so many citizens were present, he thought the matter might be met by slightly amending the resolution.

Alderman G. Clubb moved, as an amendment: "That this meeting is of opinion that, in view of the advanced state of the Government plans for railway to Longnose Point, it would be unwise to in any way interfere with the said Government plans." Alderman Clubb showed what, in his opinion, were the advantages of the deep water, and other conveniences of Longnose Point, which rendered this spot desirable. He also showed the time and expense the Glebe Island scheme would involve, and he compared the present action of the Glebe Island scheme to the fable of the dog crossing the stream with a piece of meat in his mouth, and seeing his shadow in the water thought to secure two pieces of meat instead of one, and so let go the one in his mouth, and thus lost substance and shadow. That was what would be done if we fought among ourselves—we should lose both. The present movement was only called to censure the Government. He thought Balmain would, by a large majority, endorse the action of the present Government. He did not think that any action of the present meeting would alter the views of Sir Henry Parkes, but still the attempt had been made to censure him.

Mr. Alderman Neale (Leichhardt) seeing the requisition advertised for this meeting, which would effect the proposed railway through part of Leichhardt, represented by him, came as a member of that Council to oppose the change being made to Glebe Island. He considered the Longnose scheme would enrich Balmain and also Leichhardt; it would increase the manufactories, and, as Sir Henry Parkes said, he believed the line to Longnose Point would be one of the best paying lines in the Colony. The speaker showed the many advantages, in his opinion, which would accrue from this route. He considered that this immense meeting fully endorsed the views of Sir Henry Parkes, and a copy of the resolution should be sent to him. He spoke of Leichhardt Park, and invited all present (immense laughter) to visit it when the railway took them there.

Alderman Punch spoke of the enormous shipping at present in the port of Newcastle, principally for coaling, and urged this as a necessity for having a large coaling station in Port Jackson, and the best place for this was Longnose Point. This was important, in view of Cockatoo and other large works; but, referring to the present war scare, urged that should a gun-boat be brought against Newcastle all traffic would be stopped, while at Longnose Point no great obstruction to trade could follow.

The Mayor read the resolution and called for a show of hands. He declared the Longnose Point resolution carried, almost unanimously. (Cheers.)

Mr. Reid moved: "That copy of resolution be forwarded to Sir H. Parkes."

Captain Punch seconded.

Mr. Flood considered that, in fairness to the meeting and West End residents, the original resolution should, at least, be moved as an amendment.

The Mayor ruled Mr. Flood out of order, and put the resolution, which was carried.

Mr. Flood tried to speak, but the audience, or the noisy portion, would hear no more.

A vote of thanks to the Mayor was passed, amid cheers.

The Mayor returned thanks, and then gave, what he would not do before, his opinion that Longnose Point would bring great advantage for coal or minerals throughout the Colony. He did not think the Government had so much to do with the matter as the railway authorities, who always considered this the best spot in the Colony for the intended purpose. The Mayor thought that those advocating the change had not sufficiently thought the subject out for the general benefit of the Colony. They only thought of Balmain. He thanked the meeting for its orderly conduct, and he felt sure all would go away in favour of the route, which it had been decided by Government to adopt.

Mr. Eathorne asked the Mayor, who had sent him the requisition.

Mr. Flood said he and other gentlemen had handed the requisition to the Mayor. He would not give the names of any others, as he was fully prepared to take all responsibility on himself. He still believed that in the course proposed in the requisition, the best interests of the borough would have been served. Such was his firm conviction, and those who knew him would give him credit for at all times showing that he had the courage of his opinions. (Cheers.)

The Mayor called for cheers for the Queen, which were rendered, and cheers for the Mayor brought the meeting to a close.

[Our report of the above is curtailed, in order not to have to delay it till our Saturday's issue.]

The meeting of last night showed that the general public of Balmain want the railway, and (whilst opinions differ as to the route) are inclined to do all in their power to further their scheme, and leave time to show that fair play shall be meted out to both sides of Balmain.

Extract from *The Echo*, Wednesday, 4 July, 1888.

#### RAILWAY MEETING AT BALMAIN.

A LARGE public meeting was held outside the Balmain Town Hall last night. There were about 800 present. The Mayor (Alderman E. H. Buchanan) presided. He called upon Captain M'Clemens to move the first resolution, as follows:—"That we highly approve of the railway now proposed by the Government to Longnose Point. We consider it the best position for shipping coal in Port Jackson, and we would recommend a loop-line to Glebe Island, as the most suitable place for a fruit and produce market, as it would be almost in the centre of the city." As this resolution was at variance with the requisition

to

to the Mayor, after Captain M'Clemens had proposed, and Mr. W. Flood had seconded the resolution, both speaking at considerable length, amidst considerable uproar and interruption, Mr. Alexander Gow, J.P., asked the ruling of the Mayor as to whether this resolution was in order, being the reverse of the objects set out in the requisition. The Mayor ruled that it was out of order, when the following was put as the original resolution, which was intended to be an amendment, by Alderman George Clubb:—"That this meeting is of opinion that, in view of the advanced Government proposal to construct a railway to Longnose Point, and considering the vast benefit such a line would be to Balmain and the Colony generally, it is injudicious at present to agitate for a railway to Glebe Island, and that any further action in the matter be postponed, pending the result of the Government proposal, which this meeting heartily endorses." Alderman Clubb spoke to the point, and was heartily applauded, and it was ably seconded by Alderman Neal, of Leichhardt. It was put to the meeting, and carried almost unanimously. It was moved by Mr. J. Reid, and seconded, that the Mayor convey the result of the resolution to the Premier, which was carried. Three cheers for the Queen and Sir Henry Parkes, and a vote of thanks to the Chairman, concluded the meeting.

Extract from *The Daily Telegraph*, 4 July, 1888.

PROPOSED RAILWAY TO LONGNOSE POINT.

Public Meeting at Balmain.

AN enthusiastic public meeting, numbering between 800 and 900 persons, was held at the rear of the Town Hall, Balmain, last night. The meeting was called by the Mayor, in answer to a requisition signed by a few persons who favoured the Glebe Island route for the railway, in lieu of the Longnose Point line. The Mayor (Alderman Buchanan) presided.

Captain M'Clemens moved the first resolution, which, to the amazement of the majority of his hearers, read as follows:—

That we highly approve of the railway now proposed by the Government to Longnose Point, as we consider it the best position for shipping coals in Port Jackson, but we would recommend a loop-line to Glebe Island, as the most suitable place for the fruit and produce market, as it would be almost in the centre of the city.

The tenor of the speaker's remarks was also in favour of Longnose Point, with a loop-line to Glebe Island, and he advocated the former terminus, as being the most suitable, on account of its depth of water. He confessed that when he signed the requisition he had not read its contents.

Mr. Wm. Flood seconded the resolution. He was not prepared to go as far as the last speaker in his assertion that the Longnose Point railway was the better of the two, but was acting in a large measure on advice in supporting a route that he had every reason to believe would receive the hearty concurrence of the Government.

Mr. Alexander Gow asked for the ruling of the Chairman as to whether it was practicable to put the resolution as read, considering the fact that it differed so materially with the wording of the requisition.

The Mayor ruled that the resolution was out of order, as being directly opposed to the requisition, which read as follows:—

We, the undersigned, respectfully request that you will call a public meeting to urge upon the Government the advisability of carrying the railway to Glebe Island in lieu of to Longnose Point.

We desire to urge upon the Ministry the reasons why the above route should be adopted, being better situated and far less expensive than that which means heavy outlay in buying up a lot of private property.

Alderman George Clubb, as one of those opposed to the object of the requisitionists, moved the following as a resolution:—

That this meeting is of opinion that, in view of the advanced stage of the Government proposal to construct a railway to Longnose Point, and considering the vast benefit such a line would be to Balmain and the Colony generally, it is injudicious at present to agitate for a railway to Glebe Island, and that any further action in the matter be postponed, pending the result of the Government proposal, which this meeting heartily endorses.

He said they had for many years past been awaiting connection by railway, and he believed that the resolution he now proposed would go far towards attaining that object, being as it was in strict accordance with the views of the Government surveyors and railway officials. Should this line of route be adopted it would prove not only of incalculable benefit to Balmain, but to the community generally of the Colony. He was in no way averse to a line of railway to Glebe Island, but considered it premature until the present line had been made, and had no doubt whatever that the Glebe Island line would be made hereafter. It was inadvisable, however that, like the dog with the meat, they should let go the substance for the shadow.

