The total number of volumes in the Library at the end of 1892 was 97,348, an increase of 5,403 over the number for 1891. The number of new works added was 5,403, being 403 less than in 1891. 136,410 persons visited the reading-room as against 114,947 in the previous year, while 60,845 visits were made to the Lending Branch. The total number of visits, therefore, paid to the institution during the year, was 197,255. Twenty-seven persons were employed on the staff.

The year's expenditure is shown hereunder:—

## THE AUSTRALIAN MUSEUM.

The number of visitors to the Museum was—On week-days, 94,438; on Sundays, 36,263; total, 130,701. As compared with 1891, this shows a decrease of 2,144 visitors, being accounted for by a falling off of 4,672 in the Sunday visits, while the week-day attendances increased by 2,528. Thirty persons were employed in the institution. The Trustees report that the year's expenditure was as given below:—

On show-cas	es, bui	ldings,	repairs		£ $890$	19	0

#### NATIONAL ART GALLERY.

During the year 250,109 visits to the Gallery were registered, showing an increase of 11,978 on the attendance for 1891. On week-days the visits numbered 148,426, and on Sundays 101,683, as against 139,863 and 98,268 respectively for the previous year. Six persons were permanently employed, with three extra assistants on Sundays and holidays. Mr. E. L. Montefiore was, on 1st September, appointed Director of the Art Gallery, and, having in consequence vacated his seat on the Board of Trustees, Mr. E. Du Faur was elected to succeed him as President. His Honor Sir J. G. L. Innes was appointed by the Government as a Trustee.

The following is a statement of the year	rs expen	ditu	re :	
For works of art purchased	£5,084	10	6	
For maintenance (frames, freight,	•			
insurances, &c.)	832	8	1	
For salaries	1,064	4	2	
	£6,981	2	9	

# NEW SOUTH WALES INSTITUTION FOR THE DEAF AND DUMB AND THE BLIND.

The number of inmates during the year was 99, as compared with 88 for 1891. Of these, 62 were under and 37 were over 14 years of age. The new admissions were 22—21 under the age stated and 1 above it. Thirty-two inmates were discharged—8 under 14 years, and 24 over that age. The income was:—

From State From other		•••	•••	£450 6,353		-
				£6,803	1	5

Showing an increase of £769 6s. 1d. on the previous year's receipts.

The expenditure for the year was as follows:—

*	•						
For buildings, &c.	•••			£6,175	5	5	
For maintenance		•••		$2,\!553$	14	10	
For salaries and wa	ages	•••	•••	$2,\!582$	15	11	
			4	£11,311	16	2	
				•			RIAL
				_			

#### INDUSTRIAL SCHOOL FOR GIRLS, PARRAMATTA.

The number of girls enrolled during 1892 was 136, of whom 42 were under and 94 above the age of 14 years. There were 56 new admissions—28 under and 28 over 14 years old. Fifty-eight inmates were discharged during the year as follows:—

For apprenticeship	•••	30
On attaining the age of 18 years		7
Transferred to the Boarding-out Officer		18
By order of the Governor-in-Council	•••	<b>2</b>
By order to Benevolent Society		1

The number remaining in the Institution at the end of the year was 78. Compared with 1891, the enrolment showed an increase of 19, the new admissions of 12, and the discharges of 21. The expenditure for the year was:—

For maintenance			• • • •	$\pounds 1,457$	9	0
For salaries	•••	•••	•••	1,078		9
			-	£2,535	17	9

Calculated on the enrolment the expenditure was equal to £18 13s. per head, a reduction upon 1891 of £4 17s. 5d.

The Superintendent reports that, as far as the behaviour of the inmates is concerned, there is little to complain of. They are obedient, orderly, and amenable to control. There has been very little sickness during the year. Of the apprentices sent out in 1892, 80 per cent. are reported to be conducting themselves in a creditable manner, not only leading moral lives but giving satisfaction to their employers. Of those finally discharged on attaining the age of 18 years, 57 per cent. are known to be living respectably.

Washing, mangling, and ironing have formed an important part of the duties of the inmates: 52,476 pieces, representing a saving of about £477, were washed for the Hurlstone Training School, and 122,117 articles for their own institution, saving thereby £693. During the year the alterations and improvements commenced in 1891 were completed.

#### NAUTICAL SCHOOL-SHIP "SOBRAON."

In this institution 426 boys were enrolled, 222 of these being under and 204 over 14 years of age; 196 were new admissions, of whom 115 were below and 81 above the age stated. The number discharged was 148, made up in the following manner:—

For apprenticeship	82
On attaining 18 years of age	8
Transferred to Boarding-out Officer	33
Sent to hospitals	3
Released by order of the Governor-in-Council	22

148

4.

Two hundred and seventy-eight boys remained on the ship at the end of the year. These figures, as compared with those of the "Vernon" for 1891, show an increase of 65 in the enrolment and of 43 in the new admissions, while 17 more were discharged. The total expenditure was £8,295 5s., made up as follows:—

For mainter	nance	•••	•••	£5,771	5	0
For salaries	•••	•••	•••	$2,\!524$	0	0
_	Total			8,295	5	0
Deducting to the Tr	parents' c			368	12	6
Net	total cost	to the S	tate	£7,926	12	6

The cost per head of the enrolment was £19 9s. 5d., calculated on the gross expenditure.

The Superintendent, Captain Neitenstein, reports:—"The principal event of the year was the removal of the institution from the 'Vernon' to the 'Sobraon.' The new ship works smoothly, and the boys are comfortable and contented. No deaths occurred during the year, and beyond an attack of influenza, little serious sickness. The daily average number on board was the highest yet reached, namely, 254. Four hundred and forty apprentices in the country are under the legal guardianship of the Superintendent. More than 90 per cent. of these received good characters from their employers. The boys who finished their apprenticeship during the year received nearly £3,000 in wages."

F. B. SUTTOR, Minister of Public Instruction.

Department of Public Instruction, Sydney, 25th March, 1893.

### APPENDIX XII.

### THE CHIEF INSPECTOR'S REPORT, WITH ITS ANNEXES.

Or the 2,452 schools open in 1891, 96 were closed during that year, leaving 2,356 in existence at the beginning of 1892. New schools to the number of 141 were established in 1892, making a total for the year of 2,497. The numbers for the last three years stood thus:-

Year.	J	Public.	]	Provisio	onal.	Half-	time.	House-t	o-House.	Eve	ening.	Total.
1890		1,680		33	3	2	89	(	95		21	2.418
1891		1,697		349	9	3	00	9	92		14	2,452

1892	38	34	21	54	117	195	222	315	665	283	553	2,497

Accommodation.

As in previous years, the Inspectors attended to many minor repairs, and superintended the erection of small schools and weathersheds. Beyond its intrinsic value, the work undertaken by them is important, because it is done on the spot by local people, just when it is needed, and at moderate rates of expenditure. In 1892, they supervised, in different parts of the Colony, the following works:—

		æ			
94 new schools 11 additions to schools	total cost	4,827	10	7	
4 new residences	,,	574	ó	Ö	
10 weathersheds	al fi.	236	0	0	
685 buildings repaired	,,	6,394	7	<b>2</b>	

The more important new buildings and extensive repairs were dealt with by the Department's Architect, and particulars respecting them will be found in his report.

At the close of 1891 there was sitting accommodation for 218,940 pupils. By the end of 1892 the sittings had increased to 222,411. As the greatest enrolment for any quarter was 187,253, the aggregate accommodation is more than sufficient for the wants of the Colony. The following table shows the accommodation in each district :-

District.	Number of places at end of 1892, reckoned at 8 square feet for each child.	Number of places at end of 1892, reckoned at 100 cubic feet of air space for each child.
Armidale	17,641	16,018
Bathurst	15,740	15,640
Bowral	14,253	12,643
Goulburn :::	18,730	15,630
Grafton	17,250	17,256
Maitland Metropolitan	26,460	27,482
Sub Metropolitan	46,627 $22,515$	59,871
Sub-Metropolitan		22,452
Wagga Wagga Wellington	22,993 12,857	22,448 12,971
Total	215,066	222,411

The Inspectors again report that the schools have a good outfit of furniture, apparatus; and working stock. Most teachers are economical in the use of materials, and careful of the Government property entrusted to them. A few, however, are still spoken of as bad tenants, who will scarcely lift a hand or drive a nail to save spouting, fencing, roofing, &c., from going to destruction. Much attention continues to be given to tree and flower cultivation, and several of the school grounds and premises, in various parts of the Colony, are distinctly attractive in appearance. Some teachers, too, by diagrams, vases, brackets, pot-flowers, animal, vegetable, and geological specimens, and collections of local products, make the inside of the schoolrooms cheerful and homely. In their annual reports special mention is made by some of the Inspectors of schools that have distinguished themselves in this manner.

Attendance.

The gross enrolment of pupils in 1892 was 239,364. Deducting 12 per cent. for multiple enrolments, the number of individual pupils on the books of the schools was 210,641. The following table gives the enrolment and average attendance for each quarter of 1891 and 1892, together with the rates of inverses. of increase :

Qüarter.	Enrolment in 1891:	Enrolment in 1892.	Increase of enrolment for 1892.	Average daily attendance for 1891.	Average daily attendance for 1892.	in average daily attendance	increase	Percentage of Increase of average attendance.
March	178,751	185,088	6,337	123,556.7	132,735.5	9,178.8	3.5	7.4
June	175,205	187,206	12,001	122,246.7	131,437 7	9,1910	6.8	<b>7</b> ·5
September	<b>1</b> 81,176	187,253	6,077	125,238.0	135,067.6	9,829 6	3.3	7.8
December	177,980	185,281	7,301	119,070.7	131,079.7	12,009.0	4.1	100
Áverages	178,278	186,207	7,929	122,528.0	132,580·1	10,052-1	4.4	8·1

The percentage for each quarter was :-

Quarter.	Enrolment.	Average Attendance.		
Quarter.	Enrolment.	Number.	Percentage.	
MarchJuhe SeptemberDecember	185,088 187,206 187,253 185,281	132,735·5 131,437·7 135,067·6 131.079·7	71·7 70·2 72·1 70·7	
Year's average	186,207	i32,580·1	71.1	

Compared with 1891, the increase on the gross enrolment was 5,645; on the average quarterly enrolment 7,929, and on the average daily attendance 10,052.

**Inspection** Inspection.

### Inspection.

Sixteen small schools either closed before the Inspectors could reach them, or were opened late in the year after these gentlemen had visited their neighbourhood. With these exceptions, all schools were thoroughly inspected once, and 1,174 were inspected a second time. In schools of more than one department, each department was examined separately, and, for all purposes of inspection, was treated as a distinct school. Altogether 2,728 schools or departments were open during the whole or a portion of the year, an increase of 66 on the number in 1891. The increase in the number of pupils examined was 10,065. The details of inspections made during the last three years are shown in the following table:—

Year.	No. of schools.	No. of schools inspected.	No. of schools inspected twice.	Total No. of inspections.	No. of schools not inspected.	No. of pupils examined.	No. of Inspectors.
1890	2,627	2,587	704	3,291	40	127,515	35
1891	2,662	2,623	986	3,609	<b>3</b> 9	132,044	35
1892	2,728	2,712	1,174	3,886	16	142,109	35

### The particulars for each district stand thus :-

Totals	1,938	344	346	85	15	2,728

### Attainments of Scholars.

Of the 2,712 schools regularly examined, 2,462, or 90 per cent., reached the standard or exceeded it. In 1891, the percentage was 88. I ascribe the gradual improvement, year by year, to the increased number of capable teachers that the Department is now able to place in charge of the smaller schools. The ex-pupil-teachers who are at the disposal of the Department for this kind of work are well adapted for such positions. They have had four or five years of good practical training, are well educated, and quite understand what is required of them. The following tables show the proficiency of all schools inspected.

	Below Standard.	Up to Standard.	Above Standard.	Totals.

Needlework	49,146	41,711	84				
Drill	135,466	105,455	77				
Natural science	8,514	6,678	78				

In comparing these results with those of last year, it is satisfactory to notice that in every subject there is an increase in the percentage of passes. There is a steady advance throughout the Colony in the quality of the work done, but in no subject is the improvement so great as in writing. Teachers now recognise that it is hopeless for them to attempt to obtain good reports on their schools, or promotion to better positions, unless reading, writing, spelling, and arithmetic—the ground-work of all instruction—are unmistakably well taught in all their classes. While attention has been paid to these most important matters, an examination of the returns shows that in more advanced subjects, such as Euclid, algebra, mensuration, Latin, trigonometry, &c., the passes considerably exceed anything hitherto recorded.

# Discipline.

The discipline of the schools, as a whole, is good. The children are taught to be punctual, orderly, attentive, and industrious. They give prompt obedience to instructions, and the judicious teacher finds no difficulty in ruling them. Drill received considerable attention, and is used with effect in many school operations.

### Compulsory Clauses of the Act.

Compulsory Clauses of the Act.

The average enrolment for the half-year ending 30th June, 1892, was 186,147. Of this number, 22,555 failed to attend school seventy days. The explanations given in regard to 15,189, were considered satisfactory. Of the remainder, amounting to 3.9 per cent. of the average enrolment, the parents of 1,503 were prosecuted, and cautions were sent in 5,863 cases.

For the half-year ending the 31st December, the average enrolment was 186,267. Of these, 18,619 failed to attend seventy days. The explanations respecting 12,624 were accepted, the parents of 4,119 were cautioned, and legal action was taken in 1,876 cases. The prosecutions, therefore, for the December half-year, amounted to 3.2 per cent. of the average enrolment for that period.

It has been pointed out in previous reports that the compulsory clauses of the Act do not invest Attendance Officers with sufficient powers to effectively deal with defaulting children.

### Staff of Teachers.

At the end of the year there were 4,636 teachers employed, an increase of 240 on 1891. Of these, 3,173, are principal teachers or assistants, 1,390 are students of the Training Schools or pupil-teachers, and 73 are work-mistresses. In Schools below the second class, needle-work is taught by the female assistants, or by the wives of teachers.

The Inspectors' reports on the conduct and habits of teachers and pupil-teachers are, with very few exceptions, favourable. The large majority are respectable citizens, who take a warm interest in

their pupils, and do honest useful work.

The following table shows the number of teachers, together with their classifications. It is worthy of remark that, notwithstanding the very large increase in the number of pupils in average attendance—
10,052—the number of new teachers appointed was less than in 1891:—

		Α.	ı	в.	II	A.	II	В.	m	ſA.	III	В.	III	C.		lassi- ed.	To	tals.	Total.

### Training Schools.

Both training schools were in full operation throughout the year. There were in attendance during the whole of 1892 :-

Fort-street (male students) Hurlstone (female students)					
Totals	46 seniors	- 	62 juniors	•••	Total, 108

All students have to study practical teaching, school management, music, drawing, and drill. The male students have in addition to practise carpentry, and the female students needlework and cookery. Outside these subjects their literary studies may be conducted at the University if they have matriculated, or at the Training Schools if they have not. The following table shows their distribution for study.

				Senior.	Junior.	Total.
Attending Univ	ersity—1st y	ear cou	rse (males)	10	9	19
"	1st	,,	(females)	9	0	9.

	•	,-				
	Totals		·	46	62	108

The results of the examinations are very creditable to the students, and show that they are working with great earnestness. In an appendix will be found the reports of the two Principals, giving detailed information respecting the Training Schools.

High Schools.

No increase or decrease has taken place in the number of High Schools. The following table shows the attendance at each:

School.	Total enrolment 1892.	Average quarterly enrolment.	Average daily attendance.	Amount of fees paid.
Sydney (Boys) ,, (Girls) Maitland (Boys) ,, (Girls) Bathurst ,,	360 <b>75</b>	277 264 54 47 44	252·1 236·1 48·8 40·3 37·6	£ s. d 1,785 0 0 1,734 12 0 267 2 2 227 10 0 279 14 10
Total	. 882	686	614:9	4,293 19
The figures for 1891 were	. 878	695	624.3	4,735 17

Practically the enrolment and the attendance are the same as they were for 1891. As in former years, a great number who presented themselves for the entrance examination and passed, failed to attend a High School. They competed for a scholarship or bursary, and not succeeding in obtaining one, could go no further. The total number who attended the examinations for admission was 1,095, and of these 1,018 passed. The scholarships awarded during the year were 61, and the bursaries 31.

All the High Schools were fully examined by the Department's Inspectors. The results were on the whole satisfactory, and the Inspectors report favourably of the discipline and general management. The following table gives the number of pupils examined in each subject, and the percentage of passes:—

Subject.	Number examined.	Percentage of passes.	· Subject.	Number examined.	Percentage of passes.
Arithmetic	589	72	French	505	79
Mensuration	424	65	German	65	94
Algebra	543	71	Drawing	492	80

Jeography	489	86	Singing	39	100
Latin	535	74	Physiology	11	100

All the schools were represented at the various University examinations. The following table shows the number of passes:-

	Junior.	Senior	Matriculation.
Sydney (Boys)  " (Girls)  West Maitland (Boys)  " (Girls)  Bathurst (Girls)	65 57 5 14 8	5 3 0 1 2	35* 15† 31 6 2 1
Totals	149	. 11	57
In 1891 the totals were	• 113	16	30

^{*} Of these 5 matriculated at the Senior, and 24 at the Junior Examinations. † Of these 5 matriculated at the Junior Examination.

The total expenditure on High Schools for the year was £8,950 9s. 4d. Deducting from this sum the amount paid as fees, there is a balance of expenditure over income of £4,656 10s. 4d., or £6 15s. 9d. per head of the average enrolment.

2nd March, 1893.

J. C. MAYNARD, Chief Inspector.

### ANNEX A.

### INSPECTORS ALLPASS AND DAWSON'S REPORT.

The schools in our section of the Metropolitan District are substantially the same as at the end of 1891, the only difference being that Manly School is now a school of two departments.

The total number of schools and departments under our supervision is ninety-three (93), of which

ninety (90) are Public Schools, and three (3) are Evening Schools. These schools are classified as

Class I.	II.	111.	IV.	Ÿ.	VI.	VII.	VIII.	IX	x.	Evening Public.	Total.
37	18	10	15	9		•••		1		3	93

During the year, the schools at Forest Lodge, Woollahra, and Croydon, were raised to the status of Superior Public Schools.

of Superior Public Schools.

Speaking generally, the material condition of the schools continues to be very good. Repairs and improvements of varying extent have been made to the premises at Albion-street, Alexandria, Camdenville, Crown-street, Croydon Park, Darlington, Darlinghurst, Forest Lodge, Fort-street, Glenmore Road, Hurlstone, Leichhardt, Leichhardt West, Mossman's Bay, Pyrmont, Redfern West, Riley-street, Surry Hills South, Waterloo, Waverley, and Woollahra. New weathersheds have been erected at Surry Hills South (Infants') and Willoughby. Glazed partitions to facilitate the work of teaching have been put in the large school-rooms at Darlinghurst, Blackfriars, and Surry Hills South. The teacher's residence at Manly has been enlarged. At the beginning of 1891, a new Infants' School was opened at Leichhardt to replace old buildings there, and towards the end of the year a new school-room was built at William-street. Two new class-rooms have been provided at Macdonaldtown, and the school-room at Naremburn has been lengthened. Additions are in progress at Paddington and Leichhardt.

New school buildings are required at Albion-street (to replace old buildings), Bondi (to accommodate Infants), Leichhardt West (to accommodate Girls), and Manly (to accommodate Infants).

The total number of seats provided for scholars in our district at the end of 1891, was 23,786, allowing 8 square feet to each child; through the extensions noted above, there is now room for 24,213 scholars.

The following table shows the enrolment, average daily attendance, &c., in the schools under our supervision:

	Enrolment.	Average attendance.	Percentage of attendance.	Free pupils.
March quarter June quarter September quarter December quarter	26,415 26,266	18,825 18,430 18,983 18,148	71·8 69·8 72·3 70·3	1,028 1,239 1,240 1,350

The attendance at several schools fell off during the last quarter owing to the prevalence of

The attendance at several schools fell off during the last quarter owing to the prevalence of influenza amongst the children.

All the schools under our supervision have undergone two inspections during the year, a regular inspection and an ordinary inspection. Incidental inspections have been made frequently during the year.

As regards internal organisation, the schools are well equipped with all needful educational appliances, the work of teaching is evenly distributed—special care is taken that young teachers are not imposed upon—and the course of instruction is carefully regulated. The order maintained in the schools is very satisfactory, and the behaviour of the pupils under examination is creditable to themselves and their teachers. The use of the cane is discouraged, and there have been few complaints of severity. severity.

The condition of the schools as regards efficiency may be seen from the following table:—

	Below standard.	Pass (50 per cent.)	Above standard.	Total.
Public Schools	0	o	90	90
Evening Schools	0	0	3	3

The table underneath shows the number of pupils examined in each subject and the percentage of

Subject.	Number examined.	Percentage of passes.	Subject.	Number examined.	Percentage of passes.
Reading	19,301	79	Drawing	18,017	67
Writing	19,301	77	Music	18,075	80
Dictation	14,687	74	French	485	65
Arithmetic	19,254	64	Euclid	1,490	67

. Australian		68	Needlework	5,594	91
Scripture		72	Drill	18,123	87
Object Lessons		74	Natural Science	1,540	73

In nearly every case the percentage obtained is higher than that of last year.

The teachers, as a body, are capable men in their profession, and good citizens. The pupil-teachers, with but few exceptions, have been favourably reported upon, as to both conduct and aptitude in teaching.

TABLE showing the classifications of Teachers and Pupil-teachers.

The Superintendents of Drawing, Music, Drill, and Needlework have performed their duties in a diligent and efficient manner.

The work of the Attendance Officers (2) has been done quite to our satisfaction. During the year 3,216 cautions have been sent out to defaulting parents and guardians; 194 prosecutions were instituted, resulting in 173 convictions.

J. W. ALLPASS, Inspectors.
J. DAWSON,

Sydney, 30th December, 1892.

### ANNEX B.

# INSPECTORS THOMPSON AND PITT'S REPORT.

THE schools under our supervision during the year consisted of 41 Public Schools, and 3 Evening Public Schools, embracing a total of 95 departments. The Provisional School at Biloela was converted into a Public School and a school at La Perouse—formerly existing as Botany Heads—was reopened.

Accommodation.

At the beginning of the year the accommodation provided for 21,192 pupils, and by the close of the year provision was made for 22,414 places. Thus, during the year, additional accommodation for 1,222 pupils was provided. This increased accommodation was effected by the erection of new buildings and class-rooms at Ashfield, Balmain, Cleveland-street, Gardeners' Road, Newtown, and Smith-street (Balmain). Buildings in progress at the present time, or sanctioned, are:—St. Leonards, additional building to accommodate 180 pupils; La Perouse, new building sanctioned, to be erected so soon as funds will permit. School

### School Sites.

Land for school sites has been purchased at Kensington, and at the cross-roads at La Perouse—that is, between La Perouse and Little Bay.

### Attendance

The following schedule shows the total enrolment, average attendance, and percentage of attendance for each quarter during the year:—

Quarter.	Enrolment.	Average.	Percentage.
March	25,160	18,085·0	71·8
	25,710	18,109·3	70·4
September	25,861	18,553·1	71·6
	25,452	17, <b>763·</b> 9	69·7

The attendance at Evening Public Schools is not included in the percentages above given.

# Inspection.

In addition to incidental visits, all schools and departments have undergone regular and ordinary inspection. It is satisfactory to record that of the total 95 departments—regularly inspected—93 were above the standard of 50 per cent. of possible marks, and that the remaining 2 departments were up to the standard required. Consequently no school or department has been found to be below the required standard of proficiency. The total number of pupils examined, and their proficiency in the several subjects prescribed, is hereunder shown:—

Subject.	Number examined.	Per centage (on standard of 50 per cent.)	Subject.	Number examined.	Per centage (on standard of £0 per cent.)
Reading Writing Dictation Arithmetic Grammar	21,413 21,413 17,604 21,413 8,774	77.0 75.0 75.0 74.0 75.0	Music French Geometry Algebra Mensuration	21,413 783 5,332 3,462 5,332	80·0 69·0 80·0 79·0 73·0

## Classification of Schools.

1st Class.	2nd Class.	3rd Class.	4th Class.	5th Class.	6th Class.	7th Class.	8th Class.	9th Class.	10th Class.	Evening Public Schools.	Total.
16	4	3	7	5	2		1	2	1	3	44

To sum up,—The organisation may be regarded as good; the government is judiciously and effectively administered, and the instruction is sound and effective. The condition of the schools in respect to general efficiency is highly creditable to the teaching staff.

 $\begin{array}{l} W. \ F. \ THOMPSON, \\ CHAS. \ JNO. \ PITT, \end{array} \} Inspectors.$ 

Sydney, 30 December, 1892.

### ANNEX C.

### DISTRICT-INSPECTOR W. DWYER'S REPORT.

THE number of schools in operation at the close of the year was 205. They are classified as follows:-

Public	184 De	partments.
Provisional	11	• ,,
Half-time	8	,,
House-to-house	2	"

One Provisional and one Evening School were closed.

The number of places available for pupils, according to the authorised standard of floor space, was 22,515 for an enrolment (during last quarter) of 20,120. The accommodation provided is therefore ample, and it is evenly distributed.

Two schools were not inspected—one a small Provisional with an enrolment of 10, the other an Evening School with an enrolment of 28. The former was duly visited for examination, but the teacher, under instructions for removal, was found making the necessary preparations for taking his departure from the locality, and no pupils were present; the latter had collapsed before the Inspector was able to examine it. The condition of the schools inspected as regards efficiency may be understood from the following table:—

,	Below Standard.	Up to Standard.	Above Standard.	Total.
Public Schools open a full year  " not open a full year  Provisional Schools open a full year  " not open a full year  " not open a full year	0 1 1	16 1 0 0	156 3 8 1	180 4 9 2
Half-time Schools open a full year  ,, not open a full year  House-to-house Schools open a full year  ,, not open a full year	0 0	1 0 0 0	4 1 1 1	7 1 1 1
Totals, open a full year	11 1	17 1	169 6	197 8
Totals	12	18	175	205

The following table shows the subjects of instruction, the number of pupils examined in each, and the percentage of passes :-

Subject.	Number of Pupils examined.	Number of Passes per 100.
Reading	15,561	' 78
Writing	15,498	79
Dictation	11,965	72
Arithmetic	14,616	65
Grammar	5,783	69
Geography	5,773	69
History (English)	5,540	66
,, (Australian)	1,414	73
Scripture and Moral Lessons	15,442	66
Object Lessons	15,234	68
Drawing	15,240	63
Vocal Music	14,822	63
French	195	70
Euclid	851	63
Algebra	247	65
Mensuration	479	61
Latin	209	64
Needlework	5,348	72
Drill	15,371	65
Natural Science	405	76

These results show, for the most part, a decided advance upon those of the two preceding years, and may be regarded as indicating satisfactory progress on the part of the pupils and a corresponding degree of efficiency on the part of the schools, the general character of which may be learned from the following statement :-

Proportion of schools	up to or above	standard (tolerable)	for 1890	86 p	er cent
,,	,,	,,	1891	91 ~	,,
**			189 <b>2</b>	94	

In almost all points the majority of schools manifest improvement, some, indeed, having reached a very high degree of excellence, and several a very fair standard of efficiency; while, as the table shows, there are very few which have failed to realise a greater or less measure of progress. Under such circumstances there is no reasonable room to doubt that the teachers and their assistants of all grades have worked harmoniously, energetically, and effectively.

The teachers and assistants are classified as follow:—

Class	1 4	<b>A</b> .			•••					<b>.</b>	• • • •	. <b></b>				5
	1)															
	2 4															
	2]															36
	3 4															70

																4
Uncle	tssi	nec	ι.	• • • •	• • • •	• • •	• • • •	• • • •	•••	••••	••••	• • •	• • •	• • •	•	36
					7	l'ot	al						•••			272

Pupil-teachers.

Pupil-teachers.	
Class 1	22
,, 2	29
,, 3	53 58
On probation	9
Total '	171

Teachers, assistants, and pupil-teachers evince, for the most part, satisfactory interest in and attention to their work, and maintain, respectively, becoming social positions. They are generally alive to the requirements of their situations, and always willing and ready to render their services as useful and effective as possible. With these conditions given, there seems no reason to doubt that the schools of the district are likely to achieve a reasonable degree of success during the year now commencing.

All prescribed forms and summaries have been already forwarded.

WM. DWYER.

District Inspector.

Sydney, 9th January, 1893.

ANNEX D.

INSPECTOR HOOKINS' REPORT. THE year 1891 closed with the following schools in operation in this section of the district :-

Provisional School Half-time Schools	ls	6
House Schools	•••••••	2
	Total	74
Industrial School	(Girls)	1

New schools have been erected under inspectoral supervision at Olive Mount and Blaxland Ridge, and under that of the architect at Kingswood and St. Mary's (Infants).

One House School has been converted into a Provisional one, and two Half-time Schools com-

mence the year 1893 as House Schools.

Additions and repairs, of a more or less important character, have been made under the Inspector's supervision to the following schools:—

Baulkham Hills	Kenthurst	North Rocks	Riverstone
Castlereagh	Kingswood	Parramatta, Superior	St. Mary's
Colyton	Llandielo	Penrith	Wallgrove
Dundas	Mangrove	Pennant Hills	Woodstock
Dural, Middle	Maroota	Portland, Lower	Toongabbie
Freeman's Reach	Nelson	Regentville	Sandhurst
Gentleman's Halt		9	

Accommodation.

At the end of 1891, floor-space was provided for 5,167 children, and air space for 4 169. During the past year, by the erection of new buildings, floor-space exists for 5,351 pupils, and air-space for 4,396.

No schools have been permanently closed.

Inspection.

All schools in this section received one full or regular inspection, and thirteen of these received an ordinary inspection. The work done is shown in a concise form below:—

	Pul	olic.	Pro- visional.	]			Total Number
Inspections.	Schools.	Depart- ments.		Half-time.	House.	Evening.	of Depart- ments.
<ul> <li>(a) Departments opened the whole year when inspected or part of year.</li> <li>(b) Received regular inspection</li></ul>	57 57  57 9	62 62  62 10	4 4 2 1	6 6  6 	2 2  2 1 1		74 74  74 13 4

Proficiency of Schools or Departments inspected :-

	ion a full y	ear at time	of inspect	ion	2		68	70
Not	do	do	do				4	4
	Gran	nd total	••••••		2		72	74

In addition to the above, the Girl's Industrial School at North Parramatta was fully inspected, with results of a favourable character.

Results of inspection as regards Standard :-

• •	Departments	Departments	Percentages.		
Schools.	Departments inspected.	Departments up to and above Standard.	1891.	1892.	
Public	62 4 6	62 4 5	98·4 100·0 100·0	100·0 100·0 83·3	
Half-time	2	2	100.0	100.0	
Totals	74	73	99.6	95.7	

The Half-time Schools do not show so well this year as the previous year, owing to the frequent freshes in the streams on the banks of which they are located, and the consequent impossibility of

maintaining a full and regular attendance.

The proficiency of the pupils this year, as compared with last, is shown in the following table, and represents an advance of nearly 5 per cent. for 1892:—

Subjects.	Examined.	Passed.	1891.	1892	Increase or decrease.

# $Organisation{--Internal\ and\ External.}$

Tree-planting, so far as it applies to the adorminent of the school grounds, is nearly complete in this section, and what work has been done was chiefly confined to replacing dead plants. Rains fell this year at just the favourable season, and the shrubs planted have struck well. The grounds at St. Mary's, Castlehill, Dural, Laughtondale, Baulkham Hills, Pennant Hills, and Riverstone, for their beauty, demand

Castlehill, Dural, Laughtondale, Baulkham Hills, Pennant Hills, and Riverstone, for their beauty, demand special notice.

Save a few of the small schools, the equipment and ventilation of the rooms are very satisfactory, while in the rural school buildings, Half-time, Provisional, or House, the heat from the iron roofs, so often complained of, may easily be mitigated by interposing between the children's heads and the iron, a ceiling of bark, slender bush saplings, green branches, or rushes, to be frequently renewed. These makeshifts are not needed when the roof is of bark or shingles.

Towards the maintenance of the buildings in good working order, much has been done, and is still being done, but, where the material is of wood, such is the destructive power of the sun and of the white ant, this work of preservation becomes very costly.

The general classification of pupils is satisfactory.

Teaching

### Teaching Staff.

Teachers. —	1st (	Class.	2nd	Class.		3rd Class.

Totals	4	1.	7	10		12	2		35

Sewing is taught at the Superior Schools at North Parramatta and Penrith by paid work-mistresses; at other schools by the teacher's wife, or some female relative.

In accordance with the new rules, teachers alone were examined in June last, and pupil-teachers, candidates for the High Schools, and pupil-teacher applicants, in December.

The conduct generally of the members of the teaching staff has been every way deserving of approval; in very few cases have I had occasion to hold an inquiry, and when I have, the teacher has come out free of blame.

Discipline.

Among the children of the country districts it is an easy task to inculcate and maintain good order, to cultivate obedience, and a prompt attention to instructions. They are generally docile and well-mannered, and a kindly and discreet person has more influence over them for their good than most of their parents. It is not, therefore, to be wondered at that country inspectors all speak very favourably of the quietness and good order that prevails in these schools. I am happy to say that similar good results are found in the town schools controlled by trained and experienced teachers.

Summary

 The enrolment and attendance have increased during the year.
 The proficiency of the pupils is some 5 per cent. higher than last year.
 The accommodation for the pupils is commensurate with the demand.
 No school has been permanently closed during the year, and four new buildings have been erected.

14th January, 1893.

### ANNEX E. INSPECTOR SKILLMAN'S REPORT.

Inspector.

C. HOOKINS,

Inspector Skillman's Report.

At the end of 1891 there were in this section of the Sub-Metropolitan district 71 schools, comprising 54 Public Schools in 69 departments, 1 Provisional, and 1 Heuse School.

During the year a new Public School has been established at Hurstville West, a Girls' department opened at Kogarah, the House School at Darke's Forest converted into Provisional, and the Public Schools at Berkeley and Port Kembla changed into Half-time.

An Evening Public School was opened at Helensburgh, but after a brief existence, it shared the fate of the majority of such schools by lapsing on account of the non-attendance of pupils.

There are now in this district 53 Public Schools in 69 departments, 2 Half-time Schools, 2 Provisional Schools. Total, 73 schools.

An Infants' department will shortly be opened in connection with the school at Bexley, and new schools will probably be established at Auburn Park, Austral, Burrance Bay, and Homewood.

The establishment of a school at Austral was authorised in 1891, but delay has occurred partly owing to a difficulty in connection with the site, and partly in consequence of the altered circumstances of the locality. of the locality.

Hereunder is a list of the new buildings completed during the year :-

School.	Under whose supervision.	Object.	Places provided.
Fairy Meadow Hurstville Girls' Hurstville West	do	do	255

Teachers' residences have been erected at Fairy Meadow and Hoxton Park.

The following table shows the accommodation for pupils provided in this district:-

	Seats reckoned at 8 square feet per child.	Seats reckoned at 100 cubic feet per child.
Seats provided at end of 1891  Lost by giving up old buildings  Gained by new schools  Increase of places  Total places at present	184 543 359	11,221 175 616 441 11,662
_		Į.

The enrolment of pupils at the end of December quarter was 9,557. Taken as a whole, therefore, the accommodation supplied is ample.

More room, however, is required at several schools, where additions should be made as soon as

practicable.

A new building for an Infants department at Bexley, and an addition to Granville Infants' School-room are almost completed, and a new school at Clifton and an additional room at Rookwood are to be erected.

Tenders have been accepted for a new teacher's residence at Canley Vale.

Extensive

Extensive repairs and improvements have been effected during the year by the Architect at the school buildings and teachers' residences at Dapto West. Mount Keira, Robbinsville, and Wollongong, and minor repairs, costing £80 16s. 9d., have been executed at 27 schools under the Inspector's supervision.

As was the case in 1891, needed works in some instances have had to be postponed, in consequence of the legh of finds.

of the lack of funds.

Petitions for the establishment of new schools at the following places have been received during 1892, with the results specified hereunder:

Result of Inquiry. Place. Public-granted.
Provisional—granted conditionally. Auburn Park ..... Burrance Bay ..... Public—granted.
Declined. Homewood ..... Queen's Park .....

### Attendance.

In all 74 schools have been in operation during 1892, 72 being in existence for the whole year,

and 2 for only a portion thereof.

The total enrolment of pupils has been 12,339 (including 2,102 double enrolments), and the average attendance for the year 6,807.3.

The average attendance for the four quarters was:—

Quarter.	Boys.	Girls.	Total.	Enrolment.	Per centages.
March June September December	3,585.5	3,146·4 3,136·8 3,267·8 3,191·2	6,699 6 6,722 3 6,942 2 6,804 2	9,414 9,592 9 635 9,557	71·1 70·0 72·0 71·1

During 1891 the highest attendance for any quarter did not exceed 68.8 per cent. of the enrolso that in this respect there has been a satisfactory improvement in the year just ended. The number of children present at inspection was 7,528. ment,

### School Fees.

The fees collected during the year amounted to £4,060 16s. 6d. as against £3,937 4s. 3d. in 1891, or an increase of £123 12s. 3d.

Inspection.

The schools in the district were all regularly inspected with the exception of Helensburgh Evening School, which was closed before I had an opportunity to visit it.

Thirty-eight schools received an ordinary inspection.

The internal organisation of the schools is in most instances satisfactory. In some cases, however, there is a lack of tidiness in connection with the presses and the daily removal of litter, lunch papers, &c.,

from the playground.

Too many teachers have neglected the Careful balancing of the fees marked in the Class Roll with the entries on the Quarterly Return and the Cashier's receipts. Hence inaccuracies in the fee records

have been detected.

The discipline maintained in the schools is good, and must have a tendency to train the pupils to habits of submission to due order and authority that will prove beneficial to themselves and to their

country in after life.

The following table shows the condition of the schools in relation to the standard for the years

Below Standard.		Up to Standard.		Above Standard.		Total.	
1891.	1892.	1891.	1892.	1891.	1892.	1891.	1892.
12	8	17	17	43	48	72	73

Five more schools reached the standard in 1892 than in 1891, only 10.9 per cent. failing to secure the minimum percentage of marks

The number of pupils examined and the percentage of those who satisfied the standard are given

hereunder:

Recitation of poetry and arithmetic are not well taught in many schools.

Recitation of poetry and arithmetic are not well taught in many schools.

The recitation in some instances consists merely of the repetition of a certain number of lines, without expression or an intelligent grasp of the meaning of the passage.

I attribute the weakness in arithmetic to the fact that in the infants' schools and lower classes addition tables are too often neglected. The pupils are allowed or even taught to use strokes or their fingers as mechanical aids in working addition. Then in the higher classes the attention given to mental arithmetic and extended tables of multiplication, money, weights and measures, and aliquot parts is altogether insufficient. The result is that pupils frequently cover their slates with figures in a fruitless attempt to obtain the correct answer to an arithmetical problem that can be solved mentally with ease.

Teachers.

The teachers and pupil-teachers employed in this district are with scarcely any exception diligent in their work, loyal to the Department, and irreproachable in their conduct.

Summary.

The district is well supplied with schools, which taken as a whole, afford sufficient accommodation

for the school population.

The progress anticipated in my last report has been achieved.

The attendance of pupils has been more regular.

Five more schools have reached the standard than in 1891. Three more schools have attained the rank of superior. I see no reason why the work during 1893 should not produce an equally satisfactory H. SKILLMAN,

Kogarah, 31st December, 1892.

Inspector.

### ANNEX F.

# DISTRICT-INSPECTOR BRADLEY'S REPORT.

I .- Schools and School Establishments.

A NET increase of five schools has taken place in this district during the past year, and for the whole year, or some portion of it, there were in operation :-

Public Schools	196
Provisional Schools	54
Half-time Schools	35
House-to-house Schools	17
Total	302

The schools newly opened are classified as follows:—

Public.—North Cuerindi, Rock Vale, Rywang and Walhallow.

Provisional.—Bullawa Creek, Fieldside, Forest Farm, Heslington, Hoskisson's Creek, Rivertree, Severn and Willala.

Half-time.—Bective North, Bective South, Duncan's Creek, Highfield and Moredun.

House-to-house.—Abington and Kingsmill's Peak.

About a dozen small schools whose existence had been precarious for, in most cases, a considerable period, have been closed, and owing to decadence of population there is little prospect that they will again be required. With the new year the Provisional School at Oban, for some time closed, will be again brought into operation, as also new Provisional Schools at Big Ben, Coningdale, Eversleigh, Maitland Point and Tarban. An Infants' School at Rose Hill will be established early in the year, and six applications for small schools have yet to be dealt with. There has thus been a fair increase as regards the distribution of schools, while the prospect of further extension is equally assuring.

II.—School Buildings, Accommodation, &c.

During the past year 18 new school buildings have been erected and furnished under the supervision of the inspectoral staff of the district at a total cost of £1,259 14s. 6d. These afford sitting accommodation (at 8 square feet per child) for 592 pupils. The average cost has thus been £70, and the average capacity sufficient for about 33 scholars. Three other small school-houses, to cost £181 7s., are in progress, and will be ready for occupation in a short time. In addition to these works, the Inspectors have arranged for the repair of 42 school-rooms and 9 residences, and for the erection of 1 new weathershed and a small residence. These have cost in all £637 14s. 3d. The gross outlay on material improvements effected by the staff has been £2,078 15s. 9d., and the time and labour involved in correspondence, preparation of specifications, &c., and in visits of inspection, form no small item in this year's work.

work.

While much has been done in the way of minor improvements and repairs, the insufficiency of funds at the disposal of the Department has compelled the postponement of all but the most urgent cases; so that although, generally speaking, school buildings and residences are very fairly good in essential points, there are many cases in which painting and renovation might have been effected with advantage, both as regards appearance and as a means of preservation.

Among the works executed under the Architect to the Department, the new school buildings and residence at Glen Innes stand first in point of importance. These supersede buildings, the main portions of which were erected some 20 years ago, and which in point of appearance, character, and accommodation, had fallen much behind the times. Extensive additions have also been made at Hillgrove West, and some alterations and improvements have been effected at Armidale. In the case of the latter schools provision must shortly be made for a new wing or separate department, as the attendance has largely increased and is still increasing, and present arrangements for carrying on the Boys' and Girls' Schools as separate departments are but of temporary and makeshift character.

As regards the internal equipment of the schools, the condition generally is satisfactory. In all of the more important localities the furniture is ample, of good quality, and suitable in design; while in the smaller outlying schools, gradual improvement has taken place and serious imperfections are few. The stock of books and apparatus, granted as a yearly supply mainly in proportion to the attendance of pupils, is found to be adequate with the exercise of care and economy. Except in the case of the town schools, however, an uninviting bareness is the characteristic of the school walls. Pictures of plants and animals, diagrams illustrative of the various arts and manufactures, and in a measure maps also, are conspicuous by their absence; and the teacher must be an adept in the use of cha

overcome the handicap imposed under the deprivation of such valuable aids to instruction and education. When it is remembered too, that the world of the Australian bush child—and oftener than not, of his parents also—is comprised within a few miles radius of his home, the need for a more liberal grant in the direction indicated must be manifest. The increase of cost to the State would be but trifling in comparison with the benefits accruing.

Viewed as a whole, the sitting accommodation provided in the schools of the district is ample. Of course, it happens that in some instances the capacity of the building is fully taxed, while in others very poorly filled benches are found; but these cases form the exception to the general rule. The following table exhibits the increase in accommodation that has taken place during the past year:—

Allowing each Pupil—
Square ft. 100 cubic ft.

	MILLOWING	cach i upii
	8 square ft.	100 cubic ft.
Number of seats at the end of 1891	17,150	15,641
Scats lost by closing of schools, &c	1,039	903
Seats gained by provision of new buildings, &c	1,530	1,280
Increase for 1892	491	377
Total accommodation at the end of 1892	17,641	16,018

III.—Inspection. Condition of Schools, &c.

The inspectoral staff and distribution of schools remain the same as in 1891. As has been previously stated, 5 more schools have been in operation, bringing the total for the year up to 302. Each of these schools has received a regular inspection, and the total number of pupils present under examination reached 10,439. This total exceeds that of the previous year by 540.

In addition to the regular inspections, 121 secondary inspections have been made, at which 6,100 pupils (60 per cent of the ordinary attendance for the entire district) were present; and numerous

uppils (60 per cent. of the ordinary attendance for the entire district) were present; and numerous incidental visits were paid as opportunity offered.

This record is better than that of any previous year, notwithstanding that the frequent occurrence of heavy rains and flooded creeks hindered travelling, and rendered inspection work generally more than usually arduous.

as the result of inspection, and having regard to their general efficiency, it is found that, of the 303 schools examined, 239 obtained marks above the requirements of the standard, 20 just met the standard, and 43 fell below it. In other words, 86 per cent. of the schools either reached or exceeded the mark of satisfactory efficiency, and 14 per cent. failed to do so. In 1891 the percentage of non-efficient schools was 17, and, in the previous year, 21. Thus for the three years quoted there has been steady improvement at the rate of 4 per cent.

The award for the "general efficiency" of a school involves the consideration of the teacher's worth as an organizer and disciplinarian, as well as of his success in the matter of instruction. Viewing the attainments of the pupils alone, the proficiency as elicited by examination shows a fair degree of progress. In no subject of importance has there been any marked degree of retrogression, while, in several, some solid progress can be recorded.

solid progress can be recorded.

The detailed particulars in connection with the proficiency of the pupils may be gathered from the following table:

	Estimated Proficiency.

Except in some few small schools under imperfectly trained teachers, little cause for dissatisfaction with the organisation can be found. The disciplinary condition is no less satisfactory than in former years, and is really one of the most creditable and pleasing features of the school management.

As a body the teachers are respectable and respected, and discharge their duties with zeal, intelligence, and efficiency. The appointment of ex-pupil-teachers to the charge of the smaller schools, to the practical exclusion of untrained outsiders, has been productive of beneficial results, and it will be advantageous to the interests of the schools generally should such source of supply prove permanent.

J. D. BRADLEY,

District Inspector

District Inspector.

# ANNEX G. INSPECTOR BLUMER'S REPORT.

I.—Adequacy of the means of Education as Regards Amount and Distribution.

1.—Adequacy of the means of Education as Regards Amount and Distribution.

During the whole or some portion of the past year, 75 schools were in operation in the Tamworth section of the Armidale District; of this number 2 Public (North Cuerindi and Rywany); 3 Provisional (Emu Creek, Heslington, and Hoskisson's Creek); 1 Half-time (Duncan's Creek); and 1 House-to-house (Abington) are new schools. Four schools (Cooringoora and Molroy, Provisional, and Sobraon and Riley's Flat, Half-time) were closed during the year on account of diminished attendances. At present, therefore, my list includes 48 Public, 16 Provisional, 2 Half-time, and 5 House-to-House,—Total 71 schools.

The following applications for establishment of new schools were dealt with as stated hereunder:—

Place.	Kind of School applied for.	Result of Application.		
Mungundi				
Tamworth (Bourke Ward)				
Crinoline (Morce)		"		
Doctor's Creek (Bingara)	,,	,		
Duncan's Creek (Tamworth)	,,	Half-time granted.		
Haning (Bendemeer)	,,	Granted conditionally.		
Lyston (Moree)	,,	Refused.		
Tareela (Barraba)				
Toryburn (Yarrowyck)	,,	House-to-house offered conditionally		
Woolshed (Bundarra)	To re-open Provisional	Refused.		
Borah, &c. (Manilla)	Half-time	House-to-house offered.		
Rockmore (Barraba)	House-to-house	Granted.		
Sand Holes (Moree)	,,	Refused.		
	) i			

The conditional offers in connection with Haning and Toryburn were not accepted, and the Mungundi residents have not yet provided the necessary buildings and furniture.

Schools are well distributed throughout this section of the district, and it is not expected that many applications will be received during the ensuing twelve months.

II .- The Actual Condition of the Schools as elicited by Inspection.

Every school was fully inspected, 25 received ordinary inspections, and numerous incidental visits were made. More second inspections would have been held but for the great amount of time lost on account of heavy rains and flooded rivers and creeks. On one occasion these impediments rendered itnecessary to travel 400 miles to inspect one small school.

In general the schoolrooms are commodious, suitable, and properly furnished. The accommodation of some of the smaller ones is rather limited; but in these few instances the immediate prospects of the schools do not warrant any outlay for enlargement of buildings.

Notwithstanding that the most rigid economy has been exercised for several years, the premises, in nearly every case, are in a satisfactory state of repair. Increased attention is paid to the improvement and adornment of school grounds. The Teachers at Walcha and Nemingha deserve special mention for their efforts in this direction. Not only have shade trees been planted in the play-ground, but beautiful flower plots are tended by the pupils, hedges have been set, and fruit trees are thriving in the Teachers' gardens.

Due care is taken of the school stock, the records are correctly, and, with few exceptions, neatly kept, and improvement is noticeable in the construction of the prescribed lesson guides.

The disciplinary condition of the schools is quite as satisfactory as formerly. As a body, the pupils are regular, punctual, tidy, respectful, and promptly obedient. Military drill is taught and practised in all schools where the teachers possess a knowledge of the subject. The Tamworth Cadet Corps is in a healthy state, and the formation of a fife and drum band in connection with it has proved a decided success.

Comparison of the general efficiency of the schools for this and the preceding year shows that the results are about equal; 86 per cent. were up to or above standard. The schools that most distinguished themselves are Tamworth Superior, Manilla, Bingara, and Walcha.

In the various subjects of instruction the proficiency results stated hereunder are quite as high as those of last year.

Proficiency of Pupils in the various subjects compared with that of last year, 1891

Subjects.	Percentage of Puj Stan	Increase (+) or Decrease (-)	
	1891.	1892.	during 1891.

Needlework	97	95	_ 2
Drill	67	86	+ 19

The Secretary of the Railway Ambulance Corps gave a course of lessons to the fifth-class boys in Tamworth Superior Public School. These lessons were supplemented by practices under the supervision of the head-master. The lads entered heartily into the spirit of the affair, and concluded the course by a public display. Their ability to render invaluable "first aid" in cases of wounds, fractures, apparent drowning, &c., was unmistakably proven. The value of such practical instruction cannot be overestimated estimated.

III .- Adequacy of School Accommodation

	Allowing each Pupil.		
	8 square fect.	100 cubic feet.	
Accommodation existing at end of 1891	4,418 227	<b>4,126</b> 169	
Number of new seats provided during 1892	263 36	181 12	
Accommodation existing at end of 1892	<b>4,</b> 454	4,138	

Greatest number of pupils on roll during any quarter of 1892, 3,571. It is evident from the above statistics that the accommodation provided is more than sufficient for

the pupils enrolled.

Extensive and necessary additions to the school buildings are in progress, under the supervision of the architect, at Bingara and Moree. Small schoolrooms were erected at Boolooroo, Duri, and Upper Horton, and the buildings at Rywang enlarged by the Inspector. A new schoolroom is in course of crection at Mount Drummond, near Bundarra, and will be ready for occupation early next year.

### IV .- Teachers.

Difficulty is experienced in obtaining the services of pupil-teachers at Bendemeer, Bingara, and the staff at Bendemeer is incomplete, but at the other places mentioned the difficulty has been

Moree. The start at Bennemeer is incomplete, out at the collect particle.

Met by the employment of ex-pupil teachers as assistants.

With one or two exceptions, the teachers are earnest, efficient, and thoroughly reliable. The fact that no complaints were made against any of them during the year speaks well for their character with

that no complaints were made against any of them during the year speaks well for their character with the general public.

The principal teachers at Tamworth Superior, West Tamworth Public, and Nemingha Public eagerly availed themselves of an invitation to attend a series of lessons in Ambulance work given for the benefit of railway employees. At an examination subsequently held by the Railway Medical Officer, they received special commendation for their marked ability to render prompt and effective aid in almost any case of accident. As such practical knowledge is of incalculable value to all, and especially to persons remote from medical assistance, it is hoped that other teachers will embrace any similar opportunity that may present itself of extending their usefulness.

### V.-Summary.

The increased educational requirements of this section of the district have been fully met by the establishment of new schools.

The general efficiency of the schools is highly satisfactory and promising.

The aggregate accommodation is in excess of that required, and where, in special cases, increased accommodation was found necessary, it was at once provided for.

The teachers continue to discharge their duties loyally and efficiently, and to win well-merited

public estcem.

Tamworth, 26th December, 1892.

L. BLUMER,

Inspector.

## ANNEX H.

# INSPECTOR BEAVIS' REPORT.

The work of the year was commenced with 83 schools in operation; these have since been added to by the opening of 5 new schools, viz., 3 Provisional (Severn, Fieldside, and Rivertree) and 2 Half-time (Highfield and Moredun). The schools at Clearbank and Kulki, which were discontinued in 1891 on account of small attendance, have been re-established; the former was for a short period worked as a Half-time School with Wellingrove, but the arrangement proved to be unsatisfactory, and the schools are now conducted separately as Provisional.

Altogether 90 schools have been in operation for the whole or a portion of the year, viz.:-

65 Public.

21 Provisional.

2 Half-time 2 House-to-house.

The Provisional School at Argenton failed in September from paucity of attendance, and it is likely that the Torrington School will have to be discontinued for a similar reason; thus 88 of the schools

above enumerated will still remain effective.

The school at Oban, closed since 1890, and a new Provisional School at Big Ben, near Emmaville, will commence work after the vacation. The list will be further increased at an early date by the establishment of an Infant School at Ross Hill (Inverell) and a Provisional School at Tarban, near Tenter-

Applications are under consideration for the establishment of schools at Vivier (King's Plains), Long Plain (near Inverell), Brushey Creek (near Guyra), Clairville and Yarrow Creek (near Glen Innes), and Oakey Creek (near Ashford). These numerous requests from localities so widely separated indicate the progress of settlement throughout the district. The list of schools for 1893 will probably

reach 100.

The material condition of the schools generally has been improved during the year. A handsome, well-furnished structure at Glen Innes has superseded the irregular and defective accommodation of the past. More commodious schoolrooms have been provided at Bear Hill and Nine Mile, and much-needed improvements (chiefly painting and repairs) have been effected in connection with a large number of school buildings throughout the section.

Further advance is to be recorded in the work of inspection. Every school has been regularly inspected, and 36 schools (40 per cent.) have received ordinary inspection. Only 15 of the schools are rated as below standard, and of this number only 9 failed to show satisfactory results, the remainder being schools incompletely organised. The 66 schools which exceeded standard requirements, and 9 which satisfied the standard, represent 83 per cent. of the full list—an increase of 3 per cent. on last year's results. It was not practicable to make ordinary inspections of all the schools, but it is to be noted that in nearly every instance where a visit of this kind preceded the regular inspection, the school had in the interval made material improvement.

3,197 interval made material improvement.

3,197 pupils were examined as compared with 3,012 in 1892; the results, summarised hereunder, bear favourable comparison with those of the previous year:—

Subjects	Percentage up to or	Increase or Decreas	
Subjects.	1891.	1892.	per cent.
Reading	84	86	+ 2
Writing	86	90	+ 4
Dictation	72	74	+ 2
Arithmetic	77	78	+ 1
Grammar		77	+ 3
Geography		75	- 8
History (English)	80	75	- 5.
History (Australian)	92	79	13
Scripture	87	85	- 2
Object Lessons	82	85	+ 3
Drawing	72	77	+ 5
Music	82	81	
French	4444444444	100	+ 100
Euclid		97	+ 25
Algebra	83	88	+ 5
Mensuration	71	82	1 + 11
Latin	96	79	- 17
Prigonometry	********		
Needlework	86	87	+ 1
Drill	75	78	+ 3
Natural Science	100	100	

It will be observed that the figures show some advance in most of the subjects taught, including the "three Rs." French appears in the list for the first time as a consequence of the recent formation of the "three Rs." French appears in the list for the first time as a consequence of the recent formation of a fifth class at the Glen Innes Girls' School. Fifth classes (embracing 40 pupils), were examined at Emmaville, Glen Innes, and Tenterfield; but at other schools also the work has been such as to qualify individual pupils for the University Public Examinations. Pupils from the Public Schools at Emmaville, Deepwater, Glen Innes, Inverell, and Tingha, secured passes at these examinations.

Drill is becoming more widely taught as an aid to school discipline. The Cadet Corps (4) are efficiently managed.

Many school-grounds under the stimulating influence of the "Arbor Day" celebration are gradually assuming an attractive appearance. The flower-borders at Elsmore, Tenterfield, Glen Innes, and Inverell, show special evidence of careful supervision on the part of the teachers; the teacher of the first-named school has been the recipient of a bonus in recognition of his efforts. Kitchen gardens in connection with the residences are of more frequent occurrence, and in some instances are excellently kent

The teachers as a body maintain a reputation for personal character which is a credit to the service, and which tends largely to promote the popularity of the schools; during the year no serious cause of complaint has been preferred against any teacher under my superintendence.

The attendance in the schools shows a small increase; and, as will be seen from the subjoined

table, the accommodation grows with the requirements.

•	Number of places allowing each child		ving Attendance.	
	8 square feet of floor space.	100 cub. ft. of air space.	Highest enrol- ment quarter.	Highest average quarter.
Accommodation at the end of 1891	5,115 636	4,758 620	June.	September.
Places gained Net increase Accommodation at the end of 1892	736	677 57 4,815	4,016	2,925

Under my supervision 5 small school-buildings and 1 weathershed have been erected at a cost of £289 5s.; and 11 other buildings have been repaired or improved at a further cost of £95 18s. 7d.

School-buildings at Highfield and Moredun have been provided by the residents, free of cost to the Department.

Summary.

The number of schools has been increased by the establishment of 5 schools in new localities and the re-opening of 2 schools which had been closed; only one school has been permanently discontinued. 90 schools at least will commence work in January, and two others some time later. Several applications for new schools from localities widely separated, indicate at once the steady growth of settlement and the for new schools from localities widely separated, indicate at once the steady growth of settlement and the desire of the people to avail themselves of the means of education; these applications will receive early attention. The accommodation in the schools keeps pace with the requirements.

The work of inspection has been more complete, and gives evidence of increased efficiency of the schools, a wider scope of instruction in special instances, and the industry and high personal character of the teachers.

W. BEAVIS,

The protector

Glen Innes, 31st Dec., 1892.

### Inspector.

### ANNEX I.

# INSPECTOR PARKINSON'S REPORT.

AT the close of 1891 the Schools under my supervision were 43 Public, 13 Provisional, 10 Half-time, 9 House-to-house—Total, 75. All these schools have been in operation this year, and 6 new schools have been established, so that the number of schools at work during 1892 has been 81. The new schools were the following:—Walhallow Public, Bullawa Creek and Willala Provisional, North and South Bective Half-time, and Kingsmill Peak House-to-house. House-to-house Schools have also been granted at Kereargo and North Lynn, and an application for the re-opening of a similar school at Barry, near Newcastle, has not yet been dealt with. Several changes have taken place in other schools. Yarraman Half-time School has been closed; St. Helena Provisional School has been converted into a Half-time School, to work with Blackville; and the Provisional Schools at Bando, Come-by-Chance, Spring Ridge, and Warrah have become Public Schools. Thus, of 80 schools on my list at the close of the year, 48 are Public,

Public, 10 are Provisional, 12 are Half-time, and 10 are House-to-House. The Half-time Schools at Gunnenbene and Keepit are to be discontinued, but as two new schools have been granted no decrease in the number of schools open in 1893 is likely to occur.

This district is well supplied with schools, and I do not think there are any children without the

means of public education, excepting those of a few really isolated families, who cannot possibly be reached by any provision of the present Act,

reached by any provision of the present Act,

At the close of 1891 accommodation was provided for 4,519 children, allowing 8 square feet of floor space for each, or for 3,944 children, allowing 100 cubic feet of space for each. By the closing of Yarraman School, and the giving up of old buildings at Curlewis, Currabubula, Spring Ridge, and Mullaly, 148 or 94 places respectively were lost; but an increase of 375 or 298 places respectively was obtained by the building of new schools at Curlewis, Walhallow, Spring Ridge, Bullawa Creek, Mullaly, and Willala, new class rooms at Currabubula and Narrabri West, adding to the school at Galathara Road, and leasing rooms at Bective and Kingsmill Peak. At the present time the school-rooms in this district provide accommodation for 4,746 or 4,148 children, according to the mode of calculation adopted; and as the gross enrolment of pupils for the year only reached 4,312, it will be seen that ample room exists for all. In two or three towns the structures are old and inconvenient, and they must shortly be replaced by new ones constructed on modern principles; but taking the district as a whole the buildings

exists for all. In two or three towns the structures are old and inconvenient, and they must shortly be replaced by new ones constructed on modern principles; but taking the district as a whole the buildings are suitable, and provide sufficient accommodation for the school population in the various centres. Much has been done, too, during the year to improve them; whilst one school has been enlarged, and seventeen schools and five residences repaired under my direction, improvements of a more important character have been carried out by the architect at thirteen schools. Some of the residences provided for the teachers are rather small, and in many places kitchens and other conveniences have been erected.

Eighty-one schools were in operation during 1892. Each of these received a regular inspection, and 50 of them an ordinary inspection. The district of which I have charge is so extensive that even with constant travelling it is impossible to visit each school twice within the year. Fourteen of the schools not inspected a second time are situated from 130 to 280 miles from my head-quarters, 4 are located across the Namoi River, and cannot be reached excepting in dry months, and 7 were schools not in operation the whole year. At the ordinary inspections the pupils were tested in reading, writing, arithmetic, and dictation. The adoption of this course leads the teachers to maintain a higher state of efficiency in their schools by giving most attention to the principal subjects. Of the 81 schools examined, 9 were found below standard, 3 up to standard, and 69 above. Thus 89 per cent. of the schools were either up to or above requirements. This is an improvement of 4 per cent. on the results of last year. last year

A fuller comparison between the results for the two years is shown hereunder :-

	Schools.	
	1891.	1892.
Below standard (less than 50 per cent. of marks)  Between standard and fair (from 50 to 60 per cent.  Between fair and very fair (from 60 to 70 per cent.)  Above very fair (more than 70 per cent.)	42	9 38 29 5
Totals	76	81

Nundle Public School has continued to hold the premier position for efficiency, and the other 4 schools which obtained the highest marks are (in order of merit), Gunnedah, Currabubula, Quirindi, and Boggabri. The Public Schools at Bando, Wee Waa, Rotherfield, Narrabri West, and Bowling Alley Point approach those already named in efficiency.

The following table gives the number of pupils examined in each subject in 1892, and the percentages of passes for the years 1891 and 1892:—

Subjects.	Number of children examined in 1892.	Percentage of passes in 1892.	Percentage of passes in 1891.	Increase or decrease.
Reading	2,692	87	85	+ 2
Writing		94	89	+ 5
Arithmetic		76	77	- 1
Dictation		66	69	<b>—</b> 3
Grammar		74	77	<b>—</b> 3
Geography		77	86	<del> 9</del>
English History		73	78	<b>—</b> 5
Australian History	125	89	100	11
Scripture	2,475	86	83	+ 3
Object Lessons		91	87	+ 4
Drawing		88	80	+ 8
Music		76	66	+10
Mensuration		74	6 <b>2</b>	+12
Euclid		96	76	+20
Algebra		82	89	<b>—</b> 7
Latin		82	81	+1
French		70	75	<del></del> 5
Needlework		94	94	==
Drill		91	92	1
Natural Science		100	100	=

From this table it will be seen that of 20 subjects examined, 9 show an improvement on last year's results, 9 are inferior, and 2 are equal. One hundred and fifty-three more pupils were examined in 1892 than in 1891.

In 1892 than in 1891.

During the past year the teachers have maintained the reputation they have already earned for sobriety, industry, and respectability. Only one teacher has incurred the Minister's displeasure; and although complaints have been made against several others, investigation has shown that very often the quarrelling has been due to local jealousies, and not to either incompetency or neglect on the part of the teachers. At the annual examination held in June, 21 teachers presented themselves, and 12 were successful. The number of small schools in the district necessitates the employment of a like number of unclassified male teachers; and as suitable persons cannot always be readily found, now and then a school has to be closed for a few weeks. No other difficulty is met with in keeping the school staffs properly equipped, as more than sufficient candidates for the office of pupil-teacher are constantly presenting themselves. The pupil-teachers employed in this district are well supported by their respective teachers, and their work is of a satisfactory character. All of those examined in December, 1891, gained promotion. Some of the most efficient of the small schools are under the charge of ex-pupil-teachers; though a few of those teachers who have had no previous training show marked ability, and a promise of eventually rising to positions of responsibility. rising to positions of responsibility.

### In conclusion:-

- Ample accommodation is provided for the school population of the district.
   Seven new buildings have been erected, 1 has been enlarged, and 27 have been repaired and improved.
- All schools received a regular inspection, and more than 60 per cent. an ordinary inspection.

4. Eighty-nine per cent. of the schools were up to or above standard.5. Six new schools were established during the year.

The teachers have worked with diligence and success, and have conducted themselves in an exemplary manner.

Quirindi, 2nd January, 1892.

H. PARKINSON, Inspector.

### ANNEX J.

### DISTRICT-INSPECTOR McCREDIE'S REPORT.

AT the close of 1891 there were 250 schools and departments in the Bathurst District, but early in January, AT the close of 1891 there were 250 schools and departments in the Bathurst District, but early in January, 1892, it was decided to close 1 school (Swallow Creek Provisional), and not to include it in the list of schools for the year, which, therefore, opened with 249 schools and departments in active operation. Of this number, 7 were afterwards closed through insufficient attendance, viz., the schools at Molong Creek, Thompson's Creek, Mickie's Plains, Tomanbil, Paling Yards, Felled Timber, and Bungerellingong. To counterbalance this loss, new schools were opened at the following places:—Megalong, Glenbrook, Porcupine Gap, Winburndale, Mingelow, Swallow's Nest, Isabella, Brogan Gate, Harrow, Goonigal, Taylor's Pit, and Gorman's Hill West. The number of existing schools and departments at the end of 1892 was 254, of which 82 are in the Forbes section, 103 in the Eskbank section, and the remaining 69 in the Central section of the district.

in the Central section of the district.

The following changes in the classification of schools occurred during the year:—One of the new schools, Megalong Public, was first opened as a teaching-centre of a House-to-house School, and two others, Glenbrook and New Vale Provisional, were subsequently converted into Public. The Half-time schools at Mount Lawson, Porter's Retreat, and Kangaroobic Creek—became, the first mentioned, Public, and the other two, Provisional; and the House-to-house schools at Nanima and Aliwell were raised to the rank of Half-time. Chatham Valley Provisional, which was closed for the first eight months of the year, is now worked as a House-to-house School, with Gingkin, another teaching-station in its neighbourhood. Ganbenang Public has taken the place of Megalong as one of the centres of the House-to-house School at Cox's River and Cullenbenbong; while the Public Schools at Brisbane Valley and Mayfield have been reduced to Half-time. Katoomba Public was raised to the rank of Superior Public during the year.

Twenty-one applications for the establishment of new schools were received, the majority being from new settlements in the Forbes or Western section of the district. Subjoined is a list of the applications, and the Minister's decision in regard to them:—

Locality.	School sought.	Decision.
aisy Bank	Provisional	Half-time offered.
ledlow	Public	Declined.
rraga		
enbrook		Granted.
awatha		House-to-house offered.
ogan Gate	Half-time	Granted.

oring Terraceoring Roads		Decimed.
		TT-was to house offered
aree Brothers		House-to-house offered.
ckson's Swamp		Declined.
oodview	House-to-house	Under consideration.

In April last the school-building at Mount Ranken was accidentally destroyed by fire, and was replaced towards the close of the year by a new and comfortable wooden structure. New school-rooms have also been erected, under the supervision of the Inspectoral staff, at Reinville, Porcupine Gap, Mingelo, Ungarie, and Winburndale. The works supervised by the Inspectors, and the total cost of such works, are as under :-

·	C	ost.	
	£	s.	d.
1. Erection of 6 new school-rooms	452	6	6
2. Enlargement of 1 building	22	0	0
3. Repairs to 68 schools		1	2
4. Repairs to 12 residences	158	8	6
5. Erection of 1 weather-shed	33	10	0
•			
Total cost	£1,068	6	<b>2</b>

Repairs and additions to a large number of schools were also carried out by the Architect, under the supervision of Mr. Gostelow, the local Clerk of Works. Speaking generally, the buildings are in very fair repair, the only serious defect being that pointed out in my report for 1891, viz., that nearly all the wooden school-rooms are badly in need of painting. It is to be hoped, however, that funds will be available during the coming year to remove all or part of this defect. The internal organisation and discipline of the schools are of as high a standard as in past years; but a few might still be mentioned in which these important branches of school management do not receive the attention they deserve. The teachers, as a body, continue to evince much interest in the improvement of the school-grounds by tree-planting, &c., and in this good work they are in many localities strongly supported by the co-operation of parents and pupils, a fact borne out by the great interest shown in the celebration of Arbor Day at Milltown, Blayney, Kelso, and other places in the district.

STATISTICAL

4. Average attendance for the year	9,403.8
5. Percentage of average attendance in relation to the actual	
enrolment	$65 \cdot 4$
6. Percentage for 1891	61
7. Total fees received	£5,377 0 $7\frac{1}{2}$
8. Total fees in arrear at the end of 1892	£120 3 10}

### C .- RESULTS OF PROSECUTIONS.

### I .- For Breach of the Compulsory Clause of the Public Instruction Act of 1880.

Number of Cases.	Convictions.	Dismissals,	Withdrawals.
288	239	12	37

### II .- For Recovery of School Fees in arrear.

During the year only seven persons were sued for the recovery of school fees in arrear, and in each case a verdict for the full amount claimed was obtained.

The number of cautions issued by the School Attendance Officer to parents and guardians for their non-compliance with the compulsory clause of the Public Instruction Act of 1880 was 2,089.

The Attendance Officer, Mr. P. J. Cusack, discharged the duties of his office very satisfactorily. A comparison of the statistical tables, A and B, with those for 1891, shows an increase during the past year in the school accommodation, the enrolment of pupils, the average attendance and percentages of attendance in relation to the enrolment for each school quarter, and in the total fees received.

Through a general depression in business and scarcity of work, especially in mining centres, the amount of school fees in arrear, and the number of free pupils, were higher than in 1891, the increase in both being greater in the eastern section of the district than in the western and central sections.

During the whole or a portion of the year there were 261 schools and departments in operation, and all except one received a regular inspection.

Five were fully inspected a second time, and 73 received an ordinary inspection. Paling Yards Half-time, the school not inspected, was closed through small attendance early in January, in favour of another centre a few miles distant, where it was ascertained that a larger attendance could be secured.

The total number of inspections, regular and ordinary, was 338.

The total number of inspections, regular and ordinary, was 338.

As in past years, Mr. Inspector Lawford, of Nowra, assisted at the inspection of the Bathurst Public High School for girls.

Ninety-five per cent. of the schools inspected were up to or above the standard in efficiency. In 1891 the percentage was 92.

The highest number of children examined in any subject at the regular inspections was 9,673, or 73 per cent. of the mean quarterly enrolment. The following table shows the number examined nearly 73 per cent. of the mean quarterly enrolment. in each subject, and the percentage of passes :-

Subjects.	Number of pupils examined.	Percentage up to or above the standard.	Percentage for 1891.	Increase or decrease per cent.
Reading Writing Dictation Arithmetic Grammar Geography History Scripture Object Lessons Drawing Music French Euclid Algebra Mensuration Latin Needlework Drill Natural Science	9,495 7,383 9,071 3,510 3,510 3,422 8,993 9,134 9,339 8,236 66 355 106 435 75 3,567 8,888	84 84 76 75 75 77 70 78 77 74 82 89 82 89 82 84 72 93 87 79 88	84 83 73 74 70 78 69 75 75 72 80 69 • 77 76 72 84 82 71	$ \begin{array}{c}                                     $

In only one subject, geography, the percentage of passes is slightly below that for 1891; in two others it is the same; and in the remaining sixteen, it is above.

For respectability, efficiency, and worth, the teachers, assistants, and pupil-teachers are, with very

exceptions, deserving of as favourable mention as in past years.

The present educational wants of the district are well met by existing schools, and the prospects for the year now entered upon are hopeful and encouraging.

J. McCREDIE.

District Inspector.

### ANNEX K.

### INSPECTOR KEVIN'S REPORT.

At the close of 1891 I had on my roll 101 schools, classified as follows:

Public Schools	68
Provisional Schools	12
Half-time Schools	22
House-to-house Schools	4
_	
Total	101

## Buildings.

New buildings have been erected during the year at Reinville and Glenbrook—the former under my own supervision, and costing £58; and the latter locally, costing, I believe, £80. One school, Wattleville Public, was enlarged, at a cost of £22; while 37 were repaired in various ways, at a cost of £228 15s. 8d. Five residences were also repaired, at a cost of £33 10s. In addition to the foregoing, important works have been or are being carried out by the Architect at Wangools, Katoomba, Tarana, Neville, Shaw, Irene, Esk Bank, and other places. These works in the main represent new buildings, additions, or important repairs

Neville, Shaw, Irene, Esk Bank, and other places. These works in the main represent new buildings, additions, or important repairs.

It is with regret that I refer to the limited funds at disposal during the year; for, in addition to the work already done in the way of repairs, &c., there is still a great deal to be accomplished. Many buildings are sadly in need of painting, while others require a general overhaul. I find the white ant has got into some of the residences and out-offices, causing destruction wherever it has appeared. Taking the buildings, however, as a whole, they are in fair condition, comfortable, and fully meet the attendance in point of space.

As a body, the teachers are careful tenants, but I regret to say there are some so indifferent, or careless, or lazy, that they appear not to be able to drive a nail in a loose slip-rail or batten, or put in a shilling pane of glass, without invoking aid from the Department. Teachers should, I consider, treat their residences and school-buildings as if they were their own while in charge, and on removal give them up in a clean, tidy, and fair condition as to repair. I find several of the residences quite too small for the number of occupants, and I have endeavoured to have them enlarged from time to time, where the circumstances fully warranted the expenditure.

## Organisation.

The organisation is generally good, as far as the teachers can be held responsible. The general aspect of the schools, both externally and internally, is pleasing; the lesson-guides are drawn with skill and care, while the returns are furnished promptly and correctly. There are, however, some exceptions; and I notice that more errors are made at the termination of the half-years than at that of the ordinary quarters, and I attribute this to the eagerness of the delinquents to be off for their holidays. To find classified, experienced, and intelligent teachers going wrong in adding up a small line of money in fees is simply inexplicable, and most decidedly unpardonable. With a whole month of holidays, it is surely not too much to expect that a couple of hours will be given to the important matter of compiling a neat, accurate, and reliable statement of the school's doings for the quarter, half-year, and year.

The supply of materials is sufficient and is fairly well cared for, but many teachers have complained The supply of materials is sufficient and is rainly well cared for, but many teachers have companied to me, and with justice, of the inferior quality of some of the articles supplied, especially the slate-pencils, pens, and pencil-holders.

The classification is generally correct, but I have found several cases where promotions have been delayed too long, under the mistaken notion, I believe, that a good report is next to impossible immediately

or shortly before a regular inspection.

or shortly before a regular inspection.

Many of the schools begin to show signs of a bright and pleasing future, as far as outward appearances go, owing to the planting and growth of ornamental trees and shrubs; and I venture to say that, in ten or fifteen years hence, every important school in the country will be as an oasis in a desert, and easily discerned, even at a distance, owing to its surrounding foliage. The teachers and scholars continue to take much interest in the trees and flower-beds, as they now begin to see some reward for past labour.

Arbor Day was celebrated as usual, chiefly in the form of supplementary tree-planting, a picnic, or in secrets and at night by a children's concert.

or in sports, and at night by a children's concert.

Savings Banks are in operation in all the more important schools, and, on the whole, are doing

Discipline.

This feature continues to give satisfaction. The pupils, as a whole, are regular and punctual (except on cold and wet winter mornings), neat and clean, and well-conducted. They are respectful in demeanour in the school, but much of this disappears outside, which is not perhaps to be wondered at, considering their home surroundings and influences. During the year I gave directions to have the Lesson of Conduct (which I adopt for want of a better name) read aboud by a senior pupil twice a week, viz., Friday evening before closing, and on Monday morning before work commenced. In this way the pupils will, I hope, be regularly and forcibly reminded of their duty to society and to one another.

The total enrolment for the year (no child being counted twice) was 3,061 boys and 2,756 girls; total, 5,817. The average daily attendance was 1,7320 boys and 1,5382 girls; total, 3,2702. These figures show an increase of 279 and 354 respectively over those for last year, which might naturally be expected.

The total number of children reported to me who are evading the Act amounts to 13; 2 of these have been prosecuted, 6 warned, 4 recommended for prosecution, and 1 ill. It is very satisfactory, I think, to find that there are so very few not attending school. There are, I regret to say, some children still who do not attend at all, but as they are outside of the distance limit the Department is powerless to reach them. I should like to see the compulsory distance made  $2\frac{1}{2}$  miles at least, and the Act amended so as to prevent children from leaving school before 16, unless they were prepared to show that they had some bona-fide and respectable employment to go to, in which case, and under a certificate from the Inspector, they might be allowed to go at 14, as heretofore. I am forced to this conclusion by observing the numbers of boys and girls who leave school the hour they reach their fourteenth birthday, and who then begin a systematic course of idleness—the boys about street-corners and the girls about home—till they are 16, 17, or 18. It is all over with the majority by this as regards usefulness, for they have learnt to do nothing, and the boys simply develop into larrikins and the girls into—well, household drones or parasites—too lazy to work at home, and too proud and conceited to take respectable domestic service abroad. That the larrikin is a domestic product there cannot be the shadow of a doubt, and no system of public education can, in my opinion, overcome the evil. An altered condition of society may, perhaps, reach it in time.

public education can, in my opinion, overcome the evil. An altered condition of society may, perhaps, reach it in time.

I will take this opportunity of touching upon another point. It cannot have escaped the attention and observation of people living in the country that there is a decided and steady tendency in the past of our young people after leaving school to gravitate towards the cities and towns. Boys and girls of from 16 to 20 years seem, after a time, to be wholly dissatisfied with rustic life, and long to get to Sydney or some other large centre of population, in order to find something genteel to do. The lives and surroundings of their parents become distasteful to them, and they evince little or no disposition to engage in the quiet yet honorable pursuits of their progenitors. Now, I ask what can be done (or can anything be done) to stop or mitigate this evil—for evil it certainly is? Can our system of education be made to assist, and, if so, in what direction? In what way can we make country life and rural surroundings more attractive to our young people, so that when their school-days are over they may find as much pleasure and happiness among the gum-trees as in the city's noisy ways? These are questions I am not fully prepared to answer at present, but that they need an answer, and a very decided one, is, to my mind, beyond a doubt. Drill is tolerably well taught in all the schools, and exceptionally so in a few of the higher class. The Cadet movement does very well in three schools.

Of the 106 schools on my list at the beginning of the year, all, except Paling Yards Half-time, were regularly inspected; but as it was closed to make room for Isabella Half-time, and as this was inspected, my programme must in reality be regarded as having been completed. Two schools underwent a second regular inspection, while 30 received an ordinary inspection. Besides, a large number were visited incidentally, some twice or thrice, so that the work of inspection was regular and sustained. The following table shows the results under this head:—

Below standard.	Up to standard.	Above standard.	Totals.
1	0	63	64
2	0	9	11
2	1	22	25
1	0	4	5
6	1	98	105
	1 2 2 2	standard.   standard.	standard.         standard.         standard.           1         0         63           2         0         9           2         1         22           1         0         4

These results are, I consider, very satisfactory, and show that the teaching and general conduct of the schools under my supervision are of a high order. As, however, 90 per cent. of the teachers are classified and experienced, the above-stated results are not to be wondered at. Another view of the case would be to class the schools without reference to technicalities, thus:

In a highly satisfactory condition In a creditable condition In a satisfactory condition In an unsatisfactory condition	48 33 18 6
Total	105

### Instruction.

The work of instruction has gone on steadily and earnestly during the year, and with good results. A few schools were found in a somewhat unsatisfactory condition at the first inspection, but had greatly improved at the date of the second. The prescribed subjects are taught in almost every school, and the methods employed vary from tolerable to good. The appointment of pupil-teachers who have failed to

pass for training to the charge of small schools has done a great deal of good—reducing the local candidates to a mere minimum, and increasing the efficiency of the schools in a marked degree. The important subjects—reading, writing, arithmetic, and dictation—show good work done for the year—all averaging close upon 80 per cent.; while the less important are even higher in many instances.

The teachers under my supervision are a steady, conscientious class of public servants—faithful in the discharge of their duties, and loval to the noble cause they espouse. Many are studious, and have gained creditable promotion; while others, though not successful, have shown a laudable determination to advance under very discouraging circumstances. Others there are, again, who are only retarded by the absence of assistance in their studies in consequence of isolation or distance from some intellectual centre.