Alderman N. C. Neal, of Leichhardt, warmly seconded the motion. He considered the result of the meeting after the requisition to the Mayor would conclusively prove to Sir Henry Parkes that the residents of Balmain were with him almost to a man as regards the steps he had already taken in connection with the Longnose Point railway. He had much pleasure in seconding the resolution.

Alderman Punch supported the resolution, which was then put, and carried almost unanimously, only two voting against it.

Mr. J. H. Reid moved that a copy of the resolution be forwarded to Sir Henry Parkes, which was seconded by Alderman Punch, and carried unanimously.

Cheers were given for Sir Henry Parkes.

Minute Paper.

Subject:—Shipment of coal, Sydney Harbour.

Department of Public Works, Sydney, 7 June, 1888.

MESSERS. Fletcher and McMillan, Ms.P., waited upon me this morning with reference to the shipment of coal in Sydney taken from the Metropolitan Coal Company's mine.

Mr. McMillan stated that they represented the directorate of the Metropolitan Coal Company of Sydney, and they expected the mine to be in full working operation by the end of the year. They were getting

getting out the most approved machinery from England. It would be the best of its kind ever introduced into the Colony, and when the mine was in working order they would have an output of from 1,000 to 1,500 tons per day, or say a shipping output of 300,000 tons per year. Taking the railway haulage at 3s. per ton would give an annual revenue to the Railway Department of £45,000 a year, which would be equal to 5 per cent. on £900,000, and consequently when the mine was in working order it would be a valuable feeder to that railway. He represented that, from the limit of suburban settlement to a distance from 40 to 60 miles, the only prospect of the line paying would be from the haulage of minerals and timber, as otherwise the district was a barren one for the purpose of settlement, and practically the only traffic would be in the connection with the industries named. Mining operations had been adopted in this district on a sort of tacit understanding with the various Governments of the day, that Sydney would sooner or later be a shipping port, and he thought the Government was justified in providing shipping appliances for the coal traffic in view of the large interests involved. Another point which should be brought under notice was that they were tenants of the Crown, that they were developing Crown property, and in addition to the estimated £45,000 railway revenue they would pay at the rate of 6d. per ton royalty on the coal raised. Their operations, however, would be absolutely nullified unless the Government provided facilities for the shipment of their coal. They could not depend altogether upon local consumption. A large amount of capital—about £100,000—a large portion of it English capital, was invested in their mine, and of course it was their wish, as early as possible, to make it reproductive. He would urge upon the Government the necessity, as soon as possible, to connect the railway line with the portion of the port which would be set apart, and simultaneously with it to provide the necessary cranes, &c., in order to give Sydney the same facilities for the shipment of coal as has been given at Newcastle.

Mr. Fletcher supported the request for the connection to be made in view of the benefit that the Colony and the Railway Department would secure from it. As Mr. McMillan pointed out it would be necessary to provide the shipping appliances and at the same time consideration would have to be given to the design of vehicles to be used for the traffic. The Commissioner, he thought rightly, was adverse to the Company being allowed to use their own vehicles, as it would probably interfere with the ordinary passenger traffic.

In reply, I stated that so far as we are concerned it had been decided that the department should carry out the service, and that we would have to have the best class and suitable trucks for the coal traffic alone. Of course that arrangement might be altered, but I did not think so, as I thought we could provide a splendid design of trucks for this trade. It was proposed to bring in the Illawarra coal trade to Longnose Point, and there to provide proper and suitable shipping appliances, and this was a matter that would be considered by the Government. The plans had all been drawn up and were ready for submission.

JOHN SUTHERLAND.

Put by till asked for by Minister.—H.M'L., 14/6/88. Comr: 88-12,490.

The Metropolitan Coal Company of Sydney (Limited),

Sir,

Sydney, 6 June, 1888.

I have the honor, on behalf of the directors of the Company, to ask that an appointment may be made with the Honorable the Minister for Works to receive them at his office for the purpose of representing the necessity of facilities for the shipping of coal being provided from the shores of Port Jackson.

I have, &c.,

GRESLEY LUKIN,

Manager.

The Under Secretary for Public Works, Sydney.

Arrange for Wednesday morning at 11 a.m.—D.C.M'L., 11/6/88. Urgent. Gresley Lukin, Esq.,  
11/6/88. Railways.—D.C.M'L., 11/6/88. Very Urgent. Have waited on Minister previously.—  
H.M'L. With Comrs., 88-11,040.

Extract from *The Daily Telegraph*, Thursday, July 12, 1888.

At the last meeting of the Leichhardt Council it was resolved that letters be sent to Sir Henry Parkes and Mr. Sutherland urging them to seek the approval of Parliament for the Tempe to Longnose Point railway, as such, in the opinion of the council, would be the means of utilizing a very large extent of deep water frontage, and would provide immense and required facilities for coal and other mineral loading, as well as give increased accommodation to manufacturing industries now restricted to comparatively limited areas.

Connection between Illawarra Line, near St. Peters Station, and the deep waters of the harbour at Longnose Point.

I HAVE gone through this line, but do not anticipate much local traffic. The Metropolitan Coal Company at Helensburgh, 28 miles from Sydney, will, in about three or four months, be in a position to put out a large quantity of coal, and we are certain to get all their shipping traffic, but I am not so sure of the other companies south of Helensburgh, as they have all got their private jetties and are increasing them. During rough weather we should get the shipping traffic.

Manager.

H. RICHARDSON,

20/12/88.

Secretary.—D. KIRKCALDIE (*per* W.W.), 20/12/88.  
Resubmitted, 4/1/89.

Resubmit in a week, 28/12/88.

## Proposed line to Longnose Point.

Traffic Manager's Office, Sydney, 27 August, 1888.

PAPERS and plan herewith. Please look into the matter and furnish me with a report.

Coaching Superintendent.

## Memorandum to the Engineer-in-Chief.

Department of Public Works, Railway Branch, Engineer-in-Chief's Office,  
Sydney, 21 April, 1888.

I FORWARD herewith six drawings, showing proposed double lines of railway, viz., a branch line from Homebush on the Great Southern Railway to Longnose Point, Balmain, also from Tempe on the Illawarra line, to a point, marked A, on the plan of the former line of railway, viz. :—

- No. 1. Diagram plan.
- „ 2. Plan, Homebush to Balmain.
- „ 3. Section, Homebush to Balmain.
- „ 4. Enlarged plan of wharf arrangements at Longnose Point.
- „ 5. Plan, Tempe to point A, Balmain.
- „ 6. Section, Tempe to point A, Balmain.

## DESCRIPTION OF LINES.

*Homebush to Longnose Point, Balmain.*

Branching off to the left from the Great Southern Railway, at about 8 miles 35 chains from Sydney on the eastern side of the Homebush Cattle Sale-yards, the proposed line runs in a north-easterly direction through Concord, crossing over the Parramatta Road on the level, and thence over Powell's Creek and the Great Northern Railway, which line it is connected with by a loop about a quarter of a mile further on; thence crossing Brunswick Road and turning to the right the line passes over Flavelle and Wellbank Streets, and Major-bay Road; from thence across Broughton and Wharf Streets, over the mud flats in Hen and Chickens Bay, through Five Dock, across the Great Northern Road; thence over Iron Cove Creek Road, passing through Five Dock Park and the Barnstable Manor grounds, the property of B. C. Rodd, Esq.; thence over the Iron Cove Creek to the point A, where the proposed line from Tempe has its junction; from this point the line skirts the shore of Long Cove and the Parramatta River, passing through the left of Callan Park Asylum grounds, and to the right of Fig-tree and White Horse Points to Longnose Point, Balmain, where a wharf for loading coal is proposed. This line is 7 miles 30 chains in length.

Drawing No. 4 shows the general arrangements of the wharf and feeding lines, standage and marshalling sidings in connection with the main line to an enlarged scale of 1 chain to an inch.

In this plan it is proposed to have nine hydraulic cranes, with a loading power of 14,000 tons of coal per diem, discharging into ships or colliers alongside the wharf. Each of the above cranes should lift 10 tons, and dump about twenty-six 10-ton hopper waggons per hour, or 1,560 tons per working day of six hours, the remaining two hours being occupied in berthing the ships, trimming coal in the holds, &c., which will give an aggregate of 14,040 tons, or approximately 14,000 tons of coal per working day of eight hours. The wharf will follow the natural configuration of the land, and at the same time will give 25 feet in depth at low water, probably without dredging or cutting the bottom.

The length of the wharf as now proposed will be about 2,500 feet, the end nearest to Longnose Point will be on a curve of 28 chains radius, the remainder will be in straight portions of 300, 200, and 800 feet in length.

Should future requirements necessitate an extension of the wharf it can be made by continuing it in the direction of White Horse Point, as shown on the plan by the dotted red lines, which would give room for six extra loading-cranes.

The sidings for loading the feeding and standage lines will hold 650 loaded trucks, and the marshalling lines will hold 600 empty trucks. The switches and crossings are arranged so as to give through communication with all the lines.

*Tempe to point A, Balmain.*

This line, branching off to the left in a northerly direction from Tempe Station on the Illawarra Railway, at 3 miles 78 chains from Sydney, crosses Meek's road, and turns sharply to the left passing through Marrickville, over the Illawarra and Livingstone Roads; thence across Wardell, New Canterbury, and Constitution Roads, turning to the right through Petersham, and following the course of Long Cove Creek, which is upon its left for a distance of 1 mile; thence across the Old Canterbury Road, and under

under the northern end of the Petersham viaduct, on the Great Southern Railway, over the Great Western Road to the head of Long Cove, skirting its right bank; thence over Walter and Water Streets, and through Leichhardt Park to point A, where it has its junction with the line from Homebush. The length of this line being 4 miles 60 chains.

J. W. DREWETT.

Forwarded for the Minister's information, with memo. 88 of 23 April, 1888.

The Minister wishes the fullest statistics collected with regard to the probable traffic to be obtained from the projected lines to Longnose Point. He would be glad to have the information on an early date.—D.C.M.L., 15/8/88.

Traffic Manager.—H.M.L., 16/8/88.

Minute Paper.

*Subject*:—Proposed coal lines to Balmain.

Department of Public Works, Railway Branch,

Engineer-in-Chief's Office, Sydney, 23 April, 1888.

I FORWARD for the information of the Minister, six plans and sections of the proposed coal lines from the Southern, Western, Northern, and Illawarra Railways to the suggested shipping staiths at Longnose Point, Balmain.

A general description of the course of the various lines is appended: (No. 88-1,087).

The estimated cost of these lines, including coal staiths, is now being prepared, and will be forwarded as early as practicable.

The Honorable the Minister for Works.

JOHN WHITTON.

Railways.—J.B., B.C., 26/4/88. On the sketch map, the loop to connect the Homebush and Waratah line with the line to Longnose Point is not shown; please have it put on.—CH.A.G., 3/5/88.

Submitted for Minister's information. I would draw attention to the number of junctions involved by the proposal:—(No. 1) Junction on main suburban line, Parramatta side of the Strathfield Junction; (No. 2) Junction on the Northern line, Ryde side of the Strathfield Junction; (No. 3) Junction on line to Longnose Point, to admit trains from Northern line; besides which the Northern line is crossed on the level by the branch line from Homebush to Longnose Point. It is of course possible to avoid this inconvenience and expense to the working, but it may be done at too great a cost.—CH.A.G., 8/5/88.

Mr. Drewett has now filled in the loop. It was almost impossible to show it correctly on the sketch.—A.R., 9/5/88. Minister would be glad to see Commissioner, with all the plans, on Monday, 11/5/88.

Refer to Engineer-in-Chief.—Can this line be taken without great disadvantage by a route which will avoid the junctions referred to, which must involve considerable expense in working?—J.S., B.C., 17/5/88.

Proposed coal lines to Balmain.

There are four junctions, viz.:—

No. 1.—With the main Southern line on the Parramatta side of Homebush.

No. 2.—With the Homebush-Waratah line, before reaching the Strathfield Junction.

No. 3.—With the Illawarra line near Marrickville.

No. 4.—The junction of the line from the Illawarra Railway with the line from Homebush at Long Cove.

If the Southern, Western, and Northern coal traffic be all carried on the main Southern line to the Sydney side of the Strathfield Junction, the junction on the Northern line could be dispensed with, but the Northern coal traffic would be brought on to the Southern line, which in my opinion would be objectionable.

Besides, if a junction were formed on the Sydney side of Strathfield, the line would have to pass through very valuable property to reach Longnose Point—this I endeavoured to avoid.

The junction where the Homebush line joins the line from Marrickville, might be avoided, either by laying down four lines of rails to Longnose Point, or by working the double lines from this junction to Longnose Point as single lines, one for the Southern, Western, and Northern Railways, and the other for the Illawarra Railway. This would be objectionable, but it could be done.

The junction at Marrickville cannot be avoided.

The branch line from near Homebush passes over the Northern line, and does not cross on the level as stated.

JOHN WHITTON.

The Hon. the Minister, B.C., 23/5/88. P.W.O., 25/5/88. The Commissioner for Railways.—J.B., B.C., 25/5/88. Estimate not yet completed, supposed to be £400,000, including nine curves, the whole of which would not be required at once.—CH.A.G.

Sir,

Railways, 27 December, 1888.

I have the honor, by direction of the Railway Commissioners, to submit herewith two letters from the Manager of the Metropolitan Coal Company of Sydney, urging the construction of a line from Tempe to Longnose Point, and pointing out the benefits which would accrue both to the department and to the trade from the execution of that work.

Being a work of railway construction, it would appear to be outside the scope of the functions devolving upon the Commissioners under the Act, and I have therefore the honor to forward the papers for such action as the Honorable the Minister may deem necessary.

I have, &c.,

D. VERNON,

Secretary for Railways.

The Under Secretary for Finance and Trade, Sydney.

Inform

Inform Mr. Gresley Lukin of the action taken, 9/1/89. Done, 9/1/89. Mr. O'Brien.—The Secretary wants these papers looked through to see if all the papers attached are properly attached, or if anything remains to be done.—J.P., 9/1/89. Nothing requires to be done pending the action to be taken by the Minister for Railways.—M.C.B., 10/1/89. In a week, 11/1/89. Resubmitted, 5/2/89. In a month, 5/2/89. Copy of Mr. H. Richardson's report of 20 December, 1888, made for the information of the Commissioners.—A.P., 11/2/89. Misc. 89-1,158.

Minute Paper.

*Subject* :—Arrangements for shipping coal at Darling Harbour.

I BEG to refer the Commissioner to my minute of 6th April, 1888, *re* the above.

I think that until the scheme for the wharves at Longnose Point should be made for the shipping of coal by carrying a temporary wooden jetty out into deep water, so that the ship could lay alongside it, and the coal be dumped from the dump cars into a shoot to lead into the hold of the ship.

W.V.R., 12/5/88.

To Commissioner.

Commissioner, 88-7,828. Engineer-in-Chief, forwarding six plans of proposed coal lines, &c. Mr. Cowdery, 3/5/88. Mr. Cowdery.—J.P. (*pro Secty.*), 16/5/88. Previous papers with sketch plan were returned to the Commissioner on the 8th instant.—G.C., 17/5/88. Secretary. Mr. Quodling.—J.P. (for Secretary), 18/5/88. Papers, *re* coal lines to Balmain are forwarded herewith.—W.H.Q., 23/5/88.

*Subject* :—Arrangements for shipping coal at Darling Harbour.

I HAVE again to draw the Commissioner's attention to the necessity for something being done at Darling Harbour to facilitate the shipment of coal. Now that a shaft has been sunk on a large seam of coal near Waterfall, within 30 miles of Darling Harbour, a large traffic may shortly be expected to the port, for which special additional accommodation will have to be provided.

W. V. READ

(*Per* W.W.), 6/4/88.

Will Mr. Quodling be so good as to return the papers?—A.R., B.C., 10/4/88. Papers returned herewith.—W.H.Q., 10/4/88. Mr. Richardson. Traffic Manager to see.—J.P. (*pro Secretary*), 12/4/88. Seen.—W.V.R., 14/4/88. Commissioner. Will Mr. Quodling kindly say whether plans are now ready.—A. RICHARDSON. J.P., B.C., 17/4/88. Mr. Quodling. Not yet.—W.H.Q., 19/4/88. In a fortnight, 20/4/88. Commissioner, 88-7,828. Survey to Longnose Point.—How does matter stand?—J.S., 25/2/84. Where are the papers?—D.C.M.L., 28/2/88. Please return as early as possible.—A.R., B.C., 29/2/88. Traffic Manager. Returned yesterday.—W. V. READ (*per* W.W.), 1/3/88. Secretary. Mr. Quodling.—A.R., B.C., 3/3/88. Commissioner, 88-6,526.

Minute Paper.

*Subject* :—Coal Shipping Arrangements.