The pupil-teachers have worked well during the year, and have been favourably reported upon by their respective teachers. All those due for promotion were examined at my head-quarters on the 14th, 15th, and 16th instant, or by local committees where such attendance was considered inconvenient

Summary.

To sum up,—

(a) The means of education are ample and well distributed.

(b) Organisation and discipline are satisfactory.

(c) The instruction is of full range, and imparted earnestly and skilfully, and under the foregoing conditions I see nothing in the way of a successful year's work for 1893.

The usual statistics have already been forwarded.

JOHN KEVIN,
Inspector.

Inspector's Office, Mount Victoria, 31st December, 1892.

Inspector.

### ANNEX L.

### INSPECTOR THOMAS'S REPORT.

I.—The adequacy of the means of Education as regards amount and distribution.

Or the schools on my list at the close of 1891, one (Swallow Creek Provisional) did not re-open, so that I commenced the year with 79 schools in operation, viz. :-

Public Schools	45
Provisional Schools	11
	16
House-to-house	7

During the year, 6 new Schools have been opened in localities where none previously existed,

Porcupine Gap Mingelo	
Bogan Gate	Half-time.
Harrow	**
Goomgal	House-to-hous

The House-to-house School at Long Angle and Nanima became Nanima Half-time School, and the Half-time School at Kangarooby Creek was convered into a Provisional School.

The following schools were closed:—

Bungerellingong	Half-time.
Tomanbil	Provisional.
Mickie's Plains	,,
The latter may, however, re-open shortly as Half-time. Thus I close the year with 82 Schools in active operation, viz.:—	
Public	46
Provisional	
TT 10.4	~ ~

House-to-house .... The following applications for new schools have been received during the year :-

Locality.	School sought.	Result of application.
Bogan Gate and Harrow. Hiawatha Goonigal and Nanima { Porcupine Gap Coate's Creek Tom's Lagoon Wanara Bucobra Elswick Woodview Carlton Wangan	Provisional Half-time Public Provisional Provisional Provisional Provisional Provisional Provisional	Aid at House-to-house rates offered, but not yet accepted. In lieu of existing House-to-house School. Granted, and now in operation.  Declined.  Aid at House-to-house rates offered, but not accepted. Declined. Under consideration.

I have also received informal applications for the establishment of Half-time Schools at Bena and Womboyne, and a House-to-house School at Lawnsdale, but am not yet in a position to recommend

anything definite in either case.

The only portion of my district not well supplied with schools is that lying to the north and north-west of Condobolin, where free-selection is rapidly going on, and whence early application for schools may be expected.

II .- The actual condition of the Schools as elicited by Inspection.

Of the 85 schools that were in operation during any portion of the year, all received full inspection, 2 underwent a second regular inspection, and 32 received an ordinary inspection, while incidental visits

were made as frequently as possible.

Two of my schools were inspected by the District Inspector, while I visited two of his. We co-operated in the inspection of Orange (Boys and Girls), Forbes (Primary and Infants), and Parkes Public Schools.

The efficiency of the schools may be exhibited thus :-

Class of School.	Below standard.	Up to standard.	Above standard.	Total.	Percentage satisfying standard.
Public Provisional Half-time House-to-house	2 0 3 2	1 0 1 1	43 13 15 4	46 13 19 7	95 100 84 71
Total	7	3	75	85	92
Results in 1891	8	3	71	82	90

# (a.) Organisation.

The details in the organisation of the schools falling within the circle of teachers' duties are, on

the whole, well attended to, and hints and suggestions are promptly acted upon.

Several of the buildings are, however, in great need of repair and renovation, and it is a matter of extreme regret to me that I have been unable to do all that I wished in this direction. I can only hope that the Department will during the coming year have sufficient funds at its disposal to admit of the removal of this blemish upon the organisation of my schools.

### (b.) Discipline.

The pupils, as a rule, present a very respectable appearance in person and attire, and exhibit a becoming demeanour under instruction.

In several localities they do not attend as punctually and as regularly as they should, but this is a defect frequently beyond the teacher's power to remedy, as farming pursuits, shearing, &c., absorb a great deal of juvenile labour. The long wet season, too, and its attendant floods, had a weakening effect upon the regularity of the children, and led to frequent closings of small schools, while whooping-cough, diphtheria, and sandy blight have been unusually severe during the year.

Two thousand four hundred and sixty-three pupils presented themselves at the regular inspections of the year, with results set forth in the table below:—

Subject.	Number examined.	Percentage of passes, 1892.	Percentage of passes, 1891.	Increase or decrease per cent.
Reading. Writing Dictation Arithmetic Grammar Geography English History Australian History Scripture Object Lesson Drawing Music. Drill Needlework French Latin Euclid Algebra	2,387 1,873 2,300 812 812 811 147 2,112 2,272 2,323 2,117 2,205 894 4 3 57 8	84 84 72 77 73 71 61 74 72 73 74 74 69 85 75 67 84 75	85 85 67 74 75 75 -60 57 70 73 72 70 70 74 80 50 50	$\begin{array}{c ccccccccccccccccccccccccccccccccccc$
Mensuration	92 57	66 <b>93</b>	91 90	— 25 + 3

It will be noticed that in all subjects taken by the pupils as a body the results differ very slightly from those of 1891.

### (d.) Teaching Staff.

Five unclassified teachers (one of them an ex-pupil-teacher) hold positions that should be filled by classified teachers. This is a distinct improvement on last year's figures.

All pupil-teachers in my section of the district obtained promotion during the year.

I still experience great difficulty in obtaining suitable male candidates for small schools.

The teachers employed under my supervision are classified as under:—

Pupil-teachers	·		2	3		4.	6		1	16
			ı.	11.		III.	Iv.	Prot	oationer.	otal.
Total	0	2	6	5	20	14	3	7	21	78
Assistants	0	0	1	1	2	0	0	0	0	4
Teachers-in-charge	0	2	5	4	18	14	3	7	21	74
	I A.	IB.	II A.	II B.	III A.	III B.	III C.	Ex-PT	Unclassified.	Total

III .- Accommodation.

At the close of 1891 the schools in operation provided scats for 4,624 pupils, on basis of 8 square feet of floor-space to each, or for 4,416, on basis of 100 cubic feet of air-space each. During the year the opening of 6 new schools, of a new class-room at Peak Hill, and of a vested building at Ungarie, to replace a rented building, has added 334 seats (floor-space), or 259 seats (cubic space); while the closing of 4 schools, and the giving up of the old building at Ungarie have caused a loss of 136 seats (floor-space), or 92 seats (cubic space). The net gain has raised the available accommodation in existing schools to 4,822 seats on the former basis of calculation, or to 4,577 on the latter.

As the highest quarterly enrolment was 3,442, and the highest quarterly average attendance 2,364, it is apparent that ample provision has been made for seating the school population of the district.

During the year the premises at Bowan, Cargo, Condobolin, and Lake Cudgellico, were painted and improved by the Architect's branch, and those at Gregra and Marsden under my own supervision, while minor repairs, costing in all £55 9s. 9d., were effected at 12 schools.

while minor repairs, costing in all £55 9s. 9d., were effected at 12 schools.

No works of any importance remain unfinished at the end of the year.

Eighty-two schools, with an enrolment of 3,351, and an average attendance of 2,249, were in operation at the close of the school year.

The close of the school year.

The total fees paid amounted to £1,312 0s. 3d., and the outstanding arrears stand at £19 14s. 6d.

One hundred and twenty-one free pupils were on the roll at the close of the year.

Every school was fully inspected, and 92 per cent. satisfied the standard.

The present educational requirements of the district are fully met.

Forbes, 31st December, 1892.

W. GEO. THOMAS, Inspector.

### ANNEX M.

# DISTRICT-INSPECTOR JOHNSON'S REPORT.

There were 163 Public, 14 Provisional, 24 Half-time, and 9 House-to-house Schools in the Bowral District at the beginning of 1892; and at the end of the year there were 162 Public, 21 Provisional, 32 Half-time, and 7 House-to-house Schools in operation. There has, therefore, been an increase of 12 schools during the year. Eighty-five of these are in the Nowra section, 71 in the Crookwell section, and 67 in the Bowral section.

In this section of the district new school-buildings, including teachers' residences, were erected at Ingleburn and Roberton Park, and new buildings will shortly be commenced at Balmoral and Spaniard's Hill. A girls' room at Bowral, and a school-room and teacher's residence at The Oaks, are much needed, and will probably be erected during 1893.

Eighteen school-buildings were repaired and otherwise improved. The works at Luddenham, Menangle, Glenmore, Berrima, and Sutton Forest were carried out under the Architect's supervision, and the others were supervised by myself. Extensions alterations and interest were activated by myself.

Camden school-buildings, which, owing to faulty construction, were unsuitable for school purposes.

The school-rooms of this section of the district provide sittings for 4,167 pupils, which is considerably in excess of the number actually required. Bowral School is the only one in which the accommodation is under that required, and, as before stated, it has been decided to erect an additional room at that place.

The enrolment and average attendance for each quarter of 1892 were as under:—

	Enrolment.	Average.
March quarter	3,593	2,564
June quarter	3,696	2,569
September quarter	3,648	2,614
December quarter	3,666	2,594
For the previous year they were :		
<u>.</u> .	Enrolment.	Average.
March quarter	3,527	2.413
June quarter	3,423	2,338
September quarter	3,434	2,389
December quarter	3,418	2,220
77 47 4 4 4 4 4 4 4 4 4 4 4 4 4 4 4 4 4		

From these numbers it will be seen that the enrolment and attendance were higher this year than in 1891

All the schools of the district, except one in the Crookwell section, were inspected during the year, and 72 were inspected a second time. Thirty of these second inspections were made by Mr. Inspector Lawford, 8 by Mr. Inspector Baillie, and 34 by myself. At the regular inspections, 200 schools ranked above the standard, 9 reached it, and 12 failed to reach it. The numbers last year were, 185, 11, and 19. Satisfactory improvement has therefore taken place since the inspection of the schools in 1891. The number of pupils examined last year was 2,545, and this year 2,697.

Judged by the number of passes, reading shows fair improvement, and at my ordinary inspections I observed that this subject is being more earefully and more intelligently taught in several schools than previously. Still, in some schools the reading lesson consists mainly in teaching the pupils to say the words of the lessons, without any attempt at correct grouping, emphasis, or inflection of the voice.

Legal proceedings were taken against the parents of 63 pupils for breaches of the compulsory clauses of the Act. Convictions were secured in 47 of these cases, 13 were withdrawn, and 3 were dismissed.

The teachers in this section of the district are highly respectable and attentive to their duties. Four gained promotion to Class I by examination, and other 4 to the highest grade of Third Class.

There are 21 pupil-teachers employed in this section of the district. These young persons are well-conducted and industrious, and, with one or two exceptions, give promise of becoming skilful teachers.

The present educational requirements of the district are fully met by existing schools, and satisfactory work may be looked for during 1893.

W. H. JOHNSON District Inspector.

Bowral, 7th January, 1893.

### ANNEX N.

## INSPECTOR LAWFORD'S REPORT.

The boundaries of the district are the same as they were last year. At the end of that year there were 84 schools in operation, and 1 new school—Wallaby Hill—was opened at the beginning of the year, making a total of 85 schools open during the year, or any part of it, viz.:—

Public	76
Provisional	1
Half-time	8
Total	

Of these, one small school—Mimosa Park—was closed last month, owing to the low attendance throughout the year, and it is likely that another—Comarong—will not be re-opened next year for similar

reasons. On the other hand, the Nowra Superior Public School, which has reached Class IV, will be worked in two departments. It is probable, therefore, that in January next there will be 84 schools in working order.

working order.

All schools have received one full or regular inspection, and 30 schools have also had an ordinary inspection, while incidental visits have been made in many other cases.

There is statute accommodation at the present time for 5,784 children, and floor-space for 6,627; while additions now in progress at Kiama, Nowra, and Ulladulla will provide, by the middle of 1893, considerable additional accommodation, which is much wanted at those places. There will then be no school in the district where there is any overcrowding. A new school-room has been built at Broughton Vale by the Inspector, and the old school at that place converted into two additional rooms for the teacher's residence—a very necessary work—at a total cost of £214. The school-room at Yalwal has been lengthened, at a cost of £32 1s., to meet increased demands.

New residences have been built by the Architect at Albion Park and Tomerong, and a new school

New residences have been built by the Architect at Albion Park and Tomerong, and a new school

is in progress at the former place.

Repairs, including fencing and water supply, have been made at 34 schools and 8 residences, under the direction of the Inspector, at a total cost of £322 7s. 2d.

The efficiency of the schools is very good, 96 per cent. being up to or above the standard, as against 94 per cent. last year; but as a school has only to gain half the possible number of marks to be up to the standard, it is not a very difficult achievement, and a school below the standard must be in a very half condition. very bad condition.

The remarks made in last year's report as to the distribution of the means of education apply with equal force now; only one new school—Wallaby Hill—having been opened during the year. Six applications for new schools have been made, at—

East Milton. Poplar Grove. Road Ends.

Brooker's Farm. Little Forest Yerriyong Valley.

The first four applications were declined. A teacher has been conditionally promised at Little Forest, and a Half-time School, to be worked with Yerriyong, has been established on the usual conditions at Yerriyong Valley. As, however, in both these cases the conditions involve the erection of buildings by the residents, it is doubtful if schools will be opened at either place.

The district is thoroughly settled; there are plenty of schools, well distributed; they are in a very satisfactory condition as regards their efficiency and working order. The teachers, with one or two exceptions, are an earnest and painstaking body, and the prospects for the coming year are entirely satisfactory.

satisfactory.

L. E. LAWFORD,

Nowra, 21st December, 1892.

Inspector.

#### ANNEX O.

#### INSPECTOR BAILLIE'S REPORT.

During the first eight months of the year the Mittagong section of the Bowral District was under the supervision of Mr. Inspector Murray, who retired on the 31st August, under the provisions of the Civil Service Act, and I was appointed his successor on the 1st September. Much of the information contained in the following report has, therefore, been furnished by Mr. Murray, who states that at the beginning of the year there were 38 Public, 8 Provisional, 8 Half-time, and 8 House-to-house Schools in operation in the Crookwell District. At the close of the year there were under my supervision 36 Public, 10 Provisional, 18 Half-time, and 5 House-to-house Schools. The 5 House-to-house Schools comprise 12 stations. stations.

# School-buildings.

Small schools have been creeted at Five-mile Tree, Greenwattle, Marian Vale, and Green Gully by the inhabitants of these localities, the first three as Half-time, and the other as House-to-house. A new Provisional School was opened at the beginning of the year at Monk's Crossing, near Laggan, in a temporary building provided by the residents; and a new Provisional School (which will be opened after the Christmas vacation) has been established at Big Meadow, near Peelwood, at a small cost to the Department. The Public School at Memundie has been converted into a House-to-house, and is worked Department. The Public School at Memundie has been converted into a House-to-nouse, and is worked with Green Gully. A new school building has been erected at Golspie, in a central position, to meet the educational requirements of Golspie and Fassifern; and a school is in course of erection at Myrtleville, in a much better position than the old building occupies. The schools at Hadley and Greenwich Park have been closed through small attendance.

Repairs have been effected at Chatsbury, Bungonia, Leighwood, Gullen, and Pejar—Public; at Streamville, Kareela, and Fullerton—Provisional; and at Windellama West, Curran's Creek, and Argyle

East-Half-time Schools.

A teacher's residence has been provided at Peelwood, and one is being erected at Kentgrove Public School. The buildings at Crookwell have been enlarged and improved, to afford better accommodation for the increasing numbers.

The sitting accommodation is adequate to the requirements of the district, and is properly

distributed.

The teachers and pupil-teachers employed at the end of the year numbered 64. As a body, they are assiduous in their duties, held in esteem amongst the people, and respected by their pupils. Their

Pupil-teachers					2	1		1	4
		1.	2.		3.	4.	Probat	ioner.	Total.
Totals			3	•••	15	4	10	28	60

	I A.	I B.	II A.	II B.	III A.	III B.	III C.	Unclas- sified.	Total

#### Discipline.

Under this head I am pleased to report that good order and attention were dominant features in over 90 per cent. of the schools inspected by me. The cane is resorted to only as a last resource, and in the majority of schools it is scarcely ever used. Drill is imperfectly taught in many of the country schools, from the fact that three-fourths of the teachers have only a slight theoretical knowledge of the subject, without any practical experience. However, I am induced to hope considerable improvement will be made in this important branch of education during the ensuing year. The drill at Flowerburn Public School deserves special mention.

## Instruction.

This section of the district, taken as a whole, is sparsely populated, and several of the schools are difficult of access, especially during heavy rains, yet every school received a regular inspection, except Hadley, closed early in the year. Eight were inspected twice, and several received incidental inspections as opportunities offered. Of all the schools inspected, five only were below the standard, one reached the set was above it. the standard, and the rest were above it.

The numbers of pupils examined, and the percentages of passes are given hereunder:-

umbers of pupils examined, and the percentages of passes are given as the standard.

1,428 in Reading, of which 89'9 per cent. passed the standard.

1,423 in Writing, of which 88'0

1,234 in Dictation, of which 80'7

1,383 in Arithmetic, of which 80'8

463 in Grammar, of which 84'6

463 in Geography, of which 84'2

449 in English History, of which 77'9 per cent.

103 in Australian History, of which 79'6 per cent.

1,265 in Scripture, of which 76'4 per cent.

1,301 in Object Lessons, of which 76'8 per cent.

1,322 in Drawing, of which 78'4

885 in Music, of which 82'3

21 in Euclid, of which 85'7

18 in Mensuration, of which 77'7 18 in Mensuration, of which 77.7 402 in Needlework, of which 91.5 1,304 in Drill, of which 81.1

The percentages of passes in writing, Australian history, drawing, music, Euclid, needlework, and drill, are slightly above last year's results, while in reading, dictation, arithmetic, grammar, geography, English history, and scripture, the resultsare a shade lower. On the whole, however, satisfactory progress has been made.

#### Summary.

- 1. The means of education are sufficient, well distributed, and meet the requirements of the District.
  - 2. The teachers are as a body respectable, trustworthy, and earnest in their work.
  - Satisfactory progress has been made during the year.
     The outlook is healthy.

J. W. E. BAILLIE, Inspector.

Parramatta, 31st December, 1892.

ANNEX P.

DISTRICT-INSPECTOR COOPER'S REPORT.

At the close of 1891, there were 366 schools in the Goulburn District. Of that number, 4 in the Bega and Braidwood Section were not reopened. During the year just ended, 24 new or revived schools were brought into operation. The total number of schools or departments open for the whole or part of 1892 was therefore 386, distributed as indicated hereunder:—

	;	1892.	1891.			
Section of District.	Schools.	Pupils enrolled.	Schools.	Pupils enrolled		
Goulburn	86	4,953	82	4,892		
Braidwood	106	3,458	100	3,454		
Bega	103	4,671	103	4,533		
Yass	91	3,783	91	3,708		
Totals	386	16,865	376	16,587		

This table shows an increase of 10 schools and of 278 pupils enrolled. In the course of the year, however, the diminished attendance at 7 of the schools taken over from 1891, rendered their closing necessary, so that the schools or departments existing at the end of last quarter numbered 379. It will be seen from the following figures that these schools, in the aggregate, afford ample accommodation for the children enrolled therein:—

School or	Number of places, al	Highest quarterl	
Departments.	8 square feet.	100 cubic feet.	corolment.
84 105 100	4,541 4,820 5,194	4,206 3,378 4,438	3,926 2,811 3,746
90		3,628	3,144
	84 105 100	School or Departments.     8 square feet.       84     4,541       105     4,820       100     5,194       90     4,175	84     4,541     4,206       105     4,820     3,378       100     5,194     4,438       30     4,175     3,628

Of the new schools provided during the year, 15 were erected under the supervision of the District Inspector and the Inspectors who, in several cases, had the assistance of Local Committees. In the Goulburn Section, new schools were built at Williamsdale and Canberra, to replace old and unsuitable rooms; and at Middle Arm, Malcolm Vale, Tinderry Vale, and Waterholes, Half-time Schools were erected. The new Girls' Department at South Goulburn has been accommodated in one of the buildings already existing. As an addition to the Tarago Public School, an excellent brick building has been provided under the supervision of the Architect. Information as to the particular schools erected under

the superintendence of the Inspectors stationed at Braidwood, Bega, and Yass is given in their respective reports appended hereto. The additional space afforded by these buildings, and by those leased by the Department, is shown below:—

Schools built, enlarged, or leased.

	New	Schools	Schools	Number of places allowing			
Section of District.	schools.	enlarged.	leased.	8 square feet.	100 cubic feet.		
Goulburn Braidwood Bega Yass	6 3 5 2	1 1 1 0	0 10 1 2	204 331 424 190	174 232 437 177		
Totals	16	3	13	1,149	1,020		

Many existing schools and residences have been repaired and painted, further provision for the conservation of wholesome water for the pupils has been made, and some advance is to be mentioned in the matter of enclosing school grounds. This work may be summarised thus:—

		Repairs	Wes	Weather-sheds.			
Section of District.	Schools.	Residences.	. Cost.	Number.	Cost.		
			£ s. d.		£ s. d.		
oulburn	12	1 1	316 11 2		**********		
raidwood	18	1 1	70 10 0	••••			
ega	7	2	<b>14</b> 6 18 0	1 1	$6 \ 0 \ 0$		
ass	33	10	$578 \ 11 \ 2\frac{1}{2}$				
Totals	70	14	1,112 10 4½	1	6 0 0		

The total space available in the schools of the district is sufficient for the aggregate number of children on the rolls; and, although some schools are now somewhat small, and others are too large for present wants, the accommodation is, on the whole, fairly distributed. Most of the buildings that have come under my own notice are now in good repair and suitable.

# $Play\mbox{-}grounds.$

Satisfactory progress has been made in the improvement of many of the play-grounds in the Goulburn Section. Those in respect to which the teachers deserve the most commendation are, in the order of merit, South Goulburn, Eastgrove, Queanbeyan, Tarago, Yarralumla, Thornford, Sutton, Tirranna, Goulburn (Girls) and Goulburn (Boys). I was glad to be able to recommend the granting of bonuses ranging from £1 to £5 to the teachers of these schools. Bec-keeping has, in the case of several schools, been successfully introduced, and it is hoped that it will be possible, at no distant date, to report that practical instruction in that important industry forms a part of the curriculum of almost all the schools under my supervision.

Attendance of pupils.

This table affords evidence of substantial improvement in respect to the aggregate number of children under instruction, and the regularity of attendance. In reference to the free pupils, it is proper to point out that in the Goulburn section alone 129 of those so returned are "State children," of whom there are also 52 in the schools of the other sections. For the half-year ending 30th June, 1892, 1,003 children were reported as not having completed the statutory attendance. The parents of 524 were held to be excusable, those of 376 were cautioned, and authority to prosecute those of 103 was obtained. The parents of 96 were dealt with by the magistrates, and in the case of the remaining 7, proceedings were, for various reasons, allowed to lapse. For the half-year just ended, 742 children have been reported. The parents of 183 will be cautioned, and those of 83 will be recommended for prosecution.

#### Inspection.

A summary of the inspection work done in the several sections of the district is given in the following table:—

			Schools that underwent regular inspection.			Schools e inspec	ted.	ons.	Pupils examined.				
Section of District.	Total number of Schools.	Number.	Percentage.		Number.	Percentage.		al inspections.	Nun	nber.	me	ent. of ean Iment.	
		Nui	1892.	1891.	Мш	1892.	1891.	Total	1892.	1891.	1892.	1891.	
Goulburn	86	86	- 100	100	68	79	58	154	2,950	2,827	76	75	
Braidwood	106	106	100	98	50	47	49	156	2,228	2,194	80	79	
Bega	103	102	99	93	57	55	55	159	2,725	2,724	74	76	
Yass	91	90	99	90	4	4	1	94	2,180	2,020	71	67	
	**************************************	<u> </u>											
Totals	386	384	99	97	179	46	41	563	10,083	9,765	75	74	

It will thus be seen that 384 out of 386 schools were fully inspected; that 10,083, or 75 per cent. of the mean enrolment, were examined; and that 179 schools were subjected to ordinary inspection; making a total of 563 inspections. In view of the comparatively large number of schools to be dealt with, the fact that, with the exception of two which were almost necessarily omitted, all were regularly inspected, may be taken as satisfactory. In the Goulburn, Braidwood, and Bega sections, 175 out of 295 schools underwent a second inspection. It is to be regretted that only a small portion of the schools in the Yass section have had the benefit of ordinary inspections during the last three years. That only four of these inspections were held in that section for 1892 is explained in the general report of the Inspector.

	Grand totals	241	92	51	384	86	84

Of the 384 schools embraced in this return, 213 are Public Schools, representing the greater portion of the children examined. The percentage of Public Schools reported as up to or above the standard ranges from 86 in the Bega section to 98 in the Goulburn section, and in each section substantial improvement, as compared with the former year's results, is evident in respect to that class of schools, The total results of all schools are also higher in three of the sections, but those of Bega show a decline of 5 per cent. The general advance in efficiency throughout the District may be deemed fairly satisfactory.

The proficiency in most subjects compares favourably with that shown in this district in 1891, and

The proficiency in most subjects compares favourably with that shown in this district in 1891, and also with the general results hitherto reported for the whole Colony. Copy-book writing shows an improvement of 7 per cent. in the number of "passes" This may be taken as evidence of increased attention to that subject. As, however, something more than ability to make a tolerable copy of a head line is required from the pupils who leave school for the avocations of every-day life, the fact that 86 per cent. of those examined reached the standard of mediocrity indicated by a "pass" is not in itself evidence of any great proficiency in hand-writing. In those schools where writing on slates has been discontinued in the higher classes, and the pupils do the greater part of their work on paper, or in exercise books carefully revised by the teachers the writing has improved greatly

Arithmetic, as exemplified by text-books, has borne the test of examination fairly well, 79 per cent. of those examined having passed; but sufficient attention is not given to the working of questions of practical utility. It is by no means rare to find pupils doing interest, discount and stocks who are unable to solve a simple question relating to a business transaction involving a little thought, but not reducible to any particular formula. Mental arithmetic is not, as a rule, taught in such a way as to lead to useful results. Mensuration is a weak subject, chiefly because it is not made attractive and interesting. In respect to most of the school subjects, it may be said that more satisfactory results would be obtained if a larger number of the teachers would use their efforts to stimulate their pupils to think for themselves and thus become self-reliant. Where undue efforts are mide to cultivate the memory, to the partial neglect of the higher faculties of the mind, and mere rote work is accepted as sufficient, the results of examination are necessarily disappointing.

Superior Public Schools.

## Superior Public Schools.

Superior Public Schools.

The Superior Public Schools in the district are Goulburn (Boys'), Goulburn (Girls'), South Goulburn (Boys'), South Goulburn (Girls'), North Goulburn (Boys'), South Goulburn (Girls'), North Goulburn (Girls'), Queanbeyan (Mixed), Braidwood (Mixed), Cooma (Mixed), and Bega (Mixed). The work done in these schools during the year may be taken as satisfactory. The subjects taught to the fifth classes number 17 The examination of these classes in 5 out of the 7 Superior Schools under my personal supervision was a written one on grammar, geography, history, geometry, and Latin, as well as arithmetic and algebra. The papers in most of these subjects were prepared on the lines of the Sydner Thiversity public examinations. By this arrangement the proficiency of each individual pupil was gauged with more accuracy than is possible by oral class examination; and, although it entailed additional work on the examiner, the results fully compensated for the labour. If the pupils of the fifth classes in all the Superior Public Schools of the Colony were examined simultaneously on the same papers, and certificates were issued by the Department to those passing with credit, much good would result to the pupils and to the schools generally, and the comparatively poor would be placed on the same level, in respect of scholastic credentials, as those of their fellows who are more favoured by fortune.

Kindergarten.

# Kındergarten.

The very useful instruction given under this heading continues to produce good results in the Goulburn, North Goulburn, and South Goulburn Infants' Schools, and in the first classes of the Queanbeyan and Braidwood Public Schools.

## School Banks.

These exist in all schools in the district in which more than one teacher is engaged, and are fairly successful. Discipline.

#### Discipline.

In the majority of the schools the discipline is sound and healthy. Harshness in inflicting corporal punishment is the exception, but it is to be regretted that the cane should still be frequently resorted to for the checking of trivial faults which vigilance and judgment would entirely prevent. In some cases the explicit official direction to record promptly every instance of corporal punishment is neglected by teachers, who thus, in their own practice, offend against an obvious rule of discipline.

#### Teachers.

At the close of 1892 the general staff of teachers consisted of 407 persons, showing an increase of 13 for the year. They may be classed as under:—

	Teachers.		5. gsec.		stants.	All	ranks.	Pupil-teachers.	
	Males.	Females.	Mistresses.	Males.	Females.	Classified.	Unclassified.	Males.	Females.
Goulburn	54	28 27 16 36	6 1 1 	3  	5 3 3 2	58 47 70 49	25 38 25 37	9 3 5 3	15 8 6 9
Totals	218	107	8	3	13	224	125	20	38

The teachers, as a body, have fully maintained their high character for personal conduct and attention to duty. The pupil-teachers have, for the most part, worked satisfactorily, and give promise of becoming very useful members of the profession. In 1891 Saturday classes were formed in Goulburn for special instruction in Latin, French, drawing, and music. They are attended by 20 pupil-teachers, and have proved of much benefit to these young people.

#### Summary.

During the year the educational needs of the district were well supplied, almost all the schools underwent regular inspection, a large number were twice inspected, the proficiency of the pupils has advanced, and the general efficiency of the schools shows sensible improvement. The results for the year may therefore be deemed satisfactory, and the prospects of 1893 are hopeful.

D. J. COOPER,

Goulburn, 2nd January, 1893.

District Inspector.

## ANNEX Q.

## INSPECTOR WILLIS'S REPORT.

INSPECTOR WILLIS'S REPORT.

In this section of the Goulburn District, at the close of last year, there were 94 schools in operation, viz., Public, 34; Provisional, 19; Half-time, 36; and House-to-house, 5. Last January, work was resumed at 93 of those schools. Since then new ones have been opened at Rhine Falls, Woodend, Wombrook, Good Good, Jerangle, Eucumbene, and West Denizen; and others, formerly closed, reopened at Clyde Mountain, Araluen West, Jerrabatgulla, Gundillion, Moonbah, and Celey's Creek. Thus 106 schools have been in operation during the current year, viz.:—Public, 36; Provisional, 22; Half-time, 47; and Evening School, 1.

As the Half-time School at Bullellahans larger.

Evening School, 1.

As the Half-time School at Bullallaba no longer exists, and it is not intended to reopen the schools at Uridux and Larbert East, there will be 103 schools in existence at the commencement of next year's work, and they will be classified thus:—Public, 36; Provisional, 22; Half-time, 45.

For the establishment of new schools applications from the residents at the following places have this year been received:—Lake Plain, Wombrook, Woodend, Mittagang, Mosquito Bay, and Murrumbucca. The applications from Mittagang and Murrumbucca are still under consideration; those from the other places have been granted. The schools under my supervision are now so numerous, and so well distributed, that only a very small fraction of the children in this part of the Colony are out of the reach of the means of education.

The accommodation afforded by existing buildings is more than sufficient for present requirements.

places have been granted. The schools under my supervision are now so numerous, and so well distributed, that only a very small fraction of the children in this part of the Colony are out of the reach of the means of education.

The accommodation afforded by existing buildings is more than sufficient for present requirements. Last year there were 4,601 seats provided for 2,971 pupils. Now there are 4,820 seats for the use of 3,086 pupils. Regarded generally, the condition of the school buildings may be considered satisfactory. During the year new school-rooms have been provided by the Department at Nithsdale, Rhine Falls, and Wood-ond, and by the local settlers at Eucumbene, Denizen West, Wombrook, and Celey's Creek. The school at Nelligen was enlarged last July, and repairs have this year been effected to 2 chool-rooms and 3 residences. Besides the actual accomplishment of this work, it has been decided to replace with new buildings the old school-rooms at Benanderah, Bateman's Bay, and Middlingbank, and to make extensive improvements to the premises at Cooma, Jembaicumbene, and Mongarlowe. When these projects have been carried out, and the premises at Rock Villa, Corang River, and Jerrabatgulls put in better order, the general condition of the buildings in use will be good. Most of the schools are amply supplied with furniture, books, and apparatus. In some of the bush schools the desks and forms are roughly constructed and unsuitable, but these are being gradually replaced with others betrifted for service. The schools are liberally provided with books and other requisites, and, as a rule, these are taken care of and economically used. All but-two teachers have been commended for the clean and tidy state of their school-rooms and play-grounds. All the enclosed grounds are now being improved by the planting of trees and the cultivation of flowers. For special proficiency in this work bonuses have been awarded to Mr. Blumer, of Braidwood Superior Public School, and to Mr. Richards, teacher of the schools at Be

is now taught in all the schools, and of the pupils tested in the subject, 67 per cent. satisfied the prescribed standard. Of the discipline generally existing in the schools under my supervision, it may be stated that the government is mild but firm and effective, the order and general behaviour of the pupils commendable, and the moral tone of the schools very satisfactory.

The whole of the 106 schools under my supervision received one, and 7 of them two regular inspections, and 50 ordinary inspections were effected. Add to these numbers 18 meidental visits to schools, and the inspectoral work of the year stands thus:—

Regular inspections	113
Ordinary inspections.	<b>5</b> 0
Incidental visits	18

Of the schools inspected, 20 were found to be below standard requirements, 33 up to, and 53 above those requirements. These results are better than the corresponding ones of last year, and indicate that 81 per cent. of the schools in this part of the Colony are in an efficient state. Amongst the 20 failures are 8 schools that at the time of inspection had not been long in existence, and 2 others that obtained very nearly the number of marks necessary to reach the standard. The following schools, arranged alphabetically, obtained this year the highest marks for efficiency:—Adaminaby Public, Araluen Public, Bateman's Bay Public, Bell's Creek Public, Braidwood Superior Public, Captain's Flat Public, Cooma Primary, Cooma Infants', Major's Creek Public, and the Half-time Schools at Monkittie and Murroo Flat.

Last September, 18 of the pupils attending the schools in this part of the Colony submitted themselves to examination as applicants for the Junior University certificate. Of these 17 were successful, and one of them—Cecil Alley, of Araluen—gained a medal. Here follow the names of the schools in which the successful examinees were taught:—

Araluen Public—Mr. J. J. Hyndes—5 passes.

Araluen Public—Mr. J. J. Hyndes—5 passes. Braidwood Public—Mr. Chas. Blumer—2 passes. Cooma Public—Mr. H. Thomas—8 passes. Adaminaby Public—Mr. J. Gillies—2 passes.

This year 2,228 pupils have been examined. The results obtained during the years 1891 and 1892 are shown in the table given below:—

Subjects.	Percentage of passes for 1892.	Percentage of passes for 1891.	Differences.				
Reading	'84	84	Nil.				
Writing	77	74	Increase 3 per cent.				
Dictation	73	74	Decrease 1 ,,				
Arithmetic	66	68	,, 2 ,,				
Grammar	65	68	,, 3 ,,				
Geography	64	67	3 ,				
History—English	66	61	Increase 5 ,,				
" Australian	82	79	3				
Scripture	67	67	" Nil. "				
Object Lessons	69	70	Decrease 1 per cent.				
Drawing	61	56	Increase 5 ,,				
Music	69	71	Decrease 2 ,,				
French		64	, 10 ,,				
Euclid		71	Ingranca 19				
Algebra	66	64	9				
Mensuration	72	89	Decrease 17 "				
Latin	75	59	Increase 16				
Needlework	74	86	Desmand 19				
Drill	67	68	1 "				
Science	80	83	3' "				

Mental arithmetic is very feebly handed by many of the teachers, and this is the chief cause of the comparatively low results recorded in these schools for the correct working of the test sums given.

While under inspection the pupils, as a rule, enter heartily into their work, and behave in a manner creditable alike to themselves and to their teachers.

In the schools under my supervision there are 82 teachers, 3 assistants, and 11 pupil-teachers; these officers are thus classified:—

Office.	Class I.		Class II.		Class III.			Probationers.	Total.
o mes.	A	В	A	D	A	В	С	Probationers.	Total.
Teachers	0	2	5	0	15	11	11	38	82
Assistants	. 0 0		0	0	2	1	0	o	, 3
	Class	s I.	Class II.			Class III	•	Class IV.	Total.
Pupil-teachers	3		1		3			4	11

Nine of the unclassified teachers have been fully trained as pupil-teachers.

The teachers are attentive to duty, and most of them have rendered effective service throughout the year. They have the good-will of their pupils, and the respect of the people amongst whom they labour. The work done in the schools this year has, on the whole, been of a fairly satisfactory character, and there is no doubt that results at least equal in merit to those now recorded will be obtained by pupils and teachers next year. and teachers next year.

M. WILLIS, Inspector.

Braidwood, 30th December, 1892.

## ANNEX R.

## INSPECTOR SHEEHY'S REPORT.

This section embraces most of the counties of King, Murray, and Harden, as well as portions of some of the adjacent counties. Its southern boundary has been extended to Tumorrama, thus including the greater part of the county of Buccleugh, in which the schools are few and far apart. The principal population centres of the section are:—Yass, Burrowa, Murrumburrah, Gundagai, Coolac, Jugiong, Ryé Park, Frogmoor, Narrawa, Gunning, Murrumbateman, and Gininderra.

The schools in operation at the commencement of the year consisted of	<u>.</u>
Public	56
Provisional	22
Half-time	10
Total	88

Public	57 23
Provisional Half-time	10
	_
Total	90

Eight applications for the establishment of new schools have been dealt with during the year. In most cases they were from inhabitants in outlying localities, and hence the necessary inquiries occupied a good deal of time. The result in each case is shown hereunder:—

Place.	Result.
Goondah	Declined.
Tumorrama	House-to-house School granted.
Rose Vale	Declined.
Warham (Warroo)	House-to-house School granted.
	Provisional School granted.
	House-to-house School granted.
Allandale	Declined.
Benbengeno	Half-time School granted.

In spection.

Except Murrumburrah Evening Public, which had been closed before the time fixed for my visit, all the schools in this section received a regular inspection, and 4 an ordinary inspection. The demands made on my time by inquiries in regard to applications for new schools, the selection of school sites, and attention to the repairs and improvements, &c., effected under my supervision, prevented me from making a second inspection of all the schools in the section as programmed at the commencement of the year. Their efficiency in relation to the standard (50 per cent. of possible marks) is given in the subyear. Their joined table :-

	Schools.	Below Standard.	Up to Standard.	Above Standard.	Total,
Provisional		4 8 0	1 4 1	52 11 9	57 23 10
	Total	12	6	72	90

All these schools were on my list last year. The number above the standard has increased from 65 to 72, and there is an improvement generally in their efficiency.

# Organisation.

Except in a few schools, the organisation is satisfactory. The school-rooms present a tidy, well-kept appearance, and the lesson guides are constructed with a very fair judgment. In some subjects, however, the programmes have not always been up to the standard, while in others they have been in advance of it and of the attainments of the pupils.

## Discipline.

In most schools the pupils' habits are orderly, and their demeanour and behaviour good. Where elementary drill and physical training receive necessary attention, the school movements, and also the steadiness of the pupils under examination, are of a satisfactory character. It is to be regretted that several teachers are but imperfectly acquainted with drill, and do not seem to realise its advantages. Breaches of the "Instruction to Teachers" that "corporal punishment is not to be recognised as a proper aid to teaching," are few, and generally unimportant. Two cases, however, of a serious nature occurred, and suitable action was taken in regard to them.

## Proficiency.

The subjects taught, number of pupils examined, number passed, percentages for 1892 and 1891, are given in the following table:—

9.11.4			Percentages.			
Subjects.	Number examined.	Number passed.	1892.	1891.		
Reading	2,180	1,730	79.3	80.3		
Writing	1,975	1,762	89.2	86.7		
Dictation	1,735	1,179	67.9	61.3		
Arithmetic	2,002	1,426	71.2	66.0		
Grammar		481	59· <b>6</b>	43.9		
Geography	821	501	61.0	60:7		
History (English)	821	298	36.2	28.2		
,, (Australasian)	94	75	<b>7</b> 9·7	87.5		
Scripture	2,177	1,107	50.8	51.8		
Object Lessons	2,180	2,023	92.7	93.2		
Drawing	1,996	1,396	69.9	56·2		
Music	2,163	1,010	<b>46</b> · <b>6</b>	45.1		
Euclid	72	55	76.3	22.5		
Algebra	19	19	100.0			
Mensuration	22	10	45.4			
Latin	10	10	100.0	********		
Needlework	908	888	97.7	90.3		
Drill		1,400	64.2	50.6		

The percentages of passes in most subjects are higher than those for last year. Satisfactory progress has been made in writing, dictation, arithmetic, grammar, drawing, needlework, and drill. In many schools history is a weak subject, and the results in meanings and mental operations are not up to the standard.

Murrumburrah Public and Gunning Public were represented at the Junior Public Examination. Six pupils from the former school and one from the latter were successful.

## Teachers.

The following table shows the classifications of the teachers and pupil-teachers employed in this section at the end of the year:—

	I	Α.	I	в.	III	А.	III	В.	III	С,	Unc fi	lassi- ed.	То	tal.
	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.
Teachers	4	0	5	0	11	2	13	6	4	2	12	25	49	35
Assistants			<b></b>			2			}				0	2
Total	4				11	4	13	6	4	2	12	25	49	37

#### Pupil-teachers.

Clas	ss I.	Class II.		Class III.		Clas	s IV.	Total.		
Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	Male.	Female.	
•••		1	2	1	2	1	5	3	9	

The teachers as a body have worked well during the year. All are exemplary in their conduct and habits, and are deservedly respected. I have received no complaint against any of the pupil-teachers, and the reports upon them are in general of a favourable character.

#### Accommodation.

At the end of last year 3,586 seats or places, reckoned at 100 cubic feet each were provided for scholars in this section. By the closing of Elizabethfields Half-time and giving up the old school buildings at Burrowa and Brungle, 135 of these were lost, but 177 others were acquired by the erection of new school-rooms at Burrowa and Brungle, and the provision of non-vested buildings at Elizabethfields and Little Narrawa. Hence the accommodation at the end of the year consisted of 3,628 places. Information respecting the school-buildings erected is subjoined.

School. Cost.		Places provided.	Supervised by	Remarks.
Burrowa Public	£ s. d. 684 8 0 75 10 0	106 25 16 30	Architect Inspector Residents	Erected to replace old building.  " "  New school built free of cost to the Department.  This is an old building fitted up by the residents, and is situated 3 miles from the former Elizabethfields Half-time, which was closed.

Repairs and improvements to 33 schools, at a total cost of £414 11s. 4d., and to 10 teachers' residences, at a cost of £163 19s. 4d., have been carried out under the supervision of the Inspector. Seven schools are undergoing repairs to cost £114 18s. 4d. Tenders have been accepted for the erection of a new school-room at Murrimboola, a new school at Cunningham Creek, and a weather-shed at Edwardstown. The erection also of a new school-building at Brewer's Flat (Five-mile Creek), to replace the old

one, has been sanctioned.

Under the Architect, repairs and improvements of an important kind have been effected at Murrumburrah and Demondrille Junction. At the latter place a brick residence is in course of erection, and at Chain of Ponds and South Gundagai the teachers' residences have been enlarged.

During the year arboriculture has received due attention, and the play-grounds and teachers' gardens, are as a rule, well kept. At one school, Bendenine Public, bee-culture is practised with good prospects of success, and the pupils are afforded an opportunity of acquiring a knowledge of the work.

## Summary.

The results of inspection are higher than those for last year, both in regard to passes to satisfy the standard, and to marks gained for general efficiency. Two new school-rooms have been built to replace old ones, 2 new schools have been opened, and it is expected that 4 others will soon be fit for occupation. Adequate provision has been made to meet the wants of the section, and its educational prospects are satisfactory.

Yass, 30th December, 1892.

P. F. SHEEHY. Inspector.

#### ANNEX S.

INSPECTOR DURIE'S REPORT.

AT the close of 1891 thers were 102 schools in existence in Bega Section, made up thus:-

72 Public Schools.

10 Provisional Schools. 20 Half-time Schools.

20 Half-time Schools.

Of these, 3, viz., Jinenbuen, Numbla, and Jettiba Half-time Schools, were not reopened this year on account of low attendance; and 3 others, Wolumla North Public, Tombong and Willow Glen Half-time were closed early in the year for the same cause. Four new schools were opened during 1892, viz., Yowaka Public, Yourie Provisional, and Fox Hill and Currowoodga Half-time. During the year the following changes were made:—Curia Creek and Thoko, both previously Half-time, were made Provisional, and Nelbothery and Timbery Range Public, and Bobundarah Provisional were reduced to Half-time Schools. These changes have reduced the number of schools to 100, classified as follows:—

70 Public Schools to 100, classified as follows:—
70 Public Schools.
12 Provisional Schools.
18 Half-time Schools.
During 1892, Yourie Provisional School was erected under my supervision; and repairs were effected at Noorooma, Jellat Jellat, Lord's Hill, and Kiora Public Schools. A new weather-shed was erected at Stony Creek Public.
The sittings provided at the class of 1801.

The sittings provided at the close of 1891 were 5,140. By the changes caused by the closing of old schools and the opening of new ones, the seats provided have been increased to 5,194.

#### Attendance.

There were throughout the year, 103 schools in operation, having an enrolment of 4,671, and an average daily attendance of 2,512.8. The following table exhibits the enrolment and attendance for 1891 and 1892 :-

0	Enrol	ment.	Atten	dance.	Percentage.		
Quarter.	1891.	1892.	1891.	1892.	1891.	1892.	
March	3,563	3,686	2,491·1	2,504.6	69.9	67.9	
June	3,59 <b>1</b> 3,600	3,746 3,682	2,460·9 2,346·3	2,582.9 2,521.0	68·5 65·1	68·9 68·4	
December	<b>3,59</b> 0	3,563	2,294.8	2,320.7	63.9	65.1	

Thus there was throughout the year, in daily attendance, a percentage of 67.5 of the pupils enrolled. This is slightly in excess of that for 1891, and in view of the very unfavourable weather experienced throughout the year, the attendance should be considered satisfactory. It will be observed that there was a considerable falling off in the last quarter of the year. This is due to the shearing and the harvesting operations going on then.

#### Inspection.

During 1892, the following inspections were made:—Regular, 104; ordinary, 57; total, 161. In addition to these numerous incidental inspections were made. Two schools, Cathcart and Lord's Hill Public were inspected regularly twice; and one school, Wolumla North Public, was not inspected, as it was closed early in February, on account of very low attendance. The following table shows the condition of the various classes of schools in 1891 and 1892.

Schools:	Below S	tandard.	Up to St	andard.	Above Standard.		
•	1891.	1892.	1891.	1892.	1891.	1892.	
Public	12	per cent. 14 16 10 12	per cent. 64 75 53 59	per cent. 44 58 30 44	per cent. 29 13 41 33	per cent. 42 26 60 44	

The proficiency for 1892 bears very favourable comparison with that for 1891; for, while the percentage of schools below standard is 4 more in the former than in the latter year, there is an increase of 11 per cent. in schools above standard for the year 1892. With few exceptions the organisation and the discipline of the schools are very satisfactory. The tone is healthy, and corporal punishment is in no school very severe.

Teachers.

For good service, the following promotions were made during 1892:—Class 3 C to 3 B, 1 teacher; Class 3 B to 3 A, 5 teachers; Class 2 B to 2 A, 1 teacher. The teachers are, with very few exceptions, held in high estimation by the parents, and are earnest in the discharge of their duties. The following lists will show the teachers employed in this section at the close of 1892:—

beachers employed in this section at the close of 1002.

Summary. The satisfactory condition of the schools as reported last year has been well maintained; the means of education are ample and well distributed, and the prospects for the coming year are favourable.

P. DURIE,

Bega, 29th December, 1892.

Inspector. ANNEX

#### ANNEX T.

#### DISTRICT-INSPECTOR LOBBAN'S REPORT.

#### Schools in Overation.

DURING the last quarter of 1891 there were 261 schools or 265 departments in operation in the Grafton District. Of these, 7 were closed in 1892 on account of diminished attendance, but during the same period 2 House-to-house Schools were converted into 4 Half-time Schools, and 25 new schools were opened, 10 in the Port Macquarie section, 7 in the Grafton section, and 8 in the Lismore section. The subjoined table shows the number and kind of schools in operation at the close of 1891 and 1892 respectively. A clear increase of 20 schools for the latter year is apparent —

Sections.	Public or De- partments	Provisional	Half time,	House to house	Total.	Public or De- partments	Provisional	Half-tıme	House-to-	Total	Increase.
Grafton	60 64 79 203	13 16 10 39	8 2 6 16	2 2 3 7	83 84 98 265	60 69 79 209	17 17 15 49	$   \begin{array}{c c}     10 \\     2 \\     10 \\     \hline     22   \end{array} $	3 0 3 —	90 88 107 285	7 4 9 20

#### Accommodation.

At the close of 1891 seats were available for 16,520 pupils, allowing each 8 square feet of floor-space. By the erection of new buildings or additions to old ones during 1892, additional places were provided for 730 children, making the accommodation, at the end of the year, sufficient for 17,250 scholars, vız.:-

Grafton section		 	 	5,435 places.
Lismore ,,		 	 	5,215 ,,
Port Macquarie	section	 	 	6,600

#### Works carried out by Inspectors.

Under inspectoral supervision, the sum of £1,413 9s. was expended in the erection of 21 new school-houses and 3 weather-sheds, and in additions to 2 school-buildings and repairs and improvements to 90 others, including 2 residences. The expenditure in each section was:—

Grafton	£342	11	6
Lismore	829	10	11
Port Macquarie	241	6	7

## Works carried out by Architect.

Besides the minor works carried out by the Inspectors, contracts, which cost £9,837 16s. 4d., were completed under the direction of the Architect, and works which will cost £3,550 16s. 4d. are still on The expenditure by the Architect in each section was as follows:-

Grafton	£1,565	0	11
Lismore			
Port Macquarie	4,711	2	Э
works still in progress will be distributed as shown bel			
Grafton	£106	18	6
Lismore	1,533	18	6

The cost of

# $Nature\ of\ Works.$

Nature of Works.

Only I new school-building, that at Calliope, was erected under the Architect's supervision in the Grafton section, but new premises were completed at Cogo, Cundletown, and Darawauk, in the Port Macquarie section, and at Brunswick Heads, Brooklet, Bungawalbyn, Mullumbimby, and Tumbulgum, in the Lismore section. New residences were erected at Beechwood, Cundletown, and Taree, in the Port Macquarie section, and at Brooklet, Buckendoon, Newrybar, and Tumbulgum, in the Lismore section. Additions were made to 4 school-rooms and 7 residences, and 8 new weather-sheds were built. Improvements of various kinds were effected in connection with school-buildings in all parts of the district, and more would have been accomplished had funds been available. Taken as a whole, however, the material condition of the schools is good. New buildings are required to replace old or rented premises at Copmanhurst (Budgambi), Glenreagh, and West Ulmarra; and extensive improvements in connection with the buildings and grounds of the Superior Public School at Grafton are needed. A number of school-houses and residences want painting, and some of the latter must be enlarged to supply adequate accommodation for the families occupying them. Substantial buildings are now erected at most of the permanent centres of settlement, so that expenditure in this direction should decrease year by year. The white ant pest, so destructive formerly, has been succe-sfully excluded from the wooden buildings erected during the past five years, under the supervision of Mr. Catt, Cierk of Works in this district.

## Inspection.

• With the exception of 6 small schools in the Lismore section, which could not maintain the minimum average, and had to be closed before an Inspector could visit them, all the schools in the district received a regular inspection, and 75 of them an ordinary inspection also. Two schools in the Grafton district were regularly inspected by Mr. McLelland, who also made an ordinary inspection of the South Grafton Primary Department. One ordinary inspection was made by me in the Lismore section, and 5 in the Port Macquarie section. Incidental visits, too, were paid to all the Superior Public and several other schools in these sections. The pupils examined in 1891 numbered 9,464, in 1892 the number was 10,507. Of these, 3,311 were examined by the District Inspector, 3,526 by Mr Inspector Nolan, and 3,670 by Mr Inspector McLelland. The number of inspections made by each member of the inspectoral staff is given below. inspectoral staff is given below .-

By whom.	Regular.	Ordinary	Total	No at Reg Inspections
District-Inspector Lobban	88	54	142	3,311
Mr. Inspector Nolan	108	5	113	3,526
Mr. Inspector McLelland	90	16	106	3,670
Total	. 286	75	361	10,507

19th

Efficiency of Schools.

The efficiency of the schools inspected in relation to the standards is represented in the following table:--

Sections.	Below Standard.	Up to Standard.	Above Standard.	Total Inspected.	Percentage up to or above
Grafton	10	4	76	90	88.8
Lismore	6	5	77	88	93.1
Port Macquarie	12		96	108	88.8
Total	28	9	249	286	90.2

Only 80 per cent. of the schools were up to or above the standard in 1891; an improvement of 10 per cent. is thus shown in 1892.

# Proficiency of Pupils.

The general proficiency of all the pupils examined in the various subjects is shown hereunder, and the percentage of passes in 1891 is also given for purposes of comparison. It will be observed that improvement is manifested in a large proportion of the subjects:—

Subjects.	Number examined.	Percentage of Passes.	Percentage in 1891
Reading	10,507	93	92
Writing	10,507	92	91
Dietation	7,898	76	73
Arithmetic		78	84

Orill	10,390	77	77
Natural Science	376	89	88
		•	

## University Examinations.

The results achieved by the pupils who attended the University examinations in 1892 were highly satisfactory. The Superior Public School at Gratton deserves special mention, not only on account of the number of pupils who passed, but also for the high range of marks obtained. The following table shows the schools which were successfully represented, and the number who passed from each:—

Name of School.	Senior.	Junior.	Civil Service.	Total
Alstonville Ballina Bellingen Chatsworth Island Euroka Grafton Superior Kempsey West Superior Kempsey East Lismore Superior Maclean Superior Pampoolah Port Macquarie Superior Rous Southgate	0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0	1 2 0 1 1 21 10 3 2 4 1 3	0 0 0 1 1 0 0 0 0 0 0 0 0	1 2 1 1 21 20 3 3 2 4 4 1 3
aree Superior Ulmarra. Ulmarra West Vardell Vyrallah	1 0 0 0	0 3 6 1 . 2	0 1 0 0	1 3 7 1 2
Total	1	64	2	67

## Attendance.

Notwithstanding the unfavourable weather during the first half of the year, the attendance has, on the whole, been fairly satisfactory. Legal action in the case of defective attendance was only recommended as a last resort. In Grafton all parents whose children were shown to be behind in attendance in the quarterly returns of defaulters were visited by Mr. Huggart, the School Attendance Officer, by whom they were urged to send their children to school regularly to prevent the necessity for prosecution The same course was followed by him in other cases, and also by Mr. Justelius, on the Manning. The result has been that only 73 parents or guardians, representing 118 children were proceeded against unde

the provisions of the compulsory clauses of the Public Instruction Act. Convictions were obtained in 84 cases; 16 cases were withdrawn, and 18 were dismissed. The cases withdrawn or dismissed were in connection with pupils attending schools exceptionally situated. The object aimed at, however, has been secured; for the teachers now report that most of these children attend regularly. The following table shows the range of operations in this direction:—

Sections.	Number of parents or guardians prosecuted.	Number of children represented.	Number of convic- tions.	Cases with- drawn.	Cases dis- missed.	Fines.	Costs.	Total.
Grafton		16 60 42 118	14 32 38 	0 12 4 16	16 0	£ s. d. 2 2 0 3 11 0 4 19 0	£ s. d. 1 13 0 5 17 2 10 1 0  17 11 2	£ s. d. 3 15 0 9 8 2 15 0 0

#### School Fees.

School fees are paid much more regularly than formerly, and legal steps for the recovery of debts of this kind had to be taken in only a few cases. At the end of each quarter, all persons owing 5s. or upwards were written to by the attendance officers, and each debtor was asked to make some arrangement with the teacher to pay up, either in one sum or by instalments. In the majority of cases no further action was needed, and only those who were able to pay, but refused to do so, or to make satisfactory arrangements with the teachers, were proceeded against—in each case successfully. At the close of the year there were many schools in which no fees were owing, and several in which no single debt exceeded 5s. The total amount of fees in arrear in the 285 schools on 31st December, 1892, was £118 6s., viz.:—

	£	s.	d.	
Grafton section	17	3	0	
Lismore section		19	3	
Part Macqueria section		3	9	

The comparatively large amount in the Lismore section may be credited chiefly to the moving population along the railway works. The school at each successive stage of settlement has a number of bad debts to return.

# Distribution of Prizes.

Most of the large schools closed with "speech days" and the distribution of prizes. At Grafton, Taree, and several other places, these gatherings were of a very interesting character. In addition to prizes awarded locally, a gift-book was presented to each pupil in the Public Schools of the Grafton electorate by the Honorable John See, the member for the district.

## Arbor Day.

Arbor Day was celebrated in all parts of the district with much enthusiasm, and it is a rare thing now to see an enclosed school-site utterly neglected. The grounds at Chatsworth, Palmer's Island, and Southgate are worthy of special commendation, being tastefully laid out in flower-beds and planted with shade trees. At Palmer's Island there is a tennis court for the girls and a cricket ground for the boys, with all the necessary appliances for these games; and there are, moreover, the best-tended flower and vegetable gardens in the district.

# Public School Banks.

The School Banks continue to be fairly patronised. After the great floods on these rivers, the deposits were not so large or so regular as previously, but the prospects of the district are now brighter than they have been for years. Dairy factories are being established in various centres, and new fields of industry are being developed. A fair yield of sugar-cane has been obtained, and a splendid crop of maize is now ripening, so that there is every reason to expect that the number and the amounts of the deposits will increase in 1893 deposits will increase in 1893.

# Cookery Class.

Cookery Class.

During the latter half of the year a very important departure was made by the Department in the establishment of Cookery Classes in connection with the Superior Public School at Grafton. The term lasted for four months, and 60 girls from the schools near were admitted, and arranged in 5 classes of 12 each; one forenoon per week was devoted to a class. They were instructed in primary cooking. Miss Lance, the young lady sent to inaugurate and conduct these classes, was eminently suited for the position, and the classes were popular from the commencement. At the close of the course a written examination in the Theory of Cookery was held under my supervision, and 56 girls were present. The practical work was tested by Mrs. Storey, the Directress of Cookery, and 57 girls were examined. Mrs. Storey expressed herself as highly satisfied with the progress that had been made. All the pupils who were examined passed.

# Cookery Classes-Technical Branch.

In addition to the classes for school girls which occupied the forenoons, classes of adults were instructed in primary, plain, and high-class cookery. Upwards of 120 individual students joined these classes. Some attended two or more classes, the enrolment being:—High class, 33; plain, 103; primary, 17, and practice 11 17; and practice, 11.

## Public High Schools.

That a high standard of education is reached in many of our Public Schools, and that an excellent primary education is obtained in most of them is universally acknowledged; but a general desire is manifested in favour of the establishment of Public High Schools for boys and girls on the Clarence, as a connecting link, in the North Coast District, between the Public Schools and the University. From the action already taken by the Department, it is hoped that ere long parents in this district, which has no railway connection with the metropolis, will enjoy the privilege of having within their reach the means of giving to their sons and daughters an education which will fit them for entering the University.

## Public School Boards.

The Public School Boards, especially in the Grafton section, have performed their duties with zeal and efficiency. As they are now organised, real local supervision is exercised, and it is gratifying to note from their reports that, as a rule, they speak favourably of the way the schools under their supervision are being and their vision are being conducted.

## Special Religious Instruction.

Special religious instruction continues to be given in many of the Public Schools by clergymen of the Church of England, and, in a few cases, by ministers of other denominations. It is pleasing to find that not the slightest hitch has occurred between clergymen and teachers in connection with these classes. As a matter of fact several clergymen have expressed to me the great pleasure they feel in this branch of their work. They are considerate to the teachers, and work harmoniously with them. Such visitors are always cordially welcomed, and they are respected by both pupils and teachers.

#### Departmental Staff.

The complete staff employed by the Department in this district includes the District Inspector, 2 inspectors, 2 attendance officers, 1 clerk of works, 283 teachers, 16 assistants, 1 work-mistress, and 86 pupil-teachers. Work throughout the year went on smoothly in each section. Very few complaints against teachers were made, and some of these were undeserved. As a rule, the teachers are contented and industrious, and endeavour to discharge their duties faithfully and to the best of their ability. They are unanimous in approval of the existing standards, and strive to keep abreast of them. The pupil-teachers are worthy of commendation for the zeal, industry, and aptitude they display. Special Saturday-forenoon classes are held in Grafton for the study of French, Latin, vocal music, and drawing. About 20 pupil-teachers attend regularly, and they are greatly benefited by the instruction they receive.

## Applicants for employment.

Applicants for the office of teacher are as numerous as formerly, so that it is easy to find suitable Applicants for the office of teacher are as numerous as formerly, so that it is easy to find saltable persons to fill vacancies in the small schools in the bush. The number of girls who apply for the position of pupil-teacher is altogether out of proportion to the number of openings for their services. Places can be found for most of the male applicants, but not for one-third of the females. In the Grafton section alone the examination fees collected during the year amounted to £12 5s.

# Special Visit of Chief Inspector.

Several schools in each section were visited by the Chief Inspector, and examined by him in the more important subjects. Such visits are advantageous to both inspectors and teachers. The latter are benefited by faithful criticism when the results are not fully satisfactory, and cheered when their work merits the commendation of the Chief Inspector; while the inspectors are fortified and reanimated by their intercourse with the head of their branch of the Service.

#### Summary.

The schools or departments in operation number	285
The highest enrolment, that of September quarter, was	13,666
The average attendance for the year was	9,803.5
The total number of seats available is	17,250
The number of schools fully inspected was	286
The number up to, or above the standard, was	258
The expenditure on new buildings and repairs was	£11,251 5s. 4d.

Most of the premises are now in good condition.
The teachers are loyal and trustworthy.
The pupil-teachers are well behaved and studious.
Grafton Superior Public School takes first place for general efficiency.
The prospects for 1893 are encouraging.

A. LOBBAN,

Grafton, 7th January, 1893.

District Inspector.

## ANNEX U.

## INSPECTOR NOLAN'S REPORT.

AT the close of 1891 there were 98 schools in operation. During the current year 10 schools (5 Provisional and 5 Half-time) were opened; and one, Ballangarra Public, was closed on account of small attendance. The present year closes with 107 schools, comprising:—

Public	<b>7</b> 9
Provisional	
Half-time	10
House-to-house	3

The establishment of the undermentioned schools has already been sanctioned, and they will come into operation early next year:—Kew, Public; Heron's Creek, Provisional; Unkya Creek, Provisional; Bohnock, Provisional; Telegraph Point, Provisional; Missabobbi, Provisional; Temagogue, Half-time; Parrabee, Half-time; Five Day Creek, Upper, Half-time; and Five Day Creek, Lower,

Half-time.

The rapid extension of settlement on the coastal rivers has necessitated the provision of several small schools, and there is every indication of an increased demand for such schools. In most cases the true centre of population is not certain, and, consequently, cheap temporary buildings are erected, to be replaced by permanent structures after further experience.

During the year substantial works were effected under the supervision of the Architect at Belmore River, Beechwood, Tarce, Smithtown, Wingham, Koppin Yarratt, Wauchope, Sherwood, Euroka, Cundletown, and Seven Oaks. Five new buildings were erected under my own supervision, at a cost of £145; and six small buildings were provided by the residents at their own cost. Minor repairs under inspectoral supervision, were effected to 20 schools, at a cost of £96 6s. 7d. From the above statement it will be observed that considerable activity has been displayed in the provision of new schools, and in the repairs to existing buildings. The establishment of schools is keeping pace with the extension of settlement.

Notwithstanding delays caused by flooded rivers, and the amount of my time occupied in making Notwithstanding delays caused by flooded rivers, and the amount of my time occupied in making inquiries, all the schools (108) on my list were regularly inspected, and 10 received ordinary inspection. 3,526 pupils were examined in accordance with the standards of proficiency. 12 schools (or 11 per cent.) were below, and 96, or 89 per cent., were above standard requirements. In the preceding year 3,312 pupils, representing 98 schools, were examined, and 90 schools passed. It will be observed that while the number of pupils has increased, there has been a slight decline in the attainments. The decadence is due to the low standard reached in several small schools established late in the year in localities formerly without the means of education. Speaking generally, satisfactory work has been done during the year, and the prospects of the coming year are favorable. The material condition of the schools is steadily improving; the older buildings are being superseded by substantial and commodious structures; the school property is carefully guarded, and the grounds present a cheerful aspect. As far as the teachers are directly responsible the organisation is satisfactory, and the discipline is sound. The methods of instruction instruction are modern, and they are applied with zeal and energy. The undermentioned schools deserve mention for the satisfactory work done during the year:—Pelican Island Public, Taree Public, Wingham Public, Frederickton Public, and West Kempsey Superior Public. Very pleasing results have also been

Public, Frederickton Public, and West Kempsey Superior Public. Very pleasing results have also been attained in many of the smaller schools.

The following schools were represented at the recent University Junior Examinations:—West Kempsey Public, 10 passes; East Kempsey Public, 3 passes; Port Macquarie, 3 passes; Euroka Public, 1 pass, and Pampoolah Public, 1 pass. One pupil from Taree Public passed the Senior Examination.

Of the ten ordinary inspections, 5 were conducted by Mr. District-Inspector Lobban. A considerable portion of my time was occupied in visiting remote portions of the district, in order to make the necessary inquiries re the establishment of schools, hence the number of ordinary inspections was smaller than is desirable.

The following tables give information regarding the teaching staff under my supervision:-

om.	Class I.		Class II.		Class III.				
Office.	Α.	В.	, A.	В.	Α.	В.	c.	Unclassified.	Total.
Teachers	0	1	16	8	27	15	7	33	107
Assistants	0 0		0 0		3   1		0	1	5
	Class	I.	Class	II.	Class	III.	Class I	v. To	tal.
Pupil-teachers	10	,	2		6		11	2	9

I have much pleasure in complimenting the various members of the teaching staff on their irreproachable character, their industry, their devotion to duty, and their loyalty to the Department.

Sydney, 31st December, 1892.

W. NOLAN, Inspector.

#### ANNEX V.

#### INSPECTOR McLelland's Report for 1892.

The number of schools in operation in the Lismore Section at the end of last year was 84. No less than 6 of these were closed during the year on account of failing attendance, viz., Murragang and Warwick, Kangarco Creek and Nimbin Half-time, and Tooloon, and Sandy Hill Public. New schools were opened at Ballina (Infants' Department), Lower Booerie Creek, Byron Bay, Drighlington, Duranbah, Gay's Hill, Graham Town, and Rous Mill. Several schools were raised in rank during the year, some from House-to-house rates to Half-time, other to the grade of Provisional or Public, so that the disposition of the whole at the end of the year stands thus:—Public, 69; Provisional, 17; Half-time, 2; total 88. It has been decided by the Minister to establish other schools at Cheviot, Dungay Creek, Ellengowan, and Richmond (Half-time), Kurrara, Peacock's Creek, and Riley's Hill. Tooloom will be reopened as a Provisional School next year, and an application re opening Murragang as a Half-time School in conjunction with a similar station at Wyau is now under consideration.

At the end of 1891, sitting room was provided for 4,893 pupils at the rate of 8 square feet for each child. During the present year 10 new schools have been erected (4 under the Architect's and 6 under the Inspector's supervision), 2 others have been enlarged, and 4 buildings have been temporarily leased pending the erection of vested premises. As the result of these movements the accommodation is now sufficient for 5,215 pupils. In the few remaining instances where the buildings need to be enlarged to meet existing requirements, steps have already been taken in the necessary direction.

The material condition of the Department's property is, generally speaking, good. The expenditure for the year has been neither lavish nor niggardly, but with due regard to reasonable economy, has aimed at keeping fully abreast of the necessities of a rapidly growing district. The amount expended by the Architect 1 am not able to state, but it has been considerable. Under my own THE number of schools in operation in the Lismore Section at the end of last year was 84. No less than

not yet completed.

In point of organisation and discipline the teachers have for the most part obtained a creditable record. Many of the teachers are very successful in both these departments of school management, and of only a few can it be said that they fail to conduct their schools methodically, or to govern their pupils judiciously and effectively. Complaints about excessive corporal punishment on the part of the teachers are rare, and are not always well founded. There is a steady and commendable tendency to make the cane, as far as possible, a last resort, and there is little doubt that if teachers always met with the moral supposit that have a right to arrest from paperts effective discipling would be a much engine method them. support they have a right to expect from parents, effective discipline would be a much easier matter than

it is at present.

support they have a right to expect from parents, effective discipline would be a much easier matter than it is at present.

Good work has been done during the year in beautifying the school-grounds. Arbor Day was celebrated very successfully at a large number of s hoois. In this district at any rate, the parents cannot, as a body, be charged with apathy towards a movement so full of splendid promise. Wherever the teachers have had sufficient energy to take the matter up heartily, and apply to the parents for assistance, they have met with a liberal response. Altogether, tree-planting has taken place at 33 schools. In many of the cases where nothing has yet been accomplished, the reason is to be found in the fact that the sites are not fenced, and of course, until that has been done, either by the Department or the residents, nothing permanent can be effected either in the way of planting trees or forming gardens.

The only schools not inspected during the year were the 6 referred to above as having been closed. Two of these, Murragang and Warwick were practically, though not formally, closed at the beginning of the year. The others, Tooloom, Sa dy Hills, Kangaroo Creek, and Nimbin. all collapsed before I had an opportunity of visiting them. In all 88 regular and 16 ordinary inspections were made. The calls upon my time have been so various that a larger number of ordinary inspections were made. The calls upon my time have been so various that a larger number of ordinary inspections was out of the question, especially as the first part of the year was, as usual, excessively wet. The progress of the regular inspections was greatly retarded by this circumstance, and in consequence very little time remained at the end of the year for secondary visits. Many incidental inspections were, however, made as occasion arose during the year. Of the 88 schools inspected, 77 were above, 5 up to, and only 6 below standard requirements. These results are good, and showing as they do, an improvement upon those of last year, may

observed between the two in almost every subject. This may be seen by reference to the table subjoined. Last year 2,955 pupils were examined, this year 3,670.

Subject	Number of	Percentage of	Percentage of	Increase or Decrease		
	Pupils examined	Passes for 1892.	Passes for 1891.	for 1899		
Reading Writing Dictation Arithmetic Grammar Geography English History Australian History Scripture Object Lessons Drawing Music French Geometry Algebra Mensuration Latin Needlework	3,670 3,670 2,626 3,670 1,173 1,173 1,173 218 3,480 3,670 3,670 3,670 18 118 23 35 19 1,335	90 87 71 79 71 66 54 61 62 65 60 54 33 68 78 62 57 87	90 88 72 78 77 71 50 74 61 67 60 55 76 71 71 51 35	Neither. Decrease, 1 per cent.  1		
Drill	3,673	37	55	Increase 2 ,,		
	<b>37</b>	64	79	Decrease 15 ,,		

A few remarks may be made respecting some of the subjects of instruction.

Reading.—In this branch, as in several others, a high percentage of passes is naturally looked for, and it seems to me that where the percentage falls below 80, there must be something wrong with the teaching. In this district the reading is generally fluent enough, and the articulation very fairly distinct, but the pupils in the upper classes are not so successful as one could wish in giving to their voices the sympathetic tone so essential to the best reading. This is especially noticeable in the treatment of poetry, whether the pupils read it or repeat the lines from memory.

Writing.—In a fair number of schools this subject is well taught, but in several instances I have had to complain to teachers of the very uncritical nature of their examination of the copy-books. Faulty letters are too often allowed to pass without comment. Yet it is only by constant showing that the pupil's eye can be trained to a just appreciation of well-formed letters

have had to complain to teachers of the very uncritical nature of their examination of the copy-books. Faulty letters are too often allowed to pass without comment. Yet it is only by constant showing that the pupil's eye can be trained to a just appreciation of well-formed letters

Arithmetic — The pupils are more proficient in the mechanical than in the mental portion of this subject. In many schools teachers have so many other subjects demanding their attention, that they are often unable to devote as much time as is necessary to training the thinking powers of the children by means of frequent solutions of arithmetical problems on the blackboard. Even in the lower classes the pupils should be taught the application of the simple rules by means of easy problems.

Grammar and Geography.—The passes in these subjects, 71 and 66 per cent respectively, are not so numerous as they should be Many teachers who handle other branches skilfully have a dry way of presenting these subjects. They make the one appear to be a set of indeous rules, the other an interminable string of names. The pupils lose interest in the lesson and, in the case of grammar particularly, begin to look upon it with a cordial hatred. When a teacher finds that his class as a whole dislikes a certain lesson, it is high time for him to revise his method of teaching that subject

History —This branch is well taught in only a few schools. The reason of this, I conceive, to lie in the fact that very few teachers address their pupils from full minds. Some of them, in spite of remonstrance, are satisfied with giving the little text-books to their pupils to read. In such cases the result is of course, a dismal failure. Others, again, who have mastered these text-books but never read anything else, are altogether destrute of any art in exciting the interest of the children in what ought to be one of their pleasantest lessons.

Dril'.—It is only in the larger schools that drill is effectively taught. The instruction in the small schools is in most cases co

various motions properly performed

Of the teachers as a body I am able to report favourably A few have given cause more or less serious for dissatisfaction, but the great majority of them have maintained their former reputations for ability and industry in the discharge of their duties. The pupil-teachers, of whom there are 21, are in almost every instance highly spoken of by the teachers under whom they are placed.

The following schools deserve special mention this year for having obtained high marks for general efficiency.

general efficiency

Ballina Primary and Infants'. Byron Creek. Corakı. Cudgen. Lismore Infants'

New Italy Pimlico South Wardell Woodburn Woodlawn

In conclusion, I may state that while there are defects to be remedied still, yet the work of the past year has been attended with a very fair measure of success, and I fully expect to find during the coming year a solid advance where progress is to be desired.

H. D. McLELLAND, Inspector.

Lismore, 28th December, 1892.

## ANNEX W.

## DISTRICT-INSPECTOR T. DWYER'S REPORT.

THE number of schools in operation in the Maitland District at the beginning of the year was as

Section of District	Public Schools	Provisional	Half time.	Evening Public	House-to house	Total.
Martland	71	5	2	! .		78
Newcastle	51			2		53
Musclebrook .	50	9	16	1	4 !	79
Dungog	60	9	10			79
Total	232	23	28	2	4	289

The following is a brief summary of the school work and extension carried out in this district

during 1892:—

Maitland Section.-Maitland Section.—A new infant department was completed and officially opened at Jesmond, and a new department for infants is in course of erection at Wallsend. In July, the Provisional School at Grenton was reduced to half-time rank, and worked in conjunction with Mandalong, which had been closed since November, 1891.

Improvements were effected to 35 school buildings and 12 teachers' residences by the District Inspector, at a cost of £299 0s. 8d.

Inspector, at a cost of £299 0s. 8d.

Increased activity was displayed by teachers and pupils in improving the school-grounds by tree-planting and the formation of flower gardens and borders. The following is a list of school-grounds which have been appreciably improved in this way, during the past few years, in the Maitland section. The list is in alphabetical order:—Aberglasslyn, Bolwarra, Brokenback, Branxton, Cessnock, Cooranbong. Dora Creek, Dunmore, Elderslie, Ellalong, Greta, Hinton, Horseshoe Bend, Iona, Jesmond, Lochinvar, Maitland East, Maitland West, Millfield, Minmi, Morpeth, Oakhampton, Payne's Crossing, Plattsburg, Pokolbin, Rothbury, Stanhope, Wallalong, Wallsend, Wallsend West, Wallsend Young. The Inspectors of this district have invariable favoured the formation of gardens, and the extension of arboriculture in connection with the schools under their supervision, as they know that the love of plants and flowers, and the study of their growth, history, and peculiarities, have a refining influence upon children, and tend to develop their perception to a keener appreciation of beauty in form and colour.

Newcastle Section.—A Provisional School was established at Warner, and an Evening Public School was opened at Stockton. A girls' department at Tighe's Hill, and additional buildings for infants at Hanbury and Wickham are in course of erection. Class-rooms have been added to the schools at Hamilton and Tighe's Hill. Improvements and repairs have been effected to 14 schools, and extensive works are in progress in connection with three others.

Musclebrook Section.—The school buildings at Belford, Cassilis, Merriwa, Borambil, Warkworth, Gundy, Gouldsville, and Giant's Creek were thoroughly repaired during the year, and minor improvements were done to many others.

Gundy, Gouldsville, and Giant's Creek were thoroughly repaired during the year, and minor improvements were done to many others.

Dungog Section.—In January, new schools, where none previously existed, were opened at Martin's Creek (Provisional) and Gloucester River (House). In May, an Evening Public School, which remained in operation for about three months, was opened at William Town. During the year, Tea Tree Provisional and Sugarloaf Half-time were reopened. Dusodie Half-time was converted to Provisional. Nelson's Bay and Warden Provisional were raised to the rank of Public, and Raymond Terrace was proclaimed a Superior Public School. Twenty-two buildings were repaired under the Inspector's supervision.

The number of schools in each section of the Maitland District at the close of 1892 is shown hereunder:—

Section or District.	Public Schools.	Provisional.	Half-time.	House-to-house.	Evening Public.	Total
I	<u> </u>	1			l	
Maitland	71	2	4			77
Newcastle		1			2	<b>5</b> 5
Musclebrook		9	16	4		79
Dungog		10	10	1	·····. }	83
Total	235	22	30	5	2	294

Three hundred and one schools were in operation in this district during some portion of the year.

With few exceptions, the schools are centrally situated, and afford more than sufficient floor space for the average attendance of the pupils attending them. The total amount of floor space for the whole district at the close of the year was 26,460 places, while the number of cubical spaces amounted to 27,482, an increase over 1891 of 678 and 692 respectively.

The number of pupils enrolled for the whole district during the year is 29,760; the multiple enrolments amount to 4,249; the net enrolment is, therefore, 25,511; the average attendance for the year is 17,551.8, which is 69 per cent. of the net enrolment. For last year the percentage of attendance to the net enrolment was 65.8, and for 1890, 65.

The number of pupils enrolled, and the average attendance during each quarter of the year for the whole district are shown below:—

Quarter of the year.	Number enrolled.	Quarterly average.	Percentage
March	23,474	17,176·6	73·
	23,457	17,239·3	73·4
	23,812	17,811·	75·
	23,520	17,363·6	74·

# Organisation.

Improvement in the organisation of all classes of schools is perceptible. The premises are better kept; cleanliness, neatness, and the orderly arrangement of school appliances show decided advancement. The records, including time-tables and programmes, are more neatly and accurately kept than heretofore; the classification of the pupils is conducted with increased care and skill; and the majority of the teachers realise the fact that to have their schoolrooms models of neatness, order, and cleanliness is of great advantage to their pupils, who receive therefrom an important silent lesson.

The discipline maintained in the schools of this district shows improvement over that upheld in them in former years. Recourse to corporal punishment is less frequent, and drill is better taught. The tone of the best schools has much advanced; the pupils therein are willing learners, and take pleasure in their work; they are orderly, and exhibit considerable self-reliance without any sign of compulsion.

The work of inspection for the year is shown in the following table:—

Section of District.	Regular inspections.	Second regular and ordinary inspections.	Total number of inspections.	Total number of pupils examined.
Maitland	79	76	155	5,619
Newcastle	55	50	105	8,117
Musclebrook	82	51	133	2,653
Dungog	85	46	131	2,470
Total	301	223	524	18,859

Of the 155 inspections effected in the Maitland section, 2 regular, Elderslie and Stanhope, were made by Inspector Waterhouse.

There is extensive educational machinery in operation in all parts of this district. It is carried on with energy and zeal on the part of the Department of Public Instruction, and with faithful and mostly successful labour on the teachers' side. An intelligent interest in the welfare of the schools is manifested by a considerable number of members of Public School Boards. The benefit to be derived from careful and judicious criticism of work (which can be done at ordinary inspections), and from the suggestions made by Inspectors from time to time, are now fully appreciated by the great bulk of classified teachers. teachers

The following list contains the names of the 26 schools in the Maitland section that obtained the The following list contains the names of the 26 schools in the Mailland section that obtained the highest marks for general efficiency at the regular inspections of the year. No school is named the general efficiency of which did not reach very fair. The names are in alphabetical order:—Brownmuir; Cessnock; Ellalong; Greta, Infants'; Horseshoe Bend, Infants'; Maitland East, Boys', Girls', and Infants'; Maitland West, Boys', Girls', and Infants'; Millfield; Minmi, Boys' Girls', and Infants'; Morpeth; Plattsburg, Boys', Girls', and Infants'; Wallalong; Wallsend, Boys', Girls', and Infants'; Wallsend West, Young, Wallsend, Wollombi.