THE Traffic Manager has asked for these papers.—A.R., B.C., 24/2/88. Seen.—D.K., 29/2/88. Secretary. Put by. A minute, written by the Minister, requesting to see these papers, was forwarded to the Traffic Manager, urging their return. It has not been returned, so papers are now submitted.—A.R., 1/3/88. Urgent. Submitted for Minister's consideration. I would strongly urge that this matter be expedited. The selection of a place for shipping coal from Port Jackson is a pressing matter, in view of the early completion of the Northern and Illawarra Coast lines.—CH.A.G., 2/3/88. I have been pressing for survey, and Cabinet is anxious to have it. I would like to know when I will receive it.—J.S., 2/3/88. Engineer-in-Chief, B.C., 3/3/88.

Several lines have been surveyed, and everything possible has been done to get this work completed, but as it is a question requiring careful consideration it could not be hurried. The plans and sections will probably be ready in the course of a few days.—J.W., 10/4/88. The Hon. the Minister. Commissioner, 88-4,130.

Minute Paper.

*Subject* :—Coal Shipping Arrangements.

THE question of making adequate arrangements for the shipment of coal in Sydney Harbour has been on the *tapis* for a number of years.

For some years efforts appear to have been made to accomplish this at Darling Harbour, but in January, 1886, Commissioner minuted that he knew it would be impracticable to do a coal shipping business there; that he had proposed to Mr. Secretary Wright and Mr. Secretary Lyne to form a coal shipping wharf, &c., at Longnose Point, which might be done for a comparatively small outlay; and that both Ministers were favourable to the scheme.

In July, 1886, Mr. Moriarty minuted on this subject, that the whole question of wharfage accommodation had been remitted to Sir John Coode, and that he was then obtaining further information for Sir John.

This minute may have been written in view of a question which was asked on the 24th August, 1886, as to the intention of the Government in regard to provision for the shipment of coal in Sydney Harbour, in anticipation of the opening of the Illawarra and Homebush-Waratah Railway.

Thereon Commissioner minuted that for years he had submitted to the several Ministers for Public Works a scheme of railway extension which would provide in a comprehensive and comparatively inexpensive way for the shipment of coal and heavy goods at Longnose Point, Balmain. The whole expenditure would not exceed £350,000; would probably be much less; and an outlay of £250,000 would suffice for present requirements. There would be comparatively nothing to pay for land, and very little for compensation. Mr. Cowdery had prepared estimate in rough. Recommended that a survey should be made, and an estimate prepared.

The

The Minister approved, and the Engineer-in-Chief was instructed.—1/11/86.

Engineer-in-Chief minuted that as soon as the surveyors returned they should make surveys from the Illawarra Railway and Strathfield to Longnose Point, Balmain.—7/4/87.

In the same month Mr. Secretary Sutherland stated in the House that steps would be taken to provide temporary accommodation at Darling Harbour, and Mr. Cowdery reported that the arrangements were in the hands of Harbours and Rivers, and suggested that the two departments should act in concert, which the Minister approved, but the papers do not show what steps, if any, were taken.

A few days before this a deputation had waited on the Minister to represent the urgency of making provision for the coal traffic of the metropolis, and the Minister informed them that he had foreseen that the facilities at Darling Harbour would be inadequate for the requirements, but they could be made available temporarily, pending the completion of a larger scheme. The best plan was that proposed by the Commissioner for Railways, for which surveys were being made. The matter should be pressed on as much as possible.

Mr. Secretary Sutherland minuted that he presumed the survey was in progress. It was a most urgent matter, and should be brought speedily to a final decision.—30/5/87.

Commissioner minuted that Mr. Deering had, at his request, furnished the Engineer-in-Chief with plans of the localities through which the line was to pass, and this should expedite the survey.—7/6/87. Appendix A.

Traffic Manager asked for papers relative to resumption of land at Darling Harbour in connection with the coal-shipping arrangements, and pointed out the urgency of the case.—30/11/87.

In accordance with suggestion of the Assistant Secretary, I have made this amended *précis* to include the additional papers which came to light after the first *précis* was completed, but it is now the reverse of satisfactory. I am sure there must be more papers, and I think the two matters, viz., Darling Harbour and Longnose Point should be submitted separately. C.A.B.,

3/2/88.

Make one more thorough search for these papers.—A.R., 3/2/88. A careful search has been made, but no further papers could be found.—J.P., 13/2/88. Mr. Iredale. Mr. Badham.—L.P.L., 13/2/88.

The foregoing is a statement of the case so far as it is represented by these papers, but I would direct the Assistant Secretary's attention to Traffic Manager's minute of 30/11/87. There must have been some previous papers about resumption of land at Darling Harbour.—C.A.B., 13/2/88.

On further consideration, and after consulting Mr. M'Lachlan, I am inclined to think there are no further papers on the subject of land resumption for shipping purposes at Darling Harbour.—A.R., 22/2/88.

Seen.—CH.A.G., 23/2/88.

#### Minute Paper.

*Subject*:—Proposed Branch Line to Longnose Point, Balmain.

PLEASE see Engineer-in-Chief's report of 7th April, 1887. Before dealing with the question, the Commissioner asked to see the paper upon which the Engineer-in-Chief suggested Glebe Island as the place of shipment for coal from the south and west lines. The paper required was connected with the papers respecting the Pearce's Corner and North Shore Railway.

No action was taken with regard to the suggestion *re* Glebe Island.

D.C.M'L., 23/5/87.

#### Minute Paper.

*Subject*:—Shipment of coal, Sydney.

Department of Public Works, Sydney, 1 April, 1887.

MESSRS. McMillan, Garrett, M's.P., Lukin, and Dodimeade waited upon me to-day with reference to the shipment of coal in Port Jackson. They represented that the Illawarra Railway would soon open up the coal mines of that district, and that there would be a large coal traffic brought to Sydney. The facilities at Darling Harbour would be quite inadequate for the traffic that would come, and they urged that some comprehensive scheme should be matured to provide for the business that would be done.

I informed them that I had not been idle in this matter, and I had foreseen that the facilities at Darling Harbour would be quite inadequate for the business we might anticipate, and that Darling Harbour did not offer advantages for the extension of the facilities, although it could be made available, temporarily, for receiving coal, until a larger and better scheme had been matured.

The best site it seemed to me was that on plan submitted by the Commissioner for Railways, and surveys were now being carried out for bringing the railway on to Longnose Point, and I promised to press the matter on as far as possible.

JOHN SUTHERLAND.

Forwarded to the Engineer-in-Chief, who has previous papers on the subject.—A.R., (for Commissioner for Railways), B.C., 7/4/87. See memo. 87-479 of 7th April, 1887.—W.H.Q. Commissioner, 87-7,782.

Extract from *The Sydney Morning Herald*, 2 April, 1887.

#### THE FACILITIES FOR THE SHIPMENT OF COAL AT PORT JACKSON.

A DEPUTATION from the Cumberland Coal-mining Company, consisting of the Honorable T. Garrett, Minister for Lands, Mr. McMillan, M.L.A., Mr. Dodimeade, and Mr. Gresley Lukin, Secretary, waited upon the Minister for Works yesterday with the view to urging upon the Government the necessity for making provision for the shipment of coal in ocean-going steamers in Port Jackson.

Mr. McMillan pointed out that the matter was not merely important to the Company which the deputation represented, but was almost of national importance. It certainly was of great importance to the City of Sydney and the surrounding district. It was well known that two or three years ago coal was discovered on the southern coal-fields much nearer Sydney than it had ever before been found, the coal being tapped within a distance of 28 or 24 miles from Sydney, alongside the Illawarra railway line.

It was known, also, that the freights for the carriage of the coal along the suburban lines right down from Wollongong were to be charged at a minimum rate, in order that the coal might be brought into the market

market. He need not point out the advantages which would accrue from having the coal brought over lines at a cheap rate, but in order to realize the full benefit of opening up the coal mines in the district, it was absolutely necessary that at the port of Sydney there should be some facilities for the shipment of coal on the large ocean-going steamers—just such facilities as they had at Newcastle. The members of the deputation felt that no partial scheme would be of any benefit in a case of this kind—that the coal trade in this district should be localized in Port Jackson. The object of the deputation to-day was not particularly to point out any scheme that might be adopted, for that was almost beyond their province. They believed that the Government had had under consideration a scheme for turning the upper part of the harbour into an *entrepôt* for the coal trade. It seemed to possess all the facilities required—a large water frontage, deep water sufficient to enable large ocean-going steamers to go alongside the wharves. They could not expect the coal trade to be thrust into Darling Harbour. Before going further into the matter, he might refer to another point of some importance. The Minister was aware that from the 24-mile peg on the Illawarra Railway, some important engineering difficulties would have to be encountered, and some time would elapse before the line would be opened further than that terminus. It would be a matter of great loss to the public revenue and a great loss to the Cumberland Coal-mining Company and the country generally if, when the railway was open to the 28th mile, where their mine was situated, they found after they had been waiting for a year or two that the shipping arrangements at Port Jackson were not complete—that when they were ready to put the coal into Sydney market there was no provision for its output. He hoped that the works required to give complete facilities for the shipment of coal would be finished simultaneously with the opening of the railway.