The condition of the inspected schools in relation to the standard, and for each section of the district, is exhibited in the following table:—

Section of District.	Schools.	Above Standard.	Up to Standard.	Below Standard.	Total.
Maitland	Public Provisional Half-time Evening Public	66 2 4 1	3  	3  	72 2 4 1
	Total	73	3 -	3	79
Newcastle	Public	46  2	5 1 	1 	$\begin{array}{c} 52 \\ 1 \\ \cdot \cdot 2 \end{array}$
-	Total	41	6	1	55
Musclebrook	Public Provisional Half-time House-to-house	45 8 12 3	1  1 1	5 1 5	51 9 18 4
•.	Total	68	3	11	82
Dungog	Public	51 5 6 2	5 3 2 	6 2 2 	62 10 10 2 1
,	Total	64	10	11	85
	Grand total	253	22	26	301

It appears from this table that 91 per cent. of the inspected schools succeeded in exceeding or satisfying the standard, the percentage for each section being—Maitland, 96; Newcastle, 98; Musclebrook, 86; Dungog, 87. Last year 86 per cent. of the inspected schools exceeded or satisfied the standard, and the percentage for each section was—Maitland, 91; Newcastle, 98; Musclebrook, 86;

Dungog, 72.

The following table gives the names of the Superior Public Schools in the Maitland District, and shows the number of pupils from each school that succeeded in passing the Senior and Junior University examination for 1892:—

Schools.	Class of School.	Seniors.	Juniors.	Total.	Remarks.
Dungog	5		3	3	2 boys and 1 girl.
Hamilton	1		l	•••	1 .
Iaitland, East	3		4	4	2 boys and 2 girls.
Iaitland, West	1 .		}		
Inmi	<b>2</b>		l <b>.</b>	•••	
Tewcastle	1	2	18	20	All boys.
lattsburg	<b>2</b>	l	1	1	1 boy.
Raymond Terrace	5		l i		
Singleton	2		9	9	4 boys and 5 girls.
Vallsend	1		. 3	3	3 boys.
Wickham	1		16	16	All boys.
Total		2	54	56	-

The following ordinary Public Schools sent up successful candidates for the Junior examination, viz. :-

Catherine Hill Bay ..... Mosquito Island Wallsend West

In the 11 Superior Public Schools, there are fifth classes in the Primary Departments. In only 3 of these schools, however, have girls passed the Junior, viz.:—Dungog, Maitland East, and Singleton. When it is remembered that the standard of proficiency for fifth classes is designed expressly to enable

the teachers of these classes to prepare their pupils for passing the Junior examination during the ordinary course of instruction, and without in any way interfering with the organisation, discipline, and general routine of their schools, it is somewhat strange that successful candidates for that examination were not sent up from all Superior Public Schools. It is to be hoped that for 1893 an increased number of boys and a very much greater number of girls will succeed in passing these examinations from the Superior Public Schools of this District, in which such advantages for thoroughly preparing pupils exist.

The proficiency of the pupils examined in each subject of instruction, and the percentage of those who satisfied or exceeded the standard are shown in the following table:—

Subjects.	Number examined.	Percentage up to or above the Standard.
Reading—Alphabet	1,936	73
" Monosyllables	3,671	77
,, Easy Narrative	5,438	76
" Ordinary Prose	7,814	81
Total	18,859	78

Mensuration	1,708	59
Latin	283	75
Needlework	6,719	83
Drill	18,254	77
Natural ocience	542	82

Compared with last year, the percentages for Reading and Euclid are the same. There is an advance of 2 per cent. in the simple rules of Arithmetic, of 5 per cent. in the Compound Rules, and of 7 per cent. in the Higher Rules. Elementary Grammar is better by 2 per cent.; Advanced Grammar, by 4 per cent. Geography and Needlework show an improvement of 1 per cent. respectively. English History, Scripture, and Latin are better by 3 per cent. Drawing and Music have improved 4 per cent.; Algebra has advanced 12 per cent.; Mensuration, 13 per cent; Natural Science, 5 per cent.; Australian History, 6 per cent. Writing and Dictation are not so good by 2 per cent. French and Drill have fallen 3 per cent.

History, 6 per cent. Writing and Dictation are not so good by z per cent. From and History, 6 per cent.

Reading.—The teaching of this subject has been, on the whole, satisfactory. However, a higher degree of excellence could easily be aimed at. Schools in which word-grouping received little or no attention in the junior classes, failed to produce expressive reading. The style of reading in such schools is of a most commonplace type. Poetry receives due attention in most schools, and is frequently recited in a very pleasing manner. Spelling is tested orally, as well as by dictation, in the first, second, and third classes; and the results are creditable in the majority of schools.

Writing.—Vertical or perfectly upright writing is now practised in all of the best schools of this district, and with most satisfactory results. Jackson's series of copybooks is preferred in these schools to all others, and in schools in which the pupils are made to imitate the headlines with fidelity and perseverance the most gratifying results are met with.

Arithmetic.—Elementary mental arithmetic and tables should receive increased attention. The habit of counting on the fingers even in 2nd and 3rd classes is still met with. Long sums in compound addition are not sufficiently practised in 4th and 5th classes; and in these classes mental arithmetic is not what it ought to be.

not what it ought to be.

Grammar.—This subject being the art of speaking and writing correctly, teachers should be most careful in their own speech and composition, so as not to violate the rules of grammar, and furnish examples of inaccuracy or defective style to their pupils. Letter-writing on paper in 4th and 5th classes has not received much attention, and, except in a few of the more important schools, has been poorly

Geography is intelligently taught in schools conducted by teachers who carefully and regularly prepare their work. In schools taught by teachers who give instruction in mapping, the answering was

very satisfactory.

History, Object Lessons, and Scripture are very fairly taught by teachers who can give a lesson in these branches without the aid of a text-book (in the Inspector's presence) to refresh their memories.

Drawing, Drill, Music are well taught by teachers who have a good knowledge of them.

Geometry is very fairly taught. In two schools of the Maitland section the girls of the 4th

Algebra

Algebra is very well taught, and has improved during the year.

Mensuration is fairly taught. Were the teachers to show their pupils that the rules are deduced from the propositions of Euclid, higher results would be obtained.

Needlework is very well taught except in a few small schools.

Teachers.—As a body, the teachers of this district are well qualified for the discharge of their important duties. Their general character is good. They are faithful public servants, with but few exceptions; assiduous and successful in their labours; and show marked signs of progress in the acquiquisition of professional knowledge. During the year 1 teacher was promoted to class 1 A, under Article 103 of the Regulations, and no fewer than 10 obtained 1 B by examination. The instruction given to the pupil-teachers in the schools conducted by conscientious teachers has been thorough and effective. In some schools, however, there is a tendency on the part of the principals to shirk this important duty, and to perform it in a perfunctory manner. Such people should expect neither respect nor sympathy from the Department or its officers.

Pupil-teachers.—One hundred and seventy were employed during the year. As stated by me in previous reports, they are the backbone of the system. Their training and instruction should receive the most unremitting attention. With few exceptions, they are well conducted, studious, and helpful in their schools. The Saturday classes at East Maitland and Wickham continue to be regularly attended, and to be the means of conferring important advantages on the regular and industrious students.

and to be the means of conferring important advantages on the regular and industrious students.

The classification of the teachers, assistants, and pupil-teachers employed in each section of this district is shown in the subjoined table:-

Teachers and Assistants.

## Summary.

Seven new schools were opened during the year. Accommodation exists for 26,460 pupils. Every school in operation during any portion of the year received a regular inspection, and 234 had second inspections. The average attendance of pupils and the general efficiency of the schools have advanced. Tree-planting has been very general. School banks continue to be patronised. Teachers, assistants, and pupil-teachers are, on the whole, zealous in the discharge of their duties, and of studious habits. The work done over the whole district has been sound and progressive.

T. DWYER, District Inspector.

East Maitland, 5th January, 1893.

## ANNEX X.

# INSPECTOR McCormack's Report.

At the beginning of 1892 the Newcastle Section of the Maitland District had 53 schools in operation. In July a Provisional School was established at Warner, Lake Macquarie, and at Stockton an Evening Public School was opened in August. A school for girls at Tighe's Hill, and additional buildings for infants at Hanbury and Wickham are in course of erection. Class-rooms have been added to the schools at Hamilton and Tighe's Hill. Improvements and repairs have been effected in connection with the schools at—

Adamstown. Ash Island. Belmont. Carrington. Cook's Hill. Dudley. Hexham.

Islington. Newcastle, South. Stockton. Tighe's Hill. Waratah. Wickham.

Extensive improvements are in progress at Newcastle, Newcastle East, and Stockton. All works except minor ones were carried out under the supervision of the Architect. The 55 schools in the Newcastle Section are situated within easy reach of the school population. They are in a

very fair state of repair, and are adequately supplied with furniture and working materials. Floor space, allowing 8 square feet for each pupil, is provided in them for 8,713 children. The enrolment of pupils approaches 10,000, the average quarterly attendance is 7,400, and the ordinary attendance 8,000. The aggregate sitting accommodation is therefore sufficient, and, with three exceptions, the provision of places in each school is in excess of the number actually required. Close attention is given by teachers to the cleanliness, proper ventilation, and neat appearance of the rooms. Due care is taken of the furniture and stock. As a rule the classification of pupils is sound, and the registration correct. Most school-grounds have been considerably improved during the year. Tree-planting and garden cultivation have been actively and successfully carried on by teachers and pupils. Several gardens are well laid out, and the display of plants is varied and choice. At one school comfortable and ornamental seats, fixed under tall and branchy trees, provide pleasant accommodation for 120 pupils.

with the display of plants is varied and tender. At one school combination and of name as eas, free under tall and branchy trees, provide pleasant accommodation for 120 pupils.

With few exceptions, the pupils present a clean, neat, and intelligent appearance. The attendance averages 74 per cent. of the enrolment. In the majority of schools good punctuality is secured, a vigilant, regular, and judicious government is exercised, and school movements are effected with ease, quietness, and precision.

The schools and the departments under my supervision are ranked thus :-

Public Sch	Public Schools—Classes.				1	Schools a	ınd Depa	
I.	*****						<b></b>	12
II.				• • • • • • • •	•••••			9
III.	••••			<b></b> .	• • • • • • • •			9
IV.	• • • • • • • •		• • • • • • •					8
V.		• • • • • • •						3
VI.					· · · · · · • · · ·		• • • • • • •	4
VII.							• • • • • • •	4
VIII.	*******	• • • • • • •				• • • • • • •		2

<u>X</u> .					• • • • • • • • •			0
Ever	ning Pu	blic .			• • • • • • • • •	· · • • • • • • •	· · · · · · · · · · · · · · · · · · ·	2
Prov	risional		<b></b>					1

In the following table the enrolment and the average attendance of pupils for each quarter of the year are given :-

Quarter.	Pupils enrolled.	Average attendance.	Percentages.
March June September December	9,884	7,283·4	73·
	9,839	7,303·8	74·
	9,973	7,500·5	75·
	9,793	7,288·1	74·

This attendance, averaging 74 per cent. of the enrolment, is very satisfactory. Last year the average was 70 per cent.

During the year all schools received regular inspection, and all but 5 received ordinary inspection. The general condition of the schools is here given:—

Schools.	Below Standard.	Up to Standard.	Above Standard.
Public	1 0 0	<b>5</b> 1 0	46 0 2
Totals	1	6	48

All Schools but 1 either reached or exceeded the standard.

The proficiency of the pupils examined is given in the following table:-

Subjects.	Pupils examined.	Percentage up to or above Standard.	Subjects.	Pupils examined.	Percentage up to or above Standard.
Reading	8,117	72	Music	8,087 166	73
Writing Dictation	$8,117 \\ 6,449$	75 70	French	629	67 60
Arithmetic	$8{,}117$ $3{,}572$	58	Algebra	$135 \\ 1,210$	70 52
Geography	3,572 3,555	71 74	Latin Needlework	135 2,700	67 75
Scripture	8,100	72	Drill	8,100	73
Object Lessons Drawing	7,820 8,100	78 62	Science	<b>27</b> 9	79

These satisfactory results are the outcome of skilful and regular work. Compared with last year's results, they are higher in 13 subjects, equal in 2, and lower in 4. The teachers of the Newcastle, Wickham, Mosquito Island, Catherine Bill Bay, and Tighe's Hill Public Schools were successful in passing 41 pupils at the University Public Examinations this year.

The entire teaching staff consists of-

During the year seven teachers obtained first-class certificates by examination.

#### Pupil-teachers.

Class I.	Class II.	Class III.	Class IV.
15	11	29	38

As a body, the teachers discharge their duties with earnestness and judgment. The pupil-teachers are intelligent, studious, and well conducted. Special classes are held for them on Saturday mornings at the Wickham Superior Public School. Lessons in Latin, French, drawing, music, and drill are imparted by skilful teachers. Except in two cases, absences from these classes during the year were very few.

A Cookery School was opened in Newcastle in August last. The premises are central, suitable, and well equipped. The staff consists of a teacher and an assistant teacher. Sixty senior pupils of near Public Schools completed a course of elementary cookery early in December. They were examined by Mrs. A. Fawcett Storey, Directress of Cookery. Highly satisfactory results were obtained.

School work in the Newcastle section of the Maitland district has been successfully carried on this year, and the prospects for 1893 are good.

J. McCORMACK. As a body, the teachers discharge their duties with earnestness and judgment. The pupil-teachers

Inspector.

#### ANNEX Y.

#### INSPECTOR FLASHMAN'S REPORT.

DURING this year, the Half-time Schools at Coggan and Bylong, also the Public School at Wilpinjong were closed in consequence of diminished attendance. At the Upper Middle Brook a Half-time School was opened, and the Public School at Lower Middle Brook was converted into a Half-time School. The Provisional School at Gungal was raised to the rank of a Public School.

The year closed with the following schools in operation:-

Public	50
Provisional	9
Half-time	16
House	4
Total	79

The attendance at some of the country schools is still very unsatisfactory, and unless a higher The attendance at some of the country schools is still very unsatisfactory, and unless a higher average is maintained several of them will have to be closed during the ensuing year. A marked improvement in the attendance has taken place at nearly all schools situated in towns.

The buildings at Belford, Cassilis, Merriwa, Borambil, Warkworth, Gundy, Gouldsville, Giant's Creek, Broke, and Scone have, during the year, been thoroughly repaired, and minor repairs and improvements done to many others.

White ants are doing much damage to many wooden buildings. I have had a supply of anti-ant oil sent to several schools where these insects are very bad. I have found that when the oil is carefully used by a teacher who is anxious to get rid of the pest, the results have been most satisfactory.

All the teachers' residences are comfortable, suitable, and in good order; during the next year it is hoped that several additional residences will be built.

is hoped that several additional residences will be buil-

A new school-room to accommodate 100 pupils is being erected at Aberdeen; it is expected to be available for use early next year.

Speaking generally, the whole of the school property in this section is now in a satisfactory

The school-grounds in many instances are becoming year by year more attractive; the efforts made by some teachers in this direction cannot be too highly commended. The influence of a well kept school garden is most marked and wide spread; not only does it improve the school surroundings, but it cultivates and develops the tastes of the pupils for flowers, while it exerts a powerful influence upon many a poor home in the neighbourhood.

It is seldom, indeed, that I visit a school where vases of beautiful gay flowers do not form part of the school-room adornments; these silent but potent influences do more to mould and fa-hion young lives

school-room adornments; these silent but potent innuences do more to modification and facilities.

The 12 schools having the best kept and most attractive gardens are the following which are named in their order of merit:—Warkworth, Denman, Singleton, Roughit, Muswellbrook, Roughel, Aberdeen, Murrurundi, Parkville, Moonan Brook, Cassilis, Camberwell.

During the past year gymnastic appliances have been supplied to the play-grounds of several schools; these have been found to be most attractive to the pupils, as well as an aid to the full development of the muse es of many a child. The appliances provided at Sirgleton, Bulga, Murrurundi, and Muswell-brook are the best in the district. brook are the best in the district.

All the schools in this section received a regular inspection, and 51 received an ordinary inspection, the total number of inspections being 133, and the number of purils examined 2,653, about 200 more than last year.

In reviewing the year's results of inspection and comparing them with those of last year, I am of the opinion that the work done is very satisfactory, and in some cases an improvement upon that of previous years. Dictation, arithmetic, grammar, history, scripture, and drawing have been better taught in most schools.

The schools which received the highest marks for organisation, discipline, and instruction are:
Singleton Boys and Girls, Aberdeen, Belltree, Broke, Bulga, Denman, Mount Thorley, and Rix's Creek.

I am pleased to report that 5 girls and 3 boys from the Superior Public School, Singleton, passed the recent University Junior Examination.

The

Last year the number of schools below standard was 12

Last year the number of schools below standard was 12
In every case where low results were obtained suitable action was taken by the Department.
The organisation of the majority of schools still continues to be of a commendable character. Many teachers take a comprehensive view of their duties and obligations; nothing is overlooked or neglected; their school-rooms are pictures of neatness and attention; their lesson documents are drawn with such care as to call forth expressions of praise; the records of the school are kept with exemplary accuracy; their play-grounds are places of healthy, pleasing, and innocent amusement, while they themselves guide and direct the pastimes of their pupils. Some few teachers, however, are less praiseworthy, a few entirely neglect their play-ground duties; if they visit the grounds at all, it is as a detective rather than a welcome addition to a happy throng. Such teachers forget that it is in the play-ground that the best chances are given of studying the real character of children, and of exercising influences over their moral and physical being, which are not to be obtained in the class-room. The cold, distant, fault-finding teacher who never enters into the sports and joys of his pupils, may occasionally be respected, but he will be seldom loved.

The discipline of the schools is highly satisfactory; no case of excessive or unwise corporal punish-nas come under my notice.

Th	e teac	hers a	and	pupil-teacher	rs are	classified	thus:-

Five teachers were examined for promotion; four were successful. All the pupil-teachers, excepting one, gained promotion by examination.

Most of the teachers are hard-working, enthusiastic, conscientious workers; they are inspired with a love of their profession, and are anxious for their schools to stand well with the general public. They make themselves acquainted with the best thoughts of the leading educationists of the day, and are ever on the alert to learn and appropriate what may be of advantage to their schools. To these men's thoughts their professional work is ever present; they are always experimenting, frequently succeeding, occasionally failing, yet never becoming discouraged. Their methods are sufficiently elastic to accommodate themselves to any suggestion; yet they have sufficient acuteness not to allow their zeal for novelties to endanger their prospect of a successful school inspection.

The pupil-teachers in this section are respectable intelligent young persons, they have made

The pupil-teachers in this section are respectable intelligent young persons: they have made reasonable progress in their profession during the year, and they give promise of extended usefulness in

I am of the opinion that the educational requirements of this section have been well met during the past year.

ANNEX Z

Muswellbrook, 23rd December, 1892.

C. O. FLASHMAN, Inspector.

# INSPECTOR WATERHOUSE'S REPORT.

The schools in operation at the close of the year 1891 were classified thus:-

Public
Provisional
Half-time
Evening Public
-
Total

Work at all these schools, with one exception, was resumed after the midsummer vacation. In the exceptional case, viz., Miller's Forest Evening Public, the school was closed, in consequence of insufficient attendance, from the beginning of the year to May, when it was reopened, and again lapsed after a few weeks' duration. In January, new schools, where none previously existed, were opened at Martin's Creek (Provisional) and Gloucester River (House-to-house). In May an Evening Public School, which remained in operation for about three months, was opened at William Town. During the year Tea Tree (Provisional) and Sugar-loaf Creek (Half-time) were reopened, Dusodie (Half-time) was converted to Provisional, Nelson's Bay and Woerden (Provisional) were raised to the rank of Public, and Raymond Terrace (Public) was proclaimed a Superior Public School.

As a consequence of these changes the schools now in operation are :-- .

Public	62
· Provisional	
Half-time	
House-to-house	
Total	83

New schools at Webber's Creek (Provisional) and Branch River (House-to-house) will come into

operation next month, and bring the means of instruction within the reach of those hitherto without them. The other applications for schools are still under consideration.

Rather extensive repairs to nine schools and residences have been effected by the Architect's Department, whilst the Inspector has been responsible for repairs and improvements to twenty-two buildings.

buildings.

The adequacy of the accommodation may be judged from the following table, which give (I) the number of seats provided, and (II) the enrolment and average attendance:—

1	Allowing for each Child.		
	8 square feet.	100 cubic feet.	
Seats provided at the close of 1891	4,622 172	4,281 135	
Scats provided at the close of 1892	4,794	4,416	

II

Quarter.	Enrolment.	Average Attendance.
March  June September December	3,207 3,217 3,285 3,213	2,295·7 2,310·6 2,403·2 2,357·8

In nearly every school ample accommodation is provided, and, though in a few cases it is limited, it is sufficient to satisfy statute requirements.

## Organisation.

In the majority of cases the organisation of the schools is very satisfactory. Proper attention In the majority of cases the organisation of the schools is very satisfactory. Proper attention is paid to their ventilation; they are kept clean and neat, and in many instances are rendered attractive by the presence of flowers, ferns, or pot plants, by the display of suitable diagrams, properly arranged, and by neatly-framed time-tables and lesson programmes, in the ornamentation of which the teachers show both taste and judgment. The furniture and appliances are suitably arranged and well cared for, and the book-presses kept tidy. Sufficient attention is not, however, paid to the ruling of the slates used by the junior pupils, nor are the slate pencils kept properly sharpened. The classification is appropriate, except in a few instances in which inexperienced teachers make too many sub-divisions of the classes, or promote pupils before they have completed the work prescribed by the standards. The time-tables are constructed constructed with fair skill, and the lesson programmes make provision for a regular progressive course of study in the different subjects of instruction. In the subject of "Object Lessons" many teachers fail to notice that the lessons in the first and second classes should be upon the properties of common objects and materials, and upon common animals and vegetables. The records are kept with accuracy and neatness, and in most cases complete and correct returns are promptly forwarded, and reasonable care is taken of the preparaty of the Department generally.

and in most cases complete and correct returns are promptly forwarded, and reasonable care is taken of the property of the Department generally.

The impetus to tree-planting and the formation of flower-beds given by the inauguration of Arbor Day in 1890, and its annual celebration, has in many parts of this section of the Maitland district been most marked. The interest in the movement has not only been sustained, but extended, and the neat, well-kept, and attractive appearance of several of the play-grounds is very creditable to those concerned. The schools at which the most noticeable improvements have been effected are Booral, Chicester, Clarence Town, Euwylong, Fosterton, Malvern, Oakendale, Paterson, Stroud, and Telegherry.

## Discipline.

The discipline of the schools is one of their marked and pleasing features. With very few exceptions, the punctuality, regularity, neatness, and good behaviour of the pupils merit commendation. School operations are conducted with decorum, and the obedience rendered by the pupils is prompt and cheerful. School movements are executed with considerable precision, and at least elementary drill is taught in all the schools. Dumb-bells and poles have recently been supplied to the leading schools, and their proper use should tend to the physical development of the senior pupils.

The inspectoral work for the year may be summarised thus:-

85 regular inspections.

9 second regular inspections. 37 ordinary inspections.

2 regular inspections for the District Inspector.

Total 133 inspections.

i.e., every school received a full inspection, and 46 underwent a second inspection. Special duty in Sydney for 10 days prevented me from holding a larger number of ordinary inspections.

The following table exhibits the efficiency of the schools in relation to the authorised standard:—

	Below Standard.	Up to Standard.	Above Standard.	Total.
Schools in operation a full year at the time of inspection	9	9	61	79
Schools not in operation a full year at the time of inspection	2	. 1	3	6
Total	11.	10	64	85

It will be noticed that 87 per cent. of the schools have satisfied, or exceeded standard requirements—an improvement of 15 per cent. upon last year's results. It must, however, be borne in mind that to secure such favourable results it was necessary to reinspect 9 schools, which, on the first occasion, were

not in a very satisfactory state.

The schools of highest general efficiency (including organisation, discipline, and instruction) at the regular inspections, in order of merit, are:—

 Mundawa
 Mr. H. E. Hunt, removed.

 Telegherry
 Mr. A. J. Dransfield.

 Euwylong
 Miss A. A. Connolly.

 Stroud
 Mr. E. E. Mitchell.

 Binglebrah
 Mr. H. A. McLean.

 Booral
 Mr. W. McKnight.

 Dungog
 Mr. C. E. Broome.

 Raymond Terrace
 Mr. J. P. Green.

 Gresford
 Mr. W. J. Parker.

The results of the examination of the pupils, and (for the sake of comparison) the percentage of passes last year are given below:—

Subjects.	Number of Pupils examined.	Percentage up to or above Standard.	Percentage up to or above Standard in 189
Reading	2,470	87	82
Writing	2,470	87	84
Dictation	2,100	75	73
Arithmetic	2,470	72	70
Grammar	992	77	69
Geography		76	74
English History	981	70	69
Australian History	302	75	68
Scripture and Moral Lessons	2,312	82	79
Object Lessons	2,447	86	83
Drawing	2,447	86	80
Music	2,004	81	74
Euclid	153	68	76
Algebra	48	75	65
Mensuration	$2\overline{29}$	58	54
Latin	21	76	83
Needlework	1,050	86	82
Drill	2,280	79	67
Natural Science	39	87	83

A comparison of the percentages obtained this year with those gained in 1891 reveals the fact that there is an improvement under every heading except Latin and Euclid.

The teachers, as a whole, have worked conscientiously and zealously, and with a very fair degree of success. All the pupil-teachers, with one exception, have been favourably reported upon by their teachers. They are of good repute, studious habits, and are becoming increasingly useful.

Particulars

Particulars with regard to the status of the teachers and pupil-teachers employed are supplied by the following table:

	I. A.	I. B.	II A.	II. B.	III. A.	III. B.	III. C.	Unclassified.	Total.
Teachers		1	3	4	21	14	10	25	78
Assistant Teachers					2	1		1	4

	Class I	Class II.	Class III.	Class IV.	Total.
Pupil-teachers	2	1	3	2	8.

Since my last report, 1 teacher has been promoted for good service, in accordance with paragraph 103 of the Regulations; 9 others have, by examination, gained a classification, or been advanced to a higher grade.

1. The accommodation provided by the existing schools is ample and well distributed.

2. All the schools in this section received a regular inspection, and 54 per cent. underwent a second inspection.

3. Eighty-seven per cent, of the schools satisfied or exceeded standard requirements—an improvement of 15 per cent.

4. The proficiency of the pupils is higher than it was last year.

5. The outlook for the year 1893 is decidedly promising.

J. WATERHOUSE.

Inspector.

Dungog, 29th December, 1892.

#### ANNEX Z1.

#### DISTRICT-INSPECTOR O'BYRNE'S REPORT.

THE following is a statement of the number of schools or departments that were in operation for the whole or part of the year in the Wagga Wagga District :-

Public	233
Provisional	54
Half-time	32
House-to-House	13
Evening	0
Total	332

Eighteen of the above are entirely new schools, brought into operation since my last report. These

Eighteen of the above are entirely new schools, brought into operation since my last report. These new schools are situated as follows:—

Wagga Wagga Section:—Wagga Wagga South, Boys, Girls, and Infants; Derry, Yanko, Eulenstein, Henty, Green's Gunyah.

In Hay Section:—Bynya, Tarrawingie, Strathmore; Alma, Girls.

In Albury Section:—Lobbs' Hole, Carabost.

And in Young Section:—Cowra, Infants; Tumbleton, Winderahdeen, and Wheogo.

The schools that were closed for small attendance were:—Kildary, Bloomfield, Milbrulong, Tootal, Ballast Quarries, Ulandra, Dingi Dingi, Kingvale, Cal Cal, Tamar, Whealbah. It is probable that several of these will reopen, under itinerant teachers, during the year 1893.

All arrangements have been completed for opening new schools at Uley, Wantiool, and Tooyal, at the commencement of the new year.

Applications were received from various places for the establishment of small schools, but in consequence of the sparseness of the population, or the unwillingness of the residents to give the necessary guarantee for supplementing the teacher's salary, when necessary, several of these applications had to be declined. Lists of such places are given in the Inspectors' reports.

The school accommodation was further increased by enlarging the schools at Gwynne and Brungle Camp, and by providing class-rooms at Coolamon and Lake Albert.

Camp, and by providing class-rooms at Coolamon and Lake Albert.

## Accomodation.

In estimating the school accommodation two standards of measurement are adopted—8 square feet of floor space, or 100 cubic feet of air space for each pupil. The calculations on both standards are given in this report. After making due adjustment for the changes before noted I find that the total school accommodation in the Wagga Wagga District stands at present as follows:—

,	Allowing 8 square feet for each pupil.	100 cubic feet each.
Accommodation at end of 1891		20,511
Increased accommodation in 1892	1,607	1,937
•	<del> </del>	
Total accommodation in 1892	<b>22,</b> 993	22,448

The average enrolment for the year was 16,376, and the average attendance for the year was . It will thus be seen that the accommodation, tested by either standard, is well ahead of all 11,492. reasonable requirements.

Buildings, repairs, and other works, done under the supervision of the Inspectors:

Twelve small schools were built under the supervision of the Inspectors, at a cost of £845 19s. These were Derry, Henty, Eulenstein, Green's Gunyah, Wantiool, Wheogo, Tumbleton, Winderahdeen, Grogan, Warrangong, Wemmera, and Coreen. Warrangong, Wemmera, and Coreen are to replace old buildings.

Teachers' residences were erected at Grong Grong and Monteagle, at a cost of £386. Seventy-seven school-houses were repaired, or supplied with means of conserving water, at a cost Seventy-seven school-house the first state of £769 cs. 5d.

Twenty-seven residences were repaired, at a cost of £270 7s. 6d.

New schools at Tooyal and Calafat were not quite finished at the end of the year.

New weather-sheds were erected at Blowering and Wallendbeen.

Inspection

## Inspection.

I am glad to be able to report that, in consequence of favourable weather, and through the unflagging zeal of my colleagues, all the schools except one were fully inspected and reported on. The school not inspected—Tarrawingie, in the Barrier—was only brought into operation late in the year. The condition of the schools inspected in relation to the standard of proficiency is exhibited in the following table: following table:

Kind of Schools.	Below.	Equal to.	Above.	Total.
Public Provisional Half-time House-to-house	12 11 5 3	29 10 7 4	191 33 20 6	232 54 32 13
Total	31	50	250	331

This shows an increase of about 4 per cent. on last year's results.

The percentage of "passes" on the various subjects of instruction is given hereunder:

Subjects.	Percentage of Passes.	Subjects.	Percentage of Passes.
Reading Writing Dictation Arithmetic Grammar Geography History. Scripture Object Lessons. Drawing	80 79 80 76 75 78 74 76 80 76	Music French Euclid Algebra Mensuration Latin Needlework Drill Natural Science	79 79 75 71 54 74 80 79 83

The following shows the number of pupils examined in each section of the district:-

Albury	. 2,444 in 90	schools
Hay		**
Wagga Wagga	2,774 in 82	•
Young		
5		

There has been no change in the Inspectoral Staff during the year.

## Teaching Staff.

The staff for working the 332 schools consists of 364 teachers and assistants and 72 pupil-teachers Their classifications are given in the subjoined tables:—

# Teachers and Assistants.

Sections.	I A.	IB.	II A.	II B.	III A.	III B.	III C.	Unclassified.	Total.
Albury	•••	1 2 1 6	8 19 11 8	5 7 3 6	25 16 19 29	8 14 14 9	8 6 7 7	29 35 25 36	84 99 80 101
Total	•••	10	46	21	89	45	28	125	364

## Pupil-teachers.

Sections.	Class I.	Class II.	Class III.	Class IV.	Total.
Albury Hay Wagga Wagga Young	4 1 6 6	2 1 3	6 6 3	6 10 9 9	12 18 21 21
Total	17	6	15	34	72

The teachers are, as a rule, a steady, industrious, and improving body of public servants. Considering that so large a number of persons are scattered over so wide a tract of country, often remote from any central supervision, it is marvellous how few complaints of any significance are heard against any of them. This, I think, is owing to the careful selection, to the good training our teachers now receive, and to the high estimation in which the teaching profession is now being held by the public. I have not heard a complaint of a grave nature against any teacher in this district during the year.

The pupil-teachers continue to be an important factor in the work of the primary schools in this Colony. They do a large amount of the heavy routine work, and they do it well, at a small cost. The character and efficiency of the small schools throughout the country districts are being very much raised by the appointment of ex-pupil-teachers.

The total amount of school fees paid during the year was £6,318 4s. 7d., being an increase of £346 0s. 1d. on last year's receipts. This increase would certainly have reached £500 were it not for the almost total cessation of the payment of fees at Broken Hill during and after the "strike."

General

#### General Summary.

Finally, I am justified in reporting:—

1. That the year has been favourable for school attendance and inspection, and that these favourable conditions have been fully availed of.

2. That a considerable number of new schools have been opened.

3. That a very large amount has been judiciously spent by Inspectors in repairing and improving school house and toochor' residences.

school-houses and teachers' residences.

4. That a reasonable advancement in all points has been made by the schools in the Wagga Wagga district during the year.

Wagga Wagga, 3rd January, 1893.

G. O'BYRNE. District Inspector.

## ANNEX Z2.

#### INSPECTOR WRIGHT'S REPORT.

At the end of 1891, there were 86 schools in operation in this district, and during 1892 2 new schools, viz., Lobb's Hole Provisional and Carabost Half-time were opened, and 2 schools, South Humula Half-time and Upper Tumberumba Half-time, which were temporarily closed in 1891, were reopened. There were, therefore, 90 schools in operation during some portion of the year, but of these, 2, viz., Ballast Quarries Public and Ulandra Provisional, were closed owing to the limited attendance, so that there are now 88 in operation. The classification of these schools is as follows:—

Public Schools Provisional Schools Half-time Schools House School	13 18
Total	

New schools will be opened early in 1893 at Cumberoona and Munderoo, and an application for the establishment of a Provisional School at Butherwah, near Urana, is still under consideration. The requirements of the district are well met, and it is not likely that there will be many applications for new schools during 1893.

#### Inspection.

Every school open during the year was regularly inspected, and 8 ordinary inspections were made. The efficiency of the schools is shown in the following table:—

Class of Schools.	Below Standard.	Up to Standard.	Above Standard.
Public Provisional Half-time House	2	7 1 1	44 11 14 1
Totals	11	9	70

It will thus be seen that 87.7 per cent. of the schools in the district were up to standard requirements. This is 3 per cent. above the results obtained last year, and shows that the teachers, as a whole, are industrious and intelligent.

The attainments of the pupils in the principal subjects of examination are shown below:

Subject.	Number of Pupils examined.	Percentage up to o above Standard.	
Reading Writing Dictation Arithmetic Grammar Geography English History Australian History Scripture. Object Lessons Drawing Needlework	2,242 1,035 1,034 1,027 234 2,352 2,346 2,351	75·5 68·8 77·5 70·4 68·3 74·4 64·6 70· 71·5 74·3 66·	
Needlework	933 <b>2</b> .391	78·8 68 6	

In all subjects, except Grammar and Australian History, these results are higher than those obtained last year, and the improvement is especially marked in Dictation and Arithmetic, two of the most important subjects, the latter of which is taught much more thoroughly and systematically than it was a few years ago. Drill has also received much more attention than was previously bestowed on it, and in most cases the teachers seem to be alive to the fact that physical training is necessary for the proper cultivation of the mantal families proper cultivation of the mental faculties.

## Accommodation.

At the end of 1891 accommodation was provided for 4,550 pupils, allowing 100 cubic feet of air space for each pupil. During 1893 places for 329 were lost by closing schools, &c., while new places for 746 were provided by the erection of new buildings. There is thus a total gain for the year of 417 places, there being accommodation now for 4,967 scholars. As the enrolment did not exceed 3,500 at any time during the year, it will be seen that ample provision has been made for properly accommodating the children. modating the children.

# Buildings, Grounds, &c.

The following works were executed during the year under the supervision of the Inspector:

One new building was erected, at a cost of £147 16s. 6d.; 24 schools and residences were repaired at a cost of £146 6s. 6d., and 1 weather-shed was erected for £38 15s.

Under the architect many new schools and residences have been erected, and several buildings

have been thoroughly repaired.

The planting of school-grounds has now become a very noticeable feature in the district, and both teachers and pupils take a deep interest in the work, and attend to the trees, &c., with care and assiduity. The following teachers deserve special mention for the work they done in this respect:—Mr. Manus, of Black Range; Mr. Daley, of Bowna; Mr. Buggy, of Corowa; Mr. Godfrey, of Germanton; Mr. Kullmer, of Huon; Mr. Cragh, of Shepardstown; Mr. Spence, of Thurgoona; and Mr. Carmody, of Urana. Urana.

Teachers.

The classifications of the teachers and pupil-teachers are shown in the following table:-

				1				o	
Position.	1 A.	1 B.	II A.	II B	III A.	III B.	III C.	Un- classified.	Total
Teachers and Assistants	•••••	1	8	5	25	8	8	29	84
	Clas	s I.	Class	s II.	Class	s III.	Cla	ss IV.	Total.
Pupil-teachers	4		2					6	12

#### Work-mistress, 1.

Many of the unclassified teachers are ex-pupil-teachers, who have had three or four years practical training under experienced masters. Their employment as teachers of small schools has proved most satisfactory in every way, and has materially increased the efficiency of the schools.

As a whole, the teachers are diligent and capable, and they work, both as teachers and citizens, to promote the interests of the localities in which they reside.

All schools were fully inspected; in emetercy the schools are in a consisting educational requirements of the district are well met; and the outlook for next year is promising.

STEWART WRIGHT, All schools were fully inspected; in efficiency the schools are in a satisfactory condition; the

Albury, 30th December, 1892.

Inspector.

#### ANNEX Z3.

## INSPECTOR FRIEND'S REPORT.

THE Young section of the Wagga Wagga District comprised, in December last, 92 schools. One of The Young section of the Wagga Wagga District comprised, in December last, 92 schools. One of these, Kingvale Public, lapsed in March for want of sufficient attendance. During the current year, an Infants' department has been brought into existence at Cowra, and schools have been established at Tumbleton, Winderahdeen, and Wheogo—the last of these as a Half-time in conjunction with Piney Range, which was previously in operation as a Provisional. There are therefore 95 schools under my supervision at present. Others will open shortly at Tyagong, Grogan, Willundry, and Mulyan. Dinga Dinga will, in all probability, reopen. Applications have been received from Wyalong and Mimosa, and petitions are expected from Deep Creek, near Temora, and Upper Balabla, near Tubbul. Hence there will be 100 or more schools in my inspectorate during the early part of the ensuing year.

The following petitions for schools have been dealt with this year:-

Place.	Result.
Scrubby Řush	Declined. Half-time School established. Referred to Yass Inspector, the place being in his district. House-to-House School offered, but declined by residents. Declined for the present. Provisional School sanctioned. Reopened as House-to-House School. Provisional School sanctioned.

The works done under the Inspector's direction may be thus classified: -

		Accomm			
Name of School	Object.	At 8 square feet per child.	At 100 cubic feet per child.	Cost	
Tumbleton Winderahdeen Warrangong Grogan Wheogo	To replace old building New	$\begin{bmatrix} 42 & , & \\ 52 & , & \end{bmatrix}$	41 ,, 34 ,,	£97 10s.	

- A teacher's residence at Monteagle cost £136. Repairs to 29 school-rooms cost £360 3s. 3d.
- (c) Repairs to 29 school-rooms cost £360 3s. 3d.
  (d) Repairs to 14 school residences cost £147 19s. 6d.

(d) Repairs to 14 school residences cost £147 19s. 6d.

A new Infant's School at Cowra, and important repairs at Cootamundra, Young, and Jindalee, have been carried out by the Architect, who has in progress substantial and commodious school buildings at Muttama and Yeo Yeo. The buildings provide more than sufficient accommodation for the pupils; they are well placed, suitably equipped with the needful educational appliances, and mostly in good repair. Their neat and well-kept appearance does credit to the teachers, and not a few of them present a pleasing aspect in having flower gardens, &c., the voluntary work of the pupils.

Every school in this district received a regular inspection, and 45 an ordinary. Three of them were visited a second time for the latter purpose. The total number of inspections made was 144. A distinct advance has been achieved in the matter of organisation, and the schools are more efficiently managed than formerly; but a disposition to work their classes (especially the first), in too many divisions, is still apparent in some of the teachers of small schools. This has been corrected as far as nossible, and a proper basis of classification submitted to those deficient in this important branch of possible, and a proper basis of classification submitted to those deficient in this important branch of school organisation.

The

The disciplinary condition of almost all schools is of high order. The children, in the vast majority of cases, are diligent, tractable, becoming in their demeanour, and neatly dressed; though in some bush schools they are wanting in confidence. It is to be regretted that, where this last condition exists, it does not seem to occur to the teachers that the defect could be remedied by judicious and

proper training in school.

Generally speaking, the instruction may be pronounced well regulated, penetrative, and profitable.

The efficiency of the teaching, as disclosed by the regular inspections, is shown in the following table:—

	Estimated Proficiency.						
Subjects.	Total number	Number					
	examined.	passed.	For 1892.	For 1891.			
Reading—Alphabet	95	78	82	68			
" Monosyllables	640	564	88	75

Drill	2,290	1,843	80	65			
Natural Science	840	711	85	78			

It will be seen that, in every subject except mensuration, the results are higher than those secured It will be seen that, in every subject except mensuration, the results are higher than those securca last year, and that in several instances the improvement made during this year is very substantial. More prominence should be given to mensuration, to a systematic course of mental arithmetic, to word meanings, and to the subject matter of the reading lessons. The reading is often taught in such a fashion that it is unsuccessful as a means of intellectual development. The teachers certainly aim at securing correct pronunciation, fluency, and the other points of good reading; but, treated as it is by some of them, the pupils are not rendered familiar with their mother tongue, and the reading lesson, instead of acting as a vehicle for the communication of general knowledge, misses one of the most important ends it is intended to serve. Drill, too, in a large number of schools, continues to be of a very superficial character; but to serve. Drill, too, in a large number of schools, continues to be of a very superficial character; but usually this is through no neglect on the part of the teachers, who do as much justice to the subject as their limited acquaintance with it will allow. In my last report I made a suggestion relative to the

As a rule the schools are properly respected, and the marked efficiency of some of them has placed them high in public estimation. The following merit special mention for the work done:—Bagdad, Bullokreek, Burrangong Heights, Calare, Clarendon, Cootamuadra Infants', Cowra Primary, Holmwood, Holy Camp, Koorawatha, McHenry's Creek, Quandong, Tipperary Gully, Wambanumba, Warraderry, Warrangong, Wattamadara, Wombat, Young (boys', girls', infants'). The most efficient Provisional Schools are Burnt Hut Creek and Kikiamah.

Four schools in this district were represented in the recent University examinations. Young Superior Public, with 25 juniors and 1 senior, has gained second place among the Public Schools of the Colony, as regards the number of successful candidates. The other passes were—Cowra Superior Public, 5; Grenfell Superior Public, 4; Wombat Public, 2; making in all, 36 juniors and 1 senior.

The next table illustrates the number of schools above, up to on below standard in

The next table illustrates the number of schools above, up to, or below standard :-

	Above Standard.	Up to Standard.	Below Standard.
Public Provisional Half-time House-to-house	72 13 4 2	1  	1 2 
Totals	91	1	3

The pupils are, in most places, fairly regular in their attendance, but in a few localities the parents continue to give symptoms of the uncorcern they feel for the education of their children, by keeping them at home for the sake of their services, or for no definite reason. The teaching staff of this section is classified thus :-

	I A.	IB.	2 A.	2 B.	3 A.	3 B.	3 C.	Unclassified.
Teachers and mistresses	•••	5 1	7	4 2	27 2	9	7	35 1
Totals		6	8	6	29	9	7	36

Pupil-teachers.

Class I.	Class II.	C'ass III.	Class iv.	
6	3	3	9	

I can speak in very high terms of the character, and sense of duty, of almost all teachers under my supervision. In one or two schools, however, I noticed that they performed their daily work with a mechanical listlessness which indicated that their duties were irksome to them. Naturally, in the at sence of a stimulus to exertion, the children displayed little interest in their lessons, and their proficiency in them was correspondingly small. Sui able action, in the shape of removal to less important positions, and reduction of certificates, has been taken to meet the cases of teachers of this stamp.

To conclude:—

(a) Every school received a regular, and 45 an ordinary inspection.
(b) The schools are liberally distributed, and centrally situated. With few exceptions, they are

in good repair.

(c) The accommodation provided is in excess of requirements.

(d) A retrospect of the year's work reveals a marked improvement over that of 1891, and there is no reason to suppose that, in point of efficiency, the schools will retrograde or remain stagnant during

Young, 26th December, 1892.

CHAS. W. FRIEND,

Inspector.

#### ANNEX Z4.

. INSPECTOR TEARSON'S REPORT.
1. The adequacy of the means of education as regards amount and distribution:—  At the close of the year 1891, there were 62 schools in this section classified as under:—  Public
Provisional 8 House-to-House 4
Evening2
Total 62
Conargo Public, and the two Evening Schools were closed, and Strathmore Provisional, Alm Girls, and Broken Hill Girls were established; thus the year 1892 began with 62 schools.  - During the year, 3 schools were closed, owing to diminished attendance. These were Tama Public, and Cal Lal and Whealbah Provisional. Conargo Public was reopened, Bynya Provisional and Conargo Public was reopened.
Tarrawingie Public were established. Mount Browne Provisional was raised to the rank of Public.  The total number of schools open during the year, therefore, was 65, and the 62 in operation a

the end of the year were classified as 51 Public, 7 Provisional, and 4 House-to-House. These changes are summarised thus :-

Schools opened as new Schools reopened..... Schools in operation during some portion of the year
Schools in operation during the whole year
Schools in operation at end of the year

The educational requirements of this section are well met by existing schools.

2. The actual condition of the schools as elicited by inspection:

Of the 65 schools in operation during the year all except one were fully inspected.

The only school uninspected was Tarrawingie, which was established on the Barrier after my visit to that portion of this very extensive district.

In addition, 17 schools received an ordinary inspection, and one school (Maude) was fully inspected twice.

twice.

I also inspected, at the request of the District Inspector, Wagga Wagga Superior Public Girls'; and Wagga Wagga South Boys' Schools. My inspections were therefore:—

Regular.... Ordinary Regular (Wagga Wagga) ..... 

Total ..... The efficiency of the schools, as elicited at inspection, were :-

Schools.	Below standard.	Up to standard	Above standard	Total
Public Provisional House-to-house	1	1 	47 8 2	51 9 4
	6	1	57	61

Thus 90 per cent. has satisfied standard requirements.

Comparing these results with 1891, we have:

	Year.	Schools inspected.	Up to or above standard.	Percentages.
1891		66	58	88
1822		64	58	90

Thus an improvement of 2 per cent. has been shown in the efficiency of the schools.

The schools of highest efficiency are in order of merit:—
Broken Hill Boys and Girls, Alma Boys, Deniliquin Infants, Hay Primary, Broken Hill North Boys and Girls, Alma Girls and Infants, Gunbar, Hay Infants, Broken Hill North Infants, Deniliquin Primary, Wentworth, Round Hill, Silverton, Broken Hill Infants, and Wilcannia.

The

The efficiency of the following schools is below the standard:—Conargo, Moulamein, Tibooburra, Strathmore, Bourton Terrace, and Tori.

The subjects, the number of pupils examined in each subject, the number who passed, and the percentages up to or above the standard are hereunder tabulated:---

Subjects,	Pupils examined.	Pupils passed.	Percentages up to or above standard, 1892.	Percentages up to or above standard, 1891.
Reading Writing Dictation Arithmetic Grammar Geography English History Australian History Scripture Object Lessons Drawing Music French Euclid Algebra Mensuration Latin Needlework Drill Natural Science	3,363 26 145 27 37 26 1.118	3,035 2,990 2,490 3,061 868 870 881 188 2,999 3,122 2,387 2,907 20 114 18 25 18 914 3,035 51	82·9 81·6 92·5 83·8 82·3 83·3 83·5 85·0 83·2 87·9 86·4 76·9 78·6 66·6 67·5 69·2 81·7 84·6 78·4	90·0 86·8 84·4 89·2 89·1 82·9 82·7 95·3 83·4 91·1 81·6 89·4 100·0 97·3 93·7 90·4 81·2 86·7 91·0 94·0

An improvement is therefore shown in Dictation, Geography, History, and Drawing; Scripture is the same, while the other subjects show a retrogression.

In several of the smaller schools Drill, Mental Arithmetic and even Object Lessons are not regularly and systematically taught. Generally speaking the organisation and discipline of the schools show an improvement on last year, and the government, with few exceptions, is more kindly, uniform, and judicious.

Arboriculture has been carried on in many schools, but, unfortunately, with only tolerable results, owing to the unfavourable climate. Hay flower garden and Balranald vegetable and flower garden deserve special commendation.

3. Adequacy of school accommodation :-

-J	
Accommodation existing at beginning of 1892	6,000
Additional accommodation provided	314
Accommodation lost by closing of schools, &c	253
Accommodation existing at end of 1892	
December quarterly enrolment	
December quarterly average	8,650.6

It is therefore shown that the accommodation provided is ample.

The following new buildings have been erected :-

Schools.	Accommodation.	Object.	Supervision.
Acacia Dam Tarrawangie Bynya Strathmore	27	To replace old New	

Under the Inspector's supervision repairs and improvements have been effected to 14 schools, at a cost of £204, and to 3 residences, at a cost of £15 2s. 6d. There are no buildings or additions in progress under my supervision.

Teaching Staff

				eaching Bi	ay.

		Total	Teachers	of all ran	ks	·····	•••••	·····	119

Collectively, the teachers are respectable, intelligent, and zealous in their work, and are, with very few exceptions, highly esteemed by the parents and general public.

All schools but one received a regular inspection.
 The efficiency of the schools has improved 2 per cent.
 The outlook for 1893 is promising.

Hay, 29th December, 1892.

T. PEARSON, Inspector.

ANNEX

#### ANNEX Z5.

#### DISTRICT-INSPECTOR LONG'S REPORT.

DISTRICT-INSPECTOR LONG'S REPORT.

The divisions of my district for inspectoral supervision have remained unchanged, and consist of the Eastern or Mudgee Section, under Mr. Inspector J. P. Rooney, the Western or Dubbo Section, under Mr. Inspector J. L. Smith, and the Central or Wellington Section, under the District Inspector.

The year opened with 228 schools in operation in the district. An infant department has been added to the Wellington School, and schools have been established at Mitchell's Creek, Leadville, Myrangle, Muddy Creek, Capertee, Kilgcola, Nulla Mountain, Bullbodney, and Breelong West. The following schools have been closed, viz., Nubrygyn, Gowangreen, Springfield, Lower Tallawang, Pandora's Pass, Brewarrina Mission, Coonabarabran Evening, and Brightling Park. The Gumbalie School has not been in operation during the last three-quarters of the year. The number of schools in operation at the end of the year is thus 229. Of these, 100 are in the Mudgee Section, 67 in the Dubbo, and 62 in the Wellington Section. No locality, where the circumstances admit of the application of any of the provisions of the Act relative to the establishment of schools, is without means of education. In the more remote parts of a district, however, which extends to the boundary of the Colony on the north, and to the Darling and Paroo Rivers on the west, there must, while the present modes of settlement continue, always be isolated cases, which no State system of education can reach. Excepting these cases the always be isolated cases, which no State system of education can reach. Excepting these cases the existing schools satisfy the educational wants of the district. The buildings in which they are conducted are, with few exceptions, in good, serviceable condition; they afford sufficient accommodation, and are well supplied with all necessary furniture and educational appliances. Under Inspectors' supervision, 9 school-buildings, 1 residence, and 1 weather-shed, have been erected, 1 school-room enlarged, and 39 school-rooms and 9 residences repaired, at a cost, in all, of £1,323 5s. 9d. Of this sum, £455 7s. 9d. has been errorled in preserve active. been expended in my own section.

been expended in my own section.

The buildings in use at the end of 1891 sufficed for the accommodation of 12,388 pupils, at 8 feet of floor space for each. By the erection of new buildings, &c., 707 additional places have been provided, and, by the closing of schools and the giving up of old buildings, 238 places have been lost. The buildings in use at the end of the year contain, therefore, places for 12,857 pupils. The average enrolment for the year was 10,085-7, and the average daily attendance, 7,129-4. The highest enrolment and average attendance for any quarter were 10,199 and 7,337-0 respectively. The accommodation provided by the school-buildings of the district, is, therefore, in the aggregate, considerably in excess of actual requirements, and I am not aware of any individual case in which it is less than is required by regulation for the attendance. The average number of children present each day in the schools of the district was 71.8 per cent. of the mean quarterly enrolment, while for the preceding year it was 68 per cent. This is a marked improvement, and must indicate satisfactory regularity in the attendance of children of statutory school age. Legal proceedings for failure to send children to school were taken in 163 cases, and in 133 conviction and a penalty resulted, the remainder, excepting one not yet completed, being withdrawn or dismissed. withdrawn or dismissed.

The enrolment and attendance for each quarter of the year are shown in the following table:-

Quarter.	Enrolment.	Average attendance.
First	9,941 10,139 10,199 10,063	7,231·7 7 015·7 7,337·0 6,933·2

Of the 236 schools in operation during the year, all excepting three in the Dubbo section, received a regular inspection, and 73 a second or ordinary inspection. The following tabular statement exhibits in detail the inspections effected in the several sections of the district:

Section.	Number of schools.	Regular inspections.	Ordinary inspections.
Wellington Mudgec Dubbo Total	64	64	16
	102	102	57
	70	67	0
	236	233	73

Two of the regular inspections in the Wellington section were by Mr. Inspector Smith, and 6 of

those in the Dubbo section by the District Inspector.

In the following schedules is shown the relation to standard of each school inspected in regard to general efficiency, as deduced from the marks awarded for organisation, discipline, and proficiency of the pupils :-

Above Standard.—Amaroo, Baker's Swamp, Ballarah, Cobar, Cobborah, Cumnock, Galwadgerie, Geurie, Gulgullendah, Kerr's Creek, Maryvale, Mitchell's Creek, Molong, Mullion Creek, Murrumbidgerie, Nymagec, Nyngan, Rocky Ponds, Sandy Creek, Spicer's Creek, Stuart Town, Suntop, Terra Bella, Warne, Wellington Primary, Wellington Infant, Yeoval, Bara Creek, Beryl, Botobolar, Burrundulla, Black Springs, Camboon, Canadian Lead, Coolah, Coomber, Cooyal, Crudine, Cudgegong, Cudgebegong, Cullenbone. Dapper, Dungaree, Eurunderee, Frome's Creek, Grattai, Gulgong, Guntawang, Gulgamree, Hill End, Ilford, Linburn, Leadville, M'Donald's Creek, Merrendee, Millsville, Mobellah, Mullamuddy, Munghorn, Mudgee Boys', Mudgee Girls', Mudgee Infant, Mudgee South, Narrango, Pipcelay Creek, Pyramul Upper, Pyangle, Rylstone, Stubbo, Spring Flat, Tallawang Upper, Tallawang Lower, Tara, Tunabutta, Tambaroora, Warrungunyah, Wilbertree, Baradine, Bourke Boys', Bourke Girls', Burewarrina, Brocklehurst, Bunglegumbie, Coonamble, Coonabarabran, Dubbo Boys', Dubbo Girls', Dubbo Infants', Gilgandra, Girilambone, Mundooran, Narramine, Nullabong, Tomingley, Trangie, Wanaaring, Warren, Bcomey, Bournewood, Birriwa, Bocoble, Denisontown, M'Donald's Hole, Narrangerie, Oakborough, Nubrygyn, Carwell, Clandulla, Crudine Creek, Sally's Flat, Dabee, Glen Lee, Gulgowra, Havilah, Kilgoolah, Nulla Mountain, Molarban, Murragamba, Pinnacle Swamp, Rawdon, Piambong, Rat's Castle, Ballimore, Elong Elong, Dun Dun, Oak Creek, Pandora's Pass, Apple-tree Flat, Tenandra, Wilgas.

Rat's Castle, Baltimore, Elong Elong, Dun Dun, Carl State, Wilgas.

Up to Standard.—Bayly, Hargreaves, Lambing Hill, Lawson's Creek, Menah, Round Swamp, Windeyer, Bulbugerie, Buckhobble, Coolabah, Cundumbul, Curra Creek, Eschol, Eulomogo, Eurimbla, Morrungulan, Mulyan, Mumbil, Newrea, Nora Creek, Obley, Yullundry, Angledool, Bourke North, Barringun, Beni, Buninyong, Byrock, Curban, Gulargambone, Rocky Glen, Timbriebungie, Warkton, Willandra, Apsley, Beri, Medway, Peabody, Station Point, Store Creek, Cainbill Creek, Combo, Coolah Bridge, Collingwood, Leaning Oak, Tong Bong, Wyaldra, Armatree, Belairingah, Bundemar, Kallara, Manoa, Noonbar Creek, Plain Creek, Arthurville, Pinto, Burrendong, Lower Spicer's Creek, Windora, Brogan's

Brogan's Creek, Ben Buckley, Flatlands, Belarbigill, Brightling Park, Ford's Bridge, Glen Alice, Nile, Gowengreen, Killeigh, Tarrabran, Warburton, World's End, Biamble, Belar Creek, Collie, Dappo Springs,

Purlewaugh.

Below Standard.—Farnham, Goolma, Binnaway, Eringonia, Goodooga, Louth, Minore, Nevertire, Orandelbimnia, Toorawenah, Bridgewater, Lincoln, Muddy Croek, Myrangle, Capertee, Ironbarks, Yalcogrin, Mookerawa, Avisford, Campbell's Creek, Bimbijong, Coalbaggie, Bone Bone, Breelong West, Kienbri.

Summary.—Above standard, 131; up to, 77; below, 25. The number of schools whose efficiency satisfied or exceeded standard is thus over 89 per cent. of the number inspected, which is an improvement of 3 per cent. on the result of the former year, and of 13 per cent. on that of 1890. The schools below standard include several, which, at the date of inspection, had been but recently opened.

The following table shows the number of pupils examined in the several subjects of instruction at the regular inspections of the year, and the percentage of passes in each subject. The percentages of the former year are placed with them:—

Cubinsta	Number of pupils	Percentage of passes.		
Subjects.	examined.	1892.	1891.	
Reading	7,202	83.5	83.8	
Writing	7,142	84:2	86.7	
Dictation	5,441	79.1	77.7	
Arithmetic		76.3	78.4	
Grammar	2,453	70.1	73.3	
Geography	2,453	77.0	82.9	
History—English	2,434	75·5	72.3	
,, Australian	461	73.3	80.1	
Scripture and Moral Lessons	6.791	77.1	77.2	
Object Lessons	6,839	82.3	75.8	
Drawing		73.2	67.8	
Music	5,210	71.5	71.1	
French	55	76.4	100.0	
Euclid	317	89.2	83.6	
Algebra	77	78.0	82.5	
Mensuration	237	83.1	75.4

Trigonometry		100.0	75.0	
Needlework	2,523	81.5	83.2	
Drill	6.495	64.7	62.8	
Natural Science.	142	84.0	91.1	

In 9 of the subjects the percentage of passes is higher than for the former year, and in the same number it is slightly lower. In the remaining 3 the difference is but a fraction. Excluding drawing and

In 9 of the subjects the percentage of passes is higher than for the former year, and in the same number it is slightly lower. In the remaining 3 the difference is but a fraction. Excluding drawing and drill, which are subjects of special difficulty to many of the teachers of smaller schools, the passes do not fall below 71 per cent. in any subject. This may fairly be regarded as indicating a satisfactory degree of success in regard to the general efficiency of the teaching, especially when we take into account the facts that the returns include a larger number of schools of lower grade than formerly, and that there is an increase in the number of pupils examined in the more advanced subjects. A further reason for this conclusion is found in the increase in the percentage of schools whose efficiency is up to or above standard.

The organization in regard to details depending on the teacher's skill, diligence, and good taste, and the discipline, continue to be satisfactory features. It very rarely happens that an estimate is awarded for either which indicates less than a tolerable degree of competency or care. The records, lesson guides, and general appearance of the school and its surroundings afford, as a rule, evidence of care and due regard for neatness and good order. The defect most frequently observed is failure to fully comply with the directions relative to the construction of the lesson guides. Great interest continues to be taken in the observance of Arbor Day, and in very many instances the presence in the school-grounds of well-tended trees, ornamental shrubs, and flower beds and borders, afford pleasing evidence of good taste and correct appreciation of the educational efforts of cheerful and well-ordered surroundings. Many teachers devote much attention to developing in their pupils an interest in agricultural, horticultural, and other useful pursuits, such as apiculture, and give them much practical and theoretical instruction therein. In regard to discipline, it continues to be a matter for regr the above views are but too well founded.

The teachers employed in my district are 273 in number, and are classified as indicated in the

following table :-Teachers and Assistants

1	eachers	ana	At 88 is in in its.

Class	31.	Class 2.		Class 3.		Class 4.	Tota	ıl.

The teachers are, as a body, competent, conscientious, and successful in the performance of the duties of their responsible and honorable position, and are generally popular and highly esteemed. The exceptions form but a very small proportion of the staff of the district. Very few complaints, and but one of a serious nature, have been received during the year. The pupil-teachers, as would be expected from the care exercised in their selection, are intelligent, well-conducted, and useful. In all cases which have come under my observation, the reports of the principal teachers in regard to them are of a most favourable nature.

#### Summary.

The existing means of education are, in extent and distribution, sufficient for the requirements of the district. The material condition of the schools is satisfactory. The general results indicate gratifying success in the achievement of the objects for which the Department exists, and afford favourable

prospects for the succeeding year.

I forward with this the reports for the year of the officers associated with me in the inspectoral supervision of the district.

Waverley, 11th January, 1893.

GEORGE ED. LONG. District Inspector.

#### ANNEX Z6.

#### INSPECTOR ROONEY'S REPORT.

At the end of 1891 there were in this section of the district 99 schools in operation, classified thus:-

Public	58
Provisional	
Half-time	
House-to-house	
Total	99

The Public School at Springfield was closed at the beginning of the year, that at Lower Tallawang in June, and the House-to-house School at Pandora's Pass in September. The attendance at these schools had fallen very low. A Public School was opened at Leadville in January. Half-time Schools were established in June at Kelgoola and Nulla Mountain, and the school at Capertee was reopened as Provisional.

The schools in active operation at the end of 1892 are as follows:-

Public		57
Provisional	•••••	14
Half-time		21
House-to-house		7
Total		100

Under my direct supervision, the following works have been effected during the year now approaching its close:—Schools have been erected at Leadville, Glen Lee, Nulla Mountain, and Kelgoola—three of these in places hitherto unprovided with school buildings; a residence at Tallawang, and a weather-shed at Mullamuddy; 10 school-rooms and 5 residences have been repaired.

A new school has been erected at Black Springs, and repairs effected at Canadian Lead, Round Swamp, and Mudgee, under the control of the Architect. In addition to these, the Architect is at present engaged with the erection of new school buildings at Gulgong and Hill End, and enlargement and repairs at Beryl, Eurunderee, Leadville, Mudgee, and Mudgee South.

Repairs at Ilford and MDonald Hole were carried out under the supervision of the Capertee

Repairs at Ilford and M'Donald Hole were carried out under the supervision of the Capertee

Local School Board.

Local School Board.

With the exception of 1 Public, 1 Provisional, and 3 Half-time Schools, all buildings are in fair repair, and suitable for educational purposes. Of the wooden structures, many will soon require to be repainted. About 8 buildings are more or less infested with white ants.

All the Public and Provisional Schools, excepting 2 small ones, Menah and Collingwood, and 9 of the Half-time Schools, are vested in the Department.

There are 7 classified Public Schools not provided with residences. There are 7 married teachers in charge of schools without residences.

The school accommodation has increased during the year from 3,705 to 3,818 seats, and, as the total enrolment does not much exceed 3,800, sufficient room is provided.

total enrolment does not much exceed 3,800, sufficient room is provided.

## Play-grounds.

Interest in the adornment of play-grounds by trees and flowering plants is still maintained by teachers, pupils, and parents.

The following schools have ornamental trees, shrubs, and flowering plants in the play-grounds:—

Burrundulla,	Crudine,	Linburn,	Rylstone,
Black Springs,	Cudgegong,	M'Donald's Creek,	Tunnabutta,
Botobolar,	Cullenbone,	Mobellah,	Tambaroora,
Coomber,	Dungaree,	Mudgee,	Wilbetree,
Campbell's Creek,	Eurunderee,	Pyramul,	Warrangunyah.
Coovel	Gulgamraa	Pranala	<b>.</b>

Special commendation must be bestowed upon the teachers of the following schools, on account of the attention given by them to their gardens and play-grounds:-

Burrundulla,	Dungaree,	Pyramul,	Tambaroora,
Cudgegong,	Eurunderee,	Rylstone,	Warrangunyah.
Cullenbone	Gulcamraa	Tunnahutta	0 0

The teachers of the schools at Crudine and Tunnabutta have given their pupils practical instruction in bee-keeping.

## Enrolment and Attendance.

The total enrolment for the year was 4,611, of which number 487 were entered as pupils of more than one school. Both enrolment and average attendance, compared with last year, show an increase, the former of 144, and the latter of 134.

The following table shows the enrolment and average attendance for each quarter of the year

1892 :-

			Enrolment.	Average Attendance.
1st Q	uarter	******************************	3,845	2,905.6
2nd	,,,	************************	3,877	2,755.9
3rd	,,	*******************************	3,851	2,840.9
4th	,,	*** * * * * * * * * * * * * * * * * * *	3,821	2,758.2

School Fees.—The fees received during the year amounted to £1,441 15s.  $3\frac{1}{2}$ d., being an increase of £42 2s. on the preceding year. There are 276 free pupils, an increase of 33 on the number for last

The free pupils belong mostly to the gold-mining portions of the district.

*Inspection.—Of the 102 schools in operation during the whole or part of the year, all received regular inspection, and 57 received a second or ordinary inspection.

*To

In these schools a total of 2,986 pupils were examined. The results, with the percentage satisfying standard last year, are subjoined :-

Subjects.	Number of Pupils	Percentage satisfying Standard.	
	examined.	1892.	, 1891.
Reading	2,986	75:9	82.2
Writing	2,926	78· <b>7</b>	86.
Dictation	2,351	82.	79.
Arithmetic	2,796	80.2	82.8
Grammar	1,118	67.2	78.3
Geography		75.2	80.7
History—English	1,103	71.2	77.2
" Australian	256	73.8	86.7
Scripture		70.	74.3
Object Lessons		81.8	70.6
Drawing		<b>72</b> ·	74.5
Music		56.7	61.7
French		65.7	100
Euclid		80.	84•
Algebra		66.4	83.3
Mensuration		86.4	72.7
Latin		76·	91.6
Natural Science		80.3	91.
Trigonometry		100	75.
Needlework	1,052	$69 \cdot$	78.5
Drill	2,760	$62 \cdot 2$	65.4

In comparing the results of the two years, it will be seen that the general average for this year falls below that of the previous one.

When, however, it is considered that there has been an increase in the number of Provisional, Half-time, and House-to-House Schools, and that more pupils have been examined in higher classes than hitherto, the slight falling off may easily be accounted for. Drill and Music are badly taught in most schools under the control of untrained teachers.

The following table shows the efficiency of the schools in relation to the standard:-

•	Schools.	Below Standard.	Up to Standard.	Above Standard.
Provisional Half-time	use	$\frac{1}{3}$	13 9 9 4	44 4 10 4
	Total	5	35	62

Thus 95 per cent. of the schools either satisfied or exceeded the requirements of the standard.

The teachers under my supervision are ranked as follows:-

Class.	Number.
I A	. 1
I B	
II A	
II B	
III A	
III B	
III C	
Unclassified	
Total	. 97

Of the unclassified teachers, 3 are ex-pupil-teachers.

Pupil-teachers.		
Class.	Number	•
II	5	
IIIIV		
ΙΥ	6	
Total	15	

With scarcely an exception, the teachers are painstaking, intelligent, and respectable. No complaint has been made against any teacher during the year.

In conclusion, it may be said that-

- (a) There are sufficient schools in this section of the Wellington District.
  (b) The material condition of the greater number of the schools is very fair.
  (c) The accommodation afforded by each school is sufficient for the requirements of the individual place.

  (d) The enrolment and average attendance show an increase on last year.

  (e) The organization of the schools is very satisfactory.
- (e) The organization of the schools (f) The general discipline is good.

The work done during the year has been satisfactory. Improved results may be expected for the year 1893.

JOHN P. ROONEY,

Mudgee, 29th December, 1892.

Inspector.

# 136

#### ANNEX Z7.

#### INSPECTOR SMITH'S REPORT.

THE year 1891 closed with 69 schools on my list, classified as follows:-

Public Schools Provisional Schools Half-time Schools House-to-House Schools Evening Public School	9 8 11
<u> </u>	
makal	en

The Provisional School at Brewarrina Mission Station and the Evening Public School at Coonabarabran were not re-opened at the beginning of the year 1892, but the Public School at Tooraweenah, which had been closed for some time during 1891, was re-opened. Ulamambri Public was converted into a House-to-House School in conjunction with Purlewaugh and Sand Creek, and Ironbarks Half-time was converted into a Provisional School, while Brightling Park Half-time was permanently closed.

Two new schools were established in places where no schools existed before—Bulbodney Provisional and Breelong West House Schools.

At the end of 1892 the schools were three closeifed.—

At the end of 1892 the schools were thus classified :-

Public Scho	ools		39.
Provisional	Schoo	ds	10
Half-time	,,	***	6
House	31		12
		Total	67

During the year 3 applications for new schools in remote places were refused, because there was not a sufficient number of children to warrant establishment, and one has not yet been dealt with.

Although the number of schools at the end of 1892 is not quite so great as that at the end of 1891, the number of children enrolled and the average attendance have increased, as may be seen by comparing the figures in the December quarter in each year:—

	Schools.	Enrolment.	Average attendance.
December, 1891		<b>3,247</b> <b>3,4</b> 98	2,145·7 2,363·0

Sixty-seven schools received a regular inspection last year. Three schools were not inspected, namely, Bulbodney Provisional, opened late and unable to be reached; Billeroy House, through indisposition of Inspector, consequent upon a serious coach accident; and Gumbalie Half-time, closed when the locality was visited. No ordinary inspections were made. Mr. District-Inspector Long examined 6 of my schools—Barringun, Eringonia, Ford's Bridge, Kallara, Louth, and Wanaaring—and I examined 2 of his—Wellington Primary and Wellington Infants.

The following tables show the estimated proficiency of all the schools with regard to standard, inclusive of attainments, organisation, and discipline:—

	Below.	Up to.	Above.	Totals.
(a) Schools in operation a whole year	21 2	5	39	65 2

Mensuration	1 - 1	15	100	100

The enrolment and the average attendance for each quarter of the year were:-

	Number of Schools.	Enrolment.	Average Attendance.
March June September December	67	3,444	2,381·2
	69	3,536	2,386·5
	68	3,586	2,533·3
	67	3,498	2,363·0

The school buildings and teachers' residences are, as a rule, in a satisfactory state of repair. A number of small schools were much improved during last year, and the Public School at Gulargambone is being enlarged. Very handsome buildings on a new site, in place of a small and dilapidated room, are in course of erection at Trangie. A new weather-shed was built at Goodooga, and supplied a long-felt

The sitting accommodation is more than adequate for the number of scholars enrolled. The total

number of seats afforded this year, reckoning 100 cubic feet for each child, is 4,941, while the number of scholars enrolled is under 4,000.

No complaints of any serious character have been brought against teachers or pupil-teachers during the past year. The teachers have proved themselves to be painstaking, zealous in their several positions, and most attentive to their duties.

In conclusion, I may add that satisfactory progress has been made during 1892 in every respect in the Dubbo section of the Wellington District, and there is every prospect of a continuance of the same good results in the future.

JOHN LESLIE SMITH,

Dubbo, 3rd January, 1893.

Inspector.

#### ANNEX Z8.

REPORT OF THE PRINCIPAL OF THE TRAINING SCHOOL, FORT-STREET.

On the 19th January, 1891, 26 students were admitted, who now form the senior division. Of these 11 matriculated at the Sydney University the following March, and 9 in March, 1892; 3 failed, and 4 were removed from the Training School in December, 1891, one of whom afterwards passed the matriculation examination.

matriculation examination.

On the 18th January, 1892, 28 students were admitted who now form the junior division. Of these 2 matriculated prior to their entrance into training, and 8 the following March. Two of these were removed from the institution during the year, and the remainder studied at the Training School for the matriculation examination in March, 1893, and the Departmental examination in December, 1892.

In addition to these, the privilege of a third year's course of training was granted to 5 students, 4 of whom passed the B.A. examination in December, 1892, and 1 took the degree of B. Sc.

The number of students in attendance at the close of the year, therefore, was 26 in the first year, 22 in the second year, and 5 in the third year.

In December, the whole of the students, with the exception of those in their third year, were examined at the Training School in School Management, Music, and Drawing, their examinations in other subjects depending upon their year of training and their connection or otherwise with the University. The various examinations for which the students presented themselves, together with the number in each case, are as follows: case, are as follows :-

	Number of Students.		
Nature of Examination.	Seniors.	Juniors.	
University, 1st year  " 2nd " " 3rd "  B. Sc., 3rd year  Special Training School Examination	10 12 4 1	9	
Totals	27	25	

One student was absent through illness at the special Training School examination. The number who passed was as follows :-

Nature of Examination.	Senior.	Junior.
University, 1st year ,, 2nd ,, ,, 3rd ,, B. Sc., 3rd year Special Training School Examination  Totals	8 4 1	15 23

In the case of the University examinations, the students who are not recognised by the Senate as having passed failed in either one or two subjects, and all such will be granted a deferred examination in March, 1893.

The earnestness and diligence of the students are sufficiently attested by the figures given above, and their conduct has been, with but very few exceptions, in every way satisfactory.

The distribution of scholarships and half-scholarships among the students was as follows:—

Scnior. Junior. Without scholarships .....

During the year 4 half-scholarship students were awarded full scholarships, and 2 who were paying nole cost of their training were granted half-scholarships. These changes were due to the retirethe whole cost of their training were granted half-scholarships. These changes ment or removal of students before the term of their scholarships had expired.

Latin.

The staff remains the same as in 1891. Mr. J. D. St. Clair Maclardy, M.A., is Mathematical Master; Mr. J. M. Taylor, M.A., Assistant Training Master and Lecturer in Science; Mr. Woodhouse, Drawing Master; and Mr. Hugo Alpen, Instructor in Music. All have proved themselves, as heretofore, earnest, zealous, and successful teachers; and the success which has attended the various examinations is largely due to their painstaking and unremitting efforts.

#### 4. PRACTICAL TRAINING.

Test, criticism, and specimen lessons have been regularly carried on, as in former years, under the supervision of Mr. J. W. Turner, Mr. J. Finney, and myself; in addition to which, every student was employed in the Practising School as assistant, in rotation, for a week at a time. The result of thus keeping the practical part of the students' work to the fore during the year has been that 19 seniors were awarded a skill-mark of 7,000 and over, 3 seniors under 7,000, but not less than 6,500, 16 juniors received 7,000 and over, and 8 juniors under 7,000 (lowest mark, 6,500). The skill of the third-year students was not tested this year.

Opportunities have also been afforded students for matching the marking of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Timburg of the Ti

Opportunities have also been afforded students for watching the working of the Kindergarten system under Miss Banks, and instruction has been given on the application of Froebel's method to junior classes in our Public Schools.

5. MANUAL TRAINING.

The arrangement of the workshop provides for the occupation of 11 students at a time. The students have, therefore, been divided, as nearly as possible, into sections of 11, who attend the carpentry lessons in rotation. At the close of the year an examination was held under the superintendence of the Technical Education Branch, the result of which is as under:—

	Nature of Pass.			TI- 11	m-4-1
	Honours.	First Grade.	Second Grade.	Failure.	Total.
First Year Students		7 3	14 10	. 2 8	26 22

Only such students were examined as had not previously satisfied the requirements of the Syllabus in Manual Training.

### 6. TRAINING COLLEGE BATTALION.

This battalion, consisting of the students in training, and the pupil-teachers attending the Saturday classes, continues to do useful work. The A company (students) receives instruction in drill three times a week; the B, C, and D companies (pupil-teachers) once a week, on Saturday mornings. The usual parades of the whole battalion were held during the year, and the A company had target practice at either Flemington or Randwick once a month. It is hoped that during the year 1893 a similar privilege will be accorded to the B, C, and D companies. Captain Maclardy forms a highly efficient and enthusiastic adjutant to the battalion, and the various companies are captained as follows:—

A company Captain Taylor. B company Captain Figures. Company Captain McCov. D company A company, Captain Taylor; B company, Captain Finney; C company, Captain McCoy; D company, Captain Mannell.

At the close of the session the  $\Lambda$  company underwent an examination in drill at which 23 senior students and 24 juniors presented themselves. Of these 14 seniors and 15 juniors succeeded in passing.

### 7. PUPIL-TEACHERS' CLASSES.

The enrolment and attendance of the pupil-teachers' classes is as follows:-

CI.		Enrolment.		Ordinary attend
Classes.	Males.	Females.	Total.	ance.
I	30 47 38 49	56 88 75 123	86 135 113 172	80 130 105 165
Totals	164	342	506	480

In consequence of the very large number of pupil-teachers in these classes it was decided, in April last, to appoint two reliable students to assist the instructors in drawing, whose teaching must necessarily be to a large extent individual.

be to a large extent individual.

The work done in these classes has, on the whole, been productive of very satisfactory results, and shows a decided improvement over previous years. The course of study was the same as formerly, viz., Music, Drawing, and Drill (calisthenics for females) in the third and fourth classes; and Latin and French in the first and second classes. The staff was made up as follows:—Mr. J. D. St. Clair Maclardy, M.A., Latin and French, class I, males; Mr. Smith, M.A., Latin, class I, females, French, class II, males; Dr. Thibault, French, class I, females; Mr. J. M. Taylor, M.A., Latin and French, class II females; Mr. Stephenson, M.A., Latin, class II, males; Mr. Alpen, Vocal Music, class III; Mr. Wood house and Miss Douglas (assisted by a student of the Training School), Drawing, class III; Mr. J. W Turner, Vocal Music, class IV; Mr. G. Thornton and Mrs. O'Byrne (assisted by a student), Drawing, class IV; Captain Mulholland, calisthenics, females, classes III and IV; Warrant-Officer Murphy (assisted by two instructors), Drill for all classes of males. The arrangement of the work at these classes is as follows:—

Classes.	9·15 to 10·15 a.m.	10.15 to 11.10 a.m.	11·20 to 12·15 p.m.		
IV III	Music. Music.	Drawing.	Drill.		
	9·13 to 10·45 p.	m.	11·0 to 12·15 p.m.		
II	Latin.		French.		
I	Latin.	Latin. F			

Instruction is also given to the male pupil-teachers of the city and adjacent suburbs in Latin and French on Wednesday afternoons, between 4.30 and 5.30 p.m., at the Castlereagh-street Public

It is pleasing to be able to speak in the highest terms of the earnestness and industry of the great majority of the pupil-teachers attending these classes, and their conduct has, with but few exceptions, given me every satisfaction.

Principal.

#### ANNEX Z9.

### REPORT OF PRINCIPAL OF HURLSTONE TRAINING SCHOOL.

#### I. THE STUDENTS.

THE Students this year number 54—18 seniors or second-year students, and 36 juniors or first-year students. The health of the students has been good, and their conduct highly satisfactory.

Both seniors and juniors have undergone examination in School Method, Music, and Drawing. The juniors and those seniors who failed to matriculate in March are now sitting for examination, the seniors for second-class certificates, the juniors for third-class.

Nine students have attended the University lectures, 8 being in the first year in Arts, and one in the second year. Eighteen students—17 seniors and 1 junior—presented themselves for matriculation examination in March, 1892, and 8, all seniors, passed. The unsuccessful students failed in Latin only.

All the Hurlstone students attending the University lectures this year have, so far, done creditable work. They have passed all the examinations which were set—one failure in Physics excepted—and in several cases their names were high in the list.

# II.—Course of Study.

1. The course of study for the seniors who matriculated was :-

(a) At the University:-

Cicero pro Milone; Virgil, Æneid I and II.

French.

Principia, Part III; Fontaine's Fables; Racine's "Andromache"; Sandeau's "Mademoiselle de la Seiglière.

English.

Shakespeare's "King Lear"; Chaucer's Prologue; Morris' History of English Grammar.

Mathematics.

Euclid, Books I to VI; Plane Trigonometry; Algebra to Progression.

Physics.

Chemistry,

Physiography.

(b) At the Training School:-

Art of Teaching and School Management.

Music.

Theory and Practice.

Drawing.

Geometrical.

2. For the senior students studying at Hurlstone for second class :-

English.

Shakespeare's "Coriolanus"; Meiklejohn's Book of English; Composition, Parsing, and Analysis.

French

Macmillan's Third Year's Course; Guizot's Edward III.