Mr. Dodimeade and Mr. Gresley Lukin having spoken in support of the object in view,

Mr. Sutherland said that when he took office he made personal inquiries into the condition of the wharves at Darling Harbour. He approved of the widening of the part of the harbour spanned by the Pyrmont Bridge for the purpose of allowing vessels of larger size to go through into Darling Harbour. But that harbour could never be the coal dipper for the quantity of coal that would have to be shipped. They must look to some other place for that. They had the report of an officer who went carefully through the plans of Darling Harbour and the wharves that would be erected there, and there might be temporary room given for the shipment of coal until a larger or better scheme was brought in, but without any intention of reopening the coal trade in Darling Harbour at all. He was afraid that the larger scheme to which he had alluded would not be ready in time for the shippers of coal by the time the railway was opened. He gave orders that the Engineer-in-Chief should have a survey prepared as soon as possible. Round about Longnose Point, Cockatoo, and Spectacle Islands there was deep water and excellent natural advantages for the purposes required. A survey would be made at the earliest possible date, and in the meantime he would see what arrangements could be made for the shipment of coal at Darling Harbour.

Extract from *The Daily Telegraph*, Saturday, 2nd April, 1887.

#### SHIPPING COAL IN PORT JACKSON.

Messrs. Garrett and McMillan, M.S.P., and Gresley Lukin and Dodimeade, directors of the Cumberland Coal-mining Company, waited on the Minister for Works yesterday to ask that greater facilities should be given in Port Jackson for the shipping of coal into large steamers and vessels. It was pointed out that the same facilities should be granted in the waters of Port Jackson as existed at Newcastle for shipping coal, and it was understood that the Government had under consideration a scheme for turning that part of the harbour known as the abattoirs into a coal depôt. It could not be expected that Darling Harbour could be set apart, and if the water in the locality of the abattoirs was deep enough for large steamers to come alongside that was all that was required.

Mr. Sutherland said when he came into his position he made inquiries at once with reference to the wharfage at Darling Harbour, and he approved of widening the entrance to Pyrmont Bridge, for the purpose of allowing vessels to get there. But Darling Harbour could never be a coal depôt, for the quantity of coal that would be wanted in a few years, and therefore he had to look to some other place for it. A temporary place would be made at Darling Harbour for shipping coal until a better scheme was completed, but there would be no intention of keeping the coaling-place at Darling Harbour. He gave orders to the engineer to make a survey of the waters at Longnose, opposite Cockatoo and Spectacle Islands, for coaling purposes. An Act would be brought into Parliament to prevent the land about there being taken up. In this place there was deep water, and it would form a natural coaling depôt.

Sir, The South Cumberland Coal-mining Company (Limited), Sydney, 17 March, 1887.

I have the honor, on behalf of the directors of this Company, to apply to you for an appointment with the Honorable the Minister for Works at his office for Thursday next, 24th instant, at 10 a.m., to receive a deputation from the Company for the purpose of representing the necessity of making provision for the shipping of coal from the shores of Port Jackson. Awaiting your reply,

I have, &c.,

GRESLEY LUKIN,

Manager.

The Under Secretary for Public Works, Sydney.

Friday, 1st April, at 11:30.—J.R., 19/3/87. Inform. The Manager, the South Cumberland Coal-mining Company (Limited), 21/3/87. Harbours and Rivers.—J.R., B.C., 21/3/87.

I think this is a case when the gentlemen forming the deputation might be asked to express their views of what is required. This is too large a matter to deal with lightly or in a hurried manner, so it may be that some suggestions may be made by the deputation, which would be of considerable value and assistance in preparing a scheme for providing for the large coal-shipping trade, which, in all probability will grow up; but as this growth will probably be a work of time, immediate requirements may be met by an extension of Darling Harbour wharf. This position is, however, not a desirable one to locate the coal trade permanently, nor indeed would there be room enough there to do so.—C. W. DARLEY (*per* E. O. MOBIARTY), 31/3/87.

B.C., Under Secretary, Public Works.

Sir,

Sir,  
The South Cumberland Coal-mining Company (Limited), Sydney, 25 March, 1887.  
I beg to acknowledge receipt of your letter of the 21st instant, appointing Friday, the 1st proximo, at 11.30 a.m., for the deputation from this Company to the Minister for Works, on the subject of shipping coal in Port Jackson.  
I have, &c.,  
GRESLEY LUKIN,  
Manager.

The Under Secretary, Department of Works, Sydney.

Harbours and Rivers.—J.R., B.C., 28/3/87.

Department of Railways, Sydney, 22 March, 1887.

THE Minister would like to see papers with reference to the Commissioner's scheme for coal traffic at Balmain, &c.  
H.M.L.

Papers herewith.—D.C.M.L., 24/3/87. A.R., 24/3/87. How is survey progressing? I should like it completed early.—J.S., 24/3/87. The Engineer-in-Chief, B.C.

Legislative Assembly, No. 115—Tuesday, 24 August, 1886.

(14.) Export of Coals from Sydney Harbour:—Mr. Kethel asked the Secretary for Public Works,—In view of the expected completion of the Illawarra and Homebush-Waratah Railways, and the increase in the traffic in coals and other minerals that it is alleged will result therefrom, is it the intention of the Government to provide facilities for the export and shipment of coals in and from Sydney Harbour?

Mr. Lyne answered,—Yes.

Is anything further to be done in this matter?—D.C.M.L., 27/8/86.

I have submitted to the several Ministers for Public Works for the last two years, or certainly Appendix B. eighteen months, a scheme of railway extension which will provide in a comprehensive and comparatively inexpensive way for the shipment of coal and other bulky traffic at Longnose Point, Balmain. It is unnecessary to dilate upon the advantages of this line of railway and wharf accommodation. They are admitted by all who have seen the proposal. I recommend that a detailed survey be made, and an estimate prepared. It is a scheme the whole of which (as it provides for the future as well as the present) need not be carried out at once, but in parts, as required. Map showing route, and photograph of site of wharf herewith.—CH. A.G., 28/8/86.

The whole expenditure for line, wharves, cranes, and other appliances, will not exceed £350,000—will probably be much less; but an expenditure of £250,000 will meet the requirements of the immediate future. Mr. Cowdery has prepared rough estimate. There will be comparatively nothing to pay for land, and very little for compensation under the new Bill.—CH. A.G.

As the Railway Bill has been shelved for the present, will the Minister approve of this survey being made?—CH. A.G., 26/10/86. Yes.—W.J.L., 30/10/86. Forward to Engineer-in-Chief.—CH. A.G., B.C., 1/11/86. Memo. to Minister, dated 7th April, 1887, herewith.—W.H.Q.

Extract from *The Sydney Morning Herald*, Monday, 23 August, 1886.

THE Minister for Works is to be questioned to-morrow concerning the facilities which exist at Darling Harbour for shipping coal. It is to be feared that he will not be able to give a satisfactory reply. There are substantial wharves at Darling Harbour, and the railway runs alongside those wharves, but there are no appliances worthy of the name for transferring coal from the railway trucks to the steamers. This work, it seems, is performed by means of ordinary wheelbarrows, a method of loading cargo which most people had supposed had become obsolete in cities a quarter of a century ago. The consequence of the neglect of the Government to provide proper shipping facilities at Darling Harbour is that the western coal companies, who have spent large sums of money in opening up their mines, are prevented from exporting their produce except in small quantities, and a great deal of business which should be secured by the metropolis is diverted to Newcastle. The time occupied in loading one of the intercolonial steamers at Darling Harbour is about three days. Now a similar work can be performed at Newcastle in about ten hours; and naturally the owners of steamers engaged in the coal trade send their vessels to the port where the loading is done expeditiously. In the course of a few months other mines besides those in the Blue Mountains will be connected with Darling Harbour. The Coal Cliff colliery is one of these. This mine has been in operation for several years. The coal extracted therefrom is now brought to Sydney by sea; but, as the shipping place is only an open roadstead, in which large vessels would not anchor, there can be no doubt that land carriage will be substituted for sea carriage as soon as the Illawarra Railway has been extended to the property. According to a cablegram published two or three days ago, a company has been formed in England to work the coal seam discovered last year near the National Park. It is expected that this Company will be ready to ship coal before the end of next year. They have no shipping place, and they must necessarily send their coal to Sydney by rail. These things should stimulate the Government to action. Arrangements should be made for constructing jetties and erecting loading staiths or hydraulic cranes. All that is needful to make Sydney a great coal-shipping port is enterprise on the part of the Government, and it may be hoped they will not be found deficient in that quality.