Latin.

Smith's Latin Grammar; Arnold's Composition; Cicero pro Murena.

Mathematics.

Mathematics.

Arithmetic, Hamblin Smith's and Barnard Smith's Text-books; Euclid, Books I and II; Algebra. Quadratics without Surds.

Natural Science.

Physiology; Chemistry; Physics.

School Management.

Gladman's School Work; Compilation of School Records, Time-tables, and Lesson Programmes; History of Education; Public Schools Act and Regulations; Kindergarten.

Vocal Music.

Sutton's Class Book; Stainer's Harmony Practice; Staff Notation, and Tonic Sol-fa.

Drawing.

Blackboard, Freehand, Model, and Geometrical.

Calisthenics and School Drill.

3. For the junior students.

English.

Meiklejohn's Book of English; Composition, Parsing, Analysis, Prosody; Special study-" Coriolanus.

French.

Macmillan's Third French Course; Guizot's Edward III.

Smith's Latin Grammar; Arnold's Composition; Cicero pro Murena.

Mathematics.

Arithmetic, Theory and Practice; Euclid, Books I and II; Smith's Algebra.

Natural Science.

Physiology, Chemistry; Physics.

School Management.

Gladman's School Work; Compilation of School Records, Time-tables, and Lesson Programmes; History of Education; Public Schools Act and Regulations; Kindergarten.

Domestic Economy.

Cookery, Theory and Practice; Needlework.

Vocal Music.

Sutton's Class-book; Stainer's Harmony; Practice; Staff Notation; Tonic Sol-fa.

Drawing.

Freehand, Model, Geometrical, Elementary, Perspective.

Calisthenics and School Drill.

III .- THE STAFF.

THE Staff consists of Principal, Assistant, and Mistress of the Practising School. The following subjects are taught by visiting teachers :-

Latin, Algebra, and Geometry.

Physiology.

Drawing.

Music. Chemistry and Physics. Kindergarten. Cookery.

Chemistry and Physics are new subjects, but have long been necessary for the thorough teaching of Object Lessons. It is without doubt owing to the establishment of these classes at the Training School that the Hurlstone students attending the University owe much of their success this year.

1V .- DRAWING.

A special examination in Geometrical Drawing took place in June. Thirty-five Juniors and 4 Seniors presented themselves for examination, with the result that 25 Juniors and 2 Seniors passed. Those who failed have taken up the subject at the present December Examination.

Special lessons have been given by the Superintendent of Drawing to the Practising School children in presence of the Junior Students.

V.-DRILL.

The Students have made satisfactory progress in Drill, Calisthenics, Swedish Exercises, and School Gallery Exercises.

VI.-KINDERGARTEN.

The Mistress of the Kindergarten Department, Fort-street Model School, teaches the subject to the students for one hour on Saturday mornings. There is no Kindergarten School for children.

VII.--NEEDLEWORK.

The students were examined in this subject in June, and all succeeded in passing.

VIII .- PRACTICAL TRAINING.

Three students act as assistants in the Practising School for a week at a time. Each Junior has had three weeks in the Practising School, and has been required to give Criticism Lessons in the presence of her fellow-students.

IX.-PREMISES.

The Seniors' dormitories and the bedrooms of the Assistant, the Matron, and the Cook have been painted and renovated; movable shutters have been fitted in the covered-way between the two wings of the Training School; a new stove and hot-water pipes have been placed in the kitchen. The new vegetable garden at the foot of the lawns is fairly successful.

It is desirable that further improvements be carried out, if possible, particularly the following:—

A new building for the Practising School; a new sick ward, apart from the main buildings and properly fitted up; a large pantry; a gymnasium, and drawing studio.

MARY EVERITT. Principal.

APPENDIX

# 141

### APPENDIX XIII.

#### REPORT ON DRAWING.

Annual inspections have been held in 83 schools. Every class has been examined, orally and practically, and the book-work of the upper classes has been separately inspected. Thus the inspection of each class amounts practically to a model lesson. I was able also to pay additional visits to 22 schools, and give special model lessons.

#### Text-books, appliances, &c.

The want of suitable copy-books, for the use of the teachers in setting black-board copies, is now satisfactorily met by a selection from Longmans' drawing-books and Poynter's South Kensington drawing-book for the Primary Departments, and a useful Kindergarten drawing-book for the Infants' Schools.

The need of a collection of drawing models, which should retain the typical geometrical forms, while possessing more variety, and being more interesting to the pupil, suggested to me the possibility of devising a set combining these advantages. The result has been a set where every piece is capable of combination with the others in many ways, and these models, though larger than those previously in use, can be made in the Colony at a price not exceeding that charged for the less useful ones. This set has been authorised for use in the schools.

The Technical Branch has kindly supplied sets of casts, chosen by me, to several schools which I recommended as being likely to make a careful and intelligent use of them.

#### High Schools.

The work done in these schools is sound and thorough. At the Boys' School a class has been started for mechanical drawing, which will prove a most useful branch of work for many of the boys. The conditions under which the more advanced work is pursued are vastly improved by the Technical Branch having granted the use of class-rooms in the Technical College.

#### Training Schools.

Since the institution of the class in solid geometry in connection with the course of manual training at Fort-street, the work of the training students in this branch of geometrical drawing has made a great advance. At Hurlstone the teaching is most efficient, and the results of the examinations are satisfactory.

#### Pupil-teachers' Saturday Classes.

There is certainly some improvement in the work of these classes, but this is due more to the further subdivision of the classes than to the efforts, properly speaking, of the students themselves. The want of suitable accommodation and arrangements for these classes militate much against their success.

### Examinations of Teachers, Pupil-teachers, &c.

I have revised the papers of 411 teachers, 541 pupil-teachers, 600 applicant pupil-teachers, and 110 students in training during the year. The black-board work in the Metropolitan District, and freehand in the country, shows a higher percentage of passes. The passes in black-board drawing in the country are at a lower rate. This is a good sign, if it shows that a somewhat higher standard is now demanded.

#### Results of Public School inspections.

I append the results of my inspections in tabulated form :-

Schools.	Departments.	Classes.	Boys.	Girls.	Infants.	Total.
83	182	1,016	10,476	10,276	13,954	34,706

Result of oral and individual examinations in each department, and the percentage of passes (50 per cent. and over) :

	Above.	Up to.	Below Standard.	Percentage of passes.
Boys	753 665 1,582	6,092 5,908 7,920	3,631 3,703 4,452	65·3 64·0 68·0
Total	3,000	19,920	11,786	66.0

This table shows that the efficiency of the schools is on the whole increasing, a result chiefly owing to the spreading interest in the subject, which I am gratified to observe among the teachers.

FREDERIC W. WOODHOUSE,

12th January, 1893.

Superintendent of Drawing.

# APPENDIX XIV.

# REPORT ON SINGING.

During 1892 I examined and reported upon the whole of the Public Schools in the Metropolitan District in Singing and the Theory of Music.

There can be no doubt of the steady, if somewhat leisurely, advance our schools are making in the study of music and singing. This is best shown in the tests of "singing at sight," as in many schools fairly difficult passages—sometimes in two and three part harmony—(staff notation) were rendered with an ease that was very satisfactory. I have not been contented to apply this test to the upper classes alone, but have also commenced to do this with the lower classes (in Tonic Sol Fa), with varying results. Though teachers have found these tests rather hard, there can be no better way thoroughly to gauge children's knowledge of music than to sing a piece at sight.

Though teachers have found these tests rather hard, there can be no better way thoroughly to gauge children's knowledge of music than to sing a piece at sight.

The teaching of the lower classes still remains the weak point in our system, though there is a certain improvement. I think the reason of this may be found in the somewhat unsatisfactory lessons received by the pupil-teachers from their head masters. In point of fact, I know in quite half of our schools music lessons are not given to the pupil-teachers, or, at best, given in a desultory manner. In schools where elder teachers take the lower classes the results are very good, e.g., at Darling Road, the lower second class (Boys' Department) obtained the highest marks in the school. At Waterloo (Boys' Department) the lowest and highest class, being taught by the assistant, were really excellent. I would draw draw

draw attention to a point to which I have often directed the attention of teachers—the want of steady exercises in both pitch and time of notes, especially the latter. Teachers as well as pupils prefer the teaching of songs, forgetting that proficiency in exercises will make the other an easy task. The singing varies greatly in different schools. Sometimes teachers forget that shouting is not singing, but on the whole the voice production is not bad. I am happy to recognise the fact that in many schools the singing lesson is hailed as a pleasant change from other lessons, and not as an additional task. In such schools good progress is generally made. The general results would range (5th and 4th classes) very fair; the lower classes fair. Nearly all our teachers participate in the teaching of this subject.

HUGO ALPEN,

Superintendent of Music.

Superintendent of Music.

# APPENDIX XV.

### REPORT ON DRILL.

I no myself the honor to report with regard to my work in 1892:—

1st. I visited and examined in military drill, calisthenics, gallery exercises, and physical drill every school in the Metropolitan District.

2nd. Taking fair as the standard, all were either up to or above the standard.

3rd. I regularly twice a week gave instructions in school drill, calisthenics, infants' drill, gallery exercises, dumb-bell and wand exercises, also in marching, play-ground orders, orders for marching in and out of school, &c., to the students of the Hurlstone Training College, and as a result, at the close of the year, the 36 students who submitted themselves for examination succeeded in obtaining the Department's certificate.

the year, the 36 students who submitted themselves for examination succeeded in obtaining the Department's certificate.

The examination consisted of (a) a paper of 13 questions, and (b) a practical test. The result of a twelvemenths' course of physical training upon the students is very marked. The carriage and deportment show very great improvement, and the physique generally is greatly improved.

4th. I gave instruction at Fort-street to the female pupil-teachers of the third and fourth classes on alternate Saturdays in calisthenics, school drill, gallery exercises, marching, wand, and dumb-bell exercises, and many of the lady teachers of the Metropolitan and Suburban schools attended these Saturday classes for the purpose of taking notes of the various sections of drill, so that they might be the better enabled to teach the standard in their schools.

5th. On the whole the standard of drill is good.

In conclusion. I beg to bear my willing testimony to the very satisfactory state of the discipline

In conclusion, I beg to bear my willing testimony to the very satisfactory state of the discipline and drill in the schools I have visited, and the very cordial manner in which I am always received by the teachers, and to the honest efforts made to act upon my suggestions for the improvement of the drill.

W. P. MULHOLLAND, Captain,

Superintendent of Drill.

### APPENDIX XVI.

#### REPORT ON COOKERY.

THE most important work of the year has been the training of an efficient staff of teachers. was commenced at Fort-street in January, the trainers consisting of 4 Hurlstone students, who already held certificates for the primary course, 8 first-class pupil-teachers, and the 4 teachers who formed our staff, and desired to gain first-class certificates. The latter continued to conduct their schools, but opportunity was afforded them of attending the lessons in their special subjects.

The subjects taken were :-

High-class Cookery.* Plain ,, Primary Cookery School Management.

Housekeeping. Accounts Domestic Economy. Hygiene.

* For First-class Certificate.

The examination held in July was severe and thorough. Each student cooked an entire dinner from her course in a given time, from materials bought by herself, due accounts being rendered; gave a demonstration in cookery; a test lesson in domestic economy; and sat for an examination in domestic economy and hygiene. All passed successfully, some with considerable credit. The examiners were:—

Domestic Hygiene—Dr. Huxtable.

"Economy—Dr. Morris.

Practical Cookery and Housekeeping—W. G. Cassidy, Esq.

Demonstrations and Test Lessons—The Principal of Fort-street School, and the Master

The carnestness, industry, and conduct of the students were admirable; considerable esprit de corps has been developed, and I regard the staff as a very valuable one on the whole. As the teachers gain experience the best results may be looked for.

# Training School of Cookery.

The discomfort caused by the very inadequate and inconvenient accommodation which the one class-room at Fort-street afforded for the work of training teachers led to the conversion of the house, hitherto occupied by the principal of Fort-street Training College, into a Training School of Cookery. In this, lecture room, practice kitchen, pastry and serving room, storeroom, scullery, teachers' room, and dining-room have been provided, fitted with every requisite, and, excepting in point of size, this training school will compare favourably with any institution of the kind with which I am acquainted in Great Britain. There is no reason why this school should not be largely self-supporting, as are similar institutions at home.

### Grafton.

One of the senior teachers, with an assistant, was sent to Grafton in August. Instruction was given, by means of a portable kitchen, to 129 adults and 60 children in cookery, and 70 children received lessons in domestic economy. Fees were paid by adults amounting to £48 15s., and cooked food sold to £36 3s. 5d. The classes gave the greatest satisfaction to the District Inspector and townspeople, and may be regarded as having been thoroughly successful.

A senior teacher and assistant were sent to Newcastle to establish a permanent school, but as we

were using rented premises, they were supplied with a portable kitchen.

Adult work was not commenced owing to the plans upon which it was to be conducted not being fully matured; but the children from three schools attended, and the examination gave very satisfactory

results. Both here and at Grafton the Inspectors brought many prominent townspeople to see the children examined, and many teachers showed their interest by attending. During 1893 it is expected that the adult classes will be brought into working order.

Nothing in the other schools calls for special mention. Taking the inexperience of the teachers into consideration very good work was done. The average marks gained by the teachers were:—

State of Appliances,—Good. Accounts.—Very good. Records.—Very good. Cleanliness.—Good. Housekeeping .- Good.

The results of the examination were slightly affected by its unavoidable postponement in three schools until after the holidays and the non-return of some of the children.

The cookery standard at Hurlstone has not improved, but is as high as can be expected under the very unfavourable conditions under which it is taught. Should it be arranged that the students attend the new Training School for their lessons this year, I have no doubt that the results will be very different. different.

Arrangements have been made to draw the children from the schools in smaller groups this year, which will be an advantage to the teachers, the 60 girls taken from the larger schools being spread over the year, instead of three months as heretofore. We shall also be enabled to take some children from smaller schools.

On the whole, I think there is every reason for congratulation in the progress made this year, and do not doubt that it will be largely increased before the next report is written.

A. FAWCETT STORY,

27th February, 1893.

Directress of Cookery.

#### APPENDIX XVII.

#### REPORT ON NEEDLEWORK.

In reviewing the work accomplished in the schools of the Metropolitan District for the past year, the results, with some few exceptions, are very good, and will bear favourable comparison with work accomplished in the past two years.

I may state that I have examined and reported upon 76 schools. This number includes Hurlstone Training College, the High School, Castlereagh-street, and the Randwick Asylum. In all, 11,700 pupils were present at examination.

Referring to absentees, the teachers of needlework in charge gave satisfactory proof of their skill and industry, the work being retained in school for my inspection. This, I think, shows conclusively that the existing system of instruction in needlework throughout the Public Schools continues to be effective and well maintained according to the standard.

Head Mistresses in their respective schools have this year taken the same interest as formerly in

Head Mistresses in their respective schools have this year taken the same interest as formerly in

the progress of needlework.

As a result of this incentive there continues to exist among the pupils that spirit of emulation and rivalry which is the true secret of success.

# Dressmaking, &c.

This section, in addition to the other branches of needlework taught, continues to be carried out in the upper classes of most schools on a small scale, namely, small dresses for girls' wear; the elder girls displaying much facility and interest in this industry.

As mentioned in my previous Annual Report, the absence of work-rooms in most Metropolitan schools is a hindrance, as the fitting-on attracts attention, and disturbs the quiet and order necessary at

# Work-aprons and Needle-books.

Work-mistresses continue to introduce neatly made and ornamented work-aprons. This method has an orderly and artistic influence, as making these articles cultivates form, and has a practical effect in cutting out and setting. It also creates emulation in design, and in applying the ornamental needlework taught in former lessons.

In addition to work-aprons, needle-books artistically made and finished by the pupils for general use at sewing lessons have been introduced. These are a decided acquisition, inasmuch as this essential sewing material was formerly provided at the cost of the teachers in charge of the sewing classes.

### Discipline.

I am glad to be able to report that the improved method of distributing needlework, and economising time, continues to be carried out in most schools in the Metropolitan District.

Head teachers and their assistants, as a rule, continue to display the same interest, and to support

the work-mistresses in maintaining method and order.

### Mixed Schools.

The introduction of needlework to 1st class in the above schools continues to give satisfaction to parents and teachers.

The simple employment of plain-sewing in coloured cotton attracts and amuses the active young brain, and it is wonderful to see the care and patience these children display, and how rapidly the ideas of form and colour are acquired.

### Pupil-teachers.

In my incidental visits to schools it was noticeable that the pupil-teachers continue to be attentive to the instructions of work-mistresses, and showed great proficiency in the art of needlework and design. I may repeat, as in my last Annual Report, that their aptitude and eager industry cannot be too highly commended.

In conclusion, I may also add that I am gratified to testify to the high proficiency in needlework attained by many of the schools under my supervision in the Metropolitan District during the past year, many being far above the standard required in this subject, also to the continued encouragement given by head mistressess and teachers, who in conjunction with work-mistresses have assisted in bringing about these successful results.

Balmain, 18th January, 1893. ·

ANNIE DADLEY Directress of Needlework.

# APPENDIX XVIII.

ANNUAL REPORT OF THE WORK OF THE ARCHITECT'S OFFICE FOR THE YEAR ENDED THE 31st DECEMBER, 1893.

# Buildings.

DURING the year there have been delivered to the Department, ready for occupation, the following Public School buildings, viz. :-

Number.'	Nature of Work.	Accommodation.	Cost.
42 9 17 28 418	Public School buildings Teacher's residences Weather-sheds Additions providing increased accommodation Additions not providing increased accommodation	1,865	£ s. d. 49,675 13 6 5,061 17 0 1,625 3 8 8,139 5 0 27,482 17 11

The school accommodation has thus been increased this year by 7,511, at a cost of £57,814 18s. 6d., or an average of about £7 14s. per head, against an increase of 8,448, at a cost of £59,906, or an average

of an average of about 17 148. Per nead, against an increase of 0,320, at 1 of 27 per head last year.

Some of the new buildings erected during this year were of a slightly ornamental character, which, to some extent, increased the cost per child of the accommodation provided, amongst which I might mention, as examples, the following:

Accommodation:

Cost.

	Accommodation:	Cost.
Albury	440	£4,536
Cleveland-street	600	4,389
Leichhardt (stone)	<b>4</b> 0 <b>0</b>	6,328
Wagga Wagga South	536	4,223

In addition to these, a large number of residences and weather-sheds were erected under the same contract as the school buildings, thus further increasing the cost per head of the accommodation provided.

The following works were completed in connection with the Technical College buildings and High School at Ultimo :-

Nature of Work.	Cost.	
	£ s. d.	
rechnical College	. 19,535 0 0	
High School.	16,220 0 0	
Pechnological Museum	.  19,365 10 0	
Architects' Workshops, and School of Cookery	4,834 0 0	
Furniture and fittings	1.205 3 7	
Pechnical College High School Pechnological Museum Architects' Workshops, and School of Cookery Furniture and fittings Car-paving, improvements, &c. Fencing, gates, &c.	1,107 5 0	
Fencing gates &c	433 0 0	
Weather-shed for High School	249 0 0	
Furniture for chemical laboratory	471 17 6	
Furniture for chemical laboratory Stores, cupola, &c.	350 14 6	
Overhead traveller and blower	213 3 0	

In addition to these works contracts have been entered into and completed for-

•	Cost.	
High School buildings at East Maitland	£5,592 0	0
Laying on water, &c., at East Maitland	53 7	0
Improvements to grounds at East Maitland	151 12	6
Furniture and fittings	31 17	6

The following works in connection with Public School buildings were in progress on the 31st December, 1892 :-

Number.	Nature of Work.	Accommodation.	Cost.
28 15 6 15 100	Public School buildings	2,242	£ s. d 30,233 3 2 8,247 15 5 321 9 0 12,747 2 6 10,456 1 2

All of these will most probably be completed during 1893, and additional accommodation is provided therein for 6,533 children at a cost of £42,980 5s. 8d., or an average of £6 11s. 7d. per head. This number will certainly be increased to some extent by the accommodation which will be provided in new buildings and additions, commenced and completed during the year 1893, but these works must of necessity be few, on account of the very small sum placed on the Estimates for 1893 for this purpose, a large portion of which will be required to keep the extensive and valuable property of the Department in a reasonably good state of repair.

The undermentioned works are also in progress at Ultimo:—

Gas and fire service, Technological Museum	£779	0	0
Boundary wall	838	17	0
Extension of water supply	22	0	0
Double-hung windows	15	0	0

It will thus be seen that the aggregate cost of the work in progress on the 31st December, 1892, is £63,660 8s. 3d.

# Outlay.

The total outlay for works certified for by me during the year is £125,563 5s. 2d. in 1,832 certificates, averaging about £68 10s. each, against an outlay of £170,289 in 1,912 certificates, averaging about £91 each for 1891.

### Correspondence.

The number of papers received, registered, and dealt with during the year, is about 10,700, against about 10,000 last year, and the number of reports, letters, &c., written and despatched is 6,367, against 6,091 last year, and the furniture orders number 355, against 352 for 1891. The number of contracts entered into is 655, against 500 last year, for which sets of contract documents had to be prepared in each case, and a number of small works were carried out under Ministerial authority, but for which no contracts were entered into.

**Plans** which no contracts were entered into.

Plans and Specifications.

During the year, 1,086 plans and 948 specifications were prepared, against 1,080 plans and 892 specifications during 1891.

The cost of the office for salaries amounted to £5,384 5s. 9d., and £1,526 3s. 3d. for travelling expenses, making a total of £6,910 9s., or equal to about 5.5 per cent. on the outlay.

In connection with this question, I have made a careful calculation of the probable cost of carrying out the work of this office, if paid for under the rules and regulations of the Institute of Architects of New South Wales, and I find that, without making all the allowances which seem to be charged under those rules, and calculating at the lowest possible rate, the cost would be £9,561 6s. 7d., or equal to 7.49 per cent. on the value of the work completed, against an actual cost of £6,910 9s., or equal to 5.41 per cent. on the value of the work completed. In making this calculation, I have taken no account of the Technical College buildings and High School at Ultimo, as these works, though actually finished early in 1892, were nearly completed at the end of 1891, and the greater portion of the contract money was paid during that year. money was paid during that year.

Staff. At the close of the year the staff consisted of 4 draftsmen, 3 junior draftsmen, 1 temporary draftsman, 1 cadet, 3 clerks, and 8 clerks of works. This is the same staff as I had at the end of 1891, with the addition of a cadet; and, notwithstanding the extent to which the works had increased during 1890 and 1891, there is a further increase this year of about 7 per cent.

I am pleased to be able to report continued diligence and attention to their duties on the part of the officers serving under me.

Sydney, 10th February, 1893.

WILLIAM E. KEMP.

Architect for Public Schools.

#### APPENDIX XIX.

THE BOARD OF EXAMINERS' REPORT.

THE total number of candidates reported upon was 3,548, being an increase of 15 upon 1891. The various classes of examinees are shown thus :-

1. Teachers	887
2. Training students	147
3. Pupil-teachers	648
4. Pupil-teacher applicants	716
b. High School candidates	1 123
6. Cookery students	17
Total	
	9 5 40

The following are the detailed results of these examinations:-

1. 7	l'eachers	(887):—	
		Recommended for I B	48
		" II A	24
		" II B	38
		, , III A	178
		" III B	101
		_ " III C	71
		Examined in Drawing only	25
		Examination incomplete	9
		Failed	393

Percentages of passes, 53.6, as against 51.1 last year.

2. Students (

Students in Training :	
(a) Males (66)—	
Examined December, 1891	48)
Examined in Drawing only, June, 1892	$\frac{18}{18}$ 66
Recommended for II A	22
" II B	2
, III A	$\overline{2}$
second year's training	22
(b) Females (81)—	
Examined in December, 1891	42)
Examined in Drawing only, June, 1892	$39 \} 81$
Recommended for II A	13

· · · · · · · · · · · · · · · · · · ·	

Two male students were recommended for a third year's training, while one female, in consequence of unusual success as a second year's student at the University, was recommended for a fourth year's training, in order to enable her to take a degree.

3. Pupil-teachers (648)—

Passed from class IV to class III	185
" " III " II	134
., " II " I	141
,, ,, I to training	119
Incomplete, or examined in Drawing only	7
Failed	62
<del>-</del>	
Total	648

Percentage of passes, 90.3, as against 85.5 in 1891.

The total number of pupil-teachers reported on is smaller than that of 1891. The reason is that by the new arrangement the second, third, and fourth class pupil-teachers, who hitherto have been examined in June, were not examined until December, and the results of their examination will therefore appear in the report for 1802 appear in the report for 1893.

4. Pupil-teacher applicants (716)-

Percentage of passes ..... (as against 68.8 in 1891.)

Examinations were held four times during the year, and the total number of those who presented themselves was 1,133 while the number in the previous year was 1,281.

The new plan, by which teachers are examined in June only, and pupil-teachers and training students in December only, has now come into operation, and, so far, appears to be an improvement on the method formerly in use; securing, as it does, greater uniformity in the valuing of answers, more expedition in dealing with the papers, and a reduction of the work connected with the preparation of questions, and the appointment of committees for supervising pupil-teachers' examinations. In this connection the Board desires again to call attention to the value of the assistance rendered by the ladies and gentlemen who give their services on the supervising committees referred to above.

With respect to the results of the year's examinations, it may be said that the percentage of passes of teachers and pupil-teachers shows, in each case, an increase over that of 1891; indeed, the pupil-teachers, of whom over 90 per cent. gained promotion, must be regarded as having done exceptionally good work.

From time to time during the year various sets of examination questions have been published in the Educational Gazette, and it is understood that this has given valuable assistance to those preparing for examination.

for examination.

R. N. MORRIS. Examiner.

#### APPENDIX XX.

### REPORT ON THE PUBLIC SCHOOL CADET FORCE.

In December, 1891, there were 6,888 members of the Public Schools Cadet Force, while 1892 closed with an enrolment of 6,221 of all ranks, being 667 fewer than were enrolled in the December quarter of the previous year. The greatest strength, however, for 1892—that for the June quarter—was 6,695; so that the falling-off in numbers was greater in the second half of the year.

The quarterly enrolment in a force of this kind necessarily fluctuates, depending on a variety of circumstances, among which may be mentioned the season of the year, the attractions which at different times the force itself offers to teachers and pupils, and the ability or otherwise of parents to provide their boys with the pecessary uniforms.

times the force itself offers to teachers and pupils, and the ability or otherwise of parents to provide their boys with the necessary uniforms.

The last-named circumstance is chiefly responsible for the decrease referred to, the prevailing depression in trade throughout the Colony having made itself felt in the cadet movement as in other matters affecting the pockets of the people.

This inability was repeatedly mentioned by teachers when questioned regarding the want of further expansion of the Cadet Force, or of shrinkage of corps in certain instances.

The following particulars of the strength and distribution of the Cadet Force are summarised from the December returns:—

Corps.	Number.	Enrolment.
enior Cadets—		
Cavalry	3	50
Artillery	1	47
Infantry	8	386
Bands	<b>2</b>	42
Ambulance	1	35
chool Cadets—		
Metropolitan (including Roman Catholic schools)	68	2,369
Country	93	2,471
Bands	22	522
pecial Corps—		
Fort-street Training College Battalion	<b>2</b>	214
Newcastle Pupil-teachers	1	45

The recent Royal Commission on the Military Forces of the Colony took up the Cadet question and in its report acknowledged the physical and moral advantages to the rising generation, resulting from the carrying out of a proper cadet system.

The gist of the evidence educed by the Commission is to the effect that the cadet movement is really an educational one, but that its value from a military point of view depends largely on the lads trained as cadets finding their way into the ranks of the military forces.

That a fair proportion of the lads so trained will as men join these forces may be reasonably expected, judging from experience.

There are many ex-cadets in the military service of this colony, and many of those now being trained will doubtless enter such service as soon as they are qualified to do so, and with a distinct advantage to the service

advantage to the service

advantage to the service

Several of our Senior Cadet Corps were formed with the object of supplying local military corps with desirable recruits, and this object is being attained.

In a recent English publication, entitled "Our Armies," direct evidence is afforded of the value of cadet training as a means of fostering in lads a taste for military work. Within three and a half years of its formation one cadet battalion, attached to the Royal Warwickshire Regiment, contributed over eighty recruits to the regular army. Similar instances could be multiplied.

There is no doubt that a proper cadet system may be made an admirable means of providing for the future a cheap and valuable citizen soldiery. Even apart from this consideration its maintenance is fully justified as an educational agent.

the future a cheap and valuable citizen soldiery. Even apart from this consideration its maintenance is fully justified as an educational agent.

The annual review of the Public Schools Cadet Force was omitted in 1892, as it was not practicable to bring the Country Cadets to Sydney for the purpose, as was done in 1890 and 1891.

There were, however, several occasions on which corps were combined for special purposes.

Among these, the following may be mentioned:

April 7th:—A parade of Western Corps (from Lithgow to Dubbo) at Bathurst, in connection with the visit of His Excellency the Governor to open the Bathurst A.H. and P. Society's Show.

The visiting cadets camped for three days on the Superior Public School premises, the necessary camp equipment having been obtained from Sydney.

May 24th:—Country Senior Cadets assembled in Sydney, and with their metropolitan comrades took part in the Queen's Birthday review of the military forces.

September 28th:—The Public Schools Athletic Association meeting, at which several School Corps competed in "Physical Drill," the event being won by the Redfern Superior Public School Corps, with Newtown Superior Public School Corps a close second.

At this meeting the Public Schools Drill Competition Shield was won by the Fort-street Model

At this meeting the Public Schools Drill Competition Shield was won by the Fort-street Model Public School.

September 30th to October 3rd:—The Cadet Artillery, the Metropolitan Senior Cadet Infantry and the Ambulance Corps held a very successful camp at La Perouse.

At this camp the Cadet Artillery engaged in their annual shot and shell practice with the 16-pounder field guns belonging to the Partially-paid Artillery, firing 50 rounds at floating targets placed at 1,000 and 1,700 yards ranges.

Lieutenant Le Messurier (Acting Adjutant New South Wales Artillery) supervised the practice, and Warrant Officer Green, of the same force, was present as instructor. Within the first twenty-five rounds the first target was sunk. A party of cadets towed the second target out and moored it at the

rounds the first target was sunk. A party of cadets towed the second target out and moored it at the longer range, and firing recommenced.

Better shooting could not have been witnessed. Shell after shell burst right over the object, and if, instead of a barrel, it had been a boat, the smallest object that would have been aimed at in actual warfare, it must have been sunk four times out of every fire.

As it was, this second barrel was also sunk, thus putting up a record for the afternoon's work, and showing that the previous training of the cadets in preparation for this practice had been thorough.

9th November:—Gathering of Western Cadets at Orange for a military display arranged for Prince of Wales' Birthday. On this occasion the cadets, assisted by a detachment of the Cadet Artillery, with 2 guns, engaged in a sham fight with the 3rd Regiment of P.P. Infantry.

28th November to 8th December:—Encampment of Metropolitan School Cadets at Middle Head.

The camp was pitched to accommodate 1,000 cadets, and was occupied by 2 battalions at a time for 3 days.

A carefully-prepared programme of work was carried out, and useful training afforded. The camp duties were cheerfully and intelligently performed by all concerned, and the discipline was excellent. With the assistance of a small working party of the local Artillery, the camp was pitched by the Cadets themselves, and it was wholly struck by the latter, the work being done in a very short space of time, and the whole of the camp equipment returned to the Ordnance Store in Sydney within twenty-four hours of the order to strike camp being given—a feat of which a military force might well be proud. Of the 6 battalions in camp, all were fully inspected, corps by corps, but 2, the bad weather prevailing during the middle period of training preventing my completing the inspections. The results were in most instances very satisfactory, and gave evidence of careful attention to drill instruction.

16th and 17th December:—The competition at Randwick Rifle Range for the Public Schools Cadet Challenge Shield.

Challenge Shield.

Twenty-seven schools entered for this competition, but, owing to the wet weather, only 22 competed. The shield was won by the Orange Superior Public School team, which makes the third consecutive win for this school. Penrith Public School came second, and Crookwell and Tamworth Schools

secutive win for this school. Penrith Public School came second, and Crookwell and Tamworth Schools tied for third place.

The Metropolitan Cadets have been most unfortunate during the last three years in not having a rifle range to attend at for regular practice. The Paddington Range definitely closed in 1890, the new Randwick Range opened for two or three months and then reported dangerous in December, 1891, and closed again for nearly twelve months, limited the cadets to the use of the Flemington Range, on which a couple of targets were available for them at very irregular intervals. Without regular target practice it was not possible to produce good shooting, and one of the inducements for boys to join the Cadet Force was wanting. These cadets may now get such practice.

Early in the year arrangements were made by which the Metropolitan Corps and those in the Bathurst, Goulburn, Maitland, and Newcastle districts were conveniently grouped in battalions, and battalion parades were held under these arrangements. Where the country corps are more or less isolated it is not practicable to so group them, on account of the difficulty and expense of bringing them together. In every case, however, where local military instructors were available their services were obtained, under regulation 18, to assist the teachers in training their corps. Forty-two corps were assisted in this way.

The formation of the Newcastle Pupil-teacher Corps in February gave an impetus to drill in that

district which must be followed by good results.

Notwithstanding the decrease in numbers during the past year, I am satisfied with the prospects of the Cadet movement, and believe that the Cadet Force will maintain its efficiency and probably increase its enrolment during 1893.

A. PAUL, Lieut.-Col., Commanding the Public Schools Cadet Force.

# APPENDIX XXI.

# REPORT UPON TECHNICAL EDUCATION FOR THE YEAR 1892, WITH ANNEXES A TO G.

THE work of the Technical Education Branch during 1892, though not marked by the rapid extension that distinguished the two previous years, showed a steady and satisfactory advance. The chief event of the year was the transfer of all the classes of the Sydney Technical College to the new buildings at Ultimo. It was feared that the situation of these buildings in a comparatively unknown and out-of-theway part of the city, difficult and expensive to reach from the populous marine suburbs, would cause a serious decline in the number of students, but the reverse has been the case. The enrolments at the College for the year exceeded those of 1891 by 886.

### Classes and Students.

The record for 1891 gave 295 classes in operation for the whole or some portion of the year, but 13 of these were discontinued at or before its close. Applications for new classes were numerous, but most of them were for various reasons declined; 24 new classes were, however, started, bringing the number up to 306, an increase of 11. In the following table the record for the last four years is given:—

	1889.	1890.	1891.	1892.
a) Classes in operation— Sydney Technical College Suburban classes Classes in country towns Classes connected with Public Schools	56 8 55	70 26 109 20	73 48 140 34	75 44 147 40
Totals	119	225	295	306
Studente' envelopment	1889.	1890.	1891.	1892.
(b) Students' enrolments— Sydney Technical College Classes in Branch Schools Classes connected with Public Schools	1,841 745	2,822 3,020 738	2,912 4,178 1,376	3.858 4,902 1,329
	2,586	6,580	8,466	10,089

Deducting from the total enrolment all cases where students have joined two or more classes, the number of individual students on our books for the year was 8,295, an increase of 1,607. The average attendance for the year was 6,205.3. In these returns the cookery classes, under the Directress of Cookery, are not counted.

Teaching Staff.

The staff employed during the year consisted of 13 lecturers, 5 resident science masters in charge of Branch Schools, and 110 teachers and assistants. The work throughout has been of the most satisfactory character, and I am under great obligations to one and all for the zeal and efficiency with which the work has been carried on. The Sydney Technical College was unfortunate enough to have two teachers, Mr. Charles Phillips and Mr. David Nelson, taken away by death. Mr. Phillips was killed by an explosion of gas while preparing for his class work; Mr. Nelson died after a lingering and painful illness. Both teachers had been employed for several years, and were highly esteemed by their students and colleagues.

**Instruction**

Instruction.

No material changes were made in the arrangements for imparting instruction. The lines on which the work has hitherto been carried on, and that have been proved to be productive of good, have been followed. The following are the details of the operations of the most important classes and Branch

Agriculture.

Mr. Angus Mackay, Lecturer-in-charge, was absent on leave, in consequence of severe illness for the whole of the first term. His work was carried on by the Assistant Instructor, Mr. Henry Lord, and Mr. G. J. Pitt, a former student. These gentlemen proved very efficient substitutes. Mr. Mackay

Mr. Angus Mackay, Lecturer-in-charge, was absent on leave, in consequence of severe illness for the whole of the first term. His work was carried on by the Assistant Instructor, Mr. Henry Lord, and Mr. G. J. Pitt, a former student. These gentlemen proved very efficient substitutes. Mr. Mackay reports:—

"The number of students the first term was 90; this increased to 167 during the year. The provision made in the College has been ample for the advanced class. The chemistry and general science of Agriculture came into the instruction of this class, original research being an especial feature of the system. Several of the students have evinced decided capacity for work of this kind, and analyses osils, plant sab, fruits, vegetables milk, water, the compounding of manures, spray mixtures for killing insects, &c., have been followed up in a manner which will enable me, when they are proved and perfected, to submit particulars concerning what fruits, vegetables, &c., take from the soil, which are likely to prove of decided value to Australian Agriculture.

"The accommodation available for the Elementary classes is sufficient even for an increase in numbers. The apparatus and appliances necessary to keep the teaching abreast of the improvements going on in general farming, fruit-growing, dairying, bee-keeping, and other branches, are not likely to exceed £100 for all the classes. These appliances will be spraying apparatus for editional properties, tools for draining, test apparatus for milk, &c.

"The advanced students in the Chemistry classes pay about £1 for the apparatus, which is ample for class purposes, and for their own use after leaving the College.

"The conduct of the students in the College and in country classes is most satisfactory. It always has been satisfactory. The attention given is very close, and the results creditable to the apitianes of the Colonial College classes is the want of a test farm or garden, where the instruction followed in the Technical College classes is the want of a test farm or

acquire knowledge of Nature's workings in a manner which inclines them more readily to agricultural pursuits.

"Attention to the nature and modes of life of fungoid and insect pests has been one of the chief features of the system of teaching followed in the classes. It is a branch of the first importance, and during the coming session it is my intention to follow it still more closely, so that the knowledge available concerning the operations of pests, both vegetable and animal, with the appliances found effective in checking them, may become known as widely as possible. Remarkably good effects are already seen in gardens and orchards from the use of compounds that check or destroy fungi and insects, and there is a growing desire in the country districts to know more. This is a very hopeful sign of a time, not far distant, when pests may be kept in check with as much certainty as good results are got from careful cultivation, or other skilful agricultural operations. The appliances, and the instructions given in the classes for using them, and for compounding spray and other mixtures, are such as quickly develop practical acquaintance with the life of pests, and how to destroy them."

As Mr. L. Henry, the Senior Lecturer, continued absent, the temporary arrangements for carrying on his work were renewed, but the general supervision of the Art classes devolved upon Mr. J. R. Wright,

who reports as follows:who reports as 1010ws:—
"The accommodation provided is far superior to anything we had in the old School of Art. As all the class-rooms are upon the one floor, the general supervision of the working is thereby reduced to a ::::innimum. At the present there are four large rooms in use—one 42 feet by 30 feet, for drawing from the antique; this is lighted from the roof, and is an admirable room; one 36 feet by 33 feet, used for elementary freehand drawing, fitted with drawing stands, &c., to accommodate 70 students; a room, 42 feet by 30 feet, divided by a low wooden screen into two sections, for elementary and advanced model drawing, fitted with galleries and desks for 48 students; this room also is lighted from the roof; the fourth room, 36 feet by 20 feet, is used for lectures in geometry, perspective, and sciography. The rooms are all lofty, and well-proportioned.

"Appliances for the several classes now in operation are fairly well supplied. The new series of plaster casts for the first year's course of freehand drawing will be ready for use at the beginning of next year. These casts will make the work of the students more interesting and instructive.

"The conduct of the students this year, as heretofore, has been all that could be desired.

"The classes throughout for the past year have been in a healthy condition. The attendance was not so good in the first term as after, owing wholly to the continued wet weather; since then the attendance has been better, and the enrolment of students generally, more than in any previous year. The work of the students also has been superior, as was exemplified at the exhibition of works selected for the Chicago Exposition.

for the Chicago Exposition.

"A class in sciography was formed about the middle of the first term and worked in conjunction with descriptive geometry. This is a subject specially useful to the engineering and architectural student as well as the art student, and no doubt, will become a popular one when better known.

"The following is a list of the classes and their total enrolment:-

Freehand Drawing	194
Model Drawing	144
Perspective	45
Plain and Solid Geometry	39
Sciography and Descriptive Geometry	20
Modelling	46
Design	16

The teacher of modelling reports:-

"I am very pleased to report that the conduct of the students continues to be satisfactory, and that many of them give good promise of becoming good art modellers, and a credit to the Colony. Numerically the class is strong, students are taking more lessons per week, and attending regularly.

"The syllabus laid down in the calendar has been strictly followed. A day-class is greatly needed by those who cannot attend in the evening, and I am confident that when established and known, will be reall extended.

well attended.

"I have been greatly encouraged by the acknowledgment of parents and employers of the great benefit gained by attendance at the class, and by the favourable report of the examiners."

The chemistry classes have met with exceptional difficulties during the year. The room at 301, Pitt-street, formerly occupied for lectures had to be given up at the end of 1891, and the new laboratory was not ready for the work of the first term. The occupation of the old laboratory was centinued for three months, but the lectures could not be taken up till June. The continuity of the laboratory practice was greatly interrupted by the removal to Ultimo. The absence of the lecturer, too, for four and a half months militated against the progress of the classes. Now that everything is in good working order, a large increase of students is confidently expected.

The accommodation is ample for all requirements; special provision is made for those students who can attend only in the evening. The equipment of the laboratory and the lecture-room leaves little to be desired. Among the new appliances may be mentioned gas furnaces of a very superior kind specially imported from America, and a set of 100 diagrams prepared by Mr. Byrn under the supervision of Mr. Dixon.

Dixon.

### Mechanical Engineering.

This is one of the most useful and best appreciated departments of the College work. The Lecturer-in-Charge reports upon the various classes as follows:

# Applied Mechanics.

"The present condition of the class is satisfactory, and I have prospects of still larger classes, as the young engineers are now finding out that the course of lectures is not too far advanced for them to understand—a system that drove the students away before, and has given me great trouble to rectify.

"The advantages accruing to students are that in the workshops they see work done, and in this class they have the reasons explained why it is done; they also learn the way of calculating the power required or obtained by work. The regularity of attendance shows the system of teaching is appreciated.

### Mechanical Drawing.

"Since moving into the new College the accommodation for pupils has been ample. The conduct of

"Since moving into the new College the accommodation for pupils has been ample. The conduct of the students throughout the year has been very good.

"The present condition of the class is very good, and also the future prospects. Good steady work has been done, the aim being to thoroughly ground the students in what will be useful to them in their work—not to make showy drawings.

The advantage of drawing to an engineer is that he learns a universal language by which he can understand any drawing, or communicate his ideas to another who may not know his language or understand his description. It also gives him an advantage in his work for the manufacture of machinery, and also gives him the principle on which to erect machinery.

# Fitting and Turning.

"In this class we have had a great increase in numbers, and have also done some excellent work, as

shown by the exhibits sent to Chicago.

"The class is now complete with all the new machinery ordered from England, and gives every satisfaction, and we are able to give a most complete course of instruction.

"This class, though always a small section in the engineering work, has done some very good work, but not as much as I think ought to have been done, but I hope by some changes to give more life and energy to the work.

### Iron-moulding.

"This class, though now properly started, has had very little chance to show what could be done, as it was not till the last term of the year we had our workshop fitted up, and now we are working with a lot of borrowed plant, so that we cannot really speak of the work for this year, but next year I hope to see a very large and important class doing work to help the other departments.

# Boiler-making.

"This c'ass has done excellent work during the year, and has also improved in numbers. Now we are thoroughly established in our new class-room with improved machinery, we are able to give a good course of instruction. I propose getting an old boiler for repair lessons, a very important part of a course of instruction... boiler-maker's training. 853—U Blacksmithing

#### Blacksmithing.

"This class has done some steady work, but has not advanced as much as I hoped. The only reason I can see is the slackness in the iron trade holds out very little inducement at the present time for youths, and those who are our students are mostly employed as strikers to other smiths, but take the opportunity we offer to learn the smithing for themselves.

#### Carriage-building.

"The enrolment for this class has increased since we have had more accommodation. The class has generally improved. The great difficulty so far has been the deficiency of drawings to work from, all the students learning drawing as well as practical work; but this will shortly be arranged for.

"Speaking generally, the work done during the year has been very good, and the various teachers have done their best in trying times.

"In considering the work for the year, the depression in the engineering trades must not be forgotten. So great has it been it is almost impossible at the present time to find an opening for a youth in the workshops. Several attending the College classes say they cannot find anything to do, but still steadily attend to their classes.

"I cannot close my Annual Report without saying how one and all of the teachers have worked in harmony with me, and done all they could to assist and advance the work of the College."

harmony with me, and done all they could to assist and advance the work of the College.'

#### Architecture.

The Department of Architecture includes classes for the study of architectural drawing and design, history of architecture, building construction, carpentry and joinery, bricklaying, masonry, stone and marble carving, cabinet-making, and slide rule. The Lecturer-in-Charge reports:—

"The accommodation has served the purposes and requirements of all the different sections of the

Department.
"Right through the Department the conduct of the students has been most exemplary.

"The condition of the classes generally should be considered as being fair, having regard to the great depression which has affected the building trades throughout the past year, from the

"Visits have been paid by societies and individuals interested in technical education, not only belonging to this Colony, but to the other Colonies and various parts of the world, and it is gratifying to record that whilst in every instance satisfaction has been evidenced regarding the operations in existence, praise, and even surprise, has been expressed at the scope and results of our operations.

"So much impressed have some of the visitors been with the value of the instruction given that

"So much impressed have some of the visitors been with the value of the instruction given that they have joined the classes, and have not only expressed their intention to continue as students, but to

recommend their example to others.

"The advantages to students from their technical education cannot, of course, be properly gauge.l. It must be admitted that the highest honors which can be obtained, viz., at South Kensington and at the City and Guilds of London Institute, bestowed liberally upon students of technical education in this

Colony, are no mean honors.

"In some branches of work there is no opportunity for youths outside of technical education to acquire the necessary training in this or any of these colonies, and it is not too much to say that this State, in affording such training, is doing a service which not only redounds to its credit now, but will bear creditable results in the future."

Art Decoration, House-painting, Sign-writing, Marbling, and Graining.

The Teacher reports :-

"The accommodation is sufficient for the present number of students.

"The conduct of students has been very good, and the condition of the classes is good; the enrolment and attendance being larger than in previous years. With more apparatus the classes may be

further developed.

"The greater part of the students in the classes are connected with the trade as apprentices, improvers, &c., and are gaining instruction which would otherwise be out of their reach."

# Sanitary Engineering.

The Lecturer reports:—

"The classes already established under the department of sanitary engineering have shown very satisfactory and progressive increase, both in point of enrolment and attendance.

"The College examinations for diplomas of merit as master plumbers, which are now conducted and the table of the control of the college examinations for diplomas of merit as master plumbers, which are now conducted the college examinations for diplomas of merit as master plumbers, which are now conducted the college examinations for diplomas of merit as master plumbers, which are now conducted the college examinations for diplomas of merit as master plumbers, which are now conducted the college examinations for diplomas of merit as master plumbers, which are now conducted the college examinations for diplomas of merit as master plumbers, which are now conducted the college examinations for diplomas of merit as master plumbers, which are now conducted the college examinations for diplomas of merit as master plumbers, which are now conducted the college examinations for diplomas of merit as master plumbers, which are now conducted the college examinations for diplomas of merit as master plumbers, which are now conducted the college examinations for diplomas of merit as master plumbers, which are now conducted the college examinations for diplomas of merit as master plumbers, which are now conducted the college examinations for diplomas of merit as master plumbers, which are now conducted the college examinations for diplomas of merit as merit as master plumbers, which are now conducted the college examinations for diplomas of merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as merit as m "The College examinations for diplomas of merit as master plumbers, which are now conducted monthly by this department, have come to be recognised by master and journeyman plumbers alike as furnishing a reliable guarantee of skill and sanitary knowledge on the part of those who have secured this distinction. As showing the work done in this direction, and the influence already exerted by this department, it may be mentioned that applicants for licenses to perform plumbing work in the metropolitan and surrounding districts, under the jurisdiction of the Sydney Board of Water Supply and Sewerage, must now possess this diploma, which is accepted by that Board as a necessary and sufficient guarantee of ability and skill.

"With a view to establishing the fullest public confidence in these examinations, delegates are invited to be present from the Metropolitan Board of Water Supply and Sewerage, the Master Plumbers' Association, and the Operative Plumbers' Society, and the interest taken in this work is such that these invitations have always been fully taken advantage of.

Association, and the Operative Plumbers' Society, and the interest taken in this work is such that these invitations have always been fully taken advantage of.

"From the evidence of the facts above explained, and also from the opinions expressed by the delegates and members of the bodies represented, it is evident that the value of the work of the Sanitary Engineering Department in this direction is being fully and increasingly recognised, so that we may fairly claim to be performing important and useful work in providing a means whereby the general public throughout the colonies may have a sure guarantee that tradesmen holding our diploma are thoroughly competent men, worthy to be entrusted with the execution of those sanitary works now recognised to be of paramount importance to the public health.

of paramount importance to the public health.

"The course of instruction in general principles and in drawing, followed by the preparation of working drawings in the drawing class-room, which were afterwards carried out in the workshops by the students, was initiated with much success, and was clearly valuable in the direction of enabling the students more plainly to realise the requirements and purposes of the various parts of their work, which previously they were only enabled to make as mere individual parts, having no obvious connection with

"The Plumbing Class was, as usual, attended during the year, and the work done very satisfactory.
"In conclusion, I may add that during the past session I have had every reason to be satisfied with the attention and progress of the students generally in the department under my charge."

# Electrical Engineering.

This class commenced well, having as many as 98 students for the first term, but from various causes the enrolment declined to 59 in the second term, and to 48 in the third. A courses of 84 lectures by Mr. A. C. Webb was arranged for, as the full scheme of instruction could not be taken in hand without a completely equipped laboratory.

Mr. Webb reports:—"On the whole, the above class was decidedly satisfactory. As a matter of fact, the amount of ground that had to be covered in the year made it extremely difficult for students to keep pace with the lectures, and there is no doubt that the falling-off in numbers as the lectures got more and more advanced was solely due to this fact. With regard to the behaviour of the class, I could not wish for a more attentive or better behaved class of students."

#### Physics.

The Lecturer reports :-

"The Electrical Engineering class, established early in the year, absorbed the late Practical Electricity class, and consequently affected the enrolments in my department. These have been, Electricity, 37, Telegraphy, 34, Sound, &c., 8; total, 79; as against 14, 16, and 11 respectively for the year 1891,

37, Telegraphy, 34, Sound, &c., 8; total, 73; as against 14, 10, and 11 respectively for the joint 2007, showing an increase of 38.

"The apparatus is quite sufficient for the general purposes of the Physics classes.

"The conduct of the students has been good, their attendance very erratic. I am unable to account for the latter fact, my inquiries eliciting only some excuse, such as bad weather, &c."

#### Lithography and Photo-Lithography.

Lithography and Photo-Lithography.

The Teacher of these classes reports as follows:—

"The present accommodation is of a highly satisfactory character, with but one exception. The appliances now in use have proved serviceable, both for theoretical and practical methods. The conduct of my pupils has been a source of much pleasure to me, and lessened my labours in a most appreciable manner. A better class of students I have seldom met with. The average attendance, however, has not been what I should have desired, but the non-attendances have, in the majority of cases, been occasioned through influenza and kindred complaints. There has been no lack of interest in the work, and it has been highly gratifying to me to find my pupils so ready to learn and willing to acquiesce in my wishes regarding the method of instruction.

"The photographic branch of the tuition is not only instructive, but a source of pleasure to its exponents, added to which the same advantages mentioned above accrue to those whose occupation in life necessitates a knowledge of photography."

necessitates a knowledge of photography."

# Geology and Mineralogy.

The classes in the Department of Geology, Mineralogy, and Mining have been well attended during the year. The accommodation in the new building is better fitted for the work of these classes than the old rooms in Sussex-street, and the enrolment of students has increased considerably. It was found necessary to divide the Mineralogy class into two sections, taught on different evenings, and a new class for instruction in mineral prospecting was formed. The students have also been taken on Saturday afternoons to the Prospect Quarry and other places for practical work. The appliances during the year have been largely increased by the donation and purchase of specimens.

#### Mathematics.

The Teacher reports:—

"The present condition of the classes, with regard to enrolment and attendance, is fairly satisfactory. At the beginning of next year I have every reason to believe that a very satisfactory improvement will be shown.

The standard of the work done during the present year has been higher than last year, and the students are working much better together than formerly. The chief difficulty that has to be contended with is the limited time that is necessarily devoted to each subject, and unless students can find time at home to revise the work done in class a high standard of proficiency cannot be attained.

In conclusion, it affords me very great pleasure to say that the conduct of the students is in every way highly satisfactory, and, as a whole, they show a keen desire to improve themselves."

# Caligraphy and Correspondence.

Caligraphy and Correspondence.

The Teacher reports:—

"The year 1892 has been, I am pleased to be able to report, an exceptionally good one as regards the number of students who attended the classes, and also the amount and quality of the work done.

The enrolment for the year in the Sydney classes was 257, being the largest yet recorded for the caligraphy classes. The students were a fine body of young men, composed principally of clerks, salesmen, and artisans, with a fair percentage of lads averaging 15 years of age, who had just left school or were in their last year of school life. The conduct of the students was excellent.

The classes conducted by me at Ashfield and Burwood Technical Schools have been attended with success, and a good enrolment was secured for each of the classes mentioned.

I am pleased to report that the students applied themselves most assiduously to the work of the classes, and satisfactory progress was made by every member of the classes. It may also be mentioned that the attendance at the Burwood class during the third term was considerably in excess of previous terms, and, indeed, the largest enrolment made since the class was formed, and the future prospects are good."

Department of Sheen and Weel Theory.

# Department of Sheep and Wool Training.

The Lecturer-in-Charge of this department reports:—

"There were 6 students the first week, but the numbers gradually increased to 16 before the end of the term. The hours are from 9:30 a.m. to 4:30 p.m. each day, excepting Saturday. The daily attendance has been most satisfactory, each student attending as if going to regular business. The members of the classes were: a wool-broker, wool-scourers, wool-classers, station overseer, and young men just left school, who are intending to make the wool trade and wool-growing their profession. The young men are really serving a term of apprenticeship, and will attend the department for a number of terms.

"With few exceptions, wool-brokers and wool-growers are greatly in favour of this branch, and acknowledge that it is supplying a much needed want. A great advantage to the younger members of this class, who are competent to class wool, &c., is that a good many wool-growers this last season have eagerly sought and paid well for their services in connection with skirting, rolling fleeces, and sorting pieces, and had there been 100 students available I could have placed them at from 30s. to 40s. per week, with board and fare one way. I have much pleasure in stating that most satisfactory reports of the work and behaviour of the pupils who went away for the shearing season have reached me, and the employers express themselves freely as to the useful and serviceable work done in the department. Already a number of wool-growers are desirous of engaging students for next shearing at suitable pay.

"Other subjects in connection with the department receive careful consideration, as far as appliances will allow. Several young men are studying with a view to become stock inspectors, wool-brokers, speculators, and in course of time I have no doubt but that the sheep and wool branch will turn out reliable and competent men.

"Five students went up for examination for wool-classing, practical and theoretical, and all passed.

"The Minister has appointed a Board, consisting of seve

Evening Class.

The attendance at this class has considerably improved. The Teacher reports very favourably of the attention and progress of the students, and the report of the Examiner is very favourable.

#### Sick Nursiny.

The Teacher of these classes reports:—
"At the Technical College everything required for the classes and for practically demonstrating the lectures was at hand.

"To properly demonstrate some of my lectures I found it necessary for some weeks to collect the students to hold an extra class at the Technical College on Saturday.

"In view of the fact that many of the students are wives an imothers, with their numerous home duties, the attendance has been very good. During the first term the enrolment was 67; during the last it was 82. It will be seen from this that there was a steady increase in the number of students during the year. I have on various occasions examined the students on the practical work connected with the classes viz hadmelting from the politicing made for any large much graft fed with the definest and classes, viz., bedmaking for invalids, poulticing, packs, &c., and was much gratified with the deftness and skill displayed in the performance of these tasks, evidences of the strict attention given to instruction.

#### BATHURST.

The Resident Master's report is as follows:—
"The session which has just closed compares favourably with that of any previous year, alike in the numbers of subjects taught, and the number of students attending the classes. The total enrolment for the year in the various classes was as follows:—

Applied Mechanics	16	Geology	11
Agriculture	6	Mathematics	58
Book-keeping	43	Mineralogy	10
Botany	14	. Physics—Senior	18
Chemistry—Theory	16	,, Junior	
, Practice	7	Phonography	42
Drawing	20	Type-writing	
French		Practical Geometry	8

"The class in type-writing was applied for at the close of last session, but was not commenced until July of the present year, when Mr. A. T. Atkins was appointed teacher, and a large number of students joined, most of whom have attended regularly, and the progress they have made is creditable to themselves and to their teacher. The use of the "Remington," "Caligraph," and "National" machines is

selves and to their teacher. The use of the "Remington, Cangraph, and Taurona."

"In July a Junior Class in Physics was also formed, at the suggestion of the Superintendent, consisting of the boys and girls in the upper classes of the Superior Public School. There being too many enrolled for all to attend at one time, the boys attend one week and the girls the next, on Wednesday afternoon. The subject of electricity and magnetism was chosen as the branch of physics to be treated, and the lessons were fully illustrated by experiments. The greatest intelligence and attention were shown by the students, many of whom appeared to acquire a genuine acquaintance with the principles of the science. The success of the class was largely due to the warm interest which the head master and head mistress of the Superior Public School took in the matter. The students of this class pay no fees.

As on previous occasions I can report most favourably on the general behaviour of the students; anything approaching intentional rudeness or misbehaviour being unknown. All the teachers report to the same effect.

the same effect.

On the whole the present condition of the Technical School is eminently satisfactory, and the prospects for the future are encouraging. The total enrolment was 166 in excess of that of last year, which, again, was the largest we had had up to that time. The majority of the students have worked well, and some have shown quite exceptional zeal in their studies, not only attending with the utmost regularity, but also working well at home.

I have often regretted that we could not obtain students for day classes, and was, therefore, glad that the afternoon class in Physics was formed, although it entails a good deal of work. A junior Botany class was also formed, the students of which have shown much intelligence.

We have had for several years past a fair number of scnior boys from the Superior Public School in attendance at the school, but I am of opinion that the establishment of a class in Junior Physics, by bringing us more closely in touch with the scholars, will lead a much larger number of them to join the evening classes. Several scholars have already expressed a desire to join the senior class in Physics, in order to continue their studies. A good many of our students come from the railway works, and we should probably have more, but that the irregularity in their hours of work militates against their regular attendance.

The alterations in the course of instruction in various subjects have, on the whole, worked well with us. The division of Geology and Mineralogy into two years' courses, has been a distinct improvement, although the arrangements of matter in the Geology course renders it difficult to teach elementary

ment, although the arrangements of matter in the Geology course renders it difficult to teach elementary and advanced students at the same time.

The establishment of a course in Theoretical Mechanics is also an advance, and I hope to have a good class in this important subject next year.

Several of our Botany students passed well at the Junior public examination, and others have passed the matriculation in French from knowledge gained entirely at the Technical School.

Branch Technological Museum.—The attendance of visitors at the museum continues to improve steadily. Last year the average was about 30 per day; this year, for several months it did not fall below an average of 50, and in November reached 60 per day. There have been numerous and valuable local donations to the museum during the year, including an interesting series of minerals and fossils from the Yarrangobilly Caves; a very complete set of cereals and other vegetable products grown in the district; some good samples of Lincoln and Leicester wools; and numerous mineral specimens. The addition of a small collection of natural history specimens, principally stuffed birds and snakes, has proved very attractive.

addition of a small collection of natural history specimens, principally studied bits and charce, has proved very attractive.

Bathurst Scientific Society.—This society continues to meet monthly at the Technical School. A very successful conversazione was held at the close of the first session, at which the curator of the Sydney Technological Museum attended; and some valuable papers have been read at the monthly meetings. Two botanical excursions were made in the spring, which were well attended, and resulted in the collection of a large number of plants. It is hoped that in time a tolerably complete collection, to illustrate the flora of the district, will be formed at the Technical School.

The annual meeting for the distribution of prizes was held in June, and was one of the most successful we have had.

successful we have had.

At the Bathurst Agricultural Show, held in April, there was a very extensive and valuable exhibit sent from the Technical College, Sydney. Some of the cases and apparatus from the Technical School were used on the same occasion, and the whole exhibit was much admired.

### GOULBURN.

The Resident Master reports:—The various classes in connection with this school have been successfully maintained during the past year. In the matter of attendance of students it has been one of the most successful years in the school's history. The number of individuals attending the classes has been 180, 186, and 178 respectively for the three terms; those numbers are exclusive of about 30 Public School boys who attended for manual training. The number of individuals attending my own classes reached 101 in the third term. This number has never been reached before. The total enrolment has never been reached before.

The accommodation is good, but certain classes suffer from want of special rooms adapted to their special requirements. The various classes are reported on as follows:—

their special requirements. The various classes are reported on as follows:—

Inorganic Chemistry:—The enrolments for the year were 27 for theory and 7 for practice. The theory class was conducted in three divisions—one for the second-year students and two for first-year students, meeting on Wednesday evenings and Saturday mornings respectively. The apparatus and material provided are sufficient, but the stock will require keeping up.

Physics:—Enrolments, 19. There were two classes, one devoted to magnetism and electricity, and the other to the study of sound, light, and heat. These subjects require a large amount of apparatus for effective teaching. Some of the apparatus we have is of good quality, and it is used at every lesson either by the teacher or the students. A class in Practical Magnetism and Electricity was commenced this year; some of the articles manufactured are worthy of being placed amongst the school apparatus, notably a tangent galvanometer, a differential galvanometer, a potentiometer, a set of resistance coils, and a Wheatstone bridge. The woodwork for these articles was prepared by the teacher of manual training.

a Wheatstone bridge. The woodwork for these articles was prepared by the teacher of manual training.

Geology and Mineralogy.—These subjects are taught in a thoroughly practical manner. Besides the collections supplied, specially for teaching, we use the Museum collection. Prospectors and others are also continually supplying us with samples which, if not worth putting in the Museum cases, are useful for examination. We have made excursions into the surrounding district in search of mineral and

geological structures.

Art Classes.—Enrolments—Freehand, 63; Model, 21; Geometrical, 21; Perspective, 10. Good progress has been made by these classes, and they have been well attended. Ten hours a week are devoted to this section.

Commercial Classes.—The teacher of Typewriting and Shorthand reports satisfactorily on the state of his classes. The enrolments were—Typewriting 17; Shorthand, 35; Arithmetic, 30; Book-

Commercial Classes.—The teacher of Typewriting and Shorthand reports satisfactorily on the state of his classes. The enrolments were—Typewriting 17; Shorthand, 35; Arithmetic, 30; Book keeping, 26.

Architecture.—Enrolments, 10. The tacher reports that the accommodation is good, also that the class requires an additional stock of copies.

Manual Training for Public Schools.—The enrolments for each quarter have been—31, 31, 32, and 32. The syllabus has been followed as closely as possible. Some difficulty has been experienced in getting the boys to bring compasses for the geometrical drawing. The teacher reports that their conduct, with one or two exceptions, has been good.

Manual Training, Carpentry, Lathe, and Fretwork.—Enrolments, 25. The teacher reports that the appliances are satisfactory, and that the conduct of the students has been good.

Sick Nursing.—Enrolments, 69. The teacher reports that great interest is shown by the students, who have made good progress. Three of the Goulburn doctors kindly offered special prizes for bandaging, bed-making, and for a paper on "The treatment of a typhoid patient" respectively. They also conducted these special examinations and awarded the prizes.

The general conduct has been excellent. As a rule students voluntarily attend the classes; their object being to work seriously and steadily. The present condition of the school is very good.

Branch Technologic il Museum—The attendance of the public shows a very satisfactory increase; the total number for the year is 11,303. The delivery of four additional show-cases has enabled us to display a very fine collection of minerals and rocks. Numerous inquiries are made by prospectors and persons interested in mining as to the nature of specimens which they have found. Specimens have been loaned to the Public School teachers on five occasions for illustrating lessons, while in one case a teacher brought her class to the Museum for instruction. The total number of registered specimens is now 2,514. Of these 372 were received t

teaching purposes.

Special prizes have again been offered by friends, Mr. E. P. Bryden, President of the Scientific Society; Mr. W. E. Kelso, M.A.; Mr. E. Howard, Mayor of Goulburn; Mr. W. P. Faithfull, and the Committee of the Mechanics' Institute. It may be interesting to state that several Public School teachers travel great distances to attend the classes held on Saturdays. Four students have availed themselves of the concession of half-fares granted by the Commissioners for Railways.

# WEST MAITLAND.

West Maitland.

The Resident Master reports as follows:—

The conduct of the students has been excellent. The work this year has been progressive; there has been no lapsing of established classes, nor falling away in attendances. In the building construction, art, and carpentry classes more advanced work has been done than previously, and I anticipate a very great advancement next year, with the better accommodation, &c., available.

Hitherto much of the work of the art classes has been elementary, but a great many of the students have now worked through the first course, and are taking up more advanced studies.

The most direct appreciation of the efforts of the teachers that has come under my notice is in the case of the phonography class. Every year some of the smartest of the lads are offered appointments on the staff of the local newspaper, the Maitland Mercury, &c.

The adult students of the plumbing class have benefited largely from the instruction gained, without which they could not have faced the examination in connection with the Board of the Hunter River Water Supply.

without which they could not have faced the examination in connection with the Board of the number River Water Supply.

Several young men in business houses have been raised from inferior positions to that of book-keepers after attending the book-keeping class for a time; and, finally, I may say that every earnest man attending these classes has benefited by the instruction given.

One of the leading events in the year's history of the school was the competition for the prizes offered by the Hunter River Agricultural and Horticultural Association in May last. The prizes were competed for with keen rivalry by the students, and the exhibits gave the residents a clear idea of what sort of work was undertaken by the Technical Branch. In conjunction with his Worship the Mayor (R. A. Young, E3q), the Association has authorised me to draw up a still larger programme for the next exhibition.

Architectural and Mechanical Drawing.—The conduct of the students has been very exemplary.

next exhibition.

Architectural and Mechanical Drawing.—The conduct of the students has been very exemplary. The course of studies has been carried out in accordance with the syllabus.

Architecture.—The historical studies have embraced the different styles of architecture as contained in the first year syllabus, viz.:—Indian, Chinese, Japanese, Mexican, Peruvian, Babylonian, Assyrian and Persian, Egyptian, Phænician, and Grecian.

Building Construction.—The subjects taken have been those as laid down in the first and second years' syllabus, with explanations and sketches on blackboard, &c.

Architectural Drawing.—This was carried out by instruction on the use of scales and instruments, drawing on different scales, drawing to scale, enlarging and altering sizes, the different styles and orders of architecture; also a few original designs by students carried out in the classes under my supervision and direction. The progress of students has been gradual and satisfactory, as a comparison of their later work with their first attempts will plainly show. The attendance has also been very satisfactory, and when we get into the new room with better ventilation, light, and appliances, continued success may be anticipated.

Mechanical

Mechanical Drawing.—As in the above classes, the conduct of students has been all that could be desired, and their attendance very good and regular. The students have been initiated into the use of scales and instruments, the understanding of plans, elevations, and sections of different parts of machinery, taken from cards, blackboard sketches, and examples from Cryer and Jordan's work on mechanical drawing. The absence of models of machinery was greatly felt both by students and myself when explaining to class the different parts and sections, &c. It is very pleasing, however, to be able to record that good progress has been made, especially when we consider that with perhaps 4 exceptions, all were new to the work. A number of plumbers also joined this class for the purpose of receiving instruction in plumbing, theory, &c. And although they commenced late in the second term, and were very backward in elementary education, they have made fair progress. The subject staught them embraced the working out of contents of cisterns and weight of same, ascertaining the dimensions of cisterns to hold given quantities, &c., the sizes of lead, &c., required to line cisterns, their weight, &c., rules regarding head and pressure, and sanitary laws regarding the arrangement of soil waste pipes, their proper ventilation, the necessity for trapping, &c. This class promises to become a very good one next year. As the Hunter District Water Supply and Sewerage Board are going to insist on plumbers passing the technical standard after 1893, they will have to study up, which will necessitate their having a separate class. I feel sure there will be a sufficient number of students to warrant one being started.

Wood-working Classes.—The teacher of these classes reports:—The present workshops at West Maitland, to which the classes were removed in September last, provide ample accommodation, and when the proposed alterations are carried out, we shall have a first-class workshop. The workshop at the Boys' High School, East Maitland, is

the eye and hand for future development, and the providing of useful employment for spare hours are the greatest advantages gained.

**Book-keeeping.**—The Teacher reports:**—The course of studies has comprised the formation of six sets of books, with entries pertaining to general storekeeping, drapery, and grocery businesses, and a set of auctioneers and commission agents' books. Special care has been taken to introduce into our work every transaction likely to occur in actual business, and cach set has been thoroughly completed, by the taking out of general balances, profit and loss accounts, and capital accounts. A marked improvement has been shown by the students during the past six months in putting in the finishing entries and taking out balance-sheets. Taking into consideration that a number of students occupy positions where they receive no daily practice, progress is of necessity slow, but it is pleasurable to record that they personally acknowledge they are well satisfied. The accommodation has been in every way suitable for the purpose, but the desks are too narrow for the work to be done properly.

**Phonography and Typeruriting.**—These classes in Maitland have been well attended, and satisfactory results may be anticipated from both. The Phonography class, in particular, has increased in numbers since last year. The accommodation for pupils has been somewhat limited, but when the class is located in the High-street building there will be no reason for complaint. The prospects of the classes are very encouraging indeed. Since the Phonography class was established no less than 7 of the students have secured work through the knowledge they possess of the "winged art."

**Dresscutting.**—The Teacher reports as follows:**—The accommodation provided for s'udents is taxed to its utmost capacity in both Maitland and Singleton. There are sufficient appliances. At present the classes are in a very prosperous condition. Since the beginning of the second term there has been an increase of 43 students altogeth

### NEWCASTLE.

The Resident Master reports: -The enrolment of students in the Technical classes of the Newcastle district during 1892 is as follows:

Č			
Mechanical drawing	<b>22</b>	Advanced drawing	27
Metallurgy	7	Freehand drawing	0
Mineralogy	5	Model drawing	73
Geology	14	Perspective	0
Chemistry	13	Geometrical	Õ
Mathematics	43	Book-keeping	25
Typewriting	24	Carving and Gilding	-6
Phonography	109	Steam and Steam-engine	16
Boiler-making	16	Coal-mining	12
Plumbing	9	Physics	4
Dresscutting	59	<b>,</b>	
Stockton	Typewriti	ng 19	
	Phonogra	phy 26	
Plattsburg	Drawing		
Minmi	Mechanica	al drawing 31	
Lambton	Model dra	wing8	

These numbers, on comparison with those of last year, will show a very satisfactory increase.

The conduct of the students is uniformly satisfactory, as might naturally be anticipated where they are, as in this district, mostly young men and women earnestly anxious to increase their knowledge and

improve their status.

The coal-mining classes are carried on for the convenience of students at five localities, viz., Newcastle, Merewether, Minmi, Hamilton, and Wallsend. A large majority of the members are working miners, and some of them of middle age, who have to begin again their mathematical studies. Solid and satisfactory progress has been made, and this, to a large extent, is due to the regular home work that supplements the class teaching.

In all the classes the attendance has been regular, though somewhat injuriously influenced by the

supplements the class teaching.

In all the classes the attendance has been regular, though somewhat injuriously influenced by the general state of business depression. The supply of appliances for teaching purposes is generally satisfactory. The class for plumbing lapsed during the year, as did also that for carving and gilding; in both cases owing to the small attendance. A new class for plumbing has been proposed by students who wished to be prepared and examined for work under the Hunter River District Water and Sewerage Board. New classes have been formed in mechanical drawing at Minmi; coal-mining at Hamilton, in place of a class formerly conducted at West Maitland; book-keeping at Newcastle; and a day class in advanced freehand drawing at Newcastle, and at night at Plattsburg.

Art classes.—The teacher reports:—The art classes conducted by me are still held in the Bolton-street Public School room, where the accommodation for the pupils is very fair. During the year the conduct of the students has been very good; as a rule they are attentive, industrious, and anxious to succeed.

Advanced

Advanced

Advanced Drawing.—The teacher of this class reports that it has made a very successful start. Steam and steam-engine.—The teacher reports:—The accommodation for the students in steam and steam-engine class has been sufficient, having never had more than 16 present at one class, but for mechanical drawing it is totally inadequate, for since taking charge of this class in August the number has increased from 10 to 22. This number compels that there be two rooms occupied, and this is not desirable when only one teacher has charge. The advantages of these classes are many, chiefly to young engineers, of which the majority of students attending are, as it enables them to combine theory and practice, and is of great benefit to them, and also to colliery engineers.

Boiler making.—The teacher reports:—The pupils in attendance take a great interest in the class, and a number of other apprentices in the district have signified their intention of joining the class at the beginning of the year. The students are able to undertake work in templating in their daily vocation, which formerly they were unable to do, as the theoretical part is not generally learned in workshops.

shops.

Ccal-mining.—The teacher of these classes reports as follows:—In the lectures during the year I have kept steadily in view the advisability of adapting the method and matter to the education of the students. The large majority of them being working miners, many of those of middle age, have had to begin again their mathematical education with their connection with the classes. The solid and satisfactory progress made by this section of the students has been principally due to making their home work suggestive of their daily surroundings in the mine. By thus making the students' work attractive and interesting by connecting it with the details of the mining operations with which they are every day in contact, the distaste to mental application—natural to a man of middle age, after a hard day's toil—is considerably counteracted, whilst its effects on the young and ardent student, who has been only four or five years from school, are too obvious to require any comment. It would be difficult to speak in too high terms of the students' attendance at class or attentiveness to their studies, whilst their uniform courtesy to their fellow students and myself has been of the most praiseworthy character. Our accommodation at the different centres is all that can be wished. On this point Newcastle has probably the worst accommodation. the worst accommodation.

the worst accommodation.

Mathematics.—The teacher reports:—The accommodation is sufficient, and the conduct of students has been excellent. The classes have prospered, and promise to be more successful in 1893 than in the past year. Boiler-makers, clerks, mechanics, and teachers have attended, and shown great interest in the work and anxiety to improve, and have spoken highly of the benefit received.

Phonography.—The teacher's report is as follows:—"The classes have quite outgrown the accommodation. The room is about 14 by 16 feet; it is used as a store-room for chairs, books, and papers, and is badly ventilated. I have an attendance reaching as high as 45 at times; there are 65 on the roll in one of my classes.

as badly ventilated. I have an attendance reaching as high as 45 at times; there are 65 on the roll in one of my classes.

**Dresscutting.**—The teacher reports: These classes were started on the 3rd April, 1891, with 12 pupils, and two lessons per week were given. At the end of 1891 the number of pupils had increased to 53, and the number of lessons per week to four. At the end of the first term in 1892 there were 45 pupils and four lessons per week, and now, at the end of the year, there are 57 pupils enrolled.

The students are well conducted, very anxious to learn the system, and therefore take great interest in their work, many coming a great distance at much inconvenience to themselves. There is every prospect of the classes increasing, as several have already stated their willingness to join during the coaling term.

coming term.

Mechanical Drawing, Minmi.—The conduct of the students was excellent throughout. Seventeen lessons of this session had lapsed before this class met. This is a loss of 40 per cent. in the lessons of the session, and therefore the class as a whole cannot be expected to have made that progress which it would have done had the whole session been at its disposal. Notwitstanding this, the students have worked and applied themselves diligently to the subject.

### GRANVILLE.

The resident teacher reports: -The enrolment of students for the year in the various classes is as follows:

Applied Mechanics	11	Agriculture	34
Mechanical Drawing	25	Phonography	
Geometrical Drawing	20	Chemistry	20
Mathematics	26	•	

During the year the class-rooms at Granville have been the same as last year, except that the class in mathematics has moved into a larger room, the advanced class in Agriculture being held on the same evening in the smaller room, previously occupied by the mathematical class. In Parramatta the desks sent up from the Sydney Art room have proved a great improvement for the Model Drawing class, only the capacity of the room would have been severely tested had the attendance not been affected by bad weather and sickness.

The conduct of students throughout the year has been very good. During this year a considerable increase has been noticeable both in the gross and also in the individual enrolments.

The manager of Hudson Brothers' works informed me recently that he notices a marked improvement in the apprentices in that establishment who are attending the classes regularly, and predicts very considerable advantage to them in their future career as engineers from the course of study which they are pursuing.

Agriculture.—The teacher of this class reports:—
This year the elementary class had an enrolment of 24, which is an increase of 5 on last year.

An advanced class was started at the beginning of this year, and had an enrolment of 10 students, who had previously gone through the elementary class. The future prospects of these classes seem to me

The advantage of these lessons will be seen when it is remembered that the average age in the elementary class is over 27, and in the advanced class over 34 years of age, and that most of the students possess poultry and gardens, and, in some cases, a few acres of land, where they apply in an intelligent way the information gained in the class-room. This, I have pleasure to state, I have ascertained by visits to the gardens, &c., of 11 of the students in the neighbourhood of Burwood, Auburn, Clyde, Merrylands, and Granville. and Granville.

and Granville.

In order to make the teaching as practical as possible, and to illustrate the lessons given in the class-room, 19 excursions were made during the year by the students accompanied by me. At several of the excursions the students did a good deal of practical work, such as budding, grafting, pruning, &c. On one occasion, one of the students having provided the horse, the students were shown by me in a practical way how to break in a horse for the saddle, harness, or plough.

Theoretical chemistry.—The teacher reports:—

In spite of the continued depression in the large manufacturing establishments here, this class has held its ground, both in numerical strength, and in the zeal and aptitude displayed by the majority of the students. The inhabitants of Granville are beginning to recognise the important bearing which chemistry must have upon all the manufacturing industries of the immediate future. In this class there are workers in metal, gardeners, agriculturists, and others, who will take an intelligent interest in the science, especially as it may be applied to their own particular callings. Granville promises to become an important centre of technical teaching.

The class-room is large, and in every way convenient, and the apparatus for illustration and experiment is as perfect as the present size of the class will warrant.

#### NEWTOWN.

The classes are held at the Public School. The room provides adequate accommodation, and is well lighted, and in consequence of the erection of partitions during the year, no difficulty is now experienced. The total enrolment for the year has been :-

Art classes	114	Mathematics	25
Phonography	86	Mechanical drawing	29
Book-keeping	27	C C	

The teacher of the Art Classes reports :-

The teacher of the Art Classes reports:—

The accommodation for pupils is sufficient. The future prospects of the classes are encouraging. The total enrolments and attendance for freehand and model drawing have increased each year since the commencement of the classes, and now that they are well established, there is every probability that the year 1893 will show a further advance.

"The annual distribution of prizes and certificates, held in the Town Hall in June last, has proved of considerable benefit to the classes, enlisting as it did the support of a number of residents whose positions in the district place them directly in touch with the work done in the school. Indeed, the teachers would be wanting in something more than courtesy did they not express their indebtedness to Messrs. Rigg (Mayor of Newtown), Preston, Gommeson, Hodgkinson, and others, for their active interest in the work of technical education. These gentlemen have inaugurated a prize fund, which it is hoped, will be not only a reward, but an additional incentive to the students."

The teacher of Geometrical and Mechanical Drawing reports:—

The accommodation has been sufficient. During the year a new press and several sets of "Cusson," and other geometrical and perspective models have been received, and those, together with the kind permission to take whatever might be necessary in the way of practical models for mechanical drawing, extended to me by several gentlemen connected with engineering in the town, have rendered it necessary to say that, with the exception of blackboards, we are very well supplied.

The conduct of the students has been very good, and the present condition of the classes is healthy, and it might be said that there is every indication that the future will show an increase, both in work and attendance.

attendance.

The custom last year of the Saturday afternoon visits by the students to engineering and other works has been continued this year, every fourth Saturday afternoon being devoted to this purpose. And it must be said, in justice to the gentlemen connected with the works visited, that the greatest kindness and courtesy was shown to the students in every case. It is almost needless to say that the benefit and courtesy was shown to the students in every case. It is all derived from such visits was felt and appreciated by the students.

#### PETERSHAM.

The Art Teacher reports as follows:—

The advantages to be derived from these classes is shown by the satisfactory increase in the number of students enrolled each year. During the present year only 1 new class was started—scientific dresscutting. This gives promise of becoming one of the most taking classes in the district. The following are the classes in operation, and the number of students in each:—

Art and Mechanical Drawing	93
Phonography	76
Mathematics	34
Dresscutting	31

The scientific dresscutting class, established during the second term, meets on Tuesday, at 3 to 5 p.m., and Thursday at 7 to 9 p.m., with excellent results.

The classes in mathematics do not appear to have been so popular as formerly, yet good] work

seems to have been accomplished in the short space of time allowed.

In shorthand a steady increase is maintained. The senior students take a great interest in the subject, especially in the reporting section. A great number presented themselves for examination.

In the freehand drawing class a great number of students are enrolled. During the year pupils of a superior class have joined, and will tend to assist in building up some of the higher sections for next very. In model drawing cases are a work belowed to the hear dependent of the higher sections for next

year. In model drawing some good work has been done.

In practical plane and solid geometry an excellent class has been maintained.

The first and second years' course of mechanical drawing shows gradual progress. The attendance of students is most satisfactory, and I expect a large class for the next year.

The Teacher of the Art Classes reports as follows:—

The accommodation is all that can be desired. The lighting is perfect, each pupil having a good light wherever he may be working. The rooms are situated in the centre of the town, within 2 minutes' walk of the Post Office.

The appliances are perfect, with the exception of ink-wells for the shorthand pupils, which are

The appliances are perice, with the exception of the state of the state greatly needed.

"The class is in a flourishing condition, the number of pupils on the roll at the end of the third term being 79, and I hope next year to be able to add to that number. The conduct of the students is excellent; they are punctual and attentive to their studies, inasmuch that some of whom I had small hope last year have done really good work. The interest pupils take in their work is shown by the number who sat for examination in the different subjects, 56. The classes on the whole have shown a marked improvement on the work done last year, the pupils beginning to think before they draw, and there not being that haphazard manner of working, which is so trying to a teacher."

### BROKEN HILL

The Resident Master reports:—
"The enrolment of students for the year in the various classes is as follows:—

י ומי		4 + 01	
Physics	⊥ <b>L</b>	Art Classes	40
Chemistry—Theory	13	Mechanical Drawing	11
Applied Mechanics	14	Mathematics and Technical Arith-	
Geology		metic	27
Mineralogy	5	Physiology	
Carpentry and Joinery	16	Book-keeping	6
Staircase and handrailing	16		

"The rooms are very hot, and not too well lit. This point has to be considered, as the students who work at the mines have one week out of every three on the 'afternoon shift,' consequently are unable to attend at the Evening Class, and to prevent their losing the requisite number of lessons have to be received in the day-time of that special week.

"The conduct of students has been in all the classes invariably good. They have been most attentive, and have expressed their intention, almost without exception, of joining the classes again next year, but as I reported last year, the want of primary education is a great drawback to the majority of the students, but several have stated they intend to join the mathematical and technical arithmetic classes when we reopen."

Mechanical Drawing and Applied Mechanics.—The Teacher of these classes reports:—"A number of new students entered the classes at the beginning of the third term, hence they were not sufficiently advanced in their studies to admit of examination this year. Work has been hampered during the past term through the prolonged strike in Broken Hill, and several promising students have left the district, at any rate for a time. It is gratifying to know that our work has not suffered greatly through the struggle. The outlook for the future is bright. A number of very large sulphide plants, including very heavy machinery, will be erected here early in the coming year, and all the technical knowledge available will be required.

"Two of last year's students have applied for letters patent for useful contrivances, and they were anticipating, a few months ago, sending an agent to the Chicago Exhibition to exhibit and sell their patented article. A third student has prepared drawings for a 'hydraulic separator,' to be patented, and he is frequently called upon to prepare drawings for the manager of the South Mine, Broken Hill. Drawings and specifications for a patent concentrator are in anticipation by this student also. A class for the study of steam and the steam-engine would be well patronised here. We have the greatest variety of engines I have ever met with here, including 'Corliss engines,' and the latest valve motions extant, namely, Zutner's. Students could be taken every Saturday to examine machinery."

Mathematics.—The Teacher reports:—"The present condition of the classes is fairly satisfactory. The very elementary mathematical knowledge possessed by the majority of the students is very disheartening. It is a work of great difficulty to fit them for examination, and this year the protracted strike, with its attendant excitement, caused several to put off all idea of sitting for examination.

"It is with pleasure that I mention the substantial increase in the enrolment towards the end of the year. The outlook for t

#### Wagga Wagga.

The Teacher of Art Classes reports:—"There has been a considerable advance on the previous year, both in the work of the classes and the growing interest in the school generally.

"The present condition of the classes, although not satisfactory to me as a teacher, is quite as good as can be obtained from the local conditions. Next year a greater number of students is expected.

"The art classes here are the only means of acquiring a knowledge of elementary art in the locality, and as some little credit is given to the progress of the classes, the work is causing an emulative spirit to grow in this branch of knowledge, and the advantages extend much further than can be seen at a casual glance."

**Technical Classes corrected with Public Classes.**

Technical Classes connected with Public Schools.

Manual Training.—The metropolitan classes are held at Fort-street, Crown-street, Sussex-street, and Blackfriars. At each of these schools a workshop is provided. Only pupils of the schools named attend the classes. At Goulburn and Maitland one workshop serves for all the schools of each town, the boys attending at hours arranged. A small workshop has been erected at the Boys' High School, East Maitland.

The Instructor at Fort-street reports:

"The present condition of classes for students in training is below what I had every reason to expect, and is attributable to the non-attendance of students, owing to afternoon lectures at the University, which have interfered very materially with these classes, some students having only attended three or four lessons during the year. Under these conditions it is absolutely impossible for them to attain four lessons during the year.

four lessons during the year. Under these conditions it is absolutely impossible for them to attain proficiency.

"As evidencing the interest taken by many of the students in the work, I may mention that some of them attend voluntarily in the workshop out of school hours.

"I have every reason to be satisfied with the condition of the boys' classes. Obstacles to their more rapid progress are, however, encountered by the hours at which the classes meet, being half an hour earlier and extending half an hour beyond their ordinary school hours, whereby most of the students miss half an hour at each lesson. They also miss a number of lessons by being detained by their teachers at their other studies in school.

"The prospects of the classes for the coming year are rendered brighter by notice of the discontinuance of the University lectures above alluded to. With the more regular attendance this will render possible, I look forward with confidence to a higher standard being attained next year.

"During the year the students have done useful work in fitting up the workshop, repairing school furniture, and making models. Several exhibits have also been executed for the Chicago Exhibition."

The Instructor of the Crown-street, Blackfriars, and Sussex-street classes reports:-

"The classes under my charge have fully realised my expectations this year. The interest and zeal manifested by the students in their work may be gauged by the fact that a number of them attended during midwinter vacation, and, in some cases, at night (some living at such distances as Bondi, Randwick, &c.), most of such work being exhibits for Chicago. The fact of being able to make something, to know the use of tools, must of necessity be extremely useful, no matter what position in life they may occurve they may occupy.

"I have given as far as possible, in the time allowed, a fair knowledge of plans, &c., and many of the students could give working drawings to any scale in common use."

The West Maitland classes were, in September last, moved to new workshops that provide ample accommodation. The classes are in a flourishing condition, and the boys have thrown themselves heartly into the work, and a large number of useful articles has been made. The practical training of the eye

accommodation. The classes are in a flourishing condition, and the boys have thrown themselves nearly into the work, and a large number of useful articles has been made. The practical training of the eye and hand is steadily kept in view.

The Goulburn classes are attended by pupils from the various schools at times arranged by the District Inspector, who has taken a very warm interest in the work.

The Committee appointed to examine the works submitted for transmission to Chicago commended much that came from their manual training classes, those from Fort-street being specially mentioned for excellence of finish. It is matter for regret that the teachers and the inspectors generally do not take more active interest in these manual training classes. Their value as educational agencies, and their beneficial effect upon the intellectual life of a school do not appear to be properly recognised. It has been very well observed: "There is no place, or only a most uncomfortable one, for those boys who are strong in perception, apt in manipulation, and correct in the interpretation of phenomena, but who are not good at memorising or rehearsing the opinions and statements of others; or who, by diffidence or slowness of speech, are not fitted for the ordinary intellectual gymnastics. These boys are quite as numerous as the other sort, and are quite as deserving of sympathy and respect, besides rather better qualified to become of use in the industrial and social order. And yet, for this class of boys, the average school offers almost nothing upon which they can employ their priceless powers. They may, by labouring painfully over the prescribed but uncongenial exercises, escape the stigma of being blockheads, but at least never know the joy of intellectual acquisition. They will always appear to disadvantage when compared with the boys with good memories for words, whose mental and moral natures accept when compared with the boys with good memories for words, whose mental and moral natures accept when compared with the bo better head than his master.'

853-X

### Shorthand in Public Schools.

Shorthand classes in connection with the Public Schools, with the exception of that at the Sydney High School, do not meet during school hours. The classes are held at the following Public Schools:—
Fort-street, Girls' High School Sydney, Crown-street, Plunkett-street, Cleveland street, Darlinghurst, Woollahra, Redfern, Balmain, Birchgrove, Darling-street Balmain, Burwood, Kogarah, Newcastle, Wickham, Wallsend, Lambton, Tighe's Hill, Carrington, Hamilton, East Maitland, East Maitland High School, and Singleton.

The pupils do not attend with any great degree of regularity, being often kept behind to do their school tasks, and are oftentimes too tired from their day's work to obtain much benefit from the shorthand instruction; but still some good is being done, and many of the boys who have left school continue at the evening Shorthand classes.

that the evening Shorthand classes.

The total number of boys present at the Annual Examination was 240, and 50 per cent. of these passed. This may be considered a fair percentage of passes, especially in view of the fact that in some cases the instruction is given for one hour only each week.

### Practical Instruction in Horticulture in Public Schools.

Mr. Gale visited 97 schools during the year, and gave practical lessons in subjects connected with Horticulture. The schools visited are situated on the coast from Bega to the Manning River, on the Southern Line as far as Albury, and in the districts of Cowra, Orange, and Mudgee. The improvement of school grounds and the celebration of Arbor Day are still carried on with much enthusiasm by many

teachers, and the interest of the pupils continues unabated.

Ninety-six teachers have been awarded a bonus, varying according to quantity and quality of the work in improving the school grounds, from £5 to £1. In most cases the amount of bonus is expended in effecting further improvement—the expenditure under this head amounting to £225, a small outlay considering the good produced.

A list of the teachers awarded bonuses is given in Annex G.

#### Lantern Slides.

Teachers of Public Schools may obtain loans of lantern slides, on condition that they pay the expense of carriage and guarantee their safe return. During the year 138 sets of slides were borrowed for use in 34 different places. As these slides are both interesting and instructive, it is to be regretted that they are not more extensively made use of. Probably the cost of a good lantern is the chief difficulty in the way, but if a few teachers of a district were to co-operate and use a lantern in turn the difficulty would be overcome. The benefit to the pupils would amply repay the teachers.

Geology and Mineralogy.—The Rev. J. Milne Curran has been kept fully employed during the year. He has delivered 40 lectures, chiefly in the Southern and Western Districts, to audiences varying from 100 to 700 persons, the aggregate attendance reaching 12,000. In every instance the lectures dealt with local geological features, and thus were made not only interesting but of great practical value. Applications for Mr. Curran's services are so numerous that those now in hand will take up nearly the whole of 1893. Further details of Mr. Curran's work will be found in his report. (Annex D.)

Bee Culture.—Mr. Gale delivered 64 lectures on subjects connected with bees and their commercial value, to an aggregate attendance of 6,944—an average of 108 at each lecture. The interest in the subject is rapidly increasing, and in many places bee-keeping, as a profitable industry, has been taken up.

Agriculture.—During the early part of the year Mr. Mackay was absent from the Colony on sick leave, and in the latter part he, at the special request of the residents of the Clarence district, was sent to investigate the nature of the disease making sad havoc in the sugar-cane. The report upon this matter has been published. As the class-work in Sydney and Hornsby keeps Mr. Mackay fully occupied during the period, February to November, the time available for lectures is very short. Lectures were given at Chatsworth, Hornsby Junction, Thornleigh, and in the Clarence River district.

### Examinations.

The results of the examinations indicate good work all round. The number of students submitting to examination was 3,332, including 240 Public School pupils examined in shorthand, and 283 in manual training. Out of the total entries, 398 obtained honors, 579 passed in the first grade, and 1,294 in the second grade. The total number of passes 2,271, or 68.2 per cent of those examined. The standards of examination were the same as in 1891, viz.:—

50 per cent. of marks to gain a pass. 75 per cent. of marks to gain a first grade. 85 per cent. of marks to pass with honors.

The tests applied were on the whole more rigorous than in former years. The examiners in the various subjects are men of high standing, well-known as experts in their particular professions. Most of them occupy prominent public positions—a circumstance that makes the opinion all the more valuable. Technical education is under very great obligations to those gentlemen.

Every year teachers are disappointed at the non-appearance of students at examination. Some are unable through press of work to attend, others stay away from sheer nervousness, and others from perfect indifference. The necessity for holding practical examinations on Saturday afternoon also militates against a good attendance.

Example 100 pass with 110 nors.

Expenditure.

The expenditure for the year amounted to £27,800 17s. 5d. on account of Technical Education, and £5,709 12s. 7d. on account of the Technical Museum and its four branches.

The fees paid by students amounted to £4,385 14s. 9d. Of this sum £2,432 17s. was paid by the students of the Sydney Technical College, and £1,952 17s. 9d. at the branch schools.

### Technological Museum.

The Technological Museum in Sydney, and the branch museums at Bathurst, Goulburn, Maitland, and Newcastle continue to increase in popularity and usefulness. The following returns show a most satisfactory increase in the number of visitors:—

	Number of Visitors during the year 1892.	Increase of attendance of that of 1891.
Fechnological Museum, Sydney	144,253	31,621
Bathurst	14,101	4,71 <b>1</b> 5,351
Goulburn Maitland	11,303 9,884	<b>3,8</b> 84
Newcastle	5,044	544
	184,585	46,111

One very satisfactory feature of the museum work is the growing disposition on the part of the teachers of Public Schools to avail themselves of the collections for the instruction of their pupils, and to obtain information from the museum officers upon minerals, plants, insects, &c. The museums have in their turn benefited by the intercourse, as several teachers have rendered substantial help by presenting valuable specimens. It is confidently expected that, as the aims and objects of the Technological Museum are more widely known the teachers of the Service will become closely connected with it, either as correspondents or contributors.

The new Technological Museum at Ultimo is now approaching completion, and is already being used for the reception of exhibits. This new building will give about three times the space now at disposal in the iron-shed in the Domain, and though none too large, will afford scope for the proper arrangement and effective display of the exhibits, and will greatly enhance the usefulness of the collection as an educational agency.

Details of the museum work will be found in the report of the Curator. (Annex E.)

Details of the museum work will be found in the report of the Curator. (Annex E.)

Summary of Statistics for 1891 and 1892.

	1891.	1892.	Increase.
Number of classes	295	306	11
	8,466	10,089	1,579
	6,688	8,329	1,641
	4,461	6,205	1,744
	2,563	3,332	769
	1,704	2,271	567
	£3,721 5s. 6d.	£4,388 14s. 9d.	£664 9s. 3d.
	112,632	144,253	31,621
	25,842	40,332	14,490

The year dealt with in this report may be regarded as terminating a period in the history of technical education. In consequence of the large reduction in the parliamentary vote, many classes have been discontinued, and the operation of this branch will for the future be confined within narrower limits. I furnish a statement showing the cost per student for the last year under the late Board, and for the three years under the direct control of the Minister.

Year.	Number of Students.	Expenditure.	Cost per Student.
1889	6,688	£ s. d. 17,500 0 0 22,049 0 0 28,694 0 0 27,800 0 0	£ s. d. 6 15 4 4 4 8 4 5 9 3 7 0

#### ANNEX C.

#### Science and Art Department, South Kensington. Examinations—1892.

Examinations—1892.

Works of students of the technical classes are sent annually to South Kensington for classification by the Examiners of the Science and Art Department of Great Britain. Returns which have been received of the works sent in March last show that two bronze medals and eight book prizes in the national competition have been gained by the students of the Sydney Technical College. In the United Kingdom payments are made to the teachers of successful students, and the sums which would be payable to the colonial teachers, were the funds of the Science and Art Department available for work executed in the colonies, amount to £31–12s

Bronze medal—John Hankinson, for ornament modelled from the cast. Bronze medal—R. E. Nancarrow, for a design of an Australian residence. National book prizes—John Hankinson, Robert Larcombe, Edward Mueller (two prizes), Edward Paton (two prizes), for modelling from the cast; Alexander McRae and G. M. Poole, for designs for Australian mansions.

The works of the following students were marked as being worthy of grants to their teachers of over £2 in each case:—Joseph Buckley, and students Hankinson, McRae, Muellen, Nancarrow, Paton, and Poole, as above.

and Poole, as above.

The following candidates passed the Technological Examinations of the City and Guilds of London Institute for the advancement of Technical Education, held in New South Wales in 1892, and obtained certificates in the undermentioned grades :-

# ANNEX D.

#### REPORT OF THE LECTURER IN GEOLOGY FOR THE YEAR 1832. Lectures.

. DURING the year I have delivered 40 lectures in the southern and western districts of the Colony. In every instance the lectures dealt with local geological features, which, I venture to think, gave them an interest that will account for their evident popularity in the country districts. The lectures were invariably well attended, particularly in the mining centres. A marked feature of my visits to the country towns was the number of samples of mineral rocks that were brought to me for identification, or information as to their commercial value.

## Collecting.

I have availed myself of every opportunity to secure good geological specimens for our museum and its country branches. A collection of minerals and rocks was made in every district visited.

# $Laboratory\ work.$

The examination and identification of minerals and rocks for lecture purposes and information for the public kept me fully occupied in the intervals between lecturing tours. I may add, that, when travelling in the country, I have taken photographs of any remarkable geological features, rock sections, &c., that have come under my notice. Copies of these are now ready for distribution to the classes in geology.

I have, &c,

J. MILNE CURRAN.

ANNEX

#### ANNEX E.

#### CURATOR'S REPORT.

Technological Museum, 14th February, 1893. The attendance of visitors for the year has been 144,253, an increase of 31,621 over that of 1891. This is the more satisfactory as there were an unusual number of wet days during the past year, and it is also to be borne in mind that the museum is not open to visitors during the morning, except to those from the country who apply for admittance. It will be seen below that the branch museums also show satisfactory increases in attendance.

While the new museum has not yet been formally handed over, it is almost complete, and it has already been used for the reception of a quantity of exhibits, which interfered with the convenience of visitors in the present congested museum.

#### Statistics.

The following figures summarise the acquisition of specimens by the central and branch museums during the year. They are actual numbers, taken from the Stock Registers, and the duplicates (of which there are a great many) are not given a separate number. Thus, in wool alone there are 400 duplicates, and 1,500 duplicates sent in by the botanical and geological collectors.

Number of specimens received during the year 1892-3,956, as under:-

# Purchases. Economic Botany 414 ", Geology 121 ", Zoology 208 Applied art 69 Miscellaneous 723 Maps, drawings, &c. 23 Donations. Exchanges (inward) Transfers from Technical College... Transfers from country museums. 228 89 76 3.956

# Principal Donations.

As will be seen from the figures, the number of donations (contributed by some hundreds of donors), has been highly satisfactory. It is not easy, in some instances, where to draw the line of honorable mention for valuable donations. The most notable donation of the year is undoubtedly the collection of high-class pottery presented by Doulton & Co., of Burslem, through Mr. J. Shorter, of Sydney. The collection was handed over to the Minister in person, and is remarkable for the skilful decorative treatment of Australian native plants. For a museum of this kind the value of the collection is enhanced by a fine series showing all the stages in the manufacture of high-class pottery from the materials to the finished article. Collection of Australian minerals from Mr. J. M. Smith, Australian Mining Standard; fine crystallised specimens, and of the native mineral, from the Australian Alum Company; American minerals and rocks, from the State Mining Bureau of California; fine series of antimony, from Mr. E. Herbert Becke, of Kempsey; Tasmanian minerals, from Mr. Charles Chandler, of the Architect's branch; series of specimens to illustrate leather belting and joints, from Messrs, J. C. Ludovici and Son (Limited); series of Colonial leather, from Mr. Thomas Shepherd, of Cambewarra; an extensive series of herbarium specimens, collected by the Elder Exploring Expedition, presented by Sir Thomas Elder through Professor Tate. Two fine series of eucalyptus, and other essential oils—one by Dr. J. F. Elliott, of Sydney, and the other by the Secretary of Agriculture, Melbourne (from the Dunolly Seent Farm); agricultural products from Mr. C. E. Wilson, Public School, Walli; Samoan timbers, fibres, &c., from Mr. W. D. P. Keppel; fibres, barks, gums, &c., from the Royal Gardens, Kew; collections of native plants, from Miss Clements, of Palesthan, Mr. G. S. Home, of Wooyeo, Mr. J. R. Chisholm, of Torren's Creek, Queensland, Mr. J. Banfield, of Townsville, and many others.

### Principal Purchases.

Following is a brief record of some of the principal purchases during the past year:—Models, educational apparatus, &c., chiefly illustrating continental systems of education, and kindly selected by the Chevalier Jervis, of Turin, Italy; German art majolica ware; a very fine collection of specimens illustrating the Broken Hill mines; slabs of colonial timber 16 feet long, and the full width of the tree; a collection of rare fruits and seeds from Mount Bellenden-Ker, Queensland; a fine collection of aboriginal implements of various kinds, chiefly from the Alligator River, Northern Australia; various ethnological specimens from the Pacific Islands; a comprehensive collection of Japanese domestic utensils, agricultural implements, &c.

### Branch Museums.

The following figures refer to the Branch Museums, which, on the whole, are progressing in a satisfactory manner. Three of them are important institutions in the towns in which they are placed, and, besides being very popular, act as *nuclei* to the scientific activity of each district.

and, besides being very popular, act as nuclei to the scientific activity of each district.

The relations between the Central and Branch Museums result in mutual advantage. The Branch Museums receive duplicates from the central institution, and specimens are named and particulars given concerning them wherever it is deemed necessary. On the other hand, as regards the Sydney Museum, my experience is widened in that I have the supervision of a greater variety of specimens since the Branch Museums receive samples which would probably never find their way to Sydney; also, we receive from the country Museums a certain number of duplicates, which are additions to our collections. Of course, the formation of Museums in country towns takes time, and yet our Branch Museums show each

year a distinct advance, not only in quantity, but also in the quality of the specimens received, and they already feel the need of additional space and show-cases.

	Local donations.	Transfers from Sydney Museum.
Goulburn Bathurst Newcastle West Maitland	165 147 26 305	191 179 351 87
\ <u>-</u>	643	808

The attendance of visitors at the various Museums has been as follows:-

	Attendance, 1892.	Increase over 1891.
Bathurst Goulburn West Maitland Newcastle	14,101 11,303 9,884 5,044	4,711 5,351 3,884 544

N.B.—The Branch Museums are not open on Sundays.

#### Public School Teachers and the Museum.

A large number of Public School teachers have during the year sent one or more specimens of

A large number of Public School teachers have during the year sent one or more specimens of insects, plants, minerals, rocks, &c., for names and other information.

My most frequent communications have been with the following:—Messrs. C. E. Wilson, of Walli; J. Mitchell, of Narellan; J. K. Larner, of Clybucca; Robert Harper, of Menangle; T. Miller, of Cadia; and Miss Liddle, of Lue. The first-named gentleman has sent scores of splendidly-grown agricultural products, many of them new to his district; these have proved of much interest. Miss Liddle has sent two cases of minerals and plants. About 50 school-teachers sent specimens from time to time: I trust the number will be nearer 500 in 1893.

A large number of specimens have been got together for the students at Hurlstone Training

A large number of specimens have been got together for the students at Hurlstone Training College, who required them for the purpose of giving object lessons. The Museum is in a position to supply such specimens to practically any extent. Specimens for object lessons have also been drawn upon for the male students in training at Fort-street, but not so largely as those of Hurlstone.

# Exhibitions, Shows, &c.

The museum received a first-class award and silver medal for a collection of wool shown at the Tasmanian Exhibition. A comprehensive collection of our raw products has been prepared and despatched to the forthcoming Chicago Exhibition. A smaller collection is being got ready for the New South Wales Court at the Imperial Institute. In addition, temporary loan exhibits of interesting specimens have been sent to various agricultural shows, conversaziones in connection with schools of art, &c.

# Wool Section.

Wool Section.

Mr. Alfred Hawkesworth, the Lecturer, Sheep and Wool Department, Technical College, has continued in charge of this section, and a number of his pupils have given assistance in arranging and examining the samples. Such work, in fact, forms part of the practical work of the class, and while the students have the advantage of the aid of what I believe to be the finest Wool Museum in the world, the Museum reaps the advantage of their very acceptable help.

Several invitations have been received from the secretaries of agricultural societies for the loan of our educational series of wools at their respective shows. These requests have been complied with, as far as possible, and in some instances Mr. Hawkesworth, accompanied by his pupils, has given practical demonstrations of wool-classing, &c., at the local shows, which have excited much interest.

During the year many exchanges have been made with American and other agricultural departments; also, an extensive wool collection is now well in hand for the Bradford Chamber of Commerce, in exchange for a comprehensive series of English wool manufactures being got together under the auspices of the above influential organisation.

The wool exhibits sent from this Museum to Chicago number 600 fleeces and samples from the highest class stud sheep as well as the ordinary commercial wools.

The following gentlemen are the principal contributors to the wool collection during the past

#### Native Plants.

The exhibition of cut native flowers has remained open the whole of the year, and has excited a good deal of interest. Unfortunately, as the Museum became more crowded, I had to curtail the space available for this interesting collection, which has been contributed to by a large number of friends.

I have continued to name plants for correspondents in many parts of the Colony. A rough register has been kept of the number thus dealt with, which for the year amounts to nearly 3,000. From these correspondents I have received a large number of duplicates for the herbarium. Notes have been made of flay rare and interesting plants, and entered in a register which is kept of the geographical distribution of New South Wales plants.

**Colonial Timbers.**

Colonial Timbers.

Colonial Timbers.

The collection of colonial timbers is a very fine one, and during the year it has received notable additions. Not only has the botanical collector (Mr. Eäurelen), continued to send down a number of logs which are rarely, or not at all, found in the Sydney market, but I have been able to secure, from Sydney timber merchants, fine planks of our merchantable timbers whenever they have happened to find their way to Sydrey. In the new Museum colonial timbers will be shown as they have never hitherto been shown south of the equator. I have been honoured with consultations in regard to certain timbers, by most of the Government Departments, which use timber in quantity; and one result has been that our collections have been enriched with timbers of special interest, owing to notes on the treatment to which they have been subjected. I gave a lecture on some of the pale hardwoods of New South Wales, by invitation, before the Sydney Architectural Association, in September, which was well received, and, as an example of the desire which exists to receive authentic information in regard to our colonial timbers, the discourse was printed in extenso three times in Sydney and four times in England.

### Wattles and Wattle-barks.

Wattles and Wattle-barks.

This Museum continues to receive numerous written and verbal inquiries on the above subject. Unfortunately, at the present time, the price of wattle-bark (in common with that of other tanning substances), has gone down, but I look upon this as only temporary, and connected with the commercial depression which is being felt not only by these colonies, but by other nations. Wattle-bark is one of the most valuable tan-substances in the world, and when one contemplates the inferior substances of this class, which are regularly used in Europe and America, I feel sure that what is required is to educate the people of these continents to the fact that we can grow for them illimitable quantities of the finest bark. We, in Australia, know the value of good wattle-bark quite well, but I am in a position to state that very few people in the United States, Great Britain, and the continent of Europe, have more than a hazy idea of what wattle-bark is, its average quality, and whether we can supply it in quantity. Like other products, it requires to be pushed, and we must continue to diffuse authentic information in regard to it if we wish to develop the trade of the Colony. During the past year I have answered letters on the subject to every Australian colony (except Western Australia), New Zealand, Great Britain and Ireland, France, Germany, the United States, Jamaica, and the Cape of Good Hope.

Negotiations for the sale of wattle-barks by assay are proceeding satisfactorily, and I am very sanguine of ultimate success. If a man were in the habit of selling ores without assay he would be accounted a fool, or something worse.

accounted a fool, or something worse.

So far as time will allow, I am continuing my investigations on tan-barks other than wattles, and, thanks to the enterprise of Mr. Thomas Shepherd, of Cambewarra, I am able to have some of them subjected to practical tests in a tannery.

(By the Curator.)

1. On Panax Gum (Linnean Society of New South Wales). Gums from this genus have not hitherto been described, and are shown to closely resemble those of Acacia.

2. Report on the vegetable exudations collected by the Elder Exploring Expedition (Royal Society of South Australia.) Gums, kinos, and resins are described, but the most interesting substance is the Manna from Myoporum platycarpum, which is shown to be identical in composition with the manna of commerce.

5. A Bibliography of Australia. But the Manna of commerce of Australia.

5. A Bibliography of Australian Botany (Royal, 8vo., pp. 61, Government Printer, Sydney). An attempt to render a railable to the student the enormous number of scattered papers and other works

- on the subject.

  4. Some of the pale hardwoods of New South Wales (Sydney Architectural Association).

  5. In conjunction with Baron von Mueller. Description of a new Hakea from Eastern New South Wales. (Linn. Soc. of N.S.W.)
- 1. Plates and descriptive notes of the following previously unfigured Australian plants:—Tar argyrodendron, Acacia pugioniformis, and Acacia pruinosa (Linnean Society of New South Wales).

  2. Plates of one new species each of Acacia and Hakea (Macleay memorial volume).

(By Mr. Smith.)

Preliminary note on Limestone occurring near Sydney (Royal Society of New South Wales).

This limestone was hitherto looked upon as blue metal (basalt), and investigation of its real character is of high practical importance to municipalities and others.

(By

### (By Mr. Froggatt.)

I. Part II, Catalogue of the described Hymenoptera of Australia (Linnean Society of New South Wales), containing list of all described Hymenoptera from the family Scoliidæ to the family Apidæ, and concluding the catalogue.

2. Notes on the family Cynipidæ, with descriptions of new species (Linn. Soc., N.S.W.). An account of these gall-making wasps (none of which have been until this previously described), with descriptions of three new species that form galls on wattles.

3. On Gall-making Buprestidæ (Linnean Society, New South Wales), a description of the galls and three species of the genus Ethon that attack plants in the vicinity of Sydney.

4. Notes on the Family Brachyscelidæ, with description of new species and some account of their parasites (Linnean Society of N.S.W.) General account of these gall-forming coccids, and descriptions of eight new species.

of eight new species.

5. Hymenoptera of the Elder Exploring Expedition (Royal Society of South Australia). List of specimens obtained by the collectors of this expedition, with descriptions of new species.

#### Reports.

My correspondence has, as usual, been of the most varied character. The Museum is looked upon in many quarters (and I desire to encourage this feeling), as a bureau of general information, so that a mere list of the matters dealt with would be a lengthy document. The principal items dealt with are the naming of minerals and rocks (analyses being made where necessary, and notes on economic value and application being given); naming and treatment of injurious insects; naming of native plants; notes on supposed poisonous plants (to stock); notes on native drugs; notes on Australian (chiefly) grasses and fodder plants, agricultural products, tan barks, and timbers.

I have interviewed at least 50 people, and written to a great many more, on the subject of eucalyptus oil. I have pointed out the best species for quantity and quality of oil, and have given advice as to the localities most suitable for the industry. I have especially endeavoured to impress on inquirers the necessity of not mixing the various kinds of leaves. Few of the commercial oils are of constant, or even approximately constant composition, the stills being looked upon as a sort of stock-pot for all sorts of leaves.

of leaves.

The collection of named eucalyptus oils in this Museum is without any serious rival in Australia, and I propose to make a series of investigations into certain problems connected with the industry as soon as the collections are arranged in the new Museum.

J. H. MAIDEN,

Curator.

# AMENDED REGULATIONS.

Department of Public Instruction, Sydney, 24 March, 1892.

# PUBLIC INSTRUCTION ACT OF 1880—AMENDED REGULATION AS TO THE PROVISION OF RESIDENCES FOR TEACHERS.

HIS Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of the following amended regulation in substitution for that relating to the provision of residences for teachers in charge of Public Schools, of date 1st July, 1891:—

111. In addition to these salarics, residences, vested or rented, shall be provided for classified married male teachers in charge of classified Public Schools; but a residence rented for a teacher shall be as near as practicable to his school.

F. B. SUTTOR.

Department of Public Instruction, Sydney 24 November, 1892.

# PUBLIC INSTRUCTION ACT OF 1880—AMENDED REGULATIONS AS TO VACATIONS AND HOLIDAYS.

His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of the following amended regulation, in substitution for that relating to vacations and holidays, of date 1st July. 1891:—

152. The vacations sanctioned by the Minister are: Four weeks at Christmas, one week at Easter, and a fortnight at Midwinter. The holidays allowed, other than those occurring in vacation, are the Anniversary of the Colony, of the Queen's Birthday, and the Prince of Wales' Birthday, and Good Friday.

Teachers are to enter on their time-tables these vacations and holidays.

F. B. SUTTOR.

# NEW SOUTH WALES.

# EDUCATION.

(AMENDED REGULATIONS UNDER THE PUBLIC INSTRUCTION ACT OF 1880.)

Presented to Parliament, pursuant to Act 43 Dic. Ao. 23, sec. 37.

# PUBLIC INSTRUCTION.

An Act to make more adequate provision for Public 43 VICTORIA, Education. [16 April, 1880.]

BE it enacted by the Queen's Most Excellent Majesty by and with the advice and consent of the Legislative Council and Legislative Assembly of New South Wales in Parliament assembled and by the

authority of the same as follows:—

1. The Act thirty Victoria number twenty-two known and cited as Act 30 Vic. No. the "Public Schools Act of 1866" shall be and is hereby repealed and Council of Eduthe Council of Education created by the provisions of that Act is hereby cation dissolved. dissolved and all the powers and authorities hitherto exercised by the said Council shall be and are hereby transferred to the Minister of Public Instruction or the Member of the Executive Council acting on his behalf. And all the lands moneys securities and personal property vested in or held in trust for or belonging to the Council of Education shall by virtue of this Act revert to and be held by the Crown under the direction control and authority of the Minister for the time being subject however to the contracts liabilities and claims lawfully made

or incurred by the said Council at the date of the passing of this Act.

2. All sums of money appropriated by Parliament for the purposes of Sums appropriated by Parliament for the purposes of Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums appropriated by Sums

this Act.

3. All persons employed under the Department of Public Instruct Appointment of Officers. tion shall be appointed and removed by the Governor and all Inspectors and teachers of Schools and all officers connected therewith so appointed shall be Civil Servants of the Crown Provided that until such Inspectors Teachers and other officers as may be necessary shall be so appointed the persons employed by the Council of Education shall be continued in their respective offices.

4. All lands acquired under this Act or by grant purchase or bequest Land for the in future for the purposes of Public Instruction shall be held by the Education. Crown in trust for the maintenance of the several classes of schools herein provided for and for no other except in cases wherein other conditions shall be imposed by law and the Minister shall have power subject to the Governor to sell any such lands and to convey the same to the purchasers thereof and to invest the proceeds arising therefrom in the purchase of other lands or in the erection of school buildings for the purposes aforesaid.

All schools hitherto established and maintained by the Council Public Schools. of Education as Public Schools shall become and are hereby declared to be Public Schools under the provisions of this Act.

43 Victoria, No. 23.

Classes of schools to be established and maintained.

- 6. The several classes of Schools herein defined may be established and maintained under this Act as fully organized Schools namely
  - (1.) Public Schools in which the main object shall be to afford the best primary education to all children without sectarian or class distinction.
  - (II.) Superior Public Schools in towns and populous districts in which additional lessons in the higher branches of education may be given under such regulations for the purpose as may be approved by the Governor.

(III.) Evening Public Schools in which the object shall be to instruct persons who may not have received the advantages

of primary education.

(IV.) High Schools for boys in which the course of instruction shall be of such a character as to complete the Public School curriculum or to prepare students for the University.

(v.) High Schools for girls.

Secular instruc-

7. In all Schools under this Act the teaching shall be strictly non-sectarian but the words "secular instruction" shall be held to include general religious teaching as distinguished from dogmatical or polemical theology and lessons in the history of England and in the history of

Public Schools may be established.

Australia shall form part of the course of secular instruction.

8. A Public School may be established in any locality where after due inquiry the Minister shall be satisfied that there are at least twenty children who will regularly attend such school on its establishment.

Superior Public Schools.

9. On the advice of the Minister after due inquiry any Public School may by proclamation in the Gazette by the Governor be appointed to

Evening Public Schools.

be a Superior Public School.

10. If in any locality where a Public School has been established the parents guardians or other residents apply by petition on behalf of not fewer than ten persons for the establishment of an Evening Public School the Minister may on being satisfied of all the circumstances establish such School Provided that all such Schools shall be in the charge of a properly trained teacher.

Public School fees.

11. In all Public Schools the weekly fees shall not exceed threepence for each child up to four children of one family and for four or any larger number of the same family the total amount of fees shall not exceed one shilling And in every case the fees shall be payable to the teacher in charge of the School or other person appointed by the Minister to receive them and may be recovered by the person so appointed in a summary way before any Justice of the Peace and under regulations to be made for such purpose shall be remitted to the Colonial Treasurer and shall be paid into the Consolidated Revenue Fund

Fees in Evening Public Schools.

12. The fees for the teaching in Evening Public Schools shall be fixed by regulations approved by the Governor and all such fees shall be paid to the teachers performing such special duties and may be recovered by

Payment of school fees not enforced in certain cases.

such teacher in a summary way before any Justice of the Peace.

13. The Minister or the Public School Board of the district under regulations to be made for that purpose may relieve parents or guardians from the payment of school fees in any case where their inability to pay such fees is satisfactorily shown.

Free railway passes to school children.

14. It shall be lawful for any Station-master on the Government Railways to issue a free pass to any child to travel in a suitable railway carriage or van to and from any school established or declared to be certified under this Act Provided that such school if a Public School shall be the one nearest the residence of the parents or guardians of such child.

15. Every Public School where there is a regular attendance of not fewer than fifty pupils shall have attached to it a class-room adapted for the more efficient conduct of the said school and the buildings of larger Public Schools shall have attached to them one or more similar class-rooms as may after due inquiry be considered necessary for the number of pupils attending such schools.

Apportionment of space in School buildings. Space inside the building shall not be less than one hundred cubic feet for each child ordinarily in attendance Provided that no child shall be refused admission to or be entitled to claim exemption from attendance at any such school by reason of the space for each child falling

Hours for secular nstruction. Religious instruction may

temporarily below such rule of apportionment. 17. In every Public School four hours during each school-day shall be devoted to secular instruction exclusively and a portion of each day not more than one hour shall be set apart when the children of any one religious persuasion may be instructed by the clergyman or other religious teacher of such persuasion but in all cases the pupils receiving such religious instruction shall be separated from the other pupils of the school And the hour during which such religious instruction may be given shall be fixed by mutual agreement between the Public School Board in consultation with the teacher of such school and the clergyman . of the district or such other person as may be duly authorized to act in

his stead and any class-room of any Public School may be used for 43 Victoria, such religious instruction by like agreement Provided that if two No. 23. or more clergymen of different persuasions desire to give religious instruction at any school the children of each such different persuasion shall be so instructed on different days Provided also that the religious instruction to be so given shall in every case be the religious instruction authorized by the Church to which the clergyman or other religious teacher may belong Provided further that in case of the nonattendance of any clergyman or religious teacher during any portion of the period agreed to be set apart for religious instruction such period shall be devoted to the ordinary secular instruction in such school.

18. Notwithstanding anything to the contrary in the last preceding Objection to resection no pupil in a Public School shall be required to receive any tion. general or special religious instruction if the parents or guardians of

such pupil object to such religious instruction being given.

19. The Governor by proclamation in the Gazette may constitute and Public School define Public School districts containing one or more Public Schools Boards. and may appoint a Public School Board for any such district to consist of not more than seven persons And the duties of every Public School Board shall be

(1.) To regularly visit inspect and report upon the School placed under their supervision.

(II.) To suspend any teacher for misconduct in cases not admitting of delay and to report immediately the cause of such suspension to the Minister.

(III.) To use every endeavour to induce parents to send their children regularly to school and to report the names of parents or guardians who refuse or fail to educate their children.

20. After the expiration of three months from the passing of this Duty of parents Act it shall be obligatory upon the parents or guardians of all children between the ages of six and fourteen years (unless just cause of exemption can be shown) to cause such children to attend school for a period of not less than seventy days in each half-year But any of the following reasons shall be held to be a just cause of exemption-

(I.) That the child is being regularly and efficiently instructed in some other manner.

(II.) That the child has been unable to attend school from sickness or infirmity or from fear of infection or other unavoidable

(III.) That there is no school maintained under this Act within two miles by the nearest road of the residence of the child.

(IV.) That the child has been educated up to the standard of education required.

21. The Governor by proclamation in the Gazette may declare any Punishment for Public School District to be a portion of the Colony where the obligates and children to tion upon parents enacted by the last preceding section may be enforced School. and any parent or guardian in such proclaimed district who shall neglect to send his children to school without just cause of exemption may be summoned by any person appointed for that purpose by the Minister before two or more Justices in Petty Sessions assembled and on conviction of the first offence shall forfeit and pay a sum not exceeding five shillings and for every succeeding offence a sum not exceeding twenty shillings and in default the person so offending may be imprisoned for a term not exceeding seven days.

22. In remote and thinly populated districts where no Public Provisional School may exist the Minister may establish Schools which shall not be established in classed as fully organised but as provisional only under Regulations for certain case that purpose to be approved by the Governor Provided that in all such schools the course of instruction shall be wholly secular and that all such schools shall be subject to the same control and inspection as are prescribed for Public Schools Provided further that so soon as twenty children shall have been in regular attendance at any such school for three months the said School shall be converted into a Public

School.

23. In districts where from the scattered state of the population and Itinerant from other causes it is not practicable to collect a sufficient number of teachers may be children to form a permanent school the Minister may appoint itinerant

teachers under Regulations to be approved of by the Governor.

24. Training Schools shall be established for the education of teachers Training Schools both male and female and the teachers so trained and educated shall be to be established. classified according to their attainments and skill in teaching and shall receive certificates of competency which shall qualify them for corresponding grades in the School Service.

25. High Schools for boys may be established in which instruction High Schools to shall be given in ancient and modern languages in history in literature boys to be established. in mathematics and in physical science together with such other subjects as the Minister may from time to time direct.

43 Victoria, No. 23.

High Schools for girls to be established.

Fees and discipline in High Schools.

26. High Schools for girls may be established in which instruction shall be given in modern languages history music the elements of mathematics and physical science together with such other subjects as the Minister may from time to time direct.

27. The fees to be charged and the discipline to be maintained in High Schools and for the higher classes in superior Public Schools and all other matters necessary to be done for the efficient conduct of such Schools shall be determined by Regulations approved by the Governor.
28. Subject to the provisions hereinafter contained all Denominational

Aid to Denominational Schools to cease.

Schools certified by the Council of Education at the passing of this Act shall be continued and held to be so certified until the thirty-first day of December one thousand eight hundred and eighty-two after which date all aid to such Schools from the Consolidated Revenue shall wholly cease Provided that all such certified Denominational Schools shall in the meantime be subject to the same course of secular instruction the same Regulations and the same inspection as may be prescribed by this Act or by the Regulations made thereunder in respect to Public Schools. 29. It shall be lawful for the Minister at any time to withdraw the

Withdrawal of certificate.

certificate from any Denominational School for either of the following reasons

(1.) The regular attendance of pupils falling below the minimum of thirty.

(II.) The dilapidated or unhealthy state of the building in which the school is held.

30. In all Denominational Schools held to be certified under this Act Fees payable at Denominational Schools and during the currency of the certificates the fees payable for pupils attending such schools shall be the same as those payable at Public Schools and shall in like manner be remitted by the teacher in charge of the school to the Colonial Treasurer and shall be paid into the Consolidated Revenue Fund.

Public Schools to supply the place of Denominational

31. At the expiration of the term allowed for the continuation of Certified Denominational Schools the place of such schools shall be supplied where necessary by Public Schools and steps shall be taken previous to the thirty-first day of December one thousand eight hundred and eighty-two wherever it may be deemed expedient for the establishment of such Public Schools.

Buildings of discontinued Denominational Schools may be purchased.

32. It shall be lawful for the Minister to purchase the buildings of such Denominational Schools as may be discontinued after the Government aid shall have been withdrawn the value of such buildings in every such case to be ascertained by arbitration in accordance with Regulations under this Act Provided that in every such case the building shall be suitable for the purposes of a Public School.

Scholarships and exhibitions.

33. In addition to any sum which may be specially appropriated by Parliament for any such similar purpose any private person may collect raise or give a sum of money towards founding a scholarship or exhibition at the University of Sydney in connection with any Public School and money or land or both may be bequeathed for that purpose And every such scholarship or exhibition shall be open to any child on the roll of such school and in the event of any school for which a scholarship or exhibition shall be founded being discontinued the Minister may direct that the scholarship or exhibition shall attach to some other Public School.

Notification of

34. Notices of all proposals to establish schools as classified under section six of this Act shall be published four times in the Gazette previous to the final decision thereon of the Minister.

Certificate to pupils.

35. When any child attending a Public School is educated up to the standard of education required by this Act such child shall receive a certificate in the form of Schedule A hereto.

Annual report.

36. On or before the thirty-first day of March in every year the Minister shall lay before the Governor his report on the condition and progress of the several classes of Schools established and maintained under this Act together with a detailed statement of the expenditure in the maintenance of such schools and copies of the same shall be laid before both Houses of Parliament within one month if Parliament be then sitting and if Parliament be not sitting then within one month after the commencement of the next ensuing Session thereof.

Regulations to have the force of

37. It shall be lawful for the Governor to make Regulations for carrying out the provisions of this Act and copies of all such Regulations shall be laid before both Houses of Parliament within one month if Parliament be then sitting and if Parliament be not then sitting then within one month after the commencement of the next ensuing Session thereof and if not disallowed by resolution of both Houses within one month of their being so laid before Parliament such Regulations shall have the force of law and shall thereupon be published in the Gazette for general information.

No action or suit shall be maintained rainst the Minister.

38. No action or suit shall be brought or maintained against any person who may have held or shall hold office as Minister of Public Instruction for any nonfeasance or misfeasance in connection with the duties imposed upon him by this Act.

39. In the construction and for the purposes of this Act the following terms shall if not inconsistent with the context or subject matter have the respective meanings hereby assigned to them that is to say—

Interpretation of terms. Interpretation of terms.

# REGULATIONS UNDER THE PUBLIC INSTRUCTION ACT OF 1880.

Department of Public Instruction,

Sydney, 1st July, 1893.

His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of the following Regulations, for carrying out the provisions of the Public Instruction Act of 1880, being made in accordance with the 37th section of that Act. These Regulations are intended to supersede those of 1st July, 1891, and of subsequent dates.

F. B. SUTTOR.

## APPLICATIONS FOR SCHOOLS.

Applications for the establishment of the several classes of Schools must be made on the forms prescribed, which may be obtained at the Office of the Department, or from any Inspector.

## PUBLIC SCHOOLS.

2. A Public School may be established in any locality where a regular attendance of twenty children between the ages of 6 and 14 years is guaranteed.

3. In the case of every Public School, whether the property be vested in the Minister or not, the words "Public School" only, with, if desired, the year of establishment, shall be put up on the outside of the building in a conspicuous position.

## Uses of Public School Buildings.

4. No use shall be made of any Public School building tending to cause contention—such as the holding of political meetings, or bringing into it political documents or petitions for signature—or for private purposes. And no such building shall be used as a place of public worship, or for other sectarian purposes, unless built and kept in repair without aid from the Minister; nor in such case, if objected to in writing by one-fourth of the parents of the children attending the school.

5. The Fee payable for each pupil shall be 3d. per week up to four children of one family, and for four, or any larger number from the same family, the total amount of fees shall be 1s. weekly. Such Fees shall be paid to the Teachers in charge on or before school closing on Friday in each week.

6. The Teacher shall demand and receive such Fees and shall record the receipt thereof, at the time, in the Roll Book of the School.

7. All sums received by Teachers as School Fees must be remitted weekly, or monthly, to the Cashier of the Department of Public Instruction, for payment into the Consolidated Revenue Fund, together with statement in the prescribed form. At the same time a formal return of fees shall be forwarded to the Accountant of the Department.

## Relief from Payment of School Fees.

8. Application to be relieved from payment of school fees shall be made upon the prescribed form, which may be obtained from teachers of schools by the parents or guardians of children.

# Standard for Exemption from Attendance.

- 9. The standard of education required by the 20th section of the Public Instruction Act as a just section for exempting any child from the obligation to attend school, shall be the following:—

  (1.) Reading—To read the Fourth Book of any authorised series, or, at the option of the

Inspector, any other book of equal difficulty.

(2.) Writing—To write in a neat and legible hand, and without errors in spelling, a passage of twelve lines to be dictated slowly from such book.

(3.) Arithmetic—To work correctly questions of ordinary difficulty in simple and compound rules, reduction, proportion, and practice.

## SUPERIOR PUBLIC SCHOOLS.

10. Any Public School may be declared a Superior Public School, if, after due inquiry, it shall be found that the attendance thereat is sufficient to enable a class to be formed of not less than twenty pupils, who have been educated up to the standard that completes the course prescribed for a Fourth Class.

11. In addition to more advanced work in the ordinary subjects, lessons in other branches shall be

given to the highest class, as under:—

To Boys.—In Mathematics, Latin, Science, and Drawing.

To Girls.—In French, Drawing, and Sanitary Science.

Instruction may also be given in such other branches as the Minister may from time to time

consider expedient.

12. Necessary text-books shall be supplied by the Minister.

13. In cases where the regular staff is unable to teach any prescribed subject efficiently, the Minister may employ a special teacher for such subject, and pay him such salary as he may deem expedient, provided that the special class so taught shall be drafted from the highest class, and contain not less than twenty pupils not less than twenty pupils.

14. The course of instruction to be carried out in the highest class of a Superior Public School shall be that prescribed for a fifth class in the Standard of Proficiency; and such subjects shall be studied each year as may be prescribed annually for the Junior or Senior Examinations of the Sydney University. EVENING

## EVENING PUBLIC SCHOOLS.

## Signatures to Petition.

15. Every petition for the establishment of an Evening Public School must be signed, on behalf of not fewer than ten persons, by the parents, guardians, or other residents of the locality in which it is desired to establish such School.

## Persons not eligible to be Pupils.

16. No person below the age of fourteen years shall be received as a pupil in any Evening Public School, until such person has received a certificate under section 35 of the Public Instruction Act; and no teacher or pupil-teacher employed in any school established or maintained under this Act shall be eligible for admission into such Evening Public School unless authorised by the local Inspector.

# Appointments of Teachers.

17. Teachers of Evening Public Schools will be appointed by the Minister, but no teacher can be appointed unless he has been trained and classified.

## Place of holding Evening Public Schools.

18. An Evening Public School may be conducted in any Public School-room, in any class-room attached thereto, or elsewhere in a suitable place.

# Furniture and Apparatus.

19. The ordinary school furniture and apparatus of any such Public School may be used in the management of an Evening Public School.

## Books.

20. Necessary supplies of reading books will be granted to Evening Public Schools.

## Time of Meeting.

21. The pupils of an Evening Public School shall meet for instruction three times weekly at least, and every such meeting shall be of not less than two hours' duration.

## Course of Instruction.

22. The course of instruction shall comprise Reading, Writing, Dictation, Arithmetic, Grammar, and Geography, and such other subjects as the Minister may from time to time determine.

# Instruction to be Secular.

23. The instruction imparted must be secular, in accordance with section 7 of the Public Instruction Act.

24. Every pupil in an Evening Public School shall pay to the teacher weekly, in advance, a fee not exceeding one shilling; but the Minister may relieve any pupils from the payment of school fees where inability to pay is satisfactorily shown, and shall make good the payment to the teacher.

30 to 40, £36

Fuel and Light.

26. The expense of providing fuel and light must be borne by the Teacher.

## Registers.

27. A class roll for recording the attendance of pupils, and a lesson register, shall be kept in every Evening Public School.

# Returns.

28. Quarterly and annual returns shall be furnished in the same form as in Public Schools.

# Inspection and control.

29. Evening Public Schools shall be subject to the same inspection and control as Public Schools.

## PUBLIC HIGH SCHOOLS.

30. Examinations for admission to Public High Schools as well as for Scholarships and Bursaries shall be held half-yearly, in June and December, and at these examinations Scholarships and Bursaries may be awarded to those who gain the most marks and show the requisite proficiency, as follows:—

## SCHOLARSHIPS.

15 (7 to boys and 8 to girls in June; 8 to boys and 7 to girls in December), Sydney High School.
5 Bathurst Girls' High School.
10 (5 to boys and 5 to girls), Maitland High School.

## BURSARIES.

Bursaries.

10 half bursaries for Metropolitan and Sub-metropolitan children tenable at the Sydney High, Grammar, or Superior Schools.

5 full bursaries (2 to boys and 3 to girls in June; 3 to boys and 2 to girls in December) for country children tenable at the same schools.

2 full bursaries in June and 3 in December, Maitland Girls' High School.

2 full bursaries in June and 3 in December, Bathurst Girls' High School.

5 full bursaries, Maitland Boys' High School.

In the case of children whose parents reside within convenient access of the country schools only half bursaries will be awarded, and no child so residing will be permitted to compete for a Sydney bursary. Vice versa, no Sydney child may compete for a country bursary.

Every applicant for either a scholarship or a bursary must state in his application what school he intends to enter.

Country children are expected to attend the High School nearest by a practicable route to their places of residence. In exceptional circumstances, however, the Minister may, on application being made, sanction a departure from this rule. The application should accompany the form notifying intention to compete.

31. There shall be two groups of subjects for examinations, one for Scholarships and one for ries.

Bursaries. They are

(1.) Grammar.—To parse the more difficult words in a passage of about six lines. To distinguish the true subjects and the true predicates in sentences. To correct inelegant or ungrammatical expressions. To exemplify the correct usage of picked words. (2.)

(2.) Dictation.—To write a passage of about fourteen lines, dictated from some standard author or from an ordinary newspaper, with correct spelling and punctuation.

(3.) Arithmetic.—To solve questions in Proportion, Vulgar and Decimal Fractions, Interest

and Discount.*

(4.) French (for girls) Latin (for boys) As prescribed for Fifth Classes in Public Schools, First Half-year.
(5.) Euclid (for boys only).—Book I, Definitions, &c.; Propositions 1 to 20 inclusive.
(6.) Algebra (for boys only).—First Four Rules.

FOR BURSARIES.

(1.) Grammar.—As for Scholarships.
(2.) Dictation.—As for Scholarships.
(3.) Arithmetic.—As for Scholarships.
(4.) History.—Henry VII to Victoria inclusive, as prescribed for fourth classes in Public Schools; History of Australia as taught in Public Schools.
(5.) Geography.—Furgory Asia America and Australia as prescribed for third and fourth classes.

(5.) Geography.—Europe, Asia, America, and Australia, as prescribed for third and fourth classes in Public Schools.

(6.) Drawing and Music.—As prescribed for third and fourth classes in Public Schools.

Candidates shall be eligible for admission to a High School who pass satisfactorily in the subjects numbered (1), (2), and (3), and in one other subject selected from Nos. (4), (5), and (6) in either group.

in either group.

32. A Scholarship will be tenable for three years, subject to good reports from teachers, and will entitle a pupil to a free grant of text-books and to free education in a State High School. A bursary will be tenable for three years, subject to good reports from teachers, and will entitle a pupil to a free grant of text-books and to free education in Sydney High School, in a Sydney Superior Public School, or in the Sydney Grammar School, or in one of the Country High Schools. When a pupil holding a Bursary must necessarily board away from home in order to attend one of these schools, an allowance not exceeding £30 a year, in addition to free education and text-books, will be made

33. No pupil will be awarded a Bursary whose parents or guardians are in a position to pay for his education; but, subject to this proviso, the examination for Bursaries will be open to all boys and girls under fourteen years of age who have attended a Public School with reasonable regularity for the two years preceding the date of examination.

34. The examination for scholarships will be open to all boys and girls under fourteen years of age.
35. Candidates who compete for a Bursary or Scholarship more than once will be eligible for a Bursary or Scholarship only for the period remaining out of three years from the date of their first competition, and no candidate will be permitted to compete after having attended a High School.

36. The fee to be charged at a High School shall be £3 3s. per quarter payable in advance.

37. The fees shall in no case be the property of the teachers but shall be forwarded to the Cashier for payment into the Consolidated Revenue Fund.

38. The parents or guardians of candidates for Bursaries or Scholarships must fill in and forward to the Under Secretary the necessary forms of application at least six weeks before the date of examination. Such forms may be obtained at this office.

Such forms may be obtained at this office

## STATE BURSARIES FOR UNIVERSITY EDUCATION.

39. Ten Bursaries, six to boys and four to girls, tenable for three years at the Sydney University, will be awarded annually on the position of candidates at the March Matriculation Examination.

40. Candidates must be under eighteen years of age, and must have attended a State High School, a Public School, or, as State Bursars, the Sydney Grammar School, for the year previous to the examination; and they must produce satisfactory testimonials of character from the headmasters of the schools they have attended they have attended.

41. They must satisfy the Minister of Public Instruction that their own and their parents' means are unequal to the expense of the University education. To a successful competitor who resides at such distance from the University as to be unable to travel to and fro daily a full bursary will be awarded, while to one who resides in the metropolitan or sub-metropolitan inspectoral district, within easy access of the University, part of a Bursary only will be awarded. The candidate's status as to whether he can be deemed eligible for a full Bursary or part of a Bursary will be decided by the Minister before his admission to examination.

admission to examination.

42. A Bursary shall entitle pupils to text-books and free education, together with an allowance not exceeding £20 per annum to those who need not board away from home, and not exceeding £50 to those

who must necessarily do so.

who must necessarily do so.

43. Every Bursar must matriculate at the University and attend lectures; and he shall continue to hold the Bursary only on condition that his conduct be good, and that he pass creditably the examination at the end of the first and second years after his matriculation.

44. The parents or guardians of candidates must fill in and forward to the Under Secretary the necessary forms of application for University Bursaries at least six weeks before the date of the Matriculation examination. Such forms may be obtained at this office.

## PROVISIONAL SCHOOLS.

45. A Provisional School may be established in any locality where not fewer than twelve, but not more than nineteen, children between the ages of six and fourteen years can regularly attend such school: provided that no Provisional School shall be established within four miles, by the nearest route practicable for children, of any existing Public, Provisional, or Half-time School.

46. The necessary school buildings and furniture for a Provisional School, as well as the requisite books and apparatus, will be provided at the cost of the Department, subject to the following conditions:—

(a) That the grant in aid of the building and furniture shall be limited to £45, when, in the opinion of the Inspector, the average attendance will be from 12 to 15, and to £60 when the average attendance is likely to be 18; that payment shall not be made until the building has been erected, and reported by an Inspector or other officer of the Department of Public

has been erected, and reported by an Inspector or other officer of the Department of Public Instruction to be ready for occupation.

(b) That the building shall be placed on Crown lands, if a site thereon central to the school population and otherwise suitable can be obtained, and that, if built on private land, the right-of-way shall be secured, and the property leased to the Minister of Public Instruction for a term of years, as may be agreed upon, at a peppercorn rent, the Minister having the right to remove the building before or at the expiration of that term.

(c) That where the average attendance is expected to range from 12 to 15, the schoolroom shall measure 14 feet in length, 12 feet in width, and 9 feet in height to the wall-plates, and shall have a pitched roof, two windows, a boarded floor, and a fireplace; two out-offices must also be provided, and the following articles of furniture supplied, viz.:—

2 desks. each 10 feet 6 inches long.

(d)

2 desks, each 10 feet 6 inches long.

2 forms, each 10 feet 6 inches long 1 book-press or box.

table, 3 feet by 2 feet. 1 chair.

(1) That when the average attendance is expected to be 18, the schoolroom shall measure 17 fect in length, 14 feet in width, and 9 feet in height to the wall-plates, and shall have a pitched roof, two windows, a boarded floor, and a fireplace; two out-offices must also be provided, together with the following articles of furniture, viz. :-

4 desks, each 7 feet 6 inches long. 4 forms, each 7 feet 6 inches long. 1 book-press or box.
1 table, 3 feet by 2 feet. 1 chair.

- (e) That the applicants for a Provisional School state, on the usual form of application, the arrangements which they deem best for having the building erected, and the furniture supplied, with the least possible delay.
- 47. Teachers of Provisional Schools will be appointed by the Minister, after their competency for the office has been ascertained.
- 48. To ensure the continuance of a Provisional School, the provisions of the Public Instruction Act must be duly observed, and an average attendance of not less than 12 pupils maintained.

  49. Provisional Schools shall be classified in the following manner:—

Schools with an average attendance below 20, but not } First-class Provisional Schools. below 18. Schools with an average attendance below 18, but not ) Second-class Provisional Schools. below 15. Schools with an average attendance below 15, but not \( \) Third-class Provisional Schools. below 12.

50. The Salaries of Teachers of Provisional Schools shall be at the following rates:-

In First-class Provisional Schools, £91 per annum. In Second-class Provisional Schools, £80 per annum. In Third-class Provisional Schools, £68 per annum.

51. School fees shall be paid at the same rate as prescribed for Public Schools, and the sums received shall be paid to the Consolidated Revenue.
52. Provisional Schools must be conducted in every respect as Public Schools, and be subject to

all the provisions of the Public Instruction Act with respect to religious instruction.

53. The course of secular education shall embrace Reading, Writing, Arithmetic, Grammar, Geography, and History, with needlework for girls, whenever practicable; and the instruction must be imparted in accordance with the prescribed standards of proficiency.

## SCHOOLS TAUGHT BY ITINERANT TEACHERS.

# (A.) Half-time Schools.

54. Wherever twenty children, between the ages of six and fourteen years, are residing within an estimated radius of 10 miles from a central point, and can be collected in groups of not less than ten children in each, the Itinerant Teacher shall visit two such places only, and the schools so established shall be designated Half-time Schools.

55. Aid will not be granted towards the maintenance of such schools unless suitable school-houses be provided by the applicants

- be provided by the applicants

  56. No schoolroom shall be approved unless it be at least 10 feet in width, be floored, be provided with a fireplace, and be properly lighted and ventilated.

  57. A full supply of furniture and school books shall be granted as a first stock to all schools newly established, and further grants will be made from time to time, as may be deemed expedient.

  58. The same Registers are to be kept, and the same Returns furnished as in Public Schools.

  59. Every teacher must divide his time between the schools under his charge, in such a way as to effect the largest amount of good. Where practicable, he is to devote the mornings to the teaching of one school, and the afternoons to the teaching of the other; but, if found more suitable, other arrangements may be adopted, under the authority of the Inspector charged with the supervision of the schools. The parent or guardian of each child is to be supplied by the Teacher with a time-table showing the hours at which school opens and closes.

  60. Half-time Schools shall be classified in the same manner as Public Schools, according to the total average attendance of pupils at the stations at which the teacher gives instruction.

total average attendance of pupils at the stations at which the teacher gives instruction.

61. Teachers shall be paid the same rates of salary as teachers of Public Schools of corresponding classification

62. The scale of fees for Half-time Schools shall be, for five days teaching-

For one child in a family, threepence. For two children in a family, sixpence.
For three children in a family, ninepence.
For four or more children in a family, one shilling.

The sums received shall be forwarded by the Teacher to the Cashier for payment into the Consolidated Revenue.

63. Teachers shall be paid an annual allowance of £10, where necessary, for forage, in addition to the salary attached to their schools.

64. As regards instruction, every Half-time School is to be conducted in all respects as a Public School.

65. Teachers are required to insist on the carrying out of a systematic course of Home Lessons.

66. Teachers shall be held directly responsible to the Inspectors under whose supervision they

are placed.

67. At the end of each month a report upon the work done during that period must be furnished by Teachers to the Inspector.

## (B.) House-to-house Schools.

68. Teachers not necessarily trained may be employed in house-to-house teaching; they must be persons of good moral character, and must satisfy the Inspector that they are capable of imparting the rudiments of an English education.

69. The mode in which their time shall be apportioned between the several families visited by them will be determined by the Minister, on information furnished by the Inspector.

70. The subjects of Instruction shall be limited to Reading, Writing, Dictation, and Arithmetic.

71. It is required that the teacher shall supplement his oral instruction by a systematic course of

Home Lessons

72 At the end of each month a report upon the work done during that period must be furnished by the Teacher to the Inspector.

73. The remuneration of teachers engaged in the work shall be at the rate of £4 15s, per annum for each pupil in average attendance, up to a maximum salary of £95 per annum.

74. In addition to such remuneration, they shall be allowed, where necessary, a sum of £10 per annum as forage allowance. Application for payment should be made at the end of each quarter.

- 75. As a condition to payment of salary, they must keep a record of the pupils' attendance in a atisfactory manner, and furnish punctually and accurately such returns as may be required by the Department.
- 76. Necessary text-books and materials will be supplied on requisition, as in the case of other
- 77. The school fees payable shall be at the same rate as prescribed for half-time schools, and the sums received shall be forwarded to the Cashier for payment into the Consolidated Revenue.

## GENERAL REGULATIONS.

## Grants of School Books, &c.

78. Grants of school books and apparatus shall be made from time to time, as may be deemed expedient, to all schools under supervision of the Minister, in proportion to the average number of children in attendance. A full supply will be granted to schools newly established.

## Requisitions for School Materials.

79. Requisitions for supplies should be forwarded at the end of a quarter only.

## Character of School Books.

80. Such books only as are supplied or sanctioned by the Minister shall be used in any school for ordinary instruction.

## Apparatus.

81. The term Apparatus shall be held to include maps, diagrams, pictures, black-boards, easels, ball-frames, and Kindergarten appliances.

## Registers, &c., to be kept.

82. The undermentioned Registers and Forms shall be kept, according to directions supplied with them, by every teacher: (a) Admission Register, (b) Class Roll, (c) Daily Report Book, (d) Punishment Book, (e) Lesson Register, (f) Time-table, and (g) Programme of Lessons for each Class.

### Returns.

83. Quarterly and Annual Returns shall be furnished from every school. Each Quarterly Return must be neatly made out in duplicate, one copy to be retained by the teacher as a record, and the other to be furnished to the Inspector on the last Saturday preceding the Midwinter and Christmas vacations, and in other cases on the last Saturday in the months of March and September. The Annual Return must be forwarded, with the Quarterly Return, immediately after the close of the December quarter.

## Default as to Returns or Registers.

84. Negligence in compiling or sending Returns, or in keeping School Registers, shall render a teacher liable to a fine, or, if repeated, to a loss of classification. Any teacher guilty of fraudulently making false entries in any Register or Return will be dismissed.

## Appointment and Training of Teachers.

85. Every applicant for employment as a teacher, unless he be a University graduate, or a person holding a certificate from a recognized training institution, must show that he has gained in the Colony, either as a pupil in a State School, or otherwise, a sufficient experience of the established Public School system to warrant his employment. Every untrained applicant must undergo a course of training before being permanently appointed, and he must sign an undertaking to accept employment in any locality indicated by the Minister.

# Married Women Ineligible.

86. Married women will not be accepted for employment as teachers.

# Position of Teachers.

87. Teachers employed under the Department of Public Instruction are Civil Servants of the Crown.

## Teachers not to seek Outside Influence.

88. Teachers are appointed, promoted, and removed on a due consideration of their claims and merits. They, are, therefore, prohibited from seeking the interest of influential persons outside the Department to obtain promotion, removal, or other advantage. Any infringement of this Regulation will be severely dealt with.

## General Qualifications.

89. As a general rule, no person will be appointed as a teacher unless he has been examined and classified. In some cases a teacher may be appointed provisionally who has not undergone examination; but his appointment will not be ratified until his competency has been tested in that manner.

# Teachers' Travelling Expenses.

90. Except in the case of applicants for removal and of teachers who obtain substantial promotion by removal, reasonable allowances on account of personal expenses in travelling will be granted to teachers in proceeding to new appointments. As a rule, the cost of carriage of furniture and household effects must be borne by teachers themselves.

# Examination and Classification.

91. The attainments of Teachers, Students of the Training Schools, and Candidates for employment as Teachers, shall be tested by written and oral examinations, and their skill in teaching determined by their ability to manage a school or class; and, according to such attainments and skill, they will be classified in the following grades:—The first, or highest, class, will have three grades, distinguished as IA with Honors, IA (without Honors), and IB; the Second Class will have three grades, distinguished as IIA with Honors, IIA (without Honors), and IIB; and the Third Class will have three grades, distinguished as 3A, 3B, and 3C. A classification awarded to a Teacher, a Student of the Training School, or a Candidate for employment, after his first successful examination, shall be provisional only, and be confirmed at the end of three years from the date of examination if the Inspectors' reports upon his school work be fully satisfactory: provided that the classification of any Teacher in the School Service shall be liable to reduction or cancellation for inefficiency, gross neglect of duty, or serious misconduct on the part of the person holding such classification. As a rule, a teacher will not be regarded as eligible for examination, with a view to promotion to a higher class, until his provisional classification has been confirmed.

**Commencement** confirmed.

## Com nencement of duty.

92. When a teacher is appointed to a school, he must report to the Inspector of the District the fact of arrival at his post, and the date of commencing duty.

## Resignation of a Teacher.

93. A teacher is required to give not less than one month's notice of his intended resignation, which shall take effect on the last day of the month indicated. Before receiving salary for the last month, he must hand over to a person duly authorized all school property belonging to the Minister, and make out, in duplicate, an inventory of the same: one copy, to be forwarded to the Inspector, the other to be left with the School Records.

## Teachers not to engage in other Occupations.

94. Teachers in the service of the Minister are prohibited from holding any office unconnected with their school work which might bring them into collision with any. of the parents or residents, and from engaging in any occupation not having a distinctly educational character, unless the sanction of the Minister has been previously obtained.

## Duties of Teachers.

95. The duties of Teachers shall be:

To observe faithfully these Regulations.

To carry out the suggestions of Inspectors.

To teach according to the Course of Secular Instruction.

To maintain the discipline prescribed in the Regulations.

To keep the School Records neatly, and to furnish Returns punctually.

To see that the undermentioned documents are kept posted in a conspicuous place in the school-room, namely:— (a) The Regulations; (b) Notice to Visitors; (c) Course of Secular Instruction; (d) Time-table; (e) Programme of Lessons; (f) Scale of Fees; (g) Proclamation as to obligatory attendance; (h) List of Public School Board.

To take charge of the school buildings and all property belonging to the Minister, and to be responsible for keeping the school premises in good order and tenantable repair—reasonable wear and tear excepted—and to see that they are not used for any private purposes without the Minister's permission.

## Teachers' Wives.

96. In a school containing female children but no female teacher, it will be the duty of the teacher's wife to teach needle-work to the girls during at least four hours in each week. In forming an estimate of the efficiency of a school, the competency and usefulness of the teacher's wife, and the time she devotes to school duties, will be taken into account.

## Assistant Teachers.

97. Assistant teachers may be appointed to schools in which the average daily attendance exceeds seventy. They may be (a) persons who have served for four years as pupil-teachers, or, (b) persons who have been examined and classified.

## Pupil-teachers.

98. Pupil-teachers may be employed to serve for not less than four years in any school in which the average attendance has not been less than fifty for the preceding quarter, provided that the teacher holds a classification not lower than Class II.

# Conditions of Appointment.

99. Candidates for the office of pupil-teacher must be not less than fourteen nor more than seventeen years of age, and free from any bodily infirmity likely to impair their usefulness. They must also pass an examination in the subjects specified in Appendix A.

100. The remuneration of a pupil-teacher will consist partly of instruction to be given by the teacher, for at least one hour on every school day, and partly in a yearly salary.

## Examinations.

101. The subjects in which teachers and pupil-teachers shall be examined for classification are those stated in Appendix A.

102. An examination of teachers shall be held yearly in each Inspector's district. Teachers who desire to be examined, with a view to promotion, must apprise the Inspector of their wish at least one month before the date of examination, and furnish him with a list of the alternative subjects, if any, upon which they are prepared for examination.

## Promotion for Good Service.

103. Teachers can be promoted from one class to another by examination only. But in each class a teacher may, without examination, be advanced to a higher grade for good service; that is to say, if in the last five years during which he has held his classification, his school has increased in efficiency, if the Inspectors' Reports throughout that period have been satisfactory, and the Report for the fifth year indicates that the applicant's practical skill is equal to that required for the grade sought, and if his general conduct has merited the Minister's approval.

# Promotion by Removal.

104. Teachers desirous of being promoted to more important schools must intimate their wishes to the Inspector of the district, in writing. A list of such teachers will be kept in the Department of Public Instruction; and, except in special cases, promotions will be made in accordance with the principle of absorption and except in special cases, promotions will be made in accordance with the principle of classification and seniority.

# Efficiency of Teachers.

105. In judging of the efficiency and usefulness of Teachers and of their claims to promotion, the successful work carried on by them in connection with (a) the initiation and management of School Savings' Banks, (b) the planting and beautifying of school grounds, (c) the instructing and drilling of Public School Cadet Corps, and (d) the passing of pupils at the Junior or Senior Examinations, will have full value awarded to it.

# Classification of Schools.

106. Primary schools established or maintained under this Act shall be classed as follows:-

## First Class Schools.

All schools in which the average daily attendance is not less than six hundred, and in which the standard of proficiency prescribed for that class of school is fully reached.

Second

## Second Class Schools.

All schools in which the average daily attendance is not less than four hundred children nor more than six hundred, and in which the standard of proficiency prescribed for that class of school is fully reached.

## Third Class Schools.

All schools in which the average daily attendance is not less than three hundred nor more than four hundred, and in which the standard of proficiency prescribed for that class of school is fully reached.

### Fourth Class Schools.

All schools in which the average daily attendance is not less than two hundred nor more than three hundred, and in which the standard of proficiency prescribed for that class of school is fully reached.

## Fifth Class Schools.

All schools in which the average daily attendance is not less than one hundred nor more than two hundred children, and in which the standard of proficiency prescribed for that class of school is fully reached.

## Sixth Class Schools.

All schools in which the average daily attendance is not less than fifty nor more than a hundred children, and in which the standard of proficiency prescribed for that class of school is fully reached.

## Seventh Class Schools.

All schools in which the average daily attendance is not less than forty nor more than fifty, and in which the standard of proficiency prescribed for that class of school is fully reached.

## Eighth Class Schools.

All schools in which the average daily attendance is not less than 'thirty nor more than forty children, and in which the standard of proficiency prescribed for that class of school is fully reached.

# Ninth Class Schools.

All schools in which the average daily attendance is not less than twenty nor more than thirty children, and in which the standard of proficiency prescribed for that class of school is fully reached.

## Tenth Class Schools.

All Public Schools in which the average daily attendance does not reach twenty.

## Condition of Retention in Class.

107. Where a school fails to meet the conditions above specified, the Minister may remove such school to a lower class.

# Eligibility of Teachers for appointment to certain Schools.

108. Teachers who have gained their classifications by examination, or by promotion under Regulation 103, shall be eligible for appointment to any Primary School or any boys' or girls' department, in accordance with the following Schedule:-

lass of School or Department.	Teacher's Classification,
I	I.A.
II	I.B.
III	
IV	II. A.
V	II. B.
VI	II. B.
VII	
VIII	III. B.
IX	III. C.
X	III. C.

Mistresses of Infants' Departments must hold a classification of II.A.

109. A teacher may be removed from the school in which he is employed to another of a lower class, should he fail, through any default on his part, to maintain the requisite number of pupils in average attendance, or to satisfy the conditions of the standard of proficiency.

# Teachers' Emoluments.

110. The salaries of male teachers shall be according to the following scale:—

Do do do Second Class 5 Do do do Third Class 5	239
	239
Do do do Fourth Class	228
Do do do Fifth Class	
Do do do Sixth Class	
Do do do Seventh Class	
Do do do Eighth Class	
Do do do Ninth Class	
Do do do Tenth Class	

In schools ranking below the fourth class, the salaries of unmarried male teachers, of married teachers

who are not assisted by their wives, as required by regulation 96, and of female teachers in charge, shall be £12 per annum less than the foregoing rates.

111. In addition to these salaries, residences, vested or rented, shall be provided for classified married male teachers in charge of classified Public Schools; but a residence rented for a teacher shall be as near as practicable to his school.

## Mistresses.

112. The salaries of mistresses shall be according to the following scale:-For a mistress in charge of a girls' or infants' department of a

	Girls' Department.	Infants' Department.
School of the First Class		£194

Work-mistresses.	
115. Work-mistresses may be appointed to schools of the first and second classes; and the	r salaries
In a First Class School with an average daily attendance of not fewer than 250 girls	annum. 3114 £95 £86
110. The time devoted to their duties by Work-mistresses shall be as follows:—	

117. Each Work-mistress shall be required to keep a record showing the names of the pupils, as well as the dates of commencing and completing each piece of work. The record is to be preserved for the information of the Inspector, and of the Directress of Needlework.

118. The regular Teachers of such classes as may be receiving instruction in Needlework will be expected to assist the Work-mistress in the performance of her duties.

Days a week.

## TRAINING SCHOOLS.

## Classes of Candidates.

Classes of Candidates.

119. The Minister may authorize to be received into the Training Schools, annually, three classes of candidates, namely, First Class, or Scholarship Candidates—Thirty pupil-teachers whose term of service has expired, and who have obtained the highest marks among those passing the entrance examination successfully; Second Class, or Half-Scholarship Candidates—Twenty pupil-teachers whose term of service has expired, and who have obtained, after the first thirty, the next highest marks among those passing the entrance examination successfully, and are prepared to pay half the cost of their maintenance while in training; Third Class, or non-Scholarship Candidates—Other Pupil-teachers whose terms of service have expired, untrained teachers who have had charge of schools, and persons entering the teaching profession for the first time, who have passed the entrance examination successfully, and are prepared to pay the whole cost of their maintenance while in training.

# Qualifications.

120. Candidates must apply for admission in a form prescribed by the Minister. They must, except in the case of pupil-teachers, be not less than twenty years of age, and, as a general rule, not more than thirty; they must be free from any bodily infirmity likely to impair their usefulness as teachers, and be persons of active habits and unblemished reputation. They must also satisfy the Minister as to their previous history and their qualifications.

# Conditions of Admission.

121. Before admission, every candidate must make a declaration that he intends, in good faith, to follow the profession of a teacher in schools under the Minister, and that he will accept a situation in any district, as the Minister may see fit. He must also procure a guarantee from two responsible persons that the whole expense of his training defrayed by the State will be refunded, if, from any cause whatever, he shall not enter the service of the Minister, or shall leave it in less than three years from the date of his first appointment.

## Terms of Training.

122. Entrance examinations shall be held yearly in December; and the periods of training will be one year, two years, or three years, as may be found expedient.

## Allowances during Training.

123. The following allowances may be made to students who satisfy the aforementioned conditions and pass successfully the prescribed examinations:—To scholarship students, £6 per month; to half-scholarship students, £3 per month. When the school is prepared to receive students into residence, these allowances are not paid, board and lodging being provided instead.

## Practical Training.

124. The students shall be trained in the practical management of schools by attendance at the Practising Schools.

## Examinations.

125. Oral examinations of the students shall be held periodically to test their attention and progress; and written examinations shall take place yearly, in December, when classifications will be awarded according to attainments and teaching skill to students who have completed their course. No certificate shall be given until the Inspector's Report shows that the student is successful in the management of a

## GOVERNMENT OF SCHOOLS.

# Public School Boards.

126. The Minister reserves to himself the power of controlling, through his officers, the internal management of schools; but, for other purposes, he will avail himself of the assistance of Public School Boards, wherever suitable persons are found to fill the office.

127. Every Public School Board, at the first meeting thereof, shall elect from the members a Chairman, whose duty it will be to correspond with the Minister on behalf of the Board; and the Board may in like manner appoint such other honorary officers, being members of the Board, as the Board way deem expedient.

128. A Public School Board may, by resolution passed at a duly constituted meeting thereof, appoint any member or members to perform the duty, prescribed by the 19th section of the Public Instruction Act, of visiting any of the schools placed under the supervision of the Board; and it shall be the duty of the member or members so appointed to report the results of any such visitation to the Board, who will, if necessary, report to the Minister.

120. The grounds upon which any Public School Board shall exercise the power conferred on it by the section beforementioned to suspend a teacher for misconduct, shall be the following:—Unfitness on the part of such teacher to perform his duties from intemperance immoral conduct gross perfect of

on the part of such teacher to perform his duties from intemperance, immoral conduct, gross neglect of duty, or continued absence from duty without leave.

130. Public School Boards shall, before leaving the school under visitation, report to the Minister any case in which a teacher is suspended by them, and apprise the Inspector having charge of such

131. Public School Boards are expected to use every endeavour to induce parents to send their children regularly to school, and to report the names of any parents or guardians who refuse or fail

to educate their children.

to educate their children.