Extract from *The Sydney Morning Herald*, Friday, 27 August, 1886.

SHIPPING COAL AT DARLING HARBOUR.

(To the Editor of the *Herald*.)

Sir,—In your issue of the 23rd instant there appeared a paragraph in reference to a deputation waiting upon the Minister for Works concerning the facilities which exist at Darling Harbour for shipping coal. Allow me to offer my feeble assistance in the advocacy of one of the most important facilities that is required in the metropolis for the benefit of the western and southern districts. For years I may say the

the coal proprietors (and also the miners) of the western district have been depending upon the "Government contract" and a few private firms for the consumption of the whole of their trade, whereas if such facilities as those which are at Newcastle had been erected at Darling Harbour, I maintain that the western district would, in the course of a few years, be able to compete with her sister the northern district. It is surprising that proper facilities have not before now been erected at Darling Harbour, considering the large sums of money spent on the Blue Mountains by different mining speculators. Other collieries are getting ready to ship coal both in the southern and the western districts. Are all these collieries going to depend upon the "Government contract" to consume all their vast wealth of coal? Had the Government given the west district the same facilities as they have for Newcastle, instead of there being hundreds of miners in Lithgow there would be thousands. I hope that the *Sydney Morning Herald* will not let this important subject be lost sight of, as the growth of not only Lithgow, but every town on the west, will depend a great deal upon the Government erecting proper shipping facilities at Darling Harbour. There are now ten collieries in working order in the western district, all of which depend upon the Government Locomotive Department and a few private firms to consume their coal, and in those ten collieries there are only about 300 miners; whereas, if the proprietors could only export their coal, as Newcastle and Wollongong do, they could employ 3,000 miners. Would not the Government derive some benefit from such increase? I maintain that they would, and I think the only thing to do now is for the masters and miners to put heads together and urge upon the Government to erect proper shipping facilities at Darling Harbour. Many a thousand pounds has been spent by the Government in works not half so important as this, and which do not return half the revenue to the Treasury as this would. I hope for the sake of mining in the western and southern districts that someone more able to deal with this important subject than I am will take the matter up, and see that proper facilities are given us for the export of our coal and other materials.

I have, &c.,  
JOHN OWENS.

Lithgow, 25 August.

Extract from *Daily Telegraph*, Wednesday, 6th April, 1887.

SHIPMENT OF COAL FROM PORT JACKSON.

(To the Editor of the *Daily Telegraph*.)

Sir,—The deputation which Mr. McMillan introduced to Honorable the Minister for Public Works on Friday last had charge of a matter of more than usual deputation importance. As a general rule these deputations ask for some local work not required at all, except for the purpose of procuring work for local tradesmen, perhaps for a road to be made which will never be used when made, or for a court-house in which no cases will ever be tried. The dirty work in this direction which M.S.P. have to do to keep sweet with their constituents is often a subject of indignant private protest by those members who have to do the said dirty work.

But the deputation who, under the guidance of Mr. McMillan, interviewed the Minister for Works, interviewed him upon a matter really of national importance. It was upon the matter of the shipment of our southern coal from Sydney harbour, a line of commerce which, if well established, will largely increase the commerce of our port and employment for our people; and in view of the above the answer of the Minister, who fully appreciated the importance of the subject, is of equal importance to the subject itself. The Minister said he had made inquiries. He did not say, or rather, it is not reported, the nature of the inquiries, &c., &c. But he approved of the widening of the bridge. Well, all that goes for nothing, for any sensible man must do that. But he thought that the harbour could never be the coal depôt for the quantity of coal that would have to be shipped from Sydney. Then he spoke of a larger scheme, and for a survey to be made for a coal shipping place at Longnose Point, Balmain, necessitating the wasting of another quarter of a million of money after so much has already been wasted by the department.

Mr. Editor, that scheme might have been well enough had Mr. James Manning's original project of the Illawarra Railway been carried out in its entirety, for by that scheme the Illawarra line joined the old line at Petersham, and the coal railway proceeded to the harbour along the western shores of Balmain. But now, as the Illawarra Railway joins the main line at Eveleigh, "the officer's" scheme would necessitate the coal traffic encumbering the main line between Eveleigh and Petersham, and it must be borne in mind that the main line has now already as much traffic as it possibly can carry.

In sober truth, the wharf frontage to Darling Harbour, owned by the Government, which is at present lying idle, is ample for the requirements of a coal traffic far in advance of what can be expected for at least another quarter of a century. The Government have length of wharfage space for at least a dozen large ocean-going steamships of 2,000 tons and upwards. What should be at once done is to build wharves suitable for present requirements along that frontage from the present "failure of a wharf" at the head of Darling Harbour to below the bridge, and to use the land at the back of the brewery to Murray-street for wharf purposes, and also (for without this all the rest will be useless) to construct a proper bridge with enlarged openings at a level of at least 15 feet above the present bridge from Sussex-street, opposite Market-street, parallel to the present bridge, to a point in Murray-street of equal elevation. The underneath portion of the bridge could also be utilized in increasing the wharfage accommodation, while the railway traffic could pass underneath such bridge to below Union-street.

I feel assured that by such a scheme the shipment of southern coal from Sydney harbour could be amply provided for at a very small relative cost, far better as well as far cheaper than by the Longnose Point scheme, and, at the same time, as there is ample space for both, the immense traffic from the northern districts of the Colony, to be expected on the completion of the Homebush-Waratah line, would also be provided for permanently, and that concentration, which is essential to economical administration, will likewise be secured.

Sydney, 5 April.

Yours, &c.,

GEORGE PILE.

It is proposed to bring the Illawarra line through Petersham viaduct, or near there, to join on to Longnose Point line. Mr. G. Pile does not know the project apparently.—CH.A.G., 8/4/87.

Department of Public Works, Sydney, 18 November, 1887.

I SHALL be glad to know how the survey of the line from the suburban system, &c., to Longnose Point is proceeding.

The Engineer-in-Chief, B.C.

J.S.

Mr. Thomas.—W.H.Q., 22/11/87. The surveys have been completed, and the plans and sections are being plotted.—E.R.T., 22/11/87. Under Secretary.—J.W. (*pro* W.H.Q.), B.C., 23/11/87.

#### Resumption of Land at Darling Harbour.

WILL the Secretary kindly favour me with a sight of the Commissioner's papers respecting the land to be resumed at Darling Harbour in connection with the shipping of coal.

30/11/87.

W. V. READ  
(*Per* W.W.)

Perhaps Mr. Quodling can oblige with these.—A.R., B.C., 3/12/87. Papers herewith.—J.W. (*pro* W.H.Q.), 6/12/87. Railways, B.C. Traffic Manager, Redfern.—J.P. (*pro* Secretary), 7/12/87.

Commissioner,—I would impress upon the Commissioner that this matter is one which now requires immediate attention. In a short time we shall have the Illawarra coal traffic coming in, and nothing has been done to provide accommodation for taking delivery of it.—W.V.R., 12/12/87.

Now herewith.—A.R., B.C., 16/12/87. Traffic Manager. Secretary. Seen. I shall be glad to know what is being done in the matter.—W.V.R. (*per* W.W.), 19/12/87. Brief statement please, Mr. Badham.—A.R., 20/12/87.

PLAN of wharf arrangements, Darling Harbour, to meet requirements of general merchandise traffic and produce.

Commissioner, 87-7,265.

Ch.A.G.

#### Minute Paper.

*Subject* :—Proposed Arrangement for Shipping Coal at Balmain.

Department of Public Works, Railway Branch,

Engineer-in-Chief's Office, Sydney, 7 April, 1887.

A PROPOSAL was made by me in 1873 to use Longnose Point for shipping coal from the Illawarra District, and the surveys for this purpose were made as forming part of the Illawarra Railway.

This survey commenced at about 7 chains south-west of the Chemical Works at Balmain, passing under the Petersham viaduct, and over Cook's River, with a fork for the passenger traffic joining the main Southern line at Petersham.