132. When the course laid down in Regulations under the 13th section of the Public Instruction Act for relieving parents and guardians from payment of school fees by the Minister is not convenient, application may be made by parents or guardians to the Public School Board of the district; and, if satisfied as to the inability of the applicants to pay school fees, such Public School Board may issue a certificate of exemption from payment thereof for a period not exceeding three months, and shall thereupon report the case to the Minister.

133. In fixing the hour for special religious instruction, in accordance with section 17 of the Public Instruction Act, the Public School Board should take care that the daily routine of the school, as laid down in the Regulations, is not unduly interfered with.

134. In addition to the powers conferred on such Boards by the Public Instruction Act, the Minister entrusts to them the following duties:—(a) To take care that the school buildings are not used for any improper purpose. (b) To see that a sufficient quantity of suitable furniture and apparatus is provided. (c) To take precautions for excluding from the school, during its ordinary business, all books not sanctioned by the Minister. (d) To inspect periodically the School Registers and Records. (e) To observe whether the teacher discharges his duties, to report his conduct to the Minister when he is in fault, and to protect him from vexatious complaints.

Inspectors of Schools.

## Inspectors of Schools.

135. Inspectors and other persons deputed by the Minister to visit any school shall be furnished with proper credentials. Every teacher is required to treat such persons with deference; to carry out their suggestions for the improvement of the school; and to obey their instructions in all matters relating to the Public Instruction Act and these Regulations.

## Duties of Inspectors.

136. Inspectors are to enforce observance of the provisions of the Public Instruction Act and of the Regulations; but their decisions shall be subject to appeal to the Minister. They are to examine into condition of the schools, and to inquire into all matters which it may be expedient to report to the Minister. They are authorized to determine all questions of school management, and to take the teaching of a class or of a school into their own hands for a time, to show the teacher how defective methods may be improved.

## Annual Inspections.

137. Once at least in the year, every school in each Inspector's district shall be visited by him and the pupils be examined as to their proficiency in the several branches of instruction as authoritatively prescribed. He shall, within six days of such inspection, send a report thereupon to the Minister, together with such observations on the state of the school generally as shall appear to him to be called

# Conduct of Inspectors.

138. In their intercourse with teachers, Inspectors should be guided by feelings of respect for the teacher's office, and of sympathy with his labours. They should exhibit towards teachers every possible courtesy, treating them at all times with the consideration and kindness which the difficulties of their position demand.

## Observation Book.

139. The Inspector's remarks upon the state of a school visited by him, shall, at the close of the examination, be entered in the Observation Book of the school, which, as a record, is to be carefully preserved. Entries therein must not be erased or altered.

# SCHOOL ROUTINE AND DISCIPLINE.

# Punctuality.

140. With a view to the proper training of their pupils, teachers must conduct the operations of their schools with punctuality and regularity.

141. Habits of personal neatness and cleanliness are to be encouraged among the pupils, not only by precept, but by the personal example of the teachers, and, if necessary, may be enforced. Teachers are also responsible for keeping the schoolrooms and furniture clean and arranged in an orderly

# Order and Conduct.

142. Teachers are to instil into the minds of their pupils the necessity for orderly and modest behaviour, as well as for obedience to teachers and to the rules of the school. Pupils should also be trained to exhibit respect for the property of others, whether public or private; to regard the feelings of their fellows; to be honest and truthful, attentive under instruction, and conscientious in the discharge of every duty.

# Government of Pupils.

143. In the government of pupils a teacher must avoid all degrading punishments. His discipline should be mild but firm, his manner kindly, his demeanour cheerful, and his language marked on all occasions by strict-propriety. While overlooking no offence, his aim should be to prevent the necessity for punishment by effecting the improvement of the offender.

# Corporal Punishment.

144. Corporal punishment may be inflicted, but by the principal teacher only, or by an assistant with his approval. It should be restricted to extreme cases; and the teacher must keep a record of the time and place of punishment, its amount, and the nature of the offence. [See also Clause 17 of Instructions to Teachers.]

## Expulsion of Pupils.

145. No pupil shall be expelled from any school except by the authority of the Minister.

Suspension.

## Suspension.

146. A pupil may, nevertheless, for gross insolence, persistent disobedience, profanity, or immoral conduct, be, by the teacher, forthwith removed from the school: provided that, in every such case, the matter shall be reported without delay to the Minister; and, until its settlement by him, the pupil shall not be re-admitted.

## Playground Supervision.

147. The conduct of pupils in the playground must be carefully supervised by the teacher; and he must see that, in proceeding to school and returning from it, their behaviour is orderly.

## Religious Views of Pupils or of Parents.

148. Nothing must ever be said or done by any teacher, in a pupil's hearing or presence, calculated to offend the religious views of that pupil, or of any other in the school, or of the parents of any such pupil.

## Daily Routine.

149. In all schools maintained or aided by the Minister, the daily routine shall be that specified hereunder: Provided that, by permission of the Minister, the time of assembling may be half an hour later than so specified; in which case, the several times stated will be later in the same proportion.

At 8.45. Pupils to assemble in the playground. All school materials to be prepared for lessons.

At 8.55. Pupils to be arranged in ranks, inspected as to cleanliness, and marched into school.

At 9. Lessons (or Special Religious Instruction) to commence; as noted in the Time-table prescribed by Rule 150.

At 10.30. Recess for ten minutes, to be spent in the playground by pupils and teachers.

At 10.45. Lessons to be resumed according to the Time-table.

At 11.55. Class-roll to be called and marked.

At 12. The school to be dismissed for mid-day recess.

At 11.55. Class-roll to be called and marked.
At 12. The school to be dismissed for mid-day recess.

### Afternoon.

From 12 to 1.20. Recess for dinner and recreation, under the superintendence of the teachers At 1.20. Pupils to re-assemble in the playground. School materials to be prepared for lessons. At 1.25. Pupils to be arranged, inspected, and marched into school.

At 1.30. Lessons to re-commence as noted in the Time-table.

At 3.25. The Roll to be called and marked.

The school to be dismissed.

The school to be dismissed. At 3:30.

## · Time-table.

150. The Time-table to be observed in the schools is the following, except that, in cases within the provise to the preceding Regulation, the time in each instance will be half an hour later than

m 9 to 10. Special Religious Instruction; or, in Public and Provisional Schools, where no Religious Teacher is in attendance, Ordinary Instruction. From 9 to 10.

From 10 to 12. Ordinary Instruction. From 12 to 1.30. Recess for dinner and re-assembling. From 1.30 to 3.30. Ordinary Instruction.

## Special Religious Instruction.

151. Where the time specified for special religious instruction is inconvenient, some other hour may be fixed by mutual agreement between the Public School Board, the teacher, and the person giving such instruction.

## Vacations and Holidaus.

152. The vacations sanctioned by the Minister are—four weeks at Christmas, one week at Easter, and a fortnight at Midwinter. The holidays allowed, other than those occurring in vacation, are—the Anniversary of the Colony, of the Queen's Birthday, and of the Prince of Wales' Birthday; and Good Friday.

Teachers are to enter on their Time-tables these Vacations and Holidays.

## Closing Schools.

153. No school is to be closed upon any school-day without the written direction of the Minister or other person duly authorized by him on that behalf.

## Infectious Diseases.

154. The attendance of any pupil suffering from any contagious, offensive, or infectious disease, may be temporarily suspended by the teacher under rules approved by the Minister.

# INSTRUCTION IN SCHOOLS.

# Course of Instruction.

155. The Course of Secular Instruction, as the term is defined in the Public Instruction Act, shall be as given in Appendix B. Provisional Schools.

156. The Course of Instruction, with all Regulations respecting routine, discipline, and inspection, shall apply equally to Provisional as to other schools. Special Religious Instruction.

# 157. No pupil is to be required to receive Special Religious Instruction if the parents or guardians of such pupil object to such religious instruction being given.

General Religious Instruction. 158. Where any parent or guardian objects to a pupil receiving the General Religious Instruction prescribed in the Course of Instruction, notification to this effect shall be made to the teacher in writing.

# Denominational Books.

159. The Teacher, in all schools under the superintendence of the Minister, shall see that the religious books employed in the Classes for Special Religious Instruction are confined to the time and place of such instruction, and not left in the way of children whose parents may object to them.

# Methods of Teaching.

160. Every Teacher shall make himself acquainted with improved methods of teaching, and practise them in his school; and, as the efficiency of Teachers will be judged by the attainments, as well as by the moral improvement of their pupils, results, as well as the mode of instruction, should be best in right attainments. should be kept in view.

Teaching power to be justly distributed.

161. Teachers shall provide for the equitable distribution of their time through all the classes, so that the instruction of no pupil be neglected.

Persons

# Persons visiting Schools.

162. Visitors shall have access to every school maintained or aided by the Minister, during the hours of Secular Instruction—not to take part in the business or to interrupt it, but simply to observe how

## Duty of Teachers to Visitors.

163. Every Teacher shall receive courteously visitors seeking to inspect his school, and afford them access to the schoolroom, and liberty to observe what books are in the hands of the children or on the desks, what tablets are on the walls, and what is the method of teaching; but teachers shall not permit any person to interrupt the business of the school by asking questions of the children, examining classes, calling for papers, or in any way diverting attention from the usual business.

164. The restriction expressed in the preceding Rule will, of course, not interfere with the provision in Section 17 of the Public Instruction Act, whereby access is afforded to Religious Teachers for the purpose of communicating Special Religious Instruction.

### Visitors' Book.

165. Every Teacher shall have the "Visitors' Book" lying upon his desk, in which the visitors may enter their names, and, if they think proper, any remarks. Teachers are by no means to erase or alter any remark so made.

## INSTRUCTIONS TO TEACHERS.

The following Instructions, issued for the information and guidance of Principal Teachers of Schools and of Mistresses of Girls' and Infants' Departments, are also to be acted upon, as far as they may apply, by Teachers generally. These instructions have equal force with the preceding Regulations.

## I. Instructions relating to Principal Teachers only.

The Principal Teacher will keep a Teachers' Time Book, and will see that all Teachers enter therein the time of their arrival at and departure from school.

2. He will report to the Inspector all Teachers absent from duty without leave, and any who are

2. He will report to the Inspector all Teachers absent from duty without leave, and any who are habitually unpunctual.

3. He will visit the other School Departments once a day at least, to ascertain that the Teachers are at their posts and are observing the Time-tables. He will see that all documents required by the Regulations are exhibited in their proper places. It is not intended that he shall arbitrarily interfere with the teaching, the discipline, or the internal management of the other Departments; nor is he at liberty to remove children therefrom to his own Department without the sanction of the Inspector; but he is empowered to decide questions relating to the general order and routine of the entire school, subject to appeal to higher authority.

4. He will, with the concurrence and aid of the Heads of Departments, arrange for the regular cleaning of the schoolrooms, will see that the water-closets and all external premises are kept clean, and that the fences and gates are uninjured by the pupils. He will report promptly any damage done to the school buildings, as also any necessity for emptying the water-closets. If the water for the use of the pupils should become bad, the Inspector should be informed to that effect; and, in dry seasons, care is to be taken to prevent any persons, other than the pupils or the Teacher's family, from obtaining water from the school tanks or wells.

5. He will receive all letters addressed to Teachers at the School, and deliver them to the owners as soon as convenient. At the same time he will impress upon Teachers that having private letters addressed to them at the school is an inconvenient arrangement, justified only by urgent circumstances. Letters intended for pupils, and non-official letters addressed to Pupil-teachers, should be forwarded to the parents of the persons concerned.

the parents of the persons concerned.

6. Persons visiting the School, or calling upon Teachers, should in the first instance be brought to

6. Persons visiting the School, or calling upon Teachers, should in the first instance be brought to the Principal Teacher.

7. He will receive and investigate complaints from parents and others. It is expected that he will attentively consider such complaints, that he will endeavour to ascertain whether they are well founded, and that he will afford the redress which their nature may require or suggest.

8. The Principal Teacher will register all children applying for admission to the School, and will determine the Department for which they are fit.

9. Under the heading in the Annual Return, "Number of Scholars on the Records," pupils who have left, but who have subsequently been re-enrolled in the same school during the year, should only be counted once. A School with two or more Departments is to furnish but one Annual Return, in which children transferred from one Department to another during the year are only to be counted once.

## II. INSTRUCTIONS RELATING ALIKE TO PRINCIPAL TEACHERS AND MISTRESSES OF DEPARTMENTS.

10. He will give vigilant attention to the ventilation and temperature of the rooms, and will especially avoid an excessive degree of heat. At each recess the doors and windows should be opened so as to secure an effectual change of air. Windows should be opened, where practicable, by lowering them from the top; and children must not be allowed to sit in a strong current of air.

11. He will note the methods employed and the discipline maintained by the several Teachers under his immediate supervision, and will have power to interfere whenever he may consider either to be defective.

to be defective.

12. He will arrange his classes, if four or more, in sections, each section to contain two or three classes; and will place in charge of each section an Assistant Teacher, who, when the staff admits, will be aided by a Pupil-teacher.

13. For all purposes of classification and examination, the actual attendance of a pupil in days shall determine his half-year in class, such half-year to consist of 110 days.

14. When a subordinate Teacher relinquishes the charge of a class or section, it should be examined by the Head of the Department in the presence of the outgoing Teacher and his successor. A record of the condition of the class or section, as elicited by such examination, should be entered in the Lesson Register, and be attested by the signatures of all the persons concerned.

15. A similar course should be followed with respect to the materials used by the class or section in charge of the outgoing Teacher.

16. He will carefully preserve in the School all completed records and duplicate returns, for the use of future Teachers.

16. He will carefully preserve in the School all completed records and duplicate returns, for the use of future Teachers.

17. Corporal punishment must not be inflicted except by the Head of the school, or Department, or—under his direction and responsibility—by an Assistant Teacher. Pupil-teachers are, under no circumstances, to be allowed to inflict corporal punishment. Careful attention must be paid to the Regulation which provides that corporal punishment "should be restricted to extreme cases." Failure or inability to learn is not to be regarded as an extreme case; and corporal punishment is not to be recognised as a proper aid to teaching. The boxing of pupils' ears and the tapping of children on the head are strictly forbidden, as is also the corporal punishment of female pupils twelve years of age and over; and no corporal punishment may be inflicted for neglect to prepare home lessons. All cases of corporal punishment are to be recorded, at the time the punishment is inflicted, in the Punishment Book supplied to all schools by the Department.

### 18. Home Lessons :-

(a.) No home lessons or written exercises of any kind shall be given to children attending Infants'

Schools or First Classes in other schools.

Children in the Second Class shall have no written exercises of any kind; but they may be required to prepare lessons on Reading, Spelling, or Tables, provided such work take up not more

than half-an-hour each evening.

(c.) Children in the Third Class may be given home lessons four evenings in the week, the subjects being left to the discretion of the Teacher; but each night's lessons must not take more than one hour to complete.

(d.) In the case of Fourth and Fifth Classes it is left to the discretion of the Teacher to give such

home lessons as he may consider necessary.

19. Pupils shall not be detained in School for study or for punishment during any part of the

19. Pupils shall not be detained in School for study or for punishment during any part of the forenoon recess.

20. The Teacher shall make the necessary arrangements for the proper oversight of the playground during recesses. It is competent for the head of a School or of a Department, the staff of which contains more than one Teacher, to so arrange that each half of the staff shall be relieved of playground supervision during an equal portion of the recess for dinner. Principal Teachers and Mistresses of Departments must undertake playground duty equally with the other Teachers.

21. He will construct Programmes of Lessons for classes in his Department taught by Pupilteachers, and will decide upon the suitableness of those framed by Assistant Teachers. His signature is to be attached to these documents in gridence that they have been examined by him and have

is to be attached to these documents, in evidence that they have been examined by him and have

received his approval.

22. He will devote a portion of his time weekly to the instruction of each class in his Department.

23. He will examine each class in his Department at least once a month, and will record the results, note the defects, and enter suggestions for their remedy in a book kept for the purpose. Such entries should be signed by himself and the Teacher of the class.

24. He will be responsible for the progress of all children in his Department, and for the condition of the Department in all other matters, excepting those points of organization for which he cannot responsibly be held accountable.

reasonably be held accountable.

tion of the Department in all other matters, excepting those points of organization for which he cannot reasonably be held accountable.

25. He will devote at least one hour daily to the instruction of Pupil-teachers, and will see that all the prescribed subjects are duly studied by them. Suitable programmes are to be prepared, and a Register is to be kept showing (a) the time of commencing the daily lesson and the time at which it was concluded, (b) the exercise or home-lesson appointed for the day. It must be clearly understood that Mistresses of Departments are to perform a fair share of the work of instructing Pupil-teachers.

26. He will be responsible for posting Quarterly Returns on the last Saturday preceding the Midwinter and Christmas vacations; and, in other cases, on the last Saturday of the months of March and September. In country places, where no post leaves on Saturday or the preceding Friday evening, the Returns must be sent, without fail, by the first subsequent opportunity.

27. In making application for increased assistance, he will give attention to the following Rules, by which the numerical strength of Teaching Staffs is regulated.

In a mixed school, or in a separate Boys' or Girls' Department, having an average attendance of—50 pupils, the staff may consist of Teacher and Pupil-teachers.

10 to 140 pupils, the staff may consist of Teacher and 2 Pupil-teachers.

110 to 140 pupils, the staff may consist of Teacher, Assistant, and Pupil-teachers.

120 to 270 pupils, the staff may consist of Teacher, Assistant, and 2 Pupil-teachers.

270 to 310 pupils, the staff may consist of Teacher, 2 Assistants, and 2 Pupil-teachers.

310 to 350 pupils, the staff may consist of Teacher, 2 Assistants, and 4 Pupil-teachers.

310 to 400 pupils, the staff may consist of Teacher, 3 Assistants, and 4 Pupil-teachers.

450 to 400 pupils, the staff may consist of Teacher, 3 Assistants, and 6 Pupil-teachers.

450 to 500 pupils, the staff may consist of Teacher, 3 Assistants, and 6 Pupil-teachers.

1 to very separ

450 to 500 pupils, the staff may consist of Teacher, 3 Assistants, and 6 Pupil-teachers. every separate Infants' Department having an average attendance of—60 pupils, the staff may consist of Teacher and a Pupil-teacher.
100 to 120 pupils, the staff may consist of Teacher and 2 Pupil-teachers.
120 to 160 pupils, the staff may consist of Teacher, Assistant, and Pupil-teacher.
160 to 200 pupils, the staff may consist of Teacher, Assistant, and 2 Pupil-teachers.
200 to 240 pupils, the staff may consist of Teacher, Assistant, and 3 Pupil-teachers.
240 to 300 pupils, the staff may consist of Teacher, 2 Assistants, and 3 Pupil-teachers.
300 to 340 pupils, the staff may consist of Teacher, 2 Assistants, and 4 Pupil-teachers.
340 to 380 pupils, the staff may consist of Teacher, 2 Assistants, and 5 Pupil-teachers.
380 to 440 pupils, the staff may consist of Teacher, 3 Assistants, and 5 Pupil-teachers.
440 to 480 pupils, the staff may consist of Teacher, 3 Assistants, and 6 Pupil-teachers.
480 to 550 pupils, the staff may consist of Teacher, 3 Assistants, and 7 Pupil-teachers.

28. Principal Teachers and Mistresses of Departments, respectively, are empowered to grant leave of absence to Assistants and Pupil-teachers employed under their supervision for a period not exceeding one day, subject to the conditions stated in paragraph 3 of the Rules regulating leave of absence. It must, however, be distinctly understood that such leave of absence can only be granted in cases where the necessity for it is clearly shown. In forwarding applications for leave of absence for more than one day, the Principal Teacher or Mistress of a Department, will state thereon the arrangements proposed for the performance of the duties of those applying; will express an opinion as to whether such arrangements are satisfactory; and will state what previous leave has been granted, and on what terms, during the past twelve months. Applications for sick leave for three or more days should be accompanied by medical certificates.

29. All correspondence and returns (except those relating to fees) should be sent to the Inspector under whose immediate supervision the school is placed. Salary abstracts should be sent direct to the

Accountant.

30. Teachers of all ranks are required to abstain from participation in any public meetings or other gatherings on party, political, or sectarian topics, and generally to refrain from all action in such matters calculated to give offence to any section of the community or to impair their own usefulness as teachers; they must also abstain from public controversy upon the merits of the system of education now in force, and from acting as local preachers, lay readers, or local correspondents of newspapers.

31. It is incumbent on teachers to attend to directions given them by Inspectors, and all departmental orders issued to them must be strictly observed. Should a Teacher at any time feel aggrieved, he may appeal to the Minister for redress, but such appeal must be made in a proper and respectful manner. Pending an appeal, no Teacher will be justified in disobeying orders, nor in the course of an appeal shall he knowingly make unfounded charges or improperly introduce subjects foreign to the matter of appeal.

32. No Sectarian or denominational publications of any kind whatsoever shall be used in school, nor shall any denominational or sectarian doctrines be inculcated.

33. It shall be the duty of all Teachers to impress on the minds of their pupils the principles of morality, truth, justice, and patriotism; to teach them to avoid idleness, profanity, and falsehood; to instruct them in the principles of a free Government; and to train them up to a true comprehension of the rights, duties, and dignity of citizenship.

## APPENDIX A.

Subjects of Examination for Teachers and Pupil-teachers.

```
FOR A THIRD-CLASS CERTIFICATE.
```

Reading—Full value, 800 marks. Prose and Poetry.

Writing and Dictation—Full value, 1,000 marks. Specimens of Copy-setting in round hand, half-text, and small hand

and small hand.

Arithmetic—Full value, 1,000 marks. Simple and Compound Rules, Reduction, Proportion, Practice, Simple and Compound Interest, Vulgar and Decimal Fractions.

Text Books—Barnard Smith's Arithmetic, or Hamblin Smith's Arithmetic.

Grammar—Full value, 1,000 marks. Including Accidence, Parsing, Analysis of Sentences, Meanings and Applications of Words, Saxon and Latin Prefixes and Affixes, and Composition.

Text Books—Lennie's Grammar and Laurie's Composition. For special study—the Text-book prescribed for the Junior University Examination of the current year.

Geography—Full value, 800 marks. Europe and Australia in detail. Mapping in connection with those Continents.

those Continents.

Text Books—Hughes' Class Book of Geography.

Geography of New South Wales (Wilkins').

Full value, 600 marks. Outlines of British History from the Conquest to the reign of Victoria inclusive; date of Accession of each Sovereign; leading Men; and most important events. General sketch of Australian History.

Text Books—Nelson's Royal History of England.

History of Australia.

School Management—Full value, 800 marks. Organization, Discipline, and Instruction of Schools—in outline.

in outline

Text Books-Gladman's School Method.

Public Instruction Act and Regulations.

(Female Teachers only)—Full value, 500 marks. Plain Needlework, Food, Clothing,

Domestic Economy—(Female Teachers only)—Full value, 500 marks. Fram I Household Management.

Text Book—Hassell's Domestic Economy.

Drawing—Full value, 500 marks. Black-board, Freehand.

Text Books—As prescribed in the Standard of Proficiency.

Vocal Music—Full value, 500 marks. Rudiments of Music, either notation.

Text Books—Curwen's Standard Course to Step IV inclusive, or Stimpson's Singing Class Book Stimpson's Singing Class Book.

## FOR A SECOND-CLASS CERTIFICATE.

Reading—Full value, 500 marks. Prose and Poetry.
 Writing—Full value, 500 marks. Specimens of Copy-lines, Ornamental Writing.
 Arithmetic—Full value, 1,000 marks. The full Course, with Elementary Mensuration.
 Text Books—Barnard Smith's Arithmetic.

Hamblin Smith's Arithmetic.

Hamblin Smith's Arithmetic.

Todhunter's Mensuration (for Males), Chaps. I to XVII, omitting Chap. VI.

Grammar—Full value, 1,000 marks. Including Accidence, Parsing, Derivations, Meaning and uses of Words, Composition, and Analysis.

Text Books—Hunter's Grammar.

Milleiches, Rock of Fuelish

Meiklejohn's Book of English.

Subject for Special Study—Same as that prescribed for the Senior University Examination of the current year.

Full value, 800 marks. Physical Geography.

Europe, Australasia, and North America, in detail.

Geography-

Mapping within these limits.

Text Books—W. Hughes' Class Book of Geography, and
W. Hughes' Physical Geography, or
Geikie's Physical Geography.

—Full value, 600 marks. British History, from the Conquest to the present times.

Text Books—Ransones's Short History of England.

Australian History.

Australian History.

Australian History.

British Literature—Full value, 600 marks.

Smith's Smaller History of English Literature.

1894—Chapters I to VIII inclusive.

1895— "IX to XIII",

1896— "XIV to XIX",

1897— "XX to XXVII",

and so on in cycles of four years.

Also, Smith's Specimens of English Literature for corresponding periods each year.

Art of Teaching-Full value, 1,000 marks. Organization, Discipline, Method, and Instruction of Schools in greater detail.

Text Books-

-Gladman's School Work.

Text Books—Gladman's School Work.

Public Instruction Act and Regulations.

Sanitary Science (Female Teachers only)—Full value, 500 marks.

Text Book—Wilson's Healthy Life and Healthy Dwellings.

Drawing—Full value, 500 marks. Geometrical and Model Drawing.

Text Books—Nesbit and Brown's Handbook of Model and Object Drawing.

Partle's Practical Plana Geometry.

Rawle's Practical Plane Geometry.

Rawle's Practical Plane Geometry.

Susic—Full value, 500 marks. Rudiments of Music, either notation, with increased proficiency.

Text Books—Curwen's Standard Course to Step VI inclusive, or

Dunstan's Teacher's Manual of Music.

Köhler's Elements of Music. Vocal Music-

Stainer's Rudiments of Harmony, Chaps. I to IV.

# * Alternative Groups for Males.

Group I.

Euclid—Full value, 1,000 marks. First three Books of Euclid's Elements, with Deductions.
 Algebra—Full value, 1,000 marks. To Quadratic Equations, including Surds.
 Text Books—Hamblin Smith's Algebra.
 Todhunter's Euclid.

Group

^{*} Note.—These groups of subjects are styled Alternative, because candidates are allowed to choose from them the Group in which they wish to be examined. Candidates are required to confine themselves to one group.

## Group II.

Latin-Full value, 2,000 marks. Grammar, Composition. Casar: De Bello Gallico, Books I to IV

inclusive.

Text Books—Dr. Smith's Smaller Latin Grammar.

Exercise 40. Arnold's Composition (Bradley) to

Group III.

Euclid-700 marks. Books I and II, with deductions. Algebra-700 marks. To Quadratics, without Surds.

Science-600 marks. Any one mentioned in Group IV for Females.

* Alternative Groups for Females.

## Group I.

French—Full value, 2,000 marks. Grammar, Composition. Translation from an easy author.

Text Books—(For translation.) Book prescribed for Junior University of current year.

Havet's French Class Book (complete), or

Halland's French Classical Computer. Hallard's French Grammar.

## Group II.

Latin—Full value, 2,000 marks. Grammar, Composition. Cæsar, De Bello Gallico, Books I, II. Text Books—As for Males.

## Group III.

Euclid—Full value, 1,000 marks. Books I and II, with easy Deductions from them.

Text Books—As for Males.

Algebra—Full value, 1,000 marks. To Quadratics, omitting Surds.

Text Books—As for Males.

Group IV.

Any two of the following Sciences:-

Experimental Physics—Full value, 1,000 marks.

Text Book—Balfour Stewart's Lessons on Elementary Physics.

Chemistry—Full value, 1,000 marks. Inorganic.

Text Book—Roscoe's Lessons in Elementary Chemistry.

Geology—Full value, 1,000 marks.

Text Book—Geikie's Class Book of Geology.

Wilkinson's Notes on the Geology of New South Wales.

Botany—Full value, 1,000 marks.

Wilkinson's Notes on the Geology of New So Botany—Full value, 1,000 marks.

Text Book—Oliver's Lessons in Elementary Botany.

Fhysiology—Full value, 1,000 marks.

Text Book—Huxley's Lessons in Elementary Physiology.

## FOR A FIRST-CLASS CERTIFICATE

Reading-Full value, 500 marks. Prose and Poetry from a standard author.

Writing-Full value, 500 marks. Specimens of Copy-setting and Letter-writing, Ornamental Printing.

Arithmetic—Full value, 900 marks. The whole theory and practice.

Text Books—Hamblin Smith's Arithmetic.

Colenso's Arithmetic (as revised by Hunter). Todhunter's Mensuration (for Males only). Chaps. 1 to 32.

Grammar-Full value, 900 marks. Including Accidence, Parsing, Analysis, Composition, Prosody, and Derivations.

Text Books—Mason's English Grammar.

Meiklejohn's English Language.

Geography—Full value, 800 marks. Physical Geography.

Astronomical Geography. Map Drawing.

Text Books—Geikie's Physical Geography.

Lockyer's Astronomy. Derivations.

Art of Teaching—Full value, 900 marks. Organization, Method, Discipline, with a knowledge of the Constitution of the Human Mind.

Text Books—Bain's Education as a Science.

Morell's Mental Philosophy.

Public Instruction Act and Regulations.

-(Female Teachers only)-Full value, 500 marks. Sanitary Science-

Text Book-Wilson's Healthy Life and Healthy Dwellings.

Drawing—Full value, 500 marks. To complete the full D Certificate.

Text Book—Dennis' Perspective.

Vocal Music—Full value, 500 marks. Rudiments of Music and Elements of Harmony, either notation.

Text Books—Curwen's Standard Course, or same as for Class II, with Stainer's Rudiments of Harmony, Chapters 1 to 8.

History—Full value, 700 marks. History of England in detail. History of Australia.

Text Books—Smith's Student's Hume. (Brewer.)

Creasy on the English Constitution. Chapters 10, 11, 15, 16.

History of Australia.

History of Australia.
English Literature—Full value, 800 marks.

Morley's English Literature.

I to V inclusive.
VI and VII.
VIII to X inclusive. 1894—Chapters

1895---,,

1897---XI and XII,

,, and so on in cycles of four years.

For Special Study—Shakespeare's "Hamlet."
Milton's "Paradise Lost." Book I.
Addison's Essays, 12 (Clarendon edition), Nos. 3, 15, 25, 61, 105, 106, 135, 159, 165, 409, 458, 487.

Bacon's Essays, 6. Civil and Moral. Blackie's edition.

^{*} Note.—These groups of subjects are styled Alternative, because candidates are allowed to choose from them the Group in which they wish to be examined. Candidates are requested to confine themselves to one group.

# Alternative Groups for Males.

-Full value, 1,000 marks. Including the Binomial Theorem.

Text Books—Colenso's Algebra, as revised by Hunter, or
Hamblin Smith's Algebra.

Full Value, 1,000 marks. Books I to VI, with Deductions

* Text Books—Mackay's Euclid, or Todhunter's Euclid.

Plane Trigonometry—Full value, 1,000 marks.

Text Book—Todhunter's Trigonometry for Schools and Colleges.

# * Group II.

Latin—Full value, 2,000 marks. Virgil, first two Books of Æneid; Livy, Book 21. Horace's Odes, Books I, II. Questions on Grammar. Composition.

Text Books—Dr. Smith's Larger Latin Grammar.

Abbott's Latin Prose through English Idiom.

Arnold's Latin Prose Composition. (Bradley.)

Arnold's Latin Prose Composition. (Bradley.)

Greek—Full Value, 1,000 marks.

Text Books—Xenophon's "Memorabilia." Books I and II.

Smith's Smaller Greek Grammar.

Abbott's Greek Prose Composition.

French—Full value, 1,000 marks. Grammar, Translation, Composition.

Text Books—Subjects as for Senior University Examination of the current year.

Havet's French Grammar.

Hallard's French Grammar.

German—Full value, 1,000 marks. Grammar, Translation, Composition.

Text Books—Subjects as for Senior University Examination of the current year.

Otto's German Grammar.

Otto's German Grammar.

## †Group III.

Physics-Full value, 750 marks

-Full value, 750 marks.

Text Book—Ganot's Physics.

y-Full value, 750 marks. Inorganic.

Text Book—Roscoe's Class Book of Elementary Chemistry (Macmillan).

-Full value, 750 marks.

Text Book—Jukes' or Geikie's Geology.

-Full value, 750 marks.

Text Book—Oliver's Lessons in Elementary Botany.

yw.—Full value, 750 marks.

Geology.

Text Book—Oliver's Lessons in Elementary Bounds.

Physiology—Full value, 750 marks.

Text Book—Huxley's Elementary Lessons in Physiology.

Sanilary Science—Full value, 750 marks.

Text Book—Wilson's Handbook of Hygiene.

# Group IV.

Euclid—Full value, 1,000 marks. Books, I to VI, with Deductions.

Text Books—As in Group I.

Algebra—Full value, 1,000 marks. Inclusive of the Binomial Theorem.

Text Books—As in Group I.

Latin—Full value, 1,000 marks. Cæsar, De Bello Gallico. First two books.

Virgil's Æneid. Book I.

Text Books—As in Group II.

Group V.

Euclid—Full value, 1,000 marks. Books I to VI, with Deductions.

Text Books—As in Group I.

Algebra—Full value, 1,000 marks. Inclusive of the Binomial Theorem.

Text Books—As in Group I.

And any two Sciences of the Science Group already specified in Group III. Full value, 1,000 marks.

## Group VI.

Latin—Full value, 2,000 marks. Virgil's Æneid. Books I, II.
Livy. Book XXI.
Horace's Odes. Books I, II.
Grammar and Composition.
Text Books—As in Group II.
Together with any two of the Sciences in Court III.

Together with any two of the Sciences in Group III.

Full value, 1,000 marks.

Text Books—As in Group III.

# Alternative Groups for Females.

## Group I.

French—Full value, 2,000 marks. Grammar, Translation, Composition.

Text Books—Subjects as for the Senior University Examination of the current year.

Havet's French Grammar.

Hallard's French Grammar.

# Group II.

German—Full value, 2,000 marks. Grammar, Translation, Composition.

Text Books—As for Males.

Group III.

Latin—Full value, 2,000 marks. Grammar, Translation, Composition. Text Books—As for Males.

Group IV.

Euclid—Full value, 1,000 marks. Books I to IV, with Deductions.

Text Books—As for Males.
—Full value, 1,000 marks. To Quadratic Equations including Surds.
Text Books—As for Males. Algebra-

Group

^{*} Note.—In this group at least two languages must be taken, one of them being Latin.
† Any four of these Sciences may be taken.

## Group V.

Any two of the following Sciences:

Experimental Physics—Full value, 1,000 marks.
Chemistry—Full value, 1,000 marks.
Geology—Full value, 1,000 marks.
Botany—Full value, 1,000 marks.
Physiology—Full value, 1,000 marks.
Text Books—As for Males of First Class.

Note 1. In lieu of the Alternative Subjects of examination herein prescribed for a Second-class or a First-class Certificate, the subjects of the Sydney University Arts' Course (as set forth in the By-laws and annually published in the Calendar) shall be taken up in the Training Schools by those students who have passed the University Matriculation Examination and who may desire to compete, in subsequent University examinations, for the special privilege of remaining a third year in Training and proceeding to the final examination for the Bachelor of Arts degree.

Norn 2. Graduates of any recognised British or Colonial University of not more than five years standing may be exempted from examination in the Alternative Groups for Class I or Class II.

Norn 3. Any Teacher who can show, to the satisfaction of the Minister, that he is unable to take Music or Drawing, may substitute for each or either of these any one of the Sciences specified in Group IV, Class II.

Norn 4. Certificates issued to Teachers and Pupil Teachers by the Technical Education Branch in the undermentioned subjects, will exempt the holders from further examination in such subjects:

Physics, Chemistry, Geology, Botany, Physiology.

Freehand Drawing (first year)—any grade—for applicants for employment as Pupil Teachers.

Freehand Drawing (first year)—any grade for Teachers and Pupil Teachers.

Model Drawing (first year)—any grade; Perspective Drawing (first year)—any grade—Section 1.

Geometrical Drawing (first year)—any grade.

## SUBJECTS OF STUDY FOR PUPIL-TEACHERS.

## Before Appointment—Candidates.

Reading-Full value, 100 marks. ding—Full value, 100 marks. To read an advanced Class Book, sanctioned by the Minister, with ease, fluency, and expression, to spell well, and to understand the meaning of the passage read.

Specimens of penmanship, not less than two lines, in round and small hand.

Dictation—Full value, 100 marks. As for a Fourth Class.

Arithmetic—Full value, 100 marks. To know the Arithmetical Tables, and to work the rules in Vulgar

Fractions, Proportion, and Practice.

Grammar—Full value, 100 marks. To Parse and Analyse correctly a passage taken from an ordinary Class-book; to know the Elements of Grammar, including Prefixes, Affixes, and Common Roots.

Geography—Full value, 100 marks. To understand the Geographical Terms, to have a general knowledge of the Map of the World, and the Outlines of the Geography of Australia.

Drawing—Full value, 50 marks. Freehand Tests, as prescribed for a Third Class in the Standard of

Proficiency.

Proficiency.

Vocal Music—Full value, 50 marks. As prescribed for a Third Class in the Standard of Proficiency.

Skill in Teaching—To Teach a Junior Class in the presence of an Inspector.

## Pupil-teachers-Class IV

Reading—Full value, 100 marks. To read the Fifth Reading Book, sanctioned by the Minister, with fluency and expression, give synonymous words and phrases, and answer upon the subject matter; to repeat from memory 50 lines of Poetry.

Writing—Full value, 100 marks. Specimens of copy-setting.

Dictation—Full value, 100 marks. Coutie's Word Expositor, to page 41.

Arithmetic—Full value, 100 marks. To work questions in Proportion, Vulgar and Decimal Fractions,

and Practice.

Text Book—Barnard Smith's Arithmetic.

Grammar—Full value, 100 marks. Accidence, Parsing, Analysis, Derivations, and Composition.

Text Book—Lennie's Grammar (revised).

Special Text Book—Same as prescribed for Junior Examination of current year.

Geography—Full value, 80 marks. Cycle of Study for Pupil-teachers of all classes. Outlines of each continent together with—

continent, together with—

1890—Africa and South America, in detail. Physical Geography, Chaps. I to VI.

1891—Asia and North America, " " Chaps. VII and VIII.

1891—Asia and Polynesia. " " Chaps. IX to XI. 1891—Asia and North America, 1892—Australia and Polynesia, 1893—Europe, Chaps. XII to end. ,, and so on in cycles of four years.

Note.—One question at least may be given on the Geography of New South Wales in each year, and Mapping within the limits of each year's study.

Text Books—Wilkins' Geography of New South Wales.

W. Hughes' Class Book of Geography.

W. Hughes' Physical Geography.

W. Hughes' Physical Geography.

History—Full value, 70 marks. Pupil-teachers of all classes will be expected to have a knowledge of the order and date of Accession of each Sovereign, and of the chief events of each Reign.

Cycle of Special Study for Pupil-teachers of all classes:—

1890—George I to present time. Australian History from 1859 to present date.

1891—Commencement of Book to Stephen (1154). Australian History to 1808.

1892—Henry II to Elizabeth (1603). Australian History to 1851.

1893—James I to Anne (1714).

And so on in cycles of four years.

And so on in cycles of four years.

Text Books—Nelson's Royal History of England.

Australian History.

Drawing—Full value, 50 marks. Blackboard Practice.

Vocal Music—Full value, 50 marks. Stimpson's Singing Class Book, Chaps. I to VIII.

Geometry (for Males)—Full value, 100 marks. Euclid. Book I. Props. I to XXVI.

Text Book—Todhunter's Euclid.

Algebra (for Males)—Full value, 100 marks. Hamblin Smith's Algebra. Chaps. I to V inclusive.

Latin (for Males)—Full value, 100 marks. Wia Latina, to Exercise XXV inclusive.

**French* (for Females)—Full value, 100 marks. Macmillan's French Course, First Year.

School Management—Full value, 50 marks. The Kindergarten Principle. Gladman's School Method.

Laurie's Kindergarten Manual.

Needlework (for Females)—Full value, 50 marks. I. In Paper, cut out and tack drawers, chemise, and pinafore. 2. A Sampler, showing the various stitches in needlework as done by pupils in Classes 1, 2, and 3.

Latin, or Euclid and As for Males.

^{*} From female pupil-teachers in country districts the following will be accepted in lieu of French, where it can be shown that the examinee has had no means of acquiring a knowledge of the language in question:—

## Pupil-teachers-Class III.

Reading—Full value, 100 marks. To read with improved intonation and expression.

Writing—Full value, 100 marks. Specimens of Penmanship; three hands.

Dictation—Full value, 100 marks. Coutie's Word Expositor to page 81.

Arithmetic—Full value, 100 marks. Compound Interest, Profit and Loss, and Square Root—as in

Barnard Smith's Arithmetic.

Barnard Smith's Arithmetic.

Grammar—Full value, 100 marks. Accidence, Parsing, Analysis, Derivations, Composition.

Text Books—Lennie's Grammar (revised), and Text Book for Junior Examination of current year.

Geography—Full value, 80 marks. See Cycle in Class IV.

Text Books—As for Class IV.

History—Full value, 70 marks. English History. Australian History. See Cycle for Class IV.

Text Books—Nelson's Royal History of England.

History of Australia

Text Books—Nelson's Royal History of England.

History of Australia.

Drawing—Full value, 50 marks. Freehand Drawing.

Vocal Music—Full value, 50 marks. Stimpson's Singing Class Book, Chaps. IX to XII inclusive.

Geometry—Full value, 100 marks. Euclid. Book I. With easy deductions from Book I.

Algebra—Full value—100 marks. Fractions and Simple Equations, to Chap. XIV inclusive (H. Smith).

Latin—Full value, 100 marks. Via Latina to Exercise 48; Appendix II, pages 200 to 205; Appendix V, page 226.

*French (for Females)—Full value, 150 marks. Macmillan's French Course, Second Year. Exercises pages 77-103. Grammar, pages 1-19. Macmillan's First French Reader, pages 1-17.

School Management—Full value, 50 marks. Gladman's School Method. The Kindergarten. Laurie's Kindergarten Manual.

Kindergarten Manual.

Needlework (for Females). Full value, 50 marks. 1. A small shirt or dress. 2. A sampler, showing all the stitches required from pupils in Classes 4 and 5.

## Pupil-teachers-Class II.

Reading—Full value, 50 marks. A standard author, with correct intonation and emphasis.

Writing—Full value, 50 marks. Specimens of Penmanship; three hands, with increased skill.

Arithmetic—Full value, 100 marks. Cube Root, Discount, Stocks, Proportional Parts—as in Barnard Smith's Arithmetic, or Hamblin Smith's Arithmetic.

Grammar—Full value, 100 marks. Accidence, Parsing, Analysis, Derivations, Composition.

Text Books—Lennic's Grammar and Special Text-book as for Junior Examination of current year.

Geography—Full value, 80 marks. See Cycle for Class IV.

History—Full value, 70 marks. English History and Australian History: see cycle for Class IV.

Drawing—Full value, 50 marks. Model Drawing.

Vocal Music—Full value, 50 marks. Stimpson's Class Book, Chaps. XIII to XV-inclusive.

Geometry—Full value, 100 marks. Books I and II, with deductions from Book I.

Algebra—Full value, 100 marks. Via Latina to Exercise 72; appendix II, pages 206-210; appendix V, page 227.

**page 227.

**French (for Females)—Full value, 150 marks. Macmillan's French Course, Second Year. Grammar, pages 1 to 38. Exercises, pages 104-140. Macmillan's First French Reader, pages 1-43.

**School Management—Full value, 50 marks. Gladman's School Method. The Kindergarten Principle (Laurie's Kindergarten Manual).

**New Journel (for Females) Full related to Exercise 72; appendix 11, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 206-210; appendix 7, pages 2

Needlework (for Females)—Full value, 50 marks. 1. Cut out young child's dress in paper, and tack.

2. A patch in calico, print and flanuel.

3. A sampler as for last year, but showing greater skill.

## Pupil-teachers-Class I.

Reading—Full value, 50 marks. To read with ease and expression from a standard author.

Writing—Full value, 50 marks. Specimen of Penmanship; three hands, with increased skill.

Arithmetic—Full value, 100 marks. Application of Rules and Principles. Mensuration of Surfaces.

Text Books—Barnard Smith's Arithmetic.

Text Books—Barnard Smith's Arithmetic.
Todhunter's Mensuration. Chapters 7 to 17 inclusive.

Grammar—Full value, 100 marks. Accidence, Parsing, Analysis, Derivations, Composition.
Text Book—Lennie's Grammar, and Special Text-book for Junior Examination of current year.

Geography—Full value, 80 marks. See Cycle in Class IV.

History—Full value, 70 marks. English History, and Australian History. See Cycle for Class IV.

Drawing—Full value, 50 marks. Advanced proficiency expected in the three sections.

Vocal Music—Full value, 50 marks. Stimpson's Class Book, Chap. XVI to end.

Geometry—Full value, 100 marks. Books I, II, and III, with deductions from Book I.

Algebra—Full value, 100 marks. Quadratic Equations, with Surds, to Chap. XXVI, inclusive, omitting Chapter XXII.

Chapter XXII.

Latin—Full value, 100 marks. Quadratic Equations, with Surds, to Chap. XXVI, inclusive, omitting Chapter XXII.

Latin—Full value, 100 marks. Via Latina, to exercise 93; Appendices II and V. Easy translations. Cæsar, De Bello Gallico. (Chaps. I to III).

*French (for Females)—Full value, 150 marks. Macmillan's French Course, Second Year. Macmillan's First French Reader, pages 1-73.

School Management—Full value, 50 marks. Gladman's School Method. The Kindergarten Principle (Lauvie's Kindergarten Manuel)

(Laurie's Kindergarten Manual).

Needlework (for Fomales)—Full value, 50 marks. 1. A young child's dress, showing gathering and stroking, ornamented with various stitches as shown in former samplers; tucks to be run, frill-whipped and hem-stitched to be used as a trimming. Also cut out any garment required as in former classes. 2. A six-inch sampler done in coloured silk with threads drawn showing all the various stitches used in needlework.

NOTE 1.—The course herein prescribed is for all pupil-teachers alike. It is recommended, however, that the Sydney University Matriculation subjects (as set forth in the by-laws and annually published in the Calendar) be also studied by those pupil-teachers who may desire or intend, after admission to the Training School, to present themselves at the Matriculation examination and to compete, in subsequent University examinations, for the privilege of remaining three years in training and proceeding to the final examination for the Bachelor of Arts degree.

NOTE 2.—Any pupil-teacher who may have passed the Junior or the Senior University examination in Euclid, Algebra, Latin, or French may be exempted from further examination in such subject or subjects in Classes IV, III, and II.

NOTE 3.—Drawing must be taken by all candidates for scholarships, even though the standard has been previously satisfied.

NOTE 4 .- See also Note 4, at end of Subjects of Study for Teachers.

^{*} From femal@pupil-teachers in country districts the following will be accepted in licu of French, where it can be shown that the examinee has had no means of acquiring a knowledge of the language in question:—

## APPENDIX B.

Course of Secular Instruction.

## INFANTS' DEPARTMENT.

(Course, 2 years.)

Course, 2 years.)

Reading—Primer and Reader I—"Australian School Series."

Writing—On slates, from copies and dictation.

Arithmetic—Notation to four places, and Simple Addition on slates; easy mental operations in Addition and Subtraction, and the Multiplication Tables to "7 times."

Object Lessons—Familiar Objects, Domestic Animals, Common Vegetables, Common Materials.

Form—Lines and Angles, Three and Four-sided Figures, Curved-line and other Plain Figures.

Colour—Primary, Secondary, and Tertiary Colours; Combination, Shades and Tints.

Singing—Simple Melodies by Ear.

Scripture—Narratives and Moral Lessons.

Drill—Inspection Drill, Free Exercises, Gallery Exercises, Marking Time.

Drawing—On Slates, Lines, Angles, Parallels.

# FOR PRIMARY SCHOOLS AND FOR BOYS' AND GIRLS' DEPARTMENTS.

First Class.

(Course, 11 year.)

Reading—Primers, and Reader I—A. S. Series; or, I.N.B. Series as far as Book II, Section III, Lesson 8. Writing—On slates from copy. Dictation—From Lessons read.

Arithmetic— As in Infants' Department. Singing-

Scripture—Narratives and Moral Lessons; Old Testament, No. 1.

Object Lessons As in Infants' Department. Drawing-

Needlework—Hem, top-sew, make holland or calico work-apron or sachet. Name to be marked.

Second Class.

(Course, 1 year.)

Reading-Reader II, A.S. Series, or I.N.B. Series, Book II, with Sequel I.

Reading—Reader II, A.S. Series, or I.N.B. Series, Book II, with Sequel I.

Writing—On slates from copy; in copy-books.

Dictation—From Lessons read.

Arithmetic—Notation; Simple Rules; Mental Arithmetic—Simple Rules; Tables—Money.

Object Lessons—Domestic Animals, Common Objects, and Materials, Common Animals, and Vegetables.

Singing—Simple Melodies by Ear; Scale Exercises, Two and Three Pulse Measures.

Scripture—I.N.B., Old Testament No. I; Moral Lessons.

Drawing—Freehand, on Slates; Simple Right-lined and Curved Figures.

Drill (for Boys)—"Infantry Drill for 1889"; Squad Drill with Intervals; Sections 1, 2, 3, 4, 5, 6, 25, 26; Marching, 12, 13, 15, 16, 17, 18, 19, 31, 32, 37, and 50; Physical Training, Sect. V, Exercises, 1, 2, 3, 4.

Drill (for Girls)—Dressing with Intervals: Turnings by Numbers: Free Exercises and Rody Elevions

Drill (for Girls)—Dressing with Intervals; Turnings by Numbers; Free Exercises and Body Flexions (six exercises); Marching in Single Rank.

Needlework—Hemming, top sewing, feather stitch, satin stitch; a pinafore, pillow-slip, &c.; seams top-sewed and felled-finished with tapes.

Third Class.

(Course, 2 years.)

Reading—Readers III and IV, A. S. Series; or, I.N.B. Series, Books III and IV; Synonyms, Meanings, Derivations; Repetition of Poetry, 130 lines.

Derivations; Repetition of Poetry, 130 lines.

Writing—In copy-books.

Dictation—From the Reading Lessons, with correct spelling and punctuation.

Arithmetic—Compound Rules and Reduction; Simple and Compound Proportion. Mental Arithmetic—Prices of Dozens and Scores, Exercises in Buying and Selling Transactions, and in Proportion.

Grammar—All the Parts of Speech; Accidence, Parsing and Analysis of Simple Sentences; the Rules of Syntax; Composition—Letter-writing, description of places and events.

Geography—School Locality, Cardinal Points, Definitions, Map of World; Outlines of the Geography of Australasia and Polynesia; Physical Geography, and Towns of New South Wales and Europe;

Mapping

Mapping.
Object Lessons

Mapping.

Object Lessons—Animal and Plant Life, with Special Reference to Agriculture; the Human Frame and Laws of Health; Elementary Physiology; Important Manufactures.

History—Nelson's Brief History of England; History of Australia; Outlines of English History.

Singing—Part-singing; Notation, Pitch, Accent, Length of Sound; Double, Triple, and Quadruple Measures; Time Signatures; Scale, &c.

Drawing—On Paper; Freehand Exercises from Models and Common Schoolroom Objects; Geometrical Figures, with Rulers and in Freehand.

Scripture—I.N.B. Old Testament No. 1; New Testament No. 1.

Needlework—Plain under-garments, stitching, herring-boning, eyelet and button holes, felling, running, darning, &c.; sampler showing various stitches used in needlework.

Drill (for boys)—"Infantry Drill for 1889"; Physical Training, section V, Exercises 5, 6, 7; Squad drill—Sections 8, 10, 11, 20, 21, 22, and 37 to 50.

Drill (for girls)—File Marching; Wheeling in File; Marking Time; Changing Step; Free Exercises while Marching and Marking Time.

Fourth Class.

Fourth Class.

(Course, 1 year.)

Reading—Reader V to Lesson 56, A.S. Series; or I.N.B. Fourth Supplement, to page 155. Repetition of Poetry—100 lines.

of Poetry—100 lines.

Writing—In copy-books.

Dictation—From any portion of books read, with punctuation.

Arithmetic—Practice; Vulgar and Decimal Fractions; Interest; Discount, Profit and Loss; Mensuration of Surfaces; Mental Arithmetic.

Grammar—Accidence; Parsing and Analysis generally; framing Sentences; simple Essays.

Geography—Physical features and Chief Towns of Asia and America; Mapping.

Object Lessons—As in Third Class (advanced), with the Chemical and Physical principles involved in Agriculture; Health; Elementary Physical Science.

History-Nelson's History of England for Junior Classes, Henry VII to Victoria; History of Australia.

Also Work of Class III.

Singing—As in Third Class; Sharps, Flats, Transition, Staff Notation, Key and Time; Signatures and Intervals fully; Three Part Songs; Easy Passages at Sight.

Drawing—Freehand Drawing, from copies of common objects, which should be enlarged or reduced from the example; Drawing Plans and Elevations of Plane Figures and Rectangular Solids, in simple positions; Drawing Geometrical Figures with Instruments; Drawing to Scale in a limited manner. manner.

manner.

Scripture—I.N.B. Whole Series.

Euclid—Book I, to Proposition XII.

Drill (for boys)—"Infantry Drill for 1889"; Company Drill; Formation and Movements—Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 20, 22.

Drill (for girls)—Marching in line; Balance Step, with and without advancing; Body and Limb Flexions; Pole Exercises; Dumb Bells (\frac{1}{2}\text{ ib.}).

Needlework—The Work of the Previous Standards, with advanced skill; Patching in calico, flannel, and print; cutting out garments, and setting work. Ornamental work and knitting to be introduced when standard of plain needlework prescribed for the Third Class has been completed.

## Fifth Class.

(Course, 1 year.)

Reading—As prescribed for University Junior Examination. Writing—As in Fourth Class.

Dictation—On unruled paper, ordinary prose—15 corsecutive lines.

Arithmetic—Full Course, from Hamblin Smith's Manual, or any equivalent. Mensuration—Regular Surfaces and Solids.

Grammar As prescribed for Junior and Senior Public Examinations at the Sydney University.

Natural Science-Physics or Physiology, or one of the Science Subjects prescribed for University Examinations; or

Examinations; or

Cooking: For girls.

Geometry—Euclid, Books I and II, with easy exercises.

Algebra—Hamblin Smith's Algebra to Chapter 13.

Latin (for boys)—Abbott's "Via Latina," to page 53, with the first conjugation and the verb sum.

French (for girls)—Macmillan's Progressive French Course to the end, with Macmillan's "First Reader," to page 28, or an equivalent.

Needlework—As for Fourth Class; child's frock in washing material; cutting out and fixing work; fancy work and knitting at discretion of Work Mistress.

Drill (for boys)—As for Fourth Class.

Drill (for girls)—As for Fourth Class.

Drawing—Similar to Class IV, but of greater difficulty; Drawing from Common Objects and from Casts of Ornaments in Light and Shade; Plans and Elevations of Circular Solids, with sections.

Music—As in Third and Fourth Class.

Note 1.—Where there are pupils in a Fifth Class in third half-year, it is expected that Trigono-

NOTE 1.—Where there are pupils in a Fifth Class in third half-year, it is expected that Trigonometry will be introduced; also Euclid Book III; Algebra to Quadratics.

NOTE 2.—Where there are not as many as ten pupils to form a Fourth Class or a Fifth Class, as required, the Fourth Class and Fifth Class courses are to be taken as additions to the courses of the Third and Fourth Class are required. and Fourth Classes respectively.

## THE STANDARDS OF PROFICIENCY FOR THE SEVERAL CLASSES IN SCHOOLS SHALL BE AS FOLLOW:

## FOR INFANTS' SCHOOLS.

First Half-year of Enrolment.

First Half-year of Enrolment.

Reading—To read Primer, Part I (Australian School Series), to Lesson 20.

Writing—To write on Slates—i, u, n, m, v, r, w.

Arithmetic—To count and read up to 10; to know ball-frame exercises in Addition, and Addition of other Concrete Quantities as far as 10.

Object Lessons—Familiar Objects.

Form—The different kinds of Lines and Angles.

Colour—First (Primary) Colours.

Singing—Simple Melodies by Ear.

Scripture—Narratives and Moral Lessons.

Drill—Inspection Drill for Cleanliness; Free Exercises; Gallery Exercises.

Drawing—On Slates—Lines. Angles, and Parallels.

Drawing-On Slates-Lines, Angles, and Parallels.

## Second Half-year of Enrolment.

Reading—To read Primer, Part I, to the end.

Writing—To Write on Slates all the Letters of the Alphabet, with easy combinations.

Arithmetic—To Count and Read as far as 20; Addition, in single column, to 20; to add and subtract mentally numbers not involving results higher than 20.

Object Lessons—Domestic Animals.

Form—Three and Four Sided Figures. Colour—Secondary Colours. Singing—Simple Melodies by Ear.

Scripture—Narratives and Moral Lessons.

Drill—As for last half-year.

Drawing-As for last half-year.

# Third Half-year of Enrolment.

Reading -- Primer, Part II, to the end.

Reading — Primer, Part II, to the end.
Writing—To Write on Slates from Copies.
Dictation—Words from Lessons Read.
Arithmetic—To Read and Notate as far as 100; Addition to three places—three addends; Mental Arithmetic up to 30; tables to "4 times."
Object Lessons—Common Vegetables.
Form—Curved Line Figures.
Colour—Tertiary Colours.
Singing—Simple Melodies by Ear.
Scripture—Narratives and Moral Lessons.
Drill—As for last half-year.

Drawing—As for last half-year.
Fourth

1009-D

## Fourth Half-year of Enrolment.

Reading—Australian School Series—Reader I, to the end.

Writing—On slates from copies.

Dictation—From lessons read, 8 lines.

Arithmetic—To read and notate up to 1,000; Addition, 4 places, 4 lines; mental operations in Addition and Subtraction; Multiplication Tables to "7 times."

Object Lessons—Common metaviole.

Addition and Subtraction; Multiplication Tables to 7 times.

Object Lessons—Common materials.

Form—Other plain figures.

Colour—Combination; shades and tints.

Singing—Simple melodies by ear.

Drawing—Freehand Drawing on slates—lines, angles, and parallels.

Scripture—Narratives and Moral Lessons.

Drill—As for previous half-years, with marking time—(1) with left foot; (2) with right foot; (3) with left foot and right foot alternately.

Drawing—As for previous half-year.

Drawing-As for previous half-year.

Note.—The enrolment of each pupil in the several classes of an Infants' School must show the time of such pupil in the school and not in the class.

## FOR PRIMARY SCHOOLS AND FOR BOYS' AND GIRLS' DEPARTMENTS.

## FIRST CLASS.

# First Half-year of Enrolment.

Reading—One of the following books, or an authorized equivalent:—
1. Australian School Series: Primer I, to Lesson 40.

1. Australian School Series: Primer I, to Lesson 40.
2. I. N. B.: Book I, to Sec. II, Lesson 12.

Writing—To write on slates, from the blackboard, the following letters, with their combinations, in words of four letters—i, u, n, m, o, a, c, e, v, w, r, t, d, l, b, h, j, f, y, g, p, q.

Arithmetic—To count and read any number as far as 20; to add in single columns numbers not involving a higher result than 20; to notate as far as 20; to add and subtract, mentally, numbers not involving results higher than 20.

Drawing—Freehand Drawing, on slates—lines, angles, and parallels.

Object Lessons—As for Infants' Schools; oral lessons on form and colour, on the properties of common objects and materials, and on common animals and vegetables.

Needlework—Hem 2-inch Strips with coloured cotton.

Simolna—Simple melodies by ear.

Singing—Simple melodies by ear.
Scripture—Narratives (Old Testament No. 1)—Moral Lessons. (First and Second Classes may be taken together.)

Drill-As for Infants' Schools, first half-year.

## Second Half-year of Enrolment.

Reading—1. Australian School Series: Primer II, to the end.

2. I. N. B.: Book I, to the end.

Writing—To write on slates from copies.

Dictation—Words from lessons read.

Arithmetic—To read and notate easy numbers as far as 100; to work sums in Addition—three addends; to add, mentally, numbers involving results not higher than 30; Multiplication Tables to "4 times."

Drawing—As for first half-year.

Object Lessons—As for first half-year.

Needlesyon-Hem and ton-sew together strips with coloured cotton, and plain hems.

Needlework—Hem and top-sew together strips with coloured cotton, and plain hems.

Singing—Simple melodies by ear.

Scripture—Narratives and Moral Lessons; Old Testament, No. 1.

Drill—As for Infants' Schools, first half-year.

## Third Half-year of Enrolment.

Reading-1. Australian School Series: Reader I, to the end. 2. I. N. B.: Book II, to Section III, Lesson 8.

2. I. N. B.: Book II, to Section III, Lesson 8.

Writing—On slates from copies.

Dictation—From lessons read.

Arithmetic—To read and notate numbers as far as 1,000; to work sums in Addition to 4 places, 4 lines; to perform easy mental operations in Addition and Subtraction; Multiplication Tables to "7 times."

Drawing—As for first half-year.

*Object Lessons—As for first half-year.

Singing—Simple melodies by ear.

*Scripture—Narratives and Moral Lessons: Old Testament, No. 1.

Drill—As for Infants' Schools, fourth half-year.

Needlework—Make Work-apron or Sachet with holland or calico. Name to be worked.

## SECOND CLASS.

# First Half-year of Enrolment.

One of the following books, or an authorized equivalent:—
1. Australian School Series: Reader II, to Lesson 50.
2. I.N.B.: Book II, to the end.

Writing—In copy books.

Dictation—Eight lines from lessons read.

Arithmetic—Notation as far as six places, three lines; Subtraction; Multiplication by two digits; Mental Arithmetic; More difficult operations in Addition and Subtraction; Multiplication Tables to "12 times."

"12 times."

Singing—Simple melodies by ear; Easy Exercises on the Modulator.

*Scripture—Old Testament, No. 1.

Drawing—Freehand Drawing on slates, of simple right-lined and curved figures.

*Object Lessons—Properties of common objects and materials, common animals, and vegetables.

Drill (for boys)—"Infantry Drill for 1889"; Squad Drill with intervals; Sections 1, 2, 3, 4,6, 25, 26;

Marching, 12, 13, 15, 16, 17, 18, 19, 31, 32, 37, and 50.

Drill (for girls)—Dressing with intervals; turnings by numbers; free exercises and body flexions (six exercises); marching in single rank.

Needlework—Hem and top-sew a 9-inch sampler of jaconet with coloured cotton, and feather-stitch all round. Initial or name in satin-stitch.

## Second Half-year of Enrolment.

Reading—1. A. S. S.: Reader II, to the end.
2. I. N. B.: Sequel I, to the end.
Writing—In copy-books.
Dictation—Eight lines from lessons read.

Dictation—Eight lines from lessons read.
 Arithmetic—Notation to 9 places, 3 lines; Multiplication in full; Short Division; Mental Arithmetic; Exercises in simple Rules; Tables—Money.
 Singing—Tonic Sol-fa. Notation—Scale Exercises (without accidentals); two and three pulse measures (without subdivision of pulse); simple melodies.
 *Scripture—Old Testament, No. 1; Moral Lessons. (Moral Lessons to be given orally.)
 Drawing—Freehand Drawing on slates, of simple right-lined and curved figures.
 *Object Lessons—As for previous half-year.
 Needlework—Make a plain pillow-slip, pinafore, handkerchief, or similar useful article; seams to be top-sewed and felled-finished with tapes.
 Drill—As for previous half-year; and Physical Training, section 5; Exercises 1, 2, 3, and 4.

## THIRD CLASS.

## First Half-year of Enrolment.

Reading—One of the following books, or an authorized equivalent:

1. Australian School Series: Reader III, to Lesson 20.
2. I.N.B.: Book III, to Lesson 30.

Repetition from memory of twenty lines of poetry.

Writing—In copy books.

Dictation—Eight lines from lessons read.

**Dictation—Eight lines from lessons read.**

**Dictation—Eight lines from lessons read.*

**Arithmetic—Notation, Long Division, Addition, Subtraction, and Multiplication of Money; Mental Arithmetic—Easy Exercises; Tables—Weights and Measures.

**Geography—To know the school locality and the cardinal points; and the names and positions of the Continents, Oceans, and chief divisions of land and water marked on a Map of the World.

**Grammar—To define the noun, pronoun, adjective, and verb, and to distinguish each in easy sentences.*

†*Singing—Tonic Sol-fa Notation: scale exercises; easy time exercises; two, three, and four-pulse measures (pulse, half-pulse, hold marks, and rests); simple two part songs and rounds.

**History—Celtic Period to Henry II; to page 21, Nelson's Brief History of England.*

**Drawing—On paper, from simple rectangular and circular models, and from common objects about the school-room; also simple geometrical figures, to be drawn with rulers and in free-hand.

**Scripture—Old Testament, No. 1; New Testament, No. 1; Moral Lessons.*

**Object Lessons—Lessons on animals and plants, with special reference to agriculture; on the human frame, and laws of health; on elementary physiology; and on important manufactures.

**Drill** (for boys)—"Infantry Drill for 1889"; Physical Training as for Second Class; Squad drill—Sections 8, 10, 11, 20, 21 and 22.

**Drill** (for girls)—File marching; wheeling in file; marking time; changing step; free exercises while marching and marking time.

**Needlework.—A plain chemise, gathered at neck into a stitched band, ornamented with feather-stitching; or similar useful article which can be completed by stitches already taught.

**Second Half-wear of Envolment.**

## Second Half-year of Enrolment.

Reading—1. Australian School Series: Reader III, to the end.
2. I.N.B.: Book III, to the end.

Z. I.N.B.: BOOK III, to the end.
Repetition from memory of thirty lines of poetry.

Writing—In copy-books.

Dictation—Twelve lines from the reading lessons.

Arithmetic—All the Compound Rules; Mental Arithmetic.

Grammar—To distinguish readily all the parts of speech.

than twelve lines than twelve lines

Geography-To know the outlines of the Geography of Australia, Tasmania, and New Zealand. Object Lessons—As for previous half-year.

History—To death of Richard III; to page 44 of Nelson's Brief History of England.

* In small schools, the First and Second Classes should be combined for Object Lessons and Scripture, and should receive in each subject not less than one half-hour lesson per week; the inspection to be conducted on the lessons actually

[†] Note.—In Schools below the Sixth Class, the standard in singing for Second Class shall also be that for Third Class.

† Note.—In schools below the Sixth Class, the standard for drill will be that for the Second Class.

Singing—Staff Notation (movable doh system); Treble Clef; Pitch and Time; Names; Relative Value of Notes; Two-part Songs and Rounds from Tonic Sol-fa Notation.
Drawing—As for previous half-year.
Scripture Lessons—Old Testament, No 1; New Testament, No 1.
Drill (for boys)—"Infantry Drill for 1889;" Physical Training, section 5; Exercises, 5, 6, and 7; Squad Training and Training Staff Notation. Drill (for boys)—"Intantry Drill for 1000; Inysteed Flaming, Section 37 to 50.

Drill (for girls)—As for first half-year.

Needlework—A linen sampler, with threads drawn, showing the various stitches used in Needlework, namely: top-sewing, stitching, herring-boning, various feather-stitching, eyelet and button-holes, small square of darning, loops; name done in satin-stitch. Third Half-Year of Enrolment. Reading—1. Australian School Series: Reader IV, to the end of Lesson 30.
2. I. N. B., Book IV, to end of Section II.
Repetition from memory of forty lines of poetry.

Writing—In copy-books. Writing—In copy-books.

Dictation—Twelve lines from the Reading Lessons.

Arithmetic—Reduction; Miscellaneous Exercises in Simple and Compound Rules; Mental Arithmetic;

Easy Questions in Buying and Selling.

Grammar—Parsing of Simple Sentences; Accidence, and Analysis of Simple Sentences. Composition—

To write on paper a letter of not less than twelve lines.

Geography—New South Wales—Physical Features and Chief Towns; Mapping.

Object Lessons—As for first half-year. History—Nelson's Brief History of England, to page 70; Outlines of English History, to the Abdication of James II. Singing—Staff Notation—2 and 2 times; Time Exercises on Minim and Crochet (with corresponding rests); Scale Exercises on the Staff; Two-part Songs and Rounds from Tonic Sol-fa Notation. Pastis); Scale Exercises on the Stair; Two-part songs and Rothus from Total Sol-12 Troubson.

Drawing—As for first half-year.

Scripture Lessons—Old Testament, No. 1; New Testament, No. 1.

Drill (for boys)—Same as second half-year.

Drill (for girls)—As for first half-year.

Needlework—1. Sampler as in last half-year.

2. A pair of drawers, tucked, finished with button-holes in band; or similar useful article. Fourth Half-year of Enrolment. -1. Australian School Series; Reader IV, to the end.
2. I. N. B., Book IV, to the end.
Synonyms, Meanings, Derivations; Repetition from memory of forty lines of poetry. Reading-Writing—In copy books.

Dictation—Twelve lines from the Reading Lessons, on paper.

Arithmetic—Simple and Compound Proportion, with Miscellaneous Exercises in back Rules. Mental Arithmetic.

Grammar—Parsing and Analysis of Sentences, with a knowledge of the Rules of Syntax; Composition.

Geography—Europe—Physical Features and Chief Towns of each Country; Mapping.

Object Lessons—As for first half-year.

History—English History; Nelson's Brief History, to the end; Outlines of English History to the present time; History of Australia.

Singing—Staff Notation, ²/₄, ³/₄, and ⁴/₄ Times; Time Exercises on Minim, Crochet, and Quaver (with corresponding rests); Scale Exercises on the Staff, introducing fe and ta; Two-part Songs and Rounds, from Tonic Sol-fa Notation.

Drawing—As for first half-year Arithmetic. Trom Tonic Sol-1a Notation.

Drawing—As for first half-year.

Scripture Lessons—Old Testament, No. 1; New Testament, No. 1.

Needlework—1. Running and felling seams with tucks run and gathered into band, in chemise or similar useful article; name or initial in satin-stitch.

2. Darning in stocking-web material.

3. Button-holes in cloth.

Drill (for bors)—Same as for second half-year. Drill (for boys)—Same as for second half-year.

Drill (for girls)—As for first half-year. Values of Subjects taught to Third Class. Marks. 100 Reading (Reading, 60; Poetry, 20; Meanings, &c., 20) ... Writing ... Note 1.—Where there are not ten pupils to form a Fourth Class, the standard prescribed for the first half-year in the Fourth Class shall be that for the fifth half-year in the Third Class.

NOTE 2.—The work prescribed in Object Lessons, Scripture, and Drawing, is for the whole period pupils remain in the Third Class. The examination will be on the subjects taught.

NOTE 3.—When the standard of plain needlework prescribed for the Third Class has been completed, ornamental work, or knitting, or both, should be introduced. FOURTH CLASS. First Half-year of Enrolment. Reading—One of the following books, or an authorised equivalent:—

1. Australian School Series: Reader V, to end of Lesson 22.

2. I. N. B.; Fourth Supplement, to page 63.
Repetition from memory of fifty lines of poetry.

Writing—In copy-books.
Dictation—Twelve consecutive lines from Lessons read.

Arithmetic—Practice; Vulgar and Decimal Fractions; Mental Arithmetic—the full course, as treated in any Standard Work.

Grammar—Parsing passages from Reading Lessons; Accidence; Analysis of a Compound Sentence;

Grammar-Parsing passages from Reading Lessons; Accidence; Analysis of a Compound Sentence;

Composition.

Geography—Asia; Physical Features and Chief Towns of each Country; Mapping.

Object Lessons—Lessons on Animal and Plant Life, and on the Chemical and Physical Principles involved in Agriculture; more Advanced Lessons on Third-class Subjects, with Light, Heat, and Air in relation to Health; also Lessons on Elementary Physical Science.

History—

Composition.

History—English History: Nelson's "History for Junior Classes"—Henry VII to James II; revision of Third-class Work; Australian History.

Singing—Staff Notation only; Key Signatures, C, F, and G; Structure of Scale, Tetrachords, Common Marks of Expression, Abbreviations, and Symbols. Time Signatures, \(\frac{2}{4}\), \(\frac{4}{4}\), and \(\frac{6}{3}\) Times; Easy Accidentals; Time Exercises on Minim, Dotted Minim, Crotchet, and Quaver (with corresponding rests); Three-part Songs and Rounds; very easy passages at sight.

Drawing—Freehand Drawing, from copies of Common Objects, which should be enlarged or reduced from the example; Drawing Plans and Elevations of Plane Figures and Rectangular Solids, in simple positions; Drawing Geometrical Figures with Instruments; Drawing to Scale in a limited manner.

Scripture Lessons—The whole series (Fourth Class and Fifth Class may be taken together).

Euclid—Definitions of, Book I.

Drill (for boys)—"Infantry Drill for 1889"; Company Drill; Formation and Movements—Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 20, 22.

Drill (for girls)—Marching in Line; Balance Step, with and without advancing; Body and Limb Flexions; Pole Exercises; Dumb Bells (\(\frac{1}{2}\) lb.)

Needlework—1. Sampler with greater skill than before.

2. A petticoat with tucks run, gathered and stroked into band; or similar useful article.

3. Darning and button-holes, as in last half-year.

Second Half-year of Enrolment.

Reading—1. Australian School Series: Reader V, to end of Lesson 56.
2. I. N. B., 4th Supplement, to page 155.
Repetition from memory of fifty lines of poetry.

Writing—As for last half-year.

Dictation—Selected passages of twelve consecutive lines from books read.

Dictation—Selected passages of twelve consecutive lines from books read.

Arithmetic—Interest; Discount; Profit and Loss; Mensuration of Surfaces.

Grammar—Accidence; Parsing and Analysis generally; Simple Essays.

Geography—America; Physical Features, and Chief Towns of each Country.

Object Lessons—As for first half-year.

History—English History (Nelson's "History for Junior Classes")—William III to present time; History of Australia.

Singing—Staff Notation only; Key Signatures, Bp. D. Ip. A; Time Signatures fully; Time Exercises as in last half-year, with Dotted Notes, Ledger Lines, Accidentals, Definitions of most common Musical Terms; Three-part Songs and Rounds; Easy Passages at Sight.

Drawing—As for first half-year.

Scripture Lessons—The whole series.

Euclid—Book I, to Proposition 12.

Drill (for girls)—As for first half-year.

Needlework—I. A plain night-shirt, showing top sewing, stitching, button-holes, and gathers, and finished with gussets; or a night-dress tucked and trimmed, or any similar article.

2. Patching in calico and flannel.

3. This class will be expected to set their own sewing, with the advice of the Work-

3. This class will be expected to set their own sewing, with the advice of the Workmistress; and pupils over 14 years of age should be able to cut out and fit garments specified in Third Class.

Norg. —When there are not ten pupils to form a Fifth Class, the standard prescribed for the first half-year in Fifth Class shall be that for the third half-year of the Fourth Class.

# FIFTH CLASS.

## First Half-year of Enrolment.

Reading—The Text-book prescribed for the University Junior Examination.

Writing—In copy-books.

Dictation—Passages of ordinary prose, fifteen consecutive lines.

Arithmetic—Compound Interest, Profit and Loss, as treated in Hamblin Smith's Manual, or any equivalent; Mensuration; Area of Regular Surfaces. Grammar

Geography— As prescribed for the Senior or Junior Public Examinations at the Sydney University.

History— )

Natural Science—Physics or Physiology, or one of the Science Subjects prescribed for the University Examinations; or

Cooking: For girls. Euclid—Book I.

Euclid—Book I.
 Algebra—As shown in Hamblin Smith's Algebra, up to Chapter 6, omitting Exercises 15 to 32.
 Latin (for boys)—Abbott's "Via Latina" to Exercise 21, page 29.
 French (for girls)—Macmillan's Progressive French Course, to Lesson 25.
 Drawing—Similar to Class IV, but of greater difficulty; Drawing from any Common Objects and Casts of Ornaments, in Light and Shade; Drawing Plans and Elevations of Circular Solids with Sections.
 Music—Key and Time Signatures fully; Time Exercises on all the ordinary notes and Rests, with Dots, Triplets, Simple Passages at sight, Syncopation, Modulation, Double Dotted Notes, Double Sharps and Flats, Three-part Songs.
 Scripture Lessons—The whole series. (The Class may be taken with Fourth Class in this subject.)
 Drill (for boys)— As for Exercise Class

Drill (for boys)—
Drill (for girls)—
Needlework—1. Pa As for Fourth Class.

-1. Patching in print, flannel, and cloth.
2. A linen sampler as in Third and Fourth Classes; also a child's dress made of washing

3. The pupils will be required to cut out and fix their own sewing; also any garment named in former classes.

Second

Note 1.—Where there are pupils in a Fifth Class in third half-year, it is expected that Trigonometry will be introduced; and provided the pupils are able to work as far as page 104 of Todiunter's "Trigonometry for Beginners," full marks (100) will be awarded. (Euclid in the third half-year, Book III; Algebra to Quadratics.)

NOTE 2.—Music—In separate boys' and girls departments the sexes may be combined for singing lessons at the discretion of the teachers; but the teachers of the respective departments will be held responsible for instruction in the theory of music.

NOTE 3.—Drill—In all schools under one teacher, the standard for the second-class shall be the highest required for any class. Subject to this provision, rifle drill should be taught to third and higher classes whenever not fewer than ten pupils can be assembled.

NOTE 4.—Writing—All writing will be rejected as a failure if there is no attempt made to imitate the copies set.

NOTE 5.—Arithmetic—Pupils of girls' schools will not be expected to work Discount, Stocks, or Cube Root.

Sydney: Charles Potter, Government Printer.—1893.

1892 - 3.

LEGISLATIVE ASSEMBLY.

SOUTH WALES.

(RETURN RESPECTING BONUSES IN PUBLIC INSTRUCTION DEPARTMENT.)

Ordered by the Legislative Assembly to be printed, 22 February, 1893.

RETURN to an Order of the Legislative Assembly, That there be laid upon the Table of this House,—

- "Copies of all applications, letters, minutes, or other papers in connection
- "with bonuses applied for or granted to members of the Civil Service in
- "the Public Instruction Department during the years 1889 to 1892, "inclusive."

(Mr. Wright.)

# SCHEDULE.

1. Chief Clerk's memorandum to Under Secretary, with minute of Minister of Public Instruction (Mr. Carruthers), and enclosures. 31 December, 1890 .....

2. Petition from certain officers for bonuses, with memorandum of Under Secretary, minute of Minister (Mr. Suttor), and enclosure. 28 December, 1892

## No. 1.

# Memorandum to The Under Secretary.

In view of the fact that the amounts placed on the Supplementary and Additional Estimates for the years 1889 and 1890 to enable certain small increases of salaries to officers under £350 per annum, and to

years 1889 and 1890 to enable certain small increases of salaries to officers under £350 per annum, and to the two Sydney Inspectors, to be made, have for some reason been struck off the Estimates, I would suggest that as there is a sum available in the Contingency Vote for 1890 sufficient to meet the payments proposed, the amounts in question be paid from that Vote, as a bonus for additional work performed.

It may be pointed out that although an addition to their salaries will be received by certain officers, as already approved by the Minister, a saving has been effected, as the positions vacated by Mr. District-Inspector M Credie (£650 per annum), Mr. Sladen (£440 per annum), and Messrs. Booth, Hitchens, and Monckton (£350 per annum each), have not been filled, an additional junior clerk only having been appointed in each case having been appointed in each case.

It will be observed that the amount required is £666 17s. 10d., and the balance available from the Contingency Vote for 1890 is £737.

J. GIBSON, Chief Clerk.

Submitted.—E.J., 31/12/90.

Approved.-J.H.C., 31/12/90.

# No. 2.

# Mr. C. J. D. Blackmore and others to The Under Secretary for Public Instruction.

Sir,

In view of the fact that all proposed increases to salaries of officers of this Department for 1893 have been struck off the Estimates, we, the undersigned, who are in receipt of annual salaries of £150 and under, beg to request that the Minister will be good enough to make some special provision for us. We desire to bring to Mr. Suttor's remembrance the fact that last year we met with a similar disappointment. Our salaries are small compared with those of gentlemen of similar service in other Departments, and in view of the apparent necessity for a continued policy of retrenchment on the part of the Government, there seems no prospect of increases being placed on the Estimates for a long time to come. Our duties are performed in an admittedly satisfactory manner, and we feel that we are justly entitled to recognition.

We beg to request, therefore, that the Minister will be pleased to grant us, as bonuses, the amounts proposed to be added to our salaries on the 1893 Estimates. A similar concession was granted at the end of 1890 to certain officers whose proposed increases had been struck off the Estimates by the Cabinet, as ours have been. The bonuses at that time amounted to £666, and the sum was taken from the unused balance of the Contingency Vote for 1890. In our cases the bonuses would not amount to half that sum, and there is, we understand, an available balance from the Contingency Vote for 1892 considerably in excess of the total amount now asked for. The granting of our request would necessitate a comparatively small expenditure, and a large number of deserving officers would be rewarded.

In

In conclusion, we would very respectfully point out that, whereas last year and this year our Department has been rigidly scrupulous in cutting off salary increases, other branches of the Service have not exercised the same economy. Last year we instanced cases where officers in other Departments had been awarded increased salaries, and in the Estimates for 1893, under the plea of staff-reorganization, a number of increases have been given in the Treasury and the Justice Department. Increases in the ordinary way have also been bestowed on certain officers in the Departments of Lands and Works, and in the Crown Solicitor's, Attorney-General's, Audit, and Railway Offices.

We have, &c., C. J. D. BLACKMORE.

# NEW SOUTH WALES.

# EDUCATION.

(AMENDED REGULATION RESPECTING VACATIONS AND HOLIDAYS.)

Presented to Parliament, pursuant to Act 43 Dic. Ao. 23, sec. 37.

Department of Public Instruction, Sydney, 24 November, 1892.

PUBLIC INSTRUCTION ACT OF 1880—AMENDED REGULATION AS TO VACATIONS AND HOLIDAYS.

His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of the following amended regulation, in substitution for that relating to vacations and holidays, of date 1st July, 1891:—

152. The vacations sanctioned by the Minister are: Four weeks at Christmas, one week at Easter, and a fortnight at Midwinter. The holidays allowed, other than those occurring in vacation, are the Anniversary of the Colony, of the Queen's Birthday, and of the Prince of Wales' Birthday, and Good Friday.

Teachers are to enter on their time-tables these vacations and holidays.

# UNIVERSITY OF SYDNEY.

(REPORT FOR 1891.)

Presented to Parliament, pursuant to Act 14 Dic. Ao. 31, sec. 22.

REPORT of the Senate of the University for the year ended 31st December, 1891.

- 1. The Senate of the University of Sydney, in pursuance of the Act of Incorporation, 14 Victoria No. 31, has the honor to transmit the account of its proceedings during the year 1891, for the information of His Excellency the Governor and the Executive Council.
- 2. Out of a total of 264 candidates who presented themselves for the ordinary matriculation examination in March, 182 qualified themselves for matriculation. In addition to this number, 17 passed the senior public examination and 62 the junior public examination in the subjects prescribed for matriculation, and 37 passed the equivalent matriculation examination for solicitors' articled clerks. For the March entrance examination for the Faculties of Medicine and Science and the Department of Engineering there were 14 candidates, of whom 7 were successful.
- 3. The following are the number of students who presented themselves and passed successfully in the various University examinations held in December, 1890, and March, 1891:—

Faculty :	of.	${f Arts.}$
-----------	-----	-------------

770		Candidates.	Passed.
First year examination	 	175	133
Second year examination	 	54	45
Third year examination	 :	36	33

18 evening students, in addition to those included above as having passed in the whole of their respective examinations, and 4 day students, passed in individual subjects at the various yearly examinations.

4. The following are the numbers of matriculated students attending lectures in the various faculties during the year:—Faculty of Arts, 343, including 82 evening students; Faculty of Law, 23; Faculty of Medicine, 87; Faculty of Science, 10; Department of Engineering, 15; total, 478. In addition to the above the day lectures were attended by 11, and the evening lectures by 33 non-matriculated students. 10 graduates also attended post-graduate courses of lectures. The total number of students for the year was thus 532. The numbers of women students included in the above are as follows:—Faculty of Arts, 75; Faculty of Medicine, 6; Faculty of Science, 1; total, 82.

5. The following degrees were conferred after examination:— Master of Arts (M.A.):—Peter Board, B.A.; Sarah Octavia Brennan, B.A.; Caroline Lomer, B.A.; Gresley Windham Hall Lukin, B.A.; George Herbert Pike, B.A.; Henry Thomas Robjohns, B.A. (Lond.); John Michael Taylor, B.A.

18—A Bachelor

Bachelor of Arts (B.A.):—Tancred de Carteret Armstrong, Cuthbert Blacket, Christopher John Brennan, Theodosia Ada Britton, William Aloysius Conlon, James Cosh, William Thomas Patrick Coyle, Esther Fischer Cripps, Frank Wiseman Doak, John Edwards, James Forde, George Harris, Ernest Rudolph Holme. Sarah Hynes, Arthur Stanton Lamrock, Amy Atherton Molineaux, William Hunt Ward Nicholls, Sydney Llewellyn Rudder, Charles Townsend Russell, Fraicis Alfred Allison Russell, Lillian Russell, George Compbell Sarahy Lavigne Francet Serision, Loseph Hanny Smeil, Edward Milner Stanken Campbell Saxby, Lavigne Ernest Serisier, Joseph Henry Smail, Edward Milner Stephen, Annie Avice Matilda Studdy, Elmina Louise Sutherland, Alec Thomson, Robert Alfred Thompson, Allen Hammill Uther, Percival Richard Waddy, William Williams, Richard Windever.

Bachelor of Medicine (M.B.):—George Henry Abbott, B A.; Claude Leopold Wolfgang Hunt, William John McKay, B.Sc.; Reginald Jeffrey Millard, George Percival Stanley, Edward

Sutherland Stokes.

Master of Surgery (Ch.M.): — George Henry Abbott, B.A.; Claude Wolfgang Hunt, William John McKay, B.Sc.; Reginald Jeffrey Millard, George Percival Stanley, Edward Suther-

land Stokes.

Bachelor of Engineering (B.E.):—Louis Geoffery Bucknell, William James Birch.

6. The following graduates of other universities were admitted ad eundum gradum, in accordance with the provisions of the "Ad Eundem Degrees Act," 44 Victoria No. 22:—

Bachelor of Arts (B.A.):—John Doyle, B.A., Royal University of Ireland; Donald Murray, B.A., University of New Zealand.

Bachelor of Science (B.Sc.):—William John Clunies Ross, B.Sc., London.

Bachelor of Engineering (B.E.):—Colin John Ross, B.Sc. in Engineering, Edinburgh.

7. The total number of degrees conferred during the year was thus 57, divided as follows:—

M.A, 7; B.A., 35; M.B., 6; Ch.M., 6; B.Sc., 1; B.E., 2.

8. The following are the honours conferred at the Degree Examinations:—

**Faculty of Arts—Honours at the R A Examination**

### Faculty of Arts-Honours at the B.A. Examination.

Classics—Class I:—E. M. Stephen (University gold medal). Class II:—C. J. Brennan. Latin and English—Class I:—E. R. Holme. Latin and French—Class II:—J. Forde.

Mathematics—Class III:—E. M. Stephen, F. W. Doak.

Logic and Mental Philosophy—Class I:—C. J. Brennan (University gold medal), J. H. Smairl and E. M. Stephen equal. Class II:—Lillan Russell.

Geology and Palæontology-Class I:-Jas. Cosh. Class II:-C. Blacket and L. E. Serisier equal, G. Harris.

Faculty of Medicine—Honours at Graduation as M.B. and Ch.M.

Class 11:-G. H. Abbott, B.A.; E. S. Stokes.

9. The following Scholarships were awarded:-

(a) Matriculation Examination.
University Scholarship for General Proficiency—D. S. Edwards.

Cooper Scholarship No. 2 for Classics—A. H. Garnsey. Barker Scholarship No. 2 for Mathematics—A. B. Davies.

Horner Exhibition for Mathematics—A. B. Davies.

Lithgow Scholarship for Latin and German—C. N. Mell.

Salting Exhibition—A. H. Garnsey.

(b) First Year Examination in Arts. Cooper Scholarship No. 3 for Classics—D. Levy. George Allen Scholarship for Mathematics—D. Levy.

(c) Second Year Examination in Arts.

Cooper Scholarship No. 1 for Classics—W. A. Parker.

Barker Scholarship No. 1 for Mathematics (vacated by J. W. Fell, on account of his holding two other scholarships)—H. de B. O'Reilly.

(d) First Examination in Medicine. Renwick Scholarship for General Proficiency—M. O'G. Hughes, B.A., prox acc. M. Veech.

(e) Second Examination in Medicine.

John Harris Scholarship for General Proficiency—R. Dick.

(f) First Year Examination in Science.

Levey Scholarship for Chemistry and Physics—J. H. D. Brearley.

(g) Second Year Examination in Engineering.

Deas-Thomson Scholarship for Physics—J. W. Fell. Deas-Thomson Scholarship for Chemistry—
J. W. Fell. Barker Scholarship No. 1 for Mathematics—J. W. Fell (awarded to H. de B.
O'Reilly).

Faculty of Medicine.

First Examination—Chemistry:—M. O'G. Hughes, B.A. Zoology:—G. R. P. Hall. Botany:— G. R. P. Hall, M. O'G. Hughes, B.A., M. Veech. Faculty Second Examination—Passed with distinction:—R. Dick.

### Faculty of Science.

First Year Examination—Chemistry:—J. H. D. Brearley. Zoology:—J. H. D. Brearley. Botany:—J. H. D. Brearley. Physics:—J. H. D. Brearley.

### Department of Engineering.

First Year Examination—Mathematics:—W. H. Ledger. Physics:—W. H. Ledger. Second Year Examination—Chemistry:—J. W. Fell. Physics:—J. W. Fell. Mathematics:—J. W. Fell. Applied Mechanics:—C. T. Stephens, S. H. Barraclough, J. W. Fell. Surveying and Mechanical Drawing:—J. W. Fell, S. H. Barraclough, C. T. Stephens.

11. Special Annual Prizes were awarded as follows:—
Smith Prize for Physics:—J. H. D. Brearley. Slade Prize for Chemistry:—A. C. Gill. Professor MacCallum's Prizes for English Essays:—First Year—Lizzie Proctor; Second Year—F. V. Pratt and J. P. Pickburn, equal; Third Year—Elmina L. Sutherland and E. R. Holme, equal. Norbert Quirk Prize for Mathematics—H. de B. O'Reilly. Professor Anderson's Prizes for Philosophy:—Second Year—J. B. Peden. Third Year—C. J. Brennan. Professor Wilson's Prize for Regional and Surgical Anatomy—F. J. Sawkins. Professor Wilson's Prize for General and Descriptive Anatomy—R. G. Craig. Dr. MacCormick's Prize for Surgery—G. E. Smith and Grace F. Robinson, equal. Dr. Wilkinson's Prize for Pathology—R. Dick. Dr. Dixson's Prize for Materia Medica—F. J. Sawkins. Professor Haswell's Prize for Zoology—J. H. D. Brearley. Slade Prize for Practical Chemistry—S. H. Barraclough. Slade Prize for Practical Physics—J. W. Roberts.

12. The following Bursaries were awarded:

Maurice Alexander Bursary.
Ernest Manson Frazer Bursary (one-half).
William Charles Wentworth Bursary, No. 2 (one half).
Hunter Baillie Bursary, No. 2 (one half).
John Brown Watt Exhibition.
James Aitken Bursary.
Walker Bursary, No. 1 (one half).
Walker Bursary, No. 5.

(N.B.—The Half Bursaries carried full exemption from fees.)

Twenty students—including twelve State Bursars—in addition to twenty-two holders of University Bursaries, were permitted to attend lectures without the payment of fees. Eighty-eight students of the Training Schools for Male and Female Teachers were also permitted to attend at a reduced fee, as arranged with the Minister of Public Instruction.

13. The following courses of Lectures, under the University Extension Scheme, were delivered during the year:—

Lent Term.—Sydney—Subject:—"Introduction to the Study of Logic, First Series." Lecturer, Professor Anderson, M.A.; number of students attending, 63; number who passed concluding examination, 14. Sydney—Subject: "Greek Politics." Lecturer, Professor Scott, M.A.; number of students attending, 14; number who passed concluding examination, 3. Burwood—Subject: "Shakespeare's Plays on English History." Lecturer, Professor MacCallum, M.A.; number of students attending, 92; number who passed concluding examination, 6.

Concluding examination, 6.

Trinity Term.—Sydney—Subject: "Introduction to the Study of Logic, Second Series."

Lecturer, Professor Anderson, M.A.; number of students attending, 29; number who passed concluding examination, 15. Sydney—Subject: "The Puritan Revolution of the Seventeenth Century." Lecturer, Professor G. Arnold Wood, B.A.; number attending, 45; number who passed examination, 11. Goulburn—Subject: "Outlines of Common Law and Equity." Lecturer, Mr. W. P. Cullen, M.A., LL.D.; number attending, 14; number who passed, 4.

Michaelmas Term.—Bathurst—Subject: "Great Writers of the Victorian Age." Lecturer Mr. A. W. Jose; number attending, 41; number who passed, 5.

14. The Senior and Junior Public Examinations were held in the month of September in Sydney, and in the following local centres:—Adelong, Albury, Armidale, Ballina, Bathurst, Bega, Berrima, Borenore, Bourke, Braidwood, Brewarrina, Brisbane, Casino, Cooma, Cowra, Cudal, Deniliquin, Dubbo, Dungog, Emmaville, Forbes, Glen Innes, Goulburn, Grafton, Hay, Hill End, Ipswich, Inverell, Kempsey, Lismore, Lithgow, Maclean, West Maitland, Molong, Maryborough, Moruya, Mount Victoria, Mudgee, Murrumburrah, Narrandera, Newcastle, Nowra, Nundle, Orange, Parramatta, Penrith, Port Macquarie, Queanbeyan, Richmond, Rockhampton, Scone, Singleton, Smithtown, Tamworth, Taree, Temora, Tenterfield, Tingha, Toowoomba, Townsville, Wagga Wagga, Warwick, Wellington, Windsor, Wollongong, and Young. One hundred and forty-three candidates presented themselves for the Senior Examination, and 1,729 for the Junior Examination. Of these, 110 senior candidates and 1,191 junior candidates were successful.

15. The prizes for general proficiency at these examinations were awarded as follows:—

### Seniors.

University Prize and John West Medal, and Grahame Prize Medal:-

Dixon, Graham Patrick, Brisbane Grammar School
Hall, Edwin Cuthbert, Newington College
Rowland Norman de Horne, Brisbane Grammar School
Simpson, Edward Sydney, Brisbane Grammar School
Roberts, Francis Joseph, Brisbane Grammar School, prox acc.

Fairfax Prize for Senior Females:—
Whitfeld, Eleanor Madeline, Sydney Girls' Public High School.

#### Juniors.

University Prize:-

Whitfeld, Hubert Edwin, Sydney Grammar School. Stewart, Donald, Sydney Public High School, prox acc.

Fairfax Prize for Junior Females:—

(Over age—Sutton, Jessie Nellie, Mrs. Wilson, Carlton.)

Awarded to-

Ferguson, Margaret Elizabeth, Sydney Girls' Public High School Parker, Annie Harriet, Brisbane Girls' Grammar School

A complete analysis of the examinations will be found in the "Manual of Public Examinations," which accompanies this report.

- 16. Four examinations of candidates for the Civil Service were held during the year. At these 283 candidates presented themselves, and 104 were successful.
- 17. Three law examinations, similar and equal in standard to that prescribed for matriculation, for candidates for articles of clerkship with attorneys, were held. At these 66 candidates presented themselves, and 37 were successful.
- 18. During the year the Senate held twenty-two regular meetings, one adjourned and three special meetings, in addition to one meeting of the conjoint Board, consisting of the Senate of the University and the Board of Directors of the Prince Alfred Hospital, and the Annual Commemoration.

The attendances of the various Fellows were as follows:-

19. The annual election to the office of Vice-Chancellor took place in the month of April, and resulted in the election of Mr. Henry Chamberlaine Russell, B.A., C M.G., F.R.S.

At the same time the Senate placed upon record its sense of the conspicuous ability with which the Hon. Dr. Renwick had discharged the duties of the office of Vice-Chancellor for the two previous years.

- 20. A communication was received in the month of February from the General Council of Medical Education and Registration of the United Kingdom stating that at a meeting of that Council held on the 24th of November, 1890, it was resolved that the degrees in medicine and surgery conferred by the University of Sydney should be registered in the list of Colonial Medical Practitioners, under section 13 of Part II of the Imperial Medical Act of 1886
- 21. In the month of March, Mr. Colin J. Wilson, M.B, was appointed Demonstrator in Anatomy in the place of Mr. A. E. Mills, M.B., whose term of office had expired. Mr. Wilson's health, however, not allowing him to continue in the office for longer than one term, Mr. Mills was reappointed temporarily, and subsequently Mr. John Morton, MB, Ch.M, was appointed until the end of the year.
- 22. The office of Demonstrator in Physiology, rendered vacant in March by the resignation of Mr. A. E. Wright, M.B., was temporarily filled for one term by Mr. A. E. Mills, M.B. At the end of Lent term Mr. C. J. Martin, B.Sc., M.B. (London), who had been selected in England for the office, entered upon his duties.
- 23. In the month of February Mr. L. F. M. Armstrong, B.A., LL.B., was reappointed Curator of the Nicholson Museum for a period of one year.
- 24. The newly appointed Professor of History, Mr. G. Arnold Wood, B.A., arrived in Sydney in the month of February, and commenced his duties in the beginning of the academic year in March. A fair proportion of students in the second and third years in the Faculty of Arts selected History as one of their optional subjects.
- 25. In order to carry on the work of the Department of Geology and Physical Geography, until the appointment of a successor to the late Professor Stephens, the Senate appointed Mr. T. W. Edgeworth David, B.A. (Oxford), Geological Surveyor in the Department of Mines, to deliver the necessary lectures.

In the month of May the Senate received a communication by telegram from the Agent-General Sir Saul Samuel, announcing the recommendations of the English Committee which had been appointed to report upon the applications of candidates for the Professorship of Geology and Physical Geography. After full deliberation and further communication by telegraph with the Agent-General, the Senate appointed Mr. T. W. Edgeworth David, B.A., to the office. In making its selection the Senate took into consideration, in addition to his more general qualifications, the fact that Mr. David had had and has used successfully special advantages as N.S.W. Government Geological Surveyor for nine years, acquiring a knowledge of Australian geology, and also his eminent success as a Lecturer in the University during his term of temporary office.

26. A report was received in the month of March from the Committee appointed in December, 1890, to consider and report what branches of learning should be represented in the Senate, in accordance with the provisions of the University Act, 24 Vic., No. 13. The Committee recommended the distribution of the branches of learning represented by professorships into four faculties, and the adoption of certain by-laws, under which one of the branches of learning in each should be selected by a system of rotation

by-laws, under which one of the branches of learning in each should be selected by a system of rotation for representation by its Professor as an ex-officio Member of the Senate.

At the same time notice was given in the Senate of a proposal to limit the tenure of its elected members to five years, and to provide for the abolition of ex-officio memberships. Before the Senate had had an opportunity of fully discussing these proposals, a meeting of members of Convocation was held on the 16th and 20th of May, at which the following resolutions were passed:—

1. That Convocation is of opinion that the Dean of each Faculty should be a Professor elected by the Members of that Faculty, and eligible for re-election at the expiration of his term of office. And that the Deans of Faculties so elected should be ex-officio Members of the Senate under the Act 24 Vic. No. 13.

Senate under the Act 24 Vic. No. 13.

That Convocation is of opinion that the elective Members of the Senate should hold office for five years, but should be eligible for re-election on the expiration of their term of office; that this resolution should apply to present as well as future Members of the Senate.
 That, to assist the Senate in giving effect to the wishes of Convocation, this body, while expressing its gratitude to all Members of the Senate for their past services, respectfully requests those Members of the Senate who were elected before Tenyour let 1886.

requests those Members of the Senate who were elected before January 1st, 1886, to agree upon some scheme of retiring in the course of three years from January 1st, 1891.

4. That Convocation is of opinion that a Public Orator should be elected annually by the Members of the University (i.e., Members of Convocation, Graduates who are not Members of Convocation, and Undergraduates passing through their course), and invited to deliver an address at Commemoration. And that the first of such elections should take place before next Commemoration.

5. That this Convocation respectfully requests the Senate to take such steps as may be necessary

to give effect to the foregoing resolutions.

These resolutions were considered by the Senate at special meetings held on the 8th and 22nd of June, together with the report of the Ex-officio Fellows Committee mentioned above, and the proposals to limit the tenure of Fellows and to abolish ex-officio membership. From the discussion it appeared

that almost all, if not all, of the changes proposed would necessitate an amended Act of Parliament to enable them to be carried out, and the following resolution was ultimately adopted:—

"That it be referred to a Committee to consider and report as to the expediency of consolidating and amending the statute law relating to the University, and of introducing in a Bill to be presented to Parliament such provisions for altering the duration of the office of Fellow; for determining the eligibility to such office of Professors and other paid officers of the University; for establishing a Professorial Council or Senatus Academicus; for transfering to such Council certain functions and duties now devolving on the Senate or General Authority of the University; for establishing Convention on a statutory besig with certain Authority of the University; for establishing Convocation on a statutory basis with certain powers and authority; and generally for embodying such amendments of the constitution of the University as may be considered beneficial in the public interest. That such Committee consist of the Chancellor, the Vice-Chancellor, the Hon. Sir William Windeyer, the Hon. Dr. Renwick, the Hon. Dr. McLaurin, Mr. R. Teece, the Hon. Peter Faucett, Professor Anderson Stuart, Professor Scott, Professor Gurney, and Mr. Alexander Oliver,

together with four members of Convocation to be appointed at a meeting of Convocation."

A meeting of Convocation was held on the 11th of July, and adjourned to the 18th for the purpose of electing four of its number to act with the Committee of the Senate, but failed to make the necessary appointments; and it was subsequently resolved that the Committee should proceed with the consideration of the metters for which it had been appointed on the understanding that if Commenting consideration of the matters for which it had been appointed, on the understanding that if Convocation should choose four members from its body, in terms of the resolution of the Senate, such members should be entitled to take part in the consideration of the subject.

A progress report was received from the Committee on the 7th of December, recommending the establishment by by-law of an Academic Council, consisting of members of the teaching staff, to supervise the studies and discipline of the University, and so relieve the Senate from the transaction of a consider-

able amount of business, but no definite decision has yet been arrived at in the matter.

In the meantime to carry out the apparently general opinion that the ex-officio memberships should be so arranged as to provide some more definite representation of the four Faculties, the following

resolutions were adopted as a temporary measure:—

"1. That in future each of the four Faculties of Arts, Law, Medicine, and Science be invited from time to time to recommend for consideration by the Senate a particular branch of learning for selection, the professor in which shall be an ex-officio member of the Senate, under the provisions of section 2 of the Act 24 Victoria, No. 13.

under the provisions of section 2 of the Act 24 victoria, No. 13.

"2. That it is expedient that every such selection shall be for a term not exceeding two years, provided that the same branch of learning may at any time be reselected."

27. Leave of absence has been granted to Mr. H. E. Barff, M.A., Registrar, for the year 1892, during the proposes to visit a number of the Universities of Europe and America.

Mr. Barff has held his which he proposes to visit a number of the Universities of Europe and America. present office of Registrar for nine years, having been an officer of the University for fifteen years, during which he was successively Master of Studies and Assistant Lecturer in Mathematics

During his absence the duties of his office will be discharged by Mr. R. A. Dallen, Chief Clerk and

Accountant, who has had experience in the work of the office extending over four years.

28. Upon the incorporation in July of the College for Women within the University, the Senate elected the Hon. Sir William C. Windeyer, M.A., LL.D., and the Hon. Peter Faucett, M.L.C., to be ex-officio members of the Council of the College for a period of two years, in accordance with the provisions of section VII of the Act 53 Vic., No. 10.

29. The Senate has also set apart for the Women's College a site upon the University grounds, near the St. Paul's College sub-grant, and the proposed sub-grant for a Training College for Teachers.

30. In the month of July a communication was received from a Committee representing the Wesleyan Methodist Conference, stating that the Wesleyan body desired, if possible, to revive its lapsed claim for a Methodist Conference, stating that the Wesleyan body desired, it possible, to revive its lapsed chain for a site upon the University grounds for the erection of a College to be affiliated to the University, and also stating that in the event of the University being able to set apart a site for the purpose, the Wesleyan body would probably find little difficulty in obtaining the funds required to enable it to take advantage of the provisions of the Affiliated Colleges Act (18 Vic., No. 37).

In response to the application, the Senate offered to set apart a site of  $2\frac{1}{3}$  acres for the purpose near the St. Andrew's College sub-grant, provided that the Wesleyan body should have complied with the

necessary conditions for the establishment of a Wesleyan College, affiliated to the University, within a period of two years.

31. Leave of absence has been granted to Professor Gurney, Professor of Mathematics, for the year

1892, during which he proposes to visit Europe.

During his absence the duties of his office will be performed by Mr. W. E. Brunyate, B.A., Fellow of Trinity College, Cambridge, who is expected to arrive in Sydney from England before the beginning of Lent Term. Mr. Brunyate obtained a distinguished place in the Mathematical Tripos at Cambridge, and has had considerable experience in teaching.

32. The Senate has slightly increased the standard required on the part of candidates for Matriculation, by requiring a knowledge of Algebra to Quadratic Equations involving one unknown quantity, instead of Algebra to Simple Equations, and three books of Euclid in lieu of one.

33. The Senate has to record the death, in September, of the Hon. Geoffrey Eagar, who had rendered valuable services to the University as Auditor during a period of thirty-one years.

In order to fill the vacancy, the Senate appointed Mr. F. Kirkpatrick, Under Secretary for

Finance and Trade, to the position.

34. In the month of September, Mr. F. B. Guthrie, Demonstrator in Chemistry, resigned his office from the 1st of January, 1892, in consequence of his appointment as Analyst to the Department of Agriculture.

In order to fill the vacancy thus created, the Senate has requested Professor Thorpe, of the Royal School of Mines, London, and Professor Ramsay, of University College, London, to select and appoint a Demonstrator to take office in the beginning of the next Academic Year.

35. In the month of October, a communication was received from Professor Threlfall, requesting the Senate to take into consideration the question of the establishment of a curriculum in Electrical Engineering, and pointing out that such a curriculum could be established at a cost of not more than

£200 or £300 for apparatus, and without additional expense for teaching staff.

The matter having been carefully considered by the Senate, after reference to the Faculty of Science, it was deemed desirable that the suggestion should be carried out, and a code of By-laws to

regulate the curriculum adopted.

These By-laws provide that the curriculum shall lead to the degree of Bachelor of Engineering in the Department of Electrical Engineering, and that it shall extend over three years, during which the subjects of study shall correspond as far as possible with those prescribed in the other departments of engineering; but special courses of instruction, both theoretical and practical, will be given in Electrical

Engineering and kindred subjects.

36. The Senate has determined to make certain modifications in the arrangement of classes in Modern Literature, which it is hoped will diminish the labour without decreasing the efficiency of the teaching. Instead of delivering a separate course to each year, the Professor will deliver a Senior and Junior course, and students of the Third Year will be permitted, if they choose, to take the Senior course with order to proceed additional course with additional course with additional course with a delivery and students of the Third Year will be permitted, if they choose, to take the Senior course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery course with a delivery cour

with certain prescribed additions.

37. The subject of Modern Literature has also been added to those for which candidates for the degree of M.A. may present themselves.

38. Two alterations have been made in the regulations for conducting the Junior Public Examina-By the first, candidates for that examination will be permitted to present themselves in Music; the second requires all candidates after the 1st of September, 1893, to pass in at least four subjects before gaining a certificate.

39. In the month of December a communication was received from Miss Helen P. Phillips, tutor to the women students, resigning her office from the commencement of June, 1892. Steps will be taken to

fill the vacancy early in the year.

40. The Senate has to report the death, in the month of December, of the Hon. Sir William Macleay, who was a Fellow of the Senate for seventeen years, and took a very active part in its councils, especially in matters relating to the Faculty of Science. He was also a most liberal benefactor of the University, having presented to it in 1887 his valuable Museum of Natural History together with £6,000 to make provision for a curatorship in connection with it. He has also bequeathed sums of £12,000 and £35,000 in which the University will benefit, and which are mentioned in another part of this report.

### Benefactions.

41. A sum of £100 bequeathed by the late Hon. William Grahame, the income to be applied in providing annually a gold medal, to be called the "Grahame Prize Medal," to be awarded to such candidate as shall display the greatest proficiency at the senior public examination.

42. The nomination to a Science Scholarship of £150 per annum offered by the Commissioners of the Royal Exhibition of 1851. The nominee to this scholarship must be a distinguished student of science of three years' standing, and he will be required to pursue his researches in some University or institution approved by the Commissioners, with a view of developing the industries and manufactures of his country.

43. In the month of July a further sum of £25,000 was handed to the University by the Australian

Trustees of the Challis Estate, being a portion of the proceeds of the sale to the New South Wales Government of land at Woolloomooloo Bay.

44. The Senate has received from Sir Charles Nicholson—at one time Chancellor of the University—a large number of copies of a work published by him entitled "Egyptiaca," being a catalogue of the Egyptian antiquities presented by him to the University, together with certain original papers read by him before the Royal Society of Literature on "Egyptian Antiquities." Sir Charles Nicholson desired that a certain number of these copies should be presented to persons whom he named, and that the remainder should be sold for the benefit of the Egyptian Exploration Fund.

45. The late Sir William Macleay bequeathed to the University the sum of £12,000 for the establishment and maintenance of a professorship or lectureship in Bacteriology, under certain conditions laid down in a memorandum attached to his will, and which the Senate decided to accept.

He also bequeathed the sum of £35,000 to the Linnean Society of New South Wales for the establishment of fellowships in Biological Science of the annual value of £400 to be awarded to graduates in science of the Sydney University.

46. The annual statements of receipts and expenditure, duly certified by the auditor, Mr. F. Kirkpatrick, and also a statement showing the condition of the various private foundations of the University

patrick, and also a statement showing the condition of the various private foundations of the University are appended to this report.

> H. E. BARFF, Registrar.

ROBERT A. DALLEN, Accountant. 1892-3.

### NEW SOUTH WALES.

# UNIVERSITY OF SYDNEY.

(REPORT FOR 1892.)

Presented to Parliament, pursuant to Act 14 Vic. Ao. 31, sec. 22.

REPORT of the University of Sydney for the year ended 31st December, 1892.

- 1. The Senate of the University of Sydney, in pursuance of the Act of Incorporation, 14 Victoria No. 31, has the honor to transmit the account of its proceedings during the year 1892, for the information of His Excellency the Governor and the Executive Council.
- 2. Out of a total of 194 candidates who presented themselves for the ordinary matriculation examination in March, 124 qualified themselves for matriculation. In addition to this number, 22 passed the senior public examination, and 119 the junior public examination, in the subjects prescribed for matriculation, and 35 passed the equivalent matriculation examination for solicitors' articled clerks. For the March entrance examination for the Faculties of Medicine and Science and the Department of Engineering there were 16 candidates, of whom 7 were successful.
- 3. The following are the numbers of students who presented themselves and passed successfully in the various University Examinations held in December, 1891, and March, 1892:—

	Facu	ilty of a	Arts.		
TA:		•		Candidates.	Passed.
First year examination	•••	• • •	• • •	146	108
Second year examination	•••	•••	4	102	82
Third year examination				48	42

27 evening students, in addition to those included above as having passed in the whole of their respective examinations, passed in individual subjects at the various yearly examinations.

- * Several of the students in this Faculty are re-enumerated under the Faculty of Arts, having taken the Intermediate Examination in Law as part of their B.A. Examination.
- 4. The following are the numbers of matriculated students attending lectures in the various faculties during the year:—Faculty of Arts, 372, including 120 evening students; Faculty of Law, 34; Faculty of Medicine, 95; Faculty of Science, 20; Department of Engineering, 19; total, 540. In addition to the above the day lectures were attended by 19, and the evening lectures by 39 non-matriculated students. The total number of students for the year was thus, 598. The numbers of women students included in the above are as follows:—Faculty of Arts, 91; Faculty of Medicine, 7; Faculty of Science, 1; total, 99.
  - 5. The following degrees were conferred after examination:

Master of Arts (M.A.):—Christopher John Brennan, B.A.; Nicholas John Cock, B.A.; Matilda Meares, B.A.; Donald Murray, B.A.; John Hunter Stephenson, B.A.; John Alexander Watt, B.A.; Minnie F. Wearne, B.A.

Bachelor of Arts (B.A.):—William Addison Smyth Anderson, Ruth Bowmaker, William Edmund Byrne, John Connellan, Clarence Hudson Cooke, Charles Craig, William John Creagh, John Michael Edmunds, George Ernest Flannery, James Froude Flashman, Edward William Theodore Gerber, Aubrey Halloran, John Harris, Charles Howard Helsham, Alfred Theodore Huggart, Robert Matthew Kidston, Samuel Lasker, John Main, Francis Worthington Mannell, William Ernest Manning, Hyam Marks, William Archibald Alexander Maze, William Frazer McManamey, Thomas Henry Distin Morgan, James Egan Moulton, Broughton Barnabas O'Conor, Hubert de Burgh O'Reilly, William Arthur Parker, John Beverley Peden, Joseph Abraham Ralph Perkins, James Prosper Pickburn, Arthur James Prentice, Frederick Vicary Pratt, William James Rooney, Graham Ford Rutter, William Trotman Seaward, Henry Giles Shaw, Reginald Sullivan, William Tighe, Frederick Percy Woodward, Ernest Wootton, James Leslie Williams, Ella Wilson.

Doctor of Laws (LL.D.):—James Napoleon Manning, M.A., LL.B.

Bachelor of Laws (LL.B.):—Henry Raine Curlewis, B.A.; Arthur James Kelynack, B.A.; Sydney Mack, B.A.; John Meillon, M.A.

Bachelor of Medicine (M.B.):—Frederick Challands, Cyril Ernest Corlette, Robert Dick, Reginald Freshney, Charles Herbert Essery Lawes, John Patrick Daunt Leahy, Henry Lister, Herbert Lethington Maitland, Benjamin Armitage Newell, Joseph Park, Frederick John Thomas Sawkins, Frederick Charles Seymour Shaw, Frank Tidswell.

Master of Surgery (Ch. M.):—Frederick Challands, Cyril Ernest Corlette, Robert Dick, Reginald Freshney, Charles Herbert Essery Lawes, John Patrick Daunt Leaby, Henry Lister, Herbert Lethington Maitland, Benjamin Armitage Newell, Joseph Park, Frederick John Thomas Sawkins, Frederick Charles Seymour Shaw, Frank Tidswell.

Master of Engineering (M.E.): - James Vicars, B.E.

Bachelor of Engineering (B.E.):—Samuel Henry Barraclough, Norman John Campbell MacTaggart, James Waller Roberts, Charles Thomas Stephens.

6. The following Graduates of other Universities were admitted ad eundem gradum, in accordance with the provisions of the "Ad Eundem Degrees Act," 44 Victoria No. 22:—

Master of Arts (M.A.) :- Bella Halloran (née Guérin), M.A., Melbourne; Louisa Macdenald, M.A., London.

Doctor of Medicine (M.D.): -Michael John Lyden, M.D., Queen's College, Ireland; Wahab

McMurray, M.D., Queen's University, Ireland.
7. The total number of degrees conferred during the year was thus 90, divided as follows:— M.A., 9; B.A., 43; LL.D., 1; LL.B., 4; M.D., 2; M.B., 13; Ch. M., 13; M.E., 1; B.E., 4.

8. The following are the honors conferred at the Degree Examinations:-

Faculty of Arts-Honors at the B.A. Examination.

Classics—Latin—Class I:—W. A. Parker (University gold medal for Classics), J. B. Peden, F. V. Pratt. Class II:—Ruth Bowmaker, C. Craig.*

Greek—Class I:—W. A. Parker, J. B. Peden. Class II:—F. V. Pratt.

French—Class I:—Ruth Bowmaker, J. A. R. Perkins, C. Craig.* Class II:—Ella Wilson. English—Class I:—J. P. Pickburn.

Mathematics—Class II:—H. Marks and H. de B. O'Reilly, eq. Class III:—Ruth Bowmaker.

Logic and Mental Philosophy—Class I:—F. V. Pratt (University gold medal), J. B. Peden, J. M. Edmunds, F. W. Mannell.* Class II:—W. J. Rooney,* S. Lasker, W. F. Macmanamey,* R. M. Kidston,* E. Wooton, H. G. Shaw,* J. A. R. Perkins. Class III:—Ella

History-Class II :- E. Wooton.

Geology and Palæontology-Class II: -A. J. Prentice.

* Evening students.

Faculty of Law-Honors at Graduation as LL.B.

Class II:-J. Meillon, M.A., A. J. Kelynack, B.A. Class III:-H. R. Curlewis, B.A., S. Mack, B.A.

Faculty of Medicine-Honors at Graduation as M.B., Ch. M.

Class I :- R. Dick (University gold medal), F. J. T. Sawkins.

Faculty of Science—Department of Engineering—Honors at Graduation as M.E.

Class I:—J. Vicars, B.E. (University gold medal).

Honors at Graduation as B.E.

S. H. Barraclough, J. W. Roberts, N. J. C. MacTaggart.

9. The following Scholarships were awarded:-

(a) Matriculation Examination.

University Scholarship for general proficiency—E. C. Hall, and N. de H. Rowland,  $\alpha q$ . Cooper Scholarship, No. 11, for Classics—E. C. Hall. Barker Scholarship, No. II, for Mathematics—E. S. Simpson. Lithgow Scholarship for an Ancient and a Modern Language—N de H. Rowland and Eleanor M. Whitfield,  $\alpha q$ .

Horner Exhibition for Mathematics—E. S. Simpson.
Salting Exhibition—A. H. Garnery.

Salting Exhibition—A. H. Garnsey.

(b) First Year Examination in Arts.

Cooper Scholarship, No. III, for Classics—A. H. Garnsey. George Allen Scholarship for Mathematics—A. B. Davies.

(c)

(c) Second Year Examination in Arts.

Cooper Scholarship, No. I, for Classics—D. Levy. Barker Scholarship, No. I, for Mathematics—W. J. E. Davies.

(d) Intermediate Examination in Law.

G. Wigram Allen Scholarship-G. E. Flannery.

(e) First Examination in Medicine.

Renwick Scholarship for general proficiency—G. H. B. Deck.

Second Professional Examination.

John Harris Scholarship-G. E. Smith.

(f) Second Year Examination in Science.

Deas-Thomson Scholarship for Chemistry and Physics—J. H. D. Brearley. Deas-Thomson Scholarship for Geology—M. O'G. Hughes, B.A.

(g) First Year Examination in Engineering.

Levey Scholarship for Chemistry and Physics—H. P. Seale.

10. The following awards for Prize Compositions were made:-

University Prize for English Verse—subject, "The Death of Leichhardt"—J. Le Gay Brereton.
Professor Anderson's Medal for a Philosophical Essay—subject, "The Social Organism"— Henry Davis, B.A.

11. Prize Books, stamped with the University Arms, were awarded to those who obtained firstclasses in Honours at the yearly examinations :-

### Faculty of Arts.

First Year Examination.—Latin—A. H. Garnsey, D. S. Edwards, F. W. Wood.*
A. H. Garnsey. Latin and German—C. N. Mell. Mathematics—A. B. Davies.

Second Year Examination.—Classics—D. Levy. Latin and French—W. L. Atkins. English and French—Annie A. Kennedy. English—L. O. Martin. English and German—Lizzie Proctor. German—Joanna Barton. Mathematics—W. J. E. Davies. History—H. P. Abbott, G. C. Henderson, Amy I. Wearne, and F. L. Kendall. Logic and Mental Philosophy—Annie A. Kennedy, G. C. Henderson. Zoology—J. MacPherson.

*Evening student.

### Faculty of Medicine.

First Examination.—Chemistry and Physics—G. H. B. Deck. Second Professional Examination Passed with distinction—G. E. Smith. Passed with credit—A. S. Vallack.

### Faculty of Science.

Second Year Examination.—Biology-G. R. P. Hall, M. O'G. Hughes, B.A. Physics-J. H. D. Brearley.

### Department of Engineering.

First Year Examination.—Chemistry and Physics—H. P. Seale.

Second Year Examination.—Surveying, Descriptive Geometry, Drawing, and Field Book—W. H. Ledger.

12. Special Annual prizes were awarded as follows:—
Smith Prize for Physics—G. H. B. Deck. Slade Prize for Chemistry—A. R. Weigall.
University Prize for Physiography—T. Blatchford. Professor MacCallum's Prizes for English Essays—First Year, C. N. Mell; Second Year, Lizzie Proctor; Third Year, J. P. Pickburn and F. V. Pratt, eq. Norbert Quirk Prize for Mathematics—W. J. E. Davies. Professor Haswell's Prize for Zoology—J. MacPherson. Professor Anderson's Prizes for Logic and Mental Philosophy—Second Year, Eliza L. Abigail and F. L. Kendall, eq.; Third Year, F. V. Pratt and J. B. Peden, eq. Professor Wilson's Prizes for Regional and Surgical Anatomy—G. E. Smith; General and Descriptive Anatomy—E. H. Robison. Dr. MacCormick's Prize for Surgery—D. Luker. Professor Wilkinson's Prize for Pathology—G. E. Smith. for Pathology-G. E. Smith.

13. The following Bursaries, each consisting of a payment to the student of £50 per annum for three years, or in the case of a half bursary, £25 per annum together with exemption from the payment of lecture fees in non-professional schools were awarded:-

William Charles Wentworth Bursary, No. 1. William Charles Wentworth Bursary, No. 2 (one-half*).

Burdekin Bursary.

Hunter Bailie Bursary, No. 1.
Walker Bursary, No. 2 (one-half*).
Walker Bursary, No. 3.
Walker Bursary, No. 4.
Walker Bursary, No. 5 (one-half*).

* The other half in each case previously awarded.

In addition to 18 State Bursars and 24 holders of University bursaries, 12 students who had shewn their inability to defray the expenses of University education were permitted to attend lectures without the payment of fees. One hundred and two students of the Training Schools for Male and Female Teachers were also permitted to attend on a reduced scale, as arranged with the Minister of Public Instruction, and provided by Parliament.

14. The following Courses of Lectures, under the University Extension Scheme, were delivered

during the year

Lent Term.—Sydney-Subject: "Socialism." Lecturer, Professor Anderson, M.A.; number of students attending, 93; number who passed concluding examination, 24. Subject: "The Puritan Revolution." Lecturer, Professor Wood, B.A.; Subject: "The Puritan Revolution." Lecturer, Professor Wood, B.A.; number of students attending, 122; number who passed concluding examination, 16. St. Leonards—Subject: "The Idylls of the King and the Development of Arthurian Legend." Lecturer, Professor MacCallum, M.A.; number of students attending, 50; number who passed con-

cluding examination, 4.

Trinity Term.—Sydney—Subject: Political Economy, "Work and Wages." Lecturer, Professor Scott, M.A.; number of students attending, 33; number who passed concluding examination, 14. Woollahra—Subject: "Some Leaders of Modern Thought." Lecturer,

tion, 14. Woollahra—Subject: "Some Leaders of Modern Linguist. Declared, Mr. A. W. Jose; number attending, 113; number who passed concluding examination, 8. Michaelmas Term.—Sydney—Subject: Ancient History, "Greek Life and Art." Lecturer, Miss Louisa Macdonald, M.A.; number of students attending, 130; number who passed concluding examination, 20. Parramatta—Subject: English Literature, "Some Leaders of Lecturer, Mr. A. W. Jose; number attending, 30; number who Modern Thought."

passed, 4.

passed, 4.

15. The Senior and Junior Public Examinations were held in the month of September in Sydney, and in the following local centres:—Albury, Araluen, Armidale, Ballina, Bathurst, Bega, Bellingen, Berrima, Bombala, Bowral, Braidwood, Brewarrina, Brisbane, Broken Hill, Bundanoon, Burrowa, Casino, Cooma, Cootamundra, Cowra, Deniliquin, Dubbo, Dungog, Emmaville, Eurobodalla, Glen Innes, Goulburn, Grafton, Grenfell, Gunning, Hay, Hill End, Hunter's Hill, Inverell, Ipswich, Kempsey, Kiama, Lismore, Lithgow, MacKay, Maclean, West Maitland, Maryborough, Moruya, Mount Victoria, Mudgee, Murrumburrah, Narrandera, Narellan, Newcastle, Nowra, Nymagee, Orange, Parkes, Parramatta, Penrith, Picton, Plattsburg, Port Macquarie, Queanbeyan, Richmond, Rockhampton, Rylstone, Scone, Singleton, Tamworth, Taree, Tingha, Toowoomba, Townsville, Tumbarumba, Tumut, Ulmarra, Wagga, Warwick, Wellington, Windsor, Wollongong, Yass, Young.

One hundred and seventy-three candidates presented themselves for the Senior Examination, and

One hundred and seventy-three candidates presented themselves for the Senior Examination, and 2,132 for the Junior Examination. Of these 134 senior candidates and 1,467 junior candidates were

successful.

16. The prizes for General Proficiency at these examinations were awarded as follows:—

Seniors.

University Prize, John West Medal, and Grahame Prize Medal-

Mitchell, Ernest Meyer, Sydney Grammar School Strickland, Tom Percival, Sydney Grammar School

Dettmann, Herbert Stanley, Sydney Public High School, prox. acc.

Fairfax Prize for Senior Females-

Bloomfield, Elsie I'Anson, Miss Hyland, Randwick.

Kelly, Edward Henry, Jesuit College, Riverview.

Grant, Russell Walker, Brisbane Grammar School, prox. acc.

Fairfax Prize for Junior Females

Dey, Charlotte Johnston, Wellesley College, Newtown.

A complete analysis of the examinations will be found in the "Manual of Public Examinations" which accompanies this report.

17. Four examinations of candidates, for the Civil Service were held during the year. At these

243 candidates presented themselves, and 71 were successful.

18. Three Law Examinations, similar and equal in standard to that prescribed for Matriculation, for candidates for articles of clerkship with attorneys, were held. At these 77 candidates presented themselves, and 35 were successful.

19. During the year the Senate held 22 regular meetings, 3 adjourned, and 5 special meetings, in addition to 1 meeting of the conjoint Board, consisting of the Senate of the University and the Board of Directors of the Prince Alfred Hospital, and the Annual Commemoration.

The attendances of the various Fellows were as follows:-

20. In the month of January the Senate, through the Chancellor, forwarded to Her Majesty the Queen and Their Royal Highnesses the Prince and Princess of Wales, through His Excellency the Governor, a message of condolence in respect to the loss sustained by them in the death of the Duke of Clarence.

Fifteen meetings of the Finance Committee and eight meetings of various Select Committees of

the Senate have also been held.

21. In the month of January the death of the Hon. Sir John Hay, M.A., K.C.M.G., took place. The Senate by resolution placed upon record its sense of the great loss sustained by his death, Sir John Hay having rendered valuable service to the University as a Member of the Senate during the last twenty

22. In the month of February, at a convocation of electors, the Hon. Edmund Barton, M.A., M.L.A., was elected a Fellow of the Senate in the room of the Hon. Sir William Macleay, deceased.

23. In the month of March, at a convocation of electors, the Hon. Mr. Justice Charles James Manning, M.A., was elected a Fellow of the Senate in the room of the Hon. Sir John Hay, deceased.

24. In the month of February, Mr. H. C. Russell, B.A., resigned the office of Vice-Chancellor in consequence of pressure of other duties; in accepting the resignation the Senate placed upon record a sense of its regret at the loss of his services as Vice-Chancellor. At a special meeting held in the same month the Hon. A. Renwick, B.A., M.D., M.L.C., was elected and consented to fill the position during the

remaining period of Mr. Russell's term of office.

At the annual election in April to the office of Vice-Chancellor the Hon. A. Renwick, B.A., M.D., M.L.C., was elected, but in consequence of his appointment as Executive Commissioner at the Chicago World's Fair and his proposed absence from the Colony, in the month of July he resigned. His resignation was accepted with regret and leave of absence from the meetings of the Fenter Book have M.A. twelve months was granted and at the same meeting the Senate elected His Honor Judge Backhouse, M.A., to the office of Vice-Chancellor for the remainder of the Vice-Chancellor's term of one year.

25. In the month of March leave of absence from the meetings of the Senate from the 1st of April, for a period of twelve months, was granted to the Hon. H. N. MacLaurin, M.D., M.L.C., in con-

sequence of his proposed visit to Europe.

26. In the month of May leave of absence for a period of twelve months was granted to the Hon. P. Faucett, in consequence of his proposed absence from the Colony. Mr. Faucett in the same month resigned his ex-officio member of the Council of the Women's College and the Senate appointed Mr. C. B. Stephen, M.A., in his room.

27. The Hon. Peter Faucett, a valued member of the Senate, was appointed an additional delegate

to represent the University of Sydney at the Tercentenary Celebrations at Dublin University.

28. Leave of absence has been granted to Professor MacCallum, Professor of Modern Literature, for the year 1893, to enable him to visit Europe. During his absence the duties of his office will be performed by Mr. A. W. Jose (late of Balliol College, Oxford) and Dr. Trechmann, and Dr. Max the present Lecturers in the Department of Modern Literature in this University.

29. To fill the vacancy caused by the resignation of Miss Helen P. Phillips, Tutor to the Women

Students, Miss Jane F. Russell, M.A., who graduated with honors in Classics and Mathematics in her B.A. course in 1886, was elected in the month of July.

30. In the month of February a communication was received from Professor Thorpe, of the Royal School of Mines, and Professor Ramsay, of University College, London, notifying the selection and appointment, in accordance with authority given in September, 1891, of Mr. James Alexander Schofield, Associate of the Royal School of Mines, to the Demonstratorship in Chemistry in the room of Mr. F. B. Guthrie, resigned.

31. In the same month Mr. J. Morton, M.B., Ch.M., was reappointed Demonstrator in Anatomy

to the end of the year.

32. In the month of March, Mr. L. F. Armstrong, B.A., LL.B., was reappointed Curator of the Nicholson Museum for a period of one year.

33. In the month of July the Professor of Biology and Geology were reappointed a committee of

management for the Macleay Museum for a period of one year.

34. In the month of November the biennial election to the offices of Dean of the Faculty of Medicine and Dean of the Faulty of Science resulted in the re-election of Professor Stuart and Professor Liversidge respectively.

35. In the month of June the University Auditor, Mr. F. Kirkpatrick, Under Secretary for Finance and Trade, resigned on account of pressure of other duties. Mr. John C. Dibbs was elected in

the month of November, for a period of two years, to fill the vacancy thus caused.

36. In the month of April a letter was received from Professor Haswell, urging the appointment of a Demonstrator in Biology to assist him in the work of his department. It was resolved to comply with the request, and Professors Howes and Scott, of the Royal College of Science, South Kensington, were appointed a Committee to select a Demonstratorship at a salary of £350 per annum. In the month of September the Senate received a letter from these gentlemen, notifying the selection by them of Mr. James P. Hill for the office. That gentleman entered upon his duties in October.

37. In the month of June Mr. Sydney Jamieson, M.B., Ch.M., was appointed Curator of the Museum of Normal and Morbid Anatomy, at a salary of £100 per annum.

38. In the month of August application was made by Professor T. W. E. David, Professor of Geology, for the services of a Demonstrator, in order to assist him in the work of his department, which had rapidly increased. The Senate resolved to comply with the request, and from the increase in lecture fees to provide a salary of £350 for the Demonstrator; and Professor Judd, of the Royal School of Mines, South Kensington, and the Hon. Sir Saul Samuel, K.C.M.G., Agent-General for New South Wales, were requested to select a suitable candidate. In October the Senate was notified of the appointment of Mr. W. F. Smeeth to the office.

39. In the month of March the Senate considered the question of the appointments necessary for the teaching of Mining and Metallurgy in accordance with the curriculum for the Degree in Mining Engineering, and appointed Professor W. C. Roberts Austen, C.B., F.R.S., Chemist of the Royal Mint and Professor of Metallurgy, Royal School of Mines, and Professor Thorpe, B.Sc., F.R.S., &c., Professor of Chemistry, Royal School of Mines, London, to select and appoint a gentleman to fill the office of Lecturer

Lecturer in Metallurgy and Demonstrator in Assaying and Chemistry under the Challis Fund, and at a salary of £450 per annum. Application was also made to the Department of Mines that, by way of commencement of special instruction in Mining, the services of Mr. E. F. Pittman, Government Geologist, should be placed at the disposal of the University for the purpose of delivering a course of sixty Lectures in Mining 1893, and upon payment to him from the Challis Fund of an honorarium of £150, to which the Secretary of Mines and Agriculture assented. Mr. Pittman has accepted the

appointment, and commences his lectures in Lent Term, 1893.

In the month of July a communication was received from Professor Roberts Austen and Professor Thorpe, notifying the selection of Mr. Savannah J. Speak to the office of Lecturer in Metallurgy and Demonstrator in Assaying and Chemistry; and Mr. Speak entered upon his duties in the same month.

40. In the month of December the Senate resolved that, as the University had established a full curriculum in mining, and was urgently in need of apparatus and diagrams and additional accommodation for the Department of Geology and Mineralogy, applications be made to the Government that, from the unexpended vote of £10,000 for the establishment of a School of Mines, sums of £1,300 and £8,000 respectively might be provided. The applications have been granted, and it is understood that plans for

the necessary alterations and enlargement of buildings are in course of preparation.

41. In order to carry out the resolutions passed in regard to ex-officio memberships, the Senate in the month of June amended the by-law, and declared that the following were the selections of branches of learning, the Professors in which shall be ex-officio members of the Senate for a period of two years—

that is to say, Greek, Law, Physiology, and Chemistry.
42. In the month of July the Chancellor submitted to the Senate a draft Bill further to amend the Sydney University Incorporation Act, together with an explanatory memorandum on the subject which he had prepared, which Bill he had based principally on the resolution, passed by Convocation and by the Senate from time to time, and in which certain original propositions were also introduced by him. The Bill and memorandum were referred to a Committee, consisting of the Chancellor, the Vice-Chancellor, the Hon. Sir William Windeyer, J., Professor Liversidge, the Hon. R. E. O'Connor, Mr. H. C. Russell, the Hon. Mr. Justice Manning, Mr. Alexander Oliver, Mr. F. E. Rogers, and Mr. C. B. Stephen, to consider and report thereon.

In the month of August the Committee presented its report, and the Senate subsequently proceeded to consider the clauses of the Bill seriatim. The discussion of the Bill, though extended over several ordinary and special meetings of the Senate, is not yet concluded.

43. The Senate has had under consideration the question raised by the Minister of Public Instruction in regard to the teaching of electrical science at the University and at the Technical College, in order that there shall not be any overlapping of the work undertaken in both institutions, and the report of Professor Threlfall, who had been authorised to confer with the authorities of the Technical College, and in the month of April appointed a Select Committee, consisting of the Chancellor, the Vice-Chancellor, and Mr. Russell, to consider the real nature of the co-operation proposals of the Technical Branch of the Department of Public Instruction with the University, and to report to the Senate. Committee was also empowered to interview the Minister with reference thereto. The report The report was presented to the Senate in July, and it was ordered that the following resolutions should be sent to the Minister of Public Instruction for his consideration and approval.:

1. That, having regard to the vital importance which electrical engineering is certain to acquire, it is very desirable that the University should impart the necessary instruction in it and give direction

to original research in electrical science.

2. That it is expedient that this institution, as being the country's principal seat of learning, should be solely charged with all the higher teaching in this subject, by means of its Professor of Physics and of an efficient laboratory and advanced apparatus, and that it is undesirable that public instruction in it should be duplicated.

3. That it is desirable that the Technical College should abandon so much of its scheme for electrical engineering as relates to its proposed third year in that subject, and that such of its students as shall, after their second year in the College, have reached a standard qualifying them for the third year classes under the University curriculum should be admitted to those classes without matriculation.

4. That such students shall be subject to University Examinations in common with the University's ordinary students, and shall in case of success therein be entitled to certificates from the

University to that effect.

5. But inasmuch as the University does not at present possess so complete a laboratory, and such advanced apparatus as its third year course of study in this subject demands, provision should

be made for the purpose.

- 6. That in the event of the Technical College deciding to abandon so much of its scheme as it comprises in its third year, it be suggested that the provision already made by Parliament for a laboratory and apparatus adapted only to such third year, may, with the authority of the Government and Parliament be diverted from the Technical College to the University; or that so much thereof as may be necessary for completing the University's existing laboratory and apparatus may be so applied.
- 44. The subject of Modern History has been added to those in which candidates for the degree of M.A. may elect to be examined.

45. Amendments have been made in the by-laws of the Faculty of Medicine, by which some subjects in the first, second, third, and fourth Years of the course for the degree of M.B., Ch.M., are transposed, and under which examinations are to be held at the end of each year of the course.

46. An University Extension Board, with fuller powers than those previously possessed by the University Extension Lectures Committee, was created under by-laws passed in the month of August, which are as follows:

Chapter 25 by-law:-

1. There shall be a Board, to be called the University Extension Board, consisting of not less than ten nor more than twelve persons, of whom four at least shall be members of the Senate, and four at least shall be members of the teaching staff, and not less than two shall be persons not being members of the Senate or of the teaching staff. The Board shall be appointed annually by the Senate, all members being re-eligible, and any vacancies which occur during the year shall be filled up by the Senate for the remainder of the year.

2. The Board shall, at its first meeting after its appointment in each year, elect a Chairman for the year, and may recommend to the Senate the appointment of a Secretary, the tenure of whose office and the amount of whose salary (if any) shall be determined by the Senate. The Chairman shall convene meetings of the Board, and three members shall form a quorum.

3. All action taken by the Board shall be subject to the by-laws and to any directions which

may be given by the Senate.

4. The Board shall, from time to time, recommend to the Senate the names of certain persons to be authorised for employment as University Extension Lecturers, and the Senate shall, at its discretion, authorise the employment of such persons to deliver lectures under the direction of the Board.

5. The Board may appoint any persons, whose employment as Lecturers has been authorised by the Senate, to deliver such courses of Lectures, and to hold such classes and examinations

on such subjects, and at such times and places, as the Board may see fit.

6. The Board shall determine the tenure of office of the Lecturers, the duties to be performed by them, the fees and charges to be paid for the Lectures, classes and examinations, and the mode and time of payment of the fees and charges.

7. The payments to be made to the Lecturers shall be determined by the Board, in accordance with regulations, as to the rate of payment to be laid down by the Senate.

8. The Board shall make all other arrangements requisite for the delivery of Lectures and the holding of classes and examinations, and may award such certificates as it shall think fit.

9. The fees received, together with any Government grant, donations, and such sums as may from time to time be assigned for the purpose by the Senate shall be the fund for the payment of Lecturers and other expenses. The fund shall be deposited in a bank in the name of the University Extension Board, and all payments from the fund shall be made by cheques, signed by the Chairman or two other Members of the Board, and by the Secretary.

10. The Board shall, in the month of December in each year, lay before the Senate a report of

its proceedings of that year, with a statement of its finances.

Under selections since made by the Senate the Board as at present constituted is composed of twelve persons, of whom four are Members of the Senate, four are members of the Teaching Staff, and four who are not members of the Teaching Staff nor of the Senate, viz.:—The Vice Chancellor (His Honor Judge Backhouse), Mr. H. C. Russell, B.A., Dr. P. Sydney Jones, the Hon. Sir William Windeyer, Professor Scott, Professor Anderson, Professor Wood, Professor David, Mr. A. W. Jose, Mr. J. H. Carruthers, M.L.A., Mr. G. Boyce Allen, B.A., and Mr. Herbert Goode, re.

47. Amendments have been made in the by-laws by which the Professorial Board has fuller powers in regard to matters concerning the discipline, studies and examinations affecting the students of more

than one Faculty

48. Candidates for the Degree of Master of Engineering are now required to have attained the standard for honors in the professional subjects of the Examination for the Degree of B.E., before being admitted to the examination in one of seven branches of Engineering enumerated.

Amendments have also been made in the by-laws relating to the course for the Degree of Bachelor

of Engineering in Mining and Metallurgy.

49. By-laws for the regulation of the Finances of the University have been made and approved.

50. In the month of May the Senate resolved that a sum of £100 should be devoted to the purchase of plaster casts of rare Egyptian relics in the British Museum under the selection of Sir Chas. Nicholson

and for the Museum bearing his name.

51. The Senate upon application of the Minister of Public Instruction resolved to exempt State Bursars to the number of thirty in each year, from the payment of the fees for the Junior and Senior

Public Examinations.

- 52. Representations have been made to the Royal College of Physicians, London, and the Royal College of Surgeons, England, in order that graduates of this University (and other Australian Universities) may be placed upon the same footing as graduates of the Universities of the United Kingdom in regard to admission to the Final Examination of the L.R.C.P. and M.R.C.S. of the respective Colleges
- 53. Representations have been made to the Judges of the Supreme Court with a view of obtaining from them for the future a recognition of the LLB. Degree as an equivalent for the Final Solicitor's

54. It has been resolved that Physiology shall be included as a subject of the Junior Public Examination.

55. The need of further and more suitable accommodation for a library has been brought under the notice of the Minister of Public Instruction during the year and he has been requested to propose to Parliament a vote of £25,000 towards the erection of a building to be known as the Fisher Library—the Senate renewing its proposal to give a similar amount from the fund left by the late Thomas Fisher for

56. The Senate has, in response to the invitation of the Commissioners of the Chicago Exposition, forwarded certain exhibits from the Macleay Museum and the Chemical and Physical Laboratories, and has also caused larger photographs of the exterior and interior of the University Buildings to be prepared

and sent.

57. In the month of March the Senate nominated Mr. S. H. Barraclough, a Third Year Student in Engineering, who had taken first-class honors in the final examination for the B.E. Degree, for the Science Scholarship offered by Her Majesty's Commissioners for the Royal Exhibition of 1851. He

proceeded at once to America, and is at present studying at Cornell University.

58. At the same meeting the Senate awarded the James King, of Irrawang, Travelling Scholarship, of £150 for two years, to Mr. C. J. Brennan, B.A., who had distinguished himself in Classics and Philosophy throughout his B.A. course, and who had passed his examination for the M.A. Degree with honors in

Philosophy. He shortly proceeded to Germany to prosecute special studies.

59. It having been pointed out by the Chancellor to Mrs. Frazer and the Trustees of the Will of the Hon. J. Frazer that the benefaction of £2,000 under the will of the late Hon. J. Frazer, towards the foundation of a Chair in Ancient and Modern History, had been received after the Chair of History had been

been fully established under the Challis Fund, and that it seemed therefore to be expedient to apply the fund to Scholarships in History, a letter was received in June from the Trustees stating that Mrs. Frazer (with whom the question practically rested) desired that the amount of the bequest should be devoted to the foundation of one Scholarship (not a travelling one) in History. The Senate resolved to comply with the request, and conditions of award have been drawn up in regard thereto.

60. In the month of July the Architect's plans for the proposed College for Women were sub-

mitted by the College Council and approved.

61. On the representations of the Council of the Women's College, the Senate joined with the Council in its application to the Minister of Public Instruction for an exchange of building sites between the Training College and the College for Women. The Minister acquiesced in the proposed exchange, and the boundaries of the respective shave been fixed by mutual accord and by the Senate's authority. The site for the Women's College will take a frontage to Bligh-street, and that for the contemplated Training College, when established as a College within the University, will be adjoining it, and be made accessible by a new road of 50 ft. in width, to which the Council of St. Andrew's College have contributed 17 ft. on conditions which have been accepted.

62. In the month of December the seat of the Hon. R. E. O'Connor, M.A., M.L.C., was declared vacant under by-law 8, chap. II. A convocation of electors has been called for 4th February, 1893, for the

purpose of electing a Fellow to fill the vacancy on the Senate.

P.S.—Mr. O'Connor was re-elected on 4th February, without opposition.

#### Benefactions.

63. (a) The nomination to a Science Scholarship of the value of £150 per annum, offered by Her Majesty's Commissioners of the Royal Exhibition of 1851, on the same terms as previousĺv.

(b) In the month of June, a bust of Robert Brown, the Botanist, was received from Lady

Macleay in the name of the late Sir George Macleay.

(c) In the month of September, the sum of £11,400, being the amount (less legacy duty) bequeathed by the late Hon. Sir William Macleay for the establishment and maintenance of a Professorship or Lectureship in Bacteriology was received, and it was referred to the Faculties of Medicine and Science to report to the Senate upon the teaching of the subject in terms and conditions of the will and memorandum therein referred to.

(d) In the month of December, a sum of £75 was received from the executors of the will of the late Rev. R. Collie for the foundation of an annual prize in Botany, to be called "The Collie Prize."

64. The annual statements of receipts and expenditure, duly certified by the auditor. Mr. J. C. Dibbs, and also a statement showing the condition of the various private foundations of the University at 31st of December are appended to this report. In the case of the Challis Fund, all temporary excesses of income beyond normal rates are placed in reserve to meet casualties, and to equalise income, prospectively, for a scale of expenditure, permanently fixed by appointments under the Fund, and also to provide for the quinquennial increases of salary to which the Challis Professors will be entitled in lieu of fees, and for other incidental purposes.

#### LEGISLATIVE ASSEMBLY.

### SOUTH WALES.

# UNIVERSITY OF SYDNEY.

(NEW BY-LAWS.)

Ordered by the Legislative Assembly to be printed, 13 September, 1892.

New By-laws adopted by the Senate at a meeting held on Monday, 4th April, 1892.

To stand as Chapter 26—Finance.

1. The general supervision of the financial affairs of the University shall, subject to the direction and control of the Senate, be entrusted to a Finance Committee, consisting of the Chancellor, the Vice-Chancellor, and three elected Fellows of the Senate, of which number three shall constitute a quorum.

2. The elected members of the Committee shall be chosen annually by the Senate, and shall remain in office until their successors shall have been appointed. All casual vacancies shall be notified by the Registrar at the next meeting of the Senate, and shall be filled by the Senate as soon thereafter as conveniently may be.

3. The Finance Committee shall meet once a month, and at such other times as the Senate shall have directed, or when it shall be summoned by the Registrar under the direction of the Chancellor or

4. The Registrar shall attend all meetings of the Committee, and shall keep due records and minutes of their proceedings, and shall act generally as executive officer of the Committee. And the University Solicitor may be required by the Committee to attend any of its meetings with reference to

the investments or other matters requiring legal advice or assistance.

5. It shall be the duty of the Finance Committee to submit to the Senate towards the end of each academic year an estimate of the expected revenue for the next ensuing year, together with a statement of the proposed expenditure as already authorised by the Senate or apprehended to be necessary, such estimates and expenditure to be arranged under as many heads as shall be convenient. And the Senate shall as soon after as may be consider such estimates and pass votes for expenditure during such coming year, which votes shall not be exceeded unless upon special grounds and on the report of the Finance Committee that sufficient funds are available for the expenditure.

6. The Finance Committee shall as soon as practicable after the close of each academic year submit to the Senate a report and a duly audited statement of the accounts and transactions during the

7. The Registrar and Accountant shall present to the Finance Committee in each month a statement showing, with such details and particulars as the Committee shall have required, the full state and condition of the University's financial affairs at that time; and the Registrar shall then inform the Committee of all financial matters proper to be considered at that meeting, and shall produce the Bank Pass Books of the University made up to the preceding day.

8. The Finance Committee shall once in each month present a report setting forth a pay-sheet for the disbursements required for that or the next month, as occasion may arise, in accordance with the general estimates and votes for expenditure for the current year, or with any specific order previously made by the Senate, and also setting forth any other demands which the Committee shall, after inquiry

and examination, see reason to submit for allowance and payment in that month.

9. The Finance Committee shall also in each month present to the Senate a report showing the 9. The Finance Committee shall also in each month present to the Senate a report showing the general state and condition of the University's financial affairs, and setting forth all receipts and disbursements since the last preceding report of like character, and shall therein distinguish all loans and repayments of loans from other disbursements and receipts; and the Committee shall at such meeting, and at other meetings, promptly report any default in the payment of interest on any investment or in the payment of any principal money which may be due to the University.

10. No expenditure of the funds of the University, otherwise than by way of investment on loan, upon the authority of the Finance Committee, with the approval of the Chancellor or Vice-Chancellor, shall be made unless the same shall have been authorised by the Senate.

11. All moneys received on behalf of the University shall be forthwith paid by the Registrar to the credit of the University at its bank of deposit on general or special account, as the case may require.

the credit of the University at its bank of deposit on general or special account, as the case may require.

12. All disbursements of money belonging to the University, whether the same shall be by way of payment or of investment, shall be by cheques on the University's bank, signed by two members of the Senate, and countersigned by the Registrar. And in case the seal of the University shall be required to any deed or instrument relating to investments, or to the return of moneys lent from the capital moneys of the University, the same may be affixed by the Chancellor or Vice-Chancellor. The investment of moneys shall be confined within the following classes of securities: moneys shall be confined within the following classes of securities:

(a.) Deposit with the Government of the Colony at interest, if allowed by the Government for the

time being.

(b.) Purchase of Debentures or Inscribed Stock, or Treasury Bills, or other form of security issued by the Governments of any of the Australian Colonies.

(c.) Debentures or other loan issues of Municipal or other public bodies within this Colony, having statutory powers to borrow moneys within limits then open, or of any incorporated body or society having such authority and within such limits.

(d.) Mortgages of land and premises held in fee-simple to the extent of two-thirds the estimated

value with sufficient insurance on destructible improvements or articles included in such

(e) Mortgages of leasehold lands or premises held under leases which will have not less than thirty years to run at the date of expiration of such mortgages, to an extent not exceeding three-fifths of like approved estimates and with like insurance on destructible improvements or

Deposits at interest in any bank in the Colony.

(g.) Purchase of freehold or leasehold lands, with or without improvements, provided that no such investment shall be made without the special authority after special notice of a meeting of the Senate, at which two-thirds of the members shall be present at the time of authorising same.

> ARTHUR RENWICK, Vice-Chancellor.

ROBERT A. DALLEN, Acting Registrar.

Laid before the Executive Council on 7th day of June, 1892.—ALEX. C. BUDGF, Clerk of the Council. JERSEY.

#### NEW SOUTH WALES.

# OF SYDNEY.

· (AMENDED BY-LAWS.)

Presented to Parliament, pursuant to Act 14 Dic. Ao. 31, sec. 21.

Amended By-laws adopted by the Senate at a meeting held on the 20th of June, 1892.

To stand in lieu of chap. 2, sec. 14, 15.

14. That the several By-laws, in virtue of which the following Professors now sit as ex-officio members of the Senate, under the authority of the "Sydney University Incorporation Act Amendment Act of 1861,"—that is to say, the Professors of Greek, of Mathematics, of Chemistry, of Physiology, and of Law, be and the same are hereby revoked; and, in lieu thereof, the Senate hereby makes and declares the following selections of branches of learning, the Professors in which shall be ex-officio members of the Senate—that is to say, Greek, Law, Physiology, and Chemistry, such selections to take effect from the date of the Governor's assent hereto, and to endure for the term of two years from that date, unless sooner revoked by the authority of the Senate, and with the approval of the Governor.

### To stand in lieu of chap. 7, sec. 3.

3. In the event of the office of Dean becoming vacant by death, resignation, or otherwise before the expiration of the full term of office herein prescribed, the appointment of a successor shall be proceeded with at the next ensuing regular meeting of the Senate; and the Dean so appointed shall hold office until the first regular meeting of the Senate in the Term next after the expiration of two years of the date of such appointment.

To stand in lieu of chap. 15, sec. 26.

26. Candidates for the degree of M.A. shall elect to be examined in one or more of the following branches of knowledge:

Classical Philology and History.
 Mathematics and Natural Philosophy

Logic, Moral, Mental, and Political Philosophy.

Modern Literature and Language.

5. Modern History

The candidate most distinguished in each branch of the examination shall, if he possess sufficient merit, receive a gold medal.

To stand in lieu of chap. 17, sec. 8.

8. Candidates for the degrees of Bachelor of Medicine and Master of Surgery shall attend the following courses of instruction, and present the following certificates:—

1. In the First Year— Inorganic Chemistry and Practical Chemistry.

Physics and Practical Physics. Biology and Practical Biology.

2. In the Second Year-

During Lent and Trinity Terms-

Descriptive Anatomy (Junior Course).

Physiology (Junior Course).

During Trinity and Michaelmas Terms—

Practical Physiology (Histology and Experimental Physiology).

During Michaelmas Term

Organic Chemistry.

Descriptive Anatomy (Senior Course).

3. In the Third Year-

During Lent Term-

Practical Physiology (Physiological Practical Chemistry).

During Lent and Trinity Terms—

Materia Medica and Therapeutics.

Regional Anatomy. During Michaelmas Term

Physiology (Senior Course).

259-

4. In the Fourth Year-

During Lent and Trinity Terms-

Pathology.

Surgery.

Operative Surgery and Surgical Anatomy—a course of twenty five (25) hours instruction.

Clinical Surgery. Tutorial Surgery.

During Michaelmas Term-

Medical Jurisprudence and Public Health.

Practical Pathology. Clinical Surgery. Tutorial Medicine.

5. In the Fifth Year-

During Lent and Trinity Terms-

Medicine.

Midwifery and Gynecology.

During Michaelmas Term-

Applied Logic.

Psychological Medicine, including Clinical instruction, and at least twelve systematic lectures.

Ophthalmic Medicine and Surgery, including Clinical instruction and at least twelve systematic lectures.

Before admission to the Final Examination, candidates shall also be required to present the following certificates at least ten clear days before the date of the examination:

1. Of Hospital Practice during the Fourth and Fifth years.

2. Of attendance on Practical Pharmacy, or a certificate showing that the student has been engaged for at least three months, by apprenticeship or otherwise, in compounding and dispensing drugs in the laboratory of a hospital or dispensary, or of a Licentiate of the London or Dublin Society of Apothecaries or Pharmaceutical Chemist approved by the Faculty of Medicine.

3. Of having acted during at least three months as a Dresser in the Out-patients Department, during at least six months as a Dresser in the Surgical Wards, and during at least six months as a Clinical Clerk in the Medical Wards of a recognised hospital.

4. Of attendance on Post-mortem Examinations during at least one Term during the Fourth or Fifth year of the curriculum.

5. Of attendance on at least twelve cases of Practical Midwifery.

6. Of proficiency in Vaccination, signed by a legally qualified Medical Practitioner.
7. Of proficiency in the administration of Anæsthetics.

### To stand in lieu of chap. 17, sec. 9.

9. For the Degrees of Bachelor of Medicine and Master of Surgery, there shall be five examinations, viz., one at the end of each year of study.

The examination at the end of the First Year shall include Inorganic Chemistry, Physics, Biology. The examination at the end of the Second Year shall include Organic Chemistry, and an Inter-

mediate Examination at the end of the Second Tear shall include Organic Chemistry, and an Intermediate Examination in Anatomy and Physiology.

The examination at the end of the Third Year shall include the entire subjects of Anatomy, Physiology, and Materia Medica, and Therapeutics.

Before admission to the Third Examination candidates shall be required to present certificates of having dissected during at least six Terms and of having completed the dissection of every part of the body at least once.

The examination at the end of the Fourth Year shall include Pathology, Medical Jurisprudence,

and Public Health, and Operative Surgery and Surgical Anatomy.

The examination at the end of the Fifth Year shall include Medicine, Clinical Medicine, Surgery, Clinical Surgery, Midwifery, Psychological Medicine, Ophthalmic Medicine and Surgery, and Applied Logic.

### To stand in lieu of chap. 17, sec. 10.

10. Before admission to the final examination each candidate shall furnish a declaration of having completed his twenty-first year, and also a certificate of good fame and character signed by two competent

To stand in lieu of chap. 17, sec. 23.

23. Undergraduates in Medicine who have passed the subjects of the Second and Third Medical Examinations, and have in addition attended an advanced course of and passed an advanced examination in one of the following divisions, viz.:—(a) Chemistry, (b) Physics, (c) Biology, (d) Geology, may, on the report of the Dean of the Faculty of Science, be admitted by the Senate to the degree of Bachelor of Science.

W. M. MANNING, Chancellor.

ROBERT A. DALLEN, Acting Registrar.

Laid before the Executive Council, on the 6th September, 1892,-

A. C. BUDGE, Clerk of the Council.

JERSEY.

Amended

Amended and New By-laws adopted by the Senate at a meeting held on Tuesday, the 2nd of August, 1892.

Sections 7, 8, 9, and 10, of Chapter 24, to be repealed; the present Chapters 25 and 26 to be 26 and 27.

#### To stand as Chapter 25.

- 1. There shall be a Board, consisting of not less than ten, nor more than twelve, persons, of whom four at least shall be members of the Senate, and four at least shall be members of the Teaching Staff, and not less than two shall be persons not being members of the Senate or of the Teaching Staff. The Board shall be appointed annually by the Senate, all members being re-eligible, and any vacancies which occur during the year shall be filled up by the Senate for the remainder of the year.
- 2. The Board shall at its first meeting after its appointment in each year elect a Chairman for the year, and may recommend to the Senate the appointment of a Secretary, the tenure of whose office and the amount of whose salary (if any) shall be determined by the Senate. The Chairman shall convene meetings of the Board, and three members shall form a quorum.
- 3. All action taken by the Board shall be subject to the By-laws, and to any directions which may be given by the Senate.
- 4. The Board shall from time to time recommend to the Senate the names of certain persons to be authorised for employment as University Extension Lecturers, and the Senate shall at its discretion authorise the employment of such persons to deliver lectures under the direction of the Board.
- 5. The Board may appoint any persons whose employment as Lecturers has been authorised by the Senate to deliver such courses of lectures, and to hold such classes and examinations on such subjects, and at such times and places, as the Board may see fit.
- 6. The Board shall determine the tenure of office of the Lecturers, the duties to be performed by them, the fees and charges to be paid for the lectures, classes, and examinations, and the mode and time of payment of the fees and charges.
- 7. The payments to be made to the Lecturers shall be determined by the Board in accordance with regulations as to the rate of payment to be laid down by the Senate.
- 8. The Board shall make all other arrangements requisite for the delivery of lectures and the holding of classes and examinations, and may award such certificates as it shall think fit.
- 9. The fees received, together with any Government grant, donations, and such sums as may from time to time be assigned for the purpose by the Senate, shall be the fund for the payment of Lecturers and other expenses. The fund shall be deposited in a bank in the name of the University Extension Board, and all payments from the fund shall be made by cheques signed by the Chairman or two other members of the Board and by the Secretary.
- 10. The Board shall, in the month of December in each year, lay before the Senate a report of its proceedings of that year, with a statement of its finances.

### To stand in lieu of Chapter 17, Section 7.

7. Candidates for a degree in Medicine shall, before admission to the Medical School, produce candidates for a degree in Medicine shall, before admission to the Medicine School, produce evidence of having graduated in Arts or in Science, or of having attended the lectures of the First Year of the Arts Course, and passed the First Year Examination in Arts, or of having passed the Senior Public Examinations in the following subjects, viz.:—Latin, and one of the three languages—Greek, French, German, and in three of the sections in Group 3, viz.:—Arithmetic, Algebra, Geometry, Trigonometry, Elementary Surveying and Astronomy, Mechanics, Applied Mechanics.

### To stand in lieu of Chapter 22, Section I.

1. The Academic costume shall be for:

The Chancellor and Vice-Chancellor—a robe and cap similar to those worn by the Chancellor of the University of Oxford. In undress, the silk gown worn by other members of the Senate, black velvet cap and gold tassel.

A member of the Senate—the habit of his degree, or a black silk gown of the description worn by graduates holding the degree of Doctor, with tippet of scarlet cloth, edged with white fur and lined with blue silk, black velvet trencher cap.

Doctor of Laws, Medicine, or Science—the gown worn by graduates holding the degree of Doctor in the Universities of Oxford or Cambridge, black cloth trencher cap. Doctor of Laws—hood of scarlet cloth, lined with blue silk.

Doctor of Medicine-hood of scarlet cloth, lined with purple silk.

Doctor of Science-hood of scarlet cloth, lined with amber-coloured satin.

Master of Arts—the ordinary Master's gown of Oxford or Cambridge, of silk or bombazine, with black silk hood lined with blue silk, black cloth trencher cap.

Master of Surgery—the ordinary Master's gown of Oxford or Cambridge, of silk or bombazine, with

hood of scarlet cloth lined with French grey, black cloth trencher cap.

Master of Engineering—a Master of Arts' gown, with black silk hood lined with light marooncoloured silk, black cloth trencher cap.

Bachelor of Laws or Medicine—the black gown worn by civilians in Oxford or Cambridge holding Degrees, black cloth trencher cap.
Bachelor of Laws—hood of black silk, edged with blue silk.

Bachelor of Medicine-hood of black silk, edged with purple silk.

4

Bachelor of Arts, Science, or Engineering—a plain black stuff gown, black cloth trencher cap.
Bachelor of Arts—hood similar to that worn by the B.A. at Cambridge.
Bachelor of Science—hood of black stuff, edged with amber-coloured silk.
Bachelor of, Engineering—hood of black stuff, edged with light maroon-coloured silk.
An officer not being a graduate—a black silk gown of the description worn by civilians not holding, degrees, black cloth trencher cap.
Undergraduate—a plain black stuff gown, black cloth trencher cap.
Scholar—plain black stuff gown, with a velvet bar and shoulder strap, black cloth trencher cap.

ROBERT A. DALLEN, Acting Registrar. W. M. MANNING, Chancellor.