The survey from Strathfield, to join this line in the neighbourhood of Long Cove, is the only portion of the scheme with which the Commissioner can be credited, and this would have come as a matter of course.

The plans of this line, I believe, were burnt in the Garden Palace fire; but Mr. Stephen's report, dated 20th January, 1874, an extract from which I subjoin, gives sufficient information to fully bear out my statement :—

\* \* \* \* \*  
 "Terminus.—The terminus, or rather the starting point, is situated about 7 chains south-west of the Chemical Works, Balmain, and is, I consider, admirably suited to the purpose intended; there being comparatively deep water close in to the shore, and the bottom being of mud and sand, admits of being still further deepened, should it be found necessary. The general situation, also, is excellent, being close to the main part of the city, and yet in no wise interfering with the principal shipping.

"I have made the plan of the terminus on a large scale, and this I will submit to you on my next visit to Sydney.

"I have kept the formation level 20 feet above high-water mark, so as to allow the coal to be shot into the ship's hold.

"Line between Sydney and George's River.

"On examining the accompanying tracing, you will find that I have sketched thereon several projected lines. The full red line denotes the route as now adopted by me. The dotted red lines represent rough trial lines which I have examined, but which I have abandoned.

"The line as now adopted by me, after leaving Balmain, passes underneath the Burke Town Ferry Road (the level of which remains unaltered), crosses two narrow arms of the harbour, which are dry at low water, and then, as a rule, skirts the shores of Long Cove until it reaches Petersham. The Parramatta Road I cross by an under-road bridge, and do not alter the level thereof more than 2 feet. I then pass under the first arch of the Petersham viaduct, which arch allows of ample room for a double line of railway.

"From this, with an average gradient of about 1 in 90, I reach the new Canterbury Road, which I cross at its lowest point with about 25 feet of cutting, so that the level thereof need not be affected.

"About midway on this incline I purpose to branch off with a nearly level line to Petersham Station, so as to connect this line with the existing line."

\* \* \* \* \*  
 As soon as the surveyors, who are under instructions to return to head-quarters, arrive in town, I will instruct them to make surveys from the Illawarra Railway and Strathfield to Longnose Point, Balmain.

The Hon. the Minister for Works.

JOHN WHITTON.

Railways.—J.R., B.C., 16/4/87. A.R., 19/4/87.

I presume by this time that the surveyors are at work on this survey. I should like to know what progress has been made. The matter is an urgent one, as we have now no place at which any large quantity of coal can be shipped, and the trade will be upon us before we are ready to meet it unless this matter is brought early to a final decision.—J.S., 30/5/87.

Engineer-in-Chief, B.C. The survey was commenced at the beginning of last month, but owing to the rainy weather, only little progress has been made.—J.W. (*pro* W.H.Q.), 2/6/87. Railways.—A.R., B.C., 4/6/87.

I understand that the Metropolitan District Surveyor (Mr. Deering) has furnished the Engineer-in-Chief with surveys of the localities through which the proposed lines will pass, which should expedite the completion of the survey of this route; in fact it was at my request that Mr. Deering furnished the Engineer-in-Chief with these plans.—CH.A.G., 7/6/87.

J.W., 23/6/87. I wish to have this survey completed as soon as possible.—J.S., 14/6/87. Engineer-in-Chief, B.C.

---

Minute Paper.

I BEG to forward herein report of the Railway Commissioners on the proposed lines from Tempe to Longnose Point; Westmead to Dural.

H.M'L.  
(*Pro* Secretary), 21/3/89.

To the Under Secretary, Public Works.

Reports handed to Under Secretary.—D.C.M'L., 22/3/89.

---

Line from Tempe to Longnose Point, Balmain.

Length, 6 miles 66 chains.

The estimated cost of constructing a double line from Tempe, on the Illawarra Railway, to Longnose Point, Balmain, including 1,350 feet of wharf, and five steam cranes for shipping coal, is £250,100, exclusive of land and compensation. The heavy section of rail, viz., 71 lb. per yard, has been provided for.

COMMENCING at 3 miles 69 chains 45 links on the Illawarra Railway, near Tempe Platform, and passing through the Municipalities of Marrickville, Petersham, and Balmain, to the end of Longnose Point in the latter suburb, being a distance of 6 miles 66 chains. Leaving the Illawarra line it proceeds in a north-westerly direction to the permanently staked line, St. Peters to Liverpool, which it will cross on an over-bridge in the vicinity of Livingstone Road; thence in a north-easterly direction along the south-east side of Long Cove Creek to the Great Southern Railway, which it passes under at the Petersham viaduct; thence to the Parramatta Road, which it intersects at 2 miles 65.50 chains (mileage on railway trial survey) near to where the road crosses the Long Cove Creek; thence in a northerly direction along the creek to Weston-street, which it cuts at 5 miles 17 chains, near to where it forms the approach to the Long Cove Bridge; thence along the south-eastern side of the Parramatta River, passes Fig-tree and White Horse Points to Longnose Point, where it terminates at 6 miles 66 chains.

The estimate provides for 1,350 feet of wharf at Longnose Point, and five steam cranes, with ample siding accommodation. Further, there is room for increasing the length of the wharf to 2,500 feet, and the number of steam cranes to nine, should the traffic require it in the future.  
January, 1889.

---

Memorandum to Engineer-in-Chief,

Department of Public Works, Railway Branch,  
Engineer-in-Chief's Office, Sydney, 1 March, 1889.

I BEG to forward a tracing of the coal-loading wharves and sidings proposed for Longnose Point, on the proposed line from Tempe to Balmain. This tracing has been made by your direction for the use of the Railway Commissioners.

STANLEY ALEXANDER.

---

Memo. to Mr. Quodling.

Department of Public Works, Railway Branch,  
Engineer-in-Chief's Office, Sydney, 17 November, 1888.

I WOULD ask if the plan of siding arrangements at Longnose Point, on Tempe to Balmain line, is available. Mr. Quodling may remember that this drawing was supposed to be in the Minister's hands. Mr. Drewett has none.

STANLEY ALEXANDER.

Telephonic message sent to Traffic Manager, Redfern—W.H.Q., 17/11/88. Plan herewith.—W.H.Q., 19/11/88. Mr. Alexander. This small scale plan does not show sidings at Longnose Point. If Mr. Drewett could send me the original drawing, I might arrange for the estimate from it.—S.H.A., 19/11/88. Mr. Drewett.—W.H.Q., 19/11/88. Mr. Alexander has, I understand, received the plan referred to.—J.W.D., 21/11/88. The plans were found in the Minister's room yesterday.—W.H.Q., 21/11/88. Mr. Alexander. Plans received.—S.H.A., 22/11/88. Plans and sections sent to Commissioners, 20/2/89. Memo. to Under Secretary.

## Minute Paper.

*Subject*:—Proposed extension, Tempe to Longnose Point.

Department of Public Works, Railway Branch,  
Engineer-in-Chief's Office, Sydney, 20 February, 1889.

I HAVE the honor to inform you that the Parliamentary plan, section, and book of reference of the proposed line from Tempe to Longnose Point, have this day been handed to Mr. Hugh M'Lachlan for the Minister.

W. H. QUODLING  
(For the Engineer-in-Chief).

The Under Secretary for Works.

Trial survey, Tempe to Balmain.

Sir,

Railway Survey Office, 3 February, 1888.

I have the honor herewith to transmit you plan and sections (2) of, and my report on the above trial survey.

The survey commences at 3 miles 78.32 chains on the Illawarra Railway, *i.e.*, a short distance on the Sydney side of Tempe Station, and joins the permanently stated line to Liverpool at 3 miles 71.55½ chains mileage on that line, and then deviates from said line at 4 miles 24½ chains, crossing the new Canterbury Road to the southward of Dulwich Hill; thence to head of Long Cove Creek, running down the east side of that creek (under Petersham viaduct) and Long Cove, crossing Weston-street, Balmain, a few chains from Long Cove Bridge; then keeping between the coast and Terry-street, striking the coast of the Parramatta River at White Horse Reserve; skirting said river, and across private wharves to the west side of Longnose Point.

The total distance of this line is 7 miles.

I have also run several alternative lines between White Horse Point and Longnose Point, keeping more to the westward of the coast line, as also a short deviation to the Snail's Bay side of Longnose.