Laid before the Executive Council, on the 12th September, 1892.—A. C. Budge, Clerk of the Council.

#### NEW SOUTH WALES.

# NIVERSITY OF SYDNEY.

(NEW AND AMENDED BY-LAWS.)

Presented to Parliament, pursuant to Act 14 Vic. Lo. 31, sec. 21.

New and Amended By-laws adopted by the Senate at a meeting held on Monday, the 15th August, 1892.

To stand in lieu of Chapter 9, By-law 1.

#### CHAPTER 9.

1. The Professors in the four Faculties, with the Chancellor and Vice-Chancellor, shall form a

Board, to be called the Professorial Board.

2. Subject to the By-laws of the University, the Professorial Board shall manage and superintend the discipline of all students in the University, and shall have power to determine all matters concerning the studies and examinations which affect the students of more than one Faculty.

3. For these purposes, the Professorial Board shall make such rules as it may think fit, provided

that these rules be not repugnant to any existing By-law, and shall have power to impose any penalties in accordance with academic usage, on any student, for breach of such rules or misconduct of any kind.

4. Any member of the University affected by any decision of the Board, or any member of the Board, may appeal therefrom to the Senate, and thereupon the Senate may review such decision, and

either confirm, vary, or annul the same.

5. It shall also be the duty of the Professorial Board from time to time to consider the By-laws which deal with the studies of students which deal with the discipline of the University, and the By-laws which deal with the studies of students of more than one Faculty, and when the Board is of opinion that any such By-laws require amendment,

it shall send up recommendations to the Senate to that effect. 6. A précis of the proceedings of the Board shall be laid upon the Table of the Senate once in each Term, or forthwith in matters of special importance, and the Senate shall have power of its own motion to review any decision of the said Board.

The present By-laws 2, 3, and 4, to be Nos. 7, 8, and 9.

#### CHAPTER 11.

### To stand in lieu of By-law 6.

6. Any undergraduate not holding a Scholarship in the University, nor being a member of a College established under the provisions of the Act 18 Victoriae No. 37, may be exempted from attendance upon any or all of the prescribed lectures upon producing evidence which shall satisfy the Faculty to which he belongs that there are sufficient reasons for such exemption. Provided that no such exemption shall be granted for more than one year at any time.

### To stand in lieu of By-law 7.

7. No such exemption shall be granted until the Examiners shall have specially certified to the Faculty that the abilities and attainments of the applicant are such as to enable him, in their opinion, to keep up with the usual course of study at the University without attendance upon lectures. Undergraduates admitted ad eundem statum, and who are not required to pass the Matriculation Examination, shall nevertheless be required to pass a special examination to be certified by the Examiners as above, before obtaining exemption from attendance upon lectures.

#### CHAPTER 13.

### To stand in lieu of By-law 1.

1. Undergraduates of other Universities may, at the discretion of the Professorial Board, be admitted ad eundem statum in this University without examination. Provided always that they shall give sufficient evidence of their alleged status and of good conduct. 393-

CHAPTER

#### CHAPTER 15.

### To stand in lieu of By-law 2.

2. The Faculty shall meet for the purpose of considering and reporting to the Senate upon such subjects as have relation to the studies, lectures, examinations, and degrees in arts, and such questions as may be referred to it by the Senate, and shall have the general direction and superintendence over the teaching in arts, subject to the By-laws, and to such resolutions as the Senate may think fit to pass in relation thereto.

### To stand in lieu of By-law 9.

9. The names of all candidates who have passed the Matriculation Examination shall be arranged and published in such order as the Board of Examiners shall determine.

#### To stand in lieu of By-law 10.

10. Students who shall have passed the Matriculation Examination, or the Senior or Junior Public Examination in the subjects required for the ordinary Matriculation Examination, and shall have paid a fee of £2 to the Registrar, may be admitted as members of the University.

#### CHAPTER 23.

#### To stand in lieu of By-law 8.

8. At the conclusion of each examination the Board shall publish the result and transmit to the Senate a copy of it, signed by the Chairman and at least one other member.

(L.s.)

ALF. P. BACKHOUSE,

Vice-Chancellor.

ROBERT A. DALLEN,
Acting Registrar.

Laid before the Executive Council on the 27th September, 1892.—Alex. C. Budge, Clerk of the Council.

#### UNIVERSITY SYDNEY.

(NEW AND AMENDED BY-LAWS.)

Presented to Parliament, pursuant to Act 14 Dic. Ao. 31, sec. 21.

New and Amended By-laws adopted by the Senate, at a meeting held on the 17th October, 1892.

To stand in lieu of Chapter 18, By-laws 21 and 22.

- 21. Candidates for the degree of Bachelor of Engineering in Mining and Metallurgy shall, during the first year, attend the courses of instruction upon, and pass the examinations in, the following subjects, viz.
  - Chemistry, Inorganic, with Laboratory Practice;

Descriptive Geometry and Drawing;

3. Mathematics;

4. Mechanics and Mechanical Drawing;

5. Physics, with Laboratory Practice;6. Physical Geography and Geology.

22. Candidates for the degree of Bachelor of Engineering in Mining and Metallurgy shall, during the second year, attend the courses of instruction upon, and pass the examinations in, the following subjects, viz.

1. Applied Mechanics, with Laboratory Practice;

2. Chemistry, including Quantitative Analysis;

3. Civil Engineering;

4. Geology, with Laboratory Practice;

5. Mathematics

6. Mechanical Drawing;

7. Surveying.

23. Candidates for the degree of Bachelor of Engineering in Mining and Metallurgy shall, during the third year, attend the courses of instruction upon, and pass the examinations in, the following subjects, viz.

Civil Engineering;

2. Materials and Structures; 3. Metallurgy and Assaying;

4. Mineralogy;

5. Mining.

The present By-laws 23 to 35 to be numbered 24 to 36 respectively.

To stand in lieu of Chapter 18, By-law 30.

30. Candidates for the degree of Master of Engineering shall have taken Honors in the Professional subjects of the examination for the degree of B.E., or must attain the standard for Honors at some subsequent B.E. examination, and shall be required to pass examinations in one of the following divisions or branches-

1. Engineering Construction in Iron, Steel, Timber, Masonry, and Concrete;

2. Hydraulic and Sanitary Engineering;

3. Railway Engineering, including Railway Location, Permanent Way, Locomotives and Rolling Stock, and Railway Appliances;

Architecture, Building Construction, and Sanitation; 5. Mechanical Engineering and Machine Construction;

6. Mining and Metallurgy;

7. Electrical Engineering.

Candidates must give at least twelve months' notice of their intention to proceed to the Master's

Candidates shall be required to prepare a complete set of working drawings and specifications of such works or machinery as the Examiners may require in the particular division or branch of Engineering selected.

> W. M. MANNING, Chancellor. ROBERT A. DALLEN, Acting Registrar.

Laid before the Executive Council on the 13th December, 1892.—Alex. C. Budge, Clerk of the Council. JERSEY.

## SYDNEY GRAMMAR SCHOOL.

(REPORT FOR 1891.)

Presented to Parliament, in accordance with the probisions of section 16 of Act 18 Dic., 1854.

The Chairman of Board of Trustees to The Minister of Public Instruction.

Sir

Sydney Grammar School, 8 March, 1892.

I have the honor to submit the following Report of the Proceedings of the Trustees, and of the progress of the school, during the year 1891, in order that the same may be laid before His Excellency the Governor and the Executive Council, in accordance with the provisions of the "Sydney Grammar School Act."

The Trustees can again record their satisfaction with the working of the school throughout the year, and their appreciation of the efficient and zealous performance by the members of the teaching staff of the duties intrusted to them.

The average attendance of pupils for the year was 404, which, relatively to the previous year, shows a small decrease, probably attributable partly to the influenza epidemic, and partly to the commercial depression which prevailed during the later months.

As a large proportion of the boys have now joined the commercial side of the school, arrangements have been made by which the Head Master shall give more of his personal supervision to that department than has hitherto been found practicable, without however prejudicing the standard and efficiency of the classical side which continues to maintain its high position.

In accordance with the usual practice, the yearly examination of the boys throughout the school was conducted by gentlemen of high educational attainments selected from other institutions.

Though the pupils who enter for the University Examinations receive no special teaching to prepare them, it is gratifying to the Trustees to note that most of the boys from the school who presented themselves for these examinations secured highly satisfactory places in the class-lists.

The improvements in the play-ground, mentioned in the last Report, have been completed, and a commodious gymnasium has been erected, which is almost ready for occupation. As evidencing the interest taken by the pupils and their parents in this respect, it is worthy of mention that the necessary funds for the gymnasium apparatus and internal fittings have been privately subscribed. The cost of erection of this building, which has been defrayed from the school funds, has, however, taxed the Trustees' resources to the utmost, and they venture to hope that the Government will make the necessary provision for recouping them this expenditure.

The vacancy on the Board, created by the death of Mr. J. R. Street, has been filled by the election of the Honorable C. K. Mackellar, M.B., M.L.C.

The offices of Chairman and Vice-Chairman have been held by the Honorable Sir William C. Windeyer, and Mr. E. W. Knox.

A statement of the income and expenditure of the school for the past year is forwarded herewith.

I have, &c.,

W. C. WINDEYER,

Chairman of Board of Trustees.

RETURN of the Salaries and Allowances of the Masters of the Sydney Grammar School for the year 1891.

### SYDNEY GRAMMAR SCHOOL.—DECEMBER, 1891.

#### Reports of the Examiners.

Mr. C. H. Rendall, M.A., Late Scholar Hertford College, Oxford, reports upon the Classical work of the Upper School as follows:—

After a lapse of eight years I have had the pleasure of examining the Sydney Grammar School in Classics. In comparing the standard with that of eight years ago I may at once say that I think it on the whole higher. Both the Sixth and Fifth Forms are more level in their work than then, and a larger number of boys have pretensions to be considered scholars. To particularise—

scholars. To particularise—
In Form VI the work was excellent all through except in the critical papers. The training in Analytical Syntax has been weak, and I would suggest more attention to this subject. The composition was good, and Mitchell did one of the best pieces of Latin Composition I ever saw done in an examination.

Form V is perhaps the form that shows most improvement.
The Latin Prose was excellent, and all the boys did more or less well. I think Greek Accents should always be inserted by boys of this standard. One boy here is especially promising.

promising.

Form IV (Upper) has done very well, but hardly shows the complete soundness and accuracy of former days, especially in Greek; but the translation was well done, and the Greek Grammar mostly good.

Form IV.(Lower) has done exceedingly well in Latin, Grammar, and Composition, the average being 71 per cent. I consider this, from a teaching point of view, the most brilliant performance in the examination. Their Greek was good, but not so good as their Latin.

The Remove do Latin only, and have done very satisfactory papers.

Speaking as a whole, I find the Latin much better than the Greek, and I would urge that they should, if possible, be equalised; I think the comparative thought that thus arises is most valuable, and that both languages thus become more easy and interesting to the learners. Finally, I beg to congratulate the Trustees and the Head Master on the general condition of the school. In no school in Australia have I found such level teaching, such accurate knowledge, such a good style generally in arranging and expressing knowledge. The boys are not only being taught, but, which is far more important, educated.

Mr. Alexander McAuley, M.A., Cambridge Mathematical Lecturer at Ormonde College, Melbourne, reports as follows on the Mathematics of the Upper Classical and Lower School:—

the Mathematics of the Upper Classical and Lower School:

Gentlemen,

I have the honor to submit to you a report on the recent examination in Mathematics.
I have examined also in other subjects to be mentioned later.

The state of the Arithmetic of the first three Divisions of the Upper School is beyond praise. To make the subject serve the purpose of a real mental training is of course the chief object of an elaborate study of it. This object has clearly been most successfully attained. In some individual cases the work on very difficult papers was well-nigh perfect. Although setting the papers in Arithmetic throughout the rest of the School I have been only able to see an analysis of the marks and therefore cannot undertake to report in detail. From a study of the analysis, however, the Arithmetic would appear to be uniformly good throughout the whole school.

In Euclid, throughout the whole of the Upper School the results are good or very good except perhaps in Division V, where there is evidence that the boys have been pushed on too rapidly. The teaching of riders is of course essential to making Euclid a mental stimulus, and it is plain that much attention has been devoted to this branch of the teaching throughout the whole of the Upper School. In Divisions III, IV, and V, however, it appears from the results as if too much time has been devoted in teaching the boys certain particular riders that would probably be somewhat hard for them. This time would have been more profitably spent in attempting riders of an easier type such as the majority of them would be able to solve for themselves. The educational value of a rider is to a great extent lost if the learner has eventually to be shown the solution. In the one Division of the Lower School which is taught Euclid the results are not satisfactory. The boys with one or two exceptions do not seem to have attained any geometrical or logical conceptions. The remedy would seem to be to spend very much more time over the first three or four propositions, than ap

Mr. E. E. Morris, M.A., Professor of Modern Languages and Literature at the University of Melbourne, reports on the teaching of German and French as follows:—

Gentlemen,

The work submitted to me in this subject is satisfactory, and in some parts very good. The translation from unprepared books was excellent. The range of books from which the passages were chosen was so wide that it is not likely that more than one or two of the extracts can have been seen before. I have seldom seen better translations in an examination, even from prepared books. The boys in the highest division have evidently a good mastery of the German language, an extensive vocabulary and an appreciation of the matter of translation. Strickland is the best, and Ludowici, of the lower half of the division, comes second. With respect to these boys at the top, I must add what the foreign general added, after praising the English cavalry: "It is a pity there are so few of them."

Of Division IA, in the taste or general paper, two excellent answers, as shown by the marks. In composition, one is excellent, all very satisfactory; Simpson, however, did not try the essay. I look upon the work of all three as reflecting great-credit on their teacher.

I have not received what an examiner ought always to have in order to judge fairly—a statement of the average age in each division. The remaining work in German is much more varied. In Division II, some in the lower half are better than some in the upper. Between best and worst there is a great gap, the former being four times as good as the latter. Reid and Wallach, of the upper half, Smail of the lower, deserve especial praise. Between Divisions II and III there is another great gap in attainments—probably there is also of age. With respect to the teaching, I have no comment to offer. It has achieved a good average result. The successes are far above an average—the failures are probably due to the extraordinary power that boys of our race have of forgetting. The books for teaching are well chosen.

The work is very good. In the two highest and in the lowest divisions it is best.

In the first division, the book work is well known. Answers are exceedingly ac

In the 2nd division, the translations again are exceedingly well done, and, compared with the 1st division, there is more style in the rendering. Questions that require a special and minute knowledge of books are exceedingly well answered. The unseen translations are good. In all the translation work the members of the class are very close together, a sign of good teaching. In the grammar paper verbs are well known and the consecutive composition is better done than the translation of sentences in the earlier part of the paper would give any warrant for expecting.

Division III. Knowledge of prepared author, good. Sentences poor and verbs good. The difference between savoir and connaître rarely known. Perhaps this is not to be wondered at when so many French grammars go wrong.

Division IV. Grammar indifferent and some questions rarely attempted. Translation of sentences (some quite easy) from English into French, bad as a rule: from French into English, better, but in many cases not attempted. The master puts a foot-note to the list that "three out of four pieces were done previous to the latter half-year's work, and, consequently, only half the form have prepared them." The Examiner was not told anything about this before preparing the paper. Many boys omit questions, an average of three questions per boy being left unanswered.

I look upon Division IV as the weak point in the French work.

Division V. Grammar fair throughout, and even the translation of sentences into French is not bad. Both are very much better than the Division above. The translation into English is very good throughout and evidently carefully prepared.

The whole of the French examination leaves a satisfactory impression on my mind.

Mr. E. E. Morris, M.A., Professor of Modern Languages and Literature at the University of Melbourne, reports upon the English of the Commercial School as follows:—

Gentlemen,

This Examination consisted of simple composition, letter-writing, analysis, and parsing. The same questions were set to all the five classes. This is, perhaps, a little hard on the boys in the lower classes, but it enables a general comparison to be made, and all the subjects of the paper are taught in all the classes. As a rule, each class holds its place; but the lowest is quite as good as, and perhaps better than, the class immediately above it. The best paper is by a boy whose name comes first on the list in alphabetical order—viz., Aitken; but the second best is by a boy in the third class, Thomas, who deserves great praise.

Now to speak in detail of the work, the handwriting is, on the whole, good; there are a few unfortunate exceptions. The spelling is good, much better in the higher classes than in the lower. Most of the boys can write a direct letter fairly well, though they commonly make the common mistake of tense—"will be happy to accept." The mysteries of a reply in the third person are known only to a few. Place in school has no influence on this knowledge: the few are scattered up and down the school. The short essay was done fairly well by all, or almost all, really well by few. The parsing is good in the higher part, very poor (with exceptions) in the two lowest classes. The analysis is strangely uncertain: it is the weakest point in the whole paper. Many teachers, especially those who have had a classical education, despise analysis and its educational value. I should like, therefore, here to bear my testimony to its effectiveness as a mind-clearer, in which respect it is hardly second to Euclid.

Mr. F. W. Jonson reports upon the Shorthand as follows:-

Gentlemen. Referring to the Shorthand papers by boys of the Grammar School submitted to me for examination, I consider the result satisfactory. The Phonographic Penmanship in most of the papers is really very good. Divisions I and II A have done particularly well, the writing in many cases being beautifully neat and clear. Nearly all the boys who have not succeeded in passing have yet shown such a knowledge of the System as to convince me that they will eventually not only pass such an examination as this, but will become good practical Phonographers, if they persevere.

# APPENDIX giving full details of the Examination Work. I.—Classical School.

•		Perce	ntal R	esults	
Form.	Subjects.	Average.	Highest.	Lowest.	Remarks.
VI.	Latin Unprepared Trans-	68	90	47	An excellent paper. All the Form show they can grapple with a piece of
Latin, 11 boys.	lation. Latin Prose	51	90	24	Latin, and can translate exceedingly well.  Mitchell's prose is exceedingly good, and all have made intelligent attempts.
Greek, 9 boys.	Greek Unprepared Trans- lation.	64	89	91	It is much better than five years ago.  A good paper: the class show that they have been trained to grammatical
	Greek Prose	55	84	28	accuracy, and also to write English. Maxwell's paper excellent. A fair standard all through the form; but not nearly as good as the Latin Prose.
	Critical Paper	52	72	30	Not as good a paper as their other scholarship would lead one to expect.  Answers not sufficiently analytical.
5 boys.	Ancient History	64	78	47	As a whole, the work is good; but the questions on Greek Literature and Roman Religion were poorly done.
V. 15 boys.	Latin Prose	51	74	28	The prose was uniformly good throughout, and shows quite a different standard to the Greek. All the boys understand Latin construction. The Syntax was good; but they need a clear notion of Hypothetical Sentence.
15 boys.	Latin Unseens	38	71	$\begin{vmatrix} 21 \end{vmatrix}$	On the whole, very fair work; one boy excellent. Some knowledge of scansion would have saved many mistakes in the poetry.
11 boys.	Greek Prose	38	75	21	Syntax very fair in all papers; but the prose seems above the form, which accounts for the low marks. Nevertheless, I think some attempts should have been made. Whitfeld good. I think accents should always
12 boys.	Greek Unseens	32	77	10	be used in this form.  One excellent paper; but the work seems rather hard for the form.  However, all preserved a standard of grammatical accuracy.
FORM UPPER IV. 28 boys.	Cæsar and Latin Accidence	54	75	40	The translation evinced much style and accuracy; the grammar generally satisfactory. The question on the Oratis Obliqua was quite beyond the form. This, combined with the fact that several boys did not enter the form till late in the year, fully accounts for the average marks.
	Latin, Composition, and Syntax.	51	94	,25	A good paper on the whole; but the prose not as good as the syntax.
24 boys.	Greek Translation	63	90	34	Translation good, almost without exception; verb inflexions in the Lower Division weak. Divisions seem well classified.
Division A. 12 boys.	Greek Grammar and Syntax.		65	30	The grammar, as a rule, accurately done; but the sentences are very poor both in forms and syntax; they hardly seem to have done enough composition.
Division B. 12 boys.		31	44	18	Not a satisfactory form; their knowledge of the verb is very weak, and the sentences were hardly attempted. Only in the comparison of adjectives do they do well.
LOWER IV. 25 boys.	Latin Translations— Cæsar.	58	78	51	anjectives do mey do wen.  This result shows remarkably level teaching. Several boys showed very good style in translation. The grammar very satisfactory.
6 boys.	Latin Composition Greek	71 47	89 56	50 39	A most excellent paper; the work is remarkably good in every way. Only fair grammar work, adjectives especially weak; form very level.
REMÖVE. 21 boys.	Latin Translation—Livy	42	74	15	With four exceptions, the translations were very unsatisfactory. The pieces set contained long sentences, and very few saw their way through them. The grammar, on the other hand, was good. Two papers were excellent.
MATHEMATICS. HIGHER MATHEMATICS.	Latin Composition	57	88	34	Sentences, on the whole, good; and grammar well answered, except the question on the supine. A satisfactory form.
PART I. 4 boys.	Trigonometry	53	62	43	A long and somewhat hard paper was set in Trigonometry, so that the percentage, 53 per cent., is very good. The boys seem to have forgotten more than they should of the elementary parts of the subject, and in
PART II. 11 boys. ARITHMETIC.	Mechanics and Conic Sections.	44 56	74 96	10 31	these parts do not show so much ingenuity as in the latter parts.  Three excellent papers. Two good. A fair result for one quarter's work.  An easy but not very short paper was set in Geometrical Conics and Statics. The results are good. One paper excellent.
Division I. 10 boys.	All	48	95	28	A very hard paper was asked for and set. (28) is on such a paper very creditable. The obtaining of 95 per cent.,
Division II. 18 boys.	All	63	94	22	as one boy (Simpson) did, is a marvellous feat of rapid and accurate thinking on the part of a boy. Results, as a whole, very satisfactory. In the examiner's opinion, the paper was a very stiff one. The results are, therefore, very gratifying. Any boy who obtained above 50 per cent.
Division III. 20 boys.	A11	42	75	14	may be held to have done a very good paper. Although there was not an entire absence of poor papers, there was much absence of bad ones. This division took the same paper as Division II. The percentages are therefore highly satisfactory. Nearly all the boys failed, however, to give an intelligent anywart or an elevatory was to be the work.
Division IV. 20 boys.	To Stocks	64	85	42	give an intelligent answer to an elementary question on the theory of Arithmetical processes.  A very satisfactory division. There were very few gaps in the work.
Division V. 24 boys.	To Profit and loss	54	75	35	Decimals somewhat weak. Satisfactory, the boys being well together. Decimals weak; vulgar
ALGEBRA. Division I. 9 boys.	To Binomial Theorems and Logarithms.	28	40	20	fractions only fair.  On account of the great length of the paper the nominal maximum was only two-thirds of that which was attainable. The paper proved to be considerably above the heads of the boys. This ought not to have been the case with the best mathematician of the school. The boys, probably for reasons indicated in the general report, have not apparently been shown any of the now recognised Algebraic methods which do not occupy a prominent place in Todhunter's treatise. It was quite a pathetic spectacle to witness the undoubted powers of some boys employed in verifying the factors of a symmetrical expressions in 3 symbols by direct multiplication. The probable reason and cure for these results have been indicated in the general report. Such work as was sent in was accurate though not always elegant.

### I.—CLASSICAL SCHOOL—continued.

		Perce	ntal R	esults	
Form.	Subject.	Average.	Highest.	Lowest.	Remarks
Division II. 18 boys.	To Progressions	35	65	9	The paper was not a hard one; so that the percentages might be expected to be higher. Scarcely a piece of correct book-work was sent in. Inaccuracy the rule. The boys have evidently had considerable practice in problems leading to simple and quadratic equations. Even here, however, they did not think, but worked mechanically, e.g., in nearly every attempt to solve a clock problem, the statement which formed the basis of the solution was that the minute-hand moves 11 times as
Division III. 20 boys.	Upper division to Indices Lower division to Simultaneous Quadratics		49	4	fast as the hour-hand.  The maximum for the 2 part of this division were different on account of the different amounts the boys had read. The faults of the division above appear in greater prominence here. Any paper which gained
Division IV. 20 boys.	To Fractions	38	56	19	The lowness of the percentages is not due to inaccuracy, but to the small amount of work. The work itself was remarkable for neatness and accuracy. More attention should be shown to the logical arrangement
Division V. 24 boys,	Upperdivision to Simultaneous Equations Lower divisions to Simple Equations.	40	54	25	of proofs. A simple problem was not attempted by anyone. So similar in kind are the results in this division to those in Division IV that the boys appear to be taught by the same master. The same remarks apply to this division as to that.
EUCLID. Division I.	Books I, XI	46.5	80	6	The riders were attacked intelligently by nearly everybody. The results
10 boys. Division II. 18 bóys.	Books I, VI	52	78	14	on the whole are good. Three very good papers. One very bad. Although there was abundant evidence that the boys had been well practised in riders there was a rather disappointing lack of capability of independent thinking. This was seen in the utter failure, with two exceptions, to answer correctly a simple question out of the beaten
Division III. 20 boys.	Books I, IV	52	89	17	track though nearly all attempted to. Results good.  Too much reliance on memory shown in a very general attempt to do a rider which had evidently at some time been shown them. Of four other riders, of which two were fairly easy, not a single attempt was
Division IV. , 20 boys.	Book I	49.5	87	20	sent in. Results fairly good.  The boys have evidently been very carefully and conscientiously taught.  They would have been improved, however, by being set very easy riders, or perhaps better by being set pieces of book-work thinly
Division V. 24 boys.	Book I to Prop. 42	43	84	5	disguised.  This division seems to have spent ample time over the definitions, axioms, and postulates, but to have passed too quickly over the propositions
FRENCH. Division I. 9 boys.	Authors and Unseen Translation.	74	3 <b>4</b>	61	The division also would be benefited by disguised book-work.    See General Report.
Division II. 14 boys.	Composition and Grammar Author and Unseen Translation.	77	91 91	32 60	See General Report.
Division III. 16 boys.	Composition and Grammar Author Composition and	47 57	$\frac{64}{21}$	$\frac{.32}{39}$	See General Report.
Division IV. 27 boys.	Grammar. Author Composition and Grammar.	37	57	25	See General Report.

Division III. 13 boys.	mar.  Composition and Gram-		46	11	
CHEMISTRY. Division I. 5 boys.	mar.  Metals and Non-metals	60	84	29	Remarks appended by Mr. W. Osterneyer, M.A., chemical lecturer at Ormonde College, Melbourne, the examiner.  The two best papers were of a high standard and the lowest one, the
Division II. 24 boys.	Non-metals and Qualitative Tests for simple Metals and Acids.	60	88	36	result of two or three months' study of the subject, gave evidence of sure progress.
Division III. 24 boys.	Non-metals and simple Qualitative Tests.	30	80	8	manner.  The average proficiency of this class cannot be said to be high. There was but one excellent paper, only five obtained over 50 per cent., while seven obtained less than 20 per cent.
				Ţ	I.—Commercial School.
Com. I.	English			34	See General Report.
19 boys.	Geography		88	32 38	Work, except in a few cases, very well known. Papers generally well known and arranged.  Maps not nearly as good as in Com. II. Definitions poor. Half of sketch maps of Baltic bad, about five good. exceptions. The papers were neat.

		Perce	ntal R	esults	
Form.	Subjects.	Average.	Highest.	Lowest.	Remarks.
Com. II. 29 boys. 3 absent.	English History		78 73	43 15	See General Report. Facts generally well known. Most of the boys seem to possess an intelligent knowledge of the subject. Three boys failed badly. Writing
Com. III. 26 boys.	Geography English History Geography	$\frac{42}{52.4}$	82 81 81	   14   13   21	as a rule good.  Maps good. Definitions poor. Papers were neatly written.  See General Report.  A fair result varying from excellence almost to zero.  A very satisfactory result—six papers excellent, six good, and sixteen out of twenty-six boys got more than 50 per cent. Work on the whole
Com. IV. 27 boys.	English History	30·5 45·7	55 94	14 18	very neat. See General Report. Not a satisfactory result, only seven boys showing a creditable knowledge
3 absent.	Geography		59	15	of their subject.  Not a satisfactory result, only eight boys reached half marks or over working tidy as a rule.
Com. V. 21 boys. 1 absent.	English History	32·8 40	53·6 62	13 10	See General Report.  Result very unsatisfactory. I am, however, given to understand that circumstances have prevented the form having many lessons in this subject.
•	Geography	82	56	28	An easy paper, fairly neatly done. One excellent and six good papers. Only a few boys of marked ability.
FRENCH. Division I. 12 boys.	Grammar and Composition.	57	76	41	The form is generally well together, and the work is neat and accurate.
Division II. 19 boys. Division III.	Grammar and Composition.	}	70	36	The form shows a fair knowledge of the nouns, adjectives and pronouns, but the verbs are extremely weak.
24 boys. Division IV.	Grammar and Composition. Grammar and Composi-		64 62	14	Result very poor, both in Grammar and Composition; but the material of the form is of a low standard. A fair result in Grammar, but unsatisfactory in Composition. The verbs
28 boys. Division V. A. 16 boys.	tion. Grammar and Sentences	ļ	73	25	were pretty well done by half the form.  A.—A more even result than the parallel form. The grammar with two
B. 16 boys.		39	88	17	or three exceptions was well known, but the verbs were not so good as in the other division. The sentences were pretty good.  B.—The work was most unequal. The grammar was pretty fair; some of the questions were well answered; the knowledge of the verbs was
MATHEMATICS. Division I., 19 boys.	Arithmetic	61	83	35	fair. An excellent all round result. The accuracy was very much above the ordinary, and there seems to be plenty of ability properly utilised.
A. 11 boys. B. 8 boys.	Algebra	351	92 67	42 21 30	Div. A.—A very good result. Div. B.—Result not good compared with upper division. Work neat generally.
A. 11 boys. B. 8 boys.	Eucht	55	81 19	23	Div. A.—Papers very well written and arranged. Propositions well known. Deductions weak, except in the case of three boys.  Div. B.—Papers not as well written as the upper division. With the exception of three boys the division knows the Euclid well, and made
Division II. 23 boys.	Arithmetic	36	79	8	some good attempts at the deductions.  Mental calibre of this division falls considerably below that of Div. I.  Fractions and Decimals weak; too much unnecessary work. Questions 9-10 well done throughout. Compound interest ought to have been
	AlgebraEuclid	17 34	56 74	$\begin{bmatrix} 0 \\ 2 \end{bmatrix}$	done better. Early work not at all well known. Result unsatisfactory. Book-work not well known except in about five cases. I should say that a great deal too much had been attempted. Attempts at the deductions
Division III. 24 Boys.	Arithmetic	33	62	10	were poor. Papers as a rule were neat.  A very uneven division. As in Division II elementary work is poor, as if insufficient revision work were done in early work. A large number of the class seem unable to bear the strain of anything outside
Division IV. 28 Boys.	Algebra	68	100	19	straightforward rules and sums. Decimals weak.  Early work known very well indeed, with two or three exceptions. Most of the papers neatly worked.
	Arithmetic		76	7	Working accurate and neat. Questions 7 and 9 were above their ability, but there was an honest attempt made by all.
Division V. 26 Boys.	Algebra		75 70	7 3	The majority of the papers were neat. The early rules seem to be well known.  Very unsatisfactory. Fractions poor. Decimals almost unknown. Many
		_0	, , ,		of the questions were no doubt too hard for them, but this does not excuse the sins of commission and omission in the elementary work.
		•		III	-Lower School.
III A. 30 boys.	English Poetry and Gram- mar.			53	Knowledge of grammar very good. Analysis excellent.
	Geography—Australasia History—George I to	52 49·5	$\frac{72}{77}$	30	A satisfactory result on the whole, but the definitions were weak. The form is well together.  The categorical questions were well done, many of the papers being
•	Victoria.		••	,	extremely accurate. The written examination was less satisfactory; the best boys were easily discovered, but good results from a first attempt at such work are hardly to be expected. There was far too much bad spelling and writing.
_	Latin Grammar  Latin Composition  French—Grammar and Composition.	53 62	87 83 80	57 29 39	Knowledge of the grammar excellent. A very even result.  Vocabulary good. Composition uneven.  A great deal of very good and accurate work was done by this form; there was some weakness in the verb inflexions.
III B.	English Poetry and Gram- mar.		90	31	Knowledge of grammar good. Analysis very good.
	Geography—Australasia History—George I to	45½ 44	81 87	20 15	Maps very well done. Definitions badly known. Historical questions very poorly answered.  Categorical questions very well known. As in III A, the paper portion of the examination proved very formidable to all but the best boys.

### III —LOWER SCHOOL—continued.

		Percei	ntal R	esults	
Form.	Subjects.	Average.	Highest.	Lowest.	Remarks.
	Latin Grammar Latin Composition French	55.5	83 78 82	42 23 30	A fairly even result. Four excellent papers.  Knowledge of vocabulary good. Composition satisfactory.  The higher boys in the form did excellent work, but the verb inflexion were generally not known.
II A.	English Poetry and Grammar.	64	83	40	Poetry well known; also the meanings and allusions. Definitions very well known; the rest of the grammar fairly. Parsing and analysis with three exceptions, not satisfactory. There might be some improve
	Geography of Australia	72	92	48	ment in writing and neatness.  Maps, with one or two exceptions, very good. General and categorica questions well answered throughout.
	Latin GrammarLatin Composition	74·5 51·5	93 64	51 7	An excellent set of papers, except that the vocabularies were rather weal A few failures, but the paper was generally well done. The question of
	French	74	93	.38	syntax was very well done.  The formation of tenses seems the only weak point. The rest of the paper was splendidly done, only one boy getting less than half mark
II B.	English Poetry and Gram- mar.	55	79	38	Repetition not well known; meanings and allusions as a rule well don Grammar definitions very good. Parsing not very good; probably to difficult. Analysis very well done by several boys, though a goo many were weak. Spelling bad in many cases. Writing general
	Geography of Australia	69	89	20	extremely careless.  Maps and categorical questions good. General questions well answered with two or three exceptions.
	Latin Grammar Latin Composition		80 82	30 ¹	Papers generally good. Verbs rather weak. Vocabularies fairly good. Very few failures. Most of the papers were good. A third of the classified excellently.
•	French	·71½	97	49	A most excellent division. Formation of tenses weak. The rest of the paper shows careful and consistent work. Only one boy got less that half marks.
I A.	English Poetry and Gram- mar.	$61\frac{1}{2}$	82	42	A very good result. Meaning of words very good. Parsing very fair.
	Geography—Australia and Africa.	$65\frac{1}{2}$	89	13	Maps good. General questions fairly good. Categorical questions good but the spelling of geographical names somewhat weak.
I B	Latin  English Poetry and Gram-		83 95	23	A good set of papers. The sentences were rather above the class, other wise much of the work was excellent.  A very uneven result. Some papers very good.
1 15.	mar. Geography			32	Maps good. General questions fair. Categorical questions very fai
ATHEMATICS.	Latin		96	24	Spelling of geographical names very weak.  A few failures; but the work generally was very satisfactory.
ARITHMETIC. Division I.	To Stocks	54	78	33	Satisfactory on the whole. Decimals very weak. One excellent paper.
22 Boys. Division I A. 17 Boys.	To Practice	56	90	25	Elementary work, with the exception of decimals, sound.
Division II. 26 Boys.	To Simple Interest	60	85	48	The boys are well together. Decimals weak.
Division III. 28 Boys.	To Practice	53	85	30	A fair result. Decimals weak.
Division IV. 28 Boys.	To easy Decimals	58	89	39.	The paper, which was rather an easy one for this division, was very we done by half the boys. A question on the division of money seeme however, to puzzle every one.
Division V. 22 Boys.	To Fractions		87	30	Two papers were particularly good, three poor.
Division VI. 19 Boys. EUCLID.	Reduction	62	100	22	Four papers were well done, nine were fair, and two poor.
DIVISION I. Upper Section. 3 Boys.	Books I-IV	29	44	15	These three boys took the same paper as Divisions II and III of t Upper School. They would have benefited much more by attempti much less. They not only failed to evince any spontaniety
Lower Section. 19 Boys.	Book I	30	105	1	reasoning, but were disappointingly deficient in answering straight forward questions on the text.  The paper was a very long one, and it was not expected that any be would do by any means the whole. The nominal maximum, on whise are based the percental, is, therefore, not the absolutely attainal maximum. This explains why one boy has apparently obtained mothan the maximum. This boy's paper was an astonishingly good or
Division I A. 17 Boys.	Book I, 20	20	26.	2	Of the rest, four ranged from good to passable; three were bad; at eleven were complete failures.  These boys form a division 'specially backward in mathematics.' instead of attempting to reach I 20 or beyond, they had only attempt to reach I 3 or I 4, they might possibly be brought to understand so
ALGEBRA. DIVISION I. 22.	To Quadrates. 2 boys to Indices	. 33	71	7	proposition.  As in the case of the Euclid, this division seems to have been push beyond its powers, though in the present case the results are bett The problem referred to in the remarks on Division IV, Upper Scho
Division I A.	To simple Equations	. 18	38	0	was done by two boys in this division.  The greater part of this division cannot be said to have acquired a mental training at all, as yet, from their algebra. They migh
Division II.	To simple Equations	. 28	50	6	perhaps, have done so had they covered much less ground.  This division took the same paper as Division V of the Upper School, a compares very favourably with it.
25. Division III. 16.	Brackets	. 38	90	0	compares very favourably with it. Fairly satisfactory; though the question requiring the result of taki from $a$ the excess of $b$ over $c$ ought to have been answered correct by somebody.

#### NEW SOUTH WALES.

# SYDNEY FREE PUBLIC LIBRARY.

(REPORT FROM TRUSTEES FOR 1892.)

Presented to Parliament by Command.

The Trustees of the Free Public Library to The Minister of Public Instruction.

Sir. Sydney, 8 March, 1893.

Sir, Sydney, 8 March, 1893.

I have the honor to transmit to you the Twenty-second Annual Report of the Trustees of the Free Public Library, being the Report for the year 1892.

- 2. On the 29th August the Hon. Philip Gidley King, M.L.C., was appointed Trustee to fill the vacancy caused by the decease of Sir William Macleay, M.L.C.,
- Trustee to fill the vacancy caused by the decease of Sir William Macleay, M.L.C., who died on 7th December, 1891.

  3. A vacancy occurred in the staff on 17th September by the death of Mr. A.
- A. Richardson, Assistant Librarian of the Lending Branch, and the position was filled by the promotion of Mr. O. Stevens, Cataloguing Clerk; this gave room for further promotions, all of which were made from the existing staff.
- 4. An unforeseen delay has taken place in the printing of the Australasian Bibliography, mentioned in the Report for the year 1891, but the whole of the text has been set up in type and the proofs corrected and returned to the printer.
- 5. It was intended that this work should be carried on simultaneously with the General Catalogue of the Library now in course of preparation, but at the special request of the New South Wales Commissioners for the World's Columbian Exposition, Chicago, the General Catalogue has been temporarily delayed, in order that the Australasian Bibliography may be completed in time for opening of the Exhibition, and it is anticipated that the book will be issued from the Government Printing Office by the end of May. The General Catalogue is being proceeded with as rapidly as can be expected, but the date of its completion cannot yet be fixed.
- 6. The new Catalogue of the Lending Branch, announced in the last Report, was completed in July, and is now on sale at the Government Printing Office.
- 7. During the year 5,702 volumes have been added to the general collection, making the total number of volumes in the Library 97,348. The number of books transferred, worn out, or lost during the year 1892, and deducted from the stock, was —for the Reference Library, 7, and Lending Branch, 171, making a total of 178. The details of the additions under the classification are given in Appendix A.
- 8. Appendix B shows the total number of visits for the year as 197,255, being the highest number reached since the opening of the Institution.
- 9. The demand for loans of books to Country Libraries still increases, but with the addition of some new boxes there has not been any difficulty in satisfying all the applicants. By the return in Appendix E an excess is shown of 3,911 miles, travelled by the boxes sent out during the year, over the mileage of the previous year. Altogether 130 boxes, containing 10,141 volumes, were issued.
- 10. The Reference Library was kept open during the year for 359 days, including Sundays, and the Lending Branch for 345 days, also including Sundays.

759—A 11.

- 11. Appendix C shows that the number of volumes borrowed from the Lending Branch exceeds by 2,659 the number borrowed in 1891, although in that year the issue of books was continued for three days longer.
- 12. Appendix G contains a list of donations to the Library, comprising 440 volumes and pamphlets; 106 volumes and pamphlets have also been received under the Copyright Act.

I have, &c.,

JAMES NORTON,

President.

Summary

APPENDIX A.

Number of Volumes in the Free Public Library on the 31st December, 1892.

Synopsis of Classification.	Reference Department.	Lending Branch.	For Country Libraries.	Total.
Natural Philosophy, Science, and the Arts History, Chronology, Antiquities, and Mythology Biography and Correspondence Geography, Topography, Voyages and Travels, &c. Periodical and Serial Literature Jurisprudence Theology, Moral and Mental Philosophy, and Education Poetry and Drama Miscellaneous Literature and Collected Works. # AUSTRALIAN MUSEUM.

(REPORT OF TRUSTEES FOR THE YEAR 1891.)

Presented to Parliament pursuant to Act 17 Vic. Ao. 2, scc, 9.

TO HIS EXCELLENCY THE GOVERNOR AND EXECUTIVE COUNCIL,-

The Trustees of the Australian Museum, incorporated by the Act 17 Victoria No. 2, have the honor to submit to Your Excellency in Council, in accordance with the 9th section of that Act, this their thirty-eighth Annual Report.

- 1. The hours during which the Museum was open to the public were, as in previous years, from 10 a.m. till 5 p.m.; but in summer till 6 p.m., except on Sundays, when they were from 2 p.m. to 5 p.m., and on Mondays, when the Museum was closed for cleaning. The number of visitors in 1891 was 132,845, being an increase of 9,121. The largest attendance on any one week-day was 2,080, on Monday, 5th October. The largest Sunday attendance was 2,233, on 10th May. The average for the year was 296 on week-days, and 787 on Sundays.
- 2. The collections are still being steadily increased, although on account of the temporary disarrangement of the Museum for building purposes, the Trustees have continued to limit the acquisition of specimens. The principal purchases during the year have been:—

Casts of notable fossils in the British and other museums.

Two rare whales from New Zealand.

Skins and skeletons of Australian animals, including twenty Ceratodus forsteri, for exchanges.

Some rare New Guinea birds.

Ethnological specimens from Northern Queensland, the South Sea Islands, &c.

The most important acquisitions by exchange have been:—

Brazilian shells from Dr. Ihering.

A collection of Japanese Echinoderms, from Dr. Doderlein.

- 3. The Trustees are glad to report that the enlargement of the Museum was nearly completed before the end of the year.
- 4. The Committees of Trustees appointed for the investigation of duties and salaries of the officers and employees of the Museum, and for the revision of the Standing Rules and By-laws, have sent in their reports, which have been dealt with by the Board; and the By-laws and Regulations made thereunder have been forwarded to His Excellency the Governor for approval.
  - 5. The following publications have been issued during the year:-

Catalogue of Australian Birds in the Australian Museum, by Dr. E. P. Ramsay, part 3.

Australian Lepidoptera and their Transformations, by the late A. W. Scott, edited and revised by Mr. A. S. Olliff and Mrs. Forde, vol. 11, part 2.

Records of the Australian Museum, Nos. 6 to 10, forming completion of vol. 1.

The following works are in course of preparation:-

Catalogue of Australian Birds, parts 4 and 5, by Dr. Ramsay.

Catalogue of Shells, by Mr. Brazier.

Catalogue of Tunicata, by Professor Herdman, Liverpool, England.

Records of the Australian Museum, vol. II.

Catalogue of Australian Mammals, by Mr. Ogilby.

Catalogue of Reptiles and Batrachians, by Mr. Ogilby.

Australian Lepidoptera, vol. 11, part 3.

25-A

- 6. Full information with respect to the working of the institution will be found in the Curator's Report comprised in Appendix VII.
- 7. It is with feelings of deep regret that the Trustees have to record the death of C. S. Wilkinson, E.q., F.G.S., one of the elective Trustees, who occupied a seat on the Board from 1880 to 1891. The vacancy had not been filled by the end of the year.

The following Appendices are attached to this Report:-

I.—Annual Balance-sheet.

II.—Attendance of Visitors.

III.—Attendance of the Trustees.

IV.—Donations of Books to the Library.

V.—Donations of Specimens to the Museum.

VI.—Exchanges.

VII.—Curator's Report.

VIII.—Additions to the Library.

IX.—Publications of the Australian Museum.

The Common Seal of the Museum was hereunto affixed by order of the Board, this fifth day of July, 1892.

(Signed)

(L.S.)

(Signed)

S. Sinclair,

Secretary.

JAMES C. COX, M.D.,

Crown Trustee and Chairman.

# APPENDIX V. DONATIONS OF SPECIMENS TO THE MUSEUM.

Donor.	No. of Speci- mens.	Scientific Name.	Common Name.
		MAMMALIA.	
Mr. R. Bose	1	Hydromys chrysogaster	Golden-bellied water-rat.
Captain Carpenter	1		Blade of Baleen of a whale.
Mr. F. C. Chopin	1		. Flying squirrel.
Mr. Chas. Cross	1	Macropus ualabatus	
Mr. Thos. Illidge	1	Dasyurus maculatus &	
Mr. O. le Bon	1		. Kangaroo. . Rabbit rat.
Dr. Machattie	1	,	Albino Norway rat.
Mr. J. T. McMahon	$\frac{1}{1}$	Mus decumanus,  Dasyurus viverrinus	1 a
Mr. E. K. Moulder Mr. F. S. Nichols		Ornithorhynchus anatinus	1
Mr. F. S. Nichols Miss E. Oldfield	i -	Molossus australis	D-L
Mr. Rose	1 1	Hydromys chrysogaster	Q 17 1 13' 1 to to
Mr. B. Russell	1 7		Piece of Baleen.
Mr. F. B. Starky		Hydromys chrysogaster	
Mr. Henry Snell	1 -	Mus decumanus, variety	. Norway Rat.
Mr. O. B. West	<b>2</b>	Dasyurus viverrinus	. Native cats.
	A	Transpared Turner Negma AND	Face
		s, INCLUDING THEIR NESTS AND	.  Nest & Eggs of Lineated Acanthiza
Mr. Richard Brannon		Acanthiza lineata	Nankeen Kestrel.
Mr. W. C. Browne	$\frac{1}{2}$		Black-shouldered Kite.
(	1 1	Chalcites plagosus	Bronze Cuckoo.
Mr. Neville Cayley	-		Least Swamp Quail.
Mr. Richard Cockran Mr. S. B. Dav	1		. Rifle Bird.
Mr. S. B. Day	1		. Black-necked Swan.
Director Botanic Gardens	1	,, olor	. White Swan.
photoi Bomino sur III	1	~	Silver Pheasant (hybrid)
Mr. Hugh Dixon	1	Cuculus pallidus	Pallid Cuckoo.
Mr. H. J. Douglass			Australian Cormorant.
Dr. Edwards {	2		Jameson's Gulls.
Dr. Edwards	1		Giant Petrel.
Master Etheridge {	1		Brown Tree Creeper. White-throated Tree Creeper.
Ι,	1		To:
Miss M. Z. Flood	$\begin{vmatrix} 1 \\ 1 \end{vmatrix}$	1 ~	Giant Petrel.
Dr. L. Holden	1 1	1	White Goshawk.
Mr. J. Humphries	î	Malurus lamberti ♀	Lambert's Superb Warbler.

#### APPENDIX VII.

CURATOR'S REPORT TO 31ST DECEMBER, 1891.

To the Trustees of the Australian Museum.

Gentlemen.

I have the honor to submit herewith Reports of the different Departments for the year 1891.

The alterations to the Museum being still incomplete, those portions of the collections withdrawn from public exhibition, viz., the foreign mammals, the minerals and the fossils, remain housed in temporary

The new portion of the Museum destined for offices and workrooms was so far completed as to permit of occupation about the beginning of December, and although the work of moving into it was not completed by 31st December, this will be a convenient time to report the allocation of the different rooms.

On the Basement:—Store-room, strong-room, kitchen, bathroom, and lavatories.

On the Ground Floor:—Board-room and Secretary's offices, Curator's rooms, and Ornithological scientific work-room.

On the First Floor:—Library, and Ornithological cabinet rooms. On the Upper Floor:—Scientific work-rooms, viz., Conchology, Entomology, Marine Invertebrata, and the registration of specimens, and Draftsman.

The suite of rooms under main staircase formerly occupied by the Entomologist and the Draftsman is being renovated and will be allotted to the Paleontologist

The portion of the new buildings intended for exhibition of specimens is not yet ready.

MAMMALS.

Mammals.—The specimens acquired and registered in this department during the year are -50 specimens, purchased; 113 specimens, collected; 8 specimens, received by exchange; 16 specimens, presented. The most noteworthy have been two rare whales from New Zealand.

The foreign mammals have been, as already intimated, withdrawn from exhibition owing to the building alterations, but the Australian mammals are on view as usual in the north end of the ground floor. catalogue of the Australian mammals by Mr. J. D. Ogilby is now in the press and will be issued in the coming year (1892). A paper on a new species of Pteropine Bat from the New Britain Group was published in the "Records" in March, 1891.

Birds (Mr. A. J. North).—During the year 575 specimens of birds' nests and eggs have been registered, viz., 203 specimens, purchased; 113 specimens, collected; 101 specimens, received by exchange; 158

specimens, presented.

The principal acquisition consists of a number of additional species of Birds of Paradise, among them being examples of Astrapia nigra, Epimachus maximus, Lophorina atra, and Paradisea rubra, making the already fine collection of Paradiseidæ nearly perfect. Opportunities for an occasional day's collecting near Sydney have occurred, of which advantage has been taken to fill up gaps in the Reference Collection, and to replace with fresh specimens many of the exhibits in the Old Collection on view in the cases.

The new wall cases in upper floor of the Museum, referred to in my last year's report, for the reception of the mounted collections of birds, are now completed, and are being filled with birds mounted in groups to show the male and female, young, nests, eggs, and habits of the family, as far as it is possible to do so.

Mr. A. J. North, who was formerly engaged to assist in the preparation of the catalogues of Australian birds, has now been appointed on the staff as "Assistant in Ornithology." Since his appointment I have put the Ornithological Registers under his charge, and he has been engaged in registering the specimens and looking after the collections of birds.

- Mr. North has published the following papers during the year in the "Records":—
  (1) Supplement to the Catalogue of "Nests and Eggs of Birds found breeding in Australia and Tasmania."
- (2) Note on the Nidification of Plotus novæ-hollandiæ, Gould.
  (3) Note on the Nidification of Edoliisoma tenuirostre, Jard.
  (4) Note on the Nidification of Turnix melanotus, Gould.

A specimen of the rare *Pediononus torquatus* having been sent to the Cambridge University to be worked out, the result has been a valuable paper in the "Records" by Dr. Hans Gadow, on its structure with regard to its systematic position; and a very useful paper was also published in the "Records," by the late Mr. K. H. Bennett, on the "Disappearance of certain species of Birds in the Lower Lachlan district."

Work has been continued at the Catalogue of Australian Birds. Part III, Psittaci, has been issued, and parts IV and V are in preparation.

REPTILES, BATRACHIANS, AND FISHES.—In the present condition of the Museum buildings, already referred to, not much new work has been attempted during the year, but the collections have been gone over, as usual, and carefully attended to.

The acquisitions registered have been:—(Reptiles and Batrachians) 59 specimens purchased; 111 specimens presented. Fishes. -- 67 specimens purchased; 106 specimens received by exchange; 53 specimens presented; total, 396.

The new work in this department is mainly represented by the following papers in the "Records," by Mr. J. Douglas Ogilby :-Description of a new Fish from Lord Howe Island.

Descriptions of three new Papuan Snakes.

Mollusca.—(Mr. J. Brazier and Mr. C. Hedley.) The acquisitions registered have been—83 specimens purchased; 53 specimens received by exchange; 1,742 specimens presented.

The purchases include 62 species of land and marine shells from Mauritius, Southern India, The purchases include 62 species of land and marine shells from Mauritius, Southern India, Mexico, California, Japan, Philippine Islands, Borneo, and North-western Australia, and fill up some gaps in the general collection. The exchanges consist of species received from Brazil, New Zealand, and New Guinea, for which suitable returns of Australian shells are being sent. The presentations comprise 264 species, mostly from Australia and British New Guinea. The most important acquisitions are some of the original type-specimens described and figured by Dr. J. C. Cox, F.L.S., in his "Catalogue of Australian Land Shells," 1864, and "Monograph," 1868, presented by the Rev. R. L. King.

The work of this department is so great that in the beginning of the year the Trustees decided that for a time it should be divided, and in April, 1891, Mr. C. Hedley, late on the Scientific Staff of the Queensland Museum, was engaged. To him was assigned the duty of unpacking, naming, arranging, and cataloguing the land and fresh water shells, commencing with those illustrating the fauna of Australia, Papua, and Polynesia. A large proportion has been determined, named, and mounted.

Papua, and Polynesia. A large proportion has been determined, named, and mounted.

Mr. Brazier has been occupied during the greater part of his time in determining, naming, and cataloguing the marine shells of Australia and Tasmania, of which catalogue Part I, Cephalopoda, and Part II, Pteropoda, are ready, and will be issued early in 1892, while Part III, Muricidae, is in a forward state, and will soon be in the printer's hands.

Publications of this Department have been-by Mr. C. Hedley, in the "Records of the Australian Museum"

(1.) The Land and Freshwater Shells of Lord Howe Island.

(2.) On Hadra gulosa, Gould.

INSECTS—(Mr. F. A. A. Skuse).—During the year about 500 specimens have been acquired from various sources outside the Museum, besides a large number collected by Mr. Skuse, but not registered. The particulars of these, as registered, are: 155 specimens purchased; 422 specimens received by exchange; 244 specimens presented. Among the purchases were 60 specimens, including 34 species, from the interior of New South Wales, and 93 specimens (29 species) from New Britain. The most interesting exchanges were a collection of 21 species of Orthoptera, solely grasshoppers, from Mr. H. de Saussure, Geneva.

Mr. Skuse has devoted a considerable amount of his attention to the preparation of specimens to be

placed on exhibit in the new gallery when ready for their reception.

Owing to press of other duties, only one entomological paper has been prepared and published in the "Records," viz. :- Description of a new Pelagic Hemipteron from Port Jackson. .

MARINE INVERTEBRATA—(Mr. T. Whitelegge).—The accessions to this Department amount to 379 specimens, representing 149 species, of which 250 specimens were presented, and the remainder were obtained by purchase and exchange. The different sections are represented as follows:—

Myriopoda	27 specimens presented.
Crustacea	13 specimens purchased.
,,	62 ,, received in exchange.
,,	67 ,, presented.
Vermes	7 specimens purchased.
44	3 ,, presented.
Echinodermata	4 specimens purchased.
,,,	33 , received in exchange
,,	50 ,, presented.
Coelenterata	8 specimens purchased.
33	2 , received in exchange
,,	103 " presented.
Total	379

Among the interesting additions made during the year may be mentioned a collection of corals from the Barrier Reef, including several type specimens, presented by W. Saville-Kent, Esq., and a large series from Lord Howe Island, presented by the Department of Mines.

Owing to the vacant position of Assistant in Zoology (for Fishes and Reptiles) not being yet filled up, the whole of the spirit specimens have been placed in Mr. Whitelegge's charge, and his time has been fully occupied in attending to the identification, registration, and preservation of the collections in these Departments as well as in his own.

In April, 1891, Mr. Whitelegge, was instructed by the Trustees, at the request of the Commissioners for Fisheries, to investigate and report upon the cause of the discolouration of the waters of Port Jackson for Fisheries, to investigate and report upon the cause of the discolouration of the waters of Port Jackson in the early part of the year. The results were embodied in a Report enumerating 30 species of Protozoa, 29 being additions to the fauna of Port Jackson, and one being described as new. This was published in the "Records of the Australian Museum." Other publications in the "Records" relating to this Department were:—By W. Saville-Kent, Esq., "Notes on new and little-known Australian Madroporacea"; by Chas. Chilton, Esq., "On a new and peculiar Fresh-water Isopod from Mount Kosciusko."

PALÆONTOLOGY—(Mr. R. Etheridge, jun.)—The specimens registered during 1891 numbered 684, comprising as follows:—64 specimens purchased; 13 specimens collected; 37 specimens received in exchange; 220 specimens presented; 349 specimens from old collections.

The difference in the total number between last and previous years is naturally accounted for by the entire inaccessibility of the collections during the greater part of the year, owing to the alterations to that

entire inaccessibility of the collections during the greater part of the year, owing to the alterations to that portion of the building in which the Geological Hall is situated, and also by the small number of specimens received from extraneous sources.

The chief presentations consisted of a part of the *Elephas hysudricus*, F. & C., from the Siwalik Hills, India, presented by the Trustees of the British Museum; Miocene Fossils, from Bordeaux, presented by the Royal Society of N. S. Wales; and miscellaneous Victorian Fossils, presented by Mr. S. H. Wintle, of Melbourne.

The most important exchange was with Mr. F. M'Knight, of Melbourne, by which a small collection of Graptolites, very much wanted in the Museum, was obtained.

Those portions of the Old Collection registered consisted chiefly of Permc-Carboniferous and Coal-Measure fossils of New South Wales.

The following papers were published in the "Records" by Mr. R. Etheridge:-

- 1. Further Descriptions of Upper Silurian Fossils from the Lilydale Limestone, Upper Yarra District,
- 2. A Much-thickened Variety of *Bulimus bivaricosus*, Gaskoin, from Lord Howe Island. 3. Notes on "Rock-Shelters" or "Gibba-Gunyahs" at Deewhy Lagoon.

4. On the Occurrence of the Genus *Palgaster* in the Upper Silurian Rocks of Victoria.

5. The Operculate Madreporaria-Rugosa of New South Wales.

MINERALS. -- Owing to the Mineral Specimens being almost entirely stored away on account of the alterations to the building, it was not deemed necessary to appoint a successor to the late Assistant in The additions to the Collections in this Department have been—1 specimen purchased; 132 specimens received by exchange; 72 specimens presented.

ETHNOLOGICAL, NUMISMATICAL, AND HISTORICAL COLLECTIONS.—These were formerly under the charge of Mr. Brazier; but to give him more time to push on with the Catalogue of Shells, they have, for the present, with the registers, been handed over to Mr. North. The Ethnological Specimens registered in 1891 were 53, viz.:—31 specimens purchased; 15 specimens collected; 7 specimens presented. These came from the following localities:—From New Britain, 4; New Zealand, 2; Queensland, 14; New South Wales, 31; North America, 1; New Guinea, 1.

The most interesting acquisitions are a series of fifteen portions of trunks of trees with aboriginal carvings, from near Dubbo, N.S.W.; some aboriginal shields, wooden swords, large stone axe-heads, and skulls of aborigines from Bussell Biver North-eastern Oueensland; and a very rare fish-hook said to be

skulls of aborigines, from Russell River, North-eastern Queensland; and a very rare fish-hook, said to be

made of human bone, and used by the Maoris as a charm when fishing.

Only 2 Numismatical and Historical Specimens have been received during the year, viz., a bronze medal, struck in 1889 in commemoration of the 700th anniversary of the Mayoralty of the City of London, and presented by the Corporation of the City of London; and a copy of "The Office of the Holy Week, according to the Roman Missal and Breviary, Printed by Henry Hills, Printer to the King's Most Excellent Majesty, for his Household and Chappell, and Sold at his Printing House, on the Ditch-side, in Black-Fryer, 1688," presented by Mr. G. H. Barrow.

### NEW SOUTH WALES.

## NATIONAL ART GALLEI

(REPORT OF TRUSTEES FOR THE YEAR 1891.)

### Presented to Parliament by Command.

Trustees of the National Art Gallery of New South Wales:

E. L. Montefiore, Esq., J.P., R.A.A.S., President.

E. Du FAUR, Esq., J.P., F.R.G.S. J. R. FAIRFAX, Esq. Hon. E. Combes, Esq., C.M.G., M.L.C. JoSIAH MULLENS, Esq., F.R.G.S.

Hon. W. J. TRICKETT, M.L.C. J. R. ASHTON, Esq., P.A.S. B. R. WISE, Esq.

Hon. Sir Patrick Jennings, K.C.M.G., M.L.C.

Secretary and Treasurer: W. P. WARTON.

### Report to The Minister for Public Instruction.

In presenting their Report for the past year the Trustees have much pleasure in recording the continued satisfactory progress of the National Art Gallery. Considerable additions have been made by purchase, and some valuable presentations have been added to the collection, amongst which may be specially mentioned a very interesting collection of relics connected with the early history of the Colony, presented to the Gallery by Mrs. F. Johnston.

The purchases made by the Trustees comprise fourteen oil paintings, fifteen water-colour drawings, four drawings in black and white, one piece of statuary, and two suits of Japanese armour, at a total cost of £4,834 10s. A detailed list of purchases and presentations is appended herewith.

In response to the invitation of the Trustees, forty-nine competitive drawings by Australian artists, illustrating the scenery of New South Wales in its remoter districts, were sent in and exhibited during the month of December, out of which the Trustees selected eight to be permanently placed in the Gallery, forming the nucleus of a collection which they trust will, in course of time, fairly illustrate the picturesque features of the Colony. A list of the pictures purchased appears in the Appendix herewith.

During the month of January, 1892, the third competitive exhibition of works by art students and amateurs was held in the Gallery. The total number of works sent in amounted to 239.

The Trustees have to express their disappointment at the quality of the said works, which did not exhibit the progress which they were entitled to expect, the average being decidedly inferior to those sent

exhibit the progress which they were entitled to expect, the average being decidedly inferior to those sent in on the previous year.

Under the circumstances the Trustees have decided on discontinuing these exhibitions for the

Under the circumstances the Trustees have decided on discontinuing these exhibitions for the present, with a view of giving competitors the opportunity of attaining greater proficiency.

As testifying to the growing popularity of the Gallery it is to be noted that the attendance of visitors during the year numbered 238,131, the average on Sundays being 1889, and on week days 450, showing a total increase of nearly 27,000 over the attendance of the previous year.

There was a fair attendance of students in the Gallery throughout the year, and twenty fresh applicants have been added to the roll of those permitted to copy.

Since the commencement of the present year a very important addition has been made to the collection of sculpture, under a bequest by the late ex-Judge Josephson, consisting of original works by Gibson, Spence, Harriet Hosmer, &c., full particulars of which will appear in the next annual report. The Trustees also avail themselves of the opportunity of reporting a very valuable presentation recently made to the Gallery by Sir Henry Doulton of a collection of pottery from his well-known Burslem and Lambeth factories.

The Trustees desire to express their regret that nothing has been done towards carrying out the extension of the Gallery, as approved by the late Government, and respectfully urge upon the Government the desirability not only of enlarging the Gallery but also of commencing such external improvement as will render the building worthy of a collection acknowledged to be unrivalled in the Southern Hemisphere.

> E. L. MONTEFIORE, President.

#### APPENDIX.

Oil Paintings British.

The Pool, London: By Ernest Dade.

Relics of the Johnston Family, consisting of silver gilt tankard, swords, pistols, telescope, &c. Presented by Mrs. F. Johnston.

Models.

Models of the Tower, Cathedral, and Baptistry, Pisa. Presented by A. Stanger Leathes, Esq.

### 1892-3.

### NEW SOUTH WALES.

### NATIONAL ART GALLERY OF NEW SOUTH WALES.

(REPORT OF TRUSTEES FOR THE YEAR 1892.)

Presented to Parliament by Command.

Trustees of the National Art Gallery of New South Wales:

E. Du Faur, Esq., J.P., F.R.G.S., President.

J. R. FAIRFAX, Esq. Hon. E. Combes, C.M.G., M.L.C., P.A.S. JOSIAH MULLENS, Esq., F.R.G.S. Hon. W. J. TRICKETT, M.L.C. J. R. Ashton, Esq. B. R. Wise, Esq., M.L.A. Hon. Sir Patrick Jennings, K.C.M.G., M.L.C. His Honor Sir J. G. L. Innes, Knt.

Director:

E. L. Montefiore, J.P., R.A.A.S.

### Report to The Minister of Public Instruction.

The Trustees are gratified in being again able to report the continued satisfactory progress of the Institution. Important additions were made during the past year, amongst which may be specially noticed Mr. Poynter's work, "The Meeting of King Solomon and the Queen of Sheba," which has proved a very great source of attraction, as evidenced by the large number of visitors which have attended the Gallery since its arrival, amounting to no less than 30,196 during the closing month of the year.

The total number of purchases in 1892 comprised eight oil paintings, twelve water-color drawings, three drawings in black and white, thirteen pieces of sculpture, and one bronze medal, at a total cost of £5,083 10s. 6d. The Gallery has received several additional presentations. A detailed list is appended.

At the close of the year, in response to the invitation of the Trustees, eighty competitive drawings, illustrating the Colony, were submitted; of these the Trustees selected forty-three for exhibition, and purchased five.

Looking at the growing importance of the Gallery, and the large and constantly increasing value of the collection, the Trustees urged upon the Minister of Public Instruction the desirability of the appointment of an official head, recommending that the said appointment should be conferred on Mr. E. L. Montefiore, the President, who had taken a very active part in the initiation and progress of the Institution. He was accordingly appointed by the Government to fill the position, and assumed office on the 1st September last. Mr. Montefiore having in consequence resigned his position as President and Trustee, Mr. Du Faur was unanimously elected by his colleagues to fill the Presidential chair, and his Honor Sir J. G. L. Innes was appointed to fill the vacancy on the Board of Trustees.

With the view to the artists of New South Wales being adequately represented at the Chicago World's Fair, the Trustees, in response to a request from the Commissioners, consented to lend, under proper guarantees as to their safe custody and return, a selection of the works from the Australian Court; these comprised thirteen oil paintings and twelve water color drawings, the whole of which were carefully packed under the immediate superintendence of the Director.

There was a fair attendance of students throughout the year, and twenty-three new applicants were added to those already on the roll.

The attendance of visitors for the year numbered 250,109, viz., on week days 148,426, on Sundays 101,683, being a total increase over the attendance of the previous year of 11,978.

The Trustees look forward to a time when the Government may see its way to the extension of the Gallery so much required, and the improvement of its external appearance.

E. Du FAUR, President. List of Works of Art purchased by the Trustees during the year 1892.

#### OIL PAINTINGS.

British.—"Train up a child in the way he should go," by E. Douglas. "Mignon," by E. Stanhope Forbes. "The meeting of Solomon and the Queen of Sheba," by E. J. Poynter, R.A. "A Farm-yard," by Rolfe and Herring.

Australian.—"The ever restless Sea," by W. Lister Lister. "As in the Days of Old," by F. B. Mahony. "Eileen," by Tom Roberts. "An aboriginal's head," by Tom Roberts.

### WATER-COLOR DRAWINGS.

British.—Classic Landscape, by George Barrett.

Foreign.—Birches (pastel), by N. Marechal.

Australian.—"Jervis Bay," by A. N. Fullwood. "Kangaroo Valley," by A. N. Fullwood. "The Cathedral Rocks," by A. N. Fullwood. "The Season of Mists," by B. E. Minns. "Bathurst Plains," by Madame Roth. "Shoalhaven River," by J. R. Ashton. "Stonehenge," by W. Lister Lister. "Graham's Valley," by W. Lister Lister. "Silvery Seas," by A. J. Hanson. "A preliminary puff," by E. Bevan.

### BLACK AND WHITE.

"The French Revolution in 1789" (engraving), by Lamotte. "The meeting of King Solomon and the Queen of Sheba" (photogravure), after E. J. Poynter. "Vale of Tears" (engraving), by Saddler, after G. Doré.

#### STATUARY.

British.—Eleven pieces of marble statuary, purchased from the late ex-Judge Josephson. "The meeting of Jacob and Joseph," by Geo. Tinworth. Bronzed portrait bust, by Ann Dobson.

### NEW SOUTH WALES.

### NAUTICAL SCHOOL-SHIP "VERNON."

(REPORT FOR THE YEAR ENDING 30 APRIL, 1892.)

Presented to Parliament by Command.

The Superintendent, N.S.S. "Vernon," to The Under Secretary of Public Instruction.

Sir,

I have the honor to submit to you the twenty-fifth Annual Report upon the "Vernon," for the year which ended the 30th April last.

- 2. The work of the Institution showed a large increase upon that of the preceding year. The admissions and discharges were much more numerous; the daily average number of boys for the twelve months rose to 230; the greatest number ever on board at one time—251—was attained; and there was an almost daily change in the composition of the ship's company.
- 3. The health of the lads has been good, and no deaths have occurred. During the severe epidemic of influenza, this ship had not a single case. The Institution has always been remarkably healthy, and during the last sixteen years only three deaths have taken place on board, amongst over 2,100 boys. In other cases, chronic disease existed before coming on board.
- 4. I am able to report most favourably concerning the boys' behaviour. Their conduct has been better, than in any former year. As usual, new-comers have composed the bulk of the offenders, as was only to be expected. We have had some awkward cases sent to the ship, of boys, who have been given up as failures by other charitable organisations. One hundred of such lads were on board during the year, but, with a few exceptions, these soon made good progress, and some have since been placed out as apprentices with good results. Of the new-comers, 65 per cent. had been at least once before the Police Courts prior to coming here, and 30 per cent. had appeared three times before the magistrates before their committal to the "Vernon." A few others had even more prior convictions to show. Despite this evidence of unfavourable antecedents, the conduct of the lads has been very good. No abscondings have taken place.
- 5. It is plain from the foregoing paragraph, that the "Vernon" performs reformative, as well as preventive work. Since the establishment of the State Children Relief Department, the ship has become more of a reformatory; the younger and innocent boys being now largely dealt with by the boarding-out system, which is a far better plan, when intelligently carried out, than committing them to Industrial Schools. But there will always be a certain number of youths, who, from various causes, fall into criminal ways, or hover on the verge of criminality. There is not much harm done provided that they are dealt with in time. I have had boys sent to me with seven previous convictions, and with terrible characters. I have seen the same boys rise to positions of trust on board, and ultimately go out as apprentices, and obtain good reports from their employers thereafter. But they require firm handling and constant supervision, without any semblance of prison treatment; and these things are obtained on the "Vernon." The new ship, the "Sobraon," can deal with 600 inmates; and a slight addition to the Industrial Schools Act, would enable boys to be sent to the ship, instead of going to gaol; and would also enable the police to clear the streets of the unruly gangs of youths, who now are such dangerous nuisances.
- 6. Good work has been done in school, and about three hours daily has been spent by every boy under the schoolmasters. Mr. Dakin, assistant master, was appointed early in the year to be chief schoolmaster, and the vacant position was filled by Mr. Leer. The school has considerably improved in every way by the changes. Drill has been systematically carried out. The Inspector of Schools makes the following remarks respecting his examination:—" Drill excellent. The boys were remarkably clean, well behaved, and respectful. The teaching and general management evince attention to duty and arnestness."

7. In addition to the work of drill and school, the following shows the industrial training accomplished:—

- 8. The systematic teaching of swimming continues to produce good results, and the whole school is divided into five classes according to proficiency. Only a few of the latest arrivals compose the class of non-swimmers. The swimming-bath is a spacious well-fitted department, forming part of our land establishment.
- 9. Rational recreation has always been an important feature of the system, and during the year much more has been done in this direction than in former years. Undoubtedly the boys have gained morally and physically by the facilities afforded them for recreation. The Vernon Athletic and Swimming Club is a flourishing institution, and is closely pressed in popularity by the Vernon Cricket Club. Both of these, as is also the Liedertafel, are managed by committees of the boys, who show considerable intelligence in this respect. The shore gymnasium has been added to during the year, and is now a spacious, very complete affair. Rewards for, and inducements to, good conduct, have consisted of eligibility for membership to the above clubs, participation in the harbour excursions on alternate Saturdays, admission to library and various entertainments, and occasional visits to Sydney and the suburbs under my personal guidance. The Hon. George Coppin, M.P., Victoria, entertained 230 boys at Her Majesty's Theatre, and on two occasions, they visited the Theatre Royal, and the American Circus through the kindness of Messrs. Musgrove, Goodman, and Sells.
- 10. On the 16th June his Excellency the Governor and the Countess of Jersey entertained the boys at Government House. On the Queen's Birthday Sir Henry and Lady Parkes entertained them at their residence, Balmain. On both occasions happy days were spent, which the boys will long remember.
- 11. Respecting the lads who have left the ship as apprentices, and who are in the second stage of the system—practically free while all goes well, but liable to be brought back at any time if matters do not progress satisfactorily—I am glad to say that more than 92 per cent. have received favourable reports. Some of these lads have been away five years from the "Vernon," and have comfortable sums of £30 and upwards to their credit in the bank. Seven of these boys, on recently completing their apprenticeship, drew nearly £50 each. The police have, as hitherto, rendered most valuable assistance in supervising these youths, and they have done this in a quiet, tactful way of the most valuable kind. With few exceptions, I have corresponded with every one of these apprentices—one lad wrote to me twenty-seven times—and, although the letters replied to, amounted to a great number, I am sure that much benefit was the result and that it more than repaid the work.
- 12. Frequent visits have been paid to their old ship by young men, at one time or other boys on board since establishment in 1867. Since the 1st January last until the time of writing this—a period of six months—211 visits have been made, or letters written to me, by these men, who are, of course, in no way under my legal control, although they still keep up communication with us here. One left the ship as long ago as 1868, when he was 16 years old. He is now a man of 40, who has for a very long time occupied a responsible situation in the Public Service. Another man, who left here in 1873, wrote to me in the friendliest way two days ago, and was quite pleased to tell me respecting a well-deserved promotion he had received. Numbers of such cases are on record, and they are interesting, not only as showing practical evidence of the ship's work, but also as showing the good feeling, which undoubtedly exists between old boys and officers.

- 13. On Sundays the boys landed and marched to their respective places of worship, when the weather was fine; and when this could not be done, service took place aboard. In addition to the ordinary religious exercises on the ship, instruction has been conducted by Mrs. Ford, Miss Fitzhardinge, and the Rev. W. Charlton in the case of the Protestants; and by the Rev. E. Corcoran, the Rev. J. Hagarty, and the Sisters of St. Joseph on behalf of the Roman Catholics. All of these ladies and gentlemen act in an honorary capacity, and are entitled to our sincere thanks for their earnest and valuable labours.
- 14. Lectures have been given, illustrated by the institution's oxy-hydrogen lantern, by Messrs. Haviland, C. Smith, Ritchie, and Dakin. Periodicals and books have been presented by Miss Levey; the Committee of the Band of Mercy; the proprietors of the Illustrated Sydney News; and the proprietors of the Town and Country Journal; and gifts of various kinds have been given by the Hon. W. J. Lyne; his Honor Judge Fitzhardinge; and others.
- 15. The experiment of allowing and encouraging the keeping of various birds, dogs, and other pets on board, proved so successful last year, that a considerable extension has taken place in this direction. It is satisfactory to report, that not one case of cruelty took place towards these creatures in the year. In December last seventeen boys gained prizes for essays written by them on "The Habits and Instincts of Animals," "Kindness to Dumb Animals," and kindred subjects, the prizes being awarded by the N.S.W. Band of Mercy, and presented at the annual meeting of the society, held at the Town Hall under the presidency of the Hon. F. B. Suttor, Minister of Public Instruction.
- 16. I desire once more to invite attention to the continued support which has been afforded me by the officers. They have performed their duties cheerfully, and well under circumstances of some discouragement, owing to the discomfort experienced through the dilapidated state of the institution.
- 17. As this will be the last report concerning the present vessel, I have dwelt at greater length than usual concerning its operations. During its career of a quarter of a century it has dealt with 2,656 boys, more than half of which number came under its control during the last eight years. During the whole twenty-five years, only eleven deaths occurred on the ship, or in hospital; and, with the exceptions of two epidemics of measles and scarlet fever, experienced in the early period of the "Vernon's" existence, when most of the deaths took place, the general health has been remarkably good. Little misconduct of a serious kind has occurred, and riots, mutinies, and incendiary attempts, which are so frequent in kindred establishments, have been absent from our history. Some of the ex inmates have gone to the bad, as could only have been expected, but these have been few in number. For instance, the Comptroller-General of Prisons reports that twenty ex "Vernon" boys were convicted during the year out of 2,395 who have left the ship during the twenty-five years of its establishment. This is only 1.2 per cent. In the Home Institutions the percentage of ex Reformatory boys who had been convicted during the last year reported upon was 1.8. And 1.8 is about the proportion of the total convictions in this Colony to the entire male population.
- 18. The usual statistics are appended. Table C will show that want of parental control is the principal cause of juvenile vagrancy and crime.

I have, &c., FREDK. W. NEITENSTEIN, Commander and Superintendent.

### NEW SOUTH WALES.

### ${f MUNICIPALITIES}.$

(ASHFIELD FREE PUBLIC LIBRARY.-BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Tic. Ao. 12, sec. 158.

Department of Public Instruction Sydney, 14th April, 1893.

THE following By-laws, for the regulation of the Free Public Library at Ashfield, which have been made by the Municipal Council of Ashfield, and confirmed by His Excellency the Lieutenant-Governor in Council, are published in accordance with the "Municipalities Act of 1867."

F. B. SUTTOR.

## BY-LAWS FOR THE REGULATION OF THE FREE PUBLIC LIBRARY AT ASHFIELD.

BY-LAWS FOR THE REGULATION OF THE FREE PUBLIC LIBRARY AT ASHFIELD.

1. The Library and Reading-room shall be open to the public every evening from 7 to 9 o'clock, except public holidays.

2. Any person who, being intoxicated, shall enter such Library or Reading-room shall be at once removed from the premises. Any person who shall use therein any abusive, improper, or unbecoming language, or who shall, by unnecessarily loud talking, or by any noise or otherwise disturb or annoy the persons using or resorting to such Library or Reading-room, or who shall, without lawful excuse, remove any property from such Library or Reading-room, shall forfeit and pay any sum not exceeding ten pounds; and any such person may forthwith be removed by any officer of the Council in charge of such Library or Reading-room.

3. Any ratepayer, or any member of his or her family over sixteen years of age, may obtain from the Librarian, on a written order from any Alderman, and depositing with the Librarian the sum of 2s. 6d., not more than one volume at a time of any work in the Library, and retain the same for any period not exceeding fourteen days, provided he or she makes known to the Librarian the title of the work he or she may desire to take away; but works labelled "New" shall not be retained for a longer period than seven days.

4. Any person desiring to retain a book for a longer period may renew the loan on making such desire known to the Librarian at the expiration of fourteen days, provided no other person shall have expressed a wish to have the book in the meantime. Every person who shall retain a book longer than the specified time shall be fined 3d. for the first seven days, and

meantime. Every person who shall retain a book longer than the specified time shall be fined 3d. for the first seven days, and

6d. for each and every additional seven days.

5. Every person desiring to renew a book must produce his or her ticket, as no book will be issued except upon the production of a duly authorised ticket.

6. Any person losing his or her ticket will be held responsible

by the use of such ticket by any other person.

7. Folding down the leaves, writing in, marking, tearing, or making dirty any book or books will render the borrower liable to have his or her ticket cancelled, and also liable to a fine not exceeding 40s., or proceeded against as the law directs.

8. All publications received from the Government Printing

Office and books purchased with the Government grant, also certain books marked "R," shall not be considered within the

class of books persons may borrow. No periodical shall be considered within the class "L" until it shall be on the Library table for one month.

- 9. In all cases where books or other subject matters of reference shall be in use by any person or persons and shall have been applied for by others, it shall be the duty of the Librarian to make an entry of such applications as they occur, and to supply the applicants in accordance with the order of such entry. such entry.
- 10. Every person who may have received from the Librarian or his Assistant any book or other subject of reference soever shall, immediately on the completion of his or her study, examination, or perusal thereof, return the same to the officer from whom it was received, and shall not under any circumstances hand it for further use to another. stances hand it for further use to another.
- 11. Any donation of books, documents, or money made to or for the use of the Library may be handed to the Librarian, to members of the Committee, or to the Council, and shall, in case of a money donation, be forthwith paid to the credit of the Free Library Account at the Ashfield branch of the Australian Joint Stock Rank Joint Stock Bank.
- 12. It shall be the duty of the Librarian to report at every meeting of the Library Committee any infraction of the Rules, or any injury to the books.
- 13. Any ratepayer may propose books for addition to the Library on entering the titles, price, and other particulars in a book to be kept for that purpose.
- 14. The Library shall be closed annually from the 15th to the 30th November inclusive, and all books must be returned to the Library on or before the first-mentioned date, or be subject to the fine as being overdue.
- 15. The foregoing Rules shall be printed, framed, and suspended in the Library room for the information of visitors.

Passed by the Municipal Council of the Borough of Ash-field, on the eleventh day of October, in the year of our Lord one thousand eight hundred and ninety-two. (Signed) ALBERT BROWN,

Mayor.

(Signed) THOS. GLASSOP, Council Clerk.

(L.S.)