Between Marrickville and Petersham viaduct I have lately run a deviation commencing at 45.19 chains from the junction of the first trial line with the Illawarra Railway. This deviation runs in nearly a direct line to Petersham viaduct, and is 34 chains shorter than line No. 1. This line, though shorter, goes through more valuable property, and grade and curves are more severe in the descent from the New Canterbury Road to the viaduct.

Several of the streets on No. 1 line to Petersham viaduct can be closed, and the cottages taken can be averaged at £300.

Between viaduct and Leichhardt Park several streets also can be closed.

I have staked the trial line in the most feasible place to minimise damage, but I can doubtless further improve the same.

Between White Horse Point and Cove-street the coast line runs along the edge of cliffs, and then skirting and on to private wharves to Longnose Point.

Very deep water is attainable off these private wharves, but their alienation, and the consequent damage to the residences, will be a heavy item.

The heaviest cutting on the line shows 34 feet in sandstone, *i.e.*, in the ascent from Callen Bay to Elliott's Chemical Works, Balmain, and the steepest grade (which is at the same locality) is 1 in 48; the other cuttings in Balmain will be in sandstone.

I found it necessary to put in several 8-chain curves to enable me to keep the greatest distance from the private dwellings.

I have taken several cross sections along the Balmain end, which are shown in red figures on plan.

I have, &c.,

HENRY HARDY.

E.R.T., 3/2/88. Plan and sections herewith.—W.H.Q., 5/3/88. Mr. Drewett. A plan showing fresh trial line in blue, with mem. D. 88-18, to Engineer-in-Chief. Original plans are still in my possession.—J.W.D., 22/3/88. The Engineer-in-Chief. See memo. 88-325 of 23rd April.

Memorandum to Mr. E. R. Thomas, Survey Branch.

Balmain survey.

Department of Public Works, Railway Branch,  
Engineer-in-Chief's Office, Sydney, 20 January, 1888.

PLEASE say when the plan and section of Mr. H. Hardy's survey to Balmain will be ready. They are urgently required.

W. H. QUODLING.

Mr. Hardy is now engaged plotting plan and section, and will complete them about the end of first week in February.—E.R.T., 23/1/88. Plan and sections forwarded this day with report.—E.R.T., 3/2/88.

Memorandum to Mr. Hardy, Railway Survey Office, Pitt-street.

Survey to Longnose Point.

Department of Public Works, Railway Branch,  
Engineer-in-Chief's Office, Sydney, 22 June, 1887.

BE good enough to report when you expect to complete your portion of the above survey.

W.H.Q.

It is impossible to give a definite answer to this query. The survey of the above line has to be done with great care, and on account of obstructions in the way of staking, the centre line and curves take some time to mark, and a good deal of detail survey has to be done. The work will be executed with as quick despatch as accuracy will allow, and probably will be concluded in the course of August next.—H. HARDY, 24/6/87. The Engineer-in-Chief for Railways.

Is

Is a permanent or a trial survey being made by Mr. Hardy?—W.H.Q., 25/6/87. Mr. Thomas. Mr. Hardy is making a trial survey, but the route is through populous districts and property of great value, which latter he will avoid passing through wherever possible.—E.R.T., 27/6/87. The Engineer-in-Chief.—J.W., 4/7/87.

The late rainy weather has retarded the field-work considerably, but good progress has been made taking this into account. A great amount of cross levelling and sounding to deep water will be necessary on the line along the shore to Longnose Point.—E.R.T., 2/9/87. The Engineer-in-Chief.

J.W., 5/9/87. When will the plan and section be ready?—W.H.Q., 1/12/87. Mr. Thomas. In about three weeks; they are sufficiently forward for inspection.—E.R.T., 2/12/87. The Engineer-in-Chief. End of year, 3/12/87. Mr. Thomas.—W.H.Q., 30/12/87. Plan and section will be completed about end of first week in February.—E.R.T., 23/1/88.

#### Survey—Strathfield to Longnose Point.

Sir,

Camp, Croydon Road, Ashfield, 23 June, 1887.

In reply to your memo. of the 22nd instant, No. 87-777, requesting to know when my portion of the above survey will be completed, I have the honor to inform you that I have sections of two separate trial lines almost completed. They will be forwarded with rough plan for approval at once. I received by same post as your letter a tracing from Mr. Thomas, directing me to try another line round Iron Creek. This line will probably take a fortnight, and it will depend very much upon which line is approved how long the detail survey will take. The approved line will have to be cross-levelled, and with the detail, which is close from end to end, embracing 10 chains, *i.e.*, 5 chains on each side, will probably take six or seven weeks in addition to the survey just ordered.

If the second line I levelled, starting from 7 miles 50 chains on the Northern Railway, is approved, a connection will have to be made with the main line from somewhere between Strathfield and Homebush. This connection will be in addition to the above, but will probably be only three or four days' work. It is more than probable that the detail at this place will have to be surveyed and plan plotted before this connecting line can be set out.

I explained the above to Mr. Thomas on Saturday last.

I have, &c.,

GEORGE MELROSE.

The Engineer-in-Chief for Railways, Sydney.

J.W., 24/6/87. Mr. Thomas. Forwarded are two field sections sent in by Mr. Melrose this morning. On the plan (tracing) the two routes are shown in red and blue lines.—E.R.T., 27/6/87. The Engineer-in-Chief. Mr. Melrose may try the line marked by him in pencil, starting from the Southern line at the bridge near Burwood. The other line, in red, from Strathfield, passes through very valuable property, and would require expensive bridges and works.—J.W., 4/7/87. Mr. Thomas. Plan and sections returned herewith. Instructions forwarded to Mr. Melrose.—E.R.T., 5/7/87.

#### Memorandum to Mr. Melrose.

Department of Public Works, Railway Branch,

Engineer-in-Chief's Office, Sydney, 4 June, 1887.

In dealing with the Dobroyde Estate in connection with the proposed coal line, it should be borne in mind that there is a reservation of 100 feet in the grant. Thus:—

N. Bayley, 480 acres, granted 9th August, 1803, as "Sunny Hill Farm." . . . "On the north-west side by Iron Cove Creek, and on the east by Long Cove Creek. Reserving a road of 100 feet as near the high-water mark as convenient."

Advantage should be taken of this reservation, if practicable, in laying out the proposed railway. Please note and return.

W. H. QUODLING.

Noted and returned.—GEORGE MELROSE, 6/6/87. Mr. Thomas.—W.H.Q., 7/6/87. Noted.—E.R.T., 8/6/87.

Mr. Deering has kindly furnished the following information, *viz.*:—The Minister for Lands has, at his suggestion, stopped all reclamation and rescission cases along east side of Long Cove to Longnose Point. There is no reservation through the 550 acres granted to Dr. Balmain. It is doubtful if there are reservations in the grants between Dobroyde and Balmain.—W.H.Q., 9/6/87. Mr. Thomas.

Noted, and copy sent for Mr. Hardy's information.—E.R.T., 10/6/87. Put by.

#### Memorandum from Mr. J. W. Deering to Mr. W. H. Quodling.

Dear Quodling,—

2 June, 1887.

Mr. Whitton desired to have the survey of east side of Long Cove, where the trial line is now being surveyed. Nearly all my stations were on rock, and can be picked up on the railway traverse, and this will give you the H.W.M. precisely, also the L.W.M. Sheets 6, 7, 8, 9, 11, and 12 herewith. Return when you have done with them. Excuse haste.

J.W.D.

Will you please have the accompanying plans copied for the information of the surveyor, and returned as early as practicable?—W.H.Q., 2/6/87. Mr. Thomas. Copies made, and the sheets Nos. 6, 7, 8, 9, 11, and 12 returned herewith.—E.R.T., 11/6/87. Plans returned to Mr. Deering, with memo. 87-734.—W.H.Q., 11/6/87.

Memorandum

Memorandum to Mr. E. R. Thomas.

Department of Public Works, Railway Branch, Engineer-in-Chief's Office,  
Sydney 27th April, 1887.

THE Engineer-in-Chief wishes a trial survey to be made from the Illawarra Railway, near Marrickville, to Longnose Point, Balmain. The line would have to pass under the Petersham viaduct, and follow down the east side of Long Cove. Also a branch from this line to Strathfield, joining the Illawarra branch near Long Cove.

W. H. QUODLING.

Messrs. Melrose and Hardy have been instructed to proceed with trial surveys as soon as the necessary tracings have been prepared, and camps ready.—E.R.T., 28/4/87. Messrs. Hardy and Melrose are engaged on trial surveys, Marrickville to Longnose Point, Balmain, and branch line to Strathfield respectively. See journals for May, 1887.—E.R.T., 1/6/87.

27 April, 1887.
